CHINA PHARMA HOLDINGS, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2007
(unaudited)

NOTE 1 - BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements of China Pharma Holdings, Inc. (the Company) and its subsidiaries were prepared pursuant to the rules and regulations of the United States Securities and Exchange Commission. Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations. Management of the Company (Management) believes that the following disclosures are adequate to make the information presented not misleading. These condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and the notes thereto included in the Company's Form 10-KSB report for the year ended December 31, 2006.

These unaudited condensed consolidated financial statements reflect all adjustments (consisting only of normal recurring adjustments) that, in the opinion of Management, are necessary to present fairly the consolidated financial position and results of operations of the Company for the periods presented. Operating results for the six months ended June 30, 2007 are not necessarily indicative of the results that may be expected for the year ending December 31, 2007.

Organization - Onny Investment Limited (Onny) was incorporated in the British Virgin Islands on January 12, 2005 and was a development stage enterprise through June 15, 2005. On June 16, 2005, Onny acquired all of the outstanding shares of Hainan Helpson Medical & Biotechnology Co., Ltd, a privately held Chinese joint venture (Helpson) and emerged from the development stage.

On October 19, 2005, Onny was reorganized as a wholly owned subsidiary of China Pharma Holdings, Inc., formerly TS Electronics (the Company).

Edgar Filing: CHINA PHARMA HOLDINGS, INC. - Form 10QSB

Nature of Operations - Helpson manufactures and markets several Western and Chinese medicines sold mainly to hospitals and private retailers in The People's Republic of China (PRC), through its marketing department located in Hainan Province. There are also nine other offices, with sales representatives in other provinces and cities throughout the PRC. Helpson's other operating activities include biochemical products, health products, and cosmetics.

Accounting Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Basic and Diluted Earnings per Common Share - Basic and diluted earnings per common share are computed by dividing net income by the weighted-average number of common shares outstanding. As of June 30, 2007 potentially dilutive securities includes warrants outstanding to purchase a total of 1,252,941 shares

4

of Company common stock at an exercise price of \$2.38 per share. These are not included in the computation of fully diluted earnings per share as the effect is anti-dilutive due to the exercise price of the warrants exceeding the market price of the stock at June 30, 2007. There are no anti-dilutive securities outstanding at June 30, 2006.

Recently Issued Accounting Pronouncements - In September 2006, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements (SFAS 157), which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and requires additional disclosures about fair value measurements. SFAS 157 aims to improve the consistency and comparability of fair value measurements by creating a single definition of fair value. The Statement emphasizes that fair value is not entity-specific, but instead is a market-based measurement of an asset or liability. SFAS 157 upholds the requirements of previously issued pronouncements concerning fair value measurements and expands the required disclosures. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, however earlier application is permitted provided the reporting entity has not yet issued financial statements for that fiscal year. The Company does not believe that the adoption of SFAS 157 will have a material effect on its consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment of FASB Statement No. 115 (SFAS 159). This pronouncement permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. SFAS 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The impact of adopting SFAS 159 on the Company's consolidated financial statements, if any, has not yet been determined.

NOTE 2 - INVENTORY

Inventory consisted of the following:

Edgar Filing: CHINA PHARMA HOLDINGS, INC. - Form 10QSB

	June 30, 2007	December 31, 2006
Raw materials	\$ 9,293,117	\$ 8,458,181
Work in progress	57,942	1,579,410
Finished goods	3,040,527	240,296
Total Inventory	\$ 12,391,586	\$ 10,277,887

NOTE 3 - INCOME TAXES

The Company accounts for its income taxes in accordance with SFAS No. 109, which requires recognition of deferred tax assets and liabilities and their respective tax bases and any tax credit carry forwards available. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

According to federal law in the People's Republic of China (PRC), enterprises with foreign investment and foreign enterprises doing business in the PRC are generally subject to federal enterprise income tax at a rate of 30%. Effective at the beginning of 2006 and extending through 2007, the PRC granted the Company

5

a tax holiday that allows the Company to be exempt from income taxes for the first two profitable years. This tax holiday further allows the Company to be exempt from 50% of income taxes during the third through the fifth years. The reduced tax rate for 2008 through 2010 is 15%. Additionally, Hainan province is considered a developing economic region which has a reduced statutory tax rate of 15%, which results in a tax holiday rate of 7.5% during the third through the fifth years of profitability.

The Company has a deferred tax asset based upon the temporary differences from the allowance for bad debt. The Company has also incurred various other taxes, comprised primarily of business taxes, value-added taxes, urban construction taxes, education surcharges and others. Any unpaid amounts are reflected on the balance sheets as accrued taxes payable.

NOTE 4 - NOTES PAYABLE

Short Term Notes Payable - During the third quarter of 2006, the Company borrowed a total of \$2,196,113 from a bank. The loans bore interest with a range of 6.45% to 6.77%, principal and accrued interest were due July and August of 2007 and were collateralized by land use rights, machinery and equipment. On July 13, 2007 the Company renewed the loans with the bank. The renewed loan principal and accrued interest are due on April 25, 2008.

Edgar Filing: CHINA PHARMA HOLDINGS, INC. - Form 10QSB

Short Term Notes Payable to Former Shareholders - In January 2006, the Company converted its dividend payable of \$4,402,147 into short-term notes bearing interest at a rate of 2.25% per annum. As of June 30, 2007 these notes and accrued interest remain outstanding.

NOTE 5 - STOCKHOLDERS' EQUITY

On February 1, 2007, the Company completed an offering of units priced at \$1.70 per unit consisting of one share of Company common stock and a warrant to purchase one-half of a share of Company common stock at an exercise price of \$2.38 per share. The Company received gross proceeds in the aggregate amount of \$4,259,900. The net proceeds, after deduction of related offering expenses of \$462,717 amounted to \$3,797,183. The Company issued an aggregate of 2,505,882 shares of common stock and issued three-year warrants to purchase an aggregate of 1,252,941 shares of Company's common stock to 17 accredited investors. The proceeds were allocated to the warrants based upon their fair value or \$2,010,219, and the balance of the proceeds was allocated to the shares of common stock. The fair value of the warrants, determined using the Black-Scholes Option Pricing Model, was calculated using the following assumptions: risk free interest rate of 4.80%, expected dividend yield of 0%, expected volatility of 124.39% and an expected life of 3 years.

The common shares and the shares underlying the warrants have registration rights and, accordingly a registration statement was filed with the Securities Exchange Commission on March 30, 2007 within the 60 day period prescribed by the registration rights agreement. The registration statement was declared effective on May 4, 2007.

NOTE 6 - TRANSFERS OF TECHNOLOGY

During the first quarter of 2007, the Company entered into agreements to sell certain pharmaceutical formulas presently in the research and development stage with two separate transactions to third parties for an aggregate sales price of \$1,479,792 which is recorded as other income, transfer (sales) tax of \$73,990, which has been recorded as part of general and administrative expenses and \$836,404 recorded as research and development expense in the accompanying statement of operations and comprehensive income for the six months ended June

6

30, 2007. The amounts due under the contracts were collected during the second quarter of 2007.

NOTE 7 - CONTINGENCIES

Economic environment - Significantly all of the Company's operations are conducted in the PRC, and therefore the Company is subject to special considerations and significant risks not typically associated with companies operating in the United States of America. These risks include, among others, the political, economic and legal environments and fluctuations in the foreign currency exchange rate. The Company's results may be adversely affected by changes in the political and social conditions in the PRC, and by changes in governmental policies with respect to laws and regulations, anti-inflationary measures, currency conversion and remittance abroad, and rates and methods of taxation, among other things.

In addition, all of the Company's revenue is denominated in the PRC's currency

Edgar Filing: CHINA PHARMA HOLDINGS, INC. - Form 10QSB

of Renminbi (CNY or (Y)), which must be converted into other currencies before remittance out of the PRC. Both the conversion of CNY into foreign currencies and the remittance of foreign currencies abroad require approval of the PRC government.

Item 2. Management's Discussion and Analysis or Plan of Operation

The following discussion should be read in conjunction with China Pharma Inc.'s consolidated financial statements and related notes included elsewhere in this Current Report on Form 10-QSB.

This filing contains forward-looking statements. The words "anticipated", "believe", "expect", "plan", "intend", "seek", "estimate", "project", "could", "may" and similar expressions are intended to identify forward-looking statements. These statements include, among others, information regarding future operations, future capital expenditures, and future net cash flow. Such statements reflect China Pharma management's current views with respect to future events and financial performance and involve risks and uncertainties, including but not limited to changes in general economic and business conditions, changes in foreign, political, social, and economic conditions, regulatory initiatives and compliance with governmental regulations, the ability to increase market share, and various other matters, many of which are beyond China Pharma's control. Should one or more of these risks or uncertainties occur, or should underlying assumptions prove to be incorrect, actual results may vary materially and adversely from those anticipated, believed, estimated or otherwise indicated. Consequently, all of the forward-looking statements made in this filing are qualified by these cautionary statements and there can be no assurance of the actual results or developments.

I. The Six Months Ended June 30, 2007 In Brief

During the six months ended June 30, 2007, China Pharma continued to show sound growth and outstanding financial performance. For the six months ended June 30, 2007, the Company's total revenue increased by over 81.46% to a record high of \$15.8 million compared to \$8.7 million for the six months ended June 30, 2006. This rapid growth was due to increased sales of existing products and the products that were developed during the second half year of 2006. This was consistent with China Pharma's strategy of launching new products in an increasingly competitive market and exploring potential domestic markets.

7

The financial performance for the six months ended June 30, 2007 improved compared to the six months ended June 30, 2006. Gross profit increased 76.53% to \$7.2 million and net income, not including foreign currency translation adjustment, increased 67.57% to \$5.7 million. This growth was attributable to the development of new product processes and new marketing activities.

For the six months ended June 30, 2007, earnings per common share increased 58.18% to \$0.15 per share compared to \$0.10 per share for the six months ended June 30, 2006. China Pharma started working closely with a variety of professional pharmaceutical research institutions to deliver more functional products tailored to the demands of the end-user. Management's goals are

Edgar Filing: CHINA PHARMA HOLDINGS, INC. - Form 10QSB

centered on achieving stable profit growth. Accordingly, we operate the business based on strategic principles, which have proven successful. Thoroughly exploring the potential in the pharmaceutical field is the key to our success.

We are also concerned with corporate governance as a modern enterprise. In the near future, we will establish a more systematic and long lasting internal controls process for prospective development and the benefit of our shareholders.

II. Business Overview

China Pharma is primarily engaged in the research, development, manufacture, and marketing of pharmaceutical and nutritional supplements. During 2006, we launched two new products, Ozagrel Sodium for Injection and Gastrodin Injection.

We plan to expand our biotechnology product series. Based on the foundation established by some of Helpson's widely recognized medicine labels such as Neurotrophicpeptide, we have launched and will continue to launch a variety of biological medicine, including the injected hepatocyte growth-promoting factors, which are expected to fuel additional growth beyond that of Neurotrophicpeptide.

One of our products, Buflomedil Hydrochloride (including raw material, injection and troche) has been recognized in the following ways:

- o Designated as the key technology project in Hainan in 2003 by Hai'kou Municipality.

- o Received the best commercialized technology award in Hainan in 2004 by Hainan Scientific and Technological Result Examination Committee.

- o Awarded the national key new products certificate in 2003 by the State Science and Technology Department, State Taxation Bureau, Ministry of Commerce, State Bureau of Quality Supervision, Inspection and Quarantine, and State Environmental Protection Bureau.

In 2003, Helpson attained GMP authentication and the prize as the best enterprise for supporting SARS medicine awarded by Hainan Food and Drug Administration, demonstrating our industry leadership. For the six months ended June 30, 2007, our products have been distributed to more than 29 provinces, sovereignties, and autonomous regions around China. Our products have been sold in more than 29 provinces, sovereignties, and autonomous regions. We have 16 sales offices and approximately 550 proxy agents throughout the PRC. The main

channels we use to deliver our products are as follows: (1) Distribution system (Proxy Agents); (2) Direct sale system to hospitals; (3) Distribution of products to end-market through local medical companies.

Onny Investment Limited (Onny) was incorporated in the British Virgin Islands on January 12, 2005 and was a development stage enterprise through June 15, 2005. On June 16, 2005, Onny acquired all of theF outstanding shares of Hainan Helpson Medical & Biotechnology Co., Ltd, a privately held Chinese joint venture (Helpson) and emerged from the development stage. On October 19, 2005, Onny was reorganized as a wholly owned subsidiary of China Pharma Holdings, Inc. formerly

Edgar Filing: CHINA PHARMA HOLDINGS, INC. - Form 10QSB

TS Electronics, (the Company).

Additionally, on February 1, 2007, China Pharma fulfilled a fund raising equity offering of units priced at \$1.70 each consisting of one share of common stock and a warrant to purchase one-half of a share of common stock at an exercise price of \$2.38 per share. China Pharma received gross proceeds in the aggregate amount of \$4,259,900. The net proceeds, after deducting the related offering expenses of \$462,717 amounted to \$3,797,183. In total, we issued 2,505,882 shares of common stock and issued three-year warrants to purchase an aggregate of 1,252,941 shares of common stock to 17 accredited investors.

III. Trend in the Market.

Studies show that due to the expansion and aging of the world's population, ever-growing numbers of people have age-related diseases, such as cancer, Alzheimer's disease, diabetes and rheumatoid arthritis. These diseases have already become prevalent, especially in developed areas. In a growing and aging population, people need to find more effective methods of treatment.

Patient empowerment has been a factor in high-quality healthcare. Many are better informed about the importance of health issues and medical advancement. Naturally, people today are demanding greater care and access to the latest medical procedures and medicines.

Helpson views this market trend as an opportunity. However, the best way to take advantage of this opportunity is to identify our business risks beforehand. Generally speaking, there are three aspects of risks:

o External Risk

In recent years, the Chinese medical system has been reformed, resulting in the State Department's establishment of a basic medical insurance system for employees. Considering the social environment and the governmental policy in the pharmaceutical industry in PRC, a large increase in sales can be expected due to local government involvement in the industry. Competition will also be strong across the industry overall. Currently, the Company's existing products are competitive in the market and possess growth potential. However, from a long-term perspective, some major western medicine producers are also seeking Chinese market share. This will make the Company face strong competition in the natural medicine market sector.

o Operation Risk

One of the major uncertainties in the Company is the purchase of raw materials. Raw materials are primarily affected by the geographical, island environment of

Hainan Province. Because of high transportation costs and the need to supply production requirements, the Company has to store large amounts of inventory to maintain consistent production levels. In addition, partial raw materials need to be specially ordered which further increases the need to store inventory. Finally, due to the increasing sales, the Company must store a large volume of packaging material.

o Foreign Currency Risk

Substantially all of our operations are conducted in the PRC. Our sales and

Edgar Filing: CHINA PHARMA HOLDINGS, INC. - Form 10QSB

purchases are conducted within the PRC in Chinese Renminbi. As a result, the effect of the exchange rate fluctuation would inevitably be considered to be material to our business operations.

All of our revenues and expenses are accounted for in Renminbi. But we use the United States dollar (USD) for financial reporting purposes. Conversion of Renminbi into foreign currencies is regulated by the People's Bank of China through a unified floating exchange rate system. Although the PRC government has stated its intention to support the value of the Renminbi, there could be no assurance that such exchange rate will not become volatile again or that the Renminbi will not devalue significantly against the USD. Exchange rate fluctuations may adversely affect the value, in USD terms, of our net assets and income derived from its operations in the PRC.

IV. Analysis to the Financial Performance

The following table presents the operations of the Company for the three months ended June 30, 2007 and June 30, 2006; both are denominated in USD.

Analysis for the Three Months Ended June 30, 2007

Revenues

Revenues increased to approximately \$8.57 million for the three months ended June 30, 2007 as compared to approximately \$3.98 million for the three months ended June 30, 2006. This represents an increase of approximately \$4.59 million or 115.57%. This increase was due largely to the increased sales of new products for the three months ended June 30, 2007. In the second quarter, PuSenOK (TM), a Gastrodin injection, which reached the market expectation, increased market share and increased revenues by approximately \$1.18 million more than the

corresponding period in 2006. In addition, the mature products of Cefaclor dispersible tablets and Neoandrographolade (Chinese plant medicine) revenues dramatically increase by \$1.14 million in the second quarter. The new products of Hepatocyte growth-promoting factor for injection, Ozagrel, a Granisetron Hydrochloride injection which was issued after June 2006 boosted the revenue by \$1.32 million. On the other hand, because of Chinese medical control, the medicine market is a good marketing environment. The distribution network has been further developed over a majority of the 29 provinces or regions in China. Furthermore, with the improvement of production capacity, a significant increase in sales has been made possible by an increased yield capacity, both in new and existing products.

Cost of Revenue

Edgar Filing: CHINA PHARMA HOLDINGS, INC. - Form 10QSB

Cost of revenue for the three months ended June 30, 2007 was approximately \$4.67 million or 54.50% of revenues as compared to \$2.10 million or 52.95% of revenues for the three months ended June 30, 2006. The increased cost of revenue was due primarily to the increased revenue for the three months ended June 30, 2007.

Gross Profit

Gross profit for the three months ended June 30, 2007 was approximately \$3.90 million or 45.50% of revenues as compared to \$1.87 million or 47.05% of revenues for the three months ended June 30, 2006. The gross profit for the three months ended June 30, 2007 was higher than that for the corresponding period by \$2.03 million, representing a 108.48% increase. The increase was primarily due to the higher revenue for the three months ended June 30, 2007.

Selling Expenses

Selling expenses have increased due to an increase in distribution cost. Relative to the total operating expenses, selling expenses accounted for approximately 61% of total operating expenses for the three months ended June 30, 2007. The two reasons are the expense for the printing and distributing of throwaway materials increased and increased salary, travel, and office expenses from employing 35 additional sales representatives.

General & Administrative Expenses

General and administrative expenses decreased from approximately \$0.4 million for the three months ended June 30, 2006 to approximately \$0.2 million for the three months ended June 30, 2007. The slight decrease is mainly from the Company spending less on entertainment expenses, travel expenses, and office expenses.

Income from Operations

There was an increase in income from operations from approximately \$1.35 million for the three months ended June 30, 2006 to approximately \$3.37 million for the three months ended June 30, 2007. The increase was primarily due to an increase in capacity and customers for the three months ended June 30, 2007.

Other Income

The amount of other income decreased for the three months ended June 30, 2007. It was approximately \$7,937 which was decrease of 93.43% compared to \$120,803 or 3% of revenues for the corresponding period in 2006. The decrease is from a tax subsidy for the corresponding period in 2006, but no subsidy was received for the three months ended June 30, 2007.

Bad Debt Recovery

For the three months ended June 30, 2006, the Company collected trade receivables which were past due and were accrued in the allowance for bad debt at March 31, 2006, the result was a bad debt recovery of \$627,861 for these trade receivables. For the three months ended June 30, 2007, there were no trade receivables collected that had been previously allowed against.

Edgar Filing: CHINA PHARMA HOLDINGS, INC. - Form 10QSB

Income Tax Expense

For the three months ended June 30, 2007, the Company had no tax expense. The People's Republic of China granted the Company a tax holiday that allowed the Company to be exempt from income taxes in 2007.

Net Income

Net income, excluding the effect of foreign currency translation, was \$3,326,128 for the three months ended June 30, 2007. It was 81.71% higher than the net income of \$1,830,462 for the three months ended June 30, 2006. The corresponding growth in operations resulting in revenue increases caused the cost of revenue and related expenses, as a percentage of total revenues, to increase.

Analysis for the Six Months Ended June 30, 2007

The following table presents the operations of the Company for the six months ended June 30, 2007 and June 30, 2006; both are denominated in USD.

13

Weighted-average common shares outstanding	36,785,909	34,723,056	2,062,853	

Revenues

Revenues increased to approximately \$15.80 million for the six months ended June 30, 2007 as compared to approximately \$8.71 million for the six months ended June 30, 2006. This represents an increase of approximately \$7.09 million or 81.46%. In the second quarter, PuSenOK (TM), a Gastrodin injection, which reached the market expectation, increased market share and increased revenues by approximately \$2.65 million more than the corresponding period in 2006. In addition, the mature products of Cefaclor dispersible tablets and Neoandrographolade (Chinese plant medicine) revenues dramatically increase by

14

\$2.06 million in the second quarter. The new products of Hepatocyte growth-promoting factor for injection, Ozagrel, a Granisetron Hydrochloride injection, which issued after June 2006 boosted the revenue by \$2.72 million. Additionally, because of Chinese medical control, the medicine market runs in a better marketing environment. The distribution network has been further developed over a majority of the 29 provinces or regions in China. Further, with the improvement of production capacity, a significant increase in sales has been made possible by an increased yield capacity, both in new and existing products.

Cost of Revenue

Cost of revenue for the six months ended June 30, 2007 was approximately \$8.61 million or 54.45% of revenues as compared to \$4.63 million or 53.18% of revenues for the six months ended June 30, 2006. The increased cost of revenue was due primarily to the increased revenue for the six months ended June 30, 2007.

Edgar Filing: CHINA PHARMA HOLDINGS, INC. - Form 10QSB

Gross Profit

Gross profit for the six months ended June 30, 2007 was approximately \$7.20 million or 45.55% of revenues as compared to \$4.07 million or 46.82% of revenues for the six months ended June 30, 2006. The gross profit for the six months ended June 30, 2007 was higher than that for the corresponding period by \$3.12 million, representing a 76.53% increase. The increase was primarily due to the higher revenue for the six months ended June 30, 2007.

Selling Expenses

Selling expenses have increased due to an increase in distribution cost. Relative to the total operating expenses, selling expenses accounted for approximately 16.35% of total operating expenses for the six months ended June 30, 2007. The reasons are that the expense for the printing and distributing of throwaway materials increased and due to the salary, travel expenses, and office expenses from employing 35 additional sales representatives.

General & Administrative Expenses

General and administrative expenses increase from approximately \$0.6 million for the six months ended June 30, 2006 to approximately \$1.58 million for the six months ended June 30, 2007. The allowance for doubtful accounts was increased as a result of an increase in trade receivable for the six months ended June 30, 2007.

Research and Development

As one of our strategies, selling certain formulas to other pharmaceutical companies is not an expedient tactic; instead, it is an organic part of our overall strategy for development. We have solid R&D capabilities, and selling some formulas out of our newly developed formulas can make greater profits than otherwise maturing them into final products for marketing. Selling of such formulas won't pose any unfavorable impact upon the Company.

Income from Operations

15

There was an increase in income from operations from approximately \$3.23 million for the six months ended June 30, 2006 to approximately \$4.30 million for the six months ended June 30, 2007. The increase was primarily due to the higher revenue for the six months ended June 30, 2007.

Other Income

The amount of other income increased for the six months ended June 30, 2007. It was approximately \$1.49 million or 9.43% of revenue which was an increase of 1137.37% compared to \$120,461 or 1.38% of revenues for the corresponding period in 2006. The increase came from the sale of the drug formula.

Income Tax Expense

For the six months ended June 30, 2007, the Company had no tax expense. The

Edgar Filing: CHINA PHARMA HOLDINGS, INC. - Form 10QSB

People's Republic of China granted the Company a tax holiday that allowed the Company to be exempt from income taxes in 2007.

Net Income

Net income, excluding the effect of foreign currency translation, was \$5,700,177 for the six months ended June 30, 2007. It was 67.57% higher than the net income of \$3,401,606 for the six months ended June 30, 2006. The corresponding growth in operations resulting in revenue increases caused the cost of revenue and related expenses, as a percentage of total revenues, to increase.

V. Analysis of Fthe Financial Position

Liquidity and Capital Resource

As of June 30, 2007, the Company had cash and cash equivalents of \$2,436,105. This represents a 271.11% increase over the December 31, 2006 balance of \$656,441. During the six months ended June 30, 2007, the proceeds from sale of common stock and warrants increased by approximately \$3,797,183. (Figure 2)

	-----	-----
Cash and Cash Equivalents at End of Period	\$ 2,436,105	\$ 195,224
	-----	-----

Net cash used in operating activities was \$2,003,279 for the six months ended June 30, 2007, nearly twenty times more than the \$102,529 used for the period ended at June 30, 2006. This large decrease was due to the increase in trade account receivable, inventory and advance to suppliers. The collection term of trade account receivable was long relatively in Chinese medicine industry. The Company had to pay in cash to purchase raw materials for production to meet the large amount of sales in the coming half year. Net cash used in investing activities, for purchase of property and equipment decreased to \$25,931 at the end of June 2007. Net cash proceeds for financing activities increased to \$3,797,183 as of June 30, 2007. The increase was primarily due to the proceeds from sale of common stock and warrants.

On February 1, 2007, the Company completed an offering of units priced at \$1.70 per unit consisting of one share of Company common stock and a warrant to purchase one-half of a share of Company common stock at an exercise price of \$2.38 per share. The Company received gross proceeds in the aggregate amount of \$4,259,900. The net proceeds, after deduction of related offering expenses of \$462,717 amounted to \$3,797,183. The Company issued an aggregate of 2,505,882 shares of common stock and issued three-year warrants to purchase an aggregate

of 1,252,941 shares of Company's common stock to 17 accredited investors. The proceeds were allocated to the warrants based upon their fair value or \$2,010,219, and the balance of the proceeds was allocated to the shares of common stock. The fair value of the warrants, determined using the Black-Scholes Option Pricing Model, was calculated using the following assumptions: risk free interest rate of 4.80%, expected dividend yield of 0%, expected volatility of 124.39% and an expected life of 3 years.

The common shares and the shares underlying the warrants have registration rights and, accordingly a registration statement was filed with the Securities Exchange Commission on March 30, 2007 within the 60 day period prescribed by the

Edgar Filing: CHINA PHARMA HOLDINGS, INC. - Form 10QSB

registration rights agreement. The registration statement was declared effective on May 4, 2007.

VI. Off-Balance Sheet Arrangements

There were no off-balance sheet arrangements in the Company.

VII. Commitments

At June 30, 2007, the Company had no material commitments for capital expenditures other than for those expenditures incurred in the ordinary course of business.

VIII. Recently Enacted Accounting Pronouncements

On January 1, 2006, we adopted SFAS No. 151, Inventory Costs - An Amendment of ARB No. 43, Chapter 4 (SFAS 151). SFAS 151 amends the guidance in ARB No. 43, Chapter 4, Inventory Pricing, to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs, and wasted material (spoilage). Among other provisions, the new rule requires that items such as idle facility expense, excessive spoilage, double freight, and re-handling costs be recognized as current-period charges. Additionally, SFAS 151 requires that the allocation of fixed production overhead to the costs of conversion be based on the normal capacity of the production facilities. The effects of adoption of SFAS 151 were not material.

On January 1, 2006, we adopted SFAS No. 123 (revised 2004), Share-Based Payment (SFAS 123R), which revises SFAS No. 123, Accounting for Stock-Based Compensation. SFAS 123R also superseded APB 25, Accounting for Stock Issued to Employees, and amends SFAS No. 95, Statement of Cash Flows. Under SFAS 123R, share-based payments to employees, including the fair value of grants of employee stock options, are recognized in the income statement at their fair value, generally over the option vesting period. The effects of adoption of SFAS 123R were not material.

In December 2004, the FASB issued SFAS No. 153, Exchanges of Non-monetary Assets--An Amendment of APB Opinion No. 29, Accounting for Non-monetary Transactions (SFAS 153). SFAS 153 eliminated the exception from fair value measurement for non-monetary exchanges of similar productive assets in paragraph 21(b) of APB Opinion No. 29, Accounting for Non-monetary Transactions, and replaced it with an exception for exchanges that do not have commercial substance. SFAS 153 specifies that a non-monetary exchange has commercial

substance if the future cash flows of the entity are expected to change significantly as a result of the exchange. The effects of adoption of SFAS 153 were not material.

In June 2005, the FASB issued SFAS No. 154, Accounting Changes and Error Corrections, a replacement of APB Opinion No. 20, Accounting Changes, and FASB No. 3, Reporting Accounting Changes in Interim Financial Statements. Statement 154 applies to all voluntary changes in accounting principle, and changes the

Edgar Filing: CHINA PHARMA HOLDINGS, INC. - Form 10QSB

requirements for accounting for and reporting of a change in accounting principle. Statement 154 requires retrospective application to prior periods' financial statements of a voluntary change in accounting principle unless it is impracticable. It is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. Earlier application is permitted for accounting changes and corrections of errors made occurring in fiscal years beginning after June 1, 2005. The effects of adoption of SFAS 154 were not material.

In June 2005, the FASB Emerging Issues Task Force (EITF) reached a consensus on Issue No.05-6, determining the Amortization Period for Leasehold Improvements. The guidance requires that leasehold improvements acquired in a business combination or purchased subsequent to the inception of a lease be amortized over the lesser of the useful life of the assets or a term that includes renewals that are reasonably assured at the date of the business combination or purchase. The guidance is effective for periods beginning after June 29, 2005. The effects of adoption of EITF No. 05-6 were not material.

In February 2006, the FASB issued SFAS No. 155, accounting for Certain Hybrid Financial Instruments -- an amendment of FASB Statements No. 133 and 140 (SFAS 155). SFAS 155 amends SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities and SFAS No.140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities, and related interpretations. SFAS155 permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation and clarifies which interest-only strips and principal-only strips are not subject to recognition as liabilities. SFAS 155 eliminates the prohibition on a qualifying special-purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. SFAS 155 is effective for the Company for all financial instruments acquired or issued beginning January 1, 2007. The impact of adoption of this statement on the Company's consolidated financial statements, if any, has not yet been determined.

In March 2006, the FASB issued SFAS No. 156, Accounting for Servicing of Financial Assets - an amendment of FASB Statement No. 140 (SFAS 140). SFAS 156 amends SFAS 140 Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities and related interpretations. SFAS 156 requires an entity to recognize a servicing asset or servicing liability each time it undertakes an obligation to service a financial asset. It also requires all separately recognized servicing assets and servicing liabilities to be initially measured at fair value, if practicable. SFAS 156 permits an entity to use either the amortization method or the fair value measurement method for each class of separately recognized servicing assets and servicing liabilities. SFAS 156 is effective for the Company as of January 1, 2007. The impact of adoption of this statement on our consolidated financial statements, if any, has not yet been determined.

IX. Conclusion

The overall performance during the six months ended June 30, 2007 was outstanding. As a public company in the pharmaceutical industry, we focused on product innovation. In order to create products that are innovative and tailored

Edgar Filing: CHINA PHARMA HOLDINGS, INC. - Form 10QSB

to the end user, we must concentrate on R&D. As a result, the Company will continue to actively pursue the development and distribution of high-quality products to the market.

Item 3 - Controls and Procedures

As required by Rule 13a-15 under the Exchange Act, within the 90 days prior to the filing date of this report, the Company carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures. This evaluation was carried out under the supervision and with the participation of the Company's management, including the Company's President and Chief Executive Officer and Chief Financial Officer. Based upon that evaluation, the Company's President and Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective. There have been no significant changes in the Company's internal controls or in other factors, which could significantly affect internal controls subsequent to the date the Company carried out its evaluation.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in Company reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in Company reports filed under the Exchange Act is accumulated and communicated to management, including the Company's Chief Executive and Chief Financial Officer as appropriate, to allow timely decisions regarding required disclosure.

PART II. OTHER INFORMATION

Item 1 Legal Proceedings

From time to time, the company may become involved in various lawsuits and legal proceedings which arise in the ordinary course of business. However, litigation is subject to inherent uncertainties, and an adverse result in these or other matters may arise from time to time that may harm our business. The company is currently not aware of any such legal proceeding or claims that the company believe will have, individually or in the aggregate, a material adverse effect on our business, financial condition or operating results.
