SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2016

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 001-34245

THE YORK WATER COMPANY

(Exact name of registrant as specified in its charter)

PENNSYLVANIA

(State or other jurisdiction of incorporation or organization)

23-1242500

(I.R.S. Employer Identification No.)

130 EAST MARKET STREET, YORK, PENNSYLVANIA 17401

(Address of principal executive offices)

17401

(Zip Code)

Registrant's telephone number, including area code (717) 845-3601

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act (check one):

Large accelerated filer Accelerated filer

Non-accelerated filer Small Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

YES NO

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Common stock, No par value	12,841,318 Shares outstanding as of November 2, 2016

THE YORK WATER COMPANY

Notes to Interim Financial Statements

(In thousands of dollars, except per share amounts)

1. Basis of Presentation

The interim financial statements are unaudited but, in the opinion of management, reflect all adjustments, consisting of only normal recurring accruals, necessary for a fair presentation of results for such periods. Because the financial statements cover an interim period, they do not include all disclosures and notes normally provided in annual financial statements, and therefore, should be read in conjunction with the financial statements and notes thereto contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

Operating results for the three and nine month periods ended September 30, 2016 are not necessarily indicative of the results that may be expected for the year ending December 31, 2016.

2. Common Stock and Basic Earnings Per Share

Basic earnings per share for the three months ended September 30, 2016 and 2015 were based on weighted average shares outstanding of 12,868,333 and 12,835,197, respectively.

Basic earnings per share for the nine months ended September 30, 2016 and 2015 were based on weighted average shares outstanding of 12,846,521 and 12,844,458, respectively.

Since the Company has no common stock equivalents outstanding, there are no diluted earnings per share.

On March 11, 2013, the Board of Directors authorized a share repurchase program granting the Company authority to repurchase up to 1,200,000 shares of the Company's common stock from time to time. The stock repurchase program has no specific end date and under the stock repurchase program, the Company may repurchase shares in the open market or through privately negotiated transactions. The Company may suspend or discontinue the repurchase program at any time. During the three and nine months ended September 30, 2016 and 2015, the Company repurchased and retired 16,849 and 118,812 shares, respectively. As of September 30, 2016, 685,155 shares remain available for repurchase.

3. Reclassifications

Certain 2015 amounts have been reclassified to conform to the 2016 presentation. Such reclassifications had no effect on net income, the statement of common stockholders' equity, or the statement of cash flow category reporting.

4. Commitments

The Company has committed a total of approximately \$10,079 for an additional raw water pumping station and force main, of which \$10,037 remains to be incurred as of September 30, 2016. The Company may make additional commitments for this project during the remainder of 2016.

Table of Contents

During its recently completed triennial testing, the Company determined it exceeded the action level for lead at the customer's tap as established by the Lead and Copper Rule issued by the U.S. Environmental Protection Agency. The rule allows the Company to have five samples of the 50 high-risk homes tested exceed the action level of 15 parts per billion (PPB). The testing found that six properties with lead service lines, all built before 1935, exceeded the action level, and the reported exceedance amount was just 1 PPB. The Company has determined that only 3% of the company-owned service lines in the system are lead. The Company will be required to engage in more frequent testing for lead, public education, and annually replace 7% of the remaining company-owned lead service lines in its distribution system. The Company has announced plans to perform in excess of the required actions. Specifically, the Company will provide the affected customers with a free water test and a 200 gallon per month credit to flush their line in order to reduce any lead content until their lead service line has been replaced. The cost of the water tests and flushing credits is expected to be approximately \$71 over the next four years. In addition, the Company expects to exceed the mandated replacement schedule by replacing all of the remaining company-owned lead service lines within the next three to four years. The cost for these service line replacements is estimated at \$4,600, and will be integrated into the Company's annual capital budgets for replacements over the next three to four years. The Company may update these estimates as more facts become available.

5. Pensions

Components of Net Periodic Pension Cost

	Three Months Ended September 30 2016		Nine Months Ended September 30 2016	
	2015		2015	
Service cost	\$254	\$291	\$763	\$874
Interest cost	399	378	1,199	1,136
Expected return on plan assets	(558)	(557)	(1,675)	(1,672)
Amortization of actuarial loss	141	177	421	529
Amortization of prior service cost	(3)	(3)	(9)	(9)
Rate-regulated adjustment	342	289	1,026	867
Net periodic pension expense	\$575	\$575	\$1,725	\$1,725

Employer Contributions

As of September 30, 2016, contributions of \$2,300 had been made to the Company's pension plans, and the Company does not expect to contribute any additional amount during the remainder of 2016.

Table of Contents

6. Debt

For the nine months ended September 30, 2016, the Company did not enter into any new long-term debt arrangements or modify its outstanding long-term debt, summarized in the table below.

	As of Sept. 30, 2016	As of Dec. 31, 2015
10.17% Senior Notes, Series A, due 2019	\$6,000	\$6,000
9.60% Senior Notes, Series B, due 2019	5,000	5,000
1.00% Pennvest Note, due 2019	129	162
10.05% Senior Notes, Series C, due 2020	6,500	6,500
8.43% Senior Notes, Series D, due 2022	7,500	7,500
Variable Rate Pennsylvania Economic Development Financing Authority Exempt Facilities Revenue Refunding Bonds, Series 2008A, due 2029	12,000	12,000
4.75% York County Industrial Development Authority Revenue Bonds, Series 2006, due 2036	10,500	10,500
4.50% Pennsylvania Economic Development Financing Authority Exempt Facilities Revenue Refunding Bonds, Series 2014, due 2038	14,880	14,880
5.00% Monthly Senior Notes, Series 2010A, due 2040	15,000	15,000
4.00% - 4.50% York County Industrial Development Authority Exempt Facilities Revenue Bonds, Series 2015, due 2029 - 2045	10,000	10,000
Total long-term debt	87,509	87,542
Less discount on issuance of long-term debt	(229)	(237)
Less unamortized debt issuance costs	(2,642)	(2,743)
Less current maturities	(54)	(44)
Long-term portion	\$84,584	\$84,518

The Pennsylvania Economic Development Financing Authority Series 2014 bonds contain special redemption provisions. Under these provisions, representatives of deceased beneficial owners have the right to request redemption prior to the stated maturity of all or part of their holding in the bonds. Current maturities include \$10 for bonds that met the special provisions and have been tendered for redemption. The Company is not obligated to redeem any individual holding exceeding \$25, or aggregate holdings exceeding \$300 in any annual period.

The York County Industrial Development Authority Series 2006 bonds are subject to optional redemption provisions that allow the Company to redeem all or a portion of the bonds on or after October 1, 2016. The Company may refinance these bonds prior to maturity to take advantage of lower interest rates.

In the second quarter of 2016, the Company renewed its \$13,000 and \$11,000 committed lines of credit and extended the maturity date of each to May 2018. In addition, the Company renewed its third line of credit, increasing the committed amount from \$5,000 to \$7,500, lowering the interest rate from LIBOR plus 1.50% to LIBOR plus 1.25%, and extending the maturity date to June 2017.

In the third quarter of 2016, the Company entered into an agreement with a fourth bank for a \$10,000 unsecured committed line of credit at an interest rate of LIBOR plus 1.20% maturing in September 2017.

Table of Contents

Page 10

7. Interest Rate Swap Agreement

The Company is exposed to certain risks relating to its ongoing business operations. The primary risk managed by using derivative instruments is interest rate risk. The Company utilizes an interest rate swap agreement to effectively convert the Company's \$12,000 variable-rate debt issue to a fixed rate. Interest rate swaps are contracts in which a series of interest rate cash flows are exchanged over a prescribed period. The notional amount on which the interest payments are based (\$12,000) is not exchanged. The interest rate swap provides that the Company pays the counterparty a fixed interest rate of 3.16% on the notional amount of \$12,000. In exchange, the counterparty pays the Company a variable interest rate based on 59% of the U.S. Dollar one-month LIBOR rate on the notional amount. The intent is for the variable rate received from the swap counterparty to approximate the variable rate the Company pays to bondholders on its variable rate debt issue, resulting in a fixed rate being paid to the swap counterparty and reducing the Company's interest rate risk. The Company's net payment rate on the swap was 2.94% and 3.07% during the three months ended September 30, 2016 and 2015, respectively, and 2.87% and 3.03% during the nine months ended September 30, 2016 and 2015, respectively.

The interest rate swap agreement is classified as a financial derivative used for non-trading activities. The accounting standards regarding accounting for derivatives and hedging activities require companies to recognize all derivative instruments as either assets or liabilities at fair value on the balance sheet. In accordance with the standards, the interest rate swap is recorded on the balance sheet in other deferred credits at fair value (see Note 8).

The Company uses regulatory accounting treatment rather than hedge accounting to defer the unrealized gains and losses on its interest rate swap. Instead of the effective portion being recorded as other comprehensive income or loss and the ineffective portion being recognized in earnings using the cash flow hedge accounting rules provided by the derivative accounting standards, the entire unrealized swap value is recorded as a regulatory asset. Based on current ratemaking treatment, the Company expects the unrealized gains and losses to be recognized in rates as a component of interest expense as the swap settlements occur. Swap settlements are recorded in the income statement with the hedged item as interest expense. Swap settlements resulted in the reclassification from regulatory assets to interest expense of \$86 and \$92 during the three months ended September 30, 2016 and 2015, respectively, and \$259 and \$274 during the nine months ended September 30, 2016 and 2015, respectively. The overall swap result was a loss of \$25 and \$430 for the three months ended September 30, 2016 and 2015, respectively, and \$868 and \$346 for the nine months ended September 30, 2016 and 2015, respectively. The Company expects to reclassify \$329 from regulatory assets to interest expense as a result of swap settlements over the next 12 months.

The interest rate swap agreement contains provisions that require the Company to maintain a credit rating of at least BBB- with Standard & Poor's. If the Company's rating were to fall below this rating, it would be in violation of these provisions, and the counterparty to the derivative could request immediate payment if the derivative was in a liability position. On March 30, 2016, Standard & Poor's affirmed the Company's credit rating at A-, with a stable outlook and adequate liquidity. The Company's interest rate swap was in a liability position as of September 30, 2016. If a violation due to credit rating, or some other default provision, were triggered on September 30, 2016, the Company would have been required to pay the counterparty approximately \$3,314.

The interest rate swap will expire on October 1, 2029. Other than the interest rate swap, the Company has no other derivative instruments.

Table of Contents

8. Fair Value Measurements

The accounting standards regarding fair value measurements establish a fair value hierarchy which indicates the extent to which inputs used in measuring fair value are observable in the market. Level 1 inputs include quoted prices for identical instruments and are the most observable. Level 2 inputs include quoted prices for similar assets and observable inputs such as interest rates, commodity rates and yield curves. Level 3 inputs are not observable in the market and include management's own judgments about the assumptions market participants would use in pricing the asset or liability.

The Company has recorded its interest rate swap liability at fair value in accordance with the standards. The liability is recorded under the caption "Other deferred credits" on the balance sheet. The table below illustrates the fair value of the interest rate swap as of the end of the reporting period.

<u>Description</u>	<u>September 30, 2016</u>	Fair Value Measurements at Reporting Date Using <u>Significant Other Observable Inputs (Level 2)</u>
Interest Rate Swap	\$3,118	\$3,118

Fair values are measured as the present value of all expected future cash flows based on the LIBOR-based swap yield curve as of the date of the valuation. These inputs to this calculation are deemed to be Level 2 inputs. The balance sheet carrying value reflects the Company's credit quality as of September 30, 2016. The rate used in discounting all prospective cash flows anticipated to be made under this swap reflects a representation of the yield to maturity for 30-year debt on utilities rated A- as of September 30, 2016. The use of the Company's credit rating resulted in a reduction in the fair value of the swap liability of \$196 as of September 30, 2016. The fair value of the swap reflecting the Company's credit quality as of December 31, 2015 is shown in the table below.

<u>Description</u>	<u>December 31, 2015</u>	Fair Value Measurements at Reporting Date Using <u>Significant Other Observable Inputs (Level 2)</u>
Interest Rate Swap	\$2,511	\$2,511

The carrying amount of current assets and liabilities that are considered financial instruments approximates fair value as of the dates presented. The Company's total long-term debt, with a carrying value of \$87,509 at September 30, 2016, and \$87,542 at December 31, 2015, had an estimated fair value of approximately \$105,000 and \$102,000, respectively. The estimated fair value of debt was calculated using a discounted cash flow technique that incorporates a market interest yield curve with adjustments for duration and risk profile. These inputs to this calculation are deemed to be Level 2 inputs. The Company recognized its credit rating in determining the yield curve, and did not factor in third party credit enhancements including bond insurance on the 2006 York County Industrial Development Authority issue and the letter of credit on the 2008 Pennsylvania Economic Development Financing Authority Series A issue.

Customers' advances for construction and notes receivable have carrying values at September 30, 2016 of \$8,532 and \$255, respectively. At December 31, 2015, customers' advances for construction and notes receivable had carrying values of \$7,500 and \$255, respectively. The relative fair values of these amounts cannot be accurately estimated since the timing of future payment streams is dependent upon several factors, including new customer connections, customer consumption levels and future rate increases.

Table of Contents

9. Income Taxes

The Company filed for a change in accounting method under the Internal Revenue Service tangible property regulations effective in 2014. Under the change in accounting method, the Company is permitted to deduct the costs of certain asset improvements that were previously being capitalized and depreciated for tax purposes as an expense on its income tax return. This ongoing deduction results in a reduction in the effective income tax rate, a net reduction in income tax expense, and a reduction in the amount of income taxes currently payable. It also results in increases to deferred tax liabilities and regulatory assets representing the appropriate book and tax basis difference on capital additions. As a result, the Company's effective tax rate was 27.8% and 28.3% for the three months ended September 30, 2016 and 2015, respectively, and 31.9% and 30.7% for the nine months ended September 30, 2016 and 2015, respectively. The effective tax rate will vary depending on the level of eligible asset improvements that are placed in service each period, which was lower during the first nine months of 2016 as compared to the first nine months of 2015.

10. Acquisitions

On October 19, 2015, the Company completed the acquisition of the water assets of the Newberry Farms Mobile Home Park in York County, Pennsylvania. The Company began operating the existing system through an interconnection with its current distribution system on October 22, 2015. The acquisition resulted in the addition of approximately 160 new water customers with purchase price and acquisition costs of approximately \$129, of which \$13 was paid in the first quarter of 2016. The purchase price and acquisition costs approximated the depreciated original cost of the assets. In 2016, the Company recorded an immaterial negative acquisition adjustment and will seek approval from the Pennsylvania Public Utility Commission, or PPUC, to expense the negative acquisition adjustment.

On November 2, 2015, the Company completed the acquisition of the water assets of the Margaretta Mobile Home Park in York County, Pennsylvania. The Company began operating the existing system through an interconnection with its current distribution system on November 3, 2015. The acquisition resulted in the addition of approximately 65 new water customers with purchase price and acquisition costs of approximately \$102 after a net transfer of \$31 to related construction projects in the first quarter of 2016. The purchase price and acquisition costs were more than the depreciated original cost of the assets. In 2016, the Company recorded an acquisition adjustment of approximately \$56 and will seek approval from the PPUC to amortize the acquisition adjustment over the remaining life of the acquired assets.

On March 10, 2016, the Company completed the acquisition of the water assets of Crestview Mobile Home Park in York County, Pennsylvania. The Company began operating the existing system through an interconnection with its current distribution system on March 15, 2016. The acquisition resulted in the addition of approximately 120 new water customers with purchase price and acquisition costs of approximately \$47. The purchase price and acquisition costs were more than the depreciated original cost of the assets. The Company recorded an acquisition adjustment of approximately \$19 and will seek approval from the PPUC to amortize the acquisition adjustment over the remaining life of the acquired assets. These customers were previously served by the Company through a single customer connection to the park.

The result of these acquisitions has been immaterial to total Company results.

Table of Contents

Page 13

11. Long-Term Incentive Plan

On May 2, 2016, the Company's stockholders approved The York Water Company Long-Term Incentive Plan, or LTIP. The LTIP was adopted to provide the incentive of long-term stock-based awards to officers, directors and key employees. The LTIP provides for the granting of nonqualified stock options, incentive stock options, stock appreciation rights, performance restricted stock grants and units, restricted stock grants and units, and unrestricted stock grants. A maximum of 100,000 shares of common stock may be issued under the LTIP over the ten-year life of the plan. The maximum number of shares of common stock subject to awards that may be granted to any participant in any one calendar year is 2,000. Shares of common stock issued under the LTIP may be treasury shares or authorized but unissued shares. The LTIP will be administered by the Compensation Committee of the Board, or the full Board, provided that the full Board will administer the LTIP as it relates to awards to non-employee directors of the Company. The Company filed a registration statement with the Securities and Exchange Commission on May 11, 2016 covering the offering of stock under the LTIP. The LTIP was effective on July 1, 2016. No long-term stock-based awards have yet been granted under the LTIP.

12. Rate Matters

From time to time, the Company files applications for rate increases with the PPUC and is granted rate relief as a result of such requests. The most recent rate request was filed by the Company on May 29, 2013 and sought an increase in rates designed to produce additional annual water revenues of \$7,116 and additional annual wastewater revenues of \$28. Effective February 28, 2014, the PPUC authorized an increase in water rates designed to produce approximately \$4,972 in additional annual revenues, and an increase in wastewater rates for the Asbury Pointe subdivision to produce approximately \$28 in additional annual revenues.

The PPUC permits water utilities to collect a distribution system improvement charge, or DSIC. The DSIC allows the Company to add a charge to customers' bills for qualified replacement costs of certain infrastructure without submitting a rate filing. This surcharge mechanism typically adjusts periodically based on additional qualified capital expenditures completed or anticipated in a future period. The DSIC is capped at 5% of base rates, and is reset to zero when new base rates that reflect the costs of those additions become effective or when a utility's earnings exceed a regulatory benchmark. The surcharge reset to zero when the new base rates took effect on February 28, 2014. Since the reset, the Company's earnings have exceeded the regulatory benchmark, preventing the collection of a DSIC. There were no DSIC revenues for the three and nine months ended September 30, 2016 and 2015.

13. Impact of Recent Accounting Pronouncements

In August 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2016-15, Statement of Cash Flows (Topic 320): Classification of Certain Cash Receipts and Cash Payments. This ASU clarifies how certain cash receipts and payments should be presented in the statement of cash flows. The ASU is effective for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years, with early adoption available. The Company does not expect the adoption of this standard to have a material impact on its financial position, results of operations and cash flows.

In March 2016, the FASB issued ASU No. 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. This ASU involves multiple aspects of the accounting for share-based payment transactions, including income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The ASU is effective for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years, with early adoption available. The Company will assess the impact of the adoption of the standard on its financial position, results of operations, and cash flows upon its issuance of share-based payments.

Table of Contents

In November 2015, FASB issued ASU No. 2015-17, Balance Sheet Classification of Deferred Taxes. This ASU requires that deferred tax liabilities and assets be classified as noncurrent in a classified statement of financial position. The current requirement that deferred tax liabilities and assets of a tax-paying component of an entity be offset and presented as a single amount is not affected by the amendments in this update. This ASU is effective for fiscal years beginning after December 15, 2016, and for interim periods within those fiscal years. Early adoption is permitted, and the Company adopted this ASU in the first quarter of 2016. The Company applied the ASU retrospectively and reclassified the current deferred income tax asset of \$215 to offset the noncurrent deferred income tax liability on the December 31, 2015 balance sheet. The adoption did not have a material impact on the results of operations or cash flows of the Company.

In April 2015, the FASB issued ASU No. 2015-03, Simplifying the Presentation of Debt Issuance Costs. This ASU clarifies the required presentation of debt issuance costs. The standard requires that debt issuance costs be presented on the balance sheet as a direct reduction from the carrying amount of the recognized debt liability, consistent with the treatment of debt discounts. Amortization of debt issuance costs is to be reported as interest expense. The recognition and measurement guidance for debt issuance costs are not affected by the standard. This ASU is effective for fiscal years beginning after December 15, 2015, and the Company adopted this ASU in the first quarter of 2016. The Company applied the ASU retrospectively and reclassified the deferred debt expense asset of \$2,743 to offset long-term debt on the December 31, 2015 balance sheet. The adoption did not have a material impact on the results of operations or cash flows of the Company.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers. This ASU supersedes the revenue recognition requirements in Accounting Standards Codification 605—Revenue Recognition and most industry-specific guidance throughout the Codification. The standard requires that an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In August 2015, the FASB issued ASU No. 2015-14, Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date, deferring the effective date of this amendment for public companies by one year to fiscal years beginning after December 15, 2017. Early adoption is permitted for fiscal years beginning after December 15, 2016, the original effective date. The standard permits the use of either a retrospective or cumulative effect transition method. The Company has not yet selected a transition method and is in the process of assessing the impact of the adoption of the standard on its financial position, results of operations and cash flows.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (In thousands of dollars, except per share amounts)

Forward-looking Statements

Certain statements contained in this report on Form 10-Q constitute "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934 and Section 27A of the Securities Act of 1933. Words such as "may," "should," "believe," "anticipate," "estimate," "expect," "intend," "plan" and similar expressions are intended to identify forward-looking statements. These forward-looking statements include certain information relating to the Company's business strategy; statements including, but not limited to:

the amount and timing of rate increases and other regulatory matters including the recovery of costs recorded as regulatory assets;
expected profitability and results of operations;
trends;
goals, priorities and plans for, and cost of, growth and expansion;
strategic initiatives;
availability of water supply;
water usage by customers; and
the ability to pay dividends on common stock and the rate of those dividends.

The forward-looking statements in this report reflect what the Company currently anticipates will happen. What actually happens could differ materially from what it currently anticipates will happen. The Company does not intend to make a public announcement when forward-looking statements in this report are no longer accurate, whether as a result of new information, what actually happens in the future or for any other reason. Important matters that may affect what will actually happen include, but are not limited to:

changes in weather, including drought conditions or extended periods of heavy rainfall;
levels of rate relief granted;
the level of commercial and industrial business activity within the Company's service territory;
construction of new housing within the Company's service territory and increases in population;
changes in government policies or regulations, including the tax code;
the ability to obtain permits for expansion projects;
material changes in demand from customers, including the impact of conservation efforts which may impact the demand of customers for water;
changes in economic and business conditions, including interest rates, which are less favorable than expected;
loss of customers;
changes in, or unanticipated, capital requirements;
the impact of acquisitions;
changes in accounting pronouncements;
changes in the Company's credit rating or the market price of its common stock;
the ability to obtain financing; and
other matters set forth in Item 1A, "Risk Factors" of the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

Table of Contents

General Information

The primary business of the Company is to impound, purify to meet or exceed safe drinking water standards and distribute water. The Company also owns and operates two wastewater collection and treatment systems. The Company operates within its franchised water territory, which covers 39 municipalities within York County, Pennsylvania and nine municipalities within Adams County, Pennsylvania. The Company's wastewater operations include portions of three municipalities in York County, Pennsylvania. The Company is regulated by the Pennsylvania Public Utility Commission, or PPUC, in the areas of billing, payment procedures, dispute processing, terminations, service territory, debt and equity financing and rate setting. The Company must obtain PPUC approval before changing any practices associated with the aforementioned areas.

Water service is supplied through the Company's own distribution system. The Company obtains the bulk of its water supply from both the South Branch and East Branch of the Codorus Creek, which together have an average daily flow of 73.0 million gallons. This combined watershed area is approximately 117 square miles. The Company has two reservoirs, Lake Williams and Lake Redman, which together hold up to approximately 2.2 billion gallons of water. The Company has a 15-mile pipeline from the Susquehanna River to Lake Redman which provides access to an additional supply of 12.0 million gallons of untreated water per day. The Company also owns seven wells which are capable of providing a safe yield of approximately 366,000 gallons per day to supply water to its customers in Carroll Valley Borough and Cumberland Township, Adams County. As of September 30, 2016, the Company's average daily availability was 35.4 million gallons, and average daily consumption was approximately 19.1 million gallons. The Company's service territory had an estimated population of 194,000 as of December 31, 2015. Industry within the Company's service territory is diversified, manufacturing such items as fixtures and furniture, electrical machinery, food products, paper, ordnance units, textile products, injectable drug delivery systems, air conditioning systems, laundry detergent, barbells and motorcycles.

The Company's water business is somewhat dependent on weather conditions, particularly the amount and timing of rainfall. Revenues are particularly vulnerable to weather conditions in the summer months. Prolonged periods of hot and dry weather generally cause increased water usage for watering lawns, washing cars, and keeping golf courses and sports fields irrigated. Conversely, prolonged periods of dry weather could lead to drought restrictions from governmental authorities. Despite the Company's adequate water supply, customers may be required to cut back water usage under such drought restrictions which would negatively impact revenues. The Company has addressed some of this vulnerability by instituting minimum customer charges which are intended to cover fixed costs of operations under all likely weather conditions.

The Company's business does not require large amounts of working capital and is not dependent on any single customer or a very few customers for a material portion of its business. Increases in revenues are generally dependent on the Company's ability to obtain rate increases from the PPUC in a timely manner and in adequate amounts and to increase volumes of water sold through increased consumption and increases in the number of customers served. The Company continuously looks for water and wastewater acquisition and expansion opportunities both within and outside its current service territory as well as additional opportunities to enter into bulk water contracts with municipalities and other entities to supply water.

The Company has agreements with several municipalities to provide sewer billing and collection services. The Company also has a service line protection program on a targeted basis in order to further diversify its business. Under this optional program, customers pay a fixed monthly fee, and the Company will repair or replace damaged customer service lines, as needed, subject to an annual maximum dollar amount. Opportunities to expand both initiatives are being pursued.

Page 17

Results of Operations

Three Months Ended September 30, 2016 Compared With Three Months Ended September 30, 2015

Net income for the third quarter of 2016 was \$3,571, an increase of \$51, or 1.4%, from net income of \$3,520 for the same period of 2015. The primary contributing factors to the increase were higher operating revenues which were partially offset by higher operating expenses.

Operating revenues for the three months ended September 30, 2016 increased \$233, or 1.9%, from \$12,368 for the three months ended September 30, 2015 to \$12,601 for the corresponding 2016 period. The primary reasons for the increase were higher consumption, an increase in customers, and higher sewer collection service revenue. Total per capita consumption for the third quarter of 2016 was 0.8% higher than the same period last year. The average number of customers served in the 2016 period increased as compared to the 2015 period by 938 customers, from 65,809 to 66,747 customers.

Operating expenses for the third quarter of 2016 increased \$172, or 2.9%, from \$6,015 for the third quarter of 2015 to \$6,187 for the corresponding 2016 period. The increase was due to higher expenses of approximately \$77 for depreciation, \$49 for health insurance and \$47 for wages. Other expenses increased by a net of \$40. The increase was partially offset by approximately \$41 for wages and benefits that were able to be capitalized.

Interest on debt for the third quarter of 2016 increased \$16, or 1.2%, from \$1,304 for the third quarter of 2015 to \$1,320 for the corresponding 2016 period. The increase was due to higher short-term interest rates on the variable rate debt and an increase in long-term debt outstanding resulting from the bond issuance in July 2015.

Allowance for funds used during construction increased \$11, from \$40 in the third quarter of 2015 to \$51 in the 2016 period, due to a higher volume of eligible construction.

Other income (expenses), net for the third quarter of 2016 reflects increased expenses of \$13 as compared to the same period of 2015. Higher charitable contributions of approximately \$24 were the primary reason for the increase. Other expenses of approximately \$24 increased as compared to the same period of 2015. The increased expenses were partially offset by higher earnings on life insurance policies of approximately \$35.

Income taxes for the third quarter of 2016 decreased \$8, or 0.6%, compared to the same period of 2015 due to a higher volume of asset improvements eligible for the tax benefit under the Internal Revenue Service, or IRS, tangible property regulations, or TPR. The Company's effective tax rate was 27.8% for the third quarter of 2016 and 28.3% for the third quarter of 2015.

Nine Months Ended September 30, 2016 Compared With Nine Months Ended September 30, 2015

Net income for the first nine months of 2016 was \$8,904, a decrease of \$69, or 0.8%, from net income of \$8,973 for the same period of 2015. The primary contributing factors to the decrease were higher depreciation expense and higher income taxes, which were partially offset by increased operating revenues and lower operation and maintenance expenses.

[Table of Contents](#)

Page 18

Edgar Filing: YORK WATER CO - Form 10-Q

Operating revenues for the nine months ended September 30, 2016 increased \$227, or 0.6%, from \$35,472 for the nine months ended September 30, 2015 to \$35,699 for the corresponding 2016 period. The primary reasons for the increase in revenues were an increase in customers, and higher sewer billing and collection service revenue. The average number of customers served in the 2016 period increased as compared to the 2015 period by 982 customers, from 65,544 to 66,526 customers. Lower per capita consumption due in part to the prior year non-recurring interconnection with a neighboring municipality to provide water during an emergency event partially offset the increase. Total per capita consumption for the first nine months of 2016 was 1.6% lower than the same period of last year. For the remainder of the year, the Company expects revenues to be slightly lower than each of the first three quarters in 2016 because expected increases in the number of water and wastewater customers, from acquisitions and growth within the Company's service territory, are not expected to offset seasonal declines in consumption. Other regulatory actions and weather patterns could impact results, although weather is typically not a significant factor during the fourth quarter.

Operating expenses for the first nine months of 2016 increased \$73, or 0.4%, from \$18,303 for the first nine months of 2015 to \$18,376 for the corresponding 2016 period. The increase was primarily due to higher expenses of approximately \$205 for depreciation, \$103 for wages and \$43 for pension administration. The increased expenses were partially offset by approximately \$112 for wages and benefits that were able to be capitalized, and reduced expenses of \$72 for accounting and information technology services and \$46 for rate case. Other expenses decreased by a net of \$48. For the remainder of the year, the Company expects depreciation expense to continue to rise due to additional investment in utility plant, and other expenses to increase at a moderate rate as costs to maintain and extend the distribution system continue to rise and as additional water and wastewater systems are acquired. Environmental compliance costs may add additional expense (see Note 4 to the financial statements included herein for additional information).

Interest on debt for the first nine months of 2016 increased \$67, or 1.7%, from \$3,874 for the first nine months of 2015 to \$3,941 for the corresponding 2016 period. The increase was due to an increase in long-term debt outstanding resulting from the bond issuance in July 2015. Interest expense for the remainder of the year is expected to remain consistent or be slightly higher if short-term interest rates continue to rise.

Allowance for funds used during construction increased \$3, from \$148 in the first nine months of 2015 to \$151 in the 2016 period, due to a higher volume of eligible construction. Allowance for funds used during construction for the remainder of the year is expected to increase based on a projected increase in the amount of eligible construction.

Other income (expenses), net for the first nine months of 2016 reflects decreased expenses of \$40 as compared to the same period of 2015. Higher earnings on life insurance policies of \$66 and lower charitable contributions of \$35 were the primary reasons for the decrease. The decreased expenses were partially offset by higher outside services of approximately \$28. Other expenses increased by a net of approximately \$33 as compared to the same period of 2015. For the remainder of the year, other income (expenses) will be largely determined by the change in market returns and discount rates for retirement programs and related assets. Discount rates are likely to be lower at the end of the year resulting in higher retirement expense.

Income taxes for the first nine months of 2016 increased \$199, or 5.0%, compared to the same period of 2015 due to higher taxable income and a lower volume of asset improvements eligible for the tax benefit of the IRS TPR. The Company's effective tax rate was 31.9% for the first nine months of 2016 and 30.7% for the first nine months of 2015. The Company expects the effective tax rate to be approximately 28% to 32% for 2016 due to the continued expensing of asset improvements that would have been capitalized for tax purposes prior to the implementation of the TPR. The Company's effective tax rate will vary depending on the level of eligible asset improvements that are placed in service each period.

Rate Matters

See Note 12 to the financial statements included herein for a discussion of rate matters.

Table of Contents

Page 19

The benefit from the implementation of the IRS TPR impacts the rate matters of the Company. Earnings in excess of the regulatory benchmark prevent the collection of a distribution system improvement charge, which is the case for 2016. It may also lengthen the amount of time until filing the next rate increase request. As a result, the Company does not expect to file a rate increase request in 2016. When the Company does file for its next rate increase, the PPUC will take into account the lower income taxes which resulted from the implementation of the IRS TPR, effectively reducing the amount of revenue required in future years and lowering the Company's rate increase request.

Acquisitions

See Note 10 to the financial statements included herein for a discussion of completed acquisitions included in financial results.

On October 8, 2013, the Company signed an agreement to purchase the wastewater assets of SYC WWTP, L.P. in Shrewsbury and Springfield Townships, York County, Pennsylvania. Completion of the acquisition is contingent upon receiving approval from all required regulatory authorities. Due to unforeseen delays, closing is not expected until 2017 at which time the Company will add approximately 30 commercial and industrial wastewater customers.

On January 18, 2016, the Company signed an agreement to purchase the wastewater collection assets of West York Borough in York County, Pennsylvania. Completion of the acquisition is contingent upon receiving approval from all required regulatory authorities. Closing is expected in the fourth quarter of 2016 at which time the Company will add approximately 1,700 wastewater customers.

On August 8, 2016, the Company signed an agreement to purchase the water assets of Stockham's Village Mobile Home Park in Adams County, Pennsylvania. Completion of this acquisition is contingent upon receiving approval from all required regulatory authorities. The Company expects to begin serving approximately 80 new customers through an interconnection with its current distribution system in the first quarter of 2017.

On October 13, 2016, the Company completed the acquisition of the water assets of the Westwood Mobile Home Park in York County, Pennsylvania. The Company began operating the existing system through an interconnection with its current distribution system on October 17, 2016. The acquisition resulted in the addition of approximately 200 new water customers. These customers were previously served by the Company through a single customer connection to the park.

In total, these acquisitions are expected to be immaterial to Company results. The Company is also pursuing other bulk water contracts and acquisitions in and around its service territory to help offset any further declines in per capita water consumption and to grow its business.

Capital Expenditures

For the nine months ended September 30, 2016, the Company invested \$8,302 in construction expenditures for routine items, further upgrades to water treatment facilities and information and communication technology, as well as various replacements of infrastructure. In addition, the Company invested \$29 in the acquisition of water systems. The Company was able to fund construction expenditures using internally-generated funds, proceeds from its stock purchase plans and customer advances and contributions.

The Company anticipates construction expenditures for the remainder of 2016 of approximately \$4,000 exclusive of any potential acquisitions not yet approved. In addition to routine transmission and distribution projects, a portion of the anticipated expenditures will be for additional main extensions, an additional raw water pumping station and force main, and various replacements and improvements to infrastructure. The Company intends to use primarily cash on hand and internally-generated funds for its anticipated construction and fund the remainder through proceeds from its

stock purchase plans and customer advances and contributions. Customer advances and contributions are expected to account for less than 5% of funding requirements during the remainder of 2016. The Company believes it will have adequate credit facilities to meet its anticipated capital needs in 2017.

[Table of Contents](#)

Page 20

Liquidity and Capital Resources

Cash

The Company manages its cash through a cash management account that is directly connected to one of its lines of credit. Excess cash generated automatically pays down outstanding borrowings under the line of credit arrangement. If there are no outstanding borrowings, the cash is used as an earnings credit to reduce banking fees. Likewise, if additional funds are needed beyond what is generated internally for payroll, to pay suppliers, to fund capital expenditures, or to pay debt service, funds are automatically borrowed under the line of credit. The Company utilized a significant portion of its cash on hand for cash outflows, specifically a \$2,300 contribution to its pension trusts and its quarterly dividend payments, but did not use its lines of credit during the first nine months of 2016. The Company has built its cash through internally-generated funds, accumulating a cash balance of \$6,199 as of September 30, 2016. The Company expects the cash balance to be fully utilized in the first quarter of 2017, after which the cash management facility and other lines of credit are expected to provide the necessary liquidity and funding for the Company's operations, capital expenditures, acquisitions and potential buybacks of stock.

Accounts Receivable

The accounts receivable balance tends to follow the change in revenues but is also affected by the timeliness of payments by customers and the level of the reserve for doubtful accounts. This quarter, higher revenue levels as compared to the end of 2015 resulted in an increase in accounts receivable. A reserve is maintained at a level considered adequate to provide for losses that can be reasonably anticipated based on inactive accounts with outstanding balances. Management periodically evaluates the adequacy of the reserve based on past experience, agings of the receivables, adverse situations that may affect a customer's ability to pay, current economic conditions, and other relevant factors. If the status of these factors deteriorates, the Company may incur additional expenses for uncollectible accounts and experience a reduction in its internally-generated funds.

Internally-generated Funds

The amount of internally-generated funds available for operations and construction depends on the Company's ability to obtain timely and adequate rate relief, changes in regulations including taxes, customers' water usage, weather conditions, customer growth and controlled expenses. In the first nine months of 2016, the Company generated \$14,016 internally from operations as compared to the \$13,616 it generated in the first nine months of 2015 due primarily to lower income taxes and interest paid.

Credit Lines

Historically, the Company has borrowed \$15,000 to \$20,000 under its lines of credit before refinancing with long-term debt or equity capital. As of September 30, 2016, the Company maintained unsecured lines of credit aggregating \$41,500 with four banks at interest rates ranging from LIBOR plus 1.20% to LIBOR plus 1.25%. The Company had no outstanding borrowings under any of its lines of credit as of September 30, 2016. In the second quarter of 2016, the Company renewed two of its committed lines of credit aggregating \$24,000 and extended the maturity date to May 2018. In addition, the Company renewed its \$5,000 committed line of credit increasing the available amount to \$7,500, lowering the interest rate from LIBOR plus 1.50% to LIBOR plus 1.25%, and extending the maturity to June 2017. In the third quarter of 2016, the Company entered into an agreement with a fourth bank for a \$10,000 unsecured committed line of credit at an interest rate of LIBOR plus 1.20% maturing in September 2017.

The Company has taken steps to manage the risk of reduced credit availability. It has maintained committed lines of credit that cannot be called on demand and obtained a 2-year revolving maturity on its larger facilities. One of the Company's banks recently increased the available amount and reduced the interest rate on its line of credit, and a new relationship was established with another bank for a committed line of credit at an interest rate matching the lowest rate currently offered. Despite these factors, there is no guarantee that the Company will be able to obtain sufficient lines of credit with favorable terms in the future. If the Company is unable to obtain sufficient lines of credit or to refinance its line of credit borrowings with long-term debt or equity when necessary, it may have to eliminate or postpone capital expenditures. Management believes the Company will have adequate capacity under its current lines

of credit to meet anticipated financing needs throughout 2016 and 2017.

Table of Contents

Page 21

Long-term Debt

The Company's loan agreements contain various covenants and restrictions. Management believes it is currently in compliance with all of these restrictions. See Note 4 to the Company's Annual Report on Form 10-K for the year ended December 31, 2015 for additional information regarding these restrictions.

The Pennsylvania Economic Development Financing Authority Series 2014 bonds contain special redemption provisions. Under these provisions, representatives of deceased beneficial owners have the right to request redemption prior to the stated maturity of all or part of their holding in the bonds. Current maturities include \$10 for bonds that met the special provisions and have been tendered for redemption. The Company is not obligated to redeem any individual holding exceeding \$25, or aggregate holdings exceeding \$300 in any annual period.

The York County Industrial Development Authority Series 2006 bonds are subject to optional redemption provisions that allow the Company to redeem all or a portion of the bonds on or after October 1, 2016. The Company may refinance these bonds prior to maturity to take advantage of lower interest rates.

The Company's total long-term debt as a percentage of the total capitalization, defined as total common stockholders' equity plus total long-term debt, was 43.5% as of September 30, 2016, compared with 44.5% as of December 31, 2015. The Company expects to allow the debt percentage to trend upward until it approaches fifty percent before considering additional equity. A debt to total capitalization ratio between forty-six and fifty percent has historically been acceptable to the PPUC in rate filings. Due to its recent ability to generate and retain cash internally, the Company has been able to keep its ratio below fifty percent.

Income Taxes, Deferred Income Taxes and Uncertain Tax Positions

The Company has a substantial deferred income tax asset primarily due to the differences between the book and tax balances of the pension and deferred compensation plans. The Company does not believe a valuation allowance is required due to the expected generation of future taxable income during the periods in which those temporary differences become deductible.

The Company has seen an increase in its deferred income tax liability amounts as a result of the accelerated and bonus depreciation deduction available for federal tax purposes which creates differences between book and tax depreciation expense. The Company expects this trend to continue as it makes significant investments in capital expenditures subject to accelerated and bonus depreciation or TPR.

The Company filed for a change in accounting method under the IRS TPR effective in 2014. Under the change in accounting method, the Company is permitted to deduct the costs of certain asset improvements that were previously being capitalized and depreciated for tax purposes as an expense on its income tax return. This ongoing deduction results in a reduction in the effective income tax rate, a net reduction in income tax expense, and a reduction in the amount of income taxes currently payable. It also results in increases to deferred tax liabilities and regulatory assets representing the appropriate book and tax basis difference on capital additions. The Company expects an effective tax rate of 28% to 32% each year based on current asset improvement estimates. The effective tax rate will vary depending on the level of eligible assets improvements that are placed in service each period.

The Company has determined there are no uncertain tax positions that require recognition as of September 30, 2016.

Common Stock

Common stockholders' equity as a percent of the total capitalization was 56.5% as of September 30, 2016, compared with 55.5% as of December 31, 2015. The volume of share repurchases and line of credit borrowings, among other things, could reduce this percentage in the future. It is the Company's general intent to target a ratio between fifty and fifty-four percent.

Table of Contents

Credit Rating

On March 30, 2016, Standard & Poor's affirmed the Company's credit rating at A-, with a stable outlook and adequate liquidity. The Company's ability to maintain its credit rating depends, among other things, on adequate and timely rate relief, which it has been successful in obtaining, its ability to fund capital expenditures in a balanced manner using both debt and equity and its ability to generate cash flow. The Company's objectives are to continue to maximize its funds provided by operations and maintain a strong capital structure in order to be able to attract capital.

Environmental Matters

During its recently completed triennial testing, the Company determined it exceeded the action level for lead at the customer's tap as established by the Lead and Copper Rule issued by the U.S. Environmental Protection Agency. The rule allows the Company to have five samples of the 50 high-risk homes tested exceed the action level of 15 parts per billion (PPB). The testing found that six properties with lead service lines, all built before 1935, exceeded the action level, and the reported exceedance amount was just 1 PPB. The Company has determined that only 3% of the company-owned service lines in the system are lead. The Company will be required to engage in more frequent testing for lead, public education, and annually replace 7% of the remaining company-owned lead service lines in its distribution system. The Company has announced plans to perform in excess of the required actions. Specifically, the Company will provide the affected customers with a free water test and a 200 gallon per month credit to flush their line in order to reduce any lead content until their lead service line has been replaced. The cost of the water tests and flushing credits is expected to be approximately \$71 over the next four years. In addition, the Company expects to exceed the mandated replacement schedule by replacing all of the remaining company-owned lead service lines within the next three to four years. The cost for these service line replacements is estimated at \$4,600, and will be integrated into the Company's annual capital budgets for replacements over the next three to four years. The Company may update these estimates as more facts become available.

Critical Accounting Estimates

The methods, estimates and judgments the Company used in applying its accounting policies have a significant impact on the results reported in its financial statements. The Company's accounting policies require management to make subjective judgments because of the need to make estimates of matters that are inherently uncertain. The Company's most critical accounting estimates include regulatory assets and liabilities, revenue recognition and accounting for its pension plans. There has been no significant change in accounting estimates or the method of estimation during the quarter ended September 30, 2016.

Off-Balance Sheet Arrangements

The Company does not use off-balance sheet transactions, arrangements or obligations that may have a material current or future effect on financial condition, results of operations, liquidity, capital expenditures, capital resources or significant components of revenues or expenses. The Company does not use securitization of receivables or unconsolidated entities. The Company uses a derivative financial instrument, an interest rate swap agreement discussed in Note 7 to the financial statements included herein, for risk management purposes. The Company does not engage in trading or other risk management activities, does not use other derivative financial instruments for any purpose, has no material lease obligations, no guarantees and does not have material transactions involving related parties.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company's operations are exposed to market risks primarily as a result of changes in interest rates under its lines of credit. The Company has unsecured lines of credit with four banks having a combined maximum availability of \$41,500. The first line of credit, in the amount of \$13,000, is a committed line of credit with a revolving 2-year maturity (currently May 2018), and carries an interest rate of LIBOR plus 1.20%. The second line of credit, in the amount of \$11,000, is a committed line of credit, which currently matures in May 2018 and carries an interest rate of LIBOR plus 1.25%. The third line of credit, in the amount of \$7,500, is a committed line of credit, which matures in June 2017 and carries an interest rate of LIBOR plus 1.25%. The fourth line of credit, in the amount of \$10,000, is a committed line of credit, which matures in September 2017 and carries an interest rate of LIBOR plus 1.20%. The Company had no outstanding borrowings under any of its lines of credit as of September 30, 2016. Other than lines of credit, the Company has long-term fixed rate debt obligations that are not subject to interest rate risk as shown in Note 6 to the financial statements included herein, and a variable rate PEDFA loan agreement, which is subject to minimal market risk, described below.

In May 2008, the PEDFA issued \$12,000 aggregate principal amount of PEDFA Exempt Facilities Revenue Bonds, Series A (the "2008 Bonds"). The proceeds of this bond issue were used to refund the \$12,000 PEDFA Exempt Facilities Revenue Bonds, Series B of 2004 which were refunded due to bond insurer downgrading issues. The PEDFA then loaned the proceeds to the Company pursuant to a variable interest rate loan agreement with a maturity date of October 1, 2029. The interest rate under this loan agreement averaged 0.60% during the three months ended September 30, 2016 and 0.38% during the nine months ended September 30, 2016. In connection with the loan agreement, the Company retained its interest rate swap agreement whereby the Company exchanged its floating rate obligation for a fixed rate obligation. The purpose of the interest rate swap is to manage the Company's exposure to fluctuations in the interest rate. If the interest rate swap agreement works as intended, the receive rate on the swap should approximate the variable rate the Company pays on the PEDFA Series A 2008 Bond Issue, thereby minimizing its risk. See Note 7 to the financial statements included herein for additional information regarding the interest rate swap.

In addition to the interest rate swap agreement, the Company entered into a Reimbursement, Credit and Security Agreement with PNC Bank, National Association ("the Bank"), dated as of May 1, 2008, in order to enhance the marketability of and to minimize the interest rate on the 2008 Bonds. This agreement provides for a direct pay letter of credit issued by the Bank to the trustee for the 2008 Bonds. The current expiration date of the letter of credit is June 30, 2018. It is reviewed annually for a potential extension of the expiration date. The Company's responsibility under this agreement is to reimburse the Bank on a timely basis for interest payments made to the bondholders and for any tendered bonds that could not be remarketed. The Company has fourteen months from the time bonds are tendered to reimburse the Bank. If the direct pay letter of credit is not renewed, the Company would be required to pay the Bank immediately for any tendered bonds and reclassify a portion of the bonds as current liabilities. In addition, the interest rate swap agreement would terminate causing a potential payment by the Company to the counterparty. Both the letter of credit and the swap agreement can potentially be transferred upon this type of event.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's management, with the participation of the Company's President and Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this report. Based upon this evaluation, the Company's President and Chief Executive Officer along with the Chief Financial Officer concluded that the Company's disclosure controls and procedures as of the end of the period covered by this report are effective such that the information required to be disclosed by the Company in reports filed under the Securities Exchange Act of 1934, as amended, is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to the Company's management, including the President and Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure. A controls system cannot provide absolute assurance, however, that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

No change in the Company's internal control over financial reporting occurred during the Company's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II – OTHER INFORMATION

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A – Risk Factors in our Form 10-K, and in our other public filings, which could materially affect our business, financial condition or future results. Other than as set forth below, there have been no material changes from risk factors previously disclosed in Part I, Item 1A – Risk Factors in our Form 10-K.

If our sources of water or water at customer sites become contaminated, it could subject us to reduction in usage, regulatory actions, damage to our reputation and private litigation.

As described above in "Management's Discussion and Analysis – Environmental Matters", during our recently completed triennial testing, we determined that we exceeded the action level for lead in rules issued by the U.S. Environmental Protection Agency, or EPA. The Company is working closely with the EPA and the Pennsylvania Department of Environmental Protection and has announced plans to exceed the requirements to address the test results, including a plan to replace all company-owned lead service lines in the next three to four years. While we believe that our response has been appropriate, we may incur significant costs in responding to this incident and may not be able to recover such costs through rates or from insurers.

Our primary business is to impound, purify to meet or exceed safe drinking water standards and distribute water. Contamination of the water provided to our customers exposes us to risks, including regulatory or government action, customer exposure to contamination or hazardous substances in the water, and resulting private claims and litigation. Negative impacts to our reputation may occur even if we are not responsible for any contamination or its consequences. Pending or future claims against us and reputational damage could have a material adverse impact on our business, financial condition, and results of operations.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On March 11, 2013, the Board of Directors authorized a share repurchase program granting the Company authority to repurchase up to 1,200,000 shares of the Company's common stock from time to time. The stock repurchase program has no specific end date and under the stock repurchase program, the Company may repurchase shares in the open market or through privately negotiated transactions. The Company may suspend or discontinue the repurchase program at any time. The Company did not repurchase any shares that were not part of the publicly announced plan during the quarter ended September 30, 2016.

The following table summarizes the Company's purchases of its common stock for the quarter ended September 30, 2016.

<u>Period</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid per Share</u>	<u>Total Number of Shares Purchased as a Part of Publicly Announced Plans or Programs</u>	<u>Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs</u>
Jul. 1 – Jul. 31, 2016	-	\$ -	-	702,004
Aug. 1 – Aug. 31, 2016	-	\$ -	-	702,004
Sept. 1 – Sept. 30, 2016	16,849	\$ 28.17	16,849	685,155
Total	16,849	\$ 28.17	16,849	685,155

The Company will fund repurchases under the share repurchase program with internally generated funds and borrowings under its credit facilities, if necessary.
