Forward-Looking Statements

Certain of the statements included in this Quarterly Report on Form 10-Q, including but not limited to those in Management’s Discussion and Analysis of Financial Condition and Results of Operations, constitute forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Words such as “expects,” “believes,” “anticipates,” “includes,” “plans,” “assumes,” “estimates,” “projects,” “intends,” “should,” “will,” “shall” or variations of these words are generally part of forward-looking statements. Forward-looking statements are made based on management’s current expectations and beliefs concerning future developments and their potential effects upon Prudential Financial, Inc. and its subsidiaries. There can be no assurance that future developments affecting Prudential Financial, Inc. and its subsidiaries will be those anticipated by management. These forward-looking statements are not a guarantee of future performance and involve risks and uncertainties, and there are certain important factors that could cause actual results to differ, possibly materially, from expectations or estimates reflected in such forward-looking statements, including, among others: (1) general economic, market and political conditions, including the performance and fluctuations of fixed income, equity, real estate and other financial markets; (2) the availability and cost of additional debt or equity capital or external financing for our operations; (3) interest rate fluctuations or prolonged periods of low interest rates; (4) the degree to which we choose not to hedge risks, or the potential ineffectiveness or insufficiency of hedging or risk management strategies we do implement; (5) any inability to access our credit facilities; (6) reestimates of our reserves for future policy benefits and claims; (7) differences between actual experience regarding mortality, morbidity, persistency, utilization, interest rates or market returns and the assumptions we use in pricing our products, establishing liabilities and reserves or for other purposes; (8) changes in our assumptions related to deferred policy acquisition costs, value of business acquired or goodwill; (9) changes in assumptions for our pension and other post-retirement benefit plans; (10) changes in our financial strength or credit ratings; (11) statutory reserve requirements associated with term and universal life insurance policies under Regulation XXX and Guideline AXXX; (12) investment losses, defaults and counterparty non-performance; (13) competition in our product lines and for personnel; (14) difficulties in marketing and distributing products through current or future distribution channels; (15) changes in tax law; (16) economic, political, currency and other risks relating to our international operations; (17) fluctuations in foreign currency exchange rates and foreign securities markets; (18) regulatory or legislative changes, including the Dodd-Frank Wall Street Reform and Consumer Protection Act and the U.S. Department of Labor’s fiduciary rules; (19) inability to protect our intellectual property rights or claims of infringement of the intellectual property rights of others; (20) adverse determinations in litigation or regulatory matters, and our exposure to contingent liabilities, including related to the remediation of certain securities lending activities administered by the Company; (21) domestic or international military actions, natural or man-made disasters including terrorist activities or pandemic disease, or other events resulting in catastrophic loss of life; (22) ineffectiveness of risk management policies and procedures in identifying, monitoring and managing risks; (23) possible difficulties in executing, integrating and realizing projected results of acquisitions, divestitures and restructurings; (24) interruption in telecommunication, information technology or other operational systems or failure to maintain the security, confidentiality or privacy of sensitive data on such systems; (25) changes in statutory or U.S. GAAP accounting principles, practices or policies; and (26) Prudential Financial, Inc.’s primary reliance, as a holding company, on dividends or distributions from its subsidiaries to meet debt payment obligations and the ability of the subsidiaries to pay such dividends or distributions in light of our ratings objectives and/or applicable regulatory restrictions. Prudential Financial, Inc. does not intend, and is under no obligation, to update any particular forward-looking statement included in this document. See “Risk Factors” included in the Annual Report on Form 10-K for the year ended December 31, 2015 for discussion of certain risks relating to our businesses and investment in our securities.

Table of Contents

Throughout this Quarterly Report on Form 10-Q, “Prudential Financial” and the “Registrant” refer to Prudential Financial, Inc., the ultimate holding company for all of our companies. “Prudential Insurance” refers to The Prudential Insurance Company of America. “Prudential,” the “Company,” “we” and “our” refer to our consolidated operations.

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements

1. BUSINESS AND BASIS OF PRESENTATION

Prudential Financial, Inc. (“Prudential Financial”) and its subsidiaries (collectively, “Prudential” or the “Company” or “PFI”) provide a wide range of insurance, investment management, and other financial products and services to both individual and institutional customers throughout the United States and in many other countries. Principal products and services provided include life insurance, annuities, retirement-related services, mutual funds and investment management.

From December 18, 2001, the date of demutualization, through December 31, 2014, the Company organized its principal operations into the Financial Services Businesses and the Closed Block Business, and had two classes of common stock outstanding. The Common Stock, which is publicly traded (NYSE:PRU), reflected the performance of the Financial Services Businesses, while the Class B Stock, which was issued through a private placement and did not trade on any exchange, reflected the performance of the Closed Block Business.

On January 2, 2015, Prudential Financial repurchased and canceled all of the shares of the Class B Stock (the “Class B Repurchase”). As a result, the Company no longer organizes its principal operations into the Financial Services Businesses and the Closed Block Business. The Company’s principal operations are comprised of four divisions: the U.S. Retirement Solutions and Investment Management division, the U.S. Individual Life and Group Insurance division, the International Insurance division and the Closed Block division. The Closed Block division is accounted for as a divested business that is reported separately from the divested businesses that are included in the Company’s Corporate and Other operations. The Company’s Corporate and Other operations include corporate items and initiatives that are not allocated to business segments and businesses that have been or will be divested, excluding the Closed Block division.

Basis of Presentation

As a result of the Class B Repurchase and resulting elimination of the separation of the Financial Services Businesses and the Closed Block Business, these Unaudited Interim Consolidated Financial Statements refer to the divisions and segments of the Company that formerly comprised the Financial Services Businesses as “PFI excluding Closed Block division” and refer to the operations that were formerly included in the Closed Block Business as the “Closed Block division,” except as otherwise noted. Closed Block Business results were associated with the Company’s Class B Stock for periods prior to January 1, 2015.

The Unaudited Interim Consolidated Financial Statements include the accounts of Prudential Financial, entities over which the Company exercises control, including majority-owned subsidiaries and variable interest entities (“VIEs”) in which the Company is considered the primary beneficiary. See Note 5 for more information on the Company’s consolidated variable interest entities. The Unaudited Interim Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) on a basis consistent with reporting interim financial information in accordance with instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities and Exchange Commission. Intercompany balances and transactions have been eliminated.

In the opinion of management, all adjustments necessary for a fair statement of the financial position and results of operations have been made. All such adjustments are of a normal, recurring nature. Interim results are not necessarily indicative of the results that may be expected for the full year. These financial statements should be read in conjunction with the Company’s Consolidated Financial Statements included in the Company’s Annual Report on Form

10-K for the year ended December 31, 2015.

The Company's Gibraltar Life Insurance Company, Ltd. ("Gibraltar Life") consolidated operations use a November 30 fiscal year end for purposes of inclusion in the Company's Consolidated Financial Statements. The Company's unaudited interim consolidated balance sheet data as of September 30, 2016, include the assets and liabilities of Gibraltar Life as of August 31, 2016. The Company's unaudited interim consolidated income statement data include Gibraltar Life's results of operations for the three and nine months ended August 31, 2016 and 2015, respectively.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

The most significant estimates include those used in determining deferred policy acquisition costs (“DAC”) and related amortization; value of business acquired (“VOBA”) and its amortization; amortization of deferred sales inducements (“DSI”); measurement of goodwill and any related impairment; valuation of investments including derivatives and the recognition of other-than-temporary impairments (“OTTI”); future policy benefits including guarantees; pension and other postretirement benefits; provision for income taxes and valuation of deferred tax assets; and accruals for contingent liabilities, including estimates for losses in connection with unresolved legal matters.

Out of Period Adjustments

During the second quarter of 2016, the Company recorded an out of period adjustment resulting in a decrease of \$148 million to “Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures,” which is reflected in the three month period ended June 30, 2016 and the nine month period ended September 30, 2016. The adjustment reflects a charge to increase reserves, net of a related increase in DAC, for certain universal life products within the Individual Life business. Management evaluated the adjustment and concluded it was not material to the current period or to any previously reported quarterly or annual financial statements. For additional information on the impact of this adjustment to the Company’s operating segments, see Note 11.

Reclassifications

Certain amounts in prior periods have been reclassified to conform to the current period presentation.

2. SIGNIFICANT ACCOUNTING POLICIES AND PRONOUNCEMENTS

This section supplements, and should be read in conjunction with, Note 2 to the Consolidated Financial Statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2015.

Adoption of New Accounting Pronouncements

In May 2015, the Financial Accounting Standards Board (“FASB”) issued guidance (Accounting Standards Update (“ASU”) 2015-07, Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)) to remove the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. The new guidance became effective for annual periods and interim periods within those annual periods that began after December 15, 2015, and was applied retrospectively. Adoption of the guidance did not have a significant effect on the Company’s financial statement disclosures, see Note 13.

In April 2015, the FASB issued updated guidance (ASU 2015-03, Interest—Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs) that simplifies the presentation of debt issuance costs. The pronouncement requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability. The Company adopted the guidance effective January 1, 2016. Prior period financial information presented in these financial statements has been adjusted to reflect the retrospective adoption of the amended guidance. “Other assets” and “Long-term debt” as previously reported on the Company’s consolidated statements of financial position as of December 31, 2015 were both reduced by \$133 million as a result of this retrospective adoption.

In February 2015, the FASB issued updated guidance (ASU 2015-02, Consolidation (Topic 810): Amendments to Consolidation Analysis) that modifies the rules regarding consolidation. The pronouncement eliminates specialized guidance for limited partnerships and similar legal entities, and removes the indefinite deferral for certain investment funds. The new guidance is effective for annual periods and interim periods within those annual periods beginning after December 15, 2015, with early adoption permitted. The Company adopted the updated guidance effective January 1, 2016 and applied the modified retrospective method of adoption, primarily resulting in the deconsolidation of certain of its previously consolidated collateralized loan obligations (“CLOs”), as its fee arrangements are no longer deemed variable interests in these entities. The Company continues to consolidate CLOs where it retains other economic interests which absorb more than an insignificant amount of the CLOs expected variability. The Company also deconsolidated certain investment structures where it is no longer deemed to be the primary beneficiary as the Company, through its equity ownership, no longer has the obligation to absorb losses of the VIE that could be significant to the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE. The impact to the Company’s consolidated statements of financial position upon adoption of the updated guidance was a reduction of \$5.5 billion of “Total assets” (including \$5.1 billion of “Total investments”) and \$5.5 billion of “Total liabilities” (including \$5.1 billion of “Notes issued by consolidated variable interest entities”), with a \$30 million decrease in “Noncontrolling interests” and a \$7 million increase to “Total Prudential Financial, Inc. equity.”

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

In August 2014, the FASB issued updated guidance (ASU 2014-14, Receivables—Troubled Debt Restructurings by Creditors (Subtopic 310-40): Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure) requiring that mortgage loans be derecognized and that a separate other receivable be recognized upon foreclosure if certain conditions are met. Upon foreclosure, the separate other receivable should be measured based on the amount of the loan balance (principal and interest) expected to be recovered from the guarantor. The new guidance became effective for annual periods and interim periods within those annual periods that began after December 15, 2014, and was applied prospectively. Adoption of the guidance did not have a significant effect on the Company's consolidated financial position, results of operations or financial statement disclosures.

In August 2014, the FASB issued updated guidance (ASU 2014-13, Consolidation (Topic 810): Measuring the Financial Assets and the Financial Liabilities of a Consolidated Collateralized Financing Entity) for measuring the financial assets and the financial liabilities of a consolidated collateralized financing entity. Under the guidance, an entity within scope is permitted to measure both the financial assets and financial liabilities of a consolidated collateralized financing entity based on either the fair value of the financial assets or the financial liabilities, whichever is more observable. If adopted, the guidance eliminates the measurement difference that exists when both are measured at fair value. The Company adopted the updated guidance effective January 1, 2016, and applied the modified retrospective method of adoption. The impact to the Company's consolidated statements of financial position upon adoption of the updated guidance was a \$4 million reduction in "Total liabilities" and a \$4 million increase to "Total Prudential Financial, Inc. equity."

In June 2014, the FASB issued updated guidance (ASU 2014-11, Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures) that requires repurchase-to-maturity transactions to be accounted for as secured borrowings and eliminates existing guidance for repurchase financings. The guidance also requires new disclosures for certain transactions accounted for as secured borrowings and for transfers accounted for as sales when the transferor also retains substantially all of the exposure to the economic return on the transferred financial assets. Accounting changes and new disclosures for transfers accounted for as sales under the new guidance were effective for the first interim or annual period beginning after December 15, 2014, and did not have a significant effect on the Company's consolidated financial position, results of operations or financial statement disclosures. Disclosures for certain transactions accounted for as secured borrowings were effective for interim periods beginning after March 15, 2015, and are included in Note 4. The Company applied the modified retrospective method of adoption.

In April 2014, the FASB issued updated guidance (ASU 2014-08, Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity) that changes the criteria for reporting discontinued operations and introduces new disclosures. The new guidance became effective for new disposals and new classifications of disposal groups as held for sale that occur within annual periods that began on or after December 15, 2014, and interim periods within those annual periods, and was applied prospectively. Adoption of the guidance did not have a significant effect on the Company's consolidated financial position, results of operations or financial statement disclosures.

In January 2014, the FASB issued updated guidance (ASU 2014-04, Receivables—Troubled Debt Restructuring by Creditors (Subtopic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure) for troubled debt restructurings clarifying when an in-substance repossession or foreclosure occurs, and when a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan. The new guidance became effective for annual periods and interim periods within those annual periods that began after December 15, 2014, and was applied prospectively. Adoption of the

guidance did not have a significant effect on the Company's consolidated financial position, results of operations or financial statement disclosures.

In January 2014, the FASB issued updated guidance (ASU 2014-01, Investments—Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Qualified Affordable Housing Projects) regarding investments in flow-through limited liability entities that manage or invest in affordable housing projects that qualify for the low-income housing tax credit. Under the guidance, an entity is permitted to make an accounting policy election to amortize the initial cost of its investment in proportion to the tax credits and other tax benefits received and recognize the net investment performance in the statement of operations as a component of income tax expense (benefit) if certain conditions are met. The new guidance became effective for annual periods and interim reporting periods within those annual periods that began after December 15, 2014. The Company did not elect the proportional amortization method under this guidance.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Future Adoption of New Accounting Pronouncements

In May 2014, the FASB issued updated guidance (ASU 2014-09, Revenue from Contracts with Customers (Topic 606)) on accounting for revenue recognition. The guidance is based on the core principle that revenue is recognized to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. The guidance also requires additional disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from cost incurred to obtain or fulfill a contract. Revenue recognition for insurance contracts and financial instruments is explicitly scoped out of the guidance. In August 2015, the FASB issued an update to defer the original effective date of this guidance. As a result of the deferral, the new guidance is effective for annual periods and interim periods within those annual periods, beginning after December 15, 2017, and must be applied using one of two retrospective application methods. Early adoption is permitted only for annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. The Company is currently assessing the impact of the guidance on the Company's consolidated financial position, results of operations and financial statement disclosures.

In May 2015, the FASB issued final guidance (ASU 2015-09, Financial Services—Insurance (Topic 944): Disclosures about Short-Duration Contracts) that aims to enhance disclosures about insurance contracts classified as short-duration. The new disclosure requirements focus on providing users of financial statements with more transparent information about an insurance entity's initial claim estimates and subsequent adjustments to those estimates, methodologies and judgments in estimating claims, and timing, frequency and severity of claims as they relate to short-duration insurance contracts. The new guidance is effective for annual periods beginning after December 15, 2015, and interim periods within annual periods beginning after December 15, 2016, and is to be applied retrospectively. The Company is currently assessing the impact of the guidance on the Company's financial statement disclosures but has concluded that this guidance will not impact the Company's consolidated financial position or results of operations.

In January 2016, the FASB issued updated guidance (ASU 2016-01, Financial Instruments—Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities) on the recognition and measurement of financial assets and financial liabilities. The guidance revises an entity's accounting related to the classification and measurement of certain equity investments and the presentation of certain fair value changes for financial liabilities measured at fair value. The guidance also amends certain disclosure requirements associated with the fair value of financial instruments. The new guidance is effective for annual periods and interim reporting periods within those annual periods beginning after December 15, 2017. Early adoption is not permitted except for the provisions related to the presentation of certain fair value changes for financial liabilities measured at fair value. The Company is currently assessing the impact of the guidance on the Company's consolidated financial position, results of operations and financial statement disclosures.

In February 2016, the FASB issued guidance (ASU 2016-02, Leases (Topic 842)) that ensures assets and liabilities from all outstanding lease contracts are recognized on balance sheet (with limited exception). The guidance substantially changes a Lessee's accounting for leases and requires the recording on balance sheet of a "right-of-use" asset and liability to make lease payments for most leases. A Lessee will continue to recognize expense in its income statement in a manner similar to the requirements under the current lease accounting guidance. For Lessors, the guidance modifies classification criteria and accounting for sales-type and direct financing leases and requires a Lessor to derecognize the carrying value of the leased asset that is considered to have been transferred to a Lessee and record a lease receivable and residual asset ("receivable and residual" approach). The guidance also eliminates the real estate specific provisions of the current guidance (i.e., sale-leaseback). The new guidance is effective for financial

statements issued for annual reporting periods beginning after December 15, 2018, and for interim periods within those annual periods, with early adoption permitted. The Company is currently assessing the impact of the guidance on the Company's consolidated financial position, results of operations and financial statement disclosures.

In March 2016, the FASB issued guidance (ASU 2016-07, Investments—Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting) to simplify the transition to equity method when an investment qualifies for use of the equity method as a result of an increase in the level of ownership or degree of influence. The amendments require that the equity method investor add the cost of acquiring the additional interest in the investee to the current basis of the investor's previously held interest and adopt the equity method of accounting as of the date the investment becomes qualified for equity method accounting. The new guidance is effective for financial statements issued for annual reporting periods beginning after December 15, 2016, and for interim periods within those annual periods. The guidance is to be applied prospectively to increases in the level of ownership interest or degree of influence that result in the adoption of the equity method after the effective date. The Company does not expect the adoption of this guidance to have a significant impact on the Company's consolidated financial position, results of operations and financial statement disclosures.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

In March 2016, the FASB issued guidance (ASU 2016-09, Compensation—Stock Compensation (Topic 718): Improvements to Employee Share-Based Payments Accounting) to simplify and improve employee share-based payment accounting. The areas updated include income tax consequences, a policy election related to forfeitures, classification of awards as either equity or liability, and classification of operating and financing activity on the statement of cash flows. The new guidance is effective for financial statements issued for annual reporting periods beginning after December 15, 2016, and for interim periods within those annual periods, with early adoption permitted. The Company does not expect the adoption of this guidance to have a significant impact on the Company's consolidated financial position, results of operations and financial statement disclosures.

In June 2016, the FASB issued guidance (ASU 2016-13, Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments) that provides a new current expected credit loss model to account for credit losses on certain financial assets and off-balance sheet exposures (e.g., loans held for investment, debt securities held to maturity, reinsurance receivables, net investments in leases and loan commitments). The model requires an entity to estimate lifetime credit losses related to such financial assets and exposures based on relevant information about past events, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amount. The guidance also modifies the current other-than-temporary impairment guidance for available-for-sale debt securities to require the use of an allowance rather than a direct write down of the investment, and replaces existing guidance for purchased credit deteriorated loans and debt securities. The new guidance is effective for financial statements issued by public entities for annual reporting periods beginning after December 15, 2019, and for interim periods within those annual periods. Early adoption is permitted for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The Company is currently assessing the impact of the guidance on the Company's consolidated financial position, results of operations and financial statement disclosures.

In August 2016, the FASB issued guidance (ASU 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments (a consensus of the Emerging Issues Task Force)) to address diversity in practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The amendments provide clarity on the treatment of eight specifically defined types of cash inflows and outflows. The new guidance is effective for financial statements issued for annual reporting periods beginning after December 15, 2017, and for interim periods within those annual periods, with early adoption permitted, provided that all of the amendments are adopted in the same period. The Company is currently assessing the impact of the guidance on the Company's statement of cash flows.

3. ACQUISITIONS

This section supplements, and should be read in conjunction with, the complete descriptions provided in Note 3 to the Company's Consolidated Financial Statements included in the Annual Report on Form 10-K for the year ended December 31, 2015.

Acquisition of Deutsche Bank's India Asset Management Business

In March 2016, the Company and its asset management joint venture partner in India completed the previously announced acquisition of Deutsche Bank's India asset management business through the joint venture. This acquisition, which will expand the Company's investment management expertise, distribution platform and product portfolio in India, did not have a material impact on the Company's financial results.

Acquisition of Administradora de Fondos de Pensiones Habitat S.A.

In March 2016, the Company completed the purchase of an indirect 40% ownership interest in Administradora de Fondos de Pensiones Habitat S.A. (“AFP Habitat”), a leading provider of retirement services in Chile, from Inversiones La Construcción S.A. (“ILC”), the investment subsidiary of the Chilean Construction Chamber. The Company paid 899.90 Chilean pesos per share, for a total purchase price of approximately \$532 million based on exchange rates at the share acquisition date. The Company and ILC now equally own an indirect controlling stake in AFP Habitat through a joint holding company. The Company’s investment will be accounted for under the equity method and is recorded within “Other assets.” This acquisition will enable the Company to participate in the growing Chilean pension market.

(1) Includes \$0 million of fair value and \$0 million of gross unrealized losses at December 31, 2015, on securities classified as held-to-maturity, which is not reflected in AOCI.

The gross unrealized losses on fixed maturity securities at September 30, 2016 and December 31, 2015, were composed of \$1,324 million and \$3,750 million, respectively, related to high or highest quality securities based on the National Association of Insurance Commissioners (“NAIC”) or equivalent rating and \$472 million and \$583 million, respectively, related to other than high or highest quality securities based on NAIC or equivalent rating. At September 30, 2016, the \$1,023 million of gross unrealized losses of twelve months or more were concentrated in the energy, utility and capital goods sectors of the Company’s corporate securities. At December 31, 2015, the \$1,802 million of gross unrealized losses of twelve months or more were concentrated in the energy, consumer non-cyclical and basic industry sectors of the Company’s corporate securities. In accordance with its policy described in Note 2 to the Consolidated Financial Statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2015, the Company concluded that an adjustment to earnings for OTTI for these securities was not warranted at September 30, 2016 or December 31, 2015. These conclusions are based on a detailed analysis of the underlying credit and cash flows on each security. The gross unrealized losses are primarily attributable to general credit spread widening and foreign currency exchange rate movements. At September 30, 2016, the Company does not intend to sell these securities, and it is not more likely than not that the Company will be required to sell these securities before the anticipated recovery of the remaining amortized cost basis.

At September 30, 2016, \$9 million of the gross unrealized losses on equity securities represented declines in value of greater than 20%, approximately all of which had been in that position for less than six months. At December 31, 2015, \$19 million of the gross unrealized losses on equity securities represented declines in value of greater than 20%, all of which had been in that position for less than six months. In accordance with its policy described in Note 2 to the Consolidated Financial Statements included in the Company’s Annual Report on Form 10-K for the year ended

December 31, 2015, the Company concluded that an adjustment for OTTI for these equity securities was not warranted at September 30, 2016 or December 31, 2015.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

The amortized cost and fair value of fixed maturities by contractual maturities at September 30, 2016, are as follows:

	Available-for-Sale		Held-to-Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
	(in millions)			
Due in one year or less	\$ 10,680	\$ 11,142	\$ 13	\$ 13
Due after one year through five years	47,613	52,034	191	203
Due after five years through ten years	61,574	67,850	610	685
Due after ten years(1)	151,316	184,694	961	1,302
Asset-backed securities	10,318	10,375	0	0
Commercial mortgage-backed securities	11,912	12,501	1	1
Residential mortgage-backed securities	4,332	4,648	695	752
Total	\$ 297,745	\$ 343,244	\$ 2,471	\$ 2,956

Excludes available-for-sale notes with amortized cost of \$1,127 million (fair value, \$1,127 million) and (1)held-to-maturity notes with amortized cost of \$4,165 million (fair value, \$4,165 million), which have been offset with the associated payables under a netting agreement.

Actual maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations. Asset-backed, commercial mortgage-backed and residential mortgage-backed securities are shown separately in the table above, as they are not due at a single maturity date.

The following table depicts the sources of fixed maturity and equity security proceeds and related investment gains (losses), as well as losses on impairments of both fixed maturities and equity securities:

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
	2016	2015	2016	2015

(1) Includes \$122 million and \$267 million of non-cash related proceeds for the nine months ended September 30, 2016 and 2015, respectively.

(2) Excludes the portion of OTTI recorded in “Other comprehensive income (loss),” (“OCI”) representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

As discussed in Note 2 to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015, a portion of certain OTTI losses on fixed maturity securities is recognized in OCI. For these securities, the net amount recognized in earnings ("credit loss impairments") represents the difference between the amortized cost of the security and the net present value of its projected future cash flows discounted at the effective interest rate implicit in the debt security prior to impairment. Any remaining difference between the fair value and amortized cost is recognized in OCI. The following tables set forth the amount of pre-tax credit loss impairments on fixed maturity securities held by the Company as of the dates indicated, for which a portion of the OTTI loss was recognized in OCI, and the corresponding changes in such amounts:

	Three Months Ended September 30, 2016	Nine Months Ended September 30, 2016
	(in millions)	
Balance, beginning of period	\$424	\$ 532
Credit loss impairments previously recognized on securities which matured, paid down, prepaid or were sold during the period	(76)	(217)
Credit loss impairments previously recognized on securities impaired to fair value during the period(1)	0	(2)
Credit loss impairments recognized in the current period on securities not previously impaired	0	27
Additional credit loss impairments recognized in the current period on securities previously impaired	0	0
Increases due to the passage of time on previously recorded credit losses	5	17
Accretion of credit loss impairments previously recognized due to an increase in cash flows expected to be collected	(2)	(6)
Balance, end of period	\$351	\$ 351
	(in millions)	
	Three Months Ended September 30, 2015	Nine Months Ended September 30, 2015
Balance, beginning of period	\$751	\$ 781
Credit loss impairments previously recognized on securities which matured, paid down, prepaid or were sold during the period	(187)	(215)
Credit loss impairments previously recognized on securities impaired to fair value during the period(1)	(6)	(19)
Credit loss impairments recognized in the current period on securities not previously impaired	0	3
Additional credit loss impairments recognized in the current period on securities previously impaired	1	2
Increases due to the passage of time on previously recorded credit losses	1	14
Accretion of credit loss impairments previously recognized due to an increase in cash flows expected to be collected	(3)	(9)

Balance, end of period

\$557 \$ 557

(1) Represents circumstances where the Company determined in the current period that it intends to sell the security or it is more likely than not that it will be required to sell the security before recovery of the security's amortized cost.

Equity securities	1,223	1,345	1,030	1,254
Total trading account assets supporting insurance liabilities	\$21,011	\$21,828	\$20,164	\$20,522

(1) Includes publicly-traded agency pass-through securities and collateralized mortgage obligations.

(2) Includes credit-tranched securities collateralized by sub-prime mortgages, auto loans, credit cards, education loans and other asset types.

The net change in unrealized gains (losses) from trading account assets supporting insurance liabilities still held at period end, recorded within “Other income,” was \$84 million and \$(251) million during the three months ended September 30, 2016 and 2015, respectively, and \$459 million and \$(517) million during the nine months ended September 30, 2016 and 2015, respectively.

Other Trading Account Assets

The following table sets forth the composition of the “Other trading account assets” as of the dates indicated:

	September 30, 2016		December 31, 2015	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
	(in millions)			
Short-term investments and cash equivalents	\$27	\$27	\$26	\$26

Subtotal	\$5,682	\$5,619	\$12,176	\$11,903
Derivative instruments		1,940		2,555
Total other trading account assets		\$7,559		\$14,458

The net change in unrealized gains (losses) from other trading account assets, excluding derivative instruments, still held at period end, recorded within "Other income," was \$49 million and \$(227) million during the three months ended September 30, 2016 and 2015, respectively, and \$210 million and \$(219) million during the nine months ended September 30, 2016 and 2015, respectively.

Concentrations of Financial Instruments

The Company monitors its concentrations of financial instruments and mitigates credit risk by maintaining a diversified investment portfolio which limits exposure to any one issuer.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

As of both September 30, 2016 and December 31, 2015, the Company's exposure to concentrations of credit risk of single issuers greater than 10% of the Company's stockholders' equity included securities of the U.S. government and certain U.S. government agencies and certain securities guaranteed by the U.S. government, as well as the securities disclosed below.

The net carrying value of commercial and other loans held for sale by the Company as of September 30, 2016 and December 31, 2015, was \$572 million and \$274 million, respectively. For all of these loans, the Company pre-arranges that it will sell the loan to an investor. As of both September 30, 2016 and December 31, 2015, all of the Company's commercial and other loans held for sale were collateralized, with collateral primarily consisting of apartment complexes.

The following tables set forth certain key credit quality indicators as of September 30, 2016, based upon the recorded investment gross of allowance for credit losses.

See Note 2 to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015, for further discussion regarding nonaccrual status loans.

For both the three and nine months ended September 30, 2016, there were no commercial mortgage and other loans acquired, other than those through direct origination, and there were no commercial mortgage and other loans sold, other than those classified as held-for-sale, respectively. For the three and nine months ended September 30, 2015, there were \$145 million and \$198 million, respectively, of commercial mortgage and other loans acquired, other than those through direct origination and there were \$0 million and \$18 million, respectively, of commercial mortgage and other loans sold, other than those classified as held-for-sale.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

The Company's commercial mortgage and other loans may occasionally be involved in a troubled debt restructuring. As of September 30, 2016 and December 31, 2015, the Company had no significant commitments to borrowers that have been involved in a troubled debt restructuring. During the three and nine months ended September 30, 2016 and 2015, there were no new troubled debt restructurings related to commercial mortgage and other loans and no payment defaults on commercial mortgage and other loans that were modified as a troubled debt restructuring within the twelve months preceding. For additional information relating to the accounting for troubled debt restructurings, see Note 2 to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

As of September 30, 2016, there were no private debt commitments to borrowers that have been involved in a troubled debt restructuring.

As of September 30, 2016, the Company did not have any foreclosed residential real estate property.

Net Investment Income

Net investment income for the three and nine months ended September 30, 2016 and 2015, was from the following sources:

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
	2016	2015	2016	2015
	(in millions)			
Fixed maturities, available-for-sale ⁽¹⁾	\$2,798	\$2,572	\$8,126	\$7,766
Fixed maturities, held-to-maturity ⁽¹⁾	52	51	155	151

Reinsurance Trust

During the second quarter of 2016, a trust was established for the benefit of certain policyholders related to a reinsurance agreement between two wholly-owned subsidiaries. Total assets related to this new trust arrangement of \$1.2 billion were on deposit with trustees as of September 30, 2016. For additional information on other securities pledged, restricted assets and special deposits, see Note 4 to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

5. VARIABLE INTEREST ENTITIES

In the normal course of its activities, the Company enters into relationships with various special-purpose entities and other entities that are deemed to be variable interest entities (“VIEs”). A VIE is an entity that either (1) has equity investors that lack certain essential characteristics of a controlling financial interest (including the ability to control activities of the entity, the obligation to absorb the entity’s expected losses and the right to receive the entity’s expected residual returns) or (2) lacks sufficient equity to finance its own activities without financial support provided by other entities, which in turn would be expected to absorb at least some of the expected losses of the VIE.

The Company is the primary beneficiary if the Company has (1) the power to direct the activities of the VIE that most significantly impact the economic performance of the entity and (2) the obligation to absorb losses of the entity that could be potentially significant to the VIE or the right to receive benefits from the entity that could be potentially significant. If the Company determines that it is the VIE’s primary beneficiary, it consolidates the VIE.

Consolidated Variable Interest Entities

The Company is the investment manager of certain asset-backed investment vehicles commonly referred to as collateralized loan obligations (“CLOs”) and certain other vehicles for which the Company earns fee income for investment management services, including certain investment structures in which the Company’s asset management business invests with other co-investors in investment funds referred to as feeder funds. The Company may sell or syndicate investments through these vehicles, principally as part of the strategic investing activity of the Company’s asset management businesses. Additionally, the Company may invest in securities issued by these vehicles. CLOs raise capital by issuing debt securities, and use the proceeds to purchase investments, typically interest-bearing financial instruments. The Company has analyzed these relationships and determined that for certain CLOs and other investment structures it is the primary beneficiary and consolidates these entities. This analysis includes a review of (1) the Company’s rights and responsibilities as investment manager and (2) variable interests (if any) held by the Company. The assets of these VIEs are restricted and must be used first to settle liabilities of the VIE. The Company is not required to provide, and has not provided, material financial or other support to any of these VIEs. Effective January 1, 2016, the Company adopted new FASB guidance (ASU 2015-02, Consolidation (Topic 810): Amendments to Consolidation Analysis) that resulted in the deconsolidation of certain of its previously consolidated CLOs. See Note 2 for additional information.

Additionally, the Company is the primary beneficiary of certain VIEs in which the Company has invested, as part of its investment activities, but for which it is not the investment manager. These include structured investments issued by a VIE that manages yen-denominated investments coupled with cross-currency coupon swap agreements thereby creating synthetic dual currency investments. The Company’s involvement in the structuring of these investments combined with its economic interest indicates that the Company is the primary beneficiary. The Company has not provided material financial support or other support that was not contractually required to these VIEs.

The table below reflects the carrying amount and balance sheet caption in which the assets and liabilities of consolidated VIEs are reported. The liabilities primarily comprise obligations under debt instruments issued by the VIEs that are non-recourse to the Company. The creditors of these VIEs do not have recourse to the Company in excess of the assets contained within the VIEs.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

	Consolidated VIEs for Which the Company is the Investment Manager			
	September 30, 2016(1)	December 31, 2015	September 30, 2016	December 31, 2015
	(in millions)			
Fixed maturities, available-for-sale	\$75	\$ 0	\$ 308	\$ 179
Fixed maturities, held-to-maturity	93	0	902	760
Trading account assets supporting insurance liabilities	0	0	10	10
Other trading account assets	3,325	9,536	0	0
Commercial mortgage and other loans	542	0	0	300
Other long-term investments	973	0	96	155
Cash and cash equivalents	537	337	0	1
Accrued investment income	18	56	4	3
Other assets	498	324	0	3
Total assets of consolidated VIEs	\$6,061	\$ 10,253	\$ 1,320	\$ 1,411
Notes issued by consolidated VIEs	\$2,722	\$ 8,597	\$ 0	\$ 0
Other liabilities	481	674	13	3
Total liabilities of consolidated VIEs	\$3,203	\$ 9,271	\$ 13	\$ 3

As a result of the adoption of the new accounting guidance ASU 2015-02 effective January 1, 2016, total assets of (1) consolidated VIEs reflects \$1,486 million related to VIEs whose beneficial interests are wholly-owned by consolidated subsidiaries.

Recourse is limited to the assets of the respective VIE and does not extend to the general credit of Prudential Financial. As of September 30, 2016, the maturities of these obligations were greater than five years.

Unconsolidated Variable Interest Entities

The Company has determined that it is not the primary beneficiary of certain VIEs for which it is the investment manager. These VIEs consist primarily of CLOs and investment funds for which the Company has determined that it is not the primary beneficiary as it does not have both (1) the power to direct the activities of the VIE that most significantly impact the economic performance of the entity and (2) the obligation to absorb losses of the entity that could be potentially significant to the VIE or the right to receive benefits from the entity that could be potentially significant. The Company's maximum exposure to loss resulting from its relationship with unconsolidated VIEs for which it is the investment manager is limited to its investment in the VIEs, which was \$408 million and \$218 million at September 30, 2016 and December 31, 2015, respectively. These investments are reflected in "Fixed maturities, available-for-sale," "Other trading account assets, at fair value" and "Other long-term investments." The fair value of assets held within these unconsolidated VIEs was \$13,109 million and \$5,262 million as of September 30, 2016 and December 31, 2015, respectively. There are no liabilities associated with these unconsolidated VIEs on the Company's Unaudited Interim Consolidated Statements of Financial Position.

In the normal course of its activities, the Company will invest in joint ventures and limited partnerships. These ventures include hedge funds, private equity funds and real estate-related funds and may or may not be VIEs. The Company's maximum exposure to loss on these investments, both VIEs and non-VIEs, is limited to the amount of its

investment. The Company has determined that it is not required to consolidate these entities because either: (1) it does not control them or (2) it does not have the obligation to absorb losses of the entities that could be potentially significant to the entities or the right to receive benefits from the entities that could be potentially significant. The Company classifies these investments as “Other long-term investments” and its maximum exposure to loss associated with these entities was \$8,082 million and \$7,532 million as of September 30, 2016 and December 31, 2015, respectively.

In addition, in the normal course of its activities, the Company will invest in structured investments including VIEs for which it is not the investment manager. These structured investments typically invest in fixed income investments and are managed by third parties and include asset-backed securities, commercial mortgage-backed securities and residential mortgage-backed securities. The Company’s maximum exposure to loss on these structured investments, both VIEs and non-VIEs, is limited to the amount of its investment. See Note 4 for details regarding the carrying amounts and classification of these assets. The Company has not provided material financial or other support that was not contractually required to these structures. The Company has determined that it is not the primary beneficiary of these structures due to the fact that it does not control these entities.

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

6. CLOSED BLOCK

On the date of demutualization, Prudential Insurance established a closed block for certain in force participating insurance policies and annuity products, along with corresponding assets used for the payment of benefits and policyholders' dividends on these products, (collectively the "Closed Block"), and ceased offering these participating products. The recorded assets and liabilities were allocated to the Closed Block at their historical carrying amounts. The Closed Block forms the principal component of the Closed Block division.

The policies included in the Closed Block are specified individual life insurance policies and individual annuity contracts that were in force on the date of demutualization and for which Prudential Insurance is currently paying or expects to pay experience-based policy dividends. Assets have been allocated to the Closed Block in an amount that has been determined to produce cash flows which, together with revenues from policies included in the Closed Block, are expected to be sufficient to support obligations and liabilities relating to these policies, including provision for payment of benefits, certain expenses and taxes and to provide for continuation of the policyholder dividend scales in effect in 2000, assuming experience underlying such scales continues. To the extent that, over time, cash flows from the assets allocated to the Closed Block and claims and other experience related to the Closed Block are, in the aggregate, more or less favorable than what was assumed when the Closed Block was established, total dividends paid to Closed Block policyholders may be greater than or less than the total dividends that would have been paid to these policyholders if the policyholder dividend scales in effect in 2000 had been continued. Any cash flows in excess of amounts assumed will be available for distribution over time to Closed Block policyholders and will not be available to stockholders. If the Closed Block has insufficient funds to make guaranteed policy benefit payments, such payments will be made from Prudential Insurance's assets outside of the Closed Block. The Closed Block will continue in effect as long as any policy in the Closed Block remains in force unless, with the consent of the New Jersey insurance regulator, it is terminated earlier.

The excess of Closed Block liabilities over Closed Block assets at the date of the demutualization (adjusted to eliminate the impact of related amounts in AOCI) represented the estimated maximum future earnings at that date from the Closed Block expected to result from operations attributed to the Closed Block after income taxes. In establishing the Closed Block, the Company developed an actuarial calculation of the timing of such maximum future earnings. If actual cumulative earnings of the Closed Block from inception through the end of any given period are greater than the expected cumulative earnings, only the expected earnings will be recognized in income. Any excess of actual cumulative earnings over expected cumulative earnings will represent undistributed accumulated earnings attributable to policyholders, which are recorded as a policyholder dividend obligation. The policyholder dividend obligation represents amounts to be paid to Closed Block policyholders as an additional policyholder dividend unless otherwise offset by future Closed Block performance that is less favorable than originally expected. If the actual cumulative earnings of the Closed Block from its inception through the end of any given period are less than the expected cumulative earnings of the Closed Block, the Company will recognize only the actual earnings in income. However, the Company may reduce policyholder dividend scales, which would be intended to increase future actual earnings until the actual cumulative earnings equaled the expected cumulative earnings.

As of September 30, 2016 and December 31, 2015, the Company recognized a policyholder dividend obligation of \$1,572 million and \$1,694 million, respectively, to Closed Block policyholders for the excess of actual cumulative earnings over the expected cumulative earnings. Additionally, accumulated net unrealized investment gains that have arisen subsequent to the establishment of the Closed Block have been reflected as a policyholder dividend obligation of \$4,795 million and \$2,815 million at September 30, 2016 and December 31, 2015, respectively, to be paid to Closed Block policyholders unless offset by future experience, with a corresponding amount reported in AOCI.

7. EQUITY

The changes in the number of shares of Common Stock issued, held in treasury and outstanding, are as follows for the periods indicated:

	Common Stock		
	Issued	Held In Treasury	Outstanding
	(in millions)		
Balance, December 31, 2015	660.1	213.0	447.1
Common Stock issued	0.0	0.0	0.0
Common Stock acquired	0.0	18.5	(18.5)
Stock-based compensation programs(1)	0.0	(3.1)	3.1
Balance, September 30, 2016	660.1	228.4	431.7

(1) Represents net shares issued from treasury pursuant to the Company's stock-based compensation program.

In December 2015, Prudential Financial's Board of Directors authorized the Company to repurchase at management's discretion up to \$1.5 billion of its outstanding Common Stock during the period from January 1, 2016 through December 31, 2016. Effective January 1, 2016, this authorization superseded the Company's previous \$1.0 billion share repurchase authorization that covered the period from July 1, 2015 through June 30, 2016. In August 2016, the Board of Directors authorized a \$500 million increase to the authorization for calendar year 2016. As a result, the Company's aggregate share repurchase authorization for the full year 2016 is \$2.0 billion. As of September 30, 2016, 18.5 million shares of the Company's Common Stock were repurchased under this authorization at a total cost of \$1,375 million.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

The timing and amount of share repurchases are determined by management based upon market conditions and other considerations, and repurchases may be effected in the open market, through derivative, accelerated repurchase and other negotiated transactions and through prearranged trading plans complying with Rule 10b5-1(c) under the Securities Exchange Act of 1934. Numerous factors could affect the timing and amount of any future repurchases under the share repurchase authorization, including increased capital needs of the Company due to changes in regulatory capital requirements, opportunities for growth and acquisitions, and the effect of adverse market conditions on the segments.

Class B Stock

On January 2, 2015, pursuant to a Share Repurchase Agreement entered into on December 1, 2014, between the Company and the holders of the Class B Stock, the Company repurchased and canceled all of the shares of the Class B Stock for an aggregate cash purchase price of \$651 million, resulting in the elimination of the Class B Stock held in treasury, a \$484 million decrease in “Retained earnings” and a \$167 million decrease in “Additional paid-in capital.”

In accordance with the terms of the Share Repurchase Agreement, the holders of the Class B Stock subsequently exercised their right to dispute the calculation of the purchase price. This dispute was resolved during the first quarter of 2016, resulting in an increase to the cash purchase price of \$119 million, bringing the total aggregate purchase price to \$770 million. The increase to the cash purchase price resulted in a corresponding decrease in “Retained earnings.”

Accumulated Other Comprehensive Income (Loss)

The balance of and changes in each component of “Accumulated other comprehensive income (loss) attributable to Prudential Financial, Inc.” for the nine months ended September 30, 2016 and 2015, are as follows:

(3) See Note 14 for additional information on cash flow hedges.

(4) See table below for additional information on unrealized investment gains (losses), including the impact on deferred policy acquisition and other costs, future policy benefits and policyholders' dividends.

(5) See Note 10 for information on employee benefit plans.

Net Unrealized Investment Gains (Losses)

Net unrealized investment gains (losses) on securities classified as available-for-sale and certain other long-term investments and other assets are included in the Company's Unaudited Interim Consolidated Statements of Financial Position as a component of AOCI. Changes in these amounts include reclassification adjustments to exclude from "Other comprehensive income (loss)" those items that are included as part of "Net income" for a period that had been part of "Other comprehensive income (loss)" in earlier periods. The amounts for the periods indicated below, split between amounts related to fixed maturity securities on which an OTTI loss has been recognized, and all other net unrealized investment gains (losses), are as follows:

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

	Nine Months Ended September 30, 2016		2015			
	Income	Weighted Average Shares	Per Share Amount	Income	Weighted Average Shares	Per Share Amount
(in millions, except per share amounts)						
Basic earnings per share						
Income (loss) from continuing operations	\$4,126			\$4,972		
Less: Income (loss) attributable to noncontrolling interests	42			65		
Less: Dividends and undistributed earnings allocated to participating unvested share-based payment awards	47			48		
Income (loss) from continuing operations attributable to Prudential Financial available to holders of Common Stock	\$4,037	440.7	\$ 9.16	\$4,859	452.6	\$ 10.74
Effect of dilutive securities and compensation programs						
Add: Dividends and undistributed earnings allocated to participating unvested share-based payment awards—Basic	\$47			\$48		
Less: Dividends and undistributed earnings allocated to participating unvested share-based payment awards—Diluted	46			48		
Stock options		1.7			2.4	
Deferred and long-term compensation programs		0.9			0.9	
Exchangeable Surplus Notes	13	5.6		13	5.5	
Diluted earnings per share						
Income (loss) from continuing operations attributable to Prudential Financial available to holders of Common Stock	\$4,051	448.9	\$ 9.02	\$4,872	461.4	\$ 10.56

Unvested share-based payment awards that contain nonforfeitable rights to dividends are participating securities and included in the computation of earnings per share pursuant to the two-class method. Under this method, earnings attributable to Prudential Financial are allocated between Common Stock and the participating awards, as if the awards were a second class of stock. During periods of income from continuing operations available to holders of Common Stock, the calculation of earnings per share excludes the income attributable to participating securities in the numerator and the dilutive impact of these securities from the denominator. In the event of loss from continuing operations available to holders of Common Stock, undistributed earnings are not allocated to participating securities and the denominator excludes the dilutive impact of these securities as they do not share in the losses of the Company. Undistributed earnings allocated to participating unvested share-based payment awards for the three months ended September 30, 2016 and 2015, as applicable, were based on 5.0 million and 4.4 million of such awards, respectively, and for the nine months ended September 30, 2016 and 2015, as applicable, were based on 5.1 million and 4.5 million of such awards, respectively, weighted for the period they were outstanding.

Stock options and shares related to deferred and long-term compensation programs that are considered antidilutive are excluded from the computation of diluted earnings per share. Stock options are considered antidilutive based on application of the treasury stock method or in the event of loss from continuing operations available to holders of Common Stock. Shares related to deferred and long-term compensation programs are considered antidilutive in the event of loss from continuing operations available to holders of Common Stock. For the periods indicated, the number of stock options and shares related to deferred and long-term compensation programs that were considered antidilutive and were excluded from the computation of diluted earnings per share, weighted for the portion of the period they were outstanding, are as follows:

Antidilutive shares due to loss from continuing operations available to holders of Common Stock	0.0		0.0	
Total antidilutive stock options and shares	3.6		2.4	

In September 2009, the Company issued \$500 million of surplus notes with an interest rate of 5.36% per annum which are exchangeable at the option of the note holders for shares of Common Stock. The initial exchange rate for the surplus notes was 10.1235 shares of Common Stock per each \$1,000 principal amount of surplus notes, which represents an initial exchange price per share of Common Stock of \$98.78; however, the exchange rate is subject to customary anti-dilution adjustments. In calculating diluted earnings per share under the if-converted method, the potential shares that would be issued assuming a hypothetical exchange, weighted for the period the notes are outstanding, are added to the denominator, and interest expense, net of tax, is added to the numerator, if the overall effect is dilutive.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

9. SHORT-TERM AND LONG-TERM DEBT

Short-term Debt

The table below presents the Company's short-term debt as of the dates indicated:

	September	December
	30, 2016	31, 2015
	(\$ in millions)	
Commercial paper:		
Prudential Financial	\$45	\$ 80
Prudential Funding, LLC	430	384
Subtotal commercial paper	475	464
Current portion of long-term debt	432	752
Total short-term debt(1)	\$907	\$ 1,216
Supplemental short-term debt information:		
Portion of commercial paper borrowings due overnight	\$178	\$331
Daily average commercial paper outstanding	\$1,015	\$ 1,127
Weighted average maturity of outstanding commercial paper, in days	20	10
Weighted average interest rate on outstanding short-term debt(2)	0.40	% 0.16 %

(1) Includes Prudential Financial debt of \$154 million and \$831 million at September 30, 2016 and December 31, 2015, respectively.

(2) Excludes the current portion of long-term debt.

Commercial Paper

Prudential Financial has a commercial paper program with an authorized capacity of \$3.0 billion. Prudential Financial's commercial paper borrowings have generally been used to fund the working capital needs of Prudential Financial's subsidiaries and provide short-term liquidity at Prudential Financial.

Prudential Funding, LLC ("Prudential Funding"), a wholly-owned subsidiary of Prudential Insurance, has a commercial paper program with an authorized capacity of \$7.0 billion. Prudential Funding commercial paper borrowings generally have served as an additional source of financing to meet the working capital needs of Prudential Insurance and its subsidiaries. Prudential Funding also lends to other subsidiaries of Prudential Financial up to limits agreed with the New Jersey Department of Banking and Insurance ("NJDOBI"). Prudential Funding maintains a support agreement with Prudential Insurance whereby Prudential Insurance has agreed to maintain Prudential Funding's tangible net worth at a positive level. Additionally, Prudential Financial has issued a subordinated guarantee covering Prudential Funding's \$7.0 billion commercial paper program.

Federal Home Loan Bank of New York

Prudential Insurance is a member of the Federal Home Loan Bank of New York ("FHLBNY"). Membership allows Prudential Insurance access to the FHLBNY's financial services, including the ability to obtain collateralized advances and to issue collateralized funding agreements. Under applicable law, the funding agreements issued to the FHLBNY have priority claim status above debt holders of Prudential Insurance. FHLBNY borrowings and funding agreements are collateralized by qualifying mortgage-related assets or U.S. Treasury securities, the fair value of which must be

maintained at certain specified levels relative to outstanding borrowings. FHLBNY membership requires Prudential Insurance to own member stock and borrowings require the purchase of activity-based stock in an amount equal to 4.5% of outstanding borrowings. Under FHLBNY guidelines, if any of Prudential Insurance's financial strength ratings decline below A/A2/A Stable by S&P/Moody's/Fitch, respectively, and the FHLBNY does not receive written assurances from the NJDOBI regarding Prudential Insurance's solvency, new borrowings from the FHLBNY would be limited to a term of 90 days or less. Currently, there are no restrictions on the term of borrowings from the FHLBNY.

NJDOBI permits Prudential Insurance to pledge collateral to the FHLBNY in an amount of up to 5% of its prior year-end statutory net admitted assets, excluding separate account assets. Based on Prudential Insurance's statutory net admitted assets as of December 31, 2015, the 5% limitation equates to a maximum amount of pledged assets of \$5.8 billion and an estimated maximum borrowing capacity (after taking into account required collateralization levels) of approximately \$5.0 billion. Nevertheless, FHLBNY borrowings are subject to the FHLBNY's discretion and to the availability of qualifying assets at Prudential Insurance.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

As of September 30, 2016, Prudential Insurance had pledged assets with a fair value of \$1.1 billion supporting outstanding funding agreements totaling \$1.0 billion, which are included in “Policyholders’ account balances.” The fair value of qualifying assets that were available to Prudential Insurance, but not pledged, amounted to \$6.7 billion as of September 30, 2016. Prudential Insurance had no other advances outstanding under the FHLB facility as of September 30, 2016.

Federal Home Loan Bank of Boston

Prudential Retirement Insurance and Annuity Company (“PRIAC”) is a member of the Federal Home Loan Bank of Boston (“FHLBB”). Membership allows PRIAC access to collateralized advances which will be classified in “Short-term debt” or “Long-term debt,” depending on the maturity date of the obligation. PRIAC’s membership in FHLBB requires the ownership of member stock and borrowings from FHLBB require the purchase of activity-based stock in an amount between 3.0% and 4.5% of outstanding borrowings, depending on the maturity date of the obligation. As of September 30, 2016, PRIAC had no advances outstanding under the FHLBB facility.

Under Connecticut state insurance law, without the prior consent of the Connecticut Insurance Department, the amount of assets insurers may pledge to secure debt obligations is limited to the lesser of 5% of prior year statutory admitted assets or 25% of prior year statutory surplus, resulting in a maximum borrowing capacity for PRIAC under the FHLBB facility of approximately \$244 million as of September 30, 2016.

Credit Facilities

As of September 30, 2016, the Company maintained syndicated, unsecured committed credit facilities as described below.

Borrowers	Original Term	Expiration Date	Capacity	Amount Outstanding
			(in millions)	
Prudential Financial and Prudential Funding	5 years	Apr 2020	\$4,000	\$ 0
Prudential Holdings of Japan, Inc.	3 years	Sep 2019	¥100,000	¥ 0

The \$4.0 billion five-year facility contains customary representations and warranties, covenants and events of default and borrowings are not contingent on the borrowers’ credit ratings nor subject to material adverse change clauses. Borrowings under this facility are conditioned on the continued satisfaction of customary financial covenants, including Prudential Financial’s maintenance of consolidated net worth of at least \$18.985 billion, which is calculated as U.S. GAAP equity, excluding AOCI, equity of noncontrolling interests and equity attributable to the Closed Block. The Company expects that it may borrow under the \$4.0 billion five-year facility from time to time to fund its working capital needs. In addition, amounts under this credit facility may be drawn in the form of standby letters of credit that can be used to meet the Company’s operating needs.

Prudential Holdings of Japan, Inc. entered into a ¥100 billion three-year facility in September 2016. This facility also contains customary representations and warranties, covenants, and events of default and borrowings are not contingent on the borrowers’ credit ratings nor subject to material adverse change clauses. The ¥100 billion three-year facility also contains a two year term-out option.

Borrowings under each of these credit facilities may be used for general corporate purposes. As of September 30, 2016, the Company was in compliance with the covenants under each of these credit facilities.

Put Option Agreement for Senior Debt Issuance

In November 2013, Prudential Financial entered into a ten-year put option agreement with a Delaware trust upon the completion of the sale of \$1.5 billion of trust securities by that Delaware trust in a Rule 144A private placement. The trust invested the proceeds from the sale of the trust securities in a portfolio of principal and interest strips of U.S. Treasury securities. The put option agreement provides Prudential Financial the right to sell to the trust at any time up to \$1.5 billion of 4.419% senior notes due November 2023 and receive in exchange a corresponding amount of the principal and interest strips of the U.S. Treasury securities held by the trust. In return, the Company agreed to pay a semi-annual put premium to the trust at a rate of 1.777% per annum applied to the unexercised portion of the put option. The put option agreement with the trust provides Prudential Financial with a source of liquid assets.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

The put option described above will be exercised automatically in full upon the Company's failure to make certain payments to the trust, such as paying the put option premium or reimbursing the trust for its expenses, if the Company's failure to pay is not cured within 30 days, and upon an event involving its bankruptcy. The Company is also required to exercise the put option if its consolidated stockholders' equity, calculated in accordance with GAAP but excluding AOCI, falls below \$7.0 billion, subject to adjustment in certain cases. The Company has a one-time right to unwind a prior voluntary exercise of the put option by repurchasing all of the senior notes then held by the trust in exchange for principal and interest strips of U.S. Treasury securities. Finally, any of the 4.419% senior notes that Prudential Financial issues may be redeemed prior to their maturity at par or, if greater, a make-whole price, following a voluntary exercise in full of the put option.

Long-term Debt

Surplus Notes

During the first and third quarters of 2016, the Company increased the principal amount of surplus notes outstanding under its captive financing facility initially established in December 2013 for the financing of non-economic reserves required under Guideline AXXX by \$140 million and \$175 million, respectively. As of September 30, 2016, an aggregate of \$2.4 billion of surplus notes were outstanding under this facility and no credit-linked note payments have been required.

During the second quarter of 2016, the Company increased the principal amount of surplus notes outstanding under its captive financing facility initially established in December 2014 for the financing of non-economic reserves required under Regulation XXX by \$77 million. As of September 30, 2016, an aggregate of \$1.1 billion of surplus notes were outstanding under this facility and no credit-linked note payments have been required.

Under each of the above transactions, because valid rights of set-off exist, interest and principal payments on the surplus notes and on the credit-linked notes are settled on a net basis, and the surplus notes are reflected in the Company's total consolidated borrowings on a net basis.

Senior Notes

Medium-Term Notes. Prudential Financial maintains a medium-term notes program under its shelf registration statement with an authorized issuance capacity of \$20.0 billion. As of September 30, 2016, the outstanding balance of the Company's medium-term notes was \$9.6 billion, a decrease of \$1.3 billion from December 31, 2015, due to maturities of \$750 million and the repurchase of \$500 million of medium-term notes through a tender offer. The repurchase included a prepayment premium and fees totaling \$36 million which were recorded to interest expense.

Retail Medium-Term Notes. Prudential Financial also maintains a retail medium-term notes program, including the InterNotes® program, under its shelf registration statement with an authorized issuance capacity of \$5.0 billion. As of September 30, 2016, the outstanding balance of retail notes was \$461 million.

Mortgage Debt. As of September 30, 2016, the Company's subsidiaries had mortgage debt of \$662 million that has recourse only to real estate property held for investment by those subsidiaries. This represents an increase of \$98 million from December 31, 2015, primarily due to new borrowings.

10. EMPLOYEE BENEFIT PLANS

Pension and Other Postretirement Plans

The Company has funded and non-funded non-contributory defined benefit pension plans, which cover substantially all of its employees. For some employees, benefits are based on final average earnings and length of service, while benefits for other employees are based on an account balance that takes into consideration age, service and earnings during their career.

The Company provides certain health care and life insurance benefits for its retired employees, their beneficiaries and covered dependents (“other postretirement benefits”). The health care plan is contributory; the life insurance plan is non-contributory. Substantially all of the Company’s U.S. employees may become eligible to receive other postretirement benefits if they retire after age 55 with at least 10 years of service or under certain circumstances after age 50 with at least 20 years of continuous service.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Net periodic (benefit) cost included in “General and administrative expenses” includes the following components:

	Three Months Ended September 30,			
	Pension Benefits		Other Postretirement Benefits	
	2016	2015	2016	2015
	(in millions)			
Components of net periodic (benefit) cost

Interest cost	125	118	22	21
Expected return on plan assets	(189)	(194)	(26)	(29)
Amortization of prior service cost	(2)	(2)	0	(1)
Amortization of actuarial (gain) loss, net	46	42	10	10
Settlements	1	1	0	0
Special termination benefits	0	0	0	0
Net periodic (benefit) cost	\$45	\$26	\$ 11	\$ 6

	Nine Months Ended September 30,			
	Pension Benefits		Other Postretirement Benefits	
	2016	2015	2016	2015
	(in millions)			
Components of net periodic (benefit) cost				
Service cost	\$189	\$183	\$ 14	\$ 15
Interest cost	374	352	68	64
Expected return on plan assets	(566)	(581)	(79)	(86)
Amortization of prior service cost	(5)	(6)	(1)	(4)
Amortization of actuarial (gain) loss, net	136	126	31	29
Settlements	3	2	0	0
Special termination benefits	2	4	0	0
Net periodic (benefit) cost	\$133	\$80	\$ 33	\$ 18

During the nine months ended September 30, 2016, the Company made cash contributions of \$150 million to its pension plans and anticipates making an additional \$35 million of cash contributions during the remainder of 2016.

11. SEGMENT INFORMATION

Segments

The Company’s principal operations are comprised of four divisions, which together encompass seven segments, and its Corporate and Other operations. The U.S. Retirement Solutions and Investment Management division consists of the Individual Annuities, Retirement and Asset Management segments. The U.S. Individual Life and Group Insurance division consists of the Individual Life and Group Insurance segments. The International Insurance division consists of the International Insurance segment. The Closed Block division consists of the Closed Block segment. The Closed Block division is accounted for as a divested business that is reported separately from the divested businesses that are included in Corporate and Other operations. Our Corporate and Other operations include corporate items and

initiatives that are not allocated to business segments and businesses that have been or will be divested.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Adjusted Operating Income

The Company analyzes the operating performance of each segment using “adjusted operating income.” Adjusted operating income does not equate to “Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures” or “Net income (loss)” as determined in accordance with U.S. GAAP but is the measure of segment profit or loss used by the Company’s chief operating decision maker to evaluate segment performance and allocate resources, and consistent with authoritative guidance, is the measure of segment performance presented below. Adjusted operating income is calculated by adjusting each segment’s “Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures” for the following items, which are described in greater detail below:

- realized investment gains (losses), net, and related charges and adjustments;
- net investment gains (losses) on trading account assets supporting insurance liabilities and changes in experience-rated contractholder liabilities due to asset value changes;
- the contribution to income (loss) of divested businesses that have been or will be sold or exited, including businesses that have been placed in wind down status, but that did not qualify for “discontinued operations” accounting treatment under U.S. GAAP; and
- equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests.

These items are important to an understanding of overall results of operations. Adjusted operating income is not a substitute for income determined in accordance with U.S. GAAP, and the Company’s definition of adjusted operating income may differ from that used by other companies. However, the Company believes that the presentation of adjusted operating income as measured for management purposes enhances the understanding of results of operations by highlighting the results from ongoing operations and the underlying profitability factors of its businesses.

In addition, as discussed in Note 1, during the second quarter, the Company recorded an out of period adjustment resulting in a decrease of \$148 million to “Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures,” which was reflected in the three month period ended June 30, 2016 and the nine month period ended September 30, 2016. The adjustment resulted in a decrease in adjusted operating income before income taxes of \$148 million for the Individual Life Insurance segment.

Realized investment gains (losses), net, and related charges and adjustments

Realized investment gains (losses), net

Adjusted operating income excludes “Realized investment gains (losses), net,” except for certain items described below. Significant activity excluded from adjusted operating income includes impairments and credit-related gains (losses) from sales of securities, the timing of which depends largely on market credit cycles and can vary considerably across periods, and interest rate-related gains (losses) from sales of securities, which are largely subject to the Company’s discretion and influenced by market opportunities, as well as the Company’s tax and capital profile. Additionally, certain gains (losses) pertaining to derivative contracts that do not qualify for hedge accounting treatment are also excluded from adjusted operating income. Trends in the underlying profitability of the Company’s businesses can be more clearly identified without the fluctuating effects of these transactions.

The following table sets forth the significant components of “Realized investment gains (losses), net” that are included in adjusted operating income and, as a result, are reflected as adjustments to “Realized investment gains (losses), net” for purposes of calculating adjusted operating income:

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
	2016	2015	2016	2015
	(in millions)			
Net gains (losses) from(1):				
Terminated hedges of foreign currency earnings	\$(10)	\$74	\$33	\$234
Current period yield adjustments	\$107	\$121	\$347	\$369
Principal source of earnings	\$17	\$48	\$44	\$96

In addition to the items in the table above, “Realized investment gains (losses), net, and related charges and (1) adjustments” also includes an adjustment to reflect “Realized investment gains (losses), net” related to divested businesses as results of “Divested businesses,” discussed below.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Terminated Hedges of Foreign Currency Earnings. The amounts shown in the table above primarily reflect the impact of an intercompany arrangement between Corporate and Other operations and the International Insurance segment, pursuant to which the non-U.S. dollar-denominated earnings in all countries for a particular year, including its interim reporting periods, are translated at fixed currency exchange rates. The fixed rates are determined in connection with a currency hedging program designed to mitigate the risk that unfavorable rate changes will reduce the segment's U.S. dollar equivalent earnings. Pursuant to this program, the Company's Corporate and Other operations may execute forward currency contracts with third parties to sell the net exposure of projected earnings from the hedged currency in exchange for U.S. dollars at a specified exchange rate. The maturities of these contracts correspond with the future periods in which the identified non-U.S. dollar-denominated earnings are expected to be generated. These contracts do not qualify for hedge accounting under U.S. GAAP, so the resulting profits or losses are recorded in "Realized investment gains (losses), net." When the contracts are terminated in the same period that the expected earnings emerge, the resulting positive or negative cash flow effect is included in adjusted operating income.

Current Period Yield Adjustments. The Company uses interest rate and currency swaps and other derivatives to manage interest and currency exchange rate exposures arising from mismatches between assets and liabilities, including duration mismatches. For derivative contracts that do not qualify for hedge accounting treatment, the periodic swap settlements, as well as certain other derivative related yield adjustments are recorded in "Realized investment gains (losses), net," and are included in adjusted operating income to reflect the after-hedge yield of the underlying instruments. In certain instances, when these derivative contracts are terminated or offset before their final maturity, the resulting realized gains or losses are recognized in adjusted operating income over periods that generally approximate the expected terms of the derivatives or underlying instruments in order for adjusted operating income to reflect the after-hedge yield of the underlying instruments. Included in the amounts shown in the table above are gains on certain derivative contracts that were terminated or offset before their final maturity of \$12 million and \$14 million for the three months ended September 30, 2016 and 2015, respectively, and \$36 million and \$40 million for the nine months ended September 30, 2016 and 2015, respectively. Additionally, as of September 30, 2016, there was a \$169 million deferred net gain related to certain derivative contracts that were terminated or offset before their final maturity, primarily in the International Insurance segment. Also included in the amounts shown in the table above are fees related to synthetic Guaranteed Investment Contracts ("GICs") of \$40 million for both the three months ended September 30, 2016 and 2015, and \$118 million and \$119 million for the nine months ended September 30, 2016 and 2015, respectively. Synthetic GICs are accounted for as derivatives under U.S. GAAP and, therefore, these fees are recorded in "Realized investment gains (losses), net." See Note 14 for additional information on synthetic GICs.

Principal Source of Earnings. The Company conducts certain activities for which realized investment gains (losses) are a principal source of earnings for its businesses and therefore included in adjusted operating income, particularly within the Company's Asset Management segment. For example, Asset Management's strategic investing business makes investments for sale or syndication to other investors or for placement or co-investment in the Company's managed funds and structured products. The realized investment gains (losses) associated with the sale of these strategic investments, as well as the majority of derivative results, are a principal activity for this business and included in adjusted operating income. In addition, the realized investment gains (losses) associated with loans originated by the Company's commercial mortgage operations, as well as related derivative results and retained mortgage servicing rights, are a principal activity for this business and included in adjusted operating income.

Other items reflected as adjustments to Realized investment gains (losses), net

The following table sets forth certain other items excluded from adjusted operating income and reflected as an adjustment to "Realized investment gains (losses), net" for purposes of calculating adjusted operating income:

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

	Three Months		Nine Months	
	Ended		Ended	
	September 30,		September 30,

Other trading account assets	\$16	\$(86)	\$(40)	\$(118)
Foreign currency exchange movements	\$(314)	\$(127)	\$(852)	\$31
Other activities	\$(8)	\$4	\$(12)	\$5

46

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Other Trading Account Assets. The Company has certain investments in its general account portfolios that are classified as trading. These trading investments are carried at fair value and included in “Other trading account assets, at fair value” on the Company’s Unaudited Interim Consolidated Statements of Financial Position. Realized and unrealized gains (losses) for these investments are recorded in “Other income.” Consistent with the exclusion of realized investment gains (losses) with respect to other investments managed on a consistent basis, the net gains or losses on these investments are excluded from adjusted operating income.

Foreign Currency Exchange Movements. The Company has certain assets and liabilities for which, under U.S. GAAP, the changes in value, including those associated with changes in foreign currency exchange rates during the period, are recorded in “Other income.” To the extent the foreign currency exposure on these assets and liabilities is economically hedged or considered part of the Company’s capital funding strategies for its international subsidiaries, the change in value included in “Other income” is excluded from adjusted operating income.

Other Activities. The Company excludes certain other items from adjusted operating income that are consistent with similar adjustments described above.

Related charges

Charges that relate to realized investment gains (losses) are also excluded from adjusted operating income, and include the following:

• The portion of the amortization of DAC, VOBA, unearned revenue reserves and DSI for certain products that is related to net realized investment gains (losses).

Policyholder dividends and interest credited to policyholders’ account balances that relate to certain life policies that pass back certain realized investment gains (losses) to the policyholder, and reserves for future policy benefits for certain policies that are affected by net realized investment gains (losses).

Market value adjustments paid or received upon a contractholder’s surrender of certain of the Company’s annuity products as these amounts mitigate the net realized investment gains or losses incurred upon the disposition of the underlying invested assets.

Investment gains (losses) on trading account assets supporting insurance liabilities and changes in experience-rated contractholder liabilities due to asset value changes

Certain products included in the Retirement and International Insurance segments are experience-rated in that investment results associated with these products are expected to ultimately accrue to contractholders. The majority of investments supporting these experience-rated products are classified as trading and are carried at fair value, with realized and unrealized gains (losses) reported in “Other income.” To a lesser extent, these experience-rated products are also supported by derivatives and commercial mortgage and other loans. The derivatives are carried at fair value, with realized and unrealized gains (losses) reported in “Realized investment gains (losses), net.” The commercial mortgage and other loans are carried at unpaid principal, net of unamortized discounts and an allowance for losses, with gains (losses) on sales and changes in the valuation allowance for commercial mortgage and other loans reported in “Realized investment gains (losses), net.”

Adjusted operating income excludes net investment gains (losses) on trading account assets supporting insurance liabilities, which is consistent with the exclusion of realized investment gains (losses) with respect to other investments supporting insurance liabilities managed on a consistent basis. In addition, to be consistent with the historical treatment of charges related to realized investment gains (losses) on investments, adjusted operating income

also excludes the change in contractholder liabilities due to asset value changes in the pool of investments (including changes in the fair value of commercial mortgage and other loans) supporting these experience-rated contracts, which are reflected in "Interest credited to policyholders' account balances." These adjustments are in addition to the exclusion from adjusted operating income of net investment gains (losses) on the related derivatives and commercial mortgage and other loans through "Realized investment gains (losses), net, and related charges and adjustments," as discussed above. The result of this approach is that adjusted operating income for these products includes net fee revenue and interest spread the Company earns on these experience-rated contracts, and excludes changes in fair value of the pool of investments, both realized and unrealized, that are expected to ultimately accrue to the contractholders.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Divested businesses

The contribution to income (loss) of divested businesses that have been or will be sold or exited, including businesses that have been placed in wind down, but that did not qualify for “discontinued operations” accounting treatment under U.S. GAAP, are excluded from adjusted operating income as the results of divested businesses are not considered relevant to understanding the Company’s ongoing operating results.

Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests

Equity in earnings of operating joint ventures, on a pre-tax basis, are included in adjusted operating income as these results are a principal source of earnings. These earnings are reflected on a U.S. GAAP basis on an after-tax basis as a separate line on the Company’s Unaudited Interim Consolidated Statements of Operations.

Earnings attributable to noncontrolling interests are excluded from adjusted operating income. Earnings attributable to noncontrolling interests represents the portion of earnings from consolidated entities that relates to the equity interests of minority investors, and are reflected on a U.S. GAAP basis as a separate line on the Company’s Unaudited Interim Consolidated Statements of Operations.

Reconciliation of adjusted operating income and net income (loss)

The table below reconciles adjusted operating income before income taxes to income from continuing operations before income taxes and equity in earnings of operating joint ventures:

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2016	
	2015	2015	2015	2015

The Asset Management segment revenues include intersegment revenues primarily consisting of asset-based management and administration fees as follows:

	Three Months Ended September 30, 2016	2015	Nine Months Ended September 30, 2016	2015
Asset Management segment intersegment revenues	\$173	\$159	\$504	\$506

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Management has determined the intersegment revenues with reference to market rates. Intersegment revenues are eliminated in consolidation in Corporate and Other.

12. INCOME TAXES

The Company's liability for income taxes includes the liability for unrecognized tax benefits, interest and penalties which relate to tax years still subject to review by the Internal Revenue Service ("IRS") or other taxing authorities. Audit periods remain open for review until the statute of limitations has passed. Generally, for tax years which produce net operating losses, capital losses or tax credit carryforwards ("tax attributes"), the statute of limitations does not close, to the extent of these tax attributes, until the expiration of the statute of limitations for the tax year in which they are fully utilized. The completion of review or the expiration of the statute of limitations for a given audit period could result in an adjustment to the liability for income taxes.

The Company does not anticipate any significant changes within the next 12 months to its total unrecognized tax benefits related to tax years for which the statute of limitations has not expired.

Listed below are the tax years that remain subject to examination by major tax jurisdiction, at September 30, 2016:

Major Tax Jurisdiction Open Tax Years

United States 2009 – 2015

Japan Fiscal years ended March 31, 2012 – 2016

Korea Fiscal years ended March 31, 2012 and 2013, the periods ended December 31, 2014 and 2015

The dividends received deduction ("DRD") reduces the amount of dividend income subject to U.S. tax and is a significant component of the difference between the Company's effective tax rate and the federal statutory tax rate of 35%. The DRD for the current period was estimated using information from 2015 and current year results, and was adjusted to take into account the current year's equity market performance and expected business results. The actual current year DRD can vary from the estimate based on factors such as, but not limited to, changes in the amount of dividends received that are eligible for the DRD, changes in the amount of distributions received from investments, changes in the account balances of variable life and annuity contracts, and the Company's taxable income before the DRD.

There is a possibility that the IRS and the U.S. Treasury will address, through guidance, their issues related to the calculation of the DRD. For the last several years, the revenue proposals included in the Obama Administration's budgets included proposed changes to the method used to determine the amount of the DRD. A change in the DRD, including the possible retroactive or prospective elimination of this deduction through guidance or legislation, could increase actual tax expense and reduce the Company's consolidated net income.

For tax years 2009 through 2016, the Company is participating in the IRS's Compliance Assurance Program ("CAP"). Under CAP, the IRS assigns an examination team to review completed transactions as they occur in order to reach agreement with the Company on how they should be reported in the relevant tax return. If disagreements arise, accelerated resolutions programs are available to try to resolve the disagreements in a timely manner before the tax return is filed.

13. FAIR VALUE OF ASSETS AND LIABILITIES

Fair Value Measurement—Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The authoritative fair value guidance establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement. The levels of the fair value hierarchy are as follows:

Level 1—Fair value is based on unadjusted quoted prices in active markets that are accessible to the Company for identical assets or liabilities. The Company's Level 1 assets and liabilities primarily include certain cash equivalents and short-term investments, equity securities and derivative contracts that trade on an active exchange market.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Level 2—Fair value is based on significant inputs, other than quoted prices included in Level 1, that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability through corroboration with observable market data. Level 2 inputs include quoted market prices in active markets for similar assets and liabilities, quoted market prices in markets that are not active for identical or similar assets or liabilities, and other market observable inputs. The Company's Level 2 assets and liabilities include: fixed maturities (corporate public and private bonds, most government securities, certain asset-backed and mortgage-backed securities, etc.), certain equity securities (mutual funds, which do not trade in active markets because they are not publicly available), certain commercial mortgage loans, short-term investments and certain cash equivalents (primarily commercial paper), and certain over-the-counter ("OTC") derivatives.

Level 3—Fair value is based on at least one significant unobservable input for the asset or liability. The assets and liabilities in this category may require significant judgment or estimation in determining the fair value. The Company's Level 3 assets and liabilities primarily include: certain private fixed maturities and equity securities, certain manually priced public equity securities and fixed maturities, certain highly structured OTC derivative contracts, certain commercial mortgage loans, certain consolidated real estate funds for which the Company is the general partner and embedded derivatives resulting from certain products with guaranteed benefits.

Assets and Liabilities by Hierarchy Level—The tables below present the balances of assets and liabilities reported at fair value on a recurring basis, as of the dates indicated.

“Netting” amounts represent cash collateral of \$11,066 million and \$6,181 million as of September 30, 2016 and (1)December 31, 2015, respectively, and the impact of offsetting asset and liability positions held with the same counterparty, subject to master netting arrangements.

(2)Includes “Trading account assets supporting insurance liabilities” and “Other trading account assets.”

(3)

Level 1 represents cash equivalents and short term investments. All other amounts primarily represent derivative assets.

Separate account assets represent segregated funds that are invested for certain customers. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees (4) made by the Company with respect to certain accounts. Separate account liabilities are not included in the above table as they are reported at contract value and not fair value in the Company's Unaudited Interim Consolidated Statements of Financial Position.

As of September 30, 2016, the net embedded derivative liability position of \$13.0 billion includes \$1.0 billion of embedded derivatives in an asset position and \$14.0 billion of embedded derivatives in a liability position. As of (5) December 31, 2015, the net embedded derivative liability position of \$8.4 billion includes \$0.7 billion of embedded derivatives in an asset position and \$9.1 billion of embedded derivatives in a liability position.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

- (6) Prior period amounts are presented on a basis consistent with the current period presentation, reflecting the adoption of ASU 2015-07.
- (7) Excludes notes with fair value of \$1,127 million and \$1,039 million as of September 30, 2016 and December 31, 2015, respectively, which have been offset with the associated payables under a netting agreement.
- (8) Includes credit-tranched securities collateralized by sub-prime mortgages, auto loans, credit cards, education loans and other asset types.

The methods and assumptions the Company uses to estimate the fair value of assets and liabilities measured at fair value on a recurring basis are summarized below.

Fixed Maturity Securities—The fair values of the Company’s public fixed maturity securities are generally based on prices obtained from independent pricing services. Prices for each security are generally sourced from multiple pricing vendors, and a vendor hierarchy is maintained by asset type based on historical pricing experience and vendor expertise. The Company ultimately uses the price from the pricing service highest in the vendor hierarchy based on the respective asset type. The pricing hierarchy is updated for new financial products and recent pricing experience with various vendors. Consistent with the fair value hierarchy described above, securities with validated quotes from pricing services are generally reflected within Level 2, as they are primarily based on observable pricing for similar assets and/or other market observable inputs. Typical inputs used by these pricing services include but are not limited to, reported trades, benchmark yields, issuer spreads, bids, offers, and/or estimated cash flow, prepayment speeds and default rates. If the pricing information received from third-party pricing services is deemed not reflective of market activity or other inputs observable in the market, the Company may challenge the price through a formal process with the pricing service or classify the securities as Level 3. If the pricing service updates the price to be more consistent with the presented market observations, the security remains within Level 2.

Internally-developed valuations or indicative broker quotes are also used to determine fair value in circumstances where vendor pricing is not available, or where the Company ultimately concludes that pricing information received from the independent pricing services is not reflective of market activity. If the Company concludes the values from both pricing services and brokers are not reflective of market activity, it may override the information with an internally-developed valuation. As of September 30, 2016 and December 31, 2015, overrides on a net basis were not material. Pricing service overrides, internally-developed valuations and indicative broker quotes are generally included in Level 3 in the fair value hierarchy.

The Company conducts several specific price monitoring activities. Daily analyses identify price changes over predetermined thresholds defined at the financial instrument level. Various pricing integrity reports are reviewed on a daily and monthly basis to determine if pricing is reflective of market activity or if it would warrant any adjustments. Other procedures performed include, but are not limited to, reviews of third-party pricing services methodologies, reviews of pricing trends and back testing.

The fair value of private fixed maturities, which are comprised of investments in private placement securities, originated by internal private asset managers, are primarily determined using discounted cash flow models. These models primarily use observable inputs that include Treasury or similar base rates plus estimated credit spreads to value each security. The credit spreads are obtained through a survey of private market intermediaries who are active in both primary and secondary transactions, and consider, among other factors, the credit quality and industry sector of the issuer and the reduced liquidity associated with private placements. Since most private placements are valued using standard market observable inputs and inputs derived from, or corroborated by, market observable data including observed prices and spreads for similar publicly-traded or privately-traded issues, they have been reflected within Level 2. For certain private fixed maturities, the discounted cash flow model may incorporate significant

unobservable inputs, which reflect the Company's own assumptions about the inputs that market participants would use in pricing the asset. To the extent management determines that such unobservable inputs are significant to the price of a security, a Level 3 classification is made.

Trading Account Assets—Trading account assets consist primarily of fixed maturity securities, equity securities and derivatives whose fair values are determined consistent with similar instruments described above under “Fixed Maturity Securities” and below under “Equity Securities” and “Derivative Instruments.”

Equity Securities—Equity securities consist principally of investments in common and preferred stock of publicly-traded companies, perpetual preferred stock, privately-traded securities, as well as mutual fund shares. The fair values of most publicly-traded equity securities are based on quoted market prices in active markets for identical assets and are classified within Level 1 in the fair value hierarchy. Estimated fair values for most privately traded equity securities are determined using discounted cash flow, earnings multiple and other valuation models that require a substantial level of judgment around inputs and therefore are classified within Level 3. The fair values of mutual fund shares that transact regularly (but do not trade in active markets because they are not publicly available) are based on transaction prices of identical fund shares and are classified within Level 2 in the fair value hierarchy. The fair values of perpetual preferred stock are based on inputs obtained from independent pricing services that are primarily based on indicative broker quotes. As a result, the fair values of perpetual preferred stock are classified as Level 3.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Commercial Mortgage and Other Loans—The fair value of loans held and accounted for using the fair value option is determined utilizing pricing indicators from the whole loan market, where investors are committed to purchase these loans at a predetermined price, which is considered the principal exit market for these loans. The Company evaluates the valuation inputs used for these assets, including the existence of predetermined exit prices, the terms of the loans, prevailing interest rates and credit risk, and deems the primary pricing inputs are Level 2 inputs in the fair value hierarchy.

Other Long-Term Investments—Other long-term investments include limited partnerships which are consolidated because the Company is either deemed to exercise control or considered the primary beneficiary of a variable interest entity. These entities are primarily investment companies and follow specialized industry accounting whereby their assets are carried at fair value. The investments held by these entities include various feeder fund investments in underlying master funds (whose underlying holdings generally include public fixed maturities, equity securities and mutual funds), as well as wholly-owned real estate held within other investment funds.

As discussed in Note 2, the Company adopted ASU 2015-07, effective January 1, 2016, which resulted in the exclusion of certain Other long-term investments from the fair value hierarchy. The guidance was required to be applied retrospectively, and therefore, prior period amounts have been conformed to the current period presentation. At September 30, 2016 and December 31, 2015, the fair values of these investments, which include certain hedge funds, private equity funds and other funds were \$1,514 million and \$1,413 million, respectively, of which \$82 million and \$1,331 million had been previously classified in Level 2 and Level 3, respectively, at December 31, 2015.

Other Assets—Other assets reflected in Level 3 include reinsurance recoverables which are carried at fair value and relate to the reinsurance of the Company's living benefit guarantees on certain variable annuity contracts. The methods and assumptions used to estimate the fair value are consistent with those described in "Future Policy Benefits."

Derivative Instruments—Derivatives are recorded at fair value either as assets, within "Other trading account assets," or "Other long-term investments," or as liabilities, within "Other liabilities," except for embedded derivatives which are recorded with the associated host contract. The fair values of derivative contracts can be affected by changes in interest rates, foreign exchange rates, commodity prices, credit spreads, market volatility, expected returns, non-performance risk ("NPR"), liquidity and other factors. For derivative positions included within Level 3 of the fair value hierarchy, liquidity valuation adjustments are made to reflect the cost of exiting significant risk positions, and consider the bid-ask spread, maturity, complexity and other specific attributes of the underlying derivative position.

The Company's exchange-traded futures and options include Treasury futures, Eurodollar futures, commodity futures, Eurodollar options and commodity options. Exchange-traded futures and options are valued using quoted prices in active markets and are classified within Level 1 in the fair value hierarchy.

The majority of the Company's derivative positions are traded in the OTC derivative market and are classified within Level 2 in the fair value hierarchy. OTC derivatives classified within Level 2 are valued using models that utilize actively quoted or observable market input values from external market data providers, third-party pricing vendors and/or recent trading activity. The Company's policy is to use mid-market pricing in determining its best estimate of fair value. The fair values of most OTC derivatives, including interest rate and cross-currency swaps, currency forward contracts, commodity swaps, commodity forward contracts, single name credit default swaps, loan commitments held for sale and "to be announced" ("TBA") forward contracts on highly rated mortgage-backed securities issued by U.S. government sponsored entities are determined using discounted cash flow models. The fair values of European style option contracts are determined using Black-Scholes option pricing models. These models' key inputs

include the contractual terms of the respective contract, along with significant observable inputs, including interest rates, currency rates, credit spreads, equity prices, index dividend yields, NPR, volatility and other factors.

The Company's cleared interest rate swaps and credit derivatives linked to an index are valued using models that utilize actively quoted or observable market inputs, including Overnight Indexed Swap discount rates, obtained from external market data providers, third-party pricing vendors and/or recent trading activity. These derivatives are classified as Level 2 in the fair value hierarchy.

The vast majority of the Company's derivative agreements are with highly rated major international financial institutions. To reflect the market's perception of its own and the counterparty's NPR, the Company incorporates additional spreads over London Inter-Bank Offered Rate ("LIBOR") into the discount rate used in determining the fair value of OTC derivative assets and liabilities that are not otherwise collateralized.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Derivatives classified as Level 3 include look-back equity options and other structured products. These derivatives are valued based upon models, such as Monte Carlo simulation models and other techniques that utilize significant unobservable inputs. Level 3 methodologies are validated through periodic comparison of the Company's fair values to external broker-dealer values.

Cash Equivalents and Short-Term Investments—Cash equivalents and short-term investments include money market instruments, commercial paper and other highly liquid debt instruments. Certain money market instruments are valued using unadjusted quoted prices in active markets that are accessible for identical assets and are primarily classified as Level 1. The remaining instruments in this category are generally fair valued based on market observable inputs and these investments have primarily been classified within Level 2.

Separate Account Assets—Separate account assets include fixed maturity securities, treasuries, equity securities and mutual funds for which values are determined consistent with similar instruments described above under "Fixed Maturity Securities," and "Equity Securities."

As discussed in Note 2, the Company adopted ASU 2015-07, effective January 1, 2016, which resulted in the exclusion of certain separate account investments from the fair value hierarchy. The guidance was required to be applied retrospectively, and therefore, prior period amounts have been conformed to the current period presentation. At September 30, 2016 and December 31, 2015, the fair values of Separate Account Assets excluded from the fair value hierarchy, which include investments in real estate and other invested assets, were \$25,635 million and \$25,661 million, respectively, which had been previously classified in Level 3 at December 31, 2015.

Notes issued by Consolidated VIEs—These notes are based on the fair values of corresponding bank loan collateral. Since the notes are valued based on reference collateral, they are classified as Level 3. See Note 5 and "Fair Value Option" below for additional information.

Other Liabilities—Other liabilities include certain derivative instruments, including embedded derivatives associated with certain "Policyholders' account balances." The fair values are primarily determined consistent with similar derivative instruments described above under "Derivative Instruments."

Future Policy Benefits—The liability for future policy benefits is related to guarantees primarily associated with the living benefit features of certain variable annuity contracts offered by the Company's Individual Annuities segment, including guaranteed minimum accumulation benefit, guaranteed minimum withdrawal benefits and guaranteed minimum income and withdrawal benefits, accounted for as embedded derivatives. The fair values of these liabilities are calculated as the present value of future expected benefit payments to customers less the present value of future expected rider fees attributable to the embedded derivative feature. This methodology could result in either a liability or contra-liability balance, given changing capital market conditions and various actuarial assumptions. Since there is no observable active market for the transfer of these obligations, the valuations are calculated using internally-developed models with option pricing techniques. The models are based on a risk neutral valuation framework and incorporate premiums for risks inherent in valuation techniques, inputs, and the general uncertainty around the timing and amount of future cash flows. The determination of these risk premiums requires the use of management's judgment.

The significant inputs to the valuation models for these embedded derivatives include capital market assumptions, such as interest rate levels and volatility assumptions, the Company's market-perceived NPR, as well as actuarially determined assumptions, including contractholder behavior, such as lapse rates, benefit utilization rates, withdrawal

rates, and mortality rates. Since many of these assumptions are unobservable and are considered to be significant inputs to the liability valuation, the liability included in future policy benefits has been reflected within Level 3 in the fair value hierarchy.

Capital market inputs and actual policyholders' account values are updated each quarter based on capital market conditions as of the end of the quarter, including interest rates, equity markets and volatility. In the risk neutral valuation, the initial swap curve drives the total return used to grow the policyholders' account values. The Company's discount rate assumption is based on the LIBOR swap curve adjusted for an additional spread relative to LIBOR to reflect NPR.

Actuarial assumptions, including contractholder behavior and mortality, are reviewed at least annually, and updated based upon emerging experience, future expectations and other data, including any observable market data. These assumptions are generally updated annually unless a material change that the Company feels is indicative of a long-term trend is observed in an interim period.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Transfers between Levels 1 and 2—Transfers between levels are made to reflect changes in observability of inputs and market activity. Transfers into or out of any level are generally reported as the value as of the beginning of the quarter in which the transfers occur for any such assets still held at the end of the quarter. Periodically there are transfers between Level 1 and Level 2 for assets held in the Company's Separate Account. The fair value of foreign common stock held in the Company's Separate Account may reflect differences in market levels between the close of foreign trading markets and the close of U.S. trading markets for the respective day. Dependent on the existence of such a timing difference, the assets may move between Level 1 and Level 2. During the three months ended September 30, 2016, \$15 million were transferred from Level 1 to Level 2 and \$2 million were transferred from Level 2 to Level 1. During the nine months ended September 30, 2016, \$81 million were transferred from Level 1 to Level 2 and \$33 million were transferred from Level 2 to Level 1. During the three months ended September 30, 2015, \$73 million were transferred from Level 1 to Level 2 and \$72 million were transferred from Level 2 to Level 1. During the nine months ended September 30, 2015, \$147 million were transferred from Level 1 to Level 2 and \$126 million were transferred from Level 2 to Level 1.

Level 3 Assets and Liabilities by Price Source—The table below presents the balances of Level 3 assets and liabilities measured at fair value with their corresponding pricing sources.

	Liquidation	Liquidation value	10.31%	-95.48%	86.51%	Increase
Liabilities:						
Future policy benefits(3)	\$ 13,024	Discounted cash flow	Lapse rate(4)	0%	-13%	Decrease
			NPR spread(5)	0.36%	-1.74%	Decrease
			Utilization rate(6)	52%	-96%	Increase
			Withdrawal rate	See table footnote (7) below.		
			Mortality rate(8)	0%	-14%	Decrease
			Equity volatility curve	17%	-25%	Increase

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

As of December 31, 2015							
	Fair Value	Valuation Techniques	Unobservable Inputs	Minimum	Maximum	Weighted Average	Impact of Increase in Input on Fair Value(1)
(in millions)							
Assets:							
Corporate securities(9)	\$1,085	Discounted cash flow	Discount rate	0.93%	-25%	7.66%	Decrease
		Market comparables	EBITDA multiples(2)	1.4X	-5.0X	3.7X	Increase
		Liquidation	Liquidation value	15.79%	-29.33%	17.77%	Increase
Liabilities:							
Future policy benefits(3)	\$8,434	Discounted cash flow	Lapse rate(4)	0%	-14%		Decrease
			NPR spread(5)	0.06%	-1.76%		Decrease
			Utilization rate(6)	56%	-96%		Increase
			Withdrawal rate(7)	74%	-100%		Increase
			Mortality rate(8)	0%	-14%		Decrease
			Equity volatility curve	17%	-28%		Increase

(1) Conversely, the impact of a decrease in input would have the opposite impact for the fair value as that presented in the table.

Represents multiples of earnings before interest, taxes, depreciation and amortization (“EBITDA”), and are amounts used when the reporting entity has determined that market participants would use such multiples when pricing the investments.

Future policy benefits primarily represent general account liabilities for the living benefit features of the Company’s variable annuity contracts which are accounted for as embedded derivatives. Since the valuation methodology for these liabilities uses a range of inputs that vary at the contract level over the cash flow projection period, presenting a range, rather than weighted average, is a more meaningful representation of the unobservable inputs used in the valuation.

Lapse rates are adjusted at the contract level based on the in-the-moneyness of the living benefit and reflect other factors, such as the applicability of any surrender charges. Lapse rates are reduced when contracts are more in-the-money. Lapse rates are also generally assumed to be lower for the period where surrender charges apply.

To reflect NPR, the Company incorporates an additional spread over LIBOR into the discount rate used in the valuation of individual living benefit contracts in a liability position and generally not to those in a contra-liability position. The NPR spread reflects the financial strength ratings of the Company, as these are insurance liabilities and senior to debt. The additional spread over LIBOR is determined by utilizing the credit spreads associated with issuing funding agreements, adjusted for any illiquidity risk premium.

The utilization rate assumption estimates the percentage of contracts that will utilize the benefit during the contract duration, and begin lifetime withdrawals at various time intervals from contract inception. The remaining contractholders are assumed to either begin lifetime withdrawals immediately or never utilize the benefit.

Utilization assumptions may vary by product type, tax status and age. The impact of changes in these assumptions is highly dependent on the product type, the age of the contractholder at the time of the sale and the timing of the first lifetime income withdrawal. Range reflects the utilization rate for the vast majority of business with living benefits.

(7)

The withdrawal rate assumption estimates the magnitude of annual contractholder withdrawals relative to the maximum allowable amount under the contract. These assumptions vary based on the age of the contractholder, the tax status of the contract and the duration since the contractholder began lifetime withdrawals. As of September 30, 2016, the minimum withdrawal rate assumption is 78% and the maximum withdrawal rate assumption may be greater than 100%. The fair value of the liability will generally increase the closer the withdrawal rate is to 100% and decrease as the withdrawal rate moves further away from 100%.

- Range reflects the mortality rate for the vast majority of business with living benefits, with policyholders ranging from 35 to 90 years old. While the majority of living benefits have a minimum age requirement, certain benefits do not have an age restriction. This results in contractholders for certain benefits with mortality rates approaching 0%.
- (8) Based on historical experience, the Company applies a set of age and duration specific mortality rate adjustments compared to standard industry tables. A mortality improvement assumption is also incorporated into the overall mortality table.
- (9) Includes assets classified as fixed maturities available-for-sale, trading account assets supporting insurance liabilities and other trading account assets.

Interrelationships Between Unobservable Inputs—In addition to the sensitivities of fair value measurements to changes in each unobservable input in isolation, as reflected in the table above, interrelationships between these inputs may also exist, such that a change in one unobservable input may give rise to a change in another or multiple inputs. Examples of such interrelationships for significant internally-priced Level 3 assets and liabilities are as follows:

Corporate Securities—The rate used to discount future cash flows reflects current risk-free rates plus credit and liquidity spread requirements that market participants would use to value an asset. The discount rate may be influenced by many factors, including market cycles, expectations of default, collateral, term and asset complexity. Each of these factors can influence discount rates, either in isolation, or in response to other factors.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Future Policy Benefits—The Company expects efficient benefit utilization and withdrawal rates to generally be correlated with lapse rates. However, behavior is generally highly dependent on the facts and circumstances surrounding the individual contractholder, such as their liquidity needs or tax situation, which could drive lapse behavior independent of other contractholder behavior assumptions. To the extent more efficient contractholder behavior results in greater in-the-moneyness at the contract level, lapse rates may decline for those contracts. Similarly, to the extent that increases in equity volatility are correlated with overall declines in the capital markets, lapse rates may decline as contracts become more in-the-money.

Separate Account Assets—In addition to the significant internally-priced Level 3 assets and liabilities presented and described above, the Company also has internally-priced separate account assets reported within Level 3. Changes in the fair value of separate account assets are borne by customers and thus are offset by changes in separate account liabilities on the Company's Consolidated Statements of Financial Position. As a result, changes in value associated with these investments do not impact the Company's Consolidated Statements of Operations. Quantitative information about significant internally-priced Level 3 separate account assets is as follows:

Commercial Mortgage Loans—Separate account assets include \$1,012 million and \$960 million of commercial mortgage loans as of September 30, 2016 and December 31, 2015, respectively, that are classified as Level 3 and reported at fair value. Commercial mortgage loans are primarily valued internally using discounted cash flow techniques, as described further under “—Fair Value of Financial Instruments.” The primary unobservable input used is the spread to discount cash flows, which ranged from 1.30% to 3.01% (1.46% weighted average) as of September 30, 2016, and 1.49% to 4.81% (1.79% weighted average) as of December 31, 2015. In isolation, an increase (decrease) in the value of this input would result in a lower (higher) fair value measurement.

Valuation Process for Fair Value Measurements Categorized within Level 3—The Company has established an internal control infrastructure over the valuation of financial instruments that requires ongoing oversight by its various business groups. These management control functions are segregated from the trading and investing functions. For invested assets, the Company has established oversight teams, often in the form of pricing committees within each asset management group. The teams, which typically include representation from investment, accounting, operations, legal and other disciplines are responsible for overseeing and monitoring the pricing of the Company's investments and performing periodic due diligence reviews of independent pricing services. An actuarial valuation team oversees the valuation of living benefit features of the Company's variable annuity contracts.

The Company has also established policies and guidelines that require the establishment of valuation methodologies and consistent application of such methodologies. These policies and guidelines govern the use of inputs and price source hierarchies and provide controls around the valuation processes. These controls include appropriate review and analysis of investment prices against market activity or indicators of reasonableness, analysis of portfolio returns to corresponding benchmark returns, back-testing, review of bid-ask spreads to assess activity, approval of price source changes, price overrides, methodology changes and classification of fair value hierarchy levels. For living benefit features of the Company's variable annuity products, the actuarial valuation unit periodically tests contract input data and actuarial assumptions are reviewed at least annually, and updated based upon emerging experience, future expectations and other data, including any observable market data. The valuation policies and guidelines are reviewed and updated as appropriate.

Within the trading and investing functions, the Company has established policies and procedures that relate to the approval of all new transaction types, transaction pricing sources and fair value hierarchy coding within the financial reporting system. For variable annuity product changes or new launches of living benefit features, the actuarial valuation unit validates input logic and new product features and agrees new input data directly to source documents.

Changes in Level 3 Assets and Liabilities—The following tables provide summaries of the changes in fair values of Level 3 assets and liabilities as of the dates indicated, as well as the portion of gains or losses included in income attributable to unrealized gains or losses related to those assets and liabilities still held at the end of their respective periods.

Other as of September 30, 2016 primarily represents deconsolidations of certain previously consolidated (1) collateralized loan obligations. Other as of September 30, 2015 primarily represents reclassifications of certain assets between reporting categories.

(2) Transfers into or out of Level 3 are generally reported as the value as of the beginning of the quarter in which the transfers occur for any such assets still held at the end of the quarter.

(3) Unrealized gains or losses related to assets still held at the end of the period do not include amortization or accretion of premiums and discounts.

Separate account assets represent segregated funds that are invested for certain customers. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees (4) made by the Company with respect to certain accounts. Separate account liabilities are not included in the above table as they are reported at contract value and not fair value in the Company's Unaudited Interim Consolidated Statements of Financial Position.

(5) Prior period amounts have been reclassified to conform to current period presentation, including the adoption of ASU 2015-07.

(6) Amounts as of September 30, 2015, have been revised to correct the previously reported amounts.

(7) Includes credit-tranched securities collateralized by sub-prime mortgages, auto loans, credit cards, education loans and other asset types.

Transfers—Transfers into Level 3 are generally the result of unobservable inputs utilized within valuation methodologies and the use of indicative broker quotes for assets that were previously valued using observable inputs. Transfers out of Level 3 are generally due to the use of observable inputs in valuation methodologies as well as the availability of pricing service information for certain assets that the Company is able to validate.

Derivative Fair Value Information

The following tables present the balances of derivative assets and liabilities measured at fair value on a recurring basis, as of the date indicated, by primary underlying. These tables include NPR and exclude embedded derivatives and associated reinsurance recoverables. The derivative assets and liabilities shown below are included in “Trading account assets-All Other Activity,” “Other long-term investments” or “Other liabilities” in the tables presented above, under the headings “Assets and Liabilities by Hierarchy Level” and “Changes in Level 3 Assets and Liabilities.”

Other income	\$0	\$ 0	\$0	\$ 0

(1) Primarily related to private warrants reclassified from derivatives to trading securities.

(2) Transfers into or out of Level 3 are generally reported as the value as of the beginning of the quarter in which the transfer occurs.

Nonrecurring Fair Value Measurements—The following table represents information for assets measured at fair value on a nonrecurring basis. The estimated fair values were classified as Level 3 in the valuation hierarchy.

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
	2016	2015	2016	2015
	(in millions)			
Commercial mortgage loans(1):				
Carrying value	\$47	\$0	\$47	\$0
Gains (Losses)	\$(2)	\$0	\$(6)	\$0
Mortgage servicing rights(2):				
Carrying value	\$83	\$96	\$83	\$96
Gains (Losses)	\$0	\$(1)	\$(2)	\$(2)

Cost method investments(3):

Carrying value	\$281	\$258	\$281	\$258
Gains (Losses)	\$(18)	\$(50)	\$(70)	\$(86)

(1) The reserve adjustments were based on discounted cash flows utilizing market rates or the fair value of the underlying real estate collateral.

(2) Mortgage servicing rights are revalued based on internal models which utilize inputs. The fair value for mortgage servicing rights is determined using a discounted cash flow model incorporating assumptions for servicing revenues, adjusted for expected prepayments, delinquency rates, escrow deposit income and estimated loan servicing expenses.

(3) For cost method impairments, the methodologies utilized were primarily discounted cash flow and, where appropriate, valuations provided by the general partners taking into consideration investment-related expenses.

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Fair Value Option

The fair value option provides the Company an option to elect fair value as an alternative measurement for selected financial assets and financial liabilities not otherwise reported at fair value. Such elections have been made by the Company to help mitigate volatility in earnings that results from different measurement attributes. Electing the fair value option also allows the Company to achieve consistent accounting for certain assets and liabilities.

The following table presents information regarding changes in fair values recorded in earnings for commercial mortgage and other loans, other long-term investments and notes issued by consolidated VIEs, where the fair value option has been elected.

	Three Months Ended September 30, 2016	Three Months Ended September 30, 2015	Nine Months Ended September 30, 2016	Nine Months Ended September 30, 2015
(in millions)				
Assets:				
Commercial mortgage and other loans:				
Changes in instrument-specific credit risk	\$0	\$0	\$0	\$0
Other changes in fair value	\$0	\$0	\$0	\$0
Other long-term investments:				
Changes in fair value	\$41	\$(42)	\$17	\$1
Liabilities:				
Notes issued by consolidated VIEs:				
Changes in fair value	\$22	\$(88)	\$28	\$(127)

Changes in fair value are reflected in “Realized investment gains (losses), net” for commercial mortgage and other loans and “Other income” for other long-term investments and notes issued by consolidated VIEs. Changes in fair value due to instrument-specific credit risk are estimated based on changes in credit spreads and quality ratings for the period reported.

Interest income on commercial mortgage and other loans is included in net investment income. The Company recorded \$3 million and \$2 million of interest income for the three months ended September 30, 2016 and 2015, respectively, and \$7 million of interest income for both the nine months ended September 30, 2016 and 2015 on fair value option loans. Interest income on these loans is recorded based on the effective interest rates as determined at the closing of the loan.

The fair values and aggregate contractual principal amounts of commercial mortgage and other loans, for which the fair value option has been elected, were \$572 million and \$561 million, respectively, as of September 30, 2016, and \$274 million and \$270 million, respectively, as of December 31, 2015. As of September 30, 2016, for loans for which the fair value option has been elected, there were no loans in non-accrual status and none of the loans are more than 90 days past due and still accruing.

The fair value of other long-term investments was \$1,500 million as of September 30, 2016 and \$1,322 million as of December 31, 2015.

The fair values and aggregate contractual principal amounts of limited recourse notes issued by consolidated VIEs, for which the fair value option has been elected at issuance, were \$2,722 million and \$2,869 million, respectively, as of September 30, 2016, and \$8,597 million and \$9,186 million, respectively as of December 31, 2015. Interest expense recorded for these liabilities was \$24 million and \$90 million for the three months ended September 30, 2016 and 2015, respectively, and \$92 million and \$244 million for the nine months ended September 30, 2016 and 2015, respectively.

Fair Value of Financial Instruments

The table below presents the carrying amount and fair value by fair value hierarchy level of certain financial instruments that are not reported at fair value. The financial instruments presented below are reported at carrying value on the Company's Unaudited Interim Consolidated Statements of Financial Position; however, in some cases, as described below, the carrying amount equals or approximates fair value.

As discussed in Note 2, the Company adopted ASU 2015-07, effective January 1, 2016, which resulted in the exclusion of certain other long-term investments from the fair value hierarchy. The guidance was required to be applied retrospectively, and therefore, prior period amounts have been conformed to the current period (1) presentation. At September 30, 2016 and December 31, 2015, the fair values of these cost method investments were \$1,538 million and \$1,653 million, respectively, which had been previously classified in level 3 at December 31, 2015. The carrying value of these investments were \$1,436 million and \$1,563 million as of September 30, 2016 and December 31, 2015, respectively.

Carrying values presented herein differ from those in the Company's Unaudited Interim Consolidated Statements of Financial Position because certain items within the respective financial statement captions are not considered (2) financial instruments or out of scope under authoritative guidance relating to disclosures of the fair value of financial instruments. Financial statement captions excluded from the above table are not considered financial instruments.

As of September 30, 2016, excludes notes with both fair value and carrying amount of \$4,165 million. As of (3) December 31, 2015, excludes notes with fair value and carrying amount of \$4,081 million and \$3,850 million, respectively. These amounts have been offset with the associated payables under a netting agreement.

As of September 30, 2016, includes notes with both fair value and carrying amount of \$5,292 million. As of (4) December 31, 2015, includes notes with fair value and carrying amount of \$5,120 million and \$4,889 million, respectively. These amounts have been offset with the associated receivables under a netting agreement.

(5) Prior period amounts are presented on a basis consistent with the current period presentation, reflecting the adoption of ASU 2015-03.

The fair values presented above have been determined by using available market information and by applying market valuation methodologies, as described in more detail below.

Fixed Maturities, Held-to-Maturity

The fair values of public fixed maturity securities are generally based on prices from third-party pricing services, which are reviewed for reasonableness; however, for certain public fixed maturity securities and investments in private placement fixed maturity securities, this information is either not available or not reliable. For these public fixed maturity securities, the fair value is based on indicative broker quotes, if available, or determined using a discounted cash flow model or other internally-developed models. For private fixed maturities, fair value is determined using a discounted cash flow model. In determining the fair value of certain fixed maturity securities, the discounted cash flow model may also use unobservable inputs, which reflect the Company's own assumptions about the inputs market participants would use in pricing the security.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Commercial Mortgage and Other Loans

The fair value of most commercial mortgage loans is based upon the present value of the expected future cash flows discounted at the appropriate U.S. Treasury rate or foreign government bond rate (for non-U.S. dollar-denominated loans) plus an appropriate credit spread for loans of similar quality, average life and currency. The quality ratings for these loans, a primary determinant of the credit spreads and a significant component of the pricing process, are based on an internally-developed methodology. Certain commercial mortgage loans are valued incorporating other factors, including the terms of the loans, the principal exit strategies for the loans, prevailing interest rates and credit risk.

Policy Loans

The Company's valuation technique for policy loans is to discount cash flows at the current policy loan coupon rate. Policy loans are fully collateralized by the cash surrender value of underlying insurance policies. As a result, the carrying value of the policy loans approximates the fair value.

Short-Term Investments, Cash and Cash Equivalents, Accrued Investment Income and Other Assets

The Company believes that due to the short-term nature of certain assets, the carrying value approximates fair value. These assets include: certain short-term investments which are not securities, are recorded at amortized cost and include quality loans; cash and cash equivalent instruments; accrued investment income; and other assets that meet the definition of financial instruments, including receivables, such as reinsurance recoverables, unsettled trades, accounts receivable and restricted cash.

Policyholders' Account Balances—Investment Contracts

Only the portion of policyholders' account balances related to products that are investment contracts (those without significant mortality or morbidity risk) are reflected in the table above. For fixed deferred annuities, single premium endowments, payout annuities and other similar contracts without life contingencies, fair values are generally derived using discounted projected cash flows based on interest rates that are representative of the Company's financial strength ratings, and hence reflect the Company's own NPR. For guaranteed investment contracts, funding agreements, structured settlements without life contingencies and other similar products, fair values are generally derived using discounted projected cash flows based on interest rates being offered for similar contracts with maturities consistent with those of the contracts being valued. For those balances that can be withdrawn by the customer at any time without prior notice or penalty, the fair value is the amount estimated to be payable to the customer as of the reporting date, which is generally the carrying value. For defined contribution and defined benefit contracts and certain other products, the fair value is the market value of the assets supporting the liabilities.

Securities Sold Under Agreements to Repurchase

The Company receives collateral for selling securities under agreements to repurchase, or pledges collateral under agreements to resell. Repurchase and resale agreements are also generally short-term in nature and, therefore, the carrying amounts of these instruments approximate fair value.

Cash Collateral for Loaned Securities

Cash collateral for loaned securities represents the collateral received or paid in connection with loaning or borrowing securities, similar to the securities sold under agreement to repurchase above. For these transactions, the carrying

value of the related asset or liability approximates fair value, as they equal the amount of cash collateral received or paid.

Debt

The fair value of short-term and long-term debt, as well as notes issued by consolidated VIEs, is generally determined by either prices obtained from independent pricing services, which are validated by the Company, or discounted cash flow models. With the exception of the notes issued by consolidated VIEs for which recourse is limited to the assets of the respective VIE and does not extend to the general credit of the Company, the fair values of these instruments consider the Company's own NPR. Discounted cash flow models predominately use market observable inputs such as the borrowing rates currently available to the Company for debt and financial instruments with similar terms and remaining maturities. For commercial paper issuances and other debt with a maturity of less than 90 days, the carrying value approximates fair value.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Other Liabilities

Other liabilities are primarily payables, such as reinsurance payables, unsettled trades, drafts and accrued expense payables. Due to the short-term until settlement of most of these liabilities, the Company believes that carrying value approximates fair value.

Separate Account Liabilities—Investment Contracts

Only the portion of separate account liabilities related to products that are investment contracts are reflected in the table above. Separate account liabilities are recorded at the amount credited to the contractholder, which reflects the change in fair value of the corresponding separate account assets including contractholder deposits less withdrawals and fees; therefore, carrying value approximates fair value.

14. DERIVATIVE INSTRUMENTS

Types of Derivative Instruments and Derivative Strategies

Interest Rate Contracts

Interest rate swaps, options and futures are used by the Company to reduce risks from changes in interest rates, manage interest rate exposures arising from mismatches between assets and liabilities (including duration mismatches) and to hedge against changes in the value of assets it owns or anticipates acquiring or selling.

Swaps may be attributed to specific assets or liabilities or may be used on a portfolio basis. Under interest rate swaps, the Company agrees with counterparties to exchange, at specified intervals, the difference between fixed-rate and floating-rate interest amounts calculated by reference to an agreed upon notional principal amount.

The Company also uses swaptions, interest rate caps and interest rate floors to manage interest rate risk. A swaption is an option to enter into a swap with a forward starting effective date. The Company pays a premium for purchased swaptions and receives a premium for written swaptions. In an interest rate cap, the buyer receives payments at the end of each period in which the interest rate exceeds the agreed strike price. Similarly, in an interest rate floor, the buyer receives payments at the end of each period in which the interest rate is below the agreed strike price. Swaptions and interest rate caps and floors are included in interest rate options.

In exchange-traded interest rate futures transactions, the Company purchases or sells a specified number of contracts, the values of which are determined by the values of underlying referenced investments, and posts variation margin on a daily basis in an amount equal to the difference in the daily market values of those contracts. The Company enters into exchange-traded futures with regulated futures commission's merchants who are members of a trading exchange.

Equity Contracts

Equity index options are contracts which will settle in cash based on differentials in the underlying indices at the time of exercise and the strike price. The Company uses combinations of purchases and sales of equity index options to hedge the effects of adverse changes in equity indices within a predetermined range.

Total return swaps are contracts whereby the Company agrees with counterparties to exchange, at specified intervals, the difference between the return on an asset (or market index) and LIBOR plus an associated funding spread based on

a notional amount. The Company generally uses total return swaps to hedge the effect of adverse changes in equity indices.

Foreign Exchange Contracts

Currency derivatives, including currency futures, options, forwards and swaps, are used by the Company to reduce risks from changes in currency exchange rates with respect to investments denominated in foreign currencies that the Company either holds or intends to acquire or sell, and to hedge the currency risk associated with net investments in foreign operations and anticipated earnings of its foreign operations.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Under currency forwards, the Company agrees with counterparties to deliver a specified amount of an identified currency at a specified future date. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at the specified future date. As noted above, the Company uses currency forwards to mitigate the impact of changes in currency exchange rates on U.S. dollar equivalent earnings generated by certain of its non-U.S. businesses, primarily its international insurance and investment operations. The Company executes forward sales of the hedged currency in exchange for U.S. dollars at a specified exchange rate. The maturities of these forwards correspond with the future periods in which the non-U.S. dollar-denominated earnings are expected to be generated. These earnings hedges do not qualify for hedge accounting.

Under currency swaps, the Company agrees with counterparties to exchange, at specified intervals, the difference between one currency and another at an exchange rate and calculated by reference to an agreed principal amount. Generally, the principal amount of each currency is exchanged at the beginning and termination of the currency swap by each party.

Credit Contracts

The Company writes credit default swaps for which it receives a premium to insure credit risk. These are used by the Company to enhance the return on the Company's investment portfolio by creating credit exposure similar to an investment in public fixed maturity cash instruments. With these derivatives the Company sells credit protection on a single name reference, or certain index reference, and in return receives a quarterly premium. This premium or credit spread generally corresponds to the difference between the yield on the referenced names (or an index's referenced names) public fixed maturity cash instruments and swap rates, at the time the agreement is executed. If there is an event of default by the referenced name or one of the referenced names in the index, as defined by the agreement, then the Company is obligated to pay the referenced amount of the contract to the counterparty and receive in return the referenced defaulted security or similar security or (in the case of a credit default index) pay the referenced amount less the auction recovery rate. See credit derivatives written section for further discussion of guarantees. In addition to selling credit protection, the Company has purchased credit protection using credit derivatives in order to hedge specific credit exposures in the Company's investment portfolio.

Other Contracts

TBAs. The Company uses TBA forward contracts to gain exposure to the investment risk and return of mortgage-backed securities. TBA transactions can help the Company enhance the return on its investment portfolio, and can provide a more liquid and cost effective method of achieving these goals than purchasing or selling individual mortgage-backed pools. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at a specified future date. Additionally, pursuant to the Company's mortgage dollar roll program, TBAs or mortgage-backed securities are transferred to counterparties with a corresponding agreement to repurchase them at a future date. These transactions do not qualify as secured borrowings and are accounted for as derivatives.

Loan Commitments. In its mortgage operations, the Company enters into commitments to fund commercial mortgage loans at specified interest rates and other applicable terms within specified periods of time. These commitments are legally binding agreements to extend credit to a counterparty. Loan commitments for loans that will be held for sale are recognized as derivatives and recorded at fair value. The determination of the fair value of loan commitments accounted for as derivatives considers various factors including, among others, terms of the related loan, the intended exit strategy for the loans based upon either securitization valuation models or investor purchase commitments, prevailing interest rates, origination income or expense, and the value of service rights. Loan commitments that relate to the origination of mortgage loans that will be held for investment are not accounted for as derivatives and

accordingly are not recognized in the Company's financial statements. See Note 15 for additional information.

Embedded Derivatives. The Company sells variable annuity products, which may include guaranteed benefit features that are accounted for as embedded derivatives. These embedded derivatives are marked to market through "Realized investment gains (losses), net" based on the change in value of the underlying contractual guarantees, which are determined using valuation models. The Company maintains a portfolio of derivative instruments that is intended to offset certain risks related to the above products' features. The derivatives may include, but are not limited to equity options, total return swaps, interest rate swaptions, caps, floors and other instruments.

Synthetic Guarantees. The Company sells synthetic GICs, through both full service and investment-only sales channels, to investment vehicles primarily used by qualified defined contribution pension plans. The synthetic GICs are issued in respect of assets that are owned by the trustees of such plans, who invest the assets according to the contract terms agreed to with the Company. The contracts establish participant balances and credit interest thereon. The participant balances are supported by the underlying assets. In connection with certain participant-initiated withdrawals, the contract guarantees that after all underlying assets are liquidated, any remaining participant balances will be paid by the Company. Under U.S. GAAP, these contracts are accounted for as derivatives and recorded at fair value.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

The table below provides a summary of the gross notional amount and fair value of derivatives contracts by the primary underlying, excluding embedded derivatives and associated reinsurance recoverables. Many derivative instruments contain multiple underlyings. The fair value amounts below represent the gross fair value of derivative contracts prior to taking into account the netting effects of master netting agreements, cash collateral and NPR. This netting impact results in total derivative assets of \$2,034 million and \$2,728 million as of September 30, 2016 and December 31, 2015, respectively, and total derivative liabilities of \$472 million and \$40 million as of September 30, 2016 and December 31, 2015, respectively, reflected in the Unaudited Interim Consolidated Statements of Financial Position.

(1) Notional amounts are presented on a gross basis and include derivatives used to offset existing positions.

89

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Based on notional amounts, most of the Company's derivatives do not qualify for hedge accounting as follows: derivatives that economically hedge embedded derivatives do not qualify for hedge accounting because changes in the fair value of the embedded derivatives are already recorded in net income, derivatives that are utilized as macro

(2) hedges of the Company's exposure to various risks typically do not qualify for hedge accounting because they do not meet the criteria required under portfolio hedge accounting rules, and synthetic GICs, which are product standalone derivatives, do not qualify as hedging instruments under hedge accounting rules.

(3) Excludes embedded derivatives and associated reinsurance recoverables which contain multiple underlyings. The fair value of these embedded derivatives was a net liability of \$12,970 million and \$8,408 million as of September 30, 2016 and December 31, 2015, respectively, primarily included in "Future policy benefits."

Offsetting Assets and Liabilities

The following table presents recognized derivative instruments (excluding embedded derivatives and associated reinsurance recoverables), and repurchase and reverse repurchase agreements that are offset in the Unaudited Interim Consolidated Statements of Financial Position, and/or are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset in the Unaudited Interim Consolidated Statements of Financial Position.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

For information regarding the rights of offset associated with the derivative assets and liabilities in the table above, see “—Counterparty Credit Risk” below. For securities purchased under agreements to resell and securities sold under agreements to repurchase, the Company monitors the value of the securities and maintains collateral, as appropriate, to protect against credit exposure. Where the Company has entered into repurchase and resale agreements with the same counterparty, in the event of default, the Company would generally be permitted to exercise rights of offset. For additional information on the Company’s accounting policy for securities repurchase and resale agreements, see Note 2 to the Company’s Consolidated Financial Statements included in the Annual Report on Form 10-K for the year ended December 31, 2015.

Cash Flow, Fair Value and Net Investment Hedges

The primary derivative instruments used by the Company in its fair value, cash flow and net investment hedge accounting relationships are interest rate swaps, currency swaps and currency forwards. These instruments are only designated for hedge accounting in instances where the appropriate criteria are met. The Company does not use futures, options, credit, equity or embedded derivatives in any of its fair value, cash flow or net investment hedge accounting relationships.

The following table provides the financial statement classification and impact of derivatives used in qualifying and non-qualifying hedge relationships, excluding the offset of the hedged item in an effective hedge relationship.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

(1) Amounts deferred in AOCI.

For the three and nine months ended September 30, 2016 and 2015, the ineffective portion of derivatives accounted for using hedge accounting was not material to the Company's results of operations. Also, there were no material amounts reclassified into earnings relating to instances in which the Company discontinued cash flow hedge accounting because the forecasted transaction did not occur by the anticipated date or within the additional time period permitted by the authoritative guidance for the accounting for derivatives and hedging. In addition, there were no instances in which the Company discontinued fair value hedge accounting due to a hedged firm commitment no longer qualifying as a fair value hedge.

Presented below is a rollforward of current period cash flow hedges in AOCI before taxes:

	(in millions)	
Balance, December 31, 2015	\$	1,165
Net deferred gains (losses) on cash flow hedges from January 1 to September 30, 2016	189	
Amount reclassified into current period earnings	(261)
Balance, September 30, 2016	\$	1,093

Using September 30, 2016 values, it is estimated that a pre-tax gain of approximately \$130 million will be reclassified from AOCI to earnings during the subsequent twelve months ending September 30, 2017, offset by amounts pertaining to the hedged items. As of September 30, 2016, the Company does not have any qualifying cash flow hedges of forecasted transactions other than those related to the variability of the payment or receipt of interest or foreign currency amounts on existing financial instruments. The maximum length of time for which these variable cash flows are hedged is 40 years. Income amounts deferred in AOCI as a result of cash flow hedges are included in "Net unrealized investment gains (losses)" in the Unaudited Interim Consolidated Statements of Comprehensive Income.

For effective net investment hedges, the amounts, before applicable taxes, recorded in the cumulative translation adjustment account within AOCI were \$525 million and \$541 million as of September 30, 2016 and December 31, 2015, respectively.

Credit Derivatives

Credit derivatives, where the Company has written credit protection on a single name reference, had outstanding notional amounts of \$108 million and \$106 million as of September 30, 2016 and December 31, 2015, respectively. These credit derivatives are reported at fair value as an asset of less than \$1 million and a liability of \$3 million as of September 30, 2016 and December 31, 2015, respectively. As of September 30, 2016, these credit derivatives' notionals had the following NAIC ratings: \$49 million in NAIC 1, \$48 million in NAIC 2, \$5 million in NAIC 3, \$3 million in NAIC 5 and \$3 million in NAIC 6. The Company has also written credit protection on certain index references with notional amounts of \$1,050 million and \$701 million, reported at fair value as a liability of \$34 million and \$24 million as of September 30, 2016 and December 31, 2015, respectively. As of September 30, 2016, these credit derivatives' notionals had a NAIC rating of NAIC 1. NAIC designations are based on the lowest rated

single name reference included in the index.

The Company's maximum amount at risk under these credit derivatives equals the aforementioned notional amounts and assumes the value of the underlying referenced securities become worthless. These single name credit derivatives have maturities of less than 4 years, while the credit protection on the index references have maturities of less than 42 years. This excludes a credit derivative related to surplus notes issued by a subsidiary of Prudential Insurance as further disclosed below.

The Company entered into a credit derivative that will require the Company to make certain payments in the event of deterioration in the value of the surplus notes issued by a subsidiary of Prudential Insurance. The notional amount of this credit derivative was \$500 million and was reported at fair value as of September 30, 2016 and December 31, 2015 as a liability of \$36 million and \$15 million, respectively, and has a maturity date of December 14, 2047. No collateral was pledged in either period.

In addition to writing credit protection, the Company has purchased credit protection using credit derivatives in order to hedge specific credit exposures in the Company's investment portfolio. As of September 30, 2016 and December 31, 2015, the Company had \$288 million and \$532 million of outstanding notional amounts reported at fair value as a liability of \$9 million and \$8 million, respectively.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Counterparty Credit Risk

The Company is exposed to credit-related losses in the event of non-performance by counterparties to financial derivative transactions. The Company manages credit risk by entering into derivative transactions with highly rated major international financial institutions and other creditworthy counterparties, and by obtaining collateral, such as cash and securities, when appropriate. Additionally, limits are set on single party credit exposures which are subject to periodic management review.

The credit exposure of the Company's OTC derivative transactions is represented by the contracts with a positive fair value at the reporting date. To reduce credit exposures, the Company seeks to: enter into OTC derivative transactions pursuant to master agreements that provide for a netting of payments and receipts with a single counterparty, and enter into agreements that allow the use of credit support annexes, some of which are bilateral rating-sensitive agreements that require collateral postings at established threshold levels. Cleared derivatives are transactions between the Company and a counterparty where the transactions are cleared through a clearinghouse, such that each derivative counterparty is only exposed to the default of the clearinghouse. These cleared transactions require initial and daily variation margin collateral postings and include certain interest rate swaps and credit default swaps entered into on or after June 10, 2013, related to guidelines under Dodd-Frank. The Company also enters into exchange-traded futures and certain options transactions through regulated exchanges and these transactions are settled on a daily basis, thereby reducing credit risk exposure in the event of non-performance by counterparties to such financial instruments.

Under fair value measurements, the Company incorporates the market's perception of its own and the counterparty's NPR in determining the fair value of the portion of its OTC derivative assets and liabilities that are uncollateralized. Credit spreads are applied to the derivative fair values on a net basis by counterparty. To reflect the Company's own credit spread, a proxy based on relevant debt spreads is applied to OTC derivative net liability positions. Similarly, the Company's counterparty's credit spread is applied to OTC derivative net asset positions.

Certain of the Company's derivative agreements with some of its counterparties contain credit-rating related triggers. If the Company's credit rating were to fall below a certain level, the counterparties to the derivative instruments could request termination at the then fair value of the derivative or demand immediate full collateralization on derivative instruments in net liability positions. As of September 30, 2016, there were no net liability derivative positions with counterparties with credit-risk-related contingent features. As such, the Company has not posted any collateral related to these positions and the Company would not be required to post any additional collateral to the counterparties if the credit-risk-related contingent features underlying these agreements had been triggered as of September 30, 2016.

15. COMMITMENTS AND GUARANTEES, CONTINGENT LIABILITIES AND LITIGATION AND REGULATORY MATTERS

Commitments and Guarantees

Commercial Mortgage Loan Commitments

	September 30, 2016	December 31, 2015
	(in millions)	
Total outstanding mortgage loan commitments	\$2,251	\$ 2,272
Portion of commitment where prearrangement to sell to investor exists	\$463	\$ 721

In connection with the Company's commercial mortgage operations, it originates commercial mortgage loans. Commitments for loans that will be held for sale are recognized as derivatives and recorded at fair value. In certain of these transactions, the Company pre-arranges that it will sell the loan to an investor, including to government sponsored entities as discussed below, after the Company funds the loan.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Commitments to Purchase Investments (excluding Commercial Mortgage Loans)

	September 30, 2016	December 31, 2015
	(in millions)	
Expected to be funded from the general account and other operations outside the separate accounts(1)	\$4,283	\$ 3,787
Expected to be funded from separate accounts	\$440	\$ 92

Includes a remaining commitment of \$132 million and \$152 million at September 30, 2016 and December 31, (1)2015, respectively, related to the Company's agreement to co-invest with the Fosun Group ("Fosun") in a private equity fund, managed by Fosun, for the Chinese marketplace.

The Company has other commitments to purchase or fund investments, some of which are contingent upon events or circumstances not under the Company's control, including those at the discretion of the Company's counterparties. The Company anticipates a portion of these commitments will ultimately be funded from its separate accounts.

Indemnification of Securities Lending Transactions

	September 30, 2016	December 31, 2015
	(in millions)	
Indemnification provided to mutual fund, trust fund, and insurance company separate account clients for securities lending	\$4,917	\$ 15,084
Fair value of related collateral associated with above indemnifications	\$5,033	\$ 15,508
Accrued liability associated with guarantee	\$0	\$ 0

In the normal course of business, the Company may facilitate securities lending transactions on behalf of mutual funds, trust funds, and insurance company separate account clients (collectively, "the accounts") for which the Company is the investment advisor and/or the asset manager. In certain of these arrangements, the Company has provided an indemnification to the accounts to hold them harmless against losses caused by counterparty (i.e., borrower) defaults associated with the securities lending activity facilitated by the Company. Collateral is provided by the counterparty to the accounts at the inception of the loan equal to or greater than 102% of the fair value of the loaned securities and the collateral is maintained daily at 102% or greater of the fair value of the loaned securities. The Company is only at risk if the counterparty to the securities lending transaction defaults and the value of the collateral held is less than the value of the securities loaned to such counterparty. The Company believes the possibility of any payments under these indemnities is remote.

Credit Derivatives Written

As discussed further in Note 14, the Company writes credit derivatives under which the Company is obligated to pay the counterparty the referenced amount of the contract and receive in return the defaulted security or similar security.

Guarantees of Asset Values

	September 30, 2016	December 31, 2015
	(in millions)	
Guaranteed value of third parties' assets	\$76,758	\$ 72,585
Fair value of collateral supporting these assets	\$79,153	\$ 73,634

Asset associated with guarantee, carried at fair value \$5 \$ 7

Certain contracts underwritten by the Retirement segment include guarantees related to financial assets owned by the guaranteed party. These contracts are accounted for as derivatives and carried at fair value. The collateral supporting these guarantees is not reflected on the Unaudited Interim Consolidated Statements of Financial Position.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Indemnification of Serviced Mortgage Loans

	September 30, 2016	December 31, 2015
	(in millions)	
Maximum exposure under indemnification agreements for mortgage loans serviced by the Company	\$1,338	\$ 1,200
First-loss exposure portion of above	\$408	\$ 371
Accrued liability associated with guarantees	\$13	\$ 14

As part of the commercial mortgage activities of the Company's Asset Management segment, the Company provides commercial mortgage origination, underwriting and servicing for certain government sponsored entities, such as Fannie Mae and Freddie Mac. The Company has agreed to indemnify the government sponsored entities for a portion of the credit risk associated with certain of the mortgages it services through a delegated authority arrangement. Under these arrangements, the Company originates multi-family mortgages for sale to the government sponsored entities based on underwriting standards they specify, and makes payments to them for a specified percentage share of losses they incur on certain loans serviced by the Company. The Company's percentage share of losses incurred generally varies from 2% to 20% of the loan balance, and is typically based on a first-loss exposure for a stated percentage of the loan balance, plus a shared exposure with the government sponsored entity for any losses in excess of the stated first-loss percentage, subject to a contractually specified maximum percentage. The Company services \$11,345 million and \$9,833 million of mortgages subject to these loss-sharing arrangements as of September 30, 2016 and December 31, 2015, respectively, all of which are collateralized by first priority liens on the underlying multi-family residential properties. As of September 30, 2016, these mortgages had a weighted-average debt service coverage ratio of 2.08 times and a weighted-average loan-to-value ratio of 60%. As of December 31, 2015, these mortgages had a weighted-average debt service coverage ratio of 1.96 times and a weighted-average loan-to-value ratio of 61%. The Company's total share of losses related to indemnifications that were settled was \$0 and \$0.5 million, for the nine months ended September 30, 2016 and 2015, respectively.

Other Guarantees

	September 30, 2016	December 31, 2015
	(in millions)	
Other guarantees where amount can be determined	\$ 337	\$ 324
Accrued liability for other guarantees and indemnifications	\$ 4	\$ 4

The Company is also subject to other financial guarantees and indemnity arrangements. The Company has provided indemnities and guarantees related to acquisitions, dispositions, investments and other transactions that are triggered by, among other things, breaches of representations, warranties or covenants provided by the Company. These obligations are typically subject to various time limitations, defined by the contract or by operation of law, such as statutes of limitation. In some cases, the maximum potential obligation is subject to contractual limitations, while in other cases such limitations are not specified or applicable. Included above are \$330 million and \$317 million as of September 30, 2016 and December 31, 2015, respectively, of yield maintenance guarantees related to certain investments the Company sold. The Company does not expect to make any payments on these guarantees and is not carrying any liabilities associated with these guarantees.

Since certain of these obligations are not subject to limitations, it is not possible to determine the maximum potential amount due under these guarantees. The accrued liabilities identified above do not include retained liabilities associated with sold businesses.

Contingent Liabilities

On an ongoing basis, the Company's internal supervisory and control functions review the quality of sales, marketing and other customer interface procedures and practices and may recommend modifications or enhancements. From time to time, this review process results in the discovery of product administration, servicing or other errors, including errors relating to the timing or amount of payments or contract values due to customers or other parties. In certain cases, if appropriate, the Company may offer customers or other parties remediation and may incur charges, including the cost of such remediation, administrative costs and regulatory fines.

The Company is subject to the laws and regulations of states and other jurisdictions concerning the identification, reporting and escheatment of unclaimed or abandoned funds, and is subject to audit and examination for compliance with these requirements. For additional discussion of these matters, see “—Litigation and Regulatory Matters” below.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

It is possible that the results of operations or the cash flow of the Company in a particular quarterly or annual period could be materially affected as a result of payments in connection with the matters discussed above or other matters depending, in part, upon the results of operations or cash flow for such period. Management believes, however, that ultimate payments in connection with these matters, after consideration of applicable reserves and rights to indemnification, should not have a material adverse effect on the Company's financial position.

Litigation and Regulatory Matters

The Company is subject to legal and regulatory actions in the ordinary course of its businesses. Pending legal and regulatory actions include proceedings relating to aspects of the Company's businesses and operations that are specific to it and proceedings that are typical of the businesses in which it operates, including in both cases businesses that have been either divested or placed in wind-down status. Some of these proceedings have been brought on behalf of various alleged classes of complainants. In certain of these matters, the plaintiffs are seeking large and/or indeterminate amounts, including punitive or exemplary damages. The outcome of litigation or a regulatory matter, and the amount or range of potential loss at any particular time, is often inherently uncertain. The Company establishes accruals for litigation and regulatory matters when it is probable that a loss has been incurred and the amount of that loss can be reasonably estimated. For litigation and regulatory matters where a loss may be reasonably possible, but not probable, or is probable but not reasonably estimable, no accrual is established but the matter, if material, is disclosed, including matters discussed below. The Company estimates that as of September 30, 2016, the aggregate range of reasonably possible losses in excess of accruals established for those litigation and regulatory matters for which such an estimate currently can be made is less than \$250 million. Any estimate is not an indication of expected loss, if any, or the Company's maximum possible loss exposure on such matters. The Company reviews relevant information with respect to its litigation and regulatory matters on a quarterly and annual basis and updates its accruals, disclosures and estimates of reasonably possible loss based on such reviews.

The following discussion of litigations and regulatory matters provides an update of those matters discussed in Note 23 to the Company's Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015, and should be read in conjunction with the complete descriptions provided in the Form 10-K.

Huffman v. The Prudential Insurance Company of America

In September 2016, Plaintiffs' motion for class certification was denied, and in October 2016, Plaintiffs filed a motion for reconsideration.

Wood II, et al. v. PRIAC

In September 2016, the Court issued a decision: (i) denying PRIAC's motion to dismiss the claim alleging that it is a fiduciary under ERISA; and (ii) granting PRIAC's motion to dismiss the claim alleging non-fiduciary liability. In October 2016, PRIAC filed its Answer.

Rosen, v. PRIAC, et al.

In April 2016, Plaintiff filed an amended complaint: (i) removing Prudential Investment Management Services, LLC, as a defendant; (ii) withdrawing all claims concerning Stable Value Accounts; and (iii) adding as defendants the employer/sponsor of Plaintiff's retirement plan (Ferguson Enterprises, Inc.), and the investment advisor for Plaintiff's retirement plan (Capfinancial Partners, LLC d/b/a Captrust Financial Advisors). In May 2016, the Muir v. PRIAC complaint was consolidated with this lawsuit. In June 2016, PRIAC, along with the other named defendants, filed

motions to dismiss the amended complaint.

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Muir v. PRIAC, et al.

In February 2016, a putative class action complaint entitled Randall C. Muir, on behalf of the Ferguson Enterprises, Inc. 401(k) Retirement Savings Plan and All Other Similarly Situated Plans v. PRIAC, Prudential Bank & Trust, FSB, and Prudential Investment Management Services, LLC, was filed in the United States District Court, District of Connecticut. The complaint: (1) seeks certification of a class of all Employee Retirement Income Security Act covered employee pension benefit plans with which Prudential has maintained a contractual relationship based on a group annuity contract or group funding agreement; and (2) alleges that the defendants breached their fiduciary obligations by accepting revenue sharing payments from investment vehicles in its separate accounts and/or by accepting excessive compensation by crediting rates on stable value accounts that are less than PRIAC's internal rate of return. In April 2016, Plaintiff filed an unopposed motion to consolidate this lawsuit with the Rosen lawsuit. In May 2016, the Court granted the unopposed motion to consolidate the Muir and Rosen lawsuits. The Muir case has been removed from the Court's docket.

North Valley GI Medical Group v. Prudential Investments LLC

In August 2016, the Court denied the motion to dismiss the complaint.

Financial Disclosures Concerning Death Benefits and Unclaimed Property

City of Sterling Heights General Employees' Retirement System v. Prudential Financial, Inc., et. al.—In April 2016, the parties entered into a proposed agreement to resolve the class action claims asserted in the amended complaint. Thereafter, Plaintiffs filed a motion for an order preliminarily approving the settlement in accordance with the parties' April 2016 Stipulation of Settlement. In June 2016, the Court issued an order "preliminarily approving settlement and providing for notice." In September 2016, the Court issued a final judgment approving the settlement and dismissed the amended complaint with prejudice.

Residential Mortgage-Backed Securities Trustee

PICA et al. v. Bank of New York Mellon ("BONYM")—In March 2016, the Court issued a decision involving BONYM's motion to dismiss: (i) denying the motion to dismiss the Pooling and Servicing Agreement ("PSA") trust claims for lack of jurisdiction; (ii) denying the motion regarding claims for violations of the Trust Indenture Act of 1939 and breach of contract; and (iii) granting the motion regarding claims for negligence and breach of fiduciary duty.

PICA et al. v. Citibank N.A.—In February 2016, Citibank filed a motion to dismiss the state court complaint. In August 2016, Plaintiffs filed an amended complaint in state court, and in September 2016, Citibank filed a motion to dismiss the amended complaint.

PICA et al. v. Deutsche Bank, et al.—In February 2016, the Company, together with other institutional investor plaintiffs, filed an amended complaint in federal court. In March 2016, the Company, together with other institutional investors, filed a complaint in California State Superior Court, captioned BlackRock Balanced Capital Portfolio (FI), et al. v. Deutsche Bank Trust Company Americas, asserting claims relating to the PSA trusts. In May 2016, the Company, together with other institutional investors, filed an amended class action complaint in California State Superior Court. In July 2016, Defendant filed a motion to dismiss the amended federal court complaint. In August 2016, Defendant filed a demurrer and motion to strike the amended state court class action complaint. In October 2016, the Court issued a decision regarding Defendants motion to dismiss: (i) sustaining Plaintiffs' breach of contract claims concerning the trust at issue; (ii) dismissing Plaintiffs' tort claims for breach of fiduciary duty; and (iii) dismissing Plaintiffs' claims of breach of duty to avoid conflicts of interest. The Court granted Plaintiffs' leave to file an amended complaint.

PICA et al. v. U.S. Bank National Association—In February 2016, the federal district court issued a decision involving U.S. Bank’s motion to dismiss: (1) upholding the breach of contract and Trust Indenture Act claims; and (2) dismissing the breach of fiduciary duty and extra-contractual claims.

PICA et al. v. Wells Fargo Bank, et al.—In February 2016, the Company, together with other institutional investor plaintiffs, filed an amended complaint in federal court. In March 2016, the Company, together with other institutional investors, filed a complaint in California State Superior Court, captioned BlackRock Balanced Capital Portfolio (FI), et al. v. Wells Fargo Bank, Nat’l Ass’n., asserting claims relating to the PSA trusts. In May 2016, Defendant filed a motion to dismiss or to stay the state court action. In July 2016, Defendant filed a motion to dismiss the amended complaint filed previously in federal court. In October 2016, the Court dismissed the state court complaint.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Unaudited Interim Consolidated Financial Statements—(Continued)

Prudential Investment Portfolios 2, f/k/a Dryden Core Investment Fund, o/b/o Prudential Core Short-Term Bond Fund and Prudential Core Taxable Money Market Fund v. Bank of America Corporation et al.

In May 2016, the Second Circuit Court of Appeals vacated the District Court's dismissal of the Libor plaintiffs' antitrust claims and remanded to the District Court the question of whether Plaintiffs possess standing as "efficient enforcers" of applicable antitrust laws. In July 2016, Defendants filed a joint motion to dismiss all antitrust claims based on lack of standing and lack of personal jurisdiction.

Summary

The Company's litigation and regulatory matters are subject to many uncertainties, and given their complexity and scope, their outcome cannot be predicted. It is possible that the Company's results of operations or cash flow in a particular quarterly or annual period could be materially affected by an ultimate unfavorable resolution of pending litigation and regulatory matters depending, in part, upon the results of operations or cash flow for such period. In light of the unpredictability of the Company's litigation and regulatory matters, it is also possible that in certain cases an ultimate unfavorable resolution of one or more pending litigation or regulatory matters could have a material adverse effect on the Company's financial position. Management believes, however, that, based on information currently known to it, the ultimate outcome of all pending litigation and regulatory matters, after consideration of applicable reserves and rights to indemnification, is not likely to have a material adverse effect on the Company's financial position.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") addresses the consolidated financial condition of Prudential Financial, Inc. ("Prudential Financial") as of September 30, 2016, compared with December 31, 2015, and its consolidated results of operations for the three and nine months ended September 30, 2016 and 2015. You should read the following analysis of our consolidated financial condition and results of operations in conjunction with the MD&A, the "Risk Factors" section, and the audited Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015, as well as the statements under "Forward-Looking Statements" and the Unaudited Interim Consolidated Financial Statements included elsewhere in this Quarterly Report on Form 10-Q.

Overview

Our principal operations are comprised of four divisions, which together encompass seven segments, and our Corporate and Other operations. The U.S. Retirement Solutions and Investment Management division consists of our Individual Annuities, Retirement and Asset Management segments. The U.S. Individual Life and Group Insurance division consists of our Individual Life and Group Insurance segments. The International Insurance division consists of our International Insurance segment. The Closed Block division consists of our Closed Block segment. The Closed Block division is accounted for as a divested business that is reported separately from the divested businesses that are included in Corporate and Other operations. Our Corporate and Other operations include corporate items and initiatives that are not allocated to business segments and businesses that have been or will be divested.

We attribute financing costs to each segment based on the amount of financing used by each segment, excluding financing costs associated with corporate debt which are reflected in Corporate and Other operations. The net investment income of each segment includes earnings on the amount of capital that management believes is necessary to support the risks of that segment.

Executive Summary

Prudential Financial, a financial services leader with approximately \$1.314 trillion of assets under management as of September 30, 2016, has operations primarily in the United States, Asia, Europe and Latin America. Through our subsidiaries and affiliates, we offer a wide array of financial products and services, including life insurance, annuities, retirement-related services, mutual funds, and investment management. We offer these products and services to individual and institutional customers through one of the largest distribution networks in the financial services industry.

Regulatory Developments

Resolution Planning

In August 2016 the Board of Governors of the Federal Reserve System ("FRB") and the Federal Deposit Insurance Corporation ("FDIC") announced that for non-bank financial companies ("Designated Financial Companies") supervised by the FRB under the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank"), such as Prudential Financial, and certain banks required to file annual resolution plans, the next resolution plan filing deadline will be delayed from December 31, 2016 to December 31, 2017.

Capital and Prudential Standards

In June 2016, the FRB issued an advance notice of proposed rulemaking regarding approaches to regulatory capital requirements for institutions supervised by the FRB that are significantly engaged in insurance activities, including Designated Financial Companies. The advance notice invites comments on a “building block approach” and a “consolidated approach” for determining capital requirements, including which approach is appropriate for Designated Financial Companies. The building block approach would aggregate capital resources and requirements across different legal entities to calculate combined qualifying and required capital for the insurance group. The consolidated approach would categorize insurance liabilities, assets and certain other exposures into risk segments, determine consolidated required capital by applying risk factors to the amounts in each segment, define qualifying capital for the consolidated firm, and then compare consolidated qualifying capital to consolidated required capital. The building block approach and the consolidated approach as described in the advance notice of proposed rulemaking are high level concepts for capital standards, and will ultimately need to be defined in detail in any final standards. The comment period for the advance notice closed on September 16, 2016.

Table of Contents

Also in June 2016, the FRB issued proposed enhanced prudential standards for Designated Financial Companies relating to corporate governance, risk management, and liquidity risk management. The proposed corporate governance standards would require Designated Financial Companies to establish and maintain a risk committee of the board of directors and appoint a chief risk officer and chief actuary. The proposed risk management standards would require Designated Financial Companies to establish a risk management framework that includes policies, procedures, processes and systems. The proposed liquidity risk management standards would require periodic cash-flow projections, liquidity stress testing and maintenance of a liquidity buffer. The comment period for this proposal closed on August 17, 2016.

We cannot predict the timing of the issuance or content of final capital requirements or enhanced prudential standards or how the FRB ultimately will apply the final requirements to us. For additional information on FRB supervision, see “Business—Regulation—Dodd-Frank Wall Street Reform and Consumer Protection Act—Regulation as a Designated Financial Company” in our Annual Report on Form 10-K for the year ended December 31, 2015.

Principles Based Reserving

In June 2016, the National Association of Insurance Commissioners (the “NAIC”) adopted a recommendation that will activate a principles-based reserving approach for life insurance products. Principles-based reserving replaces the reserving methods for life insurance products for which the current formulaic basis for reserves may not fully reflect the risks or costs of the liability or obligations of the insurer. The principles-based reserving approach has a three year phase in period. At the Company's discretion, it may be applied to new individual life business beginning as early as January 1, 2017, and must be applied for all new individual life business issued January 1, 2020 and later. The Company may select different implementation dates for different products. Principles-based reserving will not affect reserves for policies in force prior to January 1, 2017. The Company is currently assessing the impact of this new reserving approach on projected statutory reserve levels and product pricing for its portfolio of individual life product offerings.

Brexit

In June 2016, the United Kingdom approved a non-binding referendum to exit the European Union. The formal process for the United Kingdom to exit from the European Union would ultimately be triggered by the filing of a notice to withdraw and a negotiation between the United Kingdom and the European Union on the timing and terms of the exit. The outcome of the negotiations will determine the ultimate impact of the exit on our operations and investments in those jurisdictions and may lead to volatility in currency exchange rates and asset prices, as well as changes in regulation. See “General Account Investments—General Account Investments of PFI excluding Closed Block Division—Fixed Maturity Securities—Fixed Maturity Securities and Unrealized Gains (Losses) by Industry Category” for a discussion of our United Kingdom and European Union related investment exposures and see “Results of Operations by Segment—U.S. Retirement Solutions and Investment Management Division—Retirement—Operating Results” for a discussion of Retirement segment business denominated in pounds sterling.

DOL Fiduciary Rule

In April 2016, the U.S. Department of Labor (“DOL”) issued a final regulation accompanied by new class exemptions and amendments to long-standing exemptions from the prohibited transaction provisions under the Employee Retirement Income Security Act (“ERISA”) (collectively, the “Rules”), with implementation beginning in April 2017, and compliance with certain additional provisions required by January 2018. The Rules redefine who will be considered a “fiduciary” for purposes of transactions with qualified plans, plan participants and Individual Retirement Accounts (“IRAs”), and generally provide that advice to a plan participant or IRA owner will be treated as a fiduciary activity. We are analyzing the Rules’ impact on our operations and have started implementing the necessary adjustments to come into alignment with the Rules’ requirements. In addition, in October 2016, the DOL issued interpretive guidance on the Rules, and we are evaluating whether or not the guidance will affect our implementation plans.

Overall, the Rules will result in increased compliance costs and may create increased exposure to legal claims under certain circumstances, including class actions. We believe the Rules will primarily impact our Individual Annuities, Retirement and Asset Management segments and our Prudential Advisors distribution system which we include in the results of our Individual Life segment. Significant aspects of the Rules and their impact on our businesses include the following:

Table of Contents

Prudential Advisors: We are taking the steps we believe are required to comply with the new “best interest contract exemption” for investment advice concerning retirement plans and IRAs including recommendations to purchase products sold to IRAs, which constitutes a significant part of Prudential Advisors’ non-life insurance new business revenues. The Rules state that proprietary products may be sold to IRA owners if certain conditions are met, subject to significant new requirements for this type of sale, and we are evaluating processes to comply with these requirements. The Rules will impose compliance and contract requirements and would give customers a new private right of action for breach of contract that in some circumstances may result in damages and liability under ERISA and the Internal Revenue Code for excise taxes, disgorgement of profit, and other possible remedies. The Rules will lead to changes to compensation and benefit structures, and possibly to our product offerings.

Annuities: Sales of variable annuities by our retail distributors will be subject to the best interest contract exemption described above, but certain fixed annuities can be subject to a separate exemption or to the best interest contract exemption. As a result of the Rules, certain distributors are announcing that they will restrict the sale of certain types of annuities. In addition, we may need to alter our product design, offerings or pricing to meet the needs of certain distributors who are requesting changes to support their compliance with the Rules. We will need to monitor or potentially limit wholesaling and other sales support and customer service activities to avoid fiduciary status as the manufacturer under the Rules.

Retirement: We are making certain changes to the asset allocation tools included in our product offerings, which may include illustrations based on specific investments, so that the tools are not expected to fall within the definition of acting as a fiduciary for plan clients. We are developing processes for IRA offerings to comply with the new best interest contract exemption, referred to above, and for asset allocation tools within rollover IRAs to comply with an exemption to the Rules under the Pension Protection Act of 2006 for investment advice. In addition, we are planning to make changes to relationships with sponsors and intermediaries for plans with less than \$50 million in assets so that we will not be considered a fiduciary under the Rules. Historically, the substantial majority of our earnings in the Retirement business have not come from IRA offerings, asset retention and consolidation activities, and plans with less than \$50 million in assets.

Asset Management: We may need to alter our product design, offerings or pricing in order to meet the needs of certain distributors of mutual funds who are requesting changes to support their compliance with the Rules. We will also need to monitor or potentially limit wholesaling and other sales support and customer service activities to avoid fiduciary status as the manufacturer under the Rules.

Several financial services industry groups have initiated litigation challenging the Rules on both procedural and substantive grounds. The outcome of these litigations may alter whether and how some or all of the Rules are applied to our businesses. For additional information on the potential impacts of regulation on the Company, see “Business—Regulation” and “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2015.

Impact of a Low Interest Rate Environment

U.S. Operations excluding the Closed Block Division

Interest rates in the U.S. continue to remain lower than historical levels, despite the Federal Reserve Board’s decision to raise short-term interest rates in December 2015. Market conditions and events, including but not limited to the United Kingdom referendum to leave the European Union contrasted with strengthening economic growth and job creation, make uncertain the timing and amount of future monetary policy decisions by the Federal Reserve. Given this current low rate environment, our current reinvestment yields continue to be lower than the overall portfolio yield, primarily for our investments in fixed maturity securities and commercial mortgage loans and, as a result, our overall portfolio yields are expected to continue to decline.

For the general account supporting our U.S. Retirement Solutions and Investment Management division, our U.S. Individual Life and Group Insurance division and our Corporate and Other operations, we expect annual scheduled payments and prepayments to be approximately 10% of the fixed maturity security and commercial mortgage loan portfolios through 2017. The general account for these operations has approximately \$188 billion of such assets (based on net carrying value) as of September 30, 2016. As these assets mature, the average portfolio yield for fixed maturities and commercial mortgage loans of approximately 4.5% as of September 30, 2016, is expected to decline due to reinvesting in a lower interest rate environment.

Table of Contents

Included in the \$188 billion of fixed maturity securities and commercial mortgage loans are approximately \$92 billion that are subject to call or redemption features at the issuer's option and have a weighted average interest rate of approximately 5%. Of this \$92 billion, approximately 70% contains provisions for prepayment premiums. The reinvestment of scheduled payments and prepayments at rates below the current portfolio yield, including in some cases at rates below those guaranteed under our insurance contracts, will impact future operating results to the extent we do not, or are unable to, reduce crediting rates on in force blocks of business, or effectively utilize other asset/liability management strategies described below, in order to maintain current net interest margins.

As of September 30, 2016, these operations have approximately \$183 billion of insurance liabilities and policyholder account balances. Of this amount, approximately \$54 billion represents contracts with crediting rates that may be adjusted over the life of the contract, subject to guaranteed minimums. Although we may have the ability to lower crediting rates for those contracts above guaranteed minimums, our willingness to do so may be limited by competitive pressures.

The following table sets forth the related account values by range of guaranteed minimum crediting rates and the related range of the difference, in basis points ("bps"), between rates being credited to contractholders as of September 30, 2016, and the respective guaranteed minimums.

Account Values with Adjustable Crediting Rates Subject to
Guaranteed Minimums:

At guaranteed minimum	1-49 bps above guaranteed minimum	50-99 bps above guaranteed minimum	100-150 bps above guaranteed minimum	Greater than 150 bps above guaranteed minimum	Total
-----------------------------	--	---	---	---	-------

(\$ in billions)

Range of Guaranteed Minimum

Crediting Rates:

Less than 1.00%	\$0.6	\$ 0.8	\$ 0.3	\$ 0.0	\$ 0.0	\$1.7
1.00% - 1.99%	1.7	12.3	2.8	1.1	0.1	18.0
2.00% - 2.99%	2.2	0.4	1.8	0.9	0.1	5.4
3.00% - 4.00%	27.0	0.5	0.2	0.1	0.0	27.8
Greater than 4.00%	0.8	0.0	0.0	0.0	0.0	0.8
Total	\$32.3	\$ 14.0	\$ 5.1	\$ 2.1	\$ 0.2	\$53.7
Percentage of total	60	% 26	% 10	% 4	% 0	% 100

Also included in the table above is approximately \$1.2 billion related to contracts that impose a market value adjustment if the invested amount is not held to maturity.

The \$183 billion of insurance liabilities and policyholder account balances also includes approximately \$15 billion related to participating contracts for which the investment income risk is expected to ultimately accrue to contractholders. The crediting rates for these contracts are periodically adjusted based on the yield earned on the related assets. The remaining \$114 billion of the \$183 billion of insurance liabilities and policyholder account balances in these operations represents long duration products such as group annuities, structured settlements and other insurance products that have fixed and guaranteed terms, for which underlying assets may have to be reinvested at interest rates that are lower than portfolio rates. We seek to mitigate the impact of a prolonged low interest rate environment on these contracts through asset/liability management, as discussed further below.

Assuming a hypothetical scenario where the average 10-year U.S. Treasury rate is 1.60% for the period from October 1, 2016 through December 31, 2017, and credit spreads remain unchanged from levels as of September 30, 2016, we

estimate that the unfavorable impact to net interest margins included in pre-tax adjusted operating income of reinvesting in such an environment, compared to reinvesting at current average portfolio yields, would be approximately \$2 million in 2016 and \$47 million in 2017. This impact is most significant in the Retirement, Individual Life and Individual Annuities segments. This hypothetical scenario only reflects the impact related to the approximately \$54 billion of contracts shown in the table above, and does not reflect: any benefit from potential changes to the crediting rates on the corresponding contractholder liabilities where the Company has the contractual ability to do so, or other potential mitigants such as changes in investment mix that we may implement as funds are reinvested; any impact related to assets that do not directly support our liabilities; any impact from other factors, including but not limited to, new business, contractholder behavior, product modifications, changes in product offerings, changes in competitive conditions or changes in capital markets; or any impact from other factors described below.

Table of Contents

In order to mitigate the unfavorable impact that the current interest rate environment has on our net interest margins, we employ a proactive asset/liability management program, which includes strategic asset allocation and derivative strategies within a disciplined risk management framework. These strategies seek to match the characteristics of our products, and to closely approximate the interest rate sensitivity of the assets with the estimated interest rate sensitivity of the product liabilities. Our asset/liability management program also helps manage duration gaps, currency and other risks between assets and liabilities through the use of derivatives. We adjust this dynamic process as products change, as customer behavior changes and as changes in the market environment occur. As a result, our asset/liability management process has permitted us to manage the interest rate risk associated with our products through several market cycles. Our interest rate exposure is also mitigated by our business mix, which includes lines of business for which fee-based and insurance underwriting earnings play a more prominent role in product profitability.

Closed Block Division

Substantially all of the \$61 billion of general account assets in the Closed Block division support obligations and liabilities relating to the Closed Block policies only. See Note 6 to the Unaudited Interim Consolidated Financial Statements for further information on the Closed Block.

International Insurance Operations

While our international insurance operations have experienced a low interest rate environment for many years, the current reinvestment yields for certain blocks of business in our largest international insurance operations are generally lower than the current portfolio yield supporting these blocks of business. Recently, the Bank of Japan has been pursuing further expansionary monetary policy resulting in even lower, and at times negative yields for both 10-year and 20-year government bonds. Our international insurance operations employ a proactive asset/liability management program in order to mitigate, to the extent possible, the unfavorable impact that the current interest rate environment has on our net interest margins. In conjunction with this program, we have not purchased negative yielding assets to support the portfolio and we continue to purchase long-term bonds with tenors of 30 years or greater that carry positive yields. Additionally, our diverse product portfolio in terms of currency mix and premium payment mode allows us to further mitigate the negative impact from this low interest rate environment. We regularly examine our yen-based product offerings and their profitability. As a result, we have repriced certain products, adjusted commissions for certain products and have discontinued sales of other products that do not meet our profit expectations. The impact of these actions, coupled with the strengthening of the yen against the U.S. dollar and introduction of certain new products, has resulted in an increase in sales of U.S. dollar-denominated products relative to products denominated in other currencies. For additional information on sales within our international insurance operations, see “—International Insurance Division—International Insurance—Sales Results”, below.

As of September 30, 2016, our Japanese operations have \$147 billion of insurance liabilities and policyholder account balances. Included in the \$147 billion is approximately \$23 billion related to contracts that impose a market value adjustment if the invested amount is not held to maturity, and \$9 billion of insurance liabilities and policyholder account balances with crediting rates that may be adjusted over the life of the contract, subject to guaranteed minimums. However, for these contracts, most of the current crediting rates are at or near contractual minimums. Although we have the ability to lower crediting rates in some cases for those contracts that are above guaranteed minimum crediting rates, the majority of this business has interest crediting rates that are determined by formula. The remaining \$115 billion of insurance liabilities and policyholder account balances are predominantly comprised of long-duration insurance products that have fixed and guaranteed terms, for which underlying assets may have to be reinvested at interest rates that are lower than portfolio rates.

Assuming a hypothetical scenario within our Japanese and Korean operations where 2016 new money yields were 25 basis points lower than actual 2016 new money yields, and applying these lower new money yields to annualized

investment of renewal premiums, proceeds from investment disposition and reinvestment of investment income, we estimate that the unfavorable impact to net interest margins included in 2016 pre-tax adjusted operating income would have been in a range of approximately \$10 to \$15 million. This hypothetical scenario excludes first-year single premium and multi-currency fixed annuity cash flows, any potential benefit from repricing products, and any impact from other factors, including but not limited to new business, contractholder behavior, changes in competitive conditions, changes in capital markets, and the effect of derivative instruments.

Table of Contents

Variable Annuities Recapture

Effective April 1, 2016, we recaptured the risks related to our variable annuities living benefit riders and certain retirement products that were previously reinsured to our captive reinsurance company, Pruco Reinsurance, Ltd. (“Pruco Re”). These risks were recaptured by the originating insurance entities, thereby combining those risks with their base contracts. In addition, variable annuity contracts issued by Pruco Life Insurance Company (“Pruco Life”), a subsidiary of Prudential Insurance, were reinsured to our subsidiary, Prudential Annuities Life Assurance Corporation (“PALAC”) while variable annuity contracts issued by Pruco Life Insurance Company of New Jersey (“PLNJ”), a subsidiary of Pruco Life, were reinsured to Prudential Insurance. These series of transactions are collectively referred to as the “Variable Annuities Recapture.”

The Variable Annuities Recapture allows us to manage the capital and liquidity risks of these products more efficiently by aggregating both the risks and the assets supporting these risks in the same entities. The Variable Annuities Recapture resulted in an increase of highly liquid assets at Prudential Financial of approximately \$1.0 billion, due to payments received from subsidiaries in the form of dividends, returns of capital, and repayments under affiliate loan agreements, net of capital contributions, and is expected to reduce future capital volatility associated with our variable annuities business. Additionally, in connection with this transaction, we evaluated the overall risk management strategy associated with our Individual Annuities segment, including potential future enhancements to the living benefit hedging program. During the third quarter of 2016, we implemented modifications to the Individual Annuities’ risk management strategy in order to more efficiently manage the capital and liquidity associated with these products while continuing to mitigate fluctuations in net income due to capital market movements. These modifications include utilizing a combination of traditional fixed income instruments and derivatives to manage the associated risks. For more information on the hedging portion of Individual Annuities’ risk management strategy in place during the three and nine months ended September 30, 2016, and the results of that hedging strategy, see “Results of Operations by Segment—U.S. Retirement Solutions and Investment Management Division—Individual Annuities.”

Results of Operations

Net income attributable to Prudential Financial, Inc. for the three and nine months ended September 30, 2016 was \$1,827 million and \$4,084 million, respectively, compared to \$1,465 million and \$4,907 million, respectively, for the three and nine months ended September 30, 2015.

We analyze performance of our segments and Corporate and Other operations using a measure called adjusted operating income. See “—Consolidated Results of Operations—Segment Measures” for a discussion of adjusted operating income and its use as a measure of segment operating performance.

Shown below are the contributions of each segment and Corporate and Other operations to our adjusted operating income for the periods indicated and a reconciliation of adjusted operating income of our segments and Corporate and Other operations to “Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures.”

Table of Contents

	Three Months Ended September 30, 2016 2015		Nine Months Ended September 30, 2016 2015

- (1) Represents “Realized investment gains (losses), net,” and related adjustments. See “—Realized Investment Gains (Losses)” and Note 11 to our Unaudited Interim Consolidated Financial Statements for additional information.
- (2) Includes charges that represent the impact of realized investment gains (losses), net, on the amortization of deferred policy acquisition costs (“DAC”) and other costs, and on changes in reserves. Also includes charges resulting from payments related to market value adjustment features of certain of our annuity products and the impact of realized investment gains (losses), net, on the amortization of unearned revenue reserves.
- (3) Represents net investment gains (losses) on trading account assets supporting insurance liabilities. See “—Experience-Rated Contractholder Liabilities, Trading Account Assets Supporting Insurance Liabilities and Other Related Investments.”
- (4) Represents changes in contractholder liabilities due to asset value changes in the pool of investments supporting these experience-rated contracts. See “—Experience-Rated Contractholder Liabilities, Trading Account Assets Supporting Insurance Liabilities and Other Related Investments.”
- (5) See “—Divested Businesses.”
- (6) Equity in earnings of operating joint ventures are included in adjusted operating income but excluded from income from continuing operations before income taxes and equity in earnings of operating joint ventures as they are reflected on an after-tax U.S. GAAP basis as a separate line in our Unaudited Interim Consolidated Statements of Operations. Earnings attributable to noncontrolling interests are excluded from adjusted operating income but

included in income from continuing operations before taxes and equity earnings of operating joint ventures as they are reflected on a U.S. GAAP basis as a separate line in our Unaudited Interim Consolidated Statements of Operations. Earnings attributable to noncontrolling interests represent the portion of earnings from consolidated entities that relates to the equity interests of minority investors.

Results for the periods presented above reflect the following:

Individual Annuities. Segment results for the third quarter of 2016 increased in comparison to the prior year period, primarily reflecting a favorable comparative impact from changes in the estimated profitability of the business, as well as higher net investment income and higher fee income. Segment results for the first nine months of 2016 decreased in comparison to the prior year period, primarily reflecting lower net asset-based fee income and higher operating expenses, partially offset by lower amortization costs, lower interest expense and higher net investment income.

Table of Contents

Retirement. Segment results for the third quarter of 2016 slightly decreased in comparison to the prior year period, primarily reflecting a lower contribution from reserve experience and higher general and administrative expenses, net of capitalization, inclusive of increased legal costs, partially offset by higher net investment spread results. Segment results for the first nine months of 2016 decreased in comparison to the prior year period, primarily reflecting a lower contribution from reserve experience, higher general and administrative expenses, net of capitalization, inclusive of increased legal costs, and lower fee income, partially offset by higher net investment spread results and a favorable comparative net impact from our annual reviews and update of assumptions.

Asset Management. Segment results for the third quarter of 2016 increased in comparison to the prior year period, primarily reflecting higher asset management fees, net of expenses. Results for the first nine months of 2016 decreased in comparison to the prior year period, primarily reflecting lower other related revenues, net of associated expenses, partially offset by higher asset management fees, net of expenses.

Individual Life. Segment results for both the third quarter and the first nine months of 2016 decreased in comparison to the prior year periods. The decrease for the third quarter of 2016 primarily reflected less favorable mortality experience, net of reinsurance, and higher general and administrative expenses, partially offset by a higher contribution from investment results. The decrease for the first nine months of 2016 primarily reflected an unfavorable comparative net impact from our annual reviews and update of assumptions and other refinements, less favorable mortality experience, net of reinsurance, as well as higher general and administrative expenses, partially offset by a higher contribution from investment results.

Group Insurance. Segment results for both the third quarter and first nine months of 2016 increased in comparison to the prior year periods. The increase for the third quarter of 2016 primarily reflects higher net spread investment results, driven by higher returns on non-coupon investments, and more favorable underwriting results driven by our group life business. The increase for the first nine months of 2016 primarily reflects more favorable underwriting results driven by our group life business and a favorable comparative net impact from our annual reviews and update of assumptions, partially offset by less favorable underwriting results in our group disability business and higher net expenses.

International Insurance. Segment results for both the third quarter and first nine months of 2016 decreased in comparison to the prior year periods, primarily reflecting an unfavorable comparative net impact from foreign currency exchange rates, inclusive of the impact from our currency hedging programs. Excluding the impact of currency fluctuations, segment results increased in both current periods. The increase for the third quarter of 2016 primarily reflects the growth of business in force, including contributions from the Company's recent indirect investment in AFP Habitat in Chile, partially offset by higher net expenses, including those supporting business growth. The increase for the first nine months of 2016 primarily reflects the growth of business in force, including contributions from the Company's recent indirect investment in AFP Habitat in Chile, and more favorable mortality experience, partially offset by higher net expenses, including those supporting business growth. Net investment results were relatively flat for the quarterly comparison and unfavorable for the nine month comparison due to lower contributions from both non-coupon investments and fixed income investment spreads.

Corporate and Other operations. The results for both the third quarter and first nine months of 2016 reflected increased losses in comparison to the prior year periods, driven by higher levels of corporate expenses and lower net investment income, partially offset by lower interest expense.

Closed Block Division. The Closed Block division results for the third quarter of 2016 decreased in comparison to the prior year period, primarily driven by an increase in the policyholder dividend obligation and a decrease in net insurance results, partially offset by an increase in net realized investment gains and higher net investment income. The Closed Block division results for the first nine months of 2016 decreased in comparison to the prior year period,

primarily driven by a decrease in net realized investment gains and lower net investment income, partially offset by a decrease in the policyholder dividend obligation.

Table of Contents

Consolidated Results of Operations

The following table summarizes net income (loss) for the periods presented.

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
	2016	2015	2016	2015
	(in millions)			
Revenues	\$16,961	\$13,599	\$45,729	\$42,863
Benefits and expenses	14,646	11,550	40,341	35,937
Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures	2,315	2,049	5,388	6,926
Income tax expense (benefit)	501	584	1,300	1,962
Income (loss) from continuing operations before equity in earnings of operating joint ventures	1,814	1,465	4,088	4,964
Equity in earnings of operating joint ventures, net of taxes	18	2	38	8
Income (loss) from continuing operations	1,832	1,467	4,126	4,972
Income (loss) from discontinued operations, net of taxes	0	0	0	0
Net income (loss)	1,832	1,467	4,126	4,972
Less: Income attributable to noncontrolling interests	5	2	42	65
Net income (loss) attributable to Prudential Financial, Inc.	\$1,827	\$1,465	\$4,084	\$4,907

Results of Operations

Three Month Comparison. The increase in “Income (loss) from continuing operations” for the third quarter of 2016 compared to the third quarter of 2015 reflected the following notable items:

\$879 million favorable variance, on a pre-tax basis, reflecting our decision to manage a portion of our interest rate risk through our Capital Protection Framework (see “—Results of Operations by Segment—Corporate and Other—Capital Protection Framework” for additional information); and

\$215 million favorable variance, on a pre-tax basis, from adjustments to DAC and other costs as well as reserves, reflecting updates to the estimated profitability of our businesses. This excludes the impact associated with the variable annuity hedging program discussed below (see “—Results of Operations by Segment—U.S. Retirement Solutions and Investment Management Division—Individual Annuities” for additional information).

Partially offsetting these increases in “Income (loss) from continuing operations” were the following items:

\$500 million lower net pre-tax realized gains for PFI excluding the Closed Block division and the impact of the hedging program associated with certain variable annuities discussed below (see “—Realized Investment Gains (Losses)” for additional information); and

\$219 million unfavorable variance, on a pre-tax basis, reflecting the net impact from changes in the value of our embedded derivatives and related hedge positions associated with certain variable annuities and other products (see “—Results of Operations by Segment—U.S. Retirement Solutions and Investment Management Division—Individual Annuities—Variable Annuity Risks and Risk Mitigants” for additional information).

Nine Month Comparison. The decrease in “Income (loss) from continuing operations” for the first nine months of 2016 compared to the first nine months of 2015 reflected the following notable items:

\$1,384 million unfavorable variance, on a pre-tax basis, reflecting our decision to manage a portion of our interest rate risk through our Capital Protection Framework (see “—Results of Operations by Segment—Corporate and Other—Capital Protection Framework” for additional information); and

\$973 million unfavorable variance, on a pre-tax basis, from adjustments to DAC and other costs as well as reserves, reflecting updates to the estimated profitability of our businesses, including the impact of our annual reviews and update of assumptions and other refinements. This excludes the impact associated with the variable annuity hedging program discussed below (see “—Results of Operations by Segment—U.S. Retirement Solutions and Investment Management Division—Individual Annuities” for additional information).

Table of Contents

Partially offsetting these decreases in “Income (loss) from continuing operations” were the following items:

\$1,204 million favorable variance, on a pre-tax basis, reflecting the net impact from changes in the value of our embedded derivatives and related hedge positions associated with certain variable annuities and other products (see “—Results of Operations by Segment—U.S. Retirement Solutions and Investment Management Division—Individual Annuities—Variable Annuity Risks and Risk Mitigants” for additional information); and

\$766 million higher net pre-tax realized gains for PFI excluding the Closed Block division and the impact of the hedging program associated with certain variable annuities discussed above (see “—Realized Investment Gains (Losses)” for additional information).

Segment Measures

Adjusted Operating Income. In managing our business, we analyze our segments’ operating performance using “adjusted operating income.” Adjusted operating income does not equate to “Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures” or “Net income (loss)” as determined in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”), but is the measure of segment profit or loss we use to evaluate segment performance and allocate resources, and consistent with authoritative guidance, is our measure of segment performance. The adjustments to derive adjusted operating income are important to an understanding of our overall results of operations. Adjusted operating income is not a substitute for income determined in accordance with U.S. GAAP, and our definition of adjusted operating income may differ from that used by other companies. However, we believe that the presentation of adjusted operating income as we measure it for management purposes enhances the understanding of our results of operations by highlighting the results from ongoing operations and the underlying profitability of our businesses.

See Note 11 to the Unaudited Interim Consolidated Financial Statements for further information on the presentation of segment results and our definition of adjusted operating income.

Annualized New Business Premiums. In managing certain of our businesses, we analyze annualized new business premiums, which do not correspond to revenues under U.S. GAAP. Annualized new business premiums measure the current sales performance of the business, while revenues primarily reflect the renewal persistency of policies written in prior years and net investment income, in addition to current sales. Annualized new business premiums include 10% of first year premiums or deposits from single pay products. No other adjustments are made for limited pay contracts.

The amount of annualized new business premiums for any given period can be significantly impacted by several factors, including but not limited to: addition of new products, discontinuation of existing products, changes in credited interest rates for certain products and other product modifications, changes in tax laws, changes in regulations or changes in the competitive environment. Sales volume may increase or decrease prior to certain of these changes becoming effective, and then fluctuate in the other direction following such changes.

Assets Under Management. In managing our Asset Management business, we analyze assets under management, which do not correspond to U.S. GAAP assets, because the principal source of revenues is fees based on assets under management. Assets under management represents the fair market value or account value of assets which we manage directly for institutional clients, retail clients, and for our general account, as well as assets invested in our products that are managed by third-party managers.

Account Values. In managing our Individual Annuities and Retirement businesses, we analyze account values, which do not correspond to U.S. GAAP assets. Net sales (redemptions) in our Individual Annuities business and net additions (withdrawals) in our Retirement business do not correspond to revenues under U.S. GAAP, but are used as a relevant measure of business activity.

Accounting Policies & Pronouncements

Application of Critical Accounting Estimates

The preparation of financial statements in conformity with U.S. GAAP requires the application of accounting policies that often involve a significant degree of judgment. Management, on an ongoing basis, reviews estimates and assumptions used in the preparation of financial statements. If management determines that modifications in assumptions and estimates are appropriate given current facts and circumstances, the Company's results of operations and financial position as reported in the Unaudited Interim Consolidated Financial Statements could change significantly.

Table of Contents

Management believes the accounting policies relating to the following areas are most dependent on the application of estimates and assumptions and require management's most difficult, subjective, or complex judgments:

- DAC and other costs, including deferred sales inducements ("DSI") and value of business acquired ("VOBA");
- Goodwill;
- Valuation of investments, including derivatives, and the recognition of other-than-temporary impairments ("OTTI");
- Policyholder liabilities;
- Pension and other postretirement benefits;
- Taxes on income; and
- Reserves for contingencies, including reserves for losses in connection with unresolved legal matters.

DAC and Other Costs

The near-term future equity rate of return assumption used in evaluating DAC and other costs for our domestic variable annuity and variable life insurance products is derived using a reversion to the mean approach, a common industry practice. Under this approach, we consider historical equity returns and adjust projected equity returns over an initial future period of five years (the "near-term") so that equity returns converge to the long-term expected rate of return. If the near-term projected future rate of return is greater than our near-term maximum future rate of return of 15%, we use our maximum future rate of return. As of September 30, 2016, our variable annuities and variable life insurance businesses assume an 8.0% long-term equity expected rate of return and a 5.9% near-term mean reversion equity rate of return.

The weighted average rate of return assumptions consider many factors specific to each business, including asset durations, asset allocations and other factors. We generally update the near-term equity rates of return used in our estimate of total gross profits each quarter to reflect the result of the reversion to the mean approach. We generally update the future interest rates used to project fixed income returns annually and in any quarter when interest rates vary significantly from these assumptions. These market performance related adjustments to our estimate of total gross profits result in cumulative adjustments to prior amortization, reflecting the application of the new required rate of amortization to all prior periods' gross profits.

For additional information on our policies for DAC and other costs and for the remaining critical accounting estimates listed above, see our Annual Report on Form 10-K for the year ended December 31, 2015, under "Management's Discussion and Analysis of Financial Condition and Results of Operations—Accounting Policies & Pronouncements—Application of Critical Accounting Estimates."

Policyholder Liabilities

Profits Followed by Losses

In certain instances the policyholder liability for a particular line of business may not be deficient in the aggregate to trigger loss recognition, but the pattern of earnings may be such that profits are expected to be recognized in earlier years followed by losses in later years. In these situations, accounting standards require that an additional liability (Profits Followed by Losses or "PFL" liability) be recognized by an amount necessary to sufficiently offset the losses that would be recognized in later years. As a result, in connection with the second quarter assumption updates we recorded a charge to earnings of \$444 million to recognize a PFL liability based on our current estimate of the present value of the amount necessary to offset losses anticipated in future periods. Because the liability is measured on a discounted basis, there will also be accretion into future earnings through an interest charge, and the liability will ultimately be released into earnings as an offset to future losses. This PFL liability is predominantly associated with

certain universal life contracts that measure GAAP reserves using a dynamic approach and accordingly, will be updated each quarter using current inforce and market data and as part of the annual assumption update.

Adoption of New Accounting Pronouncements

See Note 2 to our Unaudited Interim Consolidated Financial Statements for a discussion of newly adopted accounting pronouncements.

Table of Contents

Results of Operations by Segment

U.S. Retirement Solutions and Investment Management Division

Individual Annuities

The Individual Annuities segment includes both variable and fixed annuities that may include optional guaranteed living benefits riders (e.g., guaranteed minimum income benefits (“GMIB”), guaranteed minimum accumulation benefits (“GMAB”), guaranteed minimum withdrawal benefits (“GMWB”), and guaranteed minimum income and withdrawal benefits (“GMIWB”)), and/or guaranteed minimum death benefits (“GMDB”). We also offer fixed annuities that provide a guarantee of principal and interest credited at rates we determine, subject to certain contractual minimums. We derive our revenue mainly from fee income generated on variable annuity account values, as the investment return on these contractholder funds is generally attributed directly to the contractholder. We also earn investment income on general account assets supporting annuity account values and certain other management fees. Our expenses primarily consist of interest credited and other benefits to contractholders, amortization of DAC and other costs, non-deferred expenses related to the selling and servicing of the various products we offer, costs of managing certain risks associated with these products, changes in the reserves for benefit guarantees and other general business expenses. These drivers of our business results are generally included in adjusted operating income, with exceptions related to certain guarantees, as discussed below.

The U.S. GAAP accounting and our adjusted operating income treatment for our guarantees differ depending upon the specific contractual features. Under U.S. GAAP, the reserves for GMDB and GMIB are calculated based on best estimates applying our actuarial and capital markets return assumptions in accordance with an insurance fulfillment accounting framework whereby a liability is established over time representing the portion of fees collected that is expected to be used to satisfy the obligation to pay benefits in future periods. The risks associated with these benefit features are retained and results are included in adjusted operating income in a manner generally consistent with U.S. GAAP.

In contrast, certain of our guaranteed living benefit riders (e.g., GMAB, GMWB and GMIWB) are accounted for under U.S. GAAP as embedded derivatives and reported using a fair value accounting framework. These benefit features are carried at fair value based on estimates of assumptions a market participant would use in valuing these embedded derivatives and the change in fair value during each reporting period is recorded within “Realized investment gains (losses), net”. For purposes of measuring segment performance, adjusted operating income excludes the changes in fair value and instead reflects the performance of these riders using an insurance fulfillment accounting framework. Under this framework, adjusted operating income recognized each period reflects the rider fees earned during the period less the portion of such fees estimated to be required to cover future benefit payments and hedging costs. For more information on how we determine the portion of fees needed to cover estimated future benefit payments and hedging costs, see “Variable Annuity Risks and Risk Mitigants” below.

Account Values

Account values are a significant driver of our operating results. Since most fees are determined by the level of separate account assets, fee income varies according to the level of account values. Additionally, our fee income generally drives other items such as the pattern of amortization of DAC and other costs. Account values are driven by net flows from new business sales, surrenders, withdrawals and benefit payments, the impact of market value changes, which can be either positive or negative, and policy charges. The annuity industry’s competitive and regulatory landscapes, which have been dynamic over the last few years, may impact our net flows, including new business sales. The following table sets forth account value information for the periods indicated.

Table of Contents

	Three Months Ended September 30,		Nine Months Ended September 30,		Twelve Months Ended September 30, 2016
	2016	2015	2016	2015	2016
(in millions)					
Total Individual Annuities ⁽¹⁾ :					
Beginning total account value	\$ 154,677	\$ 158,976	\$ 152,945	\$ 158,664	\$ 150,217
Sales	2,100	2,123	6,398	6,691	8,487
Surrenders and withdrawals	(2,013)	(1,995)	(5,732)	(6,394)	(7,753)
Net sales	87	128	666	297	734
Benefit payments	(440)	(491)	(1,372)	(1,468)	(1,814)
Net flows	(353)	(363)	(706)	(1,171)	(1,080)
Change in market value, interest credited and other activity	4,973	(7,500)	8,801	(4,577)	12,793
Policy charges	(909)	(896)	(2,652)	(2,699)	(3,542)
Ending total account value	\$ 158,388	\$ 150,217	\$ 158,388	\$ 150,217	\$ 158,388

Includes variable and fixed annuities sold as retail investment products. Investments sold through defined contribution plan products are included with such products within the Retirement segment. Variable annuity account values were \$154.9 billion and \$146.7 billion as of September 30, 2016 and 2015, respectively. Fixed annuity account values were \$3.5 billion as of both September 30, 2016 and 2015.

The increase in account values for the twelve months ended September 30, 2016 was largely driven by favorable changes in the market value of contractholder funds and positive net sales. These positive impacts were partially offset by contract charges on contractholder accounts and benefit payments.

While net sales for the three months ended September 30, 2016 slightly decreased compared to the prior year period, reflecting higher surrenders and withdrawals and lower gross sales, net sales for the nine months ended September 30, 2016 increased compared to the prior year period, reflecting lower surrenders and withdrawals partially offset by lower gross sales. The decline in gross sales for both periods was largely driven by decreased sales of our Prudential Premier[®] Retirement Variable Annuity with “highest daily” benefit riders and Prudential Premier[®] Investment Variable Annuity (“PPI”). The declines in gross sales were partially offset by increases in sales of our Prudential Defined Income Variable Annuity (“PDI”) product.

Operating Results

The following table sets forth the Individual Annuities segment’s operating results for the periods indicated.

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2016	
	2016	2015	2016	2015
(in millions)				
Operating results:				
Revenues	\$ 1,221	\$ 1,167	\$ 3,473	\$ 3,554

Table of Contents

Adjusted Operating Income

Three Month Comparison. Adjusted operating income increased \$278 million. Excluding the impacts of changes in the estimated profitability of the business, discussed below, adjusted operating income increased \$63 million. The increase was primarily driven by an increase in net investment income attributable to higher income on non-coupon investments and higher invested assets, and higher asset-based fee income, net of associated costs, due to greater efficiency in managing product risks associated with a recently implemented asset-liability management strategy discussed below and an increase in average variable annuity account values. The increase was also driven by the absence of certain costs for contract cancellations incurred in the prior year period.

The impacts of changes in the estimated profitability of the business include adjustments to the amortization of DAC and other costs and to the reserves for the GMDB and GMIB features of our variable annuity products. These adjustments resulted in a net benefit of \$139 million and a net charge of \$76 million in the third quarter of 2016 and 2015, respectively. The net benefit in the third quarter of 2016 primarily reflected the net impact of favorable equity market performance on contractholder accounts relative to our assumptions. The net charge in the third quarter of 2015 primarily reflected the net impact of unfavorable equity market performance on contractholder accounts relative to our assumptions.

Nine Month Comparison. Adjusted operating income decreased \$44 million. Excluding the impacts of changes in the estimated profitability of the business, discussed below, adjusted operating income decreased \$27 million. The decrease was primarily driven by lower asset-based fee income, net of a related decrease in asset-based commissions, due to a decline in average variable annuity account values, as well as higher operating expenses. Partially offsetting this net decline were lower amortization costs and lower interest expense, and an increase in net investment income driven by higher income on non-coupon investments and higher invested assets. This net decline was also partially offset by the absence of certain costs for contract cancellations incurred in the prior year period.

Adjustments to the amortization of DAC and other costs and to the reserves for the GMDB and GMIB features of our variable annuity products resulted in a net benefit of \$138 million and \$155 million in the first nine months of 2016 and 2015, respectively. The net benefit in the first nine months of 2016 primarily reflected the net impact of equity market performance on contractholder accounts relative to our assumptions, as well as a net benefit resulting from our annual reviews and update of assumptions and other refinements. The net benefit in the first nine months of 2015 primarily reflected the net impact of equity market performance on contractholder accounts relative to our assumptions, as well as a net benefit resulting from our annual review and update of assumptions.

Revenues, Benefits and Expenses

Three Month Comparison. Revenues, as shown in the table above under “—Operating Results,” increased \$54 million, primarily driven by an increase in net investment income reflecting higher income on non-coupon investments and higher invested assets, and an increase in policy charges and fee income, asset management and service fees and other income, due to an increase associated with a recently implemented asset-liability management strategy discussed below and an increase in average account values.

Benefits and expenses, as shown in the table above under “—Operating Results,” decreased \$224 million. Excluding the \$215 million net decrease related to the impacts of certain changes in our estimated profitability of the business discussed above, benefits and expenses decreased \$9 million. Amortization of DAC and policyholders’ benefits, including changes in reserves, decreased \$8 million and \$6 million, respectively, driven by the absence of certain costs for contract cancellations incurred in the prior year period, as discussed above.

Nine Month Comparison. Revenues decreased \$81 million, primarily driven by a decrease in policy charges and fee income, asset management and service fees and other income, due to a decline in average account values. Partially offsetting this decrease was an increase in net investment income driven by higher income on non-coupon investments and higher invested assets.

Benefits and expenses decreased \$37 million. Excluding the \$17 million net increase related to the impacts of certain changes in our estimated profitability of the business discussed above, benefits and expenses decreased \$54 million. Amortization of DAC and interest credited to policyholders' account balances decreased \$28 million and \$19 million, respectively, driven by lower fee income, as discussed above. General and administrative expenses, net of capitalization, decreased \$18 million driven by lower asset-based commissions and lower asset management costs due to lower average account values, partially offset by higher operating expenses.

Table of Contents

Variable Annuity Risks and Risk Mitigants

The primary risk exposures of our variable annuity contracts relate to actual deviations from, or changes to, the assumptions used in the original pricing of these products, including capital markets assumptions such as equity market returns, interest rates and market volatility, along with actuarial assumptions such as contractholder mortality, the timing and amount of annuitization and withdrawals, and contract lapses. For these risk exposures, achievement of our expected returns is subject to the risk that actual experience will differ from the assumptions used in the original pricing of these products. We currently manage our exposure to certain risks driven by capital markets fluctuations primarily through a combination of three strategies described below including Product Design Features, External Reinsurance and an Asset Liability Management Strategy.

Product Design Features

A portion of the variable annuity contracts that we offer include an automatic rebalancing feature, also referred to as an asset transfer feature. This feature is implemented at the contract level, and transfers assets between certain variable investment sub-accounts selected by the annuity contractholder and, depending on the benefit feature, a fixed-rate account in the general account or a bond fund sub-account within the separate accounts. The automatic rebalancing feature associated with currently-sold highest daily benefit products uses a designated bond fund sub-account within the separate accounts. The transfers are based on a static mathematical formula used with the particular benefit which considers a number of factors, including, but not limited to, the impact of investment performance on the contractholder's total account value. The objective of the automatic rebalancing feature is to reduce our exposure to equity market risk and market volatility. Other product design features we utilize include, among others, asset allocation restrictions, minimum issuance age requirements and certain limitations on the amount of contractholder deposits, as well as a required allocation to our general account for certain of our products. We have also introduced products that diversify our risk profile and have incorporated provisions in product design allowing frequent revisions of key pricing elements. In addition, there is diversity in our fee arrangements, as certain fees are primarily based on the benefit guarantee amount, the contractholder account value and/or premiums, which helps preserve certain revenue streams when market fluctuations cause account values to decline.

External Reinsurance

Effective April 1, 2015, we entered into an agreement with Union Hamilton Reinsurance, Ltd. ("Union Hamilton"), an external counterparty, to reinsure approximately 50% of the Highest Daily Lifetime Income ("HDI") v.3.0 business. HDI v.3.0 is the most current version of our "highest daily" living benefits guarantee that is available with our Prudential Premier® Retirement Variable Annuity. This reinsurance agreement covers most new HDI v.3.0 variable annuity business issued between April 1, 2015 and December 31, 2016 on a quota share basis, until Union Hamilton's quota share reaches \$5.0 billion of new rider premiums through December 31, 2016. From April 1, 2015 through September 30, 2016, approximately \$2.6 billion of new rider premiums were ceded to Union Hamilton under this agreement.

Asset Liability Management ("ALM") Strategy (including fixed income instruments and derivatives)

Under our historical hedging program to manage certain capital market risks associated with certain variable annuity living benefit guarantees, we utilized the U.S. GAAP valuation, and incorporated certain modifications, in order to derive a hedge target that was more reflective of our best estimate of future benefit payments, net of fees collected. Derivative positions were entered into that sought to offset the change in value of the hedge target.

During the third quarter of 2016, we implemented a new ALM strategy that utilizes a combination of both traditional fixed income instruments and derivatives to defray potential claims associated with our variable annuity living benefit

guarantees. Under the revised strategy, expected living benefit claims under less severe market conditions are managed through the accumulation of fixed income instruments and potential living benefit claims resulting from more severe market conditions are hedged using derivative instruments. We expect the revised strategy to result in more efficient management of our capital and liquidity associated with these products while continuing to mitigate fluctuations in net income due to capital markets movements.

Table of Contents

The change in hedge strategy had no impact on how we value or account for the living benefit guarantees under U.S. GAAP. However, under the new ALM strategy, beginning in the third quarter of 2016, adjusted operating income includes the fees earned that are in excess of the estimated portion of fees required to cover expected claims and hedge costs for the economic liability. The portion of fees required to cover such costs is updated quarterly to reflect updated estimates and actual experience. The effectiveness of our hedging program as measured by comparing the change in value of our hedging assets versus the liability we are attempting to hedge will ultimately be reflected in adjusted operating income over time through the inclusion of actual and expected hedge ineffectiveness which is updated periodically along with our expectation of claims. For adjusted operating income purposes, DAC and other costs are fully amortized over the life of the contracts in a pattern based on our estimate of gross profits under the adjusted operating income framework described above. We expect this strategy to result in a higher portion of fees being recognized in adjusted operating income than under our prior strategy.

The following table provides a reconciliation between the liability reported under U.S. GAAP and the economic liability we intend to manage through our ALM strategy.

	As of September 30, 2016 (in millions)
U.S. GAAP liability (including non-performance risk)	\$ 12,895
Non-performance risk adjustment	11,285
Subtotal	24,180
Adjustments including risk margins and valuation methodology differences	(7,979)
Economic liability managed by ALM strategy	\$ 16,201

As of September 30, 2016, we have sufficient fixed income instruments and derivative assets supporting the economic liability within the entities in which the risks reside.

Under the new ALM strategy, we expect differences in the U.S. GAAP net income impact between the changes in value of the fixed income instruments and derivatives as compared to the changes in the embedded derivative liability these assets support. These differences can be primarily attributed to three distinct areas:

Different valuation methodologies in measuring the liability we intend to cover with fixed income instruments and derivatives versus the liability reported under U.S. GAAP—The valuation methodology utilized in estimating the economic liability we intend to defray with fixed income instruments and derivatives is different from that required to be utilized to measure the liability under U.S. GAAP. The valuation of the economic liability excludes certain items that are included within the U.S. GAAP liability, such as non-performance risk (“NPR”) (in order to maximize protection irrespective of the possibility of our own default), as well as risk margins (required by U.S. GAAP but different from our best estimate).

Different accounting treatment between liabilities and assets supporting those liabilities—Under U.S. GAAP, changes in value of the embedded derivative liability and derivative instruments used to hedge a portion of the economic liability are immediately reflected in net income. In contrast, changes in fair value of fixed income instruments that support a portion of the economic liability are designated as available for sale and are not recorded in net income but rather are recorded as unrealized gains (losses) in other comprehensive income.

•

General hedge results—For the derivative portion of the ALM strategy, the net hedging impact (that is the extent to which the changes in value of the hedging instruments offset the change in value of the portion of the economic liability we are hedging) may be impacted by a number of factors including: cash flow timing differences between our hedging instruments and the corresponding portion of the economic liability we are hedging, basis differences attributable to actual underlying contractholder funds to be hedged versus hedgeable indices, rebalancing costs related to dynamic rebalancing of hedging instruments as markets move, certain elements of the economic liability that may not be hedged (certain actuarial assumptions), and implied and realized market volatility on the hedge positions relative to the portion of the economic liability we seek to hedge.

For the portion of our ALM strategy executed with derivatives, we enter into a range of exchange-traded, cleared and over-the-counter (“OTC”) equity and interest rate derivatives including, but not limited to: equity and treasury futures; total return and interest rate swaps; and options including equity options, swaptions, and floors and caps.

Table of Contents

The following table illustrates the net impact of changes in the U.S. GAAP embedded derivative liability and hedge positions, and the related amortization of DAC and other costs, for the periods indicated.

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
	2015	2016	2015	2016
	(1) (in millions)			
Excluding impact of assumption updates and other refinements:				
Net hedging impact(2)(3)	\$(160)	\$(350)	\$(511)	\$(349)
Change in portions of U.S. GAAP liability, before NPR(4)	385	(821)	(851)	(412)
Change in the NPR adjustment	(165)	2,555	3,052	3,215
Net impact from changes in the U.S. GAAP embedded derivative and hedge positions—reported in Individual Annuities	60	1,384	1,690	2,454
Related benefit (charge) to amortization of DAC and other costs	515	(546)	(205)	(928)
Net impact of assumption updates and other refinements	0	0	1,455	(34)
Net impact from changes in the U.S. GAAP embedded derivative and hedge positions, after the impact of NPR, DAC and other costs—reported in Individual Annuities(3)	\$575	\$838	\$2,940	\$1,492

(1) Positive amount represents income; negative amount represents a loss.

(2) Net hedging impact represents the difference between the change in fair value of the risk we seek to hedge using derivatives and the change in fair value of the derivatives utilized with respect to that risk.

Excludes \$(31) million and \$(759) million for the three months ended September 30, 2016 and 2015, respectively, and \$(1,523) million and \$(648) million for the nine months ended September 30, 2016 and 2015, respectively,

(3) representing the impact of managing interest rate risk through capital management strategies other than hedging of particular exposures. Because this decision was based on the capital considerations of the Company as a whole, the impact was reported in Corporate and Other operations. See “—Corporate and Other.”

Represents risk margins and valuation methodology differences between the economic liability managed by the

(4) ALM strategy and the U.S. GAAP liability, as well as the portion of the economic liability managed with fixed income instruments.

The net benefits of \$575 million and \$2,940 million for the three and nine months ended September 30, 2016, respectively, reflected changes in the NPR adjustment. For the three months ended September 30, 2016, equity market appreciation drove decreases in the base embedded derivative liability before NPR, which resulted in corresponding decreases in the NPR adjustment. Tightening of our credit spreads also contributed to the decrease in the NPR adjustment. For the nine months ended September 30, 2016, declining interest rates drove increases in the base embedded derivative liability before NPR, which resulted in corresponding increases in the NPR adjustment. Results for both periods also reflected net hedging impacts. The net hedging charge for the third quarter of 2016 was driven by unfavorable liability basis partially offset by fund outperformance relative to indices. Unfavorable liability basis drove a net hedging charge for the first nine months of 2016. Each of these items had corresponding partial offsets included in the related impacts to amortization of DAC and other costs for both periods. For the third quarter of 2016, amortization of DAC and other costs included a benefit of \$515 million related to changes in our estimate of total gross profits as a result of the implementation of the new ALM strategy described above. Results for both periods also reflected the changes in the portions of the U.S. GAAP liability, before NPR, net of related impacts to the amortization of DAC and other costs. The net benefit from the impact of assumption updates and other refinements of \$1,455 million for the nine months ended September 30, 2016 resulted from our annual review and update of assumptions, primarily driven by modifications to our actuarial assumptions and other refinements, including updates

to expected withdrawal rates, as well as economic assumptions.

Table of Contents

The net benefits of \$838 million and \$1,492 million for the three and nine months ended September 30, 2015, respectively, were primarily driven by changes in the NPR adjustment. Declining interest rates drove increases in the base embedded derivative liability before NPR, which resulted in corresponding increases in the NPR adjustment for both periods. Widening credit spreads also resulted in increases in the NPR adjustment. These impacts were partially offset by the net impacts of changes in the value of our historically defined hedge target, as discussed above, and related hedge positions. Fund underperformance relative to indices drove net hedging charges for both periods. The changes in the NPR adjustment and the net hedging impacts resulted in related impacts to the amortization of DAC and other costs in all periods. Results for both periods also reflected the changes in the portions of the U.S. GAAP liability that were excluded from the hedge target, net of related impacts to the amortization of DAC and other costs. The net charge from the impact of assumption updates and other refinements of \$34 million for the nine months ended September 30, 2015 resulted from our annual review and update of assumptions, primarily driven by modifications to our actuarial assumptions and other refinements.

For information regarding the Capital Protection Framework we use to evaluate and support the risks of the ALM strategy, see “—Liquidity and Capital Resources—Capital.”

Through March 31, 2016, we reinsured living benefit guarantees issued by our domestic statutory life insurance companies to a captive reinsurance company, Pruco Re, in order to facilitate the capital markets hedging program for these living benefit guarantees. Effective April 1, 2016, as part of the Variable Annuities Recapture, living benefit guarantees and certain retirement products were recaptured. The recapture transaction resulted in the transfer of these product risks to certain of our domestic statutory life insurance companies. The ALM strategy described above is executed within these domestic insurance companies. After the foregoing transactions, Pruco Re no longer had any material active reinsurance with affiliates. On September 30, 2016, Pruco Re was merged with and into PALAC.

Product Specific Risks and Risk Mitigants

For certain living benefits guarantees, claims will primarily represent the funding of contractholder lifetime withdrawals after the cumulative withdrawals have first exhausted the contractholder account value. Due to the age of the in force block, limited claim payments have occurred to date, and they are not expected to increase significantly within the next five years, based upon current assumptions. The timing and amount of future claims will depend on actual returns on contractholder account value and actual contractholder behavior relative to our assumptions. The majority of our current living benefits guarantees provide for guaranteed lifetime contractholder withdrawal payments inclusive of a “highest daily” contract value guarantee. Our PDI variable annuity complements our variable annuity products with the highest daily benefit and provides for guaranteed lifetime contractholder withdrawal payments, but restricts contractholder asset allocation to a single bond fund sub-account within the separate accounts.

The majority of our variable annuity contracts with living benefits guarantees, and all new contracts sold with our highest daily living benefits feature, include risk mitigants in the form of an automatic rebalancing feature and/or inclusion in the ALM strategy. As discussed above, we also utilize external reinsurance as a form of additional risk mitigation. The risks associated with the guaranteed benefits of certain legacy products that were sold prior to our implementation of the automatic rebalancing feature are also managed through our ALM strategy. Certain legacy GMAB products include the automatic rebalancing feature, but are not included in the ALM strategy. The PDI product and contracts with the GMIB feature have neither risk mitigant. Certain risks associated with PDI are managed through the limitation of contractholder asset allocations to a single bond fund sub-account.

For our GMDBs, we provide a benefit payable in the event of death. Our base GMDB is generally equal to a return of cumulative deposits adjusted for any partial withdrawals. Certain products include an optional enhanced GMDB based on the greater of a minimum return on the contract value or an enhanced value. We have retained the risk that the total amount of death benefit payable may be greater than the contractholder account value. However, a substantial portion

of the account values associated with GMDBs are subject to an automatic rebalancing feature because the contractholder also selected a living benefit guarantee which includes an automatic rebalancing feature. All of the variable annuity account values with living benefit guarantees also contain GMDBs. The living and death benefit features for these contracts cover the same insured life and, consequently, we have insured both the longevity and mortality risk on these contracts.

Table of Contents

The following table sets forth the risk management profile of our living benefit guarantees and GMDB features as of the periods indicated.

	September 30, 2016		December 31, 2015		September 30, 2015	
	Account Value	% of Total	Account Value	% of Total	Account Value	% of Total
	(in millions)					
Living benefit/GMDB features(1):						
Both ALM strategy and automatic rebalancing(2)	\$ 107,950	70 %	\$ 106,018	71 %	\$ 104,471	71 %
ALM strategy only	9,662	6 %	9,994	7 %	9,985	7 %
Automatic rebalancing only	1,225	1 %	1,393	1 %	1,455	1 %
External reinsurance(3)	2,629	1 %	1,513	1 %	1,011	1 %
PDI	7,845	5 %	4,664	3 %	4,149	3 %
Other Products	2,780	2 %	2,870	2 %	2,861	2 %
Total living benefit/GMDB features	\$ 132,091		\$ 126,452		\$ 123,932	
GMDB features and other(4)	22,812	15 %	22,989	15 %	22,753	15 %
Total variable annuity account value	\$ 154,903		\$ 149,441		\$ 146,685	

(1) All contracts with living benefit guarantees also contain GMDB features, covering the same insured contract.

(2) Contracts with living benefits that are included in our ALM strategy, and have an automatic rebalancing feature.

Represents contracts subject to reinsurance transaction with external counterparty covering new business for the (3) period April 1, 2015 through December 31, 2016. These contracts with living benefits also have an automatic rebalancing feature.

(4) Includes contracts that have a GMDB feature and do not have an automatic rebalancing feature.

The risk profile of our variable annuity account values as of the periods above reflect our product risk diversification strategy and the runoff of legacy products over time.

Retirement

Operating Results

The following table sets forth the Retirement segment's operating results for the periods indicated.

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
	2016	2015	2016	2015
	(in millions)			
Operating results:				
Revenues	\$ 5,134	\$ 1,937	\$ 9,268	\$ 7,595

Table of Contents

Our longevity reinsurance contracts are denominated in pounds sterling and are therefore subject to foreign currency exchange rate risk. Effective January 1, 2016, the financial results of our Retirement segment include the impact of an intercompany arrangement with our Corporate and Other operations pursuant to which certain of the segment's non-U.S. dollar-denominated earnings from longevity reinsurance contracts are translated at fixed currency exchange rates. These fixed rates are designed to mitigate the impact of exchange rate changes on the Retirement segment's U.S. dollar-equivalent earnings. Results of our Corporate and Other operations include any differences between the translation adjustments recorded by the segment at the fixed currency exchange rate versus the actual average rate during the period. The impact of this intercompany arrangement was immaterial to the operating results of the Retirement segment and our Corporate and Other operations for the three and nine months ended September 30, 2016.

Adjusted Operating Income

Three Month Comparison. Adjusted operating income decreased \$3 million, primarily driven by a lower contribution from reserve experience and higher general and administrative expenses, net of capitalization, partially offset by higher net investment spread results. The lower contribution from reserve experience reflected less favorable mortality for pension risk transfer contracts. Higher general and administrative expenses, net of capitalization, was primarily driven by increased legal costs. The increase in net investment spread results primarily reflected higher income on non-coupon investments and higher net prepayment fee income.

Nine Month Comparison. Adjusted operating income decreased \$69 million. Results for 2016 reflected a net benefit of \$6 million from our annual review and update of assumptions and other refinements, driven by favorable updates to actuarial assumptions, while results for 2015 reflected no net impact from our annual review and update of assumptions. Excluding this favorable comparative impact, adjusted operating income decreased \$75 million, primarily driven by a lower contribution from reserve experience, higher general and administrative expenses, net of capitalization, and lower fee income, partially offset by higher net investment spread results. The lower contribution from reserve experience primarily reflected less favorable mortality for pension risk transfer contracts. Higher general and administrative expenses, net of capitalization, was primarily driven by increased legal costs. The decrease in fee income primarily reflected lower margins on full service account values, partially offset by growth in account values. The increase in net investment spread results primarily reflected higher net prepayment fee income, growth in account values and the impact of crediting rate reductions on full service general account stable value account values. These increases were partially offset by lower reinvestment rates and lower income on non-coupon investments.

Revenues, Benefits and Expenses

Three Month Comparison. Revenues, as shown in the table above under “—Operating Results,” increased \$3,197 million. Premiums increased \$3,092 million, primarily driven by pension risk transfer transactions during the current period. This increase in premiums resulted in a corresponding increase in policyholders' benefits, as discussed in benefits and expenses below. Net investment income increased \$85 million, primarily reflecting higher prepayment fee income, higher income on non-coupon investments and growth in full service account values, partially offset by lower reinvestment rates.

Benefits and expenses, as shown in the table above under “—Operating Results,” increased \$3,200 million. Policyholders' benefits, including the change in policy reserves, increased \$3,143 million, primarily related to the increase in premiums discussed above. General and administrative expenses, net of capitalization, increased \$34 million, primarily driven by increased legal costs. Interest credited to policyholders' account balances increased \$24 million, primarily driven by higher prepayment fee income credited to experienced rated account balances and growth in full service account values, partially offset by the impact of crediting rate reductions on full service general account stable value account values.

Nine Month Comparison. Revenues increased \$1,673 million. Premiums increased \$1,613 million, primarily driven by pension risk transfer transactions. This increase in premiums resulted in a corresponding increase in policyholders' benefits, as discussed in benefits and expenses below. Net investment income increased \$66 million, primarily reflecting growth in account values and higher prepayment fee income, partially offset by lower reinvestment rates and lower income on non-coupon investments.

Benefits and expenses increased \$1,742 million. Excluding the impact of our annual review and update of assumptions, as discussed above, benefits and expenses increased \$1,748 million. Policyholders' benefits, including the change in policy reserves, increased \$1,731 million, primarily related to the increase in premiums discussed above. General and administrative expenses, net of capitalization, increased \$23 million, primarily driven by increased legal costs.

Table of Contents

Account Values

Account values are a significant driver of our operating results, and are primarily driven by net additions (withdrawals) and the impact of market changes. The income we earn on our fee-based products varies with the level of fee-based account values, since many policy fees are determined by these values. The investment income and interest we credit to policyholders on our spread-based products varies with the level of general account values. To a lesser extent, changes in account values impact our general and administrative expenses and pattern of amortization of DAC and VOBA. The following table shows the changes in the account values and net additions (withdrawals) of Retirement segment products for the periods indicated. Net additions (withdrawals) are plan sales and participant deposits or additions, as applicable, minus plan and participant withdrawals and benefits. Account values include both internally- and externally-managed client balances as the total balances drive revenue for the Retirement segment. For more information on internally-managed balances, see “—Asset Management.”

Beginning total account value	\$ 180,882	\$ 183,798	\$ 179,964	\$ 179,641	\$ 181,662
Additions(1)	6,907	2,031	12,389	12,147	15,814
Withdrawals and benefits	(2,339)	(3,940)	(8,241)	(11,243)	(12,386)
Change in market value, interest credited and interest income	1,953	1,106	6,204	2,818	6,862
Other(2)	(1,179)	(1,333)	(4,092)	(1,701)	(5,728)
Ending total account value	\$ 186,224	\$ 181,662	\$ 186,224	\$ 181,662	\$ 186,224
Net additions (withdrawals)	\$ 4,568	\$ (1,909)	\$ 4,148	\$ 904	\$ 3,428

Additions primarily include: group annuities calculated based on premiums received; longevity reinsurance

(1) contracts calculated as the present value of future projected benefits; and investment-only stable value contracts calculated as the fair value of customers' funds held in a client-owned trust.

“Other” activity includes the effect of foreign exchange rate changes associated with our United Kingdom longevity reinsurance business, net presentation of \$1,352 million in receipts offset by \$802 million in payments related to (2) funding agreements backed commercial paper which typically have maturities of less than 90 days, and changes in asset balances for externally-managed accounts.

The increase in full service account values for the twelve months ended September 30, 2016, primarily reflected the favorable changes in the market value of customer funds. The decrease in net additions for the three months ended September 30, 2016, compared to the prior year period, was primarily driven by lower plan sales, partially offset by

lower plan lapses. The decrease in net additions for the nine months ended September 30, 2016, compared to the prior year period, was primarily driven by lower plan sales. This decrease was partially offset by lower plan lapses, as well as net participant deposits in the current year period compared to net participant withdrawals in the prior year period.

Table of Contents

The increase in institutional investment products account values for the twelve months ended September 30, 2016, primarily reflected net additions resulting from significant pension risk transfer transactions, investment-only stable value accounts and funding agreement issuances. Also contributing to higher account values were increases in the market value of customer funds driven by the impact of lower interest rates, partially offset by an unfavorable impact from foreign currency fluctuations on longevity reinsurance account values. The increase in net additions for the three months ended September 30, 2016, compared to the prior year period, was primarily driven by net additions from significant pension risk transfer transactions in the current year period and investment-only stable value accounts. The increase in net additions for the nine months ended September 30, 2016, compared to the prior year period, was primarily driven by net additions in investment-only stable value accounts in the current year period compared to net withdrawals in the prior year period, partially offset by less additions related to pension risk transfer transactions in the current year period as compared to the prior year period.

Asset Management

Operating Results

The following table sets forth the Asset Management segment's operating results for the periods indicated.

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
	2015	2016	2015	2016
	(in millions)			
Operating results:				
Revenues	\$750	\$704	\$2,188	\$2,213
Expenses	559	524	1,625	1,632
Adjusted operating income	191	180	563	581
Realized investment gains (losses), net, and related adjustments	(5)	(43)	2	(46)
Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests	3	(1)	39	53
Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures	\$189	\$136	\$604	\$588

Effective January 1, 2016, the financial results of our Asset Management segment include the impact of an intercompany arrangement with Corporate and Other operations pursuant to which certain of the segment's non-U.S. dollar-denominated earnings are translated at fixed currency exchange rates. The fixed rates are designed to mitigate the impact of exchange rate changes on the segment's U.S. dollar-equivalent earnings. The impact of this intercompany arrangement was immaterial to the operating results of the Asset Management segment and our Corporate and Other operations for the three and nine months ended September 30, 2016.

Adjusted Operating Income

Three Month Comparison. Adjusted operating income increased \$11 million. The increase primarily reflected higher asset management fees, net of expenses, driven by an increase in average fixed income assets under management as a result of strong inflows and market appreciation, as well as from a fee rate modification within certain real estate funds. Also contributing to the increase were higher strategic investing results driven by favorable market performance and higher commercial mortgage results, partially offset by lower equity fund-related incentive fees, net

of expenses.

Nine Month Comparison. Adjusted operating income decreased \$18 million. The decrease primarily reflected lower other related revenues, net of associated expenses, driven by lower equity fund-related incentive fees, net of expenses. The decrease was partially offset by higher asset management fees, net of expenses, from an increase in average fixed income assets under management as a result of strong inflows and market appreciation as well as from a fee rate modification within certain real estate funds that occurred in the third quarter of 2016, partially offset by a decline in average equity assets under management as a result of net outflows.

Revenues and Expenses

The following table sets forth the Asset Management segment's revenues, presented on a basis consistent with the table above under "—Operating Results," by type.

122

Table of Contents

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
	2016	2015	2016	2015
	(in millions)			
Revenues by type:				
Asset management fees by source:				
Institutional customers	\$273	\$234	\$771	\$692
Retail customers(1)	182	191	524	577
General account	122	111	353	337
Total asset management fees	577	536	1,648	1,606
Other related revenues by source:				
Incentive fees	10	24	75	71
Transaction fees	5	5	16	15
Strategic investing	10	1	29	24
Commercial mortgage(2)	27	19	70	63
Total other related revenues(3)	52	49	190	173
Service, distribution and other revenues(4)	121	119	350	434
Total revenues	\$750	\$704	\$2,188	\$2,213

(1) Consists of fees from: individual mutual funds and variable annuities and variable life insurance separate account assets; funds invested in proprietary mutual funds through our defined contribution plan products; and third-party sub-advisory relationships. Revenues from fixed annuities and the fixed-rate accounts of variable annuities and variable life insurance are included in the general account.

(2) Includes mortgage origination and spread lending revenues from our commercial mortgage origination and servicing business.

(3) Future revenues will be impacted by the level and diversification of our strategic investments, the commercial real estate market, and other domestic and international markets.

(4) Includes payments from Wells Fargo under an agreement dated as of July 30, 2004, implementing arrangements with respect to money market mutual funds in connection with the combination of our retail securities brokerage and clearing operations with those of Wells Fargo. The agreement extends for ten years after termination of the

(4) Wachovia Securities joint venture, which occurred on December 31, 2009. The revenue from Wells Fargo under this agreement was \$21 million and \$20 million for the three months ended September 30, 2016 and 2015, respectively, and \$62 million and \$58 million for the nine months ended September 30, 2016 and 2015, respectively.

Three Month Comparison. Revenues, as shown in the table above, under “—Operating Results,” increased \$46 million. Total asset management fees increased \$41 million, primarily as a result of strong inflows and market appreciation within fixed income as well as from a fee rate modification within certain real estate funds. Other related revenues increased \$3 million, primarily due to higher strategic investing results driven by favorable market performance and higher commercial mortgage results, partially offset by lower equity fund-related incentive fees.

Expenses, as shown in the table above under “—Operating Results,” increased \$35 million, primarily due to higher compensation related to favorable fixed income results.

Nine Month Comparison. Revenues decreased \$25 million. Service, distribution and other revenues decreased \$84 million reflecting lower service and other fees as well as the deconsolidation of certain collateralized loan obligations.

Partially offsetting these decreases was a \$42 million increase in asset management fees, primarily as a result of strong inflows and market appreciation within fixed income as well as a fee rate modification within certain real estate funds in the third quarter of 2016, and a \$7 million increase primarily from higher commercial mortgage results.

Expenses decreased \$7 million, reflecting the deconsolidation of certain funds, as discussed above, partially offset by higher compensation related to favorable fixed income results as well as higher performance-based incentive fees (included in noncontrolling interest).

Assets Under Management

The following table sets forth assets under management by asset class and source as of the dates indicated.

Table of Contents

	September 30, 2016	December 31, 2015	September 30, 2015
	(in billions)		
Assets Under Management (at fair market value):

Individual Life

Operating Results

The following table sets forth the Individual Life segment's operating results for the periods indicated.

	Three Months Ended September 30, 2016 2015 (in millions)		Nine Months Ended September 30, 2016 2015	
Operating results:				
Revenues	\$1,410	\$1,375	\$3,931	\$3,886
Benefits and expenses	1,299	1,192	3,990	3,350
Adjusted operating income	111	183	(59)	536
Realized investment gains (losses), net, and related adjustments	91	289	670	154
Related charges	(22)	(151)	(426)	(55)
Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures	\$180	\$321	\$185	\$635

Adjusted Operating Income

Three Month Comparison. Adjusted operating income decreased \$72 million, primarily reflecting less favorable mortality experience, net of reinsurance, the impact of unfavorable reserve refinements and higher general and administrative expenses primarily driven by increased legal costs, partially offset by a higher contribution from investment results.

Table of Contents

Nine Month Comparison. Adjusted operating income decreased \$595 million, primarily reflecting unfavorable comparative net impacts from our annual reviews and update of assumptions and other refinements. Results for 2016 included a \$420 million net charge from these impacts, mainly driven by a charge to accrue a liability to offset the present value of losses expected to be recognized in later years (“Profits Followed by Losses” liability, see “—Accounting Policies & Pronouncements—Policyholder Liabilities”) and a charge related to an out of period adjustment (see Note 1 to the Unaudited Interim Consolidated Financial Statements). Partially offsetting these charges was a net benefit from the impacts of other refinements. Results for 2015 included a \$68 million net benefit from our annual review and update of assumptions and other refinements, mainly driven by net favorable modifications to our economic and actuarial assumptions. Excluding these impacts, adjusted operating income decreased \$107 million, primarily driven by less favorable mortality experience, net of reinsurance, and higher general and administrative expenses primarily driven by business growth and increased legal costs, partially offset by a higher contribution from investment results.

Revenues, Benefits and Expenses

Three Month Comparison. Revenues, as shown in the table above under “—Operating Results,” increased \$35 million. This increase was primarily driven by a \$33 million increase in net investment income primarily reflecting higher invested assets resulting from continued business growth and higher income on non-coupon investments.

Benefits and expenses, as shown in the table above under “—Operating Results,” increased \$107 million. Policyholders’ benefits and interest credited to account balances increased \$100 million primarily reflecting universal life business growth and less favorable mortality experience. General and administrative expenses increased \$16 million primarily driven by increased legal costs. The amortization of DAC decreased \$15 million, including the impact of changes in the estimated profitability of the business due to market performance and other experience relative to our assumptions.

Nine Month Comparison. Revenues increased \$45 million. Excluding the impact of our annual reviews and update of assumptions and other refinements, as discussed above, revenues increased \$122 million. Net investment income increased \$102 million primarily reflecting higher invested assets resulting from continued business growth and higher prepayment fee income. Policy charges and fee income, asset management and service fees and other income increased \$58 million primarily driven by growth in our universal life business, as well as an increase in the amortization of unearned revenue reserves, driven by the impact of changes in the estimated profitability of the business due to market performance and other experience relative to our assumptions. Partially offsetting these increases was a \$38 million decrease in premiums, primarily driven by higher ceded reinsurance premiums which were mostly offset by reserve changes in Policyholders’ benefits.

Benefits and expenses increased \$640 million. Excluding the impact of our annual reviews and update of assumptions and other refinements, as discussed above, benefits and expenses increased \$229 million. Policyholders’ benefits and interest credited to account balances increased \$180 million primarily reflecting universal life business growth and less favorable mortality experience, partially offset by reserve changes for ceded reinsurance premiums discussed above. General and administrative expenses increased \$22 million primarily driven by business growth and increased legal costs, partially offset by the absence of costs associated with the Hartford Life Business. Interest expense increased \$21 million related to higher reserve financing costs.

Table of Contents

Sales Results

The following table sets forth individual life insurance annualized new business premiums, as defined under “—Consolidated Results of Operations—Segment Measures” above, by distribution channel and product, for the periods indicated.

	Three Months Ended September 30, 2016			Three Months Ended September 30, 2015		
	Prudential Advisors	Financial Partners	Total	Prudential Advisors	Financial Partners	Total
	(in millions)					
Term Life	\$8	\$44	\$52	\$8	\$43	\$51
Guaranteed Universal Life(1)	6	48	54	8	51	59
Other Universal Life(1)	8	13	21	8	15	23
Variable Life	6	10	16	6	19	25
Total	\$28	\$115	\$143	\$30	\$128	\$158

	Nine Months Ended September 30, 2016			Nine Months Ended September 30, 2015		
	Prudential Advisors	Financial Partners	Total	Prudential Advisors	Financial Partners	Total
	(in millions)					
Term Life	\$24	\$126	\$150	\$24	\$128	\$152
Guaranteed Universal Life(1)	19	147	166	23	124	147
Other Universal Life(1)	25	39	64	19	38	57
Variable Life	19	48	67	16	40	56
Total	\$87	\$360	\$447	\$82	\$330	\$412

Single pay life annualized new business premiums, which include 10% of excess (unscheduled) premiums, represented approximately 10% and 17% of Guaranteed Universal Life and 2% and 7% of Other Universal Life (1) annualized new business premiums for the three months ended September 30, 2016 and 2015, respectively, and approximately 11% and 18% of Guaranteed Universal Life and 4% and 9% of Other Universal Life annualized new business premiums for the nine months ended September 30, 2016 and 2015, respectively.

Annualized new business premiums for the three months ended September 30, 2016 decreased \$15 million compared to the prior year period, primarily driven by lower private placement sales in variable life and lower universal life sales from the continued impact of pricing actions in early 2016. Annualized new business premiums for the nine months ended September 30, 2016, increased \$35 million compared to the prior year period, primarily driven by the continued impact of product enhancements in both universal and variable life as well as continued distribution execution.

Table of Contents

Group Insurance

Operating Results

The following table sets forth the Group Insurance segment's operating results and benefits and administrative operating expense ratios for the periods indicated.

	Three Months Ended September 30, 2016		2015		Nine Months Ended September 30, 2016		2015	
	(in millions)							
Operating results:								
Revenues	\$1,333	\$1,294	\$4,017	\$3,862				
Benefits and expenses	1,271	1,250	3,840	3,713				
Adjusted operating income	62	44	177	149				
Realized investment gains (losses), net, and related adjustments	(5)	(6)	9	2				
Related charges	0	(1)	(6)	(2)				
Income from continuing operations before income taxes and equity in earnings of operating joint ventures	\$57	\$37	\$180	\$149				
Benefits ratio(1):								
Group life(2)	88.6	% 88.6	% 89.6	% 89.2	%			
Group disability(2)	80.4	% 81.8	% 70.3	% 72.5	%			
Total group insurance(2)	87.1	% 87.4	% 86.3	% 86.5	%			
Administrative operating expense ratio(3):								
Group life	10.6	% 10.8	% 10.6	% 10.7	%			
Group disability	31.4	% 32.7	% 31.5	% 33.2	%			

(1) Ratio of policyholder benefits to earned premiums plus policy charges and fee income.

Benefits ratios for the nine months ended September 30, 2016, reflect the impacts of our annual reviews and updates of assumptions and other refinements. Excluding these impacts, the group life, group disability and total group insurance benefits ratios were 88.9%, 80.0% and 87.3% for the nine months ended September 30, 2016, respectively, and 89.9%, 77.2% and 87.8% for the nine months ended September 30, 2015, respectively.

(2) Ratio of general and administrative expenses (excluding commissions) to gross premiums plus policy charges and fee income.

Adjusted Operating Income

Three Month Comparison. Adjusted operating income increased \$18 million, primarily reflecting a larger contribution from net investment spread results, driven by higher returns on non-coupon investments, and favorable underwriting results in our group life business. The underwriting results in our group life business reflect more favorable claim experience in non-experience-rated contracts, while the underwriting results in our group disability business remained flat in comparison to the third quarter of 2015.

Nine Month Comparison. Adjusted operating income increased \$28 million, reflecting favorable comparative net impacts from our annual reviews and update of assumptions and other refinements. Results for the second quarter of 2016 included a \$41 million net benefit from these updates while results for the second quarter of 2015 included a \$28 million net benefit. The net benefit in 2016 was primarily driven by favorable experience related to our group disability business. Excluding the effect of these items, adjusted operating income increased \$15 million, primarily reflecting more favorable underwriting results in our group life business, partially offset by less favorable

underwriting results in our group disability business and higher net expenses. The underwriting results in our group life business reflect a favorable impact from a reserve refinement and more favorable experience. The underwriting results in our group disability business reflect the impact of lower claim resolutions on long-term contracts and higher benefits resulting from other claims-related charges, partially offset by the impact of fewer new claims and increased new business.

Revenues, Benefits and Expenses

Three Month Comparison. Revenues, as shown in the table above under “—Operating Results,” increased \$39 million. The increase reflected \$29 million of higher premiums and policy charges and fee income, primarily driven by higher premiums on existing experience-rated contracts in our group life business.

Table of Contents

Benefits and expenses, as shown in the table above under “—Operating Results,” increased \$21 million. This increase reflected higher policyholder benefits and changes in reserves, primarily driven by higher benefits on existing experience-rated contracts in our group life business.

Nine Month Comparison. Revenues increased \$155 million. Excluding a favorable comparative impact of \$42 million resulting from our annual reviews and update of assumptions and other refinements, as discussed above, revenues increased \$113 million. The increase reflected \$112 million of higher premiums and policy charges and fee income primarily driven by the increase in new business in both our group life and group disability businesses, as well as from higher premiums on existing experience-rated contracts in our group life business.

Benefits and expenses increased \$127 million. Excluding an unfavorable comparative impact of \$29 million resulting from our annual reviews and update of assumptions and other refinements, as discussed above, benefits and expenses increased \$98 million. Policyholders’ benefits, including the change in reserves, increased \$84 million, driven by the impact of new business for both our group life and group disability businesses, the impact of lower claim resolutions on long-term contracts in our group disability business, and higher benefits on existing experience-rated contracts in our group life business, partially offset by fewer new claims for long-term contracts.

Sales Results

The following table sets forth the Group Insurance segment’s annualized new business premiums, as defined under “—Segment Measures” above, for the periods indicated.

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
Annualized new business premiums(1):				
Group life	\$29	\$38	\$285	\$179
Group disability	13	19	113	64
Total	\$42	\$57	\$398	\$243

Amounts exclude new premiums resulting from rate changes on existing policies, from additional coverage under (1) our Servicemembers’ Group Life Insurance contract and from excess premiums on group universal life insurance that build cash value but do not purchase face amounts.

Total annualized new business premiums for the three months ended September 30, 2016, decreased \$15 million compared to the three months ended September 30, 2015, primarily driven by large case sales in the third quarter of 2015. Total annualized new business premiums for the nine months ended September 30, 2016, increased \$155 million compared to the nine months ended September 30, 2015, primarily driven by sales to new and existing clients in both our group life and group disability businesses.

International Insurance Division

Foreign Currency Exchange Rate Movements and Related Hedging Strategies

As a U.S.-based company with significant business operations outside the U.S., particularly in Japan, we are subject to foreign currency exchange rate movements that could impact our U.S. dollar-equivalent shareholder return on equity. We seek to mitigate this impact through various hedging strategies, including the use of derivative contracts and by holding U.S. dollar-denominated assets in certain of our foreign subsidiaries.

The operations of our International Insurance division are subject to currency fluctuations that can materially affect our U.S. dollar-equivalent earnings from period to period, even if earnings on a local currency basis are relatively constant. We enter into forward currency derivative contracts as part of our strategy to effectively fix the currency exchange rates for a portion of our prospective non-U.S. dollar-denominated earnings streams, thereby reducing earnings volatility from foreign currency exchange rate movements. The foreign currency income hedging program is primarily associated with our insurance operations in Japan and Korea.

Table of Contents

Separately, our Japanese insurance operations offer a variety of non-yen denominated products, primarily comprised of U.S. and Australian dollar-denominated products that are supported by investments in corresponding currencies. While these non-yen denominated assets and liabilities are economically matched, differences in the accounting for changes in the value of these assets and liabilities due to changes in foreign currency exchange rate movements have historically resulted in volatility in reported U.S. GAAP earnings. As a result of continued growth in these portfolios, we implemented a structure in Gibraltar Life in the first quarter of 2015 that disaggregated the U.S. and Australian dollar-denominated businesses into separate divisions, each with its own functional currency that aligns with the underlying products and investments.

For further information on the hedging strategies used to mitigate the risks of foreign currency exchange rate movements on earnings as well as the U.S. GAAP earnings impact from products denominated in non-local currencies, see “—Impact of foreign currency exchange rate movements on earnings.”

We utilize a yen hedging strategy that calibrates the hedge level to preserve the relative contribution of our yen-based business to the Company’s overall return on equity on a leverage neutral basis. We implement this hedging strategy utilizing a variety of instruments, including foreign currency derivative contracts, as discussed above, as well as U.S. dollar-denominated assets and, to a lesser extent, “dual currency” and “synthetic dual currency” assets held locally in our Japanese insurance subsidiaries. We may also hedge using instruments held in our U.S. domiciled entities, such as U.S. dollar-denominated debt that has been swapped to yen. The total hedge level may vary based on our periodic assessment of the relative contribution of our yen-based business to the Company’s overall return on equity.

The table below presents the aggregate amount of instruments that serve to hedge the impact of foreign currency exchange movements on our U.S. dollar-equivalent shareholder return on equity from our Japanese insurance subsidiaries for the periods indicated.

	September 30, 2016	December 31, 2015
	(in billions)	
Instruments hedging foreign currency exchange rate exposure on U.S. dollar-equivalent earnings:		
Forward currency hedging program(1)	\$ 1.6	\$ 1.9
Instruments hedging foreign currency exchange rate exposure on U.S. dollar-equivalent equity:		
U.S. dollar-denominated assets held in yen-based entities(2):		
Available-for-sale U.S. dollar-denominated investments, at amortized cost	12.6	13.0
Other	0.2	0.1
Subtotal	12.8	13.1
Dual currency and synthetic dual currency investments(3)	0.8	0.8
Total instruments hedging foreign currency exchange rate exposure on U.S. dollar-equivalent equity	13.6	13.9
Total hedges	\$ 15.2	\$ 15.8

(1) Represents the notional amount of forward currency contracts outstanding.

Excludes \$35.1 billion and \$30.5 billion as of September 30, 2016 and December 31, 2015, respectively, of U.S.

(2) dollar assets supporting U.S. dollar liabilities related to U.S. dollar-denominated products issued by our Japanese insurance operations.

Dual currency and synthetic dual currency investments are held by our yen-based entities in the form of fixed

(3) maturities and loans with a yen-denominated principal component and U.S. dollar-denominated interest income.

The amounts shown represent the present value of future U.S. dollar cash flows.

Table of Contents

Impact of foreign currency exchange rate movements on earnings

Foreign currency income hedging program

The financial results of our International Insurance segment reflect the impact of an intercompany arrangement with Corporate and Other operations pursuant to which certain of the segment's non-U.S. dollar-denominated earnings are translated at fixed currency exchange rates. The fixed rates are determined in connection with a foreign currency income hedging program designed to mitigate the impact of exchange rate changes on the segment's U.S. dollar-equivalent earnings. Pursuant to this program, Corporate and Other operations execute forward currency contracts with third parties to sell the net exposure of projected earnings for certain currencies in exchange for U.S. dollars at specified exchange rates. The maturities of these contracts correspond with the future periods (typically on a three-year rolling basis) in which the identified non-U.S. dollar-denominated earnings are expected to be generated. In establishing the level of non-U.S. dollar-denominated earnings that will be hedged through this program, we exclude the anticipated level of U.S. dollar-denominated earnings that will be generated by dual currency and synthetic dual currency investments, as well as the anticipated level of non-yen denominated earnings that will be generated by non-yen denominated products and investments. For the nine months ended September 30, 2016, approximately 31% of the segment's earnings were yen-based and, as of September 30, 2016, we have hedged 100% of expected yen-based earnings for 2016 and 100%, 61% and 18% of expected yen-based earnings for 2017, 2018 and 2019, respectively. To the extent currently unhedged, our International Insurance segment's future expected U.S. dollar-equivalent earnings will be impacted by yen exchange rate movements.

As a result of this intercompany arrangement, our International Insurance segment's results for 2016 and 2015 reflect the impact of translating yen-denominated earnings at fixed currency exchange rates of 106 and 91 yen per U.S. dollar, respectively, and Korean won-denominated earnings at fixed currency exchange rates of 1100 and 1120 Korean won per U.S. dollar, respectively. We expect our 2017 results to reflect the impact of translating yen-denominated earnings at a fixed currency exchange rate of 112 yen per U.S. dollar and Korean won-denominated earnings at a fixed currency exchange rate of 1130 won per U.S. dollar. Since determination of the fixed currency exchange rates for each respective year is impacted by changes in foreign currency exchange rates over time, the segment's future earnings will ultimately be impacted by these changes in exchange rates.

Results of Corporate and Other operations include any differences between the translation adjustments recorded by the segment at the fixed currency exchange rate versus the actual average rate during the period, and the gains or losses recorded from the forward currency contracts that settled during the period, which include the impact of any over or under hedging of actual earnings that differ from projected earnings. Results of Corporate and Other operations also include any differences between the translation adjustments recorded by the segment at the fixed currency exchange rate versus the actual average rate during the period related to currencies for which we choose not to hedge our exposure. The table below presents, for the periods indicated, the increase (decrease) to revenues and adjusted operating income for the International Insurance segment and for Corporate and Other operations, reflecting the impact of this intercompany arrangement.

	Three Months Ended September 30, 2016	Three Months Ended September 30, 2015	Nine Months Ended September 30, 2016	Nine Months Ended September 30, 2015
International Insurance Segment:				
Impact of intercompany arrangement(1)	\$(12)	\$88	\$23	\$253

Corporate and Other operations:

Impact of intercompany arrangement(1)	12	(88)	(23)	(253)
Settlement gains (losses) on forward currency contracts	(11)	74	32	235
Net benefit (detriment) to Corporate and Other operations	1	(14)	9	(18)
Net impact on consolidated revenues and adjusted operating income	\$(11)	\$74	\$32	\$235

 Represents the difference between non-U.S. dollar-denominated earnings translated on the basis of actual weighted (1) average monthly currency exchange rates versus fixed currency exchange rates determined in connection with the foreign currency income hedging program.

The notional amount of these forward currency contracts was \$2.1 billion and \$2.4 billion as of September 30, 2016 and December 31, 2015, respectively, of which \$1.6 billion and \$1.9 billion, respectively, were related to our Japanese insurance operations.

Table of Contents

U.S. GAAP earnings impact of products denominated in non-local currencies

Our international insurance operations primarily offer products denominated in local currency; however, several of our international insurance operations also offer products denominated in non-local currencies, most notably our Japanese operations, which offer U.S. and Australian dollar-denominated products. The non-local currency denominated insurance liabilities related to these products are supported by investments denominated in corresponding currencies, including a significant portion designated as available-for-sale. While the impact from foreign currency exchange rate movements on these non-local currency denominated assets and liabilities is economically matched, differences in the accounting for changes in the value of these assets and liabilities due to changes in foreign currency exchange rate movements have historically resulted in volatility in U.S. GAAP earnings.

As discussed above, we have implemented a structure in Gibraltar Life that disaggregated the U.S. and Australian dollar-denominated businesses into separate divisions, each with its own functional currency that aligns with the underlying products and investments. For the U.S. and Australian dollar-denominated assets that were transferred under this structure, the net cumulative unrealized investment gains associated with foreign exchange remeasurement that were recorded in “Accumulated other comprehensive income (loss)” (“AOCI”) totaled \$5.1 billion as of December 31, 2015, and will be recognized in earnings within “Realized investment gains (losses), net” over time as these assets mature or are sold. Absent the sale of any of these assets prior to their stated maturity, approximately 1% of the \$5.1 billion balance will be recognized throughout the remainder of 2016 and approximately 8% will be recognized in 2017, with the remainder primarily recognized over the following ten years. As of September 30, 2016, the remaining net cumulative unrealized investment gains balance related to these assets was \$4.5 billion.

International Insurance

Operating Results

The results of our International Insurance operations are translated on the basis of weighted average monthly exchange rates, inclusive of the effects of the intercompany arrangement discussed above. To provide a better understanding of operating performance within the International Insurance segment, where indicated below, we have analyzed our results of operations excluding the effect of the year over year change in foreign currency exchange rates. Our results of operations, excluding the effect of foreign currency fluctuations, were derived by translating foreign currencies to U.S. dollars at uniform exchange rates for all periods presented, including for constant dollar information discussed below. The exchange rates used were Japanese yen at a rate of 106 yen per U.S. dollar and Korean won at a rate of 1100 won per U.S. dollar, both of which were determined in connection with the foreign currency income hedging program discussed above. In addition, for constant dollar information discussed below, activity denominated in U.S. dollars is generally reported based on the amounts as transacted in U.S. dollars. Annualized new business premiums presented on a constant exchange rate basis in the “Sales Results” section below reflect translation based on these same uniform exchange rates.

The following table sets forth the International Insurance segment’s operating results for the periods indicated.

⁽¹⁾ Includes gains (losses) from changes in value of certain assets and liabilities relating to foreign currency exchange movements that are economically matched.

Adjusted Operating Income

Three Month Comparison. Adjusted operating income from our Life Planner operations decreased \$7 million, including a net unfavorable impact of \$23 million from currency fluctuations, inclusive of the currency hedging program discussed above. Excluding the impact of currency fluctuations, adjusted operating income increased \$16 million, primarily reflecting the growth of business in force and continued strong persistency in Japan and Brazil, and a larger contribution from net investment results primarily from higher income on non-coupon investments. These favorable impacts were partially offset by less favorable comparative mortality experience and higher expenses, including those supporting business growth.

Adjusted operating income from our Gibraltar Life and Other operations decreased \$25 million including a net unfavorable impact of \$30 million from currency fluctuations, inclusive of the currency hedging program discussed above. Excluding the impact of currency fluctuations, adjusted operating income increased \$5 million, primarily reflecting the growth of business in force, including contributions from the Company's recent indirect investment in AFP Habitat in Chile, and more favorable mortality experience, partially offset by higher net expenses and lower net investment spread results.

Nine Month Comparison. Adjusted operating income from our Life Planner operations decreased \$74 million, including a net unfavorable impact of \$75 million from currency fluctuations. Both periods also include the impact of our annual reviews and updates of assumptions and other refinements, which resulted in a \$38 million net charge in the second quarter of 2016, including unfavorable economic assumption updates driven by lower interest rates in Japan and Korea, compared to an \$11 million net charge in the second quarter of 2015. Excluding the effect of these items, adjusted operating income increased \$28 million, primarily reflecting the growth of business in force and continued strong persistency in Japan, and a larger contribution from net investment results primarily from higher income on non-coupon investments. These favorable impacts were partially offset by higher expenses, including those supporting business growth, and less favorable comparative mortality experience.

Table of Contents

Adjusted operating income from our Gibraltar Life and Other operations decreased \$52 million including a net unfavorable impact of \$94 million from currency fluctuations. Both periods also include the impact of our annual reviews and updates of assumptions and other refinements, which resulted in a \$34 million net charge in the second quarter of 2016, including unfavorable economic assumption updates driven by lower interest rates in Japan, compared to a \$10 million net charge in the second quarter of 2015. Excluding the effect of these items, adjusted operating income from our Gibraltar Life and Other operations increased \$66 million as the growth of business in force, including contributions from the Company's recent indirect investment in AFP Habitat in Chile, more favorable comparative mortality experience and lower net expenses, including a gain on the sale of a home office property in Japan, were partially offset by a lower contribution from net investment spreads, primarily from lower income on non-coupon investments.

Revenues, Benefits and Expenses

Three Month Comparison. Revenues from our Life Planner operations increased \$283 million including a net favorable impact of \$183 million from currency fluctuations. Excluding the impact of currency fluctuations, revenues increased \$100 million. This increase was primarily driven by higher premiums and policy charges and fee income of \$54 million related to the growth of business in force, as discussed above. Net investment income increased \$47 million primarily reflecting investment portfolio growth related to the growth of business in force, partially offset by the impact of lower reinvestment rates.

Benefits and expenses of our Life Planner operations increased \$290 million including a net unfavorable impact of \$206 million from currency fluctuations. Excluding the impact of currency fluctuations, benefits and expenses increased \$84 million. Policyholder benefits, including changes in reserves, increased \$51 million primarily driven by business growth. General and administrative expenses, net of capitalization, increased \$36 million primarily due to higher costs, including those supporting business growth.

Revenues from our Gibraltar Life and Other operations increased \$351 million including a net favorable impact of \$194 million from currency fluctuations. Excluding the impact of currency fluctuations, revenues for Gibraltar Life increased \$157 million. This increase was primarily driven by higher premiums and policy charges and fee income of \$95 million related to the growth of business in force. Net investment income increased \$26 million primarily reflecting investment portfolio growth related to the growth of business in force, partially offset by lower investment spread income.

Benefits and expenses of our Gibraltar Life and Other operations increased \$376 million including a net unfavorable impact of \$224 million from currency fluctuations. Excluding the impact of currency fluctuations, benefits and expenses increased \$152 million driven by an increase of \$119 million in policyholder benefits, including changes in reserves, related to the growth of business in force, and an increase of \$23 million in general and administrative expenses, net of capitalization, due to higher costs, including those supporting business growth.

Nine Month Comparison. Revenues from our Life Planner operations increased \$586 million including a net favorable impact of \$190 million from currency fluctuations and a net charge of \$19 million from our annual reviews and updates of assumptions, as discussed above. Excluding these items, revenues increased \$415 million. This increase was primarily driven by higher premiums and policy charges and fee income of \$269 million related to the growth of business in force, as discussed above. Net investment income increased \$130 million primarily reflecting investment portfolio growth related to the growth of business in force, partially offset by the impact of lower reinvestment rates.

Benefits and expenses of our Life Planner operations increased \$660 million including a net unfavorable impact of \$265 million from currency fluctuations and a net charge of \$8 million from our annual reviews and updates of assumptions, as discussed above. Excluding these items, benefits and expenses increased \$387 million. Policyholder

benefits, including changes in reserves, increased \$299 million primarily driven by business growth. General and administrative expenses, net of capitalization, increased \$76 million primarily due to higher costs, including those supporting business growth.

Revenues from our Gibraltar Life and Other operations increased \$492 million including a net favorable impact of \$242 million from currency fluctuations. Excluding the impact of currency fluctuations, revenues for Gibraltar Life increased \$250 million, driven by business growth, as discussed above, and the gain on the sale of a home office property in Japan.

Benefits and expenses of our Gibraltar Life and Other operations increased \$544 million including a net unfavorable impact of \$336 million from currency fluctuations and a net charge of \$24 million from our annual reviews and updates of assumptions, as discussed above. Excluding these items, benefits and expenses increased \$184 million driven by an increase of \$154 million in policyholder benefits, including changes in reserves, related to business growth and \$28 million in general and administrative expenses, net of capitalization, due to higher costs, including those supporting business growth.

Table of Contents

Sales Results

The following table sets forth annualized new business premiums, as defined under “—Segment Measures” above, on an actual and constant exchange rate basis for the periods indicated.

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
	2016	2015	2016	2015
	(in millions)			
Annualized new business premiums:				
On an actual exchange rate basis:				
Life Planner operations	\$323	\$263	\$947	\$837
Gibraltar Life	460	408	1,318	1,178
Total	\$783	\$671	\$2,265	\$2,015
On a constant exchange rate basis:				
Life Planner operations	\$315	\$284	\$965	\$879
Gibraltar Life	456	432	1,334	1,229
Total	\$771	\$716	\$2,299	\$2,108

The amount of annualized new business premiums and the sales mix in terms of types and currency denomination of products for any given period can be significantly impacted by several factors, including but not limited to: the addition of new products, discontinuation of existing products, changes in credited interest rates for certain products and other product modifications, changes in tax laws, changes in life insurance regulations or changes in the competitive environment. Sales volume may increase or decrease prior to certain of these changes becoming effective, and then fluctuate in the other direction following such changes.

The current low interest rate environment in Japan, as discussed further in “—Executive Summary—Impact of a Low Interest Rate Environment” above, and fluctuating currency markets have contributed to a shift in demand for certain products. Our diverse product portfolio in Japan, in terms of currency mix and premium payment mode, allows us to mitigate the negative impact from this extremely low interest rate environment. We regularly examine our yen-based product offerings and their related profitability and, as a result, we have been repricing our products and have discontinued sales of certain products that do not meet our profit expectations. The impact of these actions, coupled with the strengthening of the yen against the U.S. dollar and introduction of certain new products, has resulted in an increase in sales of products denominated in U.S. dollars relative to products denominated in other currencies.

The table below presents annualized new business premiums on a constant exchange rate basis, by product and distribution channel, for the periods indicated.

(1) Includes retirement income, endowment and savings variable universal life.

Single pay life annualized new business premiums, which include 10% of first year premiums, and 3-year limited pay annualized new business premiums, which include 100% of new business premiums, represented 12% and 57%, respectively, of total Japanese bank distribution channel annualized new business premiums, excluding

(2) annuity products, for the three months ended September 30, 2016, and 5% and 57%, respectively, of total Japanese bank distribution channel annualized new business premiums, excluding annuity products, for the three months ended September 30, 2015.

Table of Contents

Three Month Comparison. Annualized new business premiums, on a constant exchange rate basis, from our Life Planner operations increased \$31 million. Growth in Life Planner headcount and productivity in our Japan operation resulted in an increase in sales of U.S. dollar-denominated retirement income and whole life products and sales of yen-denominated term life products remained strong in the corporate market. Sales in our Brazilian operation increased across various product lines as Life Planner count and average premiums continued to grow. Sales of life protection products in our Korean operation decreased as a result of recent pricing actions.

Annualized new business premiums, on a constant exchange rate basis, from our Gibraltar Life operations increased \$24 million. Life Consultant sales increased \$23 million as higher sales of U.S. dollar-denominated whole life and annuity products were partially offset by lower sales of Australian dollar-denominated annuity products and yen-denominated whole life products. Independent Agency sales increased \$9 million as higher sales of U.S. dollar-denominated whole life and retirement income products were partially offset by lower sales of Australian dollar-denominated annuity products. Bank channel sales declined \$8 million as lower sales of yen-denominated whole life products were partially offset by higher sales of U.S. dollar-denominated whole life and retirement products.

(1) Includes retirement income, endowment and savings variable universal life.

Single pay life annualized new business premiums, which include 10% of first year premiums, and 3-year limited pay annualized new business premiums, which include 100% of new business premiums, represented 8% and 52%, respectively, of total Japanese bank distribution channel annualized new business premiums, excluding annuity products, for the nine months ended September 30, 2016, and 6% and 54%, respectively, of total Japanese bank distribution channel annualized new business premiums, excluding annuity products, for the nine months ended September 30, 2015.

(2)

Nine Month Comparison. Annualized new business premiums, on a constant exchange rate basis, from our Life Planner operations increased \$86 million. Growth in Life Planner headcount and productivity in our Japan operation resulted in an increase in sales of U.S. dollar-denominated retirement and whole life products and sales of yen-denominated term life products remained strong in the corporate market. Lower sales of life protection products in our Korean operation as a result of recent pricing actions were partially offset by higher sales in our Brazilian operation across various product lines as Life Planner count and average premiums continued to grow.

Annualized new business premiums, on a constant exchange rate basis, from our Gibraltar Life operations increased \$105 million. Life Consultant sales increased \$66 million as higher sales of U.S. dollar-denominated whole life and annuity products were partially offset by lower sales of yen-denominated life protection products and Australian dollar-denominated retirement income and annuity products. Bank channel sales increased \$33 million primarily

driven by higher sales of U.S. dollar-denominated whole life, retirement income and annuity products, partially offset by lower sales of yen-denominated whole life and annuity products. Independent Agency sales increased \$6 million as higher sales of U.S. dollar-denominated whole life and retirement income products were partially offset by lower sales of Australian dollar-denominated annuity and retirement products and yen-denominated retirement and annuity products.

Table of Contents

Corporate and Other

As described in our Annual Report on Form 10-K for the year ended December 31, 2015 under “Business—Financial Services Businesses—Corporate and Other,” Corporate and Other includes corporate operations, after allocations to our business segments, and divested businesses other than those that qualify for “discontinued operations” accounting treatment under U.S. GAAP.

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
	2016	2015	2016	2015
	(in millions)			
Operating results:				
Capital debt interest expense	\$(172)	\$(166)	\$(515)	\$(556)
Operating debt interest expense, net of investment income	0	(8)	(24)	52
Pension and employee benefits	22	34	70	117
Other corporate activities(1)	(263)	(168)	(671)	(468)
Adjusted operating income	(413)	(308)	(1,140)	(855)
Realized investment gains (losses), net, and related adjustments	(208)	(1,110)	(2,966)	(965)
Related charges	(18)	17	12	26
Divested businesses	56	8	76	(26)
Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests	(2)	1	(2)	(1)
Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures	\$(585)	\$(1,392)	\$(4,020)	\$(1,821)

(1)Includes consolidating adjustments.

Three Month Comparison. The loss from Corporate and Other operations, on an adjusted operating income basis, increased \$105 million. Net charges from other corporate activities increased \$95 million, reflecting higher costs for employee compensation plans tied to equity market returns, the absence of a favorable impact from escheatment related matters, including the settlement of a reinsurance recoverable in the prior year period, increased costs for enhanced regulatory supervision and other corporate expenses. Results from pension and employee benefits decreased \$12 million, primarily reflecting lower income from our qualified pension plan, driven by lower plan asset values, as well as the unfavorable impact of higher interest costs on the plan obligation due to the increase in interest rates in 2015. Capital debt interest expense increased \$6 million, and operating debt interest expense, net of investment income, decreased \$8 million. A decrease in operating debt interest expense was primarily from efforts to reduce leverage through senior debt maturities in late 2015 and early 2016, and the early extinguishment of certain debt in the second quarter of 2016.

Nine Month Comparison. The loss from Corporate and Other operations, on an adjusted operating income basis, increased \$285 million. Net charges from other corporate activities increased \$203 million, primarily reflecting costs associated with the early extinguishment of certain debt, the absence of a favorable impact from escheatment related matters in the prior year period, as discussed above, higher legal costs, increased costs for enhanced regulatory supervision and other corporate expenses. Operating debt interest expense, net of investment income, increased \$76 million, primarily reflecting lower net investment income from non-coupon investments and lower levels of invested assets resulting from assets transferred to other business segments. Results from pension and employee benefits decreased \$47 million, primarily reflecting lower income from our qualified pension plan driven by lower plan asset values as well as the unfavorable impact of higher interest costs on the plan obligation due to the increase in interest

rates in 2015. Capital debt interest expense decreased \$41 million, primarily from the reassignment of capital debt to operating debt and efforts to reduce leverage.

Table of Contents

Capital Protection Framework

“Realized investment gains (losses), net and related adjustments,” which are excluded from adjusted operating income, included net losses of \$103 million and \$2,128 million for the three and nine months ended September 30, 2016, respectively, and net losses of \$981 million and \$742 million for the three and nine months ended September 30, 2015, respectively, primarily resulting from our utilization of capital management strategies to manage a portion of our interest rate risk, and reflect changes in interest rates with respect to the exposures outstanding during the respective periods. In implementing our capital management strategies, Corporate and Other may enter into intercompany derivatives with certain business segments. During the first nine months of 2016, primarily as a result of the change in our Individual Annuities’ risk management strategy, we terminated a significant portion of the existing intercompany derivative transactions related to interest rate risk and expect to manage most of this risk within the business segments in the future. For more information on our Capital Protection Framework, see “—Liquidity and Capital Resources—Capital Protection Framework.”

Divested Businesses

Divested Businesses Included in Corporate and Other

Our income from continuing operations includes results from several businesses that have been or will be sold or exited, including businesses that have been placed in wind down status that do not qualify for “discontinued operations” accounting treatment under U.S. GAAP. The results of these divested businesses are reflected in our Corporate and Other operations, but are excluded from adjusted operating income. A summary of the results of the divested businesses reflected in our Corporate and Other operations is as follows for the periods indicated:

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
	2016	2015	2016	2015
	(in millions)			
Long-Term Care	\$58	\$10	\$85	\$(28)
Other	(2)	(2)	(9)	2
Total divested businesses income (loss) excluded from adjusted operating income	\$56	\$8	\$76	\$(26)

Long-Term Care. Results for the third quarter of 2016 increased compared to the prior year period primarily reflecting favorable policy experience, higher investment income, partially offset by a decrease in net realized investment gains driven by a less favorable comparative impact from derivatives used in duration management. Results for the first nine months of 2016 increased compared to the prior year period primarily reflecting favorable policy experience and an increase in net realized investment gains driven by a favorable comparative impact from derivatives used in duration management.

Closed Block Division

The Closed Block division includes certain in force traditional domestic participating life insurance and annuity products and assets that are used for the payment of benefits and policyholder dividends on these policies (collectively the “Closed Block”), as well as certain related assets and liabilities. We no longer offer these traditional domestic participating policies. See Note 6 to the Unaudited Interim Consolidated Financial Statements for additional details.

Each year, the Board of Directors of Prudential Insurance determines the dividends payable on participating policies for the following year based on the experience of the Closed Block, including investment income, net realized and unrealized investment gains, mortality experience and other factors. Although Closed Block experience for dividend action decisions is based upon statutory results, at the time the Closed Block was established, we developed, as required by U.S. GAAP, an actuarial calculation of the timing of the maximum future earnings from the policies included in the Closed Block. If actual cumulative earnings in any given period are greater than the cumulative earnings we expected, we record this excess as a policyholder dividend obligation. We will subsequently pay this excess to Closed Block policyholders as an additional dividend unless it is otherwise offset by future Closed Block performance that is less favorable than we originally expected. The policyholder dividends we charge to expense within the Closed Block division will include any change in our policyholder dividend obligation that we recognize for the excess of actual cumulative earnings in any given period over the cumulative earnings we expected in addition to the actual policyholder dividends declared by the Board of Directors of Prudential Insurance.

Table of Contents

As of September 30, 2016, the excess of actual cumulative earnings over the expected cumulative earnings was \$1,572 million, which was recorded as a policyholder dividend obligation. Actual cumulative earnings, as required by U.S. GAAP, reflect the recognition of realized investment gains and losses in the current period, as well as changes in assets and related liabilities that support the Closed Block policies. Additionally, the accumulation of net unrealized investment gains that have arisen subsequent to the establishment of the Closed Block have been reflected as a policyholder dividend obligation of \$4,795 million at September 30, 2016, to be paid to Closed Block policyholders unless offset by future experience, with a corresponding amount reported in AOCI.

Operating Results

The following table sets forth the Closed Block division's results for the periods indicated.

	Three Months Ended September 30, 2016		Nine Months Ended September 30, 2015	
	2015	2016	2015	2016
	(in millions)			
U.S. GAAP results:				
Revenues	\$1,481	\$1,368	\$4,156	\$4,612
Benefits and expenses	1,450	1,260	4,230	4,474
Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures	\$31	\$108	\$(74)	\$138

Income (loss) from Continuing Operations Before Income Taxes and Equity in Earnings of Operating Joint Ventures

Three Month Comparison. Income from continuing operations before income taxes and equity in earnings of operating joint ventures decreased \$77 million. Results for the third quarter of 2016 reflected a \$58 million increase in net realized investment gains, primarily due to gains from sales of fixed maturities and more favorable changes in the value of derivatives used in risk management activities, partially offset by lower gains on equity securities. Net investment income increased \$30 million, primarily driven by higher income on non-coupon investments, partially offset by lower reinvestment rates. Net insurance activity results decreased \$17 million due to higher dividends to policyholders as a result of an increase in the 2016 dividend scales. As a result of the above and other variances, a \$54 million increase in the policyholder dividend obligation was recorded in the third quarter of 2016, compared to a \$139 million reduction in the third quarter of 2015. If actual cumulative earnings fall below expected cumulative earnings in future periods, earnings volatility in the Closed Block division, which is primarily due to changes in investment results, may not be offset by changes in the cumulative earnings policyholder dividend obligation. For a discussion of Closed Block division realized investment gains (losses), net, see “—Realized Investment Gains and Losses.”

Nine Month Comparison. Income from continuing operations before income taxes and equity in earnings of operating joint ventures decreased \$212 million. Results for the first nine months of 2016 reflected a \$373 million decrease in net realized investment gains, primarily due to lower gains on equity securities, less favorable changes in the value of derivatives used in risk management activities and lower gains from sales of fixed maturities. Net investment income decreased \$67 million, primarily due to lower returns on non-coupon investments and lower reinvestment rates. As a result of the above and other variances, a \$123 million reduction in the policyholder dividend obligation was recorded in the first nine months of 2016, compared to a \$69 million increase in the first nine months of 2015.

Revenues, Benefits and Expenses

Three Month Comparison. Revenues, as shown in the table above under “—Operating Results,” increased \$113 million, primarily due to a \$58 million increase in net realized investment gains and a \$30 million increase in net investment

income, as discussed above.

Benefits and expenses, as shown in the table above under “—Operating Results,” increased \$190 million, primarily due to a \$201 million increase in dividends to policyholders, reflecting an increase in the policyholder dividend obligation expense due to changes in cumulative earnings.

Nine Month Comparison. Revenues decreased \$456 million, primarily due to a \$373 million decrease in net realized investment gains and a \$67 million decrease in net investment income, as discussed above. In addition, premiums declined \$32 million, primarily due to the runoff of policies in force.

Benefits and expenses decreased \$244 million, primarily due to a \$165 million decrease in dividends to policyholders, reflecting a decrease in the policyholder dividend obligation expense due to changes in cumulative earnings. In addition, policyholders’ benefits, including changes in reserves, decreased \$55 million, primarily due to the runoff of policies in force.

140

Table of Contents

Income Taxes

Our income tax provision, on a consolidated basis, amounted to an income tax expense of \$501 million in the third quarter of 2016, compared to an expense of \$584 million in the third quarter of 2015. The decreased expense was primarily due to changes in projected “Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures” and the difference in tax rates in the jurisdictions in which those earnings are derived.

Our income tax provision, on a consolidated basis, amounted to an income tax expense of \$1,300 million in the first nine months of 2016 compared to an expense of \$1,962 million in the first nine months of 2015. The decreased expense was primarily due to a decrease in “Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures” in the first nine months of 2016 compared to the first nine months of 2015. On March 31, 2016, the government of Japan enacted a reduction in the Japanese tax rate by approximately 2%, effective April 1, 2016. On March 31, 2015, the government of Japan enacted a reduction in the Japanese tax rate by approximately 2%, effective April 1, 2015. As a result, the impact of lower “Income (loss) from continuing operations before income taxes and equity in earnings of operating joint ventures” in the first nine months of 2016 compared to the first nine months in 2015 was partially offset by \$24 million and \$75 million of additional tax expense related to re-measurement of Japan deferred tax assets at the new tax rates during the first nine months of 2016 and 2015, respectively.

For additional information regarding income taxes, see Note 12 to the Unaudited Interim Consolidated Financial Statements.

Discontinued Operations

Included within net income are the results of businesses that are reflected as discontinued operations under U.S. GAAP. Income (loss) from discontinued operations, net of taxes, was less than \$1 million for the three and nine months ended September 30, 2016 and 2015.

Experience-Rated Contractholder Liabilities, Trading Account Assets Supporting Insurance Liabilities and Other Related Investments

Certain products included in the Retirement and International Insurance segments are experience-rated in that investment results associated with these products are expected to ultimately accrue to contractholders. The majority of investments supporting these experience-rated products are classified as trading and are carried at fair value. These trading investments are reflected on the statements of financial position as “Trading account assets supporting insurance liabilities, at fair value” (“TAASIL”). Realized and unrealized gains (losses) for these investments are reported in “Other income.” Interest and dividend income for these investments is reported in “Net investment income.” To a lesser extent, these experience-rated products are also supported by derivatives and commercial mortgage and other loans. The derivatives that support these experience-rated products are reflected on the Unaudited Interim Consolidated Statements of Financial Position as “Other long-term investments” and are carried at fair value, and the realized and unrealized gains (losses) are reported in “Realized investment gains (losses), net.” The commercial mortgage and other loans that support these experience-rated products are carried at unpaid principal, net of unamortized discounts and an allowance for losses. These loans are reflected on the Unaudited Interim Consolidated Statements of Financial Position as “Commercial mortgage and other loans.” Gains (losses) on sales and changes in the valuation allowance for commercial mortgage and other loans are reported in “Realized investment gains (losses), net.”

Our Retirement segment has two types of experience-rated products that are supported by TAASIL and other related investments. Fully participating products are those for which the entire return on underlying investments is passed back to the policyholders through a corresponding adjustment to the related liability. The adjustment to the liability is based on changes in the fair value of all of the related assets, including commercial mortgage and other loans, which are carried at amortized cost, less any valuation allowance. Partially participating products are those for which only a portion of the return on underlying investments is passed back to the policyholders over time through changes to the contractual crediting rates. The crediting rates are typically reset semiannually, often subject to a minimum crediting rate, and returns are required to be passed back within ten years.

In our International Insurance segment, the experience-rated products are fully participating. As a result, the entire return on the underlying investments is passed back to policyholders through a corresponding adjustment to the related liability.

Table of Contents

Adjusted operating income excludes net investment gains (losses) on TAASIL, related derivatives and commercial mortgage and other loans. This is consistent with the exclusion of realized investment gains (losses) with respect to other investments supporting insurance liabilities managed on a consistent basis. In addition, to be consistent with the historical treatment of charges related to realized investment gains (losses) on investments, adjusted operating income also excludes the change in contractholder liabilities due to asset value changes in the pool of investments (including changes in the fair value of commercial mortgage and other loans) supporting these experience-rated contracts, which are reflected in "Interest credited to policyholders' account balances." The result of this approach is that adjusted operating income for these products includes net fee revenue and interest spread we earn on these experience-rated contracts, and excludes changes in fair value of the pool of investments, both realized and unrealized, that we expect will ultimately accrue to the contractholders.

The following table sets forth the impact on results for the periods indicated of these items that are excluded from adjusted operating income:

	Three Months Ended September 30, 2016 2015		Nine Months Ended September 30, 2016 2015	
	(in millions)			
Retirement Segment:				
Investment gains (losses) on:				
Trading account assets supporting insurance liabilities, net	\$14	\$(81)	\$516	\$(324)
Derivatives	(22)	(14)	(130)	108
Commercial mortgages and other loans	(6)	(1)	(10)	3
Change in experience-rated contractholder liabilities due to asset value changes(1)(2)	24	111	(417)	254
Net gains (losses)	\$10	\$15	\$(41)	\$41
International Insurance Segment:				
Investment gains (losses) on trading account assets supporting insurance liabilities, net	\$23	\$(147)	\$(155)	\$(41)
Change in experience-rated contractholder liabilities due to asset value changes	(23)	147	155	41
Net gains (losses)	\$0	\$0	\$0	\$0
Total:				
Investment gains (losses) on:				
Trading account assets supporting insurance liabilities, net	\$37	\$(228)	\$361	\$(365)
Derivatives	(22)	(14)	(130)	108
Commercial mortgages and other loans	(6)	(1)	(10)	3
Change in experience-rated contractholder liabilities due to asset value changes(1)(2)	1	258	(262)	295
Net gains (losses)	\$10	\$15	\$(41)	\$41

Decreases to contractholder liabilities due to asset value changes are limited by certain floors and therefore do not reflect cumulative declines in recorded asset values of less than \$1 million and \$3 million as of September 30, 2016 (1) and 2015, respectively. We have recovered and expect to recover in future periods these declines in recorded asset values through subsequent increases in recorded asset values or reductions in crediting rates on contractholder liabilities.

(2) Included in the amounts above related to the change in the liability to contractholders as a result of commercial mortgage and other loans are decreases of \$5 million and decreases of \$16 million for the three months ended September 30, 2016 and 2015, respectively, and increases of \$51 million and decreases of \$41 million for the nine months ended September 30, 2016 and 2015, respectively. As prescribed by U.S.

GAAP, changes in the fair value of commercial mortgage and other loans held for investment in our general account, other than when associated with impairments, are not recognized in income in the current period, while the impact of these changes in fair value are reflected as a change in the liability to fully participating contractholders in the current period.

The net impacts for the Retirement segment of changes in experience-rated contractholder liabilities and investment gains (losses) on trading account assets supporting insurance liabilities and other related investments reflect timing differences between the recognition of the mark-to-market adjustments and the recognition of the recovery of these adjustments in future periods through subsequent increases in asset values or reductions in crediting rates on contractholder liabilities for partially participating products. These impacts also reflect the difference between the fair value of the underlying commercial mortgage and other loans and the amortized cost, less any valuation allowance, of these loans, as described above.

Table of Contents

Valuation of Assets and Liabilities

Fair Value of Assets and Liabilities

The authoritative guidance related to fair value measurement establishes a framework that includes a three-level hierarchy used to classify the inputs used in measuring fair value. The level in the hierarchy within which the fair value falls is determined based on the lowest level input that is significant to the measurement. The fair values of assets and liabilities classified as Level 3 include at least one significant unobservable input in the measurement. See Note 13 to the Unaudited Interim Consolidated Financial Statements for an additional description of the valuation hierarchy levels as well as for the balances of assets and liabilities measured at fair value on a recurring basis by hierarchy level presented on a consolidated basis.

The table below presents the balances of assets and liabilities measured at fair value on a recurring basis, as of the periods indicated, and the portion of such assets and liabilities that are classified in Level 3 of the valuation hierarchy. The table also provides details about these assets and liabilities excluding those held in the Closed Block division. We believe the amounts excluding the Closed Block division are most relevant to an understanding of our operations that are pertinent to investors in Prudential Financial because substantially all Closed Block division assets support obligations and liabilities relating to the Closed Block policies only. See Note 6 to the Unaudited Interim Consolidated Financial Statements for further information on the Closed Block.

	As of September 30, 2016				As of December 31, 2015

(1) Prior period amounts are presented on a basis consistent with the current period presentation, reflecting the adoption of ASU 2015-07.

(2) PFI excluding the Closed Block division and for the Closed Block division totaled 1.3% and 2.2%, respectively, as of September 30, 2016, and 1.4% and 2.5%, respectively, as of December 31, 2015.

(3) “All other” and “Other liabilities” primarily include derivatives. The amounts classified as Level 3 exclude the impact of netting.

Table of Contents

The determination of fair value, which for certain assets and liabilities is dependent on the application of estimates and assumptions, can have a significant impact on our results of operations and may require the application of a greater degree of judgment depending on market conditions, as the ability to value assets and liabilities can be significantly impacted by a decrease in market activity or a lack of transactions executed in an orderly manner. The following sections provide information regarding certain assets and liabilities which are valued using Level 3 inputs and could have a significant impact on our results of operations.

Fixed Maturity and Equity Securities

Fixed maturity securities included in Level 3 in our fair value hierarchy are generally priced based on internally-developed valuations or indicative broker quotes. For certain private fixed maturity and equity securities, the internally-developed valuation model uses significant unobservable inputs and, accordingly, such securities are included in Level 3 in our fair value hierarchy. Level 3 fixed maturity securities for PFI excluding the Closed Block division included approximately \$3.6 billion of public fixed maturities as of September 30, 2016 with values primarily based on indicative broker quotes, and approximately \$2.0 billion of private fixed maturities, with values primarily based on internally-developed models. Significant unobservable inputs used included: issue specific credit adjustments, material non-public financial information, management judgment, estimation of future earnings and cash flows, default rate assumptions, liquidity assumptions and indicative quotes from market makers. These inputs are usually considered unobservable, as not all market participants have access to this data.

The impact our determination of fair value for fixed maturity and equity securities has on our results of operations is dependent on our classification of the security as either trading, available-for-sale, or held-to-maturity. For our investments classified as trading, the impact of changes in fair value is recorded within "Other income." For our investments classified as available-for-sale, the impact of changes in fair value is recorded as an unrealized gain or loss in AOCI, a separate component of equity. Our investments classified as held-to-maturity are carried at amortized cost.

Separate Account Assets

Separate account assets included in Level 3 primarily include corporate securities and commercial mortgage loans. The valuation of corporate securities are determined as described above for fixed maturity and equity securities. See Note 13 to the Unaudited Interim Consolidated Financial Statements for additional information on the valuation of commercial mortgage loans. Separate account liabilities are reported at contract value and not at fair value.

Variable Annuity Living Benefit Features

Future policy benefits classified in Level 3 primarily include liabilities related to guarantees associated with the living benefit features of certain variable annuity contracts offered by our Individual Annuities segment, including GMAB, GMWB and GMIWB. These benefits are accounted for as embedded derivatives and carried at fair value with changes in fair value included in "Realized investment gains (losses), net." The fair values of the GMAB, GMWB and GMIWB liabilities are calculated as the present value of future expected benefit payments to customers less the present value of future rider fees attributable to the embedded derivative feature. This methodology could result in either a liability or contra-liability balance, based on capital market conditions and various policyholder behavior assumptions. Since there is no observable active market for the transfer of these obligations, the valuations are calculated using internally-developed models with option pricing techniques. These models utilize significant assumptions that are primarily unobservable, including assumptions as to lapse rates, NPR, utilization rates, withdrawal rates, mortality rates and equity market volatility. Future policy benefits classified as Level 3 for PFI excluding the Closed Block division were a net liability of \$13.0 billion as of September 30, 2016. For additional information, see "—Results of

Operations by Segment—U.S. Retirement Solutions and Investment Management Division—Individual Annuities.”

Notes Issued by Consolidated VIEs

As discussed in Note 5 to the Unaudited Interim Consolidated Financial Statements, notes issued by consolidated VIEs represent non-recourse notes issued by certain asset-backed investment vehicles, primarily collateralized loan obligations, which we are required to consolidate. We have elected the fair value option for these notes, which are valued based on corresponding bank loan collateral.

For additional information about the key estimates and assumptions used in our determination of fair value, see Note 13 to the Unaudited Interim Consolidated Financial Statements.

Table of Contents

Realized Investment Gains and Losses

Realized investment gains and losses are generated from numerous sources, including the following significant items:

- sale of investments;
- maturities of foreign denominated investments;
- adjustments to the cost basis of investments for OTTI;
- recognition of OTTI in earnings for foreign denominated securities that are approaching maturity and are in an unrealized loss position due to foreign currency exchange rate movements;
- net changes in the allowance for losses, certain restructurings and foreclosures on commercial mortgage and other loans; and
- fair value changes on embedded derivatives and free-standing derivatives that do not qualify for hedge accounting treatment.

Effective January 1, 2016, the Company classifies fixed maturity prepayment fees and call premiums in “Net investment income” rather than “Realized investment gains (losses), net.” The impact of this change was immaterial.

The level of OTTI generally reflects economic conditions and is expected to increase when economic conditions worsen and to decrease when economic conditions improve. Historically, the causes of OTTI have been specific to each individual issuer and have not directly resulted in impairments to other securities within the same industry or geographic region. We may also realize additional credit and interest rate related losses through sales of investments pursuant to our credit risk and portfolio management objectives. For additional information regarding our policies regarding OTTI for fixed maturity and equity securities, see Note 2 to the Company’s Consolidated Financial Statements included in the Annual Report on Form 10-K for the year ended December 31, 2015.

We use interest rate and currency swaps and other derivatives to manage interest and currency exchange rate exposures arising from mismatches between assets and liabilities, including duration mismatches. We use derivative contracts to mitigate the risk that unfavorable changes in currency exchange rates will materially affect U.S. dollar equivalent earnings generated by certain of our non-U.S. businesses. We also use equity-based and interest rate derivatives to hedge a portion of the risks embedded in certain variable annuity products with optional living benefit guarantees. Many of these derivative contracts do not qualify for hedge accounting and, consequently, we recognize the changes in fair value of such contracts from period to period in current earnings, although we do not necessarily account for the related assets or liabilities the same way.

Accordingly, realized investment gains and losses from our derivative activities can contribute significantly to fluctuations in net income. For a further discussion of living benefit guarantees and related hedge positions in our Individual Annuities segment, see “—Results of Operations by Segment—U.S. Retirement Solutions and Investment Management Division—Individual Annuities” above.

Adjusted operating income generally excludes “Realized investment gains (losses), net,” subject to certain exceptions. These exceptions primarily include realized investment gains or losses within certain of our businesses for which such gains or losses are a principal source of earnings, gains or losses associated with terminating hedges of foreign currency earnings and current period yield adjustments, and related charges and adjustments. OTTI, interest rate related losses and credit related losses on sales (other than those related to certain of our businesses which primarily originate investments for sale or syndication to unrelated investors) are excluded from adjusted operating income.

The following table sets forth “Realized investment gains (losses), net,” by investment type as well as related charges and adjustments for the periods indicated. For additional details regarding adjusted operating income, see Note 11 to the Unaudited Interim Consolidated Financial Statements.

2016 to 2015 Three Month Comparison

PFI excluding Closed Block Division

The following table sets forth net realized gains (losses) on fixed maturity securities, as of the dates indicated.

	Three Months Ended September 30, 2016 2015	
	(in millions)	
Gross realized investment gains:		
Gross gains on sales and maturities(1)	\$356	\$407
Gross realized investment losses:		
Net OTTI recognized in earnings(2)	(16)	(49)
Gross losses on sales and maturities(1)	(32)	(63)
Credit related losses on sales	0	(1)
Total gross realized investment losses	(48)	(113)

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Realized investment gains (losses), net—Fixed Maturity Securities	\$ 308	\$ 294
Net gains (losses) on sales and maturities—Fixed Maturity Securities(1)	\$ 324	\$ 344

Amounts exclude OTTI and credit-related losses through sales of investments due to expected near-term credit (1) conditions of an underlying issuer. During 2016, fixed maturity prepayment gains were reclassified to “Net investment income.” Prior periods were not restated.

146

Table of Contents

Excludes the portion of OTTI recorded in “Other comprehensive income (loss),” representing any difference between (2) the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

Net gains on sales and maturities of fixed maturity securities were \$324 million and \$344 million in the third quarter of 2016 and 2015, respectively, primarily due to net gains of \$318 million and \$260 million on sales and maturities of U.S. dollar-denominated securities within our International Insurance segment. See below for additional information regarding the OTTI of fixed maturity securities.

Net realized gains on equity securities were \$44 million in the third quarter of 2016, primarily driven by net gains on sales of equity securities of \$64 million, offset by OTTI of \$20 million. Net realized losses on equity securities were \$35 million in the third quarter of 2015, primarily driven by OTTI of \$52 million, offset by net gains on sales of equity securities of \$17 million. See below for additional information regarding OTTI of equity securities.

Net realized gains on commercial mortgage and other loans in the third quarter of 2016 were \$6 million, primarily driven by servicing revenue of \$14 million in our Asset Management business. These gains were partially offset by an increase in the loan loss reserve of \$6 million. Net realized losses on commercial mortgage and other loans in the third quarter of 2015 were \$7 million, primarily driven by a net increase in the loan loss reserve of \$8 million. For additional information regarding our commercial mortgage and other loan loss reserves, see “—General Account Investments—Commercial Mortgage and Other Loans—Commercial Mortgage and Other Loan Quality.”

Net realized gains on derivatives were \$304 million and \$1,419 million in the third quarter of 2016 and 2015, respectively. The net derivative gains in the third quarter of 2016 primarily reflect \$319 million of gains on derivatives in Japan operations as the Japanese yen strengthened against various currencies; \$45 million of gains of interest rate derivatives used to manage duration as longer-term swap rates decreased; and \$40 million of gains primarily representing the fees earned on fee-based Guaranteed Investment Contracts (“GICs”) which are accounted for as derivatives. Partially offsetting these gains is \$96 million of losses on Japan net long duration derivatives as Japan swap rates increased. The net gains in the third quarter of 2015 primarily reflect \$615 million of gains on product related embedded derivatives and related hedge positions mainly associated with certain variable annuity contracts, \$479 million of gains on interest rate derivatives used to manage duration as swap rates decreased, \$226 million of gains on foreign currency derivatives used to hedge foreign denominated investments as the U.S. dollar strengthened against various currencies, and \$39 million of gains primarily representing fees earned on GICs.

Related adjustments include the portions of “Realized investment gains (losses), net” that are included in adjusted operating income and the portions of “Other income” and “Net investment income” that are excluded from adjusted operating income. These adjustments are made to arrive at “Realized investment gains (losses), net, and related adjustments” which are excluded from adjusted operating income. Results for the third quarter of 2016 include net negative related adjustments of \$437 million, primarily driven by the impact of foreign currency exchange rate movements on certain non-local currency denominated assets and liabilities within the International Insurance segment, for which the majority of the foreign currency exposure is hedged and offset in “Realized Investment gains (losses), net.” Results for the third quarter of 2015 include net negative related adjustments of \$488 million driven by settlements on interest rate and currency derivatives.

Charges that relate to “Realized investment gains (losses), net” are also excluded from adjusted operating income, and may be reflected as net charges or net benefits. Results for the third quarter of 2016 include a net related benefit of \$426 million, compared to a net related charge of \$679 million for the third quarter of 2015. The current year results were driven by a benefit of \$515 million from the implementation of a new ALM strategy in the Individual Annuities segment, and the prior year results were driven by the impact of derivative activity on the amortization of DAC and other costs and certain policyholder reserves. For additional information, see “Results of Operations by Segment—U.S.

Retirement Solutions and Investment Management Division—Individual Annuities” and Note 11 to the Unaudited Interim Consolidated Financial Statements.

Table of Contents

The following tables set forth, for the periods indicated, the composition of OTTI recorded in earnings attributable to PFI excluding the Closed Block division by asset type, and for fixed maturity securities, by reason.

	Three Months Ended September 30, 20162015 (in millions)	
Public fixed maturity securities	\$13	\$4
Private fixed maturity securities	3	45
Total fixed maturity securities	16	49
Equity securities	20	52
Other invested assets(1)	11	64
Total(2)	\$47	\$165

(1) Includes OTTI related to investments in joint ventures and partnerships.

Excludes the portion of OTTI recorded in "Other comprehensive income (loss)," representing any difference between

(2) the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

	Three Months Ended September 30, 2016 2015 (in millions)	
Due to credit events or adverse conditions of the respective issuer(1)	\$ 14	\$ 49
Due to other accounting guidelines(2)	2	0
Total(3)	\$ 16	\$ 49

Represents circumstances where we believe credit events or other adverse conditions of the respective issuers have caused, or will lead to, a deficiency in the contractual cash flows related to the investment. The amount of the (1) impairment recorded in earnings is the difference between the amortized cost of the debt security and the net present value of its projected future cash flows discounted at the effective interest rate implicit in the debt security prior to impairment.

(2) Primarily represents circumstances where securities are being actively marketed for sale by the company, and securities with losses from foreign currency exchange rate movements approach maturity.

Excludes the portion of OTTI recorded in "Other comprehensive income (loss)," representing any difference between (3) the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

Fixed maturity security OTTI in the third quarter of 2016 were concentrated in the capital goods and foreign agency sectors within corporate securities. Fixed maturity security OTTI in the third quarter of 2015 were concentrated in the industrial other sector within corporate securities. In both periods, these OTTI were primarily related to securities with liquidity concerns, downgrades in credit, bankruptcy or other adverse financial conditions of the respective issuers.

Equity security OTTI in both the third quarter of 2016 and 2015 were primarily driven by the extent and duration of declines in values.

Other invested assets OTTI in both the third quarter of 2016 and 2015 were primarily driven by the extent and duration of declines in values of investments in limited partnerships.

Table of Contents

Closed Block Division

The following table sets forth net realized gains (losses) on fixed maturity securities as of the dates indicated.

	Three Months Ended September 30, 2016	2015
	(in millions)	
Gross realized investment gains:		
Gross gains on sales and maturities(1)	\$84	\$21
Gross realized investment losses:		
Net OTTI recognized in earnings(2)	(13)	(24)
Gross losses on sales and maturities(1)	(14)	(10)
Credit related losses on sales	0	0
Total gross realized investment losses	(27)	(34)
Realized investment gains (losses), net—Fixed Maturity Securities	\$57	\$(13)
Net gains (losses) on sales and maturities—Fixed Maturity Securities(1)	\$70	\$11

Amounts exclude OTTI and credit related losses through sales of investments due to expected near-term credit (1) conditions of an underlying issuer. During 2016, fixed maturity prepayment gains were reclassified to “Net investment income.” Prior periods were not restated.

Excludes the portion of OTTI recorded in “Other comprehensive income (loss),” representing any difference between (2) the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

Net realized gains on equity securities were \$80 million and \$82 million in the third quarter of 2016 and 2015, respectively, primarily driven by net gains on sales. See below for additional information regarding OTTI of equity securities.

Net realized gains on derivatives were \$19 million and \$33 million in the third quarter of 2016 and 2015 respectively. Derivative gains in the third quarter of 2016 primarily reflect \$18 million of gains on interest rate derivatives used to manage duration as longer-term swap rates decreased. The net gains in the third quarter of 2015 primarily reflect \$39 million of gains on currency derivatives used to hedge foreign denominated investments as the U.S. dollar strengthened against various currencies.

The following tables set forth, for the periods indicated, the composition of OTTI recorded in earnings attributable to the Closed Block division by asset type, and for fixed maturity securities, by reason.

Table of Contents

	Three Months Ended September 30, 2016 2015 (in millions)	
Due to credit events or adverse conditions of the respective issuer(1)	\$ 13	\$ 24
Due to other accounting guidelines	0	0
Total(2)	13	24

Represents circumstances where we believe credit events or other adverse conditions of the respective issuers have caused, or will lead to, a deficiency in the contractual cash flows related to the investment. The amount of the (1) impairment recorded in earnings is the difference between the amortized cost of the debt security and the net present value of its projected future cash flows discounted at the effective interest rate implicit in the debt security prior to impairment.

Excludes the portion of OTTI recorded in "Other comprehensive income (loss)," representing any difference between (2) the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

Fixed maturity security OTTI in the third quarter of 2016 were concentrated in the capital goods and foreign agency sectors within corporate securities. Fixed maturity security OTTI in the third quarter of 2015 were concentrated in the industrial other, foreign government, and communications sectors within corporate securities. In both periods, these OTTI were primarily related to securities with liquidity concerns, downgrades in credit, bankruptcy or other adverse financial conditions of the respective issuers.

Equity security OTTI in both the third quarter of 2016 and 2015 were primarily due to the extent and duration of declines in values.

Other invested assets OTTI in both the third quarter of 2016 and 2015 were primarily due to the extent and duration of declines in values of investments in limited partnerships.

2016 to 2015 Nine Month Comparison

PFI excluding Closed Block Division

The following table sets forth net realized gains (losses) on fixed maturity securities as of the dates indicated.

	Nine Months Ended September 30, 2016 2015 (in millions)	
Gross realized investment gains:		
Gross gains on sales and maturities(1)	\$1,051	\$1,173
Gross realized investment losses:		
Net OTTI recognized in earnings(2)	(101)	(71)
Gross losses on sales and maturities(1)	(278)	(132)

Credit related losses on sales	(11)	(4)
Total gross realized investment losses	(390)	(207)
Realized investment gains (losses), net—Fixed Maturity Securities	\$661	\$966
Net gains (losses) on sales and maturities—Fixed Maturity Securities(1)	\$773	\$1,041

Amounts exclude OTTI and credit-related losses through sales of investments due to expected near-term credit conditions of an underlying issuer. During 2016, fixed maturity prepayment gains were reclassified to “Net investment income.” Prior periods were not restated.

Excludes the portion of OTTI recorded in “Other comprehensive income (loss),” representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

Table of Contents

Net gains on sales and maturities of fixed maturity securities were \$773 million in the first nine months of 2016, primarily due to net gains of \$819 million on sales and maturities of U.S. dollar-denominated securities within our International Insurance segment. The net gains in the first nine months of 2016 were partially offset by net trading losses of approximately \$190 million on sales of securities within the energy sector and OTTI of \$101 million. Net gains on sales and maturities of fixed maturity securities were \$1,041 million in the first nine months of 2015, were primarily due to sales and maturities of U.S. dollar-denominated securities within our International Insurance segment. See below for additional information regarding the OTTI of fixed maturity securities in the first nine months of 2016 and 2015.

Net realized gains on equity securities were \$19 million and \$43 million in the first nine months of 2016 and 2015, respectively, and included net gains on sales of equity securities of \$74 million and \$109 million, respectively. Both periods' gains were offset by OTTI of \$55 million and \$66 million, in the first nine months of 2016 and 2015, respectively. See below for additional information regarding OTTI of equity securities.

Net realized gains on commercial mortgage and other loans were \$35 million and \$22 million in the first nine months of 2016 and 2015 respectively, primarily driven by servicing revenue of \$36 million and \$26 million in our Asset Management business.

Net realized gains on derivatives were \$3,210 million and \$2,549 million in the first nine months of 2016 and 2015, respectively. The net derivative gains in the first nine months of 2016 primarily reflect \$1,351 million of gains on interest rate derivatives used to manage duration as swap rates decreased; \$1,348 million of gains on product related embedded derivatives and related hedge positions mainly associated with certain variable annuity contracts; and \$116 million of gains primarily representing the fees earned on fee-based GICs which are accounted for as derivatives. The net gains in the first nine months of 2015 primarily reflect \$1,732 million of gains on product related embedded derivatives and related hedge positions mainly associated with certain variable annuity contracts, \$344 million of gains on interest rate derivatives used to manage duration as swap rates decreased, \$287 million of gains on foreign currency derivatives used to hedge foreign denominated investments as the U.S. dollar strengthened against various currencies, and \$120 million of gains primarily representing fees earned on GICs.

Related adjustments for the first nine months of 2016 include net negative related adjustments of \$1,424 million compared to net negative related adjustments of \$838 million for the first nine months of 2015. Results for the first nine months of 2016 were driven by the impact of foreign currency exchange rate movements on certain non-local currency denominated assets and liabilities within the International Insurance segment, for which the majority of the foreign currency exposure is hedged and offset in "Realized investment gains (losses), net." The net negative related adjustment was also driven by settlements on interest rate and currency derivatives. Results for the first nine months of 2015 were primarily driven by settlements on interest rate and currency derivatives.

Related charges include net related charges of \$1,096 million for the first nine months of 2016 compared to net related charges of \$944 million for the first nine months of 2015. Both periods' results were driven by the impact of derivative activity on the amortization of DAC and other costs and certain policyholder reserves including, for the first nine months of 2016, a benefit of \$515 million from the implementation of a new ALM strategy in the Individual Annuities segment discussed above.

The following tables set forth, for the periods indicated, the composition of OTTI recorded in earnings attributable to PFI excluding the Closed Block division by asset type, and for fixed maturity securities, by reason.

Nine
Months
Ended
September

Private fixed maturity securities	50	61
Total fixed maturity securities	101	71
Equity securities	55	66
Other invested assets(1)	51	90
Total(2)	\$207	\$227

(1) Includes OTTI related to investments in joint ventures and partnerships.

Excludes the portion of OTTI recorded in "Other comprehensive income (loss)," representing any difference between (2) the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

Table of Contents

	Nine Months Ended September 30, 2016 2015 (in millions)	
Due to credit events or adverse conditions of the respective issuer(1)	\$ 73	\$ 70
Due to other accounting guidelines(2)	28	1
Total(3)	\$ 101	\$ 71

Represents circumstances where we believe credit events or other adverse conditions of the respective issuers have caused, or will lead to, a deficiency in the contractual cash flows related to the investment. The amount of the (1) impairment recorded in earnings is the difference between the amortized cost of the debt security and the net present value of its projected future cash flows discounted at the effective interest rate implicit in the debt security prior to impairment.

(2) Primarily represents circumstances where securities are being actively marketed for sale by the company, and securities with losses from foreign currency exchange rate movements approach maturity.

(3) Excludes the portion of OTTI recorded in "Other comprehensive income (loss)," representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

Fixed maturity security OTTI in the first nine months of 2016 were concentrated in the energy, capital goods, and foreign agency sectors within corporate securities. Fixed maturity security OTTI in the first nine months of 2015 were concentrated in the industrial other, consumer cyclical, and utility sectors within corporate securities. In both periods, these OTTI were primarily related to securities with liquidity concerns, downgrades in credit, bankruptcy or other adverse financial conditions of the respective issuers.

Equity security OTTI in both the first nine months of 2016 and 2015 were primarily due to the extent and duration of declines in values.

Other invested assets OTTI in the first nine months of 2016 were primarily due to the extent and duration of declines in values of investments in limited partnerships within the energy sector. Other invested assets OTTI in the first nine months of 2015 were primarily due to the extent and duration of declines in values of investments in limited partnerships within the energy, finance, and utility sectors.

Closed Block Division

The following table sets forth net realized gains (losses) on fixed maturity securities as of the dates indicated.

	Nine Months Ended September 30, 2016 2015 (in millions)	
Gross realized investment gains:		
Gross gains on sales and maturities(1)	\$ 183	\$ 228
Gross realized investment losses:		
Net OTTI recognized in earnings(2)	(65)	(39)

Gross losses on sales and maturities ⁽¹⁾	(50)	(34)
Credit related losses on sales	(4)	0
Total gross realized investment losses	(119)	(73)
Realized investment gains (losses), net—Fixed Maturity Securities	\$64	\$155
Net gains (losses) on sales and maturities—Fixed Maturity Securities ⁽¹⁾	\$133	\$194

Amounts exclude OTTI and credit-related losses through sales of investments due to expected near-term credit conditions of an underlying issuer. During 2016, fixed maturity prepayment gains were reclassified to “Net investment income.” Prior periods were not restated.

Excludes the portion of OTTI recorded in “Other comprehensive income (loss),” representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

Net realized gains on equity securities were \$204 million and \$351 million in the first nine months of 2016 and 2015, respectively, resulting from net gains on sales. See below for additional information regarding the OTTI of equity securities in the first nine months of 2016 and 2015.

Table of Contents

Net realized gains on derivatives were \$8 million and \$139 million in the first nine months of 2016 and 2015 respectively. Derivative gains in the first nine months of 2016 primarily reflect \$17 million of gains on currency derivatives used to hedge foreign denominated investments as the U.S. dollar strengthened against various currencies; and \$15 million of gains on interest rate derivatives used to manage duration as swap rates decreased. Partially offsetting these gains is \$28 million of losses on the net-short treasury futures used to manage duration as treasury rates decreased. Derivative gains in the first nine months of 2015 primarily reflect net gains of \$147 million on currency derivatives used to hedge foreign denominated investments as the U.S. dollar strengthened against various currencies.

The following tables set forth, for the periods indicated, the composition of OTTI recorded in earnings attributable to the Closed Block division by asset type, and for fixed maturity securities, by reason.

	Nine Months Ended September 30, 2016 2015 (in millions)	
Public fixed maturity securities	\$ 20	\$ 6
Private fixed maturity securities	45	33
Total fixed maturity securities	65	39
Equity securities	10	11
Other invested assets(1)	20	15
Total(2)	\$ 95	\$ 65

(1) Includes OTTI related to investments in joint ventures and partnerships.

Excludes the portion of OTTI recorded in "Other comprehensive income (loss)," representing any difference between

(2) the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

	Nine Months Ended September 30, 2016 2015 (in millions)	
Due to credit events or adverse conditions of the respective issuer(1)	\$ 63	\$ 39
Due to other accounting guidelines	2	0
Total(2)	\$ 65	\$ 39

Represents circumstances where we believe credit events or other adverse conditions of the respective issuers have caused, or will lead to, a deficiency in the contractual cash flows related to the investment. The amount of the

(1) impairment recorded in earnings is the difference between the amortized cost of the debt security and the net present value of its projected future cash flows discounted at the effective interest rate implicit in the debt security prior to impairment.

(2) Excludes the portion of OTTI recorded in "Other comprehensive income (loss)," representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of

impairment.

Fixed maturity security OTTI in the first nine months of 2016 were concentrated in the energy and transportation sectors within corporate securities. Fixed maturity security OTTI in the first nine months of 2015 were concentrated in the industrial other, foreign government, and capital goods sectors within corporate securities. In both periods these OTTI were primarily related to securities with liquidity concerns, downgrades in credit, bankruptcy or other adverse financial conditions of the respective issuers.

Equity security OTTI in both the first nine months of 2016 and 2015 were primarily due to the extent and duration of declines in values.

Other invested assets OTTI in both the first nine months of 2016 and 2015 were primarily due to the extent and duration of declines in values of investments in limited partnerships primarily in the energy sector.

General Account Investments

Portfolio Composition

Our investment portfolio consists of public and private fixed maturity securities, commercial mortgage and other loans, policy loans and non-coupon investments, which include equity securities and other long-term investments such as joint ventures and limited partnerships, real estate held through direct ownership and seed money in separate accounts. The composition of our general account reflects, within the discipline provided by our risk management approach, our need for competitive results and the selection of diverse investment alternatives available primarily through our Asset Management segment. The size of our portfolio enables us to invest in asset classes that may be unavailable to the typical investor.

The following tables set forth the composition of the investments of our general account apportioned between PFI excluding the Closed Block division and the Closed Block division as of the dates indicated.

	September 30, 2016			
	PFI Excluding		Closed Block	Total
	Closed Block		Division

Other long-term investments consist of real estate and non-real estate-related investments in joint ventures and (1) partnerships, investment real estate held through direct ownership and other miscellaneous investments. For additional information regarding these investments, see “—Other Long-Term Investments” below.

(2) Includes invested assets of our asset management and derivative operations. Excludes assets of our asset management operations that are managed for third parties and those assets classified as “Separate account assets” on our balance sheet. For additional information regarding these investments, see “—Invested Assets of Other Entities and Operations” below.

The increase in general account investments attributable to PFI excluding the Closed Block division in the first nine months of 2016 was primarily due to a net increase in fair value driven by a decrease in interest rates in the U.S. and Japan, the translation impact of the yen strengthening against the U.S. dollar and the reinvestment of net investment income and net business inflows. The increase in general account investments attributable to the Closed Block division in the first nine months of 2016 was primarily due to a net increase in fair value driven by a decrease in interest rates in the U.S. For information regarding the methodology used in determining the fair value of our fixed maturities, see Note 13 to the Unaudited Interim Consolidated Financial Statements.

As of September 30, 2016 and December 31, 2015, 44% and 41%, respectively, of our general account investments, other than those of the Closed Block division, related to our Japanese insurance operations.

The following table sets forth the composition related to the investments of our Japanese insurance operations’ general account as of the dates indicated.

	September 30, 2016	December 31, 2015
	(in millions)	
Fixed maturities:		
Public, available-for-sale, at fair value	\$136,017	\$109,257
Public, held-to-maturity, at amortized cost	2,017	1,834
Private, available-for-sale, at fair value	11,568	9,747
Private, held-to-maturity, at amortized cost	454	474

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Trading account assets supporting insurance liabilities, at fair value	2,283	2,020
Other trading account assets, at fair value	470	647
Equity securities, available-for-sale, at fair value	2,816	2,660
Commercial mortgage and other loans, at book value	11,446	9,756
Policy loans, at outstanding balance	2,581	2,208
Other long-term investments(1)	2,677	1,742
Short-term investments	389	417
Total Japanese general account investments	\$172,718	\$140,762

155

Other long-term investments consist of real estate and non-real estate-related investments in joint ventures and (1) partnerships, investment real estate held through direct ownership, derivatives and other miscellaneous investments.

The increase in general account investments related to our Japanese insurance operations in the first nine months of 2016 was primarily attributable to the translation impact of the yen strengthening against the U.S. dollar, a net increase in fair value driven by a decrease in interest rates in the U.S. and Japan, the reinvestment of net investment income and net business inflows.

As of September 30, 2016, our Japanese insurance operations had \$57.3 billion, at fair value, of investments denominated in U.S. dollars, including \$5.1 billion that were hedged to yen through third-party derivative contracts and \$38.0 billion that support liabilities denominated in U.S. dollars, with the remainder hedging our foreign currency exchange rate exposure on U.S. dollar-equivalent equity. As of December 31, 2015, our Japanese insurance operations had \$50.2 billion, at fair value, of investments denominated in U.S. dollars, including \$4.0 billion that were hedged to yen through third-party derivative contracts and \$32.3 billion that support liabilities denominated in U.S. dollars, with the remainder hedging our foreign currency exchange rate exposure on U.S. dollar-equivalent equity. The \$7.1 billion increase in the fair value of U.S. dollar-denominated investments from December 31, 2015, is primarily attributable to a net increase in fair value driven by the decrease in interest rates and portfolio growth as a result of net business inflows and the reinvestment of net investment income.

Our Japanese insurance operations had \$11.1 billion and \$10.0 billion, at fair value, of investments denominated in Australian dollars that support liabilities denominated in Australian dollars as of September 30, 2016 and December 31, 2015, respectively. The \$1.1 billion increase in the fair value of Australian dollar-denominated investments from December 31, 2015, is primarily attributable to portfolio growth as a result of net business inflows and the reinvestment of net investment income as well as a net increase in fair value driven by the decrease in Australian interest rates.

For additional information regarding U.S. and Australian dollar investments held in our Japanese insurance operations and a discussion of our yen hedging strategy, see “—Results of Operations by Segment—International Insurance Division.”

Investment Results

The following tables set forth the income yield and investment income for each major investment category of our general account for the periods indicated. The yields are based on net investment income as reported under U.S. GAAP and as such do not include certain interest related items, such as settlements of duration management swaps which are included in realized gains (losses). Effective January 1, 2016, the Company classified fixed maturity prepayment fees and call premiums in “Net investment income” rather than “Realized investment gains (losses), net.” The impact of this change was immaterial.

Yields are annualized, for interim periods, and are based on quarterly average carrying values except for fixed maturities, equity securities and securities lending activity. Yields for fixed maturities are based on amortized cost.

(1) Yields for equity securities are based on cost. Yields for fixed maturities and short-term investments and cash equivalents are calculated net of liabilities and rebate expenses corresponding to securities lending activity. Yields exclude investment income on assets other than those included in invested assets.

(2) Includes investment income of our asset management operations and derivative operations.

See below for a discussion of the change in the yields for PFI excluding the Closed Block division. The increase in net investment income yield attributable to the Closed Block division for the three months ended September 30, 2016 compared to the three months ended September 30, 2015, was primarily due to higher income from non-coupon investments.

The following tables set forth the income yield and investment income for each major investment category of our general account investments for the periods indicated. The yields are based on net investment income as reported under U.S. GAAP and as such do not include certain interest related items, such as settlements of duration management swaps which are included in realized gains (losses).

The decrease in net investment income yield on the Japanese insurance portfolio for the three months ended September 30, 2016, compared to the three months ended September 30, 2015, was primarily attributable to lower fixed income reinvestment rates and lower yield from non-coupon investments.

Both the U.S. dollar-denominated and Australian dollar-denominated fixed maturities that are not hedged to yen through third party derivative contracts provide a yield that is substantially higher than the yield on comparable yen-denominated fixed maturities. The average amortized cost of U.S. dollar-denominated fixed maturities that are not hedged to yen through third party derivative contracts was approximately \$38.6 billion and \$35.3 billion, for the three months ended September 30, 2016 and 2015, respectively. The majority of U.S. dollar-denominated fixed maturities support liabilities that are denominated in U.S. dollars. The average amortized cost of Australian dollar-denominated fixed maturities that are not hedged to yen through third party derivative contracts was approximately \$9.7 billion and \$8.9 billion, for the three months ended September 30, 2016 and 2015, respectively. The Australian dollar-denominated fixed maturities support liabilities that are denominated in Australian dollars.

The following table sets forth the income yield and investment income for each major investment category of our Japanese insurance operations' general account for the periods indicated. The yields are based on net investment income as reported under U.S. GAAP and as such do not include certain interest related items, such as settlements of duration management swaps which are included in realized gains (losses).

The decrease in net investment income yield on the Japanese insurance portfolio for the nine months ended September 30, 2016, compared to the nine months ended September 30, 2015, was primarily attributable to lower fixed income reinvestment rates and lower income from non-coupon investments.

Both the U.S. dollar-denominated and Australian dollar-denominated fixed maturities that are not hedged to yen through third party derivative contracts provide a yield that is substantially higher than the yield on comparable yen-denominated fixed maturities. The average amortized cost of U.S. dollar-denominated fixed maturities that are not hedged to yen through third party derivative contracts was approximately \$37.1 billion and \$35.0 billion, for the nine

months ended September 30, 2016, and 2015, respectively. The majority of U.S. dollar-denominated fixed maturities support liabilities that are denominated in U.S. dollars. The average amortized cost of Australian dollar-denominated fixed maturities that are not hedged to yen through third party derivative contracts was approximately \$9.5 billion and \$9.2 billion for the nine months ended September 30, 2016, and 2015, respectively. The Australian dollar-denominated fixed maturities support liabilities that are denominated in Australian dollars.

For additional information regarding U.S. and Australian dollar investments held in our Japanese insurance operations, see “—Results of Operations by Segment—International Insurance Division.”

General Account Investments of PFI excluding Closed Block Division

In the following sections, we provide details about our investment portfolio, excluding investments held in the Closed Block division. We believe the details of the composition of our investment portfolio excluding the Closed Block division are most relevant to an understanding of our operations that are pertinent to investors in Prudential Financial because substantially all Closed Block division assets support obligations and liabilities relating to the Closed Block policies only. See Note 6 to the Unaudited Interim Consolidated Financial Statements for further information on the Closed Block.

Energy Related Exposure

As of September 30, 2016, PFI excluding the Closed Block division had direct and indirect energy and related exposure with a market value of approximately \$12.6 billion and a net unrealized gain of approximately \$0.6 billion, which is reflected in AOCI. Of this exposure, \$10.9 billion represented investments in public and private corporate fixed maturity securities and was concentrated primarily in midstream (33%), independent energy (29%), integrated energy (18%) and oil field services (14%). As of September 30, 2016, the credit quality of energy sector fixed maturity securities was 82% investment grade. The remaining exposure of \$1.7 billion was comprised of trading assets, equity securities and private equity investments. Energy investment realized losses were approximately \$3 million from OTTI for the three months ended September 30, 2016. There were no realized losses from sales for the three months ended September 30, 2016. Energy investment realized losses were approximately \$190 million from sales and \$101 million from OTTI for the nine months ended September 30, 2016. Our investments in the energy sector could experience future valuation declines or impairments if energy prices remain at current or lower levels for an extended period of time.

United Kingdom / European Union Exposure

As of September 30, 2016, PFI excluding the Closed Block had direct and indirect United Kingdom exposure with a market value of approximately \$10.5 billion. Net unrealized gains were approximately \$0.7 billion, which is reflected in AOCI. Of this exposure, \$7.3 billion represented public and private corporate fixed maturity securities across a range of sectors, 92% of which was investment grade. In addition, \$1.1 billion represented commercial mortgage loans with a weighted average loan to value ratio of 60% and a weighted average debt service coverage ratio of 2.64 times. The remaining United Kingdom exposure of \$2.1 billion was comprised of trading account assets, equity securities, private equity investments and real estate held through direct ownership. Of the total exposure, 40% was denominated in pound sterling, substantially all of which is hedged back to U.S. dollars.

As of September 30, 2016, PFI excluding the Closed Block had direct and indirect European Union exposure excluding the United Kingdom, with a market value of approximately \$17.9 billion. Net unrealized gains were approximately \$1.8 billion, which is reflected in AOCI. Of this exposure, \$15.1 billion represented public and private corporate fixed maturity securities, 96% of which was investment grade. The remaining European Union exposure excluding the United Kingdom of \$2.8 billion was comprised of trading assets, commercial mortgages, equity securities, private equity investments and real estate held through direct ownership. Of the total exposure, 43% was denominated in foreign currencies, substantially all of which is hedged back to U.S. dollars. The total exposure was concentrated primarily in The Netherlands (28%), France (19%), Italy (13%), Germany (10%), Luxembourg (7%), Ireland (5%) and Sweden (5%).

Fixed Maturity Securities

Fixed Maturity Securities and Unrealized Gains (Losses) by Industry Category

The following table sets forth the composition of the portion of our fixed maturity securities portfolio by industry category attributable to PFI excluding the Closed Block division as of the dates indicated and the associated gross unrealized gains and losses.

Total(5)	\$263,278	\$ 43,809	\$ 1,424	\$305,663	\$231,280	\$ 27,137	\$ 3,398	\$255,019

(1) Investment data has been classified based on standard industry categorizations for domestic public holdings and similar classifications by industry for all other holdings.

(2) Includes \$485 million of gross unrealized gains and less than \$1 million of gross unrealized losses as of September 30, 2016, compared to \$316 million of gross unrealized gains and \$0 million of gross unrealized losses as of December 31, 2015, on securities classified as held-to-maturity.

(3) As of September 30, 2016 and December 31, 2015, based on amortized cost, 77% and 76% represent Japanese government bonds held by our Japanese insurance operations, respectively, with no other individual country representing more than 9% of the balance.

(4) Includes securities related to the Build America Bonds program.

(5) Excluded from the table above are securities held outside the general account in other entities and operations. For additional information regarding investments held outside the general account, see “—Invested Assets of Other Entities and Operations” below. Also excluded from the table above are fixed maturity securities classified as trading. See “—Trading Account Assets Supporting Insurance Liabilities” and “—Other Trading Account Assets” for additional information.

The increase in net unrealized gains from December 31, 2015 to September 30, 2016, was primarily due to a net increase in fair value driven by a decrease in interest rates in both the U.S. and Japan and credit spread tightening.

Asset-Backed Securities

The following tables set forth the amortized cost and fair value of our asset-backed securities attributable to PFI excluding the Closed Block division, by credit quality, as of the dates indicated.

Asset-Backed Securities at Amortized Cost

	September 30, 2016					Total Amortized Cost	Total December 31, 2015
	Lowest Rating	Agency Rating	Rating	BB and below			
	AAA	AA	A	BBB			
	(in millions)						
Collateralized by sub-prime mortgages(1)	\$0	\$0	\$22	\$58	\$412	\$492	\$1,141
Collateralized loan obligations	5,123	20	0	0	0	5,143	4,280
Collateralized by education loans(2)	21	372	0	0	0	393	392
Collateralized by credit cards	193	0	0	0	0	193	201
Collateralized by auto loans	845	0	0	0	0	845	518
Other asset-backed securities(3)	13	82	43	22	113	273	341
Total asset-backed securities(4)	\$6,195	\$474	\$65	\$80	\$525	\$7,339	\$6,873

While there is no market standard definition for securities collateralized by sub-prime mortgages, we define (1) sub-prime mortgages as residential mortgages that are originated to weaker-quality obligors as indicated by weaker credit scores, as well as mortgages with higher loan-to-value ratios or limited documentation.

(2) All of the \$393 million of education loans included above carry a Department of Education guaranty as of September 30, 2016.

(3) Includes asset-backed securities collateralized by bond obligations, aircraft, equipment leases, franchises and timeshares.

(4) Excluded from the table above are asset-backed securities held outside the general account in other entities and operations. Also excluded from the table above are asset-backed securities classified as trading.

Asset-Backed Securities at Fair Value

	September 30, 2016					Total Fair Value	Total December 31, 2015
	Lowest Rating	Agency Rating	Rating	BB and below			
	AAA	AA	A	BBB			
	(in millions)

Other asset-backed securities(3)	13	82	48	22	137	302	376
Total asset-backed securities(4)	\$6,156	\$464	\$71	\$81	\$629	\$7,401	\$6,999

While there is no market standard definition for securities collateralized by sub-prime mortgages, we define (1) sub-prime mortgages as residential mortgages that are originated to weaker-quality obligors as indicated by weaker credit scores, as well as mortgages with higher loan-to-value ratios or limited documentation.

- (2) All of the \$383 million of education loans included above carry a Department of Education guaranty as of September 30, 2016.
- (3) Includes asset-backed securities collateralized by bond obligations, aircraft, equipment leases, franchises and timeshares.
- (4) Excluded from the table above are asset-backed securities held outside the general account in other entities and operations. Also excluded from the table above are asset-backed securities classified as trading.

The tables above provide ratings as assigned by nationally recognized rating agencies as of September 30, 2016, including Standard & Poor's, Moody's and Fitch. In making our investment decisions, rather than relying solely on the rating agencies' evaluations, we assign internal ratings to our asset-backed securities based upon our dedicated asset-backed securities unit's independent evaluation of the underlying collateral and securitization structure, including any guarantees from monoline bond insurers.

Residential Mortgage-Backed Securities

The following table sets forth the amortized cost of our residential mortgage-backed securities attributable to PFI excluding the Closed Block division as of the dates indicated.

	September 30, 2016		December 31, 2015	
	Amortized Cost	% of Total	Amortized Cost	% of Total
	(\$ in millions)			
By security type:				
Agency pass-through securities(1)	\$4,054	90.3 %	\$4,382	90.1 %
Collateralized mortgage obligations	435	9.7	479	9.9
Total residential mortgage-backed securities	\$4,489	100.0 %	\$4,861	100.0 %
Portion rated AA or higher(2)	\$4,432	98.7 %	\$4,791	98.6 %

As of September 30, 2016, of these securities, \$2.903 billion are supported by U.S. government, and \$1.151 billion (1) are supported by foreign governments. As of December 31, 2015, of these securities, \$3.267 billion were supported by the U.S. government and \$1.115 billion were supported by foreign governments.

(2) Based on lowest external rating agency rating.

Commercial Mortgage-Backed Securities

The following tables set forth the amortized cost and fair value of our commercial mortgage-backed securities attributable to PFI excluding the Closed Block division as of the dates indicated, by credit quality and by year of issuance (vintage).

Commercial Mortgage-Backed Securities at Amortized Cost

Vintage	September 30, 2016					Total Amortized Cost	Total December 31, 2015
	Lowest Rating Agency Rating(1)

Total commercial mortgage-backed securities(2)(3)	\$7,953	\$850	\$10	\$9	\$0	\$8,822	\$7,423

(1) The table above provides ratings as assigned by nationally recognized rating agencies as of September 30, 2016.

Excluded from the table above are commercial mortgage-backed securities held outside the general account in (2) other entities and operations. Also excluded from the table above are commercial mortgage-backed securities classified as trading.

(3) Included in the table above, as of September 30, 2016, are agency commercial mortgage-backed securities with fair value of \$826 million, all rated AA.

Fixed Maturity Securities Credit Quality

The Securities Valuation Office (“SVO”) of the NAIC, evaluates the investments of insurers for statutory reporting purposes and assigns fixed maturity securities to one of six categories called “NAIC Designations.” In general, NAIC Designations of “1” highest quality, or “2” high quality, include fixed maturities considered investment grade, which include securities rated Baa3 or higher by Moody’s or BBB- or higher by Standard & Poor’s. NAIC Designations of “3” through “6” generally include fixed maturities referred to as below investment grade, which include securities rated Ba1 or lower by Moody’s and BB+ or lower by Standard & Poor’s. The NAIC Designations for commercial mortgage-backed securities and non-agency residential mortgage-backed securities, including our asset-backed securities collateralized by sub-prime mortgages, are based on security level expected losses as modeled by an independent third-party (engaged by the NAIC) and the statutory carrying value of the security, including any purchase discounts or impairment charges previously recognized.

As a result of time lags between the funding of investments, the finalization of legal documents, and the completion of the SVO filing process, the fixed maturity portfolio generally includes securities that have not yet been designated by the SVO as of each balance sheet date. Pending receipt of SVO designations, the categorization of these securities by NAIC Designation is based on the expected ratings indicated by internal analysis.

Investments of our international insurance companies are not subject to NAIC guidelines. Investments of our Japanese insurance operations are regulated locally by the Financial Services Agency (“FSA”), an agency of the Japanese government. The FSA has its own investment quality criteria and risk control standards. Our Japanese insurance companies comply with the FSA’s credit quality review and risk monitoring guidelines. The credit quality ratings of the investments of our Japanese insurance companies are based on ratings assigned by nationally recognized credit rating agencies, including Moody’s, Standard & Poor’s, or rating equivalents based on ratings assigned by Japanese credit ratings agencies.

The following table sets forth our fixed maturity portfolio by NAIC Designation or equivalent ratings attributable to PFI excluding the Closed Block division as of the dates indicated.

166

(1) Reflects equivalent ratings for investments of the international insurance operations.

Includes, as of September 30, 2016 and December 31, 2015, 718 securities with amortized cost of \$3,205 million

(2) (fair value, \$3,342 million) and 938 securities with amortized cost of \$4,253 million (fair value, \$4,325 million), respectively, that have been categorized based on expected NAIC Designations pending receipt of SVO ratings.

Includes \$485 million of gross unrealized gains and less than \$1 million of gross unrealized losses as of

(3) September 30, 2016, compared to \$316 million of gross unrealized gains and \$0 million of gross unrealized losses as of December 31, 2015, on securities classified as held-to-maturity.

As of September 30, 2016, includes gross unrealized losses of \$229 million on public fixed maturities and \$174

(4) million on private fixed maturities considered to be other than high or highest quality and, as of December 31, 2015, includes gross unrealized losses of \$212 million on public fixed maturities and \$196 million on private fixed maturities considered to be other than high or highest quality.

On an amortized cost basis, as of September 30, 2016, includes \$218,463 million of public fixed maturities and

(5) \$32,245 million of private fixed maturities and, as of December 31, 2015, includes \$190,638 million of public fixed maturities and \$30,443 million of private fixed maturities.

On an amortized cost basis, as of September 30, 2016, includes \$7,353 million of public fixed maturities and

(6) \$5,217 million of private fixed maturities and, as of December 31, 2015, includes \$5,836 million of public fixed maturities and \$4,363 million of private fixed maturities.

On an amortized cost basis, as of September 30, 2016, securities considered below investment grade based on

(7) lowest of external rating agency ratings, total \$13,834 million, or 5% of the total fixed maturities, and include securities considered high or highest quality by the NAIC based on the rules described above.

Credit Derivative Exposure to Public Fixed Maturities

In addition to the credit exposure from public fixed maturities noted above, we sell credit derivatives to enhance the return on our investment portfolio by creating credit exposure similar to an investment in public fixed maturity cash instruments.

In a credit derivative, we may sell credit protection on an identified name or a broad based index, and in return receive a quarterly premium. The majority of the underlying reference names in single name and index credit derivatives where we have sold credit protection, as well as all the counterparties to these agreements, are investment grade credit quality and our credit derivatives have a remaining term to maturity of forty-two years or less. The premium or credit spread generally corresponds to the difference between the yield on the reference name's (or index's) underlying

reference names) public fixed maturity cash instruments and swap rates at the time the agreement is executed. Credit derivative contracts are recorded at fair value with changes in fair value, including the premiums received, recorded in “Realized investment gains (losses), net.”

As of September 30, 2016 and December 31, 2015, PFI excluding the Closed Block division had \$1,158 million and \$807 million of notional amounts of exposure, where we have sold credit protection through credit derivatives, reported at fair value as a liability of \$34 million and \$27 million, respectively. “Realized investment gains (losses), net” from credit derivatives we sold were a gain of \$2 million and \$1 million for the three months ended September 30, 2016 and 2015, and a gain of \$6 million and \$5 million for the nine months ended September 30, 2016 and 2015, respectively. This excludes a credit derivative related to surplus notes issued by a subsidiary of Prudential Insurance. See Note 14 to the Unaudited Interim Consolidated Financial Statements for additional information regarding this derivative.

In addition to selling credit protection, we have purchased credit protection using credit derivatives in order to hedge specific credit exposures in our investment portfolio. As of September 30, 2016 and December 31, 2015, PFI excluding the Closed Block division had \$168 million and \$409 million of notional amounts reported at fair value as a liability of \$5 million and \$4 million, respectively. “Realized investment gains (losses), net” from credit derivatives we purchased were a loss of \$1 million and \$2 million for the three months ended September 30, 2016 and 2015, and a loss of \$4 million and \$7 million for the nine months ended September 30, 2016 and 2015, respectively. See Note 14 to the Unaudited Interim Consolidated Financial Statements for additional information regarding credit derivatives and an overall description of our derivative activities.

OTTI of Fixed Maturity Securities

We maintain separate monitoring processes for public and private fixed maturities and create watch lists to highlight securities that require special scrutiny and management. Our public fixed maturity asset managers formally review all public fixed maturity holdings on a quarterly basis and more frequently when necessary to identify potential credit deterioration whether due to ratings downgrades, unexpected price variances, and/or company or industry specific concerns.

For private placements, our credit and portfolio management processes help ensure prudent controls over valuation and management. We have separate pricing and authorization processes to establish “checks and balances” for new investments. We apply consistent standards of credit analysis and due diligence for all transactions, whether they originate through our own in-house origination staff or through agents. Our regional offices closely monitor the portfolios in their regions. We set all valuation standards centrally, and we assess the fair value of all investments quarterly. Our private fixed maturity asset managers formally review all private fixed maturity holdings on a quarterly basis and more frequently when necessary to identify potential credit deterioration whether due to ratings downgrades, unexpected price variances, and/or company or industry specific concerns. For additional information regarding our policies regarding OTTI for fixed maturity securities, see Note 2 to the Consolidated Financial Statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2015.

OTTI of general account fixed maturity securities attributable to PFI excluding the Closed Block division that were recognized in earnings were \$16 million and \$49 million for the three months ended September 30, 2016 and 2015, respectively, and \$101 million and \$71 million for the nine months ended September 30, 2016 and 2015, respectively.

Trading Account Assets Supporting Insurance Liabilities

The following table sets forth the composition of the TAASIL portfolio attributable to PFI excluding the Closed Block division as of the dates indicated.

	September 30, 2016		December 31, 2015	
	Amortize Cost	Fair Value	Amortize Cost	Fair Value
Short-term investments and cash equivalents	\$908	\$908	\$765	\$765
Fixed maturities:				
Corporate securities	13,296	13,773	12,797	12,851
Commercial mortgage-backed securities	1,873	1,952	1,860	1,862
Residential mortgage-backed securities	1,217	1,261	1,411	1,428
Asset-backed securities	1,311	1,327	1,295	1,299
Foreign government bonds	784	813	680	694
U.S. government authorities and agencies and obligations of U.S. states	399	449	326	369
Total fixed maturities	18,880	19,575	18,369	18,503

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Equity securities	1,223	1,345	1,030	1,254
Total trading account assets supporting insurance liabilities	\$21,011	\$21,828	\$20,164	\$20,522

168

As a percentage of amortized cost, 80% and 77% of the portfolio was publicly traded as of September 30, 2016 and December 31, 2015, respectively. As of both September 30, 2016 and December 31, 2015, 91% of the fixed maturity portfolio was considered high or highest quality based on NAIC or equivalent rating, respectively. As of September 30, 2016, \$1.195 billion of the residential mortgage-backed securities were publicly traded agency pass-through securities, which are supported by U.S. government securities, of which more than 99% have credit ratings of A or higher. Collateralized mortgage obligations, including approximately \$16 million secured by “ALT-A” mortgages, represented the remaining \$22 million of residential mortgage-backed securities, of which 54% have credit ratings of A or better and 46% are BBB and below. For a discussion of this portfolio and changes in the fair value, see “—Experience-Rated Contractholder Liabilities, Trading Account Assets Supporting Insurance Liabilities and Other Related Investments,” above.

Other Trading Account Assets

Other trading account assets consist primarily of certain financial instruments that contain an embedded derivative where we elected to classify the entire instrument as a trading account asset rather than bifurcate. These instruments are carried at fair value, with realized and unrealized gains (losses) reported in “Other income,” and excluded from adjusted operating income. Interest and dividend income from these investments is reported in “Net investment income,” and is included in adjusted operating income.

The following table sets forth the composition of our other trading account assets attributable to PFI excluding the Closed Block division as of the dates indicated.

	September 30, 2016		December 31, 2015	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
	(in millions)			
Short-term investments and cash equivalents	\$1	\$1	\$1	\$1
Fixed maturities	1,144	1,051	1,016	964
Equity securities ⁽¹⁾	442	493	537	596
Total other trading account assets	\$1,587	\$1,545	\$1,554	\$1,561

⁽¹⁾ Included in equity securities are perpetual preferred stock securities that have characteristics of both debt and equity securities.

Commercial Mortgage and Other Loans

Investment Mix

As of September 30, 2016 and December 31, 2015, we held approximately 11% and 12%, respectively, of our general account investments attributable to PFI excluding the Closed Block division in commercial mortgage and other loans. These percentages are net of \$91 million and \$95 million allowance for losses as of September 30, 2016 and December 31, 2015, respectively.

The following table sets forth the composition of our commercial mortgage and other loans portfolio, before the allowance for losses, attributable to PFI excluding the Closed Block division as of the dates indicated.

	September 30, 2016	December 31, 2015
	(in millions)	
Commercial mortgage and agricultural property loans	\$41,035	\$39,002

Uncollateralized loans	746	966
Residential property loans	301	301
Other collateralized loans	11	312
Total commercial mortgage and other loans(1)	\$42,093	\$ 40,581

Excluded from the table above are commercial mortgage and other loans held outside the general account in other (1) entities and operations. For additional information regarding commercial mortgage and other loans held outside the general account, see “—Invested Assets of Other Entities and Operations” below.

We originate commercial mortgage and agricultural property loans using a dedicated investment staff through our various regional offices in the U.S. and international offices primarily in London and Tokyo. All loans are underwritten consistently to our standards using a proprietary quality rating system that has been developed from our experience in real estate and mortgage lending.

Uncollateralized loans primarily represent corporate loans which do not meet the definition of a security under authoritative accounting guidance.

Residential property loans primarily include Japanese recourse loans. Upon default of these recourse loans we can make a claim against the personal assets of the property owner, in addition to the mortgaged property. These loans are also backed by third-party guarantors.

Other collateralized loans include collateralized structured loans and consumer loans.

Composition of Commercial Mortgage and Agricultural Property Loans

Our commercial mortgage and agricultural property loan portfolio strategy emphasizes diversification by property type and geographic location. The following tables set forth the breakdown of the gross carrying values of our general account investments in commercial mortgage and agricultural property loans attributable to PFI excluding the Closed Block division by geographic region and property type as of the dates indicated.

	September 30, 2016		December 31, 2015

Total commercial mortgage and agricultural property loans	\$41,035	100.0 %	\$39,002	100.0 %

Loan-to-value and debt service coverage ratios are measures commonly used to assess the quality of commercial mortgage and agricultural property loans. The loan-to-value ratio compares the amount of the loan to the fair value of the underlying property collateralizing the loan and is commonly expressed as a percentage. Loan-to-value ratios greater than 100% indicate that the loan amount is greater than the collateral value. A smaller loan-to-value ratio indicates a greater excess of collateral value over the loan amount. The debt service coverage ratio compares a property's net operating income to its debt service payments. Debt service coverage ratios less than 1.0 times indicate that property operations do not generate enough income to cover the loan's current debt payments. A larger debt service coverage ratio indicates a greater excess of net operating income over the debt service payments.

As of September 30, 2016, our general account investments in commercial mortgage and agricultural property loans attributable to PFI excluding the Closed Block division had a weighted average debt service coverage ratio of 2.47 times and a weighted average loan-to-value ratio of 56%. As of September 30, 2016, approximately 95% of commercial mortgage and agricultural property loans were fixed rate loans. For those general account commercial mortgage and agricultural property loans that were originated in 2016, the weighted average debt service coverage ratio was 2.39 times and the weighted average loan-to-value ratio was 63%.

The values utilized in calculating these loan-to-value ratios are developed as part of our periodic review of the commercial mortgage and agricultural property loan portfolio, which includes an internal evaluation of the underlying collateral value. Our periodic review also includes a quality re-rating process, whereby we update the internal quality rating originally assigned at underwriting based on the proprietary quality rating system mentioned above. As discussed below, the internal quality rating is a key input in determining our allowance for loan losses.

For loans with collateral under construction, renovation or lease-up, a stabilized value and projected net operating income are used in the calculation of the loan-to-value and debt service coverage ratios. Our commercial mortgage and agricultural property loan portfolio included approximately \$1.6 billion and \$1.4 billion of such loans as of September 30, 2016 and December 31, 2015, respectively. All else being equal, these loans are inherently more risky than those collateralized by properties that have already stabilized. As of September 30, 2016, there are no loan-specific reserves related to these loans. In addition, these unstabilized loans are included in the calculation of our portfolio reserve as discussed below. For information regarding similar loans we hold as part of our commercial mortgage and agricultural property operations, see "—Invested Assets of Other Entities and Operations" below.

The following table sets forth the gross carrying value of our general account investments in commercial mortgage and agricultural property loans attributable to PFI excluding the Closed Block division as of the dates indicated by loan-to-value and debt service coverage ratios.

Commercial Mortgage and Agricultural Property Loans by Loan-to-Value and Debt Service Coverage Ratios

Loan-to-Value Ratio	September 30, 2016 Debt Service Coverage Ratio			Total Commercial Mortgage and Agricultural Property Loans
	Greater than 1.2x	1.0x to < 1.2x	Less than 1.0x

2009 & Prior	3,242	7.9
Total commercial mortgage and agricultural property loans	\$41,035	100.0%

Commercial Mortgage and Other Loan Quality

Ongoing review of the portfolio is performed and loans are placed on watch list status based on a predefined set of criteria, where they are assigned to one of the following categories. We classify loans as closely monitored when we determine there is a collateral deficiency or other credit events that may lead to a potential loss of principal or interest. Loans not in good standing are those loans where we have concluded that there is a high probability of loss of principal, such as when the loan is in the process of foreclosure or the borrower is in bankruptcy. Our workout and special servicing professionals manage the loans on the watch list. As described below, in determining our allowance for losses we evaluate each loan on the watch list to determine if it is probable that amounts due according to the contractual terms of the loan agreement will not be collected.

We establish an allowance for losses to provide for the risk of credit losses inherent in the lending process. The allowance includes loan specific reserves for loans that are determined to be impaired as a result of our loan review process, and a portfolio reserve for probable incurred but not specifically identified losses for loans which are not on the watch list. We define an impaired loan as a loan for which we estimate it is probable that amounts due according to the contractual terms of the loan agreement will not be collected. The loan specific portion of the loss allowance is based on our assessment as to ultimate collectability of loan principal and interest. Valuation allowances for an impaired loan are recorded based on the present value of expected future cash flows discounted at the loan's effective interest rate or based on the fair value of the collateral if the loan is collateral dependent. The portfolio reserve for incurred but not specifically identified losses considers the current credit composition of the portfolio based on the internal quality ratings mentioned above. The portfolio reserves are determined using past loan experience, including historical credit migration, loss probability, and loss severity factors by property type. These factors are reviewed and updated as appropriate. The valuation allowance for commercial mortgage and other loans can increase or decrease from period to period based on these factors.

Our general account investments in commercial mortgage and other loans attributable to PFI excluding the Closed Block division, based upon the recorded investment gross of allowance for credit losses, were \$42,093 million and \$40,581 million as of September 30, 2016 and December 31, 2015, respectively. As a percentage of recorded investment gross of allowance, more than 99% of these assets were current as of both September 30, 2016 and December 31, 2015.

The following table sets forth the change in valuation allowances for our commercial mortgage and other loan portfolio as of the dates indicated.

	September 30, 2016	December 31, 2015
	(in millions)	
Allowance, beginning of year	\$95	\$ 99
Addition to (release of) allowance for losses	(6)	(4)
Charge-offs, net of recoveries	0	0
Change in foreign exchange	2	0
Allowance, end of period	\$91	\$ 95
Loan specific reserve	\$6	\$ 0
Portfolio reserve	\$85	\$ 95

The decrease in the allowance for losses for the nine months ended September 30, 2016 was primarily driven by improved credit quality of the portfolio.

Equity Securities

Investment Mix

The equity securities attributable to PFI excluding the Closed Block division consist principally of investments in common and preferred stock of publicly-traded companies, as well as mutual fund shares. The following table sets forth the composition of our equity securities portfolio and the associated gross unrealized gains and losses as of the dates indicated.

September 30, 2016				December 31, 2015			
Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
(in millions)							

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

Non-redeemable preferred stocks	\$8	\$ 1	\$ 0	\$9	\$21	\$ 1	\$ 1	\$21
Mutual fund common stocks(1)	3,147	521	3	3,665	2,918	333	76	3,175
Other common stocks	2,351	1,292	23	3,620	2,033	1,339	31	3,341
Total equity securities(2)	\$5,506	\$ 1,814	\$ 26	\$7,294	\$4,972	\$ 1,673	\$ 108	\$6,537

(1) Includes mutual fund shares representing our interest in the underlying assets of certain investments supporting corporate-owned life insurance. These mutual funds invest primarily in high yield bonds.

(2) Amounts presented exclude investments in private equity and hedge funds and other investments which are reported in "Other long-term investments."

OTTI of Equity Securities

For those equity securities classified as available-for-sale, we record unrealized gains (losses) to the extent cost is different from estimated fair value. All securities with unrealized losses are subject to our review to identify OTTI in value. For additional information regarding our policies regarding OTTI for equity securities, see Note 2 to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

OTTI of equity securities attributable to PFI excluding the Closed Block division were \$20 million and \$52 million for the three months ended September 30, 2016 and 2015, respectively, and \$55 million and \$66 million for the nine months ended September 30, 2016 and 2015, respectively. For a further discussion of OTTI, see "—Realized Investment Gains (Losses)" above.

Other Long-Term Investments

The following table sets forth the composition of "Other long-term investments," which primarily consists of investments in joint ventures and limited partnerships, other than operating joint ventures, as well as wholly-owned investment real estate and other investments attributable to PFI excluding the Closed Block division, as of the dates indicated.

	September 30, 2016	December 31, 2015
	(in millions)	
Joint ventures and limited partnerships:		
Private equity	\$2,675	\$ 2,927
Hedge funds	1,592	1,160
Real estate-related	547	285
Real estate held through direct ownership	1,741	1,456
Other(1)	763	721
Total other long-term investments	\$7,318	\$ 6,549

Primarily includes derivatives and member and activity stock held in the Federal Home Loan Banks of New York (1) and Boston. For additional information regarding our holdings in the Federal Home Loan Banks of New York and Boston, see Note 9 to the Unaudited Interim Consolidated Financial Statements.

OTTI of Other Long-Term Investments

For joint ventures and limited partnerships, the carrying value of these investments is written down, or impaired to fair value when a decline in value is considered to be other-than-temporary.

OTTI on joint ventures and limited partnerships attributable to PFI excluding the Closed Block division were \$11 million and \$64 million for the three months ended September 30, 2016 and 2015, respectively, and \$51 million and \$90 million for the nine months ended September 30, 2016 and 2015, respectively. For a further discussion of OTTI, see "—Realized Investment Gains (Losses)" above.

For additional information regarding our policies regarding OTTI for joint ventures and limited partnerships, other than operating joint ventures, as well as wholly-owned investment real estate and other investments, see Note 2 to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

Invested Assets of Other Entities and Operations

“Invested Assets of Other Entities and Operations” presented below includes investments held outside the general account and primarily represents investments associated with our asset management operations and derivative operations. Our derivative operations act on behalf of affiliates primarily to manage interest rate, foreign currency, credit and equity exposures. Assets within our asset management operations that are managed for third parties and those assets classified as “Separate account assets” on our balance sheet are not included below.

174

	September 30, 2016	December 31, 2015
	(in millions)	
Fixed Maturities:		
Public, available-for-sale, at fair value	\$204	\$ 94
Private, available-for-sale, at fair value	3	39
Other trading account assets, at fair value	5,717	12,609
Equity securities, available-for-sale, at fair value	13	11
Commercial mortgage and other loans, at book value(1)	621	302
Other long-term investments	992	516
Short-term investments	33	388
Total investments	\$7,583	\$ 13,959

(1) Book value is generally based on unpaid principal balance net of any allowance for losses, the lower of cost or fair value, or fair value, depending on the loan.

The decrease in investments related to the invested assets of other entities and operations in the first nine months of 2016 was primarily attributable to a \$7 billion decrease in other trading account assets due to adoption of the consolidation accounting standard update and resulted in the deconsolidation of certain of its previously consolidated collateralized loan obligations effective January 1, 2016.

Other Trading Account Assets

Other trading account assets are primarily related to assets associated with consolidated variable interest entities for which the Company is the investment manager, as well as our derivative operations used to manage interest rate, foreign currency, credit and equity exposures. The assets of the consolidated variable interest entities are generally offset by liabilities for which the fair value option has been elected. For further information on these consolidated variable interest entities, see Note 5 to the Unaudited Interim Consolidated Financial Statements.

Commercial Mortgage and Other Loans

Our asset management operations include our commercial mortgage operations, which provide mortgage origination, asset management and servicing for our general account, institutional clients, and government sponsored entities such as Fannie Mae, the Federal Housing Administration and Freddie Mac.

The mortgage loans of our commercial mortgage operations are included in “Commercial mortgage and other loans,” with related derivatives and other hedging instruments primarily included in “Other trading account assets” and “Other long-term investments.”

Other Long-Term Investments

Other long-term investments primarily include strategic investments made as part of our asset management operations. We make these strategic investments in real estate, as well as fixed income, public equity and real estate securities, including controlling interests. Certain of these investments are made primarily for purposes of co-investment in our managed funds and structured products. Other strategic investments are made with the intention to sell or syndicate to investors, including our general account, or for placement in funds and structured products that we offer and manage (seed investments). As part of our asset management operations, we also make loans to our managed funds that are secured by equity commitments from investors or assets of the funds. Other long-term investments also include certain assets in consolidated investment funds where the Company is deemed to exercise control over the funds.

Liquidity and Capital Resources

This section supplements, and should be read in conjunction with, “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources” included in our Annual Report on Form 10-K for the year ended December 31, 2015.

175

Table of Contents

Overview

Liquidity refers to the ability to generate sufficient cash resources to meet the payment obligations of the Company. Capital refers to the long-term financial resources available to support the operations of our businesses, fund business growth, and provide a cushion to withstand adverse circumstances. Our ability to generate and maintain sufficient liquidity and capital depends on the profitability of our businesses, general economic conditions and our access to the capital markets and the alternate sources of liquidity and capital described herein.

Effective and prudent liquidity and capital management is a priority across the organization. Management monitors the liquidity of Prudential Financial and its subsidiaries on a daily basis and projects borrowing and capital needs over a multi-year time horizon through our periodic planning process. We believe that cash flows from the sources of funds available to us are sufficient to satisfy the current liquidity requirements of Prudential Financial and its subsidiaries, including under reasonably foreseeable stress scenarios. We have a capital management framework in place that governs the allocation of capital and approval of capital uses. We also employ a Capital Protection Framework to ensure the availability of capital resources to maintain adequate capitalization on a consolidated basis and competitive risk-based capital (“RBC”) ratios and solvency margins for our insurance subsidiaries under various stress scenarios.

Prudential Financial is a Designated Financial Company under Dodd-Frank. As a Designated Financial Company, Prudential Financial is subject to supervision and examination by the Federal Reserve Bank of Boston and to stricter prudential regulatory standards, which include or will include requirements and limitations (many of which are the subject of ongoing rule-making) relating to capital, leverage, liquidity, stress-testing, overall risk management, resolution and recovery plans, credit exposure reporting, early remediation, management interlocks and credit concentration. They may also include standards regarding enhanced public disclosure, short-term debt limits and other related subjects. In addition, the Financial Stability Board (“FSB”) has identified the Company as a global systemically important insurer (“G-SII”). For information on these regulatory initiatives and their potential impact on us, see “—Executive Summary—Regulatory Developments” above and “Business—Regulation” and “Risk Factors” included in our Annual Report on Form 10-K for the year ended December 31, 2015.

During the nine months ended September 30, 2016, we took the following significant actions that impacted our liquidity and capital position:

- We executed the Variable Annuities Recapture, which enabled the Individual Annuities segment to distribute \$1.0 billion of highly liquid assets to Prudential Financial and is expected to result in more efficient management of capital and liquidity associated with our variable annuities business. See “—Executive Summary—Variable Annuities Recapture” for further details;

- We repurchased \$1,375 million of shares of our Common Stock and declared aggregate Common Stock dividends of \$938 million;

- We retired \$750 million of our outstanding senior debt through maturities;

- We repurchased \$500 million of our outstanding senior debt through a tender offer;

- We obtained additional financing for Guideline AXXX and Regulation XXX reserves by increasing the amounts outstanding under captive financing facilities by \$315 million and \$77 million, respectively; and

- A subsidiary, Prudential Holdings of Japan, entered into a new ¥100 billion three-year syndicated, unsecured committed credit facility, providing us with an additional source of liquidity.

Capital

The primary components of the Company’s capitalization consist of equity and outstanding capital debt, including junior subordinated debt. As shown in the table below, as of September 30, 2016, the Company had \$43.1 billion in capital, all of which was available to support the aggregate capital requirements of its divisions and its Corporate and

Other operations. Based on our assessment of these businesses and operations, we believe this level of capital is consistent with our ratings targets.

	September	December
	30,	31,
	2016	2015(1)
	(in millions)	
Equity(2)	\$31,506	\$ 29,605
Junior subordinated debt (i.e., hybrid securities)	5,816	5,811
Other capital debt	5,826	6,069
Total capital	\$43,148	\$ 41,485

176

Table of Contents

- (1) Prior period has been revised to conform to current period presentation due to the adoption ASU 2015-03 regarding debt issuance costs. For more information, see Note 2 to the Unaudited Interim Consolidated Financial Statements.
- (2) Amounts attributable to Prudential Financial, excluding AOCI.

The decrease in other capital debt from December 31, 2015, primarily reflects a senior debt maturity, which was previously utilized to meet capital requirements of our businesses.

We manage Prudential Insurance, Prudential of Japan, Gibraltar Life, and our other domestic and international insurance subsidiaries to regulatory capital levels consistent with our “AA” ratings targets. We utilize the RBC ratio as a primary measure of the capital adequacy of our domestic insurance subsidiaries and the solvency margin ratio as a primary measure of the capital adequacy of our international insurance subsidiaries.

The table below presents the RBC ratios of our most significant domestic insurance subsidiaries as of December 31, 2015, the most recent statutory fiscal year-end and RBC reporting date for these subsidiaries.

	Ratio(1)	
Prudential Insurance(2)	484	%
PALAC	550	%

The RBC ratio calculations are intended to assist insurance regulators in measuring an insurer’s solvency and ability to pay future claims. The reporting of RBC measures is not intended for the purpose of ranking any insurance company or for use in connection with any marketing, advertising or promotional activities, but is available to the public.

(1) Includes Prudential Retirement Insurance and Annuity Company (“PRIAC”), Pruco Life Insurance Company (“Pruco Life”), PLNJ, which is a subsidiary of Pruco Life, and Prudential Legacy Insurance Company of New Jersey (“PLIC”).

The table below presents the solvency margin ratios of our most significant international insurance subsidiaries as of June 30, 2016, the most recent date for which this information is available.

	Ratio	
Prudential of Japan consolidated(1)	840	%
Gibraltar Life consolidated(2)	987	%

(1) Includes Prudential Trust Co., Ltd., a subsidiary of Prudential of Japan.

(2) Includes Prudential Gibraltar Financial Life Insurance Co., Ltd. (“PGFL”), a subsidiary of Gibraltar Life.

All of our domestic and significant international insurance subsidiaries have capital levels that substantially exceed the minimum level required by applicable insurance regulations.

We evaluate the regulatory capital of our domestic and international insurance operations under reasonably foreseeable stress scenarios and believe we have adequate resources to maintain our capital levels comfortably above regulatory requirements under these scenarios. For further information on the calculation of RBC and solvency margin ratios, as well as regulatory minimums, see Note 15 to the Consolidated Financial Statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2015.

Capital Protection Framework

We employ a “Capital Protection Framework” (the “Framework”) to ensure that sufficient capital resources are available to maintain adequate capitalization on a consolidated basis and competitive RBC ratios and solvency margins for our insurance subsidiaries under various stress scenarios. The Framework incorporates the potential impacts from market related stresses, including equity markets, real estate, interest rates, credit losses, and foreign currency exchange rates. In evaluating these potential impacts, we assess risk holistically at the enterprise level, recognizing that our business mix may produce results that partially offset on a net basis. The Framework addresses the potential capital consequences, under stress scenarios, of certain of these net risks and the strategies we use to mitigate them, including the following:

- Equity market exposure affecting the statutory capital of the Company as a whole, which we manage through our equity hedge program and on-balance sheet and contingent sources of capital; and

Table of Contents

Our decision to manage a portion of our interest rate risk internally, on a net basis, at an enterprise level. In implementing this strategy, we execute intercompany derivative transactions between our Corporate and Other operations and certain business segments. We limit our exposure to the resulting net interest rate risk at the enterprise level through options embedded in our hedging strategy that may be exercised if interest rates decline below certain thresholds. During the first nine months of 2016, primarily as a result of the change in our Individual Annuities' risk management strategy, we replaced a significant portion of these intercompany derivatives with external derivatives and expect to manage most of this interest rate risk within the business segments in the future. For more information, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Corporate and Other" and "Management's Discussion and Analysis of Financial Condition and Results of Operations—Individual Annuities."

We periodically recalibrate our hedging strategies in response to changing market conditions. The Framework accommodates periodic volatility within ranges that we deem acceptable, while also providing for additional potential sources of capital, including on-balance sheet capital, derivatives, and contingent sources of capital. Although we continue to enhance our approach, we believe we currently have access to sufficient resources to maintain adequate capitalization and competitive RBC ratios and solvency margins under a range of potential stress scenarios.

Captive Reinsurance Companies

See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Capital—Captive Reinsurance Companies" included in our Annual Report on Form 10-K for the year ended December 31, 2015, for a discussion of our use of captive reinsurance companies.

As a result of the Variable Annuities Recapture described under "—Executive Summary—Variable Annuities Recapture", the risks and associated hedging program related to certain variable annuity and retirement products no longer reside within our captive reinsurance company, Pruco Re. On September 30, 2016, Pruco Re was merged with and into PALAC.

Shareholder Distributions

Share Repurchase Program and Shareholder Dividends

In December 2015, our Board of Directors ("the Board") authorized the Company to repurchase at management's discretion up to \$1.5 billion of its outstanding Common Stock during the period from January 1, 2016 through December 31, 2016. Effective January 1, 2016, this authorization superseded the Company's previous \$1.0 billion share repurchase authorization that covered the period from July 1, 2015 through June 30, 2016. In August 2016, the Board authorized a \$500 million increase to the authorization for calendar year 2016. As a result, the Company's aggregate share repurchase authorization for the full year 2016 is \$2.0 billion.

The timing and amount of share repurchases will be determined by management based on market conditions and other considerations, including any increased capital needs of our businesses due to, among other things, changes in regulatory capital requirements and opportunities for growth and acquisitions. Repurchases may be effected in the open market, through derivative, accelerated repurchase and other negotiated transactions and through plans designed to comply with Rule 10b5-1(c) under the Exchange Act. The following table sets forth information about declarations of Common Stock dividends, as well as repurchases of shares of Prudential Financial's Common Stock, for the nine months ended September 30, 2016.

	Dividend Amount	Shares Repurchased	Total Cost
Three months ended: Per Share		Aggregate Shares	

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-Q

(in millions, except per share data)

March 31, 2016	\$0.70	\$ 316	5.4	\$ 375
June 30, 2016	\$0.70	\$ 313	5.0	\$ 375
September 30, 2016	\$0.70	\$ 309	8.1	\$ 625

As a Designated Financial Company under Dodd-Frank, Prudential Financial expects to be subject to stricter requirements and limitations regarding capital and liquidity. Our compliance with these and other requirements under Dodd-Frank could limit our ability to pay Common Stock dividends and repurchase shares in the future.

Table of Contents

Liquidity

The principles of our liquidity management framework are described in an enterprise-wide Liquidity Policy that is reviewed and approved by the Board. Liquidity management and stress testing are performed on a legal entity basis as the ability to transfer funds between subsidiaries is limited due in part to regulatory restrictions. Liquidity needs are determined through daily and quarterly cash flow forecasting at the holding company and within our operating subsidiaries. A minimum cash balance of at least \$1.3 billion is targeted to ensure that adequate liquidity is available at Prudential Financial to cover fixed expenses in the event that we experience reduced cash flows from our operating subsidiaries at a time when access to capital markets is also not available. This targeted minimum balance is reviewed and approved annually by the Board.

We seek to mitigate the risk of having limited or no access to financing due to stressed market conditions by generally pre-funding capital debt in advance of maturity. We mitigate the refinancing risk associated with our debt that is used to fund operating needs by matching the term of debt with the assets financed. To ensure adequate liquidity in stress scenarios, stress testing is performed for our major operating subsidiaries. We seek to further mitigate liquidity risk by maintaining our access to alternative sources of liquidity, as discussed below.

Liquidity of Prudential Financial

The principal sources of funds available to Prudential Financial, the parent holding company, are dividends and returns of capital from subsidiaries, repayments of operating loans from subsidiaries and highly liquid assets. These sources of funds may be supplemented by Prudential Financial's access to the capital markets as well as the "—Alternative Sources of Liquidity" described below.

The primary uses of funds at Prudential Financial include servicing debt, paying operating expenses, making capital contributions and loans to subsidiaries, paying declared shareholder dividends and repurchasing outstanding shares of Common Stock executed under authority from the Board.

As of September 30, 2016, Prudential Financial had highly liquid assets consisting of cash, short-term investments and U.S. Treasury fixed maturities with a carrying value totaling \$4,576 million, a decrease of \$6,528 million from December 31, 2015. We maintain an intercompany liquidity account that is designed to optimize the use of cash by facilitating the lending and borrowing of funds between Prudential Financial and its subsidiaries on a daily basis. Excluding net borrowings from this intercompany liquidity account, Prudential Financial had highly liquid assets of \$3,529 million as of September 30, 2016, a decrease of \$1,533 million from December 31, 2015.

The following table sets forth Prudential Financial's principal sources and uses of highly liquid assets, excluding net borrowings from our intercompany liquidity account, for the period indicated.

	Nine Months Ended September 30, 2016 (in millions)

Table of Contents

Includes dividends and/or returns of capital of \$900 million from Prudential Insurance, \$576 million from asset management subsidiaries, \$774 million from international insurance subsidiaries, \$59 million from Prudential (1) Annuities Holding Company and \$13 million from other subsidiaries. Excludes dividends and/or returns of capital associated with the Variable Annuities Recapture.

(2) Excludes \$36 million related to trades that settled in October 2016.

(3) Includes cash payments made on dividends declared in prior periods.

Includes capital contributions of \$355 million to international insurance subsidiaries (\$159 million of which was (4) related to our indirect investment in AFP Habitat), \$36 million to Pruco Re and \$4 million to other subsidiaries.

Excludes capital contributions associated with the Variable Annuities Recapture.

Includes net receipts from subsidiaries from the issuance of notes of \$357 million from international insurance (5) subsidiaries and \$494 million from Pruco Life, offset by net borrowings of \$790 million by asset management subsidiaries, \$350 million by Prudential Universal Reinsurance Company and \$4 million from other subsidiaries. Restrictions on Dividends and Returns of Capital from Subsidiaries

Our insurance companies are subject to limitations on the payment of dividends and other transfers of funds to Prudential Financial and other affiliates under applicable insurance law and regulation. In the United States, dividends above thresholds calculated under applicable insurance laws are considered “extraordinary” and require the approval of the relevant state insurance regulator. Also, more generally, the payment of dividends by any of our subsidiaries is subject to declaration by their Board of Directors and can be affected by market conditions and other factors. See Note 15 to the Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 31, 2015 for details on specific dividend restrictions.

Domestic insurance subsidiaries. Prudential Insurance is permitted to pay ordinary dividends based on calculations specified under New Jersey insurance law, subject to prior notification to the New Jersey Department of Banking and Insurance (“NJDOBI”). Any distributions above this amount in any twelve month period are considered to be “extraordinary” dividends, and the approval of NJDOBI is required prior to payment. The laws regulating dividends of the states where our other domestic insurance companies are domiciled are similar, but not identical, to New Jersey’s. During the first nine months of 2016, Prudential Insurance paid aggregate dividends of \$3.0 billion (\$1.0 billion as an ordinary dividend and \$2.0 billion as an extraordinary dividend) to Prudential Financial. This amount consisted of a \$2.1 billion dividend associated with the Variable Annuities Recapture, which was subsequently contributed to PALAC to support the risks of that business, and a \$900 million dividend relating to the operations of Prudential Insurance.

International insurance subsidiaries. Capital redeployment from our international insurance subsidiaries is subject to local regulatory requirements in the international jurisdictions in which they operate. Our most significant international insurance subsidiaries, Prudential of Japan and Gibraltar Life, are permitted to pay common stock dividends based on calculations specified by Japanese insurance law, subject to prior notification to the FSA. Dividends in excess of these amounts and other forms of capital distribution require the prior approval of the FSA. In addition to paying common stock dividends, international insurance operations may return capital to Prudential Financial through other means, such as the repayment of subordinated debt or preferred stock obligations held by Prudential Financial or other affiliates. During the first nine months of 2016, Prudential Financial received \$476 million from Prudential International Insurance Holdings, the domestic parent of our international insurance subsidiaries, of which ¥46 billion, or approximately \$446 million, was from Japanese subsidiaries and 35.0 billion, or approximately \$30 million, was from Prudential of Korea.

Other subsidiaries. The ability of our asset management subsidiaries and the majority of our other operating subsidiaries to pay dividends is largely unrestricted from a regulatory standpoint.

Liquidity of Insurance Subsidiaries

We manage the liquidity of our insurance operations to ensure stable, reliable and cost-effective sources of cash flows to meet all of our obligations. Liquidity within each of our insurance subsidiaries is provided by a variety of sources, including portfolios of liquid assets. The investment portfolios of our subsidiaries are integral to the overall liquidity of our insurance operations. We segment our investment portfolios and employ an asset/liability management approach specific to the requirements of each of our product lines. This enhances the discipline applied in managing the liquidity, as well as the interest rate and credit risk profiles, of each portfolio in a manner consistent with the unique characteristics of the product liabilities.

Liquidity is measured against internally-developed benchmarks that take into account the characteristics of both the asset portfolio and the liabilities that they support. We consider attributes of the various categories of liquid assets (for example, type of asset and credit quality) in calculating internal liquidity measures to evaluate our insurance operations' liquidity under various stress scenarios, including company-specific and market-wide events. We continue to believe that cash generated by ongoing operations and the liquidity profile of our assets provide sufficient liquidity under reasonably foreseeable stress scenarios for each of our insurance subsidiaries.

Table of Contents

The principal sources of liquidity for our insurance subsidiaries are premiums, investment and fee income, and investment maturities and sales associated with our insurance and annuity operations, as well as internal and external borrowings. The principal uses of that liquidity include benefits, claims and dividends paid to policyholders, and payments to policyholders and contractholders in connection with surrenders, withdrawals and net policy loan activity. Other uses of liquidity include commissions, general and administrative expenses, purchases of investments, the payment of dividends to the parent holding company, hedging activity and payments in connection with financing activities.

The following table sets forth the fair value of certain of our domestic insurance operations' portfolio of liquid assets, as of the dates indicated.

	September 30, 2016					Total	December 31, 2015
	Prudential Insurance (in billions)	PLIC	PRIAC	PALAC	Pruco Life

(2) Represents our international insurance operations, excluding Japan.

(3) Excludes fixed maturities designated as held-to-maturity. Classified by NAIC or equivalent rating.

(4) As of September 30, 2016, \$111.4 billion, or 73%, were invested in government or government agency bonds.

Table of Contents

Liquidity associated with other activities

Hedging activities associated with living benefit guarantees

For the portion of our Individual Annuities' risk management strategy executed through hedging, we enter into a range of exchange-traded, cleared and other OTC equity and interest rate derivatives in order to hedge certain capital market risks related to more severe market conditions. For a full discussion of our Individual Annuities' risk management strategy, see "—Results of Operations by Segment—U.S. Retirement Solutions and Investment Management Division—Individual Annuities." This portion of our Individual Annuities' risk management strategy requires access to liquidity to meet payment obligations relating to these derivatives, such as payments for periodic settlements, purchases, maturities and terminations. These liquidity needs can vary materially due to, among other items, changes in interest rates, equity markets, mortality and policyholder behavior. Through March 31, 2016, this hedging portion of our risk management strategy was executed in Pruco Re. Effective April 1, 2016, following the Variable Annuities Recapture, this hedging portion of our risk management strategy resides in certain of our domestic life insurance subsidiaries. Future liquidity needs may be funded with available resources within these subsidiaries and from other resources of Prudential Financial and its affiliates.

The hedging portion of our Individual Annuities' risk management strategy may also result in collateral postings on derivatives to or from counterparties. The net collateral position depends on changes in interest rates and equity markets related to the amount of the exposures hedged. Depending on market conditions, the collateral posting requirements can result in material liquidity needs. Also, certain derivatives entered into on or after June 10, 2013, are subject to mandatory clearing requirements under Dodd-Frank and, as a result, typically have additional collateral requirements. As of September 30, 2016, the derivatives comprising the hedging portion of our risk management strategy were in a net receive position of \$8.9 billion compared to a net receive position of \$4.8 billion as of December 31, 2015. The change in collateral position was primarily driven by a decrease in interest rates and the inclusion of collateral from certain of our domestic statutory life insurance entities as a result of the Variable Annuities Recapture.

Foreign exchange hedging activities

We employ various hedging strategies to manage potential exposure to foreign currency exchange rate movements, particularly those associated with the yen. Our overall yen hedging strategy calibrates the hedge level to preserve the relative contribution of our yen-based business to the Company's overall return on equity on a leverage neutral basis. The hedging strategy includes two primary components:

Income Hedges—We hedge a portion of our prospective yen-based earnings streams by entering into external forward currency derivative contracts that effectively fix the currency exchange rates for that portion of earnings, thereby reducing volatility from foreign currency exchange rate movements. As of September 30, 2016, we have hedged 100%, 100%, 61% and 18% of expected yen-based earnings for 2016, 2017, 2018 and 2019, respectively.

Equity Hedges—We hold both internal and external hedges primarily to hedge our U.S. dollar-equivalent equity. These hedges also mitigate volatility in the solvency margins of yen-based subsidiaries resulting from changes in the market value of their U.S. dollar-denominated investments hedging our U.S. dollar-equivalent equity attributable to changes in the yen-U.S. dollar exchange rate.

For additional information on our hedging strategy, see "—Results of Operations by Segment—International Insurance Division."

Cash settlements from these hedging activities result in cash flows between subsidiaries of Prudential Financial and either yen-based subsidiaries or external parties. The cash flows are dependent on changes in foreign currency exchange rates and the notional amount of the exposures hedged. For example, a significant yen depreciation over an extended period of time could result in net cash inflows, while a significant yen appreciation could result in net cash outflows. The following tables set forth information about net cash settlements and the net asset or liability resulting from the hedging activities related to the yen and other currencies.

(1) Includes Korean won-denominated cash settlements of \$11 million and \$1 million for the nine months ended September 30, 2016 and 2015, respectively.

(2) Includes a liability of \$15 million and an asset of \$29 million as of September 30, 2016 and December 31, 2015, respectively, both of which are primarily denominated in Korean won.

As of September 30, 2016, approximately \$70 million, \$(354) million, and \$(559) million of the net market value (3) is scheduled to settle in 2016, 2017, and thereafter, respectively. The net market value of the assets (liabilities) will vary with changing market conditions to the extent there are no corresponding offsetting positions.

Asset Management operations

The principal sources of liquidity for our fee-based asset management businesses include asset management fees and commercial mortgage origination and servicing fees. The principal uses of liquidity include general and administrative expenses and distributions of dividends and returns of capital to Prudential Financial. The primary liquidity risks for our fee-based asset management businesses relate to their profitability, which is impacted by market conditions and our investment management performance. We believe the cash flows from our fee-based asset management businesses are adequate to satisfy the current liquidity requirements of these operations, as well as requirements that could arise under reasonably foreseeable stress scenarios, which are monitored through the use of internal measures.

The principal sources of liquidity for our strategic investments held in our asset management businesses are cash flows from investments, the ability to liquidate investments, and available borrowing lines from internal sources, including Prudential Financial and Prudential Funding, LLC (“Prudential Funding”), a wholly-owned subsidiary of Prudential Insurance. The primary liquidity risks include the inability to sell assets in a timely manner, declines in the value of assets and credit defaults. There have been no material changes to the liquidity position of our asset management operations since December 31, 2015.

Alternative Sources of Liquidity

In addition to asset-based financing as discussed below, Prudential Financial and certain subsidiaries have access to other sources of liquidity, including membership in the Federal Home Loan Banks, commercial paper programs, and a put option agreement. The Company also maintains syndicated, unsecured committed credit facilities as an alternative source of liquidity. In September 2016, Prudential Holdings of Japan, a wholly-owned subsidiary of Prudential Financial, entered into a ¥100 billion three-year syndicated, unsecured committed credit facility. See Note 9 to our Unaudited Interim Consolidated Financial Statements for more information on these programs.

Table of Contents

Asset-based Financing

We conduct asset-based or secured financing within our insurance and other subsidiaries, including transactions such as securities lending, repurchase agreements and mortgage dollar rolls, to earn spread income, to borrow funds, or to facilitate trading activity. These programs are primarily driven by portfolio holdings of securities that are lendable based on counterparty demand for these securities in the marketplace. The collateral received in connection with these programs is primarily used to purchase securities in the short-term spread portfolios of our insurance entities. Investments held in the short-term spread portfolios include cash and cash equivalents, short-term investments, mortgage loans and fixed maturities, including mortgage- and asset-backed securities, with a weighted average life at time of purchase by the short-term portfolios of four years or less. Floating rate assets comprise the majority of our short-term spread portfolio. These short-term portfolios are subject to specific investment policy statements, which among other things, do not allow for significant asset/liability interest rate duration mismatch.

The following table sets forth our liabilities under asset-based or secured financing programs as of the dates indicated.

	September 30, 2016			December 31, 2015		
	PFI			PFI		
	Excluding	Closed	Consolidated	Excluding	Closed	Consolidated
	Block	Block	Block	Block	Block	Block

Securities sold but not yet purchased	3	0	3	2	0	2
Total(1)	\$8,386	\$ 3,484	\$ 11,870	\$7,518	\$ 3,862	\$ 11,380
Portion of above securities that may be returned to the Company overnight requiring immediate return of the cash collateral(2)	\$3,573	\$ 2,379	\$ 5,952	\$5,574	\$ 2,117	\$ 7,691
Weighted average maturity, in days(3)	9	17		8	17	

The daily weighted average outstanding balance for the three and nine months ended September 30, 2016, was (1) \$8,752 million and \$8,402 million, respectively, for PFI excluding the Closed Block division, and \$4,027 million and \$4,451 million, respectively, for the Closed Block division.

(2) Amount for PFI excluding the Closed Block division as of December 31, 2015, includes \$2,256 million of securities that had a term greater than one day due to the timing of the January 1, 2016, holiday.

(3) Excludes securities that may be returned to the Company overnight.

As of September 30, 2016, our domestic insurance entities had assets eligible for the asset-based or secured financing programs of \$114.0 billion, of which \$11.8 billion were on loan. Taking into account market conditions and outstanding loan balances as of September 30, 2016, we believe approximately \$18.8 billion of the remaining eligible assets are readily lendable, including approximately \$13.6 billion relating to PFI excluding the Closed Block division, of which \$3.2 billion relates to certain separate accounts and may only be used for financing activities related to those accounts, and the remaining \$5.2 billion relating to the Closed Block division.

Financing Activities

As of September 30, 2016, total short-term and long-term debt of the Company on a consolidated basis was \$19.7 billion, a decrease of \$1.1 billion from December 31, 2015. The following table sets forth total consolidated

borrowings of the Company as of the dates indicated. We may, from time to time, seek to redeem or repurchase our outstanding debt securities through open market purchases, individually negotiated transactions or otherwise. Any such repurchases will depend on prevailing market conditions, our liquidity position and other factors.

Total borrowings	\$15,902	\$ 3,763	\$ 19,665	\$17,185	\$ 3,625	\$ 20,810

(1) Prior period has been revised to conform to current period presentation due to the adoption ASU 2015-03 regarding debt issuance costs. For more information, see Note 2 to the Unaudited Interim Consolidated Financial Statements.

(2) Includes \$73 million at September 30, 2016, of limited and non-recourse borrowing mortgage debt.

(3) Amounts are net of assets under set-off arrangements of \$5,292 million and \$4,889 million as of September 30, 2016 and December 31, 2015, respectively.

(4) Limited and non-recourse borrowing primarily represents mortgage debt of our subsidiaries that has recourse only to real estate investment property.

As of September 30, 2016 and December 31, 2015, we were in compliance with all debt covenants related to the borrowings in the table above. For further information on our short- and long-term debt obligations, see Note 9 to our Unaudited Interim Consolidated Financial Statements contained herein and “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources” included in our Annual Report on Form 10-K for the year ended December 31, 2015.

Prudential Financial’s borrowings decreased \$1,283 million from December 31, 2015, primarily driven by the maturity of \$750 million of senior debt and our repurchase of \$500 million of senior debt through a tender offer. Borrowings of our subsidiaries increased \$138 million from December 31, 2015, primarily driven by the issuance of \$103 million of mortgage debt and a \$46 million increase in commercial paper outstanding.

Term and Universal Life Reserve Financing

We use captive reinsurance subsidiaries to finance the portion of the statutory reserves required to be held by our domestic life insurance companies under Regulation XXX and Guideline AXXX that we consider to be non-economic. The financing arrangements involve the reinsurance of term and universal life business to our captive reinsurers and the issuance of surplus notes by those captives that are treated as capital for statutory purposes. These surplus notes are subordinated to policyholder obligations, and the payment of principal on the surplus notes may only be made with prior insurance regulatory approval.

To date, we have entered into agreements with external counterparties providing for the issuance of up to an aggregate of \$8,850 million of surplus notes by our captive reinsurers in return for the receipt of credit-linked notes

(“Credit-Linked Note Structures”). Under the agreements, the captive receives in exchange for the surplus notes one or more credit-linked notes issued by a special-purpose affiliate of the Company with an aggregate principal amount equal to the surplus notes outstanding. The captive holds the credit-linked notes as assets supporting Regulation XXX or Guideline AXXX non-economic reserves, as applicable. As of September 30, 2016, an aggregate of \$6,892 million of surplus notes was outstanding under our Credit-Linked Note Structures, reflecting an increase of \$392 million since December 31, 2015. For more information on our Credit-Linked Note Structures, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Financing Activities” in our Annual Report on Form 10-K for the year ended December 31, 2015.

Table of Contents

The following table summarizes our Credit-Linked Note Structures, which are reported on a net basis, as of September 30, 2016.

Credit-Linked Note Structures:	Surplus Notes		Outstanding	
	Original Issue Dates	Maturity Dates	as of September 30, 2016	Facility Size
	(\$ in millions)			
XXX	2011-2014	2021-2024	\$ 1,750 (1)	\$ 2,000
AXXX	2013	2033	2,415	3,500
XXX	2014-2015	2027-2034	1,600 (2)	1,600
XXX	2014	2024	1,127	1,750
Total Credit-Linked Note Structures			\$ 6,892	\$ 8,850

(1) Prudential Financial has agreed to reimburse any amounts paid under the credit-linked notes issued in this structure.

(2) The \$1.6 billion surplus note represents an intercompany transaction that eliminates upon consolidation. Prudential Financial has agreed to reimburse amounts paid under credit-linked notes issued in this structure up to \$1.0 billion.

As of September 30, 2016, we also had outstanding an aggregate of \$3.4 billion of debt issued for the purpose of financing Regulation XXX and Guideline AXXX non-economic reserves, of which approximately \$1.5 billion relates to Regulation XXX reserves and approximately \$1.9 billion relates to Guideline AXXX reserves, all of which was issued directly by or guaranteed by Prudential Financial. Under certain of the financing arrangements pursuant to which this debt was issued, Prudential Financial has agreed to make capital contributions to the applicable captive reinsurance subsidiary to reimburse it for investment losses or to maintain its capital above prescribed minimum levels. In addition, as of September 30, 2016, for purposes of financing Guideline AXXX reserves, our captives had outstanding approximately \$4.0 billion of surplus notes that were issued to affiliates.

In December 2014, the NAIC adopted a new actuarial guideline, known as “AG 48”, that requires us to hold cash and rated securities in greater amounts than we previously held to support economic reserves for certain of our term and universal life policies. The additional asset requirement for 2015 of approximately \$400 million was funded during the first quarter of 2016 with a combination of existing assets and newly purchased assets sourced from affiliated financing. We expect the additional asset requirement for 2016 to be similar to the 2015 amount. While we continue to work with regulators and industry participants on potential long-term solutions, we currently plan to finance the 2016 additional asset requirement using internal resources.

Ratings

See “Management's Discussion and Analysis of Financial Condition and Results of Operations—Ratings” in our Annual Report on Form 10-K for the year ended December 31, 2015, for a discussion of our financial strength and credit ratings and their impact on our businesses. This section supplements, and should be read in conjunction with, the above.

On September 2, 2016, A.M. Best affirmed Prudential Financial’s long-term senior debt rating at “a-” and short-term debt rating at “AMB-1”. A.M. Best also affirmed the “A+” financial strength ratings of Prudential Financial’s core subsidiaries, including Prudential Insurance, PALAC and PRIAC, with stable outlooks.

On September 7, 2016, Fitch revised its Sector Outlook for U.S. life insurers to Negative. Fitch's Sector Outlook reflects its view of underlying fundamental trends in the industry and the current operating environment. The revision of the Sector Outlook to Negative is due to macro challenges tied to declining interest rates and market volatility. At the same time, Fitch kept its Rating Outlook on the U.S. life insurance sector as Stable. The Rating Outlook indicates the direction in which ratings are likely to move over the next 18-24 months. The current Stable rating reflects Fitch's view that the impact of the negative fundamentals indicated in their Sector Outlook remain manageable in the context of industry earnings and capital over the outlook period, and Fitch's expectations that key credit metrics will remain largely consistent with current ratings. These indicators are not necessarily a precursor of a rating change nor do they preclude a rating agency from changing a rating at any time without notice.

Off-Balance Sheet Arrangements

Guarantees and Other Contingencies

In the course of our business, we provide certain guarantees and indemnities to third parties pursuant to which we may be contingently required to make payments in the future. See "Commitments and Guarantees" within Note 15 to the Unaudited Interim Consolidated Financial Statements for additional information.

Table of Contents

Other Contingent Commitments

We also have other commitments, some of which are contingent upon events or circumstances not under our control, including those at the discretion of our counterparties. See “Commitments and Guarantees” within Note 15 to the Unaudited Interim Consolidated Financial Statements for additional information regarding these commitments. For further discussion of certain of these commitments that relate to our separate accounts, also see “—Liquidity—Liquidity associated with other activities—Asset Management operations.”

Other Off-Balance Sheet Arrangements

In November 2013, we entered into a put option agreement with a Delaware trust that gives Prudential Financial the right, at any time over a ten-year period, to issue up to \$1.5 billion of senior notes to the trust in return for principal and interest strips of U.S. Treasury securities that are held by the trust. See Note 9 to our Unaudited Interim Consolidated Financial Statements for more information on this put option agreement. In 2014, Prudential Financial entered into financing transactions, pursuant to which it issued \$500 million of limited recourse notes and, in return, obtained \$500 million of asset-backed notes from a Delaware master trust and ultimately contributed the asset-backed notes to its subsidiary, PRIAC. As of September 30, 2016, no principal payments have been received or are currently due on the asset-backed notes and, as a result, there was no payment obligation under the limited recourse notes. Accordingly, none of the notes are reflected in the Company’s Unaudited Interim Consolidated Financial Statements as of that date.

Other than as described above, we do not have retained or contingent interests in assets transferred to unconsolidated entities, or variable interests in unconsolidated entities or other similar transactions, arrangements or relationships that serve as credit, liquidity or market risk support, that we believe are reasonably likely to have a material effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or our access to or requirements for capital resources. In addition, other than the agreements referred to above, we do not have relationships with any unconsolidated entities that are contractually limited to narrow activities that facilitate our transfer of or access to associated assets.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk of fluctuations in the value of financial instruments as a result of absolute or relative changes in interest rates, foreign currency exchange rates, equity prices or commodity prices. To varying degrees, our products and services, and the investment activities supporting them, generate exposure to market risk. The market risk incurred, and our strategies for managing this risk, vary by product. As of September 30, 2016, there have been no material changes in our economic exposure to market risk from December 31, 2015, a description of which may be found in our Annual Report on Form 10-K, for the year ended December 31, 2015, Item 7A, “Quantitative and Qualitative Disclosures about Market Risk,” filed with the Securities and Exchange Commission. See Item 1A, “Risk Factors” included in the Annual Report on Form 10-K for the year ended December 31, 2015, for a discussion of how difficult conditions in the financial markets and the economy generally may materially adversely affect our business and results of our operations.

ITEM 4. CONTROLS AND PROCEDURES

In order to ensure that the information we must disclose in our filings with the SEC is recorded, processed, summarized, and reported on a timely basis, the Company’s management, including our Chief Executive Officer and Chief Financial Officer, have reviewed and evaluated the effectiveness of our disclosure controls and procedures, as defined in Exchange Act Rule 13a-15(e), as of September 30, 2016. Based on such evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of September 30, 2016, our disclosure controls and

procedures were effective. No change in our internal control over financial reporting, as defined in Exchange Act Rule 13a-15(f), occurred during the quarter ended September 30, 2016, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II—OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

See Note 15 to the Unaudited Interim Consolidated Financial Statements under “—Litigation and Regulatory Matters” for a description of material pending litigation and regulatory matters affecting us, and certain risks to our businesses presented by such matters, which is incorporated herein by reference.

ITEM 1A. RISK FACTORS

You should carefully consider the risks described under “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2015. These risks could materially affect our business, results of operations or financial condition, cause the trading price of our Common Stock to decline materially or cause our actual results to differ materially from those expected or those expressed in any forward looking statements made by or on behalf of the Company. These risks are not exclusive, and additional risks to which we are subject include, but are not limited to, the factors mentioned under “Forward-Looking Statements” above and the risks of our businesses described elsewhere in this Quarterly Report on Form 10-Q.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(c) The following table provides information about purchases by the Company during the three months ended September 30, 2016, of its Common Stock:

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid of Share	Total Number of Shares Purchased as Part of	
			Publicly Announced Program ⁽²⁾	Approximate Dollar Value of Shares that May Yet be Purchased under the Program ⁽²⁾
July 1, 2016 through July 31, 2016	1,702,483	\$ 73.51	1,700,454	
August 1, 2016 through August 31, 2016	3,253,144	\$ 77.09	3,243,098	
September 1, 2016 through September 30, 2016	3,136,181	\$ 79.79	3,133,298	
Total	8,091,808	\$ 77.38	8,076,850	\$625,000,000

(1) Includes shares of Common Stock withheld from participants for income tax withholding purposes whose shares of restricted stock units vested during the period. Such restricted stock units were originally issued to participants pursuant to the Prudential Financial, Inc. Omnibus Incentive Plan that was adopted by the Company’s Board of Directors in March 2003 (as subsequently amended and restated).

In December 2015, Prudential Financial’s Board of Directors authorized the Company to repurchase at management’s discretion up to \$1.5 billion of its outstanding Common Stock during the period from January 1, 2016 through December 31, 2016. Effective January 1, 2016, this authorization superseded the Company’s previous (2) \$1.0 billion share repurchase authorization that was announced in June 2015, covering the period from July 1, 2015 through June 30, 2016. In August 2016, the Board of Directors authorized a \$500 million increase to this authorization for calendar year 2016. As a result, the Company’s aggregate share repurchase authorization for the full year 2016 is \$2.0 billion.
