NOTES TO FINANCIAL STATEMENTS

OF DOC HOLLIDAY CASINO, LLC

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

This summary of significant accounting policies of Doc Holliday Casino, LLC (Company) is presented to assist in understanding the Company's financial statements. The financial statements and notes are representations of the Company's management who is responsible for their integrity and objectivity. These accounting policies conform to accounting principles generally accepted in the United States of America and have been consistently applied in the preparation of the financial statements.

Organization

Doc Holliday Casino, LLC (the "Company" or "Doc"), a Colorado single member limited liability company, operates a limited stakes gaming casino in Central City, Colorado.

Use of Estimates and Assumptions

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Significant estimates included herein relate to the recoverability of assets, the value of long-lived assets and liabilities, the value of share based compensation transactions, the long-term viability of the business, the future impact of gaming regulations, and future obligations under various tax statutes. Actual results may differ from estimates.

Risk Considerations

The Company operates in a highly regulated environment subject to the political process.

Our retail gaming license is subject to annual renewal by the Colorado Division of Gaming. Changes to existing statutes and regulations could have a negative effect on our operations. In addition, since the Company has its only

facility in Central City, Colorado, the potential for severe financial impact can result from negative effects of economic conditions within the market or geographic area. This concentration results in an associated risk and uncertainty.

Concentrations of Credit Risk

Financial instruments that potentially subject the company to concentrations of credit risk consist principally of cash and cash equivalents, and accounts receivables. At December 31, 2007 and 2006, the Company had approximately \$0 and \$339,000 respectively of cash or cash equivalents in financial institutions in excess of amounts insured by agencies of the U.S. Government.

Fair Value of Financial Instruments

Fair value estimates discussed herein are based upon certain market assumptions and pertinent information available to management. The Company's financial instruments include cash, accrued gaming income, accounts payable, accrued expenses, other current liabilities and long-term debt. Except for long-term debt, the carrying value of financial instruments approximated fair value due to their short maturities.

The carrying value of long-term debt approximated fair value because stated interest rates on these instruments are similar to quoted rates for instruments with similar risks.

Cash and Cash Equivalents

Cash consists of demand deposits and vault cash used in casino operations. The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents.

Accrued Gaming Income

Gaming income represents the difference between the cash played by customers, and the cash paid out by the casino machines. On a regular basis, the cash representing the casino's revenue is pulled from the machines and deposited. However, this process does not always occur at the end of the last business day of the month. Accrued gaming income represents the amount of revenue (cash) in the machines that has not yet been pulled and deposited at the end of the reporting period. Accrued gaming income at December 31, 2007 and 2006 was \$43,154 and \$0, respectively.

Other Current Assets

Other current assets consist of customer non sufficient funds checks that have been turned over for collection. As of December 31, 2007 and 2006 the Company estimates that one hundred and eighty percent of NSF checks will be ultimately be written off respectively. The receivable and corresponding allowance as of December 31, 2007 was \$28,620 and \$28,620 respectively. As of December 31, 2006 the receivable and corresponding allowance was \$27,935 and \$22,348 respectively.

Property and Equipment

Property and equipment is carried at cost. Depreciation is computed using the straight-line and two hundred percent declining balance methods over the estimated useful lives. The leasehold improvements are depreciated over the life of the lease which is 12 years. Vehicles, equipment,

devices, furniture and fixtures, and signs are depreciated over five to seven years. Depreciation expense for the years ended December 31, 2007 and 2006 was \$285,149 and \$364,061 respectively.

Impairment of Long-Lived Assets

In accordance with Statement of Financial Accounting Standards ("SFAS") No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, the Company evaluates its long-lived assets for impairment when events or changes in circumstances indicate, in management's judgment, that the carrying value of such assets may not be recoverable.

Recoverability of assets to be held and used is measured by a comparison of the carrying value to future undiscounted cash flows expected to be generated by the asset. If such assets are considered impaired, the impairment to be recognized is determined as the amount by which the carrying value exceeds the fair value of the assets. Management analysis resulted in an impairment charge of \$98,345 to the carrying value of its long-lived assets in 2007.

Revenue Recognition

In accordance with gaming industry practice, the Company recognizes casino revenues as the net win from gaming activities, which is the difference between gaming wins and losses. Anticipated payouts resulting from our customer loyalty program (Time Rewards), in which registered customers are awarded cash based on the frequency and amounts of their gaming activities are included in promotional allowances. In accordance with gaming industry practice and EITF 00-22, these promotional allowances are presented as a reduction of casino revenues.

Revenue Sharing

The Company currently has certain gaming machines in the casino that provide for revenue sharing with the manufacturer that owns them. The agreements provides for various formulas based upon the adjusted gross profit of a machine and can be returned to the manufacturer upon notice. Revenue sharing costs for years ended December 31, 2007 and 2006 was \$145,072 and \$409,767, respectively.

Income Taxes

The Company is not a taxpaying entity for federal income tax purposes, and thus no income tax expense has been recorded in the statements. Income of the Company is attributed to the member for taxation.

Comprehensive Income

SFAS No. 130, *Reporting Comprehensive Income*, established standards for reporting and display of comprehensive income, its components and accumulated balances. For the years ended December 31, 2006 and 2005, there were no differences between reported net income and comprehensive income.

Derivative Instruments and Hedging Activities

SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, established requirements for disclosure of derivative instruments and hedging activities. During the periods covered by the financial statements the Company did not have any derivative financial instruments and did not participate in hedging activities.

Segment Information

The Company currently operates in one business segment as determined in accordance with SFAS No. 131, *Disclosure about Segments of an Enterprise and Related Information*. The determination of reportable segments is based on the way management organizes financial information for making operating decisions and assessing performance. All operations are located in the United States of America.

Recent Pronouncements

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements, which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. SFAS No. 157 clarifies how to measure fair value as permitted under other accounting pronouncements, but does not require any new fair value measurements. The Company is required to adopt SFAS No. 157 as of January 1, 2008. The adoption of SFAS No. 157 is not expected to have a material impact on the Company's financial position, results of operations or cash flows.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115. SFAS No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value, with unrealized gains and losses related to these financial instruments reported in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. The adoption of SFAS No. 159 is not expected to have a material impact on the Company's financial position, results of operations or cash flows.

There were various other accounting standards and interpretations issued during 2007 and 2006, none of which are expected to have a material impact on the Company's consolidated financial position, operations, or cash flows.

NOTES TO UNAUDITED PRO FORMA CONDENSED CONSOLIDATED FINANCIAL INFORMATION OF GLOBAL CASINOS INC.

Note 1. Acquisition of Business

On March 18, 2008 we completed our acquisition of substantially all the assets and certain liabilities of the Doc Holliday Casino (Casino). The Casino is a limited stakes gaming establishment located in Central City, Colorado and is generally considered to be in the same market and gaming environment as our other operating entity, the Bull Durham Saloon and Casino.

The purchase was accounted for under the purchase method of accounting in accordance with *Statement of Financial Accounting Standards No. 141, Business Combinations*. Under the purchase method of accounting, the total purchase price, including transaction costs, is allocated to the assets and liabilities acquired based on their fair values at the completion of the transaction. The aggregate purchase price was \$2,900,471, including \$1,665,376 in cash, 450,000 shares of the Company's common stock valued at \$.75 per share totaling \$337,500, and a business personal property appraisal expense of \$7,000, as well as \$365,580 of liabilities assumed, and new short-term debt of \$525,015. The value of the common stock was determined by the average of the closing prices of the Company's common stock for the day prior through the day after the closing of the acquisition. In addition, two notes payable were issued to the seller. The first note was a 0% interest note of \$400,000, due in full on or before March 31, 2009, and was valued at \$369,345 using a discount rate of 8%. The second note in the amount of \$155,670, is an 8% installment note requiring monthly principal and interest payments of \$13,541, and matures on March 18, 2009.

In the unaudited pro forma condensed consolidated statements of operations, we have made adjustments to reflect the results of operations of Global Casinos, Inc. as if the acquisition was completed at the beginning of each period presented. All earnings per share data has been adjusted to reflect the effect of the Series D Preferred stock dividends, and the common stock issued resulting from the acquisition as if these equity securities were issued at the beginning of each period presented.

Note 2. Adjustments to Unaudited Pro Forma Condensed Consolidated Statement of Operations for the Year Ended June 30, 2007, and the Nine Months Ended March 31, 2008

- a. Adjustment to reflect the effect of quarterly dividends earned on the Series D Preferred stock. Dividends are earned at the rate of 8% per year on the total outstanding balance of \$700,000. The proceeds from the sale of the Series D Preferred stock were used as partial consideration paid to the seller.
- b. Adjustment to reflect the current depreciation of fixed assets acquired and to eliminate the historical pre-acquisition depreciation charged by the Casino. Substantially all the fixed

assets including gaming equipment and furniture and fixtures were acquired. The total value assigned to these acquired assets was \$635,970 and are being depreciated over periods ranging from one to seven years.

- c. Adjustment to reflect interest on new debt issued to the seller as partial consideration for the acquisition. In addition, adjustments were made to eliminate the historical interest, and reflect adjusted interest on several vendor financing notes assuming such notes would have been re-negotiated under the essentially the same terms as the vendor financing note assumed in the acquisition.
