BANK OF SOUTH CAROLINA CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
SEPTEMBER 30, 2010

NOTE 1: Basis of Presentation

The Bank of South Carolina (the "Bank") began operations on February 26, 1987 as a state chartered bank and later became a subsidiary of Bank of South Carolina Corporation (the "Company"), a South Carolina corporation, in a reorganization effective on April 17, 1995. The Bank currently has four locations: two in Charleston, South Carolina, one in Summerville, South Carolina and one in Mt. Pleasant, South Carolina. The consolidated financial statements in this report are unaudited, except for the December 31, 2009 consolidated balance sheet. All adjustments consisting of normal recurring accruals which are, in the opinion of management, necessary for fair presentation of the interim consolidated financial statements have been included and fairly and accurately present the financial position, results of operations and cash flows of the Company. The results of operations for the three and nine months ended September 30, 2010, are not necessarily indicative of the results which may be expected for the entire year.

The preparation of the consolidated financial statements are in conformity with accounting principles generally accepted in the United States of America (GAAP) which requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. In addition, they affect the reported amounts of income and expense during the reporting period. Actual results could differ from these estimates and assumptions.

In preparing these financial statements, the Company has evaluated events and transactions for potential recognition or disclosure through the date the financial statements were available to be issued.

NOTE 2: Investment Securities

The Company classifies investments into three categories as follows: (1) Held to Maturity - debt securities that the Company has the positive intent and ability to hold to maturity, which are reported at amortized cost, adjusted for the amortization of any related premiums or the accretion of any related discounts into interest income using a methodology which approximates a level yield of interest over the estimated remaining period until maturity; (2) Trading - debt and equity securities that are bought and held principally for the purpose of selling them in the near term, which are reported at fair value, with unrealized gains and losses included in earnings; and (3) Available for Sale - debt and equity securities that may be sold under certain conditions, which are reported at fair value, with unrealized gains and losses excluded from earnings and reported as a separate component of shareholders' equity, net of income taxes. Unrealized losses on securities due to fluctuations in fair value are recognized when it is determined that an other than temporary decline in value has occurred. Realized gains or losses on the sale of investments are recognized on a specific identification, trade date basis. All securities were classified as available for sale for the three and nine months ended September 30, 2010 and 2009. The Company does not have any mortgage-backed securities nor has it ever invested in mortgage-backed securities.

NOTE 3: Stock Based Compensation

The shareholders of the Company voted at the Company's Annual Meeting, April 13, 2010, to approve the 2010 Omnibus Stock Incentive Plan, including 330,000 shares (adjusted for a 10% stock dividend declared on August 26, 2010) reserved under the plan (copy of the plan was filed with 2010 Proxy Statement). This plan is intended to assist the Company in recruiting and retaining employees with ability and initiative by enabling employees to participate in its future success and to associate their interest with those of the Company and its shareholders. Under the Omnibus Stock Incentive Plan, options are periodically granted to employees at a price not less than 100% of the fair market value of the shares at the date of the grant. All employees are eligible to participate in this plan if the Executive Committee, in its sole discretion, determines that such person has contributed or can be expected to contribute to the profits or growth of the Company or its subsidiary. Options may be exercised in whole at any time or in part from

time to time at such times and in compliance with such requirements as the Executive Committee shall determine. The maximum period in which an Option may be exercised is determined at the date of grant and shall not exceed 10 years from the date of grant.

The options are not transferable except by will or by the laws of descent and distribution. On September 24, 2010, the Executive Committee granted options to purchase 33,000 shares of stock to 21 employees. Fair value was estimated at the date of grant using the Black-Scholes option pricing model with the following assumptions used for the grant: dividend yield 2.72%, historical volatility 72.30%, risk free interest rate of 2.62%, and an expected life of 10 years.

On April 14, 1998 the Company adopted the 1998 Omnibus Stock Incentive Plan which expired on April 14, 2008. No options may be granted under this Plan after April 14, 2008. Options granted before that date shall remain valid in accordance with their terms.

The following is a summary of the activity under the 1998 Omnibus Stock Incentive Plan for the three and nine months ending September 30, 2010 and September 30, 2009.

Three Months Ended September 30, 2010	Options	Weighted Average Exercise Price
Balance at July 1, 2010	68,965	\$ 11.26
Exercised	(7,960)	8.11
Balance at September 30, 2010	61,005	\$ 11.67

Nine Months Ended September 30, 2010	Options	Weighted Average Exercise Price
Balance at January 1, 2010	86,995	\$ 10.61
Exercised	(25,325)	8.11
Exercised	(665)	8.54
Balance at September 30, 2010	61,005	\$ 11.67
Options exercisable at September 30, 2010	16,062	\$ 8.11
	5,776	\$ 8.54

Three Months Ended September 30, 2009	Options	Weighted Average Exercise Price
Balance at July 1, 2009	87,696	\$ 10.59
Exercised	(701)	8.11
Balance at September 30, 2009	86,995	\$ 10.61

Nine Months Ended September 30, 2009	Options	Weighted Average Exercise Price
Balance at January 1, 2009	115,937	\$ 9.99
Exercised	(27,490)	8.11
Exercised	(1,452)	8.54
Balance at September 30, 2009	86,995	\$ 10.61
Options exercisable at September 30, 2009	9,576	\$ 8.11
	3,614	\$ 8.54

All share and per share data have been restated to reflect a 10% stock dividend declared on August 26, 2010.

NOTE 4: Shareholders' Equity

A regular quarterly cash dividend of \$.10 per share was declared on March 25, 2010 for shareholders of record at April 9, 2010, payable April 30, 2010. On June 24, 2010 a cash dividend of \$.10 per share was declared for shareholders of record July 9, 2010, payable on July 30, 2010. On August 26, 2010 the Company declared a 10% stock dividend to shareholders of record September 10, 2010, payable September 24, 2010. Income per common share for the three and nine months ended September 30, 2010 and for the three and nine months ended September 30, 2009 was calculated as follows:

FOR THE THREE MONTHS ENDED SEPTEMBER 30, 2010			
	INCOME (NUMERATOR)	SHARES (DENOMINATOR)	PER SHARE AMOUNT
Net income	\$ 821,601		
Basic income available to common shareholders	\$ 821,601	4,424,936	\$.19
Effect of dilutive options		-	
Diluted income available to common shareholders	\$ 821,601	4,424,936	\$.19

Effect of dilutive options		1,001	
Diluted income available to common shareholders	\$ 1,598,884	4,387,669	\$.36

All share and per share data have been restated to reflect a 10% stock dividend declared on August 26, 2010.

The future payment of cash dividends is subject to the discretion of the Board of Directors and depends upon a number of factors, including future earnings, financial condition, cash requirements, and general business conditions. Cash dividends when declared, are paid by the Bank to the Company for distribution to shareholders of the Company. Certain regulatory requirements restrict the amount of dividends which the Bank can pay to the Company.

NOTE 5: Comprehensive Income

The Company applies accounting standards which establish guidance for the reporting and display of comprehensive income and its components in a full set of general purpose financial statements. Comprehensive income consists of net income and net unrealized gains or losses on securities and is presented in the consolidated statements of shareholders' equity and comprehensive income.

Comprehensive income totaled \$2,601,360 at September 30, 2010 and \$1,744,759 at September 30, 2009. For the three months ended September 30, 2010 and September 30, 2009, comprehensive income totaled \$1,377,417 and \$550,267, respectively.

NOTE 6: Fair Value Measurements

Effective January 1, 2009, the Company adopted accounting standards which provide a framework for measuring and disclosing fair value under generally accepted accounting principles. The guidance requires disclosures about the fair value of assets and liabilities recognized in the balance sheet in periods subsequent to initial recognition, whether the measurements are made on a recurring basis (for example, available-for-sale investment securities) or on a nonrecurring basis (for example, impaired loans).

The standard defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The standard also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

- Level 1 Valuation is based upon quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access. Level 1 assets and liabilities include debt and equity securities and derivative contracts that are traded in an active exchange market, as well as US Treasuries and money market funds.
- Level 2 Valuation is based upon quoted prices for similar assets and liabilities in active markets, as well as inputs that are observable for the asset or liability (other than quoted prices), such as interest rates, foreign exchange rates, and yield curves that are observable at commonly quoted intervals. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments, mortgage-backed securities, municipal bonds, corporate debt securities and derivative contracts whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes certain derivative contracts and impaired loans.
- Level 3 Valuation is generated from model-based techniques that use at least one significant assumption based on unobservable inputs for the asset or liability, which are typically based on an entity's own assumptions, as there is little, if any, related market activity. In instances where the determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair value measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

The following is a description of the valuation methodologies used for assets and liabilities recorded at fair value.

Investment Securities Available for Sale

Investment securities available for sale are recorded at fair value on a recurring basis. At September 30, 2010 and September 30, 2009, the Company's investment portfolio was comprised of a US Treasury Note, Government Sponsored Enterprises and Municipal Securities. The portfolio did not contain any mortgage-backed securities. Fair value measurement is based upon prices obtained from third party pricing services that use independent pricing models which rely on a variety of factors including reported trades, broker/dealer quotes, benchmark yields, economic and industry events and other relevant market information. As such, these securities are classified as Level 2.

Mortgage Loans Held for Sale

The Company originates fixed and variable rate residential loans on a servicing released basis in the secondary market. Loans closed but not yet settled with other investors, are carried in the Company's loans held for sale portfolio. These loans are fixed rate residential loans that have been originated in the Company's name and have closed. Virtually all of these loans have commitments to be purchased by investors and the majority of these loans were locked in by price with the investors on the same day or shortly thereafter that the loan was locked in with the Company's customers. Therefore, these loans present very little market risk for the Company. The Company usually delivers to, and receives funding from, the investor within 30 days. Commitments to sell these loans to the investor are considered derivative contracts and are sold to investors on a "best efforts" basis. The Company is not obligated to deliver a loan or pay a penalty if a loan is not delivered to the investor. As a result of the short-term nature of these derivative contracts, the fair value of the mortgage loans held for sale in most cases is the same as the value of the loan amount at its origination. These loans are classified as Level 2.

Assets and liabilities measured at fair value on a recurring basis at September 30, 2010 and December 31, 2009 are as follows:

	Quoted Market Price in active markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance at September 30, 2010
US Treasury Note	\$ 3,037,500	\$ -	\$ -	\$ 3,037,500
Government Sponsored Enterprises	\$ -	\$ 9,199,929	\$ -	\$ 9,199,929
Municipal Securities	\$ -	\$ 24,501,260	\$ -	\$ 24,501,260
Mortgage loans held for sale	\$ -	\$ 6,676,235	\$ -	\$ 6,676,235
Total	\$ 3,037,500	\$ 40,377,424	\$ -	\$ 43,414,924

	Quoted Market Price in active markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance at December 31, 2009
US Treasury Note	\$ 3,118,594	\$ -	\$ -	\$ 3,118,594
Government Sponsored Enterprises	\$ -	\$ 12,541,819	\$ -	\$ 12,541,819
Municipal Securities	\$ -	\$ 21,201,932	\$ -	\$ 21,201,932
Mortgage loans held for sale	-	3,433,460	-	\$ 3,433,460
Total	\$ 3,118,594	\$ 37,177,211	\$ -	\$ 40,295,805

Other Real Estate Owned (OREO)

Loans, secured by real estate, are adjusted to fair value upon transfer to other real estate owned (OREO). Subsequently, OREO is carried at the lower of carrying value or fair value. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price or a current appraisal, the Company records the OREO as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the asset as nonrecurring Level 3.

Impaired Loans

The Company does not record loans at fair value on a recurring basis. However, from time to time, a loan is considered impaired and an allowance for loan losses is established. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures impairment in accordance with ASC 310-10, "Accounting by Creditors for Impairment of a Loan".

In accordance with this standard, the fair value is estimated using one of the following methods: fair value of the collateral less estimated costs to sell, discounted cash flows, or market value of the loan based on similar debt. The fair value of the collateral less estimated costs to sell is the most frequently used method. Typically, the Company reviews the most recent appraisal and if it is over 12 months old will request a new third party appraisal. Depending on the particular circumstances surrounding the loan, including the location of the collateral, the date of the most recent appraisal and the value of the collateral relative to the recorded investment in the loan, management may order an independent appraisal immediately or, in some instances, may elect to perform an internal analysis. Specifically as an example, in situations where the collateral on a nonperforming commercial real estate loan is out of the Company's primary market area, management would typically order an independent appraisal immediately, at the earlier of the date the loan becomes nonperforming or immediately following the determination that the loan is impaired. However, as a second example, on a nonperforming commercial real estate loan where management is familiar with the property and surrounding areas and where the original appraisal value far exceeds the recorded investment in the loan, management may perform an internal analysis whereby the previous appraisal value would be reviewed and adjusted for recent conditions including recent sales of similar properties in the area and any other relevant economic trends. These valuations are reviewed at a minimum on a quarterly basis.

Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. At September 30, 2010 and September 30, 2009, substantially all of the total impaired loans were evaluated based on the fair value of the collateral. In accordance with ASC 820, impaired loans where an allowance is established based on the fair value of collateral require classification in the fair value hierarchy. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the impaired loan as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the impaired loan as nonrecurring Level 3.

Certain assets and liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an on going basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). The following table presents the assets and liabilities carried on the balance sheet by caption and by level within the valuation hierarchy (as described above) as of September 30, 2010 for which a nonrecurring change in fair value has been recorded during the nine months ended September 30, 2010.

Assets and liabilities measured at fair value on a nonrecurring basis are as follows as of September 30, 2010 and December 31, 2009.

	Quoted Market Price in active markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance at September 30, 2010
Impaired loans	\$ -	\$ 3,306,181	\$ -	\$ 3,306,181
Other real estate owned	\$ -	\$ 659,430	\$ -	\$ 659,430
Total	\$ -	\$ 3,965,611	\$ -	\$ 3,965,611

	Quoted Market Price in active markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance at December 31, 2009
Impaired loans	\$ -	\$ 2,502,002	\$ -	\$ 2,502,002
Total	\$ -	\$ 2,502,002	\$ -	\$ 2,502,002

The Company has no assets or liabilities whose fair values are measured using level 3 inputs.

Accounting standards require disclosure of fair value information about financial instruments whether or not recognized on the balance sheet, for which it is practicable to estimate fair value. Fair value estimates are made as of a specific point in time based on the characteristics of the financial instruments and the relevant market information. Where available, quoted market prices are used. In other cases, fair values are based on estimates using present value or other valuation techniques. These techniques involve uncertainties and are significantly affected by the assumptions used and the judgments made regarding risk characteristics of various financial instruments, discount rates, prepayments, estimates of future cash flows, future expected loss experience and other factors. Changes in assumptions could significantly affect these estimates. Derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, may or may not be realized in an immediate sale of the instrument.

Under the accounting standard, fair value estimates are based on existing financial instruments without attempting to estimate the value of anticipated future business and the value of the assets and liabilities that are not financial instruments. Accordingly, the aggregate fair value amounts of existing financing instruments do not represent the underlying value of those instruments on the books of the Company.

The following describes the methods and assumptions used by the Company in estimating the fair values of financial instruments:

a. Cash and due from banks, interest bearing deposits in other banks and federal funds sold

The carrying value approximates fair value. All mature within 90 days and do not present unanticipated credit concerns.

b. Investment securities available for sale

The fair value of investment securities is derived from quoted market prices.

c. Loans

The carrying values of variable rate consumer and commercial loans and consumer and commercial loans with remaining maturities of three months or less, approximate fair value. The fair values of fixed rate consumer and commercial loans with maturities greater than three months are determined using a discounted cash flow analysis and assume the rate being offered on these types of loans by the Company at September 30, 2010 and December 31, 2009, approximate market.

The carrying value of mortgage loans held for sale approximates fair value.

For lines of credit, the carrying value approximates fair value.

d. Other real estate owned

Other real estate owned is carried at the lower of carrying value or fair value on a non-recurring basis, based upon independent appraisals or management's estimation of the fair value of the collateral.

e. Deposits

The estimated fair value of deposits with no stated maturity is equal to the carrying amount. The fair value of time deposits is estimated by discounting contractual cash flows, by applying interest rates currently being offered on the deposit products. The fair value estimates for deposits do not include the benefit that results from the low cost funding provided by the deposit liabilities as compared to the cost of alternative forms of funding (deposit base intangibles).

f. Short-term borrowings

The carrying amount approximates fair value due to the short-term nature of these instruments.

The estimated fair values of the Company's financial instruments at September 30, 2010 and December 31, 2009 are as follows:

	September 30, 2010	
	Carrying Amount	Estimated Fair Value
Cash and due from banks	\$ 5,930,713	\$ 5,930,713
Interest bearing deposits in other banks	8,299	8,299
Federal funds sold	20,265	20,265
Investment securities available for sale	36,738,689	36,738,689
Loans (1)	215,888,241	220,576,578
Other real estate owned	659,430	659,430
Deposits	230,377,252	230,659,046
Short-term borrowings	761,056	761,056

	December 31, 2009	
	Carrying Amount	Estimated Fair Value
Cash and due from banks	\$ 5,794,540	\$ 5,794,540
Interest bearing deposits in other banks	8,269	8,269
Federal funds sold	3,779,693	3,779,693
Investments available for sale	36,862,345	36,862,345
Loans (1)	217,315,936	222,968,621
Other real estate owned	-	-
Deposits	229,837,680	230,081,062
Short-term borrowings	8,006,753	8,006,753

(1) Includes mortgage loans to be sold

NOTE 7: Recently Issued Accounting Pronouncements

The following is a summary of recent authoritative pronouncements that could impact the accounting, reporting and/or disclosure of financial information by the Company.

Income Tax guidance was amended by FASB in April 2010 to reflect an SEC Staff Announcement after the President signed the Health Care and Education Reconciliation Act of 2010 on March 30, 2010, which amended the Patient Protection and Affordable Care Act signed on March 23, 2010. According to the announcement, although the bills were signed on separate dates, regulatory bodies would not object if the two Acts were considered together for accounting purposes. This view is based on the SEC staff's understanding that the two Acts together represent the current health care reforms as passed by Congress and signed by the President. The amendment had no impact on the Company's financial statements.

In July 2010, the Receivables topic of the ASC was amended to require disclosures related to a company's allowance for credit losses and the credit quality of its financing receivables. The amendments will require the allowance disclosure to be provided on a disaggregated basis. The Company is required to begin to comply with the disclosures in its financial statements for the year ended December 31, 2010.

On July 21, 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), which significantly changes the regulation of financial institutions and the financial services industry. The Dodd-Frank Act includes several provisions that will affect how community banks, thrifts, and small bank and thrift holding companies will be regulated in the future. Among other things, these provisions abolish the Office of Thrift Supervision and transfer its functions to the other federal banking agencies, relax rules regarding interstate branching, allow financial institutions to pay interest on business checking accounts, change the scope of federal deposit insurance coverage, and impose new capital requirements on bank and thrift holding companies. The Dodd-Frank Act also establishes the Bureau of Consumer Financial Protection as an independent entity within the Federal Reserve, which will be given the authority to promulgate consumer protection regulations applicable to all entities offering consumer financial services or products, including banks. Additionally, the Dodd-Frank Act includes a series of provisions covering mortgage loan origination standards affecting originator compensations, minimum repayment standards, and pre-payments. Management is actively reviewing the provisions of the Dodd-Frank Act and assessing its probable impact on our business, financial condition, and results of operations.

In August 2010, two updates were issued to amend various SEC rules and schedules pursuant to Release No. 33-9026: Technical Amendments to Rules, Forms, Schedules and Codification of Financial Reporting Policies and based on the issuance of SEC Staff Accounting Bulletin 112. The amendments related primarily to business combinations and removed references to “minority interest” and added references to “controlling” and “noncontrolling interest(s)”. The updates were effective upon issuance but had no impact on the Company’s financial statements.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies are not expected to have a material impact on the Company’s financial position, results of operations or cash flows.

NOTE 8: Subsequent Events

Subsequent events are events or transactions that occur after the balance sheet date but before financial statements are issued. Recognized subsequent events are events or transactions that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing financial statements. Non-recognized subsequent events are events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after that date. Management has reviewed events occurring through the date the financial statements were issued and no subsequent events have occurred requiring accrual or disclosure.

ITEM 2 MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

Management’s discussion and analysis is included to assist shareholders in understanding the Company’s financial condition, results of operations, and cash flow. This discussion should be reviewed in conjunction with the consolidated financial statements (unaudited) and notes included in this report and the supplemental financial data appearing throughout this report. Since the primary asset of the Company is its wholly-owned subsidiary, most of the discussion and analysis relates to the Bank.

Management’s Discussion and Analysis of Financial Condition and Results of Operations and other portions of this quarterly report contain certain “forward-looking statements” concerning the future operations of the Bank of South Carolina Corporation. Management desires to take advantage of the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1996 and is including this statement for the express purpose of availing the Company of protections of such safe harbor with respect to all “forward-looking statements” contained in this Form 10-Q. The Company has used “forward-looking statements” to describe future plans and strategies including its expectations of the Company’s future financial results. The following are cautionary statements. Management’s ability to predict results or the effect of future plans or strategies is inherently uncertain. A variety of factors may affect the operations, performance, business strategy and results of the Company including, but not limited to the following:

- Risk from changes in economic, monetary policy, and industry conditions,
- Changes in interest rates, shape of the yield curve, deposit rates, the net interest margin and funding sources,
- Market risk (including net income at risk analysis and economic value of equity risk analysis) and inflation,
 - Risk inherent in making loans including repayment risks and changes in the value of collateral,
- Loan growth, the adequacy of the allowance for loan losses, provisions for loan losses, and the assessment of problem loans,
 - Level, composition, and re-pricing characteristics of the securities portfolio,
 - Deposit growth, change in the mix or type of deposit products and services,
 - Continued availability of senior management,
 - Technological changes,
 - Ability to control expenses,

- Changes in compensation,
- Risks associated with income taxes including potential for adverse adjustments,
- Changes in accounting policies and practices,
- Changes in regulatory actions, including the potential for adverse adjustments,
- Recently enacted or proposed legislation,
- Current disarray in the financial service industry,
- Risk of deflation.

Such forward looking statements speak only as of the date on which such statements are made and shall be deemed to be updated by any future filings made by the Company with the SEC. The Company will undertake no obligation to update any forward looking statement to reflect events or circumstances after the date on which such statement is made to reflect the occurrence of unanticipated events. In addition, certain statements in future filings by the Company with the SEC, in press releases, and in oral and written statements made by or with the approval of the Company, which are not statements of historical fact, constitute forward looking statements.

Overview

Bank of South Carolina Corporation (the Company) is a financial institution holding company headquartered in Charleston, South Carolina, with \$261.3 million in assets as of September 30, 2010 and net income of \$821,601 and \$2,277,310 for the three and nine months ended September 30, 2010. The Company offers a broad range of financial services through its wholly-owned subsidiary, The Bank of South Carolina (the Bank). The Bank is a state-chartered commercial bank which operates principally in the Charleston, Dorchester and Berkeley counties of South Carolina. The Bank's original and current concept is to be a full service financial institution specializing in personal service, responsiveness, and attention to detail to foster long standing relationships.

The following is a discussion of the Company's financial condition as of September 30, 2010 as compared to December 31, 2009 and the results of operations for the three and nine months ended September 30, 2010 as compared to the three and nine months ended September 30, 2009. The discussion and analysis identifies significant factors that have affected the Company's financial position and operating results and should be read in conjunction with the financial statements and the related notes included in this report.

The Company derives most of its income from interest on loans and investments (interest bearing assets). The primary source of funding for making these loans and investments is the Company's deposits, on which the Company pays interest. Consequently, one of the key measures of the Company's success is the amount of net interest income, or the difference between the income on its interest earning assets, such as loans and investments, and the expense on its interest bearing liabilities, such as deposits. Another key measure is the spread between the yield the Company earns on these interest bearing assets and the rate the Company pays on its interest-bearing liabilities.

There are risks inherent in all loans; therefore, the Company maintains an allowance for loan losses to absorb estimated losses on existing loans that may become uncollectible. The Company established and maintains this allowance by charging a provision for loan losses against its operating earnings. In the following section the Company has included a discussion of this process, as well as several tables describing its allowance for loan losses and the allocation of this allowance among its various categories of loans.

The Company's results of operations depend not only on the level of its net interest income from loans and investments, but also on its non-interest income and its operating expenses. Net interest income depends upon the volumes, rates and mix associated with interest earning assets and interest bearing liabilities which result in the net interest spread. The Company's net interest spread for the three and nine months ended September 30, 2010 was 4.17% and 4.15%, respectively, compared to 3.90% and 3.95% for the three and nine months ended September 30, 2009.

Non-interest income includes fees and other expenses charged to customers. A more detailed discussion of interest income, non-interest income and operating expenses follows.

For nine months ended September 30, 2010, the Bank has paid \$1,275,000 to the Company for dividend payments.

CRITICAL ACCOUNTING POLICIES

The Company has adopted various accounting policies that govern the application principles generally accepted in the United States and with general practices within the banking industry in the preparation of its financial statements. The Company's significant accounting policies are described in the footnotes to its unaudited consolidated financial statements as of September 30, 2010 and its notes included in the consolidated financial statements in its 2009 Annual Report on Form 10-K as filed with the SEC.

Certain accounting policies involve significant judgments and assumptions by the Company that have a material impact on the carrying value of certain assets and liabilities. The Company considers these accounting policies to be critical accounting policies. The judgment and assumptions the Company uses are based on historical experience and other factors, which the Company believes to be reasonable under the circumstances. Because of the number of the judgments and assumptions the Company makes, actual results could differ from these judgments and estimates that could have a material impact on the carrying values of its assets and liabilities and its results of operations.

The Company considers its policies regarding the allowance for loan losses to be its most subjective accounting policy due to the significant degree of management judgment. The Company has developed what it believes to be appropriate policies and procedures for assessing the adequacy of the allowance for loan losses, recognizing that this process requires a number of assumptions and estimates with respect to its loan portfolio. The Company's assessments may be impacted in future periods by changes in economic conditions, the impact of regulatory examinations and the discovery of information with respect to borrowers which were not known by management at the time of the issuance of the consolidated financial statements. For additional discussion concerning the Company's allowance for loan losses and related matters, see "Allowance for Loan Losses."

BALANCE SHEET

LOANS

The Company focuses its lending activities on small and middle market businesses, professionals and individuals in its geographic markets. At September 30, 2010 outstanding loans (less deferred loan fees of \$5,123) totaled \$209,212,006 which equaled 90.81% of total deposits and 80.08% of total assets. The major components of the loan portfolio were commercial loans and commercial real estate loans totaling 23.25% and 52.42%, respectively of total loans. Substantially all loans were to borrowers located in the Company's market areas in the counties of Charleston, Dorchester and Berkeley in South Carolina. The breakdown of total loans by type and the respective percentage of total loans are as follows:

	September 30,		December 31,	
	2010	2009	2009	
Commercial loans	\$ 48,644,578	\$ 45,025,696	\$ 46,086,649	
Commercial real estate	109,665,410	114,190,915	117,044,598	
Residential mortgage	17,290,712	21,383,693	18,682,428	
Consumer loans	5,333,294	5,699,769	5,534,351	
Personal banklines	28,007,273	24,519,797	26,269,420	
Other	265,616	186,139	277,899	
Total	209,206,883	211,006,009	213,895,345	
Deferred loan fees (net)	5,123	(27,046)	(12,869)	
Allowance for loan losses	(2,683,980)	(2,013,259)	(3,026,997)	

Loans, net	\$	206,528,026	\$	208,965,704	\$	210,855,479
------------	----	-------------	----	-------------	----	-------------

Percentage of Loans	September 30, 2010	September 30, 2009	December 31, 2009
Commercial loans	23.25%	21.34%	21.55%
Commercial real estate	52.42%	54.12%	54.72%
Residential mortgage	8.26%	10.13%	8.73%
Consumer loans	2.55%	2.70%	2.59%
Personal banklines	13.39%	11.62%	12.28%
Other	.13%	.09%	0.13%
Total	100.00%	100.00%	100.00%

Total loans, not including deferred loan fees, decreased \$1,799,126 or .85% to \$209,206,883 at September 30, 2010 from \$211,006,000 at September 30, 2009 and decreased \$4,688,462 or 2.19% from \$213,895,345 at December 31, 2009. The decrease from September 30, 2009 to September 30, 2010 and from December 31, 2009 to September 30, 2010 can be attributed to loan payoffs and a decrease in new loans.

The Company saw a decrease in both commercial real estate and residential mortgage loans from September 30, 2009 to September 30, 2010 and from December 31, 2009 to September 30, 2010. Commercial real estate loans decreased \$4,525,505 or 3.96% and residential mortgage loans decreased \$4,092,981 or 19.14% from September 30, 2009 to September 30, 2010. However, the company experienced an increase in commercial loans of \$3,618,882 or 8.04% and personal banklines of \$3,487,476 or 14.22% from September 30, 2009 to September 30, 2010. The decrease in commercial real estate and residential mortgage loans continued between December 31, 2009 and September 30, 2010, with commercial real estate loans decreasing \$7,379,188 or 6.30% and residential mortgage loans decreasing \$1,391,716 or 7.45%. Commercial loans and personal banklines increased \$2,557,929 or 5.55% and \$1,737,853 or 6.62% between December 31, 2009 and September 30, 2010. The Company has experienced a decrease in new loans as the weakened economy continues to have an impact on the commercial real estate market, the housing market and businesses in general.

During the nine months ended September 30, 2010 the Company transferred \$741,470 from loans to other real estate owned. The first loan consisted of a residential lot that was sold for the estimated fair value, of \$65,000. Another loan transferred was a second mortgage loan in a situation in which the Company purchased the first mortgage in the amount of \$101,300 and received \$118,340 from the sale of other real estate owned resulting in a recorded loss of \$13,347. At September 30, 2010, the Company held two pieces of real estate (in other real estate owned), a dock slip with a fair value of \$52,290 and a single family residence with a fair market value of \$607,140.

INVESTMENT SECURITIES AVAILABLE FOR SALE

The Company uses the investment securities portfolio for several purposes. It serves as a vehicle to manage interest rate and prepayment risk, to generate interest and dividend income from investment of funds, to provide liquidity to meet funding requirements, and to provide collateral for pledges on public funds. Investments are classified into three categories (1) Held to Maturity (2) Trading and (3) Available for Sale. Management believes that maintaining its securities in the Available for Sale category provides greater flexibility in the management of the overall investment portfolio. The average yield on investments at September 30, 2010 was 4.05% compared to 4.14% at September 30, 2009. The carrying values of the investments available for sale at September 30, 2010 and 2009 and percentage of each category to total investments are as follows:

INVESTMENT PORTFOLIO

	September 30, 2010	September 30, 2009
US Treasury Note	\$ 2,994,342	\$ 2,976,860
Government-Sponsored Enterprises	9,018,723	12,028,603
Municipal Securities	22,972,743	20,858,408
	\$ 34,985,808	\$ 35,863,871
US Treasury Note	8.56%	8.30%
Government-Sponsored Enterprises	25.78%	33.54%
Municipal Securities	65.66%	58.16%
	100.00%	100.00%

All investment securities were classified as Available for Sale (debt and equity securities that may be sold under certain conditions), at September 30, 2010 and September 30, 2009. The securities were reported at fair value, with unrealized gains and losses excluded from earnings and reported as a separate component of shareholders' equity, net of income taxes. Unrealized losses on securities due to fluctuations in fair value are recognized when it is determined that an other than temporary decline in value has occurred. Gains or losses on the sale of securities are recognized on a specific identification, trade date basis.

The amortized cost and fair value of investment securities available for sale are summarized as follows as of September 30, 2010 and December 31, 2009:

	AMORTIZED COST	September 30, 2010 GROSS UNREALIZED GAINS	GROSS UNREALIZED LOSSES	ESTIMATED FAIR VALUE
U.S. Treasury Note	\$ 2,994,342	\$ 43,158	\$ -	\$ 3,037,500
Government-Sponsored Enterprises	9,018,723	181,206	-	9,199,929
Municipal Securities	22,972,743	1,528,517	-	24,501,260
Total	\$ 34,985,808	\$ 1,752,881	\$ -	\$ 36,738,689

	AMORTIZED COST	December 31, 2009 GROSS UNREALIZED GAINS	GROSS UNREALIZED LOSSES	ESTIMATED FAIR VALUE
U.S. Treasury Note	\$ 2,981,338	\$ 137,256	\$ -	\$ 3,118,594
Government-Sponsored Enterprises	12,026,844	514,975	-	12,541,819
Municipal Securities	20,615,647	675,572	89,287	21,201,932
Total	\$ 35,623,829	\$ 1,327,803	\$ 89,287	\$ 36,862,345

The amortized cost and estimated fair value of investment securities available for sale at September 30, 2010 and December 31, 2009 by contractual maturity are as follows:

		September 30, 2010	
		AMORTIZED COST	ESTIMATED FAIR VALUE
Due in one year or less	\$	12,620,571	\$ 12,852,850
Due in one year to five years		3,414,067	3,667,252
Due in five years to ten years		8,839,471	9,532,332
Due in ten years and over		10,111,699	10,686,255
Total	\$	34,985,808	\$ 36,738,689

		December 31, 2009	
		AMORTIZED COST	ESTIMATED FAIR VALUE
Due in one year or less	\$	6,404,011	\$ 6,620,355
Due in one year to five years		11,597,355	12,163,540
Due in five years to ten years		8,936,431	9,277,423
Due in ten years and over		8,685,832	8,801,027
Total	\$	35,623,629	\$ 36,862,345

There were no unrealized losses at September 30, 2010. Unrealized losses at December 31, 2009 are as follows:

Description of Securities	December 31, 2009				Total	
	Less than 12 months Fair Value	Unrealized Losses	12 months or longer Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
U.S. Treasury Notes	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -
Government-Sponsored Enterprises	-	-	-	-	-	-
Municipal Securities	2,330,893	89,287	-	-	2,330,893	89,287
	\$ 2,330,893	\$ 89,287	\$ -	\$ -	\$ 2,330,893	\$ 89,287

At September 30, 2010, there were no Securities with an unrealized loss as compared to four Municipal Securities with an unrealized loss of \$89,287, at December 31, 2009. The investments at December 31, 2009 were not considered other-than-temporarily impaired. The Company does not intend to sell these investments and therefore it is more likely than not that the Company will not be required to sell these securities before recovery of any amortized cost. The unrealized losses at December 31, 2009 were caused by interest rate increases. The contractual terms of these investments do not permit the issuer to settle the securities at a price less than the amortized cost of the investment.

The Company realized a gain of \$180,071 on the sale of investment securities for proceeds of \$10,338,930 at September 30, 2009. There were no sales of investment securities for the nine months ended September 30, 2010

DEPOSITS

Deposits remain the Company's primary source of funding for loans and investments. Average interest bearing deposits provided funding for 70.58% of average earning assets for the nine months ended September 30, 2010, and 70.66% for the nine months ended September 30, 2009. The Company encounters strong competition from other financial institutions as well as consumer and commercial finance companies, insurance companies and brokerage firms located in the primary service area of the Bank. However, the percentage of funding provided by deposits has remained stable. The breakdown of total deposits by type and the respective percentage of total deposits are as follows:

	September 30,		December 31,
	2010	2009	2009
Non-interest bearing demand	\$ 55,482,876	\$ 49,735,424	\$ 48,394,049
Interest bearing demand	\$ 49,546,790	\$ 50,448,440	\$ 49,257,712
Money market accounts	\$ 59,189,446	\$ 64,423,956	\$ 63,965,862
Certificates of deposit \$100,000 and over	\$ 36,233,303	\$ 43,520,164	\$ 41,929,687
Other time deposits	\$ 18,111,503	\$ 17,296,581	\$ 16,943,042
Other savings deposits	\$ 11,813,334	\$ 9,728,599	\$ 9,347,328
Total Deposits	\$ 230,377,252	\$ 235,153,164	\$ 229,837,680

Percentage of Deposits	September 30,		December 31,
	2010	2009	2009
Non-interest bearing demand	24.08%	21.15%	19.30%
Interest bearing demand	21.51%	21.45%	21.91%
Money Market accounts	25.69%	27.40%	28.45%
Certificates of deposit \$100,000 and over	15.73%	18.51%	18.65%
Other time deposits	7.86%	7.35%	7.54%
Other savings deposits	5.13%	4.14%	4.15%
Total Deposits	100.00%	100.00%	100.00%

Total deposits decreased \$4,775,912 or 2.03% to \$230,377,252 at September 30, 2010 from \$235,153,164 at September 30, 2009 and increased \$539,572 or .24% from \$229,837,680 at December 31, 2009. Certificates of deposit \$100,000 and over and money market accounts decreased from 18.51% to 15.73% and 27.40% to 25.69%, respectively from September 30, 2009 to September 30, 2010 and also decreased from 18.24% to 15.73% and 27.40% to 25.69% respectively, between December 31, 2009 to September 30, 2010. Non-interest bearing demand deposits increased \$5,747,452 or 11.56% from September 30, 2009 to September 30, 2010 and increased \$7,088,827 or

14.65% from December 31, 2009 to September 30, 2010.

While these fluctuations are normal in the Company's business, in order to reduce its cost of funds the Company has tried to reduce the amount of its outstanding Certificates of deposit greater than \$100,000 as a current business strategy.

SHORT-TERM BORROWINGS

The Bank has a demand note through the US Treasury, Tax and Loan system with the Federal Reserve Bank of Richmond. The Bank may borrow up to \$1,000,000 at September 30, 2010 and 2009 under the arrangement at an interest rate set by the Federal Reserve. The note is secured by Government Sponsored Enterprise Securities with a market value of \$1,086,004 at September 30, 2010 and \$1,122,021 at September 30, 2009. The amount outstanding under the note totaled \$261,056 and \$213,896 at September 30, 2010 and 2009, respectively. At September 30, 2010, the Company had \$500,000 outstanding in federal funds purchased. The Company has the option to borrow up to \$28,000,000 on short term lines of credit. The Company has also established a Borrower-In-Custody arrangement with the Federal Reserve. This arrangement permits the Company to retain possession of loans pledged as collateral to secure advances from the Federal Reserve Discount Window. The Company established this arrangement as a secondary source of liquidity. As of September 30, 2010 the Company could borrow up to \$63,362,905. There have been no borrowings under this arrangement since it was established.

On April 8, 2010, the Company paid off its \$7,500,000 loan with the Federal Reserve Bank's Term Auction Facility (TAF). The Company established this loan on March 11, 2010 at a rate of .50% for a term of 28 days. The Board of Governor's of the Federal Reserve System established this program to allow depository institutions to place a bid for an advance from its local Federal Reserve Bank at a fixed interest rate determined via a centralized single-price auction.

Comparison of Three Months Ended September 30, 2010 to Three Months Ended September 30, 2009

Net income increased \$685,080 or 501.81% to \$821,601, or basic and diluted earnings per share of \$.19 and \$.19, respectively, for the three months ended September 30, 2010, from \$136,521, or basic and diluted earnings per share of \$.03 and \$.03, respectively, for the three months ended September 30, 2009. The increase in net income between periods is primarily due to a \$920,000 decrease in the loan loss provision. This decrease was based on an evaluation of the adequacy of the allowance. Average earning assets increased \$2.7 million for the three months ended September 30, 2010 as compared to the same period in 2009. Average earning assets were \$256.9 million during the three months ended September 30, 2010 as compared to \$254.2 million for the three months ended September 30, 2009. Average loans increased \$6.6 million or 3.19% to \$212.8 million for the three months ended September 30, 2010 as compared to \$206.2 million for the three months ended September 30, 2009. The Company realized an increase in net interest income of \$178,638 for the three months ended September 30, 2010 as compared to the three months ended September 30, 2009 as a result of a 23 basis point increase in the net interest margin.

Net Interest Income

Net interest income, the major component of the Company's net income, increased \$178,638 or 6.80% to \$2,805,199 for the three months ended September 30, 2010, from \$2,626,561 for the three months ended September 30, 2009. This increase was due to an increase in the net interest margin. The net interest margin increased 23 basis points from 4.10% to 4.33%. The yields on interest earning assets increased 9 basis points to 4.73% from 4.64%. The cost of interest bearing liabilities during the three months ended September 30, 2010 was 0.55% as compared to 0.74% for the same period in 2009, a decrease of 19 basis points. Interest rates remain at historically low levels; however, the Company maintains a large percentage of non-interest bearing deposits which support the Company's funding sources resulting in a strong interest margin. In addition the Company is evaluating its loan pricing to determine if the rate is appropriate and repricing the loans as needed.

Allowance for Loan Losses

The allowance for loan losses represents management's estimate of probable losses inherent in the loan portfolio. The adequacy of the allowance for loan losses (the "Allowance") is reviewed monthly by the Loan Committee and on a quarterly basis by the Board of Directors. For purposes of this analysis, adequacy is defined as a level sufficient to absorb estimated losses in the loan portfolio as of the balance sheet date presented. The methodology employed for this analysis was modified in 2007, 2008 and 2009 to better reflect the economic environment and regulatory guidance. The revised methodology is based on a Reserve Model that is comprised of the three components listed below.

- 1) Specific Reserve analysis for impaired loans based on FASB ASC 310-10-35.
- 2) General reserve analysis applying historical loss rates based on FASB ASC 450-20.
- 3) Qualitative or environmental factors.

Loans are reviewed for impairment which is measured in accordance with FASB ASC 310-10-35. Impaired loans can either be secured or unsecured, not including large groups of smaller balance loans that are collectively evaluated. Impairment is measured by the difference between the loan amount and the present value of the future cash flow discounted at the loan's effective interest rate, or, alternatively the fair value of the collateral if the loan is collateral dependent. An impaired loan may not represent an expected loss.

A general reserve analysis is performed on individually reviewed loans, but not impaired loans, and excluded individually reviewed impaired loans, based on FASB ASC 450-20. Historical losses are segregated into risk-similar groups and a loss ratio is determined for each group over a three year period. The three year average loss ratio by type is then used to calculate the estimated loss based on the current balance of each group. The three year historical loss percentage for the three months ended September 30, 2010 and September 30, 2009 was .33% and .91%, respectively.

Qualitative and environmental factors include external risk factors that Management believes are representative of the overall lending environment of the Bank. Management believes that the following factors create a more comprehensive system of controls in which the Bank can monitor the quality of the loan portfolio.

- 1) Portfolio risk
- 2) National and local economic trends and conditions
- 3) Effects of changes in risk selection and underwriting practices
- 4) Experience, ability and depth of lending management staff
- 5) Industry conditions
- 6) Effects of changes in credit concentrations
- 7) Loan and credit administration risk

Portfolio risk includes the levels and trends in delinquencies, impaired loans and changes in the loan rating matrix, trends in volume and terms of loans and overmargined real estate lending. Management is satisfied with the stability of the past due and non-performing loans and believes there has been no decline in the quality of the loan portfolio due to any trend in delinquent or adversely classified loans. Although the aggregate total of classified loans has increased, management is confident in the adequacy of the sources of repayment. Sizable unsecured principal balances on a non-amortizing basis are monitored. Within the portfolio risk factor the Company elected to increase the risk percentage for "trends in volume and term of loan". Loans have decreased .85% or approximately \$1,799,126 from September 30, 2009 to September 30, 2010. In addition the Company elected to increase the risk percentage for "over margined real estate lending risk". Although the vast majority of the Company's real estate loans are underwritten on a cash flow basis, the secondary source of repayment is typically tied to the Company's ability to realize on the collateral. Given the contraction in real estate values, the Company closely monitors its loan to value. The Company recently amended its Loan Policy to allow for a maximum 80% collateral advance percentage on real estate

transactions.

Occasional extensions of credit occur beyond the policy thresholds of the Company's normal collateral advance margins for real estate lending. These loans are monitored and the balances reported to the Board every quarter. An excessive level of this practice could result in additional examiner scrutiny, competitive disadvantages and potential losses if forced to convert the collateral. The consideration of overmargined real estate loans directly relates to the capacity of the borrower to repay. Management often request additional collateral to bring the loan to value ratio within the policy guidelines and also require a strong secondary source of repayment in addition to the primary source of repayment.

Although significantly under the threshold of 100% of capital (currently approximately \$29 million), the Company's list and number of over margined real estate loans currently totals approximately \$13.8 million or approximately 6.42% of its loan portfolio.

Management revised the credit rating matrix in order to rate all extensions of credit providing a more specified picture of the risk each loan poses to the quality of the loan portfolio. There are eight possible ratings based on ten different qualifying characteristics. The ten characteristics are: cash flow, collateral quality, guarantor strength, financial condition, management quality, operating performance, the relevancy of the financial statements, historical loan performance, debt service coverage and the borrower's leverage. In an effort to place more emphasis on borrower's cash flow a weighted average method is used to determine the loan grade with cash flow, financial conditions, and debt service coverage being weighted triple and financial statements being weighted double. The matrix is designed to meet management's standards and expectations of loan quality. In addition to the rating matrix, the Company rates its credit exposure on the basis of each loan and the quality of each borrower.

National and local economic trends and conditions are constantly changing and results in both positive and negative impact on borrowers. Most macroeconomic conditions are not controllable by the Company and are incorporated into the qualitative risk factors. Natural and environmental disasters, wars and the recent fallout of the subprime lending market as well as problems in the traditional mortgage market are a few of the trends and conditions that are currently affecting the Company's national and local economy. Changes in the national and local economy have impacted borrowers' ability, in many cases, to repay loans in a timely manner. On occasion a loan's primary source of repayment (i.e., personal income, cash flow, or lease income) may be eroded as a result of unemployment, lack of revenues, or the inability of a tenant to make rent payments.

The quality of the Bank's loan portfolio is contingent upon its risk selection and underwriting practices. Every credit with over \$100,000 in exposure is summarized by the Bank's Credit Department and reviewed by the Loan Committee on a monthly basis. The Board of Directors review credits over \$500,000 monthly with an annual credit analysis conducted on credits in excess of \$350,000 upon the receipt of updated financial information. Prior to any extension of credit, every significant commercial loan goes through sound credit underwriting. The Credit Department conducts detailed cash flow analysis on each proposal using the most current financial information. Relevant trends and ratios are evaluated.

The Bank has over 300 years of lending management experience among twelve members of its lending staff. In addition to the lending staff the Bank has an Advisory Board for each branch comprised of business and community leaders from the specific branch's market area. Management meets with these boards quarterly to discuss the trends and conditions in each respective market. Management is aware of the many challenges currently facing the banking industry. Assessing banks to replenish the insurance fund and its corresponding impact on bank profits, increased regulatory scrutiny in and or on lending practices, and pending changes in deposit and or funding source type and mix, continue to impact the Company's environment. As other banks look to increase earnings in the short term, the Company will continue to emphasize the need to maintain its sound lending practices and core deposit growth.

There has been an influx of new banks over the last several years within the Company's geographic area. This increase has decreased the local industry's overall margins as a result of pricing competition. Management believes that the borrowing base of the Bank is well established and therefore unsound price competition is not necessary.

The risks associated with the effects of changes in credit concentration include loan concentration, geographic concentration and regulatory concentration.

As of September 30, 2010, there were only four Standard Industrial Code groups that comprised more than three percent of the Bank's total outstanding loans. The four groups are activities related to real estate, offices and clinics of doctors, real estate agents and managers, and legal services.

The Company is located along the coast and on an earthquake fault, increasing the chances that a natural disaster may impact the Bank and its borrowers. The Company has a Disaster Recovery Plan in place; however, the amount of time it would take for its customers to return to normal operations is unknown.

Loan and credit administration risk includes collateral documentation, insurance risk and maintaining financial information risk.

The majority of the Bank's loan portfolio is collateralized with a variety of its borrower's assets. The execution and monitoring of the documentation to properly secure the loan is the responsibility of the Bank's lenders and Loan Department. The Bank requires insurance coverage naming the Bank as the mortgagee or loss payee. Although insurance risk is also considered collateral documentation risk, the actual coverage, amounts of coverage and increased deductibles are important to management.

Risk includes a function of time during which the borrower's financial condition may change; therefore, keeping financial information up to date is important to the Bank. The policy of the Bank is that all new loans, regardless of the customer's history with the Bank, should have updated financial information, as long as exposure is greater than \$10,000. In addition the Company is monitoring appraisals closely as real estate values continue to decline.

The aforementioned changes to the Company's Allowance for Loan Loss methodology were not made as a result of dramatic or patterned history of loan losses, increases in past due loans, or non-performing assets, but rather because of specific changes in the Company's lending environment. These changes precipitated the need for additional reserves in a period of time when the Company's loan portfolio grew significantly (three months ended September 30, 2009). Based on the evaluation described above, the Company recorded a provision for loan losses during the three months ended September 30, 2010 of \$190,000, compared to a provision of \$1,110,000 for the three months ended September 30, 2009. At September 30, 2010 the three year average loss ratios were: .57% Commercial, .55% Consumer, .50% 1-4 Residential, .00% Real Estate Construction and .04% Real Estate Mortgage. The three year historical loss ratio used at September 30, 2010 was .33% compared to .91% at September 30, 2009.

During the quarter ended September 30, 2010, charge-offs of \$626,503 and recoveries of \$4,261 were recorded to the allowance resulting in an allowance for loan losses of \$2,683,980 or 1.24% of total loans, compared to charge-offs of \$261,918 and recoveries of \$857 resulting in an allowance loan losses of \$2,013,259 or .95% of total loans at September 30, 2009.

The Bank had impaired loans totaling \$3,306,161 as of September 30, 2010, compared to \$1,844,204 as of September 30, 2009. The impaired loans at September 30, 2010 include four non-accrual loans with a combined balance of \$844,376. Impaired loans at September 30, 2009 included four non-accrual loans with a combined balance of \$240,667. Included in the impaired loans at September 30, 2010, is one credit totaling \$1,023,000 which is secured by a second mortgage. Management does not know of any loans which will not meet their contractual obligations that are not otherwise discussed herein.

The accrual of interest is generally discontinued on loans, which become 90 days past due as to principal or interest. The accrual of interest on some loans, however, may continue even though they are 90 days past due if the loans are well secured or in the process of collection and management deems it appropriate. If non-accrual loans decrease their past due status to less than 30 days for a period of three months, they are reviewed individually by management to determine if they should be returned to accrual status. There was one loan over 90 days past due still accruing interest totaling \$104,103 as of September 30, 2010 and no loans over 90 days past due still accruing interest as of September 30, 2009.

Net charge-offs for the three months ended September 30, 2010 were \$622,242 compared to net charge-offs of \$261,061 for the three months ended September 30, 2009. Uncertainty in the economic outlook still exists, making charge-off levels in future periods less predictable; however, loss exposure in the portfolio is identified, reserved and closely monitored to ensure that changes are promptly addressed in the analysis of reserve adequacy.

The Company had \$360,953 of unallocated reserves at September 30, 2010 related to other inherent risk in the portfolio compared to unallocated reserves of \$382,615 at September 30, 2009. Management believes the allowance for loan losses at September 30, 2010 is adequate to cover estimated losses in the loan portfolio; however, assessing the adequacy of the allowance is a process that requires considerable judgment. Management's judgments are based on numerous assumptions about current events which it believes to be reasonable, but which may or may not be valid. Thus there can be no assurance that loan losses in future periods will not exceed the current allowance amount or that future increases in the allowance will not be required. No assurance can be given that management's ongoing evaluation of the loan portfolio in light of changing economic conditions and other relevant circumstances will not require significant future additions to the allowance, thus adversely affecting the operating results of the Company.

The Allowance is also subject to examination testing by regulatory agencies, which may consider such factors as the methodology used to determine adequacy and the size of the Allowance relative to that of peer institutions, and other adequacy tests. In addition, such regulatory agencies could require the Company to adjust its allowance based on information available to them at the time of their examination.

The methodology used to determine the reserve for unfunded lending commitments, which is included in other liabilities, is inherently similar to that used to determine the allowance for loan losses adjusted for factors specific to binding commitments, including the probability of funding and historical loss ratio. During the three months ended September 30, 2010, no entry was made to the allowance for unfunded loans and commitments leaving a balance of \$20,825.

Other Income

Other income for the three months ended September 30, 2010, increased \$45,887 or 8.91% to \$560,989 from \$515,102 for the three months ended September 30, 2009. This increase is primarily due to a increase in mortgage banking income of \$117,044 or 62.70% to \$303,713 for the three months ended September 30, 2010 as compared to \$186,669 for the three months ended September 30, 2009. Although the mortgage crisis continues, mortgage rates are at a historic low allowing for new home purchases and current home owners to refinance at lower rates. During the three months ended September 30, 2010, the Company originated \$26,428,480 in mortgage loans - an increase of \$2,713,060 or 11.44% compared to \$23,715,420 for the three months ended September 30, 2009. The Company realized a gain of \$57,756 on the sale of investment securities during the three months ended September 30, 2009 with no gain or loss realized during the three months ended September 30, 2010. In addition, the Company realized a loss of \$13,347 on the sale of other real estate owned in the three months ended September 30, 2010.

Other Expense

Bank overhead increased \$140,161 or 7.54% to \$1,998,737 for the three months ended September 30, 2010, from \$1,858,576 for the three months ended September 30, 2009. Salaries and employee benefits increased \$59,489 or 5.55% to \$1,131,616 for the three months ended September 30, 2010, from \$1,072,127 for the three months ended September 30, 2009. Salaries and wages increased due to annual merit increases. In addition the Board of Directors increased the monthly contribution to the ESOP from \$10,000 in 2009 to \$20,000 in 2010. Other operating expenses increased \$64,780 or 13.82% to \$533,578 for the three months ended September 30, 2010, from \$468,798 for the three months ended September 30, 2009. Data processing fees increased due to the addition of remote capture and eCorp (online banking for corporations). The other changes in non-interest expense categories reflect normal modest fluctuations between the two periods.

Income Tax Expense

For the three months ended September 30, 2010, the Company's effective tax rate was 30.22% compared to 21.13% during the three months ended September 30, 2009.

Comparison of Nine Months Ended September 30, 2010 to Nine Months Ended September 30, 2009

Net income increased \$678,426 or 42.43% to \$2,277,310, or basic and diluted earnings per share of \$.52 and \$.52, respectively, for the nine months ended September 30, 2010, from \$1,598,884, or basic and diluted earnings per share of \$.36 and \$.36, respectively, for the nine months ended September 30, 2009. The increase in net income between periods is primarily due to a decrease in the provision for loan losses from \$1,274,000 for the nine months ended September 31, 2009 to \$420,000 for the nine months ended September 30, 2010. This decrease was based on an evaluation of the adequacy of the allowance. Average earning assets increased \$11.4 million for the nine months ended September 30, 2010 as compared to the same period in 2009. Average earning assets were \$254.8 million during the nine months ended September 30, 2010 as compared to \$243.4 million for the nine months ended September 30, 2009. Average loans increased \$13.9 million or 7.01% to \$212.5 million for the nine months ended September 30, 2010 as compared to \$198.5 million for the nine months ended September 30, 2009. The Company realized an increase in net interest income of \$649,407 for the nine months ended September 30, 2010 as compared to the nine months ended September 30, 2009 as a result of a 15 basis point increase in the net interest margin.

Net Interest Income

Net interest income, the major component of the Company's net income, increased \$649,407 or 8.56% to \$8,233,843 for the nine months ended September 30, 2010, from \$7,584,434 for the nine months ended September 30, 2009. This increase was due to an increase in the net interest margin. The net interest margin increased 15 basis points from 4.17% to 4.32%. The yields on interest earning assets increased 3 basis point to 4.75% from 4.72%. The cost of interest bearing liabilities during the nine months ended September 30, 2010 was 0.60% as compared to 0.77% for the same period in 2009 - a decrease of 17 basis points. Interest rates remain at historically low levels; however, the Company maintains a large percentage of non-interest bearing deposits which support the Company's funding sources resulting in a strong interest margin.

Allowance for Loan Losses

The allowance for loan losses for the nine months ended September 30, 2010 was \$420,000 compared to \$1,274,000 for the nine months ended September 30, 2009. Net charge-offs for the nine months ended September 30, 2010 were \$763,016 compared to \$690,576 for the nine months ended September 30, 2009. Charge-offs for the nine months ended September 30, 2010 were \$778,819 with recoveries of \$15,803 resulting in an allowance for loan losses of \$2,683,980 or 1.28% of total loans. This compares to charge-offs of \$694,383 and recoveries of \$3,807 for a total allowance of \$2,013,259 or .95% of total loans for the nine months ended September 30, 2009. Loss exposure in the portfolio is identified, reserved and closely monitored to ensure that changes are promptly addressed in the analysis of the reserve.

Other Income

Other income for the nine months ended September 30, 2010, decreased \$307,738 or 17.45% to \$1,455,328 from \$1,763,066 for the nine months ended September 30, 2009. This decrease is primarily due to a decrease in mortgage banking income of \$93,838 or 12.22% to \$674,294 for the nine months ended September 30, 2010 as compared to \$768,132 for the nine months ended September 30, 2009. Mortgage origination fees, discount fees and service release premiums decreased as a result of a lower level of refinancing activity for the nine months ended September 30, 2010 as compared to the same period in 2009. In addition, changes to underwriting and appraisal requirements established by FNMA and FHLMC as well as changes in regulatory environment have resulted in making it harder for individuals to qualify for loans. The largest change in other income came from a realized gain of \$180,071 on the sale of investment securities during the nine months ended September 30, 2009 with no gain or loss realized during the nine months ended September 30, 2010. The Company realized a loss of \$13,347 on the sale of other real estate owned during the nine months ended September 30, 2010.

Other Expense

Bank overhead increased \$336,515 or 5.97% to \$5,974,960 for the nine months ended September 30, 2010, from \$5,638,445 for the nine months ended September 30, 2009. Salaries and employee benefits increased \$272,804 or 8.64% to \$3,429,996 for the nine months ended September 30, 2010, from \$3,157,192 for the nine months ended September 30, 2009. Salaries and wages increased due to annual merit increases, a four month overlap of the retiring Chief Financial Officer (CFO) and the incoming CFO, and the advancement of a management trainee to a loan officer. In addition the Board of Directors increased the monthly contribution to the ESOP from \$10,000 in 2009 to \$20,000 in 2010. Other operating expenses increased \$62,551 or 4.16% from \$1,503,952 at September 30, 2009, to \$1,566,503 for the nine months ended September 30, 2009. Data processing fees increased \$28,949 due in part to the new programs branch capture and eCorp online banking. In addition legal fees increased \$28,734. These increases were offset by a decrease in fees paid to the FDIC by 16.84% to \$250,199 for the nine months ended September 30, 2010, from \$300,875 for the nine months ended September 30, 2009.

Income Tax Expense

For the nine months ended September 30, 2010, the Company's effective tax rate was 30.96% compared to 34.34% during the nine months ended September 30, 2009.

Off Balance Sheet Arrangements

In the normal course of operations, the Company engages in a variety of financial transactions that, in accordance with generally accepted accounting principles, are not recorded in the financial statements, or are recorded in amounts that differ from the notional amounts. These transactions involve, to varying degrees, elements of credit, interest rate, and liquidity risk. Such transactions are used by the Company for general corporate purposes or for customer needs. Corporate purpose transactions are used to help manage credit, interest rate and liquidity risk or to optimize capital. Customer transactions are used to manage customer's requests for funding.

The Company's off-balance sheet arrangements consist principally of commitments to extend credit described below. The Company estimates probable losses related to binding unfunded lending commitments and records a reserve for unfunded lending commitment in other liabilities on the consolidated balance sheet. The balance of the reserve was \$20,825 at September 30, 2010 and 2009. The Company had no interests in non-consolidated special purpose entities.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained if deemed necessary by the Company upon extension of credit is based on management's credit evaluation of the

borrower. Collateral held varies, but may include accounts receivable, negotiable instruments, inventory, property, plant and equipment, and real estate. Commitments to extend credit, including unused lines of credit, amounted to \$47,091,393 and \$50,266,385 at September 30, 2010 and 2009, respectively.

Standby letters of credit represent an obligation of the Company to a third party contingent upon the failure of the Company's customer to perform under the terms of an underlying contract with the third party or obligates the Company to guarantee or stand as surety for the benefit of the third party. The underlying contract may entail either financial or nonfinancial obligations and may involve such things as the shipment of goods, performance of a contract, or repayment of an obligation. Under the terms of a standby letter, generally drafts will be drawn only when the underlying event fails to occur as intended. The Company can seek recovery of the amounts paid from the borrower. The majority of these standby letters of credit are unsecured. Commitments under standby letters of credit are usually for one year or less. The maximum potential amount of undiscounted future payments related to standby letters of credit at September 30, 2010 and 2009, was \$521,610, respectively.

The Company originates certain fixed rate residential loans and commits these loans for sale. The commitments to originate fixed rate residential loans and the sale commitments are freestanding derivative instruments. The fair value of the commitments to originate fixed rate conforming loans was not significant at September 30, 2010. The Company has forward sales commitments, totaling \$6.7 million at September 30, 2010, to sell loans held for sale of \$6.7 million. The fair value of these commitments was not significant at September 30, 2010. The Company has no embedded derivative instruments requiring separate accounting treatment.

Liquidity

The Company must maintain an adequate liquidity position in order to respond to the short-term demand for funds caused by withdrawals from deposit accounts, extensions of credit and for the payment of operating expenses. Primary liquid assets of the Company are cash and due from banks, federal funds sold, investments available for sale, other short-term investments and mortgage loans held for sale. The Company's primary liquid assets accounted for 18.90% and 21.52% of total assets at September 30, 2010 and 2009, respectively. Proper liquidity management is crucial to ensure that the Company is able to take advantage of new business opportunities as well as meet the credit needs of its existing customers. Investment securities are an important tool in the Company's liquidity management. Securities classified as available for sale may be sold in response to changes in interest rates and liquidity needs. All of the securities presently owned by the Bank are classified as available for sale. At September 30, 2010, the Bank had short-term lines of credit totaling approximately \$28,000,000 (which are withdrawable at the lender's option), with an outstanding balance of \$500,000 at September 30, 2010. Additional sources of funds available to the Bank for additional liquidity needs include borrowing on a short-term basis from the Federal Reserve System, increasing deposits by raising interest rates paid and selling mortgage loans for sale. In order to establish a secondary source of liquidity, the Company has established a Borrower-In-Custody arrangement with the Federal Reserve. This arrangement permits the Company to retain possession of assets pledged as collateral to secure advances from the Federal Reserve Discount Window. As of September 30, 2010 the Company could borrow up to \$62,362,905. There have been no borrowings under this arrangement since it was established.

The Company's core deposits consist of non-interest bearing accounts, NOW accounts, money market accounts, time deposits and savings accounts. The Company closely monitors its reliance on certificates of deposit greater than \$100,000 and other large deposits. The Company's management believes its liquidity sources are adequate to meet its operating needs and does not know of any trends, events or uncertainties that may result in a significant adverse effect on the Company's liquidity position. At September 30, 2010 and 2009, the Bank's liquidity ratio was 7.43% and 8.48%, respectively.

Capital Resources

The capital needs of the Company have been met to date through the \$10,600,000 in capital raised in the Bank's initial offering, the retention of earnings less dividends paid and the exercise of stock options for total shareholders' equity at September 30, 2010 of \$29,138,029. The rate of asset growth since the Bank's inception has not negatively impacted this capital base. The risk-based capital guidelines for financial institutions are designed to highlight differences in risk profiles among financial institutions and to account for off balance sheet risk. The guidelines established require a risk based capital ratio of 8% for bank holding companies and banks. The risk based capital ratio at September 30, 2010, for the Bank is 12.87% and at September 30, 2009 was 11.92%. The Company's management does not know of any trends, events or uncertainties that may result in the Company's capital resources materially increasing or decreasing.

The Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory – and possibly additional discretionary – actions by regulators that, if undertaken, could have a material effect on the financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of the Company's and the Bank's assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The Company's and the Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios of total and Tier 1 capital to risk-weighted assets and to average assets. Management believes, as of September 30, 2010, that the Company and the Bank meet all capital adequacy requirements to which they are subject.

At September 30, 2010 and 2009, the Company and the Bank were categorized as “well capitalized” under the regulatory framework for prompt corrective action. To be categorized as “well capitalized” the Company and the Bank must maintain minimum total risk based, Tier 1 risk based and Tier 1 leverage ratios of 10%, 6% and 5%, respectively, and to be categorized as “adequately capitalized,” the Company and the Bank must maintain minimum total risk based, Tier 1 risk based and Tier 1 leverage ratios of 8%, 4% and 4%, respectively. There are no current conditions or events that management believes would change the Company's or the Bank's category.

ITEM 3 QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not required.

ITEM 4 CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures and internal controls and procedures for financial reporting
An evaluation was carried out under the supervision and with the participation of Bank of South Carolina Corporation's management, including its Principal Executive Officer and the Chief Financial Officer/ Executive Vice President and Treasurer, of the effectiveness of Bank of South Carolina Corporation's disclosure controls and procedures as of September 30, 2010. Based on that evaluation, Bank of South Carolina Corporation's management, including the Chief Executive Officer and Chief Financial Officer/Executive Vice President and Treasurer, has concluded that Bank of South Carolina Corporation's disclosure controls and procedures are effective. During the period ending September 30, 2010, there was no change in Bank of South Carolina Corporation's internal control over financial reporting that has materially affected or is reasonably likely to materially affect, Bank of South Carolina

Corporation's internal control over financial reporting.

The Company established a Disclosure Committee on December 20, 2002. The committee is made up of the President and Chief Executive Officer, Chief Financial Officer/Executive Vice President and Treasurer, Executive Vice President, Vice President (Audit Compliance Officer), Vice President (Accounting), Assistant Vice President (Credit Department) and Vice President (Operations and Technology). This Committee meets quarterly to review the 10Q and or the 10K, to assure that the financial statements, Securities and Exchange Commission filings, and all public releases are free of any material misstatements and correctly reflect the financial position, results of operations and cash flows of the Company. This Committee also assures that the Company is in compliance with the Sarbanes-Oxley Act.

The Disclosure Committee establishes a calendar each year to assure that all filings are reviewed and filed in a proper manner. The calendar includes the dates of the Disclosure Committee meetings, the dates that the 10Q and or the 10K are sent to its independent accountants and to its independent counsel for review as well as the date for the Audit Committee of the Board of Directors to review the reports.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

The Company and its subsidiary from time to time are involved as plaintiff or defendant in various legal actions incident to its business. These actions are not believed to be material either individually or collectively to the consolidated financial condition of the Company or its subsidiary.

Item 1A. Risk Factors

Not required.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Removed and Reserved

Item 5. Other Information

None.

Item 6. Exhibits

1. The Consolidated Financial Statements are included in this Form 10-Q and listed on pages as indicated.

	Page
(1) Consolidated Balance Sheets	3
(2) Consolidated Statements of Operations for the three months ended September 30, 2010 and 2009	4
(3) Consolidated Statements of Operations for the nine months ended September 30, 2010 and 2009	5
