FORM 10-Q

x Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended June 30, 2012

or

o Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____

Commission File Number: 1-12213

COVANCE INC.

(Exact name of Registrant as specified in its Charter)

Delaware

22-3265977

Edgar Filing: COVANCE INC - Form 10-Q

(State of Incorporation)

(I.R.S. Employer Identification No.)

210 Carnegie Center, Princeton, New Jersey
(Address of Principal Executive Offices)

08540
(Zip Code)

Registrant's telephone number, including area code: **(609) 452-4440**

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act (the Exchange Act) of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files). YES NO

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. (See definition of smaller reporting company, accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act).

Large Accelerated Filer

Accelerated Filer

Non-Accelerated Filer

Smaller Reporting Company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). YES NO

APPLICABLE ONLY TO CORPORATE ISSUERS:

As of July 20, 2012, the Registrant had 55,087,916 shares of common stock outstanding.

Table of Contents

COVANCE INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)
June 30, 2012 and 2011
(dollars in thousands, unless otherwise indicated)

1. Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and six months ended June 30, 2012 are not necessarily indicative of the results that may be expected for the year ending December 31, 2012. The balance sheet at December 31, 2011 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by GAAP for complete financial statements. You should read these unaudited consolidated financial statements together with the historical consolidated financial statements of Covance Inc. and subsidiaries (Covance or the Company) for the years ended December 31, 2011, 2010 and 2009 included in our Annual Report on Form 10-K for the year ended December 31, 2011.

2. Summary of Significant Accounting Policies

Principles of Consolidation

These unaudited consolidated financial statements include the accounts of all entities controlled by Covance. All significant intercompany accounts and transactions are eliminated. The equity method of accounting is used for investments in affiliates in which Covance owns between 20 and 50 percent and does not have the ability to exercise control. For investments in which Covance owns less than 20 percent and does not have the ability to exercise significant influence over operating or financial decisions of the investee, the cost method of accounting is applied. Where the fair value of the shares of the cost method investee is based on quoted prices in active markets, Covance accounts for such investments as available-for-sale securities. See Note 4.

Use of Estimates

These unaudited consolidated financial statements have been prepared in conformity with GAAP, which requires management to make estimates and assumptions about future events that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from

these estimates.

Inventory

Inventories, which consist principally of finished goods and supplies, are valued at the lower of cost (first-in, first-out method) or market.

Prepaid Expenses and Other Current Assets

In connection with the management of multi-site clinical trials, Covance pays on behalf of its customers fees to investigators, volunteers and other out-of-pocket costs (such as travel, printing, meetings, couriers, etc.), for which the Company is reimbursed at cost, without mark-up or profit. Amounts receivable from customers in connection with billed and unbilled investigator fees, volunteer payments and other out-of-pocket pass-through costs are included in prepaid expenses and other current assets in the accompanying consolidated balance sheets and totaled \$85.8 million and \$61.3 million at June 30, 2012 and December 31, 2011, respectively. See Note 2 Reimbursable Out-of-Pocket Expenses .

Table of Contents

COVANCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

June 30, 2012 and 2011

(dollars in thousands, unless otherwise indicated)

Impairment of Long-Lived Assets

Covance reviews its long-lived assets, other than goodwill and other indefinite lived intangible assets, for impairment when events or changes in circumstances occur that indicate that the carrying value of the asset may not be recoverable. The assessment of possible impairment is based upon Covance's judgment of its ability to recover the value of the asset from the expected future undiscounted cash flows of the related operations. Actual future cash flows may be greater or less than estimated. During the second quarter of 2012, Covance determined that the carrying value of its equity method investment in a supplier of research products was no longer recoverable based upon changes in the research product market. The impairment was determined to be other-than-temporary and Covance recorded a charge of \$7.4 million to write off the remaining carrying value of the equity investment as of June 30, 2012. See Note 4.

Goodwill and Other Intangible Assets and Impairment

Goodwill represents costs in excess of the fair value of net tangible and identifiable net intangible assets acquired in business combinations. Covance performs an annual test for impairment of goodwill and other indefinite lived intangible assets during the fourth quarter. Covance tests goodwill for impairment at the reporting unit level only when, after completing a qualitative analysis, it is determined that it is more likely than not that the fair value of a reporting unit is below its carrying value. This test is performed by comparing the carrying value of the reporting unit to its fair value. Covance assesses fair value based upon its estimate of the present value of the future cash flows that it expects to be generated by the reporting unit. The most recent annual test for impairment performed for 2011 indicated that no reporting units were at significant risk for impairment. However, in the second quarter of 2012, Covance commenced actions to close its clinical pharmacology operations located in Basel, Switzerland and as a result determined the goodwill associated with the acquisition of the Basel clinic in March 2009 was impaired and recorded a charge of \$18.0 million to write off the carrying value of the goodwill as of June 30, 2012. The Basel clinic is part of Covance's Early Development segment and clinical pharmacology reporting unit, however, because the clinic was operated on a standalone basis and was not integrated into the reporting unit after its acquisition, the related goodwill was evaluated for impairment at the site level and not the reporting unit level. In light of the impairment recognized for the Basel clinic, the Company conducted an impairment analysis of the remaining goodwill in the clinical pharmacology reporting unit and determined there was no additional impairment resulting from this action. There were no other events or changes in circumstances through June 30, 2012 that warranted a reconsideration of our impairment test results.

Revenue Recognition

Covance recognizes revenue either as services are performed or products are delivered, depending on the nature of the work contracted. Historically, a majority of Covance's net revenues have been earned under contracts which range in duration from a few months to two years, but

Edgar Filing: COVANCE INC - Form 10-Q

can extend in duration up to five years or longer. Covance also has committed minimum volume arrangements with certain clients with initial terms that generally range in duration from three to ten years. Underlying these arrangements are individual project contracts for the specific services to be provided. These arrangements enable our clients to secure our services in exchange for which they commit to purchase an annual minimum dollar value (volume) of services. Under these types of arrangements, if the annual minimum volume commitment is not reached, the client is required to pay Covance for the shortfall. Progress towards the achievement of annual minimum volume commitments is monitored throughout the year. Annual minimum commitment shortfalls are not included in net revenues until the amount has been determined and agreed to by the client.

Service contracts generally take the form of fee-for-service or fixed-price arrangements. In cases where performance spans multiple accounting periods, revenue is recognized as services are performed, measured on a proportional-performance basis, generally using output measures that are specific to the service provided. Examples of output measures in our early development segment include the number of slides read, dosings performed, or specimens prepared for preclinical laboratory services, or number of dosings or number of volunteers enrolled for clinical pharmacology. Examples of output measures in our late-stage development segment s Phase II-IV clinical development service offering include among others, number of investigators enrolled, number of sites initiated, number of patients enrolled and number of monitoring visits completed. Revenue is determined by dividing the actual units of work completed by the total units of work required under the contract and multiplying that percentage by the total contract value. The total contract value, or total contractual payments, represents the

Table of Contents

COVANCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

June 30, 2012 and 2011

(dollars in thousands, unless otherwise indicated)

aggregate contracted price for each of the agreed upon services to be provided. Covance does not have any contractual arrangements spanning multiple accounting periods where revenue is recognized on a proportional-performance basis under which the Company has earned more than an immaterial amount of performance-based revenue (i.e., potential additional revenue tied to specific deliverables or performance). Changes in the scope of work are common, especially under long-term contracts, and generally result in a change in contract value. Once the client has agreed to the changes in scope and renegotiated pricing terms, the contract value is amended and revenue is recognized, as described above. Estimates of costs to complete are made to provide, where appropriate, for losses expected on contracts. Costs are not deferred in anticipation of contracts being awarded, but instead are expensed as incurred.

Billing schedules and payment terms are generally negotiated on a contract-by-contract basis. In some cases, Covance bills the client for the total contract value in progress-based installments as certain non-contingent billing milestones are reached over the contract duration, such as, but not limited to, contract signing, initial dosing, investigator site initiation, patient enrollment or database lock. The term *billing milestone* relates only to a billing trigger in a contract whereby amounts become billable and payable in accordance with a negotiated predetermined billing schedule throughout the term of a project. These billing milestones are not performance-based (i.e., potential additional arrangement consideration tied to specific deliverables or performance). In other cases, billing and payment terms are tied to the passage of time (e.g., monthly billings). In either case, the total contract value and aggregate amounts billed to the client would be the same at the end of the project. While Covance attempts to negotiate terms that provide for billing and payment of services prior or within close proximity to the provision of services, this is not always the case, as evidenced by fluctuations in the levels of unbilled receivables and unearned revenue from period to period. While a project is ongoing, cash payments are not necessarily representative of aggregate revenue earned at any particular point in time, as revenues are recognized when services are provided, while amounts billed and paid are in accordance with the negotiated billing and payment terms.

In some cases, payments received are in excess of revenue recognized. For example, a contract invoicing schedule may provide for an upfront payment of 10% of the full contract value upon contract signing, but at the time of signing, performance of services has not yet begun, and therefore, no revenue has yet been recognized. Payments received in advance of services being provided, such as in this example, are deferred as unearned revenue on the balance sheet. As the contracted services are subsequently performed and the associated revenue is recognized, the unearned revenue balance is reduced by the amount of revenue recognized during the period.

In other cases, services may be provided and revenue is recognized before the client is invoiced. In these cases, revenue recognized will exceed amounts billed, and the difference, representing an unbilled receivable, is recorded for this amount which is currently unbillable to the customer pursuant to contractual terms. Once the client is invoiced, the unbilled receivable is reduced for the amount billed, and a corresponding account receivable is recorded. All unbilled receivables are billable to customers within one year from the respective balance sheet date.

Most contracts are terminable by the client, either immediately or upon notice. These contracts often require payment to Covance of expenses to wind down the study or project, fees earned to date and, in some cases, a termination fee or a payment to Covance of some portion of the fees or

Edgar Filing: COVANCE INC - Form 10-Q

profits that could have been earned by Covance under the contract if it had not been terminated early. Termination fees are included in net revenues when realization is assured. In connection with the management of multi-site clinical trials, Covance pays on behalf of its customers fees to investigators, volunteers and other out-of-pocket costs (such as for travel, printing, meetings, couriers, etc.), for which it is reimbursed at cost, without mark-up or profit. Investigator fees are not reflected in total revenues or expenses where Covance acts in the capacity of an agent on behalf of the pharmaceutical company sponsor, passing through these costs without risk or reward to Covance. All other out-of-pocket costs are included in total revenues and expenses.

Taxes

Covance uses the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the expected future tax consequences of differences between the carrying amounts of assets and liabilities and their respective tax bases using enacted tax rates in effect for the year in which the temporary differences are

Table of Contents

COVANCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

June 30, 2012 and 2011

(dollars in thousands, unless otherwise indicated)

expected to reverse. The effect on deferred taxes of a change in enacted tax rates is recognized in income in the period when the change is effective.

The Company recognizes a tax benefit from an uncertain tax position only if the Company believes it is more likely than not to be sustained upon examination based on the technical merits of the position. The amount of the accrual for which an exposure exists is measured as the largest amount of benefit determined on a cumulative probability basis that the Company believes is more likely than not to be realized upon ultimate settlement of the position. Components of the reserve are classified as either a current or long-term liability in the consolidated balance sheet based on when the Company expects each of the items to be settled. Covance accrues interest and penalties in relation to unrecognized tax benefits as a component of income tax expense.

As of June 30, 2012 and December 31, 2011, the balance of the reserve for unrecognized tax benefits was \$16.9 million, including accrued interest of \$2.0 million, and \$16.4 million, including interest of \$1.6 million, respectively, which is recorded as a long-term liability in other liabilities on the consolidated balance sheet. This reserve relates to exposures for income tax matters such as transfer pricing, nexus and deemed income.

The Company also maintains a tax reserve related to exposures for non-income tax matters including value-added tax, state sales and use and other taxes. The balance of this reserve was \$1.1 million and \$1.0 million at June 30, 2012 and December 31, 2011, respectively, and is recorded as a current liability in accrued expenses and other current liabilities on the consolidated balance sheet.

While Covance believes it has identified all reasonably identifiable exposures and the reserve it has established for identifiable exposures is appropriate under the circumstances, it is possible that additional exposures exist and that exposures may be settled at amounts different than the amounts reserved. It is also possible that changes in facts and circumstances could cause Covance to either materially increase or reduce the carrying amount of its tax reserve.

Covance's historical policy has been to leave its unremitted foreign earnings invested indefinitely outside the United States. Covance intends to continue to leave its unremitted foreign earnings invested indefinitely outside the United States. As a result, taxes have not been provided on any of the remaining accumulated foreign unremitted earnings as of June 30, 2012.

Reimbursable Out-of-Pocket Expenses

As discussed in Note 2 Prepaid Expenses and Other Current Assets , Covance pays on behalf of its customers fees to investigators, volunteers and other out-of-pocket costs for which the Company is reimbursed at cost, without mark-up or profit. Amounts paid to volunteers and other out-of-pocket costs are reflected in operating expenses, while the reimbursements received are reflected in revenues in the consolidated statements of income. Covance excludes from revenue and expense in the consolidated statements of income fees paid to investigators and the associated reimbursement since Covance acts as an agent on behalf of the pharmaceutical company sponsors with regard to investigator payments.

Stock-Based Compensation

The Company sponsors several stock-based compensation plans pursuant to which non-qualified stock options and restricted stock awards are granted to eligible employees. These plans are described more fully in Note 7 herein and Note 10 to our audited consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2011. The grant-date fair value of awards expected to vest is expensed on a straight-line basis over the vesting period of the related awards.

(dollars in thousands, unless otherwise indicated)

Defined Benefit Pension Plans

The Company sponsors various pension and other post-retirement benefit plans. These plans are described more fully in Note 6 herein and Note 9 to our audited consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2011. The measurement of the related benefit obligations and the net periodic benefit costs recorded each year are based upon actuarial computations, which require management's judgment as to certain assumptions. These assumptions include the discount rates to use in computing the present value of the benefit obligations and the net periodic benefit costs, the expected future rate of salary increases (for pay-related plans) and the expected long-term rate of return on plan assets (for funded plans). The discount rates are derived based on a hypothetical yield curve represented by a series of annualized individual discount rates. The expected long-term rate of return on plan assets is based on the target asset allocation and the average expected rate of growth for the asset classes invested. The average expected rate of growth is derived from a combination of historic returns, current market indicators, the expected risk premium for each asset class and the opinion of professional advisors. Liabilities related to all of Covance's pension and other post-retirement benefit plans are measured as of December 31.

Earnings Per Share (EPS)

Basic EPS is computed by dividing net (loss) income available to common stockholders by the weighted average number of shares outstanding during the period. The computation of diluted EPS is similar to the computation of basic EPS, except that the denominator is increased to include the number of additional common shares that would have been outstanding if the dilutive potential common shares had been issued; computed under the treasury stock method.

In computing diluted EPS for the three months ended June 30, 2012, there were 1,500,115 potentially dilutive shares that were not included in the computation, as their effect would be anti-dilutive. In computing diluted EPS for the three months ended June 30, 2011, the denominator was increased by 1,589,504 shares, and for the six months ended June 30, 2012 and 2011, the denominator was increased by 1,490,744 shares and 1,559,065 shares, respectively, representing the dilutive effect of all unvested restricted shares as well as those stock options outstanding at June 30, 2012 and 2011, with exercise prices less than the average market price of Covance's common stock during each respective period. Excluded from the computation of diluted EPS for the three months ended June 30, 2012 were options to purchase 3,499,610 shares of common stock at prices ranging from \$46.40 to \$94.34 per share because the exercise prices of such options were greater than the average market price of Covance's common stock during this period. Excluded from the computation of diluted EPS for the six months ended June 30, 2012 were options to purchase 3,205,785 shares of common stock at prices ranging from \$46.70 to \$94.34 per share because the exercise prices of such options were greater than the average market price of Covance's common stock during this period. Excluded from the computation of diluted EPS for the three months ended June 30, 2011 were options to purchase 457,890 shares of common stock at prices ranging from \$59.69 to \$94.34 per share because the exercise prices of such options were greater than the average market price of Covance's common stock during this period. Excluded from the computation of diluted EPS for the six months ended June 30, 2011 were options to purchase 1,221,146 shares of

Edgar Filing: COVANCE INC - Form 10-Q

common stock at prices ranging from \$58.09 to \$94.34 per share because the exercise prices of such options were greater than the average market price of Covance's common stock during this period.

Supplemental Cash Flow Information

Cash paid for interest for the six month periods ended June 30, 2012 and 2011 was \$1.9 million and \$2.3 million, respectively. Cash paid for income taxes for the six month periods ended June 30, 2012 and 2011 totaled \$22.5 million and \$42.4 million, respectively. The change in income taxes payable in the consolidated statement of cash flows for the six months ended June 30, 2012 and 2011 includes as an operating cash outflow the excess tax benefit received from the exercise of non-qualified stock options of \$0.4 million and \$0.7 million, respectively (a corresponding cash inflow of \$0.4 million and \$0.7 million, respectively, for both periods has been included in financing cash flows).

Table of Contents**COVANCE INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(UNAUDITED)****June 30, 2012 and 2011****(dollars in thousands, unless otherwise indicated)****Subsequent Events**

Subsequent events are defined as those events or transactions that occur after the balance sheet date, but before the financial statements are filed with the Securities and Exchange Commission. See Note 10.

3. Treasury Stock

The Board of Directors has, from time to time, approved stock repurchase programs enabling Covance to repurchase shares of its common stock. In January 2012, the Covance Board of Directors authorized the repurchase of up to \$300 million of the Company's outstanding common stock (the 2012 Repurchase Program). This was in addition to 0.8 million shares remaining under a 3.0 million share buyback authorization approved by the Covance Board of Directors in 2007 (the 2007 Repurchase Program). At June 30, 2012, there was \$40.1 million remaining for purchase of the Company's outstanding common stock under the 2012 Repurchase Program. In addition to the Board approved share repurchase programs, Covance also reacquires shares of its common stock when employees tender shares to satisfy income tax withholdings associated with the vesting of stock awards.

The following table sets forth the treasury stock activity during the six month periods ended June 30, 2012 and 2011:

Shares repurchased in connection with:					
Board approved buyback programs	\$	294,787	6,238.7	\$	—
Employee benefit plans		7,312	152.4		130.0
Total	\$	302,099	6,391.1	\$	130.0

4. Equity Investments

Edgar Filing: COVANCE INC - Form 10-Q

Covance has a minority equity position (less than 20%) in Caprion Proteomics (Caprion), a privately held company headquartered in Montreal, Canada, which was acquired in December 2008 for a total cost of \$3.1 million. Caprion is a leading provider of proteomics-based services to the pharmaceutical industry. As Covance owns less than a 20% interest in Caprion and does not exercise significant influence over the operating or financial decisions of Caprion, the investment is accounted for under the cost method. This investment is included in other assets on the consolidated balance sheet.

Covance has a 47% minority equity position in Noveprim Limited (Noveprim), a supplier of research products, which was acquired in March 2004 at a total cost of \$20.7 million. The excess of the purchase price over the underlying equity in Noveprim 's net assets at the date of acquisition of \$13.8 million represented goodwill and was included in the carrying value of Covance 's investment. During the fourth quarter of 2011, the investment was determined to have experienced an other-than-temporary impairment in value due to a decline in demand for the research products supplied by Noveprim. As a result, Covance recorded a \$12.1 million impairment charge against the goodwill recognized upon the initial investment in Noveprim, to reduce the carrying value of the investment to its estimated fair value. Further, during the second quarter of 2012, the investment was determined to have experienced an additional impairment in value due to a further decline in demand for the research products supplied by Noveprim. As a result, Covance recorded a \$7.4 million impairment charge to write off the remaining carrying value of the investment as of June 30, 2012, net of the elimination of profit on inventory purchased from Noveprim. The fair value in both of the above instances was measured with an income approach using internally developed estimates of future cash flows, which are Level 3 inputs under the fair value hierarchy. Previously, this investment was reflected in other assets on the consolidated balance sheet. During the three and six month periods ended June 30, 2012, Covance recognized a loss of \$0.1 million and income of \$17 thousand, respectively, representing its share of Noveprim 's (losses) earnings, net of the elimination of profit on inventory purchased from Noveprim and still on hand at Covance. During both the three and six month periods ended June 30, 2011, Covance recognized a loss of \$0.2 million representing its share of Noveprim 's losses, net of the elimination of profit on inventory purchased from Noveprim and still on hand at Covance. The carrying value of Covance 's investment in Noveprim at December 31, 2011 was \$10.4 million.

Table of Contents

COVANCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

June 30, 2012 and 2011

(dollars in thousands, unless otherwise indicated)

Covance has a minority equity position (less than 20%) in BioClinica, Inc. (BIOC) (Nasdaq GM:BIOC). BIOC uses proprietary medical imaging technologies to process and analyze medical images, and also provides other services, including the data-basing and regulatory submission of medical images, quantitative data and text. As Covance owns less than a 20% interest in BIOC and does not exercise significant influence over the operating or financial decisions of BIOC, the investment is accounted for as an available-for-sale security. The cost basis of Covance's investment in BIOC is \$1.4 million. The carrying value of Covance's investment in BIOC as of June 30, 2012 and December 31, 2011 was \$11.4 million and \$10.0 million, respectively, as determined based on quoted market prices in an active market. This investment is reflected in other assets on the consolidated balance sheet. The \$1.4 million increase in the carrying value of the investment results in a \$0.9 million increase in the unrealized gain on investment, net of tax, which is included within accumulated other comprehensive income on the consolidated balance sheet. Accordingly, the balance in the unrealized gain on investment at June 30, 2012 and December 31, 2011 was \$6.1 million and \$5.2 million, net of tax, respectively.

5. Credit Facilities

On March 7, 2012, Covance amended its credit facility, which was not due to expire until October 2015, in order to, in part, provide sufficient liquidity to finance purchases under its 2012 Repurchase Program, as well as to secure more favorable financing rates. The amended credit agreement (the Credit Agreement) provides for a revolving credit facility of up to \$500 million. At June 30, 2012, there were \$330.0 million of outstanding borrowings and \$2.9 million of outstanding letters of credit under the Credit Agreement. At December 31, 2011, there were \$30.0 million of outstanding borrowings and \$2.6 million of outstanding letters of credit under the previous credit agreement. Interest on all outstanding borrowings under the Credit Agreement varies in accordance with the terms of the Credit Agreement and is presently based upon the London Interbank Offered Rate plus a margin of 125 basis points. Interest on all outstanding borrowings under the previous credit agreement was based upon the London Interbank Offered Rate plus a margin of 200 basis points. Interest on outstanding borrowings approximated 1.50% per annum and 1.68% per annum during the three and six months ended June 30, 2012, respectively. Interest on outstanding borrowings approximated 2.33% per annum and 2.37% per annum during the three and six months ended June 30, 2011, respectively. Costs associated with the Credit Agreement, which expires in March 2017, consisted primarily of bank and legal fees totaling \$1.9 million and are being amortized over the five-year term.

The Credit Agreement contains various financial and other covenants and is collateralized by guarantees of certain of Covance's domestic subsidiaries and a pledge of 65 percent of the capital stock of certain of Covance's foreign subsidiaries. At June 30, 2012, Covance was in compliance with the terms of the Credit Agreement.

6. Defined Benefit Plans

Covance sponsors various pension and other post-retirement benefit plans.

Defined Benefit Pension Plans

Covance sponsors two defined benefit pension plans for the benefit of its employees at two United Kingdom subsidiaries and one defined benefit pension plan for the benefit of its employees at a German subsidiary, all of which are legacy plans of previously acquired companies. Benefit amounts for all three plans are based upon years of service and compensation. The German plan is unfunded, while the United Kingdom plans are funded. Covance's funding policy has been to contribute annually a fixed percentage of the eligible employee's salary at least equal to the local statutory funding requirements. Pension plan assets are administered by the plans' trustees and are principally invested in equity and debt securities.

Service cost	\$ 1,163	\$ 2,248	\$ 370	\$ 424
Interest cost	3,850	4,202	344	330
Expected return on plan assets	(5,138)	(5,294)		
Amortization of net actuarial loss	586	674	16	60
Expected participant contributions		(1,034)		
Net periodic pension cost	\$ 461	\$ 796	\$ 730	\$ 814

Assumptions Used to Determine Net Periodic Pension Cost:

Discount rate	4.60%	5.20%	5.40%	4.60%
Expected rate of return on assets	5.90%	6.50%	n/a	n/a
Salary increases	4.00%	4.50%	2.50%	2.50%

Supplemental Executive Retirement Plan

In addition to these foreign defined benefit pension plans, Covance also has a non-qualified Supplemental Executive Retirement Plan (SERP). The SERP, which is not funded, is intended to provide retirement benefits for certain executive officers of Covance. Benefit amounts are based upon years of service and compensation of the participating employees.

Post-Employment Retiree Health and Welfare Plan

Covance also sponsors a post-employment retiree health and welfare plan for the benefit of eligible employees at certain U.S. subsidiaries who retire after satisfying service and age requirements. This plan is funded on a pay-as-you-go basis and the cost of providing these benefits is shared with the retirees.

The components of net periodic post-retirement benefit cost for the three and six month periods ended June 30, 2012 and 2011 are as follows:

	Three Months Ended June 30		Six Months Ended June 30	
	2012	2011	2012	2011

(a) decreasing to ultimate trend of 5.00% in 2018

7. Stock-Based Compensation Plans

Covance sponsors several employee stock-based compensation plans which are described more fully in Note 10 to our audited consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2011.

In May 2010, Covance's shareholders approved the 2010 Employee Equity Participation Plan (the 2010 EEPP) in replacement of the 2007 Employee Equity Participation Plan (the 2007 EEPP). Effective upon approval of the 2010 EEPP, no further grants or awards were permitted under the 2007 EEPP. Shares remaining available for grant under the 2007 EEPP are available for grant under the 2010 EEPP. The 2010 EEPP became effective on May 6, 2010 and will expire on May 5,

Table of Contents

COVANCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

June 30, 2012 and 2011

(dollars in thousands, unless otherwise indicated)

2020. The 2010 EEPP authorizes the Compensation and Organization Committee of the Board of Directors (the Compensation Committee), or such committee as is appointed by the Covance Board of Directors, to administer the 2010 EEPP and to grant awards to employees of Covance. The 2010 EEPP authorizes the Compensation Committee to grant the following awards: options to purchase common stock; stock appreciation rights; and other stock awards either singly or in combination. Shares granted, other than options or SARs, shall be counted against the shares available for grant based upon the ratio of 1.74 for every 1 share granted. The exercise period for stock options granted under the 2010 EEPP is determined by the Compensation Committee at the time of grant, and is generally ten years from the date of grant. The vesting period for stock options and stock awards granted under the 2010 EEPP is determined by the Compensation Committee at the time of grant. Beginning in 2012, options and restricted stock awards are generally granted with a pro rata four year vesting period, whereas previously, they were generally granted with a pro rata three year vesting period. Performance-based stock awards generally vest over a three year period. The number of shares of Covance common stock initially available for grant under the 2010 EEPP totaled approximately 4.3 million plus approximately 1.3 million shares remaining available under the 2007 EEPP at the time the 2010 EEPP was approved. All grants and awards under the 2007 EEPP remaining outstanding are now administered in accordance with the provisions of the 2007 EEPP out of shares issuable under the 2010 EEPP. The Company may issue authorized but previously unissued shares or treasury shares when options are exercised or for stock awards. There have been no grants of stock appreciation rights under the 2007 EEPP or the 2010 EEPP. At June 30, 2012 there were approximately 2.1 million shares remaining available for grants under the 2010 EEPP.

The grant-date fair value of stock option awards is estimated using an option pricing model as more fully described in Note 10 to our audited consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2011. The grant-date fair value of options expected to vest is expensed on a straight-line basis over the vesting period of the related awards.

The following table sets forth the weighted average assumptions used to calculate the fair value of options granted for the three and six month periods ended June 30, 2012 and 2011:

	Three Months Ended June 30		Six Months Ended June 30	
	2012	2011	2012	2011
Expected stock price volatility	38%	37%	38%	37%
Range of risk free interest rates	0.03% - 2.01%	0.10% - 3.62%	0.03% - 2.01%	0.10% - 3.62%
Expected life of options (years)	5.2	4.8	5.2	4.8

Restricted stock awards are granted subject to either service conditions (restricted stock) or service and performance conditions (performance-based shares). The grant-date fair value of restricted stock and performance-based share awards, which has been determined based upon the market value of Covance's shares on the grant date, is expensed on a straight-line basis over the vesting period of the related awards.

Edgar Filing: COVANCE INC - Form 10-Q

Covance had an employee stock purchase plan (the ESPP), pursuant to which Covance made available for sale to employees shares of its common stock at a price equal to 85% of the lower of the market value on the first or last day of each calendar quarter. The ESPP was intended to give Covance employees the opportunity to purchase shares of Covance common stock through payroll deductions. Effective January 1, 2011, the ESPP was terminated.

Results of operations for the three month period ended June 30, 2012 include total stock-based compensation expense of \$9.0 million (\$6.1 million net of tax benefit of \$2.9 million), \$4.8 million of which has been included in cost of revenue and \$4.2 million of which has been included in selling, general and administrative expenses. Results of operations for the six month period ended June 30, 2012 include total stock-based compensation expense of \$19.4 million (\$13.3 million net of tax benefit of \$6.1 million), \$10.1 million of which has been included in cost of revenue and \$9.3 million of which has been included in selling, general and administrative expenses. Results of operations for the three month period ended June 30, 2011 include total stock-based compensation expense of \$9.8 million (\$6.7 million net of tax benefit of \$3.1 million), \$4.9 million of which has been included in both cost of revenue and selling, general and administrative expenses. Results of operations for the six month

period ended June 30, 2011 include total stock-based compensation expense of \$18.9 million (\$12.9 million net of tax benefit of \$6.0 million), \$9.6 million of which has been included in cost of revenue and \$9.3 million of which has been included in selling, general and administrative expenses.

8. Facility Consolidation and Other Cost Reduction Actions**2012 Actions**

During the second quarter of 2012, Covance commenced additional restructuring actions in Early Development to better align capacity to preclinical market demand and further improve profitability going forward. These actions include the closure of its toxicology facility in Chandler, Arizona, as well as the Company's clinical pharmacology facilities in Honolulu, Hawaii and, following the completion of customary employee consultations, in Basel, Switzerland. In addition, these actions include a planned capacity reduction in Muenster, Germany and further reductions in its cost structure. During the three and six months ended June 30, 2012, Covance incurred costs totaling \$9.7 million (\$8.5 million of which has been included in selling, general and administrative expenses and \$1.2 million of which has been included in depreciation and amortization). These restructuring actions are expected to be complete by the end of 2012.

The following table sets forth the restructuring costs incurred in connection with the 2012 actions during the three and six month periods ended June 30, 2012:

	Three and Six Months Ended June 30, 2012	
Employee separation costs	\$	7,782
Accelerated depreciation and amortization		1,209
Other costs		676
Total	\$	9,667

The following table sets forth the restructuring costs by segment incurred in connection with the 2012 actions during the three and six month periods ended June 30, 2012:

Edgar Filing: COVANCE INC - Form 10-Q

	Three and Six Months Ended June 30, 2012	
Early Development	\$	9,197
Late-Stage Development		179
Corporate expenses		291
Total	\$	9,667

Total costs for the 2012 actions are expected to approximate \$32 million, including \$23 million in employee separation costs, \$5 million in lease and facility exit costs, \$3 million in accelerated depreciation and amortization and \$1 million in other costs. Costs by segment are expected to total \$31 million in our early development segment, \$0.5 million in our late-stage development segment and \$0.5 million in corporate expenses.

The following table sets forth the rollforward of the 2012 actions restructuring activity for the six months ended June 30, 2012:

	Balance, Dec 31, 2011	Total Charges	Cash Payments	Other	Balance, Jun 30, 2012
Employee separation costs	\$	\$ 7,782	\$ (27)	\$ 5	\$ 7,760
Accelerated depreciation and amortization		1,209		(1,209)	
Other costs		676	(484)	(192)	
Total	\$	\$ 9,667	\$ (511)	\$ (1,396)	\$ 7,760

COVANCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

June 30, 2012 and 2011

(dollars in thousands, unless otherwise indicated)

Other costs include legal and professional fees, primarily associated with employee related matters, and other costs incurred in connection with transitioning services from sites being closed, as well as loss on disposal of assets. Other activity in the reserve rollforward primarily reflects accelerated amortization, the loss on disposal of assets and foreign exchange impacts as a result of the change in exchange rates between periods.

In addition to the above costs, in the second quarter of 2012, Covance recorded a \$20.8 million charge in the early development segment to reflect the impairment of certain research product inventory based on current and expected future demand. These costs have been included in cost of sales in the early development segment.

2010 and 2011 Actions

During the second quarter of 2010, Covance announced plans to reduce costs, primarily by closing and transitioning work conducted at its Austin, Texas Phase I clinic and Kalamazoo, Michigan research products facility into other more efficient locations. These actions were completed during 2010. During the fourth quarter of 2010, the Company announced plans to further rationalize capacity, reduce the cost of overhead and support functions and to streamline processes. These actions were completed during 2011. During the three and six months ended June 30, 2011, Covance incurred costs totaling \$4.6 million and \$10.4 million, respectively. During the three months ended June 30, 2011, \$4.2 million has been included in selling, general and administrative expenses and \$0.4 million has been included in depreciation and amortization. During the six months ended June 30, 2011, \$9.6 million has been included in selling, general and administrative expenses and \$0.8 million has been included in depreciation and amortization. During the three and six months ended June 30, 2012, no restructuring costs were incurred and no further costs are expected to be incurred relating to the 2010 and 2011 actions.

The following table sets forth the restructuring costs incurred in connection with the 2010 and 2011 actions during the three and six month periods ended June 30, 2011:

	Three Months Ended June 30, 2011		Six Months Ended June 30, 2011	
Employee separation costs	\$	2,191	\$	5,581
Accelerated depreciation		405		810
Other costs		1,968		4,041
Total	\$	4,564	\$	10,432

Edgar Filing: COVANCE INC - Form 10-Q

The following table sets forth the restructuring costs incurred by segment in connection with the 2010 and 2011 actions during the three and six month periods ended June 30, 2011:

	Three Months Ended June 30, 2011		Six Months Ended June 30, 2011	
Early Development	\$	1,988	\$	4,890
Late-Stage Development		731		1,666
Corporate expenses		1,845		3,876
Total	\$	4,564	\$	10,432

Cumulative costs for the 2010 and 2011 cost actions through December 31, 2011 totaled \$52.4 million, of which \$47.7 million was included in selling, general and administrative expenses and \$4.7 million was included in depreciation and amortization. Cumulative costs incurred by category for these actions through December 31, 2011 totaled \$30.2 million in employee separation costs, \$6.8 million in lease and facility exit costs, \$4.6 million in accelerated depreciation and \$10.8 million in other costs. Cumulative costs incurred by segment through December 31, 2011 totaled \$25.5 million in our early development segment, \$12.3 million in our late-stage development segment and \$14.6 million in corporate expenses.

(UNAUDITED)

June 30, 2012 and 2011

(dollars in thousands, unless otherwise indicated)

The following table sets forth the rollforward of the 2010 and 2011 actions restructuring activity for the six months ended June 30, 2012:

	Balance, Dec 31, 2011	Total Charges	Cash Payments	Other	Balance, Jun 30, 2012
Employee separation costs	\$ 5,908	\$	\$ (4,105)	\$ (212)	\$ 1,591
Lease and facility exit costs	2,620		(602)	(166)	1,852
Other costs	1,834		(1,810)	(2)	22
Total	\$ 10,362	\$	\$ (6,517)	\$ (380)	\$ 3,465

Other costs include legal and professional fees, primarily associated with employee related matters and the outsourcing of certain functions, and other costs incurred in connection with transitioning services from sites being closed, including costs of transitioning information technology.

9. Segment Information

Covance has two reportable segments: early development and late-stage development. Early development services, which includes Covance's preclinical and clinical pharmacology service capabilities, involve evaluating a new compound for safety and early effectiveness as well as evaluating the absorption, distribution, metabolism and excretion of the compound in the human body. It is at this stage that a pharmaceutical company, based on available data, will generally decide whether to continue further development of a drug. Late-stage development services, which includes Covance's central laboratory, Phase II-IV clinical development and market access services, are geared toward demonstrating the clinical effectiveness of a compound in treating certain diseases or conditions, obtaining regulatory approval and maximizing the drug's commercial potential. The accounting policies of the reportable segments are the same as those described in Note 2.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(UNAUDITED)

June 30, 2012 and 2011

(dollars in thousands, unless otherwise indicated)

Segment revenues, operating income and total assets for the three and six months ended June 30, 2012 and 2011 are as follows:

	Early Development	Late-Stage Development	Other Reconciling Items	Total
Three months ended June 30, 2012				
Total revenues from external customers	\$ 219,683	\$ 323,099	\$ 42,263(a)	\$ 585,045
Operating (loss) income	\$ (33,092)(d)	\$ 68,027(e)	\$ (38,864)(b)	\$ (3,929)
Total assets	\$ 1,098,047(f)	\$ 814,086	\$ 225,203(c)	\$ 2,137,336
Three months ended June 30, 2011				
Total revenues from external customers	\$ 231,838	\$ 286,382	\$ 29,507(a)	\$ 547,727
Operating income	\$ 30,914(d)	\$ 56,537(e)	\$ (38,696)(b)	\$ 48,755
Total assets	\$ 1,160,148	\$ 762,156	\$ 159,242(c)	\$ 2,081,546
Six months ended June 30, 2012				
Total revenues from external customers	\$ 431,351	\$ 642,272	\$ 85,330(a)	\$ 1,158,953
Operating (loss) income	\$ (21,784)(d)	\$ 140,466(e)	\$ (76,489)(b)	\$ 42,193
Total assets	\$ 1,098,047(f)	\$ 814,086	\$ 225,203(c)	\$ 2,137,336
Six months ended June 30, 2011				
Total revenues from external customers	\$ 455,863	\$ 564,343	\$ 54,979(a)	\$ 1,075,185
Operating income	\$ 54,485(d)	\$ 111,771(e)	\$ (75,601)(b)	\$ 90,655
Total assets	\$ 1,160,148	\$ 762,156	\$ 159,242(c)	\$ 2,081,546

(a) Represents revenues associated with reimbursable out-of-pocket expenses.

(b) Represents corporate expenses (primarily information technology, marketing, communications, human resources, finance, legal and stock-based compensation expense). Corporate expenses include restructuring costs of \$291 for the three and six months ended June 30, 2012, and restructuring costs of \$1,845 and \$3,876 for the three and six months ended June 30, 2011, respectively.

(c) Represents corporate assets.

(d) Early Development operating loss includes restructuring costs of \$9,197, an inventory impairment charge of \$20,781 and a goodwill impairment charge of \$17,959 for the three and six months ended June 30, 2012, and restructuring costs of \$1,988 and \$4,890 for the three and six months ended June 30, 2011, respectively.

(e) Late-Stage Development operating income includes restructuring costs of \$179 for the three and six months ended June 30, 2012, and restructuring costs of \$731 and \$1,666 for the three and six months ended June 30, 2011, respectively.

(f) Early Development total assets reflect an inventory impairment charge of \$20,781, a goodwill impairment charge of \$17,959 and an impairment of an equity investment of \$7,373 for the three and six months ended June 30, 2012.

10. Subsequent Events

Covance completed an evaluation of the impact of any subsequent events through the date these financial statements were issued, and determined there were no subsequent events requiring disclosure in or adjustment to these financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion together with the unaudited Covance consolidated financial statements and the accompanying notes included in this Quarterly Report on Form 10-Q for the quarter ended June 30, 2012.

Overview

Covance is a leading drug development services company providing a wide range of early-stage and late-stage product development services on a worldwide basis primarily to the pharmaceutical, biotechnology and medical device industries. Covance also provides services such as laboratory testing to the chemical, agrochemical and food industries. The foregoing services comprise two reportable segments for financial reporting purposes: early development services, which includes preclinical and clinical pharmacology service offerings; and late-stage development services, which includes central laboratory, Phase II-IV clinical development and market access services. Although each segment has separate services within it, they can be and increasingly are, combined in integrated service offerings. Covance believes it is one of the largest drug development services companies, based on annual net revenues, and one of a few that is capable of providing comprehensive global product development services. Covance offers its clients high quality services designed to provide data to clients as rapidly as possible and reduce product development time. We believe this enables Covance's customers to introduce their products into the marketplace faster and as a result, maximize the period of market exclusivity and monetary return on their research and development investments. Additionally, Covance's comprehensive services and broad experience provide its customers with a variable cost alternative to fixed cost internal development capabilities.

Critical Accounting Policies

Covance's consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles (GAAP), which require management to make estimates and assumptions about future events that affect the amounts reported in the financial statements and the accompanying notes. Actual results could differ from these estimates. The following discussion highlights what we believe to be the critical accounting policies and judgments made in the preparation of these consolidated financial statements.

Revenue Recognition. Covance recognizes revenue either as services are performed or products are delivered, depending on the nature of the work contracted. Historically, a majority of Covance's net revenues have been earned under contracts which range in duration from a few months to two years, but can extend in duration up to five years or longer. Covance also has committed minimum volume arrangements with certain clients with initial terms that generally range in duration from three to ten years. Underlying these arrangements are individual project contracts for the specific services to be provided. These arrangements enable our clients to secure our services in exchange for which they commit to purchase an annual minimum dollar value (volume) of services. Under these types of arrangements, if the annual minimum volume commitment is not reached, the client is required to pay Covance for the shortfall. Progress towards the achievement of annual minimum volume commitments is monitored throughout the year. Annual minimum commitment shortfalls are not included in net revenues until the amount has been determined and agreed to by the client.

Covance does not have any individual significant contracts as pertains to revenue recognition. By way of background, at any point in time Covance is working on thousands of active client projects, which are governed by individual contracts. In addition, the Company has not had a

Edgar Filing: COVANCE INC - Form 10-Q

single customer who accounted for more than ten percent of aggregate net revenues during any one of the last three years. Covance serves in excess of 1,000 biopharmaceutical companies and has over 23,000 active client projects. Most projects are customized based on the needs of the client, the type of services being provided, therapeutic indication of the drug, geographic locations and other variables. Project specific terms related to pricing, billing milestones and the scope and type of services to be provided are generally negotiated and contracted on a project-by-project basis.

Service contracts generally take the form of fee-for-service or fixed-price arrangements. In cases where performance spans multiple accounting periods, revenue is recognized as services are performed, measured on a proportional-performance basis, generally using output measures that are specific to the service provided. Examples of output measures in our early development segment include the number of slides read, dosings performed, or specimens prepared for preclinical laboratory services, or number of dosings or number of volunteers enrolled for clinical pharmacology. Examples of output measures in our late-stage development segment's Phase II-IV clinical development service offering include among others, number of investigators enrolled, number of sites initiated, number of patients enrolled and number of monitoring visits completed. Revenue is determined by dividing the actual units of work completed by the total units of work required under the contract and multiplying that percentage by the total contract value. The total contract value, or total contractual payments, represents the

Table of Contents

aggregate contracted price for each of the agreed upon services to be provided. Covance does not have any contractual arrangements spanning multiple accounting periods where revenue is recognized on a proportional-performance basis under which the Company has earned more than an immaterial amount of performance-based revenue (i.e. potential additional revenue tied to specific deliverables or performance). Changes in the scope of work are common, especially under long-term contracts, and generally result in a change in contract value. Once the client has agreed to the changes in scope and renegotiated pricing terms, the contract value is amended and revenue is recognized, as described above. Estimates of costs to complete are made to provide, where appropriate, for losses expected on contracts. Costs are not deferred in anticipation of contracts being awarded, but instead are expensed as incurred. For the six months ended June 30, 2012, Covance did not experience a change in the estimates used to determine the amounts recognized as revenue (i.e. output measures or costs to complete) for any project resulting in a material impact on our financial position, results of operations or cash flows.

Billing schedules and payment terms are generally negotiated on a contract-by-contract basis. In some cases, Covance bills the client for the total contract value in progress-based installments as certain non-contingent billing milestones are reached over the contract duration, such as, but not limited to, contract signing, initial dosing, investigator site initiation, patient enrollment or database lock. The term *billing milestone* relates only to a billing trigger in a contract whereby amounts become billable and payable in accordance with a negotiated predetermined billing schedule throughout the term of a project. These billing milestones are not performance-based (i.e., potential additional arrangement consideration tied to specific deliverables or performance). In other cases, billing and payment terms are tied to the passage of time (e.g., monthly billings). In either case, the total contract value and aggregate amounts billed to the client would be the same at the end of the project. While Covance attempts to negotiate terms that provide for billing and payment of services prior or within close proximity to the provision of services, this is not always the case, as evidenced by fluctuations in the levels of unbilled receivables and unearned revenue from period to period. While a project is ongoing, cash payments are not necessarily representative of aggregate revenue earned at any particular point in time, as revenues are recognized when services are provided, while amounts billed and paid are in accordance with the negotiated billing and payment terms.

In some cases, payments received are in excess of revenue recognized. For example, a contract invoicing schedule may provide for an upfront payment of 10% of the full contract value upon contract signing, but at the time of signing, performance of services has not yet begun, and therefore, no revenue has yet been recognized. Payments received in advance of services being provided, such as in this example, are deferred as unearned revenue on the balance sheet. As the contracted services are subsequently performed and the associated revenue is recognized, the unearned revenue balance is reduced by the amount of revenue recognized during the period.

In other cases, services may be provided and revenue is recognized before the client is invoiced. In these cases, revenue recognized will exceed amounts billed, and the difference, representing an unbilled receivable, is recorded for this amount which is currently unbillable to the customer pursuant to contractual terms. Once the client is invoiced, the unbilled receivable is reduced for the amount billed, and a corresponding account receivable is recorded. All unbilled receivables are billable to customers within one year from the respective balance sheet date.

Most contracts are terminable by the client, either immediately or upon notice. These contracts often require payment to Covance of expenses to wind down the study, fees earned to date and, in some cases, a termination fee or a payment to Covance of some portion of the fees or profits that could have been earned by Covance under the contract if it had not been terminated early. Termination fees are included in net revenues when realization is assured.

Bad Debts. Covance endeavors to assess and monitor the creditworthiness of its customers to which it grants credit terms in the ordinary course of business. Covance maintains a provision for doubtful accounts relating to amounts due that may not be collected. This bad debt provision is monitored on a monthly basis and adjusted as circumstances warrant. Since the recorded bad debt provision is based upon management's judgment, actual bad debt write-offs may be greater or less than the amount recorded. Historically, bad debt write-offs have not been material.

Edgar Filing: COVANCE INC - Form 10-Q

Taxes. Since Covance conducts operations on a global basis, its effective tax rate has and will continue to depend upon the geographic distribution of its pre-tax earnings among locations with varying tax rates. Covance's profits are further impacted by changes in the tax rates of the various jurisdictions in which Covance operates. In addition, Covance maintains a reserve for unrecognized tax benefits, changes to which could impact Covance's effective tax rate in the period such changes are made.

The Company recognizes a tax benefit from an uncertain tax position only if the Company believes it is more likely than not to be sustained upon examination based on the technical merits of the position. The amount of the accrual for which an exposure exists is measured as the largest amount of benefit determined on a cumulative probability basis that the Company believes is more likely than not to be realized upon ultimate settlement of the position. Components of the reserve are classified

Table of Contents

as either a current or long-term liability in the consolidated balance sheet based on when the Company expects each of the items to be settled. Covance accrues interest and penalties in relation to unrecognized tax benefits as a component of income tax expense.

As of June 30, 2012, the balance of the reserve for unrecognized tax benefits is \$16.9 million, including accrued interest of \$2.0 million, which is recorded as a long-term liability in other liabilities on the consolidated balance sheet. This reserve relates to exposures for income tax matters such as transfer pricing, nexus, and deemed income.

The Company also maintains a tax reserve related to exposures for non-income tax matters including value-added tax, state sales and use and other taxes. The balance of this reserve at June 30, 2012 is \$1.1 million and is recorded as a current liability in accrued expenses and other current liabilities on the consolidated balance sheet.

While Covance believes it has identified all reasonably identifiable exposures and the reserve it has established for identifiable exposures is appropriate under the circumstances, it is possible that additional exposures exist and that exposures will be settled at amounts different than the amounts reserved. It is also possible that changes in facts and circumstances could cause Covance to either materially increase or reduce the carrying amount of its tax reserve.

Covance's policy is to provide income taxes on earnings of foreign subsidiaries only to the extent those earnings are taxable or are expected to be remitted. Covance's historical policy has been to leave its unremitted foreign earnings invested indefinitely outside the United States. Covance intends to continue to leave its unremitted foreign earnings invested indefinitely outside the United States. As a result, taxes have not been provided on any of the remaining accumulated foreign unremitted earnings as of June 30, 2012.

Stock-Based Compensation. The Company sponsors several stock-based compensation plans pursuant to which non-qualified stock options and restricted stock awards are granted to eligible employees. These plans are described more fully in Note 10 to our audited financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2011 and Note 7 to our consolidated financial statements in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2012 included elsewhere herein.

The grant-date fair value of awards expected to vest is expensed on a straight-line basis over the vesting period of the related awards. The grant-date fair value of stock awards is based upon the underlying price of the stock on the date of grant. The grant-date fair value of stock option awards must be determined using an option pricing model. Option pricing models require the use of estimates and assumptions as to (a) the expected term of the option, (b) the expected volatility of the price of the underlying stock, (c) the risk-free interest rate for the expected term of the option and (d) pre-vesting forfeiture rates. The Company uses the Lattice-Binomial option pricing formula for determining the grant-date fair value of stock option awards.

The expected term of the option is based upon the contractual term and expected employee exercise and expected post-vesting employment termination behavior. The expected volatility of the price of the underlying stock is based upon the volatility of the Company's stock computed over a period of time equal to the expected term of the option. The risk free interest rate is based upon the implied yields currently available from the U.S. Treasury zero-coupon yield curve for issues with a remaining duration equal to the expected term of the option. Pre-vesting forfeiture rates are estimated based upon past voluntary termination behavior and past option forfeitures.

Edgar Filing: COVANCE INC - Form 10-Q

The following table sets forth the weighted-average assumptions used to calculate the fair value of options granted for the three and six month periods ended June 30, 2012 and 2011:

	Three Months Ended June 30		Six Months Ended June 30	
	2012	2011	2012	2011
Expected stock price volatility	38%	37%	38%	37%
Range of risk free interest rates	0.03% - 2.01%	0.10% - 3.62%	0.03% - 2.01%	0.10% - 3.62%
Expected life of options (years)	5.2	4.8	5.2	4.8

Changes in any of these assumptions could impact, potentially materially, the amount of expense recorded in future periods related to stock-based awards.

Table of Contents

Impairment of Assets. Covance reviews its long-lived assets other than goodwill and other indefinite lived intangible assets, for impairment when events or changes in circumstances occur that indicate that the carrying value of the asset may not be recoverable. The assessment of possible impairment is based upon Covance's judgment of its ability to recover the value of the asset from the expected future undiscounted cash flows of the related operations. Actual future cash flows may be greater or less than estimated. During the second quarter of 2012, Covance determined that the carrying value of its equity method investment in a supplier of research products was no longer recoverable based upon changes in the research product market. The impairment was determined to be other-than-temporary and Covance recorded a charge of \$7.4 million to write off the remaining carrying value of the equity investment as of June 30, 2012.

Covance performs an annual test for impairment of goodwill and other indefinite lived intangible assets during the fourth quarter. Covance tests goodwill for impairment at the reporting unit level only when, after completing a qualitative analysis, it is determined that it is more likely than not that the fair value of a reporting unit is below its carrying value. This test is performed by comparing the carrying value of the reporting unit to its fair value. Covance assesses fair value based upon its estimate of the present value of the future cash flows that it expects to be generated by the reporting unit. The most recent test for impairment performed for 2011 indicated that no reporting units were at significant risk for impairment. However, in the second quarter of 2012, Covance commenced actions to close its clinical pharmacology operations located in Basel, Switzerland and as a result determined the goodwill associated with the acquisition of the Basel clinic in March 2009 was impaired and recorded a charge of \$18.0 million to write off the carrying value of the goodwill as of June 30, 2012. The Basel clinic is part of Covance's Early Development segment and clinical pharmacology reporting unit, however, because the clinic was operated on a standalone basis and was not integrated into the reporting unit after its acquisition, the related goodwill was evaluated for impairment at the site level and not the reporting unit level. In light of the impairment recognized for the Basel clinic, the Company conducted an impairment analysis of the remaining goodwill in the clinical pharmacology reporting unit and determined there was no additional impairment resulting from this action. There were no other events or changes in circumstances through June 30, 2012 that warranted a reconsideration of our impairment test results. However, changes in expectations as to the present value of a reporting unit's future cash flows might impact subsequent years' assessments of impairment.

Defined Benefit Pension Plans. Covance sponsors defined benefit pension plans for the benefit of its employees at several foreign subsidiaries, as well as a non-qualified supplemental executive retirement plan and a post-employment retiree health and welfare plan for the benefit of eligible employees at certain U.S. subsidiaries. The measurement of the related benefit obligation and net periodic benefit cost recorded each year is based upon actuarial computations which require the use of judgment as to certain assumptions. The more significant of these assumptions are: (a) the appropriate discount rate to use in computing the present value of the benefit obligation; (b) the expected return on plan assets (for funded plans); and (c) the expected future rate of salary increases (for pay-related plans). Actual results (such as the return on plan assets, future rate of salary increases and plan participation rates) will likely differ from the assumptions used. Those differences, along with changes that may be made in the assumptions used from period to period, will impact the amounts reported in the financial statements and footnote disclosures.

Set forth below is a discussion of the impact that (a) differences between assumed results and actual results and (b) assumption changes have had on our results of operations for the years ended December 31, 2011, 2010 and 2009 and on the financial position of the plans as of December 31, 2011 and 2010 for our United Kingdom defined benefit pension plans (the largest of our defined benefit-type pension plans).

(dollars in millions)	United Kingdom Plans							
	2011		2010		2009		2008	
Net periodic pension cost	\$	1.6	\$	1.6	\$	2.0	\$	3.4
Assumptions used to determine net periodic pension cost:								
Discount rate		5.20%		5.75%		6.25%		5.50%
Expected rate of return on assets		6.50%		6.75%		6.75%		6.75%
Salary increases		4.50%		4.50%		4.25%		4.25%

Table of Contents

The movement in the net periodic benefit cost from period to period is attributable to the following:

(dollars in millions)	United Kingdom Plans		
	2010 to 2011	2009 to 2010	2008 to 2009
Change in discount rate	\$ 2.1	\$ 1.3	\$ (2.2)
Change in rate of salary increases		(0.1)	
Other, including differences between actual experience and assumptions used	(2.1)	(1.6)	1.4
Foreign currency exchange rate changes			(0.6)
Net change in periodic benefit cost	\$	\$ (0.4)	\$ (1.4)

Assumptions used to determine benefit obligation:	United Kingdom Plans		
	2011	2010	2009
Discount rate	4.60%	5.20%	5.75%
Salary increases	4.00%	4.50%	4.50%

The change in the projected benefit obligation from period to period is attributable to the following:

(dollars in millions)	United Kingdom Plans		
	2010 to 2011	2009 to 2010	
Projected benefit obligation, beginning of year	\$ 156.6	\$ 139.9	
Service/interest cost components of net periodic benefit cost in year	12.7	11.4	
Benefits paid	(2.3)	(2.4)	
Actuarial loss:			
Decrease in discount rate	23.8	20.0	
Other, including differences between actual experience and assumptions used	(25.0)	(7.8)	
Foreign currency exchange rate changes	1.9	(4.5)	
Projected benefit obligation, end of year	\$ 167.7	\$ 156.6	

Foreign Currency Risks

Since Covance operates on a global basis, it is exposed to various foreign currency risks. Two specific risks arise from the nature of certain contracts. The first risk can occur when Covance executes contracts with its customers where the contracts are denominated in a currency different than the local currencies of the Covance subsidiaries performing work under the contracts. As a result, revenue recognized for services rendered may be denominated in a currency different from the currencies in which the subsidiaries' expenses are incurred. Fluctuations in exchange rates (from those in effect at the time the contract is executed and pricing is established to the time services are rendered and revenue is recognized) can affect the subsidiary's net revenues and resultant earnings. This risk is generally applicable only to a portion of the contracts executed by Covance's subsidiaries providing clinical services. Historically, fluctuations in exchange rates from those in effect at the time contracts were executed have not had a material effect upon Covance's consolidated financial results. See Risk Factors .

We also have other cross-currency contracts executed by other Covance subsidiaries where the foreign currency amounts billed are determined by converting local currency revenue amounts to the contract billing currency using the exchange rates in effect at the time services are rendered. These contracts do not give rise to foreign currency denominated revenue and local currency denominated expenses, but they do give

Edgar Filing: COVANCE INC - Form 10-Q

rise to a second type of risk. This second type of risk results from the passage of time between the invoicing of customers under both of these types of contracts and the ultimate collection of customer payments against such invoices. Because such invoices are denominated in a currency other than the subsidiary's local currency, Covance recognizes a receivable at the time of invoicing for the local currency equivalent of the foreign currency invoice

Table of Contents

amount as of the invoice date. Subsequent changes in exchange rates from the time the invoice is prepared to the time payment from the customer is received will result in Covance receiving either more or less in local currency than the local currency equivalent of the invoice amount at the time the invoice was prepared and the receivable was recorded. This difference is recognized by Covance as a foreign currency transaction gain or loss, as applicable, in the consolidated statements of income.

Finally, Covance's consolidated financial statements are denominated in U.S. dollars. Accordingly, changes in exchange rates between the applicable foreign currency and the U.S. dollar will affect the translation of each foreign subsidiary's financial results into U.S. dollars for purposes of reporting Covance's consolidated financial results. The process by which each foreign subsidiary's financial results are translated into U.S. dollars is as follows: income statement accounts are translated at average exchange rates for the period; balance sheet asset and liability accounts are translated at end of period exchange rates; and equity accounts are translated at historical exchange rates. Translation of the balance sheet in this manner affects the stockholders' equity account, referred to as the cumulative translation adjustment account. This account exists only in the foreign subsidiary's U.S. dollar balance sheet and is necessary to keep the foreign balance sheet stated in U.S. dollars in balance. At June 30, 2012, accumulated other comprehensive income on the consolidated balance sheet includes the cumulative translation account balance of \$18.0 million.

Operating Expenses and Reimbursable Out-of-Pockets

Covance segregates its recurring operating expenses among four categories: cost of revenue; reimbursable out-of-pocket expenses; selling, general and administrative expenses; and depreciation and amortization. Cost of revenue includes direct labor and related benefits, other direct costs, shipping and handling fees, and an allocation of facility charges and information technology costs, and excludes depreciation and amortization. Cost of revenue, as a percentage of net revenues, tends and is expected to fluctuate from one period to another, as a result of changes in labor utilization and the mix of service offerings involving thousands of studies conducted during any period of time. Selling, general and administrative expenses consist primarily of administrative payroll and related benefit charges, advertising and promotional expenses, administrative travel and an allocation of facility charges and information technology costs, and excludes depreciation and amortization.

In connection with the management of multi-site clinical trials, Covance pays on behalf of its customers fees to investigators, volunteers and other out-of-pocket costs (such as for travel, printing, meetings, couriers, etc.), for which it is reimbursed at cost, without mark-up or profit. Investigator fees are not reflected in total revenues or expenses where Covance acts in the capacity of an agent on behalf of the pharmaceutical company sponsor, passing through these costs without risk or reward to Covance. All other out-of-pocket costs are included in total revenues and expenses.

Quarterly Results

Covance's quarterly operating results are subject to variation, and are expected to continue to be subject to variation, as a result of factors such as (1) delays in initiating or completing significant drug development trials, (2) termination or reduction in size of drug development trials, (3) acquisitions and divestitures, (4) changes in the mix of our services, and (5) exchange rate fluctuations. Delays and terminations of trials are often the result of actions taken by Covance's customers or regulatory authorities and are not typically controllable by Covance. Since a large amount of Covance's operating costs are relatively fixed while revenue is subject to fluctuation, moderate variations in the commencement, progress or completion of drug development trials may cause significant variations in quarterly results.

Results of Operations

Three Months Ended June 30, 2012 Compared with Three Months Ended June 30, 2011. Net revenues totaling \$542.8 million for the three months ended June 30, 2012 increased 4.7%, or 6.9% excluding the unfavorable impact of foreign exchange rate variances between both periods, as compared to \$518.2 million for the corresponding 2011 period. Net revenues from Covance's early development segment decreased 5.2%, or 4.3% excluding the unfavorable impact of foreign exchange rate variances between both periods. The decline in the early development segment was due to lower volumes in toxicology and research products, which was partially offset by growth across the segment's other service offerings. Net revenues from Covance's late-stage development segment increased 12.8%, or 16.0% excluding the unfavorable impact of foreign exchange rate variances between both periods. Growth in the late-stage development segment was led by the strong performance of our Phase II-IV clinical development services and increased volume in our central laboratory services.

Cost of revenue increased 13.9% to \$408.2 million or 75.2% of net revenues for the three months ended June 30, 2012 as compared to \$358.3 million or 69.1% of net revenues for the corresponding 2011 period. Gross margins decreased by

Table of Contents

610 basis points to 24.8% for the three months ended June 30, 2012 from 30.9% for the corresponding 2011 period due to an inventory impairment charge of \$20.8 million (or 3.8% of net revenues) to write down certain preclinical inventory and the volume decrease in early development, which was only partially offset by strength in late-stage services.

Overall, selling, general and administrative expenses increased 6.2% to \$90.6 million for the three months ended June 30, 2012 from \$85.3 million for the corresponding 2011 period. As a percentage of net revenues, selling, general and administrative expenses increased by 20 basis points to 16.7% for the three months ended June 30, 2012 from 16.5% for the corresponding 2011 period. Included in selling, general and administrative expenses during the three months ended June 30, 2012 is \$8.5 million (or 1.6% of net revenues) in costs associated with the 2012 restructuring actions to better align capacity to preclinical market demand and further improve profitability going forward. These actions include closing the Chandler, Arizona facility, as well as the Company's clinical pharmacology facilities in Honolulu, Hawaii and, following the completion of customary employee consultations, in Basel, Switzerland, and a further reduction in the cost structure. Included in selling, general and administrative expense during the three months ended June 30, 2011 was \$4.2 million (or 0.8% of net revenues) in costs associated with the 2011 restructuring initiatives to rationalize capacity, reduce the cost of overhead and support functions and to streamline processes. Selling, general and administrative expenses as a percentage of net revenues can and does vary depending on the timing and nature of various professional fees and other discretionary spending.

Depreciation and amortization increased 15.9% to \$30.0 million for the three months ended June 30, 2012 from \$25.8 million for the corresponding 2011 period. As a percentage of net revenues, depreciation and amortization increased by 50 basis points to 5.5% for the three months ended June 30, 2012, from 5.0% for the corresponding 2011 period. Depreciation and amortization during the three months ended June 30, 2012 includes \$1.2 million (or 0.2% of net revenues) in accelerated depreciation associated with the 2012 restructuring actions described above. Depreciation and amortization during the three months ended June 30, 2011 included \$0.4 million (or 0.1% of net revenues) in accelerated depreciation associated with the 2011 restructuring initiatives also described above. The balance of the increase results from depreciation on assets placed in service over the last year.

Results of operations are a loss of \$3.9 million (or 0.7% of net revenues) for the three months ended June 30, 2012, compared to income of \$48.8 million for the corresponding 2011 period. The loss from operations for the three months ended June 30, 2012 includes a goodwill impairment charge of \$18.0 million (or 3.3% of net revenues) related to the Basel clinic, which is included in our early development segment results, as well as the restructuring charges of \$9.7 million (or 1.8% of net revenues) and the inventory impairment charge of \$20.8 million (or 3.8% of net revenues) discussed above. Income from operations for the three months ended June 30, 2011 included \$4.6 million (or 0.9% of net revenues) in costs associated with the 2011 restructuring initiatives described above.

Results of operations from Covance's early development segment for the three months ended June 30, 2012 decreased \$64.0 million to a loss of \$33.1 million, compared to income of \$30.9 million for the corresponding 2011 period. As a percentage of net revenues, early development results of operations declined from 13.3% of early development net revenues in the three months ended June 30, 2011 to (15.1%) in the corresponding 2012 period. The decline in results of operations in Covance's early development segment for the three months ended June 30, 2012 is driven by the lower revenue in toxicology, the 2012 restructuring actions of \$9.2 million (or 4.2% of segment net revenues), the goodwill impairment charge of \$18.0 million (or 8.2% of segment net revenues) and an inventory impairment charge of \$20.8 million (or 9.5% of segment net revenues), partially offset by the inclusion in the 2011 three month period of \$2.0 million in costs (0.9% of segment net revenues) associated with the 2011 restructuring initiatives described above.

Income from operations from Covance's late-stage development segment for the three months ended June 30, 2012 increased 20.3% or \$11.5 million to \$68.0 million as compared to \$56.5 million for the corresponding 2011 period. As a percentage of net revenues, late-stage development income from operations increased 140 basis points from 19.7% of late-stage development net revenues in the three month period ended June 30, 2011 to 21.1% of net revenues in the corresponding 2012 period, driven by the increase in revenue in both Phase II-IV clinical

Edgar Filing: COVANCE INC - Form 10-Q

development and central laboratories. Income from operations for the three months ended June 30, 2012 includes restructuring charges of \$0.2 million (or 0.1% of segment net revenues). Income from operations from Covance's late-stage development segment for the three months ended June 30, 2011 included \$0.7 million (or 0.3% of segment net revenues) in costs associated with the 2011 restructuring initiatives described above.

Corporate expense increased \$0.2 million to \$38.9 million or 7.2% of net revenues for the three months ended June 30, 2012 as compared to \$38.7 million or 7.5% of net revenues for the corresponding 2011 period. Corporate expenses for the three months ended June 30, 2012 includes restructuring charges of \$0.3 million (or 0.1% of net revenues). Corporate expenses

Table of Contents

for the three months ended June 30, 2011 included \$1.8 million (or 0.4% of net revenues) in costs associated with the 2011 restructuring initiatives described above. Also included in corporate expense is stock-based compensation expense of \$9.0 million or 1.7% of net revenues for the three months ended June 30, 2012, as compared to \$9.8 million or 1.9% of net revenues for the corresponding 2011 period.

Other expense, net increased \$8.4 million to \$9.3 million for the three months ended June 30, 2012 from \$0.9 million for the corresponding 2011 period. The primary driver of the increase is an impairment charge of \$7.4 million associated with an equity method investment in a supplier of research products recorded in the three months ended June 30, 2012. Net foreign exchange transaction losses increased \$0.5 million, to \$0.8 million during the 2012 period from \$0.3 million in the corresponding 2011 period. Net interest expense increased \$0.3 million to \$0.9 million during the 2012 period from \$0.6 million for the corresponding 2011 period.

Covance's effective tax rate for the three months ended June 30, 2012 was 4.6% compared to 20.9% for the corresponding 2011 period. Covance's effective tax rate for the three months ended June 30, 2012 includes a tax benefit of \$6.4 million associated with a \$20.8 million inventory impairment charge and a tax benefit of \$3.1 million associated with the \$9.7 million of 2012 cost reduction actions incurred predominantly in the United States. There was no tax benefit recorded for either the \$18.0 million goodwill impairment or the \$7.4 million equity investment impairment. Covance's effective tax rate for the three months ended June 30, 2011 included a tax benefit of \$1.6 million on \$4.6 million in restructuring charges incurred predominantly in the United States. The remaining year-over-year decrease in Covance's effective tax rate is attributable primarily to a shift in the mix of our pre-tax earnings across various tax jurisdictions and to the impact of tax planning initiatives.

Covance has a 47% minority equity position in Noveprim Limited (Noveprim), a supplier of research products. For the three months ended June 30, 2012, Covance recognized a loss of \$0.1 million versus a loss of \$0.2 million in the corresponding 2011 period, representing its share of Noveprim's losses, net of the elimination of profit on inventory purchased from Noveprim and still on hand at Covance.

The net loss was \$12.7 million for the three months ended June 30, 2012 compared to net income of \$37.6 million for the corresponding 2011 period. The net loss for the three months ended June 30, 2012 includes \$39.7 million, net of tax, of impairment charges for goodwill, inventory and an equity investment, and \$6.5 million, net of tax, of restructuring charges. The net income in the three months ended June 30, 2011 included restructuring charges totaling \$3.0 million, net of tax.

Six months Ended June 30, 2012 Compared with Six months Ended June 30, 2011. Net revenues totaling \$1.1 billion for the six months ended June 30, 2012 increased 5.2%, or 6.4% excluding the unfavorable impact of foreign exchange rate variances between both periods, as compared to \$1.0 billion for the corresponding 2011 period. Net revenues from Covance's early development segment decreased 5.4%, or 4.7% excluding the unfavorable impact of foreign exchange rate variances between both periods. The decline in the early development segment was due to lower volumes in toxicology and research products, which was partially offset by growth in clinical pharmacology. Net revenues from Covance's late-stage development segment increased 13.8%, or 15.4% excluding the unfavorable impact of foreign exchange rate variances between both periods. Growth in the late-stage development segment was led by the strong performance of our Phase II-IV clinical development services and increased volume in our central laboratory services.

Cost of revenue increased 10.2% to \$784.7 million or 73.1% of net revenues for the six months ended June 30, 2012 as compared to \$711.9 million or 69.8% of net revenues for the corresponding 2011 period. Gross margins decreased by 330 basis points to 26.9% for the six months ended June 30, 2012 from 30.2% for the corresponding 2011 period due to an inventory impairment charge of \$20.8 million (or 1.9% of net revenues) to write down certain preclinical inventory and the volume decrease in early development, which was only partially offset by strength in late-stage services.

Edgar Filing: COVANCE INC - Form 10-Q

Overall, selling, general and administrative expenses increased 3.4% to \$171.6 million for the six months ended June 30, 2012 from \$166.0 million for the corresponding 2011 period. As a percentage of net revenues, selling, general and administrative expenses decreased by 30 basis points to 16.0% for the six months ended June 30, 2012 from 16.3% for the corresponding 2011 period. Included in selling, general and administrative expenses during the six months ended June 30, 2012 is \$8.5 million (or 0.8% of net revenues) in costs associated with the 2012 restructuring actions to better align capacity to preclinical market demand and further improve profitability going forward. These actions include closing the Chandler, Arizona facility, as well as the Company's clinical pharmacology facilities in Honolulu, Hawaii and, following the completion of customary employee consultations, in Basel, Switzerland, and a further reduction in the cost structure. Included in selling, general and administrative expense during the six months ended June 30, 2011 was \$9.6 million (or 0.9% of net revenues) in

Table of Contents

costs associated with the 2011 restructuring initiatives to rationalize capacity, reduce the cost of overhead and support functions and to streamline processes. Selling, general and administrative expenses as a percentage of net revenues can and does vary depending on the timing and nature of various professional fees and other discretionary spending.

Depreciation and amortization increased 10.6% to \$57.2 million for the six months ended June 30, 2012 from \$51.7 million for the corresponding 2011 period. As a percentage of net revenues, depreciation and amortization increased by 20 basis points to 5.3% for the six months ended June 30, 2012 from 5.1% for the corresponding 2011 period. Depreciation and amortization during the six months ended June 30, 2012 includes \$1.2 million (or 0.1% of net revenues) in accelerated depreciation associated with the 2012 restructuring actions described above. Depreciation and amortization during the six months ended June, 2011 included \$0.8 million (or 0.1% of net revenues) in accelerated depreciation associated with the 2011 restructuring initiatives also described above. The balance of the increase results from depreciation on assets placed in service over the last year.

Income from operations decreased 53.5% to \$42.2 million or 3.9% of net revenues for the six months ended June 30, 2012 from \$90.7 million or 8.9% of net revenues for the corresponding 2011 period. Income from operations for the six months ended June 30, 2012 includes a goodwill impairment charge of \$18.0 million (or 1.7% of net revenues) related to the Basel clinic, which is included in our early development segment results, as well as the restructuring charges of \$9.7 million (or 0.9% of net revenues) and the inventory impairment charge of \$20.8 million (or 1.9% of net revenues) discussed above. Income from operations for the six months ended June 30, 2011 included \$10.4 million (or 1.0% of net revenues) in costs associated with the 2011 restructuring initiatives described above.

Results of operations from Covance's early development segment for the six months ended June 30, 2012 decreased \$76.3 million to a loss of \$21.8 million, compared to income of \$54.5 million for the corresponding 2011 period. As a percentage of net revenues, early development results of operations declined from 12.0% of early development net revenues in the six months ended June 30, 2011 to (5.1%) in the corresponding 2012 period. The decline in results of operations in Covance's early development segment for the six months ended June 30, 2012 is driven by the lower revenue in toxicology, the 2012 restructuring actions of \$9.2 million (or 2.1% of segment net revenues), the goodwill impairment charge of \$18.0 million (or 4.2% of segment net revenues) and the inventory impairment charge of \$20.8 million (or 4.8% of segment net revenues), partially offset by the inclusion in the 2011 six month period of \$4.9 million in costs (1.1% of segment net revenues) associated with the 2011 restructuring initiatives described above.

Income from operations from Covance's late-stage development segment for the six months ended June 30, 2012 increased 25.7% or \$28.7 million to \$140.5 million as compared to \$111.8 million for the corresponding 2011 period. As a percentage of net revenues, late-stage development income from operations increased 210 basis points from 19.8% of late-stage development net revenues in the six month period ended June 30, 2011 to 21.9% of net revenues in the corresponding 2012 period, driven by the increase in revenue in both Phase II-IV clinical development and central laboratories. Income from operations for the six months ended June 30, 2012 includes restructuring charges of \$0.2 million (or 0.03% of segment net revenues). In addition, income from operations from Covance's late-stage development segment for the six months ended June 30, 2011 included \$1.7 million (or 0.3% of segment net revenues) in costs associated with the 2011 restructuring initiatives described above.

Corporate expense increased \$0.9 million to \$76.5 million or 7.1% of net revenues for the six months ended June 30, 2012 as compared to \$75.6 million or 7.4% of net revenues for the corresponding 2011 period. Corporate expenses for the six months ended June 30, 2012 includes restructuring charges of \$0.3 million (or 0.03% of net revenues). Corporate expenses for the six months ended June 30, 2011 included \$3.8 million (or 0.4% of net revenues) in costs associated with the 2011 restructuring initiatives described above. Also included in corporate expense is stock-based compensation expense of \$19.4 million or 1.8% of net revenues for the six months ended June 30, 2012, as compared to \$18.9 million or 1.9% of net revenues for the corresponding 2011 period.

Other expense, net increased \$8.6 million to \$10.0 million for the six months ended June 30, 2012 from \$1.4 million for the corresponding 2011 period. The primary driver of the increase is an impairment charge of \$7.4 million associated with an equity method investment in a supplier of research products recorded in the 2012 period. Net foreign exchange transaction losses increased \$0.9 million, to \$1.0 million during the 2012 period from \$0.1 million in the corresponding 2011 period. Net interest expense increased \$0.1 million to \$1.4 million during the 2012 period from \$1.3 million for the corresponding 2011 period.

Table of Contents

Covance's effective tax rate for the six months ended June 30, 2012 was 28.6% compared to 20.9% for the corresponding 2011 period. Covance's effective tax rate for the six months ended June 30, 2012 includes a tax benefit of \$6.4 million associated with a \$20.8 million inventory impairment charge and a tax benefit of \$3.1 million associated with the \$9.7 million of 2012 cost reduction actions incurred predominantly in the United States. There was no tax benefit recorded for either the \$18.0 million goodwill impairment or the \$7.4 million equity investment impairment. Covance's effective tax rate for the six months ended June 30, 2011 included a tax benefit of \$3.7 million on \$10.4 million in restructuring charges incurred predominantly in the United States. The remaining year-over-year decrease in Covance's effective tax rate is attributable primarily to a shift in the mix of our pre-tax earnings across various tax jurisdictions and to the impact of tax planning initiatives.

Covance has a 47% minority equity position in Noveprim Limited (Noveprim), a supplier of research products. For the six months ended June 30, 2012, Covance recognized income of \$17 thousand versus a loss of \$0.2 million in the corresponding 2011 period, representing its share of Noveprim's earnings/losses, net of the elimination of profit on inventory purchased from Noveprim and still on hand at Covance.

Net income of \$23.0 million for the six months ended June 30, 2012 decreased \$47.4 million or 67.3% as compared to \$70.4 million for the corresponding 2011 period. Net income for the six months ended June 30, 2012 includes \$39.7 million, net of tax, of impairment charges for goodwill, inventory and an equity investment, and \$6.5 million, net of tax, of restructuring charges. Net income for the six months ended June 30, 2011 included restructuring charges totaling \$6.7 million, net of tax.

Liquidity and Capital Resources

Cash and cash equivalents at June 30, 2012 and December 31, 2011 were \$397.8 million and \$389.1 million, respectively. Amounts held by foreign subsidiaries were approximately \$383 million and \$367 million at June 30, 2012 and December 31, 2011, respectively, primarily in Swiss Francs, British Pounds and Euros. Foreign cash balances generally result from unremitted foreign earnings, which the Company intends to leave invested indefinitely outside of the United States. If the Company were to remit such earnings to the United States, it would be subject to additional United States income taxes. Amounts are principally invested in short-term money market funds and bank deposits with major financial institutions which carry a Moody's rating of A1 P1 or better. Covance's expected primary cash needs on both a short and long-term basis are for capital expenditures, expansion of services, possible future acquisitions, geographic expansion, working capital and other general corporate purposes, including possible share repurchases. On March 7, 2012, Covance amended its credit facility, which was not due to expire until October 2015, in order to, in part, provide sufficient liquidity to finance purchases under its recently authorized share buyback program, as well as to secure more favorable financing rates. The amended credit agreement (the Credit Agreement) provides for a revolving credit facility of up to \$500 million. At June 30, 2012, there were \$330 million of outstanding borrowings and \$2.9 million of outstanding letters of credit under the Credit Agreement. At December 31, 2011, there were \$30 million of outstanding borrowings and \$2.6 million of outstanding letters of credit under the previous credit agreement. Interest on all outstanding borrowings under the Credit Agreement varies in accordance with the terms of the Credit Agreement and is presently based upon the London Interbank Offered Rate plus a margin of 125 basis points. Interest on all outstanding borrowings under the previous credit agreement was based upon the London Interbank Offered Rate plus a margin of 200 basis points. Interest on outstanding borrowings approximated 1.50% per annum and 1.68% per annum during the three and six months ended June 30, 2012, respectively. Interest on outstanding borrowings approximated 2.33% per annum and 2.37% per annum during the three and six months ended June 30, 2011, respectively. Costs associated with the Credit Agreement, which expires in March 2017, consisted primarily of bank and legal fees totaling \$1.9 million and are being amortized over the five-year term. The Credit Agreement contains various financial and other covenants and is collateralized by guarantees of certain of Covance's domestic subsidiaries and a pledge of 65 percent of the capital stock of certain of Covance's foreign subsidiaries. At June 30, 2012, Covance was in compliance with the terms of the Credit Agreement. Covance believes cash on hand plus cash from operations and available borrowings under the Credit Agreement will provide sufficient liquidity for the foreseeable future.

Edgar Filing: COVANCE INC - Form 10-Q

During the six months ended June 30, 2012, Covance's operations provided net cash of \$82.1 million, a decrease of \$6.7 million from the corresponding 2011 period. The change in net operating assets used \$47.2 million in cash during the six months ended June 30, 2012, primarily due to a net increase in other assets and liabilities and unbilled services, combined with a decrease in accrued liabilities, partially offset by an increase in unearned revenue. The change in net operating assets used \$49.0 million in cash during the six months ended June 30, 2011, primarily due to an increase in accounts receivable and unbilled services, as well as a reduction in income taxes payable, partially offset by an increase in accrued liabilities and accounts payable. Covance's ratio of current assets to current liabilities was 1.32 at June 30, 2012 and 2.02 at December 31, 2011.

Table of Contents

Investing activities for the six months ended June 30, 2012 used \$68.4 million, compared to \$50.4 million for the corresponding 2011 period. Capital spending for the first six months of 2012 totaled \$69.3 million, and was primarily for ongoing information technology projects, upgrade of existing equipment, and the purchase of new equipment, hardware and software. Approximately \$43.4 million of capital spending in the first six months of 2012 represents expenditures associated with assets that have not yet been placed in service at June 30, 2012. Capital spending for the corresponding 2011 period totaled \$50.5 million, and was primarily for ongoing information technology projects, upgrade of existing equipment, and the purchase of new equipment, hardware and software.

Financing activities for the six months ended June 30, 2012 provided \$1.4 million, compared to a use of \$39.9 million in the corresponding 2011 period. Cash received from financing activities during the six months ended June 30, 2012 included \$300 million of net borrowings under the Credit Agreement, \$3.1 million in proceeds from the exercise of stock options and \$0.4 million in excess tax benefits realized on the exercise of stock options. Partially offsetting these items was \$294.8 million used to purchase 6,238,696 shares of common stock into treasury in connection with share buyback programs authorized by Covance's Board of Directors and \$7.3 million for the purchase into treasury of 152,371 shares in connection with employee benefit plans, for an aggregate cost of \$302.1 million. During the six months ended June 30, 2011, cash used for financing activities included the repayment of \$35.0 million on the revolver portion and \$5.0 million on the term loan portion of the prior credit agreement. In addition, \$7.5 million was used to purchase into treasury 130,030 shares of common stock in connection with employee benefit plans. Partially offsetting these items were \$5.3 million in proceeds from the exercise of stock options, \$1.6 million from employee contributions to the Company's employee stock purchase plan and \$0.7 million in excess tax benefits realized on the exercise of stock options.

Inflation

While most of Covance's net revenues are earned under contracts, the long-term contracts (those in excess of one year) generally include an inflation or cost of living adjustment for the portion of the services to be performed beyond one year from the contract date. As a result, Covance believes that the effects of inflation generally do not have a material adverse effect on its operations or financial condition.

Forward-Looking Statements. *Statements in this Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as in certain other parts of this Quarterly Report on Form 10-Q that look forward in time, are forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include statements concerning plans, objectives, goals, strategies, future events or performance, expectations, predictions, and assumptions and other statements which are other than statements of historical facts. All such forward-looking statements are based on the current expectations of management and are subject to, and are qualified by, risks and uncertainties that could cause actual results to differ materially from those expressed or implied by those statements. These risks and uncertainties include, without limitation, competitive factors, outsourcing trends in the pharmaceutical industry, levels of industry research and development spending, the Company's ability to continue to attract and retain qualified personnel, the fixed price nature of contracts or the loss or delay of large studies, risks associated with acquisitions and investments, the Company's ability to increase order volume, the pace of translation of orders into revenue in late-stage development services, testing mix and geographic mix of kit receipts in central laboratories, fluctuations in currency exchange rates, the realization of savings from the announced restructuring action in the Company's Early Development segment, the cost and pace of completion of our information technology projects and the realization of benefits therefrom, and other factors described in Covance's filings with the Securities and Exchange Commission, including its Annual Report on Form 10-K.*

Table of Contents

Item 3. Quantitative and Qualitative Disclosure About Market Risk

For the six months ended June 30, 2012, approximately 48% of our net revenues were derived from our operations outside the United States. We do not engage in material or long-term derivative or hedging activities related to our potential foreign exchange exposures. See Management's Discussion and Analysis of Financial Condition and Results of Operations - Foreign Currency Risks for a more detailed discussion of our foreign currency risks and exposures.

Covance's short-term investments are with major financial institutions which carry a Moody's rating of A1 P1 or better. These short-term investments are in bank deposits and money market funds which can be readily purchased and sold using established markets. Covance's cash investment policy is to maximize utilization of excess cash according to the following specific criteria (in order of priority): (1) preserve capital (minimize financial market risk); (2) maintain liquidity; (3) manage foreign exchange rate exposure (internal hedging); (4) maximize rate of return; and (5) enhance strategic relationships with select financial institutions. Covance also has strong operating cash flow and ready access to credit available under its Credit Agreement.

Item 4. Controls and Procedures

Disclosure controls and procedures. The Company's Principal Executive Officer and Principal Financial Officer have reviewed and evaluated the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered in this report. Based on that evaluation, the Principal Executive Officer and the Principal Financial Officer have concluded that the Company's current disclosure controls and procedures are effective. There have been no significant changes in the Company's internal control over financial reporting during the second quarter of 2012 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

Part II. Other Information

Item 1A. Risk Factors

This section discusses various risk factors that are attendant with our business and the provision of our services. If the events outlined below were to occur individually or in the aggregate, our business, results of operations, financial condition, and cash flows could be materially adversely affected.

Changes in government regulation or in practices relating to the pharmaceutical industry could decrease the need for the services we provide.

Governmental agencies throughout the world, including in the United States, strictly regulate the drug development process. Our business involves helping pharmaceutical and biotechnology companies navigate the regulatory drug approval process. Changes in regulation, such as a relaxation in regulatory requirements or the introduction of simplified drug approval procedures, or an increase in regulatory requirements that we have difficulty satisfying or that make our services less competitive, could eliminate or substantially reduce the demand for our services. Also, if government efforts contain drug costs and impact pharmaceutical and biotechnology company profits from new drugs, our customers may spend less, or reduce their growth in spending on research and development. If health insurers were to change their practices with respect to reimbursements for pharmaceutical products, our customers may spend less, or reduce their growth in spending on research and development.

Failure to comply with existing regulations could result in a loss of revenue or earnings or in increased costs.

Any failure on our part to comply with applicable regulations could result in the termination of on-going research or the disqualification of data for submission to regulatory authorities. For example, if we were to fail to properly monitor compliance by clinical trial investigators with study protocols, the data collected from that trial could be disqualified. If this were to happen, we could be contractually required to repeat the trial at no further cost to our customer, but at substantial cost to us, or could be exposed to a lawsuit seeking substantial monetary damages.

We may bear financial losses because most of our contracts are of a fixed price nature and may be delayed or terminated or reduced in scope for reasons beyond our control.

Many of our contracts provide for services on a fixed price or fee-for-service with a cap basis and they may be terminated or reduced in scope either immediately or upon notice. Cancellations may occur for a variety of reasons, including:

- the failure of products to satisfy safety requirements;

- unexpected or undesired results of the products;
- insufficient patient enrollment;
- insufficient investigator recruitment;
- the client's decision to terminate the development of a product or to end a particular study; and
- our failure to perform properly our duties under the contract.

The loss, reduction in scope or delay of a large contract or the loss or delay of multiple contracts could materially adversely affect our business, although our contracts often entitle us to receive the costs of winding down the terminated projects, as well as all fees earned by us up to the time of termination.

We may bear financial risk if we underprice our contracts or overrun cost estimates.

Since our contracts are often structured as fixed price or fee-for-service with a cap, we bear the financial risk if we initially underprice our contracts or otherwise overrun our cost estimates. Such underpricing or significant cost overruns could have a material adverse effect on our business, results of operations, financial condition, and cash flows.

We may not be able to successfully develop and market or acquire new services.

We may seek to develop and market new services that complement or expand our existing business or expand our service offerings through acquisition. If we are unable to develop new services and/or create demand for those newly developed services, or

Table of Contents

to expand our service offerings through acquisition, our future business, results of operations, financial condition, and cash flows could be adversely affected.

Our quarterly operating results may vary.

Our operating results may vary significantly from quarter to quarter and are influenced by factors over which we have little control such as:

- changes in the general global economy;
- exchange rate fluctuations;
- the commencement, completion, delay or cancellation of large projects or groups of projects;
- the progress of ongoing projects;
- the timing of and charges associated with completed acquisitions or other events; and
- changes in the mix of our services.

We believe that operating results for any particular quarter are not necessarily a meaningful indication of future results. While fluctuations in our quarterly operating results could negatively or positively affect the market price of our common stock, these fluctuations may not be related to our future overall operating performance.

We depend on the pharmaceutical and biotechnology industries.

Our revenues depend greatly on the expenditures made by the pharmaceutical and biotechnology industries in research and development. In some instances, companies in these industries are reliant on their ability to raise capital in order to fund their research and development projects. Accordingly, economic factors and industry trends that affect our clients in these industries also affect our business. If companies in these industries were to reduce the number of research and development projects they conduct or outsource, our business could be materially adversely affected.

We operate in a highly competitive industry.

Competitors in the contract research organization industry range from small, limited-service providers to full service global contract research organizations. Our main competition consists of in-house departments of pharmaceutical companies, full-service and functional contract research organizations, and, to a lesser degree, universities and teaching hospitals. We compete on a variety of factors, including:

- reputation for on-time quality performance and regulatory compliance;
- expertise and experience in specific areas;
- scope of service offerings;
- strengths in various geographic markets;
- price;
- technological expertise and efficient drug development processes;
- quality of facilities;
- ability to acquire, process, analyze and report data in an accurate manner;
- ability to manage large-scale clinical trials both domestically and internationally;
- expertise and experience in market access services; and
- size.

For instance, our clinical and other development services have from time-to-time experienced periods of increased price competition which had a material adverse effect on Covance's late-stage development profitability and consolidated net revenues and net income.

There is competition among the larger contract research organizations for both clients and potential acquisition candidates. Additionally, small, limited-service entities considering entering the contract research organization industry will find few barriers to entry, thus further increasing possible competition. These competitive pressures may affect the attractiveness of our services and could adversely affect our financial results.

Table of Contents

Unfavorable general economic conditions could negatively impact our operating results and financial condition.

Unfavorable global economic conditions, including the recent recession in the United States and the recent financial crisis affecting the banking system and financial markets, could negatively affect our business. While it is difficult for us to predict the impact of general economic conditions on our business, these conditions could reduce customer demand for some of our services, which could cause our revenue to decline. Also, our customers, particularly smaller biotechnology companies which are especially reliant on the credit and capital markets, may not be able to obtain adequate access to credit or equity funding, which could affect their ability to make timely payments to us. If that were to occur, we could be required to increase our allowance for doubtful accounts, and the number of days outstanding for our accounts receivable could increase. For these reasons, among others, if the economic conditions stagnate or decline, our operating results and financial condition could be adversely affected.

We may expand our business through acquisitions.

We review many acquisition candidates and, in addition to acquisitions which we have already made, we are continually evaluating new acquisition opportunities. Factors which may affect our ability to grow successfully through acquisitions include:

- difficulties and expenses in connection with integrating the acquired companies and achieving the expected benefits;
- diversion of management's attention from current operations;
- the possibility that we may be adversely affected by risk factors facing the acquired companies;
- acquisitions could be dilutive to earnings, or in the event of acquisitions made through the issuance of our common stock to the shareholders of the acquired company, dilutive to the percentage of ownership of our existing stockholders;
- potential losses resulting from undiscovered liabilities of acquired companies not covered by the indemnification we may obtain from the seller;
- risks of not being able to overcome differences in foreign business practices, language and other cultural barriers in connection with the acquisition of foreign companies; and
- loss of key employees of the acquired companies.

We may be affected by health care reform and potential additional reforms.

In March 2010, the United States Congress enacted health care reform legislation intended to expand, over time, health insurance coverage and impose health industry cost containment measures. This legislation may significantly impact the pharmaceutical and biotechnology industries. In addition, the U.S. Congress, various state legislatures and European and Asian governments may consider various types of health care reform in order to control growing health care costs. We are presently uncertain as to the effects of the recently enacted legislation on our business and are unable to predict what legislative proposals will be adopted in the future, if any.

Implementation of health care reform legislation that contains costs could limit the profits that can be made from the development of new drugs. This could adversely affect research and development expenditures by pharmaceutical and biotechnology companies which could in turn decrease the business opportunities available to us both in the United States and abroad. In addition, new laws or regulations may create a risk of liability, increase our costs or limit our service offerings.

We rely on third parties for important services.

We depend on third parties to provide us with services critical to our business. The failure of any of these third parties to adequately provide the needed services could have a material adverse effect on our business.

Our revenues and earnings are exposed to exchange rate fluctuations.

We derive a large portion of our net revenues from international operations. For the six months ended June 30, 2012, we derived approximately 48% of our net revenues from operations outside the United States. Since our consolidated financial statements are denominated in U.S. dollars, fluctuations in exchange rates from period to period will have an impact on our reported results. In addition, in certain circumstances, we may incur costs in one currency related to our services or products for which we are paid in a different currency. As a result, factors associated with international operations, including changes in foreign currency exchange rates, could significantly affect our results of operations, financial condition and cash flows.

Table of Contents

The loss of our key personnel could adversely affect our business.

Our success depends to a significant extent upon the efforts of our senior management team and other key personnel. The loss of the services of such personnel could adversely affect our business. Also, because of the nature of our business, our success is dependent upon our ability to attract and retain technologically qualified personnel. There is substantial competition for qualified personnel, and an inability to recruit or retain qualified personnel may impact our ability to grow our business and compete effectively in our industry.

Contract research services create a risk of liability.

In contracting to work on drug development trials and studies, we face a range of potential liabilities, for example:

- errors or omissions that create harm during a trial to study volunteers or after a trial to consumers of the drug after regulatory approval of the drug;
- general risks associated with clinical pharmacology facilities, including negative consequences from the administration of drugs to clinical trial participants or the professional malpractice of clinical pharmacology medical care providers;
- errors or omissions from tests conducted for the agrochemical and food industries;
- risks that animals in our breeding facilities may be infected with diseases that may be harmful and even lethal to themselves and humans despite preventive measures contained in our company policies for the quarantine and handling of imported animals; and
- errors and omissions during a trial that may undermine the usefulness of a trial or data from the trial or study.

We also contract with physicians, also referred to as investigators, to conduct the clinical trials to test new drugs on human volunteers. These tests can create a risk of liability for personal injury or death to volunteers, resulting from negative reactions to the drugs administered or from professional malpractice by third party investigators.

While we endeavor to include in our contracts provisions entitling us to be indemnified or entitling us to a limitation of liability, these provisions do not uniformly protect us against liability arising from certain of our own actions, such as negligence or misconduct. We could be materially and adversely affected if we were required to pay damages or bear the costs of defending any claim which is not covered by a contractual indemnification provision or in the event that a party who must indemnify us does not fulfill its indemnification obligations or which is beyond the level of our insurance coverage. There can be no assurance that we will be able to maintain such insurance coverage on terms acceptable to us.

Hardware and software failures, delays in the operation of our computer and communications systems or the failure to implement system enhancements may harm our business.

Our success depends on the efficient and uninterrupted operation of our computer and communications systems. A failure of our network or data gathering procedures could impede the processing of data, delivery of databases and services, client orders and day-to-day management of our business and could result in the corruption or loss of data. While certain of our operations have appropriate disaster recovery plans in place, we currently do not have redundant facilities everywhere in the world to provide IT capacity in the event of a system failure. Despite any precautions we may take, damage from fire, floods, hurricanes, power loss, telecommunications failures, computer viruses, break-ins, cybersecurity breaches and similar events at our various computer facilities could result in interruptions in the flow of data to our servers and from our servers to our clients. In addition, any failure by our computer environment to provide our required data communications capacity could result in interruptions in our service. In the event of a delay in the delivery of data, we could be required to transfer our data collection operations to an alternative provider of server hosting services. Such a transfer could result in delays in our ability to deliver our products and services to our clients. Additionally, significant delays in the planned delivery of system enhancements, improvements and inadequate performance of the systems once they are completed could damage our reputation and harm our business. Finally, long-term disruptions in the infrastructure caused by events such as natural disasters, the outbreak of war, the escalation of hostilities, acts of terrorism (particularly involving cities in which we have offices) and cybersecurity breaches could adversely affect our business. Although we carry property and business interruption insurance, our coverage may not be adequate to compensate us for all losses that may occur.

Reliance on facilities.

Covance relies on certain of its facilities. In particular, Covance's preclinical and central laboratory facilities are highly specific and would be difficult to replace in a short period of time. Any event that causes a disruption of the operation of these

Table of Contents

facilities might impact our ability to provide service to our customers and therefore could have a material adverse effect on our financial condition, results of operations and cash flows.

Reliance on air transportation.

Our central laboratories and certain of our other businesses are heavily reliant on air travel for transport of clinical trial kits and other material, products and people, and a significant disruption to the air travel system, or our access to it, could have a material adverse effect on our business.

Certain service offerings and research products are dependent on limited sources of supply of services or products which if interrupted could affect our business.

We depend on a limited number of suppliers for certain services and for certain animal populations. Disruptions to the continued supply of these services or products may arise from export/import restrictions or embargoes, foreign political or economic instability, or otherwise. Disruption of supply could have a material adverse effect on our business.

Actions of animal rights extremists may affect our business.

Our early development services utilize animals in preclinical testing of the safety and efficacy of drugs and also breed and sell animals for biomedical research. Such activities are required for the development of new medicines and medical devices under regulatory regimes in the United States, Europe, Japan and other countries. Acts of vandalism and other acts by animal rights extremists who object to the use of animals in drug development could have a material adverse effect on our business.

Our animal populations may suffer diseases that can damage our inventory, harm our reputation, result in decreased sales of research products or result in other liability to us.

It is important that our research products be free of diseases, including infectious diseases. The presence of diseases can distort or compromise the quality of research results, can cause loss of animals in our inventory, can result in harm to humans or outside animal populations if the disease is not contained to animals in inventory, or can result in other losses. Such results could harm our reputation or have a material adverse effect on our financial condition, results of operations, and cash flows.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Edgar Filing: COVANCE INC - Form 10-Q

Repurchases of equity securities as reported on a settlement date basis during the quarter ended June 30, 2012 were as follows:

Issuer Purchases of Equity Securities

Period	Total # of Shares Purchased	Average Price Paid Per Share	Total # of Shares Purchased as Part of Currently Authorized Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under 2012 Repurchase Program
April 1, 2012 - April 30, 2012				\$ 58.1 million
May 1, 2012 - May 31, 2012				\$ 58.1 million
June 1, 2012 - June 30, 2012	385,372	\$ 46.71	385,372	\$ 40.1 million
Total	385,372	\$ 46.71	385,372	

In January 2012, the Covance Board of Directors authorized the repurchase of up to \$300 million of the Company's outstanding common stock (the 2012 Repurchase Program).
