FORWARD-LOOKING STATEMENTS

This prospectus contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Discussions containing such forward-looking statements may be found in our Annual Report on Form 10-K for the fiscal year ended August 30, 2004, as well as within this prospectus generally. In addition, when used in this prospectus, the words "believes," "anticipates," "expects," "estimates," "plans," "intends," and similar expressions are intended to identify forward-looking statements. All forward-looking statements are subject to a number of risks and uncertainties that could cause actual results to differ materially from projected results, as discussed below under the heading "Risk Factors" in this prospectus. Factors that may cause these differences include, but are not limited to:

changing customer and product mixes, market conditions and industry consolidation;

competition;

general economic conditions in the markets in which the Company operates;

risk of cancellation or rescheduling of orders;

work stoppages at transportation centers or shipping ports;

the risk of war, terrorism and similar hostilities;

dependence on our information systems;

dependence on our personnel; and

the other matters discussed in the Business Description contained in the Company's Annual Report on Form 10-K for the fiscal year ended August 30, 2003.

Consequently, such forward-looking statements should be regarded solely as the Company's current plans, estimates and beliefs. The Company does not undertake any obligation to update any forward-looking statements to reflect future events or circumstances after the date of such statements.

RISK FACTORS

In addition to the other information in this prospectus, the following factors should be considered in evaluating the Company and its business before purchasing the shares of Class A common stock offered hereby. Our future operating results depend upon many factors and are subject to various risks and uncertainties. The known material risks and uncertainties which may cause our operating results to vary from anticipated results or which may negatively affect our operating results and profitability are as follows:

Changes in our customer and product mix could cause our gross margin percentage to fluctuate.

From time to time we have experienced changes in our customer mix and in our product mix since our formation. Changes in our customer mix have resulted from geographic expansion, daily selling activities within current geographic markets, and targeted selling activities to new customer segments. Changes in our product mix have resulted from marketing activities to existing customers and needs communicated to us from existing and prospective customers. Although we have been successful in incrementally increasing our gross margin percentage by varying our customer and product mix over the last several years and our strategy has emphasized higher margin, lower volume orders, changes in our customer and product mix could cause our gross margin percentage to fluctuate or decline from time to time in the future.

Our industry is consolidating which could cause it to become more competitive.

The business of selling MRO supplies in North America is currently undergoing some consolidation. This consolidation is being driven by customer needs and supplier capabilities, which could cause the industry to become more competitive as greater economies of scale are achieved by suppliers.

Traditional MRO suppliers are attempting to consolidate the market through internal expansion, through acquisition or merger with other industrial and construction suppliers, or through a combination of both. This consolidation allows suppliers to improve efficiency and spread fixed costs over a greater number of sales, and to achieve other benefits derived from economies of scale.

Customers are increasingly aware of the total costs of fulfillment, and of their need to have consistent sources of supply at multiple locations. Consistent sources of supply provide not just reliable product quantities, but also consistent pricing, quality, services and engineering capabilities. We believe these customer needs could result in fewer suppliers as the industry consolidates, and as the remaining suppliers become larger and capable of being a consistent source of supply.

The trend of our industry toward consolidation could make it more difficult for us to maintain our operating margins. There can be no assurance that we will be able to take advantage of the trend or that we can do so effectively.

In addition, as various sectors of the industrial and construction customer base face increased foreign competition and in fact lose business to foreign competitors, or shift their operations overseas or outsource manufacturing requirements to foreign manufacturers, or source supplies from foreign vendors in an effort to reduce expenses, we will face increased difficulty in growing and maintaining our market share and growth prospects.

We operate in a highly competitive industry.

The MRO supply industry is a large, fragmented industry that is highly competitive. We face competition from traditional channels of distribution such as retail outlets, small dealerships, regional or national distributors utilizing direct sales forces, manufacturers of MRO supplies, large warehouse stores and larger direct mail distributors. We believe that sales of MRO supplies will become more

concentrated over the next few years, which may make the industry more competitive. Our competitors challenge us with a greater variety of product offerings, financial resources, services or a combination of all of these factors.

Although we have recently had success in diversifying our customer base, which we believe will assist us to better manage periodic downturns in the manufacturing industry, there can be no assurance that sales to these additional customers will offset the adverse effects of other competitive trends in our industry, including those discussed above.

The risk of cancellation or rescheduling of orders may cause our operating results to fluctuate.

The cancellation or rescheduling of orders may cause our operating results to fluctuate. Although we strive to maintain ongoing relationships with our customers, there is an ongoing risk that orders may be cancelled or rescheduled due to fluctuations in our customers' business needs or purchasing budgets. Additionally, although our customer base is diverse, ranging from one-person machine shops to Fortune 1000 companies and large government agencies, the cancellation or rescheduling of significant orders by larger customers may still have a material adverse effect on our operating results from time to time.

Work stoppages and other disruptions at transportation centers or shipping ports may adversely affect our ability to obtain inventory and make deliveries to our customers.

Our ability to provide same-day shipping of our core business products is an integral component of our overall business strategy. Disruptions at transportation centers or shipping ports, such as the severe winter weather experienced during the third quarter of fiscal 2003 and the longshoreman's strike on the West Coast in fiscal 2002, affect both our ability to maintain core products in inventory and deliver products to our customers on a timely basis, which may in turn adversely affect our results of operations.

The risks of war, terrorism, and similar hostilities may adversely affect our operating results.

In addition to having an impact on general economic conditions, events of war, terrorism or other similar occurrences such as the attacks of September 11, 2001 and the recent conflict in Iraq may materially adversely affect our revenues and our ability to service our customers. We believe that both the events of September 11, 2001 and the Iraq conflict had a material adverse effect on our results of operations, although the impact of such events can be difficult to quantify.

Disruptions of our information systems could adversely affect us.

We believe that our computer software programs are an integral part of our business and growth strategies. We depend upon our information systems to help process orders, to manage inventory and accounts receivable collections, to purchase, sell and ship products efficiently and on a timely basis, to maintain cost-effective operations, and to help provide superior service to our customers. Any disruption in the operation of our information systems, including widespread power outages such as those that affected the northeastern and midwest United States in August 2003, could have a material adverse effect on our business, financial condition and results of operations. Although we utilize disaster recovery techniques and procedures, which we believe are adequate to fulfill our needs, and we believe that planned enhancements and upgrades to the next generation of our existing operating platforms will be sufficient to sustain our present operations and our anticipated growth for the foreseeable future, there can be no assurance that disruptions of our information systems will not occur.

Our success is dependent on certain key personnel.

Our success depends largely on the efforts and abilities of certain key senior management. The loss of the services of one or more of such key personnel could have a material adverse effect on our business and financial results. We do not maintain any key-man insurance policies with respect to any of our executive officers.

Distribution Center Expansions

In the future, as part of our long term strategic planning, we may open new distribution centers to improve our efficiency, geographic distribution and market penetration. Moving or opening distribution centers requires a substantial capital investment, including expenditures for real estate and construction, and a substantial investment in inventory. In addition, new distribution centers will have an adverse impact on distribution expenses as a percentage of sales, inventory turnover and return on investment in the periods prior to and for some time following the commencement of operations of each new distribution center. Additionally, until sales volumes mature at new distribution centers, operating expenses as a percentage of sales may be adversely impacted. Further, substantial or unanticipated delays in the commencement of operations at new distribution centers could have a material adverse effect on our geographic expansion and may impact results of operations.

Availability of and Integration of Prospective Acquisitions

Acquisitions have not played a role in our recent growth. From time to time in the future, we may pursue selected acquisitions that either expand or complement our business in new or existing markets. There can be no assurance that we will be able to identify and to acquire acceptable acquisition candidates on terms favorable to us and in a timely manner. The failure to complete or successfully integrate prospective acquisitions may have an adverse impact on our growth strategy. We are not currently a party to any oral or written acquisition agreement or engaged in any negotiations with respect to any material acquisition candidate.

Our common stock price may be volatile.

We believe factors such as fluctuations in our operating results or the operating results of our competitors, changes in economic conditions in the market sectors in which our customers operate (notably the durable and non-durable goods manufacturing industry, which accounted for 73% of our revenue in fiscal 2003), and changes in general market conditions, could cause the market price of our Class A common stock to fluctuate substantially. In addition, sales of a substantial number of shares of our common stock in the public market could adversely affect the prevailing market price of our Class A common stock.

Our principal shareholders exercise significant control over us.

Our Chief Executive Officer, his sister, certain of their family members and related trusts collectively own 100% of the outstanding shares of Class B common stock, and control approximately 86.5% of the combined voting power of the Company's capital stock. Consequently, such shareholders are in a position to elect all of the directors of the Company and to determine the outcome of any matter submitted to a vote of the Company's shareholders for approval.

Shares Eligible for Future Sale

Sales of a substantial number of shares of Class A common stock in the public market could adversely affect the prevailing market price of the Class A common stock and could impair our future ability to raise capital through an offering of our equity securities. As of July 26, 2004, there were 42,306,559 shares of Class A common stock outstanding. In addition, 5,268,832 options to purchase shares of Class A common stock granted under the Company's 1995, 1998, and 2001 Stock Option

Plans remain outstanding. Options to purchase an additional 4,147,471 shares of Class A common stock may be granted under the Company's 2001 Stock Option Plan. An additional 34,111 shares may be granted under the 1995 Restricted Stock Plan, and approximately 101,000 shares may be sold through the Company's 1998 Associate Stock Purchase Plan. Certain of the shares issuable upon exercise of the foregoing options are subject to resale pursuant to separate registration statements on Form S-8. See "Selling Shareholder."

Our Class B common stock is convertible, on a one-for-one basis, into our Class A common stock at any time. As of July 26, 2004, there were 25,445,026 shares of Class B common stock outstanding. All of the shares of Class B common stock (and the shares of Class A common stock into which such shares are convertible) are "restricted securities" for purposes of the Securities Act. Subject to the volume and other limitations set forth in Rule 144 promulgated under the Securities Act, all of such restricted securities are eligible for public sale.

THE COMPANY

MSC Industrial Direct Co., Inc. (together with its consolidated subsidiaries, "MSC" or the "Company" or "we") is one of the largest direct marketers of a broad range of industrial products to industrial customers throughout the United States. We distribute a full line of industrial products intended to satisfy our customers' maintenance, repair and operations ("MRO") supplies requirements. We offer over 500,000 stock-keeping units ("SKUs") through our master catalogs, weekly, monthly and quarterly specialty and promotional catalogs, newspapers and brochures and service our customers from approximately 90 branch offices and four distribution centers. Most of our products are carried in stock, and orders for these in-stock products are typically fulfilled the day on which the order is received. For our fiscal year ended August 30, 2003, we reported net sales of \$844.7 million and net income of \$52.1 million. For the thirty-nine weeks ended May 29, 2004, we reported net sales of \$708.6 million and net income of \$58.9 million.

Our customers include a wide range of purchasers of industrial supply products, from one-person machine shops to Fortune 1000 companies, to government agencies including the United States Postal Service. Our core business focuses on selling relatively higher margin, lower volume products and had an average order size of approximately \$224 in fiscal 2003 and \$236 for the thirty-nine weeks ended May 29, 2004. We have approximately 346,000 combined active customers (companies that have purchased at least one item during the past 12 months). Our customers select desired products from MSC's various publications and place their orders by telephone, the Internet, direct computer link or facsimile.

We operate primarily in the United States, with customers in all 50 states, through our network of four regional distribution centers and approximately 90 branch offices. MSC's distribution centers are located near Harrisburg, Pennsylvania; Atlanta, Georgia; Elkhart, Indiana and Reno, Nevada. The strategic locations of MSC's distribution centers allow for next day ground delivery via low cost ground carriers in 36 states. Our experience has been that areas accessible by next day ground delivery generate significantly greater sales than areas where next day ground delivery is not available. Accordingly, our long-term strategy is to expand our geographic coverage of next day ground delivery throughout the continental United States which at some point in the future may require the expansion of existing facilities or the opening of new facilities.

We have extensive e-commerce abilities that enable our customers to lower their procurement costs. This includes many features such as swift search and transaction abilities, access to real time inventory, customer specific pricing, workflow management tools and other features. We can also interface directly with many purchasing portals such as ARIBA and I-Procure. In addition we offer Vendor Managed Inventory systems that can lower customers' inventory investment, reduce sourcing costs and out of stock situations and increase business efficiency.

MSC's website MSCDirect.com is a searchable on-line catalog with electronic ordering capabilities designed to take advantage of the opportunities created by Internet commerce. The MSCDirect.com site offers a broad array of products, services, workflow management tools and related information to meet the needs of customers seeking to reduce processing costs through Internet e-commerce-enabled solutions. Our MSCDirect.com marketing campaign continued in fiscal years 2003 and 2004 to raise awareness and drive volume to the website. MSCDirect.com generated revenue of more than \$90 million in fiscal year 2003, a 49% increase over the prior year period and \$93.7 million for the thirty-nine weeks ended May 29, 2004, a 43% increase over the prior year period.

DISCLOSURE OF COMMISSION POSITION ON INDEMNIFICATION FOR SECURITIES ACT LIABILITIES

Our directors and officers have the benefit of certain indemnification rights included in our certificate of incorporation and other agreements. Insofar as indemnification for liabilities arising under the Securities Act may be permitted to our directors, officers or persons controlling us, we have been advised that it is the SEC's opinion that such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable.

ITEM 9. UNDERTAKINGS

The undersigned registrant hereby undertakes:

- (a) to file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:
 - (i) to include any prospectus required by Section 10(a) (3) of the Securities Act;

change in the information set forth in the registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed

with the Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than a 20% change in the maximum aggregate offering price set forth in the "Calculation of Registration Fee" table in the effective registration statement; and

(iii)

to include any material information with respect to the plan of distribution not previously disclosed in this registration statement or any material change to such information in this registration statement;

provided, however, that the undertakings set forth in clauses (a)(i) and (a)(ii) do not apply if the information required to be included in a post-effective amendment by those clauses is contained in periodic reports filed with or furnished to the Commission by the registrant pursuant to Section 13 or Section 15(d) of the Exchange Act that are incorporated by reference in the registration statement;

The undersigned registrant hereby undertakes: (1) to file, during any period in which offers or sales are being made, a post-effective amendment to this Registration Statement to include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement; (2) that, for purposes of determining any liability under the Securities Act of 1933, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of the securities at that time shall be deemed to be the initial *bona fide* offering thereof; and (3) to remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

The undersigned registrant hereby undertakes that, for purposes of determining any liability under the Securities Act of 1933, each filing of the registrant's annual report pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (and, where applicable, each filing of an employee benefit plan's annual report pursuant to Section 15(d) of the Securities Exchange Act of 1934) that is incorporated by reference in the registration statement shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial *bona fide* offering thereof.

Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that in the opinion of the Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Act and will be governed by the final adjudication of the issue.
