FIRST FINANCIAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

PART I - FINANCIAL INFORMATION

1 - Basis of Presentation

The financial information included herein for First Financial Corporation, and all of its wholly owned subsidiaries (the "Company") is unaudited; however, such unaudited information reflects all adjustments which are, in management's opinion, necessary for a fair presentation of the financial position, results of operations and statement of cash flows for the interim periods. In preparing these financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and revenue and expense for the period. Actual results could differ significantly from those estimates.

As more fully discussed in the Annual Report Form 10-KSB for the year ended December 31, 2002, effective July 31, 2002, the Company acquired all of the outstanding common stock of First Preference Mortgage Corp. ("FPMC") so that the Company directly owns 100% of the capital stock of FPMC. FPMC was a third-tier subsidiary of Key Group, Ltd. ("Key Group"), a Texas Limited Partnership, which the Company owned an approximately 53% interest. The Company's consolidated statements of income include the revenue and expense of Key Group for the period January 1, 2002 to June 30, 2002 and the revenue and expense of FPMC for the period January 1, 2003 to June 30, 2003. The minority interest in net loss for the six months ended June 30, 2002 represents the ownership of other entities in the net loss of Key Group.

The results of operations and changes in cash flow for the six-month period ended June 30, 2003 are not necessarily indicative of the results to be expected for the full year or any future period.

Certain reclassifications were made to prior periods to ensure comparability with the current period.

2 - Earnings Per Share

Earnings per common share were computed by dividing net income by the weighted average number of shares outstanding during the period.

3 - Income Taxes

Income taxes are provided for the tax effects of transactions reported in the financial statements and consist of taxes currently due plus deferred taxes related primarily to differences between the basis of the loan loss reserve for financial and income tax reporting. The deferred tax assets and liabilities represent the future tax return consequences of those differences, which will either be taxable or deductible when the assets and liabilities are recovered or settled. Deferred taxes also are recognized for operating losses that are available to offset future taxable income and tax credits that are available to offset future federal income taxes. The Company has approximately \$6,000,000 in available net operating loss carryforward benefits for financial statement purposes to offset future income, if any. A valuation allowance has been provided for all tax benefits.

4 - Contingencies

Substantially all of the conventional pools of manufactured home loans serviced by the Company, approximately \$315,000 at June 30, 2003, were sold to investors with recourse. The recourse provisions typically require the Company to repurchase delinquent loans at the unpaid balances plus accrued interest, or replace delinquent loans with another loan which is current. Further, several of the agreements require the Company to establish and maintain cash reserve accounts. Deposits are periodically made to the accounts equal to a specified percent of the outstanding loans. The accounts may be used to cover deficiencies from foreclosure and liquidation of delinquent pooled mortgage loans. Such cash reserve accounts totaled \$4,495 and are included in restricted cash at June 30, 2003.

Item 2. Management's Discussion and Analysis of Results of Operations and Financial Condition

Results of Operations

The Company had net income of \$1,120,383 for the six months ended June 30, 2003 compared to a net loss of (\$352,881) for the same period in 2002. Loan administration revenues were \$6,931,276 for the first six months for 2003 compared to \$2,886,704 for the same period of 2002. The increase in loan administration revenues is the result of increased loan origination fees from the Company's residential mortgage loan operations. During the six months ended June 30, 2003, FPMC funded approximately \$409.5 million in new residential mortgage loans compared to approximately \$254.2 million during the same period in 2002. In addition, the revenues from the sale of the mortgage loans to governmental and private investors increased by approximately \$2.8 million for the six months ended June 30, 2003 compared to the same period in 2002. This increase is due to a significant improvement in the net margins realized on the sale of these mortgage loans and a \$145.1 million increase in the amount of mortgage loans sold during the period. The net margins realized during the first quarter of 2002 were decreased due to the unstable market conditions that prevailed during the period.

For the six months ended June 30, 2002, Key Group had a net loss of (\$892,477). The Company's share of the net loss of Key Group was (\$472,442) for the six months ended June 30, 2002. The minority interest in the net loss of Key Group amounted to \$419,991 for the six months ended June 30, 2002. The minority interest represents the ownership of other entities in the Key Group net loss. As a result of transactions previously discussed that took place in July 2002, Key Group was dissolved and FPMC is now 100% directly owned by the Company.

For the six months ended June 30, 2003, FPMC had net income of \$710,211 resulting from loan originations fees and revenues from the sale of mortgage loans for the six months ended June 30, 2003 as described above.

Interest income for the six months ended June 30, 2003 amounted to \$1,448,497 compared to \$877,625 for the same period in 2002. This increase is primarily due to the approximate \$155.3 million increase in loan originations from 2003 to 2002, as discussed above. FPMC earns interest from the date the mortgage loan is closed until the date the mortgage loan is sold to investors.

Other income for the six months ended June 30, 2003 amounted to \$676,689 compared to \$606,353 for the same period in 2002. This increase is primarily due to increased fees earned under fronting and reinsurance agreements

Salaries and related expenses increased to \$3,683,645 for the six months ended June 30, 2003, compared to \$2,719,543 for the six months ended June 30, 2002. This increase is primarily due to the overall increase in the volume of new residential mortgage loans originated during the six months ended June 30, 2003 compared to the same period in 2002 as previously discussed.

For the six months ended June 30, 2003, interest expense amounted to \$1,188,928 compared to \$528,761 for the same period in 2002. The significant increase in interest expense for the six months ended June 30, 2003 is primarily the result of increased utilization of the warehouse line of credit and loan participation agreements due to the previously discussed increase in loan origination volume. During this period, the weighted average interest rate on the Company's financing of its mortgage lending activities increased to approximately 4.62% compared to approximately 4.41% for the same period in 2002.

Other operating expenses for the six months ended June 30, 2003 were \$3,063,506 compared to \$1,895,044 for the same period in 2002. This increase is primarily due to the overall increase in the volume of new residential mortgage loans originated during the six months ended June 30, 2003 compared to the same period in 2002 as previously discussed.

The consolidated statements of income for the six months ended June 30, 2002 reflect equity in the net loss of affiliates of (\$206). As more fully discussed in the Annual Report Form 10-KSB for the year ended December 31, 2002, the Company exchanged its interest in affiliates in acquiring all of the outstanding common stock of FPMC effective July 31, 2002.

Other comprehensive income consists of unrealized holding gains (losses) on marketable investment securities net of income taxes. For the six months ended June 30, 2003, unrealized holding gains amounted to \$14,337 compared to unrealized holding losses of (\$36,692) for the six months ended June 30, 2002.

Financial Condition

At June 30, 2003, the Company's total assets were \$45,713,331 compared to \$37,474,947 at June 30, 2002. Included in the Company's total assets at June 30, 2002, are the assets of Key Group which amounted to \$34,454,284. The Key Group assets at June 30, 2002 consisted primarily of cash and cash equivalents of \$470,454, mortgage loans of \$31,063,915, property and equipment of \$965,426 and accounts receivable, prepaid expenses and other assets of \$1,954,489. The minority interest in the net assets of Key Group at June 30, 2002 amounted to \$1,151,549.

On consolidated basis, cash and cash equivalents (including restricted cash) were \$3,802,598 at June 30, 2003. Included therein was cash and cash equivalents of Apex Lloyds Insurance Company of \$856,171 and First Apex Re of \$395,923. The cash flow of Apex Lloyds Insurance Company and First Apex Re are only available to the Company as allowed by state insurance regulations.

As more fully discussed in the Annual Report Form 10-KSB for the year ended December 31, 2002, FPMC has a mortgage warehouse line of credit with a financial institution totaling \$45,000,000 which expired April 30, 2003. On April 9, 2003, the maturity date was extended to May 31, 2003. On April 30, 2003, the maturity date was extended to July 31, 2003 and the amount of the line of credit increased to \$50,000,000. On July 31, 2003, the maturity date was extended to August 31, 2003. This agreement includes certain financial covenants including requirements to maintain FPMC stockholders' equity above \$3,600,000 and adjusted-tangible-net worth above \$3,400,000. Also, FPMC's total liabilities to adjusted tangible net worth may never exceed 15 to 1. On June 9, 2003, FPMC entered into a loan participation agreement in the amount of \$10,000,000 with this financial institution. Under this agreement, the financial institution has the option to purchase an undivided interest in the residential mortgage loans originated by FPMC. When the subject mortgage is sold in the secondary market, the financial institution recoups its investment plus a specified yield on its investment. At June 30, 2003, no participations were outstanding under this agreement.

In addition, FPMC has a loan participation agreement with another financial institution, which is a related party by common ownership, amounting to \$17,500,000. Under this agreement, the financial institution has the option to purchase an undivided interest in the residential mortgage loans originated by FPMC. When the subject mortgage loan is sold in the secondary market, the financial institution recoups its investment plus a specified yield on its investment. At June 30, 2003, \$14,710,657 in participations were outstanding under this agreement.

Item 3. Controls and Procedures

Within the 90 days prior to the filing of this report, the Company evaluated the effectiveness of the design and operation of its disclosure controls and procedures.
