1934

FOR THE TRANSITION PERIOD FROM TO
COMMISSION FILE NUMBER 001-16707

Prudential Financial, Inc.

(Exact Name of Registrant as Specified in its Charter)

New Jersey 22-3703799

(State or Other Jurisdiction of (I.R.S. Employer
Incorporation or Organization) Identification Number)

751 Broad Street

Newark, New Jersey 07102

(973) 802-6000

(Address and Telephone Number of Registrant's Principal Executive Offices)

SECURITIES REGISTERED PURSUANT TO SECTION 12(b) OF THE ACT:

Title of Each Class Name of Each Exchange on Which Registered

Common Stock, Par Value \$.01 New York Stock Exchange

SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE ACT: NONE

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes x No "

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the
Act. Yes " No x

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the
Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was
required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes x No "

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any,
every Interactive Data File required to be submitted and posted pursuant to Rule 405 of the Regulation S-T (§232.405
of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit
and post such files). Yes x No "

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained
herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements
incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. "

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a
smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated
filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-K

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

As of June 30, 2017, the aggregate market value of the registrant's Common Stock (par value \$0.01) held by non-affiliates of the registrant was \$46.18 billion and 427 million shares of the Common Stock were outstanding. As of January 31, 2018, 422 million shares of the registrant's Common Stock (par value \$0.01) were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Part III of this Form 10-K incorporates by reference certain information from the Registrant's Definitive Proxy Statement for the Annual Meeting of Shareholders to be held on May 8, 2018, to be filed by the Registrant with the Securities and Exchange Commission pursuant to Regulation 14A not later than 120 days after the year ended December 31, 2017.

Forward-Looking Statements

Certain of the statements included in this Annual Report on Form 10-K constitute forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Words such as “expects,” “believes,” “anticipates,” “includes,” “plans,” “assumes,” “estimates,” “projects,” “intends,” “should,” “will,” “shall” or variations of such generally part of forward-looking statements. Forward-looking statements are made based on management’s current expectations and beliefs concerning future developments and their potential effects upon Prudential Financial, Inc. and its subsidiaries. There can be no assurance that future developments affecting Prudential Financial, Inc. and its subsidiaries will be those anticipated by management. These forward-looking statements are not a guarantee of future performance and involve risks and uncertainties, and there are certain important factors that could cause actual results to differ, possibly materially, from expectations or estimates reflected in such forward-looking statements, including, among others: (1) losses on investments or financial contracts due to deterioration in credit quality or value, or counterparty default; (2) losses on insurance products due to mortality experience, morbidity experience or policyholder behavior experience that differs significantly from our expectations when we price our products; (3) changes in interest rates, equity prices and foreign currency exchange rates that may (a) adversely impact the profitability of our products, the value of separate accounts supporting these products or the value of assets we manage, (b) result in losses on derivatives we use to hedge risk or increase collateral posting requirements and (c) limit opportunities to invest at appropriate returns; (4) guarantees within certain of our products, in particular our variable annuities, which are market sensitive and may decrease our earnings or increase the volatility of our results of

operations or financial position; (5) liquidity needs resulting from (a) derivative collateral market exposure, (b) asset/liability mismatches, (c) the lack of available funding in the financial markets or (d) unexpected cash demands due to severe mortality calamity or lapse events; (6) financial or customer losses, or regulatory and legal actions, due to inadequate or failed processes or systems, human error or misconduct, and external events, such as (a) disruption of our systems and data, (b) an information security breach, (c) a failure to protect the privacy of sensitive data or (d) reliance on third-parties, including to distribute our products; (7) changes in the regulatory landscape, including related to (a) regulation under the Dodd-Frank Wall Street Reform and Consumer Protection Act, (b) changes in tax laws, (c) the U.S. Department of Labor's fiduciary rules and other fiduciary rule developments, (d) U.S. state insurance laws and developments regarding group-wide supervision, capital and reserves, (e) insurer capital standards outside the U.S. and (f) privacy and cybersecurity regulation; (8) technological changes which may adversely impact companies in our investment portfolio or cause insurance experience to deviate from our assumptions; (9) ratings downgrades; (10) market conditions that may adversely affect the sales or persistency of our products; (11) competition; and (12) reputational damage. Prudential Financial, Inc. does not undertake to update any particular forward-looking statement included in this document. See "Risk Factors" included in this Annual Report on Form 10-K for discussion of certain risks relating to our businesses and investment in our securities.

Table of Contents

Throughout this Annual Report on Form 10-K, “Prudential Financial” and the “Registrant” refer to Prudential Financial, Inc., the ultimate holding company for all of our companies. “Prudential Insurance” refers to The Prudential Insurance Company of America. “Prudential,” the “Company,” “we” and “our” refer to our consolidated operations.

PART I

ITEM 1. BUSINESS

Overview

Prudential Financial, Inc., a financial services leader with approximately \$1.394 trillion of assets under management as of December 31, 2017, has operations in the United States, Asia, Europe and Latin America. Through our subsidiaries and affiliates, we offer a wide array of financial products and services, including life insurance, annuities, retirement-related services, mutual funds and investment management. We offer these products and services to individual and institutional customers through proprietary and third-party distribution networks. Our principal executive offices are located in Newark, New Jersey, and our common stock is publicly traded on the New York Stock Exchange under the ticker symbol “PRU”.

On December 18, 2001, Prudential Insurance converted from a mutual life insurance company owned by its policyholders to a stock life insurance company and became a wholly-owned subsidiary of Prudential Financial. The demutualization was carried out under Prudential Insurance’s Plan of Reorganization, which required us to establish and operate a regulatory mechanism known as the “Closed Block.” The Closed Block includes certain in force participating insurance and annuity products and corresponding assets that are used for the payment of benefits and policyholders’ dividends on these products, as well as certain related assets and liabilities.

The results of the Closed Block, along with certain related assets and liabilities, are reported as a separate segment and treated as a divested business under Prudential Financial’s definition of adjusted operating income. The results of divested businesses are included in “Net income” in accordance with U.S. generally accepted accounting principles (“U.S. GAAP”) but are excluded from adjusted operating income. See Note 22 to the Consolidated Financial Statements for the Company’s definition of a divested business and an explanation of adjusted operating income, and see Note 12 to the Consolidated Financial Statements and “—Closed Block Division” below for more information on the Closed Block.

During the fourth quarter of 2017, we introduced a new organizational structure for our U.S. businesses that reflects our focus on leveraging our mix of businesses and our digital and customer engagement capabilities to expand our value proposition for the benefit of customers and stakeholders. This new organizational structure retains our existing segments but realigns them under new divisions. Under the new structure, our principal operations are comprised of five divisions, which together encompass seven segments, and our Corporate and Other operations. The U.S. Individual Solutions division consists of our Individual Annuities and Individual Life segments. The U.S. Workplace Solutions division consists of our Retirement and Group Insurance segments. The Investment Management division is comprised of our Investment Management segment (formerly named the Asset Management segment). The International Insurance division continues to consist of our International Insurance segment, and the Closed Block division continues to consist of our Closed Block segment. Our Corporate and Other operations continue to include corporate items and initiatives that are not allocated to business segments and businesses that have been or will be divested. There are no changes to our reporting segments nor to our measure of segment profitability as a result of the new organizational structure.

See Note 22 to the Consolidated Financial Statements for revenues, income and loss, and total assets by segment.

U.S. Individual Solutions Division

The U.S. Individual Solutions division conducts its business through the Individual Annuities and Individual Life segments.

Individual Annuities Segment

Our Individual Annuities segment manufactures and distributes individual variable and fixed annuity products, primarily to the U.S. mass affluent and affluent markets. In general, we consider households with investable assets or annual income in excess of \$100,000 to be mass affluent and households with investable assets in excess of \$250,000 to be affluent in the U.S. market. We focus on innovative product design and risk management strategies.

Table of Contents

Competition

We compete with other providers of retirement savings and accumulation products, including large, well-established insurance and financial services companies, primarily based on our innovative product features and our risk management strategies. We also compete based on brand recognition, financial strength, the breadth of our distribution platform and our customer service capabilities.

In recent years, we have experienced a dynamic competitive landscape. We proactively monitor changes in the annuity marketplace, and continue to take actions to adapt our products to the current environment in order to maintain appropriate return prospects and improve our risk profile. These actions have included variable annuity product modifications for new sales to adjust benefits pricing and commissions as well as closing of certain share classes. We also suspended or limited additional contractholder deposits for certain variable annuities with certain optional living benefit riders. Similarly, certain of our competitors have taken actions to modify benefits, to exit, or limit their presence in, the variable annuity marketplace. We have utilized external reinsurance as a form of risk mitigation, as discussed below, and incorporated provisions in the design of certain products that allow frequent revisions of key pricing elements for new business. In addition, we continue to introduce new products to broaden our offerings and diversify our risk profile, and also continue to look for opportunities to further enhance and differentiate our current suite of products to attract new customers while managing risks and responding to market conditions and regulatory changes.

Products

We offer certain variable annuities that provide our contractholders with tax-deferred asset accumulation together with a base death benefit and a suite of optional guaranteed living benefits (including versions with enhanced guaranteed minimum death benefits), and annuitization options. The majority of our currently sold contracts include an optional guaranteed living benefit which provides, among other features, the ability to make withdrawals based on the highest daily contract value plus a specified return, credited for a period of time. This contract value is a notional amount that forms the basis for determining periodic withdrawals for the life of the contractholder, and cannot be accessed as a lump sum surrender value. Certain optional living benefits can also be purchased with a companion optional death benefit, also based on a highest daily contract value. Our results are impacted by the fee rates we assess on our products. Some of our historical inforce products have fee tiers that decline throughout the life of the contract while our newer products generally have lower fee rates.

The Prudential Premier® Retirement Variable Annuity with Highest Daily Lifetime Income (“HDI”) offers lifetime income based on the highest daily account value plus a compounded deferral credit. HDI v.3.0 is the most current version of our “highest daily” guaranteed living benefits. As of December 31, 2017, \$3.2 billion of HDI v.3.0 account values are reinsured to Union Hamilton Reinsurance Ltd., an external counterparty, pursuant to a quota share agreement that covered approximately 50% of new business between April 1, 2015 and December 31, 2016. New sales of HDI v.3.0 subsequent to December 31, 2016, are not covered by this external reinsurance agreement.

In 2017, we launched the Prudential Premier® Retirement Variable Annuity with Legacy Protection Plus (“LPP”), which provides an optional enhanced death benefit based on the purchase payments rolling up at a preset rate on an annual basis until certain events occur, such as the death of the first owner (or annuitant if entity-owned) or the roll-up cap is reached. LPP cannot be elected together with any of the other optional living or death benefits we offer.

The Prudential Defined Income® (“PDI”) Variable Annuity complements the variable annuity products we offer with the highest daily lifetime income benefit. PDI provides for guaranteed lifetime withdrawal payments, but restricts contractholder investment to a single bond sub-account within the separate accounts. PDI includes a living benefit rider which provides for a specified lifetime income withdrawal rate applied to purchase payment(s) paid, subject to

annual roll-up increases until lifetime withdrawals commence, but does not have the highest daily feature.

We also offer variable annuities without guaranteed living benefits and immediate annuities. The Prudential Premier[®] Investment Variable Annuity (“PPI”) offers tax-deferred asset accumulation, annuitization options and an optional death benefit that guarantees the contractholder’s beneficiary a return of total purchase payments made to the contract, adjusted for any partial withdrawals, upon death.

Table of Contents

Excluding our PDI product, the majority of our variable annuities generally provide our contractholders with the opportunity to allocate purchase payments to sub-accounts that invest in underlying proprietary and/or non-proprietary mutual funds, frequently under asset allocation programs. Certain products also allow or require allocation to fixed-rate accounts that are invested in the general account and are credited with interest at rates we determine, subject to certain minimums. We also offer fixed annuities that provide a guarantee of principal and interest credited at rates we determine, subject to certain contractual minimums. For certain products, we have the ability to reset the crediting rates at our discretion subject to certain policy terms establishing guaranteed minimum interest crediting rates. Certain allocations made in the fixed-rate accounts of our variable annuities and certain fixed annuities impose a market value adjustment if the invested amount is not held to maturity.

In addition, most contracts also guarantee the contractholder's beneficiary a return of total purchase payments made to the contract, adjusted for any partial withdrawals, upon death. Certain inforce contracts include guaranteed benefits which are not currently offered, such as annuitization benefits based on a guaranteed notional amount and benefits payable at specified dates after the accumulation period.

During the first quarter of 2018, we launched PruSecureSM, a single premium fixed index annuity, which allows the policyholder to allocate all or a portion of their account balance into an index account, such as the S&P 500. The index account provides interest or an interest component linked to, but not an investment in, the selected index, and its performance over the elected term (i.e., 1, 3 or 5 years), subject to certain participation rates and contractual minimums and maximums. We also anticipate the launch of Guaranteed Income for Tomorrow ("GIFTSM"), a deferred income annuity, which initially will be distributed through direct response solicitation through our Group Insurance business.

For information regarding the risks inherent in our products and the mitigants we have in place to limit our exposure to these risks, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations by Segment—U.S. Individual Solutions Division—Individual Annuities—Variable Annuity Risks and Risk Mitigants."

Marketing and Distribution

Our annuity products are distributed through a diverse group of third-party broker-dealers and their representatives, banks and wirehouses, independent financial planners and, for our GIFT product, direct response solicitation through our Group Insurance business. Additionally, our variable annuity products are distributed through financial professionals, including those associated with Prudential Advisors, an affiliated broker-dealer. Our distribution efforts are supported by a network of internal and external wholesalers.

For information regarding the U.S. Department of Labor ("DOL") fiduciary rule and its impact on our Individual Annuities segment, see "Regulation—ERISA and DOL Fiduciary Rules" below.

Underwriting and Pricing

We earn asset management fees determined as a percentage of the average assets of our proprietary mutual funds in our variable annuity products, net of sub-advisory expenses related to non-proprietary sub-advisors. Additionally, we earn mortality, expense and other fees for various insurance-related options and features based on the average daily net asset value of the annuity separate accounts, account value, premium, or guaranteed value, as applicable. We also receive administrative service and distribution fees from many of the proprietary and non-proprietary mutual funds.

We price our variable annuities based on an evaluation of the risks assumed and consideration of applicable risk management strategies, including hedging and reinsurance costs. Our pricing is also influenced by competition and

assumptions regarding contractholder behavior, including persistency (the probability that a policy or contract will remain in force), benefit utilization and the timing and efficiency of withdrawals for contracts with living benefit features, as well as other assumptions. Significant deviations in actual experience from our pricing assumptions could have an adverse or positive effect on the profitability of our products. To encourage persistency, most of our variable and fixed annuities have surrender or withdrawal charges for a specified number of years. In addition, the living benefit features of our variable annuity products encourage persistency because the potential value of the living benefit is fully realized only if the contract persists.

We price our fixed annuities and the fixed-rate accounts of our variable annuities based on assumed investment returns, expenses, competition and persistency, as well as other assumptions. We seek to maintain a spread between the return on our general account invested assets and the interest we credit on our fixed annuities and the fixed-rate accounts of our variable annuities.

Table of Contents

Reserves

We establish reserves for our annuity products in accordance with U.S. GAAP. We use current best estimate assumptions when establishing reserves for our guaranteed minimum death and income benefits, including assumptions such as interest rates, equity returns, persistency, withdrawal, mortality and annuitization rates. Certain of the guaranteed living benefit features on our variable annuity contracts are accounted for as embedded derivatives and are carried at fair value. The fair values of these benefit features are calculated as the present value of future expected benefit payments to contractholders less the present value of future expected rider fees attributable to the embedded derivative feature, and are based on assumptions a market participant would use in valuing these embedded derivatives. For life contingent payout annuity contracts, we establish reserves using best estimate assumptions with provisions for adverse deviations as of inception or best estimate assumptions as of the most recent loss recognition event. For variable and fixed annuity contracts, we establish liabilities for contractholders' account balances that represent cumulative deposits plus credited interest, less withdrawals, mortality and expense charges. Policyholders' account balances also include provisions for non-life contingent payout annuity benefits. For information on developments regarding statutory reserves for variable annuities, see "Regulation—U.S. Insurance Operations—State Insurance Regulation—Financial Regulation—Variable Annuities" below.

Individual Life Segment

Our Individual Life segment manufactures and distributes universal life, term life and variable life insurance products primarily to the U.S. mass middle, mass affluent and affluent markets. In general, we consider: households with investable assets in excess of \$25,000 or annual income in excess of \$50,000 to be mass middle; households with investable assets or annual income in excess of \$100,000 to be mass affluent; and households with investable assets in excess of \$250,000 to be affluent in the U.S. market. Our life products are distributed through independent third-party distributors and licensed sales professionals within Prudential Advisors. We generally experience higher sales during the fourth quarter as some of our clients use life insurance for estate and tax planning purposes.

Competition

The Individual Life segment competes with other large, well-established life insurance companies in a mature market. We compete primarily based on price, service, including the speed and ease of underwriting, distribution channel relationships, brand recognition and financial strength. Due to the large number of competitors, pricing is competitive. Factors that could influence our ability to competitively price products while achieving targeted returns include the level, cost and availability of financing for statutory reserves required for certain term life insurance policies, the availability, utilization and timing of tax deductions associated with statutory reserves, product designs that impact the amount of statutory reserves and the associated tax deductions, the timing of principles-based reserving adoption, the level and volatility of interest rates, and our expense structure.

We periodically adjust product prices and features based on the market and our strategy, with a goal of managing the Individual Life business for steady, consistent sales growth across a balanced product portfolio and to avoid over-concentration in any one product type. These actions, and the actions of competitors, can impact our sales levels from period to period.

Products

Our primary insurance products are term life, variable life, guaranteed universal life and all other universal life, which represent 47%, 31%, 15% and 7%, respectively, of our face amount of individual life insurance in force, net of reinsurance as of December 31, 2017. We continue to maintain focus on our product diversification strategy which has positioned us to better balance portfolio risk and enhance our value proposition to our distribution partners and their

clients. Additionally, most of our variable and universal life products offer a policy rider that allows death benefits to be accelerated to the policyholder during a chronic or terminal illness, under certain contractual requirements.

Term Life Insurance. We offer a variety of term life insurance products that provide coverage for a specified time period. Most term products include a feature that allows the policyholder to convert the policy into permanent life insurance coverage. We also offer term life insurance that provides for a return of premium if the insured is alive at the end of the level premium period. There continues to be significant demand for term life insurance protection.

Table of Contents

Variable Life Insurance. We offer several variable life insurance products that give the policyholder the flexibility to change both the death benefit and premium payments, and provide the potential to earn returns linked to an underlying investment portfolio that the policyholder selects. The policyholder generally can make deposits for investments in a fixed-rate option which is part of our general account or in separate account investment options consisting of equity and fixed income funds. Any policyholder investments in the fixed-rate option provide a guarantee of principal and are credited with interest at rates that we determine, subject to certain contractual minimums. In the separate accounts, the policyholder bears the underlying portfolio performance risk. We also offer a variable life product that has an optional flexible guarantee against lapse where policyholders can select the guarantee period. While variable life insurance continues to be an important product, marketplace demand continues to favor term and universal life insurance. A meaningful portion of Individual Life's profits, however, is associated with our large in force block of variable life insurance policies which are expected to run off over time as policies age.

Universal Life Insurance. We offer universal life insurance products that feature flexible premiums and a crediting rate that we determine, subject to certain contractual minimums. Guaranteed universal life products provide a guarantee of death benefits to remain in force when a policy would otherwise lapse due to insufficient cash value. We also offer universal life insurance products that allow the policyholder to allocate all or a portion of their account balance into an index account. The index account provides interest or an interest component linked to, but not an investment in, S&P 500 index performance over the following year, subject to certain participation rates and contractual minimums and maximums. Mortality and expense margins and net interest spread impact Individual Life's profits from universal life insurance.

Marketing and Distribution

Individual Life provides products through the following two channels:

Third-Party Distribution. Our individual life products are offered through a variety of third-party channels, including independent brokers, wirehouses, banks, general agencies and producer groups. We focus on sales through independent intermediaries who provide life insurance solutions to protect individuals, families and businesses and support estate and wealth transfer planning.

Prudential Advisors. Prudential Advisors distributes Prudential universal, term and variable life insurance, variable and fixed annuities and investment products with proprietary and non-proprietary investment options, as well as selected insurance and investment products from other carriers and has access to non-proprietary property and casualty products. In addition, Prudential Advisors offers certain retail brokerage and retail investment advisory services through our dually registered broker-dealer and investment advisor, Pruco Securities, LLC. These services include brokerage accounts, discretionary and non-discretionary investment advisory programs and financial planning services. Although Prudential Advisors generates an operating loss within our Individual Life segment, it generates positive overall value when we consider the aggregate value of the business that is acquired through this channel. Individual Life is paid a market rate by the Individual Annuities and Investment Management segments to distribute their products. Any profit or loss is included in the results of the Individual Life segment and eliminated in consolidation.

For information regarding the DOL fiduciary rule and its impact on our Individual Life segment, see "Regulation—ERISA and DOL Fiduciary Rules" below.

Underwriting and Pricing

Underwriters assess and quantify the risk of our individual life insurance products based on the age, gender, health and occupation of the applicant and amount of insurance requested. We continually update our guidelines to keep pace

with changes in healthcare, research, and experience. We have also introduced new underwriting approaches designed to selectively accelerate and enhance the existing underwriting process. We base premiums and policy charges for individual life insurance on expected death benefits, surrender benefits, expenses and required reserves. We price policies using assumptions for mortality and morbidity, interest rates, expenses, policy persistency, premium payment patterns, separate account fund performance and product-generated tax deductions, as well as the level, cost and availability of financing certain statutory reserves. Deviations in actual experience from our pricing assumptions may adversely or positively impact the profitability of our products.

Table of Contents

Reserves

We establish reserves for individual life products in accordance with U.S. GAAP. For term life insurance policies and other benefits with fixed and guaranteed terms, we use best estimate assumptions with provisions for adverse deviation as of inception when establishing reserves for future policyholder benefits and expenses including assumptions for mortality, investment yield, expenses, and policy persistency. We use current best estimate assumptions when establishing reserves for no lapse guarantees, which includes an assumption for future premium payments. Reserves also include claims reported but not yet paid, and claims incurred but not yet reported. In certain instances, the reserves for a particular line of business may not be deficient in the aggregate, but the pattern of earnings may be such that profits are expected to be recognized in earlier years followed by losses in later years. In these situations, we record an additional liability (Profits Followed by Losses or “PFL” liability) in an amount necessary to sufficiently offset the losses that would be recognized in later years. For variable and universal life insurance policies, we establish liabilities for policyholders’ account balances. These liabilities represent cumulative deposits plus credited interest, less withdrawals, and expense and cost of insurance charges, as applicable. Policyholders’ account balances also include unearned revenue reserves calculated based on current best estimate assumptions. For a discussion of developments regarding principles based reserving for statutory reserves, see “Regulation—U.S. Insurance Operations—State Insurance Regulation—Financial Regulation—Insurance Reserves and Regulatory Capital,” and for a discussion of our statutory life product reserves and reserve financing see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Capital—Financing Activities—Term and Universal Life Reserve Financing.”

Reinsurance

The Individual Life segment uses reinsurance as a means of managing mortality volatility and risk capacity, which can impact product profitability. On policies sold since 2000, we have reinsured a significant portion of the mortality risk assumed, with that portion varying over time depending on market factors and strategic objectives. We remain liable if a third-party reinsurer is for some reason unable to meet its obligations. On a Company-wide basis, we evaluate the financial condition of reinsurers and monitor the concentration of counterparty risk to mitigate this exposure.

U.S. Workplace Solutions Division

The U.S. Workplace Solutions division conducts its business through the Retirement and Group Insurance segments.

Retirement Segment

Our Retirement segment, which we refer to in the marketplace as Prudential Retirement, provides retirement investment and income products and services to retirement plan sponsors in the public, private and not-for-profit sectors. Our full service business provides recordkeeping, plan administration, actuarial advisory services, tailored participant education and communication services, trustee services and institutional and retail investments. We service defined contribution, defined benefit and non-qualified plans. For clients with combinations of these plans, we offer integrated recordkeeping services. We also provide certain brokerage services through our broker-dealer, Prudential Investment Management Services LLC, and trust services through Prudential Bank & Trust, FSB (“PB&T”), a limited purpose trust-only institution. Our institutional investment products business includes both payout annuity and stable value products. Payout annuities include pension risk transfer products, structured settlements and other group annuities for defined contribution plans, defined benefit plans, non-qualified plans and individuals. Stable value products include investment-only wraps, guaranteed investment contracts (“GICs”) and funding agreements.

Competition

The Retirement segment competes with other large, well-established insurance companies, asset managers, recordkeepers and diversified financial institutions. In our full service business, we compete primarily based on pricing, the breadth of our service and investment offerings, the expertise of our employees, investment performance and our ability to offer product features to meet the retirement income needs of our clients. We collect revenue based on assets or per participant charges for plan administration, recordkeeping and employee education services. While we continue to have heightened pricing pressures, driven by competition, contractual limits on fee income, the influence of intermediaries and regulations requiring more standard and consistent fee disclosures across industry providers, this business has experienced strong persistency in recent years.

In our institutional investment products business, we compete primarily based on our pricing and structuring capabilities, as well as our ability to offer innovative product solutions and successfully execute large-scale transactions. Sales of institutional investment products are affected by competitive factors such as investment performance, company credit and financial strength ratings, product design, marketplace visibility, distribution capabilities, fees, crediting rates and customer service. We are a leader in providing innovative pension risk management solutions to plan sponsors and in the stable value wrap market. We believe the pension risk transfer market continues to offer attractive opportunities that are aligned with our expertise.

Products and Services

Full Service

Our full service business offers plan sponsors and their participants a broad range of products and services to assist in the design, delivery and administration of defined contribution, defined benefit, and non-qualified plans, including recordkeeping and administrative services, comprehensive investment offerings and consulting services to assist plan sponsors in managing fiduciary obligations. As part of our investment products, we offer a variety of general and separate account stable value products and other fee-based separate accounts, as well as retail mutual funds and institutional funds advised by affiliated and non-affiliated investment managers. In addition, certain products are marketed and sold on an investment-only basis through our full service distribution channels.

Our full service general account and separate account stable value products contain an obligation to pay interest at a specified rate for a specific period of time and to repay account balances or market value upon contract termination. These stable value products are either fully or partially participating, with annual or semi-annual rate resets subject to certain contractual minimums, giving effect to previous investment experience. We earn profits from partially participating products from the spread between the rate of return we earn on the investments and the interest rates we credit, net of expenses. In addition, we may earn administrative fees for providing recordkeeping and other administrative services for both fully and partially participating products.

We also offer fee-based products, through which customer funds are held in separate accounts, retail mutual funds, institutional funds or a client-owned trust. These products generally pass all of the investment results to the customer. In certain cases, these contracts are subject to a minimum interest rate guarantee backed by the general account. Additionally, we offer guaranteed minimum withdrawal benefits associated with certain defined contribution accounts and manage certain of the related risks with derivatives and other hedging instruments.

Our full service fee-based advisory offerings are supported by participant communications and education programs, and a broad range of plan consulting services, including non-discrimination testing, plan document services, signature-ready documents for required filings, and full actuarial support for defined benefit plans. Additional services include non-qualified deferred compensation plan administration, including executive benefit solutions and financing strategies, investment advisory services, and merger and acquisition support.

Institutional Investment Products

Our institutional investment products business primarily offers products to the payout annuity and stable value markets.

Payout Annuity Markets. We offer products designed to provide a predictable source of monthly income, generally for the life of the participant. Our pension risk transfer products include portfolio-protected products and a longevity reinsurance product. Our portfolio-protected products are non-participating group annuity contracts which we issue to pension plan sponsors and assume all of the investment and actuarial risk associated with a group of specified participants within a plan in return for a premium typically paid as a lump sum at inception. These products have economic features similar to our other general account annuity contracts, discussed below, but may also offer the added protection of an insulated separate account. Our longevity reinsurance product is a reinsurance contract from which we earn a fee for assuming the longevity risk of pension plans that have been insured by third-parties, typically with monthly net settlements of premiums and benefits. As of December 31, 2017, our pension risk transfer business in force had an approximate average age of 76 years.

Other products include structured settlements, voluntary income products and other group annuities, which fulfill the payment guarantee needs of the personal injury lawsuit settlement market, the distribution needs of defined contribution participants and the payment obligations of defined benefit plans, respectively. For our general account products, we bear all of the investment, mortality, retirement, asset/liability management, and expense risk associated with these contracts. Our profits reflect the emerging experience related to investment returns, timing of mortality, timing of retirement and the level of expenses being more or less favorable than assumed in the original pricing. Our separate account products are primarily fee-based products that cover payments to be made to defined benefit plan retirees. These contracts permit a plan sponsor to retain the risks and rewards of investment and actuarial results while receiving a general account guarantee for all annuity payments covered by the contract.

Table of Contents

Stable Value Markets. We manufacture investment-only products for use in retail and institutional capital markets and qualified plan markets. Our primary stable value product offerings are investment-only wraps through which customers' funds are held in a client-owned trust. These are participating contracts for which investment results pass through to the customer, subject to a minimum interest rate guarantee backed by the general account, and we earn fees for providing this guarantee. For contracts currently in force, the minimum interest rate has a floor of zero percent. The fees we earn for providing this guarantee may be reset as defined by the underlying contracts. Contractholders are provided with proprietary and non-proprietary fund investment alternatives.

We also offer investment-only general account products in the form of GICs and funding agreements. These products contain an obligation to pay interest at a specified rate and to repay principal at maturity or following contract termination. Because these obligations are backed by our general account, we bear the investment and asset/liability management risk associated with these contracts. Generally, profits from these products result from the spread between the rates of return we earn on the investments and the interest rates we credit, net of expenses.

Marketing and Distribution

We distribute our products through a variety of channels. In our full service business, our dedicated sales and support teams manage our distribution efforts in offices across the country. We sell our products and services through third-party financial advisors, brokers, and benefits consultants and, to a lesser extent, directly to plan sponsors. Our clients typically prefer to transition plans either at the beginning or end of their fiscal year, which are generally during our fourth quarter.

In our payout annuity area within our institutional investment products business, our pension risk transfer products, traditional group annuities and participating separate account annuities are typically distributed through actuarial consultants and third-party brokers. Structured settlements are distributed through unaffiliated specialized brokers. Voluntary income products are distributed through the defined contribution portion of our full service business, directly to plan sponsors, or as part of annuity price quoting services.

In our stable value area within our institutional investment products business, we utilize our direct sales force and intermediaries to distribute investment-only stable value wraps and traditional GICs to plan sponsors and stable value fund managers, and to distribute funding agreements to investors. We also manage a global Funding Agreement Notes Issuance Program ("FANIP") pursuant to which statutory trusts issue short-term commercial paper and/or medium-term notes secured by funding agreements issued to the trusts by Prudential Insurance. Prudential Insurance may also issue funding agreements directly to the Federal Home Loan Bank of New York.

For information regarding the DOL fiduciary rule and its impact on our Retirement segment, see "Regulation—ERISA and DOL Fiduciary Rules" below.

Underwriting and Pricing

We set our rates for our full service and institutional investment products using pricing models that consider the investment environment and our risk, expense and profitability targets. In addition, for products within our payout annuity area, our models also use assumptions for mortality and, if pertinent, early retirement risks. These assumptions may be less predictable in certain markets, and deviations in actual experience from pricing assumptions could affect the profitability of these products. For our investment-only stable value wrap product, our pricing risk is mitigated by several features, including: the fees we earn for providing a guaranteed rate of return may be reset, as defined by the underlying contracts; the contracts allow participants to withdraw funds at book value, while contractholder withdrawals occur at market value immediately or at book value over time; and our obligation is limited to payments that are in excess of the fund value.

Reserves

We establish reserves for our retirement products in accordance with U.S. GAAP. We use best estimate assumptions with provisions for adverse deviation as of inception or best estimate assumptions as of the most recent loss recognition event when establishing reserves for future policyholder benefits and expenses, including assumptions for investment yield, expenses, mortality rates, persistency and retirement. Future policyholder benefit reserves also include amounts related to deferred profit liabilities, where applicable. We also establish liabilities for policyholders' account balances and additional reserves for investment experience that will accrue to the customer but have not yet been reflected in credited rates. Policyholders' account balances also include provisions for non-life contingent payout annuity benefits.

Table of Contents

Group Insurance Segment

Our Group Insurance segment offers a full range of group life, long-term and short-term group disability, and group corporate-, bank- and trust-owned life insurance in the U.S. primarily to institutional clients for use in connection with employee plans and affinity groups. We also sell accidental death and dismemberment and other ancillary coverages, and provide plan administrative services in connection with our insurance coverages.

Competition

We are a provider of both group life and disability insurance, and compete with other large, well-established life and health insurance providers in mature U.S. markets. We compete primarily based on brand recognition, service capabilities, customer relationships, financial strength, range of product offerings and price. Pricing of group insurance products is reflective of the large number of competitors in the marketplace. The majority of our premiums are derived from large corporations, affinity groups or other organizations having over 5,000 insured individuals, which we refer to as the National segment. We are also seeking to grow our client base with institutions that have between 100 and 5,000 individuals, which we refer to as the Premier segment. Employee-paid (voluntary) coverage is important as employers attempt to control costs and shift benefit decisions and funding to employees who continue to value benefits offered at the workplace. Our profitability is dependent, in part, on the voluntary coverage marketplace, which will be affected by future employment and compensation rates.

Products

Group Life Insurance. Our portfolio of group life insurance products consists of employer-paid (basic) and employee-paid coverages, including term life insurance for employees and employees' dependents, and group universal life insurance. We offer group variable universal life insurance, basic and voluntary accidental death and dismemberment insurance, a critical illness product and an accident insurance product. Many of our employee-paid coverages allow employees to retain their coverage when they change employers or retire. We also offer waiver of premium coverage where required premiums are waived in the event the insured suffers a qualifying disability.

Our group corporate-, bank- and trust-owned life insurance products are group variable life insurance contracts utilizing separate accounts, and are typically used by large corporations to fund deferred compensation plans and benefit plans for retired employees.

Group Disability Insurance. We offer short- and long-term group disability insurance, which protects against loss of wages due to illness or injury, as well as plan administrative services and absence management services. Disability benefits are limited to a portion, generally 50% to 70%, of the insured's earned income up to a specified maximum benefit. Short-term disability generally provides a weekly benefit for three to six months, while long-term disability benefits are paid monthly, following a waiting period (usually 90 or 180 days, during which short-term disability may be provided) and generally continue until the insured returns to work or reaches normal retirement age.

Marketing and Distribution

Group Insurance offers its portfolio of products and customized benefit solutions through its own dedicated sales force that is organized around market segments and distributes primarily through employee benefit brokers and consultants.

Underwriting and Pricing

We price each product line using underwriting practices and rating systems that consider Company, industry and/or other experience. We assess the risk profile of prospective insured groups; however, certain voluntary products or

coverages may require underwriting on an individual basis. We are not obligated to accept any individual certificate application, and may require a prospective insured to submit evidence of insurability.

We maintain a disciplined approach to pricing our group life and disability insurance products. We base pricing of group insurance products on the expected pay-out of benefits and other costs that we calculate using assumptions for mortality and morbidity rates, interest rates and expenses, depending upon the specific product features. On many of our group policies, we provide multiple year rate guarantees, which can contribute to fluctuations in profitability. For certain policies with experience-rated return provisions, the final premium is adjusted to reflect the client's actual experience during the past year. For these policies, the group contractholder bears some of the risk, or receives some of the benefit, associated with claim experience fluctuations, thus lessening the fluctuations in profitability.

Table of Contents

Reserves

We establish reserves for group insurance products in accordance with U.S. GAAP. We primarily use current best estimate assumptions when establishing reserves for future policyholder benefits and expenses including assumptions for mortality, morbidity and claim termination rates, interest rates and Social Security offsets. Reserves also include claims reported but not yet paid, and claims incurred but not yet reported. We also establish liabilities for policyholders' account balances that represent cumulative deposits plus credited interest, less withdrawals, and expense and cost of insurance charges, as applicable.

Reinsurance

We use reinsurance primarily to limit losses from large claims, and in response to client requests. We may from time to time also use reinsurance for capital management purposes. We remain liable if a third-party reinsurer is for some reason unable to meet its obligations. On a Company-wide basis, we evaluate the financial condition of reinsurers and monitor concentration of counterparty risk to mitigate this exposure.

Investment Management Division

The Investment Management division conducts its business through the Investment Management segment.

Investment Management Segment

The Investment Management segment provides a broad array of investment management and advisory services by means of institutional portfolio management, retail funds management, private lending and asset securitization activity and other structured products. These products and services are provided to third-party clients and to other Prudential businesses. We also invest in asset management and investment distribution businesses in targeted countries, including through investments in operating joint ventures, to expand our mass affluent customer base outside the U.S. and to increase our global assets under management.

We earn asset management fees which are typically based upon a percentage of assets under management. In certain asset management arrangements, we also receive performance-based incentive fees when the return on the managed assets exceeds certain benchmark returns or other performance targets. Transaction fees are earned as a percentage of the transaction price associated with the sale or purchase of assets in certain funds, primarily related to real estate. In addition, we earn investment returns from strategic investing and revenues from commercial mortgage origination and servicing.

Competition

The Investment Management segment competes with numerous asset managers and other financial institutions. For our investment management products, we compete based on a number of factors, including investment performance, strategy and process, talent, organizational stability and client relationships. We offer products across multiple asset classes, with specialized investment teams that employ approaches designed to add value in each product area or asset class. Our organizational stability and robust institutional and retail businesses have helped attract and retain talent critical to delivering investment results for clients. Our private placement and commercial mortgage businesses compete based on price, terms, execution and the strength of our relationship with the borrower. Competition will vary depending on the product or service being offered.

Products and Services

We offer asset management services for public and private fixed income, public equity and real estate, as well as commercial mortgage origination and servicing, and mutual funds and other retail services through the following eight businesses:

PGIM Fixed Income. PGIM Fixed Income manages assets for a wide range of clients worldwide through our operations in Newark, London, Singapore and Tokyo. Our products include traditional broad market fixed income and single-sector strategies, traditional and customized asset/liability strategies, hedge strategies and collateralized loan obligations. PGIM Fixed Income also serves as a non-custodial securities lending agent. Portfolios are managed by seasoned portfolio managers across sector specialist teams supported by significant credit research, quantitative research and risk management organizations.

Jennison Associates. Jennison Associates LLC, a wholly-owned registered investment adviser, provides discretionary and non-discretionary asset management services by managing a range of publicly-traded equity, balanced and fixed income portfolios that span market capitalizations, investment styles and geographies. Jennison Associates uses fundamental, team-based research to manage portfolios for institutional, private and sub-advisory clients, including mutual funds.

Table of Contents

Quantitative Management Associates, a PGIM Company. Quantitative Management Associates LLC, a wholly-owned registered investment adviser, provides discretionary and non-discretionary asset management services to a wide range of clients by managing a broad array of publicly-traded equity asset classes using various investment styles. Quantitative Management Associates manages equity and asset allocation portfolios for institutional and sub-advisory clients, including mutual funds, using proprietary quantitative processes tailored to meet client objectives.

Prudential Capital Group. Prudential Capital Group provides asset management services by investing in private placement investment grade and below investment grade debt and mezzanine debt and equity securities, with a majority of the private placement investments being originated by our staff. These investment capabilities are utilized by our general account and institutional clients through direct advisory accounts, insurance company separate accounts, and private fund structures.

PGIM Real Estate Finance. PGIM Real Estate Finance provides commercial mortgage origination, asset management and servicing for our general account, institutional clients, and government sponsored entities such as Fannie Mae, the Federal Housing Administration and Freddie Mac.

PGIM Real Estate. PGIM Real Estate provides asset management services for single-client and commingled private and public real estate portfolios, and manufactures and manages a variety of real estate investment vehicles investing in private and public real estate, primarily for institutional clients through offices worldwide. Our domestic and international real estate investment vehicles range from fully diversified open-end funds to specialized closed-end funds that invest in specific types of properties or designated geographic regions or follow other specific investment strategies. Our global real estate organization has an established presence in the U.S., Europe, Asia and Latin America.

PGIM Investments. PGIM Investments manufactures, distributes and services investment management products primarily utilizing proprietary asset management expertise in the U.S. retail market. These products are designed to be sold primarily by financial professionals including third-party advisors and licensed sales professionals within Prudential Advisors. We offer a family of retail investment products consisting of over 70 mutual funds as of December 31, 2017. These products cover a wide array of investment styles and objectives designed to attract and retain assets of individuals with varying objectives and to accommodate investors' changing financial needs.

PGIM Global Partners. PGIM Global Partners operates an asset management business in Taiwan and has interests in asset management operating joint ventures in Brazil, India and Italy, which are accounted for under the equity method. Each of these businesses offers mutual funds and serves individual and institutional investors and clients.

In addition, we make strategic investments to support the creation and management of funds offered to third-party investors in private and public real estate, fixed income and publicly traded equity asset classes. Certain of these investments are made primarily for purposes of co-investment in our managed funds and structured products. Other strategic investments are made with the intention to sell or syndicate to investors, including our general account, or for placement in funds and structured products that we offer and manage (seed investments). We also make loans to, and guarantee obligations of, our managed funds that are secured by equity commitments from investors or assets of the funds.

Marketing and Distribution

We provide investment management services for our institutional customers through a proprietary sales force organized by each investment management business. Each business has an independent marketing and service team working with clients. Institutional asset management services are also offered through the Retirement segment.

Most of the retail customer assets under management are invested in our mutual funds and our variable annuities and variable life insurance products. These assets are gathered by distribution forces associated with other Prudential businesses and by third-party networks. Additionally, we work with third-party product manufacturers and distributors to include our investment options in their products and platforms.

We also provide investment management services across a broad array of asset classes for our general account, as described under “Management’s Discussion and Analysis of Financial Condition and Results of Operations—General Account Investments.”

For information regarding the DOL fiduciary rule and its impact on our Investment Management segment, see “Regulation—ERISA and DOL Fiduciary Rules” below.

International Insurance Division

The International Insurance division conducts its business through the International Insurance segment.

Table of Contents

International Insurance Segment

Our International Insurance segment manufactures and distributes individual and group life insurance, retirement and related products, including certain health and personal accident products with fixed benefits. We provide these products to the mass affluent and affluent markets through our Life Planner operations in Japan, Korea and other countries outside the U.S., including Taiwan, Italy, Brazil, Argentina, Poland and Mexico. We also provide similar products to the broad middle income and mass affluent markets across Japan through multiple distribution channels including banks, independent agencies and Life Consultants associated with our Gibraltar Life Insurance Company, Ltd. (“Gibraltar Life”) operations.

For the year ended December 31, 2017, our Life Planner and Gibraltar Life operations in Japan represented 37% and 49%, respectively, of the net premiums, policy charges and fee income of the International Insurance segment and, in aggregate, represented 37% of the net premiums, policy charges and fee income of Prudential Financial, translated on the basis of weighted average monthly exchange rates.

In addition to the operations discussed above, we continue to seek opportunities for expansion into targeted countries with attractive markets and long-term growth potential, as well as opportunities to go deeper into countries where we already have a presence. When entering these markets, we often do so with a partner that may offer expertise, distribution capabilities or an existing footprint in the targeted market. As of December 31, 2017, we have a 40% interest in a retirement services business in Chile, a 70% interest in a life insurance business in Malaysia, a 49% interest in a life insurance joint venture in India and a 49% interest in a life insurance joint venture in Indonesia. The joint venture in Indonesia was entered into in 2017 with CT Corp and is expected to take a multi-product and multi-channel distribution approach. In April 2017, we completed the purchase of a group life insurance business from Itaú Unibanco S.A., which provides group life and personal accident insurance products to corporate clients through a network of third-party brokers in Brazil. In June 2017, LeapFrog Strategic African Investments (“LSAI”), a fund in which we are the primary investor, signed an agreement to acquire a minority interest in Enterprise Group Limited and affiliates (“Enterprise Group”). Enterprise Group offers financial services including life insurance and pensions for emerging markets consumers in Ghana. This transaction closed in August 2017.

We also regularly review our existing international businesses and may seek to exit an operation if it is determined that it no longer aligns with our broader international strategy. In January 2018, we entered into a definitive agreement to sell our Pramerica of Poland subsidiary. The transaction is expected to close in 2018, subject to regulatory approvals and customary closing conditions.

We manage each operation on a stand-alone basis through local management and sales teams, with oversight by senior executives based in Newark, New Jersey and outside the United States. Each operation has its own marketing, underwriting, claims, investment management and actuarial functions. In addition, significant portions of the general account investment portfolios are managed by our Investment Management segment, primarily through international subsidiaries. Our operations generally invest in local currency denominated securities, primarily bonds issued by the local government or its agencies. In our larger operations, we have more diversified portfolios that also include U.S. dollar-denominated investments, in large part to support products issued in U.S. dollars and as part of our foreign exchange hedging strategy. Our Gibraltar Life operations also have Australian dollar-denominated investments that support products issued in that currency.

Competition

The life insurance markets in Japan and Korea are mature and pricing is competitive. Rather than competing primarily based on price, we generally compete on the basis of customer service, including our needs-based approach to selling, the quality and diversity of our distribution capabilities, and our financial strength. Demographic trends in Asia

suggest an increasing opportunity for product innovation, introducing insurance products that allow for savings and income as a growing portion of the population prepares for retirement. Further, as many Asian insurers focus on entering other markets, we have the opportunity to continue to build our presence in the Asian markets we currently serve. The ability to sell through multiple and complementary distribution channels is also a competitive advantage; however, competition for sales personnel, as well as access to third-party distribution channels, is intense.

Products

Our international insurance operations have a diversified product mix, primarily emphasizing death protection while supporting the growing demand for retirement and savings products. Outside of Japan, our products are generally denominated in local currency. Within Japan, as a result of both the continued low interest rate environment and fluctuating currency markets, there has been a shift in demand for certain products, particularly for those denominated in U.S. dollars, which currently comprise a significant portion of new sales. In addition, we regularly examine our product offerings and particularly in Japan have taken specific actions to reprice or, in some cases, suspend sales of products that are most affected by such factors, including low interest rates.

Table of Contents

We classify our products into four general categories: life insurance protection, retirement, annuity and accident & health, which represented 62%, 19%, 13% and 6%, respectively, of full year 2017 annualized new business premiums on a constant exchange rate basis. Each product category is described below:

Life Insurance Protection Products. We offer various traditional whole life products that provide either level or increasing coverage, and offer limited or lifetime premium payment options. We also offer increasing, decreasing and level benefit term insurance products that provide coverage for a specified time period, as well as protection-oriented variable universal life products. Some of these protection products are denominated in U.S. dollars and some are sold as bundled products which, in addition to death protection, include health benefits or savings elements.

Retirement Products. We offer a variety of retirement products, including endowments, savings-oriented variable universal life and retirement income. Endowments provide payment of the face amount on the earlier of death or policy maturity. Variable universal life products provide a non-guaranteed return linked to an underlying investment portfolio of equity and fixed income funds selected by the customer. Retirement income products combine insurance protection similar to term life with a lifetime income stream which commences at a predefined age.

Annuity Products. Annuity products are primarily represented by U.S. and Australian dollar-denominated fixed annuities sold by our Gibraltar Life operations in Japan and Korean won- and U.S. dollar-denominated variable annuities sold by our Life Planner operation in Korea. Sales and surrenders of non-yen products can be sensitive to foreign currency relationships which are impacted by, among other things, the comparative interest rates in the respective countries. Most of our fixed annuity products impose a market value adjustment if the contract is not held to maturity.

Accident and Health Products. In most of our operations, we offer accident and health products with fixed benefits. These products provide benefits to cover accidental death and dismemberment, hospitalization, surgeries, and cancer and other dread diseases, most of which are sold as supplementary riders and not as stand-alone products. We also offer waiver of premium coverage where required premiums are waived in the event the customer suffers a qualifying disability.

Marketing and Distribution

Our International Insurance segment distributes its products through multiple distribution channels, including two captive agent models, Life Planners and Life Consultants, as well as bank and independent agency third-party distribution channels. For additional information on headcount for our captive agents, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations by Segment—International Insurance Division.”

Life Planners. Our Life Planner model differentiates us from competitors in the countries where we do business by focusing on selling protection-oriented life insurance products on a needs basis to mass affluent and affluent customers, as well as retirement-oriented products to small businesses. We believe that our recruiting and selection process, training programs and compensation packages are key to the Life Planner model and have helped our Life Planner operations achieve higher levels of agent retention, agent productivity and policy persistency. The attributes considered when recruiting new Life Planners generally include but are not limited to: university or college degree, no prior life insurance sales experience, a minimum of two years of sales or sales management experience, and a pattern of job stability and success. The number of Life Planners as of December 31, 2017 and 2016, was 7,831 and 7,680, respectively.

Life Consultants. Our Life Consultants are the proprietary distribution force for products offered by our Gibraltar Life operations. Their focus is to provide individual protection products to the broad middle income market, primarily in Japan, particularly through relationships with affinity groups. Our Life Consultant operation is based on a variable compensation plan designed to improve productivity and persistency that is similar to compensation plans in our Life Planner operations. The number of Life Consultants in Japan as of December 31, 2017 and 2016, was 8,326 and 8,884, respectively.

Bank Distribution Channel. Bank distribution channel sales primarily consist of life insurance products intended to provide savings features, premature death protection and estate planning benefits as well as fixed annuity products primarily denominated in U.S. and Australian dollars. We view the bank distribution channel as an adjunct to our core Life Planner and Life Consultant distribution channels and will continue to pursue this channel with a focus on profitable growth.

A significant portion of our sales in Japan through our bank channel distribution are derived through a single Japanese mega-bank; however, we have relationships with each of Japan's four largest banks as well as many regional banks, and we continue to explore opportunities to expand our distribution capabilities through this channel, as appropriate.

Table of Contents

Independent Agency Distribution Channel. Our independent agency channel sells protection products and high cash value products for retirement benefits through the business market and sells a variety of other products including protection, medical and fixed annuity products through the individual market. Our focus is to maintain a diverse mix of independent agency relationships including accounting firms, corporate agencies and other independent agencies with a balanced focus on individual and business markets. We differentiate ourselves by providing quality service to producers in this distribution channel.

Underwriting and Pricing

Our International Insurance segment is subject to substantial local regulation that is generally more restrictive for product offerings, pricing and structure than U.S. insurance regulation. Each International Insurance operation has its own underwriting department that employs variations of U.S. practices in underwriting individual policy risks. To the extent permitted by local regulation, we base premiums and policy charges for our products on expected death and morbidity benefits, surrender benefits, expenses, required reserves, interest rates, policy persistency and premium payment patterns. In setting underwriting limits, we also consider local industry standards to prevent adverse selection and to stay abreast of industry trends. In addition, we set underwriting limits together with each operation's reinsurers.

Pricing of products is designed to achieve a targeted rate of return for each country, taking into account the country-specific costs of capital, risks, and competitive environment. The profitability of our products is impacted both positively and negatively by differences between actual mortality, morbidity, expense, and investment experience and the related assumptions used in pricing these policies. As a result, the profitability of our products can fluctuate from period to period. Interest rates guaranteed at issue under our insurance contracts may exceed the rates of return we earn on our investments and, as a result, we may experience negative spreads between the rate we guarantee and the rate we currently earn on investments. Additionally, profitability within any reporting period may also be affected by seasonal factors, such as common retirement dates for members of specific customer groups in the second quarter of each year, or the timing of new product introductions, sales campaigns and premium rate changes. Changes in local tax laws may also affect profitability.

Reserves

We establish reserves for our international insurance products in accordance with U.S. GAAP. We primarily use best estimate assumptions with provisions for adverse deviation as of inception when establishing reserves for future policyholder benefits and expenses including assumptions for investment yield, persistency, expenses, mortality and morbidity rates. Future policy benefit reserves also include amounts related to our deferred profit liability, claims reported but not yet paid, and claims incurred but not yet reported. For variable and interest-sensitive life products, as well as most annuity products, we establish liabilities for policyholders' account balances that represent cumulative deposits plus credited interest, less withdrawals, and expense and cost of insurance charges, as applicable. Policyholders' account balances also include unearned revenue reserves calculated based on current best estimate assumptions and provisions for non-life contingent payout annuity benefits.

Reinsurance

International Insurance reinsures portions of its insurance risks, primarily mortality, with both selected third-party reinsurers and Prudential Insurance. International Insurance may from time to time also reinsure risks to other affiliates. We remain liable if a third-party reinsurer is for some reason unable to meet its obligations. On a Company-wide basis, we evaluate the financial condition of reinsurers and monitor the concentration of credit risk to mitigate this exposure.

Corporate and Other Operations

Our Corporate and Other operations include corporate items and initiatives that are not allocated to business segments and businesses that have been or will be divested. Results of the Closed Block, along with certain related assets and liabilities, are reported as the Closed Block division and are accounted for as a divested business that is reported separately from the divested businesses included in Corporate and Other.

Table of Contents

Corporate Operations

Corporate Operations consist primarily of: (1) capital that is not deployed in any business segment; (2) investments not allocated to business segments, including debt-financed investment portfolios, as well as tax credit investments and other tax-enhanced investments financed by business segments; (3) capital debt that is used or will be used to meet the capital requirements of the Company and the related interest expense; (4) our qualified and non-qualified pension and other employee benefit plans, after allocations to business segments; (5) corporate-level activities, after allocations to business segments, including strategic expenditures, corporate governance, corporate advertising, philanthropic activities, deferred compensation, and costs related to certain contingencies and enhanced regulatory supervision; (6) certain retained obligations relating to pre-demutualization policyholders; (7) a life insurance joint venture and an asset management joint venture in China; (8) our Capital Protection Framework, discussed below; (9) the foreign currency income hedging program used to hedge certain non-U.S. dollar denominated earnings in our International Insurance segment; (10) the impact of intercompany arrangements with our Retirement and Investment Management segments to translate certain non-U.S. dollar-denominated earnings at fixed currency exchange rates; and (11) transactions with and between other segments, including the elimination of intercompany transactions for consolidation purposes.

Corporate Operations include certain results related to our Capital Protection Framework (“the Framework”), which we employ as part of our capital management strategy. The Framework addresses the potential capital consequences under a range of market related stresses and the strategies we use to mitigate them. For additional information on our Capital Protection Framework, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Capital—Capital Protection Framework.”

Divested Businesses

Divested Businesses reflect the results of the following businesses that have been, or will be, sold or exited, including businesses that have been placed in wind down status that do not qualify for “discontinued operations” accounting treatment under U.S. GAAP. We exclude these results from our adjusted operating income. See Note 22 to the Consolidated Financial Statements for an explanation of adjusted operating income.

Long-Term Care. In 2012, we discontinued sales of our individual and group long-term care insurance products. We establish reserves for these products in accordance with U.S. GAAP. We use best estimate assumptions with provisions for adverse deviation as of inception or best estimate assumptions as of the most recent loss recognition event when establishing reserves for future policyholder benefits and expenses, including assumptions for morbidity, mortality, persistency, expenses and interest rates. Our assumptions have also factored in our estimate of the timing and amount of anticipated premium increases which will require state approval. Reserves also include claims reported but not yet paid and claims incurred but not yet reported.

Other. In addition to the business described above, the results of Divested Businesses also include the following:

In 2008, we announced our intention to exit our financial advisory business, which consisted of our investment in a retail securities brokerage and clearing operations joint venture which was sold on December 31, 2009. Certain expenses relating to the businesses we originally contributed to the joint venture were retained, primarily for litigation and regulatory matters.

In 2003, we sold our property and casualty insurance companies to Liberty Mutual Group (“Liberty Mutual”). We have reinsured Liberty Mutual for adverse loss development for specific property and casualty risks that they did not want to retain. We believe that we have adequately reserved for our remaining property and casualty obligations under these reinsurance contracts based on the current information available.

•

We ceased writing individual disability income policies in 1992, and a year later ceased writing hospital expense and major medical policies. Most of our individual disability income policies are non-cancelable; however, we reinsured all of these policies as of July 1999. For our hospital expense and major medical policies, the 1996 Health Insurance Portability and Accountability Act guarantees renewal beyond age 65. Under certain circumstances, with appropriate approvals from state regulatory authorities, we are permitted to change the premiums charged for these policies if we can demonstrate the premiums have not been sufficient to pay claims. We establish reserves in accordance with U.S. GAAP for future policyholder benefits and expenses.

We have not actively engaged in the assumed life reinsurance market in the United States since the early 1990s; however, we remain subject to mortality risk for certain assumed individual life insurance policies under the terms of the reinsurance treaties. We establish reserves in accordance with U.S. GAAP for future policyholder benefits and expenses.

Table of Contents

Closed Block Division

In connection with the demutualization in 2001, we ceased offering domestic participating individual life insurance and annuity products, under which policyholders are eligible to receive policyholder dividends reflecting experience. The liabilities for our individual in force participating products were segregated, together with assets to be used exclusively for the payment of benefits and policyholder dividends, expenses and taxes with respect to these products, in the Closed Block. We selected the amount of assets that were expected to generate sufficient cash flow, together with anticipated revenues from the Closed Block policies, over the life of the Closed Block to fund payments of all policyholder benefits, expenses and taxes, and to provide for the continuation of the policyholder dividend scales in effect in 2000, assuming experience underlying such scales continued. No policies sold after demutualization have been added to the Closed Block, and its in force business is expected to decline as we pay policyholder benefits in full.

The results of the Closed Block, along with certain related assets and liabilities, comprise the Closed Block division, which is treated as a divested business under our definition of adjusted operating income and reported separately from the other divested businesses that are included in our Corporate and Other operations.

As discussed in Note 12 to the Consolidated Financial Statements, if the performance of the Closed Block is more or less favorable than we originally assumed in funding, total dividends paid to Closed Block policyholders in the future may be greater or less than the total dividends that would have been paid to these policyholders if the policyholder dividend scales in effect in 2000 had been continued. Any experience in excess of amounts assumed may be available for distribution over time to Closed Block policyholders as part of policyholder dividends unless offset by future Closed Block experience that is less favorable than expected. This excess experience will not be available to shareholders. A policyholder dividend obligation liability is established for any excess experience. Each year, the Board of Directors of Prudential Insurance determines the dividends payable on participating policies for the following year based on the experience of the Closed Block, including investment income, net realized and unrealized investment gains, mortality experience and other factors. See Note 22 to the Consolidated Financial Statements for revenues, income and loss, and total assets of the Closed Block division.

Our strategy is to maintain the Closed Block as required by our Plan of Reorganization over the time period of its gradual diminishment as policyholder benefits are paid in full. We are permitted under the Plan of Reorganization, with the prior consent of the Commissioner of Banking and Insurance for the State of New Jersey, to enter into agreements to transfer all or any part of the risks under the Closed Block policies.

Prudential Insurance reinsures substantially all of the outstanding liabilities of the Closed Block into a statutory guaranteed separate account of a wholly-owned subsidiary, Prudential Legacy Insurance Company of New Jersey ("PLIC"), primarily on a coinsurance basis.

Intangible and Intellectual Property

We capture and protect the innovation in our financial services products by applying for federal business method patents and implementing trade secret controls, as appropriate. We also use numerous federal, state, common law and foreign servicemarks, including in particular "Prudential", "Prudential Financial", the "Prudential logo" and our "Rock" symbol. We believe that the value associated with many of our patents and trade secrets, and the goodwill associated with many of our servicemarks are significant competitive assets.

Since 2004, we have had an agreement with Prudential plc of the United Kingdom ("U.K."), with whom we have no affiliation, concerning the parties' respective rights worldwide to use the names "Prudential" and "Pru." The agreement restricts use of the "Prudential" and "Pru" name and mark in a number of countries outside the Americas, including Europe and most parts of Asia. Where these limitations apply, we combine our "Rock" symbol with alternative word

marks. We believe that these limitations do not materially affect our ability to operate or expand internationally.

Regulation

Overview

Our businesses are subject to comprehensive regulation and supervision. The purpose of these regulations is primarily to protect our customers and the overall financial system and not necessarily our shareholders or debt holders. Many of the laws and regulations to which we are subject are regularly re-examined. Existing or future laws and regulations may become more restrictive or otherwise adversely affect our operations or profitability, increase compliance costs, or increase potential regulatory exposure. In recent years we have experienced, and expect to continue to experience, extensive changes in the laws and regulations, and

Table of Contents

regulatory frameworks applicable to our businesses in the U.S. and internationally, including the Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank”) discussed below. In addition, we cannot predict how current or future initiatives will impact these existing laws, regulations and regulatory frameworks.

In our international businesses, regulations may apply heightened scrutiny to non-domestic companies, which can reduce our flexibility as to intercompany transactions, investments and other aspects of business operations and adversely affect our liquidity and profitability. In some instances, regulators may impose different, or more rigorous laws and requirements than in the U.S. to protect policyholders or their financial system from perceived systemic risk, including regulations governing privacy, consumer protection, employee protection, corporate governance and capital adequacy. In addition, certain of our international operations face political, legal, operational and other risks that we do not face in the U.S., including the risk of discriminatory regulation, labor issues in connection with workers’ associations and trade unions, nationalization or expropriation of assets, price controls and currency exchange controls or other restrictions that limit our ability to transfer funds from these operations out of the countries in which they operate or to convert local currencies we hold into U.S. dollars or other currencies. Some jurisdictions in which we operate joint ventures restrict our maximum percentage of ownership, which exposes us to additional operational, compliance, legal and joint venture partner risks and limits our array of potential remedies in the event of a breach by a partner.

The primary regulatory frameworks applicable to the Company are described further below under the following section headings:

- Dodd-Frank Wall Street Reform and Consumer Protection Act
- ERISA and DOL Fiduciary Rules
- U.S. State Insurance Holding Company Regulation
- U.S. Insurance Operations
- State Insurance Regulation
- U.S. Federal and State Securities Regulation Affecting Insurance Operations
- International Insurance Regulation
- U.S. Investment and Retirement Products and Investment Management Operations
- U.S. Securities and Commodity Operations
- International Regulation of Non-Insurance Operations
- Derivatives Regulation
- Privacy and Cybersecurity Regulation
- Anti-Money Laundering and Anti-Bribery Laws
- Environmental Laws and Regulations
- Unclaimed Property Laws
- Taxation
- U.S. Taxation
- International Taxation
- International and Global Regulatory Initiatives

Several of our domestic and foreign regulators, including the Board of Governors of the Federal Reserve System (“FRB”) and the New Jersey Department of Banking and Insurance (“NJDOBI”), participate in an annual supervisory college. The purpose of the supervisory college is to promote ongoing supervisory coordination, facilitate the sharing of information among regulators and to enhance each regulator’s understanding of the Company’s risk profile. The most recent supervisory college was held in October 2017.

Dodd-Frank Wall Street Reform and Consumer Protection Act

Dodd-Frank subjects us to substantial federal regulation, primarily as a non-bank financial company (a “Designated Financial Company”) designated for supervision by the FRB, as discussed below. We cannot predict the timing or requirements of the regulations not yet adopted under Dodd-Frank or how such regulations will impact our business, credit or financial strength ratings, results of operations, cash flows, financial condition or competitive position. Furthermore, we cannot predict whether such regulations will make it advisable or require us to hold or raise additional capital or liquid assets, potentially affecting capital deployment activities, including buying back shares or paying dividends.

Initiatives Regarding Dodd-Frank and Financial Regulation

In November 2017, the U.S. Department of the Treasury released a report titled “Financial Stability Oversight Council Designations,” with recommendations on the Financial Stability Oversight Council’s (the "Council") standards and processes for the designation and continued designation of Designated Financial Companies. The Treasury was directed by President Trump in

Table of Contents

an April 2017 memorandum to review the process and issue the report. The report recommends, among other things, prioritizing an activities-based approach over the use of individual company designations, enhancing coordination and engagement with primary insurance regulators at the state level, and improving the analysis used to support determinations.

In October 2017, the U.S. Department of the Treasury released a report titled “A Financial System That Creates Economic Opportunities - Asset Management and Insurance.” The Treasury was directed by President Trump in a February 2017 executive order to review the regulation of the financial system and issue the report. The report identifies laws, regulations and other requirements that promote or inhibit certain core principles of financial regulation that are outlined in the order. Among other things, the report recommends that primary federal and state regulators should focus on potential systemic risks arising from products and activities, and on implementing regulations that strengthen the asset management and insurance industries as a whole, rather than focus on an entity-based regulatory regime. The report also affirms the role of the U.S. state-based system of insurance regulation. In addition, the report supports current efforts at the DOL to reexamine, and delay full implementation of, the fiduciary rules, and encourages the DOL and the U.S. Securities and Exchange Commission (“SEC”) to work with state insurance regulators to evaluate the impacts of the fiduciary rules across markets.

In June 2017, the U.S. House of Representatives passed the Financial CHOICE Act, which, if enacted, would amend certain provisions of Dodd-Frank, including the authority of the Council to designate non-bank financial companies for enhanced supervision by the FRB. In addition, from time to time other legislation aimed at limiting Dodd-Frank has been proposed.

We cannot predict whether the Treasury reports, the Financial CHOICE Act or other initiatives aimed at revising Dodd-Frank and regulation of the financial system will ultimately form the basis for changes to laws or regulations impacting the Company, or lead to the removal of the Company’s Designated Financial Company status.

Regulation as a Designated Financial Company

Dodd-Frank established the Council, which is authorized to subject non-bank financial companies such as Prudential Financial to stricter prudential standards and to supervision by the FRB if the Council determines that either (i) material financial distress at the Company, or (ii) the nature, scope, size, scale, concentration, interconnectedness, or mix of the Company’s activities, could pose a threat to domestic financial stability. Prudential Financial has been a Designated Financial Company since September 2013 under the first criterion. Under Dodd-Frank the Council is required to reevaluate this designation at least annually. The Council last voted to maintain Prudential Financial’s designation in December 2015, and our designation is currently being reevaluated.

Thus far the FRB has focused its general supervisory authority over us in several areas, including oversight of our capital planning and risk management processes, model governance and validation, liquidity management, compliance, information and technology security, and resolution and recovery planning.

As a Designated Financial Company, the Company is, or may become, subject to the following standards (many of which are the subject of ongoing rule-making as described below), among others:

Capital, leverage and liquidity requirements. Dodd-Frank requires the FRB to establish requirements and limitations relating to capital, leverage and liquidity. The FRB issued an advance notice of proposed rulemaking in June 2016 regarding approaches to minimum regulatory capital requirements, but otherwise has taken no public action. Corporate governance, risk management and liquidity risk requirements. The FRB issued a proposed rule in June 2016 that would apply consistent liquidity risk, corporate governance, and risk-management standards to Designated Financial Companies, but has not issued a final rule.

Stress testing. Dodd-Frank requires us to be subject to stress tests to be promulgated by the FRB. Under FRB rules, Designated Financial Companies must comply with these requirements in the calendar year after the year in which a company first becomes subject to the FRB's minimum regulatory capital requirements discussed above, although the FRB has the discretion to accelerate or extend the effective date.

Early remediation. The FRB is required under Dodd-Frank to prescribe regulations for the establishment of an "early remediation" regime for the financial distress of Designated Financial Companies.

Resolution planning. We are required to submit to the FRB and Federal Deposit Insurance Corporation ("FDIC"), and periodically update in the event of material events, a plan for rapid and orderly resolution in the event of severe financial distress. We submitted our last resolution plan in December 2015. In July 2017, the FRB and the FDIC announced that the next resolution plan filing deadline will be delayed from December 31, 2017 to December 31, 2018. If the FRB and the FDIC were to jointly determine that our 2015 resolution plan, or any future resolution plan, is not credible or would not facilitate an orderly resolution of the Company under applicable law, and the Company is unable to remedy the identified deficiencies in a timely manner, the regulators may jointly impose more stringent capital, leverage or liquidity requirements or restrictions on growth, activities or operations, or require us

Table of Contents

to divest assets. The FRB and FDIC have thus far issued no comments on our 2015 resolution plan.

Recovery planning. We are also required to submit to the FRB a recovery plan that describes the steps that the Company could take to reduce risk and conserve or restore liquidity and capital in the event of severe financial stress scenarios. We submitted our first recovery plan in 2016. We are scheduled to submit our next recovery plan in June 2019.

Credit exposure limits. Dodd-Frank requires the FRB to promulgate regulations that would prohibit Designated Financial Companies from having a credit exposure to any unaffiliated company in excess of 25% of the Designated Financial Company's capital stock and surplus. The FRB has not proposed any such rule.

Acquisitions. As a Designated Financial Company, we must seek pre-approval from the FRB for the acquisition of specified interests in certain companies engaged in financial activities.

Recommendations to other regulators. The Council may recommend that state insurance regulators or other regulators apply new or heightened standards and safeguards for activities or practices we and other insurers or other financial services companies engage in.

Activities based capital requirements. As a Designated Financial Company, we could be subject to additional capital requirements for, and other restrictions on, proprietary trading and sponsorship of, and investment in, hedge, private equity and other covered funds.

ERISA and DOL Fiduciary Rules

The Employee Retirement Income Security Act ("ERISA") is a comprehensive federal statute that applies to U.S. employee benefit plans sponsored by private employers and labor unions. Plans subject to ERISA include pension and profit sharing plans and welfare plans, including health, life and disability plans. ERISA provisions include reporting and disclosure rules, standards of conduct that apply to plan fiduciaries and prohibitions on transactions known as "prohibited transactions," such as conflict-of-interest transactions and certain transactions between a benefit plan and a party in interest. ERISA also provides for civil and criminal penalties and enforcement. Our insurance, investment management and retirement businesses provide services to employee benefit plans subject to ERISA, including services where we may act as an ERISA fiduciary. In addition to ERISA regulation of businesses providing products and services to ERISA plans, we become subject to ERISA's prohibited transaction rules for transactions with those plans, which may affect our ability to enter transactions, or the terms on which transactions may be entered, with those plans, even in businesses unrelated to those giving rise to party in interest status.

DOL Fiduciary Rules and Other Fiduciary Rules Developments

In April 2016, the DOL issued a final regulation accompanied by new class exemptions and amendments to long-standing exemptions from the prohibited transaction provisions under ERISA (collectively, the "Rules"). The Rules redefine who is considered a "fiduciary" for purposes of transactions with qualified plans, plan participants and Individual Retirement Accounts ("IRAs"), and generally provide that investment advice to a plan participant or IRA owner will be treated as a fiduciary activity. The Rules became applicable, in part, on June 9, 2017 and the remainder of the Rules will become applicable on July 1, 2019. In November 2017, the DOL announced an 18-month extension of the previous January 1, 2018 applicability date for the remainder of the Rules in order to give the DOL the time necessary to consider public comments received in response to a DOL request for information (as further described below), including whether changes and alternatives to the Rules would be appropriate.

In February 2017, President Trump directed the DOL to examine the Rules to determine whether they may adversely affect access to retirement information and advice and, if so, to issue a proposed rule rescinding or revising the Rules. In connection with the ongoing examination of the Rules as directed by President Trump, the DOL issued a request for information seeking public comment on the Rules. In addition, the Secretary of Labor has stated that he will seek to engage with the SEC on the Rules. In June 2017, the Chairman of the SEC issued a public statement soliciting comments on the standard of conduct for investment advisers and broker-dealers when they provide advice to retail

investors. The National Association of Insurance Commissioners (“NAIC”) has also formed an Annuity Suitability Working Group, which is considering the development of enhanced standards for the sale of annuities. In addition, in December 2017, the New York State Department of Financial Services (“NY DFS”) proposed amendments to its suitability regulations which, if enacted, would impose a best-interest standard to the sale of all annuity and life insurance products in New York, and other state regulators and legislatures have adopted or are considering adopting best interest standards. We cannot predict what impact these developments will have on the Rules and their application to our products or on the standard of conduct applicable to some of our businesses.

We believe the Rules primarily impact our Individual Annuities, Retirement and Investment Management segments and our Prudential Advisors distribution system, which we include in the results of our Individual Life segment. Overall, the Rules have resulted in increased compliance costs and may create increased exposure to legal claims under certain circumstances, including class actions. In addition, we have experienced a decline in sales in our annuities business, which may continue. Significant aspects of the Rules and their impact on our businesses include the following:

19

Table of Contents

- **Prudential Advisors.** We have taken the steps we believe are necessary to comply with the part of the Rules currently in effect which pertains to the “best interest contract exemption” for investment advice concerning retirement plans and IRAs, including recommendations to purchase products sold to IRAs, which constitutes a significant part of Prudential Advisors’ non-life insurance new business revenues. The Rules have also resulted in changes to compensation and benefit structures, and our product offerings. The Rules impose compliance requirements and may result in damages and liability under ERISA and the Internal Revenue Code for excise taxes, disgorgement of profit, and other possible remedies. Unless revised, one of the parts of the Rules scheduled to become applicable in 2019 requires a financial institution, if it wishes to rely on the best interest contract exemption in the Rules, to enter into a contract with each customer to whom “investment advice” is given. This contract must provide, among other things, for a new private right of action that may result in additional damages and liability.
- **Annuities.** In response to the Rules becoming effective, certain distributors restricted the sale of certain types of annuities. During the delay of certain requirements until July 2019, all qualified sales of variable and fixed annuities are generally subject to the same “impartial conduct standards” under the Rules. If the Rules become effective in their current form, following the July 2019 effective date, sales of variable annuities by our retail distributors, including Prudential Advisors, would only be permitted pursuant to the best interest contract exemption described above, while sales of certain fixed annuities would be permitted pursuant to the best interest contract exemption or a separate exemption. In addition, in some instances we are altering our product design, offerings or pricing to meet the needs of certain distributors to support their compliance with the Rules. We are also monitoring and limiting certain wholesaling and other sales support and customer service activities to continue not to be classified as a fiduciary under the Rules.
- **Retirement.** We have made certain changes to the asset allocation tools available for use by participants in defined contribution plans, which may include illustrations based on specific investments, so that the tools should not fall within the definition of acting as a fiduciary for plan clients. We have instituted processes for IRA offerings to comply with the new best interest contract exemption referred to above in connection with recommendations to plan participants to roll assets over to an IRA or retain them in their employer’s retirement plan. In addition, we have taken certain actions with sponsors and intermediaries for plans with less than \$50 million in assets to continue not to be classified as a fiduciary under the Rules. Historically, the substantial majority of our earnings in the Retirement business have not come from IRA offerings, asset retention and consolidation activities, and plans with less than \$50 million in assets.
- **Investment Management.** In some instances we have altered our product design, offerings or pricing in order to meet the needs of certain distributors of mutual funds to support their compliance with the Rules. We are also monitoring and limiting certain wholesaling and other sales support and customer service activities to continue not be classified as a fiduciary under the Rules.

The Rules have had an impact on our business as described above, and any revised Rules or additional standards developed by the DOL, the SEC or the NAIC and state regulators may further affect our business, results of operations, cash flows and financial condition.

Outside the U.S., in 2017 the Japanese Financial Services Agency (“FSA”) announced the “Principles of Fiduciary Duty,” a set of recommended general principles for businesses to adopt when performing client related financial services. The principles have been adopted by The Prudential Life Insurance Company Ltd. (“Prudential of Japan”), Gibraltar Life, and Prudential Gibraltar Financial Life Insurance Company, Ltd. (“PGFL”). The FSA encourages voluntary adoption of these fiduciary principles as a best practice, but adoption is not required by regulation. Companies’ policies regarding their fiduciary duties can be tailored based on their specific business, such as target clients and complexity of products. Once companies adopt the principles and establish a policy, they are required to implement measures to ensure their employees fulfill their fiduciary duties, and periodically assess the measures’ effectiveness. The principles or further regulatory developments may impact our business, results of operations, cash flows and financial condition.

U.S. State Insurance Holding Company Regulation

We are subject to the insurance holding company laws in the states where our insurance subsidiaries are domiciled, which currently include New Jersey, Arizona, Connecticut and Indiana, or are treated as commercially domiciled, such as New York. These laws generally require each insurance company directly or indirectly owned by the holding company to register with the insurance department in the insurance company's state of domicile and to furnish annually financial and other information about the operations of companies within the holding company system. Generally, all transactions affecting the insurers in the holding company system must be fair and reasonable and, if material, require prior notice and approval or non-disapproval by the state's insurance department.

Table of Contents

Most states, including the states in which our U.S. insurance companies are domiciled, have insurance laws that require regulatory approval of a direct or indirect change of control of an insurer or an insurer's holding company. Laws such as these that apply to us prevent any person from acquiring control of Prudential Financial or of our insurance subsidiaries unless that person has filed a statement with specified information with the insurance regulators and has obtained their prior approval. Under most states' statutes, acquiring 10% or more of the voting stock of an insurance company or its parent company is presumptively considered a change of control, although such presumption may be rebutted. Accordingly, any person who acquires 10% or more of the voting securities of Prudential Financial without the prior approval of the insurance regulators of the states in which our U.S. insurance companies are domiciled will be in violation of these states' laws and may be subject to injunctive action requiring the disposition or seizure of those securities by the relevant insurance regulator or prohibiting the voting of those securities and to other actions determined by the relevant insurance regulator. In addition, many state insurance laws require prior notification to state insurance departments of a change in control of a non-domiciliary insurance company doing business in that state.

Group-Wide Supervision

NJDOBI has acted as the group-wide supervisor of Prudential Financial since 2015 pursuant to New Jersey legislation that authorizes group-wide supervision of internationally active insurance groups. The law, among other provisions, authorizes NJDOBI to examine Prudential Financial and its subsidiaries, including by ascertaining the financial condition of the insurance companies for purposes of assessing enterprise risk. In accordance with this authority, NJDOBI receives information about the Company's operations beyond those of its New Jersey domiciled insurance subsidiaries.

The NAIC has promulgated model laws for adoption in the United States that would provide for group-wide supervision of certain insurance holding companies in addition to the current regulation of insurance subsidiaries. While the timing of their adoption and content will vary by jurisdiction, we have identified the following areas of focus in these model laws: (1) uniform standards for insurer corporate governance; (2) group-wide supervision of insurance holding companies; (3) adjustments to risk-based capital calculations to account for group-wide risks; and (4) additional regulatory and disclosure requirements for insurance holding companies.

Some laws which facilitate group-wide supervision have already been enacted in the jurisdictions in which we operate, such as Own Risk and Solvency Assessment ("ORSA") reporting, which requires larger insurers to assess the adequacy of its and its group's risk management and current and future solvency position, and Corporate Governance Annual Disclosure reporting, which requires us to report on our governance structure, policies and practices.

The NAIC has formed a working group to develop a U.S. group capital calculation using an RBC aggregation methodology. In constructing the calculation the working group is considering group capital developments undertaken by the FRB and the International Association of Insurance Supervisors ("IAIS").

The NAIC has also established a new initiative to develop a macroprudential framework intended to: (1) improve state insurance regulators' ability to monitor and respond to the impact of external financial and economic risks on insurers; (2) better monitor and respond to risk emanating from or amplified by insurers that might be transmitted externally; and (3) increase public awareness of NAIC/state monitoring capabilities regarding macroprudential trends. As part of this initiative, the areas identified by the NAIC for potential enhancement include liquidity, resolution and recovery, capital stress testing, and counterparty exposure and concentration. We cannot predict what, if any, additional requirements and compliance costs any new group-wide standards will impose on Prudential Financial.

State insurance departments conduct periodic examinations of the books and records, financial reporting, policy filings and market conduct of insurance companies domiciled in their states, generally once every three to five years.

Examinations are generally carried out in cooperation with the insurance departments of other states under guidelines promulgated by the NAIC. During 2016, as part of the normal five year examination, NJDOBI, along with the insurance regulators of Arizona, Connecticut and Indiana commenced a coordinated risk-focused financial examination for the five year period ended December 31, 2016, covering Prudential and all of its subsidiaries in connection with NJDOBI's role as group-wide supervisor. We expect the exam to be completed in 2018.

U.S. Insurance Operations

State insurance laws regulate all aspects of our U.S. insurance businesses, and state insurance departments in the fifty states, the District of Columbia and various U.S. territories and possessions monitor our insurance operations. Prudential Insurance is domiciled in New Jersey and its principal insurance regulatory authority is the NJDOBI. Our other U.S. insurance companies are principally regulated by the insurance departments of the states in which they are domiciled. Generally, our insurance products must be approved by the insurance regulators in the state in which they are sold. Our insurance products are substantially affected

Table of Contents

by federal and state tax laws.

State Insurance Regulation

State insurance authorities have broad administrative powers with respect to all aspects of the insurance business including: (1) licensing to transact business; (2) licensing agents; (3) admittance of assets to statutory surplus; (4) regulating premium rates for certain insurance products; (5) approving policy forms; (6) regulating unfair trade and claims practices; (7) establishing reserve requirements and solvency standards; (8) fixing maximum interest rates on life insurance policy loans and minimum accumulation or surrender values; (9) regulating the type, amounts and valuations of investments permitted; (10) regulating reinsurance transactions, including the role of captive reinsurers; and (11) other matters.

State insurance laws and regulations require our U.S. insurance companies to file financial statements with state insurance departments everywhere they do business in accordance with accounting practices and procedures prescribed or permitted by these departments. The operations of our U.S. insurance companies and accounts are subject to examination by those departments at any time.

Financial Regulation

Dividend Payment Limitations. New Jersey insurance law and the insurance laws of the other states in which our insurance companies are domiciled regulate the amount of dividends that may be paid by Prudential Insurance and our other U.S. insurance companies. See Note 15 to the Consolidated Financial Statements for additional information.

Risk-Based Capital. We are subject to risk-based capital (“RBC”) requirements that are designed to enhance regulation of insurers’ solvency. The RBC calculation, which regulators use to assess the sufficiency of an insurer’s statutory capital, measures the risk characteristics of a company’s assets, liabilities and certain off-balance sheet items. In general, RBC is calculated by applying factors to various asset, premium, claim, expense and reserve items. Within a given risk category, these factors are higher for those items with greater underlying risk and lower for items with lower underlying risk. Insurers that have less statutory capital than required are considered to have inadequate capital and are subject to varying degrees of regulatory action depending upon the level of capital inadequacy.

The NAIC’s Investment Risk-Based Capital Working Group is developing updates to the RBC factors for invested assets including expanding, for RBC purposes, the current NAIC designations from six to twenty. Additional adjustments to the RBC calculation are also under consideration by the NAIC, including new charges for longevity risk and operational risk. Due to the ongoing nature of the NAIC’s activities regarding RBC, we cannot determine the ultimate timing of these changes or their impact on RBC or on our financial position.

Insurance Reserves and Regulatory Capital. State insurance laws require us to analyze the adequacy of our reserves annually. The respective appointed actuaries for each of our life insurance companies must each submit an opinion that our reserves, when considered in light of the assets we hold with respect to those reserves, make adequate provision for our contractual obligations and related expenses.

In June 2016, the NAIC adopted a recommendation that will activate a principles-based reserving approach for life insurance products. Principles-based reserving replaces the reserving methods for life insurance products for which the current formulaic basis for reserves may not accurately reflect the risks or costs of the liability or obligations of the insurer. The principles-based reserving approach has a three-year phase-in period. At the Company's discretion, it may be applied to new individual life business beginning as early as January 1, 2017, but must be applied for all new individual life business issued January 1, 2020 and later. The Company may select different implementation dates for different products. Principles-based reserving will not affect reserves for policies in force prior to January 1, 2017.

During 2017, the Company adopted principles-based reserving for its guaranteed universal life products and introduced updated versions of these products that are expected to support the principles-based statutory reserve level without the need for captive reserve financing or additional assets under Actuarial Guideline No. 48 (“AG 48”). AG 48 prescribes an actuarial method to determine the portion of the assets held to support reserves for certain term and universal life policies that must be cash and rated securities, and the portion that may be financed or supported by other assets. The Credit for Reinsurance Model Law and the Term and Universal Life Insurance Reserving Financing Model Regulation, which are consistent with AG 48, will replace AG 48 in a state upon the state’s adoption of the model law and regulation. The Company is continuing to assess the impact of this new reserving approach on projected statutory reserve levels and product pricing for its remaining portfolio of individual life product offerings, such as term and variable life insurance.

As a result of an agreement with the NY DFS regarding our reserving methodologies for certain variable annuity and life insurance products, certain of our New York licensed insurance subsidiaries hold additional statutory reserves on a New York

Table of Contents

basis, which reduces their New York statutory surplus. None of our U.S. operating insurance companies are domiciled in New York, and these changes do not impact statutory reserves reported in our insurance subsidiaries' states of domicile, or any states other than New York, and therefore do not impact RBC ratios; however, the agreed reserve methodologies may require us to hold additional New York statutory reserves in the future. If we were required to establish material additional reserves on a New York statutory accounting basis or post material amounts of additional collateral with respect to annuity or insurance products, our ability to deploy capital held within our U.S. domestic insurance subsidiaries for other purposes could be affected.

Captive Reinsurance Companies. We have used captive reinsurance subsidiaries to finance the portion of the statutory reserves for term and universal life policies that we consider to be non-economic. If we are unsuccessful in obtaining additional financing as a result of market conditions, regulatory changes or otherwise, this could require us to increase prices, reduce our sales of certain life products, or modify certain products, any of which could adversely affect our competitiveness, capital and financial position and results of operations. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Capital—Financing Activities—Term and Universal Life Reserve Financing" for a discussion of our life product reserves and reserve financing.

Variable Annuities. In November 2015, the NAIC adopted the Variable Annuities Framework for Change, which outlines the NAIC's commitment to change in concept the statutory framework to address concerns that have led to the development and utilization of captive reinsurance transactions for variable annuity business in order to create more consistency across regulators and remove the impetus for insurers to cede risk to captives. The framework contemplates extensive changes to the guidance and rules governing variable annuities, including with regard to reserving, capital, accounting, derivative use limitations and disclosure.

In December 2017, the NAIC exposed for public comment proposed recommendations and revisions to the current Actuarial Guideline No. 43 ("AG 43") and RBC "C-3 Phase II" framework applicable to variable annuities reserve and capital requirements. Proposed changes include: (i) aligning economically-focused hedge assets with liability valuations; (ii) reforming standard scenarios for AG 43 and C3 Phase II; (iii) revising asset admissibility for derivatives and deferred tax assets; and (iv) standardizing capital market assumptions and aligning total asset requirements and reserves. Given the uncertainty of the ultimate outcome of these initiatives, at this time we are unable to predict the timing of any new rules or their expected effects on our business. If applicable insurance laws are changed in a way that impairs our ability to write variable annuities and efficiently manage their associated risks, we may need to increase prices or modify our products, which could also adversely affect our competitiveness, capital and financial position and results of operations.

During 2016, we recaptured the risks related to our variable annuities living benefit riders and certain retirement products that were previously reinsured to our captive reinsurance company in a series of transactions we collectively refer to as the "Variable Annuities Recapture." While we completed the Variable Annuities Recapture in advance of definitive guidance from the NAIC's Variable Annuities Framework for Change, we believe the Variable Annuities Recapture is reasonably aligned with the key concept changes planned under the framework.

Market Conduct Regulation

State insurance laws and regulations include numerous provisions governing the marketplace activities of insurers, including provisions governing the form and content of disclosure to consumers, illustrations, advertising, sales practices and complaint handling. State regulatory authorities generally enforce these provisions through periodic market conduct examinations.

Insurance Guaranty Association Assessments

Each state has insurance guaranty association laws under which insurers doing business in the state are members and may be assessed by state insurance guaranty associations for certain obligations of insolvent insurance companies to policyholders and claimants. Typically, states assess each member insurer in an amount related to the member insurer's proportionate share of the line of business written by all member insurers in the state. Many states offer a reimbursement of such assessments in the form of credits against future years' premium taxes. For the years ended December 31, 2017, 2016 and 2015, we paid \$12.6 million, \$1.5 million and \$0.6 million, respectively, in assessments pursuant to state insurance guaranty association laws. The 2017 assessments reflected the Penn Treaty Network America Insurance Company insolvency, which was liquidated on March 1, 2017. While we cannot predict the amount and timing of future assessments on our U.S. insurance companies under these laws, we have established estimated reserves totaling approximately \$35.4 million as of December 31, 2017, for future assessments relating to insurance companies that are currently subject to insolvency proceedings including Penn Treaty Network America Insurance Company, Executive Life of California and Lincoln Memorial Life Insurance Company.

In 2017, the NAIC approved amendments to the Life and Health Insurance Guaranty Association Model Act to address issues relating to long-term care insurance-related insolvencies. The amendments will spread costs from future long-term care

Table of Contents

insurance-related insolvencies across the entire health and life insurance industry, resulting in increased assessments for life insurers. The amended model law will become applicable to us as it is adopted by each state. Prior insolvencies will not be included under these amendments. Given our current market share of the impacted lines of business, we expect our cost related to future insolvencies, net of premium tax credits available under current state laws, would be a small percentage of the gross industry liability.

U.S. Federal and State Securities Regulation Affecting Insurance Operations

Our variable life insurance, variable annuity and mutual fund products generally are “securities” within the meaning of federal securities laws and may be required to be registered under the federal securities laws and subject to regulation by the SEC and the Financial Industry Regulatory Authority (“FINRA”). Certain of our insurance subsidiaries are subject to SEC public reporting and disclosure requirements based on offerings of these products. Federal and some state securities regulation similar to that discussed below under “—Investment Products and Investment Management Operations” and “—Securities and Commodities Regulation” affect investment advice, sales and related activities with respect to these products.

Our mutual funds, and in certain states our variable life insurance and variable annuity products, are also “securities” within the meaning of state securities laws. As securities, these products are subject to filing and certain other requirements. Also, sales activities with respect to these products generally are subject to state securities regulation. Such regulation may affect investment advice, sales and related activities for these products.

Federal Insurance Office

Dodd-Frank established a Federal Insurance Office (“FIO”) within the Department of the Treasury headed by a director appointed by the Secretary of the Treasury. While the FIO does not have general supervisory or regulatory authority over the business of insurance, the FIO director performs various functions with respect to insurance, including serving as a non-voting member of the Council, monitoring the insurance sector and representing the U.S. on prudential aspects of international insurance matters, including at the IAIS.

International Insurance Regulation

Our international insurance operations are principally supervised by regulatory authorities in the jurisdictions in which they operate, including the Japanese Ministry of Finance and the Japanese FSA, the financial services regulator in Japan. In addition to Japan, we operate insurance companies in Korea, Taiwan, Mexico, Argentina, Brazil, Italy and Poland and have insurance operations in China, India, Indonesia and Malaysia through joint ventures, and in Ghana through a strategic investment. The insurance regulatory bodies for these businesses typically oversee such issues as: (1) company licensing, (2) the licensing of insurance sales staff; (3) insurance product approvals; (4) sales practices; (5) claims payment practices; (6) permissible investments; (7) solvency and capital adequacy; and (8) insurance reserves, among other items. In some jurisdictions, for certain products, regulators will also mandate premium rates (or components of pricing) or minimum guaranteed interest rates. Periodic examinations of insurance company books and records, financial reporting requirements, market conduct examinations and policy filing requirements are among the techniques used by these regulators to supervise our non-U.S. insurance businesses. Finally, insurance regulatory authorities in the various jurisdictions in which our insurance companies are domiciled, including Japan, must approve any change of control of Prudential Financial or the insurance companies organized under their laws.

Solvency Regulation

In order to monitor insurers’ solvency, regulatory authorities in the jurisdictions in which we operate outside the U.S. generally establish some form of minimum solvency requirements for insurance companies, similar in concept to the

RBC ratios that are employed by U.S. insurance regulators. These solvency ratios are used by regulators to assess the sufficiency of an insurer's capital and claims-paying ability and include the impact of transactions with affiliated entities. Certain jurisdictions require the disclosure of solvency ratios to the public. Insurers that have lower solvency ratios than the regulators require are considered to have inadequate capital and are subject to varying degrees of regulatory action depending upon the level of capital inadequacy.

Changes in solvency regulation from jurisdiction to jurisdiction may arise based on the regulatory standards developed by the Financial Stability Board ("FSB"), IAIS or authorities in the U.S. or the European Economic Area ("EEA"). FSB and IAIS developments are described below under "—International and Global Regulatory Initiatives."

Japan Capital and Solvency Regulation. Our Japan insurance operations are subject to a consolidated basis capital standard known as the Solvency Margin Ratio framework ("SMR"). This standard prescribes the manner in which an insurance company's capital is calculated and is meant to respond to changes in financial markets, improve risk management practices of insurers and

Table of Contents

consider risks associated with the insurer's subsidiaries. In 2016, the FSA conducted a field test of a potential market based alternative to the SMR framework that closely aligned with components of the IAIS's risk-based Global Insurance Capital Standard ("ICS"), which is described below under "—Other International and Global Regulatory Initiatives." The FSA may continue to explore potential alternatives or revisions to the existing SMR framework. We cannot predict whether changes to the SMR will be adopted, or if they will result in additional capital requirements and compliance costs.

Korea Accounting Standards, Capital and Solvency Regulation. In 2017, the International Accounting Standards Board ("IASB") released a new International Financial Reporting Standard ("IFRS") for accounting for insurance contracts that will go into effect in 2021 in Korea and in certain other jurisdictions where we operate. Korea's Financial Supervisory Service and Financial Services Commission announced plans to enhance the liability adequacy test in June 2017 as part of its adoption effort. The enhancements require life insurers to set aside additional policy reserves in phases from December 2017 to 2020 to support the transition to IFRS, which is expected to lead to an increase in the level of reserves insurers must hold. In Japan, changes in IFRS do not currently impact our operations as they are not required to report under IFRS.

Our Korea insurance operation is subject to RBC requirements that are based in part on financial statements prepared in accordance with current accounting requirements. In 2017, the Financial Supervisory Service ("FSS") of Korea conducted a field test of a potential market based alternative to the RBC framework that closely aligned with components of the IAIS' ICS, which is described below under "—Other International and Global Regulatory Initiatives." The FSS will continue to explore potential alternatives or revisions to the existing RBC framework through further quantitative impact studies with the intention of implementing changes in 2021. We cannot predict whether changes to the RBC framework will ultimately be adopted, or if they will result in additional capital requirements and compliance costs.

Dividend Payment Limitations

The insurance regulatory bodies in some of the countries where our international insurance businesses are located regulate the amount of dividends that they can pay to shareholders. See Note 15 to the Consolidated Financial Statements for additional information regarding the ability of our international subsidiaries to pay dividends to Prudential Financial.

Insurance Guaranty Fund Assessments

Certain of our international insurance operations, including those in Japan, may be subject to assessments, generally based on their proportionate share of business written in the relevant jurisdiction, for certain obligations of insolvent insurance companies to policyholders and claimants. As we cannot predict the timing of future assessments, they may materially affect the results of operations of our international insurance operations in particular quarterly or annual periods. Under the Japanese insurance guaranty law, all licensed life insurers in Japan are required to be members of and are assessed, on a pre-funded basis, by the Japan Policyholders Protection Corporation ("PPC"). These assessments generate a collective fund which is used to satisfy certain obligations of insolvent insurance companies to policyholders and claimants. The PPC assesses each member in an amount related to its proportionate share of new business written by all member insurers. For the years ended December 31, 2017, 2016 and 2015, we paid approximately \$21 million, \$22 million and \$23 million, respectively, based on fixed currency exchange rates, in assessments pursuant to Japanese insurance guaranty association laws.

U.S. Investment and Retirement Products and Investment Management Operations

Our investment products and services are subject to federal and state securities, fiduciary, including ERISA, and other laws and regulations. The SEC, FINRA, the Commodity Futures Trading Commission (“CFTC”), state securities commissions, state banking and insurance departments and the DOL are the principal U.S. regulators that regulate our investment management operations. In some cases our domestic U.S. investment operations are also subject to non-U.S. securities laws and regulations.

Some of the separate account, mutual fund and other pooled investment products offered by our businesses, in addition to being registered under the Securities Act, are registered as investment companies under the Investment Company Act of 1940, as amended, and the shares of certain of these entities are qualified for sale in some states and the District of Columbia. Separate account investment products are also subject to state insurance regulation as described above. We also have several subsidiaries that are registered as broker-dealers under the Securities Exchange Act of 1934 (the “Exchange Act”), as amended, and are subject to federal and state regulation. In addition, we have subsidiaries that are investment advisers registered under the Investment Advisers Act of 1940, as amended. Our third-party advisors and licensed sales professionals within Prudential Advisors and other employees, insofar as they sell products that are securities, are subject to the Exchange Act and to examination requirements and regulation by the SEC, FINRA and state securities commissioners. Regulation and examination requirements also extend to various Prudential entities that employ or control those individuals.

Table of Contents

Congress from time to time considers pension reform legislation that could decrease or increase the attractiveness of certain of our retirement products and services to retirement plan sponsors and administrators, or have an unfavorable or favorable effect on our ability to earn revenues from these products and services. Over time, these changes could hinder our sales of defined benefit pension products and services and cause sponsors to discontinue existing plans for which we provide investment management, administrative, or other services, but could increase the attractiveness of certain products we offer in connection with pension plans.

Finally, Federal and state banking laws also generally require regulatory approval for a change in control of Prudential Financial or PB&T. The U.S. federal securities laws could also require reapproval by customers of our investment advisory contracts to manage mutual funds, including mutual funds included in annuity products, upon a change in control.

U.S. Securities and Commodity Operations

We have subsidiaries that are broker-dealers, investment advisers, commodity pool operators or commodity trading advisers. The SEC, the CFTC, state securities authorities, FINRA, the National Futures Association (“NFA”), the Municipal Securities Rulemaking Board, and similar authorities are the principal regulators of these subsidiaries.

Our broker-dealer and commodities affiliates are members of, and are subject to regulation by, “self-regulatory organizations,” including FINRA and the NFA. Self-regulatory organizations conduct examinations of, and have adopted rules governing, their members. In addition, state securities and certain other regulators have regulatory and oversight authority over our registered broker-dealers. Broker-dealers and their sales forces in the U.S. and in certain other jurisdictions are subject to regulations that cover many aspects of the securities business, including sales methods and trading practices. The regulations cover the suitability of investments for individual customers, use and safekeeping of customers’ funds and securities, capital adequacy, recordkeeping, financial reporting and the conduct of directors, officers and employees. The SEC, CFTC and other governmental agencies and self-regulatory organizations, as well as state securities commissions in the U.S. and non-U.S. regulatory agencies, have the power to conduct administrative proceedings that can result in censure, fine, the issuance of cease-and-desist orders or suspension, termination or limitation of the activities of a broker-dealer, an investment adviser or commodities firm or its employees. Our U.S. registered broker-dealer subsidiaries are subject to federal net capital requirements that may limit the ability of these subsidiaries to pay dividends to Prudential Financial.

International Regulation of Non-Insurance Operations

Our non-insurance international operations are supervised primarily by regulatory authorities in the countries in which they operate. We operate investment-related businesses in, among other jurisdictions, Japan, Taiwan, the U.K., Hong Kong, Mexico, Germany, Luxembourg and Singapore, and participate in investment-related joint ventures in India, Brazil, Italy and China and a retirement related joint venture in Chile. These businesses may provide products such as investment management products and services, mutual funds, separately managed accounts and retirement products. The regulatory authorities for these businesses typically oversee such issues as: (1) company licensing; (2) the licensing of investment product sales staff; (3) sales practices; (4) solvency and capital adequacy; (5) mutual fund product approvals and related disclosures; and (6) securities, commodities and related laws, among other items. In some cases, our international investment operations are also subject to U.S. securities laws and regulations.

In June 2016, the U.K. approved a non-binding referendum to exit the European Union. The formal process for the U.K. to exit from the European Union remains subject to ongoing negotiation between the U.K. and the European Union on the timing and terms of the exit. The outcome of the negotiations will determine the ultimate impact of the exit on our operations and investments in those jurisdictions and may lead to volatility in currency exchange rates and asset prices, as well as changes in regulation.

Derivatives Regulation

Prudential Financial and our subsidiaries use derivatives for various purposes, including hedging interest rate, foreign currency and equity market exposures. Dodd-Frank established a framework for regulation of the over-the-counter derivatives markets. This framework sets out requirements regarding the clearing and reporting of derivatives transactions, as well as collateral posting requirements for uncleared swaps. Affiliated swaps entered into between our subsidiaries are generally exempt from most of these requirements.

We continue to monitor the potential hedging cost impacts of new initial margin requirements that we will be required to comply with in 2020, and increased capital requirements for derivatives transactions that may be imposed on banks that are our counterparties. Additionally, the increased need to post cash collateral in connection with mandatorily cleared swaps may also

Table of Contents

require the liquidation of higher yielding assets for low yielding cash, resulting in a negative impact on investment income.

Privacy and Cybersecurity Regulation

We are subject to laws, regulations and directives that require financial institutions and other businesses to protect the security and confidentiality of personal information, including health-related and customer information, and to notify their customers and other individuals of their policies and practices relating to the collection and disclosure of health-related and customer information. In addition, we must comply with international privacy laws, regulations, and directives concerning the cross border transfer or use of employee and customer personal information. These laws, regulations and directives also:

- provide additional protections regarding the use and disclosure of certain information such as social security numbers;
- require notice to affected individuals, regulators and others if there is a breach of the security of certain personal information;
- require financial institutions and creditors to implement effective programs to detect, prevent, and mitigate identity theft;
- regulate the process by which financial institutions make telemarketing calls and send e-mail or fax messages to consumers and customers; and
- prescribe the permissible uses of certain personal information, including customer information and consumer report information.

Financial regulators in the U.S. and international jurisdictions in which we operate continue to focus on cybersecurity, including in proposed rulemaking, and have communicated heightened expectations and have increased emphasis in this area in their examinations of regulated entities. For example, the European Union's General Data Protection Regulation, which is scheduled to become effective in May 2018, confers additional privacy rights on individuals in the European Union and establishes penalties for violations. In addition, legislative and regulatory bodies may consider additional or more detailed or restrictive laws and regulations regarding these subjects and the privacy and security of personal information.

In March 2017, the NY DFS's new cybersecurity regulation went into effect. The regulation requires financial institutions regulated by NY DFS, including our insurance subsidiaries licensed in New York, to establish a cybersecurity program. The regulation includes specific technical safeguards as well as requirements regarding governance, incident planning, data management, system testing, vendor oversight and regulator notification. In addition, in October 2017, the NAIC adopted the Insurance Data Security Model Law that is consistent with the New York regulation. The model law in turn is expected to form the basis for legislation in the other states in which our insurers operate.

The Company is monitoring regulatory guidance and rulemaking in this area, and may be subject to increased compliance costs and regulatory requirements. In order to respond to the threat of security breaches and cyber attacks, we have developed a program overseen by the Chief Information Security Officer and the Information Security Office that is designed to protect and preserve the confidentiality, integrity, and continued availability of all information owned by, or in the care of the Company. As part of this program, we also maintain an incident response plan. The program provides for the coordination of various corporate functions and governance groups, and serves as a framework for the execution of responsibilities across businesses and operational roles. The program establishes security standards for our technological resources, and includes training for employees, contractors and third parties. As part of the program, we conduct periodic exercises and a response readiness assessment with outside advisors to gain a third-party independent assessment of our technical program and our internal response preparedness. We regularly engage with the outside security community and monitor cyber threat information.

Anti-Money Laundering and Anti-Bribery Laws

Our businesses are subject to various anti-money laundering and financial transparency laws and regulations that seek to promote cooperation among financial institutions, regulators and law enforcement entities in identifying parties that may be involved in terrorism or money laundering. In addition, under current U.S. law and regulations we may be prohibited from dealing with certain individuals or entities in certain circumstances and we may be required to monitor customer activities, which may affect our ability to attract and retain customers. We are also subject to various laws and regulations relating to corrupt and illegal payments to government officials and others, including the U.S. Foreign Corrupt Practices Act and the U.K.'s Anti-Bribery Law. The obligation of financial institutions, including the Company, to identify their clients, to monitor for and report suspicious transactions, to monitor dealings with government officials, to respond to requests for information by regulatory authorities and law enforcement agencies, and to share information with other financial institutions, has required the implementation and maintenance of internal practices, procedures and controls.

Environmental Laws and Regulations

Table of Contents

Federal, state and local environmental laws and regulations apply to our ownership and operation of real property. Inherent in owning and operating real property are the risks of hidden environmental liabilities and the costs of any required clean-up. Although unexpected environmental liabilities can always arise, we seek to minimize this risk by undertaking environmental assessments, among other measures prior to taking title to real estate.

Unclaimed Property Laws

We are subject to the laws and regulations of states and other jurisdictions concerning the identification, reporting and escheatment of unclaimed or abandoned funds, and we are subject to audit and examination for compliance with these requirements. For additional discussion of these matters, see Note 23 to the Consolidated Financial Statements.

Taxation

U.S. Taxation

The Company and certain domestic subsidiaries file a consolidated federal income tax return that includes both life insurance companies and non-life insurance companies. Certain other domestic subsidiaries file separate tax returns. The principal differences between the Company's actual income tax expense and the applicable statutory federal income tax rate are generally deductions for non-taxable investment income, including the dividends received deduction ("DRD"), foreign taxes applied at a different tax rate than the U.S. rate and certain tax credits. For tax years prior to 2018, the applicable statutory federal tax rate was 35%. For tax years starting in 2018, the applicable statutory federal income tax rate is 21%. In addition, as discussed further below, the tax attributes of our products may impact both the Company's and our customers' tax positions. See "Income Taxes" in Note 2 to the Consolidated Financial Statements and Note 19 to the Consolidated Financial Statements for a description of the Company's tax position. As discussed further below, new tax legislation and other potential changes to the tax law may impact the Company's tax position and the attractiveness of our products.

H.R.1, also referred to as the Tax Cuts and Jobs Act of 2017 (the "Tax Act of 2017"), was enacted into law on December 22, 2017 and is generally effective starting in 2018. The Tax Act of 2017 changes the taxation of businesses and individuals by lowering tax rates and broadening the tax base through the acceleration of taxable income and the deferral or elimination of certain deductions, as well as changing the system of taxation of earnings of foreign subsidiaries. The most significant changes for the Company are: (1) the reduction of the corporate tax rate from 35% to 21%; (2) revised methodologies for determining deductions for tax reserves and the DRD; (3) an increased capitalization and amortization period for acquisition costs related to certain products; (4) the change from a worldwide to a modified territorial system of taxation on applicable earnings of foreign subsidiaries; (5) a new tax on earnings of foreign subsidiaries (the Global Intangible Low-Taxed Income provision ("GILTI")); and (6) a new tax with respect to payments to non-U.S. affiliates that are at least 25% owned (the Base Erosion Anti-Abuse Tax ("BEAT")).

Our analysis of the Tax Act of 2017 is ongoing, as guidance may be needed from the Treasury Department and the Internal Revenue Service ("IRS") to fully understand and implement several provisions. Other life insurance and financial services companies may benefit more or less from these tax law changes, which could impact the Company's overall competitive position. The law is also expected to reduce the Company's domestic statutory capital and risk-based capital. For additional details, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Capital—Insurance Regulatory Capital." Notwithstanding the enactment of the Tax Act of 2017, the President, Congress, as well as state and local governments, may continue to consider from time to time legislation that could increase the amount of corporate taxes we pay, thereby reducing earnings.

U.S. federal tax law generally permits tax deferral on the inside build-up of investment value of certain retirement savings, annuities and life insurance products until there is a contract distribution and, in general, excludes from taxation the death benefit paid under a life insurance contract. The Tax Act of 2017 did not change these rules, though it is possible that some individuals with overall lower effective tax rates could be less attracted to the tax deferral aspect of the Company's products. The general reduction in individual tax rates and elimination of certain individual deductions may also impact the Company depending on whether current and potential customers have more or less after-tax income to save for retirement and manage their mortality and longevity risk through the purchase of the Company's products. Congress from time to time may enact other changes to the tax law that could make our products less attractive to consumers, including legislation that would modify the tax favored treatment of retirement savings, life insurance and annuities products.

The products we sell have different tax characteristics and in some cases generate tax deductions and credits for the Company. Changes in either the U.S. or foreign tax laws may negatively impact the deductions and credits available to the Company, including the ability of the Company to claim foreign tax credits with respect to taxes withheld on separate account products. These changes would increase the Company's actual tax expense and reduce its consolidated net income.

Table of Contents

The level of profitability of certain products is significantly dependent on these characteristics and our ability to continue to generate taxable income, which is taken into consideration when pricing products and is a component of our capital management strategies. Accordingly, changes in tax law, our ability to generate taxable income, or other factors impacting the availability or value of the tax characteristics generated by our products, could impact product pricing and returns or require us to reduce our sales of these products or implement other actions that could be disruptive to our businesses.

International Taxation

Our international businesses are subject to the tax laws and regulations of the countries in which they are organized and in which they operate. Foreign governments from time to time consider legislation that could impact the amount of taxes that we pay or impact the sales of our products. Such changes could negatively impact sales of our products or reduce our profits.

On December 19, 2017, South Korea enacted a 2018 tax reform bill that adds a new 25% corporate income tax bracket for taxable income in excess of 300 billion for tax years beginning on or after January 1, 2018. Taxable income in excess of 20 billion but less than 300 billion continues to be subject to a 22% corporate income tax. In addition, corporations continue to be subject to a local income surtax of 10% of the computed corporate income tax (e.g., 2.5% for the tax base in excess of 300 billion, 2.2% for the tax base between 20 billion and 300 billion). After taking into account this 10% local income tax surcharge on corporate tax, the 2018 tax reform bill increased the top corporate income tax rate in South Korea from 24.2% to 27.5%.

Prior to 2017, the Japan national corporate tax rate was reduced from 23.9% for tax years beginning on or after April 1, 2015, to 23.4% for tax years beginning on or after April 1, 2016, and to 23.2% for tax years beginning on or after April 1, 2018. In addition, there are local income taxes that are applied to our income earned in Japan. The Japanese consumption tax rate is currently 8%, and is scheduled to increase to 10% on October 1, 2019. Insurance commissions paid to our Life Planners and Life Consultants are subject to consumption tax for individuals exceeding certain earnings thresholds; however, the tax is not charged on employee compensation (other than commissions) or insurance premiums.

International and Global Regulatory Initiatives

In addition to the adoption of Dodd-Frank in the United States, lawmakers around the world are actively exploring steps to avoid future financial crises. In many respects, this work is being led by the FSB, which consists of representatives of national financial authorities of the G20 nations. The G20, the FSB and related bodies have developed proposals to address such issues as financial group supervision, capital and solvency standards, systemic economic risk, corporate governance including executive compensation, and a host of related issues.

In July 2013, we along with eight other global insurers, were designated by the FSB as a global systemically important insurer (“G-SII”) through a quantitative methodology developed and implemented by the IAIS. Similar assessments were performed and subsequent G-SII designation lists were issued annually through November 2016. We remained designated as a G-SII throughout this period. In November 2017, the FSB announced that the list of G-SIIs identified in 2016 would stand until further consideration in November 2018. The FSB also recommended that the IAIS continue ongoing efforts to develop an activities-based approach to assessing and managing potential systemic risk in the insurance sector.

At the direction of the FSB, the IAIS has developed a set of group level policy measures for insurance supervisors to apply to G-SIIs, including two group-wide capital standards. The basic capital requirement (“BCR”), which was

approved by the FSB and G20 in November 2014, is a globally consistent and comparable baseline capital metric. The higher loss absorbency (“HLA”) standard, which was approved by the FSB and G20 in November 2015, establishes a capital buffer to be held in addition to the BCR. In February 2017, the IAIS, with the approval of the FSB, delayed jurisdictional implementation of HLA until 2022 at the earliest and advised that the ICS would replace the BCR as the foundation for the HLA requirement.

In addition to G-SII related policy measures, the IAIS is developing the Common Framework for the Supervision of Internationally Active Insurance Groups (“ComFrame”). Through ComFrame, the IAIS seeks to promote effective and globally consistent supervision of the insurance industry through uniform standards for insurer corporate governance, enterprise risk management and other control functions, group-wide supervision and group capital adequacy. The non-capital related components of ComFrame are being developed iteratively through a series of public consultations and are scheduled to be adopted by the IAIS in 2019. The ICS, which is the capital adequacy component of ComFrame, is also being developed iteratively through both a series of public consultations and voluntary field tests. Recently, the IAIS announced an agreement among its members on the development and implementation of the ICS. Terms of the agreement include: adoption of the ICS by the IAIS in 2019; a five-year monitoring phase beginning in 2020 during which Internationally Active Insurance Groups (“IAIGs”) are to report ICS results to their group supervisory authorities; and implementation of the ICS at the jurisdictional level in 2026.

Table of Contents

As a standard setting body, the IAIS does not have direct authority to require insurance companies to comply with the policy measures it develops, including the BCR, ICS and HLA standards. However, if the policy measures were adopted by either our group supervisory authorities in the U.S. or supervisors of our international operations or companies, we could become subject to these standards. Adoption of IAIS policy measures could impact the manner in which we deploy our capital, structure and manage our businesses, and otherwise operate both within the U.S. and abroad. The possibility of inconsistent and conflicting regulation of the Prudential Financial at the group level and the subsidiary level also exists as law makers and regulators in multiple jurisdictions simultaneously pursue these initiatives.

Employees

As of December 31, 2017, we had 49,705 employees and sales associates, including 29,334 located outside of the United States. We believe our relations with our employees and sales associates are satisfactory.

Available Information

Prudential Financial files periodic and current reports, proxy statements and other information with the SEC. Such reports, proxy statements and other information may be obtained through the SEC's website (www.sec.gov) or by visiting the Public Reference Room of the SEC at 100 F Street, N.E., Washington D.C. 20549 or calling the SEC at 1-800-SEC-0330.

You may also access our press releases, financial information and reports filed with the SEC (for example, our Annual Report on Form 10-K, our Quarterly Reports on Form 10-Q, our Current Reports on Form 8-K and any amendments to those Forms) online at www.investor.prudential.com. Copies of any documents on our website are available without charge, and reports filed with or furnished to the SEC will be available as soon as reasonably practicable after they are filed with or furnished to the SEC. The information found on our website is not part of this or any other report filed with or furnished to the SEC.

ITEM 1A. RISK FACTORS

You should carefully consider the following risks. These risks are not exclusive, and additional risks to which we are subject include, but are not limited to, the factors mentioned under "Forward-Looking Statements" above and the risks of our businesses described elsewhere in this Annual Report on Form 10-K. Many of these risks are interrelated and could occur under similar business and economic conditions, and the occurrence of certain of them may in turn cause the emergence or exacerbate the effect of others. Such a combination could materially increase the severity of the impact of these risks on our businesses, results of operations, financial condition and liquidity.

Overview

On an annual basis, the Company reviews its risk identification framework which documents the definition, potential manifestation, and management of its risks. These Risk Factors describe the Company's material risks and their potential manifestation, as reflected in the risk identification framework. The Company's risk management framework is described under "Management's Discussion and Analysis of Financial Condition and Results of Operations—Risk Management."

The Company has categorized its risks into tactical and strategic risks. Tactical risks may cause damage to the Company, and the Company seeks to manage and mitigate them through models, metrics and the overall risk

framework. The Company's tactical risks include investment, insurance, market, liquidity, and operational risk. Strategic risks can cause the Company's fundamental business model to change, either through a shift in the businesses in which it is engaged or a change in execution. The Company's strategic risks include regulatory, technological changes and other external factors. These risks, as well as the sub-risks that may impact the Company, are discussed below.

Investment Risk

Our investment portfolios are subject to the risk of loss due to default or deterioration in credit quality or value.

Table of Contents

We are exposed to investment risk through our investments, which primarily consist of public and private fixed maturity securities, commercial mortgage and other loans, equity securities and alternative assets including private equity, hedge funds and real estate. For a discussion of our general account investments, see “Management’s Discussion and Analysis of Results of Operations and Financial Condition—General Account Investments.” We are also exposed to investment risk through a potential counterparty default.

Investment risk may result from (1) economic conditions, (2) adverse capital market conditions, including disruptions in individual market sectors or a lack of buyers in the marketplace, (3) volatility, (4) credit spread changes, (5) benchmark interest rate changes, (6) changes in foreign currency exchange rates and (7) declines in value of underlying collateral. These factors may impact the credit quality, liquidity and value of our investments and derivatives, potentially resulting in higher capital charges and unrealized or realized losses. Also, certain investments we hold, regardless of market conditions, are relatively illiquid and our ability to promptly sell these assets for their full value may be limited. Additionally, our valuation of investments may include methodologies, inputs and assumptions which are subject to change and different interpretation and could result in changes to investment valuations that may materially impact our results of operations or financial condition. For information about the valuation of our investments, see Note 20 to the Consolidated Financial Statements.

Our investment portfolio is subject to credit risk, which is the risk that an obligor (or guarantor) is unable or unwilling to meet its contractual payment obligations on its fixed maturity security, loan or other obligations. Credit risk may manifest in an idiosyncratic manner (i.e., specific to an individual borrower or industry) or through market-wide credit cycles. Financial deterioration of the obligor increases the risk of default and may increase the capital charges required under such regimes as the NAIC RBC, the FSA SMR or other constructs to hold the investment and in turn, potentially limit our overall capital flexibility. Credit defaults (as well as credit impairments, realized losses on credit-related sales, and increases in credit related reserves) may result in losses which adversely impact earnings, capital and our ability to appropriately match our liabilities and meet future obligations.

Our Company is subject to counterparty risk, which is the risk that the counterparty to a transaction could default or deteriorate in creditworthiness before or at the final settlement of a transaction. In the normal course of business, we enter into financial contracts to manage risks (such as derivatives to manage market risk and reinsurance treaties to manage insurance risk), improve the return on investments (such as securities lending and repurchase transactions) and provide sources of liquidity or financing (such as credit agreements, securities lending agreements and repurchase agreements). These transactions expose the Company to counterparty risk. Counterparties include commercial banks, investment banks, broker-dealers and insurance and reinsurance companies. In the event of a counterparty deterioration or default, the magnitude of the losses will depend on then current market conditions and the length of time required to enter into a replacement transaction with a new counterparty. Losses are likely to be higher under stressed conditions.

Our investment portfolio is subject to equity risk, which is the risk of loss due to deterioration in market value of public equity or alternative assets. We include public equity and alternative assets (including private equity, hedge funds and real estate) in our portfolio constructions, as these asset classes can provide cash flows over longer periods of time, aligning with the emergence of cash flows of our liabilities. Public equity and alternative assets have varying degrees of price transparency. Equities traded on stock exchanges (public equities) have significant price transparency, as transactions are often required to be disclosed publicly. Assets for which price transparency is more opaque include private equity (joint ventures/limited partnerships) and direct real estate. As these investments typically do not trade on public markets and indications of realizable market value may not be readily available, valuations can be infrequent and/or more volatile. A sustained decline in public equity and alternative markets may reduce the returns earned by our investment portfolio through lower than expected dividend income, property operating income, and capital gains, thereby adversely impacting earnings, capital, and product pricing assumptions. These assets may also produce volatility in earnings as a result of uneven distributions on the underlying investments.

Insurance Risk

31

Table of Contents

We have significant liabilities for policyholders benefits which are subject to insurance risk. Insurance risk is the risk that actual experience deviates adversely from our best estimate insurance assumptions, including mortality, morbidity, and policyholder behavior assumptions. We provide a variety of insurance products, on both an individual and group basis, that are designed to help customers protect against a variety of financial uncertainties. Our insurance products protect customers against their potential risk of loss by transferring those risks to the Company, where those risks can be managed more efficiently through pooling and diversification over a larger number of independent exposures. During this transfer process, we assume the risk that actual losses experienced in our insurance products deviates significantly from what we expect. More specifically, insurance risk is concerned with the deviations that impact our future liabilities. Our profitability may decline if mortality experience, morbidity experience or policyholder behavior experience differ significantly from our expectations when we price our products. In addition, if we experience higher than expected claims our liquidity position may be adversely impacted, and we may incur losses on investments if we are required to sell assets in order to pay claims. If it is necessary to sell assets at a loss, our results of operations and financial condition could be adversely impacted. For a discussion of the impact of changes in insurance assumptions on our financial condition, see “Management’s Discussion and Analysis of Results of Operations and Financial Condition—Accounting Policies and Pronouncements—Application of Critical Accounting Estimates—Policyholder Liabilities.”

Certain of our insurance products are subject to mortality risk, which is the risk that actual deaths experienced deviate adversely from our expectations. Mortality risk is a biometric risk that can manifest in the following ways:

Mortality calamity is the risk that mortality rates in a single year deviate adversely from what is expected as the result of pandemics, natural or man-made disasters, military actions or terrorism. A mortality calamity event will reduce our earnings and capital and we may be forced to liquidate assets before maturity in order to pay the excess claims.

Mortality calamity risk is more pronounced in respect of geographic areas (including major metropolitan centers, where we have concentrations of customers, including under group and individual life insurance), concentrations of employees or significant operations, and in respect of countries and regions in which we operate that are subject to a greater potential threat of military action or conflict. Ultimate losses would depend on several factors, including the rates of mortality and morbidity among various segments of the insured population, the collectability of reinsurance, the possible macroeconomic effects on our investment portfolio, the effect on lapses and surrenders of existing policies, as well as sales of new policies and other variables.

Mortality trend is the risk that mortality improvements in the future deviate adversely from what is expected.

Mortality trend is a long-term risk in that can emerge gradually over time. Longevity products, such as annuities and pension risk transfer, experience adverse impacts due to higher-than-expected mortality improvement. Mortality products, such as life insurance, experience adverse impacts due to lower-than-expected improvement. If this risk were to emerge, the Company would update assumptions used to calculate reserves for inforce business, which may result in additional assets needed to meet the higher expected annuity claims or earlier expected life claims. An increase in reserves due to revised assumptions has an immediate impact on our results of operations and financial condition; however, economically the impact is generally long term as the excess outflow is paid over time.

Mortality base is the risk that actual base mortality deviates adversely from what is expected in pricing and valuing our products. Base mortality risk can arise from a lack of credible data on which to base the assumptions.

Certain of our insurance products are subject to morbidity risk, which is the risk that either incidence or continuation experience deviates adversely from what is expected. Morbidity risk is a biometric risk that can manifest in the following ways:

Morbidity incidence is the risk that the rate at which policyholders become unhealthy (and qualify for benefits under insurance policies) deviates adversely from what is expected. We are primarily exposed to morbidity incidence risk through short-term disability products, long-term disability products, long-term care products, and the accident and health products we sell in Japan.

Morbidity continuation is the risk that the length of time for which policyholders remain unhealthy deviates adversely from what is expected. This risk is primarily in our disability and long-term care products.

In each case, an increase in claims, or an increase in reserves due to revised morbidity assumptions can have an immediate impact on our results of operations and financial condition; however, economically the impact of morbidity risk for products that pay out for ongoing illness or disability generally emerges over the longer term as the morbidity claims are paid.

Certain of our insurance products are subject to policyholder behavior risk, which is the risk that actual policyholder behavior deviates adversely from what is expected. Policyholder behavior risk includes the following components:

Table of Contents

Lapse calamity is the risk that lapse rates over the short-term deviate adversely from what is expected. Only certain products are exposed to this risk. Products that offer a cash surrender value that resides in the general account, such as general account stable value products, could pose a potential short-term lapse calamity risk. Surrender of these products can impact liquidity, and it may be necessary in certain market conditions to sell assets to meet surrender demands. Lapse calamity can also impact our earnings through its impact on estimated future profits.

Policyholder behavior efficiency is the risk that the behavior of our customers or policyholders deviates adversely from what is expected. Policyholder behavior efficiency risk arises through product features which provide some degree of choice or flexibility for the policyholder, which can impact the amount and/or timing of claims. Such choices include lapse, partial withdrawal, policy loan, utilization, and premium payment rates for contracts with flexible premiums. While some behavior is driven by macro factors such as market movements, policyholder behavior at a fundamental level is driven primarily by policyholders' individual needs, which may differ significantly from product to product depending on many factors including the features offered, the approach taken to market each product, and competitor pricing. For example, persistency (the probability that a policy or contract will remain in force) within our annuities business may be significantly impacted by the value of guaranteed minimum benefits contained in many of our variable annuity products being higher than current account values in light of poor market performance as well as other factors. Many of our products also provide our customers with wide flexibility with respect to the amount and timing of premium deposits and the amount and timing of withdrawals from the policy's value. Results may vary based on differences between actual and expected premium deposits and withdrawals for these products, especially if these product features are relatively new to the marketplace. The pricing of certain of our variable annuity products that contain certain living benefit guarantees is also based on assumptions about utilization rates, or the percentage of contracts that will utilize the benefit during the contract duration, including the timing of the first lifetime income withdrawal. Results may vary based on differences between actual and expected benefit utilization. Finally, surrenders of certain insurance products may increase following a downgrade of our financial strength ratings or adverse publicity. Policyholder behavior efficiency is generally a long-term risk that emerges over time. An increase in reserves due to revised assumptions has an immediate impact on our results of operations and financial condition; however, from an economic or cash flow perspective, the impact is generally long term as the excess outflow is paid over time.

Our ability to reprice products is limited, and may not compensate for deviations from our expected insurance assumptions.

Although some of our products permit us to increase premiums or adjust other charges and credits during the life of the policy or contract, the adjustments permitted under the terms of the policies or contracts may not be sufficient to maintain profitability or may cause the policies or contracts to lapse. For example, for our long-term care insurance products, our assumptions for reserves for future policy benefits have factored in an estimate of the timing and amount of anticipated and yet-to-be-filed premium increases which will require state approval. Our actual experience obtaining pricing increases could be materially different than what we have assumed, resulting in further policy liability increases which could be material. Many of our products do not permit us to increase premiums or adjust other charges and credits or limit those adjustments during the life of the policy or contract. Even if permitted under the policy or contract, we may not be able or willing to raise premiums or adjust other charges sufficiently, or at all. Accordingly, significant deviations in actual experience from our pricing assumptions could have an adverse effect on the profitability of our products. Finally, the development of a secondary market for life insurance, including life settlements or "viaticals" and investor owned life insurance, and third-party investor strategies in the annuities business, could adversely affect the profitability of existing business and our pricing assumptions for new business.

Market Risk

The profitability of many of our insurance and annuity products, as well as the fees we earn in our investment management business, are subject to market risk. Market risk is the risk of loss from changes in interest rates, equity

prices and foreign currency exchange rates.

The profitability of many of our insurance and annuity products depends in part on the value of the separate accounts supporting these products, which can fluctuate substantially depending on market conditions. Market conditions resulting in reductions in the value of assets we manage has an adverse effect on the revenues and profitability of our investment management business, which depends on fees related primarily to the value of assets under management, and could decrease the value of our strategic investments.

Table of Contents

Derivative instruments we use to hedge and manage foreign exchange, interest rate and equity market risks associated with our products and businesses, and other risks might not perform as intended or expected, resulting in higher than expected realized losses and stresses on liquidity. Market conditions can limit availability of hedging instruments, require us to post additional collateral, and further increase the cost of executing product related hedges and such costs may not be recovered in the pricing of the underlying products being hedged.

Market risk may limit opportunities for investment of available funds at appropriate returns, including due to the current low interest rate environment, or other factors, with possible negative impacts on our overall results. Limited opportunities for attractive investments may lead to holding cash for long periods of time and increased use of derivatives for duration management and other portfolio management purposes. The increased use of derivatives may increase the volatility of our U.S. GAAP results and our statutory capital.

Our investments, results of operations and financial condition may also be adversely affected by developments in the global economy, in the U.S. economy (including as a result of actions by the Federal Reserve with respect to monetary policy, and adverse political developments), and in the Japanese economy (including due to the effects of inflation or deflation, interest rate volatility, changes in the Japan sovereign credit rating, and material changes in the value of the Japanese yen relative to the U.S. dollar). Global, U.S. or Japanese economic activity and financial markets may in turn be negatively affected by adverse developments or conditions in specific geographical regions.

For a discussion of the impact of changes in market conditions on our financial condition see “Quantitative and Qualitative Disclosures About Market Risk.”

Our insurance and annuity products and certain of our investment products, and our investment returns, are subject to interest rate risk, which is the risk of loss arising from asset/liability duration mismatches within our general account investments as well as invested assets of other entities and operations. The risk of mismatch in asset/liability duration is mainly driven by the specific dynamics of product liabilities. Some product liabilities are expected to have only modest risk related to interest rates because cash flows can be matched by available assets in the investable space. The interest rate risk emerges primarily from their tail cash flows (30 years or more), which cannot be matched by assets for sale in the marketplace, exposing the Company to future reinvestment risk. Market-sensitive cash flows exist with other product liabilities including products whose cash flows can be linked to market performance through secondary guarantees, minimum crediting rates, and/or changes in insurance assumptions.

Our exposure to interest rates can manifest itself over years as in the case of earnings compression or in the short term by creating volatility in both earnings and capital. For example, some of our products expose us to the risk that changes in interest rates will reduce the spread between the amounts that we are required to pay under the contracts and the rate of return we are able to earn on our general account investments supporting the contracts. When interest rates decline or remain low, as they have in recent years, we must invest in lower-yielding instruments, potentially reducing net investment income and constraining our ability to offer certain products. This risk is increased as more policyholders may retain their policies in a low rate environment. Since many of our policies and contracts have guaranteed minimum crediting rates or limit the resetting of crediting rates, the spreads could decrease or go negative.

Alternatively, when interest rates rise, we may not be able to replace the assets in our general account as quickly with the higher-yielding assets needed to fund the higher crediting rates necessary to keep these products and contracts competitive. It is possible that fewer policyholders may retain their policies and annuity contracts as they pursue higher crediting rates, which could expose the Company to losses and liquidity stress. In addition, rising interest rates could cause a decline in the market value of fixed income assets the Company manages which in turn could result in lower asset management fees earned.

Our mitigation efforts with respect to interest rate risk are primarily focused on maintaining an investment portfolio with diversified maturities that has a key rate duration profile that is approximately equal to the key rate duration profile of our estimated liability cash flow profile; however, this estimate of the liability cash flow profile is complex and could turn out to be inaccurate, especially when markets are volatile. In addition, there are practical and capital market limitations on our ability to accomplish this matching. Due to these and other factors we may need to liquidate investments prior to maturity at a loss in order to satisfy liabilities or be forced to reinvest funds in a lower rate environment.

Table of Contents

Our significant business operations outside the U.S. subject us to foreign exchange risk, which is the risk of loss arising from assets that are invested in a different currency than the related liability, as well as the unhedged portion of the Company's earnings from, and capital supporting, operations in a foreign currency. As a U.S.-based company with significant business operations outside of the U.S., particularly in Japan, we are exposed to foreign currency exchange rate risk related to these operations, as well as in our investment portfolio. Fluctuations in foreign currency exchange rates could adversely affect our profitability, financial condition and cash flows, as well as increase the volatility of our results of operations under U.S. GAAP. In the short-term, solvency margins in our Japan businesses can also be impacted by fluctuations in exchange rates.

For our International Insurance operations, changes in foreign currency exchange rates create risk that we may experience volatility in the U.S. dollar-equivalent earnings and equity of these operations. We seek to manage this risk through various hedging strategies, including the use of foreign currency hedges and through holding U.S. dollar-denominated securities in the investment portfolios of certain of these operations. Additionally, our Japanese insurance operations offer a variety of non-Japanese yen denominated products. We seek to mitigate this risk by holding investments in corresponding currencies. For certain of our international insurance operations outside of Japan, we elect to not hedge the risk of changes in our subsidiary equity investments due to foreign exchange rate movements.

For our domestic investment portfolios supporting our U.S. insurance operations and other proprietary investment portfolios, our foreign currency exchange rate risk arises primarily from investments that are denominated in foreign currencies. We manage this risk by hedging substantially all domestic foreign currency-denominated fixed-income investments into U.S. dollars. We generally do not hedge all of the foreign currency risk of our investments in equity securities of unaffiliated foreign entities. The value and liquidity of our foreign currency investments could be adversely affected by local market, economic and financial conditions. For example, our investments denominated in euro could be adversely affected by unfavorable economic conditions in Europe, including due to potential changes in the euro or to the structure or membership of the European Union, and in 2016 we experienced volatility in U.K. and other European Union related investments as a result of the U.K.'s referendum to exit the European Union.

There can be no assurance that our hedging and other strategies will effectively mitigate foreign exchange risk. For a discussion of our hedging program and the impact of foreign currency exchange rates on our business, see "Management's Discussion and Analysis of Results of Operations and Financial Condition—Impact of Foreign Currency Exchange Rates."

Guarantees within certain of our products, in particular our variable annuities, are market sensitive and may decrease our earnings or increase the volatility of our results of operations or financial position under U.S. GAAP. Certain of our products, particularly our variable annuity products, include guarantees of minimum surrender values or income streams for stated periods or for life, which may be in excess of account values. Downturns in equity markets, increased equity volatility, increased credit spreads, or (as discussed above) reduced interest rates could result in an increase in the valuation of liabilities associated with such guarantees, resulting in increases in reserves and reductions in net income. We use a variety of hedging and risk management strategies, including product features, to mitigate these risks in part and we may periodically change our strategies over time. These strategies may, however, not be fully effective. In addition, we may be unable or may choose not to fully hedge these risks. Hedging instruments may not effectively offset the costs of guarantees or may otherwise be insufficient in relation to our obligations. Hedging instruments also may not change in value correspondingly with associated liabilities due to equity market or interest rate conditions, non-performance risk or other reasons. We may choose to hedge these risks on a basis that does not correspond to their anticipated or actual impact upon our results of operations or financial position under U.S. GAAP. Changes from period to period in the valuation of these policy benefits, and in the amount of our obligations effectively hedged, will result in volatility in our results of operations and financial position under U.S. GAAP and the statutory capital levels of our insurance subsidiaries. Estimates and assumptions we make in connection with hedging

activities may fail to reflect or correspond to our actual long-term exposure from our guarantees. Further, the risk of increases in the costs of our guarantees not covered by our hedging and other capital and risk management strategies may become more significant due to changes in policyholder behavior driven by market conditions or other factors. The above factors, individually or collectively, may have a material adverse effect on our results of operations, financial condition or liquidity.

Our valuation of the liabilities for the minimum benefits contained in many of our variable annuity products requires us to consider the market perception of our risk of non-performance, and a decrease in our own credit spreads resulting from ratings upgrades or other events or market conditions could cause the recorded value of these liabilities to increase, which in turn could adversely affect our results of operations and financial position.

Liquidity Risk

As a financial services company, we are exposed to liquidity risk, which is the risk that the Company is unable to meet near-term obligations as they come due.

Table of Contents

Liquidity risk is a manifestation of events that are driven by other risk types (market, insurance, investment, operational). A liquidity shortfall may arise in the event of insufficient funding sources or an immediate and significant need for cash or collateral. In addition, it is possible that expected liquidity sources, such as our credit facilities, may be unavailable or inadequate to satisfy the liquidity demands described below.

The Company has four primary sources of liquidity exposure and associated drivers that trigger material liquidity demand. Those sources are:

• **Derivative collateral market exposure:** Abrupt changes to interest rate, equity, and/or currency markets may increase collateral requirements to counterparties and create liquidity risk for the Company.

• **Asset liability mismatch:** There are liquidity risks associated with liabilities coming due prior to the matching asset cash flows. Structural maturities mismatch can occur in activities such as securities lending, where the liabilities are effectively overnight open transactions used to fund longer term assets.

• **Wholesale funding.** The Company depends upon the financial markets for funding (such as through the issuance of commercial paper, securities lending and repurchase arrangements and other forms of borrowings in the capital markets). These sources might not be available during times of stress, or may only be available on unfavorable terms, which can result in a decrease in our profitability and a significant reduction in our financial flexibility.

• **Insurance cash flows.** The Company faces potential liquidity risks from unexpected cash demands due to severe mortality calamity or lapse events. If such events were to occur, the Company may face unexpectedly high levels of claim payments to policyholders.

For a discussion of the Company's liquidity and sources and uses of liquidity, including information about legal and regulatory limits on the ability of our subsidiaries to pay dividends, see "Management's Discussion and Analysis of Results of Operations and Financial Condition—Liquidity and Capital Resources—Liquidity."

Operational Risk

Our operations are exposed to the risk of loss resulting from inadequate or failed processes or systems, human error or misconduct, and as a result of external events. An operational risk failure may result in one or more actual or potential impacts to the Company.

Operational Risk Types

• **Processes** - Processing failure; failure to safeguard or retain documents/records; errors in valuation/pricing models and processes; project management or execution failures; improper sales practices.

• **Systems** - Failures during the development and implementation of new systems; systems failures.

• **People** - Internal fraud, breaches of employment law, unauthorized activities; loss or lack of key personnel, inadequate training; inadequate supervision.

• **External Events** - External crime; outsourcing risk; vendor risk; natural and other disasters; changes in laws/regulations.

• **Legal** - Legal and regulatory compliance failures.

Potential Impacts

• **Financial losses** - The Company experiences a financial loss. This loss may originate from various causes including, but not limited to, transaction processing errors and fraud.

• **Customer impacts** - The Company may not be able to service customers. This may result if the Company is unable to continue operations during a business continuation event or if systems are compromised due to malware or virus.

Regulatory fines or sanctions - When the Company fails to comply with applicable laws or regulations, regulatory fines or sanctions may be imposed. In addition, possible restrictions on business activities may result.

Legal actions - Failure to comply with laws and regulations also exposes the Company to litigation risk. This may also result in financial losses.

Liabilities we may incur as a result of operational failures are described further under “Contingent Liabilities” in Note 23 to the Consolidated Financial Statements. In addition, certain pending regulatory and litigation matters affecting us, and certain risks to our businesses presented by such matters, are discussed under “Contingent Liabilities” and “Commitments and Guarantees, Contingent Liabilities and Litigation and Regulatory Matters” in Note 23 to the Consolidated Financial Statements. We may become subject to additional regulatory and legal actions in the future.

Table of Contents

Key Enterprise Operational Risks - Key enterprise operational risks include the following:

We are subject to business continuation risk, which is the risk that our systems and data may be disrupted. We depend heavily on our telecommunication, information technology and other operational systems and on the integrity and timeliness of data we use to run our businesses and service our customers. These systems may fail to operate properly or become disabled as a result of events or circumstances wholly or partly beyond our control. Further, we face the risk of operational and technology failures by others, including clearing agents, exchanges and other financial intermediaries and of vendors and parties to which we outsource the provision of services or business operations. We may experience a business continuation event as a result of:

- Severe pandemic, either naturally occurring or intentionally manipulated pathogens.
- Geo-political risks, including armed conflict and civil unrest.
- Terrorist events.
- A significant natural or accidental disaster.

We are subject to the risk that we may not adequately maintain information security. There continues to be significant and organized cyber-attack activity against western organizations, including but not limited to the financial services sector. Risks related to cyber-attack arise in the following areas:

Protecting both “structured” and “unstructured” sensitive information is a constant need. However, some risks associated with trusted insiders (i.e., employees, consultants, or vendors who are authorized to access the Company’s systems) remain and cannot be effectively mitigated using technology alone.

Unsuspecting employees represent a primary avenue for external parties to gain access to our network and systems.

Many attacks, even from sophisticated actors, include rudimentary techniques such as coaxing an internal user to click on a malicious attachment or link to introduce malware or steal their username and password.

In the past, hackers went after credit and debit card data, which is easy to monetize. As credit card security improves, the hackers will look to other sources of monetization, specifically personally identifiable information or using cyber-attacks or the threat of cyber-attacks to extort money from companies.

Nation-state sponsored organizations are engaged in cyber-attacks but not necessarily for monetization purposes.

Nation states appear to be motivated by the desire to gain information about foreign citizens and governments or to influence or cause disruptions in commerce or political affairs. As evidenced by the ability of criminal organizations and nation-states to successfully breach large financial institutions and the U.S. government, no organization is fully immune to cyber-attacks.

We have also seen an increase in non-technical attempts to commit fraud or solicit information via call centers and interactive voice response systems, and we anticipate the attempts will become more common.

We rely on third parties to provide services as described further below. While we have certain standards for all vendors that provide us services, our vendors, and in turn, their own service providers, may become subject to a security breach, including as a result of their failure to perform in accordance with contractual arrangements.

We may not adequately ensure the privacy of sensitive data. In the course of our ordinary business we collect, store and share with various third-parties (e.g., service providers, reinsurers, etc.) substantial amounts of private and confidential policyholder information, including in some instances sensitive health-related information. We are subject to the risk that the privacy of this information may be compromised, including as a result of an information security breach described above.

Third parties (outsourcing providers, vendors and suppliers) present added operational risk to our enterprise. The Company's business model relies heavily on the use of third parties to deliver contracted services in a broad range of areas. This presents the risk that the Company is unable to meet legal, regulatory, financial or customer obligations

because third parties fail to deliver contracted services, or that the Company is exposed to reputational damage because third parties operate in a poorly controlled manner. We use affiliates and third-party vendors located outside the U.S. to provide certain services and functions, which also exposes us to business disruptions and political risks as a result of risks inherent in conducting business outside of the U.S.

Table of Contents

Although we distribute our products through a wide variety of distribution channels, we do maintain relationships with certain key distributors. For example, a significant amount of our sales in Japan through banks is derived through a single major Japanese bank and a significant portion of our sales in Japan through Life Consultants is derived through a single association relationship. We periodically negotiate the terms of these relationships, and there can be no assurance that such terms will remain acceptable to us or such third parties. An interruption in certain key relationships could materially affect our ability to market our products and could have a material adverse effect on our business, operating results and financial condition. Distributors may elect to reduce or terminate their distribution relationships with us, including for such reasons as adverse developments in our business, adverse rating agency actions or concerns about market-related risks. We are also at risk that key distribution partners may merge, change their business models in ways that affect how our products are sold, or terminate their distribution contracts with us, or that new distribution channels could emerge and adversely impact the effectiveness of our distribution efforts. An increase in bank and broker-dealer consolidation activity could increase competition for access to distributors, result in greater distribution expenses and impair our ability to market products through these channels. Consolidation of distributors and/or other industry changes may also increase the likelihood that distributors will try to renegotiate the terms of any existing selling agreements to terms less favorable to us.

In addition, when our products are distributed through unaffiliated firms, we may not be able to monitor or control the manner of their distribution despite our training and compliance programs. If our products are distributed in an inappropriate manner, or to customers for whom they are unsuitable, or distributors of our products otherwise engage in misconduct, we may suffer reputational and other harm to our business. We also have a large captive distribution channel and we are subject to the risk that our monitoring and controls will not detect inappropriate sales practices or misconduct by our own agents.

As a financial services company, we are exposed to model risk, which is the risk of financial loss or reputational damage or adverse regulatory impacts caused by model errors or limitations, incorrect implementation of models, or misuse of or overreliance upon models. Models are utilized by our businesses and corporate areas primarily to project future cash flows associated with pricing products, calculating reserves and valuing assets, as well as in evaluating risk and determining capital requirements, among other uses. These models may not operate properly and may rely on assumptions and projections that are inherently uncertain. As our businesses continue to grow and evolve, the number and complexity of models we utilize expands, increasing our exposure to error in the design, implementation or use of models, including the associated input data and assumptions.

Strategic Risk

We are subject to the risk of events that can cause our fundamental business model to change, either through a shift in the businesses in which we are engaged or a change in our execution. In addition, tactical risks may become strategic risks. For example, interest rates remaining low for a long time may, at some point, cause us to change our sales goals, exit a certain business, and/or change our business model.

Changes in the regulatory landscape may be unsettling to our business model. New laws and regulations are being considered in the U.S. and our other countries of operation at an increasing pace, as there has been greater scrutiny on financial regulation over the past several years. Proposed or unforeseen changes in law or regulation may adversely impact our business. See “Business—Regulation” for a discussion of certain recently enacted and pending proposals by international, federal and state regulatory authorities and their potential impact on our business, including in the following areas:

• Our regulation as a Designated Financial Company and the associated enhanced prudential standards, many of which are subject to ongoing rule-making.

• Financial sector regulatory reform that may arise out of reports issued by the U.S. Treasury.

Changes in tax law (including U.S. federal, state, and non-U.S.).

- The DOL fiduciary rules.

Our regulation under U.S. state insurance laws and developments regarding group-wide supervision and capital standards, RBC factors for invested assets and reserves for life insurance, variable annuities and other products.

Insurer capital standards in Japan, Korea and other non-U.S. jurisdictions.

Privacy and cybersecurity regulation.

Changes in accounting rules applicable to our business may also have an adverse impact on our results of operations or financial condition. For a discussion of accounting pronouncements and their potential impact on our business, see Note 2 to the Consolidated Financial Statements.

Technological changes may be unsettling to our business model. We believe there are three aspects of technological change that would significantly impact our business model as described below. There may be other unforeseen changes in technology which may have a significant impact on our business model.

Table of Contents

Interaction with customers. Technology is moving rapidly and as it does, it puts pressure on existing business models. Some of the changes we can anticipate are increased choices about how customers want to interact with the Company or how they want the Company to interact with them. Evolving customer preferences may drive a need to redesign products. Our distribution channels may change to become more automated, at the place and time of the customer's choosing. Such changes clearly have the potential to disrupt our business model over the next 10 years.

Investment Portfolio. Technology may have a significant impact on the companies in which the Company invests. For example, environmental concerns spur scientific inquiry which may re-position the relative attractiveness of wind or sun power over oil and gas. The transportation industry may favor alternative modes of conveyance of goods which may shift trucking or air transport out of favor. Consumers may change their purchasing behavior to favor online activity which would change the role of malls and retail properties.

Medical Advances. The Company is exposed to the impact of medical advances in two major ways. Genetic testing and the availability of that information unequally to consumers and insurers can bring anti-selection risks.

Specifically, data from genetic testing can give our prospective customers a clearer view into their future, allowing them to select products protecting them against likelihoods of mortality or longevity with more precision. Also, technologies that extend lives will challenge our actuarial assumptions especially in the annuity-based businesses.

Other factors may be unsettling to our business model. The following items are examples of those which, among others, could have a meaningful impact on our business.

Changes to either the policies and procedures the Company uses to locate guaranteed group annuity customers, or its reserving policies for its guaranteed group annuities, may result in increased operational expenses and complexity, and increases in reserves, which could adversely impact our results of operations and financial position. The Company's retirement business provides guaranteed group annuity benefits under group annuity and structured settlement contracts. Under our policies and procedures, we use internal and external tools and resources to locate customers covered by our guaranteed group annuity benefits. We also have policies on the development of our reserve estimates, and we believe that we are complying with our policies and procedures and meeting our obligations to customers. The Company regularly reviews, tests and enhances the processes and tools used to locate customers, and over time, such processes and tools are expected to continue to evolve. However, in the normal course of business, at any given time there are a small number of customers covered by our guaranteed group annuity benefits that we cannot locate. In light of recent industry focus on missing retirement customers, the Company is reviewing this issue closely. Ultimately, we could see greater standardization of what may currently be divergent practices across the industry. Changes to either the policies and procedures the Company uses to locate customers, or its reserving policies, may result in increased operational expenses and complexity, and increases in reserves, which could adversely impact our results of operations and financial position.

A downgrade in our financial strength or credit ratings could potentially, among other things, adversely impact our business prospects, results of operations, financial condition and liquidity. For a discussion of our ratings and the potential impact of a ratings downgrade on our business, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Ratings." We cannot predict what additional actions rating agencies may take, or what actions we may take in response to the actions of rating agencies, which could adversely affect our business. Our ratings could be downgraded at any time and without notice by any rating agency. In addition, a sovereign downgrade could result in a downgrade of our subsidiaries operating in that jurisdiction, and ultimately of Prudential Financial and our other subsidiaries. For example, in September 2015, S&P downgraded Japan's sovereign rating to A+ with a 'Stable' outlook citing uncertainties around the strength of economic growth and weak fiscal positions. As a result, S&P subsequently lowered the ratings of a number of institutions in Japan, including our Japanese insurance subsidiaries. It is possible that Japan's sovereign rating could be subject to further downgrades, which would result in further downgrades of our insurance subsidiaries in Japan. Given the importance of our operations in Japan to our overall results, such downgrades could lead to a downgrade of Prudential Financial and our domestic insurance companies.

Table of Contents

London Inter-Bank Offered Rate (LIBOR) reform may adversely affect the interest rates on and value of certain derivatives and floating rate securities we hold and floating rate securities we have issued, the value and profitability of certain real estate lending and related activities conducted in our investment management business, and any other assets or liabilities whose value may be tied to LIBOR. Actions by regulators or law enforcement agencies, as well as ICE Benchmark Administration (the current administrator of LIBOR) may result in changes to the way LIBOR is determined or the establishment of alternative reference rates. For example, on July 27, 2017, the U.K. Financial Conduct Authority announced that it intends to stop persuading or compelling banks to submit LIBOR rates after 2021. The U.S. Federal Reserve, based on the recommendations of the New York Federal Reserve's Alternative Reference Rate Committee (constituted of major derivative market participants and their regulators), has announced its plans to begin publishing, in mid-2018, a Secured Overnight Funding Rate ("SOFR") which is intended to replace U.S. dollar LIBOR. Plans for alternative reference rates for other currencies have also been announced. At this time, it is not possible to predict how markets will respond to these new rates, and the effect of any changes or reforms to LIBOR or discontinuation of LIBOR on new or existing financial instruments to which we have exposure. If LIBOR ceases to exist or if the methods of calculating LIBOR change from current methods for any reason, interest rates on certain derivatives and floating rate securities we hold, securities we have issued, real estate lending and related activities we conduct in our investment management business, and any other assets or liabilities whose value is tied to LIBOR, may be adversely affected. Further, any uncertainty regarding the continued use and reliability of LIBOR as a benchmark interest rate could adversely affect the value of such instruments.

The changing competitive landscape may adversely affect the Company. In each of our businesses we face intense competition from insurance companies, asset managers and diversified financial institutions, both for the ultimate customers for our products and, in many businesses, for distribution through non-affiliated distribution channels. Technological advances, changing customer expectations, including related to digital offerings, or other changes in the marketplace may present opportunities for new or smaller competitors without established products or distribution channels to meet consumers' increased expectations more efficiently than us. Fintech and insurtech companies have the potential to disrupt industries globally, and many participants have been partially funded by industry players. For example, in Investment Management, we expect to see continued pressure on fees given the focus on passive investment and the growth of the robo-advice channel.

Climate Change may increase the severity and frequency of calamities, or adversely affect our investment portfolio. Climate change may increase the frequency and severity of weather related disasters and pandemics. In addition, climate change regulation may affect the prospects of companies and other entities whose securities we hold, or our willingness to continue to hold their securities. It may also impact other counterparties, including reinsurers, and affect the value of investments, including real estate investments we hold or manage for others. We cannot predict the long-term impacts on us from climate change or related regulation.

Market conditions and other factors may adversely impact product sales or increase expenses. Examples include: A change in market conditions, such as high inflation and high interest rates, could cause a change in consumer sentiment and behavior adversely affecting sales and persistency of our savings and protection products. Conversely, low inflation and low interest rates could cause persistency of these products to vary from that anticipated and adversely affect profitability. Similarly, changing economic conditions and unfavorable public perception of financial institutions can influence customer behavior, including increasing claims or surrenders in certain products. Sales of our investment-based and asset management products and services may decline, and lapses and surrenders of certain insurance products and withdrawals of assets from investment products may increase if a market downturn, increased market volatility or other market conditions result in customers becoming dissatisfied with their investments or products.

Changes in our discount rate, expected rate of return, life expectancy, health care cost and assumptions regarding compensation increases for our pension and other postretirement benefit plans may result in increased expenses and reduce our profitability.

Our reputation may be adversely impacted if any of the risks described in this section are realized. Reputational risk could manifest from any of the risks as identified in the Company's risk identification process. Failure to effectively manage risks across a broad range of risk issues exposes the Company to reputational harm. If the Company were to

suffer a significant loss in reputation, both policyholders and counterparties could seek to exit existing relationships. Additionally, large changes in credit worthiness, especially credit ratings, could impact access to funding markets while creating additional collateral requirements for existing relationships. The mismanagement of any such risks may potentially damage our reputational asset. Our business is anchored in the strength of our brand, our alignment to our values, and our proven commitment to keep our promises to our customers. Any negative public perception, founded or otherwise, can be widely and rapidly shared over social media or other means, and could cause damage to our reputation.

Table of Contents

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

We own our headquarters building located at 751 Broad Street, Newark, New Jersey, which comprises approximately 0.6 million square feet. Excluding our headquarters building and properties used by the International Insurance division and the international investment operations of our Investment Management segment, which are discussed below, as of December 31, 2017, we own eight and lease ten other principal properties throughout the U.S., some of which are used for home office functions. Our domestic operations also lease 178 other locations throughout the U.S.

For our International Insurance segment, as of December 31, 2017, we own seven home offices located in Japan, Korea, Taiwan, Brazil, Argentina and Malaysia, and lease four home offices located in Brazil, Italy, Mexico and Poland. We also own approximately 110 and lease approximately 530 other properties, primarily field offices, located throughout these same countries. For our Investment Management segment, which includes our international investment operations, as of December 31, 2017, we lease two home offices located in Japan and Taiwan. We also lease 12 international principal properties located in Mexico, Japan, Hong Kong, Singapore, Korea, Germany, Australia, France, Luxembourg and the U.K., in addition to six other branch and field offices within Europe and Asia.

We believe our properties are adequate and suitable for our business as currently conducted and are adequately maintained. The above properties do not include properties we own solely for investment purposes.

ITEM 3. LEGAL PROCEEDINGS

See Note 23 to the Consolidated Financial Statements under “—Litigation and Regulatory Matters” for a description of certain pending litigation and regulatory matters affecting us, and certain risks to our businesses presented by such matters.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT’S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

General

Prudential Financial’s Common Stock trades on the New York Stock Exchange under the symbol “PRU.” The following table presents the high and low closing prices for the Common Stock on the New York Stock Exchange during the periods indicated and the dividends declared per share during such periods:

	High	Low	Dividends
2017:			
Fourth Quarter	\$ 117.15	\$ 107.28	\$ 0.75
Third Quarter	\$ 115.23	\$ 98.65	\$ 0.75

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-K

Second Quarter	\$ 109.13	\$ 102.92	\$ 0.75
First Quarter	\$ 113.82	\$ 103.92	\$ 0.75
2016:			
Fourth Quarter	\$ 107.10	\$ 81.43	\$ 0.70
Third Quarter	\$ 81.65	\$ 68.74	\$ 0.70
Second Quarter	\$ 79.71	\$ 66.93	\$ 0.70
First Quarter	\$ 79.84	\$ 58.00	\$ 0.70

Table of Contents

On January 31, 2018, there were 1,295,412 registered holders of record for the Common Stock and 422 million shares outstanding.

Holders of Common Stock will be entitled to dividends if and when declared by Prudential Financial's Board of Directors out of funds legally available to pay those dividends. Prudential Financial's Board of Directors currently intends to continue to declare and pay dividends on the Common Stock. Future dividend decisions will be based on, and affected by, a number of factors including the financial performance of our businesses, our overall financial condition, results of operations, cash requirements and future prospects; regulatory restrictions including on the payment of dividends by Prudential Financial's subsidiaries and capital and liquidity requirements under Dodd-Frank; and such other factors as the Board of Directors may deem relevant. Dividends payable by Prudential Financial are limited to the amount that would be legally available for payment under New Jersey corporate law. For additional information on dividends and related regulatory restrictions, see Note 15 to the Consolidated Financial Statements. For information about our exchangeable surplus notes, see Note 14 to the Consolidated Financial Statements.

Issuer Purchases of Equity Securities

The following table provides information about purchases by the Company during the three months ended December 31, 2017, of its Common Stock.

Period	Total Number of Shares Purchased(1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program(2)	Approximate Dollar Value of Shares that May Yet Be Purchased under the Program(2)
October 1, 2017 through October 31, 2017	950,996	\$ 109.90	947,795	
November 1, 2017 through November 30, 2017	939,124	\$ 111.56	933,657	
December 1, 2017 through December 31, 2017	897,509	\$ 116.25	896,018	
Total	2,787,629	\$ 112.50	2,777,470	\$ 0

Includes shares of Common Stock withheld from participants for income tax withholding purposes whose shares of (1) restricted stock units vested during the period. Such restricted stock units were originally issued to participants pursuant to the Prudential Financial Inc. Omnibus Incentive Plan.

In December 2016, Prudential Financial's Board of Directors authorized the Company to repurchase at (2) management's discretion up to \$1.25 billion of its outstanding Common Stock during the period from January 1, 2017 through December 31, 2017.

In December 2017, Prudential Financial's Board of Directors authorized the Company to repurchase, at management's discretion, up to \$1.5 billion of its outstanding Common Stock during the period from January 1, 2018 through December 31, 2018.

ITEM 6. SELECTED FINANCIAL DATA

We derived the selected consolidated income statement data for the years ended December 31, 2017, 2016 and 2015 and the selected consolidated balance sheet data as of December 31, 2017 and 2016, from our Consolidated Financial

Statements included elsewhere herein. We derived the selected consolidated income statement data for the years ended December 31, 2014 and 2013, and the selected consolidated balance sheet data as of December 31, 2015, 2014 and 2013, from consolidated financial statements not included herein.

See Note 3 to the Consolidated Financial Statements for a discussion of acquisitions during 2017, 2016 and 2015.

The Company's Gibraltar Life consolidated operations use a November 30 fiscal year end for purposes of inclusion in the Company's Consolidated Financial Statements. The Company's consolidated balance sheet data as of December 31, 2017, 2016, 2015, 2014 and 2013, include the assets and liabilities of Gibraltar Life as of November 30 for each respective year. The Company's consolidated income statement data for the years ended December 31, 2017, 2016, 2015, 2014 and 2013 include Gibraltar Life's results of operations for the twelve months ended November 30 for each respective year. Beginning in 2018, the Company intends to eliminate this one-month reporting lag, which is not expected to have a material impact on the Company's Consolidated Financial Statements.

This selected consolidated financial information should be read in conjunction with our MD&A and Consolidated Financial Statements included elsewhere herein.

Table of Contents

	As of December 31,				
	2017	2016	2015	2014	2013
	(in millions)				
Balance Sheet Data:					
Total investments excluding policy loans	\$457,980	\$432,485	\$405,535	\$408,274	\$386,407
Separate account assets	306,617	287,636	285,570	296,435	285,060
Total assets	831,921	783,962	757,255	766,526	731,638
Future policy benefits and policyholders' account balances	405,506	386,113	361,168	353,916	343,516
Separate account liabilities	306,617	287,636	285,570	296,435	285,060
Short-term debt	1,380	1,133	1,216	3,839	2,668
Long-term debt	17,172	18,041	19,594	19,702	23,411
Total liabilities	777,577	737,874	715,332	724,177	695,757
Prudential Financial, Inc. equity	54,069	45,863	41,890	41,770	35,278
Noncontrolling interests	275	225	33	579	603
Total equity	\$54,344	\$46,088	\$41,923	\$42,349	\$35,881

(1) For 2017, 2016 and 2015, represents consolidated earnings per share of Common Stock. For 2014 and 2013, represents earnings of the Company's former Financial Services Businesses per share of Common Stock.

For purposes of this computation, earnings are defined as income from continuing operations before income taxes excluding undistributed income (loss) from equity method investments, fixed charges and interest capitalized. Also excludes earnings attributable to noncontrolling interests. Fixed charges are the sum of gross interest expense, (2) interest credited to policyholders' account balances and an estimated interest component of rent expense. Due to the Company's loss for the year ended December 31, 2013, the ratio coverage was less than 1:1 and is therefore not presented. Additional earnings of \$1,935 million would have been required for the year ended December 31, 2013 to achieve a ratio of 1:1.

Certain of the statements included in this section constitute forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements are made based on management's current expectations and beliefs concerning future developments and their potential effects upon Prudential Financial, Inc. and its subsidiaries. Prudential Financial, Inc.'s actual results may differ, possibly materially, from expectations or estimates reflected in such forward-looking statements. Certain important factors that could cause actual results to differ, possibly materially, from expectations or estimates reflected in such forward-looking statements can be found in the "Risk Factors" and "Forward-Looking Statements" sections herein. Information in this section regarding the impact of the Tax Cuts and Jobs Act on Prudential Financial, Inc.'s results of operations and financial condition consists of estimates. These estimates are forward-looking statements based on current interpretations and expectations and may change, possibly materially, as described herein.

Overview

During the fourth quarter of 2017, we introduced a new organizational structure for our U.S. businesses that reflects our focus on leveraging our mix of businesses and our digital and customer engagement capabilities to expand our value proposition for the benefit of customers and stakeholders. This new organizational structure retains our existing segments but realigns them under new divisions. Under the new structure, our principal operations are comprised of five divisions, which together encompass seven segments, and our Corporate and Other operations. The U.S. Individual Solutions division consists of our Individual Annuities and Individual Life segments. The U.S. Workplace Solutions division consists of our Retirement and Group Insurance segments. The Investment Management division is comprised of our Investment Management segment (formerly named the Asset Management segment). The International Insurance division continues to consist of our International Insurance segment, and the Closed Block division continues to consist of our Closed Block segment. Our Corporate and Other operations continue to include corporate items and initiatives that are not allocated to business segments and businesses that have been or will be divested. There are no changes to our reporting segments nor to our measure of segment profitability as a result of the new organizational structure.

Revenues and Expenses

We earn our revenues principally from insurance premiums; mortality, expense, asset management and administrative fees from insurance and investment products; and investment of general account and other funds. We earn premiums primarily from the sale of certain individual life insurance, group life and disability insurance, retirement and annuity contracts. We earn mortality, expense, and asset management fees primarily from the sale and servicing of separate account products including variable life insurance and variable annuities, and from the sale and servicing of other products including universal life insurance. We also earn asset management and administrative fees from the distribution, servicing and management of mutual funds, retirement products and other asset management products and services. Our operating expenses principally consist of insurance benefits provided and reserves established for anticipated future insurance benefits, general business expenses, dividends to policyholders, commissions and other costs of selling and servicing our products and interest credited on general account liabilities.

Profitability

Our profitability depends principally on our ability to price our insurance and annuity products at a level that enables us to earn a margin over the costs associated with providing benefits and administering those products. Profitability also depends on, among other items, our actuarial and policyholder behavior experience on insurance and annuity products, and our ability to attract and retain customer assets, generate and maintain favorable investment results, effectively deploy capital and utilize our tax capacity, and manage expenses.

Historically, the participating products included in the Closed Block have yielded lower returns on capital invested than many of our other businesses. As we have ceased offering domestic participating products, we expect that the proportion of the traditional participating products in our in force business will gradually diminish as these older policies age, and we grow other businesses. However, the relatively lower returns to us on this existing block of business will continue to affect our consolidated results of operations for many years.

Executive Summary

Industry Trends

Our U.S. and international businesses are impacted by financial markets, economic conditions, regulatory oversight, and a variety of trends that affect the industries where we compete.

Table of Contents

U.S. Businesses

Financial and Economic Environment. As discussed further under “Impact of a Low Interest Rate Environment” below, interest rates in the U.S. remain lower than historical levels, which continue to negatively impact our portfolio income yields and our net investment spread results.

Regulatory Environment. See “Business—Regulation” for a discussion of regulatory developments that may impact the Company and associated risks, including changes in U.S. tax legislation, the Dodd-Frank Wall Street Reform and Consumer Protection Act, the U.S. Department of Labor’s fiduciary rules and fiduciary rules being developed by other regulators.

Demographics. Customer demographics continue to evolve and new opportunities present themselves in different consumer segments such as the millennial and multicultural markets. Consumer expectations and preferences are changing. We believe existing customers and potential customers are increasingly looking for cost-effective solutions that they can easily understand and access through technology-enabled devices. At the same time, income protection, wealth accumulation and the needs of retiring baby boomers are continuing to shape the insurance industry. A persistent retirement security gap exists in terms of both savings and protection. Despite the ongoing phenomenon of the risk and responsibility of retirement savings shifting from employers to employees, employers are becoming increasingly focused on the financial wellness of the individuals they employ.

Competitive Environment. See “Business—” for a discussion of the competitive environment and the basis on which we compete in each of our segments.

International Businesses

Financial and Economic Environment. Our international insurance operations, especially in Japan, continue to operate in a low interest rate environment. Although the local market in Japan has adapted to low interest rates, as discussed under “Impact of a Low Interest Rate Environment” below, the current reinvestment yields for certain blocks of business in our international insurance operations are now generally lower than the current portfolio yield supporting these blocks of business, which may negatively impact our net investment spread results. The continued low interest rate environment in the U.S. may also impact the relative attractiveness of U.S. dollar-denominated products to yen-denominated products in Japan. In addition, we are subject to financial impacts associated with movements in foreign currency rates, particularly the Japanese yen. Fluctuations in the value of the yen will continue to impact the relative attractiveness of both yen-denominated and non-yen denominated products.

Regulatory Environment. See “Business—Regulation” for a discussion of regulatory developments that may impact the Company and associated risks, including developing capital standards.

Demographics. Japan has an aging population as well as a large pool of household assets invested in low-yielding deposit and savings vehicles. The aging of Japan’s population, along with strains on government pension programs, have led to a growing demand for insurance products with a significant savings element to meet savings and retirement needs as the population prepares for retirement. We are seeing a similar shift to retirement-oriented products across other Asian markets, including Korea and Taiwan, each of which also has an aging population.

Competitive Environment. See “Business—” for a discussion of the competitive environment and the basis on which we compete in each of our segments.

Impact of a Low Interest Rate Environment

As a global financial services company, market interest rates are a key driver of our results of operations and financial condition. Changes in interest rates can affect our results of operations and/or our financial condition in several ways, including favorable or adverse impacts to:

- investment-related activity, including: investment income returns, net interest margins, net investment spread results, new money rates, mortgage loan prepayments and bond redemptions;
- insurance reserve levels, market experience true-ups, and amortization of both deferred policy acquisition costs (“DAC”) and value of business acquired (“VOBA”);
- customer account values, including their impact on fee income;
- fair value of, and possible impairments on, intangible assets such as goodwill;
- product offerings, design features, crediting rates and sales mix; and
- policyholder behavior, including surrender or withdrawal activity.

Table of Contents

See below for discussions related to: the current interest rate environments in our two largest markets, the United States and Japan; the composition of our insurance liabilities and policyholder account balances; and the hypothetical impacts to our results if these interest rate environments are sustained.

U.S. Operations excluding the Closed Block Division

Interest rates in the U.S. continue to remain lower than historical levels, despite the Federal Reserve Board's actions throughout 2017 to raise short-term interest rates by a total of 75 basis points ("bps"). Market conditions and events make uncertain the timing, amount and impact of any further monetary policy decisions by the Federal Reserve. Given this continued low rate environment, our current reinvestment yields remain lower than the overall portfolio yield, primarily for our investments in fixed maturity securities and commercial mortgage loans and, as a result, our overall portfolio yields are expected to continue to decline.

For the general account supporting our U.S. Individual Solutions division, U.S. Workplace Solutions division, Investment Management division and our Corporate and Other operations, we expect annual scheduled payments and prepayments to be approximately 6.8% of the fixed maturity security and commercial mortgage loan portfolios through 2019. The general account for these operations has approximately \$195 billion of such assets (based on net carrying value) as of December 31, 2017. As these assets mature, the average portfolio yield for fixed maturities and commercial mortgage loans of approximately 4.2%, as of December 31, 2017, is expected to decline due to reinvesting in a lower interest rate environment.

Included in the \$195 billion of fixed maturity securities and commercial mortgage loans are approximately \$108 billion that are subject to call or redemption features at the issuer's option and have a weighted average interest rate of approximately 4%. Of this \$108 billion, approximately 65% contain provisions for prepayment premiums. The reinvestment of scheduled payments or prepayments (not subject to a prepayment fee) at rates below the current portfolio yield, including in some cases at rates below those guaranteed under our insurance contracts, will impact future operating results to the extent we do not, or are unable to, reduce crediting rates on in force blocks of business, or effectively utilize other asset/liability management strategies described below, in order to maintain current net interest margins.

The following table sets forth the insurance liabilities and policyholder account balances of our U.S. Operations excluding the Closed Block Division, by type, for the date indicated:

	As of December 31, 2017 (\$ in billions)
Long-duration insurance products with fixed and guaranteed terms	\$ 115
Contracts with adjustable crediting rates subject to guaranteed minimums	56
Participating contracts where investment income risk ultimately accrues to contractholders	15
Total	\$ 186

The \$115 billion above relates to long-duration products such as group annuities, structured settlements and other insurance products that have fixed and guaranteed terms, for which underlying assets may have to be reinvested at interest rates that are lower than portfolio rates. We seek to mitigate the impact of a prolonged low interest rate environment on these contracts through asset/liability management, as discussed further below.

The \$56 billion above relates to contracts with crediting rates that may be adjusted over the life of the contract, subject to guaranteed minimums. Although we may have the ability to lower crediting rates for those contracts above

guaranteed minimums, our willingness to do so may be limited by competitive pressures. The following table sets forth the related account values by range of guaranteed minimum crediting rates and the related range of the difference, in bps, between rates being credited to contractholders as of December 31, 2017, and the respective guaranteed minimums.

Table of Contents

Account Values with Adjustable Crediting Rates Subject to Guaranteed Minimums:

	At guaranteed minimum	1-49 bps above guaranteed minimum	50-99 bps above guaranteed minimum	100-150 bps above guaranteed minimum	Greater than 150 bps above guaranteed minimum	Total
	(\$ in billions)					
Range of Guaranteed Minimum Crediting Rates:						
Less than 1.00%	\$0.4	\$ 1.1	\$ 0.4	\$ 0.1	\$ 0.0	\$2.0
1.00% - 1.99%	1.0	9.6	6.4	1.5	0.3	18.8
2.00% - 2.99%	0.9	0.6	0.4	2.5	0.4	4.8
3.00% - 4.00%	26.5	2.7	0.2	0.1	0.0	29.5
Greater than 4.00%	1.0	0.0	0.0	0.0	0.0	1.0
Total(1)	\$29.8	\$ 14.0	\$ 7.4	\$ 4.2	\$ 0.7	\$56.1
Percentage of total	54	% 25	% 13	% 7	% 1	% 100

(1) Includes approximately \$0.9 billion related to contracts that impose a market value adjustment if the invested amount is not held to maturity.

The remaining \$15 billion of insurance liabilities and policyholder account balances in these operations relates to participating contracts for which the investment income risk is expected to ultimately accrue to contractholders. The crediting rates for these contracts are periodically adjusted based on the return earned on the related assets.

Assuming a hypothetical scenario where the average 10-year U.S. Treasury rate is 2.70% for the period from January 1, 2018 through December 31, 2019, and credit spreads remain unchanged from levels as of December 31, 2017, we estimate that the unfavorable impact to pre-tax adjusted operating income of reinvesting in such an environment, compared to reinvesting at current average portfolio yields, would be approximately \$14 million in 2018 and \$43 million in 2019. This impact is most significant in the Retirement and Individual Annuities segments. This hypothetical scenario only reflects the impact related to the approximately \$56 billion of contracts shown in the table above, and does not reflect: any benefit from potential changes to the crediting rates on the corresponding contractholder liabilities where the Company has the contractual ability to do so, or other potential mitigants such as changes in investment mix that we may implement as funds are reinvested; any impact related to assets that do not directly support our liabilities; any impact from other factors, including but not limited to, new business, contractholder behavior, product modifications, changes in product offerings, changes in competitive conditions or changes in capital markets; or any impact from other factors described below. See “—Segment Measures” for a discussion of adjusted operating income and its use as a measure of segment operating performance.

In order to mitigate the unfavorable impact that the current interest rate environment has on our net interest margins, we employ a proactive asset/liability management program, which includes strategic asset allocation and hedging strategies within a disciplined risk management framework. These strategies seek to match the characteristics of our products, and to closely approximate the interest rate sensitivity of the assets with the estimated interest rate sensitivity of the product liabilities. Our asset/liability management program also helps manage duration gaps, currency and other risks between assets and liabilities through the use of derivatives. We adjust this dynamic process as products change, as customer behavior changes and as changes in the market environment occur. As a result, our asset/liability management process has permitted us to manage the interest rate risk associated with our products through several market cycles. Our interest rate exposure is also mitigated by our business mix, which includes lines of business for which fee-based and insurance underwriting earnings play a more prominent role in product profitability.

Closed Block Division

Substantially all of the \$61 billion of general account assets in the Closed Block division support obligations and liabilities relating to the Closed Block policies only. See Note 12 to the Consolidated Financial Statements for further information on the Closed Block.

International Insurance Operations

Table of Contents

While our international insurance operations have experienced a low interest rate environment for many years, the current reinvestment yields for certain blocks of business in our international insurance operations are generally lower than the current portfolio yield supporting these blocks of business. In recent years, the Bank of Japan's monetary policy has resulted in even lower and, at times, negative yields for certain tenors of government bonds. Our international insurance operations employ a proactive asset/liability management program in order to mitigate, to the extent possible, the unfavorable impact that the current interest rate environment has on our net interest margins. In conjunction with this program, we have not purchased negative yielding assets to support the portfolio and we continue to purchase long-term bonds with tenors of 30 years or greater. Additionally, our diverse product portfolio in terms of currency mix and premium payment structure allows us to further mitigate the negative impact from this low interest rate environment. We regularly examine our product offerings and their profitability. As a result, we have repriced certain products, adjusted commissions for certain products and have discontinued sales of other products that do not meet our profit expectations. The impact of these actions, coupled with the strengthening of the yen against the U.S. dollar and introduction of certain new products, has resulted in an increase in sales of U.S. dollar-denominated products relative to products denominated in other currencies. For additional information on sales within our international insurance operations, see “—International Insurance Division—International Insurance—Sales Results,” below.

The following table sets forth the insurance liabilities and policyholder account balances of our Japanese operations, by type, for the date indicated:

	As of December 31, 2017 (\$ in billions)
Long-duration insurance products with fixed and guaranteed terms	\$ 125
Contracts with a market value adjustment if invested amount is not held to maturity	24
Contracts with adjustable crediting rates subject to guaranteed minimums	10
Total	\$ 159

The \$125 billion above is predominantly comprised of long-duration insurance products that have fixed and guaranteed terms, for which underlying assets may have to be reinvested at interest rates that are lower than current portfolio yields. The remaining insurance liabilities and policyholder account balances include \$24 billion related to contracts that impose a market value adjustment if the invested amount is not held to maturity and \$10 billion related to contracts with crediting rates that may be adjusted over the life of the contract, subject to guaranteed minimums. Most of the current crediting rates on these contracts, however, are at or near contractual minimums. Although we have the ability in some cases to lower crediting rates for those contracts that are above guaranteed minimum crediting rates, the majority of this business has interest crediting rates that are determined by formula.

Assuming a hypothetical scenario within our Japanese and Korean operations where 2018 new money yields would be 25 basis points lower than projected, and applying these lower new money yields to annualized investment of renewal premiums, proceeds from investment disposition and reinvestment of investment income, we estimate that the unfavorable impact would reduce adjusted operating income in 2018 by approximately \$10 to \$15 million. This hypothetical scenario excludes first-year premium, single pay premium, multi-currency fixed annuity cash flows, any potential benefit from repricing products, and any impact from other factors, including but not limited to new business, contractholder behavior, changes in competitive conditions, changes in capital markets, and the effect of derivative instruments.

Outlook

Management expects that results in 2018 will continue to benefit from our complementary mix of high-quality protection, retirement and investment management businesses. This business mix provides a diversity in earnings sources, which helps offset variability in business results or fluctuations in market conditions, while offering growth opportunities. While challenges exist in the form of a low interest rate environment (see “Impact of a Low Interest Rate Environment”), fee compression in certain of our businesses and an evolving regulatory environment (see “Business—Regulation”), we expect that our choice of businesses coupled with strong execution will produce attractive returns. Outlook considerations for each of our divisions include the following:

Table of Contents

U.S. Individual Solutions. Our Individual Annuities business remains focused on helping its customers meet their investment and retirement needs. We expect continued strong results with near-term returns on assets above our long-term target. In addition, we expect our free cash flow to be high given the stability in our block and the challenged industry-wide sales environment. We have been enhancing our risk management strategy to optimize the mix of derivatives and cash instruments which will cause some downward pressure on returns over time, but is expected to produce less volatile net income and cash flows, particularly in adverse scenarios. In addition, we expect a natural fee rate reduction due to the maturation of the existing block and due to sales of newer products which generally have lower rate structures. Furthermore, we expect our recent favorable hedging outcomes to normalize. We expect the combination of these factors to cause our returns on assets to migrate to the long-term target over time. We continue to execute on our product diversification strategy and remain focused on a broad range of outcome-oriented solutions for customers. Over the near-term, we expect the challenged industry sales environment to persist, and given a more muted equity growth assumption than in prior years, we expect a slight decline in account values. Our Individual Life business is continuing to execute on its product diversification strategy in order to maintain a diversified product mix and an attractive risk profile. We continue to deepen relationships with distribution partners while developing a more customer-oriented experience. Product actions over the last several months could result in a slightly higher portion of sales in term and variable life over the next several quarters, but we remain committed to achieving a diversified product offering.

U.S. Workplace Solutions. In our Retirement business we continue to provide products that respond to the needs of plan sponsors to manage risk and control their benefit costs, while ensuring we maintain appropriate pricing and return expectations under changing market conditions. Our differentiated capabilities and demonstrated execution in the pension risk transfer business is expected to continue to generate attractive growth opportunities. We expect, however, that growth will not be linear given the episodic nature of larger cases, which is the segment of the market where we are most competitive and where the returns are the most compelling. In addition, while we foresee continuation of the spread and fee compression that we have been experiencing in our full-service business, we believe these are manageable headwinds. In our Group Insurance business, we are focused on expanding our premier market segment, while maintaining a leadership position in the national segment and deepening our customer relationships through our Financial Wellness platform. We are seeing benefits from our multi-year underwriting efforts, especially in our disability business where improved claims management and our continued pricing discipline have resulted in improvements to our benefits ratio.

Investment Management. PGIM, our investment management business, is making targeted investments to further diversify its product offerings, continue to build a broader international presence, deepen its solutions capability, and further strengthen external recognition as a leading global asset manager. These capabilities will enable PGIM to continue to meet our clients' evolving needs and, in turn, to generate flows across multiple asset classes, client segments and geographies. Underpinning our growth strategy is our ability to continue to deliver robust investment performance, and to attract and retain high-caliber investment talent. While we are experiencing fee pressure in line with the industry, our average fee yield has remained relatively flat due to new flows coming into higher fee yielding strategies within fixed income, equities and real estate, and because of our diverse business profile.

International Markets. We continue to concentrate on deepening our presence in Japan and other markets in which we currently operate and expanding our distribution capabilities in emerging markets. The returns on our death protection products are largely driven by mortality margins which helps mitigate the exposure of results to interest rates. We have seen a shift in sales mix with a greater emphasis on U.S. dollar-denominated products in Japan. We expect this trend to continue. We are also focused on achieving scale in select growth markets outside of Japan. With regard to distribution, we are seeking modest growth in our Life Planner count in Japan but we do expect a decline in Gibraltar Life Consultants as we continue to focus on increasing quality and productivity standards.

In order to capitalize on the growth opportunities in our domestic and international markets highlighted above, we continue to make investments in and across our businesses. We are investing in expanding our distribution capabilities through a focus on customer experience and technology enabled advice and distribution, cross-business collaboration, further development of work site relationships with individuals and expanding our ability to offer relevant products and services to customers through whichever channels they choose. We are also investing in product innovation, through the use of data and digital initiatives to better understand and serve the needs of a customer base with changing demographics, to achieve a goal of offering a broader array of cost effective and easily comprehensible products. In addition, we are making investments in our information technology infrastructure in order to streamline processes and enhance the effectiveness of our administrative systems.

Table of Contents

While we expect these strategic investments to ultimately generate business growth, they will result in elevated expenses. In addition, we expect the time periods required for these investments to generate returns to vary. These investments are being funded through a combination of operating cost efficiencies and the returns generated by our businesses, and we expect to be able to continue to absorb some of these investment costs through efficiency gains.

Results of Operations

Consolidated Results of Operations

The following table summarizes net income (loss) for the periods presented.

	Year ended December 31,		
	2017	2016	2015
	(in millions)		
Revenues	\$59,689	\$58,779	\$57,119
Benefits and expenses	53,202	53,074	49,350
Income (loss) before income taxes and equity in earnings of operating joint ventures	6,487	5,705	7,769
Income tax expense (benefit)	(1,438)	1,335	2,072
Income (loss) before equity in earnings of operating joint ventures	7,925	4,370	5,697
Equity in earnings of operating joint ventures, net of taxes	49	49	15
Net income (loss)	7,974	4,419	5,712
Less: Income attributable to noncontrolling interests	111	51	70
Net income (loss) attributable to Prudential Financial, Inc.	\$7,863	\$4,368	\$5,642

2017 to 2016 Annual Comparison. The \$3,495 million increase in “Net income (loss) attributable to Prudential Financial, Inc.” reflected the following notable items:

\$2,773 million favorable impact reflecting a tax benefit in the current year compared to a tax expense in the prior year primarily as a result of tax reform (see “—Income Taxes”);

\$1,927 million net favorable variance, on a pre-tax basis, primarily from higher operating results from our business segments and income in the current period from our Divested Businesses compared to a loss in the prior year;

\$1,500 million favorable variance, on a pre-tax basis, reflecting changes to the way we manage interest rate risks for certain products. This variance is primarily attributed to changes in our Individual Annuities risk management strategy implemented in 2016, whereby we terminated the existing intercompany derivative transactions between our Corporate and Other operations and Individual Annuities related to managing interest rate risk and we now manage this risk within the Individual Annuities business segment (see “—Results of Operations by Segment—Corporate and Other—Capital Protection Framework” for additional information); and

\$478 million favorable variance, on a pre-tax basis, from adjustments to DAC and other costs as well as reserves, reflecting updates to the estimated profitability of our businesses, including the impact of our annual reviews and update of assumptions and other refinements. This excludes the impact associated with the variable annuity hedging program discussed below (see “—Results of Operations by Segment—U.S. Individual Solutions Division—Individual Annuities” for additional information).

Partially offsetting these increases in “Net income (loss) attributable to Prudential Financial, Inc.” were the following items:

\$2,373 million unfavorable variance, on a pre-tax basis, reflecting the net impact from changes in the value of our embedded derivatives and related hedge positions associated with certain variable annuities (see “—Results of Operations by Segment—U.S. Individual Solutions Division—Individual Annuities—Variable Annuity Risks and Risk Mitigants” for additional information); and

Table of Contents

\$810 million lower net pre-tax realized gains for PFI excluding the Closed Block division, and excluding the impact of the hedging program associated with certain variable annuities discussed above (see “—Realized Investment Gains and Losses” for additional information).

2016 to 2015 Annual Comparison. The \$1,274 million decrease in “Net income (loss) attributable to Prudential Financial, Inc.” reflected the following notable items:

\$980 million unfavorable variance, on a pre-tax basis, from adjustments to DAC and other costs as well as reserves, reflecting updates to the estimated profitability of our businesses, including the impact of our annual reviews and update of assumptions and other refinements. This excludes the impact associated with the variable annuity hedging program discussed below (see “—Results of Operations by Segment—U.S. Individual Solutions Division—Individual Annuities” for additional information);

\$972 million unfavorable variance, on a pre-tax basis, reflecting our decision to manage a portion of our interest rate risk through our Capital Protection Framework (see “—Results of Operations by Segment—Corporate and Other—Capital Protection Framework” for additional information); and

\$479 million lower net pre-tax realized gains for PFI excluding the Closed Block division, and excluding the impact of the hedging program associated with certain variable annuities, which is discussed below (see “—Realized Investment Gains and Losses” for additional information).

Partially offsetting these decreases in “Net income (loss) attributable to Prudential Financial, Inc.” were the following items:

\$737 million favorable impact of lower tax expense reflecting lower pre-tax income in 2016 compared to 2015; and

\$660 million favorable variance, on a pre-tax basis, reflecting the net impact from changes in the value of our embedded derivatives and related hedge positions associated with certain variable annuities and other products (see “—Results of Operations by Segment—U.S. Individual Solutions Division—Individual Annuities—Variable Annuity Risks and Risk Mitigants” for additional information).

Segment Results of Operations

We analyze the performance of our segments and Corporate and Other operations using a measure of segment profitability called adjusted operating income. See “—Segment Measures” for a discussion of adjusted operating income and its use as a measure of segment operating performance.

Shown below are the adjusted operating income contributions of each segment and Corporate and Other operations for the periods indicated and a reconciliation of this segment measure of performance to “Income (loss) before income taxes and equity in earnings of operating joint ventures” as presented in our Consolidated Statements of Operations.

Table of Contents

	Year ended December 31,		
	2017	2016	2015
	(in millions)		
Adjusted operating income before income taxes by segment:			
Individual Annuities	\$2,198	\$1,765	\$1,797

Total International Insurance division	3,198	3,117	3,226
Corporate and Other operations	(1,437)	(1,581)	(1,313)
Total Corporate and Other	(1,437)	(1,581)	(1,313)
Total segment adjusted operating income before income taxes	6,244	5,399	6,231
Reconciling items:			
Realized investment gains (losses), net, and related adjustments(2)	(602)	989	2,258
Charges related to realized investment gains (losses), net(3)	544	(466)	(679)
Investment gains (losses) on trading account assets supporting insurance liabilities, net(4)	336	(17)	(524)
Change in experience-rated contractholder liabilities due to asset value changes(5)	(151)	21	433
Divested businesses(6):			
Closed Block division	45	(132)	58
Other divested businesses	38	(84)	(66)
Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests(7)	33	(5)	58
Consolidated income (loss) before income taxes and equity in earnings of operating joint ventures	\$6,487	\$5,705	\$7,769

Prior period divisional subtotals are presented on a basis consistent with the Company's new organizational (1) structure. Individual segment results and consolidated totals remain unchanged. See "—Overview" for additional information.

(2) Represents "Realized investment gains (losses), net," and related adjustments. See "—Realized Investment Gains and Losses" and Note 22 to our Consolidated Financial Statements for additional information.

(3) Includes charges that represent the impact of realized investment gains (losses), net, on the amortization of DAC and other costs, and on changes in reserves. Also includes charges resulting from payments related to market value adjustment features of certain of our annuity products and the impact of realized investment gains (losses), net, on the amortization of unearned revenue reserves.

(4) Represents net investment gains (losses) on trading account assets supporting insurance liabilities. See "—Experience-Rated Contractholder Liabilities, Trading Account Assets Supporting Insurance Liabilities and Other Related Investments."

(5) Represents changes in contractholder liabilities due to asset value changes in the pool of investments supporting these experience-rated contracts. See "—Experience-Rated Contractholder Liabilities, Trading Account Assets Supporting Insurance Liabilities and Other Related Investments."

(6) Represents the contribution to income (loss) of divested businesses that have been or will be sold or exited, including businesses that have been placed in wind down, but that did not qualify for "discontinued operations" accounting treatment under U.S. GAAP. See "—Divested Businesses."

Equity in earnings of operating joint ventures are included in adjusted operating income but excluded from income before income taxes and equity in earnings of operating joint ventures as they are reflected on an after-tax U.S. GAAP basis as a separate line in our Consolidated Statements of Operations. Earnings attributable to (7) noncontrolling interests are excluded from adjusted operating income but included in income before taxes and equity earnings of operating joint ventures as they are reflected on a U.S. GAAP basis as a separate line in our Consolidated Statements of Operations. Earnings attributable to noncontrolling interests represent the portion of earnings from consolidated entities that relates to the equity interests of minority investors.

Segment results for 2017 presented above reflect the following:

Individual Annuities. Segment results for 2017 increased in comparison to 2016, primarily reflecting higher asset-based fee income, lower amortization costs and higher net investment spread results. Both periods also experienced favorable comparative net impacts from changes in the estimated profitability of the business, including those resulting from our annual reviews and update of assumptions and other refinements.

Table of Contents

Individual Life. Segment results for 2017 decreased in comparison to 2016, primarily reflecting unfavorable comparative net impacts from our annual reviews and update of assumptions and other refinements, higher general and administrative expenses and an unfavorable impact from mortality experience, net of reinsurance, partially offset by a higher contribution from net investment spread results.

Retirement. Segment results for 2017 increased in comparison to 2016, reflecting higher net investment spread results and a higher contribution from reserve experience.

Group Insurance. Segment results for 2017 increased in comparison to 2016, reflecting favorable comparative net impacts from our annual reviews and update of assumptions and other refinements, net favorable underwriting results and higher net investment spread results, partially offset by higher expenses.

Investment Management. Segment results for 2017 increased in comparison to 2016, primarily reflecting higher asset management fees, net of related expenses, and higher other related revenues, net of associated expenses, partially offset by higher expenses.

International Insurance. Segment results for 2017 increased in comparison to 2016, inclusive of unfavorable net impacts from foreign currency exchange rates and comparatively favorable net impacts from our annual reviews and update of assumptions and other refinements. Excluding these items, segment results increased from the prior year, primarily reflecting the growth of business in force and improved policyholder experience, partially offset by higher expenses, including legal costs and expenses supporting business growth.

Corporate and Other operations. The results for 2017 reflected a decreased loss in comparison to 2016, driven by higher investment income, net of interest expense, higher income from our qualified pension plan, and lower levels of other corporate expenses.

Closed Block Division. Results for 2017 increased in comparison to 2016, primarily driven by an increase in net realized investment gains and related activity, net insurance activity and higher net investment income, partially offset by an increase in the policyholder dividend obligation.

Segment Measures

Adjusted Operating Income. In managing our business, we analyze our segments' operating performance using "adjusted operating income." Adjusted operating income does not equate to "Income (loss) before income taxes and equity in earnings of operating joint ventures" or "Net income (loss)" as determined in accordance with U.S. GAAP, but is the measure of segment profit or loss we use to evaluate segment performance and allocate resources, and consistent with authoritative guidance, is our measure of segment performance. The adjustments to derive adjusted operating income are important to an understanding of our overall results of operations. Adjusted operating income is not a substitute for income determined in accordance with U.S. GAAP, and our definition of adjusted operating income may differ from that used by other companies. However, we believe that the presentation of adjusted operating income as we measure it for management purposes enhances the understanding of our results of operations by highlighting the results from ongoing operations and the underlying profitability of our businesses. See Note 22 to the Consolidated Financial Statements for further information on the presentation of segment results and our definition of adjusted operating income.

Annualized New Business Premiums. In managing our Individual Life, Group Insurance and International Insurance businesses, we analyze annualized new business premiums, which do not correspond to revenues under U.S. GAAP. Annualized new business premiums measure the current sales performance of the business, while revenues primarily reflect the renewal persistency of policies written in prior years and net investment income, in addition to current

sales. Annualized new business premiums include 10% of first year premiums or deposits from single pay products. No other adjustments are made for limited pay contracts.

The amount of annualized new business premiums for any given period can be significantly impacted by several factors, including but not limited to: addition of new products, discontinuation of existing products, changes in credited interest rates for certain products and other product modifications, changes in premium rates, changes in tax laws, changes in regulations or changes in the competitive environment. Sales volume may increase or decrease prior to certain of these changes becoming effective, and then fluctuate in the other direction following such changes.

Table of Contents

Assets Under Management. In managing our Investment Management business, we analyze assets under management (which do not correspond directly to U.S. GAAP assets) because the principal source of revenues is fees based on assets under management. Assets under management represents the fair market value or account value of assets which we manage directly for institutional clients, retail clients, and for our general account, as well as assets invested in our products that are managed by third-party managers.

Account Values. In managing our Individual Annuities and Retirement businesses, we analyze account values, which do not correspond to U.S. GAAP assets. Net sales (redemptions) in our Individual Annuities business and net additions (withdrawals) in our Retirement business do not correspond to revenues under U.S. GAAP, but are used as a relevant measure of business activity.

Impact of Foreign Currency Exchange Rates

Foreign currency exchange rate movements and related hedging strategies

As a U.S.-based company with significant business operations outside the U.S., particularly in Japan, we are subject to foreign currency exchange rate movements that could impact our U.S. dollar-equivalent earnings and shareholder return on equity. We seek to mitigate this impact through various hedging strategies, including the use of derivative contracts and by holding U.S. dollar-denominated assets in certain of our foreign subsidiaries.

The operations of certain of our businesses are subject to currency fluctuations that could materially affect our U.S. dollar-equivalent earnings from period to period, even if earnings on a local currency basis are relatively constant. We enter into forward currency derivative contracts as part of our strategy to effectively fix the currency exchange rates for a portion of our prospective non-U.S. dollar-denominated earnings streams, thereby reducing earnings volatility from foreign currency exchange rate movements. The forward currency hedging program is primarily associated with our insurance operations in Japan and Korea.

For further information on the hedging strategies used to mitigate the risks of foreign currency exchange rate movements on earnings as well as the U.S. GAAP earnings impact from products denominated in non-local currencies, see “—Impact of foreign currency exchange rate movements on earnings,” below.

We utilize a yen hedging strategy that calibrates the hedge level to preserve the relative contribution of our yen-based business to the Company’s overall return on equity on a leverage neutral basis. We implement this hedging strategy utilizing a variety of instruments, including foreign currency derivative contracts, as discussed above, as well as U.S. dollar-denominated assets and, to a lesser extent, “dual currency” and “synthetic dual currency” assets held locally in our Japanese insurance subsidiaries. We may also hedge using instruments held in our U.S. domiciled entities, such as U.S. dollar-denominated debt that has been swapped to yen. The total hedge level may vary based on our periodic assessment of the relative contribution of our yen-based business to the Company’s overall return on equity.

The table below presents the aggregate amount of instruments that serve to hedge the impact of foreign currency exchange movements on our U.S. dollar-equivalent shareholder return on equity from our Japanese insurance subsidiaries as of the dates indicated.

	December 31,	
	2017	2016
	(in billions)	
Instruments hedging foreign currency exchange rate exposure on U.S. dollar-equivalent earnings:		
Forward currency hedging program(1)	\$ 1.6	\$ 1.6
Instruments hedging foreign currency exchange rate exposure on U.S. dollar-equivalent equity:		

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-K

U.S. dollar-denominated assets held in yen-based entities(2):		
U.S. dollar-denominated investments, at amortized cost	13.7	12.6
Other	0.1	0.1
Subtotal	13.8	12.7
Dual currency and synthetic dual currency investments(3)	0.6	0.7
Total instruments hedging foreign currency exchange rate exposure on U.S. dollar-equivalent equity	14.4	13.4
Total hedges	\$ 16.0	\$ 15.0

(1) Represents the notional amount of forward currency contracts outstanding.

Excludes \$41.2 billion and \$36.2 billion as of December 31, 2017 and 2016, respectively, of U.S.

(2) dollar-denominated assets supporting U.S. dollar-denominated liabilities related to U.S. dollar-denominated products issued by our Japanese insurance operations.

Table of Contents

Dual currency and synthetic dual currency investments are held by our yen-based entities in the form of fixed (3) maturities and loans with a yen-denominated principal component and U.S. dollar-denominated interest income. The amounts shown represent the present value of future U.S. dollar-denominated cash flows.

The U.S. dollar-denominated investments that hedge the impact of foreign currency exchange rate movements on U.S. dollar-equivalent earnings and shareholder return on equity from our Japanese insurance operations are reported within yen-based entities and, as a result, foreign currency exchange rate movements will impact their value reported within our yen-based Japanese insurance entities. We seek to mitigate the risk that future unfavorable foreign currency exchange rate movements will decrease the value of these U.S. dollar-denominated investments reported within our yen-based Japanese insurance entities, and therefore negatively impact their equity and regulatory solvency margins, by having our Japanese insurance operations enter into currency hedging transactions. Those hedges are with a subsidiary of Prudential Financial. These hedging strategies have the economic effect of moving the change in value of these U.S. dollar-denominated investments due to foreign currency exchange rate movements from our Japanese yen-based entities to our U.S. dollar-based entities.

These U.S. dollar-denominated investments also pay a coupon which is generally higher than what a similar yen-denominated investment would pay. The incremental impact of this higher yield on our U.S. dollar-denominated investments, as well as our dual currency and synthetic dual currency investments, will vary over time, and is dependent on the duration of the underlying investments as well as interest rate environments in both the U.S. and Japan at the time of the investments. See “—General Account Investments—Investment Results” for a discussion of the investment yields generated by our Japanese insurance operations.

Impact of foreign currency exchange rate movements on earnings

The financial results of our International Insurance, Retirement and Investment Management segments reflect the impact of intercompany arrangements with our Corporate and Other operations pursuant to which certain of these segments' non-U.S. dollar-denominated earnings are translated at fixed currency exchange rates. Results of our Corporate and Other operations include any differences between the translation adjustments recorded by the segments at the fixed currency exchange rate versus the actual average rate during the period. In addition, specific to our International Insurance segment where we hedge certain currencies, as further discussed below, the results of our Corporate and Other operations also include the impact of any gains or losses recorded from the forward currency contracts that settled during the period, which include the impact of any over or under hedging of actual earnings that differ from projected earnings.

For International Insurance, the fixed currency exchange rates are generally determined in connection with a foreign currency income hedging program designed to mitigate the impact of exchange rate changes on the segment's U.S. dollar-equivalent earnings. Pursuant to this program, our Corporate and Other operations execute forward currency contracts with third parties to sell the net exposure of projected earnings for certain currencies in exchange for U.S. dollars at specified exchange rates. The maturities of these contracts correspond with the future periods (typically on a three-year rolling basis) in which the identified non-U.S. dollar-denominated earnings are expected to be generated. In establishing the level of non-U.S. dollar-denominated earnings that will be hedged through this program, we exclude the anticipated level of U.S. dollar-denominated earnings that will be generated by U.S. dollar-denominated products and investments. For the twelve months ended December 31, 2017, approximately 24% of the segment's earnings were yen-based and, as of December 31, 2017, we have hedged 100%, 73% and 28% of expected yen-based earnings for 2018, 2019 and 2020, respectively. To the extent currently unhedged, our International Insurance segment's future expected U.S. dollar-equivalent of yen-based earnings will be impacted by yen exchange rate movements.

As a result of these arrangements, our International Insurance segment's results for 2017, 2016 and 2015 reflect the impact of translating yen-denominated earnings at fixed currency exchange rates of 112, 106 and 91 yen per U.S.

dollar, respectively, and Korean won-denominated earnings at fixed currency exchange rates of 1130, 1100 and 1120 Korean won per U.S. dollar, respectively. We expect our 2018 results to reflect the impact of translating yen-denominated earnings at a fixed currency exchange rate of 111 yen per U.S. dollar and Korean won-denominated earnings at a fixed currency exchange rate of 1150 won per U.S. dollar. Since determination of the fixed currency exchange rates for a given year is impacted by changes in foreign currency exchange rates over time, the segment's future earnings will ultimately be impacted by these changes in exchange rates.

For Retirement, Investment Management and certain currencies within International Insurance, the fixed currency exchange rates for the current year are predetermined during the third quarter of the prior year using forward currency exchange rates.

The table below presents, for the periods indicated, the increase (decrease) to revenues and adjusted operating income for the International Insurance, Retirement and Investment Management segments and for Corporate and Other operations, reflecting the impact of these intercompany arrangements.

Table of Contents

	Year ended December 31, 2017 2016 2015		
	(in millions)		
Segment impacts of intercompany arrangements:			
International Insurance	\$3	\$23	\$331
Retirement	2	9	0
Investment Management	0	6	0
Impact of intercompany arrangements(1)	5	38	331
Corporate and Other operations:			
Impact of intercompany arrangements(1)	(5)	(38)	(331)
Settlement gains (losses) on forward currency contracts(2)	(16)	38	286
Net benefit (detriment) to Corporate and Other operations	(21)	0	(45)
Net impact on consolidated revenues and adjusted operating income	\$(16)	\$38	\$286

Represents the difference between non-U.S. dollar-denominated earnings translated on the basis of weighted (1) average monthly currency exchange rates versus fixed currency exchange rates determined in connection with the foreign currency income hedging program.

As of December 31, 2017, 2016 and 2015, the notional amounts of these forward currency contracts within our (2) Corporate and Other operations were \$2.8 billion, \$2.7 billion and \$2.4 billion, respectively, of which \$1.5 billion, \$1.6 billion and \$1.9 billion, respectively, were related to our Japanese insurance operations.

Impact of products denominated in non-local currencies on U.S. GAAP earnings

While our international insurance operations offer products denominated in local currency, several also offer products denominated in non-local currencies, most notably our Japanese operations, which offer U.S. and Australian dollar-denominated products. The non-local currency-denominated insurance liabilities related to these products are supported by investments denominated in corresponding currencies, including a significant portion designated as available-for-sale. While the impact from foreign currency exchange rate movements on these non-local currency-denominated assets and liabilities is economically matched, differences in the accounting for changes in the value of these assets and liabilities due to changes in foreign currency exchange rate movements have historically resulted in volatility in U.S. GAAP earnings.

In the first quarter of 2015 we implemented a structure in Gibraltar Life's operations that disaggregated the U.S. and Australian dollar-denominated businesses into separate divisions, each with its own functional currency that aligns with the underlying products and investments. The result of this alignment was to reduce differences in the accounting for changes in the value of these assets and liabilities that arise due to changes in foreign currency exchange rate movements. For the U.S. and Australian dollar-denominated assets that were transferred under this structure, the net cumulative unrealized investment gains associated with foreign exchange remeasurement that were recorded in "Accumulated other comprehensive income (loss)" ("AOCI") totaled \$6.0 billion and will be recognized in earnings within "Realized investment gains (losses), net" over time as these assets mature or are sold. As of December 31, 2017, the remaining net cumulative unrealized investment gains balance related to these assets was \$3.9 billion. Absent the sale of any of these assets prior to their stated maturity, approximately 8% of the \$3.9 billion balance will be recognized in 2018, approximately 9% will be recognized in 2019, and a majority of the remaining balance will be recognized from 2020 through 2024.

Accounting Policies & Pronouncements

Application of Critical Accounting Estimates

The preparation of financial statements in conformity with U.S. GAAP requires the application of accounting policies that often involve a significant degree of judgment. Management, on an ongoing basis, reviews estimates and assumptions used in the preparation of financial statements. If management determines that modifications in assumptions and estimates are appropriate given current facts and circumstances, the Company's results of operations and financial position as reported in the Consolidated Financial Statements could change significantly.

The following sections discuss the accounting policies applied in preparing our financial statements that management believes are most dependent on the application of estimates and assumptions and require management's most difficult, subjective, or complex judgments.

Insurance Assets

Deferred Policy Acquisition Costs and Deferred Sales Inducements

Table of Contents

We capitalize costs that are directly related to the acquisition or renewal of insurance and annuity contracts. These costs primarily include commissions, as well as costs of policy issuance and underwriting and certain other expenses that are directly related to successfully negotiated contracts. We have also deferred costs associated with sales inducements related to our variable and fixed annuity contracts primarily within our Individual Annuities segment. Sales inducements are amounts that are credited to the policyholders' account balances mainly as an inducement to purchase the contract. For additional information about sales inducements, see Note 11 to the Consolidated Financial Statements. We generally amortize DAC and deferred sales inducements ("DSI") over the expected lives of the contracts, based on our estimates of the level and timing of gross premiums, gross profits, or gross margins, depending on the type of contract. As described in more detail below, in calculating DAC and DSI amortization, we are required to make assumptions about investment returns, mortality, persistency, and other items that impact our estimates of the level and timing of gross margins, gross profits, or gross premiums. We also periodically evaluate the recoverability of our DAC and DSI. For certain contracts, this evaluation is performed as part of our premium deficiency testing, as discussed further below in "—Insurance Liabilities—Future Policy Benefits." As of December 31, 2017, DAC and DSI for PFI excluding the Closed Block division were \$18.7 billion and \$1.2 billion, respectively, and DAC in our Closed Block division was \$299 million.

Amortization methodologies

Gross Premiums. DAC associated with the non-participating whole life and term life policies of our Individual Life segment and the whole life, term life, endowment and health policies of our International Insurance segment is primarily amortized in proportion to gross premiums. Gross premiums are defined as the premiums charged to a policyholder for an insurance contract.

Gross Profits. DAC and DSI associated with the variable and universal life policies of our Individual Life and International Insurance segments and the variable and fixed annuity contracts of our Individual Annuities and International Insurance segments are generally amortized over the expected lives of these policies in proportion to total gross profits. Total gross profits include both actual gross profits and estimates of gross profits for future periods. Gross profits are defined as i) amounts assessed for mortality, contract administration, surrender charges, and other assessments plus amounts earned from investment of policyholder balances less ii) benefit claims in excess of policyholder balances, costs incurred for contract administration, interest credited to policyholder balances and other credits. If significant negative gross profits are expected in any period, the amount of insurance in force is generally substituted as the base for computing amortization. For variable annuities in our Individual Annuities segment, U.S. GAAP gross profits and amortization rates also include the impacts of the embedded derivatives associated with certain of the optional living benefit features of our variable annuity contracts and related hedging activities. For additional information on the significant inputs to the valuation models for these embedded derivatives including capital market assumptions and actuarially determined assumptions, see below "—Insurance Liabilities—Future Policy Benefits." In calculating amortization expense, we estimate the amounts of gross profits that will be included in our U.S. GAAP results and in adjusted operating income, and utilize these estimates to calculate distinct amortization rates and expense amounts. We also regularly evaluate and adjust the related DAC and DSI balances with a corresponding charge or credit to current period earnings for the impact of actual gross profits and changes in our projections of estimated future gross profits on our DAC and DSI amortization rates. Adjustments to the DAC and DSI balances include the impact to our estimate of total gross profits of the annual review of assumptions, our quarterly adjustments for current period experience, and our quarterly adjustments for market performance. Each of these adjustments is further discussed below in "—Annual assumptions review and quarterly adjustments."

Gross Margins. DAC associated with the traditional participating products of our Closed Block is amortized over the expected lives of those contracts in proportion to estimated gross margins. Gross margins are defined as: i) amounts received from premiums, earned from investment of policyholder balances and other assessments, less ii) benefits claims paid, costs for contract administration, changes in the net level premium reserve for death and endowment

benefits, annual policyholder dividends and other credits. We evaluate our estimates of future gross margins and adjust the related DAC balance with a corresponding charge or credit to current period earnings for the effects of actual gross margins and changes in our expected future gross margins. DAC adjustments for these participating products generally have not created significant volatility in our results of operations since many of the factors that affect gross margins are also included in the determination of our dividends to these policyholders and, during most years, the Closed Block has recognized a cumulative policyholder dividend obligation expense in "Policyholders' dividends," for the excess of actual cumulative earnings over expected cumulative earnings as determined at the time of demutualization. However, if actual cumulative earnings fall below expected cumulative earnings in future periods, thereby eliminating the cumulative policyholder dividend obligation expense, changes in gross margins and DAC amortization would result in a net impact to the Closed Block results of operations. As of December 31, 2017, the excess of actual cumulative earnings over the expected cumulative earnings was \$1,790 million.

The amortization methodologies for products not discussed above primarily relate to less significant DAC and DSI balances associated with products in our Group Insurance and Retirement segments, which comprised approximately 2% of the Company's total DAC and DSI balances as of December 31, 2017.

Annual assumptions review and quarterly adjustments

Table of Contents

Annually, we perform a comprehensive review of the assumptions used in estimating gross profits for future periods. Over the last several years, the Company's most significant assumption updates resulting in a change to expected future gross profits and the amortization of DAC and DSI have been related to lapse experience and other contractholder behavior assumptions, mortality, and revisions to expected future rates of returns on investments. These assumptions may also cause potential significant variability in amortization expense in the future. The impact on our results of operations of changes in these assumptions can be offsetting and we are unable to predict their movement or offsetting impact over time.

The quarterly adjustments for current period experience referred to above reflect the impact of differences between actual gross profits for a given period and the previously estimated expected gross profits for that period. To the extent each period's actual experience differs from the previous estimate for that period, the assumed level of total gross profits may change. In these cases, we recognize a cumulative adjustment to all previous periods' amortization, also referred to as an experience true-up adjustment.

The quarterly adjustments for market performance referred to above reflect the impact of changes to our estimate of total gross profits to reflect actual fund performance and market conditions. A significant portion of gross profits for our variable annuity contracts and, to a lesser degree, our variable life policies are dependent upon the total rate of return on assets held in separate account investment options. This rate of return influences the fees we earn, costs we incur associated with the guaranteed minimum death and guaranteed minimum income benefit features related to our variable annuity contracts, as well as other sources of profit. Returns that are higher than our expectations for a given period produce higher than expected account balances, which increase the future fees we expect to earn and decrease the future costs we expect to incur associated with the guaranteed minimum death and guaranteed minimum income benefit features related to our variable annuity contracts. The opposite occurs when returns are lower than our expectations. The changes in future expected gross profits are used to recognize a cumulative adjustment to all prior periods' amortization.

The near-term future equity rate of return assumption used in evaluating DAC and other costs for our domestic variable annuity and variable life insurance products is derived using a reversion to the mean approach, a common industry practice. Under this approach, we consider historical equity returns and adjust projected equity returns over an initial future period of five years (the "near-term") so that equity returns converge to the long-term expected rate of return. If the near-term projected future rate of return is greater than our near-term maximum future rate of return of 15%, we use our maximum future rate of return. As of December 31, 2017, our variable annuities and variable life insurance businesses assume an 8.0% long-term equity expected rate of return and a 3.3% near-term mean reversion equity expected rate of return.

The weighted average rate of return assumptions consider many factors specific to each business, including asset durations, asset allocations and other factors. We generally update the near-term equity rates of return and our estimate of total gross profits each quarter to reflect the result of the reversion to the mean approach. We generally update the future interest rates used to project fixed income returns annually and in any quarter when interest rates vary significantly from these assumptions. As a result of our 2017 annual reviews and update of assumptions and other refinements, we reduced our long-term expectation of the 10-year U.S. Treasury rate by 25 basis points and now grade to 3.75% over ten years and we reduced the long-term expected return by 40 basis points on Japanese government bonds and now grade to 1.5% over ten years.

These market performance related adjustments to our estimate of total gross profits result in cumulative adjustments to prior amortization, reflecting the application of the new required rate of amortization to all prior periods' gross profits.

Value of Business Acquired

In addition to DAC and DSI, we also recognize an asset for VOBA. VOBA is an intangible asset which represents an adjustment to the stated value of acquired inforce insurance contract liabilities to present them at fair value, determined as of the acquisition date. VOBA is amortized over the expected life of the acquired contracts using the same methodology and assumptions used to amortize DAC and DSI (see “—Deferred Policy Acquisition Costs and Deferred Sales Inducements” above for additional information). VOBA is also subject to recoverability testing. As of December 31, 2017, VOBA was \$1.6 billion, and included \$1.2 billion related to the acquisition from American International Group (“AIG”) of AIG Star Life Insurance Co., Ltd, AIG Edison Life Insurance Company, AIG Financial Assurance Japan K.K. and AIG Edison Service Co., Ltd. (collectively, the “Star and Edison Businesses”) in 2011, and \$0.1 billion related to the acquisition of The Hartford Financial Services Group’s individual life insurance business (“the Hartford Life Business”) in 2013. The remaining \$0.3 billion primarily relates to previously-acquired traditional life, deferred annuity, defined contribution and defined benefit businesses. The VOBA associated with the inforce contracts of the Star and Edison Businesses is less sensitive to assumption changes, as the majority is amortized in proportion to gross premiums which are more predictably stable compared to gross profits.

Insurance Liabilities

Table of Contents

Future Policy Benefits

Future Policy Benefit Reserves, including Unpaid Claims and Claim Adjustment Expenses

We establish reserves for future policy benefits to, or on behalf of, policyholders using methodologies prescribed by U.S. GAAP. The reserving methodologies used include the following:

For most long-duration contracts, we utilize a net premium valuation methodology in measuring the liability for future policy benefits. Under this methodology, a liability for future policy benefits is accrued when premium revenue is recognized. The liability, which represents the present value of future benefits to be paid to or on behalf of policyholders and related expenses less the present value of future net premiums (portion of the gross premium required to provide for all benefits and expenses), is estimated using methods that include assumptions applicable at the time the insurance contracts are made with provisions for the risk of adverse deviation, as appropriate. Original assumptions continue to be used in subsequent accounting periods to determine changes in the liability for future policy benefits (often referred to as the “lock-in concept”) unless a premium deficiency exists. The result of the net premium valuation methodology is that the liability at any point in time represents an accumulation of the portion of premiums received to date expected to be needed to fund future benefits (i.e., net premiums received to date), less any benefits and expenses already paid. The liability does not necessarily reflect the full policyholder obligation the Company expects to pay at the conclusion of the contract since a portion of that obligation would be funded by net premiums received in the future and would be recognized in the liability at that time. We perform premium deficiency tests using best estimate assumptions as of the testing date without provisions for adverse deviation. If the liabilities determined based on these best estimate assumptions are greater than the net reserves (i.e., GAAP reserves net of any DAC, DSI or VOBA asset), the existing net reserves are adjusted by first reducing these assets by the amount of the deficiency or to zero through a charge to current period earnings. If the deficiency is more than these asset balances for insurance contracts, we then increase the net reserves by the excess, again through a charge to current period earnings. If a premium deficiency is recognized, the assumptions as of the premium deficiency test date are locked in and used in subsequent valuations and the net reserves continue to be subject to premium deficiency testing. In addition, for limited-payment contracts, future policy benefit reserves also include a deferred profit liability representing gross premiums received in excess of net premiums. The deferred profits are recognized in revenue in a constant relationship with insurance in force or with the amount of expected future benefit payments.

For certain contract features, such as those related to guaranteed minimum death benefits (“GMDB”), guaranteed minimum income benefits (“GMIB”) and no-lapse guarantees, a liability is established when associated assessments (which include all policy charges including charges for administration, mortality, expense, surrender, and other, regardless of how characterized) are recognized. This liability is established utilizing current best estimate assumptions and is based on the ratio of the present value of total expected excess payments over the life of the contract divided by the present value of total expected assessments (i.e., benefit ratio). The liability equals the current benefit ratio multiplied by cumulative assessments recognized to date, plus interest, less cumulative excess payments to date. Similar to as described above for DAC, the reserves are subject to adjustments based on annual reviews of assumptions and quarterly adjustments for experience, including market performance. These adjustments reflect the impact on the benefit ratio of using actual historical experience from the issuance date to the balance sheet date plus updated estimates of future experience. The updated benefit ratio is then applied to all prior periods’ assessments to derive an adjustment to the reserve recognized through a benefit or charge to current period earnings.

For certain product guarantees, primarily certain optional living benefit features of the variable annuity products in our Individual Annuities segment including guaranteed minimum accumulation benefits (“GMAB”), guaranteed minimum withdrawal benefits (“GMWB”) and guaranteed minimum income and withdrawal benefits (“GMIWB”), the benefits are accounted for as embedded derivatives using a fair value accounting framework. The fair value of these contracts is calculated as the present value of expected future benefit payments to contractholders less the present value of assessed rider fees attributable to the embedded derivative feature. Under U.S. GAAP, the fair values of these benefit features are based on assumptions a market participant would use in valuing these embedded derivatives.

Changes in the fair value of the embedded derivatives are recorded quarterly through a benefit or charge to current period earnings.

The assumptions used in establishing reserves are generally based on the Company's experience, industry experience and/or other factors, as applicable. We typically update our actuarial assumptions, such as mortality, morbidity, retirement and policyholder behavior assumptions, annually, unless a material change is observed in an interim period that we feel is indicative of a long-term trend. Generally, we do not expect trends to change significantly in the short-term and, to the extent these trends may change, we expect such changes to be gradual over the long-term. In a sustained low interest rate environment, there is an increased likelihood that the reserves determined based on best estimate assumptions may be greater than the net liabilities.

The following paragraphs provide additional details about the reserves established by each of our segments:

61

Table of Contents

International Insurance. The reserves for future policy benefits of our International Insurance segment, which as of December 31, 2017, represented 45% of our total future policy benefit reserves, primarily relate to non-participating whole life and term life products and endowment contracts, and are generally calculated using the net premium valuation methodology, as described above. The primary assumptions used in determining expected future benefits and expenses include mortality, lapse, morbidity, investment yield and maintenance expense assumptions. In addition, future policy benefit reserves for certain contracts also include amounts related to our deferred profit liability, as described above.

Retirement. The reserves for future policy benefits of our Retirement segment, which as of December 31, 2017, represented 23% of our total future policy benefit reserves, primarily relate to our non-participating life contingent group annuity and structured settlement products and are generally calculated using the net premium valuation methodology, as described above. The primary assumptions used in establishing these reserves include mortality, retirement, maintenance expense, and investment yield assumptions. In addition, future policy benefit reserves for certain contracts also include amounts related to our deferred profit liability, as described above.

Individual Annuities. The reserves for future policy benefits of our Individual Annuities segment, which as of December 31, 2017, represented 4% of our total future policy benefit reserves, primarily relate to reserves for the GMDB and GMIB features of our variable annuities, and for the optional living benefit features that are accounted for as embedded derivatives. As discussed above, in establishing reserves for GMDBs and GMIBs, we utilize current best estimate assumptions. The primary assumptions used in establishing these reserves generally include annuitization, lapse, withdrawal and mortality assumptions, as well as interest rate and equity market return assumptions. Lapse rates are adjusted at the contract level based on the in-the-moneyness of the living benefit and reflect other factors, such as the applicability of any surrender charges. Lapse rates are reduced when contracts are more in-the-money. Lapse rates are also generally assumed to be lower for the period where surrender charges apply.

The reserves for certain optional living benefit features, including GMAB, GMWB and GMIWB are accounted for as embedded derivatives at fair value, as described above. This methodology could result in either a liability or contra-liability balance, given changing capital market conditions and various actuarial assumptions. Since there is no observable active market for the transfer of these obligations, the valuations are calculated using internally-developed models with option pricing techniques. The models are based on a risk neutral valuation framework and incorporate premiums for risks inherent in valuation techniques, inputs, and the general uncertainty around the timing and amount of future cash flows. The significant inputs to the valuation models for these embedded derivatives include capital market assumptions, such as interest rate levels and volatility assumptions, the Company's market-perceived risk of its own non-performance risk ("NPR"), as well as actuarially determined assumptions, including mortality rates and contractholder behavior, such as lapse rates, benefit utilization rates and withdrawal rates. Capital market inputs and actual contractholders' account values are updated each quarter based on capital market conditions as of the end of the quarter, including interest rates, equity markets and volatility. In the risk neutral valuation, the initial swap curve drives the total returns used to grow the contractholders' account values. The Company's discount rate assumption is based on the LIBOR swap curve adjusted for an additional spread, which includes an estimate of NPR. Actuarial assumptions, including contractholder behavior and mortality, are reviewed at least annually, and updated based upon emerging experience, future expectations and other data, including any observable market data, such as available industry studies or market transactions such as acquisitions and reinsurance transactions. For additional information regarding the valuation of these optional living benefit features, see Note 20 to the Consolidated Financial Statements.

Individual Life. The reserves for future policy benefits of our Individual Life segment, which as of December 31, 2017, represented 5% of our total future policy benefit reserves, primarily relate to term life, universal life and variable life products. For term life contracts, the future policy benefit reserves are generally calculated using the net premium valuation methodology, as described above. The primary assumptions used in determining expected future

benefits and expenses include mortality, lapse, and maintenance expense assumptions. For variable and universal life products, which include universal life contracts that contain no-lapse guarantees, reserves for future policy benefits are primarily established using the reserving methodology for GMDB and GMIB contracts. As discussed above, in establishing reserves for GMDBs and GMIBs, we utilize current best estimate assumptions. The primary assumptions used in establishing these reserves generally include mortality, lapse, and premium pattern, as well as interest rate and equity market return assumptions.

Group Insurance. The reserves for future policy benefits of our Group Insurance segment, which as of December 31, 2017, represented 2% of our total future policy benefit reserves, primarily relate to reserves for group life and disability benefits. For short-duration contracts, a liability is established when the claim occurs. The reserves for group life and disability benefits include our liability of \$2.6 billion for unpaid claims and claim adjustment expenses for our Group Insurance segment as of December 31, 2017, which relates primarily to the group long-term disability product. This liability represents our estimate of future disability claim payments and expenses as well as estimates of claims that have been incurred, but have not yet been reported, as of the balance sheet date. The liability is determined as the present value of expected future claim payments and expenses. The primary assumptions used in determining expected future claim payments are claim termination factors, an assumed interest rate and

Table of Contents

expected Social Security offsets. Long-term disability claims and claim termination experience may be affected by the economic environment and internal factors such as our claims management process. The remaining reserves for future policy benefits for group life and disability benefits relate primarily to our group life business, and include reserves for Waiver of Premium, Claims In Course of Settlement and Claims Incurred But Not Reported. The Waiver of Premium reserve is calculated as the present value of future benefits, and utilizes assumptions such as expected mortality and recovery rates. The Claims In Course of Settlement reserve is based on the inventory of claims that have been reported but not yet paid. The Claims Incurred But Not Reported reserve is estimated using expected patterns of claims reporting.

Corporate and Other operations. The reserves for future policy benefits of our Corporate & Other operations, which as of December 31, 2017, represented 2% of our total future policy benefit reserves, primarily relate to our long-term care products and are generally calculated using the net premium valuation methodology, as described above. Most contracts have recorded a premium deficiency reserve, for which we use assumptions as of the most recent premium deficiency reserve establishment. The primary assumptions used in establishing these reserves include interest rate, morbidity, mortality, lapse, premium rate increase and maintenance expense assumptions. In addition, certain less significant reserves for our long-term care products, such as our disabled life reserves, are established using current best estimate actuarial assumptions.

Closed Block Division. The future policy benefit reserves for the traditional participating life insurance products of the Closed Block division, which as of December 31, 2017, represented 19% of our total future policy benefit reserves are determined using the net premium valuation methodology, as described above. Under this method, the future policy benefit reserves are accrued as a level proportion of the premium paid by the policyholder. In applying this method, we use mortality assumptions to determine our expected future benefits and expected future premiums, and apply an interest rate to determine the present value of both the expected future benefit payments and the expected future premiums. The mortality assumptions are based on standard industry mortality tables that were used to determine the cash surrender value of the policies, and the interest rates used are the interest rates used to calculate the cash surrender value of the policies.

Profits Followed by Losses

In certain instances, the policyholder liability for a particular line of business may not be deficient in the aggregate to trigger loss recognition, but the pattern of earnings may be such that profits are expected to be recognized in earlier years followed by losses in later years. In these situations, accounting standards require that an additional PFL liability be recognized by an amount necessary to sufficiently offset the losses that would be recognized in later years. The PFL liability is based on our current estimate of the present value of the amount necessary to offset losses anticipated in future periods. Because the liability is measured on a discounted basis, there will also be accretion into future earnings through an interest charge, and the liability will ultimately be released into earnings as an offset to future losses. This PFL liability is predominantly associated with certain universal life contracts that measure net GAAP reserves using current best estimate assumptions and accordingly, will be updated each quarter using current inforce and market data and as part of the annual assumption update.

Policyholders' Account Balances

Unearned Revenue Reserve

Our unearned revenue reserve ("URR"), reported as a component of "Policyholders' account balances," was \$2.4 billion as of December 31, 2017. This reserve primarily relates to variable and universal life products within our Individual Life and International Insurance segments and represents policy charges for services to be provided in future periods. The charges are deferred as unearned revenue and are generally amortized over the expected life of the contract in

proportion to the product's estimated gross profits, similar to DAC and DSI as discussed above.

Sensitivities for Insurance Assets and Liabilities

The following table summarizes the impact that could result on each of the listed financial statement balances for the specified segments relative to changes in certain assumptions that may be considered reasonably likely to occur. The information below is for illustrative purposes only and considers only the hypothetical direct impact on December 31, 2017 balances of changes in a single assumption and not changes in any combinations of assumptions. The figures below are presented for segments that are expected to experience a significant impact as a result of the corresponding assumption change. Changes in excess of those illustrated may occur in any period. A description of the estimates and assumptions used in the preparation of each of these financial statement balances is provided further above. For traditional long duration contracts and limited payment contracts, U.S. GAAP requires the original assumptions used when the contracts are issued to be locked-in and that those assumptions be used in all future liability calculations as long as the resulting liabilities are adequate to provide for the future benefits and expenses (i.e., there is no premium deficiency). Therefore, these products are not reflected in the sensitivity table below unless the hypothetical change in assumption would cause a premium deficiency.

Table of Contents

The impacts presented within this table do not reflect the related impacts of our asset liability management strategy which seeks to offset the changes in the balances presented within this table and is primarily comprised of investments and derivatives. See further below for a discussion of the estimates and assumptions involved with the application of U.S. GAAP accounting policies for these instruments and “Quantitative and Qualitative Disclosures about Market Risk” for hypothetical impacts on related balances as a result of changes in certain significant assumptions.

(1) Includes GMDB/GMIB reserves, embedded derivative liabilities for certain living benefit guaranteed features, PFL liability, and URR.

(2) Represents the impact of a parallel shift in the long-term interest rate yield curve for the Individual Life segment and the Japanese insurance operations.

(3)

Represents the impact of an increase or decrease in the long-term equity expected rate of return for the Individual Annuities segment.

- (4) Represents the impact of an increase or decrease in the NPR credit spread for the Individual Annuities segment.
- (5) Represents the impact of an increase or decrease in mortality rates for the Individual Life and Individual Annuities segments.
- (6) Represents the impact of an increase or decrease in lapse rates for the Individual Life and Individual Annuities segments, and the Long-Term Care business within our Corporate and Other operations.

Goodwill

As of December 31, 2017, our goodwill balance of \$843 million is reflected in the following four reporting units: \$444 million related to our Retirement Full Service business, \$235 million related to our Investment Management business, \$152 million related to our Gibraltar Life and Other operations and \$12 million related to our International Insurance Life Planner business.

Table of Contents

We test goodwill for impairment on an annual basis, as of December 31 of each year, or more frequently if events or circumstances indicate the potential for impairment is more likely than not. The goodwill impairment analysis is performed at the reporting unit level which is equal to or one level below our operating segments. Accounting guidance provides for an optional qualitative assessment for testing goodwill impairment that may allow companies to skip the quantitative two step test. For additional information on goodwill and the process for testing goodwill for impairment, see Note 2 and Note 9 to the Consolidated Financial Statements.

In the International Insurance Life Planner business and the Gibraltar Life and Other operations as well as the Investment Management segment, we did not elect to utilize the option for qualitative analysis and therefore completed a quantitative impairment analysis using an earnings multiple approach. The earnings multiple approach indicates the value of a business based on comparison to publicly-traded comparable companies in similar lines of business. Each comparable company is analyzed based on various factors, including, but not limited to, financial risk, size, geographic diversification, profitability, adequate financial data, and an actively traded stock price. A multiple of price to earnings is developed for the comparable companies using independent analysts' consensus estimates for each company's 2018 forecasted earnings. The multiples are then aggregated and a mean and median multiple is calculated for the group. The lower of the mean or median multiple is then applied to the 2018 forecasted earnings of the reporting unit to develop a value. A control premium is then added to determine a total estimated fair value for the reporting unit.

In the Retirement Full Service business, we also did not elect to utilize the option for qualitative analysis and therefore completed a quantitative impairment analysis using a discounted cash flow approach. The discounted cash flow approach calculates the value of a business by applying a discount rate reflecting the market expected rate of return of the reporting unit to its projected future cash flows. These projected future cash flows were based on our internal forecasts, an expected growth rate and a terminal value. The reporting unit expected rate of return represents the required rate of return on its total capitalization. The process of deriving reporting unit specific required rates of return begins with the calculation of an overall Company Weighted Average Cost of Capital, which includes the calculation of the required return on equity using a Capital Asset Pricing Model ("CAPM"). The CAPM is a generally accepted method for estimating an equity investor's return requirement, and hence a company's cost of equity capital. The calculation using the CAPM begins with the long-term risk-free rate of return, then applies a market risk premium for large company common stock, as well as company specific adjustments to address volatility versus the market. The Company then determines reporting unit specific required rates of return based on their relative volatilities, benchmarks results against reporting unit comparable companies, and ensures that the sum of the reporting unit required returns (after considering the impact of unallocated Corporate costs and capital) add up to the overall Company required return. This process results in reporting unit specific discount rates which are then applied to the expected future cash flows of the Retirement Full Service business to estimate fair value.

After completion of the first step of the quantitative tests, the fair values exceeded the carrying amounts for each of the four reporting units and we concluded there was no impairment as of December 31, 2017. The Investment Management, International Insurance Life Planner, Gibraltar Life and Other operations, and Retirement Full Service businesses had estimated fair values that exceeded their carrying amounts, each by at least 55%. Completion of the second step of the quantitative analysis is therefore not necessary.

Estimating the fair value of reporting units is a subjective process that involves the use of significant estimates by management. For all reporting units tested, market declines or other events impacting the fair value of these businesses, including discount rates, interest rates and growth rate assumptions or increases in the level of equity required to support these businesses, could result in goodwill impairments, resulting in a charge to income.

Valuation of Investments, Including Derivatives, and the Recognition of Other-than-Temporary Impairments

Our investment portfolio consists of public and private fixed maturity securities, commercial mortgage and other loans, equity securities, other invested assets, and derivative financial instruments. Derivatives are financial instruments whose values are derived from interest rates, foreign exchange rates, financial indices or the values of securities or commodities. Derivative financial instruments we generally use include swaps, futures, forwards and options and may be exchange-traded or contracted in the over-the-counter (“OTC”) market. We are also party to financial instruments that contain derivative instruments that are “embedded” in the financial instruments. Management believes the following accounting policies related to investments, including derivatives, are most dependent on the application of estimates and assumptions. Each of these policies is discussed further within other relevant disclosures related to the investments and derivatives, as referenced below:

- Valuation of investments, including derivatives;
- Recognition of other-than-temporary impairments (“OTTI”); and
- Determination of the valuation allowance for losses on commercial mortgage and other loans.

Table of Contents

We present at fair value in the statements of financial position our investments classified as available-for-sale (including fixed maturity and equity securities), investments classified as trading such as our trading account assets supporting insurance liabilities, derivatives and embedded derivatives. For additional information regarding the key estimates and assumptions surrounding the determination of fair value of fixed maturity and equity securities, as well as derivative instruments, embedded derivatives and other investments, see Note 20 to the Consolidated Financial Statements and “—Valuation of Assets and Liabilities—Fair Value of Assets and Liabilities.”

For our investments classified as available-for-sale, the impact of changes in fair value is recorded as an unrealized gain or loss in AOCI, a separate component of equity. For our investments classified as trading, the impact of changes in fair value is recorded within “Other income.” In addition, investments classified as available-for-sale, as well as those classified as held-to-maturity, are subject to impairment reviews to identify when a decline in value is other-than-temporary. For a discussion of our policies regarding other-than-temporary declines in investment value and the related methodology for recording OTTI of fixed maturity and equity securities, see Note 2 to the Consolidated Financial Statements.

Commercial mortgage and other loans are carried primarily at unpaid principal balances, net of unamortized deferred loan origination fees and expenses and unamortized premiums or discounts and a valuation allowance for losses. For a discussion of our policies regarding the valuation allowance for commercial mortgage and other loans, see Note 2 to the Consolidated Financial Statements.

Pension and Other Postretirement Benefits

We sponsor pension and other postretirement benefit plans covering employees who meet specific eligibility requirements. Our net periodic costs for these plans consider an assumed discount (interest) rate, an expected rate of return on plan assets, expected increases in compensation levels, mortality and trends in health care costs. Of these assumptions, our expected rate of return assumptions and our discount rate assumptions have historically had the most significant effect on our net period costs associated with these plans.

We determine our expected rate of return on plan assets based upon a building block approach that considers inflation, real return, term premium, credit spreads, equity risk premium and capital appreciation as well as expenses, the effect of active management and the effect of rebalancing for the equity, debt and real estate asset mix applied on a weighted average basis to our pension asset portfolio. See Note 18 to our Consolidated Financial Statements for our actual asset allocations by asset category and the asset allocation ranges prescribed by our investment policy guidelines for both our pension and other postretirement benefit plans. Our assumed long-term rate of return for 2017 was 6.25% for our domestic pension plans and 7.00% for our other postretirement benefit plans. Given the amount of plan assets as of December 31, 2016, the beginning of the measurement year, if we had assumed an expected rate of return for both our domestic pension and other domestic postretirement benefit plans that was 100 bps higher or 100 bps lower than the rates we assumed, the change in our net periodic costs would have been as shown in the table below. The information provided in the table below considers only changes in our assumed long-term rate of return given the level and mix of invested assets at the beginning of the measurement year, without consideration of possible changes in any of the other assumptions described above that could ultimately accompany any changes in our assumed long-term rate of return.

For the year ended December 31, 2017		
Increase/(Decrease) in Net		
Periodic	Periodic	Other
Pension Cost	Postretirement Cost	

(in millions)

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-K

Increase in expected rate of return by 100 bps	\$ (122)	\$ (15)
Decrease in expected rate of return by 100 bps	\$ 122	\$ 15

Foreign pension plans represent 5% of plan assets at the beginning of 2017. An increase in expected rate of return by 100 bps would result in a decrease in net periodic pension costs of \$6 million; conversely, a decrease in expected rate of return by 100 bps would result in an increase in net periodic pension costs of \$5 million.

Table of Contents

We determine our discount rate, used to value the pension and postretirement benefit obligations, based upon rates commensurate with current yields on high quality corporate bonds. See Note 18 to the Consolidated Financial Statements for information regarding the December 31, 2016 methodology we employed to determine our discount rate for 2017. Our assumed discount rate for 2017 was 4.15% for our domestic pension plans and 4.05% for our other domestic postretirement benefit plans. Given the amount of pension and postretirement obligations as of December 31, 2016, the beginning of the measurement year, if we had assumed a discount rate for both our domestic pension and other postretirement benefit plans that was 100 bps higher or 100 bps lower than the rates we assumed, the change in our net periodic costs would have been as shown in the table below. The information provided in the table below considers only changes in our assumed discount rate without consideration of possible changes in any of the other assumptions described above that could ultimately accompany any changes in our assumed discount rate.

	For the year ended December 31, 2017	
	Increase/(Decrease) in Net Periodic Pension Cost	Increase/(Decrease) in Net Periodic Other Postretirement Cost
	(in millions)	
Increase in discount rate by 100 bps	\$ (111)	\$ (7)
Decrease in discount rate by 100 bps	\$ 140	\$ 5

Foreign pension plans represent 14% of plan obligations at the beginning of 2017. An increase in discount rate by 100 bps would result in a decrease in net periodic pension costs of \$26 million; conversely, a decrease in discount rate by 100 bps would result in an increase in net periodic pension costs of \$9 million.

Given the application of the authoritative guidance for accounting for pensions, and the deferral and amortization of actuarial gains and losses arising from changes in our assumed discount rate, the change in net periodic pension cost arising from an increase in the assumed discount rate by 100 bps would not always be expected to equal the change in net periodic pension cost arising from a decrease in the assumed discount rate by 100 bps.

For a discussion of our expected rate of return on plan assets and discount rate for our qualified pension plan in 2017, see “—Results of Operations by Segment—Corporate and Other.”

For purposes of calculating pension income from our own qualified pension plan for the year ended December 31, 2018, we will decrease the discount rate to 3.65% from 4.15% in 2017. The expected rate of return on plan assets will remain unchanged at 6.25%, and the assumed rate of increase in compensation will remain unchanged at 4.5%.

In addition to the effect of changes in our assumptions, the net periodic cost or benefit from our pension and other postretirement benefit plans may change due to factors such as actual experience being different from our assumptions, special benefits to terminated employees, or changes in benefits provided under the plans.

At December 31, 2017, the sensitivity of our domestic and foreign pension and postretirement obligations to a 100 basis point change in discount rate was as follows:

	December 31, 2017	
	Increase/(Decrease) in Pension Benefits Obligation	Increase/(Decrease) in Accumulated Postretirement Benefits Obligation
	(in millions)	

Increase in discount rate by 100 bps	\$ (1,437)	\$ (187)
Decrease in discount rate by 100 bps	\$ 1,653	\$ 208

Taxes on Income

Our effective tax rate is based on income, non-taxable and non-deductible items, statutory tax rates and tax planning opportunities available in the various jurisdictions in which we operate. Inherent in determining our annual tax rate are judgments regarding business plans, planning opportunities and expectations about future outcomes. The DRD is a major reason for the difference between the Company's effective tax rate and the federal statutory rate. The DRD is an estimate that incorporates the prior and current year information, as well as the current year's equity market performance. Both the current estimate of the DRD and the DRD in future periods can vary based on factors such as, but not limited to, changes in the amount of dividends received

Table of Contents

that are eligible for the DRD, changes in the amount of distributions received from underlying fund investments, changes in the account balances of variable life and annuity contracts, and the Company's taxable income before the DRD.

In December 2017, SEC staff issued "SAB 118, Income Tax Accounting Implications of the Tax Cuts and Jobs Act" ("SAB 118"), which allows the registrants to record provisional amounts during a 'measurement period' not to extend beyond one year. Under the relief provided by SAB 118, a company can recognize provisional amounts when it does not have the necessary information available, prepared or analyzed in reasonable detail to complete its accounting for the change in tax law. See Note 19 to the Consolidated Financial Statements for a discussion of provisional amounts related to the Tax Act of 2017 included in "Total income tax expense (benefit) before equity in earnings of operating joint ventures" in 2017.

The Tax Act of 2017 includes a provision causing post-1986 unremitted foreign earnings of at least 10% owned non-U.S. affiliates to be included in the Company's U.S. income tax base, with an election to pay the associated tax on an eight-year installment basis. Unremitted foreign earnings from certain operations in foreign jurisdictions that impose a withholding tax on dividends are considered to be permanently reinvested for purposes of determining the applicable withholding tax expense. See Note 19 to the Consolidated Financial Statements for a discussion of unremitted earnings for which the Company provides U.S. income taxes.

An increase or decrease in our effective tax rate by one percentage point would have resulted in a decrease or increase in our 2017 "Total income tax expense (benefit)" of \$65 million.

Contingencies

A contingency is an existing condition that involves a degree of uncertainty that will ultimately be resolved upon the occurrence of future events. Under U.S. GAAP, accruals for contingencies are required to be established when the future event is probable and its impact can be reasonably estimated, such as in connection with an unresolved legal matter. The initial reserve reflects management's best estimate of the probable cost of ultimate resolution of the matter and is revised accordingly as facts and circumstances change and, ultimately, when the matter is brought to closure.

Other Accounting Policies

Accounting for Certain Reinsurance Contracts in our Individual Life business

During the second quarter of 2017, we recognized a charge of \$237 million in our Individual Life segment, reflecting a change in our estimate of reinsurance cash flows associated with universal life products as well as a change in our method of reflecting these cash flows in the financial statements. Under our previous method of accounting, with the exception of recoveries pertaining to no lapse guarantees, we generally recognized reinsurance cash flows (e.g., premiums and recoveries) as they occurred. Under our new method, the expected reinsurance cash flows are recognized more ratably over the life of the underlying reinsured policies. In conjunction with this change, we revised how reinsurance is reflected in estimated gross profits used for the amortization of URR, DAC and VOBA. The change represents a change in accounting estimate effected by a change in accounting principle and is included within our annual reviews and update of assumptions and other refinements. The change in accounting estimate reflected insights gained from revised cashflow modeling enabled by a systems conversion, which prompted the change to a preferable accounting method. We view this new methodology as preferable as we believe it better reflects the economics of our reinsurance transactions by aligning the results of our reinsurance activity more closely to the underlying direct insurance activity and by better reflecting the profit pattern of this business for purposes of the amortization of the balances noted above.

Adoption of New Accounting Pronouncements

There are no new critical accounting estimates resulting from new accounting pronouncements adopted during 2017. See Note 2 to the Consolidated Financial Statements for a complete discussion of newly adopted accounting pronouncements and accounting pronouncements issued but not yet adopted.

Results of Operations by Segment

U.S. Individual Solutions Division

Individual Annuities

Table of Contents

The Individual Annuities segment includes both variable and fixed annuities that may include optional guaranteed living benefits riders (e.g., guaranteed minimum income benefits (“GMIB”), guaranteed minimum accumulation benefits (“GMAB”), guaranteed minimum withdrawal benefits (“GMWB”), and guaranteed minimum income and withdrawal benefits (“GMIWB”)), and/or guaranteed minimum death benefits (“GMDB”). We also offer fixed annuities that provide a guarantee of principal and interest credited at rates we determine, subject to certain contractual minimums. We derive our revenue mainly from fee income generated on variable annuity account values, as the investment return on these contractholder funds is generally attributed directly to the contractholder. We also earn investment income on general account assets supporting annuity account values and certain other management fees. Our expenses primarily consist of interest credited and other benefits to contractholders, amortization of DAC and other costs, non-deferred expenses related to the selling and servicing of the various products we offer, costs of managing certain risks associated with these products, changes in the reserves for benefit guarantees and other general business expenses. These drivers of our business results are generally included in adjusted operating income, with exceptions related to certain guarantees, as discussed below.

The U.S. GAAP accounting and our adjusted operating income treatment for our guarantees differ depending upon the specific contractual features. Under U.S. GAAP, the reserves for GMDB and GMIB are calculated based on best estimates applying our actuarial and capital markets return assumptions in accordance with an insurance fulfillment accounting framework. Under this framework, a liability is established over time representing the portion of fees collected that is expected to be used to satisfy the obligation to pay benefits in future periods. The risks associated with these benefit features are retained and results are included in adjusted operating income in a manner generally consistent with U.S. GAAP.

In contrast, certain of our guaranteed living benefit riders (e.g., GMAB, GMWB and GMIWB) are accounted for under U.S. GAAP as embedded derivatives and reported using a fair value accounting framework. These benefit features are carried at fair value, based on estimates of assumptions a market participant would use in valuing these embedded derivatives, and the change in fair value during each reporting period is recorded within “Realized investment gains (losses), net.” For purposes of measuring segment performance, adjusted operating income excludes the changes in fair value and instead reflects the performance of these riders using an insurance fulfillment accounting framework. Under this framework, adjusted operating income recognized each period reflects the rider fees earned during the period, less the portion of such fees estimated to be required to cover future benefit payments and hedging costs. For more information on how we determine the portion of fees needed to cover estimated future benefit payments and hedging costs, see “Variable Annuity Risks and Risk Mitigants” below.

Operating Results

The following table sets forth the Individual Annuities segment’s operating results for the periods indicated.

	Year ended December 31,		
	2017	2016	2015
	(in millions)		
Operating results:			
Revenues	\$5,110	\$4,666	\$4,695
Benefits and expenses	2,912	2,901	2,898
Adjusted operating income	2,198	1,765	1,797
Realized investment gains (losses), net, and related adjustments	(1,157)	2,031	1,588
Related charges	577	68	(624)
Income (loss) before income taxes and equity in earnings of operating joint ventures	\$1,618	\$3,864	\$2,761

Adjusted Operating Income

2017 to 2016 Annual Comparison. Adjusted operating income increased \$433 million. Excluding the impacts of changes in the estimated profitability of the business, discussed below, adjusted operating income increased \$388 million. The increase was primarily driven by higher asset-based fee income, net of associated costs, lower amortization costs and reserve provisions, and higher net investment spread results. The increase in asset-based fee income, net of a related increase in asset-based commissions, reflects higher average variable annuity account values due to market appreciation as well as the impact of greater efficiencies in managing product risks associated with the Asset Liability Management (“ALM”) strategy that was implemented in the third quarter of 2016. The increase in net investment spread results reflects higher investment income on non-coupon investments as well as a higher level of invested assets.

Table of Contents

The impacts of changes in the estimated profitability of the business include adjustments to the amortization of DAC and other costs as well as to the reserves for certain living and/or death benefit features of our variable annuity products. These adjustments resulted in a net benefit of \$183 million and \$138 million in 2017 and 2016, respectively. The net benefits primarily reflected the net impact of equity market performance on contractholder accounts and hedge effectiveness relative to our assumptions, as well as a net benefit resulting from our annual reviews and update of assumptions and other refinements.

2016 to 2015 Annual Comparison. Adjusted operating income decreased \$32 million. Excluding the impacts of changes in the estimated profitability of the business, discussed below, adjusted operating income decreased \$8 million. The decrease was primarily driven by lower asset-based fee income, net of associated costs, as well as higher general and administrative expenses including business growth initiatives. The decrease in asset-based fee income, net of a related decrease in asset-based commissions, was driven by a decline in average variable annuity account values and the decrease in the average effective fee rate as fee rates on recent sales are generally lower than fee rates on the inforce block. This decrease was partially offset by an increase due to greater efficiency in managing product risks associated with a recently implemented asset-liability management strategy discussed below. Partially offsetting this net decline were increases in net investment income driven by higher income on non-coupon investments and higher invested assets, as well as lower amortization costs and lower interest expense. This net decline was also partially offset by the absence of certain costs for contract cancellations incurred in 2015.

Adjustments to the amortization of DAC and other costs and to the reserves for certain living and/or death benefit features of our variable annuity products resulted in a net benefit of \$138 million and \$162 million in 2016 and 2015, respectively. The net benefits primarily reflected the net impact of equity market performance on contractholder accounts and hedge effectiveness (beginning in the third quarter of 2016 as a result of our new ALM strategy) relative to our assumptions, as well as a net benefit resulting from our annual reviews and update of assumptions and other refinements.

Revenues, Benefits and Expenses

2017 to 2016 Annual Comparison. Revenues increased \$444 million. Excluding an \$85 million net increase related to the impacts of certain changes in our estimated profitability of the business, as discussed above, revenues increased \$359 million. Higher average variable annuity account values and the impact from refinements to our risk management strategy drove increases in policy charges and fee income, and asset management and service fees and other income. The increase in net investment income was driven by higher income from non-coupon investments and a higher level of invested assets.

Benefits and expenses increased \$11 million. Excluding a \$40 million net increase related to the impacts of certain changes in our estimated profitability of the business, as discussed above, benefits and expenses decreased \$29 million, primarily driven by a decrease in policyholders' benefits, including changes in reserves. Partially offsetting this decrease were higher general and administrative expenses, net of capitalization, primarily driven by higher asset management costs and higher asset-based commissions due to higher average account values, as well as from higher net operating expenses, including those supporting business growth initiatives.

2016 to 2015 Annual Comparison. Revenues decreased \$29 million. Excluding a \$5 million net decrease related to the impacts of certain changes in our estimated profitability of the business, as discussed above, revenues decreased \$24 million, driven by a decrease in policy charges and fee income, asset management and service fees and other income, primarily due to a decline in average variable annuity account values. Partially offsetting this decrease was an increase in net investment income driven by higher income on non-coupon investments and higher invested assets, and an increase in premiums reflecting an increase in annuitizations of our variable annuity contracts, with offsets in policyholders' benefits, as discussed below.

Benefits and expenses increased \$3 million. Excluding a \$19 million net increase related to the impacts of certain changes in our estimated profitability of the business, as discussed above, benefits and expenses decreased \$16 million. Interest credited to policyholders' account balances and amortization of DAC decreased \$21 million and \$12 million, respectively, driven by lower fee income, as discussed above. General and administrative expenses, net of capitalization, decreased \$10 million driven by lower asset management costs and lower asset-based commissions due to lower average account values, partially offset by higher operating expenses. Partially offsetting these decreases was a \$25 million increase in policyholders' benefits, including changes in reserves, primarily reflecting an increase in annuitizations of our variable annuity contracts with offsets in premiums, as discussed above.

Account Values

Table of Contents

Account values are a significant driver of our operating results. Since most fees are determined by the level of separate account assets, fee income varies according to the level of account values. Additionally, our fee income generally drives other items such as the pattern of amortization of DAC and other costs. Account values are driven by net flows from new business sales, surrenders, withdrawals and benefit payments, policy charges and the impact of positive or negative market value changes. The annuity industry's competitive and regulatory landscapes, which have been dynamic over the last few years, may impact our net flows, including new business sales. The following table sets forth account value information for the periods indicated.

	Year ended December 31,		
	2017	2016	2015
	(in millions)		
Total Individual Annuities(1):			
Beginning total account value	\$156,783	\$152,945	\$158,664
Sales	5,894	8,054	8,780
Surrenders and withdrawals	(9,821)	(7,881)	(8,415)
Net sales	(3,927)	173	365
Benefit payments	(1,873)	(1,794)	(1,910)
Net flows	(5,800)	(1,621)	(1,545)
Change in market value, interest credited and other activity	21,355	9,012	(585)
Policy charges	(3,712)	(3,553)	(3,589)
Ending total account value	\$168,626	\$156,783	\$152,945

(1) Includes variable and fixed annuities sold as retail investment products. Investments sold through defined contribution plan products are included with such products within the Retirement segment. Variable annuity account values were \$165.1 billion, \$153.3 billion and \$149.4 billion as of December 31, 2017, 2016 and 2015, respectively. Fixed annuity account values were \$3.5 billion as of December 31, 2017, 2016 and 2015.

2017 to 2016 Annual Comparison. The increase in account values during 2017 was predominantly driven by favorable changes in the market value of contractholder funds. Net sales for 2017 decreased compared to 2016 reflecting lower gross sales and higher surrenders and withdrawals. The decline in gross sales for 2017 compared to 2016 was largely driven by the continued impact stemming from the evolving DOL fiduciary rules and an industry shift away from variable annuity products.

2016 to 2015 Annual Comparison. The increase in account values during 2016 was largely driven by favorable changes in the market value of contractholder funds, partially offset by contract charges on contractholder accounts and benefit payments. Net sales for 2016 decreased compared to 2015 reflecting lower gross sales partially offset by lower surrenders and withdrawals. The decline in gross sales for 2016 compared to 2015 was largely driven by decreased sales of our Prudential Premier® Retirement Variable Annuity with “highest daily” benefit riders and Prudential Premier® Investment Variable Annuity (“PPI”). The declines in gross sales were partially offset by increases in sales of our Prudential Defined Income Variable Annuity (“PDI”) product.

Variable Annuity Risks and Risk Mitigants

The primary risk exposures of our variable annuity contracts relate to actual deviations from, or changes to, the assumptions used in the original pricing of these products, including capital markets assumptions such as equity market returns, interest rates and market volatility, along with actuarial assumptions such as contractholder mortality, the timing and amount of annuitization and withdrawals, and contract lapses. For these risk exposures, achievement of our expected returns and profitability is subject to the risk that actual experience will differ from the assumptions used

in the original pricing of these products. We currently manage our exposure to certain risks driven by fluctuations in capital markets primarily through a combination of Product Design Features, an Asset Liability Management Strategy, a Capital Hedge Program and External Reinsurance.

Product Design Features

71

Table of Contents

A portion of the variable annuity contracts that we offer include an automatic rebalancing feature, also referred to as an asset transfer feature. This feature is implemented at the contract level, and transfers assets between certain variable investment sub-accounts selected by the annuity contractholder and, depending on the benefit feature, a fixed-rate account in the general account or a bond fund sub-account within the separate accounts. The automatic rebalancing feature associated with currently-sold highest daily benefit products uses a designated bond fund sub-account within the separate accounts. The transfers are based on a static mathematical formula used with the particular benefit which considers a number of factors, including, but not limited to, the impact of investment performance on the contractholder's total account value. The objective of the automatic rebalancing feature is to reduce our exposure to equity market risk and market volatility. Other product design features we utilize include, among others, asset allocation restrictions, minimum issuance age requirements and certain limitations on the amount of contractholder deposits, as well as a required minimum allocation to our general account for certain of our products. We continue to introduce products that diversify our risk profile and have incorporated provisions in product design allowing frequent revisions of key pricing elements for certain of our products. In addition, there is diversity in our fee arrangements, as certain fees are primarily based on the benefit guarantee amount, the contractholder account value and/or premiums, which helps preserve certain revenue streams when market fluctuations cause account values to decline.

Asset Liability Management (“ALM”) Strategy (including fixed income instruments and derivatives)

Under our historical hedging program to manage certain capital market risks associated with certain variable annuity living benefit guarantees, we utilized the U.S. GAAP valuation, with certain modifications, to derive a hedge target that was more reflective of our best estimate of future benefit payments, net of fees collected. Derivative positions were entered into that sought to offset the change in value of the hedge target.

During the third quarter of 2016, we implemented a new ALM strategy that utilizes a combination of both traditional fixed income instruments and derivatives to help defray potential claims associated with our variable annuity living benefit guarantees. The economic liability we manage with this ALM strategy consists of expected living benefit claims under less severe market conditions, which are managed through the accumulation of fixed income instruments, and potential living benefit claims resulting from more severe market conditions, which are hedged using derivative instruments. For the portion of our ALM strategy executed with derivatives, we enter into a range of exchange-traded, cleared, and OTC equity and interest rate derivatives, including, but not limited to: equity and treasury futures; total return and interest rate swaps; and options, including equity options, swaptions, and floors and caps. The intent of this strategy is to more efficiently manage the capital and liquidity associated with these products while continuing to mitigate fluctuations in net income due to movements in capital markets.

The change in hedge strategy had no impact on how we value or account for the living benefit guarantees under U.S. GAAP. However, under the ALM strategy that began in the third quarter of 2016, adjusted operating income includes the fees earned that are in excess of the estimated portion of fees required to cover expected claims and hedge costs for the economic liability. The portion of fees required to cover such costs is updated quarterly to reflect updated estimates and actual experience. The effectiveness of our hedging program as measured by comparing the change in value of our hedging assets to the change in value of the liability we are attempting to hedge will ultimately be reflected in adjusted operating income over time through the inclusion of actual hedge costs. Expected costs are updated periodically along with our expectation of claims. For adjusted operating income purposes, DAC and other costs are fully amortized over the life of the contracts proportional to our actual and estimated gross profits under the adjusted operating income framework described above. Overall, we generally expect this strategy to result in a higher portion of fees being recognized in adjusted operating income than under our prior strategy.

The following table provides a reconciliation between the liability reported under U.S. GAAP and the economic liability we manage through our ALM strategy.

	As of December 31,	
	2017	2016
	(in millions)	
U.S. GAAP liability (including non-performance risk)	\$8,663	\$8,179
Non-performance risk adjustment	3,228	7,136
Subtotal	11,891	15,315
Adjustments including risk margins and valuation methodology differences	(2,742)	(5,663)
Economic liability managed through the ALM strategy	\$9,149	\$9,652

As of December 31, 2017, our fixed income instruments and derivative assets exceed the economic liability within the entities in which the risks reside.

Table of Contents

Under our ALM strategy, we expect differences in the U.S. GAAP net income impact between the changes in value of the fixed income instruments and derivatives, as compared to the changes in the embedded derivative liability these assets support. These differences can be primarily attributed to three distinct areas:

Different valuation methodologies in measuring the liability we intend to cover with fixed income instruments and derivatives versus the liability reported under U.S. GAAP—The valuation methodology utilized in estimating the economic liability we intend to defray with fixed income instruments and derivatives is different from that required to be utilized to measure the liability under U.S. GAAP. The valuation of the economic liability excludes certain items that are included within the U.S. GAAP liability, such as NPR (in order to maximize protection irrespective of the possibility of our own default), as well as risk margins (required by U.S. GAAP but different from our best estimate).

Different accounting treatment between liabilities and assets supporting those liabilities—Under U.S. GAAP, changes in value of the embedded derivative liability and derivative instruments used to hedge a portion of the economic liability are immediately reflected in net income. In contrast, changes in fair value of fixed income instruments that support a portion of the economic liability are designated as available-for-sale and are recorded as unrealized gains (losses) in other comprehensive income rather than within net income.

General hedge results—For the derivative portion of the ALM strategy, the net hedging impact (the extent to which the changes in value of the hedging instruments offset the change in value of the portion of the economic liability we are hedging) may be impacted by a number of factors including: cash flow timing differences between our hedging instruments and the corresponding portion of the economic liability we are hedging, basis differences attributable to actual underlying contractholder funds to be hedged versus hedgeable indices, rebalancing costs related to dynamic rebalancing of hedging instruments as markets move, certain elements of the economic liability that may not be hedged (including certain actuarial assumptions), and implied and realized market volatility on the hedge positions relative to the portion of the economic liability we seek to hedge.

The following table illustrates the net impact to our Consolidated Statements of Operations from changes in the U.S. GAAP embedded derivative liability and hedge positions under the ALM strategy, and the related amortization of DAC and other costs, that are excluded from adjusted operating income.

	Year ended December 31,		
	2017	2016	2015
	(in millions)(1)		
Excluding impact of assumption updates and other refinements:			
Net hedging impact(2)(3)	\$620	\$(692)	\$(547)
Change in portions of U.S. GAAP liability, before NPR(4)	2,477	1,745	(67)
Change in the NPR adjustment	(3,890)	(1,097)	2,243
Net impact from changes in the U.S. GAAP embedded derivative and hedge positions-reported in Individual Annuities	(793)	(44)	1,629
Related benefit (charge) to amortization of DAC and other costs	\$159	\$243	\$(701)
Net impact of assumption updates and other refinements	(85)	1,455	(34)
Net impact from changes in the U.S. GAAP embedded derivative and hedge positions, after the impact of NPR, DAC and other costs-reported in Individual Annuities(3)	\$(719)	\$1,654	\$894

(1) Positive amount represents income; negative amount represents a loss.

(2) Net hedging impact represents the difference between the change in fair value of the risk we seek to hedge using derivatives and the change in fair value of the derivatives utilized with respect to that risk.

Excludes \$0 million, \$(1,523) million and \$(585) million for 2017, 2016 and 2015, respectively, representing the impact of managing interest rate risk through capital management strategies other than hedging of particular exposures through September 30, 2016. Because this decision was based on the capital considerations of the Company as a whole, the impact was reported in Corporate and Other operations. See “—Corporate and Other.”

(3) Represents risk margins and valuation methodology differences between the economic liability managed by the (4) ALM strategy and the U.S. GAAP liability, as well as the portion of the economic liability managed with fixed income instruments.

The net loss of \$719 million for 2017 primarily reflected the net impact of a \$793 million loss from changes in the U.S. GAAP embedded derivative and hedge positions, predominantly driven by a decrease in the NPR adjustment due to tightening of credit spreads used in measuring our living benefits contracts. Partially offsetting this decrease were an increase in the portions of the U.S. GAAP liability before NPR that are excluded from our hedge target and, to a lesser extent, a benefit from net hedging impacts, primarily driven by fund outperformance and favorable liability basis.

Table of Contents

The net gain of \$1,654 million for 2016 primarily reflected the impact of a \$1,455 million benefit from our annual review and update of assumptions, driven by modifications to both our actuarial assumptions, including updates to expected withdrawal rates, as well as economic assumptions. The net gain also reflected the changes in the portions of the U.S. GAAP liability before NPR that are excluded from our hedge target. This impact was partially offset by changes in the NPR adjustment, primarily driven by tightening of credit spreads. To a lesser extent, results also reflected net hedging impacts, primarily driven by unfavorable liability basis. Each of these items had corresponding partial offsets included in the related impacts to amortization of DAC and other costs. Amortization of DAC and other costs also included a benefit of \$515 million related to changes in our estimate of total gross profits as a result of the implementation of the new ALM strategy in the third quarter of 2016 described above.

The net gain of \$894 million for 2015 primarily reflected a \$2,243 million net benefit from the change in the NPR adjustment, driven by net increases in the base embedded derivative liability before NPR primarily due to declining interest rates and widening credit spreads. This impact was partially offset by a \$547 million net charge from changes in the value of our historically defined hedge target, and related hedge positions, primarily driven by fund underperformance relative to indices and unfavorable liability basis. Each of these items resulted in partial offsets included in the \$701 million related charge to the amortization of DAC and other costs. The net charge from the impact of assumption updates and other refinements of \$34 million resulted from our annual review and update of assumptions, primarily driven by modifications to our actuarial assumptions and other refinements. Results also reflected the changes in the portions of the U.S. GAAP liability that are excluded from our historically defined hedge target, net of related impacts to the amortization of DAC and other costs.

For information regarding the Capital Protection Framework we use to evaluate and support the risks of the ALM strategy, see “—Liquidity and Capital Resources—Capital.”

Through March 31, 2016, we reinsured living benefit guarantees issued by our domestic statutory life insurance companies to a captive reinsurance company, Pruco Reinsurance, Ltd. (“Pruco Re”), in order to facilitate the capital markets hedging program for these living benefit guarantees. Effective April 1, 2016, these living benefit guarantees and certain retirement products were recaptured and then reinsured to certain of our domestic statutory life insurance companies. The ALM strategy described above is executed within these domestic insurance companies. After the foregoing transactions, Pruco Re no longer had any material active reinsurance with affiliates. On September 30, 2016, Pruco Re was merged with and into Prudential Annuities Life Assurance Corporation (“PALAC”).

Capital Hedge Program

During 2017, we commenced a capital hedge program within the Individual Annuities segment to further hedge equity market impacts. The program is intended to protect a portion of the overall capital position of the variable annuities business against its exposure to the equity markets. The capital hedge program is conducted using equity derivatives which include equity call and put options, total return swaps and futures contracts. The changes in value of these derivatives are recognized in adjusted operating income over the expected duration of the capital hedge program.

External Reinsurance

As of December 31, 2017, \$3.2 billion of HDI v.3.0 account values are reinsured to Union Hamilton Reinsurance Ltd., an external counterparty, pursuant to a quota share agreement that covered approximately 50% of new business between April 1, 2015 and December 31, 2016. HDI v.3.0 is the current version of our “highest daily” living benefits guarantee that is available with our Prudential Premier® Retirement Variable Annuity. New sales of HDI v.3.0 subsequent to December 31, 2016 are not covered by this external reinsurance agreement.

Product Specific Risks and Risk Mitigants

For certain living benefits guarantees, claims will primarily represent the funding of contractholder lifetime withdrawals after the cumulative withdrawals have first exhausted the contractholder account value. Due to the age of the in force block, limited claim payments have occurred to date, and they are not expected to increase significantly within the next five years, based upon current assumptions. The timing and amount of future claims will depend on actual returns on contractholder account value and actual contractholder behavior relative to our assumptions. The majority of our current living benefits guarantees provide for guaranteed lifetime contractholder withdrawal payments inclusive of a “highest daily” contract value guarantee. Our PDI variable annuity complements our variable annuity products with the highest daily benefit and provides for guaranteed lifetime contractholder withdrawal payments, but restricts contractholder asset allocation to a single bond fund sub-account within the separate accounts.

Table of Contents

The majority of our variable annuity contracts with living benefits guarantees, and all new contracts sold with our highest daily living benefits feature, include risk mitigants in the form of an automatic rebalancing feature and/or inclusion in our ALM strategy. We may also utilize external reinsurance as a form of additional risk mitigation. The risks associated with the guaranteed benefits of certain legacy products that were sold prior to our development of the automatic rebalancing feature are also managed through our ALM strategy. Certain legacy GMAB products include the automatic rebalancing feature, but are not included in the ALM strategy. The PDI product and contracts with the GMIB feature have neither risk mitigant. Certain risks associated with PDI are managed through the limitation of contractholder asset allocations to a single bond fund sub-account.

For our GMDBs, we provide a benefit payable in the event of death. Our base GMDB is generally equal to a return of cumulative deposits adjusted for any partial withdrawals. Certain products include an optional enhanced GMDB based on the greater of a minimum return on the contract value or an enhanced value. We have retained the risk that the total amount of death benefit payable may be greater than the contractholder account value; however, a substantial portion of the account values associated with GMDBs are subject to an automatic rebalancing feature because the contractholder also selected a living benefit guarantee which includes an automatic rebalancing feature. All of the variable annuity account values with living benefit guarantees also contain GMDBs. The living and death benefit features for these contracts cover the same insured life and, consequently, we have insured both the longevity and mortality risk on these contracts.

The following table sets forth the risk management profile of our living benefit guarantees and GMDB features as of the periods indicated.

	December 31, 2017		2016		2015	
	Account Value	% of Total	Account Value	% of Total	Account Value	% of Total
	(in millions)					
Living benefit/GMDB features(1):						
Both ALM strategy and automatic rebalancing(2)	\$114,686	69 %	\$106,585	69 %	\$106,018	71 %
ALM strategy only	9,317	6 %	9,409	6 %	9,994	7 %
Automatic rebalancing only	1,003	1 %	1,168	1 %	1,393	1 %
External reinsurance(3)	3,227	2 %	2,932	2 %	1,513	1 %
PDI	9,996	5 %	7,926	5 %	4,664	3 %
Other Products	2,791	2 %	2,730	2 %	2,870	2 %
Total living benefit/GMDB features	\$141,020		\$130,750		\$126,452	
GMDB features and other(4)	24,133	15 %	22,545	15 %	22,989	15 %
Total variable annuity account value	\$165,153		\$153,295		\$149,441	

(1) All contracts with living benefit guarantees also contain GMDB features, covering the same insured contract.

(2) Contracts with living benefits that are included in our ALM strategy, and have an automatic rebalancing feature.

Represents contracts subject to reinsurance transaction with external counterparty covering certain new HDI v.3.0
(3) business for the period April 1, 2015 through December 31, 2016. These contracts with living benefits also have an automatic rebalancing feature.

(4) Includes contracts that have a GMDB feature and do not have an automatic rebalancing feature.

Individual Life

Operating Results

The following table sets forth the Individual Life segment's operating results for the periods indicated.

75

Table of Contents

	Year ended December 31,		
	2017	2016	2015
	(in millions)		
Operating results:			
Revenues	\$4,974	\$5,355	\$5,233
Benefits and expenses	5,165	5,276	4,598
Adjusted operating income	(191)	79	635
Realized investment gains (losses), net, and related adjustments	96	58	166
Related charges	101	(223)	(9)
Income (loss) before income taxes and equity in earnings of operating joint ventures	\$6	\$(86)	\$792

Adjusted Operating Income

2017 to 2016 Annual Comparison. Adjusted operating income decreased \$270 million, primarily reflecting unfavorable comparative net impacts from our annual reviews and update of assumptions and other refinements. Results for 2017 included a \$653 million net charge from this annual review, mainly driven by a charge related to the unfavorable impacts for universal life and variable life products from modeling enhancements and other refinements related to a valuation systems conversion, including a net charge related to a change in the method of accounting for reinsurance associated with certain long-duration insurance contracts (see “—Accounting Policies & Pronouncements—Application of Critical Accounting Estimates—Other Accounting Policies—Accounting for Certain Reinsurance Contracts in our Individual Life business”), as well as unfavorable lapse rate assumptions primarily for universal life products. Results for 2016 included a \$420 million net charge from our annual reviews and update of assumptions and other refinements, mainly driven by a charge to accrue a liability to offset the present value of losses expected to be recognized in later years (see “Profits Followed by Losses” included in “—Accounting Policies & Pronouncements” above) and a charge related to an out of period adjustment (see Note 1 to the Consolidated Financial Statements), partially offset by a net benefit from the impacts of other refinements. Excluding these impacts, adjusted operating income decreased \$37 million, primarily reflecting the unfavorable ongoing impact of our second quarter 2017 annual review and update of assumptions and other refinements, higher general and administrative expenses, including expenses related to business growth initiatives, and an unfavorable impact from mortality experience, net of reinsurance. These decreases were partially offset by a higher contribution from net investment spread results.

2016 to 2015 Annual Comparison. Adjusted operating income decreased \$556 million, primarily reflecting unfavorable comparative net impacts from our annual reviews and update of assumptions and other refinements. Results for 2016 included a \$420 million net charge from these impacts, as discussed above. Results for 2015 included a \$68 million net benefit from our annual review and update of assumptions and other refinements, mainly driven by net favorable modifications to our economic and actuarial assumptions. Excluding these impacts, adjusted operating income decreased \$68 million, primarily driven by less favorable mortality experience, net of reinsurance, and higher general and administrative expenses driven by business growth initiatives, partially offset by a higher contribution from investment results.

Revenues, Benefits and Expenses

2017 to 2016 Annual Comparison. Revenues decreased \$381 million. Excluding the impact of our annual reviews and update of assumptions and other refinements, as discussed above, revenues increased \$152 million. Net investment income increased \$126 million primarily reflecting higher average invested assets resulting from continued business growth and higher investment income from unaffiliated reserve financing activity, which resulted in a corresponding increase in interest expense, as discussed below, and higher income on non-coupon investments, partially offset by lower prepayment fee income. Premiums increased \$35 million primarily driven by growth in our term life insurance

business. Policy charges and fee income, asset management and service fees and other income decreased \$9 million, reflecting higher cost of reinsurance premiums, as a result of the unfavorable ongoing impact of the second quarter 2017 change in the method of accounting for reinsurance (partial offsets included in benefits and expenses below), partially offset by an increase in asset management and service fees and other income from continued business growth.

Table of Contents

Benefits and expenses decreased \$111 million. Excluding the impact of our annual reviews and update of assumptions and other refinements, as discussed above, benefits and expenses increased \$189 million. General and administrative expenses, net of capitalization, increased \$66 million primarily reflecting higher operating expenses including business growth initiatives. Interest expense increased \$65 million related to higher reserve financing costs, as discussed above. Policyholders' benefits and interest credited to account balances increased \$58 million, reflecting continued business growth and an unfavorable impact from mortality experience, partially offset by the favorable ongoing impact of the second quarter 2017 change in the method of accounting for reinsurance, as discussed above.

2016 to 2015 Annual Comparison. Revenues increased \$122 million. Excluding the impact of our annual reviews and update of assumptions and other refinements, as discussed above, revenues increased \$199 million. Net investment income increased \$153 million primarily reflecting higher invested assets resulting from continued business growth and higher required capital, higher prepayment fee income and higher income on non-coupon investments. Policy charges and fee income, asset management and service fees and other income increased \$82 million, primarily driven by growth in universal life business, partially offset by a decrease in the amortization of unearned revenue reserves, driven by the impact of changes in the estimated profitability of the business due to experience relative to our assumptions. Partially offsetting these increases was a \$36 million decrease in premiums, primarily driven by higher ceded reinsurance premiums which were mostly offset by reserve changes in Policyholders' benefits.

Benefits and expenses increased \$678 million. Excluding the impact of our annual reviews and update of assumptions and other refinements, as discussed above, benefits and expenses increased \$267 million. Policyholders' benefits and interest credited to account balances increased \$195 million primarily reflecting universal life business growth and less favorable mortality experience, partially offset by reserve changes for ceded reinsurance premiums discussed above. General and administrative expenses, net of capitalization, increased \$40 million primarily driven by business growth and initiatives. Interest expense increased \$33 million related to higher reserve financing costs.

Sales Results

The following table sets forth individual life insurance annualized new business premiums, as defined under “—Results of Operations—Segment Measures” above, by distribution channel and product, for the periods indicated.

	2017			2016			2015		
	Prudential Advisory	Third Party	Total	Prudential Advisory	Third Party	Total	Prudential Advisory	Third Party	Total
	(in millions)								
Term Life	\$30	\$183	\$213	\$32	\$168	\$200	\$33	\$171	\$204
Guaranteed Universal Life ⁽¹⁾	16	140	156	24	219	243	31	189	220
Other Universal Life ⁽¹⁾	37	88	125	34	61	95	28	61	89
Variable Life	35	95	130	26	66	92	22	56	78
Total	\$118	\$506	\$624	\$116	\$514	\$630	\$114	\$477	\$591

Single pay life premiums and excess (unscheduled) premiums are included in annualized new business premiums based on a 10% credit and represented approximately 15%, 13% and 17% of Guaranteed Universal Life and 1%, 3% and 7% of Other Universal Life annualized new business premiums for the years ended December 31, 2017, 2016 and 2015, respectively.

2017 to 2016 Annual Comparison. Annualized new business premiums decreased \$6 million, primarily driven by lower guaranteed universal life sales, partially offset by higher sales across other products, as a result of certain distribution and product actions implemented to enhance product mix diversification.

2016 to 2015 Annual Comparison. Annualized new business premiums increased \$39 million, primarily driven by the continued impact of product enhancements in both universal and variable life as well as continued improvements in distribution execution.

U.S. Workplace Solutions Division

Retirement

Operating Results

The following table sets forth the Retirement segment's operating results for the periods indicated.

77

Table of Contents

	Year ended December 31,		
	2017	2016	2015
	(in millions)		
Operating results(1):			
Revenues	\$13,843	\$12,876	\$11,821
Benefits and expenses	12,599	11,864	10,890
Adjusted operating income	1,244	1,012	931
Realized investment gains (losses), net, and related adjustments	(62)	(281)	255
Related charges	(90)	(272)	(1)
Investment gains (losses) on trading account assets supporting insurance liabilities, net	118	(21)	(581)
Change in experience-rated contractholder liabilities due to asset value changes	67	25	490
Income (loss) before income taxes and equity in earnings of operating joint ventures	\$1,277	\$463	\$1,094

(1) Certain of our Retirement segment's non-U.S. dollar-denominated earnings are from longevity reinsurance contracts, which are denominated in British pounds sterling, and are therefore subject to foreign currency exchange rate risk. Effective January 1, 2016, the financial results of our Retirement segment include the impact of an intercompany arrangement with our Corporate and Other operations designed to mitigate the impact of exchange rate changes on the segment's U.S. dollar-equivalent earnings. For more information related to this intercompany arrangement, see "—Results of Operations—Impact of Foreign Currency Exchange Rates," above.

Adjusted Operating Income

2017 to 2016 Annual Comparison. Adjusted operating income increased \$232 million. Results for 2017 and 2016 reflected a net charge of \$20 million and a net benefit of \$6 million, respectively, from our annual reviews and update of assumptions and other refinements. Excluding this unfavorable comparative impact, adjusted operating income increased \$258 million, primarily driven by higher net investment spread results, a higher contribution from reserve experience and higher fee income. The increase in net investment spread results primarily reflected higher income on non-coupon investments, higher invested assets and net prepayment fee income, partially offset by lower reinvestment rates net of crediting rate actions on full service general account stable value products. The higher contribution from reserve experience primarily reflected higher mortality gains on a comparative basis for existing contracts and growth in our pension risk transfer business. Higher fee income primarily reflected growth in full service average account values driven by market appreciation.

2016 to 2015 Annual Comparison. Adjusted operating income increased \$81 million. Results for 2016 reflected a net benefit of \$6 million from our annual review and update of assumptions and other refinements, driven by favorable updates to actuarial assumptions, while results for 2015 reflected no net impact from our annual review and update of assumptions. Excluding this favorable comparative impact, adjusted operating income increased \$74 million, primarily driven by higher net investment spread results, partially offset by a lower contribution from reserve experience, higher general and administrative expenses, net of capitalization, and lower fee income. The increase in net investment spread results primarily reflected higher net prepayment fee income, higher invested assets and income on non-coupon investments, partially offset by lower reinvestment rates net of crediting rate reductions on full service general account stable value products. The lower contribution from reserve experience primarily reflected lower mortality gains on a comparative basis for pension risk transfer contracts. The increase in general and administrative expenses, net of capitalization, was primarily driven by increased legal costs. The decrease in fee income primarily reflected lower margins on full service account values. This decrease was partially offset by growth in average account values and an increase in per participant fee charges.

Revenues, Benefits and Expenses

2017 to 2016 Annual Comparison. Revenues increased \$967 million. Premiums increased \$699 million, primarily driven by new pension risk transfer transactions. This increase in premiums resulted in a corresponding increase in policyholders' benefits, as discussed below. Net investment income increased \$219 million, primarily reflecting higher income on non-coupon investments and higher invested assets, partially offset by lower reinvestment rates. Policy charges and fee income, asset management and service fees and other income increased \$49 million, primarily driven by higher fee income from growth in full service average account values driven by market appreciation.

Benefits and expenses increased \$735 million. Excluding the impact of our annual reviews and update of assumptions and other refinements, as discussed above, benefits and expenses increased \$709 million. Policyholders' benefits, including the change in policy reserves, increased \$705 million, primarily related to the increase in premiums discussed above.

Table of Contents

2016 to 2015 Annual Comparison. Revenues increased \$1,055 million. Premiums increased \$851 million primarily driven by pension risk transfer transactions. This increase in premiums resulted in a corresponding increase in policyholders' benefits, as discussed in benefits and expenses below. Net investment income increased \$181 million, primarily reflecting higher invested assets, higher prepayment fee income and income on non-coupon investments, partially offset by lower reinvestment rates.

Benefits and expenses increased \$974 million. Excluding the impact of our annual review and update of assumptions, as discussed above, benefits and expenses increased \$981 million. Policyholders' benefits, including the change in policy reserves, increased \$968 million, primarily related to the increase in premiums discussed above. Interest credited to policyholders' account balances increased \$32 million, primarily driven by higher prepayment fee income credited to experience rated account balances and growth in account values as discussed below, partially offset by the impact of crediting rate reductions on full service general account stable value account values.

Account Values

Account values are a significant driver of our operating results, and are primarily driven by net additions (withdrawals) and the impact of market changes. The income we earn on most of our fee-based products varies in part with the level of fee-based account values, since many policy fees are determined by these values. The investment income and interest we credit to policyholders on our spread-based products varies with the level of general account values. To a lesser extent, changes in account values impact our pattern of amortization of DAC and VOBA and general and administrative expenses. The following table shows the changes in the account values and net additions (withdrawals) of Retirement segment products for the periods indicated. Net additions (withdrawals) are plan sales and participant deposits or additions, as applicable, minus plan and participant withdrawals and benefits. Account values include both internally- and externally-managed client balances as the total balances drive revenue for the Retirement segment. For more information on internally-managed balances, see "—Investment Management."

Additions(1)	21,630	16,140	15,572
Withdrawals and benefits	(17,406)	(12,161)	(15,388)
Change in market value, interest credited and interest income	5,190	5,299	3,476
Other(2)	1,702	(5,866)	(3,337)
Ending total account value	\$194,492	\$183,376	\$179,964
Net additions (withdrawals)	\$4,224	\$3,979	\$184

_____ Additions primarily include: group annuities calculated based on premiums received; longevity reinsurance (1) contracts calculated as the present value of future projected benefits; and investment-only stable value contracts calculated as the fair value of customers' funds held in a client-owned trust.

(2)

“Other” activity includes the effect of foreign exchange rate changes associated with our U.K. longevity reinsurance business and changes in asset balances for externally-managed accounts. For the years ended December 31, 2017 and 2016, “other” activity also includes \$4,782 million in receipts offset by \$4,375 million in payments and \$2,914 million in receipts offset by \$2,364 million in payments, respectively, related to funding agreements backed by commercial paper which typically have maturities of less than 90 days.

2017 to 2016 Annual Comparison. The increase in full service account values primarily reflected the favorable changes in the market value of customer funds and the addition of a significant defined contribution transaction. The increase in net additions was primarily driven by higher large plan sales, partially offset by higher large plan lapses.

The increase in institutional investment products account values primarily reflected net additions from pension risk transfer transactions, interest credited on customer funds and the impact from foreign currency fluctuations on longevity reinsurance account values, partially offset by net withdrawals from investment-only stable value accounts. The increase in net additions was primarily driven by greater net additions related to pension risk transfer transactions, partially offset by investment-only stable value accounts, which reflected net withdrawals in 2017 compared to net additions in 2016.

Table of Contents

2016 to 2015 Annual Comparison. The increase in full service account values primarily reflected the favorable changes in the market value of customer funds. The decrease in net additions was primarily driven by lower large plan sales. This decrease was partially offset by lower plan lapses, as well as net participant deposits in 2016 compared to net participant withdrawals in 2015.

The increase in institutional investment products account values primarily reflected net additions resulting from investment-only stable value accounts and pension risk transfer transactions. The increase in net additions was primarily driven by investment-only stable value accounts, which reflected net additions in 2016 compared to net withdrawals in 2015. This increase was partially offset by less net additions related to pension risk transfer transactions in 2016 as compared to 2015 and a bank-owned life insurance stable value transaction in 2015.

Group Insurance

Operating Results

The following table sets forth the Group Insurance segment's operating results and benefits and administrative operating expense ratios for the periods indicated.

	Year ended December 31,		2016		2015	
	2017					
	(in millions)					
Operating results:						
Revenues	\$	5,471	\$	5,343	\$	5,143
Benefits and expenses		5,218		5,123		4,967
Adjusted operating income		253		220		176
Realized investment gains (losses), net, and related adjustments	(53)	(8)	(1)
Related charges	0		(6)	(4)
Income before income taxes and equity in earnings of operating joint ventures	\$	200	\$	206	\$	171
Benefits ratio(1):						
Group life(2)	88.9	%	89.1	%	88.7	%
Group disability(2)	71.8	%	75.7	%	75.7	%
Total group insurance(2)	85.8	%	86.7	%	86.6	%
Administrative operating expense ratio(3):						
Group life	11.2	%	10.6	%	11.0	%
Group disability	29.4	%	31.4	%	34.1	%
	14.6	%	14.3	%	15.0	%

Total group
insurance

(1) Ratio of policyholder benefits to earned premiums, policy charges and fee income.

Benefits ratios reflect the impacts of our annual reviews and updates of assumptions and other refinements.

(2) Excluding these impacts, the group life, group disability and total group insurance benefits ratios were 88.7%, 78.9% and 86.9% for 2017, respectively, 88.5%, 82.9% and 87.5% for 2016, respectively, and 89.2%, 79.2% and 87.5% for 2015, respectively.

(3) Ratio of general and administrative expenses (excluding commissions) to gross premiums plus policy charges and fee income.

Adjusted Operating Income

2017 to 2016 Annual Comparison. Adjusted operating income increased \$33 million, including favorable comparative net impacts from our annual reviews and update of assumptions and other refinements. Results for 2017 included a \$55 million net benefit from these updates while results for 2016 included a \$41 million net benefit. The net benefit in both periods was primarily driven by favorable experience related to our group disability business. Excluding the effect of these items, adjusted operating income increased \$19 million, primarily reflecting favorable underwriting results in our group disability business and a higher contribution from net investment spread results, partially offset by higher expenses. The underwriting results in our group disability business reflect increased new business and favorable claim experience, while the underwriting results in our group life business remained relatively flat in comparison to the prior year period.

Table of Contents

2016 to 2015 Annual Comparison. Adjusted operating income increased \$44 million, primarily reflecting favorable comparative net impacts from our annual reviews and update of assumptions and other refinements. Results for 2016 included a \$41 million net benefit from these updates, while results for 2015 included a \$28 million net benefit. Excluding the effect of these items, adjusted operating income increased \$30 million primarily reflecting more favorable underwriting results in our group life business, a higher contribution from net investment spread results, and lower expenses, partially offset by less favorable underwriting results in our group disability business. The underwriting results in our group life business reflected a favorable impact from a reserve refinement and more favorable experience, while the underwriting results in our group disability business reflected the impact of lower claim resolutions on long-term contracts and higher benefits resulting from other claims-related charges, partially offset by the impacts of fewer new claims and increased new business.

Revenues, Benefits and Expenses

2017 to 2016 Annual Comparison. Revenues increased \$128 million. Excluding an unfavorable comparative impact of \$37 million resulting from our annual reviews and update of assumptions and other refinements, revenues increased \$165 million. The increase reflected \$135 million of higher premiums and policy charges and fee income, primarily driven by the increase in new business in both our group life and group disability businesses, as well as higher premiums on experience-rated contracts in our group life business with corresponding offsets in benefits and expenses. Net investment income increased \$29 million primarily driven by higher income from non-coupon investments.

Benefits and expenses increased \$95 million. Excluding a favorable comparative impact of \$51 million resulting from our annual reviews and update of assumptions and other refinements, benefits and expenses increased \$146 million. This increase primarily reflected higher policyholders' benefits and changes in reserves, driven by higher benefits on group life experience-rated contracts, as discussed above, higher benefit payments in our group disability business and our non-experience rated group life contracts, and higher general and administrative expenses.

2016 to 2015 Annual Comparison. Revenues increased \$200 million. Excluding a favorable comparative impact of \$42 million resulting from our annual reviews and update of assumptions and other refinements, revenues increased \$158 million. The increase reflected \$140 million of higher premiums and policy charges and fee income primarily driven by the increase in new business in both our group life and group disability businesses, as well as higher premiums on existing experience-rated contracts in our group life business. Net investment income increased \$21 million driven by higher prepayment income and income from non-coupon investments.

Benefits and expenses increased \$156 million. Excluding an unfavorable comparative impact of \$29 million resulting from our annual review and update of assumptions and other refinements, benefits and expenses increased \$127 million. Policyholders' benefits, including the change in reserves, increased \$120 million, driven by the impact of new business for both our group life and group disability businesses, the impact of lower claim resolutions on long-term contracts in our group disability business, and higher benefits on existing experience-rated contracts in our group life business, partially offset by a decrease in general and administrative expenses.

Sales Results

The following table sets forth the Group Insurance segment's annualized new business premiums, as defined under "—Segment Measures" above, for the periods indicated.

	Year ended December 31,		
	2017	2016	2015

(in millions)

Annualized new business premiums(1):

Group life	\$ 287	\$ 316	\$ 204
Group disability	153	119	69
Total	\$ 440	\$ 435	\$ 273

Amounts exclude new premiums resulting from rate changes on existing policies, from additional coverage under (1) our Servicemembers' Group Life Insurance contract and from excess premiums on group universal life insurance that build cash value but do not purchase face amounts.

2017 to 2016 Annual Comparison. Total annualized new business premiums increased \$5 million primarily driven by sales to new clients in our group disability business, partially offset by lower sales in our group life business, which included a large client sale in 2016.

Table of Contents

2016 to 2015 Annual Comparison. Total annualized new business premiums increased \$162 million as we continued to grow through sales to new and existing clients in both our group disability business and our group life business, which included a large client sale in 2016, while maintaining pricing and underwriting discipline.

Investment Management Division

Investment Management

Operating Results

The following table sets forth the Investment Management segment's operating results for the periods indicated.

	Year ended December 31,		
	2017	2016	2015
	(in millions)		
Operating results(1):			
Revenues	\$3,355	\$2,961	\$2,944
Expenses	2,376	2,174	2,165
Adjusted operating income	979	787	779
Realized investment gains (losses), net, and related adjustments	(4)	(6)	(4)
Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests	95	45	50
Income (loss) before income taxes and equity in earnings of operating joint ventures	\$1,070	\$826	\$825

Certain of our Investment Management segment's investment activities are based in currencies other than the U.S. dollar and are therefore subject to foreign currency exchange rate risk. Effective January 1, 2016, the financial results of our Investment Management segment include the impact of an intercompany arrangement with our (1) Corporate and Other operations designed to mitigate the impact of exchange rate changes on the segment's U.S. dollar-equivalent earnings. For more information related to this intercompany arrangement, see "—Results of Operations—Impact of Foreign Currency Exchange Rates," above.

Adjusted Operating Income

2017 to 2016 Annual Comparison. Adjusted operating income increased \$192 million. The increase primarily reflected higher asset management fees, net of related expenses, driven by an increase in average assets under management as a result of net fixed income inflows, market appreciation, and a favorable fee rate modification within certain real estate funds that occurred in the third quarter of 2016. Also contributing to the increase were higher other related revenues, net of associated expenses, driven by higher strategic investing results due to favorable investment performance, higher net performance-based incentive fees, and an increase in commercial mortgage agency loan originations. These increases were partially offset by higher expenses.

2016 to 2015 Annual Comparison. Adjusted operating income increased \$8 million. The increase primarily reflected higher asset management fees, net of related expenses, driven by an increase in average fixed income assets under management as a result of net inflows, market appreciation, and a favorable fee rate modification within certain real estate funds that occurred in the third quarter of 2016, partially offset by a decline in average equity assets under management as a result of net outflows and market volatility experienced in the first half of 2016. The increase was also partially offset by lower other related revenues, net of associated expenses, primarily related to lower strategic investing results and lower equity fund-related incentive fees, net of expenses.

Revenues and Expenses

The following table sets forth the Investment Management segment's revenues, presented on a basis consistent with the table above under "—Operating Results," by type.

82

Table of Contents

	Year ended December 31,		
	2017	2016	2015
	(in millions)		
Revenues by type:			
Asset management fees by source:			
Institutional customers	\$ 1,147	\$ 1,046	\$ 923
Retail customers(1)	800	707	764
General account	470	474	448
Total asset management fees	2,417	2,227	2,135
Other related revenues by source:			
Incentive fees	197	108	88
Transaction fees	27	19	20
Strategic investing	88	25	30
Commercial mortgage(2)	127	103	103
Total other related revenues(3)	439	255	241
Service, distribution and other revenues(4)	499	479	568
Total revenues	\$ 3,355	\$ 2,961	\$ 2,944

(1) Consists of fees from: individual mutual funds and variable annuities and variable life insurance separate account assets; funds invested in proprietary mutual funds through our defined contribution plan products; and third-party sub-advisory relationships. Revenues from fixed annuities and the fixed-rate accounts of variable annuities and variable life insurance are included in the general account.

(2) Includes mortgage origination and spread lending revenues from our commercial mortgage origination and servicing business.

(3) Future revenues will be impacted by the level and diversification of our strategic investments, the commercial real estate market, and other domestic and international markets.

(4) Includes payments from Wells Fargo under an agreement dated as of July 30, 2004, implementing arrangements with respect to money market mutual funds in connection with the combination of our retail securities brokerage and clearing operations with those of Wells Fargo. The agreement extends for ten years after termination of the Wachovia Securities joint venture, which occurred on December 31, 2009. The revenue from Wells Fargo under this agreement was \$80 million in 2017, \$84 million in 2016 and \$78 million in 2015.

2017 to 2016 Annual Comparison. Revenues increased \$394 million. Total asset management fees increased \$190 million primarily as a result of net inflows within fixed income, market appreciation, and the impact of a favorable fee rate modification within certain real estate funds. Other related revenues increased \$184 million primarily due to an increase in gross performance-based incentive fees related to certain fixed income funds, higher strategic investing results driven by favorable investment performance, and an increase in commercial mortgage agency loan originations. Service, distribution and other revenues increased \$20 million reflecting higher net investment income and other revenue related to certain consolidated funds.

Expenses increased \$202 million, primarily reflecting higher compensation attributable to higher earnings, as well as an increase in non-compensation related expenses.

2016 to 2015 Annual Comparison. Revenues increased \$17 million. Total asset management fees increased \$92 million, primarily as a result of net inflows and market appreciation within fixed income as well as from a favorable fee rate modification within certain real estate funds that occurred in the third quarter of 2016. Other related revenues increased \$14 million, primarily due to higher performance-based incentive fees related to certain fixed income hedge funds. Partially offsetting these increases was an \$89 million decrease in service, distribution and other revenues reflecting lower service and other fees as well as the deconsolidation of certain collateralized loan obligations.

Expenses increased \$9 million, as a result of business growth, higher compensation related to favorable fixed income results and higher performance-based incentive fees (included in noncontrolling interest), partially offset by the deconsolidation of certain funds, as discussed above.

Assets Under Management

The following table sets forth assets under management by asset class and source as of the dates indicated.

83

Table of Contents

	December 31,		
	2017	2016	2015
	(in billions)		
Assets Under Management (at fair value):			
Institutional customers:			
Equity	\$68.0	\$59.3	\$59.9
Fixed income	379.4	332.2	289.9
Real estate	42.1	40.0	39.3
Institutional customers(1)	489.5	431.5	389.1
Retail customers:			
Equity	132.4	112.4	121.4
Fixed income	111.5	94.5	73.7
Real estate	1.7	2.3	2.2

Ending assets under management	\$489.5	\$431.5	\$389.1
Retail Customers:			
Beginning assets under management	\$209.2	\$197.3	\$186.1
Net additions (withdrawals), excluding money market activity:			
Third-party	4.1	0.4	0.8
Third-party via affiliates(1)	(2.0)	(0.5)	9.2
Total	2.1	(0.1)	10.0
Market appreciation (depreciation)(2)	34.6	9.1	1.4
Other increases (decreases)(3)	(0.3)	2.9	(0.2)
Ending assets under management	\$245.6	\$209.2	\$197.3
General Account:			
Beginning assets under management	\$399.4	\$376.7	\$377.4
Net additions (withdrawals), excluding money market activity:			
Third-party	0.0	0.0	0.0
Affiliated	3.9	8.9	(1.1)
Total	3.9	8.9	(1.1)
Market appreciation (depreciation)(2)	15.1	13.3	(1.5)
Other increases (decreases)(3)	1.8	0.5	1.9
Ending assets under management	\$420.2	\$399.4	\$376.7

Represents assets that our Investment Management segment manages for the benefit of other reporting segments (1) within the Company. Additions and withdrawals of these assets are attributable to third-party product inflows and outflows in other reporting segments.

(2) Includes income reinvestment, where applicable.

Includes the effect of foreign exchange rate changes, net money market activity primarily related to cash collateral received or released in conjunction with our Annuities' living benefits hedging program, and the impact of acquired (3) business. The impact from foreign currency fluctuations, which primarily impact the general account, resulted in gains of \$4.7 billion, gains of \$2.7 billion and losses of \$1.7 billion for the years ended December 31, 2017, 2016 and 2015, respectively.

Strategic Investments

The following table sets forth the strategic investments of the Investment Management segment at carrying value (including the value of derivative instruments used to mitigate equity market and currency risk) by asset class and source as of the dates indicated.

Table of Contents

	December 31,	
	2017	2016
	(in millions)	
Co-Investments:		
Real estate	\$ 185	\$ 165
Fixed income	584	218
Seed Investments:		
Real estate	50	46
Public equity	658	441
Fixed income	309	279
Total	\$ 1,786	\$ 1,149

The increase in strategic investments was primarily driven by a higher level of investment in collateralized loan obligations and the funding of new mutual funds.

International Insurance Division

International Insurance

Operating Results

The results of our International Insurance operations are translated on the basis of weighted average monthly exchange rates, inclusive of the effects of the intercompany arrangement discussed in “—Results of Operations—Impact of Foreign Currency Exchange Rates” above. To provide a better understanding of operating performance within the International Insurance segment, where indicated below, we have analyzed our results of operations excluding the effect of the year over year change in foreign currency exchange rates. Our results of operations, excluding the effect of foreign currency fluctuations, were derived by translating foreign currencies to U.S. dollars at uniform exchange rates for all periods presented, including for constant dollar information discussed below. The exchange rates used were Japanese yen at a rate of 112 yen per U.S. dollar and Korean won at a rate of 1130 won per U.S. dollar, both of which were determined in connection with the foreign currency income hedging program discussed in “—Results of Operations—Impact of Foreign Currency Exchange Rates” above. In addition, for constant dollar information discussed below, activity denominated in U.S. dollars is generally reported based on the amounts as transacted in U.S. dollars. Annualized new business premiums presented on a constant exchange rate basis in the “Sales Results” section below reflect translation based on these same uniform exchange rates.

The following table sets forth the International Insurance segment’s operating results for the periods indicated.

Table of Contents

	Year ended December 31,		
	2017	2016	2015
	(in millions)		
Operating results:			
Revenues:			
Life Planner operations	\$10,644	\$9,986	\$9,172
Gibraltar Life and Other operations	10,916	11,023	10,192
Total revenues	21,560	21,009	19,364
Benefits and expenses:			
Life Planner operations	9,151	8,447	7,587
Gibraltar Life and Other operations	9,211	9,445	8,551
Total benefits and expenses	18,362	17,892	16,138

Life Planner operations	1,493	1,539	1,585
Gibraltar Life and Other operations	1,705	1,578	1,641
Total adjusted operating income	3,198	3,117	3,226
Realized investment gains (losses), net, and related adjustments	985	992	1,215
Related charges	(18)	(32)	(60)
Investment gains (losses) on trading account assets supporting insurance liabilities, net	218	4	57
Change in experience-rated contractholder liabilities due to asset value changes	(218)	(4)	(57)
Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests	(43)	(47)	8
Income (loss) before income taxes and equity in earnings of operating joint ventures	\$4,122	\$4,030	\$4,389

Adjusted Operating Income

2017 to 2016 Annual Comparison. Adjusted operating income from our Life Planner operations decreased \$46 million including a net unfavorable impact of \$32 million from currency fluctuations, inclusive of the currency hedging program discussed above. Both periods also include the impact of our annual reviews and update of assumptions and other refinements, which resulted in a \$67 million net charge in 2017, including impacts from unfavorable economic assumption updates driven by a lower long-term interest rate assumption in Japan, compared to a \$38 million net charge in 2016.

Excluding the effect of these items, adjusted operating income increased \$15 million, primarily reflecting the growth of business in force in our Japan and Brazil operations, improved policyholder experience, and a higher contribution from net investment results, primarily from higher income on non-coupon investments and higher net prepayment fee income, partially offset by lower reinvestment rates. These favorable impacts were partially offset by higher expenses, including legal costs and expenses supporting business growth.

Adjusted operating income from our Gibraltar Life and Other operations increased \$127 million including a net unfavorable impact of \$8 million from currency fluctuations, inclusive of the currency hedging program discussed above. Both periods also include the impact of our annual reviews and update of assumptions and other refinements, which resulted in a \$21 million net benefit in 2017 compared to a \$34 million net charge in 2016.

Excluding the effect of these items, adjusted operating income increased \$80 million, primarily reflecting the growth of business in force, including higher earnings from our indirect investment in AFP Habitat which reflected twelve months of income in the current year compared to ten months of income in the prior year, improved policyholder experience and more favorable comparative mortality experience. These favorable impacts were partially offset by the

absence of a gain on the sale of a home office property in Japan in the prior year.

2016 to 2015 Annual Comparison. Adjusted operating income from our Life Planner operations decreased \$46 million including a net unfavorable impact of \$97 million from currency fluctuations, inclusive of the currency hedging program discussed above. Both periods included the impact of our annual reviews and updates of assumptions and other refinements, which resulted in a \$38 million net charge in 2016, including unfavorable economic assumption updates driven by lower interest rates in Japan and Korea, compared to an \$11 million net charge in 2015.

Table of Contents

Excluding the effect of these items, adjusted operating income increased \$78 million, primarily reflecting the growth of business in force and continued strong persistency in Japan, and a larger contribution from non-coupon investments. These favorable impacts were partially offset by higher expenses, including those supporting business growth, and less favorable comparative mortality experience.

Adjusted operating income from our Gibraltar Life and Other operations decreased \$63 million including a net unfavorable impact of \$169 million from currency fluctuations, inclusive of the currency hedging program discussed above. Both periods included the impact of our annual reviews and updates of assumptions and other refinements which resulted in a \$34 million net charge in 2016, including unfavorable economic assumption updates driven by lower interest rates in Japan, compared to a \$10 million net charge in 2015.

Excluding the effect of these items, adjusted operating income increased \$130 million as the growth of business in force, including the contribution from the Company's investment in AFP Habitat in Chile in March of 2016, more favorable comparative mortality experience and lower net expenses, including a gain on the sale of a home office property in Japan, were partially offset by a lower contribution from net investment spreads, primarily from lower income on non-coupon investments.

Revenues, Benefits and Expenses

2017 to 2016 Annual Comparison. Revenues from our Life Planner operations increased \$658 million including a net unfavorable impact of \$55 million from currency fluctuations and a net benefit of \$15 million from our annual reviews and update of assumptions and other refinements. Excluding these items, revenues increased \$698 million. This increase was primarily driven by higher premiums and policy charges and fee income of \$518 million related to growth of business in force, as discussed above. Net investment income increased \$167 million primarily reflecting higher income on non-coupon investments and higher net prepayment fee income, partially offset by lower reinvestment rates.

Benefits and expenses from our Life Planner operations increased \$704 million including a net favorable impact of \$23 million from currency fluctuations and a net charge of \$44 million from our annual reviews and update of assumptions and other refinements. Excluding these items, benefits and expenses increased \$683 million. Policyholder benefits, including changes in reserves, increased \$427 million primarily driven by business growth. General and administrative expenses, net of capitalization, increased \$201 million primarily due to higher operating expenses, including legal costs and expenses supporting business growth.

Revenues from our Gibraltar Life and Other operations decreased \$107 million, including a net unfavorable impact of \$166 million from currency fluctuations and a net benefit of \$13 million from our annual reviews and update of assumptions and other refinements. Excluding these items, revenues increased \$46 million. This increase was primarily driven by higher premiums and policy charges and fee income related to the growth of business in force, as discussed above, and higher net investment income.

Benefits and expenses from our Gibraltar Life and Other operations decreased \$234 million including a net favorable impact of \$158 million from currency fluctuations and a net benefit of \$42 million from our annual reviews and update of assumptions and other refinements. Excluding these items, benefits and expenses decreased \$34 million, driven by a decrease in policyholder benefits, including changes in reserves, related to improved policyholder experience and more favorable comparative mortality experience, as discussed above.

2016 to 2015 Annual Comparison. Revenues from our Life Planner operations increased \$814 million including a net favorable impact of \$287 million from currency fluctuations. Excluding the impact of currency fluctuations, revenues increased \$527 million. This increase was primarily driven by higher premiums and policy charges and fee income of

\$372 million related to growth of business in force. Net investment income increased \$152 million primarily reflecting investment portfolio growth related to the growth of business in force, partially offset by the impact of lower reinvestment rates.

Benefits and expenses from our Life Planner operations increased \$860 million including a net unfavorable impact of \$384 million from currency fluctuations. Excluding the impact of currency fluctuations, benefits and expenses increased \$476 million. Policyholder benefits, including changes in reserves, increased \$370 million primarily driven by business growth. General and administrative expenses, net of capitalization, increased \$76 million primarily due to higher costs, including those supporting business growth.

Revenues from our Gibraltar Life and Other operations increased \$831 million, including a net favorable impact of \$321 million from currency fluctuations. Excluding the impact of currency fluctuations, revenues increased \$510 million, driven by a \$228 million increase in premiums and policy charges and fee income due to business growth, and an \$118 million increase in net investment income primarily reflecting investment portfolio growth related to the growth of business in force, partially offset by lower investment spread income, and the gain on the sale of a home office property in Japan.

Table of Contents

Benefits and expenses from our Gibraltar Life and Other operations increased \$894 million including a net unfavorable impact of \$490 million from currency fluctuations. Excluding the impact of currency fluctuations, benefits and expenses increased \$404 million, primarily reflecting a \$371 million increase in policyholder benefits, including changes in reserves, related to business growth and \$10 million in general and administrative expenses, net of capitalization, due to higher costs, including those supporting business growth.

Sales Results

The following table sets forth annualized new business premiums, as defined under “—Results of Operations—Segment Measures” above, on an actual and constant exchange rate basis for the periods indicated.

	Year ended December 31,		
	2017	2016	2015
	(in millions)		
Annualized new business premiums:			
On an actual exchange rate basis:			
Life Planner operations(1)	\$1,391	\$1,276	\$1,117
Gibraltar Life	1,598	1,726	1,548
Total	\$2,989	\$3,002	\$2,665
On a constant exchange rate basis:			
Life Planner operations	\$1,374	\$1,263	\$1,147
Gibraltar Life	1,601	1,706	1,595
Total	\$2,975	\$2,969	\$2,742

(1)The amount for the year ended December 31, 2016 has been revised to correct the previously reported amount.

The amount of annualized new business premiums and the sales mix in terms of types and currency denomination of products for any given period can be significantly impacted by several factors, including but not limited to: the addition of new products, discontinuation of existing products, changes in credited interest rates for certain products and other product modifications, changes in premium rates, changes in interest rates or fluctuations in currency markets (as described below), changes in tax laws, changes in life insurance regulations or changes in the competitive environment. Sales volume may increase or decrease prior to certain of these changes becoming effective, and then fluctuate in the other direction following such changes.

Our diverse product portfolio in Japan, in terms of currency mix and premium payment structure, allows us to adapt to changing market and competitive dynamics, including the extremely low interest rate environment. We regularly examine our product offerings and their related profitability and, as a result, we have repriced or discontinued sales of certain products that do not meet our profit expectations. The impact of these actions, coupled with the introduction of certain new products, has generally resulted in an increase in sales of products denominated in U.S. dollars relative to products denominated in other currencies.

2017 to 2016 Annual Comparison. The table below presents annualized new business premiums on a constant exchange rate basis, by product and distribution channel, for the periods indicated.

(1) Includes retirement income, endowment and savings variable universal life.

Table of Contents

Single pay life annualized new business premiums, which include 10% of first year premiums, and 3-year limited pay annualized new business premiums, which include 100% of new business premiums, represented 5% and 64%, (2) respectively, of total Japanese bank distribution channel annualized new business premiums, excluding annuity products, for the year ended December 31, 2017, and 9% and 53%, respectively, of total Japanese bank distribution channel annualized new business premiums, excluding annuity products, for the year ended December 31, 2016.

Annualized new business premiums, on a constant exchange rate basis, from our Life Planner operations increased \$111 million. Growth in Life Planner headcount in our Japan operation resulted in an increase in U.S. dollar-denominated whole life and retirement products and yen-denominated term life and retirement products. The increase also reflected higher sales in our Brazil operations across various product lines as Life Planner count continued to grow.

Annualized new business premiums, on a constant exchange rate basis, from our Gibraltar Life operations decreased \$105 million. Life Consultant sales increased \$8 million primarily from higher sales of U.S. dollar-denominated whole life products resulting from the introduction of a new recurring pay life product in the second quarter of 2017. This increase was partially offset by lower sales of yen-denominated whole life and term life products. Bank channel sales decreased \$102 million primarily from lower sales of yen-denominated term life and whole life products following the premium rate increases on yen-based products in April of 2017, the suspension of sales of yen-denominated annuity products in April 2016 in response to the low interest rate environment and lower sales of U.S. dollar- and Australian dollar-denominated annuity products due to increased competition and product actions. This decrease was partially offset by higher sales of U.S. dollar-denominated whole life products. Independent Agency sales decreased \$11 million primarily reflecting lower sales of yen-denominated whole life and term life products after the April 2017 repricing and lower sales of Australian dollar-denominated annuity products. The decrease was partially offset by higher sales of U.S. dollar-denominated whole life products.

2016 to 2015 Annual Comparison. The table below presents annualized new business premiums on a constant exchange rate basis, by product and distribution channel, for the periods indicated.

	Year Ended December 31, 2016					Year Ended December 31, 2015				
	Life	Accident & Health	Retirement (1)	Annuity	Total	Life	Accident & Health	Retirement (1)	Annuity	Total
	(in millions)									
Life Planner	742	114	332	75	1,263	708	114	264	61	1,147
Gibraltar Life:										
Life Consultants	352	52	117	212	733	331	58	126	140	655
Banks(2)	518	0	68	130	716	472	1	40	180	693
Independent Agency	128	23	71	35	257	98	22	69	58	247
Subtotal	998	75	256	377	1,706	901	81	235	378	1,595
Total	1,740	189	588	452	2,969	1,609	195	499	439	2,742

(1) Includes retirement income, endowment and savings variable universal life.

Single pay life annualized new business premiums, which include 10% of first year premiums, and 3-year limited pay annualized new business premiums, which include 100% of new business premiums, represented 9% and 53%, (2) respectively, of total Japanese bank distribution channel annualized new business premiums, excluding annuity products, for the year ended December 31, 2016, and 5% and 51%, respectively, of total Japanese bank distribution channel annualized new business premiums, excluding annuity products, for the year ended December 31, 2015.

Annualized new business premiums, on a constant exchange rate basis, from our Life Planner operations increased \$116 million. Growth in Life Planner headcount and productivity in our Japan operation, coupled with the factors described above, resulted in an increase in sales of U.S. dollar-denominated retirement and whole life products while sales of yen-denominated term life products remained strong in the corporate market. Lower sales of life protection products in our Korean operation reflecting pricing actions were partially offset by higher sales in our Brazilian operation across various product lines as Life Planner count and average premiums continued to grow.

Annualized new business premiums, on a constant exchange rate basis, from our Gibraltar Life operations increased \$111 million. Life Consultant sales increased \$78 million as higher sales of U.S. dollar-denominated annuity and whole life products were partially offset by lower sales of yen-denominated life protection products and Australian dollar-denominated annuity and retirement income products. Bank channel sales increased \$23 million primarily driven by higher sales of U.S. dollar-denominated whole life, retirement income and annuity products, partially offset by lower sales of yen-denominated whole life and annuity products and Australian dollar-denominated annuity products. Independent Agency sales increased \$10 million as higher sales of U.S. dollar-denominated whole life and retirement income products were partially offset by lower sales of Australian dollar-denominated annuity products and yen-denominated retirement and annuity products.

Table of Contents

Sales Force

The following table sets forth the number of Life Planners and Life Consultants for the periods indicated.

	As of December 31,		
	2017	2016	2015
Life Planners:			
Japan	3,941	3,824	3,528
All other countries	3,890	3,856	4,064
Gibraltar Life Consultants	8,326	8,884	8,805
Total	16,157	16,564	16,397

2017 to 2016 Comparison. The number of Life Planners increased by 151, driven by an increase of 117 in Japan as a result of improved recruiting efforts and fewer terminations. Life Planners increased by 34 in other operations, primarily in Brazil as a result of improved recruiting efforts, partially offset by a decrease in Korea and Taiwan as a result of more selective recruiting efforts.

The number of Gibraltar Life Consultants decreased by 558, primarily reflecting more selective recruiting efforts and retention standards.

2016 to 2015 Comparison. The number of Life Planners increased by 88, driven by an increase of 296 in Japan as a result of improved recruiting efforts and fewer terminations. Life Planners decreased by 208 in other operations, primarily in Korea, Poland and Italy, as a result of more selective recruiting efforts and restructurings, partially offset by an increase in Brazil as a result of recruiting efforts.

The number of Gibraltar Life Consultants increased by 79, primarily reflecting fewer terminations.

Corporate and Other

Our Corporate and Other operations include corporate items and initiatives that are not allocated to business segments and businesses that have been or will be divested.

91

Table of Contents

2017 to 2016 Annual Comparison. The loss from Corporate and Other operations, on an adjusted operating income basis, decreased \$144 million. Results for investment income, net of operating debt interest expense, improved \$95 million, primarily reflecting lower operating debt interest expense, including efforts in 2016 to reduce leverage through senior debt maturities and early extinguishment of debt, and higher investment income, driven by the absence of a non-coupon investment loss incurred in the prior year and higher income on highly liquid assets. Net charges from other corporate activities decreased \$14 million, reflecting the absence of costs incurred in the prior year associated with the early extinguishment of certain debt, partially offset by increases in other corporate expenses, including higher costs for employee compensation plans tied to equity market and Company performance, and increased expenses related to corporate initiatives. Capital debt interest expense increased \$19 million, primarily resulting from a junior subordinated debt issuance in the third quarter of 2017.

Income from pension and employee benefits increased \$54 million, primarily reflecting higher income from our qualified pension plan, including higher expected earnings on plan assets and lower interest costs on plan obligations driven by a decline in interest rates in 2016.

For purposes of calculating pension income from our qualified pension plan for the year ended December 31, 2018, we will decrease the discount rate from 4.15% to 3.65% as of December 31, 2017. The expected rate of return on plan assets and the assumed rate of increase in compensation will remain unchanged at 6.25% and 4.50%, respectively. Giving effect to the foregoing assumptions and other factors, we expect income from our qualified pension plan in 2018 to be approximately \$45 million to \$50 million higher than 2017 levels. The increase is driven by higher expected returns on plan assets due to higher than expected plan fixed income asset growth in 2017 as well as lower interest costs on the plan obligation due to the lower discount rate.

For purposes of calculating postretirement benefit expenses for the year ended December 31, 2018, we will decrease the discount rate from 4.05% to 3.60% as of December 31, 2017. The expected rate of return on plan assets will remain unchanged at 7.00%. Giving effect to the foregoing assumptions and other factors, we expect postretirement benefit expenses in 2018 to be approximately \$30 million to \$40 million lower than 2017 levels. The decrease in expenses is driven by favorable census updates at December 31, 2017, and higher expected returns on plan assets due to higher than expected asset growth in 2017.

In 2018, pension and other postretirement benefit service costs related to active employees will continue to be allocated to our business segments. For further information regarding our pension and postretirement plans, see Note 18 to the Consolidated Financial Statements.

2016 to 2015 Annual Comparison. The loss from Corporate and Other operations, on an adjusted operating income basis, increased \$268 million. Net charges from other corporate activities increased \$175 million, primarily reflecting higher costs for employee compensation plans tied to Company stock and equity market returns, increased costs for enhanced regulatory supervision, costs associated with the early extinguishment of certain debt, higher legal costs, the absence of a favorable impact from escheatment related matters in the prior year and increased costs related to other corporate initiatives. The increased charges were partially offset by the absence of certain remediation costs incurred in the prior year. Results for investment income, net of operating debt interest expense, decreased \$68 million, primarily reflecting lower levels of invested assets resulting from assets transferred to other business segments and lower net investment income from non-coupon investments. This decrease was partially offset by lower operating debt interest expense resulting from efforts to reduce leverage through senior debt maturities in late 2015 and early 2016, and the early extinguishment of certain debt in the second quarter of 2016. Capital debt interest expense decreased \$45 million, primarily reflecting the reassignment of capital debt to operating debt and efforts to reduce leverage.

Income from pension and employee benefits decreased \$70 million, primarily reflecting lower income from our qualified pension plan, driven by lower expected returns on plan assets due to lower than expected plan fixed income

asset growth in 2015, as well as higher interest costs on the plan obligation due to a higher discount rate.

Capital Protection Framework

92

Table of Contents

“Realized investment gains (losses), net and related adjustments,” which are excluded from adjusted operating income, included net losses of \$154 million, \$1,649 million and \$673 million for the years ended December 31, 2017, 2016 and 2015, respectively, related to our Capital Protection Framework. The comparative variance between 2017 and the prior years is primarily attributed to changes in our Individual Annuities risk management strategy implemented in 2016, whereby we terminated the existing intercompany derivative transactions between Corporate and Other operations and the Individual Annuities business segment related to managing interest rate risk and we now manage this risk within the Individual Annuities business segment. The net losses in 2016 and 2015, while the intercompany derivative transactions between Corporate and Other operations and the Individual Annuities business segment were in place, primarily resulted from our utilization of capital management strategies to manage a portion of our interest rate risk, and reflect changes in interest rates with respect to the exposures outstanding during the respective periods. For more information on our Individual Annuities risk management strategy, see “—Individual Annuities.” For more information on our Capital Protection Framework, see “—Liquidity and Capital Resources—Capital Protection Framework.”

Divested Businesses

Divested Businesses Included in Corporate and Other

Our income includes results from several businesses that have been or will be sold or exited, including businesses that have been placed in wind down status that do not qualify for “discontinued operations” accounting treatment under U.S. GAAP. The results of these divested businesses are reflected in our Corporate and Other operations, but are excluded from adjusted operating income. A summary of the results of the divested businesses reflected in our Corporate and Other operations is as follows for the periods indicated:

	Year ended December 31,		
	2017	2016	2015
	(in millions)		
Long-Term Care	\$ 42	\$ (74)	\$ (67)
Other	(4)	(10)	1
Total divested businesses income (loss) excluded from adjusted operating income	\$ 38	\$ (84)	\$ (66)

Long-Term Care. Results for the year ended December 31, 2017 increased compared to 2016 primarily reflecting net realized investment gains in 2017 compared to net realized investment losses in 2016, driven by a favorable comparative change in the market value of derivatives used in duration management, and higher net investment income. These increases were partially offset by unfavorable policy experience. Results for the year ended December 31, 2016 decreased compared to 2015 primarily reflecting an increase in net realized investment losses, driven by the unfavorable comparative change in the market value of derivatives used in duration management. This decrease was partially offset by favorable policy experience and higher net investment income.

Closed Block Division

The Closed Block division includes certain in force traditional domestic participating life insurance and annuity products and assets that are used for the payment of benefits and policyholder dividends on these policies

(collectively, the “Closed Block”), as well as certain related assets and liabilities. We no longer offer these traditional domestic participating policies. See Note 12 to the Consolidated Financial Statements for additional details.

Each year, the Board of Directors of Prudential Insurance determines the dividends payable on participating policies for the following year based on the experience of the Closed Block, including investment income, net realized and unrealized investment gains, mortality experience and other factors. Although Closed Block experience for dividend action decisions is based upon statutory results, at the time the Closed Block was established, we developed, as required by U.S. GAAP, an actuarial calculation of the timing of the maximum future earnings from the policies included in the Closed Block. If actual cumulative earnings in any given period are greater than the cumulative earnings we expected, we record this excess as a policyholder dividend obligation. We will subsequently pay this excess to Closed Block policyholders as an additional dividend unless it is otherwise offset by future Closed Block performance that is less favorable than we originally expected. The policyholder dividends we charge to expense within the Closed Block division will include any change in our policyholder dividend obligation that we recognize for the excess of actual cumulative earnings in any given period over the cumulative earnings we expected in addition to the actual policyholder dividends declared by the Board of Directors of Prudential Insurance.

Table of Contents

As of December 31, 2017, the excess of actual cumulative earnings over the expected cumulative earnings was \$1,790 million, which was recorded as a policyholder dividend obligation. Actual cumulative earnings, as required by U.S. GAAP, reflect the recognition of realized investment gains and losses in the current period, as well as changes in assets and related liabilities that support the Closed Block policies. Additionally, the accumulation of net unrealized investment gains that have arisen subsequent to the establishment of the Closed Block have been reflected as a policyholder dividend obligation of \$3,656 million at December 31, 2017, to be paid to Closed Block policyholders unless offset by future experience, with a corresponding amount reported in AOCI.

Operating Results

The following table sets forth the Closed Block division's results for the periods indicated.

	Year ended December 31,		
	2017	2016	2015
	(in millions)		
U.S. GAAP results:			
Revenues	\$ 5,826	\$ 5,669	\$ 6,160
Benefits and expenses	5,781	5,801	6,102
Income (loss) before income taxes and equity in earnings of operating joint ventures	\$ 45	\$ (132)	\$ 58

Income (loss) Before Income Taxes and Equity in Earnings of Operating Joint Ventures

2017 to 2016 Annual Comparison. Income (loss) before income taxes and equity in earnings of operating joint ventures increased \$177 million. Results for 2017 primarily reflected a \$175 million increase in net realized investment gains and related activity, primarily due to higher gains from sales of equity securities and fixed maturities, partially offset by unfavorable changes in the value of derivatives used in risk management activities. Net insurance activity results increased \$92 million, primarily as a result of a decrease in the 2018 dividend scale, partially offset by the runoff of policies in force and higher benefit payments. Net investment income increased \$75 million, primarily driven by higher income on non-coupon investments and higher prepayment income, partially offset by lower reinvestment rates. As a result of the above and other variances, a \$143 million increase in the policyholder dividend obligation was recorded in 2017, compared to \$48 million reduction in 2016. If actual cumulative earnings fall below expected cumulative earnings in future periods, earnings volatility in the Closed Block division, which is primarily due to changes in investment results, may not be offset by changes in the cumulative earnings policyholder dividend obligation. For a discussion of Closed Block division realized investment gains (losses), net, see “—Realized Investment Gains and Losses.”

2016 to 2015 Annual Comparison. Income (loss) before income taxes and equity in earnings of operating joint ventures decreased \$190 million. Results for 2016 primarily reflected a \$399 million decrease in net realized investment gains, primarily due to lower gains on equity securities, lower gains from sales of fixed maturities and less favorable changes in the value of derivatives used in risk management activities. Net investment income decreased \$75 million, primarily due to lower returns on non-coupon investments and lower reinvestment rates, partially offset by higher prepayment fee income. Net insurance activity results increased \$35 million, primarily due to lower benefit payments. As a result of the above and other variances, a \$48 million reduction in the policyholder dividend obligation was recorded in 2016, compared to a \$137 million increase in 2015.

Revenues, Benefits and Expenses

2017 to 2016 Annual Comparison. Revenues increased \$157 million, primarily due to increases of \$100 million in net realized investment gains, \$75 million in other revenue and \$75 million in net investment income, as discussed above. Partially offsetting these increases was a decrease in premiums of \$94 million, primarily due to run off of policies in force.

Benefits and expenses decreased \$20 million. Policyholders' benefits, including changes in reserves, decreased \$63 million primarily due to the runoff of policies in force, as discussed above. Partially offsetting this decrease was an increase in dividends to policyholders of \$66 million, reflecting an increase in the policyholder dividend obligation expense due to changes in cumulative earnings.

2016 to 2015 Annual Comparison. Revenues decreased \$491 million, primarily due to a \$399 million decrease in net realized investment gains and a \$75 million decrease in net investment income, as discussed above.

Benefits and expenses decreased \$301 million, primarily due to a \$189 million decrease in dividends to policyholders, reflecting a decrease in the policyholder dividend obligation expense due to changes in cumulative earnings. In addition, policyholders' benefits, including changes in reserves, decreased \$83 million, primarily due to the runoff of policies in force.

Table of Contents

Income Taxes

The differences between income taxes expected at the U.S. federal statutory income tax rate of 35% and the reported income tax (benefit) expense are provided in the following table:

	Year Ended December 31,		
	2017	2016	2015
	(in millions)		
Expected federal income tax expense (benefit) at federal statutory rate	\$2,270	\$1,997	\$2,719
Non-taxable investment income	(369)	(352)	(341)
Foreign taxes at other than U.S. rate	(249)	(172)	(51)
Low-income housing and other tax credits	(126)	(118)	(116)
Changes in tax law	(2,858)	0	(108)
Other	(106)	(20)	(31)
Reported income tax expense (benefit)	\$(1,438)	\$1,335	\$2,072
Effective tax rate	(22.2)%	23.4 %	26.7 %

Effective Tax Rate

The effective tax rate is the ratio of “Total income tax expense (benefit)” divided by “Income before income taxes and equity in earnings of operating joint ventures.” Our effective tax rate for fiscal years 2017, 2016 and 2015 was (22.2)%, 23.4% and 26.7%, respectively. For a detailed description of the nature of each significant reconciling item, see Note 19 to the Consolidated Financial Statements. The decrease in the effective tax rate from 26.7% in 2015 to 23.4% in 2016 was primarily driven by a decrease in pre-tax net income. The decrease in the effective tax rate from 23.4% in 2016 to (22.2)% in 2017 was primarily driven by the impacts of the Tax Act of 2017 on the date of enactment. Going forward, we generally expect a lower future effective tax rate than we have reported in recent years. This reduction is primarily due to applying the lower corporate tax rate under the Tax Act of 2017 to our U.S. businesses’ earnings.

Unrecognized Tax Benefits

The Company’s liability for income taxes includes the liability for unrecognized tax benefits and interest that relate to tax years still subject to review by the IRS or other taxing authorities. The completion of review or the expiration of the Federal statute of limitations for a given audit period could result in an adjustment to the liability for income taxes. The total unrecognized benefit as of December 31, 2017, 2016 and 2015 was \$45 million, \$26 million and \$6 million, respectively. We do not anticipate any significant changes within the next twelve months to our total unrecognized tax benefits related to tax years for which the statute of limitations has not expired.

Income Tax Expense vs. Income Tax Paid in Cash

Income tax expense recorded under U.S. GAAP routinely differs from the income taxes paid in cash in any given year. Income tax expense recorded under U.S. GAAP is based on income reported in our Consolidated Statements of Operations for the current period and it includes both current and deferred taxes. Income taxes paid during the year include tax installments made for the current year as well as tax payments and refunds related to prior periods.

For additional information on income tax related items, see “Business—Regulation” and Note 19 to the Consolidated Financial Statements.

Experience-Rated Contractholder Liabilities,

Trading Account Assets Supporting Insurance Liabilities and Other Related Investments

Certain products included in the Retirement and International Insurance segments are experience-rated in that investment results associated with these products are expected to ultimately accrue to contractholders. The majority of investments supporting these experience-rated products are classified as trading and are carried at fair value. These trading investments are reflected on the Consolidated Statements of Financial Position as "Trading account assets supporting insurance liabilities, at fair value" ("TAASIL"). Realized and unrealized gains (losses) for these investments are reported in "Other income." Interest and dividend income for these investments is reported in "Net investment income." To a lesser extent, these experience-rated products

Table of Contents

are also supported by derivatives and commercial mortgage and other loans. The derivatives that support these experience-rated products are reflected on the Consolidated Statements of Financial Position as “Other long-term investments” and are carried at fair value, and the realized and unrealized gains (losses) are reported in “Realized investment gains (losses), net.” The commercial mortgage and other loans that support these experience-rated products are carried at unpaid principal, net of unamortized discounts and an allowance for losses, and are reflected on the Consolidated Statements of Financial Position as “Commercial mortgage and other loans.” Gains (losses) on sales and changes in the valuation allowance for commercial mortgage and other loans are reported in “Realized investment gains (losses), net.”

Our Retirement segment has two types of experience-rated products that are supported by TAASIL and other related investments. Fully participating products are those for which the entire return on underlying investments is passed back to the policyholders through a corresponding adjustment to the related liability, primarily classified in the Consolidated Statements of Financial Position as “Policyholders’ account balances.” The adjustment to the liability is based on changes in the fair value of all of the related assets, including commercial mortgage and other loans, which are carried at amortized cost, less any valuation allowance. Partially participating products are those for which only a portion of the return on underlying investments is passed back to the policyholders over time through changes to the contractual crediting rates. The crediting rates are typically reset semiannually, often subject to a minimum crediting rate, and returns are required to be passed back within ten years.

In our International Insurance segment, the experience-rated products are fully participating. As a result, the entire return on the underlying investments is passed back to policyholders through a corresponding adjustment to the related liability.

Adjusted operating income excludes net investment gains (losses) on TAASIL, related derivatives and commercial mortgage and other loans. This is consistent with the exclusion of realized investment gains (losses) with respect to other investments supporting insurance liabilities managed on a consistent basis. In addition, to be consistent with the historical treatment of charges related to realized investment gains (losses) on investments, adjusted operating income also excludes the change in contractholder liabilities due to asset value changes in the pool of investments (including changes in the fair value of commercial mortgage and other loans) supporting these experience-rated contracts, which are reflected in “Interest credited to policyholders’ account balances.” The result of this approach is that adjusted operating income for these products includes net fee revenue and interest spread we earn on these experience-rated contracts, and excludes changes in fair value of the pool of investments, both realized and unrealized, that we expect will ultimately accrue to the contractholders.

The following table sets forth the impact on results for the periods indicated of these items that are excluded from adjusted operating income:

	Year ended December 31,		
	2017	2016	2015
	(in millions)		
Retirement Segment:			
Investment gains (losses) on:			
Trading account assets supporting insurance liabilities, net	\$ 118	\$(21)	\$(581)

Investment gains (losses) on trading account assets supporting insurance liabilities, net	\$218	\$4	\$57
Change in experience-rated contractholder liabilities due to asset value changes	(218)	(4)	(57)
Net gains (losses)	\$0	\$0	\$0

Total:

Investment gains (losses) on:

Trading account assets supporting insurance liabilities, net	\$336	\$(17)	\$(524)
Derivatives	(168)	(10)	138
Commercial mortgages and other loans	(7)	5	4
Change in experience-rated contractholder liabilities due to asset value changes(1)(2)	(151)	21	433
Net gains (losses)	\$10	\$(1)	\$51

Table of Contents

Decreases to contractholder liabilities due to asset value changes are limited by certain floors and therefore do not reflect cumulative declines in recorded asset values of \$18 million, \$10 million and \$15 million as of December 31, (1)2017, 2016 and 2015, respectively. We have recovered and expect to recover in future periods these declines in recorded asset values through subsequent increases in recorded asset values or reductions in crediting rates on contractholder liabilities.

(2) Included in the amounts above related to the change in the liability to contractholders as a result of commercial mortgage and other loans are a decrease of \$21 million, an increase of \$4 million and a decrease of \$64 million for the years ended December 31, 2017, 2016 and 2015, respectively. As prescribed by U.S. GAAP, changes in the fair value of commercial mortgage and other loans held for investment in our general account, other than when associated with impairments, are not recognized in income in the current period, while the impact of these changes in fair value are reflected as a change in the liability to fully participating contractholders in the current period.

The net impacts for the Retirement segment of changes in experience-rated contractholder liabilities and investment gains (losses) on trading account assets supporting insurance liabilities and other related investments reflect timing differences between the recognition of the mark-to-market adjustments and the recognition of the recovery of these adjustments in future periods through subsequent increases in asset values or reductions in crediting rates on contractholder liabilities for partially participating products. These impacts also reflect the difference between the fair value of the underlying commercial mortgage and other loans and the amortized cost, less any valuation allowance, of these loans, as described above.

Valuation of Assets and Liabilities

Fair Value of Assets and Liabilities

The authoritative guidance related to fair value measurement establishes a framework that includes a three-level hierarchy used to classify the inputs used in measuring fair value. The level in the hierarchy within which the fair value falls is determined based on the lowest level input that is significant to the measurement. The fair values of assets and liabilities classified as Level 3 include at least one significant unobservable input in the measurement. See Note 20 to the Consolidated Financial Statements for an additional description of the valuation hierarchy levels as well as for the balances of assets and liabilities measured at fair value on a recurring basis by hierarchy level presented on a consolidated basis.

The table below presents the balances of assets and liabilities measured at fair value on a recurring basis, as of the periods indicated, and the portion of such assets and liabilities that are classified in Level 3 of the valuation hierarchy. The table also provides details about these assets and liabilities excluding those held in the Closed Block division. We believe the amounts excluding the Closed Block division are most relevant to an understanding of our operations that are pertinent to investors in Prudential Financial because substantially all Closed Block division assets support obligations and liabilities relating to the Closed Block policies only. See Note 12 to the Consolidated Financial Statements for further information on the Closed Block.

Total liabilities	\$10,604	\$ 9,966	\$0	\$ 0	\$10,445	\$ 10,099	\$1	\$ 0

The amount of Level 3 assets taken as a percentage of total assets measured at fair value on a recurring basis for (1) PFI excluding the Closed Block division and for the Closed Block division totaled 1.9% and 4.9%, respectively, as of December 31, 2017 and 1.5% and 3.3% as of December 31, 2016.

(2) “All other” and “Other liabilities” primarily include derivatives. The amounts classified as Level 3 exclude the impact of netting.

(3) Prior period amounts are presented on a basis consistent with the current period presentation, reflecting the adoption of ASU 2015-07.

The determination of fair value, which for certain assets and liabilities is dependent on the application of estimates and assumptions, can have a significant impact on our results of operations and may require the application of a greater degree of judgment depending on market conditions, as the ability to value assets and liabilities can be significantly impacted by a decrease in market activity or a lack of transactions executed in an orderly manner. The following sections provide information regarding certain assets and liabilities which are valued using Level 3 inputs and could have a significant impact on our results of operations.

Fixed Maturity and Equity Securities

Fixed maturity securities included in Level 3 in our fair value hierarchy are generally priced based on internally-developed valuations, indicative broker quotes or third-party pricing services, where management believes valuations are based on unobservable inputs. For certain private fixed maturity and equity securities, the internally-developed valuation model uses significant unobservable inputs and, accordingly, such securities are included in Level 3 in our fair value hierarchy. Level 3 fixed maturity securities for PFI excluding the Closed Block division included approximately \$6.5 billion of public fixed maturities as of December 31, 2017 with values primarily based on indicative broker quotes, and approximately \$2.6 billion of private fixed maturities, with values primarily based on internally-developed models or third-party pricing services. Significant unobservable inputs used included: issue specific spread adjustments, material non-public financial information, management judgment, estimation of future earnings and cash flows, default rate assumptions, liquidity assumptions and indicative quotes from market makers. These inputs are usually considered unobservable, as not all market participants have access to this data.

Table of Contents

The impact our determination of fair value for fixed maturity and equity securities has on our results of operations is dependent on our classification of the security as either trading, available-for-sale, or held-to-maturity. For investments classified as trading, the impact of changes in fair value is recorded within “Other income.” For investments classified as available-for-sale, the impact of changes in fair value is recorded as an unrealized gain or loss in AOCI, a separate component of equity. Investments classified as held-to-maturity are carried at amortized cost.

Separate Account Assets

Separate account assets included in Level 3 primarily include corporate securities and commercial mortgage loans. The valuation of corporate securities is determined as described above for fixed maturity and equity securities. See Note 20 to the Consolidated Financial Statements for additional information on the valuation of commercial mortgage loans. Separate account liabilities are reported at contract value and not at fair value.

Variable Annuity Living Benefit Features

Future policy benefits classified in Level 3 primarily include liabilities related to guarantees associated with the living benefit features of certain variable annuity contracts offered by our Individual Annuities segment, including GMAB, GMWB and GMIWB. These benefits are accounted for as embedded derivatives and carried at fair value with changes in fair value included in “Realized investment gains (losses), net.” The fair values of the GMAB, GMWB and GMIWB liabilities are calculated as the present value of future expected benefit payments to customers less the present value of future rider fees attributable to the embedded derivative feature. This methodology could result in either a liability or contra-liability balance, based on capital market conditions and various policyholder behavior assumptions. Since there is no observable active market for the transfer of these obligations, the valuations are calculated using internally-developed models with option pricing techniques. These models utilize significant assumptions that are primarily unobservable, including assumptions as to lapse rates, NPR, utilization rates, withdrawal rates, mortality rates and equity market volatility. Future policy benefits classified as Level 3 for PFI excluding the Closed Block division were a net liability of \$8.7 billion as of December 31, 2017. For additional information, see “—Results of Operations by Segment—U.S. Individual Solutions Division—Individual Annuities.”

Notes Issued by Consolidated VIEs

As discussed in Note 5 to the Consolidated Financial Statements, notes issued by consolidated VIEs represent notes issued by certain asset-backed investment vehicles, primarily collateralized loan obligations, which we are required to consolidate. The creditors of these VIEs do not have recourse to the Company in excess of the assets contained within the VIEs. We have elected the fair value option for the majority of these notes, and have based the fair value on the corresponding bank loan collateral.

For additional information about the key estimates and assumptions used in our determination of fair value, see Note 20 to the Consolidated Financial Statements.

Realized Investment Gains and Losses

Realized investment gains and losses are generated from numerous sources, including the following significant items:

- sale of investments;
- maturities of foreign-denominated investments;
- adjustments to the cost basis of investments for OTTI;
- recognition of OTTI in earnings for foreign-denominated securities that are approaching maturity and are in an unrealized loss position due to foreign currency exchange rate movements;

net changes in the allowance for losses, certain restructurings and foreclosures on commercial mortgage and other loans; and
fair value changes on embedded derivatives and free-standing derivatives that do not qualify for hedge accounting treatment.

The level of OTTI generally reflects economic conditions and is expected to increase when economic conditions worsen and to decrease when economic conditions improve. Historically, the causes of OTTI have been specific to each individual issuer and have not directly resulted in impairments to other securities within the same industry or geographic region. We may also realize additional credit and interest rate-related losses through sales of investments pursuant to our credit risk and portfolio management objectives. For additional information regarding OTTI policies for fixed maturity and equity securities, see Note 2 to the Consolidated Financial Statements.

Table of Contents

We use interest rate and currency derivatives to manage interest and currency exchange rate exposures arising from mismatches between assets and liabilities, including duration mismatches. We also use derivative contracts to mitigate the risk that unfavorable changes in currency exchange rates will materially affect U.S. dollar-equivalent earnings generated by certain of our non-U.S. businesses. In addition, equity-based and interest rate derivatives hedge a portion of the risks embedded in certain variable annuity products with optional living benefit guarantees. Many of these derivative contracts do not qualify for hedge accounting; and consequently, we recognize the changes in fair value of such contracts from period to period in current earnings, although the required accounting for associated assets and liabilities may or may not be similar.

Accordingly, realized investment gains and losses from our derivative activities can contribute significantly to fluctuations in net income. For a further discussion of living benefit guarantees and related hedge positions in our Individual Annuities segment, see “—Results of Operations by Segment—U.S. Individual Solutions Division—Individual Annuities” above.

Adjusted operating income generally excludes “Realized investment gains (losses), net,” subject to certain exceptions. These exceptions primarily include realized investment gains or losses within certain of our businesses for which such gains or losses are a principal source of earnings, gains or losses associated with terminating hedges of foreign currency earnings and current period yield adjustments and related charges and adjustments. OTTI, interest rate-related losses and credit-related losses on sales (other than those related to certain of our businesses which primarily originate investments for sale or syndication to unrelated investors) are excluded from adjusted operating income. Additionally, adjusted operating income generally excludes realized investment gains and losses from products that contain embedded derivatives and from associated derivative portfolios that are part of an asset-liability management program related to the risk of those products. However, the effectiveness of the hedging program will ultimately be reflected in adjusted operating income over time. For additional details regarding adjusted operating income, see Note 22 to the Consolidated Financial Statements.

Effective January 1, 2016, the Company classifies fixed maturity prepayment fees and call premiums in “Net investment income” rather than “Realized investments gains (losses), net.” The impact of this change for the year ended December 31, 2015 was immaterial.

The following table sets forth “Realized investment gains (losses), net,” by investment type as well as related charges and adjustments, for the periods indicated:

Net gains (losses) on sales and maturities—Fixed Maturity Securities(2)	\$585	\$773	\$1,536

-
- Excludes the portion of OTTI recorded in “Other comprehensive income (loss),” representing any difference between
- (1) the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.
 - (2) Amounts excludes OTTI and credit-related losses through sales of investments due to expected near-term credit conditions of an underlying issuer.

Table of Contents

2017 to 2016 Annual Comparison

Net gains on sales and maturities of fixed maturity securities were \$585 million and \$773 million for the years ended December 31, 2017 and 2016, respectively, primarily driven by sales and maturities of U.S. dollar-denominated securities within our International Insurance segment. See below for additional information regarding OTTI of fixed maturity securities.

Net realized gains on equity securities were \$565 million for the year ended December 31, 2017, primarily driven by net gains on sales of \$588 million including \$546 million within our International Insurance segment from portfolio reallocation, offset by OTTI of \$23 million. Net realized gains on equity securities were \$127 million for the year ended December 31, 2016, primarily driven by net gains on sales of \$188 million, offset by OTTI of \$61 million.

Net realized gains on commercial mortgage and other loans for the year ended December 31, 2017 were \$70 million, primarily driven by net gains on originated mortgage servicing rights of approximately \$72 million in our Investment Management business. Net realized gains on commercial mortgage and other loans for the year ended December 31, 2016 were \$54 million, primarily driven by net gains on originated mortgage servicing rights of \$53 million in our Investment Management business and a net decrease in the allowance for losses of \$5 million. For additional information regarding our allowance for losses, see “—General Account Investments—Commercial Mortgage and Other Loans—Commercial Mortgage and Other Loans Quality.”

Net realized losses on derivatives were \$1,147 million for the year ended December 31, 2017, compared to net realized gains of \$1,013 million for the year ended December 31, 2016. The net derivative losses for the year ended December 31, 2017 reflected losses of \$869 million on product-related embedded derivatives and related hedges mainly associated with certain variable annuity contracts; losses of \$481 million on foreign currency derivatives used to hedge foreign-denominated investments as the U.S. dollar weakened against various currencies; and losses of \$350 million on equity derivatives in our capital hedge program as the equity indices increased. Partially offsetting these losses were net gains of \$370 million on interest rate derivatives used to manage duration as long-term rates declined; net gains of \$26 million on currency derivatives primarily in Japanese insurance operations used to hedge non-yen denominated investments as the yen strengthened against various currencies; and net gains of \$152 million primarily representing the fees earned on fee-based synthetic GICs, which are accounted for as derivatives. The net derivative gains for the year ended December 31, 2016 primarily reflected gains of \$523 million on product-related embedded derivatives and related hedge positions mainly associated with certain variable annuity contracts; gains of \$192 million on currency derivatives in Japanese insurance operations used to hedge non-yen denominated investments as the yen strengthened against various currencies; gains of \$172 million on currency derivatives in U.S. operations used to hedge foreign-denominated investments as the U.S. dollar strengthened against various currencies and gains of \$157 million primarily representing the fees earned on fee-based GICs, which are accounted for as derivatives.

Related adjustments include the portions of “Realized investment gains (losses), net” that are included in adjusted operating income and the portions of “Other income” and “Net investment income” that are excluded from adjusted operating income. These adjustments are made to arrive at “Realized investment gains (losses), net, and related adjustments” which are excluded from adjusted operating income. Results for the years ended December 31, 2017 and 2016 included net negative related adjustments of \$500 million and \$771 million, respectively. Results for both periods were primarily driven by settlements on interest rate and currency derivatives.

Charges that relate to “Realized investment gains (losses), net” are also excluded from adjusted operating income and may be reflected as net charges or net benefits. Results for the year ended December 31, 2017 included a net related benefit of \$544 million, compared to a net related charge of \$466 million for the year ended December 31, 2016.

Results for both periods were driven by the impact of derivative activity on the amortization of DAC and other costs and certain policyholder reserves. Results for the year ended December 31, 2016 were partially offset by a benefit of \$515 million related to the implementation of the revised ALM strategy in the Individual Annuities segment.

2016 to 2015 Annual Comparison

Net gains on sales and maturities of fixed maturity securities were \$773 million for the year ended December 31, 2016. Excluding energy sector losses, net gains of \$966 million were primarily from sales and maturities of U.S. dollar-denominated securities within our International Insurance segment. The net gains for the year ended December 31, 2016 were partially offset by net trading losses of approximately \$193 million on sales of securities within the energy sector. Net gains on sales and maturities of fixed maturity securities were \$1,536 million for the year ended December 31, 2015 primarily due to net gains of \$1,363 million on sales and maturities of U.S. dollar-denominated securities within our International Insurance segment. See below for additional information regarding the OTTI of fixed maturity securities for the years ended December 31, 2016 and 2015.

Table of Contents

Net realized gains on equity securities were \$127 million and \$4 million for the years ended December 31, 2016 and 2015, respectively, and included net gains on sales of equity securities of \$188 million and \$115 million, respectively. Both periods' gains were partially offset by OTTI of \$61 million and \$111 million for the years ended December 31, 2016 and 2015, respectively.

Net realized gains on commercial mortgage and other loans for the year ended December 31, 2016 were \$54 million, primarily driven by servicing revenue of \$53 million in our Investment Management business and a net decrease in the allowance for losses of \$5 million. Net realized gains on commercial mortgage and other loans for the year ended December 31, 2015 were \$36 million, primarily driven by servicing revenue of \$31 million in our Investment Management business and a net decrease in the allowance for losses of \$5 million. For additional information regarding our allowance for losses, see “—General Account Investments—Commercial Mortgage and Other Loans—Commercial Mortgage and Other Loan Quality” below.

Net realized gains on derivatives were \$1,013 million and \$1,775 million for the years ended December 31, 2016 and 2015, respectively. The net derivative gains for the year ended December 31, 2016 primarily reflected gains of \$523 million on product-related embedded derivatives and related hedge positions mainly associated with certain variable annuity contracts; gains of \$192 million on currency derivatives in Japanese insurance operations used to hedge non-yen denominated investments as the yen strengthened against various currencies; gains of \$172 million on currency derivatives in U.S. operations used to hedge foreign-denominated investments as the U.S. dollar strengthened against various currencies and gains of \$157 million primarily representing the fees earned on fee-based GICs, which are accounted for as derivatives. The net gains for the year ended December 31, 2015 primarily reflected gains of \$995 million on product-related embedded derivatives and related hedge positions mainly associated with certain variable annuity contracts; gains of \$326 million on interest rate derivatives used to manage duration as interest rates decreased; gains of \$345 million on foreign currency derivatives used to hedge foreign-denominated investments as the U.S. dollar strengthened against various currencies and gains of \$159 million primarily representing fees earned on fee-based GICs.

Results for the years ended December 31, 2016 and 2015 included net negative related adjustments of \$771 million and \$934 million, respectively, primarily driven by settlements on interest rate and currency derivatives.

Results for the year ended December 31, 2016 included net related charges of \$466 million, compared to net related charges of \$679 million for the year ended December 31, 2015. Both periods' results were driven by the impact of derivative activity on the amortization of DAC and other costs and certain policyholder reserves. Results for the year ended December 31, 2016 were partially offset by a benefit of \$515 million related to the implementation of a new ALM strategy in the Individual Annuities segment.

PFI excluding Closed Block Division—OTTI

The following tables set forth the composition of OTTI recorded in earnings attributable to PFI excluding the Closed Block division by investment type and for fixed maturity securities by reason, for the periods indicated:

	Years Ended December 31,		
	2017	2016	2015
	(in millions)		
Public fixed maturity securities	\$ 57	\$ 56	\$ 31
Private fixed maturity securities	112	88	66
Total fixed maturity securities	169	144	97
Equity securities	23	61	111
Other invested assets(1)	19	57	121

Total(2) \$ 211 \$ 262 \$ 329

(1) Primarily includes OTTI related to investments in joint ventures and limited partnerships.

Excludes amounts remaining in OCI from previously impaired investments, representing any difference between

(2) the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

Table of Contents

	Years Ended December 31,		
	2017	2016	2015
	(in millions)		
Due to foreign exchange rate movements on securities approaching maturity	\$ 36	\$ 4	\$ 0
Due to securities actively marketed for sale	12	29	15
Due to credit events or adverse conditions of the respective issuer(1)	121	111	82
Total fixed maturity securities(2)	\$ 169	\$ 144	\$ 97

Represents circumstances where we believe credit events or other adverse conditions of the respective issuers have caused or will lead to a deficiency in the contractual cash flows related to the investment. The amount of the (1) impairment recorded in earnings is the difference between the amortized cost of the debt security and the net present value of its projected future cash flows discounted at the effective interest rate implicit in the debt security prior to impairment.

Excludes amounts remaining in OCI from previously impaired investments, representing any difference between (2) the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

2017 to 2016 Annual Comparison

Fixed maturity security OTTI for the year ended December 31, 2017 were concentrated in the energy, industrial other and utility sectors within corporate securities. These OTTI were related to credit events or other adverse conditions of the respective issuers as well as securities approaching maturity with losses from foreign currency exchange rate movements which were primarily hedged with derivatives that had an offsetting realized gain. Fixed maturity security OTTI for the year ended December 31, 2016 were concentrated in the energy, capital goods and transportation sectors within corporate securities and were primarily related to securities with liquidity concerns, downgrades in credit, bankruptcy or other adverse financial conditions of the respective issuers.

Equity security OTTI for the years ended December 31, 2017 and 2016 were primarily driven by the extent and duration of declines in values.

Other invested assets OTTI for the years ended December 31, 2017 and 2016 were primarily driven by the extent and duration of declines in values of investments in private equity limited partnerships.

2016 to 2015 Annual Comparison

Fixed maturity security OTTI for the year ended December 31, 2016 were concentrated in the energy, capital goods and transportation sectors within corporate securities. Fixed maturity security OTTI for year ended December 31, 2015 were concentrated in the industrial other, consumer cyclical and energy sectors within corporate securities. In both periods, these OTTI were primarily related to securities with liquidity concerns, downgrades in credit, bankruptcy or other adverse financial conditions of the respective issuers.

Equity security OTTI for the years ended December 31, 2016 and 2015 were primarily due to the extent and duration of declines in values.

Other invested assets OTTI in for the years ended December 31, 2016 and 2015 were primarily due to the extent and duration of declines in values of investments in private equity limited partnerships.

Closed Block Division—Realized Investments Gains (Losses) and OTTI

Net realized gains on fixed maturity securities of \$173 million, \$49 million and \$203 million for the years ended December 31, 2017, 2016 and 2015, respectively, were primarily due to net gains of \$271 million, \$131 million and \$249 million on sales and maturities, respectively. These gains were offset by OTTI of \$98 million, \$78 million and \$44 million for the years ended December 31, 2017, 2016 and 2015, respectively.

Net realized gains on equity securities were \$501 million, \$249 million and \$447 million for the years ended December 31, 2017, 2016 and 2015, respectively, resulting from net gains on sales, partially offset by OTTI of \$4 million, \$13 million and \$15 million, respectively.

Net realized losses on derivatives were \$128 million for the year ended December 31, 2017, compared to net realized gains of \$162 million and \$195 million for the years ended December 31, 2016 and 2015, respectively. The net derivative losses for the year ended December 31, 2017 primarily reflected losses of \$139 million on currency derivatives used to hedge foreign-denominated investments as the U.S. dollar weakened against various currencies. Partially offsetting the losses was a net gain of \$8 million on

Table of Contents

interest rate derivatives used to manage duration as long-term rates declined. The net derivative gains for the year ended December 31, 2016 primarily reflected gains of \$132 million on currency derivatives used to hedge foreign-denominated investments as the U.S. dollar strengthened against various currencies and gains of \$30 million on interest rate derivatives used to manage duration as interest rates increased. The net derivative gains for the year ended December 31, 2015 primarily reflected gains of \$193 million on currency derivatives used to hedge foreign-denominated investments as the U.S. dollar strengthened against various currencies.

General Account Investments

We maintain diversified investment portfolios in our general account to support our liabilities to customers as well as our other general liabilities. Our general account does not include: (1) assets of our derivative operations; (2) assets of our investment management operations, including investments managed for third parties; and (3) those assets classified as “Separate account assets” on our balance sheet.

The general account portfolios are managed pursuant to the distinct objectives and investment policy statements of PFI excluding the Closed Block division and the Closed Block division. The primary investment objectives of PFI excluding the Closed Block division include:

- hedging and otherwise managing the market risk characteristics of the major product liabilities and other obligations of the Company;
- optimizing investment income yield within risk constraints over time; and
- for certain portfolios, optimizing total return, including both investment income yield and capital appreciation, within risk constraints over time, while managing the market risk exposures associated with the corresponding product liabilities.

We pursue our objective to optimize investment income yield for PFI excluding the Closed Block division over time through:

- the investment of net operating cash flows, including new product premium inflows, and proceeds from investment sales, repayments and prepayments into investments with attractive risk-adjusted yields; and
- the sale of lower-yielding investments, where appropriate, either to meet various cash flow needs or to manage the portfolio's risk exposure profile with respect to duration, credit, currency and other risk factors, while considering the impact on taxes and capital.

The primary investment objectives of the Closed Block division include:

- providing for the reasonable dividend expectations of the participating policyholders within the Closed Block division; and
- optimizing total return, including both investment income yield and capital appreciation, within risk constraints, while managing the market risk exposures associated with the major products in the Closed Block division.

Our portfolio management approach, while emphasizing our investment income yield and asset/liability risk management objectives, also takes into account the capital and tax implications of portfolio activity and our assertions regarding our ability and intent to hold debt and equity securities to recovery. For a further discussion of our OTTI policies, including our assertions regarding our ability and intent to hold equity securities to recovery and any intention or requirement to sell debt securities before anticipated recovery, see “—Fixed Maturity Securities—OTTI of Fixed Maturity Securities” and “—Equity Securities—OTTI of Equity Securities” below.

Management of Investments

The Investment Committee of our Board of Directors oversees our proprietary investments, including our general account portfolios, and regularly reviews performance and risk positions. Our Chief Investment Officer Organization (“CIO Organization”) develops investment policies subject to risk limits proposed by our Enterprise Risk Management (“ERM”) group for the general account portfolios of our domestic and international insurance subsidiaries and directs and oversees management of the general account portfolios within risk limits and exposure ranges approved annually by the Investment Committee.

105

Table of Contents

The CIO Organization, including related functions within our insurance subsidiaries, works closely with product actuaries and ERM to understand the characteristics of our products and their associated market risk exposures. This information is incorporated into the development of target asset portfolios that manage market risk exposures associated with the liability characteristics and establish investment risk exposures, within tolerances prescribed by Prudential's investment risk limits, on which we expect to earn an attractive risk-adjusted return. We develop asset strategies for specific classes of product liabilities and attributed or accumulated surplus, each with distinct risk characteristics. Market risk exposures associated with the liabilities include interest rate risk, which is addressed through the duration characteristics of the target asset mix, and currency risk, which is addressed by the currency profile of the target asset mix. In certain of our smaller markets outside of the U.S. and Japan, capital markets limitations hinder our ability to hedge interest rate exposure to the same extent we do for our U.S. and Japan businesses and lead us to accept a higher degree of interest rate risk in these smaller portfolios. General account portfolios typically include allocations to credit and other investment risks as a means to enhance investment yields and returns over time.

Most of our products can be categorized into the following three classes:

- interest-crediting products for which the rates credited to customers are periodically adjusted to reflect market and competitive forces and actual investment experience, such as fixed annuities and universal life insurance;
- participating individual and experience-rated group products in which customers participate in actual investment and business results through annual dividends, interest or return of premium; and
- products with fixed or guaranteed terms, such as traditional whole life and endowment products, guaranteed investment contracts, funding agreements and payout annuities.

Our total investment portfolio is composed of a number of operating portfolios. Each operating portfolio backs a specific set of liabilities, and the portfolios have a target asset mix that supports the liability characteristics, including duration, cash flow, liquidity needs and other criteria. As of December 31, 2017, the average duration of our domestic general account investment portfolios attributable to PFI excluding the Closed Block division, including the impact of derivatives, was between 7 and 8 years. As of December 31, 2017, the average duration of our international general account portfolios attributable to our Japanese insurance operations, including the impact of derivatives, was between 11 and 12 years and represented a blend of yen-denominated and U.S. dollar and Australian dollar-denominated investments, which have distinct average durations supporting the insurance liabilities we have issued in those currencies. Our asset/liability management process has enabled us to manage our portfolios through several market cycles.

We implement our portfolio strategies primarily through investment in a broad range of fixed income assets, including government and agency securities, public and private corporate bonds and structured securities and commercial mortgage loans. In addition, we hold allocations of non-coupon investments, which include equity securities and other long-term investments such as joint ventures and limited partnerships, real estate held through direct ownership and seed money investments in separate accounts.

We manage our public fixed maturity portfolio to a risk profile directed or overseen by the CIO Organization and ERM groups and to a profile that also reflects the market environments impacting both our domestic and international insurance portfolios. The return that we earn on the portfolio will be reflected in investment income and in realized gains or losses on investments.

We use privately-placed corporate debt securities and commercial mortgage loans, which consist of mortgages on diversified properties in terms of geography, property type and borrowers, to enhance the yield on our portfolio and to improve the overall diversification of the portfolios. Private placements typically offer enhanced yields due to an illiquidity premium and generally offer enhanced credit protection in the form of covenants. Our origination capability

offers the opportunity to lead transactions and gives us the opportunity for better terms, including covenants and call protection, and to take advantage of innovative deal structures.

Derivative strategies are employed in the context of our risk management framework to enhance our ability to manage interest rate and currency risk exposures of the asset portfolio relative to the liabilities and to manage credit and equity positions in the investment portfolios. For a discussion of our risk management process, see “Quantitative and Qualitative Disclosures About Market Risk” below.

Our portfolio asset allocation reflects our emphasis on diversification across asset classes, sectors and issuers. The CIO Organization, directly and through related functions within the insurance subsidiaries, implements portfolio strategies primarily through various investment management units within Prudential’s Investment Management segment. Activities of the Investment Management segment on behalf of the general account portfolios are directed and overseen by the CIO Organization and monitored by ERM for compliance with investment risk limits.

Table of Contents

Portfolio Composition

Our investment portfolio consists of public and private fixed maturity securities, commercial mortgage and other loans, policy loans and non-coupon investments as defined above. The composition of our general account reflects, within the discipline provided by our risk management approach, our need for competitive results and the selection of diverse investment alternatives available primarily through our Investment Management segment. The size of our portfolio enables us to invest in asset classes that may be unavailable to the typical investor.

The following tables set forth the composition of the investments of our general account apportioned between PFI excluding the Closed Block division and the Closed Block division, as of the dates indicated:

Table of Contents

Other long-term investments consist of investments in joint ventures and limited partnerships, investment real estate held through direct ownership, certain derivatives and other miscellaneous investments. For additional information regarding these investments, see “—Other Long-Term Investments” below.

(2) Includes invested assets of our investment management and derivative operations. Excludes assets of our investment management operations that are managed for third-parties and those assets classified as “Separate account assets” on our balance sheet. For additional information regarding these investments, see “—Invested Assets of Other Entities and Operations” below.

The increase in general account investments attributable to PFI excluding the Closed Block division in 2017 was primarily due to the reinvestment of net investment income, a decrease in U.S. interest rates, credit spread tightening and the translation impact of the yen strengthening against the U.S. dollar. For information regarding the methodology used in determining the fair value of our fixed maturities, see Note 20 to the Consolidated Financial Statements.

As of both December 31, 2017 and 2016, 42% of our general account investments attributable to PFI excluding the Closed Block division related to our Japanese insurance operations. The following table sets forth the composition of the investments of our Japanese insurance operations’ general account, as of the dates indicated:

	December 31,	
	2017	2016
	(in millions)	
Fixed maturities:		
Public, available-for-sale, at fair value	\$ 128,332	\$ 123,285

Other trading account assets, at fair value	492	434
Equity securities, available-for-sale, at fair value	1,916	2,654
Commercial mortgage and other loans, at book value	14,268	11,700
Policy loans, at outstanding balance	2,545	2,369
Other long-term investments(1)	2,021	1,186
Short-term investments	244	398
Total Japanese general account investments	\$ 168,991	\$ 157,982

(1) Other long-term investments consist of investments in joint ventures and limited partnerships, investment real estate held through direct ownership, derivatives and other miscellaneous investments.

The increase in general account investments related to our Japanese insurance operations in 2017 was primarily attributable to the reinvestment of net investment income, net business inflows and the translation impact of the yen strengthening against the U.S. dollar.

As of December 31, 2017, our Japanese insurance operations had \$62.6 billion, at carrying value, of investments denominated in U.S. dollars, including \$5.8 billion that were hedged to yen through third-party derivative contracts and \$43.8 billion that support liabilities denominated in U.S. dollars, with the remainder hedging our foreign currency exchange rate exposure on U.S. dollar-equivalent equity. As of December 31, 2016, our Japanese insurance operations had \$55.7 billion, at carrying value, of investments denominated in U.S. dollars, including \$5.3 billion that were hedged to yen through third-party derivative contracts and \$36.1 billion that support liabilities denominated in U.S. dollars, with the remainder hedging our foreign currency exchange rate exposure on U.S. dollar-equivalent equity. The

\$6.9 billion increase in the carrying value of U.S. dollar-denominated investments from December 31, 2016, was primarily attributable to portfolio growth as a result of net business inflows and the reinvestment of net investment income.

Table of Contents

Our Japanese insurance operations had \$11.4 billion and \$11.0 billion, at carrying value, of investments denominated in Australian dollars that support liabilities denominated in Australian dollars, as of December 31, 2017 and 2016, respectively. The \$0.4 billion increase in the carrying value of Australian dollar-denominated investments from December 31, 2016, was primarily attributable to the translation impact of the Australian dollar strengthening against the U.S. dollar, portfolio growth as a result of net business inflows and the reinvestment of net investment income. For additional information regarding U.S. and Australian dollar investments held in our Japanese insurance operations and a discussion of our yen hedging strategy, see “—Results of Operations by Segment—Impact of Foreign Currency Exchange Rates” above.

Investment Results

The following tables set forth the investment results of our general account apportioned between PFI excluding the Closed Block division and the Closed Block division, for the periods indicated. The yields are based on net investment income as reported under U.S. GAAP and as such do not include certain interest-related items, such as settlements of duration management swaps which are included in “Realized investment gains (losses), net.” Effective January 1, 2016, the Company classified fixed maturity prepayment fees and call premiums in “Net investment income” rather than “Realized investments gains (losses), net.” The impact of this change for the year ended December 31, 2015 was immaterial.

Yields are based on quarterly average carrying values except for fixed maturities, equity securities and securities lending activity. Yields for fixed maturities are based on quarterly average amortized cost. Yields for equity (1) securities are based on quarterly average cost. Yields for fixed maturities, short-term investments and cash equivalents are calculated net of liabilities and rebate expenses corresponding to securities lending activity. Yields exclude investment income on assets other than those included in invested assets.

(2) Includes net investment income of our investment management operations and derivative operations.

(3) The total yield was 3.97%, 3.92% and 3.98% for the years ended December 31, 2017, 2016 and 2015, respectively.

The increase in net investment income yield attributable to our general account investments, excluding both the Closed Block division and the Japanese insurance operations' portfolio, for 2017 compared to 2016 was primarily the result of higher yields from non-coupon investments.

The decrease in net investment income yield attributable to our general account investments, excluding both the Closed Block division and the Japanese insurance operations' portfolio, for 2016 compared to 2015 was primarily the result of lower fixed income reinvestment rates and lower yields from non-coupon investments offset by higher fixed maturity prepayment fees and call premiums.

The decrease in net investment income yield on the Japanese insurance operations' portfolio for 2017 compared to 2016 was primarily attributable to lower fixed income reinvestment rates, partially offset by higher yields from non-coupon investments and higher fixed maturity prepayment fees and call premiums.

The decrease in net investment income yield on the Japanese insurance operations' portfolio for 2016 compared to 2015 was primarily attributable to lower fixed income reinvestment rates and lower yields from non-coupon investments.

Both the U.S. dollar-denominated and Australian dollar-denominated fixed maturities that are not hedged to yen through third-party derivative contracts provide a yield that is substantially higher than the yield on comparable yen-denominated fixed maturities. The average amortized cost of U.S. dollar-denominated fixed maturities that are not hedged to yen through third-party derivative contracts was approximately \$41.4 billion and \$37.7 billion, for the years ended December 31, 2017 and 2016, respectively. The majority of U.S. dollar-denominated fixed maturities support liabilities that are denominated in U.S. dollars. The average amortized cost of Australian dollar-denominated fixed maturities that are not hedged to yen through third-party derivative contracts was approximately \$10.2 billion and \$9.5 billion, for the years ended December 31, 2017 and 2016, respectively. The Australian dollar-denominated fixed maturities support liabilities that are denominated in Australian dollars. For additional information regarding U.S. and Australian dollar investments held in our Japanese insurance operations, see “—Results of Operations—Impact of Foreign Currency Exchange Rates” above.

Table of Contents

Retail-Related Investments

As of December 31, 2017, PFI excluding the Closed Block division had retail-related investments of approximately \$15 billion consisting primarily of \$7 billion of corporate fixed maturities of which 89% were considered investment grade; \$7 billion of commercial mortgage loans with a weighted-average loan-to-value ratio of approximately 49% and weighted-average debt service coverage ratio of 2.42 times; and \$1 billion of real estate held through direct ownership and real estate-related joint ventures and limited partnerships.

In addition, we held approximately \$9 billion of commercial mortgage-backed securities, of which approximately 91% and 9% were rated AAA (super-senior) and AA, respectively, and comprised of diversified collateral pools. Approximately 30% of the collateral pools were comprised of retail-related investments, with no pools solely collateralized by retail-related investments. For additional information regarding commercial mortgage-backed securities, see “—Fixed Maturity Securities—Fixed Maturity Securities Credit Quality” below.

General Account Investments of PFI excluding Closed Block Division

In the following sections, we provide details about our investment portfolio, excluding investments held in the Closed Block division. We believe the details of the composition of our investment portfolio excluding the Closed Block division are most relevant to an understanding of our operations that are pertinent to investors in Prudential Financial, Inc. because substantially all Closed Block division assets support obligations and liabilities relating to the Closed Block policies only. See Note 12 to the Consolidated Financial Statements for further information on the Closed Block.

Fixed Maturity Securities

Fixed Maturity Securities by Contractual Maturity Date

(1) Investment data has been classified based on standard industry categorizations for domestic public holdings and similar classifications by industry for all other holdings.

Includes \$381 million of gross unrealized gains and less than \$1 million of gross unrealized losses, as of

(2) December 31, 2017, compared to \$380 million of gross unrealized gains and \$0 million of gross unrealized losses, as of December 31, 2016, on securities classified as held-to-maturity.

As of December 31, 2017 and 2016, based on amortized cost, 75% and 76%, respectively, represent Japanese

(3) government bonds held by our Japanese insurance operations with no other individual country representing more than 11% and 10% of the balance, respectively.

(4) As of December 31, 2017 and 2016, based on amortized cost, more than 99% and 95% were rated A or higher, respectively.

Excluded from the table above are securities held outside the general account in other entities and operations. For additional information regarding investments held outside the general account, see “—Invested Assets of Other

(5) Entities and Operations” below. Also excluded from the table above are fixed maturity securities classified as trading. See “—Trading Account Assets Supporting Insurance Liabilities” and “—Other Trading Account Assets” below for additional information.

The increase in net unrealized gains from December 31, 2016 to December 31, 2017 was primarily due to a decrease in U.S. interest rates and credit spread tightening.

Table of Contents

Fixed Maturity Securities Credit Quality

The Securities Valuation Office (“SVO”) of the NAIC evaluates the investments of insurers for statutory reporting purposes and assigns fixed maturity securities to one of six categories called “NAIC Designations.” In general, NAIC Designations of “1” highest quality, or “2” high quality, include fixed maturities considered investment grade, which include securities rated Baa3 or higher by Moody’s or BBB- or higher by Standard & Poor’s. NAIC Designations of “3” through “6” generally include fixed maturities referred to as below investment grade, which include securities rated Ba1 or lower by Moody’s and BB+ or lower by Standard & Poor’s. The NAIC Designations for commercial mortgage-backed securities and non-agency residential mortgage-backed securities, including our asset-backed securities collateralized by sub-prime mortgages, are based on security level expected losses as modeled by an independent third-party (engaged by the NAIC) and the statutory carrying value of the security, including any purchase discounts or impairment charges previously recognized.

As a result of time lags between the funding of investments, the finalization of legal documents, and the completion of the SVO filing process, the fixed maturity portfolio includes certain securities that have not yet been designated by the SVO as of each balance sheet date. Pending receipt of SVO designations, the categorization of these securities by NAIC Designation is based on the expected ratings indicated by internal analysis.

Investments of our international insurance companies are not subject to NAIC guidelines. Investments of our Japanese insurance operations are regulated locally by the FSA, an agency of the Japanese government. The FSA has its own investment quality criteria and risk control standards. Our Japanese insurance companies comply with the FSA’s credit quality review and risk monitoring guidelines. The credit quality ratings of the investments of our Japanese insurance companies are based on ratings assigned by nationally recognized credit rating agencies, including Moody’s and Standard & Poor’s, or rating equivalents based on ratings assigned by Japanese credit ratings agencies.

The following table sets forth our fixed maturity securities portfolio by NAIC Designation or equivalent ratings attributable to PFI excluding the Closed Block division, as of the dates indicated:

NAIC Designation(1)(2)	December 31, 2017				December 31, 2016

(1) Reflects equivalent ratings for investments of the international insurance operations.

Includes, as of December 31, 2017 and 2016, 982 securities with amortized cost of \$6,022 million (fair value, \$6,217 million) and 918 securities with amortized cost of \$4,634 million (fair value, \$4,759 million), respectively, that have been categorized based on expected NAIC Designations pending receipt of SVO ratings.

Includes \$381 million of gross unrealized gains and less than \$1 million of gross unrealized losses, as of
(3) December 31, 2017, compared to \$380 million of gross unrealized gains and \$0 million of gross unrealized losses,
as of December 31, 2016, on securities classified as held-to-maturity.

As of December 31, 2017, includes gross unrealized losses of \$156 million on public fixed maturities and \$91
(4) million on private fixed maturities considered to be other than high or highest quality and, as of December 31,
2016, includes gross unrealized losses of \$149 million on public fixed maturities and \$154 million on private fixed
maturities considered to be other than high or highest quality.

On an amortized cost basis, as of December 31, 2017, includes \$222,763 million of public fixed maturities and
(5) \$35,779 million of private fixed maturities and, as of December 31, 2016, includes \$211,753 million of public
fixed maturities and \$32,812 million of private fixed maturities.

On an amortized cost basis, as of December 31, 2017, includes \$9,975 million of public fixed maturities and
(6) \$6,809 million of private fixed maturities and, as of December 31, 2016, includes \$7,170 million of public fixed
maturities and \$5,479 million of private fixed maturities.

On an amortized cost basis, as of December 31, 2017, securities considered below investment grade based on
(7) lowest of external rating agency ratings, total \$17,910 million, or approximately 7% of the total fixed maturities,
and include securities considered high or highest quality by the NAIC based on the rules described above.

Table of Contents

- (8) On a fair value basis, as of December 31, 2017 there were approximately \$165 million of high or highest quality securities and \$2,829 million of other than high or highest quality securities representing investments in bonds that were received during the fourth quarter of 2017 when the Company exchanged shares in a mutual fund for its proportionate share of the underlying bonds in the fund.

The following table sets forth the amortized cost and fair value of asset-backed and commercial mortgage-backed securities attributable to PFI excluding the Closed Block division by credit quality, as of the dates indicated:

Lowest Rating Agency Rating(1)	December 31, 2017				December 31, 2016			
	Asset-Backed Securities(2)		Commercial Mortgage-Backed Securities(3)		Asset-Backed Securities(2)		Commercial Mortgage-Backed Securities(3)

(1) The table above provides ratings as assigned by nationally recognized rating agencies as of December 31, 2017, including Standard & Poor's, Moody's, Fitch and Morningstar.

(2) Includes credit-tranched securities collateralized by sub-prime mortgages, auto loans, credit cards, education loans and other asset types. As of December 31, 2017 and 2016, based on amortized cost, 79% and 76%, respectively, were collateralized loan obligations rated A or higher.

(3) As of December 31, 2017 and 2016, based on amortized cost, 95% and 93%, respectively, were securities with vintages of 2013 or later.

(4) Excludes securities held outside the general account in other entities and operations and securities classified as trading.

Credit Derivative Exposure to Public Fixed Maturities

In addition to the public fixed maturities noted above, as part of investment portfolio repositioning, we may from time to time sell credit derivatives to manage the credit exposure of our investment portfolio by synthetically creating investments similar to public fixed maturities.

In a credit derivative, we may sell credit protection on an identified name or a broad-based index, and in return receive a quarterly premium. The majority of the underlying reference names in single name and index credit derivatives where we have sold credit protection, as well as all the counterparties to these agreements, are investment grade credit quality, and our credit derivatives have a remaining term to maturity of thirty years or less. The premium or credit spread generally corresponds to the difference between the yield on the reference name's (or index's underlying reference names) public fixed maturity cash instruments and swap rates at the time the agreement is executed. Credit derivative contracts are recorded at fair value with changes in fair value, including the premiums received, recorded in "Realized investment gains (losses), net."

As of December 31, 2017 and 2016, PFI excluding the Closed Block division had \$1,136 million and \$162 million of notional amounts of exposure where we have sold credit protection through credit derivatives, respectively, reported at fair value as an asset of \$20 million and less than \$1 million, respectively. "Realized investment gains (losses), net" from credit derivatives we sold were a gain of \$3 million and \$7 million for the years ended December 31, 2017 and

2016, respectively. The balance at December 31, 2016 excludes a credit derivative related to surplus notes issued by a subsidiary of Prudential Insurance, with notional amount of \$500 million and reported fair value as a liability of \$17 million, which was terminated in September 2017. See Note 21 to the Consolidated Financial Statements for additional information regarding this derivative.

In addition to selling credit protection, we have purchased credit protection using credit derivatives in order to hedge specific credit exposures in our investment portfolio. As of December 31, 2017 and 2016, PFI excluding the Closed Block division had \$100 million and \$141 million of notional amounts, respectively, reported at fair value as a liability of \$1 million and \$4 million, respectively. "Realized investment gains (losses), net" from credit derivatives we purchased were a loss of \$2 million and \$5 million for the years ended December 31, 2017 and 2016, respectively. See Note 21 to the Consolidated Financial Statements for additional information regarding credit derivatives and an overall description of our derivative activities.

OTTI of Fixed Maturity Securities

Table of Contents

We maintain separate monitoring processes for public and private fixed maturities and create watch lists to highlight securities that require special scrutiny and management. Our public fixed maturity investment managers review all public fixed maturity holdings on a quarterly basis and more frequently when necessary to identify potential credit deterioration whether due to ratings downgrades, unexpected price variances and/or company or industry-specific concerns.

For private placements, our credit and portfolio management processes help ensure prudent controls over valuation and management. We have separate pricing and authorization processes to establish “checks and balances” for new investments. We apply consistent standards of credit analysis and due diligence for all transactions, whether they originate through our own in-house origination staff or through agents. Our regional offices closely monitor the portfolios in their regions. We set all valuation standards centrally, and we assess the fair value of all investments quarterly. Our private fixed maturity investment managers formally review all private fixed maturity holdings on a quarterly basis and more frequently when necessary to identify potential credit deterioration whether due to ratings downgrades, unexpected price variances and/or company or industry-specific concerns. For additional information regarding our OTTI policies for fixed maturity securities, see Note 2 to the Consolidated Financial Statements.

OTTI of general account fixed maturity securities attributable to PFI excluding the Closed Block division that were recognized in earnings were \$169 million, \$144 million and \$97 million for the years ended December 31, 2017, 2016 and 2015, respectively. For a further discussion of OTTI, see “—Realized Investment Gains and Losses” above.

Trading Account Assets Supporting Insurance Liabilities (TAASIL)

The following table sets forth the composition of the TAASIL portfolio attributable to PFI excluding the Closed Block division, as of the dates indicated:

	December 31, 2017		December 31, 2016	
	Amortized Cost or Cost	Fair Value	Amortized Cost or Cost	Fair Value
	(in millions)			
Short-term investments and cash equivalents	\$245	\$245	\$655	\$655
Fixed maturities:				
Corporate securities	13,816	14,073	13,903	13,997
Commercial mortgage-backed securities	2,294	2,311	2,032	2,052
Residential mortgage-backed securities	961	966	1,142	1,150
Asset-backed securities	1,363	1,392	1,333	1,349
Foreign government bonds	1,050	1,057	915	926
U.S. government authorities and agencies and obligations of U.S. states	357	410	330	376
Total fixed maturities(1)	19,841	20,209	19,655	19,850
Equity securities	1,278	1,643	1,097	1,335
Total trading account assets supporting insurance liabilities(2)	\$21,364	\$22,097	\$21,407	\$21,840

(1) As a percentage of amortized cost, 92% of the portfolio was considered high or highest quality based on NAIC or equivalent ratings, as of both December 31, 2017 and 2016.

(2) As a percentage of amortized cost, 80% of the portfolio consisted of public securities as of both December 31, 2017 and 2016.

Other Trading Account Assets

Other trading account assets consist primarily of certain financial instruments that contain an embedded derivative where we elected to classify the entire instrument as a trading account asset rather than bifurcate. These instruments are carried at fair value, with realized and unrealized gains (losses) reported in “Other income” and excluded from adjusted operating income. Interest and dividend income from these investments is reported in “Net investment income” and is included in adjusted operating income.

The following table sets forth the composition of our other trading account assets attributable to PFI excluding the Closed Block division, as of the dates indicated:

116

Table of Contents

	December 31, 2017		December 31, 2016	
	Amortized Cost or Cost	Fair Value	Amortized Cost or Cost	Fair Value
	(in millions)			
Short-term investments and cash equivalents	\$0	\$0	\$1	\$1
Fixed maturities(1)	1,568	1,589	1,201	1,058
Equity securities(2)	395	455	412	462
Total other trading account assets	\$1,963	\$2,044	\$1,614	\$1,521

(1) As a percentage of amortized cost, 91% and 89% of the portfolio was considered high or highest quality based on NAIC or equivalent ratings, as of December 31, 2017 and 2016, respectively.

(2) Included in equity securities are perpetual preferred stock securities that have characteristics of both debt and equity securities.

Commercial Mortgage and Other Loans

Investment Mix

The following table sets forth the composition of our commercial mortgage and other loans portfolio attributable to PFI excluding the Closed Block division, as of the dates indicated:

	December 31, 2017	December 31, 2016
	(in millions)	
Commercial mortgage and agricultural property loans	\$45,623	\$41,964
Uncollateralized loans	661	636
Residential property loans	196	252
Other collateralized loans	5	9
Total recorded investment gross of allowance(1)	46,485	42,861
Valuation allowance	(91)	(90)
Total net commercial mortgage and other loans(2)	\$46,394	\$42,771

(1) As a percentage of recorded investment gross of allowance, more than 99% of these assets were current as of both December 31, 2017 and 2016.

(2) Excluded from the table above are commercial mortgage and other loans held outside the general account in other entities and operations. For additional information regarding commercial mortgage and other loans held outside the general account, see “—Invested Assets of Other Entities and Operations” below.

We originate commercial mortgage and agricultural property loans using a dedicated investment staff through our various regional offices in the U.S. and international offices primarily in London and Tokyo. All loans are underwritten consistently to our standards using a proprietary quality rating system that has been developed from our experience in real estate and mortgage lending.

Uncollateralized loans primarily represent corporate loans which do not meet the definition of a security under authoritative accounting guidance.

Residential property loans primarily include Japanese recourse loans. Upon default of these recourse loans, we can make a claim against the personal assets of the property owner, in addition to the mortgaged property. These loans are

also backed by third-party guarantors.

Other collateralized loans include consumer loans.

Composition of Commercial Mortgage and Agricultural Property Loans

Our commercial mortgage and agricultural property loan portfolio strategy emphasizes diversification by property type and geographic location. The following tables set forth the breakdown of the gross carrying values of commercial mortgage and agricultural property loans attributable to PFI excluding the Closed Block division by geographic region and property type, as of the dates indicated:

Table of Contents

Total commercial mortgage and agricultural property loans	\$45,623	100.0%	\$41,964	100.0%

Loan-to-value and debt service coverage ratios are measures commonly used to assess the quality of commercial mortgage and agricultural property loans. The loan-to-value ratio compares the amount of the loan to the fair value of the underlying property collateralizing the loan and is commonly expressed as a percentage. A loan-to-value ratio less than 100% indicates an excess of collateral value over the loan amount. Loan-to-value ratios greater than 100% indicate that the loan amount exceeds the collateral value. The debt service coverage ratio compares a property's net operating income to its debt service payments. Debt service coverage ratios less than 1.0 times indicate that property operations do not generate enough income to cover the loan's current debt payments. A debt service coverage ratio greater than 1.0 times indicates an excess of net operating income over the debt service payments.

Table of Contents

As of December 31, 2017, our commercial mortgage and agricultural property loans attributable to PFI excluding the Closed Block division had a weighted-average debt service coverage ratio of 2.45 times and a weighted-average loan-to-value ratio of 54%. As of December 31, 2017, approximately 97% of commercial mortgage and agricultural property loans were fixed rate loans. For those commercial mortgage and agricultural property loans that were originated in 2017, the weighted-average debt service coverage ratio was 2.71 times, and the weighted-average loan-to-value ratio was 63%.

The values utilized in calculating these loan-to-value ratios are developed as part of our periodic review of the commercial mortgage and agricultural property loan portfolio, which includes an internal evaluation of the underlying collateral value. Our periodic review also includes a quality re-rating process, whereby we update the internal quality rating originally assigned at underwriting based on the proprietary quality rating system mentioned above. As discussed below, the internal quality rating is a key input in determining our allowance for losses.

For loans with collateral under construction, renovation or lease-up, a stabilized value and projected net operating income are used in the calculation of the loan-to-value and debt service coverage ratios. Our commercial mortgage and agricultural property loan portfolio included approximately \$1.0 billion and \$1.4 billion of such loans as of December 31, 2017 and 2016, respectively. All else being equal, these loans are inherently riskier than those collateralized by properties that have already stabilized. As of December 31, 2017, there were no loan-specific reserves related to these loans. In addition, these unstabilized loans are included in the calculation of our portfolio reserve as discussed below.

The following table sets forth the gross carrying value of our commercial mortgage and agricultural property loans attributable to PFI excluding the Closed Block division by loan-to-value and debt service coverage ratios, as of the date indicated:

Loan-to-Value Ratio	December 31, 2017

Total commercial mortgage and other loans	\$46,485	100.0	%

Commercial Mortgage and Other Loans Quality

The portfolio is reviewed on an ongoing basis; and if certain criteria are met, loans are assigned one of the following “watch list” categories: 1) “Closely Monitored” includes a variety of considerations such as when loan metrics fall below acceptable levels, the borrower is not cooperative or has requested a material modification, or at the direction of the portfolio manager, 2) “Not in Good Standing” includes loans in default or there is a high probability of loss of principal, such as when the loan is in the process of foreclosure or the borrower is in bankruptcy. Our workout and special servicing professionals manage the loans on the watch list.

We establish an allowance for losses to provide for the risk of credit losses inherent in the lending process. The allowance includes loan-specific reserves for loans that are determined to be impaired as a result of our loan review process and a portfolio reserve for probable incurred but not specifically identified losses for loans which are not on the watch list. We define an impaired loan as a loan for which we estimate it is probable that amounts due according to the contractual terms of the loan agreement will not be collected. The loan-specific portion of the valuation allowance is based on our assessment as to ultimate collectability of loan principal and interest. Valuation allowances for an impaired loan are recorded based on the present value of expected future cash flows discounted at the loan’s effective interest rate, or based on the fair value of the collateral if the loan is collateral dependent. The portfolio reserve for incurred but not specifically identified losses considers the current credit composition of the portfolio based on the internal quality ratings mentioned above. The portfolio reserves are determined using past loan experience, including historical credit migration, loss probability and loss severity factors by property type. These factors are reviewed and updated as appropriate. The valuation allowance for commercial mortgage and other loans can increase or decrease from period to period based on these factors.

The following table sets forth the change in valuation allowances for our commercial mortgage and other loans portfolio, as of the dates indicated:

Table of Contents

	December 31, 2017	December 31, 2016
	(in millions)	
Allowance, beginning of year	\$90	\$ 95
Addition to (release of) allowance for losses	1	(6)
Charge-offs, net of recoveries	0	0
Change in foreign exchange	0	1
Allowance, end of period	\$91	\$ 90
Loan-specific reserve	\$5	\$ 6
Portfolio reserve	\$86	\$ 84

The allowance for losses as of December 31, 2017 remained relatively flat compared to December 31, 2016.

Equity Securities

Investment Mix

The equity securities attributable to PFI excluding the Closed Block division consist principally of investments in common and preferred stock of publicly-traded companies, as well as mutual fund shares. The following table sets forth the composition of our equity securities portfolio and the associated gross unrealized gains and losses, as of the dates indicated:

	December 31, 2017				December 31, 2016			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	(in millions)							
Mutual funds(1)	\$762	\$ 156	\$ 0	\$918	\$3,193	\$ 545	\$ 2	\$3,736
Other common stocks	1,841	1,076	20	2,897	2,207	1,229	16	3,420
Non-redeemable preferred stocks	11	1	1	11	9	0	2	7
Equity securities, available-for-sale, at fair value(2)	\$2,614	\$ 1,233	\$ 21	\$3,826	\$5,409	\$ 1,774	\$ 20	\$7,163

(1) As of December 31, 2016, includes cost of \$2.6 billion (fair value, \$3.1 billion) of shares in a mutual fund that invests primarily in high yield bonds. During the fourth quarter of 2017, the Company exchanged shares in this fund with a fair value of approximately \$3 billion for its proportionate share of the underlying bonds in the fund.

These bonds are reported within "Fixed maturities, available-for-sale, at fair value" as of December 31, 2017.

(2) Amounts presented exclude investments in private equity and hedge funds and other investments which are reported in "Other long-term investments."

OTTI of Equity Securities

For those equity securities classified as available-for-sale, we record unrealized gains (losses) to the extent that cost is different from estimated fair value. All securities with unrealized losses are subject to our review to identify OTTI in value. For additional information regarding our OTTI policies for equity securities, see Note 2 to the Consolidated Financial Statements.

OTTI of equity securities attributable to PFI excluding the Closed Block division that were recognized in earnings were \$23 million, \$61 million and \$111 million for the years ended December 31, 2017, 2016 and 2015, respectively.

For a further discussion of OTTI, see “—Realized Investment Gains (Losses)” above.

Other Long-Term Investments

The following table sets forth the composition of “Other long-term investments” attributable to PFI excluding the Closed Block division, as of the dates indicated:

121

Table of Contents

	December 31, 2017	December 31, 2016
	(in millions)	
Joint ventures and limited partnerships:		
Private equity	\$2,798	\$ 2,619
Hedge funds	1,761	1,708
Real estate-related	331	451
Real estate held through direct ownership(1)	1,875	1,677
Other(2)	740	776
Total other long-term investments	\$7,505	\$ 7,231

(1) As of December 31, 2017 and 2016, real estate held through direct ownership had mortgage debt of \$799 million and \$659 million, respectively.

Primarily includes leveraged leases, member and activity stock held in the Federal Home Loan Banks of New York (2) and Boston and certain derivatives. For additional information regarding our holdings in the Federal Home Loan Banks of New York and Boston, see Note 14 to the Consolidated Financial Statements.

OTTI of Other Long-Term Investments

For joint ventures and limited partnerships, the carrying value of these investments is written down or impaired to fair value when a decline in value is considered to be other-than-temporary. For additional information regarding our OTTI policies for joint ventures and limited partnerships as well as wholly-owned investment real estate and other investments, see Note 2 to the Consolidated Financial Statements.

OTTI on joint ventures and limited partnerships attributable to PFI excluding the Closed Block division that were recognized in earnings were \$16 million, \$57 million and \$121 million for the years ended December 31, 2017, 2016 and 2015, respectively. For a further discussion of OTTI, see “—Realized Investment Gains (Losses)” above.

Invested Assets of Other Entities and Operations

“Invested Assets of Other Entities and Operations” presented below includes investments held outside the general account and primarily represents investments associated with our investment management operations and derivative operations. Our derivative operations act on behalf of affiliates primarily to manage interest rate, foreign currency, credit and equity exposures. Assets within our investment management operations that are managed for third parties and those assets classified as “Separate account assets” on our balance sheet are not included.

	December 31, 2017	December 31, 2016
	(in millions)	
Fixed maturities:		
Public, available-for-sale, at fair value	\$608	\$ 237
Private, available-for-sale, at fair value	1	3
Other trading account assets, at fair value	3,369	3,959
Equity securities, available-for-sale, at fair value	8	13
Commercial mortgage and other loans, at book value(1)	634	571
Other long-term investments	1,644	1,032
Short-term investments	41	14

Total investments \$6,305 \$ 5,829

(1) Book value is generally based on unpaid principal balance, net of any allowance for losses, or at fair value, when the fair value option has been elected.

Other Trading Account Assets

Other trading account assets are primarily related to assets associated with consolidated variable interest entities for which the Company is the investment manager, as well as our derivative operations used to manage interest rate, foreign currency, credit and equity exposures. The assets of the consolidated variable interest entities are generally offset by liabilities for which the fair value option has been elected. For further information on these consolidated variable interest entities, see Note 5 to the Consolidated Financial Statements.

Table of Contents

Commercial Mortgage and Other Loans

Our investment management operations include our commercial mortgage operations, which provide mortgage origination, investment management and servicing for our general account, institutional clients, the Federal Housing Administration and government-sponsored entities such as Fannie Mae and Freddie Mac.

The mortgage loans of our commercial mortgage operations are included in “Commercial mortgage and other loans.” Derivatives and other hedging instruments related to our commercial mortgage operations are primarily included in “Other long-term investments.”

Other Long-Term Investments

Other long-term investments primarily include strategic investments made as part of our investment management operations. We make these strategic investments in real estate, as well as fixed income, public equity and real estate securities, including controlling interests. Certain of these investments are made primarily for purposes of co-investment in our managed funds and structured products. Other strategic investments are made with the intention to sell or syndicate to investors, including our general account, or for placement in funds and structured products that we offer and manage (seed investments). As part of our investment management operations, we also make loans to our managed funds that are secured by equity commitments from investors or assets of the funds. Other long-term investments also include certain assets in consolidated investment funds where the Company is deemed to exercise control over the funds.

Liquidity and Capital Resources

Overview

Liquidity refers to the ability to generate sufficient cash resources to meet the payment obligations of the Company. Capital refers to the long-term financial resources available to support the operations of our businesses, fund business growth, and provide a cushion to withstand adverse circumstances. Our ability to generate and maintain sufficient liquidity and capital depends on the profitability of our businesses, general economic conditions and our access to the capital markets and the alternate sources of liquidity and capital described herein.

Effective and prudent liquidity and capital management is a priority across the organization. Management monitors the liquidity of Prudential Financial and its subsidiaries on a daily basis and projects borrowing and capital needs over a multi-year time horizon through our periodic planning process. We believe that cash flows from the sources of funds available to us are sufficient to satisfy the current liquidity requirements of Prudential Financial and its subsidiaries, including under reasonably foreseeable stress scenarios. We have a capital management framework in place that governs the allocation of capital and approval of capital uses. We also employ a Capital Protection Framework to ensure the availability of capital resources to maintain adequate capitalization on a consolidated basis and competitive RBC ratios and solvency margins for our insurance subsidiaries under various stress scenarios.

Prudential Financial is a Designated Financial Company under Dodd-Frank. As a Designated Financial Company, Prudential Financial is subject to supervision and examination by the Federal Reserve Bank of Boston and to stricter prudential regulatory standards, which include or will include requirements and limitations (many of which are the subject of ongoing rule-making) relating to capital, leverage, liquidity, stress-testing, overall risk management, resolution and recovery plans, credit exposure reporting, early remediation, management interlocks and credit concentration. They may also include additional standards regarding enhanced public disclosure, short-term debt limits and other related subjects. In addition, the Financial Stability Board has identified the Company as a G-SII. For information on these regulatory initiatives and their potential impact on us, see “Business—Regulation” and “Risk Factors.”

During 2017, we took the following significant actions that impacted our liquidity and capital position:

- We repurchased \$1.25 billion of shares of our Common Stock and declared aggregate Common Stock dividends of \$1.3 billion;

- We issued \$750 million of junior subordinated notes to be utilized for general corporate purposes, which may include refinancing of our \$600 million aggregate principal amount of 8.875% fixed-to-floating rate junior subordinated notes and portions of our medium-term notes maturing through 2018;

- We completed a debt exchange offer, pursuant to which we issued \$1.9 billion in principal amount of senior notes in exchange for \$1.5 billion in principal amount of outstanding medium-term notes;

- We redeemed \$1.0 billion of debt previously issued through our captive financing facilities supporting Regulation XXX and Guideline AXXX non-economic reserves; and

Table of Contents

We obtained additional financing for Guideline AXXX reserves by entering into a new captive financing facility for \$1.0 billion, of which \$560 million was outstanding as of December 31, 2017.

Capital

Our capital management framework is primarily based on statutory RBC and solvency margin measures. Due to our diverse mix of businesses and applicable regulatory requirements, we apply certain refinements to the framework that are designed to more appropriately reflect risks associated with our businesses on a consistent basis across the Company.

We seek to capitalize all of our subsidiaries and businesses in accordance with their ratings targets, and we believe Prudential Financial's capitalization and use of financial leverage are consistent with those ratings targets, including considering the impacts of the Tax Act of 2017. Our long-term senior debt rating targets for Prudential Financial are "A" for Standard & Poor's Rating Services ("S&P"), Moody's Investors Service, Inc. ("Moody's"), and Fitch Ratings Ltd. ("Fitch"), and "a" for A.M. Best Company ("A.M. Best"). Our financial strength rating targets for our life insurance companies are "AA/Aa/AA" for S&P, Moody's and Fitch, respectively, and "A+" for A.M. Best. Some entities may currently be rated below these targets, and not all life insurance companies are rated by each of these rating agencies. See "—Ratings" below for a description of the potential impacts of ratings downgrades.

Capital Governance

Our capital management framework is ultimately reviewed and approved by our Board of Directors (the "Board"). The Board has adopted a Capital Policy that authorizes our Chairman and Chief Executive Officer and Vice Chairman to approve certain capital actions on behalf of the Company and to further delegate authority with respect to capital actions to appropriate officers. Any capital commitment that exceeds the authority granted to senior management under the capital policy is separately authorized by the Board.

In addition, our Capital and Finance Committee ("CFC") reviews the use and allocation of capital above certain threshold amounts to promote the efficient use of capital, consistent with our strategic objectives, ratings aspirations and other goals and targets. This management committee provides a multi-disciplinary due diligence review of specific initiatives or transactions requiring the use of capital, including mergers and acquisitions. The CFC also reviews our annual capital plan (and updates to this plan), as well as our capital, liquidity and financial position, borrowing plans, and related matters prior to the discussion of these items with the Board.

Capitalization

The primary components of the Company's capitalization consist of equity and outstanding capital debt, including junior subordinated debt. As shown in the table below, as of December 31, 2017, the Company had \$49.0 billion in capital, all of which was available to support the aggregate capital requirements of its divisions and its Corporate and Other operations. Based on our assessment of these businesses and operations, we believe this level of capital is consistent with our ratings targets.

	December 31,	
	2017	2016
	(in millions)	
Equity(1)	\$36,995	\$31,242
Junior subordinated debt (including hybrid securities)	6,622	5,817
Other capital debt	5,402	5,822

Total capital \$49,019 \$42,881

(1) Amounts attributable to Prudential Financial, excluding AOCI.

The decrease in other capital debt from December 31, 2016 primarily reflects the maturity of senior debt that was previously utilized to meet capital requirements of our businesses.

Insurance Regulatory Capital

We manage Prudential Insurance, Prudential of Japan, Gibraltar Life, and our other domestic and international insurance subsidiaries to regulatory capital levels consistent with our “AA” ratings targets. We utilize the RBC ratio as a primary measure of the capital adequacy of our domestic insurance subsidiaries and the solvency margin ratio as a primary measure of the capital adequacy of our international insurance subsidiaries.

Table of Contents

RBC is calculated based on statutory financial statements and risk formulas consistent with the practices of the NAIC. RBC considers, among other things, risks related to the type and quality of the invested assets, insurance-related risks associated with an insurer's products and liabilities, interest rate risks and general business risks. RBC ratio calculations are intended to assist insurance regulators in measuring an insurer's solvency and ability to pay future claims. The reporting of RBC measures is not intended for the purpose of ranking any insurance company or for use in connection with any marketing, advertising or promotional activities, but is available to the public.

The table below presents the RBC ratios of our most significant domestic insurance subsidiaries as of December 31, 2016, the most recent statutory fiscal year-end for these subsidiaries for which RBC information has been filed.

	Ratio
Prudential Insurance(1)	457 %
PALAC	867 %
Composite Major U.S. Insurance Subsidiaries(2)	527 %

(1) Includes PRIAC, Pruco Life, PLNJ (which is a subsidiary of Pruco Life) and PLIC.

(2) Includes Prudential Insurance and its subsidiaries, as noted above, and PALAC. Composite RBC is not reported to regulators and is based on the summation of total adjusted capital and risk charges for the included companies as determined under statutory accounting and RBC guidance to calculate a composite numerator and denominator, respectively, for purposes of calculating the composite ratio.

We expect that the Tax Act of 2017 will adversely affect the statutory capital position of our domestic insurance companies as of December 31, 2017, due to the reduction in the corporate tax rate from 35% to 21% and the resulting reduction in the value of statutory deferred tax assets and increase in certain statutory reserves. Nevertheless, although not yet filed, we expect the Prudential Insurance, PALAC and Composite RBC ratios to be greater than 400% as of December 31, 2017, even after giving effect to impacts from the Tax Act of 2017.

In addition, the NAIC is expected to revise the RBC requirements for future periods to reflect the Tax Act of 2017, which may further adversely affect the statutory capital position of our domestic insurance subsidiaries in future periods. While the impact of the NAIC rules will not be fully known until the final updated RBC requirements are formally issued and adopted, the updated requirements may cause the regulatory capital levels of our domestic insurance subsidiaries to be below our "AA" ratings targets, in which case we would expect to fund any additional capital necessary to get back to our target levels using available capital and/or funding obtained through the capital markets.

Similar to the RBC ratios that are employed by U.S. insurance regulators, regulatory authorities in the international jurisdictions in which we operate generally establish some form of minimum solvency margin requirements for insurance companies based on local statutory accounting practices. These solvency margins are a primary measure of the capital adequacy of our international insurance operations. Maintenance of our solvency margins at certain levels is also important to our competitive positioning, as in certain jurisdictions, such as Japan, these solvency margins are required to be disclosed to the public and therefore impact the public perception of an insurer's financial strength.

The table below presents the solvency margin ratios of our most significant international insurance subsidiaries as of September 30, 2017, the most recent date for which this information is available.

	Ratio
Prudential of Japan consolidated(1)	893 %
Gibraltar Life consolidated(2)	935 %

(1) Includes Prudential Trust Co., Ltd., a subsidiary of Prudential of Japan.

(2)Includes PGFL, a subsidiary of Gibraltar Life.

Although not yet filed, we expect the solvency margin ratio for each of these subsidiaries to be greater than 700% as of December 31, 2017.

All of our domestic and significant international insurance subsidiaries have capital levels that substantially exceed the minimum level required by applicable insurance regulations. Our regulatory capital levels may be affected in the future by changes to the applicable regulations, proposals for which are currently under consideration by both domestic and international insurance regulators. For further information on the calculation of RBC and solvency margin ratios, as well as regulatory minimums, see Note 15 to the Consolidated Financial Statements.

Capital Protection Framework

125

Table of Contents

We employ a “Capital Protection Framework” (the “Framework”) to ensure that sufficient capital resources are available to maintain adequate capitalization on a consolidated basis and competitive RBC ratios and solvency margins for our insurance subsidiaries under various stress scenarios. The Framework incorporates the potential impacts from market related stresses, including equity markets, real estate, interest rates, credit losses, and foreign currency exchange rates. In evaluating these potential impacts, we assess risk holistically at the enterprise level, recognizing that our business mix may produce results that partially offset on a net basis.

The Framework accommodates periodic volatility within ranges that we deem acceptable, while also providing for additional potential sources of capital, which include on-balance sheet capital capacity and contingent sources of capital. We believe we currently have access to sufficient resources to maintain adequate capitalization and competitive RBC ratios and solvency margins under a range of potential stress scenarios.

Captive Reinsurance Companies

We use captive reinsurance companies in our domestic insurance operations to more effectively manage our reserves and capital on an economic basis and to enable the aggregation and transfer of risks. Our captive reinsurance companies assume business from affiliates only. To support the risks they assume, our captives are capitalized to a level we believe is consistent with the “AA” financial strength rating targets of our insurance subsidiaries. All of our captive reinsurance companies are wholly-owned subsidiaries and are located domestically, typically in the state of domicile of the direct writing insurance subsidiary that cedes the majority of business to the captive. In addition to state insurance regulation, our captives are subject to internal policies governing their activities. In the normal course of business we contribute capital to the captives to support business growth and other needs. Prudential Financial has also entered into support agreements with the captives in connection with financing arrangements.

Our domestic life insurance subsidiaries are subject to a regulation entitled “Valuation of Life Insurance Policies Model Regulation,” commonly known as “Regulation XXX,” and a supporting guideline entitled “The Application of the Valuation of Life Insurance Policies Model Regulation,” commonly known as “Guideline AXXX.” The regulation and supporting guideline require insurers to establish statutory reserves for term and universal life insurance policies with long-term premium guarantees at a level that exceeds what our actuarial assumptions for this business would otherwise require. We use captive reinsurance companies to finance the portion of the reserves for this business that we consider to be non-economic as described below under “—Financing Activities—Subsidiary borrowings—Financing of regulatory reserves associated with domestic life insurance products.”

Shareholder Distributions

Share Repurchase Program and Shareholder Dividends

In December 2016, the Board authorized the Company to repurchase at management’s discretion up to \$1.25 billion of its outstanding Common Stock during the period from January 1, 2017 through December 31, 2017.

In December 2017, the Board authorized the Company to repurchase at management’s discretion up to \$1.5 billion of its outstanding Common Stock during the period from January 1, 2018 through December 31, 2018.

The timing and amount of share repurchases are determined by management based on market conditions and other considerations, including any increased capital needs of our businesses due to, among other things, changes in regulatory capital requirements and opportunities for growth and acquisitions. Repurchases may be effected in the open market, through derivative, accelerated repurchase and other negotiated transactions and through plans designed to comply with Rule 10b5-1(c) under the Exchange Act.

The following table sets forth information about declarations of Common Stock dividends, as well as repurchases of shares of Prudential Financial's Common Stock, for each of the quarterly periods in 2017 and for the prior four years.

126

Table of Contents

Quarterly period ended:	Dividend	Shares Repurchased		
	Amount	Aggregate	Shares	Total Cost
	Per Share			
	(in millions, except per share data)			
December 31, 2017	\$0.75	\$ 321	2.8	\$ 313
September 30, 2017	\$0.75	\$ 324	2.9	\$ 312
June 30, 2017	\$0.75	\$ 328	2.9	\$ 313
March 31, 2017	\$0.75	\$ 327	2.9	\$ 312

Year ended:	Dividend	Shares Repurchased		
	Amount	Aggregate	Shares	Total Cost
	Per Share			
	(in millions, except per share data)			
December 31, 2016	\$2.80	\$ 1,245	25.1	\$ 2,000
December 31, 2015	\$2.44	\$ 1,115	12.1	\$ 1,000
December 31, 2014	\$2.17	\$ 1,005	11.6	\$ 1,000
December 31, 2013	\$1.73	\$ 810	10.0	\$ 750

In addition, on February 7, 2018, the Board declared a cash dividend of \$0.90 per share of Common Stock, payable on March 15, 2018 to shareholders of record as of February 21, 2018.

Liquidity

The principles of our liquidity management framework are described in an enterprise-wide Liquidity Management Policy that is reviewed and approved by the Board. Liquidity management and stress testing are performed on a legal entity basis as the ability to transfer funds between subsidiaries is limited due in part to regulatory restrictions. Liquidity needs are determined through daily and quarterly cash flow forecasting at the holding company and within our operating subsidiaries. A minimum balance of highly liquid assets of at least \$1.3 billion is targeted to ensure that adequate liquidity is available at Prudential Financial to cover fixed expenses in the event that we experience reduced cash flows from our operating subsidiaries at a time when access to capital markets is also not available. This targeted minimum balance is reviewed and approved annually by the Board.

We seek to mitigate the risk of having limited or no access to financing due to stressed market conditions by generally pre-funding debt in advance of maturity. We mitigate the refinancing risk associated with our debt that is used to fund operating needs by matching the term of debt with the assets financed. To ensure adequate liquidity in stress scenarios, stress testing is performed for our major operating subsidiaries. We seek to further mitigate liquidity risk by maintaining our access to alternative sources of liquidity, as discussed below.

Liquidity of Prudential Financial

The principal sources of funds available to Prudential Financial, the parent holding company, are dividends, returns of capital and loans from subsidiaries, and proceeds from debt issuances and certain stock-based compensation activity. These sources of funds may be supplemented by Prudential Financial's access to the capital markets as well as the "—Alternative Sources of Liquidity" described below.

The primary uses of funds at Prudential Financial include servicing debt, making capital contributions and loans to subsidiaries, paying declared shareholder dividends and repurchasing outstanding shares of Common Stock executed

under authority from the Board.

As of December 31, 2017, Prudential Financial had highly liquid assets with a carrying value totaling \$5,190 million. Highly liquid assets predominantly include cash, short-term investments, U.S. Treasury securities, obligations of other U.S. government authorities and agencies, and/or foreign government bonds. We maintain an intercompany liquidity account that is designed to optimize the use of cash by facilitating the lending and borrowing of funds between Prudential Financial and its subsidiaries on a daily basis. Excluding net borrowings from this intercompany liquidity account, Prudential Financial had highly liquid assets of \$4,376 million as of December 31, 2017, a decrease of \$177 million from December 31, 2016.

The following table sets forth Prudential Financial's principal sources and uses of highly liquid assets, excluding net borrowings from our intercompany liquidity account, for the periods indicated.

127

Table of Contents

	Year Ended December 31,	
	2017	2016
	(in millions)	
Sources:		
Dividends and/or returns of capital from subsidiaries(1)	\$ 3,124	\$ 3,843
Proceeds from the issuance of junior subordinated debt	743	0
Proceeds from stock-based compensation and exercise of stock options	491	625
Interest income from subsidiaries on intercompany agreements, net of interest paid	230	214
Net income tax receipts	213	544
Net receipts under intercompany loan agreements(2)	190	43
Net distributions from subsidiaries associated with the Variable Annuities Recapture(3)	0	1,042
Total sources	4,991	6,311
Uses:		
Common Stock dividends(4)	\$ 1,296	\$ 1,300
Share repurchases	1,250	2,000
Capital contributions to subsidiaries(5)	1,135	939
Interest paid on external debt	907	902
Maturities of long-term external debt	480	750
Repurchase of medium-term notes	0	500
Class B Stock repurchase settlement	0	119
Other, net	100	310
Total uses	5,168	6,820
Net increase (decrease) in highly liquid assets	\$ (177)	\$ (509)

See “Item 15—Schedule II—Notes to Condensed Financial Information of Registrant—Dividends and Returns of Capital” (1) for dividends and returns of capital by company. Amounts above exclude dividends and returns of capital associated with the Variable Annuities Recapture.

2017 includes net receipts from subsidiaries of \$1,323 million from international subsidiaries offset by net borrowing of \$500 million by Prudential Universal Reinsurance Company, \$350 million by Prudential Arizona Reinsurance Universal Company, \$274 million by Investment Management subsidiaries, and \$9 million by other subsidiaries. 2016 includes net receipts from subsidiaries of \$378 million from Pruco Life, \$116 million from (2) PLNJ, net proceeds of \$644 million from the issuance of notes to international insurance subsidiaries, offset by net borrowing of \$600 million by Prudential Universal Reinsurance Company, \$490 million by Investment Management subsidiaries and \$5 million by other subsidiaries. Amounts above exclude receipts associated with the Variable Annuities Recapture.

Effective April 1, 2016, we recaptured the risks related to our variable annuities living benefit riders and certain retirement products that were previously reinsured to a captive reinsurance company. These risks were recaptured (3) by the insurance entities that issued the base contracts, thereby allowing us to manage the capital and liquidity risks of these products more efficiently by aggregating both the risks and the assets supporting these risks within these insurance entities. This series of transactions is collectively referred to as the “Variable Annuities Recapture.”

(4) Includes cash payments made on dividends declared in prior periods.

2017 includes capital contributions of \$965 million to international insurance subsidiaries, \$149 million to Prudential Insurance, and \$21 million to Investment Management subsidiaries. 2016 includes capital contributions (5) of \$824 million to international insurance subsidiaries, \$36 million to Pruco Re, \$74 million to Investment Management subsidiaries, and \$5 million to other subsidiaries. Amounts above exclude capital contributions associated with the Variable Annuities Recapture.

Restrictions on Dividends and Returns of Capital from Subsidiaries

Our insurance companies are subject to limitations on the payment of dividends and other transfers of funds to Prudential Financial and other affiliates under applicable insurance law and regulation. Also, more generally, the payment of dividends by any of our subsidiaries is subject to declaration by their Board of Directors and can be affected by market conditions and other factors. See Note 15 to the Consolidated Financial Statements for details on specific dividend restrictions.

Domestic insurance subsidiaries. Prudential Insurance is permitted to pay ordinary dividends based on calculations specified under New Jersey insurance law, subject to prior notification to NJDOBI. Any distributions above this amount in any twelve month period are considered to be “extraordinary” dividends, and the approval of the NJDOBI is required prior to payment. The laws regulating dividends of the states where our other domestic insurance companies are domiciled are similar, but not identical, to New Jersey’s. During 2017, Prudential Financial received an ordinary dividend of \$1.0 billion from Prudential Insurance and extraordinary dividends of \$950 million from PALAC.

Table of Contents

International insurance subsidiaries. Capital redeployment from our international insurance subsidiaries is subject to local regulatory requirements in the international jurisdictions in which they operate. Our most significant international insurance subsidiaries, Prudential of Japan and Gibraltar Life, are permitted to pay common stock dividends based on calculations specified by Japanese insurance law, subject to prior notification to the FSA. Dividends in excess of these amounts and other forms of capital distribution require the prior approval of the FSA. In addition to paying common stock dividends, international insurance operations may return capital to Prudential Financial through other means, such as the repayment of subordinated debt or preferred stock obligations held by Prudential Financial or other affiliates. The regulatory fiscal year end for both Prudential of Japan and Gibraltar Life is March 31, 2018, after which time the common stock dividend amount permitted to be paid without prior approval from the FSA can be determined.

As of December 31, 2017, Prudential Holdings of Japan, Inc. (“PHJ”), the parent of the Company’s Japanese operations, retained \$248 million of dividends received from its international insurance subsidiaries in 2016, that remained available to be paid as a dividend to Prudential Financial.

Other subsidiaries. The ability of our asset management subsidiaries and the majority of our other operating subsidiaries to pay dividends is largely unrestricted from a regulatory standpoint.

Liquidity of Insurance Subsidiaries

We manage the liquidity of our insurance operations to ensure stable, reliable and cost-effective sources of cash flows to meet all of our obligations. Liquidity within each of our insurance subsidiaries is provided by a variety of sources, including portfolios of liquid assets. The investment portfolios of our subsidiaries are integral to the overall liquidity of our insurance operations. We segment our investment portfolios and employ an asset/liability management approach specific to the requirements of each of our product lines. This enhances the discipline applied in managing the liquidity, as well as the interest rate and credit risk profiles, of each portfolio in a manner consistent with the unique characteristics of the product liabilities.

Liquidity is measured against internally-developed benchmarks that take into account the characteristics of both the asset portfolio and the liabilities that they support. We consider attributes of the various categories of liquid assets (for example, type of asset and credit quality) in calculating internal liquidity measures to evaluate our insurance operations’ liquidity under various stress scenarios, including company-specific and market-wide events. We continue to believe that cash generated by ongoing operations and the liquidity profile of our assets provide sufficient liquidity under reasonably foreseeable stress scenarios for each of our insurance subsidiaries.

Cash Flow

The principal sources of liquidity for our insurance subsidiaries are premiums, investment and fee income, and investment maturities and sales associated with our insurance and annuity operations, as well as internal and external borrowings. The principal uses of that liquidity include benefits, claims and dividends paid to policyholders, and payments to policyholders and contractholders in connection with surrenders, withdrawals and net policy loan activity. Other uses of liquidity may include commissions, general and administrative expenses, purchases of investments, the payment of dividends to the parent holding company, hedging and reinsurance activity and payments in connection with financing activities.

In each of our major insurance subsidiaries, we believe that the cash flows from operations are adequate to satisfy current liquidity requirements, including considering the impacts of the Tax Act of 2017. The continued adequacy of this liquidity will depend upon factors such as future securities market conditions, changes in interest rate levels, policyholder perceptions of our financial strength, policyholder behavior, catastrophic events and the relative safety

and attractiveness of competing products, each of which could lead to reduced cash inflows or increased cash outflows. Our insurance operations' cash flows from investment activities result from repayments of principal, proceeds from maturities and sales of invested assets and investment income, net of amounts reinvested. The primary liquidity risks with respect to these cash flows are the risk of default by debtors or bond insurers, our counterparties' willingness to extend repurchase and/or securities lending arrangements, commitments to invest and market volatility. We closely manage these risks through our credit risk management process and regular monitoring of our liquidity position.

Domestic insurance operations. In managing the liquidity of our domestic insurance operations, we consider the risk of policyholder and contractholder withdrawals of funds earlier than our assumptions when selecting assets to support these contractual obligations. We use surrender charges and other contract provisions to mitigate the extent, timing and profitability impact of withdrawals of funds by customers. The following table sets forth the liabilities for future policy benefits and policyholders' account balances of certain of our domestic insurance subsidiaries as of the dates indicated.

Table of Contents

	December 31,	
	2017	2016
	(in billions)	
Prudential Insurance	\$197.9	\$190.5
PLIC	53.2	53.7
Pruco Life	38.7	35.4
PRIAC	26.4	26.4
PALAC	14.0	13.4
Other(1)	(87.3)	(83.2)
Total future policy benefits and policyholders' account balances(2)	\$242.9	\$236.2

(1) Includes the impact of intercompany eliminations.

(2) Amounts are reflected gross of affiliated reinsurance recoverables.

The liabilities presented above are primarily supported by invested assets in our general account. As noted above, when selecting assets to support these contractual obligations, we consider the risk of policyholder and contractholder withdrawals of funds earlier than our assumptions. As a result, assets will include both liquid assets, as discussed below, and other assets that we believe adequately support our liabilities.

For Prudential Insurance and other subsidiaries, the liabilities presented above primarily include annuity reserves and deposit liabilities and individual life insurance policy reserves. Individual life insurance policies may impose surrender charges and policyholders may be subject to a new underwriting process in order to obtain a new insurance policy. Prudential Insurance's reserves for group annuity contracts primarily relate to pension risk transfer contracts, which are generally not subject to early withdrawal. For our individual annuity contracts, to encourage persistency, most of our variable and fixed annuities have surrender or withdrawal charges for a specified number of years. In addition, certain fixed annuities impose a market value adjustment if the invested amount is not held to maturity. The living benefit features of our variable annuities also encourage persistency because the potential value of the living benefit is fully realized only if the contract persists.

For PRIAC, the liabilities presented above primarily include reserves for stable value contracts. Although many of these contracts are subject to discretionary withdrawal, withdrawals are typically at the market value of the underlying assets. Risk is further reduced by the high persistency of clients driven in part by our competitive position in our target markets and contractual provisions such as deferred payouts.

Gross account withdrawals for our domestic insurance operations' products in 2017 were generally consistent with our assumptions in asset/liability management, and the associated cash outflows did not have a material adverse impact on our overall liquidity.

International insurance operations. As with our domestic operations, in managing the liquidity of our international insurance operations, we consider the risk of policyholder and contractholder withdrawals of funds earlier than our assumptions in selecting assets to support these contractual obligations. The following table sets forth the liabilities for future policy benefits and policyholders' account balances of certain of our international insurance subsidiaries as of the dates indicated.

December 31,
2017 2016

(in billions)

Prudential of Japan(1)	\$47.1	\$42.0
Gibraltar Life(2)	99.6	95.2
All other international insurance subsidiaries(3)	15.9	12.7
Total future policy benefits and policyholders' account balances(4)	\$162.6	\$149.9

As of December 31, 2017 and 2016, \$11.8 billion and \$10.3 billion, respectively, of the insurance-related liabilities (1) for Prudential of Japan are associated with U.S. dollar-denominated products that are coinsured to our domestic insurance operations and supported by U.S. dollar-denominated assets.

(2) Includes PGFL.

(3) Represents our international insurance operations, excluding Japan.

(4) Amounts are reflected gross of affiliated reinsurance recoverables.

The liabilities presented above are primarily supported by invested assets in our general account. When selecting assets to support these contractual obligations, we consider the risk of policyholder and contractholder withdrawals of funds earlier than our assumptions. As a result, assets will include both liquid assets, as discussed below, and other assets that we believe adequately support our liabilities.

Table of Contents

We believe most of the longer-term recurring pay individual life insurance policies sold by our Japanese operations do not have significant withdrawal risk because policyholders may incur surrender charges and must undergo a new underwriting process to obtain a new insurance policy.

Gibraltar Life sells fixed annuities, denominated in U.S. and Australian dollars, that may be subject to increased surrenders should the yen depreciate in relation to these currencies or if interest rates in Australia and the U.S. decline relative to Japan. A significant portion of the liabilities associated with these contracts include a market value adjustment feature, which mitigates the profitability impact from surrenders. As of December 31, 2017, products with a market value adjustment feature represented \$24.5 billion of our Japan operations' insurance-related liabilities, which included \$20.6 billion attributable to non-yen denominated fixed annuities.

Liquid Assets

Liquid assets include cash and cash equivalents, short-term investments, U.S. Treasury securities, fixed maturities that are not designated as held-to-maturity and public equity securities. In addition to access to substantial investment portfolios, our insurance companies' liquidity is managed through access to a variety of instruments available for funding and/or managing cash flow mismatches, including from time to time those arising from claim levels in excess of projections. Our ability to utilize assets and liquidity between our subsidiaries is limited by regulatory and other constraints. We believe that ongoing operations and the liquidity profile of our assets provide sufficient liquidity under reasonably foreseeable stress scenarios for each of our insurance subsidiaries.

The following table sets forth the fair value of certain of our domestic insurance operations' portfolio of liquid assets, as of the dates indicated.

	December 31, 2017						December 31,
	Prudential Insurance	PLIC	PRIAC	PALAC	Pruco Life	Total	2016

Table of Contents

(4) As of December 31, 2017, \$104.2 billion, or 72%, were invested in government or government agency bonds.

Given the size and liquidity profile of our investment portfolios, we believe that claim experience, including policyholder withdrawals and surrenders, varying from our projections does not constitute a significant liquidity risk. Our asset/liability management process takes into account the expected maturity of investments and expected claim payments as well as the specific nature and risk profile of the liabilities. To the extent we need to pay claims in excess of projections, we may borrow temporarily or sell investments sooner than anticipated to pay these claims, which may result in increased borrowing costs or realized investment gains or losses, including from changes in interest rates or credit spreads. The payment of claims and sale of investments earlier than anticipated would have an impact on the reported level of cash flow from operating, investing, and financing activities, in our financial statements. Historically, there has been no significant variation between the expected maturities of our investments and the payment of claims.

Liquidity associated with other activities

Hedging activities associated with Individual Annuities

For the portion of our Individual Annuities' ALM strategy executed through hedging, as well as the Capital Hedge Program, we enter into a range of exchange-traded, cleared and other OTC equity and interest rate derivatives in order to hedge certain capital market risks related to more severe market conditions. For a full discussion of our Individual Annuities' risk management strategy, see "—Results of Operations by Segment—U.S. Individual Solutions Division—Individual Annuities." This portion of our Individual Annuities' ALM strategy and Capital Hedge Program requires access to liquidity to meet payment obligations relating to these derivatives, such as payments for periodic settlements, purchases, maturities and terminations. These liquidity needs can vary materially due to, among other items, changes in interest rates, equity markets, mortality and policyholder behavior.

The hedging portion of our Individual Annuities' ALM strategy and Capital Hedge Program may also result in derivatives-related collateral postings to (when we are in a net pay position) or from (when we are in a net receive position) counterparties. The net collateral position depends on changes in interest rates and equity markets related to the amount of the exposures hedged. Depending on market conditions, the collateral posting requirements can result in material liquidity needs when we are in a net pay position. As of December 31, 2017, the derivatives comprising the hedging portion of our ALM strategy and Capital Hedge Program were in a net receive position of \$3.3 billion compared to a net receive position of \$3.1 billion as of December 31, 2016. The change in collateral position was primarily driven by a decrease in interest rates.

Foreign exchange hedging activities

We employ various hedging strategies to manage potential exposure to foreign currency exchange rate movements, particularly those associated with the yen. Our overall yen hedging strategy calibrates the hedge level to preserve the relative contribution of our yen-based business to the Company's overall return on equity on a leverage neutral basis. The hedging strategy includes two primary components:

Income Hedges—We hedge a portion of our prospective yen-based earnings streams by entering into external forward currency derivative contracts that effectively fix the currency exchange rates for that portion of earnings, thereby reducing volatility from foreign currency exchange rate movements. As of December 31, 2017, we have hedged 100%, 73% and 28% of expected yen-based earnings for 2018, 2019 and 2020, respectively.

Equity Hedges—We hold both internal and external hedges primarily to hedge our U.S. dollar-equivalent equity. These hedges also mitigate volatility in the solvency margins of yen-based subsidiaries resulting from changes in the market value of their U.S. dollar-denominated investments hedging our U.S. dollar-equivalent equity attributable to changes in the yen-U.S. dollar exchange rate.

For additional information on our hedging strategy, see “—Results of Operations—Impact of Foreign Currency Exchange Rates.”

Cash settlements from these hedging activities result in cash flows between subsidiaries of Prudential Financial and either international-based subsidiaries or external parties. The cash flows are dependent on changes in foreign currency exchange rates and the notional amount of the exposures hedged. For example, a significant yen depreciation over an extended period of time could result in net cash inflows, while a significant yen appreciation could result in net cash outflows. The following tables set forth information about net cash settlements and the net asset or liability resulting from these hedging activities related to the yen and other currencies.

Table of Contents

	Year ended December 31,	
	2017	2016
Cash Settlements:	(in millions)	
Income Hedges (External)(1)	\$ (16)	\$ 38
Equity Hedges:		
Internal(2)	54	(57)

Total Equity Hedges	\$ (138)	\$ 595
Total Cash Settlements	\$ (154)	\$ 633
	As of	
	December 31,	
Assets (Liabilities):	2017	2016
	(in millions)	
Income Hedges (External)(3)	\$ (42)	\$ 85
Equity Hedges:		
Internal(2)	623	802
External	303	32
Total Equity Hedges(4)	\$ 926	\$ 834
Total Assets (Liabilities)	\$ 884	\$ 919

Includes non-yen related cash settlements of \$(14) million, primarily denominated in Brazilian real and Chilean (1) peso, and \$17 million, primarily denominated in Korean won, for the year ended December 31, 2017 and 2016, respectively.

(2) Represents internal transactions between international-based and U.S.-based entities. Amounts noted are from the U.S.-based entities' perspectives.

(3) Includes non-yen related liabilities of \$(65) million and assets of \$41 million as of December 31, 2017 and 2016, respectively, both of which were primarily denominated in Korean won and Australian dollar.

As of December 31, 2017, approximately \$322 million, \$506 million and \$98 million of the net market value is (4) scheduled to settle in 2018, 2019 and thereafter, respectively. The net market value of the assets (liabilities) will vary with changing market conditions to the extent there are no corresponding offsetting positions.

Investment Management operations

The principal sources of liquidity for our fee-based investment management businesses include asset management fees and commercial mortgage origination and servicing fees. The principal uses of liquidity include general and administrative expenses and distributions of dividends and returns of capital to Prudential Financial. The primary liquidity risks for our fee-based investment management businesses relate to their profitability, which is impacted by market conditions and our investment management performance. We believe the cash flows from our fee-based investment management businesses are adequate to satisfy the current liquidity requirements of these operations, as well as requirements that could arise under reasonably foreseeable stress scenarios, which are monitored through the use of internal measures.

The principal sources of liquidity for our strategic investments held in our investment management businesses are cash flows from investments, the ability to liquidate investments, and available borrowing lines from internal sources, including Prudential Financial and Prudential Funding, LLC ("Prudential Funding"), a wholly-owned subsidiary of Prudential Insurance. The primary liquidity risks include the inability to sell assets in a timely manner, declines in the value of assets and credit defaults. There were no material changes to the liquidity position of our investment management operations during 2017.

Alternative Sources of Liquidity

In addition to the sources of liquidity discussed above, and asset-based financing as discussed below, Prudential Financial and certain subsidiaries have access to other sources of liquidity, including syndicated, unsecured committed credit facilities, membership in the Federal Home Loan Banks, commercial paper programs, and a put option agreement. See Note 14 to our Consolidated Financial Statements for more information on these sources of liquidity.

Asset-based Financing

Table of Contents

We conduct asset-based or secured financing within our insurance and other subsidiaries, including transactions such as securities lending, repurchase agreements and mortgage dollar rolls, to earn spread income, to borrow funds, or to facilitate trading activity. These programs are primarily driven by portfolio holdings of securities that are lendable based on counterparty demand for these securities in the marketplace. The collateral received in connection with these programs is primarily used to purchase securities in the short-term spread portfolios of our insurance entities. Investments held in the short-term spread portfolios include cash and cash equivalents, short-term investments (primarily corporate bonds), mortgage loans and fixed maturities (primarily investments in collateralized loan obligations and other structured securities), with a weighted average life at time of purchase by the short-term portfolios of four years or less. Floating rate assets comprise the majority of our short-term spread portfolio. These short-term portfolios are subject to specific investment policy statements, which among other things, do not allow for significant asset/liability interest rate duration mismatch.

The following table sets forth our liabilities under asset-based or secured financing programs as of the dates indicated.

	December 31, 2017			December 31, 2016		
	PFI			PFI		
	Excluding	Closed	Consolidated	Excluding	Closed	Consolidated
	Closed Block	Block	Block	Closed Block	Block	Block
	Division	Division	Division	Division	Division	Division
	(\$ in millions)

Cash collateral for loaned securities	3,203	1,151	4,354	3,057	1,276	4,333
Securities sold but not yet purchased	3	0	3	2	0	2
Total(1)	\$8,166	\$4,591	\$ 12,757	\$7,965	\$3,976	\$ 11,941
Portion of above securities that may be returned to the Company overnight requiring immediate return of the cash collateral	\$3,838	\$1,393	\$ 5,231	\$3,583	\$1,631	\$ 5,214
Weighted average maturity, in days(2)	12	3		9	6	

The daily weighted average outstanding balance for the year ended December 31, 2017 and 2016 was \$8,279 (1) million and \$8,436 million, respectively, for PFI excluding the Closed Block division, and \$4,894 million and \$4,249 million, respectively, for the Closed Block division.

(2) Excludes securities that may be returned to the Company overnight.

As of December 31, 2017, our domestic insurance entities had assets eligible for the asset-based or secured financing programs of \$113.8 billion, of which \$12.8 billion were on loan. Taking into account market conditions and outstanding loan balances as of December 31, 2017, we believe approximately \$17.1 billion of the remaining eligible assets are readily lendable, including approximately \$12.5 billion relating to PFI excluding the Closed Block division, of which \$3.1 billion relates to certain separate accounts and may only be used for financing activities related to those accounts, and the remaining \$4.6 billion relating to the Closed Block division.

Financing Activities

As of December 31, 2017 and 2016, total short-term and long-term debt of the Company on a consolidated basis was \$18.6 billion and \$19.2 billion, respectively. We may, from time to time, seek to redeem or repurchase our outstanding debt securities through open market purchases, individually negotiated transactions or otherwise. Any such repurchases will depend on prevailing market conditions, our liquidity position and other factors. The following table sets forth total consolidated borrowings of the Company as of the dates indicated.

Table of Contents

	December 31, 2017			December 31, 2016		
	Prudential Financial	Subsidiaries	Consolidated	Prudential Financial	Subsidiaries	Consolidated
	(in millions)

Long-term debt	0	799	799	0	586	586
Subtotal	0	799	799	0	659	659
Total borrowings	\$16,184	\$ 2,368	\$ 18,552	\$15,924	\$ 3,250	\$ 19,174

(1) Amounts are net of assets under set-off arrangements of \$7,287 million and \$5,859 million as of December 31, 2017 and 2016, respectively.

(2) Limited and non-recourse borrowing represents mortgage debt of our subsidiaries that has recourse only to real estate investment property.

As of December 31, 2017 and 2016, we were in compliance with all debt covenants related to the borrowings in the table above. For further information on our short- and long-term debt obligations, see Note 14 to our Consolidated Financial Statements.

Based on the use of proceeds, we classify our borrowings as capital debt, investment-related debt, and debt related to specified businesses. Capital debt, which is debt utilized to meet the capital requirements of our businesses, was \$12.0 billion and \$11.6 billion as of December 31, 2017 and 2016, respectively. Investment-related debt of \$4.0 billion and \$5.4 billion as of December 31, 2017 and 2016, respectively, consists of debt issued to finance specific investment assets or portfolios of investment assets, the proceeds from which will service the debt. Specifically, this includes institutional spread lending investment portfolios, assets supporting reserve requirements under Regulation XXX and Guideline AXXX as described below, as well as funding for institutional and insurance company portfolio cash flow timing differences. Our remaining borrowings are utilized for business funding to meet specific purposes, which may include funding new business acquisition costs associated with our individual annuities business, operating needs associated with hedging our individual annuities products as discussed above and activities associated with our investment management business.

Prudential Financial Borrowings

Long-term borrowings are conducted primarily by Prudential Financial. It borrows these funds to meet its capital and other funding needs, as well as the capital and funding needs of its subsidiaries. Prudential Financial maintains a shelf registration statement with the SEC that permits the issuance of public debt, equity and hybrid securities. As a "Well-Known Seasoned Issuer" under SEC rules, Prudential Financial's shelf registration statement provides for automatic effectiveness upon filing and has no stated issuance capacity.

In December 2017, we completed a debt exchange offer, pursuant to which we issued \$1.9 billion in principal amount of senior notes in exchange for \$1.5 billion in principal amount of outstanding medium-term notes. The newly-issued notes consist of \$1.0 billion maturing in 2049 bearing interest at 3.94% per annum and \$900 million maturing in 2047 bearing interest at 3.91% per annum. The medium-term notes received in exchange comprised principal amounts from eight different series of notes with maturity dates between 2033 and 2043 bearing interest at rates between 5.1% and 6.63% per annum.

Prudential Financial's borrowings increased \$0.3 billion from December 31, 2016, driven by the issuance of \$0.8 billion of junior subordinated debt, partially offset by maturities of \$0.5 billion. For more information on long-term debt, see Note 14 to the Consolidated Financial Statements.

Subsidiary Borrowings

135

Table of Contents

Subsidiary borrowings principally consist of commercial paper borrowings by Prudential Funding, asset-based financing and real estate investment financing. Borrowings of our subsidiaries decreased \$0.8 billion from December 31, 2016, primarily driven by prepayments of \$0.5 billion of senior debt and \$0.5 billion of surplus notes, offset by the issuance of \$0.2 billion of mortgage debt.

Term and Universal Life Reserve Financing

Regulation XXX and Guideline AXXX require domestic life insurers to establish statutory reserves for term and universal life insurance policies with long-term premium guarantees that are consistent with the statutory reserves required for other individual life policies with similar guarantees. Many market participants believe that these levels of reserves are excessive relative to the levels reasonably required to maintain solvency for moderately adverse experience. The difference between the statutory reserve and the amount necessary to maintain solvency for moderately adverse experience is considered to be the non-economic portion of the statutory reserve.

We use captive reinsurance subsidiaries to finance the portion of the statutory reserves required to be held by our domestic life insurance companies under Regulation XXX and Guideline AXXX that we consider to be non-economic. The financing arrangements involve the reinsurance of term and universal life business to our captive reinsurers and the issuance of surplus notes by those captives that are treated as capital for statutory purposes. These surplus notes are subordinated to policyholder obligations, and the payment of principal on the surplus notes may only be made with prior insurance regulatory approval.

We have entered into agreements with external counterparties providing for the issuance of surplus notes by our captive reinsurers in return for the receipt of credit-linked notes (“Credit-Linked Note Structures”). As of December 31, 2017, we had Credit-Linked Note Structures with an aggregate issuance capacity of \$11,100 million, of which \$9,487 million was outstanding, as compared to an aggregate issuance capacity of \$9,150 million, of which \$7,759 million was outstanding, as of December 31, 2016. Under the agreements, the captive receives in exchange for the surplus notes one or more credit-linked notes issued by a special-purpose affiliate of the Company with an aggregate principal amount equal to the surplus notes outstanding. The captive holds the credit-linked notes as assets supporting Regulation XXX or Guideline AXXX non-economic reserves, as applicable. The captive can redeem the principal amount of the outstanding credit-linked notes for cash upon the occurrence of, and in an amount necessary to remedy, a specified liquidity stress event affecting the captive. Under the agreements, the external counterparties have agreed to fund any such payments under the credit-linked notes in return for the receipt of fees. Under certain of the transactions, Prudential Financial has agreed to make capital contributions to the captive to reimburse it for investment losses in excess of specified amounts and/or has agreed to reimburse the external counterparties for any payments made under the credit-linked notes. To date, no such payments under the credit-linked notes have been required. Under these transactions, because valid rights of set-off exist, interest and principal payments on the surplus notes and on the credit-linked notes are settled on a net basis, and the surplus notes are reflected in the Company’s total consolidated borrowings on a net basis.

The following table summarizes our Credit-Linked Note Structures, which are reported on a net basis, as of December 31, 2017.

Credit-Linked Note Structures:	Surplus Notes		Outstanding as of December 31, 2017	Facility Size
	Original Issue Dates	Maturity Dates		
	(\$ in millions)			

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-K

XXX	2011-2014	2021-2024	\$ 1,750	(1)	\$ 2,000
AXXX	2013	2033	2,877		3,500
XXX	2014-2017	2022-2034	2,200	(2)	2,200
XXX	2014-2017	2024-2037	2,100		2,400
AXXX	2017	2037	560		1,000
Total Credit-Linked Note Structures			\$ 9,487		\$ 11,100

(1) Prudential Financial has agreed to reimburse any amounts paid under the credit-linked notes issued in this structure.

The \$2.2 billion of surplus notes represents an intercompany transaction that eliminates upon consolidation.

(2) Prudential Financial has agreed to reimburse amounts paid under credit-linked notes issued in this structure up to \$1.0 billion.

As of December 31, 2017, we also had outstanding an aggregate of \$2.9 billion of debt issued for the purpose of financing Regulation XXX and Guideline AXXX non-economic reserves, of which approximately \$0.4 billion relates to Regulation XXX reserves and approximately \$2.5 billion relates to Guideline AXXX reserves. In addition, as of December 31, 2017, for purposes of financing Guideline AXXX reserves, one of our captives had approximately \$4.0 billion of surplus notes outstanding that were issued to affiliates.

Table of Contents

The NAIC's actuarial guideline known as "AG 48" requires us to hold cash and rated securities in greater amounts than we previously held to support economic reserves for certain of our term and universal life policies reinsured to a captive. The additional asset requirement through December 31, 2016, was approximately \$1 billion, and we expect the requirement as of December 31, 2017, to be an additional \$730 million, for a total additional asset requirement of approximately \$1.73 billion. We funded the requirements through 2016 using a combination of existing assets and newly purchased assets sourced from affiliated financing, and have funded, or expect to fund, the remaining \$730 million in the same manner. We believe we have sufficient internal resources to satisfy the additional asset requirement through 2018.

During 2017, the Company adopted principles-based reserving for its guaranteed universal life products and introduced updated versions of these products. The updated products are expected to support the principles-based statutory reserve level without the need for captive reserve financing or additional assets under AG 48. The Company is continuing to assess the impact of this new reserving approach on projected statutory reserve levels and product pricing for its remaining portfolio of individual life product offerings.

Ratings

Financial strength ratings (which are sometimes referred to as "claims-paying" ratings) and credit ratings are important factors affecting public confidence in an insurer and its competitive position in marketing products. Our credit ratings are also important for our ability to raise capital through the issuance of debt and for the cost of such financing. Nationally Recognized Statistical Ratings Organizations continually review the financial performance and financial condition of the entities they rate, including Prudential Financial and its rated subsidiaries.

A downgrade in the credit or financial strength ratings of Prudential Financial or its rated subsidiaries could potentially, among other things, limit our ability to market products, reduce our competitiveness, increase the number or value of policy surrenders and withdrawals, increase our borrowing costs and potentially make it more difficult to borrow funds, adversely affect the availability of financial guarantees, such as letters of credit, cause additional collateral requirements or other required payments under certain agreements, allow counterparties to terminate derivative agreements and/or hurt our relationships with creditors, distributors, or trading counterparties thereby potentially negatively affecting our profitability, liquidity, and/or capital. In addition, we consider our own risk of non-performance in determining the fair value of our liabilities. Therefore, changes in our credit or financial strength ratings may affect the fair value of our liabilities.

Financial strength ratings represent the opinions of rating agencies regarding the financial ability of an insurance company to meet its obligations under an insurance policy. Credit ratings represent the opinions of rating agencies regarding an entity's ability to repay its indebtedness. The following table summarizes the ratings for Prudential Financial and certain of its subsidiaries as of the date of this filing.

* "NR" indicates not rated.

(1) A.M. Best Company, which we refer to as A.M. Best, financial strength ratings for insurance companies range from "A++ (superior)" to "s (suspended)." A rating of A+ is the second highest of sixteen rating categories. A.M. Best long-term credit ratings range from "aaa (exceptional)" to "s (suspended)." A.M. Best short-term credit ratings range from "AMB-1+," which represents the strongest ability to repay short-term debt obligations, to "s(suspended)." Standard & Poor's Rating Services, which we refer to as S&P, financial strength ratings for insurance companies

(2) range from "AAA (extremely strong)" to "D (default)." A rating of AA- is the fourth highest of twenty-three rating categories. S&P's long-term issue credit ratings range from "AAA (extremely strong)" to "D (default)." S&P short-term ratings range from "A-1 (highest category)" to "D (default)."

(3) Moody's Investors Service, Inc., which we refer to as Moody's, insurance financial strength ratings range from "Aaa (exceptional)" to "C (lowest)." A rating of A1 is the fifth highest of twenty-one rating categories. Numeric modifiers are used to refer to the ranking within the group—with 1 being the highest and 3 being the lowest. These modifiers are used to indicate relative strength within a category. Moody's credit ratings range from "Aaa (highest)" to "C (default)". Moody's short-term ratings range from "Prime-1 (P-1)," which represents a superior ability for repayment of senior short-term debt obligations, to "Prime-3 (P-3)," which represents an acceptable ability for repayment of such obligations. Issuers rated "Not Prime" do not fall within any of the Prime rating categories.

(4) Fitch Ratings Inc., which we refer to as Fitch, financial strength ratings range from "AAA (exceptionally strong)" to "C (distressed)." A rating of AA- is the fourth highest of nineteen rating categories. Fitch long-term credit ratings range from "AAA (highest credit quality)," which denotes exceptionally strong capacity for timely payment of financial commitments, to "D (default)." Investment grade ratings range between "AAA" and "BBB." Short-term ratings range from "F1+ (highest credit quality)" to "D (default)."

(5) This rating for Prudential Life Insurance Company of Taiwan, Inc. was affirmed on November 14, 2017, by Taiwan Ratings Corporation, a partner of S&P.

The ratings set forth above reflect current opinions of each rating agency. Each rating should be evaluated independently of any other rating. These ratings are not directed toward shareholders and do not in any way reflect evaluations of the safety and security of the Common Stock. These ratings are reviewed periodically and may be changed at any time by the rating agencies. As a result, we cannot assure stakeholders that we will maintain our current ratings in the future.

Rating agencies use an “outlook” statement for both industry sectors and individual companies. For an industry sector, a stable outlook generally implies that over the next 12 to 18 months the rating agency expects ratings to remain unchanged among companies in the sector. This year, A.M. Best maintained the Rating Outlook on the U.S. life insurance industry at Negative. Fitch and Moody’s changed the outlook for the U.S. life insurance sector to Stable from Negative. S&P continued to keep the U.S. life insurance sector on Stable outlook. For a particular company, an outlook generally indicates a medium- or long-term trend (generally six months to two years) in credit fundamentals, which if continued, may lead to a rating change. These indicators are not necessarily a precursor of a rating change nor do they preclude a rating agency from changing a rating at any time without notice. Fitch, S&P, and A.M. Best have all of the Company’s ratings on Stable outlook. Moody’s has the ratings of Prudential Financial and its insurance subsidiaries on Positive outlook.

Table of Contents

The following is a summary of the significant changes or actions in ratings and rating outlooks for our Company, as well as for the life insurance industry and sector, that have occurred from January 1, 2017 through the date of this filing:

In May 2017, Fitch revised the company outlook for Prudential Insurance and certain other affiliated insurance companies to Stable from Negative.

In November 2017, Moody's revised its Rating Outlook on the U.S. life insurance sector to Stable from Negative. Moody's outlook indicates their expectations for the fundamental credit conditions driving the U.S. life insurance industry over the next 12-18 months. The change in the outlook recognizes the sector's resilience in the face of a low interest rate environment, as well as its strong capitalization, aided by strong equity markets and a still expansionary credit cycle.

In November 2017, Moody's changed the ratings outlook of Prudential Financial and its insurance subsidiaries to Positive from Stable. The positive outlook reflects the Company's progress in reducing debt and leverage, improving its financial flexibility, as well as steps taken to reduce earnings volatility and simplify the organizational structure.

In December 2017, Fitch revised its Sector Outlook for U.S. life insurers to Stable from Negative due to better than expected operating performance and a benign credit environment, which it expects to persist over the near term. At the same time, Fitch kept its Rating Outlook, which indicates the direction in which ratings are likely to move over the next 18 to 24 months, on the U.S. life insurance sector as Stable. The current Stable outlook reflects Fitch's expectations that key credit metrics will remain in line with rating expectations.

Requirements to post collateral or make other payments because of ratings downgrades under certain agreements, including derivative agreements, can be satisfied in cash or by posting permissible securities held by the subsidiaries subject to the agreements. In addition, a ratings downgrade by A.M. Best to "A-" for our domestic life insurance companies would require Prudential Insurance to either post collateral or a letter of credit in the amount of approximately \$1.4 billion, based on the level of statutory reserves related to the variable annuity business acquired from Allstate. We believe that the posting of such collateral would not be a material liquidity event for Prudential Insurance.

Contractual Obligations

The table below summarizes the future estimated cash payments related to certain contractual obligations as of December 31, 2017. The estimated payments reflected in this table are based on management's estimates and assumptions about these obligations. Because these estimates and assumptions are necessarily subjective, the actual cash outflows in future periods will vary, possibly materially, from those reflected in the table. In addition, we do not believe that our cash flow requirements can be adequately assessed based solely upon an analysis of these obligations, as the table below does not contemplate all aspects of our cash inflows, such as the level of cash flow generated by certain of our investments, nor all aspects of our cash outflows.

	Estimated Payments Due by Period				2023 and thereafter
	Total	2018	2019-2020	2021-2022	
	(in millions)				
Short-term and long-term debt obligations(1)	\$38,552	\$2,330	\$ 4,719	\$ 2,166	\$29,337
Operating and capital lease obligations(2)	644	147	217	142	138
Purchase obligations:					

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-K

Commitments to purchase or fund investments(3)	6,460	5,284	503	402	271
Commercial mortgage loan commitments(4)	2,772	2,669	103	0	0
Other liabilities:					
Insurance liabilities(5)	1,148,039	48,073	72,200	76,275	951,491
Other(6)	12,962	12,781	101	53	27
Total	\$1,209,429	\$71,284	\$77,843	\$79,038	\$981,264

(1) The estimated payments due by period for long-term debt reflects the contractual maturities of principal, as disclosed in Note 14 to the Consolidated Financial Statements, as well as estimated future interest payments. The payment of principal and estimated future interest for short-term debt are reflected in estimated payments due in 2018. The estimate for future interest payments includes the effect of derivatives that qualify for hedge accounting treatment. See Note 14 to the Consolidated Financial Statements for additional information concerning our short-term and long-term debt.

(2) The estimated payments due by period for operating and capital leases reflect the future minimum lease payments under non-cancelable operating and capital leases, as disclosed in Note 23 to the Consolidated Financial Statements.

Table of Contents

(3) As discussed in Note 23 to the Consolidated Financial Statements, we have commitments to purchase or fund investments, some of which are contingent upon events or circumstances not under our control, including those at the discretion of our counterparties. The timing of the fulfillment of certain of these commitments cannot be estimated, therefore the settlements of these obligations are reflected in estimated payments due in less than one year. Commitments to purchase or fund investments include \$141 million that we anticipate will ultimately be funded from our separate accounts.

(4) As discussed in Note 23 to the Consolidated Financial Statements, loan commitments of our commercial mortgage operations, which are legally binding commitments to extend credit to a counterparty, have been reflected in the contractual obligations table above principally based on the expiration date of the commitment; however, it is possible these loan commitments could be funded prior to their expiration date. In certain circumstances the counterparty may also extend the date of the expiration in exchange for a fee.

(5) The estimated cash flows due by period for insurance liabilities reflect future estimated cash payments to be made to policyholders and others for future policy benefits, policyholders' account balances, policyholder's dividends, reinsurance payables and separate account liabilities, net of premium receipts and reinsurance recoverables. These future estimated cash flows for current policies in force generally reflect our best estimate economic and actuarial assumptions. These cash flows are undiscounted with respect to interest. The sum of the cash flows shown for all years in the table of \$1,148 billion exceeds the corresponding liability amounts of approximately \$722 billion included in the Consolidated Financial Statements as of December 31, 2017. Separate account liabilities are legally insulated from general account obligations, and it is generally expected these liabilities will be fully funded by separate account assets and their related cash flows. We have made significant assumptions to determine the future estimated cash flows related to the underlying policies and contracts. Due to the significance of the assumptions used, actual cash flows will differ, possibly materially, from these estimates.

(6) The estimated payments due by period for other liabilities includes securities sold under agreements to repurchase, cash collateral for loaned securities, liabilities for unrecognized tax benefits, bank customer liabilities, and other miscellaneous liabilities. Amounts presented in the table also exclude \$1,518 million of notes issued by consolidated VIE's which recourse for these obligations is limited to the assets of the respective VIE and do not have recourse to the general credit of the company.

We also enter into agreements to purchase goods and services in the normal course of business; however, these purchase obligations are not material to our consolidated results of operations or financial position as of December 31, 2017.

Off-Balance Sheet Arrangements

Guarantees and Other Contingencies

In the course of our business, we provide certain guarantees and indemnities to third parties pursuant to which we may be contingently required to make payments in the future. See "Commitments and Guarantees" within Note 23 to the Consolidated Financial Statements for additional information.

Other Contingent Commitments

We also have other commitments, some of which are contingent upon events or circumstances not under our control, including those at the discretion of our counterparties. See "Commitments and Guarantees" within Note 23 to the Consolidated Financial Statements for additional information regarding these commitments. For further discussion of certain of these commitments that relate to our separate accounts, also see "—Liquidity associated with other activities—Investment Management operations."

Other Off-Balance Sheet Arrangements

In 2013, we entered into a put option agreement with a Delaware trust that gives Prudential Financial the right, at any time over a ten-year period, to issue up to \$1.5 billion of senior notes to the trust in return for principal and interest strips of U.S. Treasury securities that are held by the trust. See Note 14 to our Consolidated Financial Statements for more information on this put option agreement. In 2014, Prudential Financial entered into financing transactions, pursuant to which it issued \$500 million of limited recourse notes and, in return, obtained \$500 million of asset-backed notes from a Delaware master trust and ultimately contributed the asset-backed notes to its subsidiary, PRIAC. As of December 31, 2017, no principal payments have been received or are currently due on the asset-backed notes and, as a result, there was no payment obligation under the limited recourse notes. Accordingly, none of the notes are reflected in the Company's Consolidated Financial Statements as of that date.

Other than as described above, we do not have retained or contingent interests in assets transferred to unconsolidated entities, or variable interests in unconsolidated entities or other similar transactions, arrangements or relationships that serve as credit, liquidity or market risk support, that we believe are reasonably likely to have a material effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or our access to or requirements for capital resources. In addition, other than the agreements referred to above, we do not have relationships with any unconsolidated entities that are contractually limited to narrow activities that facilitate our transfer of or access to associated assets.

Risk Management

Overview

We employ a risk governance structure, overseen by senior management and our Board of Directors and managed by Enterprise Risk Management ("ERM"), to provide a common framework for evaluating the risks embedded in and across our businesses, developing risk appetites, managing these risks and identifying current and future risk challenges and opportunities. For a discussion of the risks of our businesses, see "Risk Factors".

Table of Contents

Risk Governance Framework

Each of our businesses has a risk governance structure that is supported by a framework at the corporate level. Generally, our businesses are authorized to make day-to-day risk decisions that are consistent with enterprise risk policies and limits, and subject to enterprise oversight. Our governance structure is comprised of the Board and its committees, management committees and ERM and is designed to support this framework.

Board of Directors Oversight

Our Board of Directors oversees our risk profile and management's processes for assessing and managing risk. The Board also reviews strategic risks and opportunities facing the Company. Certain specific categories of risk are assigned to Board committees that report back to the full Board, as summarized below:

Audit Committee: oversees insurance risk and operational risks, including model risk, as well as risks related to financial controls, legal, regulatory and compliance risks, and the overall risk management governance structure and risk management function.

Compensation Committee: oversees our compensation programs so that incentives are aligned with appropriate risk taking.

Corporate Governance and Business Ethics Committee: oversees our corporate governance procedures and practices, ethics and conflict of interest policies, political contributions, lobbying expenses and overall political strategy, as well as our strategy and reputation regarding environmental stewardship, sustainability and corporate social responsibility.

Finance Committee: oversees liquidity risk, including risks involving our capital and liquidity management, the incurrence and repayment of borrowings, the capital structure, the funding of benefit plans and statutory insurance reserves. The Finance Committee reviews and recommends for approval to the Board our capital plan. The Finance Committee also receives regular updates on the sources and uses of capital relative to plan, as well as on our Capital Protection Framework.

Investment Committee: oversees investment risk and market risk and the strength of the investment function. The Investment Committee approves investment and market risk limits based on asset class, issuer, credit quality and geography.

Risk Committee: oversees the governance of significant risks throughout the Company and the establishment and ongoing monitoring of our risk profile, risk capacity and risk appetite. The Risk Committee also serves to coordinate the risk oversight functions of the other committees of the Board.

Management Oversight

Our primary risk management committee is the Enterprise Risk Committee ("ERC"). The ERC is chaired by our Chief Risk Officer and otherwise comprised of the Vice Chairman, Chief Operating Officers for the U.S. and International Businesses, General Counsel, Chief Financial Officer, Chief Investment Officer and Chief Actuary. Our Chief Auditor also attends meetings of the ERC. The ERC's mandate is to review significant risks that impact us and approve, or recommend to the Board for approval, our risk management policies and limits to keep our risk profile consistent with our strategy.

The ERC is supported by six Risk Oversight Committees aligned with our tactical risks, each of which is comprised of subject matter experts and dedicated to one of the following risk types: investment, market, insurance, operational, model and liquidity. These Risk Oversight Committees report their activities to the ERC, and significant matters or matters where there are unresolved points of view are reviewed and brought to the ERC. The Risk Oversight Committees provide an opportunity to evaluate complex issues by subject matter experts within the various risk areas. They evaluate the adequacy and effectiveness of risk mitigation options, identify stakeholders of risks and issues,

review material risk assumptions for reasonability and consistency across the Company and, working with the different risk areas, develop recommendations for risk limits, among other responsibilities.

Each of our business units and significant corporate functions maintains its own risk committee. The business unit risk committees serve as a forum for leaders within each business unit to identify, assess and resolve risk and exposure issues and to review new products and initiatives, prior to such issues being reviewed by the Risk Oversight Committees and/or the ERC as appropriate. Corporate function risk committees assess and monitor risks associated with performing the relevant corporate functions, set standards and exercise oversight over specific risks.

Enterprise Risk Management Oversight

Table of Contents

ERM manages a comprehensive framework for assessing the risks embedded in and across our businesses so that the Company can manage these risks effectively, evaluate current and future risk challenges and opportunities, and enhance shareholder value. ERM operates independently and is responsible for recommending policies, limits and standards for all risks. It oversees these risks under the guidance of the ERC and Risk Oversight Committees. Additionally, ERM works with our business units and corporate areas with an objective of comprehensive identification, monitoring and management of risks that we may face. The ERM infrastructure is generally aligned by risk type, with certain groups within ERM working across risk types.

Risk Identification

We rely on a combination of activities and processes to provide analysis and seek assurance that all material risks have been identified and managed as appropriate. There are three levels of activities that seek to ensure that changes in risk levels or new risks to the Company are identified and escalated as appropriate: (1) business unit activities, (2) corporate function activities, and (3) processes involving senior management and the Board of Directors.

- **Business Units:** Each business area has a risk committee that meets periodically to allow senior leaders to discuss and evaluate current, new, and emerging operational risks in their own operations. Business units are required to develop and maintain documented operational risk inventories which facilitate the identification of current operational risk exposures. There is also an emerging risks process that identifies, assesses and monitors potential future risks which could significantly impact the business units or overall Company.
- Corporate Functions:** The corporate functions review the results of the business unit activities and examine risks from an enterprise view across businesses under normal and stressed conditions. As a result, the corporate functions, particularly ERM, use several processes and activities used to identify and assess the risks of the Company. Each corporate function also has its own risk committee.
- Senior Management and the Board of Directors:** Senior management plays a critical role in reviewing the risk profile of the Company, including by identifying impacts to the business strategy of new or changed risks, and risks in any new strategies under consideration. These risks are discussed with the ERC as appropriate, and with the Board, if significant. As discussed above, the Board of Directors oversees the Company's risk profile and management's processes for assessing and managing risk, both as a full Board and through its committees.

Risk Measurement and Monitoring

Our Risk Appetite Framework ("RAF") is a comprehensive process designed to reasonably ensure that all risks taken across the Company align with the Company's capacity and willingness to take those risks. Using common metrics allows for a cohesive assessment of risk, resources and strategy, and supports management and the Board in making well-informed business decisions. The Company has a comprehensive stress testing framework, which serves as the foundation for the RAF. The RAF evaluates the Company's exposure under various stress metrics and stress severities. The RAF provides a dynamic assessment of stress impacts and resources available to absorb these impacts under comprehensive stress scenarios. The Company's capital management framework is integrated with the RAF to determine the amount of capital the Company needs to hold given the risks taken.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk

Market risk is defined as the risk of loss from changes in interest rates, equity prices and foreign currency exchange rates resulting from asset/liability mismatches where the change in the value of our liabilities is not offset by the change in value of our assets.

For additional information regarding the potential impacts of interest rate and other market fluctuations, as well as general economic and market conditions on our businesses and profitability, see Item 1A. “Risk Factors” above. For additional information regarding the overall management of our general account investments and our asset mix strategies, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—General Account Investments—Management of Investments” above. For additional information regarding our liquidity and capital resources, which may be impacted by changing market risks, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources” above.

Market Risk Management

Table of Contents

Management of market risk, which we consider to be a combination of both investment risk and market risk exposures, includes the identification and measurement of various forms of risk, the establishment of risk thresholds and the creation of processes intended to maintain risks within these thresholds while optimizing returns on the underlying assets or liabilities.

Our risk management process utilizes a variety of tools and techniques, including:

• Measures of price sensitivity to market changes (e.g., interest rates, equity index prices, foreign exchange);

• Asset/liability management;

• Stress scenario testing;

• Hedging programs; and

Risk management governance, including policies, limits, and a committee that oversees investment and market risk.

For additional information regarding our overall risk management framework and governance structure, see

“Management’s Discussion and Analysis of Financial Condition and Results of Operations—Risk Management” above.

Market Risk Mitigation

Risk mitigation takes three primary forms:

Asset/Liability Management: Managing assets to liability-based measures. For example, investment policies identify target durations for assets based on liability characteristics and asset portfolios are managed to within ranges around them. This mitigates potential unanticipated economic losses from interest rate movements.

Hedging: Using derivatives to offset risk exposures. For example, for our variable annuities, potential living benefit claims resulting from more severe market conditions are hedged using derivative instruments.

Management of portfolio concentration risk. For example, ongoing monitoring and management at the enterprise level of key rate, currency and other concentration risks support diversification efforts to mitigate exposure to individual markets and sources of risk.

Market Risk Related to Interest Rates

We perform liability-driven investing and engage in careful asset/liability management. Asset/liability mismatches create the risk that changes in liability values will differ from the changes in the value of the related assets. Additionally, changes in interest rates may impact other items including, but not limited to, the following:

• Net investment spread between the amounts that we are required to pay and the rate of return we are able to earn on investments for certain products supported by general account investments;

• Asset-based fees earned on assets under management or contractholder account values;

• Estimated total gross profits and the amortization of deferred policy acquisition and other costs;

• Net exposure to the guarantees provided under certain products; and

• Capital levels of our regulated entities.

We use duration and convexity analyses to measure price sensitivity to interest rate changes. Duration measures the relative sensitivity of the fair value of a financial instrument to changes in interest rates. Convexity measures the rate of change of duration with respect to changes in interest rates. We use asset/liability management and derivative strategies to manage our interest rate exposure by legal entity by matching the relative sensitivity of asset and liability values to interest rate changes, or controlling “duration mismatch” of assets and liability duration targets. In certain markets, capital market limitations that hinder our ability to acquire assets that approximate the duration of some of our liabilities are considered in setting duration targets. We consider risk-based capital and tax implications as well as current market conditions in our asset/liability management strategies.

Table of Contents

We assess the impact of interest rate movements on the value of our financial assets, financial liabilities and derivatives using hypothetical test scenarios that assume either upward or downward 100 basis point parallel shifts in the yield curve from prevailing interest rates, reflecting changes in either credit spreads or the risk-free rate. The following table sets forth the net estimated potential loss in fair value on these financial instruments from a hypothetical 100 basis point upward shift as of December 31, 2017 and 2016. This table is presented on a gross basis and excludes offsetting impacts to insurance liabilities that are not considered financial liabilities under U.S GAAP. This scenario results in the greatest net exposure to interest rate risk of the hypothetical scenarios tested at those dates. While the test scenario is for illustrative purposes only and does not reflect our expectations regarding future interest rates or the performance of fixed income markets, it is a near-term, reasonably possible hypothetical change that illustrates the potential impact of such events. These test scenarios do not measure the changes in value that could result from non-parallel shifts in the yield curve which we would expect to produce different changes in discount rates for different maturities. As a result, the actual loss in fair value from a 100 basis point change in interest rates could be different from that indicated by these calculations. The estimated changes in fair values do not include separate account assets.

	As of December 31, 2017			As of December 31, 2016		
	Notional	Fair Value	Hypothetical Change in Fair Value	Notional	Fair Value	Hypothetical Change in Fair Value
(in millions)						
Financial assets with interest rate risk:						
Fixed maturities(1)		\$372,926	\$ (36,554)		\$347,246	\$ (33,171)
Commercial mortgage and other loans		57,341	(2,832)		54,283	(2,626)
Derivatives with interest rate risk:						
Swaps	\$210,137	4,735	(3,824)	\$209,406	7,097	(5,415)
Futures	24,502	24	(1,081)	32,555	49	(995)
Options	54,522	188	188	25,403	166	284
Forwards	25,948	(94)	0	21,530	(519)	(20)
Synthetic GICs	77,290	(1)	(1)	77,197	5	(1)
Variable annuity and other living benefit feature embedded derivatives(2)		(8,720)	5,706		(8,238)	5,386
Financial liabilities with interest rate risk(3):						
Short-term and long-term debt		(21,144)	3,180		(21,079)	3,049
Policyholders' account balances—investment contracts		(100,186)	3,561		(100,045)	3,570
Net estimated potential loss			\$ (31,657)			\$ (29,939)

(1) Includes fixed maturities classified as “trading account assets supporting insurance liabilities” and other fixed maturities classified as trading securities under U.S. GAAP, but are held for “other than trading” activities in our segments that offer insurance, retirement and annuities products. Includes approximately \$370 billion and \$345 billion as of December 31, 2017 and 2016, respectively, of fixed maturities classified as “available-for-sale”, where unrealized gains and losses are recorded in AOCI.

(2) Excludes any offsetting impact of derivative instruments purchased to hedge changes in the embedded derivatives. Amounts reported net of third-party reinsurance.

(3) Excludes approximately \$306 billion and \$286 billion as of December 31, 2017 and 2016, respectively, of insurance reserve and deposit liabilities which are not considered financial liabilities. We believe that the interest rate sensitivities of these insurance liabilities would serve as an offset to the net interest rate risk of the financial assets and liabilities, including investment contracts.

Under U.S. GAAP, the fair value of the embedded derivatives for certain variable annuity and other living benefit features, reflected in the table above, includes the impact of the market's perception of our NPR. For more information on NPR related to the sensitivity of the embedded derivatives to our NPR credit spread, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Accounting Policies & Pronouncements—Application of Critical Accounting Estimates—Sensitivities for Insurance Assets and Liabilities" above.

For an additional discussion of our variable annuity optional living benefit guarantees accounted for as embedded derivatives and related derivatives used to hedge the changes in fair value of these embedded derivatives, see "Market Risk Related to Certain Variable Annuity Products" below. For additional information about the key estimates and assumptions used in our determination of fair value, see Note 20 to the Consolidated Financial Statements. For information on the impacts of a sustained low interest rate environment, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Executive Summary—Impact of a Low Interest Rate Environment" above.

Market Risk Related to Equity Prices

Table of Contents

We have exposure to equity risk through asset/liability mismatches, including our investments in equity securities held in our general account investment portfolio and unhedged exposure in our insurance liabilities, principally related to certain variable annuity living benefit feature embedded derivatives. Our equity-based derivatives primarily hedge the equity risk embedded in these living benefit feature embedded derivatives, and are also part of our capital hedging program. Changes in equity prices create risk that the resulting changes in asset values will differ from the changes in the value of the liabilities relating to the underlying or hedged products. Additionally, changes in equity prices may impact other items including, but not limited to, the following:

- ▲Asset-based fees earned on assets under management or contractholder account value;
- ◆Estimated total gross profits and the amortization of deferred policy acquisition and other costs; and
- ♣Net exposure to the guarantees provided under certain products.

We manage equity risk against benchmarks in respective markets. We benchmark our return on equity holdings against a blend of market indices, mainly the S&P 500 and Russell 2000 for U.S. equities. We benchmark foreign equities against the Tokyo Price Index, and the MSCI EAFE, a market index of European, Australian, and Far Eastern equities. We target price sensitivities that approximate those of the benchmark indices.

We estimate our equity risk from a hypothetical 10% decline in equity benchmark market levels. The following table sets forth the net estimated potential loss in fair value from such a decline as of December 31, 2017 and 2016. While these scenarios are for illustrative purposes only and do not reflect our expectations regarding future performance of equity markets or of our equity portfolio, they represent near-term reasonably possible hypothetical changes that illustrate the potential impact of such events. These scenarios consider only the direct impact on fair value of declines in equity benchmark market levels and not changes in asset-based fees recognized as revenue, changes in our estimates of total gross profits used as a basis for amortizing deferred policy acquisition and other costs, or changes in any other assumptions such as market volatility or mortality, utilization or persistency rates in our variable annuity contracts that could also impact the fair value of our living benefit features. In addition, these scenarios do not reflect the impact of basis risk, such as potential differences in the performance of the investment funds underlying the variable annuity products relative to the market indices we use as a basis for developing our hedging strategy. The impact of basis risk could result in larger differences between the change in fair value of the equity-based derivatives and the related living benefit features in comparison to these scenarios. In calculating these amounts, we exclude separate account equity securities.

	As of December 31, 2017		As of December 31, 2016			
	Notional	Fair Value	Hypothetical Change in Fair Value	Notional	Fair Value	Hypothetical Change in Fair Value
	(in millions)					
Equity securities(1)		\$8,972	\$ (897)		\$12,139	\$ (1,214)
Equity-based derivatives(2)	\$52,275	(128)	1,373	\$31,558	(285)	1,137
Variable annuity and other living benefit feature embedded derivatives(2)(3)		(8,720)	(1,423)		(8,238)	(1,116)
Net estimated potential loss			\$ (947)			\$ (1,193)

Includes equity securities classified as “trading account assets supporting insurance liabilities” and other equity (1) securities classified as trading securities under U.S. GAAP, but are held for “other than trading” activities in our segments that offer insurance, retirement and annuities products.

(2) The notional and fair value of equity-based derivatives and the fair value of variable annuity and other living benefit feature embedded derivatives are also reflected in amounts under “Market Risk Related to Interest Rates”

above, and are not cumulative.

- (3) Excludes any offsetting impact of derivative instruments purchased to hedge changes in the embedded derivatives.
Amounts reported net of third-party reinsurance.

Market Risk Related to Foreign Currency Exchange Rates

As a U.S.-based company with significant business operations outside of the U.S., particularly in Japan, we are exposed to foreign currency exchange rate risk related to these operations, as well as in our general account investment portfolio and other proprietary investment portfolios.

145

Table of Contents

For our international insurance operations, changes in foreign currency exchange rates create risk that we may experience volatility in the U.S. dollar-equivalent earnings and equity of these operations. We actively manage this risk through various hedging strategies, including the use of foreign currency hedges and through holding U.S. dollar-denominated securities in the investment portfolios of certain of these operations. Additionally, our Japanese insurance operations offer a variety of non-yen denominated products which are supported by investments in corresponding currencies. While these non-yen denominated assets are economically matched to the currency of the product liabilities, the accounting treatment may differ for changes in the value of these assets and liabilities due to moves in foreign currency exchange rates, resulting in volatility in reported U.S. GAAP earnings. This volatility has been mitigated by disaggregating the U.S. and Australian dollar-denominated businesses in Gibraltar Life into separate divisions, each with its own functional currency that aligns with the underlying products and investments. For certain of our international insurance operations outside of Japan, we elect to not hedge the risk of changes in our equity investments due to foreign exchange rate movements. For further information, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Impact of Foreign Currency Exchange Rates—Impact of products denominated in non-local currencies on U.S. GAAP earnings” above.

For our domestic general account investment portfolios supporting our U.S. insurance operations and other proprietary investment portfolios, our foreign currency exchange rate risk arises primarily from investments that are denominated in foreign currencies. We manage this risk by hedging substantially all domestic foreign currency denominated fixed income investments into U.S. dollars. We generally do not hedge all of the foreign currency risk of our investments in equity securities of unaffiliated foreign entities.

We manage our foreign currency exchange rate risks within specified limits, and estimate our exposure, excluding equity in our Japanese insurance operations, to a hypothetical 10% change in foreign currency exchange rates. The following table sets forth the net estimated potential loss in fair value from such a change as of December 31, 2017 and 2016. While these scenarios are for illustrative purposes only and do not reflect our expectations regarding future changes in foreign exchange markets, they represent reasonably possible near-term hypothetical changes that illustrate the potential impact of such events.

	As of December 31, 2017		As of December 31, 2016	
	Fair Value	Hypothetical Change in Fair Value	Fair Value	Hypothetical Change in Fair Value
	(in millions)			
Unhedged portion of equity investment in international subsidiaries and foreign currency denominated investments in domestic general account portfolio	\$6,345	\$ (635)	\$5,003	\$ (500)

For additional information, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—General Account Investments—Portfolio Composition” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations by Segment—International Insurance Division” above.

Derivatives

We use derivative financial instruments primarily to reduce market risk from changes in interest rates, equity prices and foreign currency exchange rates, including their use to alter interest rate or foreign currency exposures arising from mismatches between assets and liabilities. Our derivatives primarily include swaps, futures, options and forward

contracts that are exchange-traded or contracted in the OTC market.

Our derivatives also include interest rate guarantees we provide on our synthetic GIC products. Synthetic GICs simulate the performance of traditional insurance-related GICs but are accounted for as derivatives under U.S. GAAP due to the fact that the policyholders own the underlying assets, and we only provide a book value “wrap” on the customers’ funds, which are held in a client-owned trust. Since these wraps provide payment of guaranteed principal and interest to the customer, changes in interest rates create risk that declines in the market value of customers’ funds would increase our net exposure to these guarantees; however, our obligation is limited to payments that are in excess of the existing customers’ fund value. Additionally, we have the ability to periodically reset crediting rates, subject to a 0% minimum floor, as well as the ability to increase prices. Further, our contract provisions provide that, although participants may withdraw funds at book value, contractholder withdrawals may only occur at market value immediately, or at book value over time. These factors, among others, result in these contracts experiencing minimal changes in fair value, despite a more significant notional value.

Table of Contents

Our derivatives also include those that are embedded in certain financial instruments, and primarily relate to certain optional living benefit features associated with our variable annuity products, as discussed in more detail in “Market Risk Related to Certain Variable Annuity Products” below. For additional information on our derivative activities, see Note 21 to the Consolidated Financial Statements.

Market Risk Related to Certain Variable Annuity Products

The primary risk exposures of our variable annuity contracts relate to actual deviations from, or changes to, the assumptions used in the original pricing of these products, including capital markets assumptions, such as equity market returns, interest rates and market volatility and actuarial assumptions. For our capital markets assumptions, we manage our exposure to the risk created by capital markets fluctuations through a combination of product design elements, such as an automatic rebalancing element and inclusion of certain optional living benefits in our living benefits hedging program. In addition, we consider external reinsurance a form of risk mitigation as well as our capital hedge program. Certain variable annuity optional living benefit features are accounted for as embedded derivatives and recorded at fair value. The market risk sensitivities associated with U.S. GAAP values of both the embedded derivatives and the related derivatives used to hedge the changes in fair value of these embedded derivatives are provided under “Market Risk Related to Interest Rates” and “Market Risk Related to Equity Prices” above.

For additional information regarding our risk management strategies, including our living benefit hedging program and other product design elements, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations by Segment—Individual Annuities” above.

Management's Annual Report on Internal Control Over Financial Reporting

Management of Prudential Financial, Inc. (together with its consolidated subsidiaries, the "Company") is responsible for establishing and maintaining adequate internal control over financial reporting. Management conducted an assessment of the effectiveness, as of December 31, 2017, of the Company's internal control over financial reporting, based on the framework established in Internal Control—Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on our assessment under that framework, management concluded that the Company's internal control over financial reporting was effective as of December 31, 2017.

Our internal control over financial reporting is a process designed by or under the supervision of our principal executive and principal financial officers to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our internal control over financial reporting includes policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures are being made only in accordance with authorizations of management and the directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on our financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2017, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report appearing herein.

February 16, 2018

Table of Contents

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of
Prudential Financial, Inc.:

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated statements of financial position of Prudential Financial, Inc. and its subsidiaries (hereinafter referred to as “the Company”) as of December 31, 2017 and December 31, 2016, and the related statements of operations, comprehensive income, equity and cash flows for each of the three years in the period ended December 31, 2017, including the related notes and financial statement schedules listed in the index appearing under Item 15.2 (collectively referred to as the “consolidated financial statements”). We also have audited the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and December 31, 2016, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2017 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control - Integrated Framework (2013) issued by the COSO.

Change in Accounting Principle

As discussed in Note 2 to the consolidated financial statements, the Company changed the manner in which it accounts for certain reinsurance costs in 2017.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated

financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the

Table of Contents

company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

/s/ PricewaterhouseCoopers LLP

New York, New York
February 16, 2018

We have served as the Company's auditor since 1996, which includes periods before the Company became subject to SEC reporting requirements.

PRUDENTIAL FINANCIAL, INC.
Notes to Consolidated Financial Statements

1. BUSINESS AND BASIS OF PRESENTATION

Prudential Financial, Inc. (“Prudential Financial”) and its subsidiaries (collectively, “Prudential” or the “Company”) provide a wide range of insurance, investment management, and other financial products and services to both individual and institutional customers throughout the United States and in many other countries. Principal products and services provided include life insurance, annuities, retirement-related services, mutual funds and investment management.

During the fourth quarter of 2017, the Company introduced a new organizational structure for its U.S. businesses that reflects its focus on leveraging its mix of businesses and its digital and customer engagement capabilities to expand its value proposition for the benefit of customers and stakeholders. This new organizational structure retains the Company’s segments but realigns them under new divisions. Under the new structure, the Company’s principal operations are comprised of five divisions, which together encompass seven segments, and its Corporate and Other operations. The U.S. Individual Solutions division consists of the Individual Annuities and Individual Life segments. The U.S. Workplace Solutions division consists of the Retirement and Group Insurance segments. The Investment Management division is comprised of the Investment Management segment (formerly named the Asset Management segment). The International Insurance division continues to consist of the International Insurance segment, and the Closed Block division continues to consist of the Closed Block segment. The Closed Block division is accounted for as a divested business that is reported separately from the divested businesses that are included in the Company’s Corporate and Other operations. The Company’s Corporate and Other operations continue to include corporate items and initiatives that are not allocated to business segments and businesses that have been or will be divested, excluding the Closed Block division. There are no changes to the Company’s reporting segments nor to its measure of segment profitability as a result of the new organizational structure.

Basis of Presentation

The Company’s Consolidated Financial Statements include the accounts of Prudential Financial, entities over which the Company exercises control, including majority-owned subsidiaries and minority-owned entities such as limited partnerships in which the Company is the general partner, and variable interest entities (“VIEs”) in which the Company is considered the primary beneficiary. See Note 5 for more information on the Company’s consolidated variable interest entities. The Company’s Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”). Intercompany balances and transactions have been eliminated.

The Company’s Gibraltar Life Insurance Company, Ltd. (“Gibraltar Life”) consolidated operations use a November 30 fiscal year end for purposes of inclusion in the Company’s Consolidated Financial Statements. The Company’s consolidated balance sheet data as of December 31, 2017 and 2016, include the assets and liabilities of Gibraltar Life as of November 30 for each respective year. The Company’s consolidated income statement data for the years ended December 31, 2017, 2016 and 2015, include Gibraltar Life’s results of operations for the twelve months ended November 30 for each respective year. Beginning in 2018, the Company intends to eliminate this one-month reporting lag, which is not expected to have a material impact on the Company’s Consolidated Financial Statements.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The most significant estimates include those used in determining deferred policy acquisition costs (“DAC”) and related amortization; value of business acquired (“VOBA”) and its amortization; amortization of deferred sales inducements (“DSI”); measurement of goodwill and any related impairment; valuation of investments including derivatives and the recognition of other-than-temporary impairments (“OTTI”); future policy benefits including guarantees; pension and other postretirement benefits; provision for income taxes and valuation of deferred tax assets; and accruals for contingent liabilities, including estimates for losses in connection with unresolved legal and regulatory matters.

Out of Period Adjustments

As previously disclosed in its Annual Report on Form 10-K for the year ended December 31, 2016, during 2016, the Company recorded out of period adjustments that resulted in an aggregate net decrease of \$134 million to “Income (loss) before income taxes and equity in earnings of operating joint ventures” for the year ended December 31, 2016. Such adjustments primarily

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

consisted of a charge of \$141 million to increase reserves, net of a related increase in DAC, for certain universal life products within the Individual Life business. Management evaluated the adjustments, both individually and in the aggregate, and concluded that they were not material to any previously reported quarterly or annual financial statements. For additional information on the impact of these adjustments to the Company's operating segments, see Note 22.

Reclassifications

Certain amounts in prior years have been reclassified to conform to the current year presentation.

2. SIGNIFICANT ACCOUNTING POLICIES AND PRONOUNCEMENTS

ASSETS

Fixed maturities, available-for-sale and Fixed maturities, held-to-maturity are comprised of bonds, notes and redeemable preferred stock. Fixed maturities classified as "available-for-sale" are carried at fair value. See Note 20 for additional information regarding the determination of fair value. The associated unrealized gains and losses, net of tax, and the effect on DAC, VOBA, DSI, future policy benefits, policyholders' account balances and policyholders' dividends that would result from the realization of unrealized gains and losses, are included in "Accumulated other comprehensive income (loss)" ("AOCI"). Fixed maturities that the Company has both the positive intent and ability to hold to maturity are carried at amortized cost and classified as "held-to-maturity." The purchased cost of fixed maturities is adjusted for amortization of premiums and accretion of discounts to maturity or, if applicable, call date.

Interest income, and amortization of premium and accretion of discount are included in "Net investment income" under the effective yield method. Additionally, prepayment premiums are also included in "Net investment income." For mortgage-backed and asset-backed securities, the effective yield is based on estimated cash flows, including interest rate and prepayment assumptions based on data from widely accepted third-party data sources or internal estimates. In addition to interest rate and prepayment assumptions, cash flow estimates also vary based on other assumptions regarding the underlying collateral, including default rates and changes in value. These assumptions can significantly impact income recognition and the amount of OTTI recognized in earnings and other comprehensive income. For high credit quality mortgage-backed and asset-backed securities (those rated AA or above), cash flows are provided quarterly, and the amortized cost and effective yield of the securities are adjusted as necessary to reflect historical prepayment experience and changes in estimated future prepayments. The adjustments to amortized cost are recorded as a charge or credit to "Net investment income" in accordance with the retrospective method. For mortgage-backed and asset-backed securities rated below AA, or those for which an OTTI has been recorded, the effective yield is adjusted prospectively for any changes in estimated cash flows. See the discussion below on realized investment gains and losses for a description of the accounting for impairments.

Trading account assets supporting insurance liabilities, at fair value includes invested assets that consist of fixed maturities, equity securities, and short-term investments and cash equivalents, that support certain products included in the Retirement and International Insurance segments which are experience-rated, meaning that the investment results associated with these products are expected to ultimately accrue to contractholders. Realized and unrealized gains and losses for these investments are reported in "Other income." Interest and dividend income from these investments is reported in "Net investment income."

Other trading account assets, at fair value consists of fixed maturities, certain derivatives and equity securities, including seed money that the Company invests in investment funds and certain perpetual preferred stock. Realized

and unrealized gains and losses on these investments are reported in “Other income,” and interest and dividend income from these investments are reported in “Net investment income.” The fixed maturities are primarily related to assets associated with consolidated variable interest entities for which the Company is the investment manager and the realized and unrealized gain and loss activity is generally offset by changes in the corresponding liability. See also “Notes issued by consolidated variable interest entities” below. The derivatives are primarily associated with the Company’s derivative operations used to manage interest rate, foreign currency, credit and equity exposures and are not reported with other derivatives in “Other long-term investments” primarily due to their short-term nature. The perpetual preferred stock represents certain financial instruments that contain an embedded derivative where the Company elects to classify the entire instrument as a trading account asset rather than bifurcate the derivative from the host contract. See “Derivative Financial Instruments” below for additional information regarding the accounting for derivatives.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Equity securities available-for-sale, at fair value is comprised of common stock, mutual fund shares and non-redeemable preferred stock, and are carried at fair value. The associated unrealized gains and losses, net of tax, and the effect on DAC, VOBA, DSI, future policy benefits, policyholders' account balances and policyholders' dividends that would result from the realization of unrealized gains and losses, are included in AOCI. The cost of equity securities is written down to fair value when a decline in value is considered to be other-than-temporary. See the discussion below on realized investment gains and losses for a description of the accounting for impairments. Dividends from these investments are generally recognized in "Net investment income" on the ex-dividend date.

Commercial mortgage and other loans consists of commercial mortgage loans, agricultural property loans, loans backed by residential properties, as well as certain other collateralized and uncollateralized loans. Loans backed by residential properties primarily include recourse loans held by the Company's international insurance businesses. Uncollateralized loans primarily represent reverse dual currency loans and corporate loans held by the Company's international insurance businesses.

Commercial mortgage and other loans originated and held for investment are generally carried at unpaid principal balance, net of unamortized deferred loan origination fees and expenses, and net of an allowance for losses. The Company carries certain commercial mortgage loans originated within the Company's commercial mortgage operations at fair value where the fair value option has been elected. Loans held for sale where the Company has not elected the fair value option are carried at the lower of cost or fair value. Commercial mortgage and other loans acquired, including those related to the acquisition of a business, are recorded at fair value when purchased, reflecting any premiums or discounts to unpaid principal balances. Interest income, and the amortization of the related premiums or discounts, are included in "Net investment income" under the effective yield method. Prepayment fees are also included in "Net investment income."

Impaired loans include those loans for which it is probable that amounts due will not all be collected according to the contractual terms of the loan agreement. The Company defines "past due" as principal or interest not collected at least 30 days past the scheduled contractual due date. Interest received on loans that are past due, including impaired and non-impaired loans as well as loans that were previously modified in a troubled debt restructuring, is either applied against the principal or reported as net investment income based on the Company's assessment as to the collectability of the principal. See Note 4 for additional information about the Company's past due loans.

The Company discontinues accruing interest on loans after the loans become 90 days delinquent as to principal or interest payments, or earlier when the Company has doubts about collectability. When the Company discontinues accruing interest on a loan, any accrued but uncollectible interest on the loan and other loans backed by the same collateral, if any, is charged to interest income in the same period. Generally, a loan is restored to accrual status only after all delinquent interest and principal are brought current and, in the case of loans where the payment of interest has been interrupted for a substantial period, or the loan has been modified, a regular payment performance has been established.

The Company reviews the performance and credit quality of the commercial mortgage and other loan portfolio on an on-going basis. Loans are placed on watch list status based on a predefined set of criteria and are assigned one of two categories. Loans are classified as "closely monitored" when it is determined that there is a collateral deficiency or other credit events that may lead to a potential loss of principal or interest. Loans "not in good standing" are those loans where the Company has concluded that there is a high probability of loss of principal, such as when the loan is delinquent or in the process of foreclosure. As described below, in determining the allowance for losses, the Company evaluates each loan on the watch list to determine if it is probable that amounts due will not be collected according to the contractual terms of the loan agreement.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Loan-to-value and debt service coverage ratios are measures commonly used to assess the quality of commercial mortgage loans. The loan-to-value ratio compares the amount of the loan to the fair value of the underlying property collateralizing the loan, and is commonly expressed as a percentage. Loan-to-value ratios greater than 100% indicate that the loan amount exceeds the collateral value. A loan-to-value ratio less than 100% indicates an excess of collateral value over the loan amount. The debt service coverage ratio compares a property's net operating income to its debt service payments. Debt service coverage ratios less than 1.0 times indicate that property operations do not generate enough income to cover the loan's current debt payments. A debt service coverage ratio greater than 1.0 times indicates an excess of net operating income over the debt service payments. The values utilized in calculating these ratios are developed as part of the Company's periodic review of the commercial mortgage loan and agricultural property loan portfolios, which includes an internal appraisal of the underlying collateral value. The Company's periodic review also includes a quality re-rating process, whereby the internal quality rating originally assigned at underwriting is updated based on current loan, property and market information using a proprietary quality rating system. The loan-to-value ratio is the most significant of several inputs used to establish the internal credit rating of a loan which in turn drives the allowance for losses. Other key factors considered in determining the internal credit rating include debt service coverage ratios, amortization, loan term, and estimated market value growth rate and volatility for the property type and region. See Note 4 for additional information related to the loan-to-value ratios and debt service coverage ratios related to the Company's commercial mortgage and agricultural loan portfolios.

Loans backed by residential properties and uncollateralized loans are also reviewed periodically. Each loan is assigned an internal or external credit rating. Internal credit ratings take into consideration various factors including financial ratios and qualitative assessments based on non-financial information. In cases where there are personal or third-party guarantors, the credit quality of the guarantor is also reviewed. These factors are used in developing the allowance for losses. Based on the diversity of the loans in these categories and their immateriality, the Company has not disclosed the credit quality indicators related to these loans in Note 4.

For those loans not reported at fair value, the allowance for losses includes a loan specific reserve for each impaired loan that has a specifically identified loss and a portfolio reserve for probable incurred but not specifically identified losses. For impaired commercial mortgage and other loans, the allowances for losses are determined based on the present value of expected future cash flows discounted at the loan's effective interest rate, or based upon the fair value of the collateral if the loan is collateral dependent. The portfolio reserves for probable incurred but not specifically identified losses in the commercial mortgage and agricultural loan portfolios consider the current credit composition of the portfolio based on an internal quality rating, as described above. The portfolio reserves are determined using past loan experience, including historical credit migration, loss probability and loss severity factors by property type. These factors are reviewed and updated as appropriate.

The allowance for losses on commercial mortgage and other loans can increase or decrease from period to period based on the factors noted above. "Realized investment gains (losses), net" includes changes in the allowance for losses and changes in value for loans accounted for under the fair value option. "Realized investment gains (losses), net" also includes gains and losses on sales, certain restructurings, and foreclosures.

When a commercial mortgage or other loan is deemed to be uncollectible, any specific valuation allowance associated with the loan is reversed and a direct write-down of the carrying amount of the loan is made. The carrying amount of the loan is not adjusted for subsequent recoveries in value.

Commercial mortgage and other loans are occasionally restructured in a troubled debt restructuring. These restructurings generally include one or more of the following: full or partial payoffs outside of the original contract terms; changes to interest rates; extensions of maturity; or additions or modifications to covenants. Additionally, the

Company may accept assets in full or partial satisfaction of the debt as part of a troubled debt restructuring. When restructurings occur, they are evaluated individually to determine whether the restructuring or modification constitutes a “troubled debt restructuring” as defined by authoritative accounting guidance. If the borrower is experiencing financial difficulty and the Company has granted a concession, the restructuring, including those that involve a partial payoff or the receipt of assets in full satisfaction of the debt is deemed to be a troubled debt restructuring. Based on the Company’s credit review process described above, these loans generally would have been deemed impaired prior to the troubled debt restructuring, and specific allowances for losses would have been established prior to the determination that a troubled debt restructuring has occurred.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

In a troubled debt restructuring where the Company receives assets in full satisfaction of the debt, any specific valuation allowance is reversed and a direct write-down of the loan is recorded for the amount of the allowance, and any additional loss, net of recoveries, or any gain is recorded for the difference between the fair value of the assets received and the recorded investment in the loan. When assets are received in partial settlement, the same process is followed, and the remaining loan is evaluated prospectively for impairment based on the credit review process noted above. When a loan is restructured in a troubled debt restructuring, the impairment of the loan is remeasured using the modified terms and the loan's original effective yield, and the allowance for loss is adjusted accordingly. Subsequent to the modification, income is recognized prospectively based on the modified terms of the loans in accordance with the income recognition policy noted above. Additionally, the loan continues to be subject to the credit review process noted above.

In situations where a loan has been restructured in a troubled debt restructuring and the loan has subsequently defaulted, this factor is considered when evaluating the loan for a specific allowance for losses in accordance with the credit review process noted above.

See Note 4 for additional information about commercial mortgage and other loans that have been restructured in a troubled debt restructuring.

Policy loans represent funds loaned to policyholders up to the cash surrender value of the associated insurance policies and are carried at the unpaid principal balances due to the Company from the policyholders. Interest income on policy loans is recognized in "Net investment income" at the contract interest rate when earned. Policy loans are fully collateralized by the cash surrender value of the associated insurance policies.

Other long-term investments consists of the Company's non-coupon investments in joint ventures and limited partnerships, other than operating joint ventures, as well as wholly-owned investment real estate and other investments. Joint venture and partnership interests are accounted for using the equity method of accounting, the cost method when the Company's partnership interest is so minor (generally less than 3%) that it exercises virtually no influence over operating and financial policies, or the fair value option where elected. The Company's income from investments in joint ventures and partnerships accounted for using the equity method or the cost method, other than the Company's investments in operating joint ventures, is included in "Net investment income." The carrying value of these investments is written down, or impaired, to fair value when a decline in value is considered to be other-than-temporary. In applying the equity method or the cost method (including assessment for OTTI), the Company uses financial information provided by the investee, generally on a one to three month lag. For the investments for which the Company has elected the fair value option, the associated realized and unrealized gains and losses are reported in "Other income." The Company consolidates joint ventures and limited partnerships in certain other instances where it is deemed to exercise control, or is considered the primary beneficiary of a variable interest entity. See Note 5 for additional information about VIEs.

The Company's wholly-owned investment real estate consists of real estate which the Company has the intent to hold for the production of income as well as real estate held for sale. Real estate which the Company has the intent to hold for the production of income is carried at depreciated cost less any write-downs to fair value for impairment losses and is reviewed for impairment whenever events or circumstances indicate that the carrying value may not be recoverable. Real estate held for sale is carried at the lower of depreciated cost or fair value less estimated selling costs and is not further depreciated once classified as such. An impairment loss is recognized when the carrying value of the investment real estate exceeds the estimated undiscounted future cash flows (excluding interest charges) from the investment. At that time, the carrying value of the investment real estate is written down to fair value. Decreases in the carrying value of investment real estate held for the production of income due to OTTI are recorded in "Realized

investment gains (losses), net.” Depreciation on real estate held for the production of income is computed using the straight-line method over the estimated useful lives of the properties and is included in “Net investment income.”

Short-term investments primarily consist of highly liquid debt instruments with a maturity of twelve months or less and greater than three months when purchased, other than those debt instruments meeting this definition that are included in “Trading account assets supporting insurance liabilities, at fair value.” These investments are generally carried at fair value and include certain money market investments, funds managed similar to regulated money market funds, short-term debt securities issued by government-sponsored entities and other highly liquid debt instruments.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Realized investment gains (losses) are computed using the specific identification method with the exception of some of the Company's International Insurance businesses' portfolios, where the average cost method is used. Realized investment gains and losses are generated from numerous sources, including the sales of fixed maturity securities, equity securities, investments in joint ventures and limited partnerships and other types of investments, as well as adjustments to the cost basis of investments for net OTTI recognized in earnings. Realized investment gains and losses also reflect changes in the allowance for losses on commercial mortgage and other loans, fair value changes on commercial mortgage loans carried at fair value, and fair value changes on embedded derivatives and free-standing derivatives that do not qualify for hedge accounting treatment. See "Derivative Financial Instruments" below for additional information regarding the accounting for derivatives.

The Company's available-for-sale and held-to-maturity securities with unrealized losses are reviewed quarterly to identify OTTI in value. In evaluating whether a decline in value is other-than-temporary, the Company considers several factors including, but not limited to the following: (1) the extent and the duration of the decline; (2) the reasons for the decline in value (credit event, currency or interest-rate related, including general credit spread widening); and (3) the financial condition of and near-term prospects of the issuer. With regard to available-for-sale equity securities, the Company also considers the ability and intent to hold the investment for a period of time to allow for a recovery of value. When it is determined that a decline in value of an equity security is other-than-temporary, the carrying value of the equity security is reduced to its fair value, with a corresponding charge to earnings.

An OTTI is recognized in earnings for a debt security in an unrealized loss position when either (1) the Company has the intent to sell the debt security or (2) it is more likely than not the Company will be required to sell the debt security before its anticipated recovery. For all debt securities in unrealized loss positions that do not meet either of these two criteria, the Company analyzes its ability to recover the amortized cost by comparing the net present value of projected future cash flows with the amortized cost of the security. The net present value is calculated by discounting the Company's best estimate of projected future cash flows at the effective interest rate implicit in the debt security prior to impairment. The Company may use the estimated fair value of collateral as a proxy for the net present value if it believes that the security is dependent on the liquidation of collateral for recovery of its investment. If the net present value is less than the amortized cost of the investment, an OTTI is recognized. In addition to the above mentioned circumstances, the Company also recognizes an OTTI in earnings when a non-functional currency denominated security in an unrealized loss position due to currency exchange rates is not expected to recover in value before maturity.

When an OTTI of a debt security has occurred, the amount of the OTTI recognized in earnings depends on whether the Company intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis. If the debt security meets either of these two criteria or the unrealized losses due to changes in foreign currency exchange rates are not expected to be recovered before maturity, the OTTI recognized in earnings is equal to the entire difference between the security's amortized cost basis and its fair value at the impairment measurement date. For OTTI of debt securities that do not meet these criteria, the net amount recognized in earnings is equal to the difference between the amortized cost of the debt security and its net present value calculated as described above. Any difference between the fair value and the net present value of the debt security at the impairment measurement date is recorded in "Other comprehensive income (loss)." Unrealized gains or losses on securities for which an OTTI has been recognized in earnings is tracked as a separate component of AOCI.

The split between the amount of an OTTI recognized in other comprehensive income (loss) and the net amount recognized in earnings for debt securities is driven principally by assumptions regarding the amount and timing of projected cash flows. For mortgage-backed and asset-backed securities, cash flow estimates consider the payment terms of the underlying assets backing a particular security, including interest rate and prepayment assumptions based

on data from widely accepted third-party data sources or internal estimates. In addition to interest rate and prepayment assumptions, cash flow estimates also include other assumptions regarding the underlying collateral including default rates and recoveries, which vary based on the asset type and geographic location, as well as the vintage year of the security. For structured securities, the payment priority within the tranche structure is also considered. For all other debt securities, cash flow estimates are driven by assumptions regarding probability of default and estimates regarding timing and amount of recoveries associated with a default. The Company has developed these estimates using information based on its historical experience as well as using market observable data, such as industry analyst reports and forecasts, sector credit ratings and other data relevant to the collectability of a security, such as the general payment terms of the security and the security's position within the capital structure of the issuer.

The new cost basis of an impaired security is not adjusted for subsequent increases in estimated fair value. In periods subsequent to the recognition of an OTTI, the impaired security is accounted for as if it had been purchased on the measurement date of the impairment. For debt securities, the discount (or reduced premium) based on the new cost basis may be accreted into net investment income in future periods, including increases in cash flow on a prospective basis. In certain cases where there are decreased cash flow expectations, the security is reviewed for further cash flow impairments.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Unrealized investment gains and losses are also considered in determining certain other balances, including DAC, VOBA, DSI, certain future policy benefits, policyholders' account balances, policyholders' dividends and deferred tax assets or liabilities. These balances are adjusted, as applicable, for the impact of unrealized gains or losses on investments as if these gains or losses had been realized, with corresponding credits or charges included in AOCI. Each of these balances is discussed in greater detail below.

Cash and cash equivalents include cash on hand, amounts due from banks, certain money market investments, funds managed similar to regulated money market funds, and other debt instruments with maturities of three months or less when purchased, other than cash equivalents that are included in "Trading account assets supporting insurance liabilities, at fair value."

Accrued investment income primarily includes accruals of interest and dividend income from investments that have been earned but not yet received.

Deferred policy acquisition costs are costs related directly to the successful acquisition of new and renewal insurance and annuity business that have been deferred to the extent such costs are deemed recoverable from future profits. Such DAC primarily includes commissions, costs of policy issuance and underwriting, and certain other expenses that are directly related to successfully negotiated contracts. In each reporting period, capitalized DAC is amortized to "Amortization of DAC," net of the accrual of imputed interest on DAC balances. DAC is subject to periodic recoverability testing. DAC, for applicable products, is adjusted for the impact of unrealized gains or losses on investments as if these gains or losses had been realized, with corresponding credits or charges included in AOCI.

For traditional participating life insurance which are included in the Closed Block, DAC is amortized over the expected life of the contracts in proportion to gross margins based on historical and anticipated future experience, which is evaluated regularly. The effect of changes in estimated gross margins on unamortized DAC is reflected in the period such estimated gross margins are revised on a retrospective basis. DAC related to non-participating traditional individual life insurance and longevity reinsurance contracts is amortized in proportion to gross premiums.

DAC related to universal and variable life products and fixed and variable deferred annuity products are generally deferred and amortized over the expected life of the contracts in proportion to gross profits arising principally from investment margins, mortality and expense margins, and surrender charges, based on historical and anticipated future experience, which is updated periodically. The Company uses a reversion to the mean approach for equities to derive future equity return assumptions. However, if the projected equity return calculated using this approach is greater than the maximum equity return assumption, the maximum equity return is utilized. Gross profits also include impacts from the embedded derivatives associated with certain of the optional living benefit features of the Company's variable annuity contracts and related hedging activities. Total gross profits include both actual gross profits and estimates of gross profits for future periods. The Company regularly evaluates and adjusts DAC balances with a corresponding charge or credit to current period earnings, representing a cumulative adjustment to all prior periods' amortization, for the impact of actual gross profits and changes in the Company's projections of estimated future gross profits. Adjustments to DAC balances include: (i) annual review of assumptions that reflect the comprehensive review of the assumptions used in estimating gross profits for future periods, (ii) quarterly adjustments for current period experience (also referred to as "experience true-up" adjustments) that reflect the impact of differences between actual gross profits for a given period and the previously estimated expected gross profits for that period, and (iii) quarterly adjustments for market performance (also referred to as "experience unlocking") that reflect the impact of changes to the Company's estimate of total gross profits to reflect actual fund performance and market conditions.

For group annuity contracts (other than single premium group annuities), acquisition costs are generally deferred and amortized over the expected life of the contracts in proportion to gross profits. For group corporate-, bank- and trust-owned life insurance contracts, acquisition costs are generally deferred and amortized in proportion to lives insured. For single premium immediate annuities with life contingencies, single premium group annuities, including non-participating group annuity contracts, and single premium structured settlements with life contingencies, all acquisition costs are charged to expense immediately because generally all premiums are received at the inception of the contract. For funding agreement notes contracts, single premium structured settlement contracts without life contingencies, and single premium immediate annuities without life contingencies, acquisition expenses are deferred and amortized over the expected life of the contracts using the interest method. For other group life and disability insurance contracts and guaranteed investment contracts, acquisition costs are expensed as incurred.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

For some products, policyholders can elect to modify product benefits, features, rights or coverages by exchanging a contract for a new contract or by amendment, endorsement, or rider to a contract, or by the election of a feature or coverage within a contract. These transactions are known as internal replacements. If policyholders surrender traditional life insurance policies in exchange for life insurance policies that do not have fixed and guaranteed terms, the Company immediately charges to expense the remaining unamortized DAC on the surrendered policies. For other internal replacement transactions, except those that involve the addition of a nonintegrated contract feature that does not change the existing base contract, the unamortized DAC is immediately charged to expense if the terms of the new policies are not substantially similar to those of the former policies. If the new terms are substantially similar to those of the earlier policies, the DAC is retained with respect to the new policies and amortized over the expected life of the new policies. See Note 6 for additional information regarding DAC.

Value of business acquired represents identifiable intangible assets to which a portion of the purchase price in a business acquisition is attributed under the application of purchase accounting. VOBA represents an adjustment to the stated value of inforce insurance contract liabilities to present them at fair value, determined as of the acquisition date. VOBA balances are subject to recoverability testing, in the manner in which they were acquired. The Company has established a VOBA asset primarily for its acquired life insurance products, accident and health products with fixed benefits, deferred annuity contracts, and defined contribution and defined benefit businesses. As of December 31, 2017, the majority of the VOBA balance relates to the 2011 acquisition of AIG Star Life Insurance Co., Ltd, AIG Edison Life Insurance Company, AIG Financial Assurance Japan K.K. and AIG Edison Service Co., Ltd. (collectively, the “Star and Edison Businesses”) and the 2013 acquisition of The Hartford Financial Services Group’s individual life insurance business (“the Hartford Life Business”). The Company amortizes VOBA over the anticipated life of the acquired contracts using the same methodology and assumptions used to amortize DAC. The Company records amortization of VOBA in “General and administrative expenses.” VOBA, for applicable products, is adjusted for the impact of unrealized gains or losses on investments as if these gains or losses had been realized, with corresponding credits or charges included in AOCI. See Note 8 for additional information regarding VOBA.

Other assets consist primarily of prepaid pension benefit costs (see Note 18), certain restricted assets, trade receivables, goodwill and other intangible assets, DSI, the Company’s investments in operating joint ventures, property and equipment, reinsurance recoverables, and receivables resulting from sales of securities that had not yet settled at the balance sheet date.

Property and equipment are carried at cost less accumulated depreciation. Depreciation is determined using the straight-line method over the estimated useful lives of the related assets, which generally range from 3 to 40 years.

As a result of certain acquisitions, the Company recognizes an asset for goodwill representing the excess of cost over the net fair value of the assets acquired and liabilities assumed. Goodwill is assigned to reporting units at the date the goodwill is initially recorded. A reporting unit is an operating segment or a unit one level below the operating segment, if discrete financial information is prepared and regularly reviewed by management at that level. Once goodwill has been assigned to reporting units, it no longer retains its association with a particular acquisition, and all of the activities within a reporting unit, whether acquired or organically grown, are available to support the value of the goodwill.

The Company tests goodwill for impairment annually as of December 31 and more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. Accounting guidance provides for an optional qualitative assessment for testing goodwill impairment that may allow companies to skip the quantitative two-step test. The Company has elected the quantitative two-step test that is performed at the reporting unit level. The first step, used to identify potential impairment, involves comparing

each reporting unit's fair value to its carrying value including goodwill. If the fair value of a reporting unit exceeds its carrying value, the applicable goodwill is considered not to be impaired. If the carrying value exceeds fair value, there is an indication of a potential impairment and the second step of the test is performed to measure the amount of impairment.

The second step involves calculating an implied fair value of goodwill for each reporting unit for which the first step indicated impairment. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination, which is the excess of the fair value of the reporting unit, as determined in the first step, over the aggregate fair values of the individual assets, liabilities and identifiable intangibles as if the reporting unit was being acquired in a business combination. If the implied fair value of goodwill in the "pro forma" business combination accounting as described above exceeds the goodwill assigned to the reporting unit, there is no impairment. If the goodwill assigned to a reporting unit exceeds the implied fair value of the goodwill, an impairment charge is recorded in "General and administrative expenses" for the excess. An impairment loss recognized cannot exceed the amount of goodwill assigned to a reporting unit, and the loss establishes a new basis in the goodwill. Subsequent reversal of goodwill impairment losses is not permitted. Management is required to make significant estimates in determining the fair value of a reporting unit including, but not limited to: projected earnings, comparative market multiples, and the risk rate at which future net cash flows are discounted.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

The Company offered various types of sales inducements to policyholders related to fixed and variable deferred annuity contracts. The Company defers sales inducements and amortizes them over the anticipated life of the policy using the same methodology and assumptions used to amortize DAC. Sales inducement balances are subject to periodic recoverability testing. The Company records amortization of DSI in “Interest credited to policyholders’ account balances.” DSI, for applicable products, is adjusted for the impact of unrealized gains or losses on investments as if these gains or losses had been realized, with corresponding credits or charges included in AOCI. See Note 11 for additional information regarding sales inducements.

The majority of the Company’s reinsurance recoverables and payables are associated with the reinsurance arrangements used to effect the Company’s acquisition of the retirement business of CIGNA and the Hartford Life Business. The remaining amounts relate to other reinsurance arrangements entered into by the Company. For each of its reinsurance contracts, the Company determines if the contract provides indemnification against loss or liability relating to insurance risk in accordance with applicable accounting standards. The Company reviews all contractual features, particularly those that may limit the amount of insurance risk to which the reinsurer is subject or features that delay the timely reimbursement of claims. See Note 13 for additional information about the Company’s reinsurance arrangements.

Identifiable intangible assets primarily include customer relationships and mortgage servicing rights and are recorded net of accumulated amortization. The Company tests identifiable intangible assets for impairment on an annual basis as of December 31 of each year or whenever events or circumstances suggest that the carrying value of an identifiable intangible asset may exceed the sum of the undiscounted cash flows expected to result from its use and eventual disposition. If this condition exists and the carrying value of an identifiable intangible asset exceeds its fair value, the excess is recognized as an impairment and is recorded as a charge against net income. Measuring intangible assets requires the use of estimates. Significant estimates include the projected net cash flow attributable to the intangible asset and the risk rate at which future net cash flows are discounted for purposes of estimating fair value, as applicable. See Note 9 for additional information regarding identifiable intangible assets.

Investments in operating joint ventures are generally accounted for under the equity method. The carrying value of these investments is written down, or impaired, to fair value when a decline in value is considered to be other-than-temporary. See Note 7 for additional information on investments in operating joint ventures.

Separate account assets represent segregated funds that are invested for certain policyholders, pension funds and other customers. The assets consist primarily of equity securities, fixed maturities, real estate-related investments, real estate mortgage loans, short-term investments and derivative instruments and are reported at fair value. The assets of each account are legally segregated and are not subject to claims that arise out of any other business of the Company. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees made by the Company with respect to certain accounts. The investment income and realized investment gains or losses from separate account assets generally accrue to the policyholders and are not included in the Company’s results of operations. Mortality, policy administration and surrender charges assessed against the accounts are included in “Policy charges and fee income.” Asset management fees charged to the accounts are included in “Asset management and service fees.” Seed money that the Company invests in separate accounts is reported in the appropriate general account asset line. Investment income and realized investment gains or losses from seed money invested in separate accounts accrues to the Company and is included in the Company’s results of operations. See Note 11 for additional information regarding separate account arrangements with contractual guarantees. See also “Separate account liabilities” below.

LIABILITIES

166

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Future policy benefits liability is primarily comprised of the present value of estimated future payments to or on behalf of policyholders, where the timing and amount of payment depends on policyholder mortality or morbidity, less the present value of future net premiums. For individual traditional participating life insurance products, the mortality and interest rate assumptions applied are those used to calculate the policies' guaranteed cash surrender values. For life insurance, other than individual traditional participating life insurance, and annuity and disability products, expected mortality and morbidity are generally based on Company experience, industry data and/or other factors. Interest rate assumptions are based on factors such as market conditions and expected investment returns. Although mortality, morbidity and interest rate assumptions are "locked-in" upon the issuance of new insurance or annuity business with fixed and guaranteed terms, significant changes in experience or assumptions may require the Company to provide for expected future losses on a product by establishing premium deficiency reserves. Premium deficiency reserves are established, if necessary, when the liability for future policy benefits plus the present value of expected future gross premiums are determined to be insufficient to provide for expected future policy benefits and expenses. Premium deficiency reserves do not include a provision for the risk of adverse deviation. In determining if a premium deficiency related to short-duration contracts exists, the Company considers, among other factors, anticipated investment income. Any adjustments to future policy benefit reserves related to net unrealized gains on securities classified as available-for-sale are included in AOCI. In certain instances, the policyholder liability for a particular line of business may not be deficient in the aggregate to trigger loss recognition, but the pattern of earnings may be such that profits are expected to be recognized in earlier years followed by losses in later years. In these situations, accounting standards require that an additional liability (Profits Followed by Losses or "PFL" liability) be recognized by an amount necessary to sufficiently offset the losses that would be recognized in later years. Currently, PFL liabilities are predominantly associated with certain universal life contracts that measure GAAP reserves using a dynamic approach and accordingly, are updated each quarter using current inforce and market data and as part of the annual assumption update such that the liability as of each measurement date represents the Company's current estimate of the present value of the amount necessary to offset anticipated future losses. See Note 10 for additional information regarding future policy benefits.

The Company's liability for future policy benefits also includes a liability for unpaid claims and claim adjustment expenses. The Company does not establish claim liabilities until a loss has been incurred. However, unpaid claims and claim adjustment expenses include estimates of claims that the Company believes have been incurred but have not yet been reported as of the balance sheet date. The Company's liability for future policy benefits also includes net liabilities for guarantee benefits related to certain long-duration life and annuity contracts, which are discussed more fully in Note 11, and deferred profits.

Policyholders' account balances liability represents the contract value that has accrued to the benefit of the policyholder as of the balance sheet date. This liability is primarily associated with the accumulated account deposits, plus interest credited, less policyholder withdrawals and other charges assessed against the account balance, as applicable. These policyholders' account balances also include provision for benefits under non-life contingent payout annuities and certain unearned revenues. See Note 10 for additional information regarding policyholders' account balances.

Policyholders' dividends liability includes dividends payable to policyholders and the policyholder dividend obligation associated with the participating policies included in the Closed Block. The dividends payable for participating policies included in the Closed Block are determined at the end of each year for the following year by the Board of Directors of the Prudential Insurance Company of America ("Prudential Insurance") based on its statutory results, capital position, ratings, and the emerging experience of the Closed Block. The policyholder dividend obligation represents amounts expected to be paid to Closed Block policyholders as an additional policyholder dividend unless otherwise offset by future Closed Block performance. Any adjustments to the policyholder dividend obligation related

to net unrealized gains (losses) on securities classified as available-for-sale are included in AOCI. For additional information on the policyholder dividend obligation, see Note 12. The dividends payable for policies other than the participating policies included in the Closed Block include dividends payable in accordance with certain group and individual insurance policies.

Securities sold under agreements to repurchase represent liabilities associated with securities repurchase and resale agreements which are used primarily to earn spread income, to borrow funds, or to facilitate trading activity. As part of securities repurchase agreements, the Company transfers U.S. government and government agency securities to a third-party, and receives cash as collateral. As part of securities resale agreements, the Company invests cash and receives as collateral U.S. government securities or other debt securities. For securities repurchase agreements used to earn spread income, the cash received is typically invested in cash equivalents, short-term investments or fixed maturities.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Securities repurchase and resale agreements that satisfy certain criteria are treated as secured borrowing or secured lending arrangements. These agreements are carried at the amounts at which the securities will be subsequently resold or reacquired, as specified in the respective transactions. For securities purchased under agreements to resell, the Company's policy is to take possession or control of the securities either directly or through a third-party custodian. These securities are valued daily and additional securities or cash collateral is received, or returned, when appropriate to protect against credit exposure. Securities to be resold are the same, or substantially the same, as the securities received. The majority of these transactions are with large brokerage firms and large banks. For securities sold under agreements to repurchase, the market value of the securities to be repurchased is monitored, and additional collateral is obtained where appropriate, to protect against credit exposure. The Company obtains collateral in an amount at least equal to 95% of the fair value of the securities sold. Securities to be repurchased are the same, or substantially the same, as those sold. The majority of these transactions are with highly rated money market funds. Income and expenses related to these transactions executed within the insurance companies used to earn spread income are reported as "Net investment income;" however, for transactions used for funding purposes, the associated borrowing cost is reported as interest expense (included in "General and administrative expenses"). Income and expenses related to these transactions executed within the Company's derivative operations are reported in "Other income."

Cash collateral for loaned securities represent liabilities to return cash proceeds from security lending transactions. Securities lending transactions are used primarily to earn spread income, to borrow funds, or to facilitate trading activity. As part of securities lending transactions, the Company transfers U.S. and foreign debt and equity securities, as well as U.S. government and government agency securities, and receives cash as collateral. Cash proceeds from securities lending transactions are used to earn spread income, and are typically invested in cash equivalents, short-term investments or fixed maturities. Securities lending transactions are treated as financing arrangements and are recorded at the amount of cash received. The Company obtains collateral in an amount equal to 102% and 105% of the fair value of the domestic and foreign securities, respectively. The Company monitors the market value of the securities loaned on a daily basis with additional collateral obtained as necessary. Substantially all of the Company's securities lending transactions are with large brokerage firms and large banks. Income and expenses associated with securities lending transactions used to earn spread income are reported as "Net investment income;" however, for securities lending transactions used for funding purposes the associated rebate is reported as interest expense (included in "General and administrative expenses").

Income taxes liability primarily represents the net deferred tax liability and the Company's estimated taxes payable for the current year.

The Company and its includible domestic subsidiaries file a consolidated federal income tax return that includes both life insurance companies and non-life insurance companies. Certain other domestic subsidiaries file separate tax returns. Subsidiaries operating outside the U.S. are taxed, and income tax expense is recorded, based on applicable foreign statutes. See Note 19 for a discussion of certain non-U.S. jurisdictions for which the Company assumes repatriation of earnings.

Deferred income taxes are recognized, based on enacted rates, when assets and liabilities have different values for financial statement and tax reporting purposes. A valuation allowance is recorded to reduce a deferred tax asset to the amount expected to be realized.

Items required by tax regulations to be included in the tax return may differ from the items reflected in the financial statements. As a result, the effective tax rate reflected in the financial statements may be different than the actual rate applied on the tax return. Some of these differences are permanent such as expenses that are not deductible in the Company's tax return, and some differences are temporary, reversing over time, such as valuation of insurance

reserves. Temporary differences create deferred tax assets and liabilities. Deferred tax assets generally represent items that can be used as a tax deduction or credit in future years for which the Company has already recorded the tax benefit in the Company's Consolidated Statements of Operations. Deferred tax liabilities generally represent tax expense recognized in the Company's financial statements for which payment has been deferred, or expenditures for which the Company has already taken a deduction in the Company's tax return but have not yet been recognized in the Company's financial statements.

The application of U.S. GAAP requires the Company to evaluate the recoverability of the Company's deferred tax assets and establish a valuation allowance if necessary to reduce the Company's deferred tax assets to an amount that is more likely than not expected to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. See Note 19 for a discussion of factors considered when evaluating the need for a valuation allowance.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

The U.S. Tax Cuts and Jobs Act of 2017 (“Tax Act of 2017”) enacted two new taxes that could impact the Company’s effective tax rate and cash tax payments in future periods. The Global Intangible Low-Taxed Income provision (“GILTI”) applies a U.S. minimum tax to earnings of foreign subsidiaries in excess of a 10% deemed return on tangible assets of foreign subsidiaries. The amount of tax in any period on GILTI, if any, can depend on annual differences between U.S. taxable income recognition rules and taxable income recognition rules in the country of operations and the overall taxable income of U.S. operations. The Company will account for the effects of the GILTI tax as a period cost if and when incurred. The Tax Act of 2017 also includes a new Base Erosion and Anti-Abuse Tax (“BEAT”). BEAT is an alternative tax which is due if the calculated BEAT amount is greater than the regular corporate tax in any given year. The additional tax is generally calculated after adding back to taxable income certain deductible payments made to foreign affiliates that are at least 25% owned, and then applying an alternative tax rate of 10% (5% in 2018) to the alternative tax base, rather than the 21% corporate tax rate. The amount of the BEAT in any period, if any, will depend on the amount of payments by U.S. entities to foreign affiliates that are at least 25% owned, the amount of overall U.S. deductible amounts and the results of the U.S. consolidated group. The Company will account for the effects of the BEAT as a period cost if and when incurred.

In December of 2017, SEC staff issued “SAB 118, Income Tax Accounting Implications of the Tax Cuts and Jobs Act” (“SAB 118”), which allows registrants to record provisional amounts during a ‘measurement period’ not to extend beyond one year. Under the relief provided by SAB 118, a company can recognize provisional amounts when it does not have the necessary information available, prepared or analyzed in reasonable detail to complete its accounting for the change in tax law. See Note 19 to the Consolidated Financial Statements for a discussion of provisional amounts related to the Tax Act of 2017.

U.S. GAAP prescribes a comprehensive model for how a company should recognize, measure, present, and disclose in its financial statements uncertain tax positions that a company has taken or expects to take on tax returns. The application of this guidance is a two-step process. First, the Company determines whether it is more likely than not, based on the technical merits, that the tax position will be sustained upon examination. If a tax position does not meet the more likely than not recognition threshold, the benefit of that position is not recognized in the financial statements. The second step is measurement. The Company measures the tax position as the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate resolution with a taxing authority that has full knowledge of all relevant information. This measurement considers the amounts and probabilities of the outcomes that could be realized upon ultimate settlement using the facts, circumstances, and information available at the reporting date.

The Company’s liability for income taxes includes a liability for unrecognized tax benefits, interest and penalties which relate to tax years still subject to review by the Internal Revenue Service (“IRS”) or other taxing jurisdictions. Audit periods remain open for review until the statute of limitations has passed. Generally, for tax years which produce net operating losses, capital losses or tax credit carryforwards (“tax attributes”), the statute of limitations does not close, to the extent of these tax attributes, until the expiration of the statute of limitations for the tax year in which they are fully utilized. The completion of review or the expiration of the statute of limitations for a given audit period could result in an adjustment to the liability for income taxes. The Company classifies all interest and penalties related to tax uncertainties as income tax expense. See Note 19 for additional information regarding income taxes.

Short-term and long-term debt liabilities are primarily carried at an amount equal to unpaid principal balance, net of unamortized discount or premium and debt issue costs. Original-issue discount or premium and debt-issue costs are recognized as a component of interest expense over the period the debt is expected to be outstanding, using the interest method of amortization. Interest expense is generally presented within “General and administrative expenses” in the Company’s Consolidated Statements of Operations. Interest expense may also be reported within “Net investment

income” for certain activity, as prescribed by specialized industry guidance. Short-term debt is debt coming due in the next twelve months, including that portion of debt otherwise classified as long-term. The short-term debt caption may exclude short-term debt items the Company intends to refinance on a long-term basis in the near-term. See Note 14 for additional information regarding short-term and long-term debt.

Other liabilities consist primarily of trade payables, pension and other employee benefit liabilities (see Note 18), derivative liabilities (see “Derivative Financial Instruments” below), reinsurance payables (see discussion of reinsurance above in “Other assets”), and payables resulting from purchases of securities that had not yet settled at the balance sheet date.

Notes issued by consolidated variable interest entities represent notes issued by certain asset-backed investment vehicles, primarily collateralized loan obligations, which the Company is required to consolidate. The creditors of these VIEs do not have recourse to the Company in excess of the assets contained within the VIEs. The Company has elected the fair value option for the majority of these notes, and has based the fair value on the corresponding bank loan collateral. Changes in fair value are reported in “Other income.”

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Separate account liabilities primarily represent the contractholder's account balance in separate account assets and to a lesser extent borrowings of the separate account, and will be equal and offsetting to total separate account assets. See also "Separate account assets" above.

Commitments and contingent liabilities are accrued if it is probable that a liability has been incurred and an amount is reasonably estimable. Management evaluates whether there are incremental legal or other costs directly associated with the ultimate resolution of the matter that are reasonably estimable and, if so, they are included in the accrual. These accruals are generally reported in "Other liabilities."

REVENUES AND BENEFITS AND EXPENSES

Insurance Revenue and Expense Recognition

Premiums from individual life products, other than universal and variable life contracts, and health insurance and long-term care products are recognized when due. When premiums are due over a significantly shorter period than the period over which benefits are provided, any gross premium in excess of the net premium (i.e., the portion of the gross premium required to provide for all expected future benefits and expenses) is generally deferred and recognized into revenue in a constant relationship to insurance in force. Benefits are recorded as an expense when they are incurred. A liability for future policy benefits is recorded when premiums are recognized using the net premium valuation methodology.

Premiums from non-participating group annuities with life contingencies, single premium structured settlements with life contingencies and single premium immediate annuities with life contingencies are recognized when due. When premiums are due over a significantly shorter period than the period over which benefits are provided, any gross premium in excess of the net premium is generally deferred and recognized into revenue based on expected future benefit payments. Benefits are recorded as an expense when they are incurred. A liability for future policy benefits is recorded when premiums are recognized using the net level premium method.

Certain individual annuity contracts provide the contractholder a guarantee that the benefit received upon death or annuitization will be no less than a minimum prescribed amount. These benefits are accounted for as insurance contracts. The Company also provides contracts with certain living benefits which are considered embedded derivatives. See Note 11 for additional information regarding these contracts.

Amounts received as payment for universal or variable group and individual life contracts, deferred fixed or variable annuities, structured settlements and other contracts without life contingencies, and participating group annuities are reported as deposits to "Policyholders' account balances" and/or "Separate account liabilities." Revenues from these contracts are reflected in "Policy charges and fee income" consisting primarily of fees assessed during the period against the policyholders' account balances for mortality and other benefit charges, policy administration charges and surrender charges. In addition to fees, the Company earns investment income from the investment of deposits in the Company's general account portfolio. Fees assessed that represent compensation to the Company for services to be provided in future periods and certain other fees are generally deferred and amortized into revenue over the life of the related contracts in proportion to estimated gross profits. Benefits and expenses for these products include claims in excess of related account balances, expenses of contract administration, interest credited to policyholders' account balances and amortization of DAC, DSI and VOBA.

For group life, other than universal and variable group life contracts, and disability insurance, premiums are generally recognized over the period to which the premiums relate in proportion to the amount of insurance protection provided. Claim and claim adjustment expenses are recognized when incurred.

Asset management and service fees principally includes asset-based asset management fees, which are recognized in the period in which the services are performed. In certain asset management fee arrangements, the Company is entitled to receive performance-based incentive fees when the return on assets under management exceeds certain benchmark returns or other performance targets. The Company may be required to return all, or part, of such performance-based incentive fee depending on future performance of these assets relative to performance benchmarks. The Company records performance-based incentive fee revenue when the contractual terms of the asset management fee arrangement have been satisfied such that the performance fee is no longer subject to clawback or contingency. Under this principle the Company records a deferred performance-based incentive fee liability to the extent it receives cash related to the performance-based incentive fee prior to meeting the revenue recognition criteria delineated above.

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Other income includes realized and unrealized gains or losses from investments classified as “trading” such as “Trading account assets supporting insurance liabilities” and “Other trading account assets,” “Other long-term investments” for which the Company has elected the fair value option, and consolidated entities that follow specialized investment company fair value accounting. “Other income” also includes gains and losses primarily related to the remeasurement of foreign currency denominated assets and liabilities, as discussed in more detail under “Foreign Currency” below.

OTHER ACCOUNTING POLICIES

Share-Based Payments

The Company applies the fair value-based measurement method in accounting for share-based payment transactions with employees except for equity instruments held by employee share ownership plans. Excess tax benefits (deficits) represent the cumulative difference between the actual tax benefit realized and the amount of deferred tax assets recorded attributable to share-based payment transactions. Beginning in 2017, as a result of the prospective adoption of Accounting Standards Update (“ASU”) 2016-09 (see “—Recent Accounting Pronouncements”), the Company accounts for excess tax benefits (deficits) in earnings. Prior to the adoption of ASU 2016-09, the Company accounted for excess tax benefits (deficits) in additional paid-in capital.

The Company accounts for non-employee stock options using the fair value method in accordance with authoritative guidance and related interpretations on accounting for equity instruments that are issued to other than employees for acquiring, or in conjunction with selling, goods or services.

Earnings Per Share

Earnings per share of Common Stock for 2017, 2016 and 2015 reflects the consolidated earnings of Prudential Financial. Basic earnings per share is computed by dividing available income attributable to common shareholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share includes the effect of all dilutive potential common shares that were outstanding during the period. See Note 16 for additional information.

As discussed under “Share-Based Payments” above, the Company accounts for excess tax benefits (deficits) in earnings beginning in 2017. For the years 2016 and 2015, excess tax benefits (deficits) were accounted for in additional paid-in capital. The Company reflects in assumed proceeds, based on application of the treasury stock method, the excess tax benefits (deficits) that would be recognized in earnings upon exercise or release of the award.

Foreign Currency

Assets, liabilities and results of foreign operations are recorded based on the functional currency of each foreign operation. The determination of the functional currency is based on economic facts and circumstances pertaining to each foreign operation. With the exception of the Company’s Japanese operations, where multiple functional currencies exist, the local currencies of the Company’s foreign operations are typically their functional currencies.

Assets and liabilities of foreign operations and subsidiaries reported in currencies other than U.S. dollars are translated at the exchange rate in effect at the end of the period. Revenues, benefits and other expenses are translated at the average rate prevailing during the period. The effects of translating the statements of operations and financial position of non-U.S. entities with functional currencies other than the U.S. dollar are included, net of related qualifying hedge gains and losses and income taxes, in AOCI. Gains and losses resulting from the remeasurement of foreign currency

transactions are reported in either AOCI or current earnings in “Other income” depending on the nature of the related foreign currency denominated asset or liability.

Derivative Financial Instruments

Derivatives are financial instruments whose values are derived from interest rates, foreign exchange rates, financial indices, values of securities or commodities, credit spreads, market volatility, expected returns, and liquidity. Values can also be affected by changes in estimates and assumptions, including those related to counterparty behavior and non-performance risk (“NPR”) used in valuation models. Derivative financial instruments generally used by the Company include swaps, futures, forwards and options and may be exchange-traded or contracted in the over-the-counter (“OTC”) market. Derivative positions are carried at fair value, generally by obtaining quoted market prices or through the use of valuation models.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Derivatives are used to manage the interest rate and currency characteristics of assets or liabilities and to mitigate volatility of expected non-functional currency earnings and net investments in foreign operations resulting from changes in currency exchange rates. Additionally, derivatives may be used to seek to reduce exposure to interest rate, credit, foreign currency and equity risks associated with assets held or expected to be purchased or sold, and liabilities incurred or expected to be incurred. As discussed in detail below and in Note 21, all realized and unrealized changes in fair value of derivatives are recorded in current earnings, with the exception of the effective portion of cash flow hedges and effective hedges of net investments in foreign operations. The Company may also enter into intercompany derivatives, the results of which ultimately eliminate in consolidation over the term of the instrument; however, where applicable, derivative results are included in business gross profits which may impact the pattern by which DAC and other assets are amortized. Cash flows from derivatives are reported in the operating, investing, or financing activities sections in the Consolidated Statements of Cash Flows based on the nature and purpose of the derivative.

Derivatives are recorded either as assets, within “Other trading account assets, at fair value” or “Other long-term investments,” or as liabilities, within “Other liabilities,” except for embedded derivatives which are recorded with the associated host contract. The Company nets the fair value of all derivative financial instruments with counterparties for which a master netting arrangement has been executed.

The Company designates derivatives as either (1) a hedge of the fair value of a recognized asset or liability or unrecognized firm commitment (“fair value” hedge); (2) a hedge of a forecasted transaction or of the variability of cash flows to be received or paid related to a recognized asset or liability (“cash flow” hedge); (3) a foreign currency fair value or cash flow hedge (“foreign currency” hedge); (4) a hedge of a net investment in a foreign operation; or (5) a derivative that does not qualify for hedge accounting.

To qualify for hedge accounting treatment, a derivative must be highly effective in mitigating the designated risk of the hedged item. Effectiveness of the hedge is formally assessed at inception and throughout the life of the hedging relationship. Even if a derivative qualifies for hedge accounting treatment, there may be an element of ineffectiveness of the hedge. Under such circumstances, the ineffective portion is recorded in “Realized investment gains (losses), net.”

The Company formally documents at inception all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking various hedge transactions. This process includes linking all derivatives designated as fair value, cash flow, or foreign currency hedges to specific assets and liabilities on the balance sheet or to specific firm commitments or forecasted transactions. Hedges of a net investment in a foreign operation are linked to the specific foreign operation.

When a derivative is designated as a fair value hedge and is determined to be highly effective, changes in its fair value, along with changes in the fair value of the hedged asset or liability (including losses or gains on firm commitments), are reported on a net basis in the Consolidated Statements of Operations, generally in “Realized investment gains (losses), net.” When swaps are used in hedge accounting relationships, periodic settlements are recorded in the same Consolidated Statements of Operations line as the related settlements of the hedged items.

When a derivative is designated as a cash flow hedge and is determined to be highly effective, changes in its fair value are recorded in AOCI until earnings are affected by the variability of cash flows being hedged (e.g., when periodic settlements on a variable-rate asset or liability are recorded in earnings). At that time, the related portion of deferred gains or losses on the derivative instrument is reclassified and reported in the Consolidated Statements of Operations line item associated with the hedged item.

When a derivative is designated as a foreign currency hedge and is determined to be highly effective, changes in its fair value are recorded either in current period earnings if the hedge transaction is a fair value hedge (e.g., a hedge of a recognized foreign currency asset or liability) or in AOCI if the hedge transaction is a cash flow hedge (e.g., a foreign currency denominated forecasted transaction). When a derivative is used as a hedge of a net investment in a foreign operation, its change in fair value, to the extent effective as a hedge, is accounted for in the same manner as a translation adjustment (i.e., reported in the cumulative translation adjustment account within AOCI).

If it is determined that a derivative no longer qualifies as an effective fair value or cash flow hedge or management removes the hedge designation, the derivative will continue to be carried on the balance sheet at its fair value, with changes in fair value recognized currently in "Realized investment gains (losses), net." In this scenario, the hedged asset or liability under a fair value hedge will no longer be adjusted for changes in fair value and the existing basis adjustment is amortized to the Consolidated Statements of Operations line associated with the asset or liability. The component of AOCI related to discontinued cash flow hedges is reclassified to the Consolidated Statements of Operations line associated with the hedged cash flows consistent with the earnings impact of the original hedged cash flows.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

When hedge accounting is discontinued because the hedged item no longer meets the definition of a firm commitment, or because it is probable that the forecasted transaction will not occur by the end of the specified time period, the derivative will continue to be carried on the balance sheet at its fair value, with changes in fair value recognized currently in “Realized investment gains (losses), net.” Any asset or liability that was recorded pursuant to recognition of the firm commitment is removed from the balance sheet and recognized currently in “Realized investment gains (losses), net.” Gains and losses that were in AOCI pursuant to the cash flow hedge of a forecasted transaction are recognized immediately in “Realized investment gains (losses), net.”

If a derivative does not qualify for hedge accounting, all changes in its fair value, including net receipts and payments, are included in “Realized investment gains (losses), net” without considering changes in the fair value of the economically associated assets or liabilities.

The Company is a party to financial instruments that contain derivative instruments that are “embedded” in the financial instruments. At inception, the Company assesses whether the economic characteristics of the embedded instrument are clearly and closely related to the economic characteristics of the remaining component of the financial instrument (i.e., the host contract) and whether a separate instrument with the same terms as the embedded instrument would meet the definition of a derivative instrument. When it is determined that (1) the embedded instrument possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract and (2) a separate instrument with the same terms would qualify as a derivative instrument, the embedded instrument qualifies as an embedded derivative that is separated from the host contract, carried at fair value, and changes in its fair value are included in “Realized investment gains (losses), net.” For certain financial instruments that contain an embedded derivative that otherwise would need to be bifurcated and reported at fair value, the Company may elect to classify the entire instrument as a trading account asset and report it within “Other trading account assets, at fair value.”

Accounting for Certain Reinsurance Contracts in the Individual Life Business

During the second quarter of 2017, the Company recognized a charge of \$237 million in the Individual Life segment, reflecting a change in estimate of reinsurance cash flows associated with universal life products as well as a change in method of reflecting these cash flows in the financial statements. Under the previous method of accounting, with the exception of recoveries pertaining to no lapse guarantees, reinsurance cash flows (e.g., premiums and recoveries) were generally recognized as they occurred. Under the new method, the expected reinsurance cash flows are recognized more ratably over the life of the underlying reinsured policies. In conjunction with this change, the way in which reinsurance is reflected in estimated gross profits used for the amortization of unearned revenue reserves, DAC and VOBA was also revised. The change represents a change in accounting estimate effected by a change in accounting principle and is included within the Company’s annual reviews and update of assumptions and other refinements. The change in accounting estimate reflected insights gained from revised cashflow modeling enabled by a systems conversion, which prompted the change to a preferable accounting method. This new methodology is viewed as preferable as the Company believes it better reflects the economics of reinsurance transactions by aligning the results of reinsurance activity more closely to the underlying direct insurance activity and by better reflecting the profit pattern of this business for purposes of the amortization of the balances noted above.

RECENT ACCOUNTING PRONOUNCEMENTS

Changes to U.S. GAAP are established by the Financial Accounting Standards Board (“FASB”) in the form of accounting standards updates to the FASB Accounting Standards Codification.

The Company considers the applicability and impact of all ASU. ASU listed below include those that have been adopted during the current fiscal year and/or those that have been issued but not yet adopted as of the date of this filing. ASU not listed below were assessed and determined to be either not applicable or not material.

ASU adopted during year ended December 31, 2017

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Standard	Description	Effective date and method of adoption	Effect on the financial statements or other significant matters
ASU 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payments Accounting	This ASU simplifies and improves employee share-based payment accounting. The areas updated include income tax consequences, a policy election related to forfeitures, classification of awards as either equity or liability, and classification of operating and financing activity on the statement of cash flows.	January 1, 2017 using various transition methods as prescribed by the ASU.	Adoption of the ASU did not have a significant impact on the Company's Consolidated Financial Statements and Notes to the Consolidated Financial Statements.

ASU issued but not yet adopted as of December 31, 2017

Standard	Description	Effective date and method of adoption	Effect on the financial statements or other significant matters
ASU 2014-09, Revenue from Contracts with Customers (Topic 606)	The ASU is based on the core principle that revenue is recognized to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. The standard also requires additional disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, and assets recognized from the costs to obtain or fulfill a contract with a customer. Revenue recognition for insurance contracts and financial instruments is explicitly scoped out of the standard.	January 1, 2018 using the modified retrospective method which will include a cumulative-effect adjustment on the balance sheet as of the beginning of the fiscal year of adoption.	Adoption of the ASU will not have a significant impact on the Company's Consolidated Financial Statements and Notes to the Consolidated Financial Statements.

Standard	Description	Effective date and method of adoption	Effect on the financial statements or other significant matters
ASU 2016-01, Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Liabilities	The ASU revises an entity's accounting related to the recognition and measurement of certain equity investments and the presentation of certain fair value changes for financial liabilities measured at fair value. The ASU requires equity investments, except for those accounted for using the equity method, to be measured at fair value with changes in fair value recognized in net income. The standard also amends certain disclosure requirements associated with the fair value of financial instruments.	January 1, 2018 using the modified retrospective method which will include a cumulative-effect adjustment to retained earnings.	Adoption of this guidance will result in 1) the reclassification of net unrealized gains on equity securities currently classified as available-for-sale from accumulated other comprehensive income to retained earnings and 2) adjustment of the basis of equity investments currently accounted for using the cost method to fair value with the embedded net unrealized gain included in retained earnings. The cumulative effect of adoption is expected to increase retained earnings by \$900 million and total equity by \$53 million after giving effect to offsetting items including those related to taxes and the policyholder dividend obligation in the Closed Block. See table below for the impact to the line items in the Consolidated Statements of Financial Position. There will be no impact to net income on the adoption date. Subsequent to the adoption date, the change in fair value of these equity investments will be reported in net income.

Notes to Consolidated Financial Statements—(Continued)

Standard	Description	Effective date and method of adoption	Effect on the financial statements or other significant matters
ASU 2016-02, Leases (Topic 842)	This ASU ensures that assets and liabilities from all outstanding lease contracts are recognized on the balance sheet (with limited exception). The ASU substantially changes a Lessee's accounting for leases and requires the recording on balance sheet of a "right-of-use" asset and liability to make lease payments for most leases. A Lessee will continue to recognize expense in its income statement in a manner similar to the requirements under the current lease accounting standard. For Lessors, the standard modifies classification criteria and accounting for sales-type and direct financing leases and requires a Lessor to derecognize the carrying value of the leased asset that is considered to have been transferred to a Lessee and record a lease receivable and residual asset ("receivable and residual" approach). The standard also eliminates the real estate specific provisions of the current standard (i.e., sale-leaseback). This ASU provides a new current expected credit loss model to account for credit losses on certain financial assets and off-balance sheet exposures (e.g., loans held for investment, debt securities held to maturity, reinsurance receivables, net investments in leases and loan commitments). The model requires an entity to estimate lifetime credit losses related to such financial assets and exposures based on relevant information about past events, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amount. The standard also modifies the current OTTI standard for available-for-sale debt securities to require the use of an allowance rather than a direct write down of the investment, and replaces the existing standard for purchased credit deteriorated loans and debt securities.	January 1, 2019 using the modified retrospective method (with early adoption permitted) which will include a cumulative-effect adjustment on the balance sheet as of the beginning of the fiscal year of adoption.	The Company is currently assessing the impact of the ASU on the Company's Consolidated Financial Statements and Notes to the Consolidated Financial Statements.
ASU 2016-13, Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments	securities held to maturity, reinsurance receivables, net investments in leases and loan commitments). The model requires an entity to estimate lifetime credit losses related to such financial assets and exposures based on relevant information about past events, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amount. The standard also modifies the current OTTI standard for available-for-sale debt securities to require the use of an allowance rather than a direct write down of the investment, and replaces the existing standard for purchased credit deteriorated loans and debt securities.	January 1, 2020 using the modified retrospective method which will include a cumulative-effect adjustment on the balance sheet as of the beginning of the fiscal year of adoption. However, prospective application is required for purchased credit deteriorated assets previously accounted for under ASU 310-30 and for debt securities for which an OTTI was recognized prior to the date of adoption. Early adoption is permitted beginning January 1, 2019.	The Company is currently assessing the impact of the ASU on the Company's Consolidated Financial Statements and Notes to the Consolidated Financial Statements.
ASU 2016-15, Statement of Cash	This ASU addresses diversity in practice in how certain cash receipts and cash payments are presented and classified in the statement of cash	January 1, 2018 using the retrospective method (with early adoption permitted provided that	Adoption of the ASU will not have a significant

Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments (a Consensus of the Emerging Issues Task Force)	flows. The standard provides clarity on the treatment of eight specifically defined types of cash inflows and outflows.	all amendments are adopted in the same period).	impact on the Company's Consolidated Financial Statements and Notes to the Consolidated Financial Statements.

Standard	Description	Effective date and method of adoption	Effect on the financial statements or other significant matters
ASU 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash	In November 2016, the FASB issued this ASU to address diversity in practice from entities classifying and presenting transfers between cash and restricted cash as operating, investing, or financing activities, or as a combination of those activities in the Statement of Cash Flows. The ASU requires entities to show the changes in the total of cash, cash equivalents, restricted cash, and restricted cash equivalents in the Statement of Cash Flows. As a result, transfers between such categories will no longer be presented in the Statement of Cash Flows.	January 1, 2018 using the retrospective method (with early adoption permitted).	Adoption of the ASU will not have a significant impact on the Company's Consolidated Financial Statements and Notes to the Consolidated Financial Statements.
ASU 2017-04, Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment	This ASU simplifies the subsequent measurement of goodwill by eliminating Step 2 from the goodwill impairment test in current GAAP, which measures a goodwill impairment by comparing the implied fair value of a reporting unit's goodwill with the carrying amount of the goodwill. Under the ASU, a goodwill impairment should be recorded for the amount by which the carrying amount of a reporting unit exceeds its fair value (capped by the total amount of goodwill allocated to the reporting unit).	January 1, 2020 using the prospective method (with early adoption permitted).	The Company does not expect the adoption of the ASU to have a significant impact on the Company's Consolidated Financial Statements and Notes to the Consolidated Financial Statements.
ASU 2017-08, Receivables -Nonrefundable Fees and Other Costs (Subtopic 310-20) Premium Amortization on Purchased Callable Debt Securities	This ASU requires certain premiums on callable debt securities to be amortized to the earliest call date.	January 1, 2019 using the modified retrospective method (with early adoption permitted) which will include a cumulative-effect adjustment on the balance sheet as of the beginning of the fiscal year of adoption.	The Company is currently assessing the impact of the ASU on the Company's Consolidated Financial Statements and Notes to the Consolidated Financial Statements.

ASU 2018-02, Income Statement - Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income	In February 2018, this ASU was issued following the enactment of the Tax Act of 2017. This ASU allows an entity to elect a reclassification from accumulated other comprehensive income to retained earnings for stranded effects resulting from the Tax Act of 2017.	January 1, 2019 with early adoption permitted. The ASU should be applied either in the period of adoption or retrospectively to each period in which the effect of the change in the U.S. federal corporate income tax rate in the Tax Act of 2017 is recognized.	The Company is currently assessing the impact of the ASU on the Company's Consolidated Financial Statements and Notes to the Consolidated Financial Statements.

3. ACQUISITIONS**Acquisition of Deutsche Bank's India Asset Management Business**

In August 2015, the Company and its asset management joint venture partner in India agreed to acquire Deutsche Bank's India asset management business through the joint venture. In March 2016, the Company and its asset management joint venture partner in India completed the acquisition. This acquisition, which will expand the Company's investment management expertise, distribution platform and product portfolio in India, did not have a material impact on the Company's financial results.

Acquisition of Administradora de Fondos de Pensiones Habitat S.A.

In March 2016, the Company completed the purchase of an indirect 40% ownership interest in Administradora de Fondos de Pensiones Habitat S.A. ("AFP Habitat"), a leading provider of retirement services in Chile, from Inversiones La Construcción S.A. ("ILC"), the investment subsidiary of the Chilean Construction Chamber. The Company paid 899.90 Chilean pesos per share, for a total purchase price of approximately \$532 million based on exchange rates at the share acquisition date. The Company and ILC now equally own an indirect controlling stake in AFP Habitat through a joint holding company. The Company's investment is accounted for under the equity method and is recorded within "Other assets." This acquisition enables the Company to participate in the growing Chilean pension market.

4. INVESTMENTS**Fixed Maturities and Equity Securities**

The following tables set forth information relating to fixed maturities and equity securities (excluding investments classified as trading), as of the dates indicated:

Amount excludes \$649 million of net unrealized gains on impaired available-for-sale securities and \$1 million of net unrealized gains on impaired held-to-maturity securities relating to changes in the value of such securities subsequent to the impairment measurement date.

(5) Excludes notes with amortized cost of \$4,403 million (fair value, \$4,403 million), which have been offset with the associated payables under a netting agreement.

The following tables set forth the fair value and gross unrealized losses aggregated by investment category and length of time that individual fixed maturity and equity securities had been in a continuous unrealized loss position, as of the

dates indicated:

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

As of December 31, 2017 and 2016, the gross unrealized losses on fixed maturity securities were composed of \$1,470 million and \$4,233 million, respectively, related to “1” highest quality or “2” high quality securities based on the National Association of Insurance Commissioners (“NAIC”) or equivalent rating and \$306 million and \$392 million, respectively, related to other than high or highest quality securities based on NAIC or equivalent rating. As of December 31, 2017, the \$1,443 million of gross unrealized losses on fixed maturity securities of twelve months or more were concentrated in U.S. government bonds, foreign government bonds and in the Company’s corporate securities within the energy, utility and consumer non-cyclical sectors. As of December 31, 2016, the \$1,420 million of gross unrealized losses on fixed maturity securities of twelve months or more were concentrated in the Company’s corporate securities within the energy, utility and capital goods sectors. In accordance with its policy described in Note 2, the Company concluded that an adjustment to earnings for OTTI for these fixed maturity securities was not warranted at either December 31, 2017 or 2016. These conclusions were based on a detailed analysis of the underlying credit and cash flows on each security. Gross unrealized losses are primarily attributable to general credit spread widening, increases in interest rates and foreign currency exchange rate movements. As of December 31, 2017, the Company did not intend to sell these securities, and it was not more likely than not that the Company would be required to sell these securities before the anticipated recovery of the remaining amortized cost basis.

As of December 31, 2017, \$8 million of the gross unrealized losses on equity securities represented declines in value of 20% or more, \$5 million of which had been in a gross unrealized loss position for less than six months. As of December 31, 2016, \$9 million of the gross unrealized losses on equity securities represented declines in value of 20% or more, \$8 million of which had been in a gross unrealized loss position for less than six months. In accordance with its policy described in Note 2, the Company concluded that an adjustment to earnings for OTTI for these equity securities was not warranted at either December 31, 2017 or 2016.

The following table sets forth the amortized cost and fair value of fixed maturities by contractual maturities, as of the date indicated:

	December 31, 2017			
	Available-for-Sale		Held-to-Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
	(in millions)			
Fixed maturities:				
Due in one year or less	\$8,244	\$8,711	\$0	\$0
Due after one year through five years	47,967	51,936	176	183
Due after five years through ten years	69,445	75,596	565	642
Due after ten years(1)	158,139	181,378	862	1,127
Asset-backed securities	11,965	12,233	0	0
Commercial mortgage-backed securities	13,134	13,281	0	0
Residential mortgage-backed securities	3,491	3,645	446	478
Total	\$312,385	\$346,780	\$2,049	\$2,430

Excludes available-for-sale notes with amortized cost of \$2,660 million (fair value, \$2,660 million) and (1) held-to-maturity notes with amortized cost of \$4,627 million (fair value, \$4,913 million), which have been offset with the associated payables under a netting agreement.

Actual maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations. Asset-backed, commercial mortgage-backed and residential mortgage-backed securities are shown

separately in the table above, as they do not have a single maturity date.

The following table sets forth the sources of fixed maturity and equity security proceeds and related investment gains (losses), as well as losses on impairments of both fixed maturities and equity securities, for the periods indicated:

182

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

	Years Ended December 31,		
	2017	2016	2015
	(in millions)		
Fixed maturities, available-for-sale:			
Proceeds from sales(1)	\$34,002	\$29,878	\$27,679
Proceeds from maturities/prepayments	24,460	19,710	19,559
Gross investment gains from sales and maturities	1,548	1,433	2,115
Gross investment losses from sales and maturities	(700)	(545)	(340)
OTTI recognized in earnings(2)	(267)	(222)	(141)
Fixed maturities, held-to-maturity:			
Proceeds from maturities/prepayments(3)	\$153	\$272	\$235
Equity securities, available-for-sale:			
Proceeds from sales(4)	\$4,552	\$3,504	\$4,589
Gross investment gains from sales	1,187	608	746
Gross investment losses from sales	(94)	(158)	(169)
OTTI recognized in earnings	(27)	(74)	(126)

(1) Includes \$218 million, \$(125) million and \$158 million of non-cash related proceeds for the years ended December 31, 2017, 2016 and 2015, respectively.

(2) Excludes the portion of OTTI recorded in “Other comprehensive income (loss)” (“OCI”), representing any difference between the fair value of the impaired debt security and the net present value of its projected future cash flows at the time of impairment.

(3) Includes \$(2) million, \$1 million and less than \$1 million of non-cash related proceeds for the years ended December 31, 2017, 2016 and 2015, respectively.

(4) Includes \$2 million, \$2 million and \$12 million of non-cash related proceeds for the years ended December 31, 2017, 2016 and 2015, respectively.

The following table sets forth the amount of pre-tax credit loss impairments on fixed maturity securities held by the Company for which a portion of the OTTI loss was recognized in OCI and the corresponding changes in such amounts, for the periods indicated:

	Years Ended December 31,	
	2017	2016
	(in millions)	
Balance, beginning of period	\$ 359	\$ 532
New credit loss impairments	10	41
Additional credit loss impairments on securities previously impaired	11	1
Increases due to the passage of time on previously recorded credit losses	15	24
Reductions for securities which matured, paid down, prepaid or were sold during the period	(58)	(229)
Reductions for securities impaired to fair value during the period(1)	(13)	(2)
Accretion of credit loss impairments previously recognized due to an increase in cash flows expected to be collected	(5)	(8)
Balance, end of period	\$ 319	\$ 359

(1) Represents circumstances where the Company determined in the current period that it intends to sell the security or it is more likely than not that it will be required to sell the security before recovery of the security’s amortized cost.

Trading Account Assets Supporting Insurance Liabilities

The following table sets forth the composition of “Trading account assets supporting insurance liabilities,” as of the dates indicated:

183

Total trading account assets supporting insurance liabilities	\$21,364	\$22,097	\$21,407	\$21,840

(1) Includes publicly-traded agency pass-through securities and collateralized mortgage obligations.

(2) Includes credit-tranched securities collateralized by sub-prime mortgages, auto loans, credit cards, education loans and other asset types.

The net change in unrealized gains (losses) from trading account assets supporting insurance liabilities still held at period end, recorded within "Other income," was \$300 million, \$75 million and \$(642) million during the years ended December 31, 2017, 2016 and 2015, respectively.

Other Trading Account Assets

The following table sets forth the composition of "Other trading account assets," as of the dates indicated:

	December 31, 2017		December 31, 2016	
	Amortized Cost or Cost	Fair Value	Amortized Cost or Cost	Fair Value
	(in millions)			
Short-term investments and cash equivalents	\$25	\$25	\$26	\$26

Equity securities	1,007	1,155	985	1,056
Other	6	7	4	5
Subtotal	\$4,547	4,694	\$4,649	4,540
Derivative instruments		1,058		1,224
Total other trading account assets		\$5,752		\$5,764

The net change in unrealized gains (losses) from other trading account assets, excluding derivative instruments, still held at period end, recorded within "Other income," was \$256 million, \$164 million and \$(366) million during the years ended December 31, 2017, 2016 and 2015, respectively.

Concentrations of Financial Instruments

The Company monitors its concentrations of financial instruments and mitigates credit risk by maintaining a diversified investment portfolio which limits exposure to any one issuer.

As of the dates indicated, the Company's exposure to concentrations of credit risk of single issuers greater than 10% of the Company's stockholders' equity included securities of the U.S. government and certain U.S. government agencies and securities guaranteed by the U.S. government, as well as the securities disclosed below:

Residential property loans	191	3	0	2	5	196	2
Other collateralized loans	5	0	0	0	0	5	0
Uncollateralized loans	663	0	0	0	0	663	0
Total	\$56,144	\$ 3	\$ 0	\$ 4	\$ 7	\$56,151	\$ 96

(1) As of December 31, 2017, there were no loans in this category accruing interest.

(2) For additional information regarding the Company's policies for accruing interest on loans, see Note 2.

	December 31, 2016						
	Current	30-59 Days Past Due	60-89 Days Past Due	90 Days or More Past Due(1)	Total Past Due	Total Loans	Non-Accrual Status(2)
	(in millions)						
Commercial mortgage loans	\$49,006	\$ 21	\$ 0	\$ 0	\$ 21	\$49,027	\$ 49
Agricultural property loans	2,956	0	0	2	2	2,958	2
Residential property loans	241	7	1	3	11	252	3
Other collateralized loans	10	0	0	0	0	10	0
Uncollateralized loans	638	0	0	0	0	638	0
Total	\$52,851	\$ 28	\$ 1	\$ 5	\$ 34	\$52,885	\$ 54

(1) As of December 31, 2016, there were no loans in this category accruing interest.

(2) For additional information regarding the Company's policies for accruing interest on loans, see Note 2.

For the years ended December 31, 2017 and 2016, there were no commercial mortgage and other loans acquired, other than those through direct origination and there were \$2 million and \$0 million of commercial mortgage and other loans sold, respectively, other than those classified as held-for-sale.

The Company's commercial mortgage and other loans may occasionally be involved in a troubled debt restructuring. As of December 31, 2017 and 2016, there were \$0 million and \$47 million, respectively, of new troubled debt restructurings related to commercial mortgage and other loans with payment defaults on loans that were modified as a troubled debt restructuring within the twelve months preceding. As of both December 31, 2017 and 2016, the Company had no significant commitments to provide additional funds to borrowers that had been involved in a troubled debt restructurings. For additional information relating to the accounting for troubled debt restructurings, see Note 2.

As of December 31, 2017, there were \$5 million of private debt commitments to provide additional funds to borrowers that had been involved in a troubled debt restructuring.

Other Long-Term Investments

The following table sets forth the composition of "Other long-term investments," as of the dates indicated:

190

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

	December 31,	
	2017	2016
	(in millions)	
Joint ventures and limited partnerships:		
Private equity	\$4,280	\$4,059
Hedge funds	3,222	2,660
Real estate-related	1,218	1,291
Total joint ventures and limited partnerships	8,720	8,010
Real estate held through direct ownership(1)	2,409	2,195
Other(2)	1,179	1,078
Total other long-term investments	\$12,308	\$11,283

(1) As of December 31, 2017 and 2016, real estate held through direct ownership had mortgage debt of \$799 million and \$659 million, respectively.

(2) Primarily includes strategic investments made by investment management operations, leveraged leases, member and activity stock held in the Federal Home Loan Banks of New York and Boston and certain derivatives. For additional information regarding the Company's holdings in the Federal Home Loan Banks of New York and Boston, see Note 14.

In certain investment structures, the Company's investment management business invests with other co-investors in an investment fund referred to as a feeder fund. In these structures, the invested capital of several feeder funds is pooled together and used to purchase ownership interests in another fund, referred to as a master fund. The master fund utilizes this invested capital and, in certain cases, other debt financing, to purchase various classes of assets on behalf of its investors. Specialized industry accounting for investment companies calls for the feeder fund to reflect its investment in the master fund as a single net asset equal to its proportionate share of the net assets of the master fund, regardless of its level of interest in the master fund. In cases where the Company consolidates the feeder fund, it retains the feeder fund's net asset presentation and reports the consolidated feeder fund's proportionate share of the net assets of the master fund in "Other long-term investments," with any unaffiliated investors' non-controlling interest in the feeder fund reported in "Other liabilities" or "Noncontrolling interests." The consolidated feeder funds' investments in these master funds, reflected on this net asset basis, totaled \$451 million and \$216 million as of December 31, 2017 and 2016, respectively. There was \$310 million and \$93 million of unaffiliated interest in the consolidated feeder funds as of December 31, 2017 and 2016, respectively, and the master funds had gross assets of \$82,126 million and \$36,279 million, respectively, and gross liabilities of \$79,185 million and \$34,880 million, respectively, which are not included on the Company's balance sheet.

Equity Method Investments

The following tables set forth summarized combined financial information for significant joint ventures and limited partnership interests accounted for under the equity method, including the Company's investments in operating joint ventures that are described in more detail in Note 7. Changes between periods in the tables below reflect changes in the activities within the joint ventures and limited partnerships, as well as changes in the Company's level of investment in such entities.

	December 31,	
	2017	2016
	(in millions)	

STATEMENTS OF FINANCIAL POSITION

Total assets(1)	\$62,292	\$59,897
Total liabilities(2)	\$15,225	\$14,787
Partners' capital	47,067	45,110
Total liabilities and partners' capital	\$62,292	\$59,897
Total liabilities and partners' capital included above	\$5,515	\$5,135
Equity in limited partnership interests not included above	696	592
Carrying value	\$6,211	\$5,727

(1) Assets consist primarily of investments in real estate, investments in securities and other miscellaneous assets.

(2) Liabilities consist primarily of third-party-borrowed funds, securities repurchase agreements and other miscellaneous liabilities.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

	Years Ended December 31,		
	2017	2016	2015
	(in millions)		
STATEMENTS OF OPERATIONS			
Total revenue(1)	\$6,392	\$5,360	\$4,356
Total expenses(2)	(2,300)	(1,995)	(1,803)
Net earnings (losses)	\$4,092	\$3,365	\$2,553
Equity in net earnings (losses) included above	\$409	\$247	\$216
Equity in net earnings (losses) of limited partnership interests not included above	123	103	32
Total equity in net earnings (losses)	\$532	\$350	\$248

(1) Revenue consists of income from investments in real estate, investments in securities and other income.

(2) Expenses consist primarily of interest expense, investment management fees, salary expenses and other expenses.

Net Investment Income

The following table sets forth “Net investment income” by investment type, for the periods indicated:

	Years Ended December 31,		
	2017	2016	2015
	(in millions)		
Fixed maturities, available-for-sale(1)	\$11,482	\$10,920	\$10,347
Fixed maturities, held-to-maturity(1)	215	208	202
Equity securities, available-for-sale	377	366	337
Trading account assets	920	986	1,205
Commercial mortgage and other loans	2,267	2,243	2,255
Policy loans	617	627	619
Short-term investments and cash equivalents	203	145	56
Other long-term investments	1,117	731	717
Gross investment income	17,198	16,226	15,738
Less: investment expenses	(763)	(706)	(909)
Net investment income	\$16,435	\$15,520	\$14,829

(1) Includes income on credit-linked notes which are reported on the same financial statement line items as related surplus notes, as conditions are met for right to offset.

The carrying value of non-income producing assets included \$111 million in available-for-sale fixed maturities, \$22 million in trading account assets supporting insurance liabilities, less than \$1 million in other trading account assets and less than \$1 million in other long-term investments as of December 31, 2017. Non-income producing assets represent investments that have not produced income for the twelve months preceding December 31, 2017.

Realized Investment Gains (Losses), Net

The following table sets forth “Realized investment gains (losses), net,” by investment type, for the periods indicated:

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

	Years Ended December		
	2017	2016	2015
	31,		
	(in millions)		
Fixed maturities	\$581	\$666	\$1,634
Equity securities	1,066	376	451

Realized investment gains (losses), net	\$432	\$2,194	\$4,025

(1)Includes the hedged items offset in qualifying fair value hedge accounting relationships.

Net Unrealized Gains (Losses) on Investments

The following table sets forth net unrealized gains (losses) on investments, as of the dates indicated:

	December 31,		
	2017	2016	2015
	(in millions)		
Fixed maturity securities, available-for-sale—with OTTI	\$286	\$312	\$234
Fixed maturity securities, available-for-sale—all other	34,109	28,526	24,673
Equity securities, available-for-sale	2,027	2,599	2,427
Derivatives designated as cash flow hedges(1)	(39)	1,316	1,165
Other investments(2)	15	(21)	(25)
Net unrealized gains (losses) on investments	\$36,398	\$32,732	\$28,474

(1)See Note 21 for more information on cash flow hedges.

As of December 31, 2017, there were no net unrealized losses on held-to-maturity securities that were previously (2)transferred from available-for-sale. Includes net unrealized gains on certain joint ventures that are strategic in nature and are included in “Other assets.”

Repurchase Agreements and Securities Lending

In the normal course of business, the Company sells securities under agreements to repurchase and enters into securities lending transactions. The following table sets forth the composition of “Securities sold under agreements to repurchase,” as of the dates indicated:

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

	December 31, 2017			December 31, 2016		
	Remaining Contractual Maturities of the Agreements Overnight & 30 Days	Total	(in millions)	Remaining Contractual Maturities of the Agreements Overnight & 30 Days	Total	(in millions)

(1) The Company did not have agreements with remaining contractual maturities of thirty days or greater, as of the dates indicated.

Securities Pledged, Restricted Assets and Special Deposits

The Company pledges as collateral investment securities it owns to unaffiliated parties through certain transactions, including securities lending, securities sold under agreements to repurchase, collateralized borrowings and postings of collateral with derivative counterparties. The following table sets forth the carrying value of investments pledged to third parties, as of the dates indicated:

194

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

	December 31,	
	2017	2016
	(in millions)	
Fixed maturities	\$ 13,303	\$ 11,393
Trading account assets supporting insurance liabilities	369	477
Other trading account assets	1	2
Separate account assets	2,992	3,386
Equity securities	171	368
Total securities pledged	\$ 16,836	\$ 15,626

The following table sets forth the carrying amount of the associated liabilities supported by the pledged collateral, as of the dates indicated:

	December 31,	
	2017	2016
	(in millions)	
Securities sold under agreements to repurchase	\$ 8,400	\$ 7,606
Cash collateral for loaned securities	4,354	4,333
Separate account liabilities	3,064	3,462
Policyholders' account balances(1)	436	1,001
Total liabilities supported by the pledged collateral	\$ 16,254	\$ 16,402

(1) Represents amounts supporting outstanding funding agreements.

In the normal course of its business activities, the Company accepts collateral that can be sold or repledged. The primary sources of this collateral are securities in customer accounts, securities purchased under agreements to resell and postings of collateral from OTC derivative counterparties. The fair value of this collateral was approximately \$5,126 million as of December 31, 2017 (the largest components of which include \$599 million of securities and \$4,527 million of cash from OTC derivative counterparties) and \$7,185 million as of December 31, 2016 (the largest components of which include \$1,595 million of securities and \$5,590 million of cash from OTC derivative counterparties). A portion of the aforementioned securities, for both periods, had either been sold or repledged.

Assets of \$73 million and \$78 million at December 31, 2017 and 2016, respectively, were on deposit with governmental authorities or trustees, including certain restricted cash balances and securities. Restricted cash and securities of \$45 million and \$54 million at December 31, 2017 and 2016, respectively, were included in "Other assets." Additionally, assets carried at \$3.5 billion and \$3.3 billion at December 31, 2017 and 2016, respectively, were held in a trust established for the benefit of certain policyholders related to a reinsurance agreement between two wholly-owned subsidiaries. Assets carried at \$604 million and \$605 million at December 31, 2017 and 2016, respectively, were held in voluntary trusts established primarily to fund guaranteed dividends to certain policyholders and to fund certain employee benefits. Securities restricted as to sale amounted to \$59 million and \$89 million as of December 31, 2017 and 2016, respectively. These amounts include member and activity-based stock associated with memberships in the Federal Home Loan Banks of New York and Boston.

5. VARIABLE INTEREST ENTITIES

In the normal course of its activities, the Company enters into relationships with various special-purpose entities and other entities that are deemed to be variable interest entities ("VIEs"). A VIE is an entity that either (1) has equity investors that lack certain essential characteristics of a controlling financial interest (including the ability to control

activities of the entity, the obligation to absorb the entity's expected losses and the right to receive the entity's expected residual returns) or (2) lacks sufficient equity to finance its own activities without financial support provided by other entities, which in turn would be expected to absorb at least some of the expected losses of the VIE.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

The Company is the primary beneficiary if the Company has (1) the power to direct the activities of the VIE that most significantly impact the economic performance of the entity and (2) the obligation to absorb losses of the entity that could be potentially significant to the VIE or the right to receive benefits from the entity that could be potentially significant. If the Company determines that it is the VIE's primary beneficiary, it consolidates the VIE.

Consolidated Variable Interest Entities

The Company is the investment manager of certain asset-backed investment vehicles, commonly referred to as collateralized loan obligations ("CLOs"), and certain other vehicles for which the Company earns fee income for investment management services. The Company may sell or syndicate investments through these vehicles, principally as part of the strategic investing activity of the Company's asset management businesses. Additionally, the Company may invest in securities issued by these vehicles. The Company is also the investment manager of certain investment structures whose beneficial interests are wholly-owned by consolidated subsidiaries.

The Company has analyzed these relationships and determined that for certain CLOs and other investment structures it is the primary beneficiary and consolidates these entities. This analysis includes a review of (1) the Company's rights and responsibilities as investment manager and (2) variable interests (if any) held by the Company. The assets of these VIEs are restricted and must be used first to settle liabilities of the VIE. The Company is not required to provide, and has not provided, material financial or other support to any of these VIEs.

Additionally, the Company is the primary beneficiary of certain VIEs in which the Company has invested, as part of its investment activities, but for which it is not the investment manager. These include structured investments issued by a VIE that manages yen-denominated investments coupled with cross-currency coupon swap agreements thereby creating synthetic dual currency investments. The Company's involvement in the structuring of these investments combined with its economic interest indicates that the Company is the primary beneficiary. The Company has not provided material financial support or other support that was not contractually required to these VIEs.

The table below reflects the carrying amount and balance sheet caption in which the assets and liabilities of consolidated VIEs are reported. The liabilities primarily comprise obligations under debt instruments issued by the VIEs. The creditors of these VIEs do not have recourse to the Company in excess of the assets contained within the VIEs.

	Consolidated VIEs for Which the Company is the Investment Manager(1)			
	December 31, 2017		December 31, 2016	
	2017	2016	2017	2016
	(in millions)			
Fixed maturities, available-for-sale	\$69	\$65	\$ 275	\$ 269
Fixed maturities, held-to-maturity	83	81	810	783
Trading account assets supporting insurance liabilities	0	0	9	9
Other trading account assets	1,652	2,140	0	0
Commercial mortgage and other loans	617	503	0	0
Other long-term investments	1,389	1,083	97	114
Cash and cash equivalents	164	618	0	1

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-K

Accrued investment income	7	10	4	4
Other assets	440	424	150	1
Total assets of consolidated VIEs	\$4,421	\$4,924	\$ 1,345	\$ 1,181
Notes issued by consolidated VIEs(2)	\$1,518	\$2,150	\$ 0	\$ 0
Other liabilities	433	611	0	7
Total liabilities of consolidated VIEs	\$1,951	\$2,761	\$ 0	\$ 7

(1) Total assets of consolidated VIEs reflect \$1,716 million and \$1,386 million as of December 31, 2017 and 2016, respectively, related to VIEs whose beneficial interests are wholly-owned by consolidated subsidiaries.

(2) Recourse is limited to the assets of the respective VIE and does not extend to the general credit of the Company. As of December 31, 2017 and December 31, 2016, the maturities of these obligations were greater than five years.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Unconsolidated Variable Interest Entities

The Company has determined that it is not the primary beneficiary of certain VIEs for which it is the investment manager. These VIEs consist primarily of CLOs and investment funds for which the Company has determined that it is not the primary beneficiary as it does not have both (1) the power to direct the activities of the VIE that most significantly impact the economic performance of the entity and (2) the obligation to absorb losses of the entity that could be potentially significant to the VIE or the right to receive benefits from the entity that could be potentially significant. The Company's maximum exposure to loss resulting from its relationship with unconsolidated VIEs for which it is the investment manager is limited to its investment in the VIEs, which was \$1,013 million and \$515 million at December 31, 2017 and 2016, respectively. These investments are reflected in "Fixed maturities, available-for-sale," "Other trading account assets, at fair value" and "Other long-term investments." There are no liabilities associated with these unconsolidated VIEs on the Company's Consolidated Statements of Financial Position.

In the normal course of its activities, the Company will invest in joint ventures and limited partnerships. These ventures include hedge funds, private equity funds and real estate-related funds and may or may not be VIEs. The Company's maximum exposure to loss on these investments, both VIEs and non-VIEs, is limited to the amount of its investment. The Company has determined that it is not required to consolidate these entities because either (1) it does not control them or (2) it does not have the obligation to absorb losses of the entities that could be potentially significant to the entities or the right to receive benefits from the entities that could be potentially significant. The Company classifies these investments as "Other long-term investments" and its maximum exposure to loss associated with these entities was \$8,720 million and \$8,010 million as of December 31, 2017 and 2016, respectively.

In addition, in the normal course of its activities, the Company will invest in structured investments including VIEs for which it is not the investment manager. These structured investments typically invest in fixed income investments and are managed by third parties and include asset-backed securities, commercial mortgage-backed securities and residential mortgage-backed securities. The Company's maximum exposure to loss on these structured investments, both VIEs and non-VIEs, is limited to the amount of its investment. See Note 4 for details regarding the carrying amounts and classification of these assets. The Company has not provided material financial or other support that was not contractually required to these structures. The Company has determined that it is not the primary beneficiary of these structures due to the fact that it does not control these entities.

6. DEFERRED POLICY ACQUISITION COSTS

The balances of and changes in DAC as of and for the years ended December 31, are as follows:

	2017	2016	2015
	(in millions)		
Balance, beginning of year	\$17,661	\$16,718	\$15,971
Capitalization of commissions, sales and issue expenses	2,820	2,845	2,653
Amortization—Impact of assumption and experience unlocking and true-up	247	445	280
Amortization—All other	(1,827)	(2,322)	(2,400)
Change in unrealized investment gains and losses	(190)	(199)	477
Foreign currency translation and other	281	174	(263)
Balance, end of year	\$18,992	\$17,661	\$16,718

7. INVESTMENTS IN OPERATING JOINT VENTURES

The Company has made investments in certain joint ventures that are strategic in nature and made other than for the sole purpose of generating investment income. These investments are accounted for under the equity method of accounting and are included in “Other assets” in the Company’s Consolidated Statements of Financial Position. The earnings from these investments are included on an after-tax basis in “Equity in earnings of operating joint ventures, net of taxes” in the Company’s Consolidated Statements of Operations. The Company has made these investments through its Investment Management and International Insurance segments, and its Corporate and Other operations. The summarized financial information for the Company’s operating joint ventures has been included in the summarized combined financial information for all significant equity method investments shown in Note 4.

The following table sets forth information related to the Company’s investments in operating joint ventures as of, and for, the years ended December 31:

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

	2017	2016	2015
	(in millions)		
Investment in operating joint ventures	\$1,483	\$994	\$341
Dividends received from operating joint ventures	\$63	\$60	\$27
After-tax equity in earnings of operating joint ventures	\$49	\$49	\$15

The increase in investment in operating joint ventures for 2016, compared to 2015, primarily reflects the impact of the Company's investment in AFP Habitat in Chile. The increase in investment in operating joint ventures for 2017, compared to 2016, primarily reflects the impact of the Company's investments in Enterprise Group Limited in Ghana and CT Corp in Indonesia.

For the years ended December 31, 2017, 2016 and 2015, the Company recognized \$36 million, \$32 million and \$34 million, respectively, of asset management fee income for services the Company provided to these operating joint ventures.

8. VALUE OF BUSINESS ACQUIRED

The balances of and changes in VOBA as of and for the years ended December 31, are as follows:

	2017	2016	2015
	(in millions)		
Balance, beginning of year	\$2,314	\$2,828	\$2,836
Amortization—Impact of assumption and experience unlocking and true-ups	(56)	(246)	128
Amortization—All other	(311)	(351)	(385)

The following table provides estimated future amortization, net of interest, for the periods indicated.

	2018	2019	2020	2021	2022
	(in millions)				
Estimated future VOBA amortization	\$204	\$182	\$164	\$152	\$138

9. GOODWILL AND OTHER INTANGIBLES

The changes in the book value of goodwill by area are as follows:

	Retirement	Investment Management	International Insurance	Total
	(in millions)			
Balance at December 31, 2014:				
Gross Goodwill	\$444	\$ 235	\$ 152	\$831
Accumulated Impairment Losses	0	0	0	0
Net Goodwill	444	235	152	831
2015 Activity:				
Acquisitions	0	0	0	0
Other(1)	0	(4) (3) (7
Balance at December 31, 2015:				
Gross Goodwill	444	231	149	824
Accumulated Impairment Losses	0	0	0	0
Net Goodwill	444	231	149	824
2016 Activity:				
Acquisitions	0	0	0	0
Other(1)	0	(1) 10	9
Balance at December 31, 2016:				
Gross Goodwill	444	230	159	833
Accumulated Impairment Losses	0	0	0	0
Net Goodwill	444	230	159	833
2017 Activity:				
Acquisitions	0	0	0	0
Other(1)	0	5	5	10
Balance at December 31, 2017:				
Gross Goodwill	444	235	164	843
Accumulated Impairment Losses	0	0	0	0
Net Goodwill	\$444	\$ 235	\$ 164	\$843

(1) Represents foreign currency translation.

The Company tests goodwill for impairment annually as of December 31 and more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount, as discussed in further detail in Note 2.

The Company performed goodwill impairment testing using the quantitative approach for all reporting units that had goodwill at December 31, 2017 and 2016, and no impairments were recorded.

Other Intangibles

Other intangible balances at December 31, are as follows:

199

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

	2017			2016		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
	(in millions)					
Subject to amortization:						
Mortgage servicing rights	\$623	\$ (382)) \$ 241	\$548	\$ (341)) \$ 207
Customer relationships	174	(116)) 58	243	(179)) 64
Other	149	(109)) 40	138	(102)) 36
Not subject to amortization	3	N/A	3	3	N/A	3
Total			\$ 342			\$ 310

The fair values of net mortgage servicing rights were \$256 million and \$217 million at December 31, 2017 and 2016, respectively. Amortization expense for other intangibles was \$51 million, \$116 million and \$64 million for the years ending December 31, 2017, 2016 and 2015, respectively. Amortization expense for other intangibles is expected to be approximately \$52 million in 2018, \$48 million in 2019, \$40 million in 2020, \$37 million in 2021 and \$33 million in 2022. The amortization expense amounts listed above for 2017, 2016 and 2015 do not include impairments recorded for mortgage servicing rights or other intangibles. See the non-recurring fair value measurements section of Note 20 for more information regarding these impairments.

10. POLICYHOLDERS' LIABILITIES

Future Policy Benefits

Future policy benefits at December 31 for the years indicated are as follows:

	2017	2016
	(in millions)	
Life insurance	\$172,586	\$161,406
Individual and group annuities and supplementary contracts	67,090	63,486
Other contract liabilities	14,849	13,173
Subtotal future policy benefits excluding unpaid claims and claim settlement expenses	254,525	238,065
Unpaid claims and claim settlement expenses	2,792	2,843
Total future policy benefits	\$257,317	\$240,908

Life insurance liabilities include reserves for death and endowment policy benefits, terminal dividends and certain health benefits. Individual and group annuities and supplementary contracts liabilities include reserves for life contingent immediate annuities and life contingent group annuities. Other contract liabilities include unearned premiums and certain other reserves for group, annuities and individual life and health products.

Future policy benefits for individual participating traditional life insurance are based on the net level premium method, calculated using the guaranteed mortality and nonforfeiture interest rates which range from 2.5% to 7.5%. Participating insurance represented 3% and 4% of direct individual life insurance in force at December 31, 2017 and 2016, respectively, and 14%, 14% and 16% of direct individual life insurance premiums for 2017, 2016 and 2015, respectively.

Future policy benefits for individual non-participating traditional life insurance policies, group and individual long-term care policies and individual health insurance policies are generally equal to the present value of future benefit payments and related expenses, less the present value of future net premiums. Assumptions as to mortality, morbidity and persistency are based on the Company's experience, industry data, and/or other factors, when the basis of the reserve is established. Interest rates used in the determination of the present values range from 0.1% to 9.5%; less than 1% of the reserves are based on an interest rate in excess of 8%.

Future policy benefits for individual and group annuities and supplementary contracts with life contingencies are generally equal to the present value of expected future payments. Assumptions as to mortality are based on the Company's experience, industry data, and/or other factors, when the basis of the reserve is established. The interest rates used in the determination of the present values range from 0.1% to 11.3%; less than 1% of the reserves are based on an interest rate in excess of 8%.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Future policy benefits for other contract liabilities are generally equal to the present value of expected future payments based on the Company's experience, except for example, certain group insurance coverages for which future policy benefits are equal to gross unearned premium reserves. The interest rates used in the determination of the present values range from 1.0% to 7.3%.

The Company's liability for future policy benefits is also inclusive of liabilities for guaranteed benefits related to certain long-duration life and annuity contracts. Liabilities for guaranteed benefits with embedded derivative features are primarily in "other contract liabilities" in the table above. The remaining liabilities for guaranteed benefits are primarily reflected with the underlying contract. See Note 11 for additional information regarding liabilities for guaranteed benefits related to certain long-duration life and annuity contracts.

Premium deficiency reserves included in "Future policy benefits" are established, if necessary, when the liability for future policy benefits plus the present value of expected future gross premiums are determined to be insufficient to provide for expected future policy benefits and expenses. Premium deficiency reserves have been recorded for the group single premium annuity business, which consists of limited-payment, long-duration traditional, non-participating annuities; structured settlements; single premium immediate annuities with life contingencies; long-term care; and for certain individual health policies. Additionally, in certain instances the policyholder liability for a particular line of business may not be deficient in the aggregate to trigger loss recognition, but the pattern of earnings may be such that profits are expected to be recognized in earlier years followed by losses in later years. In these situations, accounting standards require that an additional PFL liability be recognized by an amount necessary to sufficiently offset the losses that would be recognized in later years. A PFL liability is included in "Future policy benefits" and is predominately associated with certain interest-sensitive life contracts.

Unpaid claims and claim settlement expenses primarily reflect the Company's estimate of future disability claim payments and expenses as well as estimates of claims incurred but not yet reported as of the balance sheet dates related to group disability products. Unpaid claim liabilities that are discounted use interest rates ranging from 2.6% to 6.4%.

Policyholders' Account Balances

Policyholders' account balances at December 31 for the years indicated are as follows:

	2017	2016
	(in millions)	
Individual annuities	\$41,449	\$40,338
Group annuities	28,152	28,350
Guaranteed investment contracts and guaranteed interest accounts	14,002	14,528
Funding agreements	4,631	4,794
Interest-sensitive life contracts	36,879	34,452
Dividend accumulation and other	23,076	22,743
Total policyholders' account balances	\$148,189	\$145,205

Policyholders' account balances primarily represent an accumulation of account deposits plus credited interest less withdrawals, expense charges and mortality charges, if applicable. These policyholders' account balances also include provisions for benefits under non-life contingent payout annuities. Included in "Funding agreements" at December 31, 2017 and 2016 are \$4,165 million and \$3,758 million, respectively, related to the Company's Funding Agreement Notes Issuance Program ("FANIP"). Under this program, which has a maximum authorized amount of \$15 billion of

medium-term notes and \$3 billion of commercial paper, Delaware statutory trusts issue short-term commercial paper and/or medium-term notes to investors that are secured by funding agreements issued to the trusts by Prudential Insurance. The outstanding commercial paper and notes have fixed or floating interest rates that range from 0.0% to 2.6% and original maturities ranging from seven days to five years. Included in the amounts at December 31, 2017 and 2016 is the medium-term note liability, which is carried at amortized cost, of \$3,211 million and \$3,210 million, respectively and short-term note liability of \$957 million and \$550 million, respectively.

Also included in “Funding agreements” are collateralized funding agreements issued to the Federal Home Loan Bank of New York (“FHLBNY”), which at December 31, 2017 and 2016 totaled \$436 million and \$1,001 million, respectively. These obligations, which are carried at amortized cost, have fixed or floating interest rates that range from 1.2% to 2.1% and original maturities ranging from five to seven years. For additional details on the FHLBNY program, see Note 14.

Interest crediting rates range from 0% to 7.6% for interest-sensitive life contracts and from 0% to 13.3% for contracts other than interest-sensitive life. Less than 1% of policyholders’ account balances have interest crediting rates in excess of 8%.

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

11. CERTAIN LONG-DURATION CONTRACTS WITH GUARANTEES

The Company issues variable annuity contracts through its separate accounts for which investment income and investment gains and losses accrue directly to, and investment risk is borne by, the contractholder. The Company also issues variable annuity contracts with general and separate account options where the Company contractually guarantees to the contractholder a return of no less than total deposits made to the contract adjusted for any partial withdrawals (“return of net deposits”). In certain of these variable annuity contracts, the Company also contractually guarantees to the contractholder a return of no less than (1) total deposits made to the contract adjusted for any partial withdrawals plus a minimum return (“minimum return”), and/or (2) the highest contract value on a specified date adjusted for any withdrawals (“contract value”). These guarantees include benefits that are payable in the event of death, annuitization or at specified dates during the accumulation period and withdrawal and income benefits payable during specified periods. The Company also issues annuity contracts with market value adjusted investment options (“MVAs”), which provide for a return of principal plus a fixed rate of return if held-to-maturity, or, alternatively, a “market adjusted value” if surrendered prior to maturity or if funds are reallocated to other investment options. The market value adjustment may result in a gain or loss to the Company, depending on crediting rates or an indexed rate at surrender, as applicable. The Company also issues fixed deferred and immediate annuity contracts, some without MVA, that have a guaranteed credited rate and annuity benefit.

In addition, the Company issues certain variable life, variable universal life and universal life contracts where the Company contractually guarantees to the contractholder a death benefit even when there is insufficient value to cover monthly mortality and expense charges, whereas otherwise the contract would typically lapse (“no-lapse guarantee”). Variable life and variable universal life contracts are offered with general and separate account options.

The assets supporting the variable portion of all variable annuities are carried at fair value and reported as “Separate account assets” with an equivalent amount reported as “Separate account liabilities.” Amounts assessed against the contractholders for mortality, administration, and other services are included within revenue in “Policy charges and fee income” and changes in liabilities for minimum guarantees are generally included in “Policyholders’ benefits” or “Realized investment gains (losses), net.”

For those guarantees of benefits that are payable in the event of death, the net amount at risk is generally defined as the current guaranteed minimum death benefit in excess of the current account balance at the balance sheet date. The Company’s primary risk exposures for these contracts relates to actual deviations from, or changes to, the assumptions used in the original pricing of these products, including fixed income and equity market returns, contract lapses and contractholder mortality.

For guarantees of benefits that are payable at annuitization, the net amount at risk is generally defined as the present value of the minimum guaranteed annuity payments available to the contractholder determined in accordance with the terms of the contract in excess of the current account balance. The Company’s primary risk exposures for these contracts relates to actual deviations from, or changes to, the assumptions used in the original pricing of these products, including fixed income and equity market returns, timing of annuitization, contract lapses and contractholder mortality.

For guarantees of benefits that are payable at withdrawal, the net amount at risk is generally defined as the present value of the minimum guaranteed withdrawal payments available to the contractholder determined in accordance with the terms of the contract in excess of the current account balance. For guarantees of accumulation balances, the net amount at risk is generally defined as the guaranteed minimum accumulation balance minus the current account

balance. The Company's primary risk exposures for these contracts relates to actual deviations from, or changes to, the assumptions used in the original pricing of these products, including equity market returns, interest rates, market volatility and contractholder behavior.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

The Company's contracts with guarantees may offer more than one type of guarantee in each contract; therefore, the amounts listed may not be mutually exclusive. The liabilities related to the net amount at risk are reflected within "Future policy benefits." As of December 31, 2017 and 2016, the Company had the following guarantees associated with these contracts, by product and guarantee type:

	December 31, 2017		December 31, 2016	
	In the Event of Death	At Annuity Accumulation(1)	In the Event of Death	At Annuity Accumulation(1)
(\$ in millions)				
Annuity Contracts				
Return of net deposits				
Account value	\$ 129,231	\$ 100	\$ 119,433	\$ 152
Net amount at risk	\$ 288	\$ 0	\$ 493	\$ 0
Average attained age of contractholders	66 years	66 years	65 years	66 years
Minimum return or contract value				
Account value	\$ 35,431	\$ 146,319	\$ 33,843	\$ 135,462
Net amount at risk	\$ 2,611	\$ 3,762	\$ 3,714	\$ 5,788
Average attained age of contractholders	68 years	66 years	67 years	65 years
Average period remaining until earliest expected annuitization	N/A	0.24 years	N/A	0.27 years

(1) Includes income and withdrawal benefits.

	December 31,	
	2017	2016
In the Event of Death		
(\$ in millions)		
Variable Life, Variable Universal Life and Universal Life Contracts		
No-lapse guarantees		
Separate account value	\$ 9,365	\$ 8,144
General account value	\$ 15,969	\$ 14,513
Net amount at risk	\$ 241,598	\$ 225,084
Average attained age of contractholders	55 years	56 years

Account balances of variable annuity contracts with guarantees were invested in separate account investment options as follows:

	December 31,	
	2017	2016
(in millions)		
Equity funds	\$ 93,798	\$ 86,751
Bond funds	58,939	48,789
Balanced funds	1,382	914
Money market funds	4,391	10,124
Total	\$ 158,510	\$ 146,578

In addition to the amounts invested in separate account investment options above, \$8,308 million at December 31, 2017, and \$8,566 million at December 31, 2016, of account balances of variable annuity contracts with guarantees, inclusive of contracts with MVA features, were invested in general account investment options. For the years ended December 31, 2017, 2016 and 2015, there were no transfers of assets, other than cash, from the general account to any separate account, and accordingly no gains or losses recorded.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Liabilities for Guarantee Benefits

The table below summarizes the changes in general account liabilities for guarantees. The liabilities for guaranteed minimum death benefits (“GMDB”), and guaranteed minimum income benefits (“GMIB”) are included in “Future policy benefits” and the related changes in the liabilities are included in “Policyholders’ benefits.” Guaranteed minimum accumulation benefits (“GMAB”), guaranteed minimum withdrawal benefits (“GMWB”), and guaranteed minimum income and withdrawal benefits (“GMIWB”) are accounted for as embedded derivatives and are recorded at fair value within “Future policy benefits.” Changes in the fair value of these derivatives, including changes in the Company’s own risk of non-performance, along with any fees attributed or payments made relating to the derivative, are recorded in “Realized investment gains (losses), net.” See Note 20 for additional information regarding the methodology used in determining the fair value of these embedded derivatives. The Company maintains a portfolio of derivative investments that serve as a partial hedge of the risks associated with these products, for which the changes in fair value are also recorded in “Realized investment gains (losses), net.” This portfolio of derivative investments does not qualify for hedge accounting treatment under U.S. GAAP. Additionally, the Company externally reinsures the guaranteed benefit features associated with certain contracts. See Note 13 for further information regarding the external reinsurance arrangement.

	GMDB Variable Life, Variable Universal Annuity and Universal Life (in millions)	GMIB Annuity	GMAB/GMWB/GMIWB Annuity	
Balance at December 31, 2014	\$2,850	\$ 642	\$ 467	\$ 8,182
Incurred guarantee benefits(1)(3)	517	167	(40)	252
Paid guarantee benefits and other	(22)	(85)	(16)	0
Change in unrealized investment gains and losses(3)	(193)	(10)	41	0
Other(2)(3)	(2)	0	(12)	(1)
Balance at December 31, 2015	3,150	714	440	8,433
Incurred guarantee benefits(1)(3)	927	98	(18)	(194)
Paid guarantee benefits	(36)	(91)	(15)	0
Change in unrealized investment gains and losses(3)	102	0	49	0
Other(2)(3)	0	0	18	(1)
Balance at December 31, 2016	4,143	721	474	8,238
Incurred guarantee benefits(1)	685	37	(20)	479
Paid guarantee benefits	(15)	(74)	(15)	0
Change in unrealized investment gains and losses	290	13	(30)	0
Other(2)	7	0	10	4
Balance at December 31, 2017	\$5,110	\$ 697	\$ 419	\$ 8,721

Incurred guarantee benefits include the portion of assessments established as additions to reserves as well as (1) changes in estimates affecting the reserves. Also includes changes in the fair value of features considered to be derivatives.

(2) Other primarily represents foreign currency translation.

(3) Prior period amounts are presented on a basis consistent with the current period presentation.

The GMDB liability is determined each period end by estimating the accumulated value of a portion of the total assessments to date less the accumulated value of the guaranteed death benefits in excess of the account balance. The GMIB liability associated with variable annuities is determined each period by estimating the accumulated value of a portion of the total assessments to date less the accumulated value of the projected income benefits in excess of the account balance. The portion of assessments used is chosen such that, at issue the present value of expected death benefits or expected income benefits in excess of the projected account balance and the portion of the present value of total expected assessments over the lifetime of the contracts are equal. The GMIB liability associated with fixed annuities is determined each period by estimating the present value of projected income benefits in excess of the account balance. The Company regularly evaluates the estimates used and adjusts the GMDB and GMIB liability balances, with an associated charge or credit to earnings, if actual experience or other evidence suggests that earlier estimates should be revised.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

The GMAB features provide the contractholder with a guaranteed return of initial account value or an enhanced value if applicable. The most significant of the Company's GMAB features are the guaranteed return option features, which includes an automatic rebalancing element that reduces the Company's exposure to these guarantees. The GMAB liability is calculated as the present value of future expected payments in excess of the account balance less the present value of future expected rider fees attributable to the embedded derivative feature.

The GMWB features provide the contractholder with access to a guaranteed remaining balance if the account value is reduced to zero through a combination of market declines and withdrawals. The guaranteed remaining balance is generally equal to the protected value under the contract, which is initially established as the greater of the account value or cumulative deposits when withdrawals commence, less cumulative withdrawals. The contractholder also has the option, after a specified time period, to reset the guaranteed remaining balance to the then current account value, if greater. The contractholder accesses the guaranteed remaining balance through payments over time, subject to maximum annual limits. The GMWB liability is calculated as the present value of future expected payments to customers less the present value of future expected rider fees attributable to the embedded derivative feature.

The GMIWB features, taken collectively, provide a contractholder two optional methods to receive guaranteed minimum payments over time, a "withdrawal" option or an "income" option. The withdrawal option (which was available under only one of the GMIWBs and is no longer offered) guarantees that a contractholder can withdraw an amount each year until the cumulative withdrawals reach a total guaranteed balance. The income option (which varies among the Company's GMIWBs) in general guarantees the contractholder the ability to withdraw an amount each year for life (or for joint lives, in the case of any spousal version of the benefit) where such amount is equal to a percentage of a protected value under the benefit. The contractholder also has the potential to increase this annual amount, based on certain subsequent increases in account value that may occur. The GMIWB can be elected by the contractholder upon issuance of an appropriate deferred variable annuity contract or at any time following contract issue prior to annuitization. Certain GMIWB features include an automatic rebalancing element that reduces the Company's exposure to these guarantees. The GMIWB liability is calculated as the present value of future expected payments to customers less the present value of future expected rider fees attributable to the embedded derivative feature.

Sales Inducements

The Company defers sales inducements and amortizes them over the anticipated life of the policy using the same methodology and assumptions used to amortize DAC. DSI is included in "Other assets." The Company has offered various types of sales inducements including: (1) a bonus whereby the policyholder's initial account balance is increased by an amount equal to a specified percentage of the customer's initial deposit; (2) additional credits after a certain number of years a contract is held; and (3) enhanced interest crediting rates that are higher than the normal general account interest rate credited in certain product lines. Changes in DSI, reported as "Interest credited to policyholders' account balances," are as follows:

	Sales Inducements (in millions)

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

12. CLOSED BLOCK

On the date of demutualization, Prudential Insurance established a closed block for certain in force participating insurance policies and annuity products, along with corresponding assets used for the payment of benefits and policyholders' dividends on these products, (collectively the "Closed Block"), and ceased offering these participating products. The recorded assets and liabilities were allocated to the Closed Block at their historical carrying amounts. The Closed Block forms the principal component of the Closed Block division. See Note 22 for financial information on the Closed Block division. The insurance policies and annuity contracts comprising the Closed Block are managed in accordance with the Plan of Reorganization approved by the New Jersey Department of Banking and Insurance ("NJDOBI") on December 18, 2001, and Prudential Insurance is directly obligated for the insurance policies and annuity contracts in the Closed Block.

The policies included in the Closed Block are specified individual life insurance policies and individual annuity contracts that were in force on the date of demutualization and for which Prudential Insurance is currently paying or expects to pay experience-based policy dividends. Assets have been allocated to the Closed Block in an amount that has been determined to produce cash flows which, together with revenues from policies included in the Closed Block, are expected to be sufficient to support obligations and liabilities relating to these policies, including provision for payment of benefits, certain expenses and taxes and to provide for continuation of the policyholder dividend scales in effect in 2000, assuming experience underlying such scales continues. To the extent that, over time, cash flows from the assets allocated to the Closed Block and claims and other experience related to the Closed Block are, in the aggregate, more or less favorable than what was assumed when the Closed Block was established, total dividends paid to Closed Block policyholders may be greater than or less than the total dividends that would have been paid to these policyholders if the policyholder dividend scales in effect in 2000 had been continued. Any cash flows in excess of amounts assumed will be available for distribution over time to Closed Block policyholders and will not be available to shareholders. If the Closed Block has insufficient funds to make guaranteed policy benefit payments, such payments will be made from Prudential Insurance's assets outside of the Closed Block. The Closed Block will continue in effect as long as any policy in the Closed Block remains in force unless, with the consent of the New Jersey insurance regulator, it is terminated earlier.

The excess of Closed Block liabilities over Closed Block assets at the date of the demutualization (adjusted to eliminate the impact of related amounts in AOCI) represented the estimated maximum future earnings at that date from the Closed Block expected to result from operations attributed to the Closed Block after income taxes. In establishing the Closed Block, the Company developed an actuarial calculation of the timing of such maximum future earnings. If actual cumulative earnings of the Closed Block from inception through the end of any given period are greater than the expected cumulative earnings, only the expected earnings will be recognized in income. Any excess of actual cumulative earnings over expected cumulative earnings will represent undistributed accumulated earnings attributable to policyholders, which are recorded as a policyholder dividend obligation. The policyholder dividend obligation represents amounts to be paid to Closed Block policyholders as an additional policyholder dividend unless otherwise offset by future Closed Block performance that is less favorable than originally expected. If the actual cumulative earnings of the Closed Block from its inception through the end of any given period are less than the expected cumulative earnings of the Closed Block, the Company will recognize only the actual earnings in income.

As of December 31, 2017 and 2016, the Company recognized a policyholder dividend obligation of \$1,790 million and \$1,647 million, respectively, to Closed Block policyholders for the excess of actual cumulative earnings over the expected cumulative earnings. Additionally, accumulated net unrealized investment gains that have arisen subsequent to the establishment of the Closed Block have been reflected as a policyholder dividend obligation of \$3,656 million and \$3,011 million at December 31, 2017 and 2016, respectively, to be paid to Closed Block policyholders unless

offset by future experience, with a corresponding amount reported in AOCI.

On December 4, 2015, Prudential Insurance's Board of Directors acted to increase the 2016 dividends payable on Closed Block policies. On December 9, 2016, Prudential Insurance's Board of Directors approved a continuation of the dividends payable on Closed Block policies for 2017. On December 8, 2017, Prudential Insurance's Board of Directors acted to decrease the 2018 dividends payable on Closed Block policies. These actions resulted in an increase of approximately \$58 million and \$32 million and a decrease of approximately \$86 million in the liability for policyholders dividends recognized for the years ended December 31, 2015, 2016 and 2017, respectively.

Closed Block liabilities and assets designated to the Closed Block at December 31, as well as maximum future earnings to be recognized from Closed Block liabilities and Closed Block assets, are as follows:

13. REINSURANCE

The Company participates in reinsurance with third parties primarily to provide additional capacity for future growth, limit the maximum net loss potential arising from large risks and acquire or dispose of businesses.

Effective April 1, 2015, the Company entered into an agreement with Union Hamilton Reinsurance, Ltd. ("Union Hamilton") an external counterparty, to reinsure approximately 50% of the Prudential Premier® Retirement Variable Annuity with Highest Daily Lifetime Income ("HDI") v.3.0 business, a guaranteed benefit feature. This reinsurance agreement covered most new HDI v.3.0 variable annuity business issued between April 1, 2015 and December 31, 2016 on a quota share basis, with Union Hamilton's cumulative quota share amounting to \$2.9 billion of new rider premiums as of December 31, 2016. Reinsurance on business subject to this agreement remains in force for the duration of the underlying annuity contracts. New sales subsequent to December 31, 2016 are not covered by this external reinsurance agreement. These guaranteed benefit features are accounted for as embedded derivatives.

In January 2013, the Company acquired the Hartford Life Business through reinsurance transactions with three subsidiaries of Hartford Financial Services Group, Inc. ("Hartford Financial"). Under the related agreements, the Company provided reinsurance for approximately 700,000 life insurance policies with net retained face amount in force of approximately \$141 billion. The Company acquired the general account business through a coinsurance arrangement and, for certain types of general account policies, a modified coinsurance arrangement. The Company acquired the separate account business through a modified coinsurance arrangement. In December 2017, Hartford Financial announced a definitive agreement to sell a group of operating subsidiaries, which includes two of the Company's counterparties to these reinsurance arrangements. There is no impact to the terms, rights or obligations of the Company, or operation of these reinsurance arrangements, as a result of this change in control of such counterparties.

Since 2011, the Company has entered into several reinsurance agreements to assume pension liabilities in the United Kingdom. Under these arrangements, the Company assumes the longevity risk associated with the pension benefits of certain named beneficiaries.

In 2006, the Company acquired the variable annuity business of The Allstate Corporation (“Allstate”) through a reinsurance transaction. The reinsurance arrangements with Allstate include a coinsurance arrangement associated with the general account liabilities assumed and a modified coinsurance arrangement associated with the separate account liabilities assumed. The reinsurance payable, which represents the Company’s obligation under the modified coinsurance arrangement, is netted with the reinsurance receivable in the Consolidated Statements of Financial Position.

In 2004, the Company acquired the retirement business of CIGNA and subsequently entered into various reinsurance arrangements. The Company still has indemnity coinsurance and modified coinsurance without assumption arrangements in effect related to this acquisition.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

For the domestic business, life and disability reinsurance is accomplished through various plans of reinsurance, primarily yearly renewable term, per person excess, excess of loss, and coinsurance. On policies sold since 2000, the Company has reinsured a significant portion of the individual life mortality risk. Placement of reinsurance is accomplished primarily on an automatic basis with some specific risks reinsured on a facultative basis. The Company is authorized and has historically retained up to \$30 million per life, but reduced its operating retention limit to \$20 million per life in 2013. Retention in excess of the operating limit is on an exception basis.

The international business primarily uses reinsurance to obtain experience with respect to certain new product offerings and to a lesser extent, to manage risk and volatility as necessary.

Reinsurance ceded arrangements do not discharge the Company as the primary insurer. Ceded balances would represent a liability of the Company in the event the reinsurers were unable to meet their obligations to the Company under the terms of the reinsurance agreements. Reinsurance premiums, commissions, expense reimbursements, benefits and reserves related to reinsured long-duration contracts under coinsurance arrangements are accounted for over the life of the underlying reinsured contracts using assumptions consistent with those used to account for the underlying contracts. Coinsurance arrangements contrast with the Company's yearly renewable term arrangements, where only mortality risk is transferred to the reinsurer and premiums are paid to the reinsurer to reinsure that risk. The mortality risk that is reinsured under yearly renewable term arrangements represents the difference between the stated death benefits in the underlying reinsured contracts and the corresponding reserves or account value carried by the Company on those same contracts. The premiums paid to the reinsurer are based upon negotiated amounts, not on the actual premiums paid by the underlying contract holders to the Company. As yearly renewable term arrangements are usually entered into by the Company with the expectation that the contracts will be in force for the lives of the underlying policies, they are considered to be long-duration reinsurance contracts. The cost of reinsurance related to short-duration reinsurance contracts is accounted for over the reinsurance contract period. The tables presented below exclude amounts pertaining to the Company's discontinued operations.

Reinsurance amounts included in the Consolidated Statements of Operations for premiums, policy charges and fee income and policyholders' benefits for the years ended December 31, were as follows:

	2017	2016	2015
	(in millions)		
Direct premiums	\$31,797	\$30,654	\$27,996
Reinsurance assumed	2,105	2,073	2,147
Reinsurance ceded	(1,811)	(1,763)	(1,622)
Premiums	\$32,091	\$30,964	\$28,521
Direct policy charges and fee income	\$4,541	\$5,031	\$5,127
Reinsurance assumed	1,176	1,243	1,179
Reinsurance ceded	(414)	(368)	(334)
Policy charges and fee income	\$5,303	\$5,906	\$5,972
Direct policyholders' benefits	\$33,261	\$32,957	\$29,242
Reinsurance assumed	3,230	3,110	3,107
Reinsurance ceded	(2,697)	(2,435)	(1,722)
Policyholders' benefits	\$33,794	\$33,632	\$30,627

Reinsurance recoverables at December 31, are as follows:

	2017	2016
	(in millions)	
Individual and group annuities(1)	\$698	\$658
Life insurance(2)	4,290	3,388
Other reinsurance	171	165
Total reinsurance recoverables	\$5,159	\$4,211

209

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

- Primarily represents reinsurance recoverables established under the reinsurance arrangements associated with the acquisition of the retirement business of CIGNA. The Company has recorded reinsurance recoverables related to the acquisition of the retirement business of CIGNA of \$682 million and \$656 million at December 31, 2017 and 2016, respectively. Also included is \$13 million and \$0 million of reinsurance recoverables at December 31, 2017 and 2016, respectively, established under the reinsurance agreement with Union Hamilton related to the ceding of certain embedded derivative liabilities associated with the Company's guaranteed benefits.
- (1) Includes \$2,145 million and \$2,049 million of reinsurance recoverables established at December 31, 2017 and 2016, respectively, under the reinsurance arrangements associated with the acquisition of the Hartford Life Business. The Company has also recorded reinsurance payables related to the Hartford Life Business acquisition of \$1,301 million and \$1,205 million at December 31, 2017 and 2016, respectively.

Excluding the reinsurance recoverable associated with the acquisition of the Hartford Life Business and the retirement business of CIGNA, four major reinsurance companies account for approximately 59% of the reinsurance recoverable at December 31, 2017. The Company periodically reviews the financial condition of its reinsurers, amounts recoverable therefrom, and unearned reinsurance premium, in order to minimize its exposure to loss from reinsurer insolvencies. If deemed necessary, the Company would secure collateral in the form of a trust, letter of credit, or funds withheld arrangement to ensure collectability; otherwise, an allowance for uncollectible reinsurance would be recorded. Under the Company's longevity reinsurance transactions, the Company has secured collateral from its counterparties to minimize counterparty default risk.

14. SHORT-TERM AND LONG-TERM DEBT

Short-term Debt

The table below presents the Company's short-term debt at December 31, for the years indicated as follows:

	2017	2016
	(\$ in millions)	
Commercial paper:		
Prudential Financial	\$50	\$65
Prudential Funding, LLC	500	525
Subtotal commercial paper	550	590
Current portion of long-term debt	830	543
Total short-term debt(1)	\$1,380	\$1,133
Supplemental short-term debt information:		
Portion of commercial paper borrowings due overnight	\$277	\$292
Daily average commercial paper outstanding	\$1,110	\$1,020
Weighted average maturity of outstanding commercial paper, in days	22	21
Weighted average interest rate on outstanding short-term debt(2)	0.99	% 0.43 %

(1)Includes Prudential Financial debt of \$880 million and \$535 million at December 31, 2017 and 2016, respectively.

(2)Excludes the current portion of long-term debt.

At December 31, 2017 and 2016, the Company was in compliance with all covenants related to the above debt.

Commercial Paper

Prudential Financial has a commercial paper program with an authorized capacity of \$3.0 billion. Prudential Financial's commercial paper borrowings have generally been used to fund the working capital needs of Prudential Financial's subsidiaries and provide short-term liquidity at Prudential Financial.

Prudential Funding, LLC ("Prudential Funding"), a wholly-owned subsidiary of Prudential Insurance, has a commercial paper program, with an authorized capacity of \$7.0 billion. Prudential Funding commercial paper borrowings generally have served as an additional source of financing to meet the working capital needs of Prudential Insurance and its subsidiaries. Prudential Funding also lends to other subsidiaries of Prudential Financial up to limits agreed with the NJDOBI. Prudential Funding maintains a support agreement with Prudential Insurance whereby Prudential Insurance has agreed to maintain Prudential Funding's tangible net worth at a positive level. Additionally, Prudential Financial has issued a subordinated guarantee covering Prudential Funding's \$7.0 billion commercial paper program.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Federal Home Loan Bank of New York

Prudential Insurance is a member of the FHLBNY. Membership allows Prudential Insurance access to the FHLBNY's financial services, including the ability to obtain collateralized loans and to issue collateralized funding agreements. Under applicable law, the funding agreements issued to the FHLBNY have priority claim status above debt holders of Prudential Insurance. FHLBNY borrowings and funding agreements are collateralized by qualifying mortgage-related assets or U.S. Treasury securities, the fair value of which must be maintained at certain specified levels relative to outstanding borrowings. FHLBNY membership requires Prudential Insurance to own member stock and borrowings require the purchase of activity-based stock in an amount equal to 4.5% of outstanding borrowings. Under FHLBNY guidelines, if any of Prudential Insurance's financial strength ratings decline below A-/A3/A- Negative by S&P/Moody's/Fitch, respectively, and the FHLBNY does not receive written assurances from the NJDOBI regarding Prudential Insurance's solvency, new borrowings from the FHLBNY would be limited to a term of 90 days or less. Currently there are no restrictions on the term of borrowings from the FHLBNY. All FHLBNY stock purchased by Prudential Insurance is classified as restricted general account investments within "Other long-term investments," and the carrying value of these investments was \$49 million and \$78 million as of December 31, 2017 and 2016, respectively.

NJDOBI permits Prudential Insurance to pledge collateral to the FHLBNY in an amount of up to 5% of its prior year-end statutory net admitted assets, excluding separate account assets. Based on Prudential Insurance's statutory net admitted assets as of December 31, 2016, the 5% limitation equates to a maximum amount of eligible assets of \$6.2 billion and an estimated maximum borrowing capacity (after taking into account required collateralization levels) of approximately \$5.3 billion. Nevertheless, FHLBNY borrowings are subject to the FHLBNY's discretion and to the availability of qualifying assets at Prudential Insurance.

As of December 31, 2017, Prudential Insurance had pledged assets with a fair value of \$0.8 billion supporting outstanding funding agreements totaling \$0.4 billion, which are included in "Policyholders' account balances." The fair value of qualifying assets that were available to Prudential Insurance, but not pledged, amounted to \$6.9 billion as of December 31, 2017. Prudential Insurance had no other advances outstanding under the FHLBNY facility as of December 31, 2017.

Federal Home Loan Bank of Boston

Prudential Retirement Insurance and Annuity Company ("PRIAC") is a member of the Federal Home Loan Bank of Boston ("FHLBB"). Membership allows PRIAC access to collateralized advances which will be classified in "Short-term debt" or "Long-term debt," depending on the maturity date of the obligation. PRIAC's membership in FHLBB requires the ownership of member stock and borrowings from FHLBB require the purchase of activity-based stock in an amount between 3.0% and 4.5% of outstanding borrowings, depending on the maturity date of the obligation. All FHLBB stock purchased by PRIAC is classified as restricted general account investments within "Other long-term investments," and the carrying value of these investments was \$10 million as of December 31, 2017 and 2016. As of December 31, 2017, PRIAC had no advances outstanding under the FHLBB facility.

Under Connecticut state insurance law, without the prior consent of the Connecticut Insurance Department, the amount of assets insurers may pledge to secure debt obligations is limited to the lesser of 5% of prior-year statutory admitted assets or 25% of prior-year statutory surplus, resulting in a maximum borrowing capacity for PRIAC under the FHLBB facility of approximately \$231 million as of December 31, 2017.

Credit Facilities

As of December 31, 2017, the Company maintained syndicated, unsecured committed credit facilities as described below.

Borrower	Original Term	Expiration Date	Capacity	Amount Outstanding
			(in millions)	
Prudential Financial and Prudential Funding	5 years	Jul 2022	\$4,000	\$ 0
Prudential Holdings of Japan, Inc.	3 years	Sep 2019	¥100,000	¥ 0

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

In July 2017, the Company amended and restated its \$4.0 billion five-year credit facility that has both Prudential Financial and Prudential Funding as borrowers and a syndicate of financial institutions as lenders, extending the term of the facility to July 2022. The credit facility contains customary representations and warranties, covenants and events of default and borrowings are not contingent on the borrowers' credit ratings nor subject to material adverse change clauses. Borrowings under this facility are conditioned on the continued satisfaction of customary conditions, including Prudential Financial's maintenance of consolidated net worth of at least \$20.958 billion, which is calculated as U.S. GAAP equity, excluding AOCI, equity of noncontrolling interests and equity attributable to the Closed Block. The Company expects that it may borrow under the facility from time to time to fund its working capital needs. In addition, amounts under this credit facility may be drawn in the form of standby letters of credit that can be used to meet the Company's operating needs.

The ¥100 billion three-year facility was entered into by Prudential Holdings of Japan, Inc. in September 2016. This facility also contains customary representations and warranties, covenants, and events of default and borrowings are not contingent on the borrower's credit ratings nor subject to material adverse change clauses. The ¥100 billion three-year facility also contains a two year term-out option.

Borrowings under each of these credit facilities may be used for general corporate purposes. As of December 31, 2017, the Company was in compliance with the covenants under each of these credit facilities.

In addition to the above credit facilities, the Company had access to \$823 million of certain other lines of credit at December 31, 2017, of which \$755 million was for the sole use of certain real estate separate accounts. The separate account facilities include loan-to-value ratio requirements and other financial covenants, and recourse on obligations under these facilities is limited to the assets of the applicable separate account. At December 31, 2017, \$462 million of these credit facilities were used. The Company also has access to uncommitted lines of credit from financial institutions.

Put Option Agreement for Senior Debt Issuance

In November 2013, Prudential Financial entered into a ten-year put option agreement with a Delaware trust upon the completion of the sale of \$1.5 billion of trust securities by that Delaware trust in a Rule 144A private placement. The trust invested the proceeds from the sale of the trust securities in a portfolio of principal and interest strips of U.S. Treasury securities. The put option agreement provides Prudential Financial the right to sell to the trust at any time up to \$1.5 billion of 4.419% senior notes due November 2023 and receive in exchange a corresponding amount of the principal and interest strips of U.S. Treasury securities held by the trust. In return, the Company agreed to pay a semi-annual put premium to the trust at a rate of 1.777% per annum applied to the unexercised portion of the put option. The put option agreement with the trust provides Prudential Financial with a source of liquid assets.

The put option described above will be exercised automatically in full upon the Company's failure to make certain payments to the trust, such as paying the put option premium or reimbursing the trust for its expenses, if the Company's failure to pay is not cured within 30 days, and upon an event involving its bankruptcy. The Company is also required to exercise the put option if its consolidated stockholders' equity, calculated in accordance with U.S. GAAP but excluding AOCI, falls below \$7.0 billion, subject to adjustment in certain cases. The Company has a one-time right to unwind a prior voluntary exercise of the put option by repurchasing all of the senior notes then held by the trust in exchange for principal and interest strips of U.S. Treasury securities. Finally, any of the 4.419% senior notes that Prudential Financial issues may be redeemed prior to their maturity at par or, if greater, a make-whole price, following a voluntary exercise in full of the put option.

Long-term Debt

The table below presents the Company's long-term debt at December 31, for the years indicated as follows:

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

	Maturity Dates	Rate(1)	December 31, 2017 2016 (\$ in millions)	
Fixed-rate notes:				
Surplus notes	2019-2025	5.36%-8.30%	\$840	\$840
Surplus notes subject to set-off arrangements	2021-2037	3.52%-5.26%	5,187	4,403
Senior notes	2018-2049	2.30%-11.31%	8,882	9,236
Mortgage debt(2)	2019-2027	0.89%-3.85%	226	177
Floating-rate notes:				
Surplus notes		-	0	499
Surplus notes subject to set-off arrangements	2024-2037	2.25%-2.74%	2,100	1,456
Senior notes(3)	2020	1.69%-5.49%	29	1,063
Mortgage debt(4)	2019-2025	0.26%-4.07%	573	409
Junior subordinated notes(5)	2042-2068	4.50%-8.88%	6,622	5,817
Subtotal			24,459	23,900
Less: assets under set-off arrangements(6)			7,287	5,859
Total long-term debt(7)			\$17,172	\$18,041

(1) Ranges of interest rates are for the year ended December 31, 2017.

(2) Includes \$107 million and \$82 million of debt denominated in foreign currency at December 31, 2017 and 2016, respectively.

(3) Includes \$0 million and \$55 million of debt denominated in foreign currency at December 31, 2017 and 2016, respectively.

(4) Includes \$245 million and \$221 million of debt denominated in foreign currency at December 31, 2017 and 2016, respectively.

(5) Includes Prudential Financial debt of \$6,566 million and subsidiary debt of \$56 million denominated in foreign currency at December 31, 2017.

(6) Assets under set-off arrangements represent a reduction in the amount of surplus notes included in long-term debt, resulting from an arrangement where valid rights of set-off exist and it is the intent of both parties to settle on a net basis under legally enforceable arrangements. These assets include available-for-sale securities that are valued at market.

(7) Includes Prudential Financial debt of \$15,304 million and \$15,389 million at December 31, 2017 and 2016, respectively.

At December 31, 2017 and 2016, the Company was in compliance with all debt covenants related to the borrowings in the table above.

The following table presents the contractual maturities of the Company's long-term debt as of December 31, 2017:

	Calendar Year					Total
	2019	2020	2021	2022	2023 and thereafter	
	(in millions)					
Long-term debt	\$1,713	\$1,298	\$564	\$73	\$13,524	\$17,172

Surplus Notes

As of December 31, 2017, the Company had \$840 million of fixed-rate surplus notes outstanding. These notes are subordinated to other Prudential Insurance borrowings and policyholder obligations, and the payment of interest and principal may only be made with the prior approval of the NJDOBI. The NJDOBI could prohibit the payment of the interest and principal on the surplus notes if certain statutory capital requirements are not met. At December 31, 2017 and 2016, the Company met these statutory capital requirements.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

The Company's fixed-rate surplus notes include \$500 million of exchangeable surplus notes issued in a private placement in 2009 with an interest rate of 5.36% per annum and due September 2019. The surplus notes became exchangeable at the option of the holder, in whole but not in part, for shares of Prudential Financial Common Stock beginning on September 18, 2014. The initial exchange rate for the surplus notes was 10.1235 shares of Common Stock per each \$1,000 principal amount of surplus notes. This was equivalent to 5.1 million shares and an initial exchange price per share of Common Stock of \$98.78. The exchange rate is subject to customary anti-dilution adjustments and is accordingly revalued during the fourth quarter of each year. As of December 31, 2017, the exchange rate is 11.7643 shares of Common Stock per each \$1,000 principal amount of surplus notes. This is equivalent to 5.88 million shares and an exchange price per share of Common Stock of \$85.00. The exchange rate is also subject to a make-whole decrease in the event of an exchange prior to maturity (except upon a fundamental business combination or a continuing payment default), that will result in a reduction in the number of shares issued upon exchange (per \$1,000 principal amount of surplus notes) determined by dividing a prescribed cash reduction value (which will decline over the life of the surplus notes, from \$102.62 for an exercise on September 18, 2014, to zero for an exercise at maturity) by the price of the Common Stock at the time of exchange. As of December 31, 2017, this reduction value is \$45.79 per \$1,000 principal amount of surplus notes. In addition, the exchange rate is subject to a customary make-whole increase in connection with an exchange of the surplus notes upon a fundamental business combination where 10% or more of the consideration in that business combination consists of cash, other property or securities that are not listed on a U.S. national securities exchange. These exchangeable surplus notes are not redeemable by Prudential Insurance prior to maturity, except in connection with a fundamental business combination involving Prudential Financial, in which case the surplus notes will be redeemable by Prudential Insurance, subject to the noteholders' right to exchange the surplus notes instead, at par or, if greater, a make-whole redemption price.

From 2011 through 2013, a captive reinsurance subsidiary entered into agreements providing for the issuance and sale of up to \$2.0 billion of ten-year fixed-rate surplus notes. Under the agreements, the captive receives in exchange for the surplus notes one or more credit-linked notes issued by a special-purpose subsidiary of the Company in an aggregate principal amount equal to the surplus notes issued. The captive holds the credit-linked notes as assets supporting the non-economic portion of the statutory reserve required to be held by the Company's domestic insurance subsidiaries under Regulation XXX in connection with the reinsurance of term life insurance policies through the captive. The non-economic portion of the statutory reserve equals the difference between the statutory reserve required under Regulation XXX and the amount the Company considers necessary to maintain solvency for moderately adverse experience. The principal amount of the outstanding credit-linked notes is redeemable by the captive in cash upon the occurrence of, and in an amount necessary to remedy, a specified liquidity stress event affecting the captive. Under the agreements, external counterparties have agreed to fund any such payment under the credit-linked notes in return for a fee. Prudential Financial has agreed to make capital contributions to the captive to reimburse it for investment losses in excess of specified amounts and has agreed to reimburse the external counterparties for any payments under the credit-linked notes that are funded by those counterparties. As of December 31, 2017, an aggregate of \$1.75 billion of surplus notes were outstanding under these agreements and no such payments under the credit-linked notes have been required.

In December 2013, a captive reinsurance subsidiary entered into a twenty-year financing facility with external counterparties providing for the issuance and sale of a surplus note for the financing of non-economic reserves required under Guideline AXXX. The current financing capacity available under the facility is \$3.5 billion, but can be increased to a maximum potential size of \$4.5 billion. The captive receives in exchange for the surplus note one or more credit-linked notes issued by a special-purpose affiliate in an aggregate principal amount equal to the surplus note. The principal amount of the outstanding credit-linked notes is redeemable by the captive in cash upon the occurrence of, and in an amount necessary to remedy, a specified liquidity stress event, and the external counterparties have agreed to fund any such payment. Prudential Financial has agreed to reimburse the captive for investment losses

in excess of specified amounts; however, Prudential Financial has no other reimbursement obligations to the external counterparties under this facility. As of December 31, 2017, an aggregate of \$2.88 billion of surplus notes were outstanding under the facility and no credit-linked note payments have been required.

In December 2014, a captive reinsurance subsidiary entered into a financing facility with external counterparties, pursuant to which the captive agreed to issue and sell a surplus note with a ten-year term in an aggregate principal amount of up to \$1.75 billion in return for an equal principal amount of credit-linked notes issued by a special-purpose affiliate. In December 2017, the Company increased the maximum potential size of the facility to \$2.4 billion, of which \$650 million has a twenty-year term. The captive holds the credit-linked notes as assets supporting non-economic reserves required to be held by the Company's domestic insurance subsidiaries under Regulation XXX. The principal amount of the outstanding credit-linked notes is redeemable by the captive in cash upon the occurrence of, and in an amount necessary to remedy, a specified liquidity stress event affecting the captive. Under the agreements, external counterparties have agreed to fund any such payment under the credit-linked notes in return for a fee. Prudential Financial has no reimbursement obligations to the external counterparties under this facility. As of December 31, 2017, an aggregate of \$2.10 billion of surplus notes were outstanding under the facility and no credit-linked note payments have been required.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Another captive reinsurance subsidiary maintains a financing facility with external counterparties, pursuant to which the captive has outstanding \$2.5 billion in principal amount of surplus notes and received in return an equal principal amount of credit-linked notes issued by a special-purpose affiliate. In November 2017, we repaid \$500 million of senior notes issued by a special purpose affiliate and held by one of the external counterparties. The remaining term of the financing is seventeen years. The captive holds the credit-linked notes as assets supporting non-economic reserves required to be held by the Company's domestic insurance subsidiaries under Regulation XXX. The captive can redeem the credit-linked notes in cash upon the occurrence of, and in an amount necessary to remedy, a liquidity stress event affecting the captive. External counterparties have agreed to fund any such credit-linked notes payments in an amount of up to \$2.2 billion, and the remaining \$300 million is supported by collateral held by the affiliate. Prudential Financial has agreed to make capital contributions to the captive and to the special-purpose affiliate to reimburse them for investment losses in excess of specified amounts. Prudential Financial has also agreed to reimburse one of the external counterparties for any payments under the credit-linked notes funded by it in an amount of up to \$1 billion.

In March 2017, a captive reinsurance subsidiary entered into a twenty-year financing facility with external counterparties providing for the issuance and sale of a surplus note for the financing of non-economic reserves required under Guideline AXXX. The current financing capacity available under the facility is \$1.0 billion. The captive receives in exchange for the surplus note one or more credit-linked notes issued by a special-purpose affiliate in an aggregate principal amount equal to the surplus note. The principal amount of the outstanding credit-linked notes is redeemable by the captive in cash upon the occurrence of, and in an amount necessary to remedy, a specified liquidity stress event, and the external counterparties have agreed to fund any such payment. Prudential Financial has no reimbursement obligations to the external counterparties under this facility. As of December 31, 2017, an aggregate of \$560 million of surplus notes were outstanding under the facility and no credit-linked note payments have been required.

Under each of the above transactions for the captive reinsurance subsidiaries, because valid rights of set-off exist, interest and principal payments on the surplus notes and on the credit-linked notes are settled on a net basis, and the surplus notes are reflected in the Company's total consolidated borrowings on a net basis. The surplus notes for the captive reinsurance subsidiaries described above are subordinated to policyholder obligations, and the payment of principal on the surplus notes may only be made with prior approval of the Arizona Department of Insurance. The payment of interest on the surplus notes has been approved by the Arizona Department of Insurance, subject to its ability to withdraw that approval.

In September 2017, the Company redeemed \$500 million of surplus notes that had been issued in 2007 by a captive reinsurance subsidiary to external counterparties to finance non-economic reserves required under Guideline AXXX.

In February 2015, Prudential Legacy Insurance Company of New Jersey ("PLIC") entered into a twenty-year financing facility with certain external counterparties and a special-purpose company affiliate, pursuant to which PLIC may, at its option and subject to the satisfaction of customary conditions, issue and sell to the affiliate up to \$4.0 billion in aggregate principal amount of surplus notes, in return for an equal principal amount of credit-linked notes. Upon issuance, PLIC would hold any credit-linked notes as assets to finance future statutory surplus needs within PLIC. As of December 31, 2017, there were no surplus notes outstanding under the facility.

Senior Notes

In December 2017, the Company completed a debt exchange offer, pursuant to which it issued \$1.9 billion in principal amount of senior notes in exchange for \$1.5 billion in principal amount of outstanding medium-term notes. The

newly-issued notes consist of \$1.0 billion maturing in 2049 bearing interest at 3.94% per annum and \$900 million maturing in 2047 bearing interest at 3.91% per annum. The medium-term notes received in exchange comprised principal amounts from eight different series of notes with maturity dates between 2033 and 2043 bearing interest at rates between 5.1% and 6.63% per annum. The transaction qualified as a modification and is accounted for as a continuation of the original debt with no gain or loss recorded. The current carrying value will accrete up to the new principal amount as additional interest expense over the term of the notes.

Medium-Term Notes Program. The Company maintains a medium-term notes program under its shelf registration statement with an authorized issuance capacity of \$20.0 billion. As of December 31, 2017, the outstanding balance of medium-term notes under this program was \$7.6 billion, a decrease of \$2.0 billion from December 31, 2016, due to the exchange of \$1.5 billion of medium-term notes for newly issued notes described above and \$470 million of maturities.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Retail Medium-Term Notes Program. The Company maintains a retail medium-term notes program, including the InterNotes® program, under its shelf registration statement with an authorized issuance capacity of \$5.0 billion. As of December 31, 2017, the outstanding balance of the program was \$454 million.

The weighted average interest rate on outstanding senior notes issued under these programs, including the effect of interest rate hedging activity, was 5.22% and 5.54% for the years ended December 31, 2017 and 2016, respectively, excluding the effect of debt issued to consolidated subsidiaries.

Funding Agreement Notes Issuance Program (“FANIP”). The Company maintains a FANIP in which statutory trusts issue medium-term notes and commercial paper secured by funding agreements issued to the trusts by Prudential Insurance. These obligations are included in “Policyholders’ account balances” and not included in the foregoing table. See Note 10 for further discussion of these obligations.

Mortgage Debt. As of December 31, 2017, the Company’s subsidiaries had mortgage debt of \$799 million that has recourse only to real estate property held for investment by those subsidiaries. This represents an increase of \$140 million from December 31, 2016, primarily due to new borrowings in 2017 of \$226 million and foreign exchange fluctuations of \$28 million, offset by \$73 million of maturities and \$41 million of prepayment activity.

Junior Subordinated Notes

Certain of Prudential Financial’s junior subordinated notes outstanding are considered hybrid securities that receive enhanced equity treatment from the rating agencies. These notes outstanding, along with their key terms, are as follows:

Issue Date	Principal Amount (\$ in millions)	Initial Interest Rate	Investor Type	Optional Redemption Date ⁽¹⁾	Interest Rate Subsequent to Optional Redemption Date	Scheduled Maturity Date	Final Maturity Date
June 2008	\$ 600	8.88 %	Institutional	6/15/2018	LIBOR + 5.00%	6/15/2038	6/15/2068
August 2012	\$ 1,000	5.88 %	Institutional	9/15/2022	LIBOR + 4.18%	n/a	9/15/2042
November 2012	\$ 1,500	5.63 %	Institutional	6/15/2023	LIBOR + 3.92%	n/a	6/15/2043
December 2012	\$ 575	5.75 %	Retail	12/4/2017	5.75%	n/a	12/15/2052
March 2013	\$ 710	5.70 %	Retail	3/15/2018	5.70%	n/a	3/15/2053
March 2013	\$ 500	5.20 %	Institutional	3/15/2024	LIBOR + 3.04%	n/a	3/15/2044
May 2015	\$ 1,000	5.38 %	Institutional	5/15/2025	LIBOR + 3.03%	n/a	3/15/2045
September 2017	\$ 750	4.50 %	Institutional	9/15/2027	LIBOR + 2.38%	n/a	9/15/2047

⁽¹⁾ Represents the initial date on which the notes can be redeemed at par solely at the option of the Company, in the case of the 8.88% notes subject to compliance with a replacement capital covenant.

The Company has the right to defer interest payments on these notes for specified periods, typically 5 to 10 years without resulting in a default, during which time interest will be compounded. On or after the optional redemption dates, Prudential Financial may redeem the notes at par plus accrued and unpaid interest. Prior to those optional redemption dates, redemptions generally are subject to a make-whole price; however, the Company may redeem the notes prior to these dates at par upon the occurrence of certain events, such as, for the notes issued in 2012 and later, a future change in the regulatory capital treatment of the notes with respect to the Company. In connection with the

issuance of the 8.88% notes, the Company entered into a replacement capital covenant for the benefit of the holders of its 5.90% senior notes due March 2036. Under this covenant, the Company agreed not to redeem or repurchase the 8.88% notes prior to June 2038 unless it has received proceeds from the issuance of specified replacement capital securities.

Limited Recourse Notes. In 2014, the Company entered into financing transactions pursuant to which it issued \$500 million of limited recourse notes and, in return, obtained \$500 million of asset-backed notes issued by a designated series of a Delaware master trust. The asset-backed notes mature from 2019 through 2024; however, the maturity date of a portion of the notes may be extended by the Company, subject to conditions.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

The master trust's payment obligations under each of the asset-backed notes are secured by corresponding payment obligations of a third-party financial institution and a portfolio of specified assets that have an aggregate value at least equal to the principal amount of the applicable asset-backed note. The principal amount of each asset-backed note is payable to PRIAC in cash at any time upon demand by PRIAC or, if not earlier paid, at maturity. Each of the limited recourse notes obligates Prudential Financial to reimburse the applicable third-party financial institution for any principal payments received on the corresponding asset-backed note, but there is no obligation to reimburse any portion of a principal payment that is needed by PRIAC to pay then current claims to its policyholders. Each limited recourse note bears interest at a rate equal to the rate on the corresponding asset-backed note, plus an amount representing fees payable to the applicable third-party financial institution. As of December 31, 2017, no principal payments have been received or are currently due on the asset-backed notes and, as a result, there was no payment obligation under the limited recourse notes. Accordingly, the notes are not reflected in the Company's Consolidated Financial Statements as of December 31, 2017.

Interest Expense

In order to modify exposure to interest rate and currency exchange rate movements, the Company utilizes derivative instruments, primarily interest rate swaps, in conjunction with some of its debt issues. The impact of these derivative instruments are not reflected in the rates presented in the tables above. For those derivative instruments that qualify for hedge accounting treatment, interest expense increased by \$3 million, \$5 million and \$7 million for the years ended December 31, 2017, 2016 and 2015, respectively. See Note 21 for additional information on the Company's use of derivative instruments.

Interest expense for short-term and long-term debt was \$1,334 million, \$1,324 million and \$1,328 million for the years ended December 31, 2017, 2016 and 2015, respectively. This includes interest expense of \$15 million for the year ended December 31, 2017, and \$11 million for each of the years ended December 31, 2016 and 2015, respectively, reported in "Net investment income." The interest expense for the year ended December 31, 2016 includes prepayment premiums and fees totaling \$36 million on debt repurchased through a tender offer.

15. EQUITY

On the date of demutualization, Prudential Financial completed an initial public offering of its Common Stock at an initial public offering price of \$27.50 per share. The shares of Common Stock issued were in addition to shares of Common Stock the Company distributed to policyholders as part of the demutualization. The Common Stock is traded on the New York Stock Exchange under the symbol "PRU". Through December 31, 2014, the Common Stock reflected the performance of the Company's former Financial Services Businesses. As a result of the Class B Repurchase described below under "—Class B Stock," beginning in 2015, the Common Stock reflects the consolidated performance of Prudential Financial.

Also on the date of demutualization, Prudential Financial completed the sale, through a private placement, of 2.0 million shares of Class B Stock at a price of \$87.50 per share. The Class B Stock was a separate class of common stock not traded publicly, which reflected the performance of the Company's former Closed Block Business. As part of the Class B Repurchase, Prudential Financial repurchased and canceled all of the 2.0 million shares of the Class B Stock.

The changes in the number of shares of Common Stock issued, held in treasury and outstanding, are as follows for the periods indicated:

Table of Contents

PRUDENTIAL FINANCIAL, INC.

(1) Represents net shares issued from treasury pursuant to the Company's stock-based compensation programs.

In the event of a liquidation, dissolution or winding-up of the Company, holders of Common Stock would be entitled to receive a proportionate share of the net assets of the Company that remain after paying all liabilities and the liquidation preferences of any preferred stock.

Common Stock Held in Treasury

Common Stock held in treasury is accounted for at average cost. Gains resulting from the reissuance of "Common Stock held in treasury" are credited to "Additional paid-in capital." Losses resulting from the reissuance of "Common Stock held in treasury" are charged first to "Additional paid-in capital" to the extent the Company has previously recorded gains on treasury share transactions, then to "Retained earnings."

In June 2015, Prudential Financial's Board of Directors authorized the Company to repurchase at management's discretion up to \$1.0 billion of its outstanding Common Stock from July 1, 2015 through June 30, 2016. As of December 31, 2015, 6.1 million shares of the Company's Common Stock were repurchased under this authorization at a total cost of \$500 million.

In December 2015, Prudential Financial's Board of Directors authorized the Company to repurchase at management's discretion up to \$1.5 billion of its outstanding Common Stock during the period from January 1, 2016 through December 31, 2016. Effective January 1, 2016, this authorization superseded the Company's previous \$1.0 billion share repurchase authorization that covered the period from July 1, 2015 through June 30, 2016. In August 2016, the Board of Directors authorized a \$500 million increase to the authorization for calendar year 2016. As a result, the Company's aggregate share repurchase authorization for the full year 2016 was \$2.0 billion. As of December 31, 2016, 25.1 million shares of the Company's Common Stock were repurchased under this authorization at a total cost of \$2.0 billion.

In December 2016, Prudential Financial's Board of Directors authorized the Company to repurchase at management's discretion up to \$1.25 billion of its outstanding Common Stock from January 1, 2017 through December 31, 2017. As of December 31, 2017, 11.5 million shares of the Company's Common Stock were repurchased under this authorization at a total cost of \$1.25 billion.

In December 2017, Prudential Financial's Board of Directors authorized the Company to repurchase at management's discretion up to \$1.5 billion of its outstanding Common Stock during the period from January 1, 2018 through December 31, 2018.

The timing and amount of share repurchases are determined by management based upon market conditions and other considerations, and repurchases may be effected in the open market, through derivative, accelerated repurchase and other negotiated transactions and through prearranged trading plans complying with Rule 10b5-1(c) under the Securities Exchange Act of 1934 (the "Exchange Act"). Numerous factors could affect the timing and amount of any future repurchases under the share repurchase authorization, including increased capital needs of the Company due to changes in regulatory capital requirements, opportunities for growth and acquisitions, and the effect of adverse market conditions on the segments.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Class B Stock

On January 2, 2015, pursuant to a share repurchase agreement entered into on December 1, 2014, between the Company and the holders of the Class B Stock, the Company repurchased and canceled all of the shares of the Class B Stock for an aggregate cash purchase price of \$651 million, resulting in the elimination of the Class B Stock held in treasury, a \$484 million decrease in “Retained earnings” and a \$167 million decrease in “Additional paid-in capital.”

In accordance with the terms of the Share Repurchase Agreement, the holders of the Class B Stock subsequently exercised their right to dispute the calculation of the purchase price. This dispute was resolved during the first quarter of 2016, resulting in an increase to the cash purchase price of \$119 million, bringing the total aggregate purchase price to \$770 million. The increase to the cash purchase price resulted in a corresponding decrease in “Retained earnings.”

Preferred Stock

As of December 31, 2017, 2016 and 2015, the Company had no preferred stock outstanding.

Dividends

The declaration and payment of dividends on the Common Stock is limited by New Jersey corporate law, pursuant to which Prudential Financial is prohibited from paying a Common Stock dividend if, after giving effect to that dividend, either (a) the Company would be unable to pay its debts as they become due in the usual course of its business or (b) the Company’s total assets would be less than its liabilities. In addition, the terms of the Company’s outstanding junior subordinated debt include a “dividend stopper” provision that restricts the payment of dividends on the Common Stock if interest payments are not made on the junior subordinated debt.

As of December 31, 2017, the Company’s U.S. GAAP retained earnings were \$28,504 million. Other than the above limitations, this amount is free of restrictions for the payment of Common Stock dividends; however, Common Stock dividends will be dependent upon financial conditions, results of operations, cash needs, future prospects and other factors, including cash available to Prudential Financial, the parent holding company. The principal sources of funds available to Prudential Financial are dividends and returns of capital from its subsidiaries, loans from its subsidiaries, repayments of operating loans from its subsidiaries, and cash and other highly liquid assets. The primary uses of funds at Prudential Financial include servicing its debt, operating expenses, capital contributions and loans to subsidiaries, the payment of declared shareholder dividends and repurchases of outstanding shares of Common Stock if executed under Board authority. As of December 31, 2017, Prudential Financial had highly liquid assets predominantly including cash, short-term investments, U.S. Treasury securities, obligations of other U.S. government authorities and agencies, and/or foreign government bonds of \$4,376 million, excluding amounts held in an intercompany liquidity account.

Future cash available at Prudential Financial to support the payment of future Common Stock dividends is dependent on the receipt of dividends or other funds from its subsidiaries, the majority of which are subject to comprehensive regulation, including limitations on their payment of dividends and other transfers of funds, which are discussed below.

With respect to Prudential Insurance, the Company’s primary domestic insurance subsidiary, New Jersey insurance law provides that, except in the case of extraordinary dividends (as described below), all dividends or other distributions paid by Prudential Insurance may be paid only from unassigned surplus, as determined pursuant to statutory

accounting principles, less cumulative unrealized investment gains and losses and revaluation of assets as of the prior calendar year-end. As of December 31, 2017, Prudential Insurance's unassigned surplus was \$8,450 million, and it recorded applicable adjustments for cumulative unrealized investment gains of \$726 million. Prudential Insurance must give prior notification to the NJDOBI of its intent to pay any such dividend or distribution. Also, if any dividend, together with other dividends or distributions made within the preceding twelve months, exceeds the greater of (i) 10% of statutory capital and surplus as of the preceding December 31 (\$9,948 million as of December 31, 2017) or (ii) its statutory net gain from operations excluding realized investment gains and losses for the twelve month period ending on the preceding December 31 (\$505 million for the year ended December 31, 2017), the dividend is considered to be an "extraordinary dividend" and requires the prior approval of the NJDOBI. Under New Jersey insurance law, Prudential Insurance is permitted to pay an ordinary dividend of up to \$995 million after June 28, 2018, without prior approval of the NJDOBI.

The laws regulating dividends of the states where the Company's other domestic insurance subsidiaries are domiciled are similar, but not identical, to New Jersey. In Arizona, if any dividend, together with other dividends or distributions made within the preceding twelve months, exceeds the lesser of (i) 10% of statutory capital and surplus as of the preceding December 31 or

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

(ii) its statutory net gain from operations excluding realized investment gains and losses for the twelve month period ending on the preceding December 31, the dividend is considered to be an “extraordinary dividend” and requires prior approval of the Arizona Department of Insurance. Under Arizona insurance law, Prudential Annuities Life Assurance Corporation (“PALAC”), an Arizona domiciled insurer that is a subsidiary of Prudential Financial, is permitted to pay an ordinary dividend of up to \$806 million in 2018, without prior approval of the Arizona Department of Insurance. Of the \$806 million, \$156 million is permitted to be paid after September 28, 2018, and \$650 million is permitted to be paid after December 21, 2018, without prior approval of the Arizona Department of Insurance.

The Company’s international insurance operations are subject to dividend restrictions from the regulatory authorities in the jurisdictions in which they operate. With respect to The Prudential Life Insurance Company Ltd. (“Prudential of Japan”) and Gibraltar Life, the Company’s most significant international insurance subsidiaries, both of which are domiciled in Japan, Japan insurance law provides that common stock dividends may be paid in an amount of up to 83% of prior fiscal year statutory after-tax earnings, after certain reserving thresholds are met, including providing for policyholder dividends. If statutory retained earnings exceed 100% of statutory paid-in capital, 100% of prior year statutory after-tax earnings may be paid, after reserving thresholds are met. Dividends in excess of these amounts and other forms of capital distribution require the prior approval of the Japan Financial Services Agency (“FSA”). Additionally, Prudential of Japan and Gibraltar Life must give prior notification to the FSA of their intent to pay any dividend or distribution. In addition to paying common stock dividends, Prudential of Japan and Gibraltar Life may return capital to Prudential Financial through other means, such as the repayment of subordinated debt or preferred stock obligations held by Prudential Financial or other affiliates.

As of December 31, 2017, Prudential Holdings of Japan, Inc. (“PHJ”), the parent of the Company’s Japanese operations, retained \$248 million of dividends received from its international insurance subsidiaries in 2016, that remained available to be paid as a dividend to Prudential Financial. The current regulatory fiscal year end for both Prudential of Japan and Gibraltar Life is March 31, 2018, after which time the common stock dividend amount permitted to be paid without prior approval from the FSA can be determined.

In addition, although prior regulatory approval may not be required by law for the payment of dividends up to the limitations described above, in practice, the Company would typically discuss any dividend payments with the applicable regulatory authority prior to payment. Additionally, the payment of dividends by the Company’s subsidiaries is subject to declaration by their Board of Directors and may be affected by market conditions and other factors.

Statutory Net Income, Capital and Surplus

The Company’s domestic insurance subsidiaries are required to prepare statutory financial statements in accordance with statutory accounting practices prescribed or permitted by the insurance department of the state of domicile. Statutory accounting practices primarily differ from U.S. GAAP by charging policy acquisition costs to expense as incurred, establishing future policy benefit liabilities using different actuarial assumptions as well as valuing investments and certain assets and accounting for deferred taxes on a different basis. Statutory net income (loss) of Prudential Insurance amounted to \$(217) million, \$5,214 million and \$5,253 million for the years ended December 31, 2017, 2016 and 2015, respectively. Statutory capital and surplus of Prudential Insurance amounted to \$9,948 million and \$11,290 million at December 31, 2017 and 2016, respectively. Statutory net income (loss) of PALAC amounted to \$3,911 million, \$(2,018) million and \$340 million for the years ended December 31, 2017, 2016 and 2015, respectively. Statutory capital and surplus of PALAC amounted to \$8,059 million and \$5,718 million at December 31, 2017 and 2016, respectively.

The risk-based capital (“RBC”) ratio is a primary measure by which the Company and its insurance regulators evaluate the capital adequacy of Prudential Insurance and the Company’s other domestic insurance subsidiaries. RBC is determined by NAIC-prescribed formulas that consider, among other things, risks related to the type and quality of the invested assets, insurance-related risks associated with an insurer’s products and liabilities, interest rate risks and general business risks. If a subsidiary’s Total Adjusted Capital (“TAC”), as calculated in a manner prescribed by the NAIC, falls below the Company Action Level RBC, corrective action is required. As of December 31, 2017, Prudential Insurance and PALAC both had TAC levels in excess of 4.0 times the regulatory required minimums that would require corrective action.

The Company’s international insurance subsidiaries prepare financial statements in accordance with local regulatory requirements. These statutory accounting practices differ from U.S. GAAP primarily by charging policy acquisition costs to expense as incurred and establishing future policy benefit liabilities using different actuarial assumptions, as well as valuing investments and certain assets and accounting for deferred taxes on a different basis.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

The FSA utilizes a solvency margin ratio to evaluate the capital adequacy of Japanese insurance companies. The solvency margin ratio considers the level of solvency margin capital to a solvency margin risk amount, which is calculated in a similar manner to RBC. As of December 31, 2017, Prudential of Japan and Gibraltar Life both had solvency margin capital in excess of 3.5 times the regulatory required minimums that would require corrective action.

All of the Company's domestic and international insurance subsidiaries have capital and surplus levels that exceed their respective regulatory minimum requirements, and none utilized prescribed or permitted practices that vary materially from the practices prescribed by the NAIC or equivalent regulatory bodies for results reported as of December 31, 2017 and 2016, respectively, or for the years ended December 31, 2017, 2016 and 2015, respectively.

Accumulated Other Comprehensive Income (Loss)

The balance of and changes in each component of "Accumulated other comprehensive income (loss) attributable to Prudential Financial, Inc." for the years ended December 31, are as follows:

Notes to Consolidated Financial Statements—(Continued)

Net Unrealized Investment Gains (Losses)

Net unrealized investment gains (losses) on securities classified as available-for-sale and certain other long-term investments and other assets are included in the Company's Consolidated Statements of Financial Position as a component of AOCI. Changes in these amounts include reclassification adjustments to exclude from "Other comprehensive income (loss)" those items that are included as part of "Net income" for a period that had been part of "Other comprehensive income (loss)" in earlier periods. The amounts for the periods indicated below, split between amounts related to fixed maturity securities on which an OTTI loss has been recognized, and all other net unrealized investment gains (losses), are as follows:

	DAC, Net Unrealized Gains (Losses) on Investments Recoverable		Future Policy Benefits, Policyholders' Account Balances and Reinsurance Payables		Deferred Income Tax (Liability) Benefit	Accumulated Other Comprehensive Income (Loss) Related To Net Unrealized Investment Gains (Losses)

Notes to Consolidated Financial Statements—(Continued)

16. EARNINGS PER SHARE

A reconciliation of the numerators and denominators of the basic and diluted per share computations of Common Stock based on the consolidated earnings of Prudential Financial for the years ended December 31, is as follows:

	2017			2016			2015		
	Income	Weighted Average Shares	Per Share Amount	Income	Weighted Average Shares	Per Share Amount	Income	Weighted Average Shares	Per Share Amount
	(in millions, except per share amounts)								
Basic earnings per share									
Net income (loss)	\$7,974			\$4,419			\$5,712		
Less: Income (loss) attributable to noncontrolling interests	111			51			70		
Less: Dividends and undistributed earnings allocated to participating unvested share-based payment awards	95			50			55		
Net income (loss) attributable to Prudential Financial available to holders of Common Stock	\$7,768	427.0	\$ 18.19	\$4,318	438.2	\$ 9.85	\$5,587	451.7	\$ 12.37
Effect of dilutive securities and compensation programs									
Add: Dividends and undistributed earnings allocated to participating unvested share-based payment awards—Basic	\$95			\$50			\$55		
Less: Dividends and undistributed earnings allocated to participating unvested share-based payment awards—Diluted	94			49			54		
Stock options		2.1			1.8			2.3	
Deferred and long-term compensation programs		1.1			0.9			0.9	
Exchangeable Surplus Notes	17	5.8		17	5.7		17	5.5	
Diluted earnings per share									
Net income (loss) attributable to Prudential Financial available to holders of Common Stock	\$7,786	436.0	\$ 17.86	\$4,336	446.6	\$ 9.71	\$5,605	460.4	\$ 12.17

Unvested share-based payment awards that contain nonforfeitable rights to dividends are participating securities and included in the computation of earnings per share pursuant to the two-class method. Under this method, earnings attributable to Prudential Financial are allocated between Common Stock and the participating awards, as if the awards were a second class of stock. During periods of net income available to holders of Common Stock, the calculation of earnings per share excludes the income attributable to participating securities in the numerator and the

dilutive impact of these securities from the denominator. In the event of a net loss available to holders of Common Stock, undistributed earnings are not allocated to participating securities and the denominator excludes the dilutive impact of these securities as they do not share in the losses of the Company. Undistributed earnings allocated to participating unvested share-based payment awards for the years ended December 31, 2017, 2016 and 2015, as applicable, were based on 5.2 million, 5.1 million and 4.4 million of such awards, respectively, weighted for the period they were outstanding.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Stock options and shares related to deferred and long-term compensation programs that are considered antidilutive are excluded from the computation of diluted earnings per share. Stock options are considered antidilutive based on application of the treasury stock method or in the event of a net loss available to holders of Common Stock. Shares related to deferred and long-term compensation programs are considered antidilutive in the event of a net loss available to holders of Common Stock. For the years ended December 31, the number of stock options and shares related to deferred and long-term compensation programs that were considered antidilutive and were excluded from the computation of diluted earnings per share, weighted for the portion of the period they were outstanding, are as follows:

	2017	2016	2015
	Exercise Shares Price Per Share	Exercise Shares Price Per Share	Exercise Shares Price Per Share
	(in millions, except per share amounts, based on weighted average)		
Antidilutive stock options based on application of the treasury stock method	0.3 \$ 110.18	2.7 \$ 83.97	2.4 \$ 87.97
Antidilutive stock options due to net loss available to holders of Common Stock	0.0	0.0	0.0
Antidilutive shares based on application of the treasury stock method	0.1	0.0	0.0
Antidilutive shares due to net loss available to holders of Common Stock	0.0	0.0	0.0
Total antidilutive stock options and shares	0.4	2.7	2.4

In September 2009, the Company issued \$500 million of surplus notes with an interest rate of 5.36% per annum which are exchangeable at the option of the note holders for shares of Common Stock. The initial exchange rate for the surplus notes was 10.1235 shares of Common Stock per each \$1,000 principal amount of surplus notes. This was equivalent to 5.1 million shares and an initial exchange price per share of Common Stock of \$98.78. The exchange rate is subject to customary anti-dilution adjustments and is accordingly revalued during the fourth quarter of each year. As of December 31, 2017, the exchange rate is equal to 11.7643 shares of Common Stock per each \$1,000 principal amount of surplus notes. This is equivalent to 5.88 million shares and an exchange price per share of Common Stock of \$85.00. In calculating diluted earnings per share under the if-converted method, the potential shares that would be issued assuming a hypothetical exchange, weighted for the period the notes are outstanding, are added to the denominator, and the related interest expense, net of tax, is excluded from the numerator, if the overall effect is dilutive.

17. SHARE-BASED PAYMENTS

Omnibus Incentive Plan

Prudential Financial, Inc.'s Omnibus Incentive Plan provides stock-based awards including stock options, stock appreciation rights, restricted stock shares, restricted stock units, stock settled performance shares, and cash settled performance units. Dividend equivalents are generally provided on restricted stock shares and restricted stock units outstanding as of the record date. Dividend equivalents are generally accrued on target performance shares and units outstanding as of the record date. These dividend equivalents are paid only on the shares and units released up to a maximum of the target number of shares and units awarded. Generally, the requisite service period is the vesting period. There were 23,092,637 authorized shares available for grant under the Omnibus Plan as of December 31,

2017.

Compensation Costs

Compensation cost for restricted stock units, performance shares and performance units granted to employees is measured by the share price of the underlying Common Stock at the date of grant.

Compensation cost for employee stock options is based on the fair values estimated on the grant date. The fair value of each stock option award is estimated using a binomial option pricing model on the date of grant for stock options issued to employees. The weighted average grant date assumptions used in the binomial option valuation model are as follows:

226

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

	2017	2016	2015	
Expected volatility	35.29	% 38.36	% 34.67	%
Expected dividend yield	2.84	% 3.92	% 3.00	%
Expected term	5.60 years	5.61 years	5.57 years	
Risk-free interest rate	2.06	% 1.25	% 1.61	%

Expected volatilities are based on historical volatility of the Company's Common Stock and implied volatilities from traded options on the Company's Common Stock. The Company uses historical data and expectations of future exercise patterns to estimate option exercises and employee terminations within the valuation model. The expected term of options granted represents the period of time that options granted are expected to be outstanding. The risk-free rate for periods associated with the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

The following chart summarizes the compensation cost recognized and the related income tax benefit for stock options, restricted stock units, performance shares and performance units for the years ended December 31:

	2017		2016		2015	
	Total Compensation Cost Recognized	Income Tax Benefit	Total Compensation Cost Recognized	Income Tax Benefit	Total Compensation Cost Recognized	Income Tax Benefit
	(in millions)					
Employee stock options	\$12	\$ 5	\$ 19	\$ 7	\$ 21	\$ 8
Employee restricted stock units	142	51	126	47	111	42
Employee performance shares and performance units	109	41	57	21	32	12
Total	\$263	\$ 97	\$ 202	\$ 75	\$ 164	\$ 62

Compensation costs related to stock-based compensation plans capitalized in deferred acquisition costs for the years ended December 31, 2017, 2016 and 2015 were de minimis.

Stock Options

Each stock option granted has an exercise price at the fair market value of the Company's Common Stock on the date of grant and has a maximum term of 10 years. Generally, one third of the option grant vests in each of the first three years.

A summary of the status of the Company's stock option grants is as follows:

	Employee Stock Options	
	Shares	Weighted Average Exercise Price
Outstanding at December 31, 2016	6,738,802	\$ 63.53
Granted	410,501	110.15
Exercised	(2,385,170)	63.80
Forfeited	(28,910)	69.23
Expired	(5,821)	83.29
Outstanding at December 31, 2017	4,729,402	\$ 67.38

Exercisable at December 31, 2017 3,248,670 \$ 61.91

The weighted average grant date fair value of employee stock options granted during the years ended December 31, 2017, 2016 and 2015 was \$27.91, \$14.81 and \$18.45, respectively.

The total intrinsic value (i.e., market price of the stock less the option exercise price) of employee stock options exercised during the years ended December 31, 2017, 2016 and 2015 was \$109 million, \$120 million, and \$49 million, respectively.

The weighted average remaining contractual term and the aggregate intrinsic value of stock options outstanding and exercisable as of December 31, 2017 is as follows:

227

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

December 31, 2017		
Employee Stock Options		
Weighted Average	Aggregate	
Remaining	Intrinsic	
Contractual Term	Value	
(in years)	(in	millions)
Outstanding	5.56	\$ 225
Exercisable	4.51	\$ 172

Restricted Stock Units, Performance Share Awards and Performance Unit Awards

A restricted stock unit is an unfunded, unsecured right to receive a share of the Company's Common Stock at the end of a specified period of time, which is subject to forfeiture and transfer restrictions. Generally, the restrictions will lapse on the third anniversary of the date of grant. Performance shares and performance units are awards denominated in the Company's Common Stock. The number of units is determined over the performance period, and may be adjusted based on the satisfaction of certain performance goals for the Company. Performance share awards are payable in the Company's Common Stock. Performance unit awards are payable in cash.

A summary of the Company's restricted stock units, performance shares and performance unit awards is as follows:

	Restricted Stock Units	Weighted Average Grant Date Fair Value	Performance Share and Performance Unit Awards(1)	Weighted Average Grant Date Fair Value
Restricted at December 31, 2016(2)	4,979,707	\$ 73.77	1,663,673	\$ 104.06
Granted(2)	1,540,848	110.39	601,179	114.98
Forfeited	(125,209)	83.34	(9,610)	109.21
Performance adjustment(3)			105,829	110.45
Released	(1,253,305)	84.08	(540,739)	110.45
Restricted at December 31, 2017(2)	5,142,041	\$ 82.00	1,820,332	\$ 114.98

Performance share and performance unit awards reflect the target units awarded, reduced for forfeitures and releases to date. The actual number of units to be awarded at the end of each performance period will range (1) between 0% and 125% of the target number of units granted, based upon a measure of the reported performance for the Company relative to stated goals.

For performance share and performance unit awards, the grant date is the same as the date the grant vests. The features of the grant are such that a mutual understanding of the key terms and conditions of the award between the (2) employee and employer have not been reached until the grant is vested. Consequently, the weighted average grant date fair value as of December 31, 2017 and December 31, 2016 is the closing stock price of Prudential Financial's common stock on those dates.

(3) Represents the difference between the target units granted and the actual units awarded based upon the attainment of performance goals for the Company.

The fair market value of restricted stock units, performance shares and performance units released for the years ended December 31, 2017, 2016 and 2015 was \$196 million, \$128 million and \$162 million, respectively.

The weighted average grant date fair value for restricted stock units granted during the years ended December 31, 2017, 2016 and 2015 was \$110.39, \$64.12 and \$78.4, respectively. The weighted average grant date fair value for performance shares and performance units granted during the years ended December 31, 2017, 2016 and 2015 was \$114.98, \$104.06 and \$81.41, respectively.

Unrecognized Compensation Cost

Unrecognized compensation cost for stock options as of December 31, 2017 was \$3 million with a weighted average recognition period of 1.64 years. Unrecognized compensation cost for restricted stock units, performance shares and performance units as of December 31, 2017 was \$152 million with a weighted average recognition period of 1.71 years.

Tax Benefits Realized

The tax benefit realized for exercises of stock options during the years ended December 31, 2017, 2016 and 2015 was \$39 million, \$41 million and \$20 million, respectively.

The tax benefit realized upon vesting of restricted stock units, performance shares and performance units for the years ended December 31, 2017, 2016 and 2015 was \$70 million, \$46 million and \$58 million, respectively.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Settlement of Awards

The Company's policy is to issue shares from Common Stock held in treasury upon exercise of stock options, the release of restricted stock units and performance shares. The Company uses cash to settle performance units. The amount of cash used to settle performance units during the years ended December 31, 2017, 2016 and 2015 was \$27 million, \$18 million and \$21 million, respectively.

18. EMPLOYEE BENEFIT PLANS

Pension and Other Postretirement Plans

The Company has funded and non-funded non-contributory defined benefit pension plans ("Pension Benefits"), which cover substantially all of its employees. For some employees, benefits are based on final average earnings and length of service, while benefits for other employees are based on an account balance that takes into consideration age, service and earnings during their career.

The Company provides certain health care and life insurance benefits for its retired employees, their beneficiaries and covered dependents ("Other Postretirement Benefits"). The health care plan is contributory; the life insurance plan is non-contributory. Substantially all of the Company's U.S. employees may become eligible to receive other postretirement benefits if they retire after age 55 with at least 10 years of service or under certain circumstances after age 50 with at least 20 years of continuous service.

Prepaid benefits costs and accrued benefit liabilities are included in "Other assets" and "Other liabilities," respectively, in the Company's Consolidated Statements of Financial Position. The status of these plans as of December 31, 2017 and 2016 is summarized below:

In addition to the plan assets above, the Company in 2007 established an irrevocable trust, commonly referred to as a "rabbi trust," for the purpose of holding assets of the Company to be used to satisfy its obligations with respect to certain non-qualified retirement plans (\$1,283 million and \$1,227 million benefit obligation at December 31, 2017 and 2016, respectively). Assets held in the rabbi trust are available to the general creditors of the Company in the event of insolvency or bankruptcy. The Company may from time to time in its discretion make contributions to the trust to fund accrued benefits payable to participants in one or more of the plans, and, in the case of a change in control of the Company, as defined in the trust agreement, the Company will be required to make contributions to the trust to fund

the accrued benefits, vested and unvested, payable on a pre-tax basis to participants in the plans. The Company did not make any discretionary payments to the trust in 2017 and 2016. As of December 31, 2017 and 2016, the assets in the trust had a carrying value of \$881 million and \$829 million, respectively.

The Company also maintains a separate rabbi trust for the purpose of holding assets of the Company to be used to satisfy its obligations with respect to certain other non-qualified retirement plans (\$81 million benefit obligation at December 31, 2017 and 2016, respectively), as well as certain cash-based deferred compensation arrangements. As of December 31, 2017 and 2016, the assets in the trust had a carrying value of \$120 million and \$115 million, respectively.

Information for pension plans with an accumulated benefit obligation in excess of plan assets

2017 2016

(in millions)

Accumulated benefit obligation	\$2,655	\$2,426
Fair value of plan assets	\$0	\$4

There were no purchases of annuity contracts in 2017 and 2016 from Prudential Insurance. The approximate future annual benefit payment payable by Prudential Insurance for all annuity contracts was \$21 million and \$19 million as of December 31, 2017 and 2016, respectively.

Components of Net Periodic Benefit Cost

The Company uses market related value to determine components of net periodic (benefit) cost. Market related value recognizes certain changes in fair value of plan assets over a period of five years. Changes in the fair value of U.S. equities, international equities, real estate and other assets are recognized over a five year period. However, changes in the fair value for fixed maturity assets (including short-term investments) are recognized immediately for the purposes of market related value.

Net periodic (benefit) cost included in “General and administrative expenses” in the Company’s Consolidated Statements of Operations for the years ended December 31, includes the following components:

	Pension Benefits			Other Postretirement Benefits		
	2017	2016	2015	2017	2016	2015
	(in millions)					
Service cost	\$284	\$253	\$244	\$20	\$19	\$20
Interest cost	476	498	469	82	91	86
Expected return on plan assets	(781)	(754)	(775)	(102)	(105)	(115)
Amortization of transition obligation	0	0	0	0	0	0
Amortization of prior service cost	(3)	(6)	(8)	0	(2)	(5)
Amortization of actuarial (gain) loss, net	191	181	168	36	41	38
Settlements	13	7	5	0	0	0
Special termination benefits(1)	4	2	4	0	0	0

Net periodic (benefit) cost	\$184	\$181	\$107	\$36	\$44	\$24
-----------------------------	-------	-------	-------	------	------	------

(1) Certain employees were provided special termination benefits under non-qualified plans in the form of unreduced early retirement benefits as a result of their involuntary termination.

Changes in Accumulated Other Comprehensive Income

The benefit obligation is based upon actuarial assumptions such as discount, termination, retirement, mortality and salary growth rates. Changes at year-end in these actuarial assumptions, along with experience changes based on updated participant census data are deferred in AOCI. Plan assets generate actuarial gains and losses when actual returns on plan assets differ from expected returns on plan assets, and these differences are also deferred in AOCI. The cumulative deferred gain (loss) within AOCI is amortized into earnings if it exceeds 10% of the greater of the benefit obligation or plan assets at the beginning of the year, and the amortization period is based upon the actuarially calculated expected future years of service for a given plan.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

The domestic discount rate used to value the pension and postretirement obligations at December 31, 2017 and December 31, 2016 is based upon the value of a portfolio of Aa-rated investments whose cash flows would be available to pay the benefit obligation's cash flows when due. The December 31, 2017 portfolio is selected from a compilation of approximately 650 Aa-rated bonds across the full range of maturities. Since yields can vary widely at each maturity point, the Company generally avoids using the highest and lowest yielding bonds at the maturity points, so as to avoid relying on bonds that might be mispriced or misrated. This refinement process generally results in having a distribution from the 10th to 90th percentile. The Aa-rated portfolio is then selected and, accordingly, its value is a measure of the benefit obligation. A single equivalent discount rate is calculated to equate the value of the Aa-rated portfolio to the cash flows for the benefit obligation. The result is rounded to the nearest 5 basis points and the benefit obligation is recalculated using the rounded discount rate.

The pension and postretirement expected long-term rates of return on plan assets for 2017 were determined based upon an approach that considered the allocation of plan assets as of December 31, 2016. Expected returns are estimated by asset class as noted in the discussion of investment policies and strategies below. Expected returns on asset classes are developed using a building-block approach that is forward looking and are not strictly based upon historical returns. The building blocks for equity returns include inflation, real return, a term premium, an equity risk premium, capital appreciation, expenses, the effect of active management and the effect of rebalancing. The building blocks for fixed maturity returns include inflation, real return, a term premium, credit spread, capital appreciation, effect of active management, expenses and the effect of rebalancing.

The Company applied the same approach to the determination of the expected rate of return on plan assets in 2018. The expected rate of return for 2018 is 6.25% and 7.00% for pension and postretirement, respectively.

The assumptions for foreign pension plans are based on local markets. There are no material foreign postretirement plans.

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plan. A one-percentage point increase and decrease in assumed health care cost trend rates would have the following effects:

	Other Postretirement Benefits (in millions)
One percentage point increase	
Increase in total service and interest costs	\$ 7
Increase in postretirement benefit obligation	130
One percentage point decrease	
Decrease in total service and interest costs	\$ 5
Decrease in postretirement benefit obligation	98

Plan Assets

The investment goal of the domestic pension plan assets is to generate an above benchmark return on a diversified portfolio of stocks, bonds and other investments. The cash requirements of the pension obligation, which include a traditional formula principally representing payments to annuitants and a cash balance formula that allows lump sum payments and annuity payments, are designed to be met by the bonds and short-term investments in the portfolio. The pension plan risk management practices include guidelines for asset concentration, credit rating and liquidity. The

pension plan does not invest in leveraged derivatives. Derivatives such as futures contracts are used to reduce transaction costs and change asset concentration, while interest rate swaps and futures are used to adjust duration.

The investment goal of the domestic postretirement plan assets is to generate an above benchmark return on a diversified portfolio of stocks, bonds, and other investments, while meeting the cash requirements for the postretirement obligation that includes a medical benefit including prescription drugs, a dental benefit and a life benefit. The postretirement plan risk management practices include guidelines for asset concentration, credit rating, liquidity and tax efficiency. The postretirement plan does not invest in leveraged derivatives. Derivatives such as futures contracts are used to reduce transaction costs and change asset concentration, while interest rate swaps and futures are used to adjust duration.

The plan fiduciaries for the Company's pension and postretirement plans have developed guidelines for asset allocations reflecting a percentage of total assets by asset class, which are reviewed on an annual basis. Asset allocation targets as of December 31, 2017 are as follows:

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Asset Category	Pension		Postretirement

Real Estate	2 %	16 %	0 %	0 %
Other	0 %	17 %	0 %	0 %

To implement the investment strategy, plan assets are invested in funds that primarily invest in securities that correspond to one of the asset categories under the investment guidelines. However, at any point in time, some of the assets in a fund may be of a different nature than the specified asset category.

Assets held with Prudential Insurance are in either pooled separate accounts or single client separate accounts. Pooled separate accounts hold assets for multiple investors. Each investor owns a “unit of account.” Single client separate accounts hold assets for only one investor, the domestic qualified pension plan, and each security in the fund is treated as individually owned. Assets held with a bank are either in common/collective trusts or single client trusts. Common or collective trusts hold assets for more than one investor. Each investor owns a “unit of account.” Single client trusts hold assets for only one investor, the domestic qualified pension plan, and each security in the fund is treated as individually owned.

There were no investments in Prudential Financial Common Stock as of December 31, 2017 and December 31, 2016 for either the pension or postretirement plans.

The authoritative guidance around fair value established a framework for measuring fair value. Fair value is disclosed using a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value, as described in Note 20.

The following describes the valuation methodologies used for pension and postretirement plans assets measured at fair value.

Insurance Company Pooled Separate Accounts, Common or Collective Trusts, and United Kingdom Insurance Pooled Funds—Insurance company pooled separate accounts are invested via group annuity contracts issued by Prudential Insurance. Assets are represented by a “unit of account.” The redemption value of those units is based on a per unit value whose value is the result of the accumulated values of underlying investments. The underlying investments are valued in accordance with the corresponding valuation method for the investments held.

Equities—See Note 20 for a discussion of the valuation methodologies for equity securities.

U.S. Government Securities (both Federal and State & Other), Non-U.S. Government Securities, and Corporate Debt—See Note 20 for a discussion of the valuation methodologies for fixed maturity securities.

Interest Rate Swaps—See Note 20 for a discussion of the valuation methodologies for derivative instruments.

Guaranteed Investment Contracts—The value is based on contract cash flows and available market rates for similar investments.

Registered Investment Companies (Mutual Funds)—Securities are priced at the net asset value (“NAV”) of shares.

Unrealized Gain (Loss) on Investment of Securities Lending Collateral—This value is the contractual position relative to the investment of securities lending collateral.

Real Estate—The values are determined through an independent appraisal process. The estimate of fair value is based on three approaches; (1) current cost of reproducing the property less deterioration and functional/economic obsolescence; (2) discounting a series of income streams and reversion at a specific yield or by directly capitalizing a single year income estimate by an appropriate factor; and (3) value indicated by recent sales of comparable properties in the market. Each approach requires the exercise of subjective judgment.

Short-term Investments—Securities are valued initially at cost and thereafter adjusted for amortization of any discount or premium (i.e., amortized cost). Amortized cost approximates fair value.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Partnerships—The value of interests owned in partnerships is based on valuations of the underlying investments that include private placements, structured debt, real estate, equities, fixed maturities, commodities and other investments.

Private equity and real estate partnerships do not provide redemption rights to their investors, and there is not a public market for these investments. The Plan's ability to redeem its investments at the end of the partnership term will depend on the ability of the fund manager to liquidate the illiquid private equity or real estate holdings. These funds are established with expected terms ranging from seven to fifteen years, with an option to extend the liquidation period for additional terms of up to two years.

Hedge Funds—The value of interests in hedge funds is based on the underlying investments that include equities, debt and other investments.

Hedge fund investments are structured as fund-of-funds vehicles or as direct investments in various hedge funds. The fund-of-funds vehicles are used for the purpose of making investments in a diverse portfolio of smaller hedge funds, while the direct investments allow for larger targeted investments without the additional fees inherent in a fund-of-funds structure. The hedge fund investments may be subject to initial period lock-up restrictions, under which capital must remain invested for a minimum period, ranging from one to two years. At December 31, 2017 and 2016, substantially none of the funds were in their initial lock-up period. Following the expiration of a fund's lock-up period, redemptions are permitted quarterly, semi-annually or annually, with advance written notice from 65 to 185 days, depending on the fund. However, redemptions from hedge funds and fund-of-funds may also be restricted by a maximum redemption limitation on any redemption payment date, generally stated as a percentage of the total fund assets or total investment by the redeeming investor; payments of redemptions in excess of that "gate" amount are deferred. The Plan's hedge fund investments include "gate" limits of 20% to 25% of the hedge fund's net assets, depending on the fund.

Variable Life Insurance Policies—These assets are held in group and individual variable life insurance policies issued by Prudential Insurance. Group policies are invested in Insurance Company Pooled Separate Accounts. Individual policies are invested in Registered Investment Companies (Mutual Funds). The value of interest in these policies is the cash surrender value of the policies based on the underlying investments.

Pension plan asset allocations in accordance with the investment guidelines are as follows:

The expected benefit payments for the Company's pension and postretirement plans, as well as the expected Medicare Part D subsidy receipts related to the Company's postretirement plan, for the years indicated are as follows:

241

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

	Pension Payments	Other Postretirement Benefit Payments	Other Postretirement Benefits—Medicare Part D Subsidy Receipts
	(in millions)		
2018	\$ 789	\$ 149	\$ 10
2019	849	152	10
2020	803	154	10
2021	827	155	11
2022	866	155	11
2023-2027	4,534	766	59
Total	\$ 8,668	\$ 1,531	\$ 111

The Company anticipates that it will make cash contributions in 2018 of approximately \$200 million to the pension plans and approximately \$10 million to the postretirement plans.

Postemployment Benefits

The Company accrues postemployment benefits for income continuance and health and life benefits provided to former or inactive employees who are not retirees. The net accumulated liability for these benefits at December 31, 2017 and 2016 was \$0 million and \$20 million, respectively, and is included in “Other liabilities.”

Other Employee Benefits

The Company sponsors voluntary savings plans for employees (401(k) plans). The plans provide for salary reduction contributions by employees and matching contributions by the Company of up to 4% of annual salary. The matching contributions by the Company included in “General and administrative expenses” were \$74 million, \$72 million and \$64 million for the years ended December 31, 2017, 2016 and 2015, respectively.

19. INCOME TAXES

The following schedule discloses significant components of income tax expense (benefit) for each year presented:

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

	Year Ended December 31,		
	2017	2016	2015
	(in millions)		
Current tax expense (benefit):			
U.S.	\$(47)	\$31	\$738
State and local	11	9	3
Foreign	594	595	622
Total current tax expense (benefit)	558	635	1,363
Deferred tax expense (benefit):			
U.S.	(2,552)	132	585
State and local	0	5	4
Foreign	556	563	120
Total deferred tax expense (benefit)	(1,996)	700	709
Total income tax expense (benefit) on income (loss) before equity in earnings of operating joint ventures	(1,438)	1,335	2,072
Income tax expense (benefit) on equity in earnings of operating joint ventures	33	11	(1)
Income tax expense (benefit) on discontinued operations	0	0	0
Income tax expense (benefit) reported in equity related to:			
Other comprehensive income	784	1,305	(2,213)
Stock-based compensation programs	(2)	(30)	(22)
Total income taxes	\$(623)	\$2,621	\$(164)

Reconciliation of Expected Tax at Statutory Rates to Reported Income Tax Expense (Benefit)

The differences between income taxes expected at the U.S. federal statutory income tax rate of 35% and the reported income tax expense (benefit) are summarized as follows:

	Year Ended December 31,		
	2017	2016	2015
	(in millions)		
Expected federal income tax expense (benefit)	\$2,270	\$1,997	\$2,719
Non-taxable investment income	(369)	(352)	(341)
Foreign taxes at other than U.S. rate	(249)	(172)	(51)
Low-income housing and other tax credits	(126)	(118)	(116)
Changes in tax law	(2,858)	0	(108)
Other	(106)	(20)	(31)
Reported income tax expense (benefit)	\$(1,438)	\$1,335	\$2,072
Effective tax rate	(22.2)%	23.4 %	26.7 %

The effective tax rate is the ratio of “Total income tax expense (benefit)” divided by “Income before income taxes and equity in earnings of operating joint ventures.” The Company’s effective tax rate for fiscal years 2017, 2016 and 2015 was -22.2%, 23.4% and 26.7%, respectively. The following is a description of items that had the most significant impact on the difference between the Company’s statutory U.S. federal income tax rate of 35% and the Company’s effective tax rate during the periods presented:

Changes in Tax Law. The following is a list of notable changes in tax law that impacted the Company's effective tax rate for the periods presented:

U.S. Tax Cuts and Jobs Act of 2017 ("Tax Act of 2017"). On December 22, 2017, the Tax Act of 2017 was enacted into U.S. law. This law includes a broad range of tax reform changes that will affect U.S. businesses, including changes to corporate tax

243

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

rates, business deductions and international tax provisions. Under U.S. GAAP, changes in tax rates and tax law are accounted for in the period of enactment (the date the President signed the bill into law).

In December 2017, the SEC staff issued SAB 118 to address the application of U.S. GAAP in situations when a registrant does not have necessary information available, prepared, or analyzed (including computations) in reasonable detail to complete the accounting for certain income tax effects of the Tax Act of 2017. SAB 118 provides guidance for registrants under three scenarios: (1) measurement of certain income tax effects is complete, (2) measurement of certain income tax effects can be reasonably estimated and (3) measurement of certain income tax effects cannot be reasonably estimated. SAB 118 provides that the measurement period is complete when a company's accounting is complete and in no circumstances should the measurement period extend beyond one year from the enactment date. SAB 118 acknowledges that a company may be able to complete the accounting for some provisions earlier than others. As a result, it may need to apply all three scenarios in determining the accounting for the Tax Act of 2017 based on information that is available.

The Company has not fully completed its accounting for the tax effects of the Tax Act of 2017. However, we have recorded the effects of the Tax Act of 2017 as reasonable estimates due to the need for further analysis of the provisions within the Tax Act of 2017 and collection, preparation and analysis of relevant data necessary to complete the accounting. As a result, upon enactment of the Tax Act of 2017, the Company recognized a \$2,880 million tax benefit in "Total income tax expense (benefit)" in the Company's Consolidated Statements of Operations for the year ended December 31, 2017. This net tax benefit was primarily comprised of the following components:

\$1,592 million tax benefit from the reduction in net deferred tax liabilities to reflect the reduction in the U.S. tax rate from 35% to 21%; and

\$1,785 million tax benefit from the adoption of a modified territorial international tax system which required the Company to eliminate net deferred tax liabilities related to undistributed foreign earnings and to adjust certain international net deferred tax liabilities from 35% down to their lower local rates.

Offset by:

\$497 million tax expense related to the one-time toll tax on the undistributed, non-previously taxed post-1986 foreign earnings as part of the transition to the territorial system.

As we complete the collection, preparation and analysis of data relevant to the Tax Act of 2017, and interpret any additional guidance issued by the IRS, U.S. Department of the Treasury, or other standard-setting organizations, we may make adjustments to these provisional amounts. These adjustments may materially impact our provision for income taxes in the period in which the adjustments are made.

South Korea Tax Reform Bill. On December 19, 2017, South Korea enacted a 2018 tax reform bill that adds a new 25% corporate income tax bracket for taxable income in excess of 300 billion for tax years beginning on or after January 1, 2018. Taxable income in excess of 20 billion but less than 300 billion continues to be subject to a 22% corporate income tax. In addition, corporations continue to be subject to a local income surtax of 10% of the computed corporate income tax before the application of tax credits and exemptions (i.e., 2.5% for the tax base in excess of 300 billion, 2.2% for the tax base between 20 billion and 300 billion). After taking into account this 10% local income tax surcharge on corporate tax, the 2018 tax reform bill increased the top corporate income tax rate in South Korea from 24.2% to 27.5%. As a result, the Company recognized a \$26 million tax expense in 2017 related to remeasuring Korea's deferred tax assets and liabilities.

U.S. Active Financing Exception (“AFE”) Tax Legislation. In December 2015, federal tax legislation was enacted that renewed the AFE retroactive for tax years beginning on or after January 1, 2015 and made the provision a permanent part of the U.S. tax code. Under the AFE, subject to certain tests, foreign business income derived in the active conduct of an insurance business is not subject to U.S. tax until distributed to the U.S. As a result of the change in tax law, in 2015 the Company recognized a \$108 million tax benefit in “Income before equity in earnings of operating joint ventures.” This amount relates to the reversal of \$108 million of tax expense associated with Prudential of Korea’s and Prudential of Taiwan’s unrealized investment gains originally included in AOCI.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Non-Taxable Investment Income. The U.S. Dividends Received Deduction (“DRD”) reduces the amount of dividend income subject to U.S. tax and accounts for most of the non-taxable investment income shown in the table above. More specifically, the U.S. DRD constitutes \$280 million of the total \$369 million of 2017 non-taxable investment income, \$266 million of the total \$352 million of 2016 non-taxable investment income, and \$296 million of the total \$341 million of 2015 non-taxable investment income. The DRD for the current period was estimated using information from 2016, current year investment results, and current year’s equity market performance. The actual current year DRD can vary based on factors such as, but not limited to, changes in the amount of dividends received that are eligible for the DRD, changes in the amount of distributions received from fund investments, changes in the account balances of variable life and annuity contracts, and the Company’s taxable income before the DRD.

Foreign Taxes at Other Than U.S. Rates. The statutory income tax rate in the Company’s two largest non-U.S. tax jurisdictions is approximately 28% in Japan and 24.2% in Korea as compared to the U.S. federal income tax rate of 35% applicable for the periods prior to 2018.

Low-Income Housing and Other Tax Credits. These amounts include incentives within the U.S. tax code for the development of affordable housing aiming at low-income Americans. The Company routinely make such investments that generate a tax credit which reduces the Company’s effective tax rate.

Other. This line item represents insignificant reconciling items that are individually less than 5% of the computed expected federal income tax expense (benefit) and have therefore been aggregated for purposes of this reconciliation in accordance with relevant disclosure guidance.

Schedule of Deferred Tax Assets and Deferred Tax Liabilities

	As of December 31,	
	2017	2016
	(in millions)	
Deferred tax assets:		
Insurance reserves	\$ 821	\$ 1,856
Policyholders’ dividends	1,262	1,849
Net operating and capital loss carryforwards	281	190
Employee benefits	635	789
Investments	862	1,166
Deferred tax assets before valuation allowance	3,861	5,850
Valuation allowance	(214)	(163)
Deferred tax assets after valuation allowance	3,647	5,687
Deferred tax liabilities:		
Net unrealized investment gains	9,062	10,551
Deferred policy acquisition costs	3,625	4,443
Unremitted foreign earnings	119	380
Value of business acquired	414	715
Other	41	393
Deferred tax liabilities	13,261	16,482
Net deferred tax liability	\$(9,614)	\$(10,795)

The application of U.S. GAAP requires the Company to evaluate the recoverability of deferred tax assets and establish a valuation allowance if necessary to reduce the deferred tax asset to an amount that is more likely than not expected to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. In evaluating the need for a valuation allowance, the Company considers many factors, including: (1) the nature of the deferred tax assets and liabilities; (2) whether they are ordinary or capital; (3) in which tax jurisdictions they were generated and the timing of their reversal; (4) taxable income in prior carryback years as well as projected taxable earnings exclusive of reversing temporary differences and carryforwards; (5) the length of time that carryovers can be utilized in the various taxing jurisdictions; (6) any unique tax rules that would impact the utilization of the deferred tax assets; and (7) any tax planning strategies that the Company would employ to avoid a tax benefit from expiring unused. Although realization is not assured, management believes it is more likely than not that the deferred tax assets, net of valuation allowances, will be realized.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

A valuation allowance has been recorded against deferred tax assets related to state and local taxes and foreign operations. Adjustments to the valuation allowance are made to reflect changes in management's assessment of the amount of the deferred tax asset that is realizable and the amount of deferred tax asset actually realized during the year. The valuation allowance includes amounts recorded in connection with deferred tax assets as follows:

	As of December 31, 2017 2016	
	(in millions)	
Valuation allowance related to state and local deferred tax assets	\$196	\$138
Valuation allowance related to foreign operations deferred tax assets	18	25
Total valuation allowance	\$214	\$163

The following table sets forth the amount and expiration dates of federal, state and foreign operating losses, capital loss and tax credit carryforwards for tax purposes, as of the periods indicated:

	As of December 31, 2017 2016	
	(in millions)	
Federal net operating and capital loss carryforwards	\$0	\$0
State net operating and capital loss carryforwards(1)	\$5,806	\$4,201
Foreign operating loss carryforwards(2)	\$58	\$45
Alternative minimum tax credits(3)	\$0	\$66

(1)Expires between 2018 and 2037.

(2)\$16 million expires between 2020 and 2035 and \$42 million has an unlimited carryforward.

(3)Effective in 2018, the alternative minimum tax is repealed for corporations.

Consistent with the Tax Act of 2017, the Company provides U.S. income tax for all unremitted earnings of the Company's foreign affiliates. For certain foreign affiliates organized in withholding tax jurisdictions, the Company considers the unremitted foreign earnings of those affiliates to be indefinitely reinvested, and therefore does not provide for the withholding tax when calculating its current and deferred tax obligations. For certain other foreign affiliates organized in withholding tax jurisdictions, the Company does not consider unremitted earnings indefinitely reinvested, and therefore provides for foreign withholding tax when calculating its current and deferred tax obligations. The following table summarizes the Company's indefinite reinvestment assertions for jurisdictions in which the Company operates that impose a withholding tax on dividends:

Unremitted earnings are indefinitely reinvested	Unremitted earnings are not indefinitely reinvested
All operations in Korea and Luxembourg, and its insurance operations in Chile, China, Italy, Poland and Taiwan	Insurance operations in Indonesia and Ghana, and non-insurance operations in China, Italy and Taiwan

During the third quarter of 2015, the Company determined that the earnings from its Brazilian insurance operations would be repatriated to the U.S. Accordingly, earnings from those Brazilian insurance operations were not considered indefinitely reinvested, and the Company recognized an income tax benefit of \$3 million in “Income (loss) before equity in earnings of operating joint ventures” during 2015. During the fourth quarter of 2017, in light of and for the period after the Tax Act of 2017, the Company determined that all unremitted earnings of the Company’s foreign operations are not considered indefinitely reinvested for purposes of determining U.S. tax liability, as well as determining whether the unremitted earnings of the Company’s foreign operations are considered indefinitely reinvested for purposes of determining its foreign withholding tax liability, as described above. Prior to the enactment of the Tax Act of 2017, for the Japanese insurance operations, the Company provided for U.S. income taxes on pre-2014 U.S. GAAP earnings, post-2013 realized and unrealized capital gains, and an additional amount from Gibraltar Life and Prudential Gibraltar, not to exceed the deferred tax asset recorded in the Statement of Financial Position as of the acquisition date for Prudential Gibraltar and the Star and Edison Businesses. The Company had no change to its U.S. tax in “Income (loss) before equity in earnings of operating joint ventures” during 2017.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

The following table sets forth the undistributed earnings of foreign subsidiaries, where the Company assumes indefinite reinvestment of such earnings and for which, in 2017, 2016, and 2015, U.S. deferred taxes have not been provided, and for which, in 2017, foreign deferred withholding taxes have not been provided. The net tax liability that may arise if the 2017 earnings were remitted can range from \$0 to \$302 million. The actual amount of this tax liability is dependent upon the resolution of uncertainty created by the Tax Act of 2017 in determining the amount of such withholding taxes that would be creditable against the Company's U.S. income tax liability.

	At December 31,		
	2017	2016	2015
	(in millions)		
Undistributed earnings of foreign subsidiaries (assuming indefinite reinvestment for all tax purposes)(1)	N/A	\$4,231	\$3,215
Undistributed earnings of foreign subsidiaries (assuming indefinite reinvestment only for Withholding Taxes)	\$2,603	N/A	N/A

(1) Consistent with the Tax Act of 2017, the Company provides U.S. income tax for all unremitted earnings of the Company's foreign affiliates as of December 31, 2017.

The Company's "Income (loss) before income taxes and equity in earnings of operating joint ventures" includes income from domestic operations of \$2,541 million, \$1,242 million and \$4,235 million, and income (loss) from foreign operations of \$3,945 million, \$4,463 million and \$3,534 million for the years ended December 31, 2017, 2016 and 2015, respectively.

Tax Audit and Unrecognized Tax Benefits

The Company's liability for income taxes includes the liability for unrecognized tax benefits and interest that relate to tax years still subject to review by the IRS or other taxing authorities. The completion of review or the expiration of the Federal statute of limitations for a given audit period could result in an adjustment to the liability for income taxes.

The following table reconciles the total amount of unrecognized tax benefits at the beginning and end of the periods indicated.

	2017	2016	2015
	(in millions)		
Balance at January 1,	\$26	\$6	\$6
Increases in unrecognized tax benefits—prior years	11	10	0
(Decreases) in unrecognized tax benefits—prior years	(5)	0	0
Increases in unrecognized tax benefits—current year	14	10	0
(Decreases) in unrecognized tax benefits—current year	0	0	0
Settlements with taxing authorities	(1)	0	0
Balance at December 31,	\$45	\$26	\$6
Unrecognized tax benefits that, if recognized, would favorably impact the effective rate	\$45	\$26	\$6

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-K

The Company does not anticipate any significant changes within the next twelve months to its total unrecognized tax benefits related to tax years for which the statute of limitations has not expired.

The Company classifies all interest and penalties related to tax uncertainties as income tax expense (benefit). The amounts recognized in the consolidated financial statements for tax-related interest and penalties for the years ended December 31 are as follows:

	2017	2016	2015
	(in millions)		
Interest and penalties recognized in the Consolidated Statements of Operations	\$ (3)	\$ 1	\$ 0

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

	2017	2016
	(in millions)	
Interest and penalties recognized in liabilities in the Consolidated Statements of Financial Position	\$ 1	\$ 5

Listed below are the tax years that remain subject to examination, by major tax jurisdiction, as of December 31, 2017:

Major Tax Jurisdiction	Open Tax Years
United States	2014-2016
Japan	Fiscal years ended March 31, 2013-2017
Korea	Fiscal year ended March 31, 2013, the periods ended December 31, 2013-2016

The Company is participating in the IRS's Compliance Assurance Program. Under this program, the IRS assigns an examination team to review completed transactions as they occur in order to reach agreement with the Company on how they should be reported in the relevant tax returns. If disagreements arise, accelerated resolutions programs are available to resolve the disagreements in a timely manner before the tax return is filed.

Certain of the Company's affiliates in Japan file a consolidated tax return, while others file separate tax returns. The Company's affiliates in Japan are subject to audits by the local taxing authority. The general statute of limitations is five years from when the return is filed. During 2016, the Tokyo Regional Taxation Bureau concluded a routine tax audit of the tax returns of the Company's affiliates in Japan for their tax years ended March 31, 2013 to March 31, 2015. These activities had no material impact on the Company's 2015, 2016 or 2017 results.

The Company's affiliates in South Korea file separate tax returns and are subject to audits by the local taxing authority. The general statute of limitations is five years from when the return is filed. During 2015, the Korean National Tax Service concluded a routine tax audit of the tax returns of Prudential of Korea for the tax years ended March 31, 2010 to March 31, 2012. These activities had no material impact on the Company's 2015, 2016 or 2017 results.

20. FAIR VALUE OF ASSETS AND LIABILITIES

Fair Value Measurement—Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The authoritative fair value guidance establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement. The levels of the fair value hierarchy are as follows:

Level 1—Fair value is based on unadjusted quoted prices in active markets that are accessible to the Company for identical assets or liabilities. The Company's Level 1 assets and liabilities primarily include certain cash equivalents and short-term investments, equity securities and derivative contracts that trade on an active exchange market.

Level 2—Fair value is based on significant inputs, other than quoted prices included in Level 1, that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability through corroboration with observable market data. Level 2 inputs include quoted market prices in active markets for similar assets and liabilities, quoted market prices in markets that are not active for identical or similar assets or liabilities, and other market observable inputs. The Company's Level 2 assets and liabilities include: fixed maturities (corporate

public and private bonds, most government securities, certain asset-backed and mortgage-backed securities, etc.), certain equity securities (mutual funds, which do not trade in active markets because they are not publicly available), certain commercial mortgage loans, short-term investments and certain cash equivalents (primarily commercial paper), and certain OTC derivatives.

Level 3—Fair value is based on at least one significant unobservable input for the asset or liability. The assets and liabilities in this category may require significant judgment or estimation in determining the fair value. The Company's Level 3 assets and liabilities primarily include: certain private fixed maturities and equity securities, certain manually priced public equity securities and fixed maturities, certain highly structured OTC derivative contracts, certain commercial mortgage loans, certain consolidated real estate funds for which the Company is the general partner and embedded derivatives resulting from certain products with guaranteed benefits.

“Netting” amounts represent cash collateral of \$4,288 million and \$5,771 million as of December 31, 2017 and 2016, (1) respectively, and the impact of offsetting asset and liability positions held with the same counterparty, subject to master netting arrangements.

(2) Excludes notes with both fair value and carrying amount of \$2,660 million and \$1,456 million, as of December 31, 2017 and 2016, respectively, which have been offset with the associated payables under a netting agreement.

(3)

Includes credit-tranched securities collateralized by syndicated bank loans, sub-prime mortgages, auto loans, credit cards, education loans and other asset types.

(4) Includes “Trading account assets supporting insurance liabilities” and “Other trading account assets.”

(5) Level 1 represents cash equivalents and short term investments. All other amounts primarily represent derivative assets.

(6) Other long-term investments excluded from the fair value hierarchy include certain hedge funds, private equity funds and other funds for which fair value is measured at NAV per share (or its equivalent) as a practical expedient. At December 31, 2017 and 2016, the fair values of such investments were \$1,969 million and \$1,579 million respectively.

(7) Separate account assets included in the fair value hierarchy exclude investments in entities that calculate net asset value per share (or its equivalent) as a practical expedient. Such investments excluded from the fair value hierarchy include investments in real estate, hedge funds and other invested assets, for which fair value is measured at NAV per share (or its equivalent). At December 31, 2017 and 2016, the fair value of such investments was \$26,224 million and \$25,619 million, respectively.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Separate account assets represent segregated funds that are invested for certain customers. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees (8) made by the Company with respect to certain accounts. Separate account liabilities are not included in the above table as they are reported at contract value and not fair value in the Company's Consolidated Statements of Financial Position.

As of December 31, 2017, the net embedded derivative liability position of \$8.7 billion includes \$0.9 billion of embedded derivatives in an asset position and \$9.6 billion of embedded derivatives in a liability position. As of (9) December 31, 2016, the net embedded derivative liability position of \$8.2 billion includes \$1.2 billion of embedded derivatives in an asset position and \$9.4 billion of embedded derivatives in a liability position.

The methods and assumptions the Company uses to estimate the fair value of assets and liabilities measured at fair value on a recurring basis are summarized below.

Fixed Maturity Securities—The fair values of the Company's public fixed maturity securities are generally based on prices obtained from independent pricing services. Prices for each security are generally sourced from multiple pricing vendors, and a vendor hierarchy is maintained by asset type based on historical pricing experience and vendor expertise. The Company ultimately uses the price from the pricing service highest in the vendor hierarchy based on the respective asset type. The pricing hierarchy is updated for new financial products and recent pricing experience with various vendors. Consistent with the fair value hierarchy described above, securities with validated quotes from pricing services are generally reflected within Level 2, as they are primarily based on observable pricing for similar assets and/or other market observable inputs. Typical inputs used by these pricing services include but are not limited to, reported trades, benchmark yields, issuer spreads, bids, offers, and/or estimated cash flow, prepayment speeds and default rates. If the pricing information received from third-party pricing services is deemed not reflective of market activity or other inputs observable in the market, the Company may challenge the price through a formal process with the pricing service or classify the securities as Level 3. If the pricing service updates the price to be more consistent with the presented market observations, the security remains within Level 2.

Internally-developed valuations or indicative broker quotes are also used to determine fair value in circumstances where vendor pricing is not available, or where the Company ultimately concludes that pricing information received from the independent pricing services is not reflective of market activity. If the Company concludes the values from both pricing services and brokers are not reflective of market activity, it may override the information with an internally-developed valuation. As of December 31, 2017 and 2016, overrides on a net basis were not material. Pricing service overrides, internally-developed valuations and indicative broker quotes are generally included in Level 3 in the fair value hierarchy.

The Company conducts several specific price monitoring activities. Daily analyses identify price changes over predetermined thresholds defined at the financial instrument level. Various pricing integrity reports are reviewed on a daily and monthly basis to determine if pricing is reflective of market activity or if it would warrant any adjustments. Other procedures performed include, but are not limited to, reviews of third-party pricing services methodologies, reviews of pricing trends and back testing.

The fair values of private fixed maturities, which are originated by internal private asset managers, are primarily determined using discounted cash flow models. These models primarily use observable inputs that include Treasury or similar base rates plus estimated credit spreads to value each security. The credit spreads are obtained through a survey of private market intermediaries who are active in both primary and secondary transactions, and consider, among other factors, the credit quality and the reduced liquidity associated with private placements. Internal adjustments are made to reflect variation in observed sector spreads. Since most private placements are valued using

standard market observable inputs and inputs derived from, or corroborated by, market observable data including, but not limited to observed prices and spreads for similar publicly-traded issues, they have been reflected within Level 2. For certain private fixed maturities, the discounted cash flow model may incorporate significant unobservable inputs, which reflect the Company's own assumptions about the inputs that market participants would use in pricing the asset. To the extent management determines that such unobservable inputs are significant to the price of a security, a Level 3 classification is made.

Trading Account Assets—Trading account assets consist primarily of fixed maturity securities, equity securities and derivatives whose fair values are determined consistent with similar instruments described above under “Fixed Maturity Securities” and below under “Equity Securities” and “Derivative Instruments.”

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Equity Securities—Equity securities consist principally of investments in common and preferred stock of publicly-traded companies, perpetual preferred stock, privately-traded securities, as well as mutual fund shares. The fair values of most publicly-traded equity securities are based on quoted market prices in active markets for identical assets and are classified within Level 1 in the fair value hierarchy. Estimated fair values for most privately traded equity securities are determined using discounted cash flow, earnings multiple and other valuation models that require a substantial level of judgment around inputs and therefore are classified within Level 3. The fair values of mutual fund shares that transact regularly (but do not trade in active markets because they are not publicly available) are based on transaction prices of identical fund shares and are classified within Level 2 in the fair value hierarchy. The fair values of perpetual preferred stock are based on inputs obtained from independent pricing services that are primarily based on indicative broker quotes. As a result, the fair values of perpetual preferred stock are classified as Level 3.

Commercial Mortgage and Other Loans—The fair value of loans held and accounted for using the fair value option is determined utilizing pricing indicators from the whole loan market, where investors are committed to purchase these loans at a predetermined price, which is considered the principal exit market for these loans. The Company evaluates the valuation inputs used for these assets, including the existence of predetermined exit prices, the terms of the loans, prevailing interest rates and credit risk, and deems the primary pricing inputs are Level 2 inputs in the fair value hierarchy.

Other Long-Term Investments—Other long-term investments include limited partnerships which are consolidated because the Company is either deemed to exercise control or considered the primary beneficiary of a variable interest entity. These entities are primarily investment companies and follow specialized industry accounting whereby their assets are carried at fair value. The investments held by these entities include various feeder fund investments in underlying master funds (whose underlying holdings generally include public fixed maturities, equity securities and mutual funds), as well as wholly-owned real estate held within other investment funds. For the unconsolidated fund investments, where the Company has elected the fair value option, the fair value is primarily determined by the fund managers and is measured at NAV as a practical expedient.

Other Assets—Other assets reflected in Level 3 include reinsurance recoverables which are carried at fair value and relate to the reinsurance of the Company's living benefit guarantees on certain variable annuity contracts. The methods and assumptions used to estimate the fair value are consistent with those described in "Future Policy Benefits."

Derivative Instruments—Derivatives are recorded at fair value either as assets, within "Other trading account assets," or "Other long-term investments," or as liabilities, within "Other liabilities," except for embedded derivatives which are recorded with the associated host contract. The fair values of derivative contracts can be affected by changes in interest rates, foreign exchange rates, commodity prices, credit spreads, market volatility, expected returns, NPR, liquidity and other factors. For derivative positions included within Level 3 of the fair value hierarchy, liquidity valuation adjustments are made to reflect the cost of exiting significant risk positions, and consider the bid-ask spread, maturity, complexity and other specific attributes of the underlying derivative position.

The Company's exchange-traded futures and options include Treasury futures, Eurodollar futures, commodity futures, Eurodollar options and commodity options. Exchange-traded futures and options are valued using quoted prices in active markets and are classified within Level 1 in the fair value hierarchy.

The majority of the Company's derivative positions are traded in the OTC derivative market and are classified within Level 2 in the fair value hierarchy. OTC derivatives classified within Level 2 are valued using models that utilize actively quoted or observable market input values from external market data providers, third-party pricing vendors and/or recent trading activity. The Company's policy is to use mid-market pricing in determining its best estimate of

fair value. The fair values of most OTC derivatives, including interest rate and cross-currency swaps, currency forward contracts, commodity swaps, commodity forward contracts, single name credit default swaps, loan commitments held for sale and “to be announced” (“TBA”) forward contracts on highly rated mortgage-backed securities issued by U.S. government sponsored entities are determined using discounted cash flow models. The fair values of European style option contracts are determined using Black-Scholes option pricing models. These models’ key inputs include the contractual terms of the respective contract, along with significant observable inputs, including interest rates, currency rates, credit spreads, equity prices, index dividend yields, NPR, volatility and other factors.

The Company’s cleared interest rate swaps and credit derivatives linked to an index are valued using models that utilize actively quoted or observable market inputs, including Overnight Indexed Swap discount rates, obtained from external market data providers, third-party pricing vendors and/or recent trading activity. These derivatives are classified as Level 2 in the fair value hierarchy.

252

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

The vast majority of the Company's derivative agreements are with highly rated major international financial institutions. To reflect the market's perception of its own and the counterparty's NPR, the Company incorporates additional spreads over London Inter-Bank Offered Rate ("LIBOR") into the discount rate used in determining the fair value of OTC derivative assets and liabilities that are not otherwise collateralized.

Derivatives classified as Level 3 include look-back equity options and other structured products. These derivatives are valued based upon models, such as Monte Carlo simulation models and other techniques that utilize significant unobservable inputs. Level 3 methodologies are validated through periodic comparison of the Company's fair values to external broker-dealer values.

Cash Equivalents and Short-Term Investments—Cash equivalents and short-term investments include money market instruments, commercial paper and other highly liquid debt instruments. Certain money market instruments are valued using unadjusted quoted prices in active markets that are accessible for identical assets and are primarily classified as Level 1. The remaining instruments in this category are generally fair valued based on market observable inputs and these investments have primarily been classified within Level 2.

Separate Account Assets—Separate account assets include mutual funds, fixed maturity securities, treasuries, equity securities, real estate and commercial mortgage loans for which values are determined consistent with similar instruments described above under "Fixed Maturity Securities," "Equity Securities" and "Commercial Mortgage and Other Loans."

Notes issued by Consolidated VIEs—These notes are based on the fair values of corresponding bank loan collateral. Since the notes are valued based on reference collateral, they are classified as Level 3. See Note 5 and "Fair Value Option" below for additional information.

Other Liabilities—Other liabilities include certain derivative instruments, including embedded derivatives associated with certain "Policyholders' account balances." The fair values are primarily determined consistent with similar derivative instruments described above under "Derivative Instruments."

Future Policy Benefits—The liability for future policy benefits is related to guarantees primarily associated with the living benefit features of certain variable annuity contracts offered by the Company's Individual Annuities segment, including GMAB, GMWB and GMIWB, accounted for as embedded derivatives. The fair values of these liabilities are calculated as the present value of future expected benefit payments to customers less the present value of future expected rider fees attributable to the embedded derivative feature. This methodology could result in either a liability or contra-liability balance, given changing capital market conditions and various actuarial assumptions. Since there is no observable active market for the transfer of these obligations, the valuations are calculated using internally-developed models with option pricing techniques. The models are based on a risk neutral valuation framework and incorporate premiums for risks inherent in valuation techniques, inputs, and the general uncertainty around the timing and amount of future cash flows. The determination of these risk premiums requires the use of management's judgment.

The significant inputs to the valuation models for these embedded derivatives include capital market assumptions, such as interest rate levels and volatility assumptions, the Company's market-perceived NPR, as well as actuarially determined assumptions, including contractholder behavior, such as lapse rates, benefit utilization rates, withdrawal rates, and mortality rates. Since many of these assumptions are unobservable and are considered to be significant inputs to the liability valuation, the liability included in future policy benefits has been reflected within Level 3 in the fair value hierarchy.

Capital market inputs and actual policyholders' account values are updated each quarter based on capital market conditions as of the end of the quarter, including interest rates, equity markets and volatility. In the risk neutral valuation, the initial swap curve drives the total return used to grow the policyholders' account values. The Company's discount rate assumption is based on the LIBOR swap curve adjusted for an additional spread relative to LIBOR to reflect NPR.

Actuarial assumptions, including contractholder behavior and mortality, are reviewed at least annually, and updated based upon emerging experience, future expectations and other data, including any observable market data. These assumptions are generally updated annually unless a material change that the Company feels is indicative of a long term trend is observed in an interim period.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Transfers between Levels 1 and 2—Transfers between levels are made to reflect changes in observability of inputs and market activity. Transfers into or out of any level are generally reported at the value as of the beginning of the quarter in which the transfers occur for any such assets still held at the end of the quarter. Periodically there are transfers between Level 1 and Level 2 for assets held in the Company's Separate Account. The fair value of foreign common stock held in the Company's Separate Account may reflect differences in market levels between the close of foreign trading markets and the close of U.S. trading markets for the respective day. Dependent on the existence of such a timing difference, the assets may move between Level 1 and Level 2. The following table presents the transfers between Level 1 and Level 2 for dates indicated below:

	Year Ended	
	December	
	31,	
	2017	2016
	(in	
	millions)	
Transferred from Level 1 to Level 2	\$ 111	\$ 86
Transferred from Level 2 to Level 1	\$ 207	\$ 40

Quantitative Information Regarding Internally-Priced Level 3 Assets and Liabilities—The tables below present quantitative information on significant internally-priced Level 3 assets and liabilities.

As of December 31, 2017

	Fair Value	Valuation Techniques	Unobservable Inputs	Minimum	Maximum	Weighted Average	Impact of Increase in Input on Fair Value(1)
	(in millions)						
Assets:

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

As of December 31, 2016

	Fair Value	Valuation Techniques	Unobservable Inputs	Minimum	Maximum	Weighted Average	Impact of Increase in Input on Fair Value(1)
(in millions)							
Assets:							
Corporate securities(2)	\$1,848	Discounted cash flow	Discount rate	0.70%	-20%	7.12%	Decrease
		Market comparables	EBITDA multiples(3)	4.0X	-4.0X	4.0X	Increase
		Liquidation	Liquidation value	15.19%	-98.68%	91.72%	Increase
Separate account assets-commercial mortgage loans(4)	\$971	Discounted cash flow	Spread	1.19%	-2.90%	1.37%	Decrease
Liabilities:							
Future policy benefits(5)	\$8,238	Discounted cash flow	Lapse rate(6)	0%	-13%		Decrease
			Spread over LIBOR(7)	0.25%	-1.50%		Decrease
			Utilization rate(8)	52%	-96%		Increase
			Withdrawal rate	See table footnote (9) below.			
			Mortality rate(10)	0%	-14%		Decrease
			Equity volatility curve	16%	-25%		Increase

(1) Conversely, the impact of a decrease in input would have the opposite impact on fair value as that presented in the table.

(2) Includes assets classified as fixed maturities available-for-sale, trading account assets supporting insurance liabilities and other trading account assets.

(3) Represents multiples of earnings before interest, taxes, depreciation and amortization (“EBITDA”), and are amounts used when the Company has determined that market participants would use such multiples when valuing the investments.

(4) Changes in the fair value of separate account assets are borne by customers and thus are offset by changes in separate account liabilities on the Company’s Consolidated Statements of Financial Position. As a result, changes in value associated with these investments are not reflected in the Company’s Consolidated Statements of Operations.

(5) Future policy benefits primarily represent general account liabilities for the living benefit features of the Company’s variable annuity contracts which are accounted for as embedded derivatives. Since the valuation methodology for these liabilities uses a range of inputs that vary at the contract level over the cash flow projection period, presenting a range, rather than weighted average, is a more meaningful representation of the unobservable inputs used in the valuation.

(6) Lapse rates are adjusted at the contract level based on the in-the-moneyness of the living benefit and reflect other factors, such as the applicability of any surrender charges. Lapse rates are reduced when contracts are more in-the-money. Lapse rates are also generally assumed to be lower for the period where surrender charges apply.

(7) The spread over LIBOR swap curve represents the premium added to the risk-free discount rate (i.e., LIBOR) to reflect our estimates of rates that a market participant would use to value the living benefit contracts in both the accumulation and payout phases. This spread includes an estimate of NPR, which is the risk that the obligation will

not be fulfilled by the Company. NPR is primarily estimated by utilizing the credit spreads associated with issuing funding agreements, adjusted for any illiquidity risk premium. In order to reflect the financial strength ratings of the Company, credit spreads associated with funding agreements, as opposed to credit spread associated with debt, are utilized in developing this estimate because both funding agreements and living benefit contracts are insurance liabilities and are therefore senior to debt.

The utilization rate assumption estimates the percentage of contracts that will utilize the benefit during the contract duration, and begin lifetime withdrawals at various time intervals from contract inception. The remaining contractholders are assumed to either begin lifetime withdrawals immediately or never utilize the benefit.

(8) Utilization assumptions may vary by product type, tax status, and age. The impact of changes in these assumptions is highly dependent on the product type, the age of the contractholder at the time of the sale, and the timing of the first lifetime income withdrawal. Range reflects the utilization rate for the vast majority of business with living benefits.

The withdrawal rate assumption estimates the magnitude of annual contractholder withdrawals relative to the maximum allowable amount under the contract. These assumptions vary based on the age of the contractholder, the tax status of the contract and the duration since the contractholder began lifetime withdrawals. As of December 31, (9) 2017 and 2016, the minimum withdrawal rate assumption is 78% and the maximum withdrawal rate assumption may be greater than 100%. The fair value of the liability will generally increase the closer the withdrawal rate is to 100% and decrease as the withdrawal rate moves further away from 100%.

(10) Range reflects the mortality rate for the vast majority of business with living benefits, with policyholders ranging from 35 to 90 years old. While the majority of living benefits have a minimum age requirement, certain benefits do not have an age restriction. This results in contractholders for certain benefits with mortality rates approaching 0%. Based on historical experience, the Company applies a set of age and duration specific mortality rate adjustments compared to standard industry tables. A mortality improvement assumption is also incorporated into the overall mortality table.

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Interrelationships Between Unobservable Inputs—In addition to the sensitivities of fair value measurements to changes in each unobservable input in isolation, as reflected in the table above, interrelationships between these inputs may also exist, such that a change in one unobservable input may give rise to a change in another or multiple inputs. Examples of such interrelationships for significant internally-priced Level 3 assets and liabilities are as follows:

Corporate Securities—The rate used to discount future cash flows reflects current risk-free rates plus credit and liquidity spread requirements that market participants would use to value an asset. The discount rate may be influenced by many factors, including market cycles, expectations of default, collateral, term, and asset complexity. Each of these factors can influence discount rates, either in isolation, or in response to other factors.

Future Policy Benefits—The Company expects efficient benefit utilization and withdrawal rates to generally be correlated with lapse rates. However, behavior is generally highly dependent on the facts and circumstances surrounding the individual contractholder, such as their liquidity needs or tax situation, which could drive lapse behavior independent of other contractholder behavior assumptions. To the extent more efficient contractholder behavior results in greater in-the-moneyness at the contract level, lapse rates may decline for those contracts. Similarly, to the extent that increases in equity volatility are correlated with overall declines in the capital markets, lapse rates may decline as contracts become more in-the-money.

Valuation Process for Fair Value Measurements Categorized within Level 3—The Company has established an internal control infrastructure over the valuation of financial instruments that requires ongoing oversight by its various business groups. These management control functions are segregated from the trading and investing functions. For invested assets, the Company has established oversight teams, often in the form of pricing committees within each asset management group. The teams, which typically include representation from investment, accounting, operations, legal and other disciplines are responsible for overseeing and monitoring the pricing of the Company's investments and performing periodic due diligence reviews of independent pricing services. An actuarial valuation team oversees the valuation of living benefit features of the Company's variable annuity contracts.

The Company has also established policies and guidelines that require the establishment of valuation methodologies and consistent application of such methodologies. These policies and guidelines govern the use of inputs and price source hierarchies and provide controls around the valuation processes. These controls include appropriate review and analysis of investment prices against market activity or indicators of reasonableness, analysis of portfolio returns to corresponding benchmark returns, back-testing, review of bid-ask spreads to assess activity, approval of price source changes, price overrides, methodology changes and classification of fair value hierarchy levels. For living benefit features of the Company's variable annuity products, the actuarial valuation unit periodically tests contract input data and actuarial assumptions are reviewed at least annually, and updated based upon emerging experience, future expectations and other data, including any observable market data. The valuation policies and guidelines are reviewed and updated as appropriate.

Within the trading and investing functions, the Company has established policies and procedures that relate to the approval of all new transaction types, transaction pricing sources and fair value hierarchy coding within the financial reporting system. For variable annuity product changes or new launches of living benefit features, the actuarial valuation unit validates input logic and new product features and agrees new input data directly to source documents.

Changes in Level 3 Assets and Liabilities—The following tables describe changes in fair values of Level 3 assets and liabilities as of the dates indicated, as well as the portion of gains or losses included in income attributable to unrealized gains or losses related to those assets and liabilities still held at the end of their respective periods.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

- (1) Includes U.S. corporate public, U.S. corporate private, foreign corporate public and foreign corporate private securities. Prior period amounts were aggregated to conform to current period presentation.
- (2) Includes asset-backed, commercial mortgage-backed and residential mortgage-backed securities. Prior period information has been revised to conform to current period presentation.
- (3) Separate account assets represent segregated funds that are invested for certain customers. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees made by the Company with respect to certain accounts. Separate account liabilities are not included in the above table as they are reported at contract value and not fair value in the Company's Consolidated Statements of Financial Position.
- (4) Other, for the period ended December 31, 2017 primarily represents deconsolidations of certain previously consolidated collateralized loan obligations and reclassifications of certain assets between reporting categories.
- (5) Other, for the period ended December 31, 2016 primarily represents deconsolidations of certain previously consolidated collateralized loan obligations.
- (6) Transfers into or out of Level 3 are generally reported as the value as of the beginning of the quarter in which the transfers occur for any such assets still held at the end of the quarter.
- (7) Unrealized gains or losses related to assets still held at the end of the period do not include amortization or accretion of premiums and discounts.

Transfers—Transfers into Level 3 are generally the result of unobservable inputs utilized within valuation methodologies and the use of indicative broker quotes for assets that were previously valued using observable inputs. Transfers out of Level 3 are generally due to the use of observable inputs in valuation methodologies as well as the availability of pricing service information for certain assets that the Company is able to validate.

Derivative Fair Value Information

The following tables present the balance of derivative assets and liabilities measured at fair value on a recurring basis, as of the date indicated, by primary underlying. These tables include NPR and exclude embedded derivatives and associated reinsurance recoverables. The derivative assets and liabilities shown below are included in "Trading account assets-All Other Activity," "Other long-term investments" or "Other liabilities" in the tables contained within the section "—Assets and Liabilities by Hierarchy Level" and "—Changes in Level 3 Assets and Liabilities", above.

Transfers into Level 3(3)	0	0
Transfers out of Level 3(3)	(1)	0
Fair Value, end of period	\$ 32	\$ 5
Unrealized gains (losses) for the period relating to those Level 3 assets that were still held at the end of the period:		
Included in earnings:		
Realized investment gains (losses), net	\$ 20	\$ 2
Other income	\$ 0	\$ 0

(1) Relates to warrants received in an asset restructuring that resulted in reclassification of reporting category.

(2) Relates to private warrants reclassified from derivatives to trading securities.

(3) Transfers into or out of Level 3 are generally reported at the value as of the beginning of the quarter in which the transfer occurs.

Nonrecurring Fair Value Measurements—The following table represents information for assets measured at fair value on a nonrecurring basis. The fair value measurement is nonrecurring as these assets are measured at fair value only when there is evidence of impairment. Assets included in the table are those that were impaired, and therefore measured at fair value, during the respective reporting periods and that are still held as of the reporting date. The estimated fair values for these amounts were determined using significant unobservable inputs (Level 3).

	Year Ended December 31,		
	2017	2016	2015
	(in millions)		
Commercial mortgage loans(1):			
Carrying value after measurement as of period end	\$64	\$47	\$0
Realized investment gains (losses) net	\$(2)	\$(5)	\$0
Mortgage servicing rights(2):			
Carrying value after measurement as of period end	\$60	\$84	\$90
Realized investment gains (losses) net	\$7	\$(1)	\$(7)

Cost method investments(3):

Carrying value after measurement as of period end	\$ 150	\$ 284	\$ 239
Realized investment gains (losses) net	\$(29)	\$(85)	\$(123)

(1) Commercial mortgage loans are valued based on discounted cash flows utilizing market rates or the fair value of the underlying real estate collateral.

Mortgage servicing rights are valued using a discounted cash flow model. The model incorporates assumptions for servicing revenues, which are adjusted for expected prepayments, delinquency rates, escrow deposit income and (2) estimated loan servicing expenses. The discount rates incorporated into the model are determined based on the estimated returns a market participant would require for this business plus a liquidity and risk premium. This estimate includes available relevant data from any active market sales of mortgage servicing rights.

(3) For cost method impairments, the methodologies utilized are primarily discounted cash flow and, where appropriate, valuations provided by the general partners taking into consideration investment-related expenses.

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Fair Value Option

The fair value option allows the Company to elect fair value as an alternative measurement for selected financial assets and financial liabilities not otherwise reported at fair value. Such elections have been made by the Company to help mitigate volatility in earnings that result from different measurement attributes. Electing the fair value option also allows the Company to achieve consistent accounting for certain assets and liabilities. Changes in fair value are reflected in “Realized investment gains (losses), net” for commercial mortgage and other loans and “Other income” for other long-term investments and notes issued by consolidated VIEs. Changes in fair value due to instrument-specific credit risk are estimated using changes in credit spreads and quality ratings for the period reported. Interest income on commercial mortgage and other loans is included in “Net investment income.” Interest income on these loans is recorded based on the effective interest rates as determined at the closing of the loan.

The following tables present information regarding assets and liabilities where the fair value option has been elected.

	Year Ended December 31,		
	2017	2016	2015
	(in millions)		
Assets:			
Commercial mortgage and other loans:			
Changes in instrument-specific credit risk	\$ 0	\$ 0	\$ 0
Other changes in fair value	\$ 0	\$ 0	\$ 0
Other long-term investments:			
Changes in fair value	\$ 147	\$ 58	\$ 2
Liabilities:			
Notes issued by consolidated VIEs:			
Changes in fair value	\$ 4	\$ 37	\$ (434)

	Year Ended December 31,		
	2017	2016	2015
	(in millions)		
Commercial mortgage and other loans:			
Interest income	\$ 13	\$ 10	\$ 11
Notes issued by consolidated VIEs:			
Interest expense	\$ 75	\$ 120	\$ 351

	Year Ended December 31,	
	2017	2016
	(in millions)	
Commercial mortgage and other loans(1):		
Fair value as of period end	\$ 593	\$ 519
Aggregate contractual principal as of period end	\$ 582	\$ 508
Other long-term investments:		
Fair value as of period end	\$ 1,945	\$ 1,556
Notes issued by consolidated VIEs:		
Fair value as of period end	\$ 1,196	\$ 1,839
Aggregate contractual principal as of period end	\$ 1,233	\$ 1,886

(1) As of December 31, 2017, for loans for which the fair value option has been elected, there were no loans in non-accrual status and none of the loans were more than 90 days past due and still accruing.

Fair Value of Financial Instruments

Notes issued by consolidated VIEs(5)	0	0	311	311	311
Other liabilities	0	6,540	696	7,236	7,236
Separate account liabilities—investment contracts	0	71,010	27,578	98,588	98,588
Total liabilities	\$1,267	\$147,924	\$90,007	\$239,198	\$236,967

Other long-term investments excluded from the fair value hierarchy include certain hedge funds, private equity funds and other funds for which fair value is measured at NAV per share (or its equivalent) as a practical expedient. At December 31, 2017 and 2016, the fair values of these cost method investments were \$1,795 million and \$1,514 million, respectively. The carrying value of these investments were \$1,571 million and \$1,478 million as of December 31, 2017 and 2016, respectively.

Carrying values presented herein differ from those in the Company's Consolidated Statements of Financial Position because certain items within the respective financial statement captions are not considered financial instruments or out of scope under authoritative guidance relating to disclosures of the fair value of financial instruments. Financial statement captions excluded from the above table are not considered financial instruments.

As of December 31, 2017, excludes notes with fair value and carrying amount of \$4,913 million and \$4,627 million, respectively. As of December 31, 2016, excludes notes with both fair value and carrying amount of \$4,403 million. These amounts have been offset with the associated payables under a netting agreement.

As of December 31, 2017, includes notes with fair value and carrying amount of \$7,577 million and \$7,287 million, respectively. As of December 31, 2016, includes notes with both fair value and carrying amount of \$5,859 million. These amounts have been offset with the associated receivables under a netting agreement.

(5) The amount as of December 31, 2016 was added to the table to correct the previously reported amounts.

The fair values presented above have been determined by using available market information and by applying market valuation methodologies, as described in more detail below.

Fixed Maturities, Held-to-Maturity

The fair values of public fixed maturity securities are generally based on prices from third-party pricing services, which are reviewed for reasonableness; however, for certain public fixed maturity securities and investments in private placement fixed maturity securities, this information is either not available or not reliable. For these public fixed maturity securities, the fair value is based on indicative broker quotes, if available, or determined using a discounted cash flow model or other internally-developed models. For private fixed maturities, fair value is determined using a discounted cash flow model. In determining the fair value of certain fixed maturity securities, the discounted cash flow model may also use unobservable inputs, which reflect the Company's own assumptions about the inputs market participants would use in pricing the security.

Commercial Mortgage and Other Loans

272

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

The fair value of most commercial mortgage loans is based upon the present value of the expected future cash flows discounted at the appropriate U.S. Treasury rate or foreign government bond rate (for non-U.S. dollar-denominated loans) plus an appropriate credit spread for loans of similar quality, average life and currency. The quality ratings for these loans, a primary determinant of the credit spreads and a significant component of the pricing process, are based on an internally-developed methodology. Certain commercial mortgage loans are valued incorporating other factors, including the terms of the loans, the principal exit strategies for the loans, prevailing interest rates and credit risk.

Policy Loans

The Company's valuation technique for policy loans is to discount cash flows at the current policy loan coupon rate. Policy loans are fully collateralized by the cash surrender value of underlying insurance policies. As a result, the carrying value of the policy loans approximates the fair value.

Short-Term Investments, Cash and Cash Equivalents, Accrued Investment Income and Other Assets

The Company believes that due to the short-term nature of certain assets, the carrying value approximates fair value. These assets include: certain short-term investments which are not securities, are recorded at amortized cost and include quality loans; cash and cash equivalent instruments; accrued investment income; and other assets that meet the definition of financial instruments, including receivables, such as reinsurance recoverables, unsettled trades, accounts receivable and restricted cash.

Policyholders' Account Balances—Investment Contracts

Only the portion of policyholders' account balances related to products that are investment contracts (those without significant mortality or morbidity risk) are reflected in the table above. For fixed deferred annuities, single premium endowments, payout annuities and other similar contracts without life contingencies, fair values are generally derived using discounted projected cash flows based on interest rates that are representative of the Company's financial strength ratings, and hence reflect the Company's NPR. For guaranteed investment contracts, funding agreements, structured settlements without life contingencies and other similar products, fair values are generally derived using discounted projected cash flows based on interest rates being offered for similar contracts with maturities consistent with those of the contracts being valued. For those balances that can be withdrawn by the customer at any time without prior notice or penalty, the fair value is the amount estimated to be payable to the customer as of the reporting date, which is generally the carrying value. For defined contribution and defined benefit contracts and certain other products, the fair value is the market value of the assets supporting the liabilities.

Securities Sold Under Agreements to Repurchase

The Company receives collateral for selling securities under agreements to repurchase, or pledges collateral under agreements to resell. Repurchase and resale agreements are also generally short-term in nature and, therefore, the carrying amounts of these instruments approximate fair value.

Cash Collateral for Loaned Securities

Cash collateral for loaned securities represents the collateral received or paid in connection with loaning or borrowing securities, similar to the securities sold under agreement to repurchase above. Due to the short-term nature of these transactions, the carrying value approximates fair value.

Debt

The fair value of short-term and long-term debt, as well as notes issued by consolidated VIEs, is generally determined by either prices obtained from independent pricing services, which are validated by the Company, or discounted cash flow models. With the exception of the notes issued by consolidated VIEs for which recourse is limited to the assets of the respective VIE and does not extend to the general credit of the Company, the fair values of these instruments consider the Company's NPR. Discounted cash flow models predominately use market observable inputs such as the borrowing rates currently available to the Company for debt and financial instruments with similar terms and remaining maturities. For commercial paper issuances and other debt with a maturity of less than 90 days, the carrying value approximates fair value.

Other Liabilities

273

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Other liabilities are primarily payables, such as reinsurance payables, unsettled trades, drafts and accrued expense payables. Due to the short-term until settlement of most of these liabilities, the Company believes that carrying value approximates fair value.

Separate Account Liabilities—Investment Contracts

Only the portion of separate account liabilities related to products that are investment contracts are reflected in the table above. Separate account liabilities are recorded at the amount credited to the contractholder, which reflects the change in fair value of the corresponding separate account assets including contractholder deposits less withdrawals and fees; therefore, carrying value approximates fair value.

21. DERIVATIVE INSTRUMENTS

Types of Derivative Instruments and Derivative Strategies

Interest Rate Contracts

Interest rate swaps, options and futures are used by the Company to reduce risks from changes in interest rates, manage interest rate exposures arising from mismatches between assets and liabilities and to hedge against changes in their values it owns or anticipates acquiring or selling.

Swaps may be attributed to specific assets or liabilities or to a portfolio of assets or liabilities. Under interest rate swaps, the Company agrees with counterparties to exchange, at specified intervals, the difference between fixed-rate and floating-rate interest amounts calculated by reference to an agreed upon notional principal amount.

The Company also uses interest rate swaptions, caps, and floors to manage interest rate risk. A swaption is an option to enter into a swap with a forward starting effective date. The Company pays a premium for purchased swaptions and receives a premium for written swaptions. In an interest rate cap, the buyer receives payments at the end of each period in which the interest rate exceeds the agreed strike price. Similarly, in an interest rate floor, the buyer receives payments at the end of each period in which the interest rate is below the agreed strike price. Swaptions, caps and floors are included in interest rate options.

In standardized exchange-traded interest rate futures transactions, the Company purchases or sells a specified number of contracts, the values of which are determined by the daily market values of underlying referenced investments. The Company enters into exchange-traded futures with regulated futures commission's merchants who are members of a trading exchange.

Equity Contracts

Equity options, total return swaps, and futures are used by the Company to manage its exposure to the equity markets which impacts the value of assets and liabilities it owns or anticipates acquiring or selling.

Equity index options are contracts which will settle in cash based on differentials in the underlying indices at the time of exercise and the strike price. The Company uses combinations of purchases and sales of equity index options to hedge the effects of adverse changes in equity indices within a predetermined range.

Total return swaps are contracts whereby the Company agrees with counterparties to exchange, at specified intervals, the difference between the return on an asset (or market index) and LIBOR plus an associated funding spread based on a notional amount. The Company generally uses total return swaps to hedge the effect of adverse changes in equity indices.

In standardized exchange-traded equity futures transactions, the Company purchases or sells a specified number of contracts, the values of which are determined by the daily market values of underlying referenced equity indices. The Company enters into exchange-traded futures with regulated futures commission's merchants who are members of a trading exchange.

Foreign Exchange Contracts

Currency derivatives, including currency futures, options, forwards and swaps, are used by the Company to reduce risks from changes in currency exchange rates with respect to investments denominated in foreign currencies that the Company either holds or intends to acquire or sell, and to hedge the currency risk associated with net investments in foreign operations and anticipated earnings of its foreign operations.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Under currency forwards, the Company agrees with counterparties to deliver a specified amount of an identified currency at a specified future date. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at the specified future date. As noted above, the Company uses currency forwards to mitigate the impact of changes in currency exchange rates on U.S. dollar-equivalent earnings generated by certain of its non-U.S. businesses, primarily its international insurance and investment operations. The Company executes forward sales of the hedged currency in exchange for U.S. dollars at a specified exchange rate. The maturities of these forwards correspond with the future periods in which the non-U.S. dollar-denominated earnings are expected to be generated.

Under currency swaps, the Company agrees with counterparties to exchange, at specified intervals, the difference between one currency and another at an exchange rate and calculated by reference to an agreed principal amount. Generally, the principal amount of each currency is exchanged at the beginning and termination of the currency swap by each party.

Credit Contracts

The Company writes credit default swaps to gain exposure similar to investment in public fixed maturity cash instruments. With these derivatives the Company sells credit protection on a single name reference, or certain index reference, and in return receives a quarterly premium. This premium or credit spread generally corresponds to the difference between the yield on the referenced names (or an index's referenced names) public fixed maturity cash instruments and swap rates, at the time the agreement is executed. If there is an event of default by the referenced name or one of the referenced names in the index, as defined by the agreement, then the Company is obligated to pay the referenced amount of the contract to the counterparty and receive in return the referenced defaulted security or similar security or (in the case of a credit default index) pay the referenced amount less the auction recovery rate. See credit derivatives written section for further discussion of guarantees. In addition to selling credit protection, the Company has purchased credit protection using credit derivatives in order to hedge specific credit exposures in the Company's investment portfolio.

Other Contracts

TBAs. The Company uses TBA forward contracts to gain exposure to the investment risk and return of mortgage-backed securities. TBA transactions can help the Company enhance the return on its investment portfolio, and can provide a more liquid and cost effective method of achieving these goals than purchasing or selling individual mortgage-backed pools. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at a specified future date. Additionally, pursuant to the Company's mortgage dollar roll program, TBAs or mortgage-backed securities are transferred to counterparties with a corresponding agreement to repurchase them at a future date. These transactions do not qualify as secured borrowings and are accounted for as derivatives.

Loan Commitments. In its mortgage operations, the Company enters into commitments to fund commercial mortgage loans at specified interest rates and other applicable terms within specified periods of time. These commitments are legally binding agreements to extend credit to a counterparty. Loan commitments for loans that will be held for sale are recognized as derivatives and recorded at fair value. The determination of the fair value of loan commitments accounted for as derivatives considers various factors including, among others, terms of the related loan, the intended exit strategy for the loans based upon either securitization valuation models or investor purchase commitments, prevailing interest rates, origination income or expense, and the value of service rights. Loan commitments that relate to the origination of mortgage loans that will be held for investment are not accounted for as derivatives and accordingly are not recognized in the Company's financial statements. See Note 23 for additional information.

Embedded Derivatives. The Company sells variable annuity products, which may include guaranteed benefit features that are accounted for as embedded derivatives. These embedded derivatives are marked to market through “Realized investment gains (losses), net” based on the change in value of the underlying contractual guarantees, which are determined using valuation models. The Company maintains a portfolio of derivative instruments that is intended to offset certain risks related to the above products’ features. The derivatives may include, but are not limited to equity options, total return swaps, interest rate swaptions, caps, floors and other instruments.

Synthetic Guarantees. The Company sells synthetic Guaranteed Investment Contracts (“GICs”), through both full service and investment-only sales channels, to investment vehicles primarily used by qualified defined contribution pension plans. The synthetic GICs are issued in respect of assets that are owned by the trustees of such plans, who invest the assets according to the contract terms agreed to with the Company. The contracts establish participant balances and credit interest thereon. The participant balances are supported by the underlying assets. In connection with certain participant-initiated withdrawals, the contract guarantees that after all underlying assets are liquidated, any remaining participant balances will be paid by the Company. Under U.S. GAAP, these contracts are accounted for as derivatives and recorded at fair value.

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Primary Risks Managed by Derivatives

The table below provides a summary of the gross notional amount and fair value of derivatives contracts by the primary underlying risks, excluding embedded derivatives and associated reinsurance recoverables. Many derivative instruments contain multiple underlyings. The fair value amounts below represent the gross fair value of derivative contracts prior to taking into account the netting effects of master netting agreements, cash collateral and NPR. This netting impact results in total derivative assets of \$1,205 million and \$1,367 million as of December 31, 2017 and 2016, respectively, and total derivative liabilities of \$643 million and \$345 million as of December 31, 2017 and 2016, respectively, reflected in the Consolidated Statements of Financial Position.

Excludes embedded derivatives and associated reinsurance recoverables which contain multiple underlyings. The (1) fair value of these embedded derivatives was a net liability of \$8,748 million and \$8,252 million as of December 31, 2017, and 2016, respectively, primarily included in "Future policy benefits."

276

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Most of the Company's derivatives do not qualify for hedge accounting for various reasons. For example: (i) derivatives that economically hedge embedded derivatives do not qualify for hedge accounting because changes in the fair value of the embedded derivatives are already recorded in net income; (ii) derivatives that are utilized as macro hedges of the Company's exposure to various risks typically do not qualify for hedge accounting because they do not meet the criteria required under portfolio hedge accounting rules; and (iii) synthetic GICs, which are product standalone derivatives, do not qualify as hedging instruments under hedge accounting rules.

Offsetting Assets and Liabilities

The following table presents recognized derivative instruments (excluding embedded derivatives and associated reinsurance recoverables), and repurchase and reverse repurchase agreements that are offset in the Consolidated Statements of Financial Position, and/or are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset in the Consolidated Statements of Financial Position.

	December 31, 2017

Total Assets	\$14,003	\$ (11,716)	\$ 2,287	\$ (1,415)	\$ 872

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-K

Offsetting of Financial Liabilities:

Derivatives(1)	\$6,281	\$ (5,945) \$ 336	\$ (299) \$ 37
Securities sold under agreement to repurchase	7,606	0	7,606	(7,606) 0
Total Liabilities	\$13,887	\$ (5,945) \$ 7,942	\$ (7,905) \$ 37

(1) Amounts exclude the excess of collateral received/pledged from/to the counterparty.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

For information regarding the rights of offset associated with the derivative assets and liabilities in the table above, see “—Counterparty Credit Risk” below. For securities purchased under agreements to resell and securities sold under agreements to repurchase, the Company monitors the value of the securities and maintains collateral, as appropriate, to protect against credit exposure. Where the Company has entered into repurchase and resale agreements with the same counterparty, in the event of default, the Company would generally be permitted to exercise rights of offset. See Note 2 for additional information.

Cash Flow, Fair Value and Net Investment Hedges

The primary derivative instruments used by the Company in its fair value, cash flow and net investment hedge accounting relationships are interest rate swaps, currency swaps and currency forwards. These instruments are only designated for hedge accounting in instances where the appropriate criteria are met. The Company does not use futures, options, credit, equity or embedded derivatives in any of its fair value, cash flow or net investment hedge accounting relationships.

The following table provides the financial statement classification and impact of derivatives used in qualifying and non-qualifying hedge relationships, excluding the offset of the hedged item in an effective hedge relationship.

(1) Amounts deferred in AOCI.

(2) Relates to the sale of equity method investments.

For the years ended December 31, 2017, 2016, and 2015, the ineffective portion of derivatives accounted for using hedge accounting were de minimis to the Company's results of operations. Also, there were no material amounts reclassified into earnings relating to instances in which the Company discontinued cash flow hedge accounting because the forecasted transaction did not occur by the anticipated date or within the additional time period permitted by the authoritative guidance for the accounting for derivatives and hedging. In addition, there were no instances in which the Company discontinued fair value hedge accounting due to a hedged firm commitment no longer qualifying as a fair value hedge.

Presented below is a rollforward of current period cash flow hedges in AOCI before taxes:

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

	(in millions)
Balance, December 31, 2014	\$ 206
Net deferred gains (losses) on cash flow hedges from January 1 to December 31, 2015	1,199
Amount reclassified into current period earnings	(240)
Balance, December 31, 2015	1,165
Net deferred gains (losses) on cash flow hedges from January 1 to December 31, 2016	602
Amount reclassified into current period earnings	(451)
Balance, December 31, 2016	1,316
Net deferred gains (losses) on cash flow hedges from January 1 to December 31, 2017	(1,373)
Amount reclassified into current period earnings	18
Balance, December 31, 2017	\$ (39)

The changes in fair value of cash flow hedges are deferred in AOCI and are included in “Net unrealized investment gains (losses)” in the Consolidated Statements of Comprehensive Income; these amounts are then reclassified to earnings when the hedged item affects earnings. Using December 31, 2017 values, it is estimated that a pre-tax gain of approximately \$157 million will be reclassified from AOCI to earnings during the subsequent twelve months ending December 31, 2018, offset by amounts pertaining to the hedged items.

The Company’s exposure from the qualified cash flow hedges reflect variability of future cash flows in foreign currency amounts related to both the forecasted transactions and the receipt or payment of interest on existing financial instruments; as of December 31, 2017, the maximum length of time over which these cash flow hedges are outstanding were 5 years and 40 years, respectively.

For effective net investment hedges, the amounts, before applicable taxes, recorded in the cumulative translation adjustment account within AOCI were \$526 million in 2017, \$536 million in 2016, and \$541 million in 2015, respectively.

Credit Derivatives

Credit derivatives, where the Company has written credit protection on a single name reference, had outstanding notional amounts of \$114 million and \$112 million as of December 31, 2017 and 2016, respectively. These credit derivatives are reported at fair value as an asset of \$2 million and an asset of less than \$1 million, as of December 31, 2017 and 2016, respectively. As of December 31, 2017, the notional amount of these credit derivatives had the following NAIC ratings: \$36 million in NAIC 1; \$62 million in NAIC 2; \$5 million in NAIC 3; \$2 million in NAIC 4; \$5 million in NAIC 5 and \$4 million in NAIC 6. The Company has also written credit protection on certain index references with notional amounts of \$1,022 million and \$50 million, reported at fair value as an asset of \$18 million and fair value as a liability of less than \$1 million as of December 31, 2017 and 2016, respectively. As of December 31, 2017, the notional amount of these credit derivatives had the following NAIC ratings: \$52 million in NAIC 1; and \$970 million in NAIC 4. NAIC designations are based on the lowest rated single name reference included in the index.

The Company’s maximum amount at risk under these credit derivatives equals the aforementioned notional amounts and assumes the value of the underlying referenced securities become worthless. These single name credit derivatives have maturities of less than 3 years, while the credit protection on the index references have maturities of less than 30 years. This excludes a credit derivative related to surplus notes issued by a subsidiary of Prudential Insurance.

The Company had a credit derivative that required the Company to make certain payments in the event of deterioration in the value of the surplus notes issued by a subsidiary of Prudential Insurance. A \$12 million payment was made to terminate the credit derivative in September 2017. As of December 31, 2017 and 2016, the outstanding notional amount of this credit derivative was \$0 million and \$500 million, reported at fair value as a liability of \$0 million and \$17 million, respectively. No collateral was pledged in either period.

In addition to writing credit protection, the Company has purchased credit protection using credit derivatives in order to hedge specific credit exposures in the Company's investment portfolio. As of December 31, 2017 and 2016, the Company had \$178 million and \$256 million of outstanding notional amounts, reported at fair value as a liability of \$5 million and \$8 million, respectively.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Counterparty Credit Risk

The Company is exposed to credit-related losses in the event of non-performance by counterparties to financial derivative transactions with a positive fair value. The Company manages credit risk by: (i) entering into derivative transactions with highly rated major international financial institutions and other creditworthy counterparties governed by master netting agreements, as applicable; (ii) trading through a central clearing and OTC; (iii) obtaining collateral, such as cash and securities, when appropriate; and (iv) setting limits on single party credit exposures which are subject to periodic management review.

Substantially all of the Company's derivative agreements have zero thresholds which require daily full collateralization by the party in a liability position. In addition, certain of the Company's derivative agreements contain credit-risk related contingent features; if the credit rating of one of the parties to the derivative agreement is to fall below a certain level, the party with positive fair value could request termination at the then fair value or demand immediate full collateralization from the party whose credit rating fell and is in a net liability position.

As of December 31, 2017, there were no net liability derivative positions with counterparties with credit risk-related contingent features; as such, all derivatives have been appropriately collateralized by the Company or the counterparty in accordance with the terms of the derivative agreements.

22. SEGMENT INFORMATION

Segments

Effective in the fourth quarter of 2017, the Company implemented a new organizational structure for the U.S. businesses, which retains our existing reportable segments but realigns them under new divisions. The Company now operates through five divisions, which together encompass seven reportable segments, and its Corporate and Other operations.

U.S. Individual Solutions division. The U.S. Individual Solutions division consists of the Individual Annuities and Individual Life segments. The Individual Annuities segment manufactures and distributes individual variable and fixed annuity products, primarily to the U.S. mass affluent and affluent markets. The Individual Life segment manufactures and distributes individual variable life, term life and universal life insurance products primarily to the U.S. mass middle, mass affluent and affluent markets.

U.S. Workplace Solutions division. The U.S. Workplace Solutions division consists of the Retirement and Group Insurance segments. The Retirement segment manufactures and distributes products and provides administrative services for qualified and non-qualified retirement plans and offers innovative pension risk transfer solutions, investment-only stable value products, guaranteed investment contracts, funding agreements, institutional and retail notes, structured settlement annuities and other group annuities. The Group Insurance segment manufactures and distributes a full range of group life, long-term and short-term group disability, and group corporate-, bank- and trust-owned life insurance in the U.S., primarily to institutional clients for use in connection with employee plans and affinity groups.

Investment Management division. The Investment Management division consists of the Investment Management segment, which provides a broad array of investment management and advisory services by means of institutional portfolio management, mutual funds, asset securitization activity and other structured products, and strategic investments. These products and services are provided to the public and private marketplace and to other segments of

the Company.

International Insurance division. The International Insurance division consists of the International Insurance segment, which manufactures and distributes individual life insurance, retirement and related products to the mass affluent and affluent markets in Japan, Korea and other foreign countries through its Life Planner operations. In addition, similar products are offered to the broad middle income market across Japan through Life Consultants, the proprietary distribution channel of the Company's Gibraltar Life operation, as well as other channels, including banks and independent agencies.

Closed Block division. The Closed Block division includes certain in force participating insurance and annuity products and corresponding assets that are used for the payment of benefits, expenses and policyholders' dividends related to these products, as well as certain related assets and liabilities. In connection with demutualization, the Company ceased offering these participating products. The Closed Block division is accounted for as a divested business that is reported separately from the divested businesses that are included in the Company's Corporate and Other operations. See Note 12 for additional information on the Closed Block.

282

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Corporate and Other. Corporate and Other includes corporate items and initiatives that are not allocated to business segments, and divested businesses. Corporate operations consist primarily of: (1) capital that is not deployed in any business segment; (2) investments not allocated to business segments, including debt-financed investment portfolios, as well as tax credit investments and other tax-enhanced investments financed by business segments; (3) capital debt that is used or will be used to meet the capital requirements of the Company and the related interest expense; (4) the Company’s qualified pension and other employee benefit plans, after allocations to business segments; (5) corporate-level activities, after allocations to business segments, including strategic expenditures, corporate governance, corporate advertising, philanthropic activities, deferred compensation, and costs related to certain contingencies and enhanced regulatory supervision; (6) certain retained obligations relating to pre-demutualization policyholders; (7) a life insurance joint venture and an asset management joint venture in China; (8) the Company’s Capital Protection Framework; (9) the foreign currency income hedging program used to hedge certain non-U.S. dollar-denominated earnings in our International Insurance segment; (10) the impact of intercompany arrangements with our Retirement and Investment Management segments to translate certain non-U.S. dollar-denominated earnings at fixed currency exchange rates; and (11) transactions with and between other segments, including the elimination of intercompany transactions for consolidation purposes.

Segment Accounting Policies. The accounting policies of the segments are the same as those described in Note 2. Results for each segment include earnings on attributed equity established at a level which management considers necessary to support each segment’s risks. Operating expenses specifically identifiable to a particular segment are allocated to that segment as incurred. Operating expenses not identifiable to a specific segment that are incurred in connection with the generation of segment revenues are generally allocated based upon the segment’s historical percentage of general and administrative expenses.

For information related to significant acquisitions, see Note 3. For information related to the adoption of new accounting pronouncements, see Note 2. The segments’ results in prior years have been revised for these items, as applicable, to conform to the current year presentation.

Adjusted Operating Income

The Company analyzes the operating performance of each segment using “adjusted operating income.” Adjusted operating income does not equate to “Income (loss) before income taxes and equity in earnings of operating joint ventures” or “Net income (loss)” as determined in accordance with U.S. GAAP but is the measure of segment profit or loss used by the Company’s chief operating decision maker to evaluate segment performance and allocate resources and, consistent with authoritative guidance, is the measure of segment performance presented below. Adjusted operating income is calculated by adjusting each segment’s “Income (loss) before income taxes and equity in earnings of operating joint ventures” for the following items, which are described in greater detail below:

- realized investment gains (losses), net, and related adjustments and charges;
- net investment gains (losses) on trading account assets supporting insurance liabilities and changes in experience-rated contractholder liabilities due to asset value changes;
- divested businesses; and
- equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests.

These items are important to an understanding of overall results of operations. Adjusted operating income is not a substitute for income determined in accordance with U.S. GAAP, and the Company’s definition of adjusted operating income may differ from that used by other companies. However, the Company believes that the presentation of adjusted operating income as measured for management purposes enhances the understanding of results of operations by highlighting the results from ongoing operations and the underlying profitability factors of its businesses.

As discussed in Note 1, during 2016, the Company recorded certain out of period adjustments. These adjustments resulted in a decrease in pre-tax adjusted operating income of \$114 million for the year ended December 31, 2016, principally consisting of a net decrease of \$153 million for the Individual Life Insurance segment. Management evaluated the adjustments, both individually and in the aggregate, and concluded that they were not material to any previously reported quarterly or annual financial statements.

Realized investment gains (losses), net, and related charges and adjustments

Realized investment gains (losses), net

283

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Adjusted operating income excludes “Realized investment gains (losses), net,” except for certain items described below. Significant activity excluded from adjusted operating income includes impairments and credit-related gains (losses) from sales of securities, the timing of which depends largely on market credit cycles and can vary considerably across periods, and interest rate-related gains (losses) from sales of securities, which are largely subject to the Company’s discretion and influenced by market opportunities, as well as the Company’s tax and capital profile. Additionally, adjusted operating income generally excludes realized investment gains (losses) from products that contain embedded derivatives, and from associated derivative portfolios that are part of an asset/liability management program related to the risk of those products. However, the effectiveness of the hedging program will ultimately be reflected in adjusted operating income over time. Trends in the underlying profitability of the Company’s businesses can be more clearly identified without the fluctuating effects of these transactions.

The following table sets forth the significant components of “Realized investment gains (losses), net” that are included in adjusted operating income and, as a result, are reflected as adjustments to “Realized investment gains (losses), net” for purposes of calculating adjusted operating income:

Year Ended December 31,
2017 2016 2015

(in millions)

Net gains (losses) from(1):

Terminated hedges of foreign currency earnings	\$ (15)	\$ 39	\$ 284
Current period yield adjustments	\$ 434	\$ 466	\$ 475
Principal source of earnings	\$ (8)	\$ 74	\$ 123

In addition to the items in the table above, “Realized investment gains (losses), net, and related charges and (1) adjustments” also includes an adjustment to reflect “Realized investment gains (losses), net” related to divested businesses as results of “Divested businesses,” discussed below.

Terminated Hedges of Foreign Currency Earnings. The amounts shown in the table above primarily reflect the impact of an intercompany arrangement between Corporate and Other operations and the International Insurance segment, pursuant to which the non-U.S. dollar-denominated earnings in all countries for a particular year, including its interim reporting periods, are translated at fixed currency exchange rates. The fixed rates are determined in connection with a currency hedging program designed to mitigate the risk that unfavorable rate changes will reduce the segment’s U.S. dollar-equivalent earnings. Pursuant to this program, the Company’s Corporate and Other operations may execute forward currency contracts with third parties to sell the net exposure of projected earnings from the hedged currency in exchange for U.S. dollars at a specified exchange rate. The maturities of these contracts correspond with the future periods in which the identified non-U.S. dollar-denominated earnings are expected to be generated. These contracts do not qualify for hedge accounting under U.S. GAAP, so the resulting profits or losses are recorded in “Realized investment gains (losses), net.” When the contracts are terminated in the same period that the expected earnings emerge, the resulting positive or negative cash flow effect is included in adjusted operating income.

Current Period Yield Adjustments. The Company uses interest rate and currency swaps and other derivatives to manage interest and currency exchange rate exposures arising from mismatches between assets and liabilities, including duration mismatches. For derivative contracts that do not qualify for hedge accounting treatment, the periodic swap settlements, as well as certain other derivative related yield adjustments are recorded in “Realized investment gains (losses), net,” and are included in adjusted operating income to reflect the after-hedge yield of the underlying instruments. In certain instances, when these derivative contracts are terminated or offset before their final

maturity, the resulting realized gains or losses are recognized in adjusted operating income over periods that generally approximate the expected terms of the derivatives or underlying instruments in order for adjusted operating income to reflect the after-hedge yield of the underlying instruments. Included in the amounts shown in the table above are gains on certain derivative contracts that were terminated or offset before their final maturity of \$53 million, \$49 million and \$55 million for the years ended 2017, 2016 and 2015, respectively. As of December 31, 2017, there was a \$80 million deferred net gain related to certain derivative contracts that were terminated or offset before their final maturity, primarily in the International Insurance segment. Also included in the amounts shown in the table above are fees related to synthetic GICs of \$159 million, \$158 million and \$158 million for the years ended 2017, 2016 and 2015, respectively. Synthetic GICs are accounted for as derivatives under U.S. GAAP and, therefore, these fees are recorded in "Realized investment gains (losses), net." See Note 21 for additional information on synthetic GICs.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Principal Source of Earnings. The Company conducts certain activities for which realized investment gains (losses) are a principal source of earnings for its businesses and are therefore included in adjusted operating income, particularly within the Company's Investment Management segment. For example, Investment Management's strategic investing business makes investments for sale or syndication to other investors or for placement or co-investment in the Company's managed funds and structured products. The realized investment gains (losses) associated with the sale of these strategic investments, as well as the majority of derivative results, are a principal activity for this business and included in adjusted operating income. In addition, the realized investment gains (losses) associated with loans originated by the Company's commercial mortgage operations, as well as related derivative results and retained mortgage servicing rights, are a principal activity for this business and are therefore included in adjusted operating income.

Adjustments related to Realized investment gains (losses), net

The following table sets forth certain other items excluded from adjusted operating income and reflected as an adjustment to "Realized investment gains (losses), net" for purposes of calculating adjusted operating income:

	Year Ended		
	December 31,		
	2017	2016	2015
	(in millions)		
Net gains (losses) from:			
Other trading account assets	\$184	\$(95)	\$(94)
Foreign currency exchange movements	\$(135)	\$(154)	\$69
Other activities	\$(20)	\$(18)	\$9

Other Trading Account Assets. The Company has certain investments in its general account portfolios that are classified as trading. These trading investments are carried at fair value and included in "Other trading account assets, at fair value" on the Company's Consolidated Statements of Financial Position. Realized and unrealized gains (losses) for these investments are recorded in "Other income." Consistent with the exclusion of realized investment gains (losses) with respect to other investments managed on a consistent basis, the net gains or losses on these investments are excluded from adjusted operating income.

Foreign Currency Exchange Movements. The Company has certain assets and liabilities for which, under U.S. GAAP, the changes in value, including those associated with changes in foreign currency exchange rates during the period, are recorded in "Other income." To the extent the foreign currency exposure on these assets and liabilities is economically hedged or considered part of the Company's capital funding strategies for its international subsidiaries, the change in value included in "Other income" is excluded from adjusted operating income. The insurance liabilities are supported by investments denominated in corresponding currencies, including a significant portion designated as available-for-sale. While these non-yen denominated assets and liabilities are economically hedged, unrealized gains (losses) on available-for-sale investments, including those arising from foreign currency exchange rate movements, are recorded in AOCI under U.S. GAAP, while the non-yen denominated liabilities are remeasured for foreign currency exchange rate movements, with the related change in value recorded in earnings within "Other income." Due to this non-economic volatility that has been reflected in U.S. GAAP earnings, the change in value recorded within "Other income" is excluded from adjusted operating income.

Other Activities. The Company excludes certain other items from adjusted operating income that are consistent with similar adjustments described above.

Charges related to realized investment gains (losses), net

Charges that relate to realized investment gains (losses) are also excluded from adjusted operating income, and include the following:

The portion of the amortization of DAC, VOBA, unearned revenue reserves and DSI for certain products that is related to net realized investment gains (losses).

Policyholder dividends and interest credited to policyholders' account balances that relate to certain life policies that pass back certain realized investment gains (losses) to the policyholder, and reserves for future policy benefits for certain policies that are affected by net realized investment gains (losses).

285

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Market value adjustments paid or received upon a contractholder's surrender of certain of the Company's annuity products as these amounts mitigate the net realized investment gains or losses incurred upon the disposition of the underlying invested assets.

Investment gains (losses) on trading account assets supporting insurance liabilities and changes in experience-rated contractholder liabilities due to asset value changes

Certain products included in the Retirement and International Insurance segments are experience-rated in that investment results associated with these products are expected to ultimately accrue to contractholders. The majority of investments supporting these experience-rated products are classified as trading and are carried at fair value, with realized and unrealized gains (losses) reported in "Other income." To a lesser extent, these experience-rated products are also supported by derivatives and commercial mortgage and other loans. The derivatives are carried at fair value, with realized and unrealized gains (losses) reported in "Realized investment gains (losses), net." The commercial mortgage and other loans are carried at unpaid principal, net of unamortized discounts and an allowance for losses, with gains (losses) on sales and changes in the valuation allowance for commercial mortgage and other loans reported in "Realized investment gains (losses), net."

Adjusted operating income excludes net investment gains (losses) on trading account assets supporting insurance liabilities, which is consistent with the exclusion of realized investment gains (losses) with respect to other investments supporting insurance liabilities managed on a consistent basis. In addition, to be consistent with the historical treatment of charges related to realized investment gains (losses) on investments, adjusted operating income also excludes the change in contractholder liabilities due to asset value changes in the pool of investments (including changes in the fair value of commercial mortgage and other loans) supporting these experience-rated contracts, which are reflected in "Interest credited to policyholders' account balances." These adjustments are in addition to the exclusion from adjusted operating income of net investment gains (losses) on the related derivatives and commercial mortgage and other loans through "Realized investment gains (losses), net, and related charges and adjustments," as discussed above. The result of this approach is that adjusted operating income for these products includes net fee revenue and interest spread the Company earns on these experience-rated contracts, and excludes changes in fair value of the pool of investments, both realized and unrealized, that are expected to ultimately accrue to the contractholders.

Divested businesses

The contribution to income (loss) of divested businesses that have been or will be sold or exited, including businesses that have been placed in wind down, but that did not qualify for "discontinued operations" accounting treatment under U.S. GAAP, are excluded from adjusted operating income as the results of divested businesses are not considered relevant to understanding the Company's ongoing operating results.

The Closed Block division, which is comprised of the Closed Block segment is accounted for as a divested business because it consists primarily of certain participating insurance and annuity products that the Company ceased selling at demutualization in 2001. See Note 12 for further information on the Closed Block.

Equity in earnings of operating joint ventures and earnings attributable to noncontrolling interests

Equity in earnings of operating joint ventures, on a pre-tax basis, are included in adjusted operating income as these results are a principal source of earnings. These earnings are reflected on a U.S. GAAP basis on an after-tax basis as a separate line on the Company's Consolidated Statements of Operations.

Earnings attributable to noncontrolling interests are excluded from adjusted operating income. Earnings attributable to noncontrolling interests represents the portion of earnings from consolidated entities that relates to the equity interests of minority investors, and are reflected on a U.S. GAAP basis as a separate line on the Company's Consolidated Statements of Operations.

Reconciliation of adjusted operating income and net income (loss)

The table below reconciles adjusted operating income before income taxes to income before income taxes and equity in earnings of operating joint ventures:

information.

Revenues, calculated in accordance with U.S. GAAP, for the years ended December 31, include the following associated with the Company's foreign and domestic operations:

291

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

	2017	2016	2015
	(in millions)		
Domestic operations	\$36,573	\$36,079	\$36,151
Foreign operations, total	\$23,116	\$22,700	\$20,968
Foreign operations, Japan	\$19,589	\$19,768	\$18,177
Foreign operations, Korea	\$1,567	\$1,439	\$1,462

Management has determined the intersegment revenues with reference to market rates. Intersegment revenues are eliminated in consolidation in Corporate and Other. The Investment Management segment revenues include intersegment revenues, primarily consisting of asset-based management and administration fees, for the years ended December 31, as follows:

	2017	2016	2015
	(in millions)		
Investment Management segment intersegment revenues	\$717	\$682	\$682

Segments may also enter into internal derivative contracts with other segments. For adjusted operating income, each segment accounts for the internal derivative results consistent with the manner in which that segment accounts for other similar external derivatives.

Certain services are provided under agreements between affiliates of Prudential Financial. Under one such agreement, certain domestic subsidiaries engaged certain foreign subsidiaries to perform services associated with managing assets, while certain other agreements among domestic and foreign affiliates related to corporate support services. For the period ending December 31, 2017, the domestic subsidiaries paid \$56 million to the foreign subsidiaries, while \$19 million was paid among certain foreign subsidiaries as a payment made in advance for services expected to be rendered and thus earned in the first quarter of 2018. These intercompany transactions are eliminated in the consolidated financial statements.

23. COMMITMENTS AND GUARANTEES, CONTINGENT LIABILITIES AND LITIGATION AND REGULATORY MATTERS

Leases

The Company occupies leased office space in many locations under various long-term leases and has entered into numerous leases covering the long-term use of computers and other equipment. Rental expense, net of sub-lease income, incurred for the years ended December 31, 2017, 2016 and 2015 was \$258 million, \$252 million and \$232 million, respectively.

The following table presents, at December 31, 2017, the Company's future minimum lease payments under non-cancelable operating and capital leases along with associated sub-lease income:

Operating and Capital Leases	Sub-lease Income
(in millions)	

Edgar Filing: PRUDENTIAL FINANCIAL INC - Form 10-K

2018	\$ 147	\$ 0
2019	123	0
2020	94	0
2021	80	0
2022	62	0
2023 and thereafter	138	0
Total	\$ 644	\$ 0

(1) Future minimum lease payments under capital leases were \$20 million as of December 31, 2017.

Occasionally, for business reasons, the Company may exit certain non-cancelable operating leases prior to their expiration. In these instances, the Company's policy is to accrue, at the time it ceases to use the property being leased, the future rental expense net of any expected sub-lease income, and to release this reserve over the remaining commitment period. Of the total non-cancelable operating and capital leases amounts listed above, \$2 million has been accrued as of December 31, 2017. There were no accruals of sub-lease income as of December 31, 2017.

292

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Commercial Mortgage Loan Commitments

	December 31,	
	2017	2016
	(in millions)	
Total outstanding mortgage loan commitments	\$2,772	\$1,984
Portion of commitment where prearrangement to sell to investor exists	\$435	\$454

In connection with the Company's commercial mortgage operations, it originates commercial mortgage loans. Commitments for loans that will be held for sale are recognized as derivatives and recorded at fair value. In certain of these transactions, the Company pre-arranges that it will sell the loan to an investor, including to government sponsored entities as discussed below, after the Company funds the loan.

Commitments to Purchase Investments (excluding Commercial Mortgage Loans)

	December 31,	
	2017	2016
	(in millions)	
Expected to be funded from the general account and other operations outside the separate accounts(1)	\$6,319	\$7,232
Expected to be funded from separate accounts(1)	\$141	\$470

(1)The amounts at December 31, 2016 have been revised to correct the previously reported amounts.

The Company has other commitments to purchase or fund investments, some of which are contingent upon events or circumstances not under the Company's control, including those at the discretion of the Company's counterparties. The Company anticipates a portion of these commitments will ultimately be funded from its separate accounts.

Indemnification of Securities Lending Transactions

	December 31,	
	2017	2016
	(in millions)	
Indemnification provided to certain securities lending clients	\$4,619	\$5,352
Fair value of related collateral associated with above indemnifications	\$4,722	\$5,465
Accrued liability associated with guarantee	\$0	\$0

In the normal course of business, the Company may facilitate securities lending transactions on behalf of certain client accounts (collectively, "the accounts") for which the Company is also the investment advisor and/or the asset manager. In certain of these arrangements, the Company has provided an indemnification to the accounts to hold them harmless against losses caused by counterparty (i.e., borrower) defaults associated with the securities lending activity facilitated by the Company. Collateral is provided by the counterparty to the accounts at the inception of the loan equal to or greater than 102% of the fair value of the loaned securities and the collateral is maintained daily at 102% or greater of the fair value of the loaned securities. The Company is only at risk if the counterparty to the securities lending

transaction defaults and the value of the collateral held is less than the value of the securities loaned to such counterparty. The Company believes the possibility of any payments under these indemnities is remote.

Credit Derivatives Written

As discussed further in Note 21, the Company writes credit derivatives under which the Company is obligated to pay the counterparty the referenced amount of the contract and receive in return the defaulted security or similar security.

Guarantees of Asset Values

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

December 31,
2017 2016

(in millions)

Guaranteed value of third parties' assets	\$77,290	\$77,197
Fair value of collateral supporting these assets	\$77,651	\$77,760
Asset (liability) associated with guarantee, carried at fair value	\$(1)	\$5

Certain contracts underwritten by the Retirement segment include guarantees related to financial assets owned by the guaranteed party. These contracts are accounted for as derivatives and carried at fair value. The collateral supporting these guarantees is not reflected on the Consolidated Statements of Financial Position.

Indemnification of Serviced Mortgage Loans

December 31,
2017 2016

(in millions)

Maximum exposure under indemnification agreements for mortgage loans serviced by the Company	\$1,609	\$1,371
First-loss exposure portion of above	\$483	\$416
Accrued liability associated with guarantees	\$14	\$13

As part of the commercial mortgage activities of the Company's Investment Management segment, the Company provides commercial mortgage origination, underwriting and servicing for certain government sponsored entities, such as Fannie Mae and Freddie Mac. The Company has agreed to indemnify the government sponsored entities for a portion of the credit risk associated with certain of the mortgages it services through a delegated authority arrangement. Under these arrangements, the Company originates multi-family mortgages for sale to the government sponsored entities based on underwriting standards they specify, and makes payments to them for a specified percentage share of losses they incur on certain loans serviced by the Company. The Company's percentage share of losses incurred generally varies from 2% to 20% of the loan balance, and is typically based on a first-loss exposure for a stated percentage of the loan balance, plus a shared exposure with the government sponsored entity for any losses in excess of the stated first-loss percentage, subject to a contractually specified maximum percentage. The Company determines the liability related to this exposure using historical loss experience, and the size and remaining life of the asset. The Company services \$12,892 million and \$11,445 million of mortgages subject to these loss-sharing arrangements as of December 31, 2017 and 2016, respectively, all of which are collateralized by first priority liens on the underlying multi-family residential properties. As of both December 31, 2017 and 2016, these mortgages had a weighted-average debt service coverage ratio of 1.82 times and a weighted-average loan-to-value ratio of 59%. The Company's total share of losses related to indemnifications that were settled was \$0 million for both years ended December 31, 2017 and 2016 and \$1 million for the year ended December 31, 2015.

Other Guarantees

December 31,
2017 2016

(in millions)

Other guarantees where amount can be determined	\$ 31	\$ 58
---	-------	-------

Accrued liability for other guarantees and indemnifications \$ 0 \$ 3

The Company is also subject to other financial guarantees and indemnity arrangements. The Company has provided indemnities and guarantees related to acquisitions, dispositions, investments and other transactions that are triggered by, among other things, breaches of representations, warranties or covenants provided by the Company. These obligations are typically subject to various time limitations, defined by the contract or by operation of law, such as statutes of limitation. In some cases, the maximum potential obligation is subject to contractual limitations, while in other cases such limitations are not specified or applicable. Included above are \$31 million and \$51 million as of December 31, 2017 and 2016, respectively, of yield maintenance guarantees related to certain investments the Company sold. The Company does not expect to make any payments on these guarantees and is not carrying any liabilities associated with these guarantees.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Since certain of these obligations are not subject to limitations, it is not possible to determine the maximum potential amount due under these guarantees. The accrued liabilities identified above do not include retained liabilities associated with sold businesses.

Insolvency Assessments

Most of the jurisdictions in which the Company is admitted to transact business require insurers doing business within the jurisdiction to participate in guarantee associations, which are organized to pay contractual benefits owed pursuant to insurance policies issued by impaired, insolvent or failed insurers. These associations levy assessments, up to prescribed limits, on all member insurers in a particular state on the basis of the proportionate share of the premiums written by member insurers in the lines of business in which the impaired, insolvent or failed insurer engaged. Some states permit member insurers to recover assessments paid through full or partial premium tax offsets. In addition, Japan has established the Japan Policyholders Protection Corporation as a contingency to protect policyholders against the insolvency of life insurance companies in Japan through assessments to companies licensed to provide life insurance.

Assets and liabilities held for insolvency assessments were as follows:

	December 31,	
	2017	2016
	(in millions)	
Other assets:		
Premium tax offset for future undiscounted assessments	\$ 64	\$ 78
Premium tax offset currently available for paid assessments	6	6
Total	\$ 70	\$ 84
Other liabilities:		
Insolvency assessments	\$ 39	\$ 52

Contingent Liabilities

On an ongoing basis, the Company reviews its operations including, but not limited to, practices and procedures for meeting obligations to our customers and other parties. This review may result in the modification or enhancement of processes, including concerning the timing or computation of payments to customers and other parties. In certain cases, if appropriate, the Company may offer customers or other parties remediation and may incur charges, including the cost of such remediation, administrative costs and regulatory fines.

The Company is subject to the laws and regulations of states and other jurisdictions concerning the identification, reporting and escheatment of unclaimed or abandoned funds, and is subject to audit and examination for compliance with these requirements. For additional discussion of these matters, see “—Litigation and Regulatory Matters” below.

It is possible that the results of operations or the cash flow of the Company in a particular quarterly or annual period could be materially affected as a result of payments in connection with the matters discussed above or other matters depending, in part, upon the results of operations or cash flow for such period. Management believes, however, that ultimate payments in connection with these matters, after consideration of applicable reserves and rights to indemnification, should not have a material adverse effect on the Company’s financial position.

Litigation and Regulatory Matters

The Company is subject to legal and regulatory actions in the ordinary course of its businesses. Pending legal and regulatory actions include proceedings relating to aspects of the Company's businesses and operations that are specific to it and proceedings that are typical of the businesses in which it operates, including in both cases businesses that have been either divested or placed in wind down status. Some of these proceedings have been brought on behalf of various alleged classes of complainants. In certain of these matters, the plaintiffs are seeking large and/or indeterminate amounts, including punitive or exemplary damages. The outcome of litigation or a regulatory matter, and the amount or range of potential loss at any particular time, is often inherently uncertain.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

The Company establishes accruals for litigation and regulatory matters when it is probable that a loss has been incurred and the amount of that loss can be reasonably estimated. For litigation and regulatory matters where a loss may be reasonably possible, but not probable, or is probable but not reasonably estimable, no accrual is established but the matter, if potentially material, is disclosed, including matters discussed below. The Company estimates that as of December 31, 2017, the aggregate range of reasonably possible losses in excess of accruals established for those litigation and regulatory matters for which such an estimate currently can be made is less than \$250 million. Any estimate is not an indication of expected loss, if any, or the Company's maximum possible loss exposure on such matters. The Company reviews relevant information with respect to its litigation and regulatory matters on a quarterly and annual basis and updates its accruals, disclosures and estimates of reasonably possible loss based on such reviews.

Labor and Employment Matters

Prudential of Brazil Labor and Employment Matters

Prudential of Brazil ("POB") sells insurance products to consumers through life planner franchisees ("Life Planners"), who are engaged as independent life insurance brokers and not as employees. When a Life Planner's contractual relationship with POB is terminated, in many cases the Life Planner commences a labor suit against POB alleging entitlement to employment related benefits. POB is a defendant in numerous such lawsuits in Brazil brought by former Life Planners, and has been subject to regulatory actions challenging the validity of POB's franchise model. POB has recently modified its franchise model to, among other things, mitigate the labor risk involving Life Planners. POB may continue to become subject to additional Life Planner labor suits and regulatory actions in the future notwithstanding the steps that POB has taken to attempt to mitigate the labor risk.

Individual Annuities, Individual Life and Group Insurance

Wells Fargo MyTerm Sales

In December 2016, the Company announced that it suspended sales of its MyTerm life insurance product through Wells Fargo pending completion of a Company-initiated review of how the product was being sold through Wells Fargo. The Company has offered to reimburse the full amount of premium with interest, to any Wells Fargo customers with concerns about the way in which the product was purchased. Wells Fargo distributed the product from June 2014 until sales were suspended, and Prudential Financial's total annualized new business premiums associated with sales through Wells Fargo were approximately \$4 million. Annualized new business premiums include 100% of scheduled first year premiums for policies sold during this period.

The Company has received inquiries, requests for information, subpoenas and a civil investigative demand related to this matter from state and federal regulators, including its lead state insurance regulator, NJDOBI, state attorneys general and federal legislators, and is responding to these requests. The Company has also received shareholder demands for certain books and records under New Jersey law. Litigation related to this matter is described below. The Company may become subject to additional regulatory inquiries and other investigations and actions, shareholder demands and litigation related to this matter. The Company has provided notice to Wells Fargo that it may seek indemnification under the MyTerm distribution agreement between the parties. In December 2017, NJDOBI ended its investigation and concluded that there was no evidence of improper activity by Prudential regarding the sale and marketing of MyTerm policies to Wells Fargo customers.

Broderick v. The Prudential Insurance Company of America, et al.

In December 2016, a complaint entitled Julie Han Broderick, Darron Smith and Thomas Schreck v. The Prudential Insurance Company of America, et al., was filed in the Superior Court of New Jersey, Law Division - Essex County. The complaint: (i) alleges that defendants terminated plaintiffs' employment for engaging in whistleblowing conduct involving the sale of MyTerm policies through Wells Fargo and violated New Jersey's Conscientious Employee Protection Act; and (ii) seeks back and front pay, compensatory and punitive damages and attorneys' fees and costs. In January 2017, defendants filed an answer to the complaint.

Alex Perea, individually and on behalf of all others similarly situated v. The Prudential Insurance Company of America, et al.

In December 2016, a putative class action complaint entitled Alex Perea, individually and on behalf of all others similarly situated v. The Prudential Insurance Company of America, Pruco Life Insurance Company, Pruco Life Insurance Company of New Jersey, and Pruco Life Insurance Company, was filed in the United States District Court for the District of New Jersey. The complaint: (i) alleges that defendants conspired with Wells Fargo to sell a life insurance product to Wells Fargo customers without their knowledge or consent and violated federal law (Racketeer Influenced and Corrupt Organizations Act ("RICO")) and New

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Jersey law (Consumer Fraud Act); and (ii) seeks injunctive relief, compensatory damages, exemplary and statutory penalties, treble damages, interest and attorneys' fees and costs. In January 2017, plaintiff filed an amended complaint in the United States District Court for the District of New Jersey, alleging the same claims contained in the complaint. In February 2017, the amended complaint was withdrawn with prejudice. This case is now closed.

Huffman v. The Prudential Insurance Company of America

In September 2010, Huffman v. The Prudential Insurance Company of America, a purported nationwide class action brought on behalf of beneficiaries of group life insurance contracts owned by the Employee Retirement Income Security Act ("ERISA")-governed employee welfare benefit plans was filed in the United States District Court for the Eastern District of Pennsylvania, challenging the use of retained asset accounts in employee welfare benefit plans to settle death benefit claims as a violation of ERISA and seeking injunctive relief and disgorgement of profits. In July 2011, Prudential Insurance's motion for judgment on the pleadings was denied. In February 2012, plaintiffs filed a motion to certify the class. In April 2012, the court stayed the case pending the outcome of a case involving another insurer that is before the Third Circuit Court of Appeals. In August 2014, the court lifted the stay, and in September 2014, plaintiffs filed a motion seeking leave to amend the complaint. In July 2015, the court granted plaintiffs' motion to file an amended complaint. Plaintiffs' amended complaint added two new class representatives, a new common law breach of fiduciary duty claim, and a prohibited transactions claim under Section 406(a)(1)(C) of ERISA. In August 2015, Prudential Insurance filed its answer to the first amended complaint. In February 2016, plaintiffs filed a class certification motion. In September 2016, plaintiffs' motion for class certification was denied, and in October 2016, plaintiffs filed a motion for reconsideration. In December 2016, the motion for reconsideration was denied. In February 2017, all parties filed motions for summary judgment. In December 2017, the court granted plaintiffs' motion for summary judgment as to their breach of fiduciary duty claims under ERISA, dismissed plaintiffs' state law claim, and denied the motions for summary judgment on the prohibited transaction claim. In December 2017, plaintiffs filed a motion to alter or amend the prior orders denying class certification. In January 2018, the court denied in part, and granted in part, plaintiffs' class certification motion and certified a class limited to participants in the two employer plans involving the named plaintiffs. In February 2018, Prudential Insurance filed a petition with the Third Circuit Court of Appeals seeking permission to appeal the class certification decision.

Behfarin v. Pruco Life

In July 2017, a putative class action complaint entitled Richard Behfarin v. Pruco Life Insurance Company was filed in the United States District Court for the Central District of California, alleging that the Company imposes charges on owners of universal life policies to cure defaults and/or reinstate lapses, that are inconsistent with the applicable universal life policy. The complaint includes claims for breach of contract, breach of implied covenant of good faith and fair dealing, and violation of California law, and seeks unspecified damages along with declaratory and injunctive relief. In September 2017, the Company filed its answer to the complaint.

Escheatment Litigation

State of West Virginia ex. Rel. John D. Perdue v. The Prudential Insurance Company of America

In September 2012, the State of West Virginia, through its State Treasurer, filed a lawsuit against Prudential Insurance in the Circuit court of Putnam County, West Virginia. The complaint alleges violations of the West Virginia Uniform Unclaimed Property Fund Act by failing to properly identify and report all unclaimed insurance policy proceeds which should either be paid to beneficiaries or escheated to West Virginia. The complaint seeks to examine the records of Prudential Insurance to determine compliance with the West Virginia Uniform Unclaimed Property Fund

Act, and to assess penalties and costs in an undetermined amount. In June 2015, the West Virginia Supreme court issued a decision: (i) reversing the trial court's dismissal of the West Virginia Treasurer's complaint alleging violations of West Virginia's unclaimed property law; and (ii) remanding the case to the Circuit court of Putnam County for proceedings consistent with its decision. In July 2015, a petition for rehearing was filed with the West Virginia Supreme court. In September 2015, the West Virginia Supreme court of Appeals denied Prudential Insurance's rehearing petition. In November 2015, Prudential Insurance filed its answer.

State of West Virginia ex. Rel. John D. Perdue v. Pruco Life

In October 2012, the State of West Virginia commenced a second action against Pruco Life making the same allegations stated in the action against Prudential Insurance. In April 2013, Pruco Life filed motions to dismiss the complaints in both of the West Virginia actions. In December 2013, the court granted Pruco Life's motions and dismissed the complaints with prejudice. In January 2014, the State of West Virginia appealed the decisions. In June 2015, the West Virginia Supreme court issued a decision: (i) reversing the trial court's dismissal of the West Virginia Treasurer's complaint alleging violations of West Virginia's unclaimed

Notes to Consolidated Financial Statements—(Continued)

property law; and (ii) remanding the case to the Circuit court of Putnam County for proceedings consistent with its decision. In July 2015, a petition for rehearing was filed with the West Virginia Supreme court. In September 2015, the West Virginia Supreme court of Appeals denied Pruco Life's rehearing petition. In November 2015, Pruco Life filed its answer.

Total Asset Recovery Services, LLC v. MetLife, Inc., et al., Prudential Financial, Inc., The Prudential Insurance Company of America, and Prudential Insurance Agency, LLC

On December 27, 2017, Total Asset Recovery Services, LLC, on behalf of the State of New York, filed a Second Amended Complaint in the Supreme Court of the State of New York, County of New York, against, among other 19 defendants, Prudential Financial, Inc., The Prudential Insurance Company of America and Prudential Insurance Agency, LLC, alleging that the Company failed to escheat life insurance proceeds in violation of the New York False Claims Act. The second amended complaint seeks injunctive relief, compensatory damages, civil penalties, treble damages, prejudgment interest, attorneys' fees and costs.

Other Matters

Wood II, et al. v. PRIAC

In December 2015, a putative class action complaint entitled, Leonard D. Wood II on behalf of the KeHe Distributors, Inc. 401(k) Retirement Saving Non-Union Plan and Maya Shaw on behalf of the Exco Resources, Inc. 401(k) Plan and all other similarly situated ERISA-covered employee pension benefit plans v. PRIAC was filed in the United States District Court, District of Connecticut. The complaint: (i) seeks certification of a class of all ERISA-covered employee pension benefit plans whose plan assets were invested in group annuity contract stable value funds within six years prior to, on, or after December 3, 2015; and (ii) alleges that PRIAC breached its fiduciary obligations and accepted excessive compensation by crediting rates on the stable value accounts that are less than PRIAC's internal rate of return on those plan assets without disclosing this spread to the plans. In February 2016, PRIAC filed a motion to dismiss the complaint. In September 2016, the court issued a decision: (i) denying PRIAC's motion to dismiss the claim alleging that it is a fiduciary under ERISA; and (ii) granting PRIAC's motion to dismiss the claim alleging non-fiduciary liability. In October 2016, PRIAC filed its Answer. In January 2017, plaintiffs filed a motion for class certification. In February 2017, the court granted the unopposed motion of plaintiff Wood on behalf of the KeHe plan to dismiss the case as to the KeHe plan without prejudice. In August 2017, the court denied plaintiff's motion for class certification. In October 2017, the court issued an order confirming the parties' stipulation dismissing the claims of the sole remaining plaintiff with prejudice. This case is now closed.

Rosen v. PRIAC, et al.

In December 2015, a putative class action complaint entitled Richard A. Rosen, on behalf of the Ferguson Enterprises, Inc. 401(k) Retirement Savings Plan and On behalf of All Other Similarly Situated Employee Benefit Plans v. PRIAC, Prudential Bank & Trust, FSB and Prudential Investment Management Services, LLC was filed in the United States District Court, District of Connecticut. The complaint: (i) seeks certification of a class of all ERISA-covered employee pension benefit plans with which Prudential has maintained a contractual relationship based on a group annuity contract or group funding agreement; and (ii) alleges that the defendants breached their fiduciary obligations by accepting revenue sharing payments from investment vehicles in its separate accounts and/or by accepting excessive compensation by crediting rates on stable value accounts that are less than PRIAC's internal rate of return. In April 2016, plaintiff filed an amended complaint: (i) removing Prudential Investment Management Services, LLC, as a defendant; (ii) withdrawing all claims concerning Stable Value Accounts; and (iii) adding as defendants the

employer/sponsor of plaintiff's retirement plan (Ferguson Enterprises, Inc.), and the investment advisor for plaintiff's retirement plan (Capital Partners, LLC d/b/a Captrust Financial Advisors). In May 2016, the Muir v. PRIAC complaint was consolidated with this lawsuit. In June 2016, PRIAC, along with the other named defendants, filed motions to dismiss the amended complaint. In December 2016, the court granted defendants' motions to dismiss with prejudice. In January 2017, plaintiff filed a Notice of Appeal to the Second Circuit. In March 2017, plaintiff filed a voluntary notice of dismissal with prejudice as to Ferguson Enterprises, Inc. and Capital Partners, LLC d/b/a Captrust Financial Advisors. In October 2017, a three judge panel from the Second Circuit Court of Appeals affirmed the judgment of the district court, and plaintiff subsequently filed a petition for rehearing before the entire Court of Appeals. In December 2017, the Court of Appeals denied plaintiff's request for a rehearing.

Bouder v. Prudential Financial, Inc.

In October 2006, a purported class action lawsuit, Bouder v. Prudential Financial, Inc. and Prudential Insurance Company of America, was filed in the United States district court for the district of New Jersey, claiming that Prudential failed to pay overtime to insurance agents in violation of federal and Pennsylvania law, and that improper deductions were made from these agents' wages

298

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

in violation of state law. The complaint sought back overtime pay and statutory damages, recovery of improper deductions, interest, and attorneys' fees. In March 2008, the court conditionally certified a nationwide class on the federal overtime claim. Separately, in March 2008, a purported nationwide class action lawsuit was filed in the United States district court for the Southern district of California, Wang v. Prudential Financial, Inc. and Prudential Insurance, claiming that the Company failed to pay its agents overtime and provide other benefits in violation of California and federal law and seeking compensatory and punitive damages in unspecified amounts. In September 2008, Wang was transferred to the United States district court for the district of New Jersey and consolidated with the Boudier matter. Subsequent amendments to the complaint resulted in additional allegations involving purported violations of an additional nine states' overtime and wage payment laws. In February 2010, Prudential moved to decertify the federal overtime class that had been conditionally certified in March 2008 and moved for summary judgment on the federal overtime claims of the named plaintiffs. In July 2010, plaintiffs filed a motion for class certification of the state law claims. In August 2010, the district court granted Prudential's motion for summary judgment, dismissing the federal overtime claims. In January 2013, the court denied plaintiffs' motion for class certification in its entirety. In July 2013, the court granted plaintiffs' motion for reconsideration, permitting plaintiffs to file a motion to certify a class of employee insurance agents seeking recovery under state wage and hour laws. In September 2013, plaintiffs filed a renewed motion for class certification. In February 2015, the federal district court for New Jersey granted in part, and denied in part, plaintiffs' renewed class certification motion. It certified for class treatment plaintiffs' wage payment claims which include allegations that the Company made improper deductions from the wages of its former common law agents in California, New York, and Pennsylvania, and its financial services associates in California and New York. The court denied plaintiffs' attempt to certify a class based on the Company's alleged failure to pay overtime to its former common law agents and its financial services associates in California, Illinois, New York and Pennsylvania. In March 2015, the Company filed a motion requesting that the court reconsider its decision to partially grant plaintiffs' renewed class certification motion with regard to its former common law agents. In June 2017, the parties filed a consent motion for preliminary settlement approval. In August 2017, the court issued an order granting preliminary approval of the parties' class action settlement. In December 2017, the court issued a Judgment and Order of Dismissal granting the unopposed motion for Certification of Settlement Classes and Final Approval of Settlement and granted the Motion for Attorney Fees. This case is now closed.

Financial Disclosures Concerning Death Benefits and Unclaimed Property

Stephen Silverman, Derivatively on Behalf of Prudential Financial, Inc. v. John R. Strangfeld, et al.

In October 2012, a shareholder derivative lawsuit, was filed in the United States district court for the district of New Jersey, alleging breaches of fiduciary duties, waste of corporate assets and unjust enrichment by certain senior officers and directors. The complaint names as defendants the Company's Chief Executive Officer, the Chief Financial Officer, the Principal Accounting Officer, certain members of the Company's Board of Directors and a former Director. The complaint alleges that the defendants made false and misleading statements regarding the Company's current and future financial condition based on, among other things, the alleged failure to disclose: (i) potential liability for benefits that should either have been paid to policyholders or their beneficiaries, or escheated to applicable states; and (ii) the extent of the Company's exposure for alleged state and federal law violations concerning the settlement of claims and the escheatment of unclaimed property. The complaint seeks an undetermined amount of damages, attorneys' fees and costs, and equitable relief including a direction for the Company to reform and to improve its corporate governance and internal procedures to comply with applicable laws. In September 2017, the court issued a stipulated consent order dismissing the complaint without prejudice. This case is now closed.

Paul Memo, Derivatively on Behalf of Prudential Financial, Inc. v. John R. Strangfeld, et al.

In October 2012, the Board of Directors received a shareholder demand letter (the “Demand”), containing allegations of wrongdoing similar to those alleged in the Silverman complaint. The Demand alleges that the Company’s Senior Management: (i) breached their fiduciary duties of loyalty and good faith in connection with the management, operation and oversight of the Company’s business; (ii) breached their fiduciary duty of good faith to establish and maintain adequate internal controls; and (iii) breached their fiduciary duties by disseminating false, misleading and/or incomplete information, all in connection with the Company’s alleged failure to use the Social Security Master Death File (“SSMDF”) and to pay beneficiaries and escheat funds to states. The Demand requests that the Board of Directors: (a) undertake an independent internal investigation into Senior Management’s violations of New Jersey and/or federal law; and (b) commence a civil action against each member of Senior Management to recover for the benefit of the Company the amount of damages sustained by the Company as a result of the alleged breaches described above. In response to the Demand, the Board of Directors formed a Special Litigation Committee that retained an outside law firm to investigate the Demand’s allegations. In September 2013, before the conclusion of the Special Litigation Committee’s investigation, the shareholder who submitted the Demand filed a shareholder derivative lawsuit, Paul Memo, Derivatively on Behalf of Prudential Financial, Inc. v. John R. Strangfeld et. al., in New Jersey Superior court, Essex County. The complaint (the “Memo complaint”) names as defendants the Company’s Chief Executive Officer, the Vice Chairman, a former

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

Chief Financial Officer, the Principal Accounting Officer, certain members of the Company's Board of Directors and a former Director. The complaint repeats the allegations in the Demand and seeks an undetermined amount of damages, attorneys' fees and costs, and equitable relief including a direction for the Company to reform and to improve its corporate governance and internal procedures to comply with applicable laws. In March 2014, the Special Litigation Committee completed its investigation into the Demand's allegations and concluded that it is neither appropriate nor in the best interests of the Company's shareholders to pursue any litigation arising from allegations contained in the Demand or in the Memo complaint, and that the Company should seek dismissal of the Memo complaint. In July 2014, the Company filed a motion to dismiss the complaint. In October 2015, the court granted defendants' summary judgment motion and dismissed the complaint with prejudice. In November 2015, plaintiff filed a notice of appeal to the New Jersey Superior court - Appellate Division. In August 2017, the New Jersey Appellate Division affirmed the trial court decision dismissing the complaint. In September 2017, the plaintiff's time to appeal the New Jersey Appellate Division's decision expired. This case is now closed.

Residential Mortgage-Backed Securities ("RMBS") Trustee Litigation

In June 2014, the Company, together with nine other institutional investors, filed six actions in New York state court against certain RMBS trustees. The actions, which are brought derivatively on behalf of more than 2,200 RMBS trusts, seek unspecified damages attributable to the trustees' alleged failure to: (i) enforce the trusts' respective repurchase rights against sellers of defective mortgage loans; and (ii) properly monitor the respective mortgage loan servicers. The complaints assert claims for breach of contract, breach of fiduciary duty, negligence and violations of the Trust Indenture Act of 1939. In July 2014, the Company amended its complaint against each of the six defendants. In November 2014, the Company filed amended complaints against each of the trustee bank defendants in federal court in the Southern District of New York. In December 2014, the New York State court actions were dismissed without prejudice upon the Company's request. The six actions described above are captioned:

PICA et al. v. Bank of New York Mellon ("BONYM")

In March 2015, defendants filed a motion to dismiss the amended complaint. In March 2016, the court issued a decision involving BONYM's motion to dismiss: (i) denying the motion to dismiss the Pooling and Servicing Agreement ("PSA") trust claims for lack of jurisdiction; (ii) denying the motion regarding claims for violations of the Trust Indenture Act of 1939 and breach of contract; and (iii) granting the motion regarding claims for negligence and breach of fiduciary duty.

PICA et al. v. Citibank N.A.

In February 2015, defendants filed a motion to dismiss the amended complaint. In September 2015, the court issued a decision involving Citibank's motion to dismiss: (i) with respect to the PSA trusts, granting the motion and declining to exercise supplemental jurisdiction; (ii) with respect to the Indenture trusts, denying the motion regarding claims for breach of contract, violations of the Trust Indenture Act of 1939, negligence and breach of fiduciary duty concerning the duty to avoid conflicts of interest; and (iii) with respect to the Indenture trusts, granting the motion to dismiss claims for negligence and breach of fiduciary duty concerning the duty of care. In November 2015, the Company, together with other institutional investors, filed a complaint in New York State Supreme court, captioned Fixed Income Shares: Series M, et al. v. Citibank N.A., asserting claims relating to the PSA trusts. In February 2016, Citibank filed a motion to dismiss the state court complaint. In August 2016, plaintiffs filed an amended complaint in state court, and in September 2016, Citibank filed a motion to dismiss the amended complaint and plaintiffs filed in federal court a motion for class certification. In April 2017, Citibank filed a motion for summary judgment in the federal court action. In June 2017, the state court issued a decision regarding defendants' motion to dismiss the

amended complaint: (i) sustaining plaintiffs' breach of contract claims concerning Citibank's pre-Event of Default obligations; (ii) dismissing plaintiffs' breach of contract claims concerning Citibank's post-Event of Default obligations; (iii) sustaining plaintiffs' implied covenant of good faith and fair dealing claim; (iv) dismissing plaintiffs' claim for breach of fiduciary duty; and (v) dismissing plaintiffs' claim for breach of duty to avoid conflicts of interest. In July 2017, Citibank filed an appeal to the Appellate Division of the Supreme Court of New York, First Department, from the June 2017 decision denying, in part, its motion to dismiss. In January 2018, the First Department: (i) affirmed the trial court's ruling upholding the breach of contract claim based on the trustee's failure to give written notice of breaches of representations and warranties; and (ii) reversed the trial court's order that sustained plaintiffs' breach of contract and implied covenant of good faith and fair dealing claims concerning servicing violations.

PICA et al. v. Deutsche Bank, et al.

In April 2015, defendants filed a motion to dismiss the amended complaint. In January 2016, the court issued a decision involving Deutsche Bank's motion to dismiss: (i) with respect to the PSA trusts, granting the motion and declining to exercise supplemental jurisdiction; and (ii) with respect to the Indenture trusts, granting leave for plaintiffs to file an amended complaint.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

In February 2016, the Company, together with other institutional investor plaintiffs, filed an amended complaint in federal court. In March 2016, the Company, together with other institutional investors, filed a complaint in California State Superior court, captioned BlackRock Balanced Capital Portfolio (FI), et al. v. Deutsche Bank Trust Company Americas, asserting claims relating to the PSA trusts. In May 2016, the Company, together with other institutional investors, filed an amended class action complaint in California State Superior court. In July 2016, defendant filed a motion to dismiss the amended federal court complaint. In August 2016, defendant filed a demurrer and motion to strike the amended state court class action complaint. In October 2016, the court issued a decision regarding defendants motion to dismiss: (i) sustaining plaintiffs' breach of contract claims concerning the trust at issue; (ii) dismissing plaintiffs' tort claims for breach of fiduciary duty; and (iii) dismissing plaintiffs' claims of breach of duty to avoid conflicts of interest. The court granted plaintiffs' leave to file an amended complaint. In January 2017, the federal court issued a decision involving Deutsche Bank's motion to dismiss: (i) granting the motion with respect to plaintiff's conflicts of interest claims; and (ii) denying the motion with respect to plaintiffs' representations-and-warranties claims, servicer-notification claims, event-of-default claims and Trust Indenture Act claims. In February 2017, the court issued a decision regarding defendants' motion to dismiss the amended complaint: (i) sustaining plaintiffs' breach of contract claims concerning the failure to remedy known servicing violations as to all sixty-two trusts at issue; (ii) sustaining plaintiffs' breach of contract claims concerning the failure to enforce seller representation and warranty claims as to forty-one trusts, and dismissing such claims as to the remaining twenty-one trusts; (iii) dismissing plaintiffs' claim for breach of fiduciary duty; and (iv) dismissing plaintiffs' claim for breach of duty to avoid conflicts of interest. In January 2018, plaintiffs filed motions for class certification in the state and federal court actions.

PICA et al. v. HSBC, et al.

In January 2015, defendants filed a motion to dismiss the amended complaint. In June 2015, the court granted in part, and denied in part, defendants' motion to dismiss the complaint for failure to state a claim and granted leave to file an amended complaint. In July 2015, plaintiffs filed an amended complaint. In January 2017, plaintiffs filed a motion seeking class certification and appointing class representatives and class counsel. In February 2018, the court denied plaintiffs' motion for class certification.

PICA et al. v. U.S. Bank N.A.

In February 2015, defendants filed a motion to dismiss the amended complaint. In May 2015, the court granted defendants' motion to dismiss: (i) declining to exercise supplemental jurisdiction regarding claims involving the PSA trusts; and (ii) granting leave for plaintiffs to file an amended complaint asserting direct claims involving the Indenture trusts. In June 2015, the Company, together with other institutional investors, filed a complaint in New York State Supreme court, captioned BlackRock Balanced Capital Portfolio (FI), et al. v. U.S. Bank Nat'l Ass'n, asserting claims relating to the PSA trusts. In July 2015, plaintiffs filed with the court an amended complaint asserting direct claims relating to the Indenture trusts. In August 2015, defendant filed a motion to dismiss the amended class action complaint in the federal court action. In September 2015, defendant filed a motion to dismiss the class action complaint in the state court action. In February 2016, the federal district court issued a decision involving U.S. Bank's motion to dismiss: (i) upholding the breach of contract and Trust Indenture Act claims; and (ii) dismissing the breach of fiduciary duty and extra-contractual claims. In September 2016, the Company together with other institutional investor plaintiffs filed an amended complaint in state court. In October 2016, U.S. Bank filed a motion to dismiss the amended state court complaint. In November 2016, plaintiffs filed in federal court motions seeking class certification and appointing class representatives and class counsel. In January 2018, the state court issued a decision on U.S. Bank's motion to dismiss the amended complaint: (i) upholding the representation and warranty breach of contract claims for all 770 trusts; (ii) upholding the breach of contract claims related to servicer violations for 77 trusts; and (iii) dismissing the breach of fiduciary duty, negligence, and implied covenant of good faith and fair dealing claims. In January 2018, the court denied plaintiffs' motion for class certification in the federal court action.

PICA et al. v. Wells Fargo Bank, et al.

In April 2015, defendants filed a motion to dismiss the amended complaint. In January 2016, the court issued a decision involving Wells Fargo's motion to dismiss: (i) with respect to the PSA trusts, granting the motion and declining to exercise supplemental jurisdiction; and (ii) with respect to the Indenture trusts, granting leave for plaintiffs to file an amended complaint. In February 2016, the Company, together with other institutional investor plaintiffs, filed an amended complaint in federal court. In March 2016, the Company, together with other institutional investors, filed a complaint in California State Superior court, captioned BlackRock Balanced Capital Portfolio (FI), et al. v. Wells Fargo Bank, Nat'l Ass'n., asserting claims relating to the PSA trusts. In May 2016, defendant filed a motion to dismiss or to stay the state court action. In July 2016, defendant filed a motion to dismiss the amended complaint filed previously in federal court. In October 2016, the court dismissed the state court complaint. In December 2016, the Company, together with other institutional investors, filed a complaint in New York State Court, captioned BlackRock Core Bond Portfolio, et al. v. Wells Fargo Bank, Nat'l Ass'n., asserting claims related to the PSA trusts. In March 2017,

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

the federal court issued an order concerning defendant's motion to dismiss as to the Indenture trusts: (i) sustaining plaintiffs' breach of contract claims; plaintiffs' claims for violations of the Trust Indenture Act of 1939; and plaintiffs' claims for breach of the duty to avoid conflicts of interest; and (ii) dismissing plaintiffs' claims for breach of fiduciary duty as duplicative of the sustained contract claims. In May 2017, Wells Fargo filed a third-party complaint for contribution against PGIM, Inc., alleging that, in the event the Prudential plaintiff Funds prevail on their claims for damages against Wells Fargo, PGIM must contribute to the award due to PGIM's alleged breach of fiduciary duties owed to the Funds in managing the Funds' RMBS investments. In June 2017, Wells Fargo filed a motion to dismiss the complaint in New York State Court. In October 2017, PGIM filed a motion to dismiss the third-party complaint filed by Wells Fargo seeking contribution. In January 2018, plaintiffs filed a motion for class certification in the federal court action.

LIBOR Litigation

Prudential Investment Portfolios 2, f/k/a Dryden Core Investment Fund, o/b/o Prudential Core Short-Term Bond Fund and Prudential Core Taxable Money Market Fund v. Bank of America Corporation, et al.

In May 2014, Prudential Investment Portfolios 2, on behalf of the Prudential Core Short-Term Bond Fund and the Prudential Core Taxable Money Market Fund (the "Funds"), filed an action against ten banks in the United States District Court for the District of New Jersey asserting that the banks participated in the setting of LIBOR, a major benchmark interest rate. The complaint alleges that the defendant banks manipulated LIBOR, and asserts, among other things, claims for common law fraud, negligent misrepresentation, breach of contract, intentional interference with contract and with prospective economic relations, unjust enrichment, breaches of the New Jersey Civil RICO statute, and violations of the Sherman Act. In June 2014, the United States Judicial Panel on Multidistrict Litigation transferred the action to the United States district court for the Southern District of New York, where it has been consolidated for pre-trial purposes with other pending LIBOR-related actions. In October 2014, the Funds filed an amended complaint. In November 2014, the defendants filed a motion to dismiss the amended complaint. In August 2015, the court issued a decision granting in part, and denying in part, defendants' motions to dismiss. The court dismissed certain of the Funds' claims, including those alleging fraud based on offering material statements; New Jersey RICO; and express breach of contract. The court upheld certain of the Funds' claims, including those alleging fraud based on false LIBOR submissions to the British Bankers' Association; negligent misrepresentation; unjust enrichment; and breach of the implied covenant of good faith and fair dealing. Following the August 2015 decision, granting in part defendants' motions to dismiss, in September 2015, Prudential filed the following LIBOR complaints: (i) in the Southern District of New York, captioned Prudential Investment Portfolios 2 et al. v. Barclays Bank PLC, et al. (the "New York Complaint"), naming as defendants Barclays Bank PLC, Barclays Capital Inc., Barclays PLC, Citibank, N.A., Citigroup Funding Inc., Credit Suisse AG, Credit Suisse Group AG, Credit Suisse (USA) Inc., Deutsche Bank AG, HSBC Bank plc, HSBC Holdings PLC, JPMorgan Chase & Co., JPMorgan Chase Bank, N.A., Royal Bank of Canada, and The Royal Bank of Scotland PLC. These defendants were dismissed from the original LIBOR action on jurisdictional grounds. The New York complaint reasserts the causes of action brought in the original LIBOR action; and (ii) in the Western district of North Carolina, captioned Prudential Investment Portfolios 2 et al. v. Bank of America Corporation et al. (the "North Carolina Complaint"), naming as defendants Bank of America Corporation and Bank of America, N.A. These defendants were dismissed from the original LIBOR action on jurisdictional grounds. The North Carolina Complaint reasserts the causes of action brought in the original LIBOR action. Both the New York Complaint and the North Carolina Complaint have been transferred for pre-trial purposes to the LIBOR multi-district litigation presided over by Judge Buchwald in the U.S. District Court for the Southern District of New York. In May 2016, the Second Circuit Court of Appeals vacated the district court's dismissal of the Libor plaintiffs' antitrust claims and remanded to the district court the question of whether plaintiffs possess standing as "efficient enforcers" of applicable antitrust laws. In July 2016, defendants filed a joint motion to dismiss all antitrust claims based on lack of standing and lack of personal jurisdiction. In December 2016, the motion was granted in part and denied in part. In January 2017, the United States Supreme Court denied defendants' petition for certiorari. In February 2017, the court clarified its December 2016 order, holding that antitrust claims only exist against panel

banks, not their affiliates. This clarification resulted in the Funds' New Jersey antitrust claims being dismissed for lack of personal jurisdiction. The Funds antitrust claims in the New York and North Carolina actions remain pending. In July 2017, the Funds obtained an entry of judgment on the New Jersey antitrust claims dismissed on personal jurisdiction grounds. In July 2017, the Funds filed with the Second Circuit Court an appeal from the dismissal of their New Jersey anti-trust claims.

Regulatory Matters

Escheatment Audit and Claims Settlement Practices Market Conduct Exam

In January 2012, a Global Resolution Agreement entered into by the Company and a third-party auditor became effective upon its acceptance by the unclaimed property departments of 20 states and jurisdictions. Under the terms of the Global Resolution Agreement, the third-party auditor acting on behalf of the signatory states will compare expanded matching criteria to the SS MDF

302

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Notes to Consolidated Financial Statements—(Continued)

to identify deceased insureds and contractholders where a valid claim has not been made. In February 2012, a Regulatory Settlement Agreement entered into by the Company to resolve a multi-state market conduct examination regarding its adherence to state claim settlement practices became effective upon its acceptance by the insurance departments of 20 states and jurisdictions. The Regulatory Settlement Agreement applies prospectively and requires the Company to adopt and implement additional procedures comparing its records to the SS MDF to identify unclaimed death benefits and prescribes procedures for identifying and locating beneficiaries once deaths are identified. Substantially all other jurisdictions that are not signatories to the Global Resolution Agreement or the Regulatory Settlement Agreement have entered into similar agreements with the Company. During 2017, audits were satisfactorily completed by the third party auditor of the Global Resolution Agreement and by the regulators for the Regulatory Settlement Agreement to assure that the Company had complied with the terms of both agreements.

The New York Attorney General has subpoenaed the Company, along with other companies, regarding its unclaimed property procedures and may ultimately seek remediation and other relief, including damages. Additionally, the New York Office of Unclaimed Funds is conducting an audit of the Company's compliance with New York's unclaimed property laws.

Securities Lending Matter

In 2016, the Company self-reported to the SEC and the DOL, and notified other regulators, that in some cases it failed to maximize securities lending income for the benefit of certain separate account investments due to a long-standing restriction benefiting the Company that limited the availability of loanable securities. The Company has removed the restriction and substantially implemented a remediation plan for the benefit of customers. The Company is cooperating with regulators in their review of this matter (which includes a review of the remediation plan) and has entered into discussions with the SEC staff regarding a possible settlement that would potentially involve charges under the Investment Advisers Act and financial remedies. We cannot predict the outcome of these discussions.

Summary

The Company's litigation and regulatory matters are subject to many uncertainties, and given their complexity and scope, their outcome cannot be predicted. It is possible that the Company's results of operations or cash flow in a particular quarterly or annual period could be materially affected by an ultimate unfavorable resolution of pending litigation and regulatory matters depending, in part, upon the results of operations or cash flow for such period. In light of the unpredictability of the Company's litigation and regulatory matters, it is also possible that in certain cases an ultimate unfavorable resolution of one or more pending litigation or regulatory matters could have a material adverse effect on the Company's financial position. Management believes, however, that, based on information currently known to it, the ultimate outcome of all pending litigation and regulatory matters, after consideration of applicable reserves and rights to indemnification, is not likely to have a material adverse effect on the Company's financial position.

24. QUARTERLY RESULTS OF OPERATIONS (UNAUDITED)

The unaudited quarterly results of operations for the years ended December 31, 2017 and 2016 are summarized in the table below:

	Three Months Ended			
	March 31	June 30	September 30	December 31
	(in millions, except per share amounts)			
2017				
Total revenues	\$ 13,670	\$ 13,441	\$ 16,313	\$ 16,265
Total benefits and expenses	11,928	12,833	13,292	15,149
Net income (loss)	1,372	496	2,241	3,865
Less: Income attributable to noncontrolling interests	3	5	3	100
Net income (loss) attributable to Prudential Financial, Inc.	\$ 1,369	\$ 491	\$ 2,238	\$ 3,765
Basic earnings per share—Common Stock(1):				
Net income (loss) attributable to Prudential Financial, Inc.	\$ 3.14	\$ 1.13	\$ 5.19	\$ 8.78
Diluted earnings per share—Common Stock(1):				
Net income (loss) attributable to Prudential Financial, Inc.	\$ 3.09	\$ 1.12	\$ 5.09	\$ 8.61
2016				
Total revenues	\$ 14,329	\$ 14,439	\$ 16,961	\$ 13,050
Total benefits and expenses	12,597	13,098	14,646	12,733
Net income (loss)	1,369	925	1,832	293
Less: Income attributable to noncontrolling interests	33	4	5	9
Net income (loss) attributable to Prudential Financial, Inc.	\$ 1,336	\$ 921	\$ 1,827	\$ 284
Basic earnings per share—Common Stock(1):				
Net income (loss) attributable to Prudential Financial, Inc.	\$ 2.97	\$ 2.06	\$ 4.14	\$ 0.65
Diluted earnings per share—Common Stock(1):				
Net income (loss) attributable to Prudential Financial, Inc.	\$ 2.93	\$ 2.04	\$ 4.07	\$ 0.65

(1) Quarterly earnings per share amounts may not add to the full year amounts due to the averaging of shares.

Results for the second quarter of 2016 included total pre-tax out of period adjustments resulting in an aggregate decrease of \$153 million which primarily consisted of a charge of \$148 million to increase reserves, net of a related increase in DAC, for certain universal life products within the Individual Life business. Management evaluated the adjustments and concluded they were not material to the second quarter or to any previously reported quarterly or annual financial statements.

25. SUBSEQUENT EVENTS

Common Stock Dividend Declaration

On February 7, 2018, Prudential Financial's Board of Directors declared a cash dividend of \$0.90 per share of Common Stock, payable on March 15, 2018 to shareholders of record as of February 21, 2018.

Table of Contents

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Management's Annual Report on Internal Control Over Financial Reporting and the report of the Company's independent registered public accounting firm on the effectiveness of internal control over financial reporting as of December 31, 2017 are included in Part II, Item 8 of this Annual Report on Form 10-K.

In order to ensure that the information we must disclose in our filings with the SEC is recorded, processed, summarized, and reported on a timely basis, the Company's management, including our Chief Executive Officer and Chief Financial Officer, have reviewed and evaluated the effectiveness of our disclosure controls and procedures, as defined in Exchange Act Rule 13a-15(e), as of December 31, 2017. Based on such evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of December 31, 2017, our disclosure controls and procedures were effective. No change in our internal control over financial reporting, as defined in Exchange Act Rule 13a-15(f), occurred during the quarter ended December 31, 2017, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The names of the executive officers of Prudential Financial and their respective ages and positions, as of February 16, 2018, were as follows:

Name	Age	Title	Other Public Directorships
John R. Strangfeld	64	Chairman, Chief Executive Officer and President	None
Mark B. Grier	65	Vice Chairman	None
Robert M. Falzon	58	Executive Vice President and Chief Financial Officer	None
Timothy P. Harris	57	Executive Vice President and General Counsel	None
Charles F. Lowrey	60	Executive Vice President and Chief Operating Officer, International Businesses	None
Stephen Pelletier	64	Executive Vice President and Chief Operating Officer, U.S. Businesses	None
Barbara G. Koster	63	Senior Vice President and Chief Information Officer	None
Candace J. Woods	57	Senior Vice President and Chief Actuary	None
Nicholas C. Silitch	56	Senior Vice President and Chief Risk Officer	None
Scott G. Sleyster	58	Senior Vice President and Chief Investment Officer	None
Lucien A. Alziari	58	Senior Vice President and Chief Human Resources Officer	None

Biographical information about Prudential Financial's executive officers is as follows:

John R. Strangfeld was elected Chairman of Prudential Financial in May 2008 and has served as Chief Executive Officer, President and Director since January 2008. He is a member of the Office of the Chairman and served as Vice Chairman of Prudential Financial from August 2002 to December 2007. He was Executive Vice President of Prudential Financial from February 2001 to August 2002. He served as Chief Executive Officer, Prudential Investment Management of Prudential Insurance from October 1998 until April 2002 and Chairman of the Board and CEO of Prudential Securities (renamed Prudential Equity Group, LLC) from December 2000 to April 2008. He has been with Prudential since July 1977, serving in various management positions, including Senior Managing Director, The Private Asset Management Group from 1995 to 1998; and Chairman, PRICOA Capital Group (London) Europe from 1989 to 1995.

Mark B. Grier was elected Director of Prudential Financial in January 2008 and has served as Vice Chairman since August 2002. He served as a director of Prudential Financial from December 1999 to January 2001, Executive Vice President from December 2000 to August 2002 and as Vice President of Prudential Financial from January 2000 to December 2000. He served as Chief Financial Officer of Prudential Insurance from May 1995 to June 1997. Since May 1995 he has variously served as Executive Vice President, Corporate Governance; Executive Vice President, Financial Management; Vice Chairman, Financial

305

Table of Contents

Management; and Vice Chairman, International. Prior to joining Prudential, Mr. Grier was an executive with Chase Manhattan Corporation.

Robert M. Falzon was elected Executive Vice President and Chief Financial Officer of Prudential Financial and Prudential Insurance in March 2013. Mr. Falzon has been with Prudential since 1983, serving in various positions. He served as Senior Vice President and Treasurer of Prudential Insurance and Prudential Financial from 2010 to 2013. Previously he had been a managing director at Prudential Real Estate Investors (“PREI”), head of PREI’s Global Merchant Banking Group and CEO of its European business; a managing director at Prudential Securities; and regional vice president at Prudential Capital Group.

Timothy P. Harris was appointed Executive Vice President and General Counsel for Prudential Financial and Prudential Insurance in October 2015. He served as the Deputy General Counsel and Chief Legal Officer, U.S. Businesses, from 2008 to 2015. He has served in various supervisory positions since 1999, including Chief Investment Counsel from 2005 through 2008, Chief Legal Officer of Prudential Annuities and Chief Legal Officer for Retirement Services and Prudential Asia. Mr. Harris was the Chief Risk Officer for Prudential Investments from 1999 to 2003. Prior to joining Prudential, he was associated with Cadwalader, Wickersham & Taft in New York, where he provided transactional and regulatory advice to investment banks, broker-dealers, banks and commodities firms.

Charles F. Lowrey was elected Executive Vice President and Chief Operating Officer, International Businesses, of Prudential Financial and Prudential Insurance in March 2014. He served as Executive Vice President and Chief Operating Officer, U.S. Businesses, of Prudential Financial and Prudential Insurance from February 2011 to March 2014. He also served as Chief Executive Officer and President of Prudential Investment Management, Inc. from January 2008 to February 2011; and as Chief Executive Officer of Prudential Real Estate Investors, our real estate investment management and advisory business from February 2002 to January 2008. He joined the Company in March 2001, after serving as a managing director and head of the Americas for J.P. Morgan’s Real Estate and Lodging Investment Banking group, where he began his investment banking career in 1988. He also spent four years as a managing partner of an architecture and development firm he founded in New York City.

Stephen Pelletier was elected Executive Vice President and Chief Operating Officer, U.S. Businesses, of Prudential Financial and Prudential Insurance in March of 2014. He served as the Chief Executive Officer of Prudential Group Insurance from July of 2013 to March of 2014. Mr. Pelletier has been with Prudential since 1992, serving in various positions including President of Prudential Annuities and Chairman and CEO of Prudential International Investments.

Barbara G. Koster was elected Senior Vice President, Operations and Systems, of Prudential Financial in May 2011 and has been a Senior Vice President of Prudential Insurance Company of America since February 2004. Ms. Koster joined Prudential in November 1995 as the Vice President and Chief Information Officer of Individual Life Insurance Systems and was appointed as the Chief Information Officer of Prudential in 2004. Prior to joining Prudential, Ms. Koster held several positions with Chase Manhattan Bank, including that of President of Chase Access Services.

Candace J. Woods was elected Senior Vice President and Chief Actuary of Prudential Financial and Prudential Insurance in November 2017. Prior to her current role, Ms. Woods served as Vice President and Chief Actuary for the actuarial center of excellence within Prudential Insurance. Also, Ms. Woods served as Vice President and Actuary from 2012 to 2013 and Vice President and Chief Actuary from 2013 to 2017 for the International Insurance businesses.

Nicholas C. Silitch was elected Senior Vice President and Chief Risk Officer of Prudential Financial and Prudential Insurance in May 2012. He joined Prudential in 2010 as Chief Credit Officer and head of investment risk management. Prior to joining Prudential, Mr. Silitch held the position of Chief Risk Officer of the Alternative Investment Services, Broker Dealer Services and Pershing businesses within Bank of New York Mellon.

Scott G. Sleyster was elected Senior Vice President and Chief Investment Officer of Prudential Insurance and Prudential Financial in May 2012 and February 2013, respectively. Mr. Sleyster has been with Prudential since 1987, serving in a variety of positions, including head of Prudential's Full Service Retirement business, president of Prudential's Guaranteed Products business, chief financial officer for Prudential's Employee Benefits Division, and has held roles in Prudential's Treasury, Derivatives and Investment Management units.

Lucien A. Alziari was elected Senior Vice President and Chief Human Resources Officer for Prudential Financial and Prudential Insurance in June 2017. From 2012 to the beginning of 2017, Mr. Alziari served as Executive Vice President and Chief Human Resources Officer of A.P. Moller-Maersk. From 2004 to 2012, he was the Chief Human Resources Officer and Head of Corporate Responsibility for Avon Products, Inc. Prior to Avon Products, Inc., Mr. Alziari held roles with Mars Confectionary in the United Kingdom and PepsiCo Inc. in New York, Vienna and Dubai.

We have adopted a code of business conduct and ethics, known as “Making the Right Choices,” which applies to our Chief Executive Officer, Chief Financial Officer and our Principal Accounting Officer, as well as to our directors and all other employees. Making the Right Choices is posted on our website at www.investor.prudential.com. Our code of business conduct and ethics, any amendments and any waiver granted to any of our directors or executive officers are available free of charge on our website at www.investor.prudential.com.

In addition, we have adopted Corporate Governance Guidelines, which we refer to as our “Corporate Governance Principles and Practices.” Our Corporate Governance Principles and Practices are available free of charge on our website at www.investor.prudential.com.

Certain of the information called for by this item is hereby incorporated herein by reference to the relevant portions of Prudential Financial’s definitive proxy statement for the Annual Meeting of Shareholders to be held on May 8, 2018, to be filed by Prudential Financial with the Securities and Exchange Commission pursuant to Regulation 14A within 120 days after December 31, 2017 (the “Proxy Statement”).

ITEM 11. EXECUTIVE COMPENSATION

The information called for by this item is hereby incorporated herein by reference to the relevant portions of the Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The following table provides information as of December 31, 2017, regarding securities authorized for issuance under our equity compensation plans. All outstanding awards relate to our Common Stock. For additional information about our equity compensation plans, see Note 17 to the Consolidated Financial Statements included in this Annual Report on Form 10-K.

	(a)	(b)	(c)
	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in (a))
Equity compensation plans approved by security holders—Omnibus Plan	10,938,453	(1) \$ 67.39	(2) 23,092,637
Equity compensation plans approved by security holders—Director Plan	157,496		27,658
Equity compensation plans approved by security holders—PSPP(3)			13,665,498
Total equity compensation plans approved by security holders	11,095,949		36,785,793
Equity compensation plans not approved by security holders	0		0
Grand Total	11,095,949		36,785,793

-
- Represents 4,738,045 outstanding Options, 5,174,321 outstanding Restricted Units and 1,026,087 outstanding Performance Shares as of December 31, 2017 under our Omnibus Plan. The number of Performance Shares represents the number of shares that would be received based on maximum performance, reduced for cancellations and releases through December 31, 2017. The actual number of shares the Compensation Committee will award at the end of each performance period will range between 0% and 125% of the target number of units granted, based upon a measure of the reported performance of the Company relative to stated goals. The outstanding Performance Units will be settled only in cash and do not reduce the number of shares authorized under the Omnibus Plan, and so they are not reflected in this table.
- (1)
- (2) Represents the weighted average exercise price of the Options disclosed in column (a). The weighted average remaining contractual term of these Options is 5.55 years.
- The Prudential Financial, Inc. Employee Stock Purchase Plan is a qualified Employee Stock Purchase Plan under Section 423 of the Code, pursuant to which up to 26,367,235 shares of Common Stock were authorized for issuance, all of which have been registered on Form S-8. Under the plan, employees may purchase shares based upon quarterly offering periods at an amount equal to the lesser of (1) 85% of the closing market price of the Common Stock on the first day of the quarterly offering period, or (2) 85% of the closing market price of the Common Stock on the last day of the quarterly offering period.

Table of Contents

PRUDENTIAL FINANCIAL, INC.

Schedule II

Condensed Financial Information of Registrant

Notes to Condensed Financial Information of Registrant

1. ORGANIZATION AND PRESENTATION

Prudential Financial, Inc. (“Prudential Financial”) was incorporated on December 28, 1999, as a wholly-owned subsidiary of The Prudential Insurance Company of America (“Prudential Insurance”). On December 18, 2001, Prudential Insurance converted from a mutual life insurance company to a stock life insurance company and became an indirect, wholly-owned subsidiary of Prudential Financial.

The condensed financial statements of Prudential Financial reflect its direct wholly-owned subsidiaries using the equity method of accounting.

Certain amounts in prior years have been reclassified to conform to the current year presentation.

2. OTHER INVESTMENTS

Prudential Financial’s other investments as of December 31, 2017 and 2016 consisted primarily of highly liquid debt investments and intercompany enterprise liquidity account funds.

3. DEBT

A summary of Prudential Financial’s short- and long-term debt is as follows:

	Maturity Dates	Rate(1)	December 31,	
			2017	2016
			(\$ in millions)	
Short-term debt:				
Commercial paper(2)			\$50	\$65
Current portion of long-term debt			830	470
Total short-term debt			\$880	\$535
Long-term debt:				
Fixed rate senior notes	2019-2049	2.35%-7.38%	\$8,709	\$9,064
Floating rate senior notes	2020	3.46%-5.49%	29	508
Junior subordinated notes	2042-2068	4.50%-8.88%	6,566	5,817
Total long-term debt			\$15,304	\$15,389

(1) Ranges of interest rates are for the year ended December 31, 2017.

(2) The weighted average interest rate on outstanding commercial paper was 1.15% and 0.6% at December 31, 2017 and 2016, respectively.

Long-term Debt

In order to modify exposure to interest rate movements, Prudential Financial utilizes derivative instruments, primarily interest rate swaps, in conjunction with some of its debt issues. The impact of these derivative instruments are not reflected in the rates presented in the table above. For those derivatives that qualify for hedge accounting treatment,

interest expense increased by \$1 million, \$2 million, and \$3 million for each of the years ended December 31, 2017, 2016 and 2015, respectively.

Schedule of Long-term Debt Maturities

The following table presents Prudential Financial's contractual maturities for long-term debt as of December 31, 2017:

	Calendar Year					
	2019	2020	2021	2022	2023 and thereafter	Total
	(\$ in millions)					
Long-term debt	\$1,100	\$1,179	\$400	\$ 0	\$ 12,625	\$15,304

Table of Contents

4. DIVIDENDS AND RETURNS OF CAPITAL

For the years ended December 31, Prudential Financial received cash dividends and/or returns of capital from the following companies:

	2017	2016	2015
	(in millions)		
Pruco Reinsurance	\$0	\$1,298	\$0
Prudential Annuities Holding Company	145	98	102
International Insurance and Investments Holding Companies	546	1,171	1,818
Prudential Insurance Company of America	1,000	900	1,950
Prudential Investment Management	467	746	266
Prudential Annuities Life Assurance Corporation	950	1,140	450
Other Holding Companies	16	231	46
Total	\$3,124	\$5,584	\$4,632

5. COMMITMENTS AND GUARANTEES

Prudential Financial has issued a subordinated guarantee covering a subsidiary's domestic commercial paper program. As of December 31, 2017, there was \$500 million outstanding under this commercial paper program.

Prudential Financial has provided guarantees of the payment of principal and interest on intercompany loans between affiliates. As of December 31, 2017, Prudential Financial had issued guarantees of outstanding loans totaling \$3.9 billion between International Insurance subsidiaries and other affiliates.

In 2013, Prudential Financial entered into a \$500 million indemnity and guarantee agreement with Wells Fargo Bank Northwest, N.A. Under this agreement, Prudential Financial guaranteed obligations with respect to an affiliated loan from PICA to an affiliate. The loan proceeds were utilized to construct Prudential's new home office in Newark, New Jersey.

Prudential Financial is also subject to other financial guarantees, net worth maintenance agreements and indemnity arrangements, including those made in the normal course of businesses guaranteeing the performance of, or representations made by, Prudential Financial subsidiaries. Prudential Financial has provided indemnities and guarantees related to acquisitions and dispositions, investments, debt issuances and other transactions, including those provided as part of its ongoing operations that are triggered by, among other things, breaches of representations, warranties or covenants provided by Prudential Financial or its subsidiaries. These obligations are typically subject to various time limitations, defined by the contract or by operation of law, such as statutes of limitation. In some cases, the maximum potential obligation is subject to contractual limitations, while in other cases such limitations are not specified or applicable. Since certain of these obligations are not subject to limitations, it is not possible to determine the maximum potential amount due under these guarantees. At December 31, 2017, Prudential Financial has no accrued liabilities associated with other financial guarantees and indemnity arrangements.

6. REDEMPTION OF CLASS B SHARES

From demutualization through December 31, 2014, Prudential Financial had two classes of common stock outstanding. The Common Stock, which is publicly-traded (NYSE:PRU), reflected the performance of the Financial Services Businesses, while the Class B Stock, which was issued through a private placement and did not trade on any

exchange, reflected the performance of the Closed Block Business.

On January 2, 2015, pursuant to a Share Repurchase Prudential Agreement entered into on December 1, 2014, between the Company and the holders of the Class B stock, the Company repurchased and canceled all of the shares of the Class B Stock for an aggregate cash purchase price of \$651 million, resulting in the elimination of the Class B stock held in treasury, a \$484 million decrease in “Retained Earnings” and a \$167 million decrease in “Additional paid-in-capital.”

In accordance with the terms of the Share Repurchase agreement, the holders of the Class B Stock subsequently exercised their right to dispute the calculation of the purchase price. This dispute was resolved during the first quarter of 2016, resulting in an increase to the cash purchase price of \$119 million, bringing the total aggregate purchase price to \$770 million. The increase to the cash purchase price resulted in a corresponding decrease in “Retained Earnings.”
