

ABAXIS INC
Form 10-K
June 14, 2012

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 or 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended March 31, 2012

or

TRANSITION REPORT PURSUANT TO SECTION 13 or 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

Commission File Number 000-19720

ABAXIS, INC.
(Exact name of registrant as specified in its charter)

California
(State or other jurisdiction of incorporation or
organization)

77-0213001
(I.R.S. Employer Identification No.)

3240 Whipple Road, Union City, California
(Address of principal executive offices)

94587
(Zip code)

Registrant's telephone number, including area code: (510) 675-6500
Securities registered pursuant to Section 12(b) of the Act:

Title of Class
Common Stock, no par value

Name of Each Exchange on Which Registered
The NASDAQ Stock Market, Inc.

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the
Act.
Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the
Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was
required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.
Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if
any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during
the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).
Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained

Edgar Filing: ABAXIS INC - Form 10-K

herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer o Accelerated filer x Non-accelerated filer o Smaller reporting company o
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes o No x

The aggregate market value of the voting stock held by non-affiliates of Abaxis as of September 30, 2011, the last business day of the second fiscal quarter, was \$250,069,000 based upon the closing sale price reported for such date on the NASDAQ Global Market. For purposes of this disclosure, 10,738,000 shares of common stock held by persons who hold more than 5% of the outstanding shares of the registrant's common stock and shares held by executive officers and directors of the registrant have been excluded because such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily conclusive for any other purpose and exclusion of such shares should not be construed to indicate that any such person possesses the power, direct or indirect, to direct or cause the direction of the management or policies of the registrant or that such person is controlled by or under common control with the registrant.

As of June 11, 2012, there were 21,889,000 shares of the registrant's common stock outstanding.

Abaxis, Inc.

Annual Report on Form 10-K
For The Fiscal Year Ended March 31, 2012

multiple analytes and contains all the reagents necessary to perform a fixed menu of tests. By using a blood analysis system near the patient-care site instead of shipping the sample to a central laboratory, blood testing and analysis becomes as easy as measuring the patient's blood pressure, temperature, and heart rate and eliminates the necessity of multiple visits to the doctor's office. Additional advantages of near-patient testing include increasing practice efficiencies and throughput, as well as eliminating errors from sample handling, transcription and transportation. We have adapted this blood analysis system in both the human medical and veterinary markets in order to bring the same advantages to all health care professionals and patients.

ABAXIS PRODUCTS AND SERVICES

We manage our business in two operating segments, the medical market and veterinary market. Revenues in the medical market accounted for 19%, 20% and 19% of our total revenues for fiscal 2012, 2011 and 2010, respectively. Revenues in the veterinary market accounted for 78%, 75% and 74% of our total revenues for fiscal 2012, 2011 and 2010, respectively. See Note 16, "Segment Reporting Information," of the Notes to Consolidated Financial Statements for additional financial information about our segments.

Table of Contents

Point-of-Care Blood Chemistry Analyzers

Our primary product is a blood analysis system, consisting of a compact portable analyzer and a series of single-use plastic discs, called reagent discs, containing all the chemicals required to perform a panel of up to 14 tests on human patients and 13 tests on veterinary patients. The system can be operated with minimal training and performs multiple routine general chemistry tests on whole blood, serum or plasma samples. The system provides test results in approximately 12 minutes with the precision and accuracy equivalent to a clinical laboratory analyzer. We manufacture the system in our manufacturing facility in Union City, California and we market our blood chemistry analyzers in both the medical market and in the veterinary market, as described below.

- **Medical Market:** We currently market the blood analysis system in the medical market under the name Piccolo Xpress. Through October 2006, we marketed the blood analysis system in the medical market as the Piccolo, now referred to as the Piccolo Classic. We continue to support and service our current population of Piccolo Xpress and Piccolo Classic chemistry analyzers.
- **Veterinary Market:** We currently market the blood analysis system in the veterinary market under the name VetScan VS2. Through March 2006, we marketed the blood analysis system in the veterinary market as the VetScan, now referred to as the VetScan Classic. We continue to support and service our current population of VetScan VS2 and VetScan Classic chemistry analyzers.

Reagent Discs

The reagent discs used with the blood chemistry analyzers are designed to handle almost all technical steps of blood chemistry testing automatically. The discs first separate a whole blood sample into plasma and blood cells, meter the required quantity of plasma and diluent, mix the plasma and diluent, and deliver the mixture to the reagent chambers, called cuvettes, along the disc perimeter. The diluted plasma dissolves and mixes with the reagent beads initiating the chemical reactions, which are monitored by the analyzer. The discs are 8-cm diameter, single-use devices constructed from three ultrasonically welded injection-molded plastic parts. The base and the middle piece create the chambers, cuvettes and passageways for processing the whole blood and mixing plasma with diluent and reagents. The top piece, referred to as the bar code ring, is imprinted with bar codes that contain disc-specific calibration information. In the center of the disc is a plastic diluent container sealed with polyethylene-laminated foil. Spherical lyophilized reagent beads are placed in the cuvettes during disc manufacturing. Upon completion of the analysis, used discs may be placed back into their foil pouches to minimize human contact with blood prior to proper disposal.

To perform a panel of tests, the operator collects a blood sample, then transfers the sample into the reagent disc. The operator places the disc into the analyzer drawer, and enters patient, physician, and operator information. The analyzer spins the disc to separate cells from plasma, meters and mixes plasma with diluent, distributes diluted plasma to the cuvettes, and monitors chemical reactions. In approximately 12 minutes, results are printed or can be transmitted to a patient data management system for inclusion in the patient's medical record. A computer port enables transmission of patient results to external computers for patient data management.

We offer our blood analysis system with a total of 29 diagnostic tests. Our test methods are as follows:

| Test Methods | | Test Methods | |
|--------------------------|-----|--------------------------------------|------|
| Alanine aminotransferase | ALT | High-density lipoprotein cholesterol | HDL |
| Albumin | ALB | Lactate dehydrogenase | LD |
| Alkaline phosphatase | ALP | Magnesium | MG |
| Amylase | AMY | Phosphorous | PHOS |

Edgar Filing: ABAXIS INC - Form 10-K

| | | | |
|----------------------------|------|----------------------|------|
| Aspartate aminotransferase | AST | Potassium | K+ |
| Bile acids | BA | Sodium | NA+ |
| C-reactive protein | CRP | Thyroxine | T4 |
| Calcium | CA | Total bilirubin | TBIL |
| Canine heartworm antigen | CHW | Total carbon dioxide | tCO2 |
| Chloride | CL- | Total cholesterol | CHOL |
| Creatine kinase | CK | Total protein | TP |
| Creatinine | CRE | Triglycerides | TRIG |
| Direct bilirubin | DBIL | Urea nitrogen | BUN |
| Gamma glutamyltransferase | GGT | Uric acid | UA |
| Glucose | GLU | | |

Table of Contents

Twenty-one of these tests are marketed for both the medical and veterinary markets. The tests for CRP, DBIL, HDL, LD and TRIG are marketed exclusively in the medical market. The tests for BA, CHW and T4 are marketed exclusively in the veterinary market. We market our reagent products by configuring these 29 test methods in panels that are designed to meet a variety of clinical diagnostic needs. We offer 15 multi-test reagent disc products in the medical market and 9 multi-test reagent disc products in the veterinary market.

The reagent discs offered with our Piccolo chemistry analyzers are as follows:

| Piccolo Profiles | Description of the Test Panels |
|---|---|
| Basic Metabolic Panel (CLIA waived) | BUN, CA, CL-, CRE, GLU, K+, NA+, tCO ₂ . |
| Basic Metabolic Panel Plus | BUN, CA, CL-, CRE, GLU, K+, LD, MG, NA+, tCO ₂ . |
| BioChemistry Panel Plus (1) | ALB, ALP, ALT, AMY, AST, BUN, CA, CRE, CRP, GGT, GLU, TP, UA. |
| Comprehensive Metabolic Panel (CLIA waived) | ALB, ALP, ALT, AST, BUN, CA, CL-, CRE, GLU, K+, NA+, TBIL, tCO ₂ , TP. |
| Electrolyte Panel (CLIA waived) | CL-, K+, NA+, tCO ₂ . |
| General Chemistry 6 (CLIA waived) | ALT, AST, BUN, CRE, GGT, GLU. |
| General Chemistry 13 (CLIA waived) | ALB, ALP, ALT, AMY, AST, BUN, CA, CRE, GGT, GLU, TBIL, TP, UA. |
| Hepatic Function Panel | ALB, ALP, ALT, AST, DBIL, TBIL, TP. |
| Kidney Check (CLIA waived) (1) | BUN, CRE. |
| Lipid Panel (CLIA waived) | CHOL, CHOL/HDL RATIO, HDL, LDL, TRIG, VLDL. |
| Lipid Panel Plus (CLIA waived) | ALT, AST, CHOL, CHOL/HDL RATIO, GLU, HDL, LDL, TRIG, VLDL. |
| Liver Panel Plus (CLIA waived) | ALB, ALP, ALT, AMY, AST, GGT, TBIL, TP. |
| MetLyte 8 Panel (CLIA waived) | BUN, CK, CL-, CRE, GLU, K+, NA+, tCO ₂ . |
| MetLyte Plus CRP (1) | BUN, CK, CL-, CRE, CRP, GLU, K+, NA+, tCO ₂ . |
| Renal Function Panel (CLIA waived) | ALB, BUN, CA, CL-, CRE, GLU, K+, NA+, PHOS, tCO ₂ . |

(1) The panel is offered only on our Piccolo Xpress.

“CLIA waived” means the U.S. Food and Drug Administration (“FDA”) has granted our application to classify the product as having waived status with respect to the Clinical Laboratory Improvement Amendments of 1988 (“CLIA”). See “Government Regulation” in this section for additional information on CLIA.

The reagent discs offered with our VetScan chemistry analyzers are as follows:

| VetScan Profile | Description of the Test Panels |
|---|---|
| Avian/Reptilian Profile Plus | ALB, AST, BA, CA, CK, GLOB, GLU, K+, NA+, PHOS, TP, UA. |
| Canine Wellness Profile including Heartworm (1) | ALB, ALP, ALT, BUN, CA, CHW, CRE, GLOB, GLU, PHOS, TBIL, TP. |
| Comprehensive Diagnostic Profile | ALB, ALP, ALT, AMY, BUN, CA, CRE, GLOB, GLU, K+, NA+, PHOS, TBIL, TP. |
| Critical Care Plus | ALT, BUN, CL-, CRE, GLU, K+, NA+, tCO ₂ . |
| Equine Profile Plus | ALB, AST, BUN, CA, CK, CRE, GGT, GLOB, GLU, K+, NA+, TBIL, tCO ₂ , TP. |
| Large Animal Profile | ALB, ALP, AST, BUN, CA, CK, GGT, GLOB, MG, PHOS, TP. |
| Mammalian Liver Profile | ALB, ALP, ALT, BA, BUN, CHOL, GGT, TBIL. |

| | |
|--------------------------------------|------------------------------|
| Prep Profile II | ALP, ALT, BUN, CRE, GLU, TP. |
| Thyroxine (T4) / Cholesterol Profile | CHOL, T4. |

(1) The panel is offered only on our VetScan VS2.

Hematology

We have marketed a veterinary hematology instrument under the name VetScan HM5 since September 2007. The VetScan HM5 offers a 22-parameter complete blood count (“CBC”) analysis, including a five-part differential cell counter specifically designed for veterinary applications. We also market the VetScan HM2, a veterinary hematology instrument that offers an 18-parameter CBC analysis, including a three-part white blood cell differential, marketed originally as the VetScan HMII. We currently purchase these hematology instruments from Diatron MI PLC (“Diatron”) of Budapest, Hungary. Through April 2004, we marketed a veterinary hematology instrument under the name VetScan HMT. We continue to support and service our current population of VetScan HM5, VetScan HM2, VetScan HMII and VetScan HMT hematology instruments. We also market reagent kits to be used with our hematology instruments which we currently purchase from two suppliers: Clinical Diagnostic Solutions, Inc. and Diatron.

Table of Contents

Coagulation and Specialty

We have marketed a veterinary coagulation and specialty analyzer under the name VetScan VSpro since January 2009. The VetScan VSpro assists in the diagnosis and evaluation of suspected bleeding disorders, toxicity/poisoning, evaluation of disseminated intravascular coagulation, hepatic disease and in monitoring therapy and the progression of disease states. The point-of-care coagulation and specialty analyzer is offered with a combination assay (PT/aPTT test cartridge) for canine and feline testing. In December 2010, we introduced the VetScan VSpro Fibrinogen Test, to provide quantitative in-vitro determination of fibrinogen levels in equine platelet poor plasma from a citrated stabilized whole blood sample. The VetScan VSpro Fibrinogen Test is designed for use with the VSpro coagulation and specialty analyzer. We currently purchase the coagulation and specialty analyzers and related cartridges from Scandinavian Micro Biodevices APS (“SMB”) of Farum, Denmark.

i-STAT

We have marketed i-STAT instruments and related cartridges in the veterinary market since fiscal 2010. The VetScan i-STAT 1 delivers blood gas, electrolyte, basic blood chemistry and hematology results in minutes from two drops of whole blood. In May 2009, we entered into an exclusive agreement with Abbott Point of Care Inc. (“Abbott”), granting us the right to sell and distribute Abbott’s i-STAT® 1 handheld instrument and associated consumables for blood gas, electrolyte, basic blood chemistry and immunoassay testing in the animal health care market worldwide.

Rapid Tests

In the veterinary market, our VetScan Rapid Test product line consists of individual rapid tests that aid in the detection of various specific diseases. We offer the following VetScan Rapid Tests, which deliver easy to read results in approximately ten minutes, as described below.

- **Canine Heartworm Rapid Test:** In January 2009, we introduced the VetScan Canine Heartworm Rapid Test, a highly sensitive and specific test for the detection of *Dirofilaria immitis* in canine whole blood, serum or plasma. The lateral flow immunoassay technology in the canine heartworm rapid tests provides immediate results.
- **Canine Parvovirus Rapid Test:** In March 2011, we introduced the VetScan Canine Parvovirus Rapid Test, a qualitative test for the detection of canine parvovirus antigen in feces. The VetScan Canine Parvovirus Rapid Test uses a unique combination of monoclonal antibodies that provides the detection of parvovirus antigen, allowing the veterinarian to screen for and diagnose the infection.
- **Giardia Rapid Test:** In May 2011, we introduced the VetScan Giardia Rapid Test, which detects giardiasis, a gastrointestinal infection caused by the protozoan parasite *Giardia*. Symptoms of *Giardia* infection include diarrhea and weight loss and infection is also more common in younger pets.
- **Canine Lyme Rapid Test:** In March 2012, we introduced the VetScan Canine Lyme Rapid Test, which detects *Borrelia burgdorferi* in canine whole blood, serum or plasma.

Abaxis Veterinary Reference Laboratories

We began developing Abaxis Veterinary Reference Laboratories (“AVRL”), a full-service veterinary laboratory testing facility based in Olathe, Kansas during fiscal 2011, based on a strategic alliance we established with Kansas State University, K-State Veterinary Diagnostic Lab and a commercial affiliate of Kansas State University, the National Institute for Strategic Technology Acquisition and Commercialization. In October 2011, AVRL began providing veterinary reference laboratory diagnostic and consulting services for veterinarians in the United States. AVRL also

focuses on providing specialty and esoteric testing and analysis. This service complements our full suite of on-site laboratory instrumentation and rapid diagnostics for in hospital routine, critical care and emergency medicine laboratory needs.

Orbos Process

The dry reagents used in our reagent discs are produced using a proprietary technology called the Orbos® Discrete Lyophilization Process (the “Orbos process”). This process allows the production of a precise amount of active chemical ingredient in the form of a soluble bead. The Orbos process involves flash-freezing a drop of liquid reagent to form a solid bead and then freeze-drying the bead to remove water. The Orbos beads are stable in dry form and dissolve rapidly in aqueous solutions. We believe that the Orbos process has broad applications in products where delivery of active ingredients in a stable, pre-metered format is desired. We have licensed the technology underlying the Orbos process to various third parties. Additionally, we have a supply contract with Becton, Dickinson and Company for products using the Orbos process. Revenues from these arrangements, however, are unpredictable. We continue to explore potential applications with other companies, although there can be no assurance that we will be able to develop any new applications for the Orbos process.

Table of Contents

Future Products and Services

We continue to develop new products and services that we believe will provide further opportunities for growth in the human medical and veterinary markets. Development of tests for point-of-care diagnostics will be targeted at specific applications based on fulfilling clinical needs.

CUSTOMERS AND DISTRIBUTION

We market and sell our products worldwide by maintaining direct sales forces and through independent distributors. We primarily sell our veterinary reference laboratory diagnostic and consulting services in the United States through our direct sales force and may enter into arrangements to sell through other channels within North America where appropriate. Our sales force is primarily located in the United States. Abaxis Europe GmbH, our wholly-owned subsidiary in Germany, markets and distributes diagnostic systems for medical and veterinary uses in the European market. Sales and marketing expenses were \$39.6 million, \$34.4 million and \$30.1 million, or 25%, 24% and 24% of our total revenues, in fiscal 2012, 2011 and 2010, respectively. See Note 17, "Revenues by Product and Service Category and Geographic Region and Significant Concentrations," of the Notes to Consolidated Financial Statements for additional financial information by geographic area.

Customers

Depending on the needs of a customer segment, we sell our point-of-care analyzers and reagent discs either directly or through distributors. In the delivery of human or veterinary care, there are many kinds of providers and a multitude of sites where Abaxis products could be used as an alternative to relying on a central laboratory for blood test information, as described below.

Medical Market

We believe that our Piccolo chemistry analyzer, consisting of a menu of 30 reagent test results (includes four calculated tests), is suitable for a wide variety of the human medical market segments. These market segments include military installations (ships, field hospitals and mobile care units), physicians' office practices across all specialties, urgent care, outpatient and walk-in clinics (free-standing or hospital-connected), health screening operations, home care providers (national, regional or local), nursing homes, ambulance companies, oncology treatment clinics, dialysis centers, pharmacies and hospital laboratories.

Veterinary Market

We believe that our VetScan product and service offerings meet a substantial part of the clinical diagnostic needs of veterinarians and the research marketplace. Potential customers for our VetScan products include companion animal hospitals, animal clinics with mixed practices of small animals, birds and reptiles, equine and bovine practitioners, veterinary emergency clinics, veterinary referral hospitals, universities, government, pharmaceutical companies, biotechnology companies and private research laboratories.

Distribution Within North America

Medical Market

We sell our human-oriented products directly to those customers who serve large human patient populations such as the military, hospitals and accountable care organizations. As a result of health care reform, we anticipate a consolidation of providers with more centralized purchasing of medical products based on the standardization of care

and the use of patient outcome studies to influence purchase decisions. We plan to achieve our direct sales objectives by employing highly skilled sales specialists and sales teams to work closely with providers in performing studies to show that the use of the Piccolo blood chemistry analyzer can assist in providing better outcomes and practice efficiencies, compared to laboratory alternatives.

Distribution alternatives in the human medical market can contribute to identifying potential customers and introducing the product, but often need the support of our personnel in completing the sale. Product distributors are generally of two types: (i) companies that primarily serve hospitals, clinics and accountable care organizations, (ii) companies that provide the daily supplies needed by office-based physicians. Both segments support their customers by using multiple warehouses and extensive transportation systems. Large distributors with local and regional companies can service the office-based physicians market segment as well. In the human medical market, these national firms sell thousands of products, including furniture, capital equipment, surgical instruments and a myriad of consumables. In the United States, we have entered into formal distribution agreements with the following distributors to sell and market Piccolo chemistry analyzers and medical reagent discs: Henry Schein's Medical Group, McKesson Medical-Surgical Inc., and PSS World Medical, Inc. We also sell directly to large national customers in the medical market.

Table of Contents

Veterinary Market

Veterinarians are served typically by local distributors, some with national affiliations. We work with various independent distributors to sell our instruments and consumable products. In the United States, we have primarily regional distributors, which includes, among others, Lextron, Inc. (d/b/a Animal Health International), IVESCO LLC, Merritt Veterinary Supply, Inc., Northeast Veterinary Supply, Penn Veterinary Supply, Inc., and Western Medical Supply, Inc. In addition to selling through distributors, we directly supply our VetScan products to Veterinary Centers of America (VCA), a large veterinary hospital chain. In Canada, our distributors of products in the veterinary market include the following: Associated Veterinary Purchasing, Aventix, CDMV, Distribution Vie et Sante (which was recently acquired by CDMV), Midwest Veterinary Distribution Cooperative Limited, Vet Novations, Veterinary Purchasing Company Limited and Western Drug Distribution Center Limited.

Distribution Outside of North America

Our international sales and marketing objectives include identifying and defining the market segments in each country by product and then focusing on specific objectives for each segment in each country. These specific objectives include modification and expansion of distribution and distributor training and monitoring to ensure the attainment of sales goals.

We currently have distributors for our products in the following foreign countries: Afghanistan, Australia, Austria, Belgium, Czech Republic, Denmark, France, Germany, Hong Kong, India, Ireland, Israel, Italy, Japan, Korea, Macao, the Netherlands, New Zealand, the Philippines, Portugal, Romania, Russia, Singapore, South Africa, Spain, Sweden, Switzerland, Turkey, the United Arab Emirates and the United Kingdom. Our distributor in each of these countries is responsible for obtaining the necessary approvals to sell our new and existing products.

Revenues in Europe accounted for 14%, 14% and 15% of our total revenues for fiscal 2012, 2011 and 2010, respectively. Revenues in Asia Pacific and rest of the world accounted for 4%, 4% and 4% of our total revenues for 2012, 2011 and 2010, respectively.

MANUFACTURING

We manufacture our Piccolo and VetScan chemistry analyzers and reagent discs at our facility located in Union City, California. We utilize standardized manufacturing processes, quality control and cost reduction and inventory management programs for our manufacturing operations. Our manufacturing activities are concentrated in the following three primary areas:

- **Point-of-Care Blood Chemistry Analyzers:** The analyzer used in the Piccolo and VetScan systems employs a variety of components designed or specified by us, including a variable speed motor, microprocessors, a liquid crystal display, a printer, a spectrophotometer and other electronic components. These components are manufactured by several third-party suppliers that have been qualified and approved by us and then assembled by our contract manufacturers. The components are assembled at our facility in Union City, California into the finished product and completely tested to ensure that the finished product meets product specifications. Our blood analyzer products use several technologically-advanced components that we currently purchase from a limited number of suppliers, including certain components from single-source suppliers, Hamamatsu Corporation and UDT Sensors (a division of OSI Optoelectronics). Our analyzers also use a printer that is primarily made by Seiko North America Corporation. We do not have supply agreements with any of these companies and they are not contractually obligated to continue supplying us with components in the quantities or at the prices that such companies have historically provided.

- **Reagent Discs:** The molded plastic discs used in the manufacture of the reagent disc are manufactured to our specifications by established injection-molding manufacturers. To achieve the precision required for accurate test results, the discs must be molded to very strict tolerances. To date, we have qualified two injection-molding manufacturers, C. Brewer & Co. and Nypro, Inc. to make the molded plastic discs that, when loaded with reagents and welded together, form our reagent disc products. We do not have supply agreements with either of these companies and they are under no contractual obligation to continue supplying us with discs either in the quantities or at the prices that such companies have historically provided. We are also working with our suppliers to improve yields and increase capacity on the existing production molds. While we have increased the number of disc molding tools to strengthen and better protect our line of supply, an inability by our injection-molding manufacturers to supply sufficient discs would have a material adverse impact on our results of operations. We assemble the reagent discs by loading the molded plastic discs with reagents and then ultrasonically welding together the top and bottom pieces.

Table of Contents

• **Reagent Beads / Reagents:** Our reagent discs and lateral flow rapid tests contain dry reagent chemistry beads, diluents and reagents necessary to perform blood analyses. We purchase chemicals from third-party suppliers and formulate the raw materials, using proprietary processes, into beads at the proper concentration and consistency to facilitate placement in the reagent disc and provide homogeneous dissolution and mixing when contacted by the diluted sample. We are dependent on the following companies who are our single source providers of one or more chemicals that we use in the reagent production process: Amano Enzyme USA Co., Ltd., Kikkoman Corporation Biochemical Division, Microgenics Corporation, a division of Thermo Fisher Scientific, Roche Molecular Biochemicals of Roche Diagnostics Corporation, a division of F. Hoffmann-La Roche, Ltd., SA Scientific Co., Sekisui Diagnostics (formerly Genzyme Diagnostics), Sigma Aldrich Inc. and Toyobo Specialties. We do not have supply agreements with any of these companies and they are under no contractual obligation to continue supplying us in the quantities or at the price such companies have historically provided. Although we believe all of the chemicals provided by these companies would be readily available elsewhere and we continue to evaluate vendor sources to protect and improve our lines of supply, the loss of any of these companies as a supplier could materially adversely affect our manufacturing activities and results of operations.

We also market original equipment manufacturer supplied products that are currently available from limited sources as discussed below.

- **Hematology Instruments and Reagent Kits:** Our VetScan hematology instruments are manufactured by Diatron in Hungary and are purchased by us as a completed instrument. In addition, we currently have qualified two suppliers to produce the reagent kits for our hematology instruments: Clinical Diagnostic Solutions, Inc. and Diatron.
- **Coagulation and Specialty Analyzers and Cartridges:** Our VetScan VSpro coagulation and specialty analyzers and cartridges are manufactured by Scandinavian Micro Biodevices APS in Denmark and are purchased by us as completed products.
- **i-STAT Analyzers and Cartridges:** The VetScan i-STAT 1 analyzers and cartridges are manufactured by Abbott Point of Care Inc. in North America and are purchased by us as completed products.

Our contractual relationships with suppliers of our original equipment manufactured products are described in the following section.

We generally operate with a limited order backlog because our products are typically shipped shortly after orders are received. As a result, product sales in any quarter are generally dependent on orders booked and shipped in that quarter.

MATERIAL RELATIONSHIPS WITH SUPPLIERS AND OTHER THIRD PARTIES

Diatron MI PLC. Since November 2003, we have had exclusive right to distribute Diatron's veterinary hematology instruments in Australia, Canada, Japan, New Zealand and the United States. In December 2011, we executed a term sheet to enter into a development and supply equipment agreement with Diatron to purchase Diatron hematology instruments. Under the terms of this agreement, we committed to purchase a minimum number of hematology instruments on an annual basis during each calendar year 2012 through 2014, which can be amended upon agreement by both parties. At March 31, 2012, our outstanding commitment due is approximately \$12.6 million. The commitment amount is based on the minimum number of hematology instruments that we are required to purchase, the cost of the instruments and the Euro exchange rate at period-end. Since the exchange rate can fluctuate in the future, the commitment amount in absolute dollars will change accordingly.

Scandinavian Micro Biodevices APS. In October 2008, we entered into an original equipment manufacturer (“OEM”) agreement with SMB to purchase coagulation and specialty analyzers and related cartridges. Effective January 2011, we amended and restated our OEM agreement, including the terms of our minimum purchase commitments. Under the amended agreement, we committed to purchase a minimum number of coagulation and specialty analyzers and related cartridges on an annual basis during each calendar year 2011 through 2015. Our purchase obligations in the future may be adjusted if our minimum purchase commitments are not met during a calendar year period. At March 31, 2012, our total remaining outstanding commitment due is approximately \$11.3 million.

In February 2011, we purchased a 15% equity ownership interest in SMB for \$2.8 million in cash. We accounted for our investment in SMB using the equity method due to our significant influence over SMB’s operations. See the “Investment in Unconsolidated Affiliate” section of “Management’s Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies, Estimates and Judgments” appearing elsewhere in this report for additional information.

Table of Contents

Alere Switzerland GmbH. Effective January 2009, we entered into a license agreement with Inverness Medical Switzerland GmbH, now known as Alere Switzerland GmbH (“Alere”). Under our license agreement, we licensed co-exclusively certain worldwide patent rights related to lateral flow immunoassay technology in the field of animal health diagnostics in the professional marketplace. The license agreement provides that Alere shall not grant any future rights to any third parties under its current lateral flow patent rights in the animal health diagnostics field in the professional marketplace. The license agreement enables us to develop and market products under rights from Alere to address animal health and laboratory animal research markets.

In exchange for the license rights, we (i) paid an up-front license fee of \$5.0 million to Alere in January 2009, (ii) agreed to pay royalties during the term of the agreement, based solely on sales of products in a jurisdiction country covered by valid and unexpired claims in that jurisdiction under the licensed Alere patent rights, and (iii) agreed to pay a yearly minimum license fee of between \$500,000 to \$1.0 million per year, which fee will be creditable against any royalties due during such calendar year. The royalties, if any, are payable through the date of the expiration of the last valid patent licensed under the agreement that includes at least one claim in a jurisdiction covering products we sell in that jurisdiction. The yearly minimum fees became payable starting in fiscal 2011 for so long as we desire to maintain exclusivity under the agreement.

Abbott Point of Care Inc. In May 2009, we entered into an exclusive agreement with Abbott Point of Care Inc. (“Abbott”), granting us the right to sell and distribute Abbott’s i-STAT® 1 handheld instrument (i-STAT 1 analyzer) and associated consumables for blood gas, electrolyte, basic blood chemistry and immunoassay testing in the animal health care market worldwide. Our right to sell and distribute these products was initially non-exclusive, but became exclusive in all countries of the world, except for Japan, in November 2009. Our rights in Japan remain non-exclusive for the term of the agreement. The initial term of the agreement ends on December 31, 2014, and after this initial term, our agreement continues automatically for successive one-year periods unless terminated by either party. We are subject to minimum purchase and minimum sales requirement if we want to maintain as an exclusive distributor of the related products.

Animal Health International. Lextron, Inc. (d/b/a Animal Health International), one of our distributors of veterinary products in the United States, accounted for 15% of our total worldwide revenues in fiscal 2012. Animal Health International was formed in 2011 from two animal health companies, which included Walco International, Inc., d/b/a DVM Resources.

Becton, Dickinson and Company. In January 2011, we entered into a ten year supplier agreement with Becton, Dickinson and Company (“BD”) for products using Abaxis’ patented Orbos Discrete Lyophilization Process. In our agreement, BD will be subject to purchase minimum quantities on an annual basis during each calendar year 2011 through 2021, which we estimate to total approximately \$30.0 million in revenues during the ten-year period. The agreement will expire in January 2021 and may be extended.

National Institute for Strategic Technology Acquisition and Commercialization / The Kansas State University. In January 2011, we entered into agreements with affiliates of the Kansas State University relating to our anticipated establishment of AVRL. We entered into a testing services agreement with K-State Diagnostic and Analytical Services, Inc. and the Veterinary Diagnostic Laboratory operated by the Kansas State University (“KDAS/VDL”). Pursuant to this agreement, KDAS/VDL will perform certain diagnostic services for AVRL at our request on a fee-for-services basis. The initial term of the agreement is five years and may be extended for additional periods if the parties desire to do so. We have certain rights to terminate this agreement early. We also entered into a Master Agreement with the National Institute for Strategic Technology Acquisition and Commercialization (“NISTAC”) and the Kansas State University Research Foundation (“KSURF”), pursuant to which we will pay royalties to KSURF on AVRL sales for ten years. If our separate testing services agreement expires or is terminated early, the royalty obligations will continue for the full ten-year period, but at a reduced rate. In addition, in January 2011, we issued to

NISTAC warrants to purchase 10,000 shares of our common stock at an exercise price of \$3.00 per share and in October 2011, we issued additional warrants to NISTAC to purchase 20,000 shares of our common stock with an exercise price of \$3.00 per share, based on the date that Abaxis first received samples from a paying customer for which KDAS/VDL could have performed one or more of the veterinary diagnostic and laboratory testing and related services contemplated by the testing services agreement. Each warrant vests at a rate of 20% annually from its issuance date and has a term of five years.

COMPETITION

Competition in the human and veterinary diagnostic markets is intense. The diagnostic market is a well-established field in which there are a number of competitors that have substantially greater financial resources and larger, more established marketing, sales and service organizations than we do. We compete primarily with the following organizations: commercial clinical laboratories, hospitals' clinical laboratories and manufacturers of bench top multi-test blood analyzers and other testing systems that health care providers can use "on-site."

Table of Contents

Historically, hospitals and commercial laboratories perform most of the human diagnostic testing, and veterinary specialized commercial laboratories perform most of the veterinary medical testing. We have identified five principal factors that we believe customers typically use to evaluate our products and those of our competitors. These factors include the following: (i) range of tests offered; (ii) immediacy of results; (iii) cost effectiveness; (iv) ease of use and (v) reliability of results. We believe that we compete effectively on each of these factors except for the range of tests offered. Clinical laboratories are effective at processing large panels of tests using skilled technicians and complex equipment. While our current offering of instruments and reagent discs cannot provide the same broad range of tests as hospitals and commercial laboratories, we believe that in certain markets, our products provide a sufficient breadth of test menus to compete successfully with clinical laboratories given the advantages of our products with respect to the other four factors.

Our principal competitors in the point-of-care human diagnostic market are Alere (formerly Inverness Medical Technologies), Alfa Wassermann S.P.A., Abbott Laboratories' i-STAT division, Johnson & Johnson (including its subsidiary, Ortho-Clinical Diagnostics, Inc.) and F. Hoffmann-La Roche Ltd. Many of our competitors in the human diagnostic market have significantly larger product lines to offer and greater financial and other resources than we do. In particular, many of these competitors have large sales forces and well-established distribution channels and brand names. Our principal competitors in the veterinary diagnostic market are Idexx Laboratories, Inc. and Heska Corporation. Idexx has a larger veterinary product line and sales force than we do and a well-established distribution network and brand name.

Our veterinary reference laboratory, AVRL, competes in the commercial laboratory arena nationwide with a full menu of laboratory diagnostics. We differentiate our services on the following factors: range of tests offered, turnaround time, cost effectiveness and reliability of results. AVRL's principal competitors are Idexx and Antech Diagnostics, a division of VCA Antech, Inc.

GOVERNMENT REGULATION

Regulation by governmental authorities in the U.S. and foreign countries is a significant factor in the manufacture and marketing of our current and future products and in our ongoing product research and development activities. We are not required to comply with all of the FDA government regulations applicable to the human medical market when manufacturing our VetScan products; however, we intend for all of our manufacturing operations to be compliant with the Quality System Regulation to help ensure product quality and integrity regardless of end use or patient. As we continue to sell in foreign markets, we may have to obtain additional governmental clearances in those markets. The government regulations for our medical and veterinary products vary.

U.S. Food and Drug Administration Clearance

Our Piccolo products are medical devices subject to regulation by the FDA, under the Federal Food, Drug, and Cosmetic Act ("FDCA"). Medical devices, to be commercially distributed in the United States, must receive either 510(k) premarket clearance or Premarket Approval ("PMA") from the FDA pursuant to the FDCA prior to marketing. Devices deemed to pose relatively less risk are placed in either class I or II, which generally requires the manufacturer to submit a premarket notification requesting permission for commercial distribution; this is known as 510(k) clearance. Most lower risk, or class I, devices are exempted from this requirement. Devices deemed by the FDA to pose the greatest risk, such as life-sustaining, life supporting or implantable devices, or devices deemed not substantially equivalent to a previously 510(k) cleared device or a preamendment class III device for which PMA applications have not been called, are placed in class III requiring PMA approval. The FDA has classified our Piccolo products as class I or class II devices, depending on their specific intended uses and indications for use.

510(k) Clearance Pathway

To obtain 510(k) clearance, a manufacturer must submit a premarket notification demonstrating that the proposed device is substantially equivalent in intended use, principles of operation, and technological characteristics to a previously 510(k) cleared device or a device that was in commercial distribution before May 28, 1976 for which the FDA has not called for submission of PMA applications. The FDA's 510(k) clearance pathway usually takes from three to six months, but it can take longer.

After a device receives 510(k) clearance, any modification that could significantly affect its safety or effectiveness, or that would constitute a major change in its intended use, requires a new 510(k) clearance or could require a PMA approval. The FDA requires each manufacturer to make this determination in the first instance, but the FDA can review any such decision. If the FDA disagrees with a manufacturer's decision not to seek a new 510(k) clearance, the agency may retroactively require the manufacturer to seek 510(k) clearance or PMA approval. The FDA also can require the manufacturer to cease marketing and/or recall the modified device until 510(k) clearance or PMA approval is obtained, to redesign the device or to submit new data or information to the FDA. Products marketed following the FDA clearance also are subject to significant postmarket requirements.

Table of Contents

As of March 31, 2012, we have received the FDA premarket clearance for our Piccolo chemistry analyzer and 26 reagent tests that we have on 15 reagent discs. We are currently developing additional tests which we will have to clear with the FDA through the 510(k) notification procedures. These new test products are crucial for our continued success in the human medical market. If we do not receive 510(k) clearance for a particular product, we will not be able to market that product in the United States until we provide additional information to the FDA and gain premarket clearance. The inability to market a new product during this time could harm our future sales.

Clinical Laboratory Improvement Act Regulations

Our Piccolo products are also affected by the CLIA. The CLIA Regulations are intended to ensure the quality and reliability of all medical testing in the United States regardless of where the tests are performed. The current CLIA regulations divide laboratory tests into three categories: “waived,” “moderately complex” and “highly complex.” Four of the tests performed using the Piccolo system are in the “moderately complex” category. This category requires that any location in which testing is performed be certified as a laboratory. Hence, we can only sell some Piccolo products to customers who meet the standards of a laboratory. To receive “laboratory” certification, a testing facility must be certified by the Centers for Medicare and Medicaid Services. After the testing facility receives a “laboratory” certification, it must then meet the CLIA regulations. Because we can only sell some Piccolo products to testing facilities that are certified “laboratories,” the market for some products is correspondingly constrained.

We can currently offer the following Piccolo reagent discs as waived tests to the medical market: Basic Metabolic Panel, Comprehensive Metabolic Panel, Electrolyte Panel, General Chemistry 6, General Chemistry 13, Kidney Check, Lipid Panel, Lipid Panel Plus, Liver Panel Plus, MetLyte 8 Panel and Renal Function Panel. Waived status permits untrained personnel to run the Piccolo chemistry analyzer using these tests; thus, extending the sites (doctors’ offices and other point-of-care environments) that can use the Piccolo chemistry analyzer. Although we are engaged in an active program to test and apply for CLIA waivers for additional analytes, we cannot assure you that we will successfully receive CLIA waived status from the FDA for other products. Consequently, for the reagent discs that have not received CLIA waived status, the market for our Piccolo products may be confined to those testing facilities that are certified as “laboratories” and our growth would be limited accordingly.

Animal and Plant Health Inspection Service Licensure of Veterinary Biologics

Our canine heartworm antigen (“CHW”) diagnostic product is regulated as a veterinary biologic under the Virus, Serum, and Toxin Act of 1913. In October 2009, we announced that we received licensure of our CHW test utilizing a rotor-based assay system consisting of eleven other important canine health determinations from the Animal and Plant Health Inspection Service (“APHIS”). Veterinary biologics are licensed as are their manufacturing facilities. Products are subject to extensive testing to establish their purity, safety, potency, and efficacy. Licensed biologics are also required to be prepared in accordance with a filed Outline of Production, among other requirements. Failure to comply with APHIS licensure or post-marketing approval requirements can result in the inability to obtain product or establishment licenses or cause the revocation or suspension of such licenses.

In February 2012, we received a second license from APHIS for our lateral flow test for VetScan Canine Lyme Rapid Test, a highly sensitive and specific test for the detection of *Borrelia burgdorferi* in canine whole blood, serum or plasma. We are currently developing additional tests that will be subject to APHIS licensure as veterinary biologics. If we do not receive licensure for these additional tests, we will not be able to market those products in the United States and our growth would be limited accordingly.

Manufacturing Regulations and Various Federal, State, Local and International Regulations

The 1976 Medical Device Amendment also requires us to manufacture our Piccolo products in accordance with Good Manufacturing Practices guidelines. Current Good Manufacturing Practice requirements are set forth in the 21 CFR 820 Quality System Regulation. These requirements regulate the methods used in, and the facilities and controls used for the design, manufacture, packaging, storage, installation and servicing of our medical devices intended for human use. Our manufacturing facility is subject to periodic inspections. In addition, various state regulatory agencies may regulate the manufacture of our products. To date, we have complied with the following federal, state, local and international regulatory requirements:

- United States Food and Drug Administration (“FDA”): In March 2012, December 2010, August 2008, September 2005 and March 2003, the FDA conducted a facility inspection and verified our compliance with the 21 CFR 820 Regulation.
- United States Department of Agriculture: In October 2009, we received a United States Veterinary Biologics Establishment License from the United States Department of Agriculture.
- State of California Food and Drug Branch (“FDB”): In April 2001, the FDB granted our manufacturing facility “in compliance” status, based on the regulations for Good Manufacturing Practices for medical devices. In May 2001, the FDB granted licensing for our manufacturing facility in Union City, California. In December 2010, the FDB conducted a routine facility inspection and verified our compliance with Good Manufacturing Practices for medical devices.

Table of Contents

- International Organization for Standardization (“ISO”): In May 2002, we received our ISO 9001 certification, expanding our compliance with international quality standards. In December 2003, we received ISO 13485 Quality System certification as required by the 2003 European In Vitro Device Directive. This certified our quality system specifically to medical devices. In April 2005, we received the Canadian Medical Device Conformity Assessment System stamp on our ISO 13485 certificate to signify compliance with Health Canada regulations. In October 2009, we received our recertification to the ISO 13485:2003 Quality System Standard for medical devices. In May 2010 and May 2011, we were recommended for continued certification to ISO 13485:2003 by our current ISO registrar.

Federal, state, local and international regulations regarding the manufacture and sale of health care products and diagnostic devices may change. In addition, as we continue to sell in foreign markets, we may have to obtain additional governmental clearances in those markets. Although we believe we are in compliance with these laws and regulations in all material respects, we cannot provide assurance that we will not be required to incur significant costs to comply with these and other laws or regulations in the future.

RESEARCH AND DEVELOPMENT

Research and development activities relate to development of new tests and test methods, clinical trials, product improvements and optimization and enhancement of existing products. Our research and development expenses, which consist of personnel costs, consulting expenses and materials and other related expenses, were \$12.2 million, \$12.0 million and \$10.7 million, or 8%, 8% and 9% of our total revenues, in fiscal 2012, 2011 and 2010, respectively.

PATENTS AND PROPRIETARY TECHNOLOGIES

We have pursued the development of a patent portfolio to protect our proprietary technology. Our policy is to file patent applications to protect technology, inventions and improvements that are important to the development of our business. We also rely upon trade secrets, know-how, continuing technological innovations and licensing opportunities to develop and maintain competitive position. As of March 31, 2012, 57 patent applications have been filed on our behalf with the United States Patent and Trademark Office, of which 33 patents have been issued and 23 patents are currently active. The expiration dates of our active patents with the United States Patent and Trademark Office range from April 2012 to February 2030. In addition, we have 21 issued and active foreign patents and 10 foreign applications pending, of which five are Patent Cooperation Treaty international applications to be filed nationally in foreign countries.

EMPLOYEES

As of March 31, 2012, we employed 491 full-time employees distributed across the following divisions: 61 in research and development; 186 in manufacturing operations; and 244 in sales, general and administrative. None of our employees is covered by a collective bargaining agreement and we consider our relations with our employees to be good.

INFORMATION AVAILABLE TO INVESTORS

We make available, free of charge on or through our Internet address located at www.abaxis.com, our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC. In addition, copies of our reports, proxy statements and other information filed electronically with the SEC may be accessed at <http://www.sec.gov>. The public may also submit a written request to the SEC, Office of FOIA/PA Operations, 100 F Street, NE, Washington, DC 20549. This information may also be obtained by calling the SEC at 202-551-8300, by sending an electronic message to the SEC at publicinfo@sec.gov or by sending a fax to the SEC at 202-772-9337.

Item 1A. Risk Factors

RISK FACTORS THAT MAY AFFECT OUR PERFORMANCE

Our future performance is subject to a number of risks. If any of the following risks actually occur, our business could be harmed and the trading price of our common stock could decline. In evaluating our business, you should carefully consider the following risks in addition to the other information in this Annual Report on Form 10-K. We note these factors for investors as permitted by the Private Securities Litigation Reform Act of 1995. It is not possible to predict or identify all such factors and, therefore, you should not consider the following risks to be a complete statement of all the potential risks or uncertainties that we face.

Table of Contents

Our facilities and manufacturing operations are vulnerable to interruption as a result of natural disasters and system failures. Any such interruption may harm our business.

Our success depends on the efficient and uninterrupted operation of our manufacturing operations, which are co-located with our corporate headquarters in Union City, California. These manufacturing operations are vulnerable to damage or interruption from earthquakes, fire, floods, power loss, telecommunications failures, break-ins and similar events. A failure of manufacturing operations, be it in the development and manufacturing of our Piccolo or VetScan blood chemistry analyzers or the reagent discs used in the blood chemistry analyzers, could result in our inability to supply customer demand. We do not have a backup facility to provide redundant manufacturing capacity in the event of a system failure or other significant loss or problem. Accordingly, if our manufacturing operations in Union City, California were interrupted, we may be required to bring an alternative facility online, a process that could take several weeks to several months or more.

Additionally, we rely on several information systems to keep financial records, process customer orders, manage inventory, process shipments to customers and operate other critical functions. If we were to experience a system disruption in the information technology systems that enable us to interact with customers and suppliers, it could result in the loss of sales and customers and significant incremental costs, which could adversely affect our business.

Although we carry property and business interruption insurance, our coverage may not be adequate to compensate us for all losses that may occur.

We are not able to predict sales in future quarters and a number of factors affect our periodic results, which makes our quarterly operating results less predictable.

We are not able to accurately predict our sales in future quarters. Our revenue in the medical and veterinary markets are derived primarily by selling to distributors that resell our products to the ultimate user. While we are better able to predict sales of our reagent discs, as we sell these discs primarily for use with blood chemistry analyzers that we sold in prior periods, we generally are unable to predict with much certainty sales of our blood chemistry analyzers, as we typically sell our blood chemistry analyzers to new users. Accordingly, our sales in any one quarter or period are not indicative of our sales in any future period.

We generally operate with a limited order backlog, because we ship our products shortly after we receive the orders from our customers. As a result, our product sales in any quarter are generally dependent on orders that we receive and ship in that quarter. As a result, any such revenues shortfall would immediately materially and adversely impact our operating results and financial condition.

The sales cycle for our products can fluctuate, which may cause revenue and operating results to vary significantly from period to period. We believe this fluctuation is primarily due (i) to seasonal patterns in the decision making processes by our independent distributors and direct customers, (ii) to inventory or timing considerations by our distributors and (iii) on the purchasing requirements of the U.S. government to acquire our products. Accordingly, we believe that period to period comparisons of our results of operations are not necessarily meaningful.

In the future, our periodic operating results may vary significantly depending on, but not limited to, a number of factors, including:

- new product or service announcements made by us or our competitors;
- changes in our pricing structures or the pricing structures of our competitors;

Edgar Filing: ABAXIS INC - Form 10-K

- our ability to develop, introduce and market new products or services on a timely basis, or at all;
- our manufacturing capacities and our ability to increase the scale of these capacities;
- the mix of sales among our instruments, consumable products and services;
- the amount we spend on research and development; and
- changes in our strategies.

Table of Contents

We depend on limited or sole suppliers, many of whom we do not have long-term contracts with, and failure of our suppliers to provide the components or products to us could harm our business.

We use several key components that are currently available from limited or sole sources as discussed below.

- **Blood Chemistry Analyzer Components:** Our blood analyzer products use several technologically-advanced components that we currently purchase from a limited number of suppliers, including certain components from single source suppliers, Hamamatsu Corporation and UDT Sensors (a division of OSI Optoelectronics). Our analyzers also use a printer that is primarily made by Seiko North America Corporation. The loss of the supply of any of these components could force us to redesign our blood chemistry analyzers.
- **Reagent Discs:** Two injection-molding manufacturers, C. Brewer & Co. and Nypro, Inc., currently make the molded plastic discs that, when loaded with reagents and welded together, form our reagent disc products. We believe that only a few manufacturers are capable of producing these discs to the narrow tolerances that we require. To date, we have only qualified these two manufacturers to manufacture the molded plastic discs.
- **Reagent Chemicals:** We currently depend on the following single source vendors for some of the chemicals that we use to produce the reagents and dry reagent chemistry beads that are either inserted in our reagent discs, lateral flow rapid tests or sold as stand-alone products: Amano Enzyme USA Co., Ltd., Kikkoman Corporation Biochemical Division, Microgenics Corporation, a division of Thermo Fisher Scientific, Roche Molecular Biochemicals of Roche Diagnostics Corporation, a division of F. Hoffmann-La Roche, Ltd., SA Scientific Co., Sekisui Diagnostics (formerly Genzyme Diagnostics), Sigma Aldrich Inc. and Toyobo Specialties.

We market original equipment manufacturer supplied products that are currently available from limited sources as discussed below.

- **Hematology Instruments and Reagent Kits:** Our VetScan hematology instruments are manufactured by Diatron in Hungary and are purchased by us as a completed instrument. In addition, currently, we have qualified two suppliers to produce the reagent kits for our hematology instruments: Clinical Diagnostic Solutions, Inc. and Diatron.
- **Coagulation and Specialty Analyzers and Cartridges:** Our VetScan VSpro coagulation and specialty analyzers and cartridges are manufactured by Scandinavian MicroBiodevices APS in Denmark and are purchased by us as completed products.
- **i-STAT Analyzers and Cartridges:** Our VetScan i-STAT 1 analyzers and cartridges are manufactured by Abbott Point of Care Inc. in North America and are purchased by us as completed products.

We primarily operate on a purchase order basis with most of our suppliers and, therefore, these suppliers are under no contractual obligation to supply us with their products or to do so at specified prices. Although we believe that there may be potential alternate suppliers available for these critical components, to date we have not qualified additional vendors beyond those referenced above and cannot assure you we would be able to enter into arrangements with additional vendors on favorable terms, or at all. For the suppliers of original equipment manufactured products that we have long-term contracts with, there can be no assurance that these suppliers will always fulfill their obligations under these contracts, or that any suppliers will not experience disruptions in their ability to supply our requirements for products. In addition, under some contracts with suppliers we have minimum purchase obligations and our failure to satisfy those obligations may result in loss of some or all of our rights under these contracts.

Because we are dependent on a limited number of suppliers and manufacturers for our products, we are particularly susceptible to any interruption in the supply of these products or the viability of our assembly arrangements. The loss of any one of these suppliers or a disruption in our manufacturing arrangements could adversely affect our business and financial condition.

We would fail to achieve anticipated revenues if the market does not accept our products or services.

We believe that our core compact blood chemistry analyzer product differs substantially from current blood chemistry analyzers on the market. We compete with centralized laboratories that offer a greater number of tests than our products, but do so at a greater overall cost and require more time. We also compete with other point-of-care analyzers that cost more, require more maintenance and offer a narrower range of tests. However, these point-of-care analyzers are generally marketed by larger companies which have greater resources for sales and marketing, in addition to a recognized brand name and established distribution relationships.

Table of Contents

In the human medical market, we believe that our blood chemistry analyzers offer customers many advantages, including substantial improvements in practice efficiencies. However, the implementation of point-of-care diagnostics in physicians' offices involves changes to current standard practices, such as using large clinical laboratories, and adopting our technology requires a shift in both the procedures and mindset of care providers. The human medical market in particular is highly regulated, structured, difficult to penetrate and often slow to adopt new product offerings. If we are unable to convince large numbers of medical clinics, hospitals and other point-of-care environments of the benefits of our Piccolo blood chemistry analyzers and our other products, we could fail to achieve anticipated revenue.

Historically, in the veterinary market, we have marketed our VetScan products through both direct sales and distribution channels to veterinarians. We continue to develop new animal blood tests to expand our product offerings; however, we cannot be assured that these products will be accepted by the veterinary market. Any failure to achieve market acceptance with our current or future products or services would harm our business and financial condition.

We rely on patents and other proprietary information, the loss of which would negatively affect our business.

As of March 31, 2012, 57 patent applications have been filed on our behalf with the United States Patent and Trademark Office ("USPTO"), of which 33 patents have been issued and 23 patents are currently active. Additionally, we have filed several international patent applications covering the same subject matter as our domestic applications. The patent position of any medical device manufacturer, including us, is uncertain and may involve complex legal and factual issues. Consequently, we may not be issued any additional patents, either domestically or internationally. Furthermore, our patents may not provide significant proprietary protection because there is a chance that they will be circumvented or invalidated. We cannot be certain that we were the first creator of the inventions covered by our issued patents or pending patent applications, or that we were the first to file patent applications for these inventions, because (1) the USPTO maintains all patent applications that are not filed in any foreign jurisdictions in secrecy until it issues the patents (when a patent application owner files a request for nonpublication) and (2) publications of discoveries in the scientific or patent literature tend to lag behind actual discoveries by several months. We may have to participate in interference proceedings, which are proceedings in front of the USPTO, to determine who will be issued a patent. These proceedings could be costly and could be decided against us.

We also rely upon copyrights, trademarks and unpatented trade secrets. Others may independently develop substantially equivalent proprietary information and techniques that would undermine our proprietary technologies. Further, others may gain access to our trade secrets or disclose such technology. Although we require our employees, consultants and advisors to execute agreements that require that our corporate information be kept confidential and that any inventions by these individuals are property of Abaxis, there can be no assurance that these agreements will provide meaningful protection or adequate remedies for our trade secrets in the event of unauthorized use or disclosure of such information. The unauthorized dissemination of our confidential information would negatively impact our business.

On June 28, 2010, we filed a patent infringement lawsuit against Cepheid with respect to Cepheid's Methicillin-resistant Staphylococcus aureus (MRSA) product, on which Cepheid has ceased paying license royalties. On December 17, 2010, Cepheid filed its amended answer and certain counterclaims seeking findings of no breach of contract, non-infringement, unenforceability and invalidity of the asserted patents, and a declaration regarding the patent term of one of the patents. We believe the counterclaims raised by Cepheid are without merit and intend to contest them vigorously. Patent infringement lawsuits are expensive and time-consuming. We believe the cost of this litigation could have a material adverse effect on our business, our consolidated financial position and results of operations. As of March 31, 2012, we have not recorded future litigation and related expenses to pursuing the patent infringement case and an estimate of such costs cannot be made at this time.

We must increase sales of our Piccolo and VetScan products or we may not be able to increase or sustain profitability.

Our ability to continue to be profitable and to increase profitability will depend, in part, on our ability to increase our sales volumes of our Piccolo and VetScan products. Increasing the sales volume of our products will depend upon, among other things, our ability to:

- continue to improve our existing products and develop new and innovative products;
- increase our sales and marketing activities;
- effectively manage our manufacturing activities; and
- effectively compete against current and future competitors.

We cannot assure you that we will be able to successfully increase our sales volumes of our products to increase or sustain profitability.

Table of Contents

We must continue to increase our sales, marketing and distribution efforts in the human diagnostic market or our business will not grow.

The human diagnostic market is fragmented, heavily regulated and constantly changing. Our limited sales, marketing and distribution capabilities are continually challenged to translate these changes into compelling value propositions for our prospective customers. Accordingly, we cannot assure you that:

- we will be able to maintain consistent growth through our key distributors in the human diagnostic market;
- the costs associated with sales, marketing and distributing our products will not be excessive; or
- government regulations or private insurer policies will not adversely affect our ability to be successful.

Should we fail to effectively develop our sales, marketing and distribution efforts and navigate regulatory challenges, our growth will be limited and our results of operations will be adversely affected.

We depend on key members of our management and scientific staff and, if we fail to retain and recruit qualified individuals, our ability to execute our business strategy and generate sales would be harmed.

We are highly dependent on the principal members of our management and scientific staff. The loss of any of these key personnel, including in particular Clinton H. Severson, our President, Chief Executive Officer and Chairman of our Board of Directors, might impede the achievement of our business objectives. We may not be able to continue to attract and retain skilled and experienced marketing, sales and manufacturing personnel on acceptable terms in the future because numerous medical products and other high technology companies compete for the services of these qualified individuals. We currently do not maintain key man life insurance on any of our employees.

We rely primarily on distributors to sell our products and we rely on sole distributor arrangements in a number of countries. Our failure to successfully develop and maintain these relationships could adversely affect our business.

We sell our medical and veterinary products primarily through a limited number of distributors. As a result, we are dependent upon these distributors to sell our products and to assist us in promoting and creating a demand for our products. We operate on a purchase order basis with the distributors and the distributors are under no contractual obligation to continue carrying our products. Further, many of our distributors may carry our competitors' products, and may promote our competitors' products over our own products.

We depend on a number of distributors in North America who distribute our VetScan products. We depend on our distributors to assist us in promoting our products in the veterinary market, and accordingly, if one or more of our distributors were to stop selling our products in the future, we may experience a temporary sharp decline or delay in our sales revenues until our customers identify another distributor or purchase products directly from us.

In the United States medical market, we depend on a few distributors for our Piccolo products. We entered into formal distribution agreements with the following distributors to sell and market Piccolo chemistry analyzers and medical reagent discs: Henry Schein's Medical Group, McKesson Medical-Surgical Inc. and PSS World Medical, Inc. We depend on these distributors to assist us in promoting market acceptance of our Piccolo chemistry analyzers. The loss of any of these distributors would have a material negative impact on our operating results and financial condition.

Internationally, we rely on only a few distributors for our products in both the medical and veterinary diagnostic markets. We currently rely on distributors that carry either our medical or veterinary products in the following

countries: Afghanistan, Australia, Austria, Belgium, Canada, Czech Republic, Denmark, France, Germany, Hong Kong, India, Ireland, Israel, Italy, Japan, Korea, Macao, the Netherlands, New Zealand, the Philippines, Portugal, Romania, Russia, Singapore, South Africa, Spain, Sweden, Switzerland, Turkey, the United Arab Emirates, the United Kingdom and the United States. Our distributors in each of these countries are responsible for obtaining the necessary approvals to sell our new and existing products. These distributors may not be successful in obtaining proper approvals for our new and existing products in their respective countries, and they may not be successful in marketing our products. Furthermore, an inability of, or any delays by, our distributor in receiving the necessary approvals for our new or other products can adversely impact our revenues in a country. We plan to continue to enter into additional distributor relationships to expand our international distribution base and presence. However, we may not be successful in entering into additional distributor relationships on favorable terms, or at all. In addition, our distributors may terminate their relationship with us at any time. Historically, we have experienced a high degree of turnover among our international distributors. This turnover makes it difficult for us to establish a steady distribution network overseas. Consequently, we may not be successful in marketing our Piccolo and VetScan products internationally, and our business and financial condition may be harmed as a result.

Table of Contents

The failure of our Abaxis Veterinary Reference Laboratories to compete effectively and achieve profitability could have a negative impact on our growth and profitability.

For AVRL to compete effectively and achieve profitability, we must convince our existing and prospective customers in the veterinary market that our service offerings would be an attractive revenue-generating addition to their practices. In addition, we have to demonstrate that the services offered now and in the future at AVRL are and will be attractive alternatives to those offered by our competitors, by differentiating our services on the basis of such factors as the range of tests offered, turnaround time, cost effectiveness and reliability of results. This is difficult to do, especially to compete with existing competitors and new market entrants. Some of our competitors for sales of on-site testing products have a more established relationship with these customers than we do, which could inhibit AVRL's market penetration efforts. We cannot be assured that AVRL or its services will be accepted by the veterinary market. If we are unable to convince large numbers of veterinarians of the benefits of AVRL or otherwise fail to achieve market acceptance for AVRL's services, the growth of AVRL will be limited accordingly, which could harm our laboratory business and financial condition.

We need to successfully manufacture and market additional reagent discs for the human diagnostic market if we are to compete in that market.

We have developed a blood analysis system that consists of a portable blood analyzer and single-use reagent discs. Each reagent disc performs a series of standard blood tests. We believe that it is necessary to develop additional series of reagent discs with various tests for use with the Piccolo and VetScan chemistry analyzers. Historically, we have developed reagent discs suitable for the human medical and veterinary diagnostic markets. We have received 510(k) clearances from the U.S. Food and Drug Administration ("FDA") for 26 test methods in the human medical market. These tests are included in standard tests for which the medical community receives reimbursements from third-party payors such as managed care organizations and Medicare. We may not be able to successfully manufacture or market these reagent discs. Our failure to meet these challenges will materially adversely affect our operating results and financial condition.

We rely on relationships with partners and other third parties that license our technologies and pay us royalties on sales of their products. Failure to maintain these relationships, poor performance by these companies or disputes with these companies could negatively impact our business.

We rely on collaborative relationships with other companies for revenues resulting from royalties payable by these third parties in connection with technologies that they license from us. For example, we entered into a license agreement with Cepheid in fiscal 2006 to license a portion of our patent portfolio covering lyophilization technology. Under the agreement, Cepheid paid us royalties based on sales of Cepheid products using the licensed technology. On October 1, 2010, we terminated the entire license as to all or any of Cepheid products due to Cepheid's discontinuation of license royalty payments. As a result of this license termination, we expect that our development and licensing revenues will be adversely and materially impacted. If other third parties fail to perform under license agreement or generate royalties to the level of our expectations, our operating results may be harmed. In addition, reliance on collaborative relationships poses a number of risks, including the following risks:

- we may not be able to control the amount and timing of resources that our collaborators may devote to products from which we derive royalties;
- disputes may arise with respect to the ownership of rights to technology developed with our partners;
- disagreements with our partners could cause delays in, or termination of, the research, development or commercialization of products or result in litigation or arbitration;

- contracts with our partners may fail to provide significant protection or may fail to be effectively enforced if one of these partners fails to perform;
- should a partner fail to develop or commercialize products based on technologies we may license, we may not receive any future payments or any royalties for the technologies or products;
- collaborative arrangements are often terminated or allowed to expire, such as our former license with Cepheid, which would adversely impact our royalty revenues; and
- our corporate partners may be unable to pay us, particularly in light of current economic conditions.

Given these risks, there is a great deal of uncertainty regarding the success of our current and future collaborative efforts.

Table of Contents

We may not be able to compete effectively with larger, more established entities or their products, or with future organizations or future products, which could cause our sales to decline.

The diagnostic market is a well-established field in which there are a number of competitors that have substantially greater financial resources and larger, more established marketing, sales and service organizations than we do. We compete primarily with the following organizations:

- commercial clinical laboratories;
- hospitals' clinical laboratories; and
- manufacturers of bench top multi-test blood analyzers and other testing systems that health care providers can use "on-site" (a listing of our competitors is listed below).

Historically, hospitals and commercial laboratories perform most of the human diagnostic testing, and veterinary specialized commercial laboratories perform most of the veterinary medical testing. We have identified five principal factors that we believe customers typically use to evaluate our products and those of our competitors. These factors include the following:

- range of tests offered;
- immediacy of results;
- cost effectiveness;
- ease of use; and
- reliability of results.

We believe that we compete effectively on each of these factors except for the range of tests offered. Clinical laboratories are effective at processing large panels of tests using skilled technicians and complex equipment. While our current offering of instruments and reagent discs cannot provide the same broad range of tests as hospitals and commercial laboratories, we believe that in certain markets, our products provide a sufficient breadth of test menus to compete successfully with clinical laboratories given the advantages of our products with respect to the other four factors. In addition, we cannot assure you that we will continue to be able to compete effectively on cost effectiveness, ease of use, immediacy of results or reliability of results. We also cannot assure you that we will ever be able to compete effectively on the basis of range of tests offered.

Our principal competitors in the point-of-care human diagnostic market are Alere (formerly Inverness Medical Technologies), Alfa Wassermann S.P.A., Abbott Laboratories' i-STAT division, Johnson & Johnson (including its subsidiary, Ortho-Clinical Diagnostics, Inc.) and F. Hoffmann-La Roche Ltd. Many of our competitors in the human diagnostic market have significantly larger product lines to offer and greater financial and other resources than we do. In particular, many of these competitors have large sales forces and well-established distribution channels and brand names. Our principal competitors in the veterinary diagnostic market are Idexx Laboratories, Inc. and Heska Corporation. Idexx has a larger veterinary product line and sales force than we do and a well-established distribution network and brand name. Consequently, we must develop our distribution channels and significantly expand our direct sales force in order to compete more effectively in these markets.

Our veterinary reference laboratory, AVRL, competes in the commercial laboratory arena nationwide with a full menu of laboratory diagnostics. We differentiate our services on the following factors: range of tests offered, turnaround time, cost effectiveness and reliability of results. AVRL's principal competitors are Idexx and Antech Diagnostics, a division of VCA Antech, Inc.

Changes in third-party payor reimbursement regulations can negatively affect our business.

By regulating the maximum amount of reimbursement they will provide for blood testing services, third-party payors, such as managed care organizations, pay-per-service insurance plans, Medicare and Medicaid, can indirectly affect the pricing or the relative attractiveness of our human testing products. For example, the Centers for Medicare and Medicaid Services (the "CMS") set the level of reimbursement of fees for blood testing services for Medicare beneficiaries. If third-party payors decrease the reimbursement amounts for blood testing services, it may decrease the likelihood that physicians and hospitals will adopt point-of-care diagnostics as a viable means of care delivery. Consequently, we would need to charge less for our products. If the government and third-party payors do not provide for adequate coverage and reimbursement levels to allow health care providers to use our products, the demand for our products will decrease and our business and financial condition would be harmed.

Table of Contents

We are subject to numerous governmental regulations and regulatory changes are difficult to predict and may be damaging to our business.

Need for Government Regulation for our Products

Our Piccolo products are medical devices subject to regulation by the FDA, under the Federal Food, Drug, and Cosmetic Act (“FDCA”). Medical devices, to be commercially distributed in the United States, must receive either 510(k) premarket clearance or Premarket Approval (“PMA”) from the FDA pursuant to the FDCA prior to marketing. Devices deemed to pose relatively less risk are placed in either class I or II, which generally requires the manufacturer to submit a premarket notification requesting permission for commercial distribution; this is known as 510(k) clearance. Most lower risk, or class I, devices are exempted from this requirement. Devices deemed by the FDA to pose the greatest risk, such as life-sustaining, life supporting or implantable devices, or devices deemed not substantially equivalent to a previously 510(k) cleared device or a preamendment class III device for which PMA applications have not been called, are placed in class III requiring PMA approval. The FDA has classified our Piccolo products as class I or class II devices, depending on their specific intended uses and indications for use.

510(k) Clearance Pathway

To obtain 510(k) clearance, a manufacturer must submit a premarket notification demonstrating that the proposed device is substantially equivalent in intended use, principles of operation, and technological characteristics to a previously 510(k) cleared device or a device that was in commercial distribution before May 28, 1976 for which the FDA has not called for submission of PMA applications. The FDA’s 510(k) clearance pathway usually takes from three to six months, but it can take longer.

After a device receives 510(k) clearance, any modification that could significantly affect its safety or effectiveness, or that would constitute a major change in its intended use, requires a new 510(k) clearance or could require a PMA approval. The FDA requires each manufacturer to make this determination in the first instance, but the FDA can review any such decision. If the FDA disagrees with a manufacturer’s decision not to seek a new 510(k) clearance, the agency may retroactively require the manufacturer to seek 510(k) clearance or PMA approval. The FDA also can require the manufacturer to cease marketing and/or recall the modified device until 510(k) clearance or PMA approval is obtained, to redesign the device or to submit new data or information to the FDA. Products marketed following the FDA clearance also are subject to significant postmarket requirements.

As of March 31, 2012, we have received the FDA premarket clearance for our Piccolo chemistry analyzer and 26 reagent tests that we have on 15 reagent discs. We are currently developing additional tests which we will have to clear with the FDA through the 510(k) notification procedures. These new test products are crucial for our continued success in the human medical market. If we do not receive 510(k) clearance for a particular product, we will not be able to market that product in the United States until we provide additional information to the FDA and gain premarket clearance. The inability to market a new product during this time could harm our future sales.

Effects of the Clinical Laboratory Improvement Amendments on our Products

Our Piccolo products are also affected by the CLIA. The CLIA Regulations are intended to ensure the quality and reliability of all medical testing in the United States regardless of where the tests are performed. The current CLIA regulations divide laboratory tests into three categories: “waived,” “moderately complex” and “highly complex.” Four of the tests performed using the Piccolo system are in the “moderately complex” category. This category requires that any location in which testing is performed be certified as a laboratory. Hence, we can only sell some Piccolo products to customers who meet the standards of a laboratory. To receive “laboratory” certification, a testing facility must be certified by the CMS. After the testing facility receives a “laboratory” certification, it must then meet the CLIA

regulations. Because we can only sell some Piccolo products to testing facilities that are certified “laboratories,” the market for some products is correspondingly constrained.

We can currently offer the following Piccolo reagent discs as waived tests to the medical market: Basic Metabolic Panel, Comprehensive Metabolic Panel, Electrolyte Panel, General Chemistry 6, General Chemistry 13, Kidney Check, Lipid Panel, Lipid Panel Plus, Liver Panel Plus, MetLyte 8 Panel and Renal Function Panel. Waived status permits untrained personnel to run the Piccolo chemistry analyzer using these tests; thus, extending the sites (doctors’ offices and other point-of-care environments) that can use the Piccolo chemistry analyzer. Although we are engaged in an active program to test and apply for CLIA waivers for additional analytes, we cannot assure you that we will successfully receive CLIA waived status from the FDA for other products. Consequently, for the reagent discs that have not received CLIA waived status, the market for our Piccolo products may be confined to those testing facilities that are certified as “laboratories” and our growth would be limited accordingly, which could harm our business and financial condition.

Table of Contents

Animal and Plant Health Inspection Service Licensure of Veterinary Biologics

Our canine heartworm antigen (“CHW”) diagnostic product is regulated as a veterinary biologic under the Virus, Serum, and Toxin Act of 1913. In October 2009, we announced that we received licensure of our CHW test utilizing a rotor-based assay system consisting of eleven other important canine health determinations from the Animal and Plant Health Inspection Service (“APHIS”). Veterinary biologics are licensed as are their manufacturing facilities. Products are subject to extensive testing to establish their purity, safety, potency, and efficacy. Licensed biologics are also required to be prepared in accordance with a filed Outline of Production, among other requirements. Failure to comply with APHIS licensure or post-marketing approval requirements can result in the inability to obtain product or establishment licenses or cause the revocation or suspension of such licenses.

In February 2012, we received a second license from APHIS for our lateral flow test for VetScan Canine Lyme Rapid Test, a highly sensitive and specific test for the detection of *Borrelia burgdorferi* in canine whole blood, serum or plasma. We are currently developing additional tests that will be subject to APHIS licensure as veterinary biologics. If we do not receive licensure for these additional tests, we will not be able to market those products in the United States and our growth would be limited accordingly.

Need to Comply with Manufacturing Regulations and Various Federal, State, Local and International Regulations

The 1976 Medical Device Amendment also requires us to manufacture our Piccolo products in accordance with Good Manufacturing Practices guidelines. Current Good Manufacturing Practice requirements are set forth in the 21 CFR 820 Quality System Regulation. These requirements regulate the methods used in, and the facilities and controls used for the design, manufacture, packaging, storage, installation and servicing of our medical devices intended for human use. Our manufacturing facility is subject to periodic inspections. In addition, various state regulatory agencies may regulate the manufacture of our products.

Federal, state, local and international regulations regarding the manufacture and sale of health care products and diagnostic devices may change. In addition, as we continue to sell in foreign markets, we may have to obtain additional governmental clearances in those markets. To date, we have complied with the following federal, state, local and international regulatory requirements:

- United States Food and Drug Administration (“FDA”): In March 2012, December 2010, August 2008, September 2005 and March 2003, the FDA conducted a facility inspection and verified our compliance with the 21 CFR 820 Regulation.
- United States Department of Agriculture: In October 2009, we received a United States Veterinary Biologics Establishment License from the United States Department of Agriculture.
- State of California Food and Drug Branch (“FDB”): In April 2001, the FDB granted our manufacturing facility “in compliance” status, based on the regulations for Good Manufacturing Practices for medical devices. In May 2001, the FDB granted licensing for our manufacturing facility in Union City, California. In December 2010, the FDB conducted a routine facility inspection and verified our compliance with Good Manufacturing Practices for medical devices.
- International Organization for Standardization (“ISO”): In May 2002, we received our ISO 9001 certification, expanding our compliance with international quality standards. In December 2003, we received ISO 13485 Quality System certification as required by the 2003 European In Vitro Device Directive. This certified our quality system specifically to medical devices. In April 2005, we received the Canadian Medical Device Conformity Assessment System stamp on our ISO 13485 certificate to signify compliance with Health Canada regulations. In October 2009,

we received our recertification to the ISO 13485:2003 Quality System Standard for medical devices. In May 2010 and May 2011, we were recommended for continued certification to ISO 13485:2003 by our current ISO registrar.

We are not required to comply with all of the FDA government regulations applicable to the human medical market when manufacturing our VetScan products; however, we intend for all of our manufacturing operations to be compliant with the Quality System Regulation to help ensure product quality and integrity regardless of end use or patient. As we continue to sell in foreign markets, we may have to obtain additional governmental clearances in those markets. We cannot assure you that we will successfully pass the latest FDA inspection or any re-inspection by the FDA or the State of California. In addition, we cannot assure you that we can comply with all current or future government manufacturing requirements and regulations. We cannot predict what impact, if any, such current or future regulatory changes would have on our business. We may not be able to obtain regulatory clearances for our products in the United States or in foreign markets, and the failure to obtain these regulatory clearances will materially adversely affect our business and results of operations. If we are unable to comply with the regulations, or if we do not pass routine inspections, our business and results of operations will be materially adversely affected. Although we believe that we will be able to comply with all applicable regulations of the FDA and of the State of California, including the Quality System Regulation, current regulations depend on administrative interpretations. Future interpretations made by the FDA, CMS or other regulatory bodies may adversely affect our business.

Table of Contents

We may inadvertently design or produce defective products, which may subject us to significant warranty liabilities or product liability claims. We may have insufficient product liability insurance to pay material uninsured claims.

Our business exposes us to potential warranty and product liability risks that are inherent in the design, testing, manufacturing and marketing of human and veterinary medical products. Although we have established procedures for quality control on both the raw materials that we receive from suppliers as well as the design and manufacturing of our products, these procedures may prove inadequate to detect a design or manufacturing defect. In addition, our Piccolo and VetScan chemistry analyzers may be unable to detect all errors that could result in the misdiagnosis of human or veterinary patients.

We may be subject to substantial claims for defective products under our warranty policy or product liability laws. In addition, our policy is to credit medical providers for any defective product that we produce, including those reagent discs that are rejected by our Piccolo and VetScan chemistry analyzers. Therefore, even if a mass defect within a lot or lots of reagent discs were detected by our Piccolo and VetScan chemistry analyzers, the replacement of such reagent discs free of charge would be costly and could materially harm our financial condition. Further, in the event that a product defect is not detected in our Piccolo chemistry analyzer, our relatively recent expansion into the human medical market greatly increases the risk that the amount of damages involved with just one product defect would be material to our operations. Our product liability insurance and cash may be insufficient to cover potential liabilities. In addition, in the future the coverage that we require may be unavailable on commercially reasonable terms, if at all. Even with our current insurance coverage, a mass product defect, product liability claim or recall could subject us to claims above the amount of our coverage and would materially adversely affect our business and our financial condition.

We may experience manufacturing problems related to our instruments, which could materially and adversely affect our revenues and business.

We manufacture our blood chemistry analyzers at our manufacturing facility in Union City, California. Should we experience problems related to the manufacture of our blood chemistry analyzer, we could fail to achieve anticipated revenues or we may incur an additional increase in our cost of revenue. These problems may include manufacturing defects and product failures, defects in raw materials acquired from our suppliers, delays in receipt of raw materials from our suppliers, increases in raw materials costs and labor disturbances. For example, we experienced a higher rate of blood chemistry analyzer failures in fiscal 2008. Although we began experiencing a decrease in the estimated product failure rates on our instruments since we began taking steps to resolve these manufacturing problems, there can be no assurance that our efforts to resolve these manufacturing difficulties will continue to prove to be successful or that similar problems will not arise in the future. If we are unable to prevent similar problems from occurring in the future, we may not be able to manufacture sufficient quantities to meet anticipated demand and, therefore, will not be able to effectively market and sell our blood chemistry analyzers or other instruments that we market and sell; accordingly, our revenues and business would be materially adversely affected.

Fluctuations in foreign exchange rates and the possible lack of financial stability in foreign countries could prevent overseas sales growth.

For our international sales denominated in U.S. dollars, an increase in the value of the U.S. dollar relative to foreign currencies could make our products less competitive in international markets. For our sales denominated in foreign currencies, we are subject to fluctuations in exchange rates between the U.S. dollar and the particular foreign currency. Our operating results could also be adversely affected by the seasonality of international sales and the economic conditions of our overseas markets.

We are subject to complex requirements from legislation requiring companies to evaluate internal control over financial reporting.

Rules adopted by the Securities and Exchange Commission pursuant to Section 404 of the Sarbanes-Oxley Act of 2002 require an assessment of internal control over financial reporting by our management and an attestation of the effectiveness of our internal control over financial reporting by an independent registered public accounting firm. We have an ongoing program to perform the assessment, testing and evaluation to comply with these requirements and we expect to continue to incur significant expenses for Section 404 compliance on an ongoing basis.

Our management assessed the effectiveness of our internal control over financial reporting as of our fiscal years ended March 31, 2012 and 2011. Although we received an unqualified opinion on our consolidated financial statements for the fiscal years ended March 31, 2012 and 2011, and on the effectiveness of our internal control over financial reporting as of March 31, 2012 and 2011, we cannot predict the outcome of our testing in future periods. In the event that our internal control over financial reporting is not effective as defined under Section 404, or any failure to implement required new or improved controls, or difficulties encountered in implementation could harm operating results or prevent us from accurately reporting financial results or cause a failure to meet our reporting obligations in the future. If management cannot assess internal control over financial reporting is effective, or our independent registered public accounting firm is unable to provide an unqualified attestation report on such assessment, investor confidence and our share value may be negatively impacted.

Table of Contents

We must comply with strict and potentially costly environmental regulations or we could pay significant fines.

We are subject to stringent federal, state and local laws, rules, regulations and policies that govern the use, generation, manufacture, storage, air emission, effluent discharge, handling and disposal of certain materials and wastes. In particular, we are subject to laws, rules and regulations governing the handling and disposal of biohazardous materials used in the development and testing of our products. Our costs to comply with applicable environmental regulations consist primarily of handling and disposing of human and veterinary blood samples for testing (whole blood, plasma, serum). Although we believe that we have complied with applicable laws and regulations in all material respects and have not been required to take any action to correct any noncompliance, we may have to incur significant costs to comply with environmental regulations if our manufacturing to commercial levels continues to increase. In addition, if a government agency determines that we have not complied with these laws, rules and regulations, we may have to pay significant fines and/or take remedial action that would be expensive and we do not carry environmental-related insurance coverage.

Our operating results could be materially affected by unanticipated changes in our tax provisions or exposure to additional income tax liabilities.

Our determination of our tax liability is subject to review by applicable tax authorities. Any adverse outcome of such a review could have an adverse effect on our operating results and financial condition. In addition, the determination of our provision for income taxes and other tax liabilities requires significant judgment including our determination of whether a valuation allowance against deferred tax assets is required. Although we believe our estimates and judgments are reasonable, the ultimate tax outcome may differ from the amounts recorded in our consolidated financial statements and may materially affect our financial results in the period or periods for which such determination is made.

Our stock price is highly volatile and investing in our stock involves a high degree of risk, which could result in substantial losses for investors.

The market price of our common stock, like the securities of many other medical products companies, fluctuates over a wide range, and will continue to be highly volatile in the future. During the quarter ended March 31, 2012, the closing sale prices of our common stock on the NASDAQ Global Market ranged from \$25.97 to \$29.79 per share and the closing sale price on March 30, 2012, the last day of trading for our quarter ended March 31, 2012, was \$29.13 per share. During the last eight fiscal quarters ended March 31, 2012, our stock price closed at a high of \$31.44 per share on May 19, 2011 and a low of \$17.74 per share on July 19, 2010. Many factors may affect the market price of our common stock, including:

- fluctuation in our operating results;
- announcements of technological innovations or new commercial products by us or our competitors;
- changes in governmental regulation in the United States and internationally;
- prospects and proposals for health care reform;
- governmental or third-party payors' controls on prices that our customers may pay for our products;
- developments or disputes concerning our patents or our other proprietary rights;
-

product liability claims and public concern as to the safety of our devices or similar devices developed by our competitors; and

- general market conditions.

Because our stock price is so volatile, investing in our common stock is highly risky. A potential investor must be able to withstand the loss of his entire investment in our common stock.

Table of Contents

Our shareholder rights plan and our ability to issue preferred stock may delay or prevent a change of control of Abaxis.

Our shareholder rights plan, adopted by our board of directors on April 22, 2003, may make it more difficult for a third party to acquire, or discourage a third party from attempting to acquire control of, Abaxis. The shareholder rights plan could limit the price that investors might be willing to pay in the future for shares of our common stock.

In addition, our board of directors has the authority to issue up to 5,000,000 shares of preferred stock and to determine the price, rights, preferences, privileges and restrictions, including voting rights, of those shares without any further vote or action by the shareholders, except to the extent required by NASDAQ rules. The issuance of preferred stock, while providing flexibility in connection with possible financings or acquisitions or other corporate purposes, could have the effect of making it more difficult for a third party to acquire a majority of our outstanding voting stock and, consequently, negatively affect our stock price.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties

We are headquartered in Union City, California, where we lease approximately 126,363 square feet of office, research and development and manufacturing space, pursuant to a lease expiring in February 2021.

Additionally, our facilities include the following:

- Lease of approximately 25,705 square feet of warehousing space in Union City, California, expiring in fiscal 2017.
- Lease of approximately 20,380 square feet of office and laboratory space in Olathe, Kansas, expiring in fiscal 2017.
- Lease of approximately 8,900 square feet of office space in Darmstadt, Germany, expiring in fiscal 2015, which serves as our headquarters for Abaxis Europe GmbH.
- Lease of approximately 12,820 square feet of warehousing space in Griesheim, Germany, expiring in fiscal 2015.

We believe that our existing facilities are adequate to meet our current requirements, and that we will be able to obtain additional facilities space on commercially reasonable terms, if and when they are required.

Item 3. Legal Proceedings

On June 28, 2010, we filed a patent infringement lawsuit against Cepheid with respect to Cepheid's Methicillin-resistant Staphylococcus aureus (MRSA) product, on which Cepheid has ceased paying license royalties. On December 17, 2010, Cepheid filed its amended answer and certain counterclaims seeking findings of no breach of contract, non-infringement, unenforceability and invalidity of the asserted patents, and a declaration regarding the patent term of one of the patents. We believe the counterclaims raised by Cepheid are without merit and intend to contest them vigorously. Because of the cost involved in pursuing patent infringement cases, we believe the cost of this litigation could have a material adverse effect on Abaxis, our consolidated financial position and results of operations. As of March 31, 2012, we had not recorded future litigation and related expenses to pursuing the patent infringement case and an estimate of such costs cannot be made at this time. A claims construction hearing was held in June 2011 and the court has issued its claims construction order. The case is ongoing. A trial date has been set for

September 24, 2012.

We are involved from time to time in various litigation matters in the normal course of business. Other than as described above, we believe that the ultimate resolution of these matters will not have a material effect on our consolidated financial position or results of operations. There can be no assurance that existing or future legal proceedings arising in the ordinary course of business or otherwise will not have a material adverse effect on our business, consolidated financial position, results of operations or cash flows.

Item 4. Mine Safety Disclosures

Not applicable.

Table of Contents

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information for Common Stock

Our common stock is traded on the NASDAQ Global Market under the symbol "ABAX." The following table sets forth the quarterly high and low intra-day per share sales prices for the common stock from April 1, 2011 through March 31, 2012 as reported on the NASDAQ Global Market:

| | Prices | | | |
|----------------------------|-------------|----------|-------------|----------|
| | Fiscal 2012 | | Fiscal 2011 | |
| | High | Low | High | Low |
| Quarter ended June 30 | \$ 31.69 | \$ 27.01 | \$ 28.11 | \$ 20.47 |
| Quarter ended September 30 | 30.50 | 19.68 | 23.40 | 17.54 |
| Quarter ended December 31 | 29.91 | 21.67 | 28.57 | 22.27 |
| Quarter ended March 31 | 29.98 | 25.56 | 31.45 | 24.50 |

Holders

As of June 11, 2012, there were 21,889,000 shares of our common stock outstanding, held by 123 shareholders of record.

Dividends

We have not paid cash dividends on our common stock and do not anticipate paying cash dividends in the foreseeable future.

Issuer Purchases of Equity Securities

The following table presents information with respect to purchases of common stock of Abaxis made during the three months ended March 31, 2012 by Abaxis:

| | Total Number of Shares Purchased | Average Price Paid Per Share Including Commissions | Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs | Maximum Number (or approximate dollar amount) of Shares that May Yet be Purchased Under the Plans or Programs |
|--|----------------------------------|--|--|---|

| Total | - | \$ - | - | |

On August 5, 2011, the Board of Directors authorized the repurchase of up to an aggregate of \$40.0 million of our common stock. The share repurchase program was announced on August 8, 2011. In January 2012, the Board of Directors approved a \$15.0 million increase to its existing share repurchase program, to a total of \$55.0 million. As of March 31, 2012, \$27.7 million of our common stock may yet be purchased under such authorization. The repurchases are made from time to time on the open market at prevailing market prices or in negotiated transactions off the market.

Stock Performance Graph(1)

The graph below compares the cumulative total shareholder return on an investment in our common stock, the Russell 2000 Index and the NASDAQ Medical Equipment Securities Index over the past five year period ended March 31, 2012. The shareholder return shown on the graph below is not necessarily indicative of future performance, and we do not make or endorse any predictions as to future shareholder returns.

The graph assumes the investment of \$100 on March 31, 2007 in our common stock, the Russell 2000 Index and the NASDAQ Medical Equipment Securities Index and assumes dividends, if any, are reinvested. No dividends have been declared on our common stock to date.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with our consolidated financial statements and related notes thereto included elsewhere in this Annual Report on Form 10-K. This discussion may contain forward-looking statements based upon current expectations that involve risks and uncertainties. Our actual results and the timing of selected events could differ materially from those anticipated in these forward-looking statements as a result of several factors, including those set forth under Item 1A. "Risk Factors" and elsewhere in this Annual Report on Form 10-K.

BUSINESS OVERVIEW

Company Description

Abaxis, Inc. develops, manufactures, markets and sells portable blood analysis systems for use in the human or veterinary patient-care setting to provide clinicians with rapid blood constituent measurements. In October 2011, Abaxis also began providing veterinary reference laboratory diagnostic and consulting services for veterinarians through its AVRL division.

Our corporate headquarters are located in Union City, California, from which we conduct our manufacturing, warehousing, research and development, regulatory, sales and marketing and administrative activities. We market and sell our products worldwide by maintaining direct sales forces and through independent distributors. Our sales force is primarily located in the United States. Abaxis Europe GmbH, our wholly-owned subsidiary in Germany since July 2008, markets and distributes diagnostic systems for medical and veterinary uses in the European market.

Financial Results. In fiscal 2012, we achieved total revenues of \$156.6 million, an increase of 9% over fiscal 2011. The growth in revenues was primarily driven by growth in revenues from consumable sales, which were \$113.8 million, an increase of 11% when compared to the prior year.

Sales and marketing expenses were \$39.6 million for fiscal 2012 and \$34.4 million for fiscal 2011, an increase of \$5.2 million, or 15%, from fiscal 2011 to fiscal 2012. The increase was primarily due to increased expenses related to headcount and promotional and marketing spending, associated with the ongoing growth of our veterinary business in North America. General and administrative expenses were \$13.8 million for fiscal 2012 and \$11.0 million for fiscal 2011, an increase of \$2.8 million, or 26%, from fiscal 2011 to fiscal 2012. The increase was primarily due to (a) legal expenses related to pursuing our patent infringement case against Cepheid and compliance in an investigation by the United States Federal Trade Commission of a competitor and (b) start-up costs to develop AVRL during the first and second quarters of fiscal 2012. AVRL began providing services starting in the third quarter of fiscal 2012.

Net income for fiscal 2012 was \$13.1 million, a 10% decrease from \$14.5 million in fiscal 2011, due primarily to the investments we made to grow our veterinary business and legal expenses described above. Our diluted earnings per share decreased by 9% to \$0.58 in fiscal 2012 from \$0.64 in fiscal 2011, which incorporates the impact of our share repurchases.

Cash, cash equivalents and investments decreased by \$14.7 million during fiscal 2012 to a total of \$91.0 million at March 31, 2012. The primary sources of cash and cash equivalents during fiscal 2012 were operating cash flows of \$22.0 million. Key non-operating uses of cash during the fiscal year 2012 included \$27.3 million for repurchases of our common stock under our share repurchase program.

During fiscal 2012, we commenced a share repurchase program to an aggregate of \$40.0 million of our common stock authorized by our Board of Directors in August 2011. In January 2012, the Board of Directors approved a \$15.0

million increase to our existing share repurchase program, to a total of \$55.0 million. In fiscal 2012, we spent a total of \$27.3 million of cash to repurchase and retired 1.2 million shares of our common stock at an average purchase price of \$23.41 per share.

Products and Services. We manage our business in two operating segments, the medical market and veterinary market, as described below. See “Segment Results” in this section for a detailed discussion of financial results.

Medical Market. We serve a worldwide customer group in the medical market consisting of military installations (ships, field hospitals and mobile care units), physicians’ office practices across all specialties, urgent care, outpatient and walk-in clinics (free-standing or hospital-connected), health screening operations, home care providers (national, regional or local), nursing homes, ambulance companies, oncology treatment clinics, dialysis centers, pharmacies and hospital laboratories.

The products manufactured and sold in the medical market segment primarily consist of Piccolo chemistry analyzers and medical reagent discs. The Piccolo chemistry analyzers provide on the spot routine multi-chemistry and electrolyte results using a small patient sample size in any treatment setting. The Piccolo profiles are used with the Piccolo chemistry analyzers and are packaged as single-use medical reagents, configured to aid in disease diagnosis or monitor disease treatment.

Table of Contents

Veterinary Market. Our VetScan products serve a worldwide customer group in the veterinary market consisting of companion animal hospitals, animal clinics with mixed practices of small animals, birds and reptiles, equine and bovine practitioners, veterinary emergency clinics, veterinary referral hospitals, universities, government, pharmaceutical companies, biotechnology companies and private research laboratories. Our product and service offerings in the veterinary market are described as follows:

Point-of-Care Blood Chemistry Analyzers. The products manufactured and sold in this segment primarily consist of VetScan chemistry analyzers and veterinary reagent discs. The VetScan is a chemistry, electrolyte, immunoassay and blood gas analyzer that delivers results from a sample of whole blood, serum or plasma. The VetScan profiles are packaged as single-use plastic veterinary reagent discs. Each reagent disc contains a diluent and all the profiles necessary to perform a complete multi-chemistry blood analysis.

Hematology. We offer two types of VetScan hematology instruments and related reagent kits, the VetScan HM5 and VetScan HM2. The VetScan HM5 is a fully automated five-part cell counter offering a comprehensive 22-parameter complete blood count (“CBC”) analysis, including direct eosinophil counts and eosinophil percentage, specifically designed for veterinary applications. The VetScan HM2 is a fully automated three-part cell counter offering an 18-parameter CBC analysis, including a 3-part white blood cell differential (lymphocytes, monocytes and granulocytes).

Coagulation and Specialty. The VetScan VSpro coagulation and specialty analyzers and related consumables assist in the diagnosis and evaluation of suspected bleeding disorders, toxicity/poisoning, evaluation of disseminated intravascular coagulation, hepatic disease and in monitoring therapy and the progression of disease states.

i-STAT. The VetScan i-STAT analyzers and related VetScan i-STAT consumables are used to deliver accurate blood gas, electrolyte, chemistry and hematology results in minutes from 2-3 drops of whole blood.

Rapid Tests. Our VetScan rapid tests include the following: Canine Heartworm Rapid Test, a highly sensitive and specific test for the detection of *Dirofilaria immitis* in canine whole blood, serum or plasma; Canine Parvovirus Rapid Test, a qualitative test for the detection of canine parvovirus antigen in feces; Giardia Rapid Test, which detects giardiasis, a gastrointestinal infection caused by the protozoan parasite *Giardia*; and Canine Lyme Rapid Test, which detects *Borrelia burgdorferi* in canine whole blood, serum or plasma.

AVRL. During fiscal 2011, we began developing AVRL, a full-service laboratory testing facility, based in Olathe, Kansas. In October 2011, we began providing veterinary reference laboratory diagnostic and consulting services for veterinarians in the United States through AVRL. AVRL also focuses on providing specialty and esoteric testing and analysis. This service complements our full suite of on-site laboratory instrumentation and rapid diagnostics for in hospital routine, critical care and emergency medicine laboratory needs.

Factors that May Impact Future Performance

Our industry is impacted by numerous competitive, regulatory and other significant factors. Our sales for any future periods are not predictable with a significant degree of certainty, and may depend on a number of factors outside of our control, including but not limited to inventory or timing considerations by our distributors. We generally operate with a limited order backlog because our products are typically shipped shortly after orders are received. Product sales in any quarter are generally dependent on orders booked and shipped in that quarter. As a result, any such revenues shortfall would negatively affect our operating results and financial condition. In addition, our sales may be adversely impacted by pricing pressure from competitors. Our ability to be consistently profitable will depend, in part, on our ability to increase the sales volumes of our Piccolo and VetScan products and to achieve profitability in AVRL and to successfully compete with other competitors. We believe that period to period comparisons of our

results of operations are not necessarily meaningful indicators of future results.

CRITICAL ACCOUNTING POLICIES, ESTIMATES AND JUDGMENTS

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States and pursuant to the rules and regulations of the Securities and Exchange Commission. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and revenues and expenses during the reporting period. On an on-going basis, we evaluate our estimates and the sensitivity of these estimates to deviations in the assumptions used in making them. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. However, there can be no assurance that our actual results will not differ from these estimates.

Table of Contents

We have identified the policies below as critical because they are not only important to understanding our financial condition and results of operations, but also because application and interpretation of these policies requires both judgment and estimates of matters that are inherently uncertain and unknown. Accordingly, actual results may differ materially from our estimates. The impact and any associated risks related to these policies on our business operations are discussed below. For a more detailed discussion on the application of these and other accounting policies, see the Notes to Consolidated Financial Statements included in this Annual Report on Form 10-K.

Revenue Recognition. Our primary customers are distributors and direct customers in both the medical and veterinary markets. Service revenues are primarily generated from veterinary reference laboratory diagnostic and consulting services for veterinarians. Revenues from product sales and services, net of estimated sales allowances, discounts and rebates, are recognized when (i) evidence of an arrangement exists, (ii) upon shipment of the products or rendering of services to the customer, (iii) the sales price is fixed or determinable and (iv) collection of the resulting receivable is reasonably assured. Rights of return are not provided. From time to time, we offer discounts on AVRL services for a specified period as incentives. Discounts are reductions to invoiced amounts within a specified period and are recorded at the time services are performed. Net service revenues are recognized at the time services are performed.

Amounts collected in advance of revenue recognition are recorded as a current or non-current deferred revenue liability based on the time from the balance sheet date to the future date of revenue recognition. We recognize revenues associated with extended maintenance agreements ratably over the life of the contract.

Multiple Element Revenue Arrangements. On April 1, 2011, we adopted Financial Accounting Standards Board (“FASB”) Accounting Standards Update (“ASU”) No. 2009-13, Multiple-Deliverable Revenue Arrangements, an amendment to Accounting Standards Codification (“ASC”) Topic 605, Revenue Recognition (ASU 2009-13). We elected to apply the amendment prospectively to new or materially modified revenue arrangements after its effective date. The FASB amended the accounting standards for certain multiple deliverable revenue arrangements. A multiple-element arrangement includes the sale of one or more tangible product offerings with one or more associated services offerings, each of which are individually considered separate units of accounting. The determination of our units of accounting did not change with the adoption of the new revenue recognition guidance and as such we allocate revenues to each element in a multiple-element arrangement based upon the relative selling price of each deliverable. When applying the relative selling price method, we determine the selling price for each deliverable using vendor-specific objective evidence (“VSOE”) of selling price, if it exists, or third-party evidence (“TPE”) of selling price. If neither VSOE nor TPE of selling price exist for a deliverable, we use our best estimate of selling price for that deliverable. Revenue allocated to each element is then recognized when all revenue recognition criteria are met for each element. The adoption of this amendment did not have a material impact on our consolidated financial position, results of operations and cash flows for fiscal 2012.

Our sales arrangements contain multiple element revenue arrangements in which a customer may purchase a combination of instruments, consumables or extended maintenance agreements. Additionally, we provide incentives in the form of free goods or extended maintenance agreements to customers in connection with the sale of our instruments. Pursuant to the guidance of ASU 2009-13, revenues from such sales are allocated separately to the instruments, consumables, extended maintenance agreements and incentives based on the relative selling price method. Amounts allocated to each element are based on its objectively determined fair value, such as the sales price for the product or service when it is sold separately. Revenues allocated to each element is then recognized when the basic revenue recognition criteria, as described above, is met for each element. Revenues associated with incentives in the form of free goods are deferred until the goods are shipped to the customer. Revenues associated with incentives in the form of extended maintenance agreements are deferred and recognized ratably over the life of the maintenance contract. Incentives in the form of extended maintenance agreements are our most significant multiple element arrangement.

Starting in fiscal 2012, we participate in selling arrangements in the veterinary market that include multiple deliverables, such as instruments, consumables and service agreements associated with our veterinary reference laboratory. Under these arrangements, we recognize revenue upon delivery of the product or performance of the service during the term of the service contract when the basic revenue recognition criteria, as described above, is met for each element. We allocate revenues to each element based on the relative selling price of each deliverable. Amounts allocated to each element are based on its objectively determined fair value, such as the sales price for the product or service when it is sold separately.

In fiscal 2012, we offered customer incentives comprising of arrangements with customers to include discounts on future sales of services associated with our veterinary reference laboratory. We apply judgment in determining whether future discounts are significant and incremental. When the future discount offered is not considered significant and incremental, we do not account for the discount as an element of the original arrangement. To determine whether a discount is significant and incremental, we look to the discount provided in comparison to standalone sales of the same product to similar customers, the level of discount provided on other elements in the arrangement, and the significance of the discount to the overall arrangement. If the discount in the multiple element arrangement approximates the discount typically provided in standalone sales, that discount is not considered incremental. During fiscal 2012 our customer incentive programs with future discounts were not significant.

Table of Contents

At March 31, 2012, 2011 and 2010, the current portion of deferred revenue balances was \$1.2 million, \$953,000 and \$1.2 million, respectively, and the non-current portion of deferred revenue balances was \$2.4 million, \$1.7 million and \$1.4 million, respectively. The total increase in deferred revenue balances as of March 31, 2012 is primarily due to an increase in maintenance contracts offered to customers from time to time in the form of free services in connection with the sale of our products, partially offset by deferred revenue recognized ratably over the life of the maintenance contract.

Customer Programs. From time to time, we offer customer marketing and incentive programs. Our most significant customer programs are described as follows:

Instrument Trade-In Programs. We periodically offer trade-in programs to customers for trading in an existing instrument to purchase a new instrument and we will either provide incentives in the form of free goods or reduce the sales price of the instrument. These incentives in the form of free goods are recorded based on the relative selling price method according to the policies described above.

Instrument Rental Programs. We periodically offer programs to customers whereby certain instruments are made available to customers for rent or on an evaluation basis. These programs typically require customers to purchase a minimum quantity of consumables during a specified period for which we recognize revenues on the related consumables according to the policies described above. Depending on the program offered, customers may purchase the instrument during the rental or evaluation period. Proceeds from such sale are recorded as revenues according to the policies described above. Rental income, if any, are also recorded as revenue according to the policies described above.

Distributor and Customer Rebate Programs. We periodically offer distributor pricing rebates and customer incentives, such as cash rebates, from time to time. The distributor pricing rebates are offered to distributors upon meeting the sales volume requirements during a qualifying period and are recorded as a reduction to gross revenues during a qualifying period. Cash rebates are offered to distributors or customers who purchase certain products or instruments during a promotional period and are recorded as a reduction to gross revenues.

The distributor pricing rebate program is offered to distributors in the North America veterinary market, upon meeting the sales volume requirements of veterinary products during the qualifying period. Factors used in the rebate calculations include the identification of products sold subject to a rebate during the qualifying period and which rebate percentage applies. Based on these factors and using historical trends, adjusted for current changes, we estimate the amount of the rebate that will be paid and record the liability as a reduction to gross revenues when we record the sale of the product. Settlement of the rebate accruals from the date of sale ranges from one to nine months after sale. Changes in the rebate accrual at each fiscal year end are based upon distributors meeting the purchase requirements during the quarter. Other rebate programs offered to distributors or customers vary from period to period in the medical and veterinary markets.

The following table summarizes the change in total accrued distributor and customer rebates (in thousands):

| | Balance at Beginning of Year | Provisions | Payments | Balance at End of Year |
|---------------------------|------------------------------------|------------|-----------|---------------------------|
| Year Ended March 31, 2012 | \$411 | \$1,626 | \$(1,341) | \$ 696 |
| Year Ended March 31, 2011 | \$48 | \$694 | \$(331) | \$ 411 |
| Year Ended March 31, 2010 | \$96 | \$268 | \$(316) | \$ 48 |

Royalty Revenues. Royalties are typically based on licensees' net sales of products that utilize our technology and are recognized as earned in accordance with the contract terms when royalties from licensees can be reliably measured and collectibility is reasonably assured, such as upon the receipt of a royalty statement from the licensee. Our royalty revenue depends on the licensees' use of our technology, and therefore, may vary from period to period and impact our revenues during a quarter. As a result of the license termination with Cepheid during fiscal 2011, our development and licensing revenue was adversely and materially impacted in our consolidated financial statements during fiscal 2012 and 2011. Also, we expect the license termination will adversely and materially impact development and licensing revenue in our consolidated financial statements in the foreseeable future.

Allowance for Doubtful Accounts. We maintain an allowance for doubtful accounts based on our assessment of the collectibility of the amounts owed to us by our customers. In determining the amount of the allowance, we make judgments about the creditworthiness of customers which is mostly determined by the customer's payment history and the outstanding period of accounts. We specifically identify amounts that we believe to be uncollectible and the allowance for doubtful accounts is adjusted accordingly. An additional allowance is recorded based on certain percentages of our aged receivables, using historical experience to estimate the potential uncollectible and our assessment of the general financial condition of our customer base. If our actual collections experience changes, revisions to our allowances may be required, which could adversely affect our operating income.

Table of Contents

Fair Value Measurements. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (“exit price”) in an orderly transaction between market participants at the measurement date. When determining fair value, we consider the principal or most advantageous market in which we would transact and consider assumptions that market participants would use when pricing the asset or liability. The fair value hierarchy distinguishes between (1) market participant assumptions developed based on market data obtained from independent sources (observable inputs) and (2) an entity’s own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The fair value hierarchy consists of three broad levels, which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities. As of March 31, 2012, our investments in cash equivalents, which we classified as available-for-sale, totaled \$7.0 million, using Level 1 inputs since these investments are traded in an active market. The valuations are based on quoted prices of the underlying security that are readily and regularly available in an active market, and accordingly, a significant degree of judgment is not required.

Level 2: Directly or indirectly observable inputs as of the reporting date through correlation with market data, including quoted prices for similar assets and liabilities in active markets and quoted prices in markets that are not active. Level 2 also includes assets and liabilities that are valued using models or other pricing methodologies that do not require significant judgment since the input assumptions used in the models, such as interest rates and volatility factors, are corroborated by readily observable data from actively quoted markets for substantially the full term of the financial instrument. As of March 31, 2012, our available-for-sale investments in certificates of deposits, corporate bonds and municipal bonds, totaled \$8.3 million, using Level 2 inputs, based on market pricing and other observable market inputs for similar securities obtained from various third party data providers.

Level 3: Unobservable inputs that are supported by little or no market data and require the use of significant management judgment. These values are generally determined using pricing models for which the assumptions utilize management’s estimates of market participant assumptions. As of March 31, 2012, we did not have any Level 3 financial assets or liabilities measured at fair value on a recurring basis.

Fair value is a market-based measure considered from the perspective of a market participant who holds the asset or owes the liability rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, our own assumptions are developed to reflect those that market participants would use in pricing the asset or liability at the measurement date. At March 31, 2012, we also had \$36.8 million in investments classified as held-to-maturity and carried at amortized cost.

Investment in Unconsolidated Affiliate. In February 2011, we purchased a 15% equity ownership interest in SMB, for \$2.8 million in cash. We use the equity method to account for our investment in this entity that we do not control, but where we have the ability to exercise significant influence. Equity method investments are recorded at original cost and adjusted periodically to recognize (1) our proportionate share of the investees’ net income or losses after the date of investment, (2) additional contributions made and dividends or distributions received, and (3) impairment losses resulting from adjustments to net realizable value. We eliminate all intercompany transactions in accounting for our equity method investments. We record our proportionate share of the investees’ net income or losses in “Interest and other income (expense), net” on the consolidated statements of income. At March 31, 2012, our investment in unconsolidated affiliate totaled \$2.6 million.

We assess the potential impairment of our equity method investments when indicators such as a history of operating losses, a negative earnings and cash flow outlook, and the financial condition and prospects for the investee’s business

segment might indicate a loss in value. We did not recognize any impairment loss on investment in unconsolidated affiliate during fiscal 2012 and 2011.

Warranty Reserves. We provide for the estimated future costs to be incurred under our standard warranty obligation on our instruments. Our standard warranty obligation on instruments ranges from one to three years, depending on the type of product. The estimated contractual warranty obligation is recorded when the related revenues are recognized and any additional amount is recorded when such cost is probable and can be reasonably estimated. Cost of revenues reflects estimated warranty expense for instruments sold in the current period and any adjustments in estimated warranty expense for the installed base under our standard warranty obligation based on our quarterly evaluation of service experience. While we engage in product quality programs and processes, including monitoring and evaluating the quality of our suppliers, our estimated accrual for warranty exposure is based on our historical experience as to product failures, estimated product failure rates, estimated repair costs, material usage and freight incurred in repairing the instrument after failure and known design changes under the warranty plan.

A provision for defective reagent discs is recorded when the related sale is recognized and any additional amount is recorded when such cost is probable and can be reasonably estimated, at which time they are included in cost of revenues. The warranty cost includes the replacement costs and freight of a defective reagent disc.

Table of Contents

As of March 31, 2012, our current portion of warranty reserves for instruments and reagent discs totaled \$1.2 million and our non-current portion of warranty reserves for instruments totaled \$601,000, which reflects our estimate of warranty obligations based on the estimated product failure rates, the number of instruments in standard warranty, estimated repair and related costs of instruments, and an estimate of defective reagent discs and replacement and related costs of a defective reagent disc.

Each quarter, we reevaluate our estimate of warranty reserves, including our assumptions. During fiscal 2012, we recorded an additional accrual to pre-existing warranties of \$257,000, which increased our warranty reserves and our cost of revenues, based on both historical and projected product performance rates of instruments. For fiscal 2012, 2011 and 2010, the provision for warranty expense related to instruments was \$1.2 million, \$818,000 and \$570,000, respectively. The increase in the provision related to instruments during fiscal 2012 was primarily attributed to a change in our standard warranty period and an increase in the number of instruments under standard warranty.

Management periodically evaluates the sufficiency of the warranty provisions and makes adjustments when necessary. If an unusual performance rate related to warranty claims is noted, an additional warranty accrual may be assessed and recorded when a failure event is probable and the cost can be reasonably estimated. We review the historical warranty cost trends and analyze the adequacy of the ending accrual balance of warranty reserves each quarter. The determination of warranty reserves requires us to make estimates of the estimated product failure rate, expected costs to repair or replace the instruments and to replace defective reagent discs under warranty. If actual repair or replacement costs of instruments or replacement costs of reagent discs differ significantly from our estimates, adjustments to cost of revenues may be required. Additionally, if factors change and we revise our assumptions on the product failure rate of instruments or reagent discs, then our warranty reserves and cost of revenues could be materially impacted in the quarter of such revision, as well as in following quarters.

Inventories. We state inventories at the lower of cost or market, cost being determined using standard costs which approximate actual costs using the first-in, first-out (FIFO) method. Inventories include material, labor and overhead. We establish provisions for excess, obsolete and unusable inventories after evaluation of future demand and market conditions. If future demand or actual market conditions are less favorable than those estimated by management or if a significant amount of the material were to become unusable, additional inventory write-downs may be required, which would have a negative effect on our operating income.

Valuation of Long-Lived Assets. We evaluate the carrying value of our long-lived assets, such as property and equipment and amortized intangible assets, whenever events or changes in business circumstances or our planned use of long-lived assets indicate that the carrying amount of an asset may not be fully recoverable or their useful lives are no longer appropriate. We look to current and future profitability, as well as current and future undiscounted cash flows, excluding financing costs, as primary indicators of recoverability. An impairment loss would be recognized when the sum of the undiscounted future net cash flows expected to result from the use of the asset and its eventual disposal is less than the carrying amount. If impairment is determined to exist, any related impairment loss is calculated based on fair value and long-lived assets are written down to their respective fair values.

Income Taxes. We account for income taxes using the liability method under which deferred tax assets and liabilities are determined based on the differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amounts expected to be recovered.

We recognize and measure benefits for uncertain tax positions using a two-step approach. The first step is to evaluate the tax position taken or expected to be taken in a tax return by determining if the weight of evidence indicates that it

is more likely than not that the tax position will be sustained upon audit, including resolution of any related appeals or litigation processes. For tax positions that are more likely than not to be sustained upon audit, the second step is to measure the tax benefit as the largest amount that is more than 50 percent likely to be realized upon settlement. Significant judgment is required to evaluate uncertain tax positions. At March 31, 2012 and 2011, we had no significant uncertain tax positions. Our policy is to include interest and penalties related to gross unrecognized tax benefits within our provision for income taxes. For fiscal 2012, 2011 and 2010, we did not recognize any interest or penalties related to uncertain tax positions in the consolidated statements of income, and at March 31, 2012 and 2011, we had no accrued interest or penalties.

Share-Based Compensation Expense. We recognize share-based compensation expense, net of an estimated forfeiture rate, over the requisite service period of the award to employees and directors.

We have not granted any stock options since the beginning of fiscal 2007 and we did not grant stock options during fiscal 2012, 2011 or 2010. For stock options granted prior to March 31, 2006, we use the Black-Scholes option pricing model to determine the fair value. Determining the appropriate fair value model and calculating the fair value of share-based awards requires highly subjective assumptions, including risk-free interest rate, expected stock price volatility, expected term and expected dividends.

Table of Contents

For restricted stock units, share-based compensation expense is based on the fair value of our stock at the grant date and recognized net of an estimated forfeiture rate, over the requisite service period of the award. As a result, if factors change and we use different assumptions, our share-based compensation expense could be materially different in the future.

As required by fair value provisions of share-based compensation, employee share-based compensation expense recognized is calculated over the requisite service period of the awards and reduced for estimated forfeitures. The forfeiture rate is estimated based on historical data of our share-based compensation awards that are granted and cancelled prior to vesting and upon historical experience of employee turnover. Changes in estimated forfeiture rates and differences between estimated forfeiture rates and actual experience may result in significant, unanticipated increases or decreases in share-based compensation expense from period to period. To the extent we revise our estimate of the forfeiture rate in the future, our share-based compensation expense could be materially impacted in the quarter of revision, as well as in following quarters.

Share-based compensation expense resulted in a material impact on our earnings per share and on our consolidated financial statements for fiscal 2012, 2011 and 2010. The impact of share-based compensation expense on our consolidated financial results is disclosed in Note 12, "Share-Based Compensation" in the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K. As of March 31, 2012, our unrecognized compensation expense related to restricted stock unit awards granted to employees and directors to date totaled \$19.3 million, which is expected to be recognized over a weighted average service period of 2.05 years. We expect that share-based compensation will materially impact our consolidated financial statements in the foreseeable future. Excluding forfeitures, we estimate expense recognition of restricted stock units over the requisite service period of the award, for awards granted and unvested as of March 31, 2012 as follows: \$6.0 million in fiscal 2013, \$7.3 million in fiscal 2014, \$7.5 million in fiscal 2015 and \$1.7 million in fiscal 2016.

RESULTS OF OPERATIONS

Total Revenues

Revenues by Geographic Region and by Product and Service Category. Revenues by geographic region based on customer location and revenues by product and service category during fiscal 2012, 2011 and 2010 were as follows (in thousands, except percentages):

| Revenues by Geographic Region | Year Ended March 31, | | | Change 2011 to 2012 | | Change 2010 to 2011 | |
|--|----------------------|------------|------------|-------------------------|-------------------|-------------------------|-------------------|
| | 2012 | 2011 | 2010 | Increase/ (Decrease) | Percent Change | Increase/ (Decrease) | Percent Change |
| North America | \$ 128,969 | \$ 117,992 | \$ 101,391 | \$ 10,977 | 9 % | \$ 16,601 | 16 % |
| Percentage of total revenues | 82 % | 82 % | 81 % | | | | |
| Europe | 21,926 | 20,308 | 18,547 | 1,618 | 8 % | 1,761 | 9 % |
| Percentage of total revenues | 14 % | 14 % | 15 % | | | | |
| Asia Pacific and rest of the world | 5,701 | 5,376 | 4,619 | 325 | 6 % | 757 | 16 % |
| Percentage of total revenues | 4 % | 4 % | 4 % | | | | |
| Total revenues | \$ 156,596 | \$ 143,676 | \$ 124,557 | \$ 12,920 | 9 % | \$ 19,119 | 15 % |

(1) Instruments include chemistry analyzers, hematology instruments, VSpro coagulation and specialty analyzers and i-STAT analyzers.

(2) Consumables include reagent discs, hematology reagent kits, VSpro coagulation and specialty cartridges, i-STAT cartridges and rapid tests.

(3) Other products and services include veterinary reference laboratory diagnostic and consulting services.

Table of Contents

Fiscal 2012 Compared to Fiscal 2011

North America. During fiscal 2012, total revenues in North America increased by 9%, or \$11.0 million, as compared to fiscal 2011. The change in total revenues in North America was primarily attributable to the following:

- Total sales of our Piccolo chemistry analyzers and medical reagent discs in North America (excluding sales to the U.S. government) increased by 9%, or \$1.6 million, primarily due to an increase in the sales volume of Piccolo chemistry analyzers to various distributors and an increase in the sales volume of medical reagent discs to various distributors resulting from higher sales to end users.
- Total sales of our Piccolo chemistry analyzers and medical reagent discs to the U.S. government decreased by 15%, or \$566,000, primarily due to a decrease in the U.S. Military's needs for our products as a result of U.S. troops leaving Iraq in 2011.
- Total sales of our VetScan chemistry analyzers and veterinary reagent discs in North America increased by 9%, or \$5.3 million, primarily attributable to (a) an increase in the sales volume of VetScan chemistry analyzers due in part to additional sales personnel, (b) an increase in the sales volume of veterinary reagent discs resulting from an expanded installed base of our VetScan chemistry analyzers and (c) higher average selling prices of veterinary reagent discs.
- Total sales of our VetScan hematology instruments and hematology reagent kits in North America increased by 23%, or \$2.9 million, primarily due to an increase in units of hematology reagent kits sold resulting from an expanded installed base of our VetScan hematology instruments.
- Total sales from our VSpro coagulation and specialty analyzers and related consumables, i-STAT analyzers and related consumables and rapid tests in North America increased by 15%, or \$2.7 million, primarily attributable to (a) an increase in the sales volume of i-STAT analyzers due in part to additional sales personnel and (b) an increase in the sales volume of rapid tests, which includes our Canine Heartworm Rapid Test, introduced in January 2009, our Canine Parvovirus Rapid Test, introduced in March 2011, our Giardia Rapid Test, introduced in May 2011 and our Lyme Rapid Test, introduced in March 2012.
- Other product and service revenues in North America increased by 1%, or \$48,000, primarily due to an increase in service revenue from veterinary reference laboratory diagnostic and consulting services provided by AVRL beginning in the third quarter of fiscal 2012. The increase in other products and services was partially offset by an increase in deferred revenue related to extended maintenance contracts offered to customers from time to time as incentives in the form of free services in connection with the sale of our products.
- Total revenues from development and licensing in North America decreased by 87%, or \$1.1 million, primarily based on Cepheid's discontinuation of license royalty payments in fiscal 2011. For further information, see Note 10, "Commitments and Contingencies," of the Notes to Consolidated Financial Statements contained in this Annual Report on Form 10-K.

Europe. During fiscal 2012, total revenues in Europe increased by 8%, or \$1.6 million, as compared to fiscal 2011. Revenues from Piccolo chemistry analyzers and medical reagent discs increased by 4%, or \$209,000, primarily due to an increase in the sales volume of medical reagent discs to various distributors, partially offset by a decrease in sales of Piccolo chemistry analyzers. Revenues from veterinary instruments increased by 29%, or \$1.2 million, primarily due to an increase in the sales volume of VetScan chemistry analyzers to various distributors. Revenues from veterinary reagent discs increased by 1%, or \$48,000, primarily attributable to higher Euro exchange rates during fiscal 2012, partially offset by a decrease in the sales volume primarily due to a change in ordering pattern of

inventory purchases by a distributor.

Asia Pacific and rest of the world. During fiscal 2012, total revenues in Asia Pacific and rest of the world increased by 6%, or \$325,000, as compared to fiscal 2011. The increase was primarily attributed to an increase in total revenues from VetScan chemistry analyzers and veterinary reagent discs of 5%, or \$148,000 and an increase in total revenues from VetScan hematology instruments and hematology reagent kits of 12%, or \$111,000.

Significant Concentration. One distributor in the United States, Animal Health International, accounted for 15% of our total worldwide revenues during fiscal 2012. Animal Health International was formed in 2011 from two animal health companies, which included Walco International, Inc., d/b/a DVM Resources.

Fiscal 2011 Compared to Fiscal 2010

North America. During fiscal 2011, total revenues in North America increased 16%, or \$16.6 million, as compared to fiscal 2010. The change in total revenues in North America was attributed primarily to the following:

- Sales of our Piccolo chemistry analyzers in North America (excluding the U.S. government) increased 31%, or \$985,000, primarily due to an increase in units sold to distributors resulting from higher sales to end users during the first nine months of fiscal 2011.

Table of Contents

- Medical reagent discs sales in North America (excluding the U.S. government) increased 14%, or \$1.8 million, primarily due to an increase in units sold resulting from an expanded installed base of our Piccolo chemistry analyzers.
- Total sales of our Piccolo chemistry analyzers and medical reagent discs to the U.S. government increased 23%, or \$700,000, primarily due to an increase in the needs for our products during the third quarter of fiscal 2011, which were not predictable.
- Veterinary reagent discs sales in North America increased 13%, or \$5.6 million, primarily due to an increase in units sold resulting from an expanded installed base of our VetScan chemistry analyzers and higher average selling prices.
- Total sales of our VetScan hematology instruments and hematology reagent kits in North America increased 14%, or \$1.6 million, primarily attributed to (a) an increase in units of VetScan hematology instruments sold and (b) an increase in units of hematology reagent kits sold resulting from an expanded installed base of our VetScan hematology instruments.
- Total sales from our original equipment manufacturer (“OEM”) supplied products (excluding hematology) in North America increased 72%, or \$7.3 million, during fiscal 2011, primarily due to the commencement of sales and marketing activities for our VetScan VSpro coagulation and specialty analyzers and related consumables (launched in the fourth quarter of fiscal 2009), canine heartworm rapid tests (launched in the fourth quarter of fiscal 2009), and VetScan i-STAT analyzers (launched in the second quarter of fiscal 2010) and related VetScan i-STAT consumables (launched in the first quarter of fiscal 2010).
- Total revenues from development and licensing in North America decreased 60%, or \$1.9 million, during fiscal 2011, primarily based on the licensees’ decreased use of our technology, which varies from period to period. On June 28, 2010, we notified Cepheid that Cepheid breached its license agreement with us due to Cepheid’s discontinuation of license royalty payments. On October 1, 2010, we informed Cepheid that the breach had not been cured, and we terminated the entire license, as to all or any Cepheid products.

Europe. During fiscal 2011, total revenues in Europe increased 9%, or \$1.8 million, as compared to fiscal 2010. The change in total revenues in Europe was attributed primarily to the following:

- Sales of our Piccolo chemistry analyzers in Europe increased 46%, or \$721,000, primarily due to an increase in sales to distributors during the first six months of fiscal 2011.
- Medical reagent discs sales in Europe increased 15%, or \$337,000, primarily due to an increase in units sold resulting from an expanded installed base of our Piccolo chemistry analyzers.
- Sales of our VetScan chemistry analyzers in Europe decreased 15%, or \$509,000, primarily due to lower inventory purchases by a distributor.
- Veterinary reagent discs sales in Europe increased 10%, or \$905,000, primarily due to an increase in units sold resulting from an expanded installed base of our VetScan chemistry analyzers.
- Total sales from our OEM supplied products (excluding hematology) in Europe increased 103%, or \$279,000, during fiscal 2011, primarily due to the commencement of sales and marketing activities for our VetScan i-STAT analyzers (launched in the second quarter of fiscal 2010) and related VetScan i-STAT consumables (launched in the first quarter of fiscal 2010).

Asia Pacific and rest of the world. During fiscal 2011, total revenues in Asia Pacific and rest of the world increased 16%, or \$757,000, as compared to fiscal 2010. The increase in total revenues in Asia Pacific and rest of the world was attributed primarily to the following:

- Veterinary reagent discs sales in Asia Pacific and rest of the world increased 13%, or \$283,000, primarily due to increased sales to various distributors during fiscal 2011.
- Total sales from our OEM supplied products (excluding hematology) in Asia Pacific and rest of the world increased 143%, or \$327,000, during fiscal 2011, primarily due to the commencement of sales and marketing activities for our VetScan i-STAT analyzers (launched in the second quarter of fiscal 2010) and related VetScan i-STAT consumables (launched in the first quarter of fiscal 2010).

Significant Concentration. There were no distributors or direct customers that accounted for 10% or more of our total worldwide revenues during fiscal 2011.

Segment Results

We identify our reportable segments as those customer groups that represent more than 10% of our combined revenue or gross profit or loss of all reported operating segments. We manage our business on the basis of the following two reportable segments: (i) the medical market and (ii) the veterinary market, which are based on the products sold and services provided by market and customer group.

Table of Contents

Fiscal 2012 Compared to Fiscal 2011

The following table presents revenues, cost of revenues, gross profit and percentage of revenues by operating segments and from certain unallocated items for fiscal 2012 and 2011 (in thousands, except percentages):

| | 2012 | | Year Ended March 31, Percent of Revenues(1) | | 2011 | | Percent of Revenues(1) | | Change Increase/ (Decrease) | | Percent Change | |
|------------------------------|------|---------|---|---|------|---------|---------------------------|---|-----------------------------------|---------|-------------------|---|
| Revenues: | | | | | | | | | | | | |
| Medical Market | \$ | 30,279 | 100 | % | \$ | 28,988 | 100 | % | \$ | 1,291 | 4 | % |
| Percentage of total revenues | | 19 | % | | | 20 | % | | | | | |
| Veterinary Market | | 121,789 | 100 | % | | 108,400 | 100 | % | | 13,389 | 12 | % |
| Percentage of total revenues | | 78 | % | | | 75 | % | | | | | |
| Other(2) | | 4,528 | | | | 6,288 | | | | (1,760) | (28) | % |
| Percentage of total revenues | | 3 | % | | | 5 | % | | | | | |
| Total revenues | | 156,596 | | | | 143,676 | | | | 12,920 | 9 | % |
| Cost of revenues: | | | | | | | | | | | | |
| Medical Market | | 13,505 | 45 | % | | 13,647 | 47 | % | | (142) | (1) | % |

| Other(2) | | 5,522 | | | | 4,799 | | | | 723 | 15 | % |
| Total cost of revenues | | 71,493 | | | | 63,884 | | | | 7,609 | 12 | % |
| Gross profit: | | | | | | | | | | | | |
| Medical Market | | 16,774 | 55 | % | | 15,341 | 53 | % | | 1,433 | 9 | % |
| Veterinary Market | | 69,323 | 57 | % | | 62,962 | 58 | % | | 6,361 | 10 | % |
| Other(2) | | (994) | | | | 1,489 | | | | (2,483) | (167) | % |
| Gross profit | \$ | 85,103 | | | \$ | 79,792 | | | \$ | 5,311 | 7 | % |

(1) The percentage reported is based on revenues by operating segment.

(2) Represents unallocated items, not specifically identified to any particular business segment.

Medical Market

Revenues for Medical Market Segment

During fiscal 2012, total revenues in the medical market increased by 4%, or \$1.3 million, as compared to fiscal 2011. Total revenues from Piccolo chemistry analyzers were flat, during fiscal 2012 as compared to fiscal 2011, primarily attributable to an increase in the sales volume to various distributors in North America, partially offset by a decrease in the U.S. Military's needs for our products as a result of U.S. troops leaving Iraq in 2011 and a decrease in sales of Piccolo chemistry analyzers in Europe. Total revenues from medical reagent discs increased by 6%, or \$1.2 million, during fiscal 2012 as compared to fiscal 2011, primarily attributable to (a) an increase in the sales volume to various distributors in North America resulting from higher sales to end users and (b) an increase in the sales volume to various distributors in Europe.

Gross Profit for Medical Market Segment

Gross profit for the medical market segment increased by 9%, or \$1.4 million, during fiscal 2012 as compared to fiscal 2011. Gross profit percentages for the medical market segment during fiscal 2012 and 2011 were 55% and 53%, respectively. In absolute dollars, the increase in gross profit for the medical market segment was primarily attributable to (a) an increase in the sales volume of medical reagent discs during fiscal 2012 and (b) lower manufacturing costs on medical reagent discs during fiscal 2012. The increase in gross profit was partially offset by lower average selling prices of Piccolo chemistry analyzers during fiscal 2012. As a percentage, the increase in gross profit was primarily due to (a) an increase in the sales volume of medical reagent discs during fiscal 2012 and (b) lower manufacturing costs on medical reagent discs during fiscal 2012.

Table of Contents

Veterinary Market

Revenues for Veterinary Market Segment

During fiscal 2012, total revenues in the veterinary market increased by 12%, or \$13.4 million, as compared to fiscal 2011. Total revenues from veterinary instruments increased by 13%, or \$3.0 million, during fiscal 2012 as compared to fiscal 2011, primarily attributable to (a) an increase in the sales volume of VetScan chemistry analyzers and i-STAT analyzers in North America, both due in part to additional sales personnel, and (b) an increase in the sales volume of VetScan chemistry analyzers to various distributors in Europe.

Total revenues from consumables in the veterinary market increased by 12%, or \$9.7 million, during fiscal 2012 as compared to fiscal 2011, primarily attributable to (a) an increase in the sales volume of veterinary reagent discs in North America resulting from an expanded installed base of our VetScan chemistry analyzers, (b) higher average selling prices of veterinary reagent discs in North America, (c) higher Euro exchange rates of our veterinary reagent discs sold in Europe during fiscal 2012, (d) an increase in units of hematology reagent kits sold in North America resulting from an expanded installed base of our VetScan hematology instruments and (e) an increase in the sales volume of rapid tests in North America, which includes our Canine Heartworm Rapid Test, introduced in January 2009, our Canine Parvovirus Rapid Test, introduced in March 2011, our Giardia Rapid Test, introduced in May 2011 and our Lyme Rapid Test, introduced in March 2012. The net increase in revenues from consumables was partially offset by a decrease in the sales volume of veterinary reagent discs in Europe primarily due to a change in ordering pattern of inventory purchases by a distributor.

Total revenues from other products and services in the veterinary market increased by 56%, or \$740,000, primarily attributable to veterinary reference laboratory diagnostic and consulting services provided by AVRL in North America beginning in the third quarter of fiscal 2012.

Gross Profit for Veterinary Market Segment

Gross profit for the veterinary market segment increased by 10%, or \$6.4 million, during fiscal 2012 as compared to fiscal 2011. Gross profit percentages for the veterinary market segment during fiscal 2012 and 2011 were 57% and 58%, respectively. In absolute dollars, the increase in gross profit for the veterinary market segment was primarily due to (a) an increase in the sales volume of VetScan chemistry analyzers, veterinary reagent discs, hematology reagent kits and rapid tests during fiscal 2012, (b) higher average selling prices of veterinary reagent discs during fiscal 2012 and (c) lower manufacturing costs of veterinary reagent discs during fiscal 2012. The increase in gross profit was partially offset by (a) higher costs of VetScan hematology instruments due to the Euro exchange rates and higher manufacturing and repair costs during fiscal 2012 and (b) cost of services provided by AVRL beginning in the third quarter of fiscal 2012. As a percentage, the decrease in gross profit was primarily due to (a) an increase in freight costs to ship products, (b) an increase in the sales volume of our OEM supplied products, which have a lower margin contribution and (c) cost of services provided by AVRL beginning in the third quarter of fiscal 2012.

Other

Gross profit in our other category decreased by 167%, or \$2.5 million, during fiscal 2012 as compared to fiscal 2011, primarily attributable to (a) a decrease in development and licensing revenue based on Cepheid's discontinuation of license royalty payments, (b) an increase in deferred revenue related to extended maintenance contracts offered to customers from time to time as incentives in the form of free services in connection with the sale of our products and (c) an increase in costs of materials and overhead allocations on facilities, both related to our instrument repair and support center, which are not allocated to a particular segment.

Table of Contents

Fiscal 2011 Compared to Fiscal 2010

The following table presents revenues, cost of revenues, gross profit and percentage of revenues by operating segments and from certain unallocated items for fiscal 2011 and 2010 (in thousands, except percentages):

| | Year Ended March 31, | | Year Ended March 31, | | Change | |
|-------------------------------|----------------------|------------------------|----------------------|------------------------|----------------------|----------------|
| | 2011 | Percent of Revenues(1) | 2010 | Percent of Revenues(1) | Increase/ (Decrease) | Percent Change |

(1) The percentage reported is based on revenues by operating segment.

(2) Represents unallocated items, not specifically identified to any particular business segment.

Medical Market**Revenues for Medical Market Segment**

During fiscal 2011, total revenues in the medical market increased by 20%, or \$4.8 million, as compared to fiscal 2010. Components of the change were as follows:

Instruments. Total revenues from sales of our Piccolo chemistry analyzers increased by 31%, or \$2.0 million, during fiscal 2011 as compared to fiscal 2010. The increase in revenues was primarily attributed to (a) an increase in revenues in North America (excluding the U.S. government) of 31%, or \$985,000, primarily due to an increase in units sold to distributors resulting from higher sales to end users during the first nine months of fiscal 2011, and (b) an increase in revenues in Europe by 46%, or \$721,000, primarily due to an increase in sales to distributors during the first six months of fiscal 2011.

Consumables. Total revenues from medical reagent discs increased by 16%, or \$2.7 million, during fiscal 2011 as compared to fiscal 2010. The increase in revenues was primarily attributed to (a) an increase in revenues in North America (excluding the U.S. government) of 14%, or \$1.8 million, primarily due to an increase in units sold resulting from an expanded installed base of our Piccolo chemistry analyzers and (b) an increase in revenues in Europe of 15%,

or \$337,000, primarily due to an increase in units sold resulting from an expanded installed base of our Piccolo chemistry analyzers.

Total sales of our Piccolo chemistry analyzers and medical reagent discs to the U.S. government increased 23%, or \$700,000, primarily due to an increase in the needs for our products during the third quarter of fiscal 2011, which were not predictable.

Gross Profit for Medical Market Segment

Gross profit for the medical market segment increased by 12%, or \$1.7 million, during fiscal 2011 as compared to fiscal 2010. Gross profit percentages for the medical market segment during fiscal 2011 and 2010 were 53% and 57%, respectively. In absolute dollars, the increase in gross profit for the medical market segment was primarily due to an increase in units of Piccolo chemistry analyzers and medical reagent discs sold during fiscal 2011, partially offset by higher manufacturing costs on medical reagent discs during fiscal 2011. As a percentage, the decrease in gross profit was primarily due to (a) lower average selling prices of medical reagent discs sold during fiscal 2011 and (b) higher manufacturing costs on medical reagent discs during fiscal 2011.

Table of Contents

Veterinary Market

Revenues for Veterinary Market Segment

During fiscal 2011, total revenues in the veterinary market increased by 17%, or \$16.0 million, as compared to fiscal 2010. Total revenues from veterinary instruments increased by 6%, or \$1.3 million, during fiscal 2011 as compared to fiscal 2010. Total revenues from consumables in the veterinary market increased by 21%, or \$14.4 million, during fiscal 2011 as compared to fiscal 2010. Components of the change were as follows:

- Sales of our VetScan chemistry analyzers decreased by 5%, or \$586,000, during fiscal 2011 as compared to fiscal 2010. The decrease in revenues was primarily attributed to a decrease in revenues in Europe of 15%, or \$509,000, primarily due to lower inventory purchases by a distributor.
- Total revenues from veterinary reagent discs increased by 12%, or \$6.8 million, during fiscal 2011 as compared to fiscal 2010. The increase in revenues was primarily attributed to (a) an increase in revenues in North America of 13%, or \$5.6 million, primarily due to an increase in units sold resulting from an expanded installed base of our VetScan chemistry analyzers and higher average selling prices, (b) an increase in revenues in Europe of 10%, or \$905,000, primarily due to an increase in units sold resulting from an expanded installed base of our VetScan chemistry analyzers, and (c) an increase in revenues in Asia Pacific and rest of the world of 13%, or \$283,000, primarily due to increased sales to various distributors during fiscal 2011.
- Total sales of our VetScan hematology instruments and hematology reagent kits increased by 13%, or \$1.7 million, during fiscal 2011 as compared to fiscal 2010. The increase in revenues was primarily attributed to an increase in revenues in North America of 14%, or \$1.6 million, due to (a) an increase in units of VetScan hematology instruments sold and (b) an increase in units of hematology reagent kits sold resulting from an expanded installed base of our VetScan hematology instruments.
- Total sales from our OEM supplied products (excluding hematology) increased by 74%, or \$7.9 million, during fiscal 2011 as compared to fiscal 2010. The increase was primarily in North America due to the commencement of sales and marketing activities for our VetScan VSpro coagulation and specialty analyzers and related consumables (launched in the fourth quarter of fiscal 2009), canine heartworm rapid tests (launched in the fourth quarter of fiscal 2009), and VetScan i-STAT analyzers (launched in the second quarter of fiscal 2010) and related VetScan i-STAT consumables (launched in the first quarter of fiscal 2010).

Gross Profit for Veterinary Market Segment

Gross profit for the veterinary market segment increased by 14%, or \$7.7 million, during fiscal 2011 as compared to fiscal 2010. Gross profit percentages for the veterinary market segment during fiscal 2011 and 2010 were 58% and 60%, respectively. In absolute dollars, the increase in gross profit for the veterinary market segment was primarily due to (a) an increase in the sales volume of veterinary reagent discs, hematology instruments, hematology reagent kits, VetScan i-STAT analyzers and related consumables and canine heartworm rapid tests during fiscal 2011 and (b) a stronger U.S. dollar relative to the Euro currency on hematology instruments during fiscal 2011. The increase was partially offset by (a) higher manufacturing costs on veterinary reagent discs during fiscal 2011 and (b) higher unit costs from our supplier of VetScan i-STAT consumables during fiscal 2011, primarily due to a pricing promotion during fiscal 2010. As a percentage, the decrease in gross profit was primarily due to (a) higher manufacturing costs on veterinary reagent discs during fiscal 2011 and (b) higher relative sales of VetScan i-STAT analyzers and related consumables, which have a lower gross margin contribution.

Cost of Revenues

The following sets forth our cost of revenues for fiscal 2012, 2011 and 2010 (in thousands, except percentages):

| | Year Ended March 31, | | | Change 2011 to 2012 | | Change 2010 to 2011 | |
|---------------------------------|----------------------|----------|----------|-------------------------|-------------------|-------------------------|-------------------|
| | 2012 | 2011 | 2010 | Increase/ (Decrease) | Percent Change | Increase/ (Decrease) | Percent Change |
| Cost of revenues | \$71,493 | \$63,884 | \$52,435 | \$7,609 | 12 % | \$11,449 | 22 % |
| Percentage of total revenues | 46 % | 44 % | 42 % | | | | |

Cost of revenues includes material, costs associated with manufacturing, assembly, packaging, warranty repairs, test and quality assurance for our instruments and consumables and manufacturing overhead, including costs of personnel and equipment associated with manufacturing support. Beginning in the third quarter of fiscal 2012, cost of revenues includes cost of services for veterinary reference laboratory diagnostic and consulting services provided by AVRL.

Table of Contents

Fiscal 2012 Compared to Fiscal 2011

The increase in cost of revenues, in absolute dollars, during fiscal 2012 as compared to fiscal 2011, was primarily due to (a) an increase in the sales volume of Piccolo and VetScan chemistry analyzers, VetScan hematology instruments and VetScan i-STAT analyzers, (b) an increase in the sales volume of medical and veterinary reagent discs, hematology reagent kits and rapid tests (c) higher costs of VetScan hematology instruments due to the Euro exchange rates and higher manufacturing and repair costs, (d) an increase in freight costs to ship products and (e) cost of services provided by AVRL beginning in the third quarter of fiscal 2012. The increase in cost of revenues was partially offset by lower manufacturing costs of reagent discs. While we have an ongoing cost improvement program to reduce material and component costs and are implementing design changes and process improvements, any cost reductions and design and process improvements may be partially offset by increases in other manufacturing costs in subsequent periods.

Fiscal 2011 Compared to Fiscal 2010

The increase in cost of revenues, in absolute dollars, during fiscal 2011 as compared to fiscal 2010, was primarily due to (a) an increase in the sales volume of our medical and veterinary reagent discs and VetScan i-STAT analyzers and related consumables during fiscal 2011, (b) higher manufacturing costs on our medical and veterinary reagent discs, primarily due to higher yield losses related to plastic bases and (c) higher freight costs to ship products. As a percentage of total revenues, the increase in cost of revenues during fiscal 2011, as compared to fiscal 2010, was primarily due to (a) a pricing promotion by our supplier of VetScan i-STAT consumables during fiscal 2010 and (b) higher manufacturing costs on our medical and veterinary reagent discs during fiscal 2011.

Gross Profit

The following sets forth our gross profit for fiscal 2012, 2011 and 2010 (in thousands, except percentages):

| | Year Ended March 31, | | | Change 2011 to 2012 | | Change 2010 to 2011 | |
|--------------------|----------------------|----------|----------|-------------------------|-------------------|-------------------------|-------------------|
| | 2012 | 2011 | 2010 | Increase/ (Decrease) | Percent Change | Increase/ (Decrease) | Percent Change |
| Total gross profit | \$85,103 | \$79,792 | \$72,122 | \$5,311 | 7 % | \$7,670 | 11 % |
| Total gross margin | 54 % | 56 % | 58 % | | | | |

Fiscal 2012 Compared to Fiscal 2011

Gross profit in fiscal 2012 increased by 7%, or \$5.3 million, as compared to fiscal 2011, primarily attributable to the following: (a) an increase in the sales volume of VetScan chemistry analyzers, medical and veterinary reagent discs, hematology reagent kits and rapid tests during fiscal 2012, (b) higher average selling prices of veterinary reagent discs during fiscal 2012 and (c) lower manufacturing costs on medical and veterinary reagent discs during fiscal 2012. The increase in gross profit was partially offset by (a) lower average selling prices of Piccolo chemistry analyzers during fiscal 2012, (b) higher costs of VetScan hematology instruments due to the Euro exchange rates and higher manufacturing and repair costs during fiscal 2012, (c) cost of services provided by AVRL beginning in the third quarter of fiscal 2012, (d) a decrease in development and licensing revenue based on Cepheid's discontinuation of license royalty payments, (e) an increase in deferred revenue related to extended maintenance contracts offered to customers from time to time as incentives in the form of free services in connection with the sale of our products and (f) an increase in costs of materials and overhead allocations on facilities, both related to our instrument repair and support center. As a percentage, the decrease in gross profit was primarily due to (a) an increase in freight costs to ship products, (b) an increase in the sales volume of our OEM supplied products, which have a lower margin

contribution and (c) cost of services provided by AVRL beginning in the third quarter of fiscal 2012, partially offset by (a) an increase in the sales volume of medical reagent discs during fiscal 2012 and (b) lower manufacturing costs on medical reagent discs during fiscal 2012.

Fiscal 2011 Compared to Fiscal 2010

Gross profit in fiscal 2011 increased by 11%, or \$7.7 million, as compared to fiscal 2010, primarily due to the following: (a) an increase in the sales volume of Piccolo chemistry analyzers and medical reagent discs sold during fiscal 2011, (b) an increase in the sales volume of veterinary reagent discs, hematology instruments, hematology reagent kits, VetScan i-STAT analyzers and related consumables and canine heartworm rapid tests during fiscal 2011, and (c) a stronger U.S. dollar relative to the Euro currency on hematology instruments during fiscal 2011. The increase was partially offset by (a) higher manufacturing costs on medical and veterinary reagent discs during fiscal 2011, primarily due to higher yield losses related to plastic bases and (b) higher unit costs from our supplier of VetScan i-STAT consumables during fiscal 2011, primarily due to a pricing promotion during fiscal 2010. As a percentage, the decrease in gross profit was primarily due to (a) higher manufacturing costs on medical and veterinary reagent discs during fiscal 2011, and (b) higher relative sales of VetScan i-STAT analyzers and related consumables, which have a lower gross margin contribution.

Table of Contents

Research and Development

The following sets forth our research and development expenses for fiscal 2012, 2011 and 2010 (in thousands, except percentages):

| | Year Ended March 31, | | | Change 2011 to 2012 | | Change 2010 to 2011 | | |
|------------------------------|----------------------|----------|----------|-------------------------|-------------------|-------------------------|-------------------|---|
| | 2012 | 2011 | 2010 | Increase/ (Decrease) | Percent Change | Increase/ (Decrease) | Percent Change | |
| Research and development | \$12,246 | \$11,973 | \$10,688 | \$273 | 2 | % \$1,285 | 12 | % |
| Percentage of total revenues | 8 | % 8 | % 9 | % | | | | |

Research and development expenses consist of personnel costs (including salaries, benefits and share-based compensation expense), consulting expenses and materials and related expenses associated with the development of new tests and test methods, clinical trials, product improvements and optimization and enhancement of existing products.

Fiscal 2012 Compared to Fiscal 2011

Research and development expenses in fiscal 2012 increased by 2%, or \$273,000, as compared to fiscal 2011. Research and development expenses in fiscal 2012 related primarily to new product development and enhancement of existing products and clinical trials. Research and development expenses are based on the project activities planned and the level of spending depends on budgeted expenditures. The projects primarily relate to new product development in both the medical and veterinary markets and costs related to compliance with FDA regulations and clinical trials. Share-based compensation expense included in research and development expenses during fiscal 2012 and 2011 was \$866,000 and \$880,000, respectively.

We anticipate the dollar amount of research and development expenses to increase in fiscal 2013 from fiscal 2012 but remain consistent as a percentage of total revenues, as we complete new products for both the medical and veterinary markets.

Fiscal 2011 Compared to Fiscal 2010

Research and development expenses in fiscal 2011 increased by 12%, or \$1.3 million, as compared to fiscal 2010. Research and development expenses in fiscal 2011 related primarily to new product development and enhancement of existing products and clinical trials. Research and development expenses are based on the project activities planned and the level of spending depends on budgeted expenditures. The projects primarily relate to new product development in both the medical and veterinary markets and costs related to compliance with FDA regulations and clinical trials. Share-based compensation expense included in research and development expenses during fiscal 2011 and 2010 was \$880,000 and \$849,000, respectively.

Sales and Marketing

The following sets forth our sales and marketing expenses for fiscal 2012, 2011 and 2010 (in thousands, except percentages):

| | Year Ended March 31, | | | Change 2011 to 2012 | | Change 2010 to 2011 | |
|--|----------------------|------|------|-------------------------|-------------------|-------------------------|-------------------|
| | 2012 | 2011 | 2010 | Increase/ (Decrease) | Percent Change | Increase/ (Decrease) | Percent Change |

Edgar Filing: ABAXIS INC - Form 10-K

| | 2012 | 2011 | 2010 | (Decrease) | Change | (Decrease) | Change |
|------------------------------|----------|----------|----------|------------|--------|------------|--------|
| Sales and marketing expenses | \$39,618 | \$34,384 | \$30,138 | \$5,234 | 15 | % \$4,246 | 14 |
| Percentage of total revenues | 25 | % 24 | % 24 | % | | | % |

Sales and marketing expenses consist of personnel costs (including salaries, benefits and share-based compensation expense), commissions and travel-related expenses for personnel engaged in selling, costs associated with advertising, lead generation, marketing programs, trade shows, services related to customer and technical support and costs associated with advertising and marketing of AVRL.

Fiscal 2012 Compared to Fiscal 2011

Sales and marketing expenses in fiscal 2012 increased by 15%, or \$5.2 million, as compared to fiscal 2011. The increase was primarily due to (a) increased personnel-related costs resulting from an increase in headcount to support the growth in our veterinary market in North America and (b) increased promotional and marketing related spending in our veterinary market in North America. Share-based compensation expense included in sales and marketing expenses during fiscal 2012 and 2011 was \$1.9 million and \$1.5 million, respectively.

Table of Contents

Fiscal 2011 Compared to Fiscal 2010

Sales and marketing expenses in fiscal 2011 increased by 14%, or \$4.2 million, as compared to fiscal 2010. The increase was primarily related to higher personnel-related costs to support the growth in both our medical and veterinary markets. Share-based compensation expense included in sales and marketing expenses during fiscal 2011 and 2010 was \$1.5 million and \$1.3 million, respectively.

General and Administrative

The following sets forth our general and administrative expenses for fiscal 2012, 2011 and 2010 (in thousands, except percentages):

| | Year Ended March 31, | | | Change 2011 to 2012 | | Change 2010 to 2011 | |
|-------------------------------------|----------------------|-----------|-----------|-------------------------|-------------------|-------------------------|-------------------|
| | 2012 | 2011 | 2010 | Increase/ (Decrease) | Percent Change | Increase/ (Decrease) | Percent Change |
| General and administrative expenses | \$ 13,782 | \$ 10,963 | \$ 10,521 | \$ 2,819 | 26 % | \$ 442 | 4 % |
| Percentage of total revenues | 9 % | 8 % | 8 % | | | | |

General and administrative expenses consist of personnel costs (including salaries, benefits and share-based compensation expense), and expenses for outside professional services related to general corporate functions, including accounting and legal, and other general and administrative expenses.

Fiscal 2012 Compared to Fiscal 2011

General and administrative expenses in fiscal 2012 increased by 26%, or \$2.8 million, as compared to fiscal 2011, primarily due to (a) an increase of \$1.5 million in legal expenses, primarily related to pursuing our Cepheid patent infringement case (see Note 10, "Commitments and Contingencies," of the Notes to Consolidated Financial Statements contained in this Annual Report on Form 10-K for further information) and compliance in an investigation by the United States Federal Trade Commission of a competitor and (b) an increase of \$1.6 million related to start-up costs to develop AVRL during the first and second quarters of fiscal 2012. AVRL began providing services starting in the third quarter of fiscal 2012. Share-based compensation expense included in general and administrative expenses during fiscal 2012 and 2011 was \$2.0 million and \$1.8 million, respectively.

Fiscal 2011 Compared to Fiscal 2010

General and administrative expenses in fiscal 2011 increased by 4%, or \$442,000, as compared to fiscal 2010, primarily due to (a) legal expenses related to pursuing a patent infringement case and (b) legal costs related to compliance in an investigation by the United States Federal Trade Commission of a competitor. The increase was partially offset by a decrease primarily due to lower personnel-related costs resulting from a decrease in share-based compensation expense during fiscal 2011 as forfeiture estimates were adjusted to reflect actual forfeitures when an award vests. Share-based compensation expense included in general and administrative expenses during fiscal 2011 and 2010 was \$1.8 million and \$2.9 million, respectively.

Interest and Other Income (Expense), Net

Edgar Filing: ABAXIS INC - Form 10-K

The following sets forth our interest and other income (expense), net for fiscal 2012, 2011 and 2010 (in thousands, except percentages):

| | Year Ended March 31, | | | Change 2011 to 2012 | | Change 2010 to 2011 | |
|--|----------------------|---------|-------|-------------------------|-------------------|-------------------------|-------------------|
| | 2012 | 2011 | 2010 | Increase/ (Decrease) | Percent Change | Increase/ (Decrease) | Percent Change |
| Interest and other income (expense), net | \$710 | \$1,099 | \$630 | \$(389) | (35)% | \$469 | 74% |

Interest and other income (expense), net consists primarily of interest earned on cash and cash equivalents and investments, foreign currency exchange gains and losses and our equity in net income and loss of an unconsolidated affiliate.

Fiscal 2012 Compared to Fiscal 2011

Interest and other income (expense), net in fiscal 2012 decreased by 35%, or \$389,000, as compared to fiscal 2011. The decrease in interest and other income (expense), net in fiscal 2012, as compared to fiscal 2011, was primarily due to (a) net unfavorable foreign currency exchange rates during the second and third quarters of fiscal 2012 and (b) equity in net loss of an unconsolidated affiliate. The decrease was partially offset by (a) net favorable foreign currency exchange rates during the first quarter of fiscal 2012, (b) grant income awarded to set up AVRL and (c) grant income from the City of Union City to purchase capital equipment, which we recognize over the asset's estimated useful life (see Note 9, "Borrowings," of the Notes to Consolidated Financial Statements contained in this Annual Report on Form 10-K for further information).

Table of Contents

Fiscal 2011 Compared to Fiscal 2010

Interest and other income (expense), net in fiscal 2011 increased by 74%, or \$469,000. The increase in interest and other income (expense), net, in fiscal 2011, as compared to fiscal 2010, was primarily attributed to (a) higher average invested balances in our investment portfolio during fiscal 2011 and (b) net favorable foreign currency exchange rates during fiscal 2011.

Income Tax Provision

The following sets forth, our income tax provision for fiscal 2012, 2011 and 2010 (in thousands, except percentages):

| | Year Ended March 31, | | | | | |
|----------------------|----------------------|---|---------|---|---------|---|
| | 2012 | | 2011 | | 2010 | |
| Income tax provision | \$7,076 | | \$9,034 | | \$8,382 | |
| Effective tax rate | 35 | % | 38 | % | 39 | % |

Fiscal 2012 Compared to Fiscal 2011

For fiscal 2012 and fiscal 2011, the income tax provisions were \$7.1 million, based on an effective tax rate of 35%, and \$9.0 million, based on an effective tax rate of 38%, respectively. The decrease in the effective tax rate during fiscal 2012, as compared to fiscal 2011, was primarily due to lower state tax expenses resulting from the change in California to a single factor apportionment.

We expect our effective tax rate will be approximately 37% for federal, foreign and various state tax jurisdictions in fiscal 2013.

Fiscal 2011 Compared to Fiscal 2010

For fiscal 2011 and fiscal 2010, the income tax provisions were \$9.0 million, based on an effective tax rate of 38%, and \$8.4 million, based on an effective tax rate of 39%, respectively. The decrease in the effective tax rate during fiscal 2011, as compared to fiscal 2010, was primarily due to an increase in tax benefits for federal qualified production activities and a decrease in non-deductible compensation expense.

LIQUIDITY AND CAPITAL RESOURCES

Cash, Cash Equivalents and Investments

The following table summarizes our cash, cash equivalents and short-term and long-term investments at March 31, 2012, 2011 and 2010 (in thousands, except percentages):

| | March 31, | | | | | |
|--|-----------|---|-----------|---|----------|---|
| | 2012 | | 2011 | | 2010 | |
| Cash and cash equivalents | \$45,843 | | \$43,471 | | \$27,857 | |
| Short-term investments | 21,689 | | 25,981 | | 32,343 | |
| Long-term investments | 23,442 | | 36,237 | | 36,319 | |
| Total cash, cash equivalents and investments | \$90,974 | | \$105,689 | | \$96,519 | |
| Percentage of total assets | 50 | % | 56 | % | 58 | % |

At March 31, 2012, we had net working capital of \$110.0 million compared to \$107.5 million at March 31, 2011.

Cash Flow Changes

Cash provided by (used in) during fiscal 2012, 2011 and 2010 were as follows (in thousands):

| | Year Ended March 31, | | |
|--|----------------------|----------|-------------|
| | 2012 | 2011 | 2010 |
| Net cash provided by operating activities | \$21,973 | \$16,369 | \$22,672 |
| Net cash provided by (used in) investing activities | 8,479 | (3,808) | (46,624) |
| Net cash provided by (used in) financing activities | (27,915) | 2,784 | 2,565 |
| Effect of exchange rate changes on cash and cash equivalents | (165) | 269 | 7 |
| Net increase (decrease) in cash and cash equivalents | \$2,372 | \$15,614 | \$(21,380) |

Table of Contents

Cash and cash equivalents at March 31, 2012 were \$45.8 million compared to \$43.5 million at March 31, 2011. The increase in cash and cash equivalents during fiscal 2012 was primarily due to net cash provided by operating activities of \$22.0 million and proceeds from maturities and redemptions of investments of \$42.6 million. The increase was partially offset by purchases of investments of \$26.4 million, purchases of property and equipment of \$7.7 million, payments made for tax withholdings related to net share settlements of restricted stock units of \$2.2 million and repurchases of common stock of \$27.3 million during fiscal 2012.

In fiscal 2012, 2011 and 2010, the effect of exchange rate changes on cash and cash equivalents and the net gain and loss on foreign exchange translation were presented in our consolidated statements of cash flows, resulting from the incorporation of our wholly-owned subsidiary, Abaxis Europe GmbH, in fiscal 2009. Abaxis Europe GmbH maintains foreign currency denominated accounts.

Cash Flows from Operating Activities

During fiscal 2012, we generated \$22.0 million in cash from operating activities, compared to \$16.4 million in fiscal 2011. The cash provided by operating activities during fiscal 2012 was primarily the result of net income of \$13.1 million during fiscal 2012, adjusted for the effects of non-cash adjustments including depreciation and amortization of \$5.1 million and share-based compensation expense of \$5.7 million, partially offset by a decrease of \$862,000 related to excess tax benefits from share-based awards.

Other changes in operating activities during fiscal 2012 were as follows:

(i) Receivables, net increased by \$2.8 million, from \$27.9 million at March 31, 2011 to \$30.7 million as of March 31, 2012, primarily due to higher sales in the last month of the quarter ended March 31, 2012.

(ii) Prepaid expenses and other current assets increased by \$1.9 million from \$3.5 million at March 31, 2011 to \$5.4 million as of March 31, 2012, primarily due to a deposit to Diatron MI PLC for future purchases of hematology instruments and reagents.

(iii) Current net deferred tax assets increased by \$729,000, from \$3.4 million at March 31, 2011 to \$4.2 million as of March 31, 2012, primarily as a result of increases in non-deductible accruals and reserves.

(iv) Non-current net deferred tax assets decreased by \$1.2 million, from \$1.2 million at March 31, 2011 to \$0 as of March 31, 2012, primarily as a result of higher U.S. federal bonus depreciation deductions during fiscal 2012.

(v) Accrued taxes decreased by \$293,000, from \$559,000 at March 31, 2011 to \$266,000 as of March 31, 2012, primarily due to income taxes payable by our subsidiary in Germany.

(vi) Net deferred tax liabilities, non-current increased by \$199,000, from \$0 at March 31, 2011 to \$199,000 as of March 31, 2012, primarily as a result of higher U.S. federal bonus depreciation deductions during fiscal 2012.

(vii) Total deferred revenue increased by \$918,000, resulting from an increase in the current portion of deferred revenue of \$259,000, from \$953,000 at March 31, 2011 to \$1.2 million as of March 31, 2012 and an increase in the non-current portion of deferred revenue of \$659,000, from \$1.7 million at March 31, 2011 to \$2.4 million as of March 31, 2012. The increase in deferred revenue balances is due to an increase in maintenance contracts offered to customers from time to time in the form of free services in connection with the sale of our products, partially offset by deferred revenue recognized ratably over the life of the maintenance contract.

(viii) Total warranty reserves increased by \$624,000, resulting from an increase in the current portion of warranty reserves of \$214,000, from \$1.0 million at March 31, 2011 to \$1.2 million as of March 31, 2012 and an increase in the non-current portion of warranty reserves of \$410,000, from \$191,000 at March 31, 2011 to \$601,000 as of March 31, 2012. The increase in warranty reserves is primarily based on (a) the number of instruments in standard warranty, estimated product failure rates and estimated repair costs and (b) an estimate of defective reagent discs and replacement costs. The increase in warranty reserves balances is due to a change in our standard warranty period and an increase in the number of instruments under standard warranty. Management periodically evaluates the sufficiency of the warranty provisions and makes adjustments when necessary. If an unusual performance rate related to warranty claims is noted, an additional warranty accrual may be assessed and recorded when a failure event is probable and the cost can be reasonably estimated.

We anticipate that we will incur incremental additional costs to support our future operations, including further additional pre-clinical testing and clinical trials for our current and future products; research and design costs related to the continuing development of our current and future products; acquisition of capital equipment for our manufacturing facility and costs to operate AVRL. Furthermore, during fiscal 2012, we incurred legal costs related to (a) a patent infringement lawsuit against Cepheid with respect to Cepheid's Methicillin-resistant Staphylococcus aureus (MRSA) product, on which Cepheid has ceased paying license royalties and (b) compliance in an investigation by the United States Federal Trade Commission of a competitor. In the future, we may continue to incur additional legal costs.

Table of Contents

Cash Flows from Investing Activities

Net cash provided by investing activities during fiscal 2012 totaled \$8.5 million, compared to net cash used in investing activities of \$3.8 million during fiscal 2011. Changes in investing activities were as follows:

Investments. Cash provided by proceeds from maturities and redemptions of investments in certificates of deposits, commercial paper, corporate bonds, municipal bonds and U.S. agency securities totaled \$42.6 million during fiscal 2012. Cash used to purchase investments in certificates of deposits, corporate bonds, municipal bonds and U.S. agency securities totaled \$26.4 million during fiscal 2012.

Property and Equipment. Cash used to purchase property and equipment totaled \$7.7 million during fiscal 2012, primarily to support (a) increased capacity requirements in our production line, (b) leasehold improvements on our principal facilities and (c) development of AVRL. We anticipate that we will continue to purchase property and equipment as necessary in the normal course of our business.

Cash Flows from Financing Activities

Net cash used in financing activities during fiscal 2012 totaled \$27.9 million, primarily due to payments made for tax withholdings related to net share settlements of restricted stock units of \$2.2 million and repurchases of common stock of \$27.3 million, partially offset by proceeds from the exercise of stock options of \$615,000 and excess tax benefits from share-based awards of \$862,000.

Share Repurchase Program

In August 2011, our Board of Directors authorized the repurchase of up to an aggregate of \$40.0 million of our common stock. In January 2012, the Board of Directors approved a \$15.0 million increase to our existing share repurchase program, to a total of \$55.0 million. As of March 31, 2012, \$27.7 million of our common stock may yet be purchased under such authorization. The repurchases are made from time to time on the open market at prevailing market prices or in negotiated transactions off the market. Repurchased shares are retired.

During fiscal 2012, we repurchased 1,168,000 shares for \$27.3 million, including commissions, at an average per share cost of \$23.41.

Financial Condition

We believe that cash and cash equivalents, investments and expected cash flows from operations will be sufficient to fund our operations, capital requirements and share repurchase program for at least the next twelve months. Our future capital requirements will largely depend upon the increased market acceptance of our point-of-care blood analyzer products and of our Abaxis Veterinary Reference Laboratories. However, our sales for any future periods are not predictable with a significant degree of certainty. Regardless, we may seek to raise additional funds to pursue strategic opportunities.

Contractual Obligations

As of March 31, 2012, our contractual obligations for succeeding fiscal years are as follows (in thousands):

| | Total | Payments Due by Period | | | |
|-------------------------------|---------|------------------------|-----------|-----------|------------|
| | | 2013 | 2014-2015 | 2016-2017 | After 2017 |
| Long-term debt obligations(1) | \$1,080 | \$143 | \$271 | \$251 | \$415 |

Edgar Filing: ABAXIS INC - Form 10-K

| | | | | | |
|--------------------------------|----------|----------|----------|---------|---------|
| Operating lease obligations(2) | 15,093 | 1,860 | 3,721 | 3,390 | 6,122 |
| Purchase obligations(3) | 23,953 | 8,728 | 12,780 | 2,445 | - |
| | \$40,126 | \$10,731 | \$16,772 | \$6,086 | \$6,537 |

(1) Long-term debt obligations include interest payments associated with notes payable, which are described below in “Notes Payable.”

(2) Operating lease obligations are described below in “Operating Leases.”

(3) Purchase obligations are described below in “Purchase Commitments.”

Table of Contents

Operating Leases. Operating lease obligations were comprised of our principal facility and various leased facilities and office equipment under operating lease agreements, which expire on various dates from fiscal 2013 through fiscal 2021. Our principal facilities located in Union City, California is under a non-cancelable operating lease agreement, which expires in fiscal 2021.

Purchase Commitments. In October 2008, we entered into an OEM agreement with SMB of Denmark to purchase coagulation and specialty analyzers and related cartridges. Effective January 2011, we amended and restated our OEM agreement, including the terms of our minimum purchase commitments. Under the amended agreement, we committed to purchase a minimum number of coagulation and specialty analyzers and related cartridges on an annual basis during each calendar year 2011 through 2015. Our purchase obligations in the future may be adjusted if our minimum purchase commitments are not met during a calendar year period. At March 31, 2012, our total remaining outstanding commitment due is approximately \$11.3 million.

In December 2011, we executed a term sheet to enter into a development and supply equipment agreement with Diatron of Hungary to purchase Diatron hematology instruments. Under the terms of this agreement, we committed to purchase a minimum number of hematology instruments on an annual basis during each calendar year 2012 through 2014, which can be amended upon agreement by both parties. At March 31, 2012, our outstanding commitment due is approximately \$12.6 million. At March 31, 2012, we prepaid \$1.4 million to Diatron for future purchases of hematology instruments and reagents, which was recorded in prepaid expenses and other current assets on the consolidated balance sheets. The commitment amount is based on the minimum number of hematology instruments that we are required to purchase, the cost of the instruments and the Euro exchange rate at period-end. Since the exchange rate can fluctuate in the future, the commitment in absolute dollars will change accordingly.

Notes Payable. We have a ten year loan agreement with the Community Redevelopment Agency of the City of Union City (“the Agency”) whereby the Agency provides us with an unsecured loan of up to \$1.0 million, primarily to purchase capital equipment. The loan was effective January 2011, bears interest at 5.0% and is payable quarterly. As of March 31, 2012, our short-term and long-term notes payable balances were \$100,000 and \$783,000, respectively, and we recorded the short-term balance in other accrued liabilities on the consolidated balance sheets. The entire outstanding balance of the note shall be payable in full on the earlier of: (i) December 2020, or (ii) the date Abaxis ceases operations in Union City, California. The Agency also has the right to accelerate the maturity date and declare all balances immediately due and payable upon the event of default as defined in the loan agreement. We evaluate covenants in our loan agreement on a quarterly basis, and we were in compliance with such covenants as of March 31, 2012.

In accordance with the terms of the loan agreement, the Agency will provide Abaxis with an annual credit that can be applied against the accrued interest and outstanding principal balance on a quarterly basis. The Agency determines the annual credit based on certain taxes paid by Abaxis to the City of Union City, California for a specified period, as defined in the loan agreement. We anticipate that our annual credits from the Agency will be used to fully repay our notes payable due to the Agency. We may carry forward unused quarterly credits to apply against our outstanding balance in a future period. Credits applied to repay our notes payable and accrued interest are recorded in “Interest and other income (expense), net” on the consolidated statements of income.

Patent Licensing Agreement. Effective January 2009, we entered into a license agreement with Alere. Under our license agreement, we licensed co-exclusively certain worldwide patent rights related to lateral flow immunoassay technology in the field of animal health diagnostics in the professional marketplace. The license agreement provides that Alere shall not grant any future rights to any third parties under its current lateral flow patent rights in the animal health diagnostics field in the professional marketplace. The license agreement enables us to develop and market products under rights from Alere to address animal health and laboratory animal research markets.

In exchange for the license rights, we (i) paid an up-front license fee of \$5.0 million to Alere in January 2009, (ii) agreed to pay royalties during the term of the agreement, based solely on sales of products in a jurisdiction country covered by valid and unexpired claims in that jurisdiction under the licensed Alere patent rights, and (iii) agreed to pay a yearly minimum license fee of between \$500,000 to \$1.0 million per year, which fee will be creditable against any royalties due during such calendar year. The royalties, if any, are payable through the date of the expiration of the last valid patent licensed under the agreement that includes at least one claim in a jurisdiction covering products we sell in that jurisdiction. The yearly minimum fees became payable starting in fiscal 2011 for so long as we desire to maintain exclusivity under the agreement.

Contingencies

On June 28, 2010, we filed a patent infringement lawsuit against Cepheid with respect to Cepheid's Methicillin-resistant Staphylococcus aureus (MRSA) product, on which Cepheid has ceased paying license royalties. On December 17, 2010, Cepheid filed its amended answer and certain counterclaims seeking findings of no breach of contract, non-infringement, unenforceability and invalidity of the asserted patents, and a declaration regarding the patent term of one of the patents. We believe the counterclaims raised by Cepheid are without merit and intend to contest them vigorously. Because of the cost involved in pursuing patent infringement cases, we believe the cost of this litigation could have a material adverse effect on Abaxis, our consolidated financial position and results of operations. As of March 31, 2012, we had not recorded future litigation and related expenses to pursuing the patent infringement case and an estimate of such costs cannot be made at this time. A claims construction hearing was held in June 2011 and the court has issued its claims construction order. The case is ongoing. A trial date has been set for September 24, 2012.

Table of Contents

We are involved from time to time in various litigation matters in the normal course of business. Other than as described above, we believe that the ultimate resolution of these matters will not have a material effect on our consolidated financial position or results of operations. There can be no assurance that existing or future legal proceedings arising in the ordinary course of business or otherwise will not have a material adverse effect on our business, consolidated financial position, results of operations or cash flows.

Off-Balance Sheet Arrangements

As of March 31, 2012, we did not have any off-balance sheet arrangements, as defined in Item 303 of Regulation S-K promulgated under the Securities Act of 1933. In addition, we identified no variable interests in any variable interest entities.

RECENT ACCOUNTING PRONOUNCEMENTS

For information with respect to recent accounting pronouncements and the impact of these pronouncements on our consolidated financial statements, see Note 1, "Description of Business and Significant Accounting Policies," of the Notes to Consolidated Financial Statements contained in this Annual Report on Form 10-K.

Table of Contents

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk

We are exposed to the impact of interest rate changes with respect to our short-term and long-term investments. Our investment objective is to invest excess cash in cash equivalents and in various types of investments to maximize yields without significantly increased risk. At March 31, 2012, our short-term and long-term investments totaled \$21.7 million and \$23.4 million, respectively, consisting of investments in certificates of deposits, corporate bonds and municipal bonds.

As of March 31, 2012, we had \$36.8 million in investments classified as held-to-maturity and carried at amortized cost. We have the ability to hold the investments classified as held-to-maturity in our investment portfolio at March 31, 2012 until maturity and therefore, we believe we have no material exposure to interest rate risk. As of March 31, 2012, our investments classified as available-for-sale totaled \$8.3 million, which we recorded at fair market value with unrealized gains or losses resulting from changes in fair value reported as a separate component of accumulated other comprehensive income (loss), net of any tax effects, in stockholders' equity. A sensitivity analysis assuming a hypothetical 10% movement in interest rates applied to our total investment balances at March 31, 2012 indicated that such market movement would not have a material effect on our business, operating results or financial condition. We have not experienced any significant loss on our investment portfolio during fiscal 2012 and 2011.

As a matter of management policy, we do not currently enter into transactions involving derivative financial instruments. In the event we do enter into such transactions in the future, such items will be accounted for in accordance with Accounting Standards Codification 815, "Derivatives and Hedging."

Investment in a Privately Held Company

In February 2011, we purchased a 15% equity ownership interest in SMB, a privately-held developer and manufacturer of point-of-care diagnostic products for veterinary use, for \$2.8 million in cash. SMB, based in Farum, Denmark, has been the original equipment manufacturer of our VetScan VSpro point-of-care coagulation and specialty analyzer since 2008. The investment is recorded in "Investment in Unconsolidated Affiliate" in our consolidated balance sheets and we use the equity method to account for our investment in this entity that we do not control, but where we have the ability to exercise significant influence. As of March 31, 2012, the total carrying amount of our investment in SMB was \$2.6 million. The investment is inherently risky and we could lose our entire investment in this company. To date, since our investment in SMB, we have not recorded an impairment charge on this investment.

Foreign Currency Rate Fluctuations

We operate primarily in the United States and a majority of our revenues, cost of revenues, operating expenses and capital purchasing activities are transacted in U.S. dollars. However, we are exposed to foreign currency exchange rate fluctuations on the hematology products purchased from Diatron MI PLC, which are primarily denominated in Euros.

Abaxis Europe GmbH, our wholly-owned subsidiary since July 2008, markets, promotes and distributes diagnostic systems for medical and veterinary uses. Abaxis Europe GmbH's functional currency is in U.S. dollars. Foreign currency denominated account balances of our subsidiary are remeasured into U.S. dollars at the end-of-period exchange rates for monetary assets and liabilities, and historical exchange rates for nonmonetary assets. Accordingly, the effects of foreign currency transactions, and of remeasuring the financial condition into the functional currency, resulted in foreign currency gains and losses, which were included in "Interest and other income (expense), net" on our

consolidated statements of income. For our sales denominated in foreign currencies, we are exposed to foreign currency exchange rate fluctuations on revenue and collection of receivables. To the extent the U.S. dollar strengthens against the Euro currency, the translation of the foreign currency denominated transactions may result in reduced cost of revenues and operating expenses. Similarly, our cost of revenues and operating expenses will increase if the U.S. dollar weakens against the Euro currency.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
Abaxis, Inc.

We have audited the accompanying consolidated balance sheets of Abaxis, Inc. and its subsidiary (“the Company”) as of March 31, 2012 and 2011, and the related consolidated statements of income, shareholders’ equity and comprehensive income, and cash flows for each of the three years in the period ended March 31, 2012. Our audits also included the financial statement schedule listed in the Index to this Annual Report on Form 10-K at Part IV Item 15(a) 2. These consolidated financial statements and the financial statement schedule are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements and the financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Abaxis, Inc. and its subsidiary as of March 31, 2012 and 2011, and the results of their operations and their cash flows for each of the three years in the period ended March 31, 2012, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the related financial statement schedule, when considered in relation to the consolidated financial statements taken as a whole, presents fairly, in all material aspects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company’s internal control over financial reporting as of March 31, 2012, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated June 14, 2012 expressed an unqualified opinion thereon.

ABAXIS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED MARCH 31, 2012, 2011 AND 2010

NOTE 1. DESCRIPTION OF BUSINESS AND SIGNIFICANT ACCOUNTING POLICIES

Description of Business. Abaxis, Inc. (“Abaxis,” the “Company” or “we”), incorporated in California in 1989, develops, manufactures, markets and sells portable blood analysis systems for use in the human or veterinary patient-care setting to provide clinicians with rapid blood constituent measurements. In October 2011, Abaxis began providing veterinary reference laboratory diagnostic and consulting services for veterinarians. We conduct business worldwide and manage our business on the basis of the following two reportable segments: the medical market and the veterinary market.

Abaxis Europe GmbH, our wholly-owned subsidiary in Darmstadt, Germany, markets, promotes and distributes diagnostic systems for medical and veterinary uses in the European market.

Principles of Consolidation. The accompanying consolidated financial statements include the accounts of Abaxis and our wholly-owned subsidiary, Abaxis Europe GmbH. Intercompany transactions and balances have been eliminated in consolidation.

Use of Estimates. The preparation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America requires our management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements, the reported amounts of revenues and expenses during the reporting period, and related disclosures. Such management estimates include allowance for doubtful accounts, sales and other allowances, estimated selling price of our products, fair value of investments, valuation of inventory, fair value and useful lives of intangible assets, income taxes, valuation allowance for deferred tax assets, share-based compensation and warranty reserves. Our management bases their estimates on historical experience and on various other assumptions that are believed to be reasonable, the results of which form the basis for making judgments about the carrying values of assets and liabilities. Our actual results may differ materially from these estimates.

Certain Significant Risks and Uncertainties. We are subject to certain risks and uncertainties and believe that changes in any of the following areas could have a material adverse effect on our future financial position or results of operations: continued Food and Drug Administration compliance or regulatory changes; uncertainty regarding health care reforms; fundamental changes in the technology underlying blood testing; the ability to develop new products and services that are accepted in the marketplace; competition, including, but not limited to, pricing and products or product features and services; litigation or other claims against Abaxis; the adequate and timely sourcing of inventories; and the hiring, training and retention of key employees.

Cash and Cash Equivalents. Cash equivalents consist of highly liquid investments with original or remaining maturities of three months or less at the time of purchase that are readily convertible into cash. The fair value of these investments was determined by using quoted prices for identical investments in active markets which are measured at Level 1 inputs under Financial Accounting Standards Board (the “FASB”) Accounting Standards Codification (“ASC”) 820, “Fair Value Measurements and Disclosures.” The carrying value of cash equivalents approximates fair value due to their relatively short-term nature.

Investments. We hold both short-term and long-term investments and our portfolio primarily consists of certificates of deposits, commercial paper, corporate bonds, municipal bonds and U.S. agency securities. Short-term investments have maturities of one year or less. All other investments with maturity dates greater than one year are classified as

long-term. Our investments are accounted for as either available-for-sale or held-to-maturity. Investments classified as available-for-sale are reported at fair value at the balance sheet date, and temporary differences between cost and fair value are presented as a separate component of accumulated other comprehensive income (loss), net of any related tax effect, in shareholders' equity. Investments classified as held-to-maturity are based on the Company's positive intent and ability to hold to maturity and these investments are carried at amortized cost.

Interest and realized gains and losses from investments are included in "Interest and other income (expense), net," computed using the specific identification cost method. We assess whether an other-than-temporary impairment loss on our investments has occurred due to declines in fair value or other market conditions. Declines in fair value that are determined to be other-than-temporary, if any, are recorded as charges against "Interest and other income (expense), net" in the consolidated statements of income. We did not recognize any impairment loss on investments during fiscal 2012, 2011 or 2010.

Table of Contents

Concentration of Credit Risk. Financial instruments that potentially subject us to a concentration of credit risk consist primarily of cash, cash equivalents, investments and receivables.

Financial Instruments. Cash, cash equivalents and investments are placed with high quality financial institutions and are regularly monitored by management. These deposits are in excess of the amount of the insurance provided by the federal government on such deposits. To date, the Company has not experienced any losses on such deposits.

Customers. We sell our products to distributors and direct customers located primarily in Europe, Japan and North America. We monitor the credit status of our distributors and direct customers on an ongoing basis and generally do not require our customers to provide collateral for purchases on credit. Collection of receivables may be affected by changes in economic or other industry conditions and may, accordingly, impact our overall credit risk. At March 31, 2012, one distributor in the United States accounted for 19% of our total receivables balance. At March 31, 2011, one distributor in the United States accounted for 11% of our total receivables balance.

Allowance for Doubtful Accounts. We maintain an allowance for doubtful accounts based on our assessment of the collectibility of the amounts owed to us by our customers. We consider the following in determining the level of allowance required: the customer's payment history, the age of the receivables, the credit quality of our customers, the general financial condition of our customer base and other factors that may affect the customers' ability to pay.

Fair Value of Financial Instruments. Financial instruments include cash, cash equivalents, investments, receivables, accounts payable and certain other accrued liabilities. The fair value of cash, cash equivalents, receivables, accounts payable and certain other accrued liabilities are valued at their carrying value, which approximates fair value due to their short maturities. See Note 3, "Fair Value Measurements" for further information on fair value measurement of our financial and nonfinancial assets and liabilities.

Inventories. Inventories include material, labor and overhead, and are stated at the lower of standard cost (which approximates actual cost using the first-in, first-out method) or market. Provisions for excess, obsolete and unusable inventories are made after management's evaluation of future demand and market conditions.

Investment in Unconsolidated Affiliate. In February 2011, we purchased a 15% equity ownership interest in Scandinavian Micro Biodevices APS ("SMB"). We use the equity method to account for our investment in this entity that we do not control, but where we have the ability to exercise significant influence. Equity method investments are recorded at original cost and adjusted periodically to recognize (1) our proportionate share of the investee's net income or losses after the date of investment, (2) additional contributions made and dividends or distributions received, and (3) impairment losses resulting from adjustments to net realizable value. We eliminate all intercompany transactions in accounting for our equity method investments. During fiscal 2012 and 2011, we recorded our proportionate share of the investee's net income or loss in "Interest and other income (expense), net" on the consolidated statements of income.

We assess the potential impairment of our equity method investments when indicators such as a history of operating losses, a negative earnings and cash flow outlook, and the financial condition and prospects for the investee's business segment might indicate a loss in value. We did not recognize any impairment loss on investment in unconsolidated affiliate during fiscal 2012 and 2011.

Property and Equipment. Property and equipment are stated at cost, net of accumulated depreciation and amortization. Depreciation and amortization is calculated using the straight-line method over the following estimated useful lives of the assets:

| Asset Classification | Estimated Useful Life |
|----------------------|-----------------------|
|----------------------|-----------------------|

| | |
|-------------------------|--|
| Machinery and equipment | 2-15 years |
| Furniture and fixtures | 3-8 years |
| Computer equipment | 2-7 years |
| Leasehold improvements | Shorter of estimated useful life or remaining lease term |

Construction in progress primarily consists of purchased material and internal payroll and related costs used in the development of production lines. We did not capitalize interest on constructed assets during fiscal 2012 or 2011 due to immateriality.

Property and equipment includes instruments transferred from inventory and held for loan or evaluation or demonstration purposes to customers. Units held for loan, evaluation or demonstration purposes are carried at cost and depreciated over their estimated useful lives of three to five years. Depreciation expense related to loan, evaluation or demonstration units is recorded in cost of revenues or in the respective operating expense line based on the function and purpose for which it is being used. Proceeds from the sale of evaluation units are recorded as revenue.

Table of Contents

Valuation of Long-Lived Assets. We evaluate the carrying value of our long-lived assets, such as property and equipment and amortized intangible assets, whenever events or changes in business circumstances or our planned use of long-lived assets indicate that the carrying amount of an asset may not be fully recoverable or their useful lives are no longer appropriate. We look to current and future profitability, as well as current and future undiscounted cash flows, excluding financing costs, as primary indicators of recoverability. An impairment loss would be recognized when the sum of the undiscounted future net cash flows expected to result from the use of the asset and its eventual disposal is less than the carrying amount. If impairment is determined to exist, any related impairment loss is calculated based on fair value and long-lived assets are written down to their respective fair values. We did not recognize any impairment charges on long-lived assets in fiscal 2012, 2011 or 2010.

Intangible Assets. Intangible assets, consisting of purchased patents, licenses and other rights acquired from third parties, are presented at cost, net of accumulated amortization. The intangible assets are amortized using the straight-line method over their estimated useful life of ten years, which approximates the economic benefit.

Revenue Recognition. Revenues from product sales and services, net of estimated sales allowances, discounts and rebates, are recognized when the following four criteria are met:

- Evidence of an arrangement exists: Persuasive evidence of an arrangement with a customer that reflects the terms and conditions to deliver products or render services must exist in order to recognize revenue.
- Upon shipment of the products or rendering of services to the customer: Delivery is considered to occur at the time of shipment of products to a distributor or direct customer, as title and risk of loss have been transferred to the distributor or direct customer on delivery to the common carrier. Rights of return are not provided. For services, delivery is considered to occur as the service is provided. Service revenues are primarily generated from veterinary reference laboratory diagnostic and consulting services for veterinarians. Net service revenues are recognized at the time services are performed.
- Fixed or determinable sales price: When the sales price is fixed or determinable that amount is recognized as revenue.
- Collection is reasonably assured: Collection is deemed probable if a customer is expected to be able to pay amounts under the arrangement as those amounts become due. Revenue is recognized when collectability of the resulting receivable is reasonably assured.

Amounts collected in advance of revenue recognition are recorded as a current or non-current deferred revenue liability based on the time from the balance sheet date to the future date of revenue recognition. We recognize revenue associated with extended maintenance agreements ratably over the life of the contract. From time to time, we offer discounts on AVRL services for a specified period as incentives. Discounts are reductions to invoiced amounts within a specified period and are recorded at the time services are performed.

Multiple Element Revenue Arrangements. On April 1, 2011, we adopted FASB Accounting Standards Update (“ASU”) No. 2009-13, Multiple-Deliverable Revenue Arrangements, an amendment to Accounting Standards Codification (“ASC”) Topic 605, Revenue Recognition (ASU 2009-13). We elected to apply the amendment prospectively to new or materially modified revenue arrangements after its effective date. The FASB amended the accounting standards for certain multiple deliverable revenue arrangements to:

- provide updated guidance on whether multiple deliverables exist, how the deliverables in an arrangement should be separated, and how the consideration should be allocated;

- require an entity to allocate revenue in an arrangement using estimated selling price (“ESP”) of deliverables if a vendor does not first have vendor-specific objective evidence (“VSOE”) of selling price or secondly does not have third-party evidence (“TPE”) of selling price; and
- eliminate the use of the residual method and require an entity to allocate revenue using the relative selling price method.

Our sales arrangements contain multiple element revenue arrangements in which a customer may purchase a combination of instruments, consumables or extended maintenance agreements. Additionally, we provide incentives in the form of free goods or extended maintenance agreements to customers in connection with the sale of our instruments. Pursuant to the guidance of ASU 2009-13, revenues from such sales are allocated separately to the instruments, consumables, extended maintenance agreements and incentives based on the relative selling price method. Amounts allocated to each element are based on its objectively determined fair value, such as the sales price for the product or service when it is sold separately. Revenues allocated to each element is then recognized when the basic revenue recognition criteria, as described above, is met for each element. Revenues associated with incentives in the form of free goods are deferred until the goods are shipped to the customer. Revenues associated with incentives in the form of extended maintenance agreements are deferred and recognized ratably over the life of the maintenance contract. Incentives in the form of extended maintenance agreements are our most significant multiple element arrangement.

Table of Contents

Starting in fiscal 2012, we participate in selling arrangements in the veterinary market that include multiple deliverables, such as instruments, consumables and service agreements associated with our veterinary reference laboratory. Under these arrangements, we recognize revenue upon delivery of the product or performance of the service during the term of the service contract when the basic revenue recognition criteria, as described above, is met for each element. We allocate revenues to each element based on the relative selling price of each deliverable. Amounts allocated to each element are based on its objectively determined fair value, such as the sales price for the product or service when it is sold separately.

In fiscal 2012, we offered customer incentives comprising of arrangements with customers to include discounts on future sales of services associated with our veterinary reference laboratory. We apply judgment in determining whether future discounts are significant and incremental. When the future discount offered is not considered significant and incremental, we do not account for the discount as an element of the original arrangement. To determine whether a discount is significant and incremental, we look to the discount provided in comparison to standalone sales of the same product to similar customers, the level of discount provided on other elements in the arrangement, and the significance of the discount to the overall arrangement. If the discount in the multiple element arrangement approximates the discount typically provided in standalone sales, that discount is not considered incremental. During fiscal 2012, our customer incentive programs with future discounts were not significant.

Customer Programs. From time to time, we offer customer marketing and incentive programs. Our most significant customer programs are described as follows:

Instrument Trade-In Programs. We periodically offer trade-in programs to customers for trading in an existing instrument to purchase a new instrument and we will either provide incentives in the form of free goods or reduce the sales price of the instrument. These incentives in the form of free goods are recorded based on the relative selling price method according to the policies described above.

Instrument Rental Programs. We periodically offer programs to customers whereby certain instruments are made available to customers for rent or on an evaluation basis. These programs typically require customers to purchase a minimum quantity of consumables during a specified period for which we recognize revenue on the related consumables according to the policies described above. Depending on the program offered, customers may purchase the instrument during the rental or evaluation period. Proceeds from such sale are recorded as revenue according to the policies described above. Rental income, if any, are also recorded as revenue according to the policies described above.

Distributor and Customer Rebate Programs. We periodically offer distributor pricing rebates to distributors upon meeting the sales volume requirements during a qualifying period. The distributor pricing rebates are recorded as a reduction to gross revenues during a qualifying period. Cash rebates are offered to distributors or customers who purchase certain products or instruments during a promotional period and are recorded as a reduction to gross revenues.

Royalty Revenues. Royalties are typically based on licensees' net sales of products that utilize our technology and are recognized as earned in accordance with the contract terms when royalties from licensees can be reliably measured and collectibility is reasonably assured, such as upon the receipt of a royalty statement from the licensee.

Shipping and Handling. In a sale transaction we recognize amounts billed to customers for shipping and handling as revenue. Shipping and handling costs incurred for inventory purchases and product shipments are recorded in cost of revenues.

Research and Development Costs. Research and development costs, including internally developed software costs, are expensed as incurred and include expenses associated with new product research and regulatory activities. Our products include certain software applications that are resident in the product. The costs to develop such software have not been capitalized as we believe our current software development processes are completed concurrent with the establishment of technological feasibility of the software.

Advertising Expenses. Costs of advertising, which are recognized as sales and marketing expenses, are generally expensed in the period incurred. Advertising expenses were \$2.1 million, \$1.7 million and \$2.3 million, for fiscal 2012, 2011 and 2010, respectively.

Income Taxes. We account for income taxes using the liability method under which deferred tax assets and liabilities are determined based on the differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amounts expected to be recovered.

Table of Contents

We recognize and measure benefits for uncertain tax positions using a two-step approach. The first step is to evaluate the tax position taken or expected to be taken in a tax return by determining if the weight of evidence indicates that it is more likely than not that the tax position will be sustained upon audit, including resolution of any related appeals or litigation processes. For tax positions that are more likely than not to be sustained upon audit, the second step is to measure the tax benefit as the largest amount that is more than 50 percent likely to be realized upon settlement. Significant judgment is required to evaluate uncertain tax positions. At March 31, 2012 and 2011, we had no significant uncertain tax positions. Our policy is to include interest and penalties related to gross unrecognized tax benefits within our provision for income taxes. For fiscal 2012, 2011 and 2010, we did not recognize any interest or penalties related to uncertain tax positions in the consolidated statements of income, and at March 31, 2012 and 2011, we had no accrued interest or penalties.

Share-Based Compensation Expense. We account for share-based compensation in accordance with ASC 718, "Compensation-Stock Compensation." We recognize share-based compensation expense, net of an estimated forfeiture rate, over the requisite service period of the award to employees and directors. As required by fair value provisions of share-based compensation, employee share-based compensation expense recognized is calculated over the requisite service period of the awards and reduced for estimated forfeitures. The forfeiture rate is estimated based on historical data of our share-based compensation awards that are granted and cancelled prior to vesting and upon historical experience of employee turnover.

There were no stock options granted since the beginning of fiscal 2007 and we did not grant stock options during fiscal 2012, 2011 and 2010. For stock options granted prior to March 31, 2006, we use the Black-Scholes option pricing model to determine the fair value. Determining the appropriate fair value model and calculating the fair value of share-based awards requires highly subjective assumptions, including risk-free interest rate, expected stock price volatility, expected term and expected dividends.

For restricted stock units, share-based compensation expense is based on the fair value of our stock at the grant date and recognized net of an estimated forfeiture rate, over the requisite service period of the award.

Net Income Per Share. Basic net income per share is computed by dividing the net income attributable to common shareholders by the weighted average number of common shares outstanding during the period. Diluted net income per share is computed by dividing the net income attributable to common shareholders by the weighted average number of common shares that would have been outstanding during the period assuming the issuance of common shares for all potential dilutive common shares outstanding using the treasury stock method. Dilutive potential common shares outstanding include outstanding stock options, restricted stock units and warrants.

Comprehensive Income. Comprehensive income generally represents all changes in shareholders' equity during a period, resulting from net income and transactions from non-owner sources. Comprehensive income consists of net income and the net-of-tax amounts for unrealized gain (loss) on available-for-sale investments (difference between the cost and fair market value). Comprehensive income and its components are reported in the consolidated statements of shareholders' equity and comprehensive income.

Foreign Currency Translations. The functional currency is the U.S. dollar for our international subsidiary, Abaxis Europe GmbH, located in Darmstadt, Germany. Foreign currency transactions of our subsidiary are remeasured into U.S. dollars at the end-of-period exchange rates for monetary assets and liabilities, and historical exchange rates for nonmonetary assets. Accordingly, the effects of foreign currency transactions, and of remeasuring the financial condition into the functional currency resulted in foreign currency gains and losses, which were included in "Interest and other income (expense), net" on the consolidated statements of income and were insignificant for fiscal 2012, 2011 and 2010.

Recent Accounting Pronouncements

Fair Value Measurement and Disclosure: In May 2011, the FASB issued ASU 2011-04, “Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. Generally Accepted Accounting Principles and International Financial Reporting Standards,” (Topic 820) - Fair Value Measurement (ASU 2011-04), to clarify guidance and minimize differences between accounting principles generally accepted in the U.S. and International Financial Reporting Standards. Among other things, the guidance expands the disclosure requirements around fair value measurements categorized in Level 3 of the fair value hierarchy and requires disclosure of the level in the fair value hierarchy of items that are not measured at fair value in the statement of financial position but whose fair value must be disclosed. The amended guidance is applied prospectively and will be effective for the Company beginning on April 1, 2012. We do not expect the adoption of this amendment to have a material impact on our consolidated financial position, results of operations and cash flows.

Table of Contents

Presentation of Comprehensive Income: In June 2011, the FASB issued ASU No. 2011-05, "Presentation of Comprehensive Income," (Topic 220) - Comprehensive Income (ASU 2011-05), to require an entity to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. ASU 2011-05 eliminates the currently available option to present the components of other comprehensive income as part of the statement of shareholders' equity. The amendment does not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. The amendment will be effective for the Company beginning on April 1, 2012. As this guidance relates to presentation only, the adoption of this guidance will not have any other effect on the Company's financial statements.

Testing Goodwill for Impairment: In September 2011, the FASB issued ASU No. 2011-08, "Testing Goodwill for Impairment," (Topic 350) - Intangibles - Goodwill and Other (ASU 2011-08), to allow entities to use a qualitative approach to test goodwill for impairment. ASU 2011-08 permits an entity to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If it is concluded that this is the case, it is necessary to perform the currently prescribed two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. The amendment will be effective for the Company beginning on April 1, 2012 and earlier adoption is permitted. We will assess the impact of the guidance if and when such transactions occur.

NOTE 2. INVESTMENTS

Our investments are classified as either available-for-sale or held-to-maturity. The following table summarizes available-for-sale and held-to-maturity investments as of March 31, 2012 and 2011 (in thousands):

| | Available-for-Sale Investments | | | |
|--------------------------------------|--------------------------------|-----------------------|-------------------------|------------|
| | Amortized Cost | Gross Unrealized Gain | Gross Unrealized (Loss) | Fair Value |
| March 31, 2012 | | | | |
| Certificates of deposits | \$1,245 | \$2 | \$- | \$1,247 |
| Corporate bonds | 6,047 | 38 | - | 6,085 |
| Municipal bonds | 961 | 1 | - | 962 |
| Total available-for-sale investments | \$8,253 | \$41 | \$- | \$8,294 |

| | Held-to-Maturity Investments | | | |
|------------------------------------|------------------------------|-------------------------|---------------------------|------------|
| | Amortized Cost | Gross Unrecognized Gain | Gross Unrecognized (Loss) | Fair Value |
| March 31, 2012 | | | | |
| Certificates of deposits | \$844 | \$ - | \$ - | \$844 |
| Corporate bonds | 23,072 | 131 | (31) | 23,172 |
| Municipal bonds | 12,921 | 71 | (1) | 12,991 |
| Total held-to-maturity investments | \$36,837 | \$ 202 | \$ (32) | \$37,007 |

| | Held-to-Maturity Investments | | | |
|--------------------------|------------------------------|-------------------------|---------------------------|------------|
| | Amortized Cost | Gross Unrecognized Gain | Gross Unrecognized (Loss) | Fair Value |
| March 31, 2011 | | | | |
| Certificates of deposits | \$12,084 | \$ 2 | \$ - | \$12,086 |
| Commercial paper | 1,997 | - | - | 1,997 |
| Corporate bonds | 23,534 | 74 | (110) | 23,498 |

| | | | | | |
|------------------------------------|----------|--------|---------|---|----------|
| Municipal bonds | 11,603 | 31 | (5 |) | 11,629 |
| U.S. agency securities | 13,000 | 7 | (73 |) | 12,934 |
| Total held-to-maturity investments | \$62,218 | \$ 114 | \$ (188 |) | \$62,144 |

The amortized cost of our held-to-maturity investments approximates their fair value. As of March 31, 2012 and 2011, we did not have other-than-temporary impairment in the fair value of any individual security classified as held-to-maturity or available-for-sale. As of March 31, 2012 and 2011, we had unrealized gain on available-for-sale investments, net of related income taxes of \$25,000 and \$0, respectively. As of March 31, 2011, we did not have any investments classified as available-for-sale. Redemptions of investments in accordance with the callable provisions during fiscal 2012 and 2011 were \$16.3 million and \$36.1 million, respectively.

Table of Contents

The following table summarizes the amortized cost and fair value of our investments, classified by stated maturity as of March 31, 2012 and 2011 (in thousands):

| | March 31, 2012 Available-for-Sale Investments | | March 31, 2012 Held-to-Maturity Investments | |
|---------------------------|---|------------|---|------------|
| | Amortized | | Amortized | |
| | Cost | Fair Value | Cost | Fair Value |
| Due in less than one year | \$670 | \$670 | \$21,019 | \$21,062 |
| Due in 1 to 4 years | 7,583 | 7,624 | 15,818 | 15,945 |
| Total investments | \$8,253 | \$8,294 | \$36,837 | \$37,007 |

| | March 31, 2011 Held-to-Maturity Investments | |
|---------------------------|---|------------|
| | Amortized | |
| | Cost | Fair Value |
| Due in less than one year | \$25,981 | \$25,988 |
| Due in 1 to 4 years | 36,237 | 36,156 |
| Total investments | \$62,218 | \$62,144 |

NOTE 3. FAIR VALUE MEASUREMENTS

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (“exit price”) in an orderly transaction between market participants at the measurement date. When determining fair value, we consider the principal or most advantageous market in which we would transact and consider assumptions that market participants would use when pricing the asset or liability. The fair value hierarchy distinguishes between (1) market participant assumptions developed based on market data obtained from independent sources (observable inputs) and (2) an entity’s own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The fair value hierarchy consists of three broad levels, which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Directly or indirectly observable inputs as of the reporting date through correlation with market data, including quoted prices for similar assets and liabilities in active markets and quoted prices in markets that are not active. Level 2 also includes assets and liabilities that are valued using models or other pricing methodologies that do not require significant judgment since the input assumptions used in the models, such as interest rates and volatility factors, are corroborated by readily observable data from actively quoted markets for substantially the full term of the financial instrument.

Level 3: Unobservable inputs that are supported by little or no market data and require the use of significant management judgment. These values are generally determined using pricing models for which the assumptions utilize management’s estimates of market participant assumptions.

The following table summarizes financial assets, measured at fair value on a recurring basis, by level within the fair value hierarchy as of March 31, 2012 and 2011 (in thousands):

Edgar Filing: ABAXIS INC - Form 10-K

| | As of March 31, 2012 | | | |
|---------------------------------|---|---|--|----------|
| | Quoted Prices in Active Markets for Identical Assets Level 1 | Significant Other Observable Inputs Level 2 | Significant Unobservable Inputs Level 3 | Total |
| Assets | | | | |
| Cash equivalents | \$6,996 | \$ - | \$ - | \$6,996 |
| Available-for-sale investments: | | | | |
| Certificates of deposits | - | 1,247 | - | 1,247 |
| Corporate bonds | - | 6,085 | - | 6,085 |
| Municipal bonds | - | 962 | - | 962 |
| Total assets at fair value | \$6,996 | \$ 8,294 | \$ - | \$15,290 |

| | As of March 31, 2011 | | | |
|----------------------------|---|---|--|---------|
| | Quoted Prices in Active Markets for Identical Assets Level 1 | Significant Other Observable Inputs Level 2 | Significant Unobservable Inputs Level 3 | Total |
| Assets | | | | |
| Cash equivalents | \$2,415 | \$ - | \$ - | \$2,415 |
| Total assets at fair value | \$2,415 | \$ - | \$ - | \$2,415 |

Table of Contents

As of March 31, 2012 and 2011, our Level 1 financial assets are comprised of money market mutual funds. Our cash equivalents are highly liquid instruments with original or remaining maturities of three months or less at the time of purchase that are readily convertible into cash. The fair value of our Level 1 financial assets is based on quoted market prices of the underlying security. As of March 31, 2012 and 2011, we did not have any Level 1 financial liabilities.

As of March 31, 2012, our Level 2 financial assets are comprised of certificates of deposits, corporate bonds and municipal bonds. We review trading activity and pricing for these investments as of the measurement date. When sufficient quoted pricing for identical securities is not available, we use market pricing and other observable market inputs for similar securities obtained from third party data providers. These inputs represent quoted prices for similar assets in active markets or these inputs have been derived from observable market data. This approach results in the classification of these securities as Level 2 of the fair value hierarchy. As of March 31, 2012, we did not have any Level 2 financial liabilities. As of March 31, 2011, we did not have any Level 2 financial assets or liabilities.

As of March 31, 2012 and 2011, we did not have any Level 3 financial assets or liabilities measured at fair value on a recurring basis. During fiscal 2012 and 2011, we did not have any Level 3 financial assets or liabilities on a recurring basis.

NOTE 4. INVENTORIES

Components of inventories at March 31, 2012 and 2011 were as follows (in thousands):

| | March 31, | |
|-----------------|-----------|----------|
| | 2012 | 2011 |
| Raw materials | \$9,046 | \$9,950 |
| Work-in-process | 3,369 | 2,323 |
| Finished goods | 7,182 | 7,541 |
| Inventories | \$19,597 | \$19,814 |

NOTE 5. INVESTMENT IN UNCONSOLIDATED AFFILIATE

Our investment in an unconsolidated affiliate consists of an investment in equity securities of Scandinavian Micro Biodevices APS (“SMB”). In February 2011, we purchased a 15% equity ownership interest in SMB, for \$2.8 million in cash. SMB is a privately-held developer and manufacturer of point-of-care diagnostic products for veterinary use. SMB, based in Farum, Denmark, has been the original equipment manufacturer of the Abaxis VetScan VSpro point-of-care coagulation and specialty analyzer since 2008. Abaxis has had exclusive distribution rights for the analyzer and associated cartridges in North America since 2008. Starting January 2011, Abaxis has non-exclusive rights in other areas of the world. We accounted for our investment in SMB using the equity method due to our significant influence over SMB’s operations. During fiscal 2012 and 2011, we recorded our allocated portion of SMB’s net loss of \$143,000 and \$31,000, respectively.

NOTE 6. PROPERTY AND EQUIPMENT, NET

Property and equipment, net, at March 31, 2012 and 2011 consisted of the following (in thousands):

| | March 31, | |
|-------------------------|-----------|----------|
| | 2012 | 2011 |
| Machinery and equipment | \$26,910 | \$26,493 |
| Furniture and fixtures | 1,565 | 1,361 |

Edgar Filing: ABAXIS INC - Form 10-K

| | | |
|---|-----------|-----------|
| Computer equipment | 4,805 | 3,177 |
| Leasehold improvements | 9,372 | 8,018 |
| Construction in progress | 5,472 | 6,444 |
| | 48,124 | 45,493 |
| Accumulated depreciation and amortization | (23,828) | (25,856) |
| Property and equipment, net | \$24,296 | \$19,637 |

Depreciation and amortization expense for property and equipment amounted to \$4.5 million, \$3.9 million and \$4.4 million in fiscal 2012, 2011 and 2010, respectively.

Table of Contents

NOTE 7. INTANGIBLE ASSETS, NET

Intangible assets, net, at March 31, 2012 and 2011 consisted of the following (in thousands):

| | Cost | Accumulated Amortization | Net Book Value |
|-------------------------|---------|-----------------------------|-------------------|
| Balance, March 31, 2012 | | | |
| Licenses | \$5,000 | \$ 1,625 | 3,375 |
| Patents | 750 | 675 | 75 |
| Other | 637 | 97 | 540 |
| Total intangible assets | \$6,387 | \$ 2,397 | \$3,990 |
| Balance, March 31, 2011 | | | |
| Licenses | \$5,000 | \$ 1,125 | \$3,875 |
| Patents | 750 | 600 | 150 |
| Other | 249 | 58 | 191 |
| Total intangible assets | \$5,999 | \$ 1,783 | \$4,216 |

In January 2009, we entered into a license agreement with Inverness Medical Switzerland GmbH, now known as Alere Switzerland GmbH (“Alere”), pursuant to which we licensed co-exclusively certain worldwide patent rights. We paid a \$5.0 million up-front license fee to Alere in January 2009, which was recorded as an intangible asset on the consolidated balance sheets. See Note 10, “Commitments and Contingencies” for additional information on our patent license agreement with Alere.

Other intangible assets, with a cost basis of \$249,000 and \$388,000, were acquired by issuing warrants to National Institute for Strategic Technology Acquisition and Commercialization in January 2011 and October 2011, respectively.

Amortization expense for intangible assets, included in cost of revenues or in the respective operating expense line based on the function and purpose for which it is being used, amounted to \$614,000, \$633,000 and \$575,000 in fiscal 2012, 2011 and 2010, respectively. Based on our intangible assets subject to amortization as of March 31, 2012, the estimated amortization expense for succeeding years is as follows (in thousands):

| | Total | Estimated Future Annual Amortization Expense | | | | | Thereafter |
|-------------------------|---------|--|-------|-------|-------|-------|------------|
| | | 2013 | 2014 | 2015 | 2016 | 2017 | |
| Amortization expense | \$3,990 | \$634 | \$558 | \$558 | \$558 | \$558 | \$1,124 |

NOTE 8. WARRANTY RESERVES

We provide for the estimated future costs to be incurred under our standard warranty obligation on our instruments and reagent discs.

Instruments. Our standard warranty obligation on instruments ranges from one to three years, depending on the type of product. The estimated contractual warranty obligation is recorded when the related revenue is recognized and any additional amount is recorded when such cost is probable and can be reasonably estimated. Cost of revenues reflects estimated warranty expense for instruments sold in the current period and any adjustments in estimated warranty expense for the installed base under our standard warranty obligation based on our quarterly evaluation of service

experience. The estimated accrual for warranty exposure is based on historical experience as to product failures, estimated product failure rates, estimated repair costs, material usage and freight incurred in repairing the instrument after failure and known design changes under the warranty plan.

During fiscal 2012, we recorded an additional accrual to pre-existing warranties of \$257,000, which increased our warranty reserves and our cost of revenues, based on both historical and projected product performance rates of instruments. During fiscal 2011, we recorded an adjustment to pre-existing warranties of \$321,000, which reduced our warranty reserves and our cost of revenues, based on both a decrease in our historical experience as to product failures and our judgment of a decrease in estimated product failure rates of instruments. Management periodically evaluates the sufficiency of the warranty provisions and makes adjustments when necessary. If an unusual performance rate related to warranty claims is noted, an additional warranty accrual may be assessed and recorded when a failure event is probable and the cost can be reasonably estimated.

Reagent Discs. We record a provision for defective reagent discs when the related sale is recognized and any additional amount is recorded when such cost is probable and can be reasonably estimated. The warranty cost includes the replacement costs and freight of a defective reagent disc. For fiscal 2012, 2011 and 2010, the provision for warranty expense related to replacement of defective reagent discs was \$456,000, \$476,000 and \$192,000, respectively. The balance of accrued warranty reserve related to replacement of defective reagent discs at March 31, 2012 and 2011 was \$564,000 and \$492,000, respectively, which was classified as a current liability on the consolidated balance sheets.

Table of Contents

We evaluate our estimates for warranty reserves on an ongoing basis and believe we have the ability to reasonably estimate warranty costs. However, unforeseeable changes in factors may impact the estimate for warranty and such changes could cause a material change in our warranty reserve accrual in the period in which the change was identified.

The change in our accrued warranty reserve during fiscal 2012, 2011 and 2010 is summarized as follows (in thousands):

| | Year Ended March 31, | | |
|---|----------------------|----------|----------|
| | 2012 | 2011 | 2010 |
| Balance at beginning of period | \$ 1,222 | \$ 1,343 | \$ 2,297 |
| Provision for warranty expense | 1,698 | 1,294 | 762 |
| Warranty costs incurred | (1,331) | (1,094) | (816) |
| Adjustment to pre-existing warranties | 257 | (321) | (900) |
| Balance at end of period | 1,846 | 1,222 | 1,343 |
| Non-current portion of warranty reserve | 601 | 191 | 160 |
| Current portion of warranty reserve | \$ 1,245 | \$ 1,031 | \$ 1,183 |

NOTE 9. BORROWINGS

Line of Credit. Through July 2010, we had a line of credit with Comerica Bank-California which provided for borrowings of up to \$2.0 million. In July 2010, we terminated our line of credit with Comerica Bank-California for which we had no outstanding balance due. In connection with our amended facilities lease agreement in March 2010, our obligation to provide a letter of credit on our facilities of \$97,000, which was secured by our line of credit, terminated in April 2010.

Notes Payable. We have a ten year loan agreement with the Community Redevelopment Agency of the City of Union City (“the Agency”) whereby the Agency provides us with an unsecured loan of up to \$1.0 million, primarily to purchase capital equipment. The loan was effective January 2011, bears interest at 5.0% and is payable quarterly. As of March 31, 2012, our short-term and long-term notes payable balances were \$100,000 and \$783,000, respectively, and we recorded the short-term balance in other accrued liabilities on the consolidated balance sheets. The entire outstanding balance of the note shall be payable in full on the earlier of: (i) December 2020, or (ii) the date Abaxis ceases operations in Union City, California. The Agency also has the right to accelerate the maturity date and declare all balances immediately due and payable upon the event of default as defined in the loan agreement. We evaluate covenants in our loan agreement on a quarterly basis, and we were in compliance with such covenants as of March 31, 2012.

In accordance with the terms of the loan agreement, the Agency will provide Abaxis with an annual credit that can be applied against the accrued interest and outstanding principal balance on a quarterly basis. The Agency determines the annual credit based on certain taxes paid by Abaxis to the City of Union City, California for a specified period, as defined in the loan agreement. We anticipate that our annual credits from the Agency will be used to fully repay our notes payable due to the Agency. We may carry forward unused quarterly credits to apply against our outstanding balance in a future period. Credits applied to repay our notes payable and accrued interest are recorded in “Interest and other income (expense), net” on the consolidated statements of income.

NOTE 10. COMMITMENTS AND CONTINGENCIES

As of March 31, 2012, our contractual obligations for our operating lease obligations for succeeding years are as follows (in thousands):

| | Payments Due by Period | | | | | | |
|-----------------------------|------------------------|---------------|----------|----------|----------|----------|------------|
| | Total | Due in Fiscal | | | | | |
| | | 2013 | 2014 | 2015 | 2016 | 2017 | Thereafter |
| Operating lease obligations | \$ 15,093 | \$ 1,860 | \$ 1,870 | \$ 1,851 | \$ 1,741 | \$ 1,649 | \$ 6,122 |

Operating Leases. Our operating lease obligations were comprised of our principal facility and various leased facilities and office equipment under operating lease agreements, which expire on various dates from fiscal 2013 through fiscal 2021. Our principal facilities located in Union City, California is under a non-cancelable operating lease agreement, which expires in fiscal 2021. The monthly rental payments on principal facilities lease increase based on a predetermined schedule and accordingly, we recognize rent expense on a straight-line basis over the life of the lease. Rent expense under operating leases was \$2.0 million, \$1.8 million and \$1.4 million for fiscal 2012, 2011 and 2010, respectively.

Table of Contents

Purchase Commitments. In October 2008, we entered into an original equipment manufacturing (“OEM”) agreement with SMB of Denmark to purchase coagulation and specialty analyzers and related cartridges. Effective January 2011, we amended and restated our OEM agreement, including the terms of our minimum purchase commitments. Under the amended agreement, we committed to purchase a minimum number of coagulation and specialty analyzers and related cartridges on an annual basis during each calendar year 2011 through 2015. Our purchase obligations in the future may be adjusted if our minimum purchase commitments are not met during a calendar year period. At March 31, 2012, our total remaining outstanding commitment due is approximately \$11.3 million.

In December 2011, we executed a term sheet to enter into a development and supply equipment agreement with Diatron MI PLC (“Diatron”) of Hungary to purchase Diatron hematology instruments. Under the terms of this agreement, we committed to purchase a minimum number of hematology instruments on an annual basis during each calendar year 2012 through 2014, which can be amended upon agreement by both parties. At March 31, 2012, our outstanding commitment due is approximately \$12.6 million. At March 31, 2012, we prepaid \$1.4 million to Diatron for future purchases of hematology instruments and reagents, which was recorded in prepaid expenses and other current assets on the consolidated balance sheets. The commitment amount is based on the minimum number of hematology instruments that we are required to purchase, the cost of the instruments and the Euro exchange rate at period-end. Since the exchange rate can fluctuate in the future, the commitment in absolute dollars will change accordingly.

Patent Licensing Agreement. Effective January 2009, we entered into a license agreement with Alere. Under our license agreement, we licensed co-exclusively certain worldwide patent rights related to lateral flow immunoassay technology in the field of animal health diagnostics in the professional marketplace. The license agreement provides that Alere shall not grant any future rights to any third parties under its current lateral flow patent rights in the animal health diagnostics field in the professional marketplace. The license agreement enables us to develop and market products under rights from Alere to address animal health and laboratory animal research markets.

In exchange for the license rights, we (i) paid an up-front license fee of \$5.0 million to Alere in January 2009, (ii) agreed to pay royalties during the term of the agreement, based solely on sales of products in a jurisdiction country covered by valid and unexpired claims in that jurisdiction under the licensed Alere patent rights, and (iii) agreed to pay a yearly minimum license fee of between \$500,000 to \$1.0 million per year, which fee will be creditable against any royalties due during such calendar year. The royalties, if any, are payable through the date of the expiration of the last valid patent licensed under the agreement that includes at least one claim in a jurisdiction covering products we sell in that jurisdiction. The yearly minimum fees became payable starting in fiscal 2011 for so long as we desire to maintain exclusivity under the agreement.

Litigation. On June 28, 2010, we filed a patent infringement lawsuit against Cepheid with respect to Cepheid’s Methicillin-resistant Staphylococcus aureus (MRSA) product, on which Cepheid has ceased paying license royalties. On December 17, 2010, Cepheid filed its amended answer and certain counterclaims seeking findings of no breach of contract, non-infringement, unenforceability and invalidity of the asserted patents, and a declaration regarding the patent term of one of the patents. We believe the counterclaims raised by Cepheid are without merit and intend to contest them vigorously. Because of the cost involved in pursuing patent infringement cases, we believe the cost of this litigation could have a material adverse effect on Abaxis, our consolidated financial position and results of operations. As of March 31, 2012, we had not recorded future litigation and related expenses to pursuing the patent infringement case and an estimate of such costs cannot be made at this time. A claims construction hearing was held in June 2011 and the court has issued its claims construction order. The case is ongoing. A trial date has been set for September 24, 2012.

We are involved from time to time in various litigation matters in the normal course of business. Other than as described above, we believe that the ultimate resolution of these matters will not have a material effect on our consolidated financial position or results of operations. There can be no assurance that existing or future legal proceedings arising in the ordinary course of business or otherwise will not have a material adverse effect on our business, consolidated financial position, results of operations or cash flows.

NOTE 11. EMPLOYEE BENEFIT PLAN

We have established the Abaxis 401(k) Plan (the “401(k) Plan”), a tax deferred savings plan, for the benefit of qualified employees. The 401(k) Plan is designed to provide employees with an accumulation of funds at retirement. Qualified employees may elect to have salary reduction contributions made to the plan on a bi-weekly basis. We may make quarterly contributions to the plan at the discretion of our Board of Directors either in cash or in common stock. Our matching contributions to the tax deferred savings plan totaled \$422,000, \$325,000 and \$400,000 in fiscal 2012, 2011 and 2010, respectively. In fiscal 2012, 2011 and 2010, our matching contributions were made in cash. We did not have any matching contributions in the form of common stock in fiscal 2012, 2011 and 2010.

Table of Contents

NOTE 12. SHARE-BASED COMPENSATION

The following table summarizes total share-based compensation expense, net of tax, related to stock options and restricted stock units for fiscal 2012, 2011 and 2010, which is included in our consolidated statements of income (in thousands, except per share data):

| | Year Ended March 31, | | |
|---|----------------------|----------|----------|
| | 2012 | 2011 | 2010 |
| Cost of revenues | \$918 | \$656 | \$374 |
| Research and development | 866 | 880 | 849 |
| Sales and marketing | 1,877 | 1,499 | 1,255 |
| General and administrative | 2,022 | 1,809 | 2,859 |
| Share-based compensation expense before income taxes | 5,683 | 4,844 | 5,337 |
| Income tax benefit | (2,001) | (1,815) | (1,741) |
| Total share-based compensation expense after income taxes | \$3,682 | \$3,029 | \$3,596 |
| Net impact of share-based compensation on: | | | |
| Basic net income per share | \$0.17 | \$0.14 | \$0.16 |
| Diluted net income per share | \$0.16 | \$0.13 | \$0.16 |

Share-based compensation has been classified in the consolidated statements of income or capitalized on the consolidated balance sheets in the same manner as cash compensation paid to employees. Capitalized share-based compensation costs at March 31, 2012, 2011 and 2010 were \$139,000, \$107,000 and \$94,000, respectively, which were included in inventories on our consolidated balance sheets.

Cash Flow Impact

The accounting standard with respect to share-based payment requires cash flows resulting from excess tax benefits to be classified as a part of cash flows from financing activities. Excess tax benefits are realized tax benefits from tax deductions for exercised stock options and vested restricted stock units in excess of the deferred tax asset attributable to share-based compensation expense for such share-based awards. Excess tax benefits are considered realized when the tax deductions reduce taxes that otherwise would be payable. Excess tax benefits classified as a financing cash inflow for fiscal 2012, 2011 and 2010 were \$862,000, \$2.3 million and \$2.1 million, respectively.

Equity Compensation Plans

Our share-based compensation plans are described below.

2005 Equity Incentive Plan. Our 2005 Equity Incentive Plan (the "Equity Incentive Plan") restated and amended our 1998 Stock Option Plan. The Equity Incentive Plan allows for the awards of stock options, stock appreciation rights, restricted stock awards, restricted stock units, performance cash awards, performance shares, performance units, deferred compensation awards or other share-based awards to employees, directors and consultants. On October 27, 2010, our shareholders approved an amendment to the Equity Incentive Plan to (i) increase the aggregate number of shares of common stock reserved for issuance under the Equity Incentive Plan by 500,000 shares, (ii) clarify that we may continue to grant performance cash awards under the Equity Incentive Plan and (iii) reapprove the Internal Revenue Code Section 162(m) performance criteria and award limits of the Equity Incentive Plan to permit us to continue to grant awards to key officers that qualify as performance-based compensation under Section 162(m) of the Internal Revenue Code. As of March 31, 2012, the Equity Incentive Plan provides for the issuance of a maximum of 5,886,000 shares, of which 300,000 shares of common stock were then available for future issuance. Shares that are canceled or forfeited from an award and shares withheld in satisfaction of tax withholding obligations are again

available for issue under the Equity Incentive Plan.

Options granted to employees and directors generally expire ten years from the grant date. Options granted to employees generally become exercisable over a period of four years based on cliff-vesting terms and continuous employment. Options granted to non-employee directors generally become exercisable over a period of one year based on monthly vesting terms and continuous service. See the “Stock Options” section in this Note for additional information.

Restricted stock units awarded to employees generally vest over a period of four years and the awards may also be subject to accelerated vesting upon achieving certain performance-based milestones and continuous employment during the vesting period. Restricted stock units awarded to non-employee directors generally vest in full one year after the grant date based on continuous service. See the “Restricted Stock Units” section in this Note for additional information.

Table of Contents

1992 Outside Directors' Stock Option Plan. Under our 1992 Outside Directors' Stock Option Plan (the "Directors Plan"), options to purchase shares of common stock were automatically granted, annually, to non-employee directors. Options under the Directors Plan were nonqualified stock options and were granted at the fair market value on the date of grant and expired ten years from the date of grant. Options granted to non-employee directors generally become exercisable over a period of one year based on monthly vesting terms and continuous service. The Directors Plan provided for the issuance of a maximum of 250,000 shares. Additionally, no shares of common stock were available for future issuance because the time period for granting options expired in June 2002 in accordance with the terms of the Directors Plan. As of March 31, 2012, there were no stock options outstanding under the Directors Plan.

Our current practice is to issue new shares of common stock from our authorized shares for share-based awards upon the exercise of stock options or vesting of restricted stock units.

Stock Options

Prior to April 1, 2006, we granted stock options to employees, with an exercise price equal to the closing market price of our common stock on the date of grant and with cliff-vesting terms over four years, conditional on continuous employment with the Company. In addition, prior to April 1, 2006, we granted stock options to non-employee directors with an exercise price equal to the closing market price of our common stock on the date of grant and became exercisable over a period of one year based on monthly vesting terms, conditional on continuous service to the Company. We have not granted any stock options since the beginning of fiscal 2007. We have recognized compensation expense during the requisite service period of the stock option. As of March 31, 2012, we had no unrecognized compensation expense related to stock options granted.

Stock Option Activity

Stock option activity under all stock plans is summarized as follows:

| | Number of Shares | Weighted Average Exercise Price Per Share | Weighted Average Remaining Contractual Life (Years) | Aggregate Intrinsic Value (In thousands) |
|---|---------------------|---|---|---|
| Outstanding at March 31, 2009 (848,000 shares exercisable at a weighted average exercise price of \$8.86 per share) | 848,000 | \$8.86 | | |
| Granted | - | - | | |
| Exercised | (128,000) | 7.18 | | |
| Canceled or forfeited | - | - | | |
| Outstanding at March 31, 2010 (720,000 shares exercisable at a weighted average exercise price of \$9.15 per share) | 720,000 | 9.15 | | |
| Granted | - | - | | |
| Exercised | (314,000) | 5.35 | | |
| Canceled or forfeited | - | - | | |
| Outstanding at March 31, 2011 (406,000 shares exercisable at a weighted average exercise price of \$12.10 per share) | 406,000 | 12.10 | | |
| Granted | - | - | | |
| Exercised | (122,000) | 5.04 | | |

Edgar Filing: ABAXIS INC - Form 10-K

| | | | | |
|---|----------|---------|------|----------|
| Canceled or forfeited | (2,000) | 5.31 | | |
| Outstanding at March 31, 2012 | 282,000 | \$15.21 | 1.78 | \$ 3,922 |
| Vested and expected to vest at March 31, 2012 | 282,000 | \$15.21 | 1.78 | \$ 3,922 |
| Exercisable at March 31, 2012 | 282,000 | \$15.21 | 1.78 | \$ 3,922 |

The aggregate intrinsic value in the table above represents the pre-tax intrinsic value, based on our closing stock price as of March 30, 2012 (the last day of trading for our fiscal year ended March 31, 2012), that would have been received by the option holders had all option holders exercised their stock options as of that date. Total intrinsic value of stock options exercised during fiscal 2012, 2011 and 2010 was \$2.5 million, \$6.7 million and \$2.2 million, respectively. Cash proceeds from stock options exercised during fiscal 2012, 2011 and 2010 were \$615,000, \$1.7 million and \$915,000, respectively.

Table of Contents

The following table summarizes information regarding stock options outstanding and stock options exercisable at March 31, 2012:

| Range of Exercise Prices | Options Outstanding | | | Options Exercisable | | |
|--------------------------|---------------------|---|---|---------------------|---|---|
| | Number of Shares | Weighted Average Remaining Contractual Life (Years) | Weighted Average Exercise Price Per Share | Number of Shares | Weighted Average Exercise Price Per Share | Weighted Average Exercise Price Per Share |
| \$ 3.12 - \$ 3.84 | 11,000 | 0.61 | \$ 3.32 | 11,000 | \$ 3.32 | \$ 3.32 |
| \$ 3.85 - \$ 3.85 | 73,000 | 1.06 | 3.85 | 73,000 | 3.85 | 3.85 |

| \$ 21.45 - \$ 21.45 | 2,000 | 2.04 | 21.45 | 2,000 | 21.45 | 21.45 |
| \$ 21.65 - \$ 21.65 | 152,000 | 2.05 | 21.65 | 152,000 | 21.65 | 21.65 |
| \$ 3.12 - \$ 21.65 | 282,000 | 1.78 | 15.21 | 282,000 | 15.21 | 15.21 |

Restricted Stock Units

We grant restricted stock unit awards to employees and directors as part of our share-based compensation program which began in fiscal 2007. The restricted stock unit awards entitle holders to receive shares of common stock at the end of a specified period of time. Vesting for restricted stock unit awards is based on continuous employment or service of the holder. Upon vesting, the equivalent number of common shares are typically issued net of tax withholdings. If the vesting conditions are not met, unvested restricted stock unit awards will be forfeited. Generally, the restricted stock unit awards vest according to one of the following time-based vesting schedules:

- Restricted stock unit awards to employees: Four-year time-based vesting as follows: five percent vesting after the first year; additional ten percent after the second year; additional 15 percent after the third year; and the remaining 70 percent after the fourth year of continuous employment with the Company.
- Restricted stock unit awards to non-employee directors: 100 percent vesting after one year of continuous service to the Company.

From time to time, restricted stock unit awards granted to employees may be subject to accelerated vesting upon achieving certain performance-based milestones. Additionally, the Compensation Committee of our Board of Directors (the "Compensation Committee"), in its discretion, may provide in the event of a change in control for the acceleration of vesting and/or settlement of the restricted stock unit held by a participant upon such conditions and to such extent as determined by the Compensation Committee. Our Board of Directors has adopted an executive change in control severance plan, which it may terminate or amend at any time, that provides that awards granted to executive officers will accelerate fully on a change of control. The vesting of non-employee director awards granted under the Equity Incentive Plan automatically will also accelerate in full upon a change in control.

The fair value of restricted stock unit awards used in our expense recognition method is measured based on the number of shares granted and the closing market price of our common stock on the date of grant. Such value is

recognized as an expense over the corresponding requisite service period. The share-based compensation expense is reduced for an estimate of the restricted stock unit awards that are expected to be forfeited. The forfeiture estimate is based on historical data and other factors, and compensation expense is adjusted for actual results. As of March 31, 2012, the total unrecognized compensation expense related to restricted stock unit awards granted amounted to \$19.3 million, which is expected to be recognized over a weighted average service period of 2.05 years.

Table of Contents

Restricted Stock Unit Activity

The following table summarizes restricted stock unit activity during fiscal 2012, 2011 and 2010:

| | Number of Shares | Weighted Average Grant Date Fair Value(1) |
|----------------------------|---------------------|--|
| Unvested at March 31, 2009 | 690,000 | \$ 23.43 |
| Granted | 309,000 | 18.33 |
| Vested(2) | (75,000) | 23.72 |
| Canceled or forfeited | (60,000) | 23.56 |
| Unvested at March 31, 2010 | 864,000 | \$ 21.57 |
| Granted | 333,000 | 24.45 |
| Vested(2) | (244,000) | 23.43 |
| Canceled or forfeited | (13,000) | 23.14 |
| Unvested at March 31, 2011 | 940,000 | \$ 22.09 |
| Granted | 436,000 | 27.25 |
| Vested(2) | (237,000) | 22.12 |
| Canceled or forfeited | (19,000) | 24.03 |
| Unvested at March 31, 2012 | 1,120,000 | \$ 24.06 |

(1) The weighted average grant date fair value of restricted stock units is based on the number of shares and the closing market price of our common stock on the date of grant.

(2) The number of restricted stock units vested includes shares that we withheld on behalf of our employees to satisfy the statutory tax withholding requirements.

Total intrinsic value of restricted stock units vested during fiscal 2012, 2011 and 2010 was \$6.6 million, \$6.0 million and \$1.3 million, respectively. The total grant date fair value of restricted stock units vested during fiscal 2012, 2011 and 2010 was \$5.2 million, \$5.7 million and \$1.8 million, respectively.

NOTE 13. SHAREHOLDERS' EQUITY

Share Repurchase Program

Share repurchase activity under our share repurchase program is summarized as follows (in thousands, except share and average per share cost data):

| | Year Ended March 31, 2012 |
|--|---------------------------------|
| Number of shares repurchased | 1,168,000 |
| Total cost | \$ 27,328 |
| Average per share cost including commissions | \$ 23.41 |

In August 2011, the Board of Directors authorized the repurchase of up to an aggregate of \$40.0 million of our common stock. In January 2012, the Board of Directors approved a \$15.0 million increase to the Company's existing share repurchase program, to a total of \$55.0 million. As of March 31, 2012, \$27.7 million of our common stock may

yet be purchased under such authorization. The repurchases are made from time to time on the open market at prevailing market prices or in negotiated transactions off the market. Repurchased shares are retired.

Stock Purchase Rights

On April 22, 2003, our Board of Directors approved the adoption of a Shareholder Rights Plan. Under the terms of the plan, shareholders of record on May 8, 2003, received one preferred stock purchase right for each outstanding share of common stock held. Each right entitled the registered holder to purchase from us one one-thousandth of a share of our Series RP Preferred Stock, \$0.001 par value, at a price of \$24.00 per share and becomes exercisable when a person or group acquires 15% or more of our common stock without prior approval by the Board of Directors.

Table of Contents

In addition, under certain conditions involving an acquisition or proposed acquisition, the rights permit the holders (other than the acquirer) to purchase our common stock at a 50% discount from the market price at that time, and in the event of certain business combinations, the rights permit the purchase of the common stock of an acquirer at a 50% discount from the market price at that time. Under certain conditions, the purchase rights may be redeemed by the Board of Directors in whole, but not in part, at a price of \$0.001 per right. The rights have no voting privileges and are attached to and automatically trade with our common stock.

The Shareholder Rights Plan and rights granted thereunder expire in 2013.

Common Stock Warrants

At March 31, 2012, there were 30,000 warrants outstanding, of which 8,000 shares were vested, to purchase common stock at a weighted average exercise price of \$3.00 per share, expiring in fiscal years 2016 through 2017. At March 31, 2011, there were 10,000 warrants outstanding, of which 2,000 shares were vested, to purchase common stock at a weighted average exercise price of \$3.00 per share, expiring in January 2016. The fair value of the warrants issued were determined using the Black-Scholes option-pricing model and are amortized over their estimated useful life, of approximately ten years, as an intangible asset. The warrants vest at a rate of 20% annually from their issuance dates and have a term of five years.

NOTE 14. NET INCOME PER SHARE

The following is a reconciliation of the weighted average number of common shares outstanding used in calculating basic and diluted net income per share (in thousands, except share and per share data):

| | Year Ended March 31, | | |
|--|----------------------|------------|------------|
| | 2012 | 2011 | 2010 |
| Numerator: | | | |
| Net income | \$13,091 | \$14,537 | \$13,023 |
| Denominator: | | | |
| Weighted average common shares outstanding - basic | 22,084,000 | 22,365,000 | 22,021,000 |
| Weighted average effect of dilutive securities: | | | |
| Stock options | 130,000 | 294,000 | 399,000 |
| Restricted stock units | 230,000 | 197,000 | 186,000 |
| Warrants | 18,000 | 2,000 | - |
| Weighted average common shares outstanding - diluted | 22,462,000 | 22,858,000 | 22,606,000 |
| Net income per share: | | | |
| Basic net income per share | \$0.59 | \$0.65 | \$0.59 |
| Diluted net income per share | \$0.58 | \$0.64 | \$0.58 |

Stock options and warrants are excluded from the computation of diluted weighted average shares outstanding if the exercise price of the stock options and warrants is greater than the average market price of our common stock during the period because the inclusion of these stock options and warrants would be antidilutive to net income per share. There were no stock options and warrants excluded from the computation of diluted weighted average shares outstanding during fiscal 2012, 2011 and 2010.

We excluded the following restricted stock units from the computation of diluted weighted average shares outstanding because the inclusion of these awards would be antidilutive to net income per share:

Year Ended March 31,

| | 2012 | 2011 | 2010 |
|--|---------|---------|--------|
| Weighted average number of shares underlying antidilutive restricted stock units | 267,000 | 213,000 | 65,000 |

NOTE 15. INCOME TAXES

Income Tax Provision

The components of our income tax provision are summarized as follows (in thousands):

| | Year Ended March 31, | | |
|-------------------------------------|----------------------|---------|---------|
| | 2012 | 2011 | 2010 |
| Current: | | | |
| Federal | \$5,552 | \$5,940 | \$5,353 |
| State | 584 | 961 | 1,448 |
| Foreign | 267 | 46 | 336 |
| Total current income tax provision | 6,403 | 6,947 | 7,137 |
| Deferred: | | | |
| Federal | 790 | 1,547 | 1,296 |
| State | (117) | 540 | (51) |
| Total deferred income tax provision | 673 | 2,087 | 1,245 |
| Total income tax provision | \$7,076 | \$9,034 | \$8,382 |

The components of our income before income tax provision are summarized as follows (in thousands):

| | Year Ended March 31, | | |
|------------------------------------|----------------------|----------|----------|
| | 2012 | 2011 | 2010 |
| United States | \$19,403 | \$23,335 | \$20,264 |
| Foreign | 764 | 236 | 1,141 |
| Income before income tax provision | \$20,167 | \$23,571 | \$21,405 |

The income tax provision differs from the amount computed by applying the federal statutory income tax rate (35 percent) to income before income tax provision as follows (in thousands):

| | Year Ended March 31, | | |
|--|----------------------|---------|---------|
| | 2012 | 2011 | 2010 |
| Income taxes at federal income tax rate | \$7,059 | \$8,250 | \$7,492 |
| State income taxes, net of federal benefits | 455 | 1,275 | 937 |
| Non-deductible compensation | 159 | 89 | 358 |
| Research and development tax credits | (254) | (385) | (183) |
| Tax-exempt interest income | (65) | (52) | (14) |
| Qualified production activities income benefit | (306) | (258) | (274) |
| Other | 28 | 115 | 66 |
| Total income tax provision | \$7,076 | \$9,034 | \$8,382 |

During fiscal 2012 and 2011, we recognized \$842,000 and \$2.2 million, respectively of tax deductions related to share-based compensation in excess of recognized share-based compensation expense ("excess benefits") which was recorded to shareholders' equity. We record excess benefits to shareholders' equity when the benefits result in a reduction in cash paid for income taxes.

Our policy is to reinvest earnings of our foreign subsidiary unless such earnings are subject to U.S. taxation. As of March 31, 2012, the cumulative earnings upon which U.S. income taxes has not been provided is approximately \$453,000. The U.S. tax liability if the earnings were repatriated is \$181,000.

Unrecognized Tax Benefits

During fiscal 2012, we did not recognize any interest and penalties related to unrecognized tax benefits. We file income tax returns in the U.S. federal jurisdiction, Germany and various state jurisdictions. The statute of limitations is three years for federal and four years for California. To the extent there is a net operating loss or a research and development tax credit available for carryover to future years, the statute of limitations with respect to the net operating loss and tax credit begins in the year utilized. As a result of the timing for the utilization of federal and California net operating loss and tax credit carryovers, we are subject to examination by U.S. federal and various state jurisdictions for fiscal years 1994 through 2012. We are subject to examination in Germany for fiscal years 2009 through 2012.

Table of Contents

Deferred Tax Assets and Liabilities

The following table presents the breakdown between current and non-current net deferred tax assets (liabilities) (in thousands):

| | March 31, | |
|---------------------------------------|-----------|---------|
| | 2012 | 2011 |
| Deferred tax assets, current | \$4,151 | \$3,422 |
| Deferred tax assets, non-current | - | 1,203 |
| Deferred tax liabilities, non-current | (199) | - |
| Total net deferred tax assets | \$3,952 | \$4,625 |

Significant components of our deferred tax assets (liabilities) are as follows (in thousands):

| | March 31, | |
|---|-----------|----------|
| | 2012 | 2011 |
| Deferred tax assets: | | |
| Research and development tax credit carryforwards | \$376 | \$379 |
| Capitalized research and development | 200 | 229 |
| Inventory reserves | 442 | 187 |
| Deferred revenue from extended maintenance agreements and warranty reserves | 2,100 | 1,480 |
| Accrued payroll and other accrued expenses | 1,145 | 1,096 |
| Share-based compensation | 1,658 | 1,561 |
| Alternative minimum tax credits | 24 | 24 |
| Tax on deferred intercompany profit | 896 | 765 |
| Other | 477 | 343 |
| Total deferred tax assets | 7,318 | 6,064 |
| Deferred tax liabilities: | | |
| Depreciation | (3,274) | (1,336) |
| Other | (92) | (103) |
| Total deferred tax liabilities | (3,366) | (1,439) |
| Net deferred tax assets | \$3,952 | \$4,625 |

A valuation allowance against deferred tax assets is provided when it is more likely than not that some portion of the deferred tax assets will not be realized. As of March 31, 2012, 2011 and 2010, we did not have a valuation allowance.

As of March 31, 2012, we had no federal or California net operating loss carryforwards. As of March 31, 2012, our California research and development tax credit carryforwards were \$579,000. The California research and development tax credit will carryforward indefinitely.

NOTE 16. SEGMENT REPORTING INFORMATION

Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by our chief operating decision maker, or decision making group, in deciding how to allocate resources and in assessing performance.

Abaxis develops, manufactures, markets and sells portable blood analysis systems for use in the human or veterinary patient-care setting to provide clinicians with rapid blood constituent measurements. We identify our reportable segments as those customer groups that represent more than 10% of our combined revenue or gross profit or loss of all

reported operating segments. We manage our business on the basis of the following two reportable segments: (i) the medical market and (ii) the veterinary market, which are based on the products sold and services provided by market and customer group. For the products that we manufacture and sell, each reportable segment has similar manufacturing processes, technology and shared infrastructures. The accounting policies for segment reporting are the same as for the Company as a whole. We do not segregate assets by segments since our chief operating decision maker, or decision making group, does not use assets as a basis to evaluate a segment's performance.

Medical Market

In the medical market reportable segment, we serve a worldwide customer group consisting of military installations (ships, field hospitals and mobile care units), physicians' office practices across all specialties, urgent care, outpatient and walk-in clinics (free-standing or hospital-connected), health screening operations, home care providers (national, regional or local), nursing homes, ambulance companies, oncology treatment clinics, dialysis centers, pharmacies and hospital laboratories. The products manufactured and sold in this segment primarily consist of Piccolo chemistry analyzers and medical reagent discs.

Table of Contents

Veterinary Market

In the veterinary market reportable segment, we serve a worldwide customer group consisting of companion animal hospitals, animal clinics with mixed practices of small animals, birds and reptiles, equine and bovine practitioners, veterinary emergency clinics, veterinary referral hospitals, universities, government, pharmaceutical companies, biotechnology companies and private research laboratories. The products manufactured and sold in this segment primarily consist of VetScan chemistry analyzers and veterinary reagent discs. We also sell OEM supplied products in this segment consisting of VetScan hematology instruments and related reagent kits, VetScan VSpro coagulation and specialty analyzers and related consumables, VetScan i-STAT analyzers and related VetScan i-STAT consumables and rapid tests. During fiscal 2011, we began developing Abaxis Veterinary Reference Laboratories (“AVRL”), a full-service laboratory testing facility, based in Olathe, Kansas. In October 2011, we began operating and providing veterinary reference laboratory diagnostic and consulting services for veterinarians in the United States through AVRL.

The table below summarizes revenues, cost of revenues and gross profit from our two operating segments and from certain unallocated items for fiscal 2012, 2011 and 2010 (in thousands).

| | Year Ended March 31, | | |
|------------------------|----------------------|-----------|-----------|
| | 2012 | 2011 | 2010 |
| Revenues: | | | |
| Medical Market | \$ 30,279 | \$ 28,988 | \$ 24,176 |
| Veterinary Market | 121,789 | 108,400 | 92,411 |
| Other(1) | 4,528 | 6,288 | 7,970 |
| Total revenues | 156,596 | 143,676 | 124,557 |
| Cost of revenues: | | | |
| Medical Market | 13,505 | 13,647 | 10,490 |
| Veterinary Market | 52,466 | 45,438 | 37,162 |
| Other(1) | 5,522 | 4,799 | 4,783 |
| Total cost of revenues | 71,493 | 63,884 | 52,435 |
| Gross profit: | | | |
| Medical Market | 16,774 | 15,341 | 13,686 |
| Veterinary Market | 69,323 | 62,962 | 55,249 |
| Other(1) | (994) | 1,489 | 3,187 |
| Gross profit | \$ 85,103 | \$ 79,792 | \$ 72,122 |

(1) Represents unallocated items, not specifically identified to any particular business segment.

NOTE 17. REVENUES BY PRODUCT AND SERVICE CATEGORY AND GEOGRAPHIC REGION AND SIGNIFICANT CONCENTRATIONS

Revenue Information

The following is a summary of our revenues by product and service category (in thousands):

| | Year Ended March 31, | | |
|--|----------------------|----------|----------|
| Revenues by Product and Service Category | 2012 | 2011 | 2010 |
| Instruments(1) | \$35,150 | \$32,092 | \$28,787 |
| Consumables(2) | 113,810 | 102,920 | 85,819 |

| | | | |
|-----------------------------------|------------|------------|------------|
| Other products and services(3) | 7,472 | 7,412 | 6,809 |
| Product and service revenues, net | 156,432 | 142,424 | 121,415 |
| Development and licensing revenue | 164 | 1,252 | 3,142 |
| Total revenues | \$ 156,596 | \$ 143,676 | \$ 124,557 |

(1) Instruments include chemistry analyzers, hematology instruments, VSpro coagulation and specialty analyzers and i-STAT analyzers.

(2) Consumables include reagent discs, hematology reagent kits, VSpro coagulation and specialty cartridges, i-STAT cartridges and rapid tests.

(3) Other products and services include veterinary reference laboratory diagnostic and consulting services.

Table of Contents

The following is a summary of our revenues by geographic region based on customer location (in thousands):

| Revenues by Geographic Region | Year Ended March 31, | | |
|------------------------------------|----------------------|------------|------------|
| | 2012 | 2011 | 2010 |
| North America | \$ 128,969 | \$ 117,992 | \$ 101,391 |
| Europe | 21,926 | 20,308 | 18,547 |
| Asia Pacific and rest of the world | 5,701 | 5,376 | 4,619 |
| Total revenues | \$ 156,596 | \$ 143,676 | \$ 124,557 |

Significant Concentrations

During fiscal 2012, one distributor in the United States, Animal Health International, accounted for 15% of our total worldwide revenues. Animal Health International was formed in 2011 from two animal health companies, which included Walco International, Inc., d/b/a DVM Resources. During fiscal 2011, there were no distributors or direct customers that accounted for 10% or more of our total worldwide revenues. During fiscal 2010, one distributor in the United States, DVM Resources accounted for 10% of our total worldwide revenues.

Substantially all of our long-lived assets are located in the United States.

NOTE 18. SUMMARY OF QUARTERLY DATA (UNAUDITED)

The following is a summary of unaudited quarterly data for fiscal 2012 and 2011 (in thousands, except per share data):

| | June 30 | Quarter Ended | | March 31 |
|-----------------------------------|-----------|---------------|-------------|-----------|
| | | September 30 | December 31 | |
| Fiscal Year Ended March 31, 2012: | | | | |
| Revenues | \$ 36,003 | \$ 40,025 | \$ 37,850 | \$ 42,718 |
| Gross profit | \$ 19,223 | \$ 22,021 | \$ 20,478 | \$ 23,381 |
| Income tax provision | \$ 1,278 | \$ 1,918 | \$ 1,696 | \$ 2,184 |
| Net income | \$ 2,214 | \$ 3,321 | \$ 2,850 | \$ 4,706 |
| Net income per share - basic | \$ 0.10 | \$ 0.15 | \$ 0.13 | \$ 0.22 |
| Net income per share - diluted | \$ 0.10 | \$ 0.15 | \$ 0.13 | \$ 0.21 |
| Fiscal Year Ended March 31, 2011: | | | | |
| Revenues | \$ 34,953 | \$ 35,277 | \$ 35,906 | \$ 37,540 |

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's management, with the participation of the Company's principal executive officer and principal financial officer, has evaluated that the effectiveness of the Company's disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, (the "Exchange Act"), as of the end of the period covered by this report. Based on such evaluation, the Company's principal executive officer and principal financial officer, have concluded that, as of the end of such period, the Company's disclosure controls and procedures were effective.

Management's Report on Internal Control Over Financial Reporting

We are responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Under the supervision and with the participation of the Company's management, including its principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on criteria established in the framework in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation, our principal executive officer and principal financial officer, have concluded that our internal control over financial reporting was effective as of March 31, 2012.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Accordingly, even an effective system of internal control will provide only reasonable assurance that the objectives of the internal control system are met.

Attestation Report of the Independent Registered Public Accounting Firm

Burr Pilger Mayer, Inc., our independent registered public accounting firm, has issued an audit report on the effectiveness of our internal control over financial reporting as of March 31, 2012, which report is included elsewhere herein.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the fiscal quarter ended March 31, 2012 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting, as defined in Rule 13a-15(f) and 15d-15(f) under the Exchange Act.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON
INTERNAL CONTROL OVER FINANCIAL REPORTING

To the Board of Directors and Shareholders
of Abaxis, Inc.

We have audited the internal control over financial reporting of Abaxis, Inc. and its subsidiary (“the Company”) as of March 31, 2012, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management’s Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Abaxis, Inc. and its subsidiary maintained, in all material respects, effective internal control over financial reporting as of March 31, 2012, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Abaxis, Inc. and its subsidiary as of March 31, 2012 and 2011, and the related consolidated statements of income, shareholders’ equity and comprehensive income, and cash flows for each of the three years in the period ended March 31, 2012 and the related financial statement schedule and our report dated June 14, 2012 expressed an unqualified opinion thereon.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The following table sets forth information concerning Abaxis' executive officers and directors as of May 31, 2012.

| Name | Age | Title |
|--|-----|---|
| Clinton H. Severson | 64 | Chairman of the Board, President and Chief Executive Officer |
| Vernon E. Altman(1)(3) | 66 | Director |
| Richard J. Bastiani, Ph.D.(1)(2)(3) | 69 | Director |
| Michael D. Casey(1)(2)(3) | 66 | Director |
| Henk J. Evenhuis(1)(3) | 69 | Director |
| Prithipal Singh, Ph.D.(1)(2)(3) | 73 | Director |
| Alberto R. Santa Ines | 65 | Chief Financial Officer and Vice President of Finance |
| Kenneth P. Aron, Ph.D. | 59 | Chief Technology Officer |
| Donald P. Wood | 60 | Chief Operations Officer |
| Martin V. Mulroy | 51 | Chief Commercial Officer for North America Animal Health |
| Vladimir E. Ostoich, Ph.D. | 66 | Vice President of Government Affairs and Vice President of Marketing for the Pacific Rim, Founder |
| Brenton G.A. Hanlon | 66 | Vice President of Medical Sales and Marketing for North America |
| Achim Henkel | 54 | Managing Director of Abaxis Europe GmbH |

- (1) Member of the Audit Committee
(2) Member of the Compensation Committee
(3) Member of the Nominating and Corporate Governance Committee

Clinton H. Severson has served as our President, Chief Executive Officer and one of our directors since June 1996. He was appointed Chairman of the Board in May 1998. Since June 2011, Mr. Severson served on the Board of Directors of Response Biomedical Corporation (CDNX: RBM). Since November 2008, Mr. Severson served on the Board of Directors of Trinity Biotech (Nasdaq: TRIB), a biotechnology company. From November 2006 to February 2012, Mr. Severson served on the Board of Directors of CytoCore, Inc. (OTCBB: CYOE.OB), a biotechnology company. From February 1989 to May 1996, Mr. Severson served as President and Chief Executive Officer of MAST Immunosystems, Inc., a privately-held medical diagnostic company. Mr. Severson is also a member of the board of directors of a privately-held company. Mr. Severson was selected as a director because of his in-depth knowledge of our operations, financial condition and strategy in his position as our President and Chief Executive Officer, as well as his extensive senior management experience in medical diagnostics and experience serving on the boards of various public and private companies.

Vernon E. Altman joined the Board of Directors in April 2011. Mr. Altman joined the founding group to start Bain & Company, a global business consulting firm, in 1973 and is currently Senior Advisor of Bain & Company. Mr. Altman is Chairman of the Board of Directors of Vobile, Inc., a company focused on content protection and monetization for media companies and other digital media stakeholders. He also served on the Board of Directors of Napster, Inc. prior to its acquisition. Mr. Altman was selected to serve as director because of his vast array of experiences in many different industry segments, including operational, executive leadership and board experience.

Richard J. Bastiani, Ph.D. joined the Board of Directors in September 1995. Dr. Bastiani is currently retired. From 2007 to 2011, Dr. Bastiani served as Chairman of the Board of Directors of Response Biomedical Corporation (CDNX: RBM). From 1998 to 2005, Dr. Bastiani served as Chairman of the Board of Directors of ID Biomedical Corporation (Nasdaq: IDBE), after he was appointed to the Board of Directors of ID Biomedical Corporation in October 1996. Dr. Bastiani was President of Dendreon (Nasdaq: DNDN), a biotechnology company, from September 1995 to September 1998. From 1971 until 1995, Dr. Bastiani held a number of positions with Syva Company, a diagnostic company, including as President from 1991 until Syva was acquired by a subsidiary of Hoechst AG of Germany in 1995. Dr. Bastiani is also a member of the board of directors of two privately-held companies. Dr. Bastiani was selected as a director because of his extensive leadership experience in biotechnology companies and his in-depth knowledge of our business, strategy and management team, as well as his experience serving as Chairman of the Compensation Committee and on the boards of various public and private companies.

Michael D. Casey joined the Board of Directors in October 2010. Mr. Casey is currently retired. From September 1997 to February 2002, Mr. Casey served as the Chairman, President, Chief Executive Officer and a director of Matrix Pharmaceutical, Inc. From November 1995 to September 1997, Mr. Casey was Executive Vice President at Schein Pharmaceutical, Inc. (NYSE: SHP). In December 1996, he was appointed President of the retail and specialty products division of Schein Pharmaceutical. From June 1993 to November 1995, he served as President and Chief Operating Officer of Genetic Therapy, Inc. Mr. Casey was President of McNeil Pharmaceutical (a unit of Johnson & Johnson) from 1989 to June 1993 and Vice President, Sales and Marketing for Ortho Pharmaceutical Corp. (a subsidiary of Johnson & Johnson) from 1985 to 1989. Mr. Casey has served on the Board of Directors of Celgene Corporation (Nasdaq: CELG) since 2002 and Durect Corp. (Nasdaq: DRRX) since 2004. Mr. Casey previously served on the Board of Directors of AVI Biopharma, Inc. (Nasdaq: AVII) from 2006 to 2010, Allos Therapeutics, Inc. (Nasdaq: ALTH) from 2002 to 2010, Cholestech Corporation (Nasdaq: CTEC) from 2001 to 2007, OrthoLogic Corporation (Nasdaq: OLG) from 2004 to 2007, Sicor, Inc. (Nasdaq: SCRI) from 2002 to 2004 and Bone Care International, Inc. (Nasdaq: BCII) from 2001 to 2005. Mr. Casey was selected to serve as director because of his extensive industry knowledge and experience, including operational, leadership and board experience from his executive positions at pharmaceutical/biotechnology companies.

Table of Contents

Henk J. Evenhuis joined the Board of Directors in November 2002. Mr. Evenhuis is currently retired. He served on the Board of Directors of Credence Systems Corporation (Nasdaq: CMOS), a semiconductor equipment manufacturer, from 1993 to 2008. Mr. Evenhuis served as Executive Vice President and Chief Financial Officer of Fair Isaac Corporation (NYSE: FIC), a global provider of analytic software products to the financial services, insurance and health care industries from October 1999 to October 2002. From 1987 to 1998, he was Executive Vice President and Chief Financial Officer of Lam Research Corporation (Nasdaq: LRCX), a semiconductor equipment manufacturer. Mr. Evenhuis was selected as a director because of his financial expertise and prior senior leadership experience as a Chief Financial Officer at global technology companies, as well as his experience serving on the boards of various public companies, which provides a strong foundation to serve as Chairman of the Audit Committee.

Prithipal Singh, Ph.D. joined the Board of Directors in June 1992. Prior to retiring, Dr. Singh was the Founder, Chairman and Chief Executive Officer of ChemTrak Inc. (Pink Sheets: CMTR) from 1988 to 1998. Prior to this, Dr. Singh was an Executive Vice President of Idetec Corporation from 1985 to 1988 and a Vice President of Syva Corporation from 1977 to 1985. Dr. Singh was selected as a director because of his insight and experience in biotechnology companies through his prior executive leadership and management positions.

Alberto R. Santa Ines has served as our Chief Financial Officer and Vice President of Finance since April 2002. Mr. Santa Ines joined us in February 2000 as Finance Manager. In April 2001, Mr. Santa Ines was promoted to Interim Chief Financial Officer and Director of Finance, and in April 2002, he was promoted to his current position. From March 1998 to January 2000, Mr. Santa Ines was a self-employed consultant to several companies. From August 1997 to March 1998, Mr. Santa Ines was the Controller of Unisil (Pink Sheets: USIL), a semiconductor company. From April 1994 to August 1997, he was a Senior Finance Manager at Lam Research Corporation (Nasdaq: LRCX), a semiconductor equipment manufacturer.

Kenneth P. Aron, Ph.D. has served as our Chief Technology Officer since April 2008. Dr. Aron joined us in February 2000 as Vice President of Research and Development. From April 1998 to November 1999, Dr. Aron was Vice President of Engineering and Technology of Incyte Pharmaceuticals (Nasdaq: INCY), a genomic information company. From April 1996 to April 1998, Dr. Aron was Vice President of Research, Development and Engineering for Cardiogenesis Corporation (Nasdaq: CGCP), a manufacturer of laser-based cardiology surgical products.

Donald P. Wood has served as our Chief Operations Officer since April 2009. Mr. Wood joined us in October 2007 as Vice President of Operations. From April 2003 to September 2007, Mr. Wood was the Vice President of Operations of Cholestech Corporation (Nasdaq: CTEC), a medical products manufacturing company that was subsequently acquired by Inverness Medical Innovations, Inc. in September 2007. From July 2001 to March 2003, Mr. Wood served as Vice President of Bone Health, a business unit of Quidel Corporation, a manufacturing and marketer of point-of-care diagnostics, and was responsible for Bone Health Product Operations, Device Research and Development, and Sales and Marketing. He also served as Quidel's Vice President of Ultrasound Operations from August 1999 to July 2001. Prior to joining Quidel, Mr. Wood was the Director of Ultrasound Operations for Metra Biosystems Inc., a developer and manufacturing company of point-of-care products for osteoporosis, from July 1998 to August 1999 prior to Quidel's acquisition of Metra Biosystems Inc.

Martin V. Mulroy has served as our Chief Commercial Officer for North America Animal Health since April 2012. Mr. Mulroy joined us in November 1997 as the Northeast Regional Sales Manager. He was promoted to Eastern Area Director of Sales in December 1998 and in January 2005, he was promoted to National Sales Director for the Domestic Veterinary market. In May 2006, Mr. Mulroy was promoted to Vice President of Animal Health Sales and Marketing for North America. From March 1996 to November 1997, Mr. Mulroy was Regional Sales Manager for BioCircuits Inc., an immunoassay company in the medical market. Mr. Mulroy was Regional Sales Manager from 1990 to 1992 and Field Operations Manager from 1992 to 1995 for MAST Immunosystems Inc., a

privately-held medical diagnostic company.

Vladimir E. Ostoich, Ph.D., one of our co-founders, is currently the Vice President of Government Affairs and Vice President of Marketing for the Pacific Rim. Dr. Ostoich has served as Vice President in various capacities at Abaxis since inception, including as Vice President of Research and Development, Senior Vice President of Research and Development, Vice President of Engineering and Instrument Manufacturing and Vice President of Marketing and Sales for the United States and Canada.

Brenton G.A. Hanlon has served as our Vice President of Medical Sales and Marketing for North America since September 2009. Mr. Hanlon served on our Board of Directors from November 1996 through August 2009. From January 2001 to August 2009, Mr. Hanlon was President and Chief Executive Officer of Hitachi Chemical Diagnostics, a manufacturer of in vitro allergy diagnostic products. Concurrently, from December 1996 to August 2009, Mr. Hanlon was also President and Chief Operating Officer of Tri-Continent Scientific, a subsidiary of Hitachi Chemical, specializing in liquid-handling products and instrument components for the medical diagnostics and biotechnology industries. From 1989 to December 1996, Mr. Hanlon was Vice President and General Manager of Tri-Continent Scientific. Mr. Hanlon serves on the board of directors of a privately-held company.

Table of Contents

Achim Henkel has served as the Managing Director of our subsidiary, Abaxis Europe GmbH, since its incorporation in 2008. Mr. Henkel joined us in January 1998 as a consultant to build a European distribution network. From January 2000 to June 2008, Mr. Henkel was Sales and Marketing Manager for Europe, the Middle East and Africa. From October 1996 to December 1997, Mr. Henkel was a self-employed consultant to several companies. From January 1988 to September 1996, Mr. Henkel held a number of positions with Syva Diagnostics Germany, including as National Sales Manager from 1991 until Syva was acquired by a subsidiary of Hoechst AG in 1995. From 1982 to 1987, Mr. Henkel was regional sales manager for Hoechst AG, a German pharmaceutical company.

Term and Number of Directors

All of our directors hold office until the next annual meeting of shareholders of Abaxis and until their successors have been elected and qualified. Our Bylaws authorize our Board of Directors to fix the number of directors at not less than four or no more than seven. The number of authorized directors of Abaxis is currently six.

Each of our executive officers serves at the discretion of the Board of Directors. There are no family relationships among any of our directors or executive officers.

Identification of Audit Committee and Financial Expert

The Audit Committee of the Board of Directors oversees Abaxis' corporate accounting, financial reporting process and systems of internal control and financial controls. The following outside directors comprise the Audit Committee: Mr. Altman, Mr. Casey, Mr. Evenhuis, Dr. Bastiani and Dr. Singh. Mr. Evenhuis serves as Chairman of the Audit Committee.

The Board of Directors annually reviews the Nasdaq Stock Market, or NASDAQ, listing standards definition of independence for Audit Committee members and has determined that all members of our Audit Committee are independent (based on the requirements for independence set forth in Rule 4350(d)(2)(A)(i) and (ii) of the NASDAQ listing standards). Securities and Exchange Commission, or SEC, regulations require Abaxis to disclose whether a director qualifying as an "audit committee financial expert" serves on the Audit Committee. The Board of Directors has determined that Mr. Evenhuis qualifies as an "audit committee financial expert," as defined in applicable SEC rules. The Board of Directors made a qualitative assessment of Mr. Evenhuis's level of knowledge and experience based on a number of factors, including his formal education and experience as a chief financial officer for public reporting companies.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Exchange Act requires our executive officers, directors and persons who beneficially own more than 10% of our equity securities to file initial reports of ownership and reports of changes in ownership with the SEC. Such persons are required by SEC regulations to furnish us with copies of all Section 16(a) forms filed by such persons.

Based solely on our review of the copies of Forms 3, 4 and 5 and amendments thereto received by us, we believe that during the period from April 1, 2011 through March 31, 2012, our executive officers, directors and greater than 10% shareholders complied with all applicable filing requirements applicable to these executive officers, directors and greater than 10% shareholders, except for one late filing by Dr. Bastiani.

Code of Business Conduct and Ethics

Abaxis has adopted a Code of Business Conduct and Ethics that applies to all our executive officers, directors and employees, including without limitation our principal executive officer, principal financial officer, principal accounting officer or controller or persons performing similar functions. The Code of Business Conduct and Ethics is available on our website at www.abaxis.com under “Investor Relations” at “Corporate Governance.” If we make any amendments to the Code of Business Conduct and Ethics or grant any waiver from a provision of the code to any executive officer or director, we will promptly disclose the nature of the amendment or waiver on our website. We intend to satisfy the disclosure requirement under Item 5.05 of Form 8-K regarding any amendment to, or waiver of, any provision of the Code of Business Conduct and Ethics by disclosing such information on the same website. You may also request a copy of our Code of Business Conduct and Ethics by contacting our investor relations department at investors@abaxis.com.

Table of Contents

Item 11. Executive Compensation

COMPENSATION DISCUSSION AND ANALYSIS

This Compensation Discussion and Analysis describes the principles underlying the material components of our executive compensation program for our executive officers, including the Named Executive Officers in the “Summary Compensation Table” below. We also provide an overview of the overall objectives of the program and the factors relevant to an analysis of these policies and decisions.

Executive Summary

The Compensation Committee believes our executive compensation program reflects a strong pay-for-performance philosophy and is well-aligned with the long-term interests of shareholders.

Fiscal 2012 Financial Performance

We achieved total revenues of \$156.6 million during fiscal 2012, as compared with revenues of \$143.7 million in fiscal 2011, an increase of 9%. Revenues in North America increased by 9% in fiscal 2012, compared to fiscal 2011, and international revenue increased by 14% in fiscal 2012, compared to fiscal 2011. Consumable sales increased to \$113.8 million, or 11%, in fiscal 2012, compared to fiscal 2011.

In our veterinary market, we expanded our product offerings through the launch of two new rapid diagnostic tests, the VetScan Giardia Rapid Test and the VetScan Canine Lyme Rapid Test. Additionally, during fiscal 2012, we began our operations of Abaxis Veterinary Reference Laboratories, a full-service laboratory testing facility providing veterinary reference laboratory diagnostic and consulting services for veterinarians in the United States.

Our total shareholder return on an investment in our common stock has outperformed the Russell 2000 Index over the past five year period ended March 31, 2012.

Fiscal 2012 Compensation

Consistent with our pay-for-performance philosophy, our Compensation Committee took the following actions with respect to the fiscal 2012 compensation of our Named Executive Officers.

- **Base Salary.** We maintained base salaries for our Named Executive Officers at their fiscal 2011 rates.
- **Annual Bonus.** We maintained the target annual bonus opportunities of our Named Executive Officers at their fiscal 2011 levels, which were competitive with their peers. The actual annual bonus for fiscal 2012 was earned at 65% of the target bonus opportunity for our Named Executive Officers.
- **Equity Awards.** We granted our Named Executive Officers equity awards in the form of restricted stock units subject to time-based vesting, which were intended to encourage retention and enhance share ownership, aligning the interests of our Named Executive Officers with our shareholders.

Executive Compensation Program Overview

Overview

The goals of our executive compensation program are to attract, retain, motivate and reward executive officers who contribute to our success and to incentivize these executives on both a short-term and long-term basis to achieve our business objectives. This program combines cash and equity awards in the proportions that we believe will motivate our executive officers to increase shareholder value over the long-term.

Our executive compensation program is designed to achieve the following objectives:

- to align our executive compensation with our strategic business objectives;
- to align the interests of our executive officers with both short-term and long-term shareholder interests; and
- to place a substantial portion of our executives' compensation at risk such that actual compensation depends on both overall company performance and individual performance.

Table of Contents

Executive Compensation Program Objectives and Framework

Our executive compensation program has three primary components: (1) base salary, (2) annual cash incentive bonus and (3) long-term equity grants. Base salaries for our executive officers are a minimum fixed level of compensation consistent with or below competitive market practice. Annual cash incentive bonuses awarded to our executive officers are intended to incentivize and reward achievement of financial, operating and strategic objectives during the fiscal year and targets are typically set to be above market. Long-term equity grants awarded to our executive officers are designed to ensure that incentive compensation is linked to our long-term company performance, promote retention and to align our executives' long-term interests with shareholders' long-term interests. Our executive officers' total potential cash compensation is heavily weighted toward annual cash incentive bonuses, because our Compensation Committee and Board of Directors believe this weighting best aligns the interests of our executive officers with that of shareholders generally and helps ensure a strong pay-for-performance culture.

Executive compensation is reviewed annually by our Compensation Committee and Board of Directors, and adjustments are made to reflect company objectives and competitive conditions. Our executive compensation review process includes engaging an independent compensation consulting advisor from time to time, as described below in "Competitive Market Analysis." We also offer our executive officers participation in our 401(k) plan, health care insurance, flexible spending accounts and certain other benefits available generally to all full-time employees.

Compensation-Setting Process

Role of Our Compensation Committee

Our Compensation Committee, which operates under a written charter adopted by the Board of Directors, is primarily responsible for reviewing and recommending to the Board of Directors for approval the compensation arrangements for our executive officers and directors. In carrying out these responsibilities, the Compensation Committee shall review all components of executive officer and director compensation for consistency with the Compensation Committee's compensation philosophy as in effect from time to time. In connection with their review and recommendations, our Compensation Committee also considers the recommendations of our Chief Executive Officer, Mr. Clinton Severson. Our Compensation Committee gives considerable weight to Mr. Severson's recommendations because of his direct knowledge of each executive officer's performance and contribution to our financial performance. However, Mr. Severson does not participate in the determination of his own compensation. No other executive officers participate in the determination or recommendation of the amount or form of executive officer compensation, except our Chief Financial Officer as discussed below. Our Compensation Committee does not delegate any of its functions in determining executive and/or director compensation. To date, our Compensation Committee has not established any formal policies or guidelines for allocating compensation between long-term and currently paid out compensation, cash and non-cash compensation, or among different forms of non-cash compensation.

Our Compensation Committee may discuss with our Chief Executive Officer or Chief Financial Officer our financial, operating and strategic business objectives, bonus targets or performance goals. The Compensation Committee reviews and determines the appropriateness of the financial measures and performance goals, as well as assesses the degree of difficulty in achieving specific bonus targets and performance goals. The Compensation Committee also considers the recommendations from our Chief Executive Officer regarding the compensation of our executive officers who report directly to him. These recommendations generally include annual adjustments to compensation levels, an assessment of each executive officer's overall individual contribution, scope of responsibilities and level of experience. The Compensation Committee then presents its recommendation for executive compensation to the Board of Directors for final review and approval. Typically, these recommendations are made to our Board of Directors by the first quarter of the ensuing fiscal year.

Competitive Market Analysis

From time to time, our Compensation Committee may engage an independent compensation advisor to obtain competitive compensation data. In May 2008, our Compensation Committee engaged an independent compensation consulting firm, Watson Wyatt, to prepare competitive benchmarking studies, and advise the Compensation Committee on compensation for executives in similarly-situated companies. We did not engage another compensation consultant, or request additional recommendations from Watson Wyatt, in connection with our determination of fiscal 2012 executive compensation because our Compensation Committee and Board of Directors determined that many of the prior recommendations made by Watson Wyatt continued to be relevant for fiscal 2012.

Table of Contents

In May 2011, our Compensation Committee engaged Pay Governance, an independent executive compensation advisor, to review our executive and board compensation programs. Pay Governance, with input from the Compensation Committee, updated the comparative frame of reference that resulted in a group of 17 companies (the “Compensation Peer Group”). This Compensation Peer Group represented similarly-situated medical device and diagnostic companies that were identified by Pay Governance as companies with similar financial growth and as competitors for executive talent. The following companies comprised the Compensation Peer Group:

| | | |
|----------------|----------------------|------------------------------|
| Abiomed | ICU Medical | Palomar Medical Technologies |
| AngioDynamics | Kensey Nash | Quidel |
| Cepheid | Luminex | Surmodics |
| Conceptus | Meridian Bioscience | Thoratec |
| Cutera | Neogen | Volcano |
| Genomic Health | Orasure Technologies | |

The Compensation Committee believes that the Compensation Peer Group is appropriate and commensurate with that of Abaxis – overall revenue, market capitalization, and profitability positioned our company at the 60th percentile of the group. The market data obtained regarding the Compensation Peer Group was considered by the Compensation Committee in its fiscal 2013 executive compensation decisions. In addition to benchmarking compensation, Pay Governance conducted a Chief Executive Officer pay and performance assessment to ensure that our Chief Executive Officer’s realizable pay is aligned with actual company performance. Our Compensation Committee and Board of Directors may engage compensation consultants in the future as they deem it to be necessary or appropriate.

The Compensation Committee did not target executive compensation in fiscal 2012 to any specific benchmarks, but did generally target total compensation to be competitive with companies with similar financial growth rates based on the compensation information for the peer company analysis of executive officers prepared in May 2008.

Executive Compensation Components

Base Salary

We provide an annual base salary to each of our executive officers to compensate them for services rendered during the year. Salaries are reviewed annually by the Compensation Committee and adjusted for the ensuing year based on both (i) an evaluation of individual job performance during the prior year, and (ii) an evaluation of the compensation levels of similarly-situated executive officers compared with our compensation studies of companies in our compensation peer group and in our industry generally.

For fiscal 2012 and 2013, the Compensation Committee targeted salaries to be between the 25th and 50th percentile of our compensation peer group. Our Compensation Committee considered this 25th and 50th percentile range as a general guideline for the appropriate level of potential salaries, but did not attempt to specifically match this or any other percentile. Our Compensation Committee also considered the recommendations of the Chief Executive Officer regarding the compensation of each of the Named Executive Officers who reported directly to him. However, the Compensation Committee and our Board of Directors did not base their considerations on any single factor but rather considered a mix of factors and evaluated individual salaries against that mix.

Our Board of Directors set salaries for fiscal 2012 after considering a peer company analysis of total compensation for executive officers prepared in May 2008 by Watson Wyatt and the recommendations of the Compensation Committee. For fiscal 2012 base salaries, our Compensation Committee recommended not to increase base salaries for our Named Executive Officers because they believed that base salaries were at an appropriate level and that the Named Executive Officers’ bonus opportunity provided competitive compensation to ensure strong company

performance. Our Compensation Committee did not use any specific formula based on the factors described above to determine the final base salary levels for each Named Executive Officer.

Our Board of Directors set salaries for fiscal 2013 after considering a peer company analysis of total compensation for executive officers prepared in October 2011 by Pay Governance and the recommendations of the Compensation Committee. For fiscal 2013 base salaries, our Compensation Committee recommended that we increase base salaries in amounts designed to reward each of the Named Executive Officers for their performance in the prior year while maintaining base salaries at an appropriately competitive level. Based on the peer company analysis of total compensation prepared by Pay Governance in October 2011, base salaries for our executive officers were below the 25th percentile of our compensation peer group, especially because in fiscal 2012 we had maintained base salaries for our Named Executive Officers at their fiscal 2011 rates. Accordingly, the Compensation Committee recommended to the Board of Directors to increase base salaries for our Named Executive Officers from fiscal 2012 to fiscal 2013 between 14.7%-20.2%, which reflected the Compensation Committee's goal for executive officer salaries to be between the 25th and 50th percentile of our compensation peer group. Based on the recommendations of the Compensation Committee, our Board of Directors approved the following base salaries (effective April 2011 for fiscal 2012 and July 2012 for fiscal 2013) for our Named Executive Officers:

Table of Contents

| Named Executive Officer | Fiscal 2012 | Fiscal 2013 |
|----------------------------|-------------|-------------|
| | Base Salary | Base Salary |
| Clinton H. Severson | \$ 375,000 | \$ 450,000 |
| Alberto R. Santa Ines | \$ 208,000 | \$ 250,000 |
| Kenneth P. Aron, Ph.D. | \$ 218,000 | \$ 250,000 |
| Vladimir E. Ostoich, Ph.D. | \$ 218,000 | \$ 250,000 |
| Donald P. Wood | \$ 208,000 | \$ 250,000 |

Fiscal 2012 and 2013 base salary increases for the Named Executive Officers were as follows:

| Named Executive Officer | Fiscal 2012 | Fiscal 2013 |
|----------------------------|--|--|
| | Percent Increase In Base Salary from Fiscal 2011 | Percent Increase In Base Salary from Fiscal 2012 |
| Clinton H. Severson | -% | 20.0% |
| Alberto R. Santa Ines | -% | 20.2% |
| Kenneth P. Aron, Ph.D. | -% | 14.7% |
| Vladimir E. Ostoich, Ph.D. | -% | 14.7% |
| Donald P. Wood | -% | 20.2% |

Annual Cash Incentive Bonus

Our annual cash incentive bonus program is designed to reward the achievement of key short-term corporate objectives that ultimately drive long-term corporate achievement. The bonus plan is an “at-risk” compensation arrangement designed to provide market competitive cash incentive opportunities that reward our executive officers for the achievement of key financial performance goals. Most importantly, the program is structured to achieve our overall objective of tying this element of compensation to the attainment of company performance goals that will create shareholder value.

Target Bonus Opportunities for Fiscal 2012

For fiscal 2012, our Compensation Committee generally targeted total cash compensation to be at or above the 75th percentile of the Compensation Peer Group. Our Compensation Committee considered this 75th percentile target as a general guideline for the appropriate level of potential cash bonus compensation, but did not attempt to specifically match this or any other percentile. For fiscal 2012, our Compensation Committee recommended to our Board of Directors that we maintain the target bonuses from fiscal 2011 for the Named Executive Officers. In April 2011, our Compensation Committee and Board of Directors (with Mr. Severson abstaining) approved the fiscal 2012 target bonus levels for our executive officers. The following table summarizes the fiscal 2012 target bonus amounts and the bonus amounts awarded for fiscal 2012 performance for our Named Executive Officers:

| Named Executive Officer | Fiscal 2012 | |
|----------------------------|-----------------|------------------------------|
| | Target Bonus | Fiscal 2012 Bonus Awarded |
| Clinton H. Severson | \$ 525,000 | \$ 341,251 |
| Alberto R. Santa Ines | \$ 300,000 | \$ 195,000 |
| Kenneth P. Aron, Ph.D. | \$ 300,000 | \$ 195,000 |
| Vladimir E. Ostoich, Ph.D. | \$ 300,000 | \$ 195,000 |
| Donald P. Wood | \$ 300,000 | \$ 195,000 |

Corporate Performance Measures

For fiscal 2012, our Compensation Committee selected quarterly net sales and quarterly pre-tax income as the corporate financial performance measures for our officer bonus program, which we believe are the most important measures of both annual financial performance and long-term shareholder value. Using these two equally-weighted performance measures, the Compensation Committee established bonus targets that are set to be achievable, yet are at a level of difficulty that does not assure that the goals will be met. The bonus targets require executive officers to increase annual corporate financial performance during the applicable fiscal year, compared to our previous year's actual financial results. Accordingly, meeting the bonus targets, especially given the global business environment, requires executive officers to improve financial performance on a year-over-year basis and, thus, a substantial portion of our executive officers' compensation is at risk if corporate financial results are not achieved during a particular fiscal year. In addition to meeting financial goals, we must not exceed a certain failure rate on our reagents discs in order for cash incentives to be paid to our executive officers. However, our Compensation Committee has the discretion to grant bonuses even if these performance goals are not met.

Table of Contents

Payment of the target bonus is equally weighted between achievement of our quarterly net sales performance goal and our quarterly pre-tax income performance goal. Bonuses are earned for the first, second and third quarter only if we achieve at least 90% of either of our pre-established quarterly net sales and/or quarterly pre-tax income goals and also meet any operational goals set by the Compensation Committee. Bonuses are earned in the fourth quarter based on the annual, rather than quarterly, achievement of at least 90% of either of our pre-established annual net sales and/or pre-tax income goals for the year and also the achievement of any operational goals set by the Compensation Committee. After the initial threshold is met, the amount of the target bonus paid is based on a sliding scale relative to the proportionate achievement of the performance goals. If we achieve 90% of only one performance goal, the payout would be limited to 25% of the aggregate target bonus. For each 1% above 90% of that performance goal, the payout would increase by 2.5% for the aggregate target bonus. The target bonus will be fully earned if at least 100% of both performance goals are achieved. For each 1% above 100% of a performance goal, the payout would increase by 1.5% for the aggregate target bonus. The maximum potential bonus payout is 200% of the target bonus, provided we achieve greater than 133% of at least one of the performance goals. Assuming targets are reached, the bonus payments are paid as follows: 15% of the applicable bonus amount for the first quarter, 25% in the second and third quarters, and 35% in the fourth quarter. At the end of the fourth quarter, the final amount of the bonus earned will be adjusted to reflect overall performance against the year.

Bonus Decisions and Analysis

The Compensation Committee evaluated our financial performance for each quarter of fiscal 2012 and the level of achievement of each of the corporate performance measures for those quarters. As noted above, the fiscal 2012 annual bonus paid to each Named Executive Officer was based upon the achievement of two equally-weighted financial goals, our total annual net sales and total annual pre-tax income goals. Based on this evaluation, the Compensation Committee determined that our Named Executive Officers had achieved 65.0% of their target bonus awards for fiscal 2012. The targets and actual results are summarized below.

| Corporate Performance Measures | Fiscal 2012 Target Bonus | Fiscal 2012 Actual Results |
|--------------------------------|-----------------------------------|-------------------------------------|
| Net sales | \$ 165.2 million | \$ 156.6 million |
| Pre-tax income (1)(2) | \$ 23.6 million | \$ 21.7 million |

(1) The target bonus level for pre-tax income includes bonus expense earned during the period.

(2) In April 2012, the Board of Directors (with Mr. Severson abstaining), upon the recommendation of the Compensation Committee, approved a revision to the target bonus level to exclude certain unbudgeted expenses in pre-tax income. The target bonus level in this table reflects the approved revision.

Target Bonus Opportunities for Fiscal 2013

For fiscal 2013, our Compensation Committee generally targeted total cash compensation to be at or above the 75th percentile of the Compensation Peer Group. Our Compensation Committee considered this 75th percentile target as a general guideline for the appropriate level of potential cash bonus compensation, but did not attempt to specifically match this or any other percentile. The target bonus level for the Named Executive Officers is designed to maintain total compensation at an appropriately competitive level in the industry.

Based on the peer company analysis of total compensation prepared by Pay Governance in October 2011, total cash compensation for our executive officers was below the 75th percentile in comparison with our compensation peer group, especially because in fiscal 2012 we had maintained annual bonus opportunities for our Named Executive Officers at their fiscal 2011 levels. Accordingly, the Compensation Committee recommended to the Board of Directors to increase target bonus opportunities for fiscal 2013 for our Named Executive Officers to be at or above the 75th percentile of the Compensation Peer Group. In April 2012, our Compensation Committee and Board of Directors (with Mr. Severson abstaining) approved the fiscal 2013 target bonus levels for our executive officers. The following table summarizes the fiscal 2013 target bonus amounts for our Named Executive Officers:

| Named Executive Officer | Fiscal 2013 Target Bonus |
|----------------------------|--------------------------------|
| Clinton H. Severson | \$ 625,000 |
| Alberto R. Santa Ines | \$ 350,000 |
| Kenneth P. Aron, Ph.D. | \$ 350,000 |
| Vladimir E. Ostoich, Ph.D. | \$ 350,000 |
| Donald P. Wood | \$ 350,000 |

Table of Contents

Payment of the target bonus, as identified above, for fiscal 2013, will continue to be equally weighted at 50% for achievement of our quarterly net sales performance goal and 50% for achievement of our quarterly pre-tax income performance goal. For fiscal 2013, bonuses will be paid in the same payout structure as the fiscal 2012 bonus discussed above, with the exception of higher financial targets. Our Compensation Committee has the discretion to adjust the parameters and performance goals for payment of these annual performance bonuses.

Recoupment of Certain Payments

We do not currently have a formal policy regarding adjustments or recovery of awards or payments following a restatement of financial performance targets. In such a circumstance, the Compensation Committee would evaluate whether compensation adjustments were appropriate based upon the facts and circumstances surrounding the restatement. The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 further expanded the reach of mandatory recoupment policies though the Securities and Exchange Commission has yet to provide final guidance. We will ensure to be compliant with any final recoupment policies.

Long-term Equity Incentive Compensation

Long-term incentive equity awards are designed as a key element of compensation for our executive officers so that a substantial portion of their total direct compensation is tied to increasing the market value of Abaxis. We make annual grants of long-term incentive equity awards to align our executives' interests with those of our shareholders, to promote executives' focus on the long-term financial performance of Abaxis, and, through time-based vesting requirements, to enhance long-term retention.

In determining the size of equity-based awards, the Compensation Committee considers competitive grant values for comparable positions at the Compensation Peer Group, as well as various subjective factors primarily relating to the responsibilities of the individual executive, past performance, and the executive's expected future contributions and value to Abaxis. The Compensation Committee also considers, in its decision-making process, the executive's historical total compensation, including prior equity grants, their tenure, responsibilities, experience and value to Abaxis. No one factor is given any specific weighting and the Compensation Committee exercises its judgment to determine the appropriate size and mix of awards.

Under our 2005 Equity Incentive Plan, we are permitted to award stock options, stock appreciation rights, restricted stock awards, restricted stock units, performance cash awards, performance shares, performance units, deferred compensation awards or other share-based awards. Prior to fiscal 2007, equity-based grants to our executive officers comprised solely of stock options. Beginning in fiscal 2007, we began granting restricted stock units to our executive officers. Equity grants to our Named Executive Officers in fiscal 2012 and fiscal 2013 are discussed below.

Stock Options

Prior to fiscal 2007, a substantial portion of our executive compensation arrangement consisted of long-term incentive grants, comprising of stock options. Starting in fiscal 2007, we decided to grant restricted stock units instead of stock options because stock options are highly dilutive and we incur an expense upfront even though executives do not necessarily realize any value from stock options.

Restricted Stock Units

Fiscal 2012 Restricted Stock Unit Grants

The Compensation Committee approves all restricted stock unit grants to our Named Executive Officers and other executive officers. In April 2011, for our Named Executive Officers and upon the recommendation of the Compensation Committee, our Board of Directors (with Mr. Severson abstaining) granted 55,000 restricted stock units to our Chief Executive Officer and 25,000 restricted stock units to each of our other Named Executive Officers. The value of these equity grants at the time of grant was approximately \$1,573,000 for our Chief Executive Officer and approximately \$715,000 for each of our other Named Executive Officers. The Compensation Committee believed that these grants of restricted stock units were appropriate based on our financial performance over the prior year.

Vesting terms of the fiscal 2012 restricted stock unit awards were time-based, over a period of four years, with the following vesting schedule: five percent vesting on the first anniversary of the grant date; additional ten percent on the second anniversary of the grant date; additional 15 percent on the third anniversary of the grant date; and the remaining 70 percent on the fourth anniversary of the grant date, in each case subject to continuous service to Abaxis during the vesting period. Time-based vesting terms are intended to encourage retention of our executive officers. Our Compensation Committee believes that retention of the Named Executive Officers is key to our success and that the time-based vesting schedule of the restricted stock units helps to retain our Named Executive Officers. Furthermore, the Compensation Committee believes that our restricted stock grants will enhance executive share ownership, further aligning their interests with that of shareholders.

Table of Contents

Fiscal 2013 Restricted Stock Unit Grants

In April 2012, after considering an analysis of total compensation for our Named Executive Officers, the Compensation Committee determined that a mix of time-based and performance-based vesting for its restricted stock unit awards would provide an effective tool for incentivizing and retaining those executive officers who are most responsible for direct impact on corporate performance by balancing variable compensation (restricted stock units subject to performance-based vesting, which we refer to as performance units) and compensation with a more predictable value (restricted stock units subject to time-based vesting). The performance units consist of the right to receive shares of common stock, subject to achievement of certain corporate performance-related goals, as established by the Compensation Committee. The performance units vest 25% on each anniversary of the grant date over four years. Restricted stock units subject to time-based vesting granted to the Named Executive Officers continued to have the four-year time-based vesting terms as described above. The Compensation Committee believed that the changes to the equity award program for fiscal 2013 would help align the executives' focus on the achievement of specific performance goals intended to help position us for future growth.

In April 2012, our Compensation Committee and Board of Directors (with Mr. Severson abstaining) approved the fiscal 2013 long-term equity incentive compensation for our Named Executive Officers. The following table summarizes the fiscal 2013 restricted stock units and performance units awarded to our Named Executive Officers:

| Named Executive Officer | Restricted | Performance |
|----------------------------|---|-------------|
| | Stock Units with Time-Based Vesting (#) | Units (#) |
| Clinton H. Severson | 23,000 | 23,000 |
| Alberto R. Santa Ines | 10,500 | 10,500 |
| Kenneth P. Aron, Ph.D. | 10,500 | 10,500 |
| Vladimir E. Ostoich, Ph.D. | 10,500 | 10,500 |
| Donald P. Wood | 10,500 | 10,500 |

Other Compensation Policies and Benefits

Benefits and Perquisites

We do not provide any of our executive officers with any material perquisites. Currently, all benefits offered to our executive officers, including an opportunity to participate in our 401(k) plan, medical, dental, vision, life insurance, disability coverage, long-term care insurance benefits and flexible spending accounts, are also available on a non-discriminatory basis to other full-time employees. We also provide vacation and other paid holidays to all full-time employees, including our Named Executive Officers.

Employment Agreements

In October 2010, we entered into an employment agreement with Clinton H. Severson, our President and Chief Executive Officer, which amended, restated and superseded Mr. Severson's existing Employment Agreement, dated July 11, 2005. The amended and restated Employment Agreement provides Mr. Severson with a severance payment equal to two years of salary, bonus and benefits if his employment with us is terminated for any reason other than cause. Additionally, upon Mr. Severson's termination without cause or resignation for good reason, all of Mr. Severson's unvested stock options, restricted stock units and other equity awards would vest in full. Certain severance

benefits provided pursuant to the Severance Plan (described below in “Change in Control Agreements”) with respect to a change of control supersede those provided pursuant to the employment agreement. None of our other executives has employment agreements with us.

Change in Control Agreements

In July 2006, our Board of Directors, after considering a change of control program analysis from the peer company analysis prepared by our compensation advisor at that time and upon the recommendation of our Compensation Committee, approved and adopted the Abaxis, Inc. Executive Change of Control Severance Plan (the “Severance Plan”). The Severance Plan was adopted by our Board of Directors to reduce the distraction of executives and potential loss of executive talent that could arise from a potential change of control. Participants in the Severance Plan include Abaxis’ senior managers who are selected by the Board of Directors. In December 2008, our Board of Directors amended the Severance Plan to ensure its compliance with Section 409A of the Internal Revenue Code of 1986, as amended (the “Code”) and designated the following current executive officers as participants in the Severance Plan: Clinton H. Severson, our Chairman, President and Chief Executive Officer; Alberto R. Santa Ines, our Chief Financial Officer and Vice President of Finance; Kenneth P. Aron, Ph.D., our Chief Technology Officer; Vladimir E. Ostoich, Ph.D., our Vice President of Government Affairs and Vice President of Marketing for the Pacific Rim; Donald P. Wood, our Chief Operations Officer; and Martin V. Mulroy, our Chief Commercial Officer for North America Animal Health. In October 2009, our Board of Directors also designated the following executive officers as participants in the Severance Plan: Brenton G.A. Hanlon, our Vice President of Medical Sales and Marketing for North America and Achim Henkel, our Managing Director of Abaxis Europe GmbH.

Table of Contents

The Severance Plan provides that upon the occurrence of a change of control a participant's outstanding stock option(s) and other unvested equity-based instruments will accelerate in full, and any such stock awards shall become immediately exercisable.

In addition, the Severance Plan provides that, if the participant's employment is terminated by us (or any successor of Abaxis) for any reason other than cause, death, or disability within 18 months following the change of control date and such termination constitutes a separation in service, the participant is eligible to receive severance benefits as follows:

- on the 60th day after the termination date, a lump sum cash payment equal to two times the sum of the participant's annual base salary and the participant's target annual bonus amount for the year in which the change of control occurs;
- payment of up to 24 months of premiums for medical, dental and vision benefits, provided, however, that if the participant becomes eligible to receive comparable benefits under another employer's plan, our benefits will be secondary to those provided under such other plan;
- reimbursement, on a monthly basis, of up to 24 months of premiums for disability and life insurance benefits if the participant elects to convert his or her disability and/or life insurance benefits under our plans into individual policies following termination; and
- payment of an amount equal to any excise tax imposed under Section 4999 of the Code, as well as a payment in reimbursement of excise and income taxes arising from the initial excise tax payment, provided, however, that payment of such amount is capped at \$1,000,000 per participant.

Payment of the foregoing severance benefits is conditioned upon the participant's execution of a valid and effective release of claims against us.

Tax Considerations

Deductibility of Executive Compensation

We have considered the provisions of Section 162(m) of the Code and related Treasury Regulations that restrict deductibility of executive compensation paid to our Named Executive Officers and our other executive officers holding office at the end of any year to the extent such compensation exceeds \$1,000,000 for any of such officers in any year and does not qualify for an exception under the statute or regulations. The Compensation Committee endeavors to maximize deductibility of compensation under Section 162(m) of the Code to the extent practicable while maintaining a competitive, performance-based compensation program. However, tax consequences, including tax deductibility, are subject to many factors (such as changes in the tax laws and regulations or interpretations thereof and the timing of various decisions by officers regarding stock options) which are beyond the control of both Abaxis and our Compensation Committee. In addition, our Compensation Committee believes that it is important to retain maximum flexibility in designing compensation programs that meet its stated business objectives. For these reasons, our Compensation Committee, while considering tax deductibility as a factor in determining compensation, will not limit compensation to those levels or types of compensation that will be deductible. Our Compensation Committee will continue to consider alternative forms of compensation, consistent with its compensation goals that preserve deductibility.

Compensation Committee Interlocks and Insider Participation

No member of the Compensation Committee has ever been an executive officer or employee of Abaxis. None of our executive officers currently serves, or has served during the last completed fiscal year, on the Compensation Committee or board of directors of any other entity that has one or more executive officers serving as a member of our board of directors or compensation committee. For information with respect to related-person transactions involving members of the Compensation Committee, see Item 13. Certain Relationships and Related Transactions, and Director Independence of this Form 10-K.

EXECUTIVE COMPENSATION

Summary Compensation Table

The following table sets forth for fiscal 2012, 2011 and 2010, the compensation awarded or paid to, or earned by, Abaxis' Chief Executive Officer, Chief Financial Officer and the three other most highly compensated executive officers at March 31, 2012 (collectively, the "Named Executive Officers").

| Name and Principal Position | Fiscal Year | Salary (\$) | Bonus (\$) | Stock Awards (\$)(1) | Non-Equity Incentive Compensation | | | Total (\$) |
|--|----------------------------|-------------|------------|----------------------|-----------------------------------|--------------|-------------------|------------|
| | | | | | Option Awards (\$)(2) | Plan (\$)(3) | All Other (\$)(3) | |
| Clinton H. Severson | 2012 | 376,442 | - | 1,573,000 | - | 341,251 | 11,726(4) | 2,302,419 |
| President, Chief Executive Officer and Chairman of the Board | 2011 | 370,385 | - | 1,416,800 | - | 488,251 | 11,160(4) | 2,286,596 |
| | 2010 | 360,000 | - | 833,250 | - | 611,626 | 12,168(4) | 1,817,044 |
| | Alberto R. Santa Ines | 2012 | 208,800 | - | 715,000 | - | 195,000 | 10,573(5) |
| Chief Financial Officer and Vice President of Finance | 2011 | 205,538 | - | 644,000 | - | 279,000 | 9,967(5) | 1,138,505 |
| | 2010 | 200,000 | - | 378,750 | - | 349,500 | 11,456(5) | 939,706 |
| | Kenneth P. Aron, Ph.D. | 2012 | 218,839 | - | 715,000 | - | 195,000 | 23,502(6) |
| Chief Technology Officer | 2011 | 215,539 | - | 644,000 | - | 279,000 | 22,462(6) | 1,161,001 |
| | 2010 | 210,000 | - | 378,750 | - | 349,500 | 22,471(6) | 960,721 |
| | Vladimir E. Ostoich, Ph.D. | 2012 | 218,839 | - | 715,000 | - | 195,000 | 18,619(7) |
| Vice President of Government Affairs and Vice President of Marketing for the Pacific Rim | 2011 | 215,539 | - | 644,000 | - | 279,000 | 17,568(7) | 1,156,107 |
| | 2010 | 210,000 | - | 378,750 | - | 349,500 | 17,917(7) | 956,167 |
| | Donald P. Wood | 2012 | 208,800 | - | 715,000 | - | 195,000 | 18,299(8) |
| Chief Operations Officer | 2011 | 205,538 | - | 644,000 | - | 279,000 | 17,518(8) | 1,146,056 |
| | 2010 | 196,923 | - | 378,750 | - | 349,500 | 17,934(8) | 943,107 |

- (1) Awards consist of restricted stock units granted to the Named Executive Officer in the fiscal year specified. Amounts listed in this column represent the grant date fair value of the awards granted in the fiscal year indicated as computed in accordance with Accounting Standards Codification ("ASC") 718, "Compensation-Stock Compensation" ("ASC 718"). Amounts shown do not reflect whether the Named Executive Officer has actually realized a financial benefit from the awards (such as by vesting in a restricted stock unit award). For a discussion of the assumptions used in determining the fair value of awards of restricted stock units in the above table, see Note 12 of the Notes to Consolidated Financial Statements included in this Annual Report on Form 10-K.
- (2) Represents aggregate cash performance bonuses earned during each fiscal year based on achievement of corporate financial performance goals, as described under "Executive Compensation – Compensation Discussion and Analysis" above. These bonuses were paid in four quarterly installments within one month following the end of the applicable quarter upon achieving the established quarterly net sales and/or quarterly pre-tax income goals for that quarter. Amounts do not include bonuses paid during a fiscal year, with respect to bonuses earned in a prior fiscal year.
- (3) Amounts listed are based upon our actual costs expensed in connection with such compensation.
- (4) In fiscal 2012, consists of \$5,420 in supplemental health plan expenses reimbursed by us, \$663 in group life insurance paid by us, \$574 in disability insurance premiums paid by us, \$444 in long-term care insurance

premiums paid by us and \$4,625 in matching contributions made by us to Mr. Severson's 401(k) account. In fiscal 2011, consists of \$5,191 in supplemental health plan expenses reimbursed by us, \$648 in group life insurance paid by us, \$616 in disability insurance premiums paid by us, \$111 in long-term care insurance premiums paid by us and \$4,594 in matching contributions made by us to Mr. Severson's 401(k) account. In fiscal 2010, consists of \$4,769 in supplemental health plan expenses reimbursed by us, \$648 in group life insurance paid by us, \$626 in disability insurance premiums paid by us and \$6,125 in matching contributions made by us to Mr. Severson's 401(k) account.

(5) In fiscal 2012, consists of \$4,516 in supplemental health plan expenses reimbursed by us, \$460 in group life insurance paid by us, \$458 in disability insurance premiums paid by us, \$514 in long-term care insurance premiums paid by us and \$4,625 in matching contributions made by us to Mr. Santa Ines' 401(k) account. In fiscal 2011, consists of \$4,323 in supplemental health plan expenses reimbursed by us, \$445 in group life insurance paid by us, \$477 in disability insurance premiums paid by us, \$128 in long-term care insurance premiums paid by us and \$4,594 in matching contributions made by us to Mr. Santa Ines' 401(k) account. In fiscal 2010, consists of \$4,419 in supplemental health plan expenses reimbursed by us, \$432 in group life insurance paid by us, \$480 in disability insurance premiums paid by us and \$6,125 in matching contributions made by us to Mr. Santa Ines' 401(k) account.

(6) In fiscal 2012, consists of \$17,611 in supplemental health plan expenses reimbursed by us, \$484 in group life insurance paid by us, \$480 in disability insurance premiums paid by us, \$302 in long-term care insurance premiums paid by us and \$4,625 in matching contributions made by us to Dr. Aron's 401(k) account. In fiscal 2011, consists of \$16,826 in supplemental health plan expenses reimbursed by us, \$467 in group life insurance paid by us, \$500 in disability insurance premiums paid by us, \$75 in long-term care insurance premiums paid by us and \$4,594 in matching contributions made by us to Dr. Aron's 401(k) account. In fiscal 2010, consists of \$15,388 in supplemental health plan expenses reimbursed by us, \$454 in group life insurance paid by us, \$504 in disability insurance premiums paid by us and \$6,125 in matching contributions made by us to Dr. Aron's 401(k) account.

Table of Contents

- (7) In fiscal 2012, consists of \$12,430 in supplemental health plan expenses reimbursed by us, \$484 in group life insurance paid by us, \$480 in disability insurance premiums paid by us, \$600 in long-term care insurance premiums paid by us and \$4,625 in matching contributions made by us to Dr. Ostoich's 401(k) account. In fiscal 2011, consists of \$11,920 in supplemental health plan expenses reimbursed by us, \$467 in group life insurance paid by us, \$500 in disability insurance premiums paid by us, \$150 in long-term care insurance premiums paid by us and \$4,531 in matching contributions made by us to Dr. Ostoich's 401(k) account. In fiscal 2010, consists of \$10,897 in supplemental health plan expenses reimbursed by us, \$454 in group life insurance paid by us, \$504 in disability insurance premiums paid by us and \$6,062 in matching contributions made by us to Dr. Ostoich's 401(k) account.
- (8) In fiscal 2012, consists of \$12,430 in supplemental health plan expenses reimbursed by us, \$460 in group life insurance paid by us, \$458 in disability insurance premiums paid by us, \$326 in long-term care insurance premiums paid by us and \$4,625 in matching contributions made by us to Mr. Wood's 401(k) account. In fiscal 2011, consists of \$11,920 in supplemental health plan expenses reimbursed by us, \$445 in group life insurance paid by us, \$477 in disability insurance premiums paid by us, \$82 in long-term care insurance premiums paid by us and \$4,594 in matching contributions made by us to Mr. Wood's 401(k) account. In fiscal 2010, consists of \$10,897 in supplemental health plan expenses reimbursed by us, \$432 in group life insurance paid by us, \$480 in disability insurance premiums paid by us and \$6,125 in matching contributions made by us to Mr. Wood's 401(k) account.

Salary and Bonus in Proportion to Total Compensation. The following table sets forth the percentage of base salary and annual cash incentive bonus earned by each Named Executive Officer as a percentage of total compensation for fiscal 2012.

| Named Executive Officer | Base Salary | Annual Cash |
|----------------------------|---------------------------------------|---|
| | As a Percentage of Total Compensation | Incentive Bonus As a Percentage of Total Compensation |
| Clinton H. Severson | 16% | 15% |
| Alberto R. Santa Ines | 18% | 17% |
| Kenneth P. Aron, Ph.D. | 19% | 17% |
| Vladimir E. Ostoich, Ph.D. | 19% | 17% |
| Donald P. Wood | 18% | 17% |

CEO Employment Agreement. In October 2010, we entered into an employment agreement with Clinton H. Severson, our President and Chief Executive Officer, which amended, restated and superseded Mr. Severson's existing Employment Agreement, dated July 11, 2005. The amended and restated Employment Agreement provides Mr. Severson with a severance payment equal to two years of salary, bonus and benefits if his employment with us is terminated for any reason other than cause. Additionally, upon Mr. Severson's termination without cause or resignation for good reason, all of Mr. Severson's unvested stock options, restricted stock units and other equity awards would vest in full. Certain severance benefits provided pursuant to the Severance Plan (described above in "Change in Control Agreements") with respect to a change of control supersede those provided pursuant to the employment agreement. None of our other executives has employment agreements with us.

Table of Contents

Grants of Plan-Based Awards in Fiscal 2012

The following table sets forth the grants of plan-based awards to our Named Executive Officers during fiscal 2012.

| Name | Grant Date | Estimated Future Payouts Under Non-Equity Incentive Plan Awards (1) | | | Estimated Future Payouts Under Equity Incentive Plan Awards | | | All Other Stock Awards: Number of Shares of Stock or Units (#) (2) | Grant Date Fair Value of Stock and Option Awards (\$) (3) |
|-----------------------------|------------|---|-------------|--------------|---|------------|-------------|--|---|
| | | Threshold (\$) | Target (\$) | Maximum (\$) | Threshold (#) | Target (#) | Maximum (#) | | |
| Clinton H. Severson | | | | | | | | | |
| Annual cash incentive bonus | | 131,250 | 525,000 | 1,050,000 | | | | | |
| Restricted stock units | 5/2/2011 | | | | | | 55,000 | 1,573,000 | |
| Alberto R. Santa Ines | | | | | | | | | |
| Annual cash incentive bonus | | 75,000 | 300,000 | 600,000 | | | | | |
| Restricted stock units | 5/2/2011 | | | | | | 25,000 | 715,000 | |
| Kenneth P. Aron, Ph.D. | | | | | | | | | |
| Annual cash incentive bonus | | 75,000 | 300,000 | 600,000 | | | | | |
| Restricted stock units | 5/2/2011 | | | | | | 25,000 | 715,000 | |
| Vladimir E. Ostoich, Ph.D. | | | | | | | | | |

| Restricted stock units | 5/2/2011 | | | | | | 25,000 | 715,000 | |
| Donald P. Wood | | | | | | | | | |
| Annual cash incentive bonus | | 75,000 | 300,000 | 600,000 | | | | | |
| Restricted stock units | 5/2/2011 | | | | | | 25,000 | 715,000 | |

(1) Actual cash performance bonuses, which were approved by the Board of Directors upon recommendation by the Compensation Committee based on achievement of corporate financial performance goals for fiscal 2012, were paid in four quarterly installments within one month following the end of the applicable quarter upon achieving the established quarterly net sales and/or quarterly pre-tax income goals. Actual cash performance bonuses are shown in the "Non-Equity Incentive Plan Compensation" column of the "Summary Compensation Table" above.

(2) Each of the equity-based awards reported in the "Grants of Plan-Based Awards" table was granted under, and is subject to, the terms of our 2005 Equity Incentive Plan. The time-based vesting schedule of restricted stock unit grants during fiscal 2012 is described above in "Restricted Stock Units."

(3) Represents the fair value of the restricted stock unit award on the date of grant, pursuant to ASC 718. See Note 12 of the Notes to Consolidated Financial Statements included in this Annual Report on Form 10-K for additional information.

Table of Contents

Outstanding Equity Awards at Fiscal Year End 2012

The following table shows, for the fiscal year ended March 31, 2012, certain information regarding outstanding equity awards at fiscal year end for our Named Executive Officers.

| Name | Option Awards | | | | Stock Awards | | | |

| | | | | | | | 14,000 (4) | 407,820 |
| | | | | | | | 21,250 (4) | 619,012 |
| | | | | | | | 23,750 (4) | 691,838 |
| | | | | | | | 25,000 (4) | 728,250 |
| Vladimir E. Ostoich, Ph.D. | 22,000 | - | 21.65 | 4/20/2014 | | | | |

| | | | |
|-------------------|--------|------|---------|
| | 14,000 | (4) | 407,820 |
| | 21,250 | (4) | 619,012 |
| | 23,750 | (4) | 691,838 |
| | 25,000 | (4) | 728,250 |
| Donald P. Wood | 14,000 | (4) | 407,820 |
| | 21,250 | (4) | 619,012 |
| | 23,750 | (4) | 691,838 |
| | 25,000 | (4) | 728,250 |

(1) Options granted to the Named Executive Officers expire ten years after the grant date. All options vest one-fourth on the first anniversary date of grant and vests at a rate of 1/48th for each full month thereafter. The options listed are now vested in full.

(2) Represents the fair value of our common stock on the grant date of the option.

(3) The value of the equity award is based on the closing price of our common stock of \$29.13 on March 30, 2012, the last day of trading for our fiscal year ended March 31, 2012, as reported on the NASDAQ Global Select Market.

(4) The four-year time-based vesting terms of the restricted stock units is as follows, assuming continuous employment: five percent of the shares vest after the first year; ten percent of the shares vest after the second year; 15 percent of the shares vest after the third year; and 70 percent of the shares vest after the fourth year.

Table of Contents

Option Exercises and Stock Vested in Fiscal 2012

The following table shows all shares of common stock acquired upon exercise of stock options and value realized upon exercise, and all stock awards vested and value realized upon vesting, held by our Named Executive Officers during fiscal 2012.

| Name | Option Awards | | Stock Awards | |
|----------------------------|---|------------------------------------|--|-----------------------------------|
| | Number of Shares Acquired on Exercise (#) | Value Realized on Exercise (\$)(1) | Number of Shares Acquired on Vesting (#) | Value Realized on Vesting (\$)(2) |
| Clinton H. Severson | 10,417 | 256,154 | 50,750 | 1,443,100 |
| Alberto R. Santa Ines | 37,432 | 874,908 | 20,750 | 590,080 |
| Kenneth P. Aron, Ph.D. | - | - | 20,750 | 590,080 |
| Vladimir E. Ostoich, Ph.D. | 40,000 | 723,200 | 20,750 | 590,080 |
| Donald P. Wood | - | - | 20,750 | 582,520 |

(1) The value realized equals the difference between the option exercise price and the fair market value of our common stock on the date of exercise, as reported on the NASDAQ Global Select Market, multiplied by the number of shares for which the option was exercised.

(2) The value realized on vesting of restricted stock units equals the fair market value of our common stock on the settlement date, multiplied by the number of shares that vested.

Severance and Change in Control Agreements

Employment Agreement

In October 2010, we entered into an employment agreement with Clinton H. Severson, our President and Chief Executive Officer, which amended, restated and superseded Mr. Severson's existing Employment Agreement, dated July 11, 2005. The amended and restated Employment Agreement provides Mr. Severson with a severance payment equal to two years of salary, bonus and benefits if his employment with us is terminated for any reason other than cause. Additionally, upon Mr. Severson's termination without cause or resignation for good reason, all of Mr. Severson's unvested stock options, restricted stock units and other equity awards would vest in full. Certain severance benefits provided pursuant to the Severance Plan (described below in "Executive Change of Control Severance Plan") with respect to a change of control supersede those provided pursuant to the employment agreement. None of our other executives has employment agreements with us.

Executive Change of Control Severance Plan

In July 2006, our Board of Directors, after considering a change of control program analysis from the peer company analysis prepared by our compensation advisor at that time and upon the recommendation of our Compensation Committee, approved and adopted the Abaxis, Inc. Executive Change of Control Severance Plan (the "Severance Plan"). The Severance Plan was adopted by our Board of Directors to reduce the distraction of executives and potential loss of executive talent that could arise from a potential change of control. Participants in the Severance Plan include Abaxis' senior managers who are selected by the Board of Directors. In December 2008, our Board of Directors amended the Severance Plan to ensure its compliance with Section 409A of the Code and designated the following current executive officers as participants in the Severance Plan: Clinton H. Severson, our Chairman, President and

Chief Executive Officer; Alberto R. Santa Ines, our Chief Financial Officer and Vice President of Finance; Kenneth P. Aron, Ph.D., our Chief Technology Officer; Vladimir E. Ostoich, Ph.D., our Vice President of Government Affairs and Vice President of Marketing for the Pacific Rim; Donald P. Wood, our Chief Operations Officer; and Martin V. Mulroy, our Chief Commercial Officer for North America Animal Health. In October 2009, our Board of Directors also designated the following executive officers as participants in the Severance Plan: Brenton G.A. Hanlon, our Vice President of Medical Sales and Marketing for North America and Achim Henkel, our Managing Director of Abaxis Europe GmbH.

The Severance Plan provides that upon the occurrence of a change of control a participant's outstanding stock option(s) and other unvested equity-based instruments will accelerate in full, and any such stock awards shall become immediately exercisable.

In addition, the Severance Plan provides that, if the participant's employment is terminated by us (or any successor of Abaxis) for any reason other than cause, death, or disability within 18 months following the change of control date and such termination constitutes a separation in service, the participant is eligible to receive severance benefits as follows:

- on the 60th day after the termination date, a lump sum cash payment equal to two times the sum of the participant's annual base salary and the participant's target annual bonus amount for the year in which the change of control occurs;

Table of Contents

- payment of up to 24 months of premiums for medical, dental and vision benefits, provided, however, that if the participant becomes eligible to receive comparable benefits under another employer's plan, our benefits will be secondary to those provided under such other plan;
- reimbursement, on a monthly basis, of up to 24 months of premiums for disability and life insurance benefits if the participant elects to convert his or her disability and/or life insurance benefits under our plans into individual policies following termination; and
- payment of an amount equal to any excise tax imposed under Section 4999 of the Code, as well as a payment in reimbursement of excise and income taxes arising from the initial excise tax payment, provided, however, that payment of such amount is capped at \$1,000,000 per participant.

Payment of the foregoing severance benefits is conditioned upon the participant's execution of a valid and effective release of claims against us.

Incentive Plans

Under our 2005 Equity Incentive Plan (the "2005 Plan"), in the event of a "change in control," as such term is defined by the 2005 Plan, the surviving, continuing, successor or purchasing entity or its parent may, without the consent of any participant, either assume or continue in effect any or all outstanding options and stock appreciation rights or substitute substantially equivalent options or rights for its stock. Any options or stock appreciation rights which are not assumed or continued in connection with a change in control or exercised prior to the change in control will terminate effective as of the time of the change in control. Our Compensation Committee may provide for the acceleration of vesting of any or all outstanding options or stock appreciation rights upon such terms and to such extent as it determines. The 2005 Plan also authorizes our Compensation Committee, in its discretion and without the consent of any participant, to cancel each or any outstanding option or stock appreciation right upon a change in control in exchange for a payment to the participant with respect to each vested share (and each unvested share if so determined by our Compensation Committee) subject to the cancelled award of an amount equal to the excess of the consideration to be paid per share of common stock in the change in control transaction over the exercise price per share under the award. The Compensation Committee, in its discretion, may provide in the event of a change in control for the acceleration of vesting and/or settlement of any stock award, restricted stock unit award, performance share or performance unit, cash-based award or other share-based award held by a participant upon such conditions and to such extent as determined by our Compensation Committee. It is currently anticipated that awards granted to executive officers will accelerate fully on a change of control. The vesting of non-employee director awards granted under the 2005 Plan automatically will accelerate in full upon a change in control.

As described above, certain additional compensation is payable to a Named Executive Officer (i) if his employment was involuntarily terminated without cause, (ii) upon a change in control or (iii) if his employment was terminated involuntarily following a change in control. The amounts shown in the table below assume that such termination was effective as of March 31, 2012, and do not include amounts in which the Named Executive Officer had already vested as of March 31, 2012. The actual compensation to be paid can only be determined at the time of the change in control and/or a Named Executive Officer's termination of employment.

Table of Contents

Potential Payments Upon Termination or Change in Control

| Executive Benefits and Payments Upon Separation | Involuntary Termination Without Cause (1) | Change In Control (No Termination) | Involuntary Termination Without Cause Following a Change In Control (2) |
|---|---|------------------------------------|---|
| Clinton H. Severson | | | |
| Salary and bonus | \$ 1,800,000 | - | \$ 1,800,000 |
| Vesting of restricted stock units (3) | \$ 5,505,570 | \$ 5,505,570 | \$ 5,505,570 |
| Health and welfare benefits | \$ 14,202 (4) | - | \$ 14,202 (4) |
| Excise tax reimbursement and related gross up (6) | - | - | - |
| Total | \$ 7,319,772 | \$ 5,505,570 | \$ 7,319,772 |
| Alberto R. Santa Ines | | | |
| Salary and bonus | - | - | \$ 1,016,000 |
| Vesting of restricted stock units (3) | - | \$ 2,446,920 | \$ 2,446,920 |
| Health and welfare benefits | - | - | \$ 10,868 (5) |
| Excise tax reimbursement and related gross up (6) | - | - | \$ 478,344 |
| Total | - | \$ 2,446,920 | \$ 3,952,132 |
| Kenneth P. Aron, Ph.D. | | | |
| Salary and bonus | - | - | \$ 1,036,000 |
| Vesting of restricted stock units (3) | - | \$ 2,446,920 | \$ 2,446,920 |
| Health and welfare benefits | - | - | \$ 37,150 (5) |
| Excise tax reimbursement and related gross up (6) | - | - | \$ 320,696 |
| Total | - | \$ 2,446,920 | \$ 3,840,766 |
| Vladimir E. Ostoich, Ph.D. | | | |
| Salary and bonus | - | - | \$ 1,036,000 |
| Vesting of restricted stock units (3) | - | \$ 2,446,920 | \$ 2,446,920 |
| Health and welfare benefits | - | - | \$ 26,788 (5) |
| Excise tax reimbursement and related gross up (6) | - | - | \$ 285,630 |
| Total | - | \$ 2,446,920 | \$ 3,795,338 |
| Donald P. Wood | | | |
| Salary and bonus | - | - | \$ 1,016,000 |
| Vesting of restricted stock units (3) | - | \$ 2,446,920 | \$ 2,446,920 |
| Health and welfare benefits | - | - | \$ 26,696 (5) |
| Excise tax reimbursement and related gross up (6) | - | - | \$ 531,917 |
| Total | - | \$ 2,446,920 | \$ 4,021,533 |

(1) Amounts relate to payments to Mr. Severson based on the aggregate of two years of salary, bonus, unvested restricted stock units and benefits if his employment with us is terminated for any reason other than cause (as defined in Mr. Severson's amended and restated employment agreement effective October 2010).

(2)

Amounts assume that the Named Executive Officer was terminated without cause or due to constructive termination during the 18-month period following a change in control.

- (3) The value of the restricted stock unit assumes that the market price per share of our common stock on the date of termination of employment was equal to the closing price of our common stock of \$29.13 on March 30, 2012, the last day of trading for our fiscal year ended March 31, 2012, as reported on the NASDAQ Global Select Market.
- (4) Health and welfare benefits include payment of 24 months of premiums for medical, dental, vision, disability, life insurance and long-term care benefits.
- (5) Health and welfare benefits include payment of 24 months of premiums for medical, dental, vision, disability and life insurance benefits.
- (6) For purposes of computing the excise tax reimbursement and related gross up payments, base amount calculations are based on the Named Executive Officer's taxable wages for fiscal years 2008 through 2012.

Table of Contents

DIRECTOR COMPENSATION

Director Compensation Table

The table below summarizes the compensation paid to our non-employee directors for fiscal 2012.

| Name (1) | Fees Earned or Paid in Cash (\$) | Stock Awards (\$) | (2) | Option Awards (\$) | (3) | All Other Compensation (\$) | Total (\$) |
|---------------------------------|---|-------------------------|-----|--------------------------|-----|-----------------------------------|---------------|
| Vernon E. Altman | 25,500 | 71,500 | (4) | - | - | - | 97,000 |
| Richard J. Bastiani, Ph.D. | 28,000 | 71,500 | (4) | - | - | - | 99,500 |
| Michael D. Casey | 28,500 | 71,500 | (4) | - | - | - | 100,000 |
| Henk J. Evenhuis | 30,500 | 71,500 | (4) | - | - | - | 102,000 |
| Prithipal Singh, Ph.D. | 28,500 | 71,500 | (4) | - | - | - | 100,000 |
| Ernest S. Tucker, III, M.D. (5) | 6,250 | 71,500 | | - | - | - | 77,750 |

(1) Clinton H. Severson, our Chief Executive Officer and Director, is not included in this table as he is an employee of Abaxis and receives no compensation for his services as a director. The compensation received by Mr. Severson as an employee is shown in the “Summary Compensation Table” above.

(2) Each non-employee director listed in the table above was granted an award of 2,500 restricted stock units on May 2, 2011 under our 2005 Plan. Amounts listed in this column represent the grant date fair value of the awards in accordance with ASC 718. Amounts shown do not reflect whether the non-employee director has actually realized a financial benefit from the awards (such as by vesting in a restricted stock unit award). For a discussion of the assumptions used in determining the fair value of awards of restricted stock units in the above table, see Note 12 of the Notes to Consolidated Financial Statements in this Annual Report on Form 10-K. No stock awards were forfeited by our non-employee directors during fiscal 2012.

(3) No options were awarded to our non-employee directors in fiscal 2012, 2011 or 2010. As of March 31, 2012, the non-employee directors held the following number of outstanding options: Dr. Bastiani, 12,000; Mr. Evenhuis, 8,000; and Dr. Singh, 4,000. Mr. Altman and Mr. Casey did not hold any outstanding options as of March 31, 2012.

(4) As of March 31, 2012, each of our non-employee directors held 2,500 shares of unvested restricted stock units.

(5) Dr. Tucker did not stand for re-election in October 2011. Upon his retirement as a director, the Board of Directors approved the full acceleration of vesting of Dr. Tucker’s restricted stock units granted in May 2011.

Cash Compensation Paid to Board Members

During fiscal 2012, all non-employee directors received an annual retainer of \$12,000, pro-rated based on the period of services provided by the non-employee director. The non-employee Chairs of our Audit Committee and Compensation Committee received an annual supplement of \$5,000 and \$2,000, respectively. Our non-employee directors each received \$1,250 per board meeting attended and \$1,000 per committee meeting attended. We also reimburse our non-employee directors for reasonable travel expenses incurred in connection with attending board and committee meetings. Directors who are employees receive no compensation for their service as directors.

Equity Compensation Paid to Board Members

Non-employee directors are eligible to receive awards under the 2005 Plan, but such awards are discretionary and not automatic. In fiscal 2012, 2011 and 2010, each non-employee director received an annual equity award of 2,500, 2,200 and 2,200, respectively, restricted stock units granted under the 2005 Plan, for the services provided by the non-employee director during the respective period. Each award of restricted stock units represents the right of the participant to receive, without payment of monetary consideration, on the vesting date, a number of shares of common stock equal to the number of units vesting on such date. Subject to the director's continued service with us through the applicable vesting date, each restricted stock unit award will vest in full 12 months after the grant date. Under the terms of the 2005 Plan, the vesting of each non-employee director restricted stock unit award will also be accelerated in full in the event of a "change in control," as defined in the 2005 Plan.

Table of Contents

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The following table sets forth certain information with respect to the beneficial ownership of our common stock as of May 31, 2012 by (i) each of the Named Executive Officers in the Summary Compensation Table; (ii) each of our directors; (iii) all of our executive officers and directors as a group and (iv) seven holders of at least five percent of our common stock. The persons named in the table have sole or shared voting and investment power with respect to all shares of common stock shown as beneficially owned by them, subject to community property laws where applicable and to the information contained in the footnotes to this table.

| Name and Address of Beneficial Owner | Shares Beneficially Owned | Percent of Abaxis Common Stock Beneficially Owned(1) |
|--|---------------------------------|---|
| Five Percent Holders: | | |
| Brown Capital Management, LLC and The Brown Capital Management Small Company Fund(3) | 3,588,883 | 16.4% |
| Kayne Anderson Rudnick Investment Management, LLC(4) | 1,807,383 | 8.3% |
| Neuberger Berman Group LLC, Neuberger Berman LLC, Neuberger Berman Management LLC and Neuberger Berman Equity Funds(5) | 1,708,856 | 7.8% |
| BlackRock, Inc.(6) | 1,654,540 | 7.6% |

207,292 shares subject to stock options exercisable by all executive officers and directors as a group within sixty days of May 31, 2012.

Table of Contents

Securities Authorized for Issuance Under Equity Compensation Plans

As of March 31, 2012, Abaxis had one equity incentive plan, the 2005 Equity Incentive Plan (the “2005 Plan”), under which our equity securities are authorized for issuance to our employees, directors and consultants. The 2005 Plan amended and restated our 1998 Stock Option Plan. In June 2002, the time period for granting options under our 1992 Outside Directors’ Stock Option Plan (“Directors Plan”) expired in accordance with the terms of the plan. As of March 31, 2012, there were no stock options outstanding under the Directors Plan. Both the 2005 Plan and the Directors Plan were approved by our shareholders.

From time to time we issue warrants to purchase shares of our common stock to non-employees, such as service providers and purchasers of our preferred stock. As of March 31, 2012, there were 30,000 warrants outstanding to purchase shares of common stock.

The following table provides aggregate information as of March 31, 2012 regarding (i) outstanding options, unvested restricted stock units and shares reserved under our equity compensation plans and (ii) outstanding warrants to purchase our common stock.

Equity Compensation Plan Information

| Plan Category | Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights | Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights | Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans(1) |
|---|---|---|---|
| Equity compensation plans approved by our shareholders: | | | |
| 2005 Equity Incentive Plan(2) | 1,402,000 | \$ 15.21 (3) | 300,000 |
| Equity compensation plans not approved by our shareholders: | | | |
| Warrants to purchase common stock(4) | 30,000 | \$ 3.00 | - |
| Total: | 1,432,000 | \$ 14.04 (3) | 300,000 |

(1)The shares are available for award grant purposes under the 2005 Plan and exclude shares listed under the column “Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights.”

(2)The 2005 Plan amended and restated the 1998 Stock Option Plan in October 2005. To date, share-based awards granted under the 2005 Plan includes stock options and restricted stock units.

(3) Excludes outstanding and unvested restricted stock unit awards, for which there is no exercise price.

(4)Consists of warrants issued to National Institute for Strategic Technology Acquisition and Commercialization to purchase 30,000 shares of Abaxis common stock. The exercise price of the warrants issued were \$3.00 per share and vests at a rate of 20% annually from its issuance date and has a term of five years, expiring in fiscal years 2016 through 2017.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Certain Relationships and Related Transactions

During the fiscal year ended March 31, 2012, there was not, nor is there any currently proposed transaction or series of similar transactions to which Abaxis was or is to be a party in which the amount involved exceeds \$120,000 and in which any executive officer, director or holder of more than 5% of any class of voting securities of Abaxis and members of that person's immediate family had or will have a direct or indirect material interest, other than as set forth in the "Summary Compensation Table" above.

Indemnification Agreements

We generally enter into indemnity agreements with our directors and certain of our executive officers. These indemnity agreements require us to indemnify these individuals to the fullest extent permitted by law.

Related-Person Transactions Policy and Procedures

Pursuant to the requirements set forth in the charter of our Audit Committee, our Audit Committee is responsible for reviewing and approving any related-party transactions, after reviewing each such transaction for potential conflicts of interests and other improprieties. We do not have any additional written procedures governing the process for addressing related-person transactions. However, in approving or rejecting proposed transactions, our audit committee generally considers the relevant facts and circumstances available and deemed relevant, including, but not limited to the risks, costs and benefits to us, the terms of the transaction, the availability of other sources for comparable services or products, and, if applicable, the impact on a director's independence.

Table of Contents

As required under the NASDAQ listing standards, a majority of the members of a listed company's Board of Directors must qualify as "independent," as affirmatively determined by the Board of Directors. The Board consults with our counsel to ensure that the Board's determinations are consistent with relevant securities and other laws and regulations regarding the definition of "independent," including those set forth in the NASDAQ listing standards, as in effect time to time. Consistent with these considerations, after review of all relevant transactions or relationships between each director, or any of his or her family members, and Abaxis, its senior management, and its independent registered public accounting firm, the Board has affirmatively determined that the following five directors are independent directors within the meaning of the applicable NASDAQ listing standards: Mr. Altman, Mr. Casey, Mr. Evenhuis and Drs. Bastiani and Singh. In making this determination, the Board found that none of the directors had a material or other disqualifying relationship with Abaxis. Mr. Severson, our Chairman, President and Chief Executive Officer, is not an independent director by virtue of his employment with Abaxis.

Item 14. Principal Accounting Fees and Services

For the fiscal years ended March 31, 2012 and 2011, our independent registered public accounting firm, Burr Pilger Mayer, Inc. billed the approximate fees set forth below. All fees included below were approved by the Audit Committee.

| | Year Ended March 31, | |
|-----------------------|----------------------|-----------|
| | 2012 | 2011 |
| Audit Fees(1) | \$650,000 | \$640,000 |
| Audit-Related Fees(2) | 30,000 | 30,000 |
| Tax Fees | - | - |
| All Other Fees | - | - |
| Total All Fees | \$680,000 | \$670,000 |

(1) Audit fees represent fees for professional services provided in connection with the audit of our financial statements and review of our quarterly financial statements, including attestation services related to Section 404 of the Sarbanes-Oxley Act of 2002.

(2) Audit-related fees represent fees for assurance and related services that are reasonably related to the performance of the audit or review of our financial statements and are not reported under "Audit Fees." In fiscal 2012 and 2011, these services include attestation services related to Abaxis' tax deferral savings plan.

Pre-Approval Policies and Procedures

The Audit Committee has adopted a policy for the pre-approval of all audit and non-audit services to be performed for Abaxis by the independent registered public accounting firm. The Audit Committee has considered the role of Burr Pilger Mayer, Inc. in providing audit and audit-related services to Abaxis and has concluded that such services are compatible with Burr Pilger Mayer, Inc.'s role as Abaxis' independent registered public accounting firm.
