PART I: FINANCIAL INFORMATION

ITEM 1. FINANCIAL STATEMENTS

The financial information set forth below with respect to our statements of operations for the three month periods ended March 31, 2004 and 2003 is unaudited. This financial information, in the opinion of management, includes all adjustments consisting of normal recurring entries necessary for the fair presentation of such data. The results of operations for the three month period ended March 31, 2004 are not necessarily indicative of results to be expected for any subsequent period.

Notes to the Consolidated Financial Statements
March 31, 2004

GENERAL

View Systems, Inc. (the Company) has elected to omit substantially all footnotes to the financial statements for the three months ended March 31, 2004 since there have been no material changes (other than indicated in other footnotes) to the information previously reported by the Company in their Annual Report filed on the Form 10-KSB for the twelve months ended December 31, 2003.

UNAUDITED INFORMATION

The information furnished herein was taken from the books and records of the Company without audit. However, such information reflects all adjustments which are, in the opinion of management, necessary to properly reflect the results of the interim period presented. The information presented is not necessarily indicative of the results from operations expected for the full fiscal year.

8

In this report references to "View Systems," "we," "us," and "our" refer to View Systems, Inc.

FORWARD LOOKING STATEMENTS

This quarterly report contains certain forward looking statements that involve risks and uncertainties, such as statements of View System's plans and expectations. Any statements contained in this report that are not statements of historical fact may be deemed to be forward looking statements. Without limiting the foregoing, words such as "may," "expect," "believe," "anticipate," "estimate" or "continue" or comparable terminology are intended to identify forward-looking statements. These statements by their nature involve substantial risks and uncertainties, and actual results may differ materially depending on a variety of factors, many of which are not within View Systems's control. These factors include, but are not limited to, economic conditions generally and in the industry which View Systems participates; competition within View Systems's chosen market and failure by View Systems to successfully develop business relationships.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS

Executive Overview

View Systems designs and develops computer software and hardware used in conjunction with weapons detection and surveillance capabilities. We have received increased product inquiries over the last six months of the 2003 year and we are also signing new dealers. In addition, our ViewMaxx Digital Video sales have been revitalized in the last two quarters, demonstrating the continuing market growth in closed circuit television surveillance products. During the first quarter of 2004 we entered into a Cooperative Research and Development Agreement with the Idaho National Laboratory for our FirstView Wireless Camera System, a first responder long range video transmission system. We believe that heightened attention to terrorist and other security threats may continue to drive growth in the market for security products.

Our revenues are primarily from sales of our VideoMaxx and SecureScan

Edgar Filing: VIEW SYSTEMS INC - Form 10QSB

Concealed Weapons Detection System. We have incurred losses for the past two fiscal years and have an accumulated deficit of \$14,719,371 at March 31, 2004. We rely on revenues, private financing and sales of common stock to provide additional funding. Management believes we will incur operating losses for the near future. However, management expects projected sales revenues and anticipated equity infusions and advances from management to be sufficient to provide funding to sustain operations through 2004.

For the 2004 second quarter our primary challenge will be to more fully develop our product line and our sales and distribution network. Our emphasis will be on marketing and sales programs through high-end dealer channels, plus internal direct sales for our products, where applicable.

Our plan is to develop a sales and distribution channel program for the United States. We expect to build a United States domestic network of manufacturing representatives and dealers for the sale and distribution of our products within the 48 states. Our initial focus will be in the Mid-Atlantic and Northeast regions. For international sales, we have engaged one group, RVP Associates, for international business development with the intent that the international sales and distribution channel will parallel the United States program only through foreign sales channels. However, we cannot assure that we will be able to develop these sales and distribution channels to a level which will result in increased revenues.

Our second major emphasis for the 2004 second quarter and the remainder of the 2004 year is to continue our SecureScan manufacturing cost reduction objectives. We will continue implementation of the three-phase initiative toward the reduction of the manufacturing costs of the SecureScan product, which we began in the last half of 2003. We have completed the first phase of this plan by reducing manufacturing costs of the SecureScan product by 25%. The second phase will be implemented over the next six months of the 2004 year. We intend to select key expensive components of the SecureScan system and replace them with performance equivalent, less

9

expensive parts. The final phase of the manufacturing cost reductions will be a \$1,600 cost reduction per unit in the fabrication of the gradiometer sensors alone which we believe can be accomplished. In addition, we anticipate completing circuitry conversions to fully digital signal processing from present digital to analog, back to digital and vice versa along with replacing over-engineered housings in the portal. We also expect to reduce assembly time and testing times to save additional manufacturing costs.

Our manufacturing and marketing objectives for FirstView, which is based on the hazmat cam, a lightweight wireless camera system that emergency response teams carry into ground zero, include:

- .. Set up a complete manufacturing line in the Baltimore, Maryland facility for building, testing and further development of the hazmat camera product.
- .. Create comprehensive manufacturing ability with a bill of materials and vendor supply source list for ongoing engineering support and production.
- .. Establish the necessary manufacturing process to sustain output levels of 8 to 10 systems per month.

Liquidity and Capital Resources

For the short term management believes that revenues and additional equity

Edgar Filing: VIEW SYSTEMS INC - Form 10QSB

financing will provide funds for operations and development of our business plan. For the long term, management expects that the development of our sales channels will increase our revenues; however, we will need to continue to raise additional funds through loans and sales of our common stock, as needed.

Operations - Our cash inflows are not sufficient to fund our day-to-day operations. Net cash used by operating activities for the three month period ended March 31, 2004 ("2004 first quarter") was \$185,863 compared to net cash used by operating activities of \$205,748 for the three month period ended March 31, 2003 ("2003 first quarter").

Financing - We have financed our operations primarily through private equity financing. We expect to rely on external financing of \$1 to \$3 million to meet our needs in the short term, increase ongoing operations to self-sustaining levels, and increase profits to the magnitude management feels is achievable. The first phase will be a \$500,000 bridge financing to be completed in the 2004 second quarter that we intend to use to expand our marketing and sales programs and to set up manufacturing capabilities for FirstView in our Baltimore, Maryland facility. The second phase is to acquire \$1 million in the third quarter 2004 to increase sales and manufacturing personnel to support development of a national sales channel model, lower manufacturing unit costs of the SecureScan products and implement an application integrating SecureScan with School Technology Management's Student Time and Attendance System. The third phase of funding will be used to expand our dealer network through the remainder of 2004 and introduce additional cost reductions of the newest products into the 2005 calendar year.

Net cash provided by financing activities for the 2004 first quarter was \$172,886; consisting of advances from shareholders of \$137,886 and \$35,000 proceeds received from sales of stock. In comparison, net cash provided by financing activities for the 2003 first quarter were \$125,000 from advances and \$86,550 proceeds from sales of common stock.

We intend to use any available cash to expand our sales, marketing and promotional activities for the SecureScan portals and to continue our product development efforts. We believe that it will be essential to continue to raise additional capital, both internally and externally, to compete in this industry. We cannot assure that we will be able to obtain financing on favorable terms and we may be required to further reduce expenses and scale back our operations. In addition to accessing the public and private equity markets, we will pursue bank credit lines and equipment leases for certain capital expenditures, if necessary.

10

Commitments and Contingent Liabilities

Our primary commitment is our operating lease for the manufacturing facility in Baltimore, Maryland. Our rent for this facility is \$2,260 per month with an annual escalator of 3%. Our total current liabilities of \$1,037,969 at March 31, 2004 include accounts payable of \$607,887, accrued expenses of \$102,947, accrued interest of \$57,750 and notes payable of \$269,385.

Off-balance Sheet Arrangements - None.

Results of Operations

The following discussions are based on the consolidated financial statements of View Systems and its subsidiaries. These charts and discussions summarize our financial statements for the three month periods ended March 31, 2004 and

Edgar Filing: VIEW SYSTEMS INC - Form 10QSB

2003 and should be read in conjunction with the financial statements, and notes thereto, included with this report at Item I, Part 1, above.

Comparison of 2003 and 2004 First Quarter Summary of Operations

	Quarter ended March 31, 2004	Quarter ended March 31, 2003
	-----	-----
Revenues, net	\$ 34,353	\$ 65,690
Cost of sales	32,326	27,536
Gross profit	2,027	38,154
Total operating expenses	213,368	329,517
Net operating loss	(211,341)	(291,363)
Total other expense	(3,014)	(3,009)
Net income (loss)	(214,355)	(294,372)
Net income (loss) per share	\$ 0.00	\$ (0.01)

Revenues for the 2004 first quarter decreased 47.7% compared to the 2003 first quarter, but costs of sales increased 17.3% in the 2004 first quarter compared to the 2003 first quarter. As a result of the reduction in revenues, coupled with the increase in cost of sales, our gross profit decreased 94.7% for the 2004 first quarter compared to the 2003 first quarter.

During the 2004 first quarter total operating expense decreased 35.2% compared to the 2003 first quarter. The decrease was primarily the result of a 50.0% decrease in general and administrative expenses and a 68.6% decrease in professional fees for technical and business consultants. The reductions in total operating expenses resulted in a 27.5% decrease in our net operating loss.

Our net loss for the 2004 quarter decreased 27.8 % in comparison to our net loss for the 2003 first quarter. Our net loss per share was \$0.00 for the 2004 first quarter compared to a net loss per share of \$0.01 for the 2003 first quarter.

11

Summary of Balance Sheet

	Quarter ended March 31, 2004	For year ended December 31, 2003
	-----	-----
Cash	\$ 6,922	\$ 19,899
Total current assets	257,404	338,228
Total assets	2,020,937	2,113,051

Edgar Filing: VIEW SYSTEMS INC - Form 10QSB

Total current liabilities	1,037,969	950,729
Accumulated deficit	(14,719,371)	(14,505,017)
Total stockholders equity	\$ 982,968	\$ 1,162,322

As of March 31, 2004 we had negative working capital of \$780,565 and our total current assets decreased due to reductions in cash and accounts receivable. We own property and equipment valued at \$33,403 and licenses related to our technology valued at \$1,626,854. Our total current liabilities have increased as of March 31, 2004 compared to December 31, 2003.

Factors Affecting Future Performance

We may need additional external capital and may be unable to raise it.

Based on our current growth plan we believe we may require \$1 to \$3 million additional financing within the next twelve months to remain competitive in our market. Our success will depend upon our ability to access equity capital markets and borrow on terms that are financially advantageous to us. However, we may not be able to obtain additional funds on acceptable terms. If we fail to obtain funds on acceptable terms, then we might be forced to delay or abandon some or all of our business plans or may not have sufficient working capital to develop products, finance acquisitions, or pursue business opportunities. If we borrow funds, then we could be forced to use a large portion of our cash reserves, if any, to repay principal and interest on those funds. If we issue our securities for capital, then the interests of investors and shareholders will be diluted.

We are currently dependent on the efforts of our resellers for our continued growth and must expand our sales channels to increase our revenues.

We are in the process of developing and expanding our sales channels, but we expect overall sales to remain down as we develop our marketing activities. We are actively recruiting and adding other additional resellers and must continue to recruit additional resellers and find other methods of distribution to increase customers. If we are unsuccessful in developing sales channels we may have to abandon our business plan.

ITEM 3. CONTROLS AND PROCEDURES

Our Chief Executive Officer who also acts in the capacity of principal financial officer has concluded that the disclosures related to the effectiveness of our disclosure controls and procedures and our internal control over financial reporting made in our annual report on Form 10-KSB, filed April 14, 2004, remain accurate.

12

PART II: OTHER INFORMATION

ITEM 2: CHANGES IN SECURITIES

The following discussion describes all securities sold by View Systems without registration during the first quarter of 2004 through a recent date.

In February and March of 2004 we issued an aggregate of 902,000 restricted common shares as compensation pursuant to employment agreements. We issued 100,000 shares to Paul Scaccio, 100,000 shares to Barry Feldman, 102,000

Edgar Filing: VIEW SYSTEMS INC - Form 10QSB

shares to David Johansen and 600,000 shares to Gunther Than. We relied on an exemption from registration for a private transaction not involving a public distribution provided by Section 4(2) of the Securities Act.

Starting on August 6, 2003 we have conducted a Regulation D Rule 505 offering for an aggregate offering amount of \$1,500,000. During the first quarter of 2004 and through April 22, 2004 we issued an aggregate of 518,833 common shares to accredited investors for approximately \$58,000. We relied on an exemption from the registration requirements of the Securities Act of 1933 for a limited offering provided by Section 3(b) and Regulation D.

On March 11, 2004 we issued 31,250 shares to InCap Group, Inc. in consideration for services. We relied on an exemption from registration for a private transaction not involving a public distribution provided by Section 4(2) of the Securities Act.

In connection with each of these isolated issuance's of our securities, we believe that each purchaser:

- .. was aware that the securities had not been registered under federal securities laws;
- .. acquired the securities for his/her/its own account for investment purposes and not with a view to or for resale in connection with any distribution for purposes of the federal securities laws;
- .. understood that the securities would need to be indefinitely held unless registered or an exemption from registration applied to a proposed disposition; and
- .. was aware that the certificate representing the securities would bear a legend restricting their transfer.

ITEM 5: OTHER INFORMATION

On April 30, 2004 Barry Feldman resigned as our President, Chief Operating Officer and Director to pursue other interests. We have not filled these vacancies as of the date of this filing.

ITEM 6. EXHIBITS AND REPORT ON FORM 8-K

Part I Exhibits

- 31.1 Chief Executive Officer Certification
- 31.2 Principal Financial Officer Certification
- 32.1 Section 1350 Certification

Part II Exhibits

- 3.1 Articles of Incorporation of View Systems, as amended (Incorporated by reference to exhibit 3.1 to Form 10-QSB filed November 14, 2003)
- 3.2 By-Laws of View Systems (Incorporated by reference to exhibit 3.2 to Form 10-QSB filed November 14, 2003)
- 10.1 Employment agreement between View Systems and Gunther Than, dated January 1, 2003 (Incorporated by reference to exhibit 10.3 for Form 10-KSB, filed April 14, 2004)
- 21.1 Subsidiaries (Incorporated by reference to Form 10-KSB, filed March 31, 2003)

Edgar Filing: VIEW SYSTEMS INC - Form 10QSB

Reports on Form 8-K

On March 2, 2004 we filed a current report on Form 8-K, dated February 24, 2004, under Item 4 related to the engagement of our independent auditor. On March 3, 2004 we filed an amendment to this report related to the resignation of our former auditor.

SIGNATURES

In accordance with the requirements of the Securities Exchange Act, the registrant caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
