Operating History

The Company has been successful in growing and expanding through multiple acquisitions supported by above average organic revenue growth as published by Staffing Industry Analysts. Our business plan for continued growth through acquisitions is subject to certain inherent risks, including accessing capital resources, potential cost overruns and possible rejection of our business model and/or sales methods. Therefore, we provide no assurance that the

Company will be successful in carrying out our business plan. We continue to pursue additional debt and equity financing to fund our business plan. We have no assurance that future financing will be available to us on acceptable terms or at all.

Industry Background

The staffing industry is divided into three (3) major segments: temporary help services, professional employer organizations and placement agencies. Temporary help services provide workers for limited periods, often to substitute for absent permanent workers or to help during periods of peak demand. These workers, who are employees of the temporary help agency, will generally fill clerical, technical, or industrial positions. Professional employer organizations (PEOs), sometimes referred to as employee leasing agencies, contract to provide workers to customers for specific functions, often related to human resource management. In many cases, customers' employees are hired by a PEO and then contracted back to the customer. Placement agencies, sometimes referred to as executive recruiters or headhunters, find workers to fill permanent positions at customer companies. These agencies may specialize in placing senior managers, mid-level managers, technical workers, or clerical and other support workers.

The Company considers itself a temporary staffing company within the broader staffing industry. However, the Company provides permanent placements at the request of existing clients and consulting services such as risk audits, due diligence for mergers and acquisition targets, and internal audit assessments.

Staffing companies identify potential employees through online advertising and referrals, and interview, test and counsel workers before sending them to the customer for approval. Pre-employment screening can include skills assessment, drug tests and criminal background checks. The personnel staffing industry has been radically changed by the internet. Many employers list available positions with one or several internet personnel sites like www.monster.com or www.careerbuilder.com, and on their own site. Personnel agencies operate their own sites and often still work as intermediaries by helping employers accurately describe job openings and by screening candidates who submit applications.

Job growth drives demand for the personnel staffing industry. The profitability of individual companies depends on good marketing and availability of qualified employees. Large companies enjoy economies of scale in marketing and back-office operations. Small companies can compete successfully by specializing in an industry or a job function.

To a great extent, clients follow the seasonal retail cycles but precede them by two (2) to three (3) months. There are two (2) distinct “peak” seasons: August to October, preceding the Holiday season; April to June, preceding the summer season. Both provide extended spikes to the baseline revenue average of companies in the staffing sector.

Major end-use customers include businesses from a wide range of industries. Marketing involves direct sales presentations, referrals from existing clients and advertising. Agencies compete both for customers and workers. Depending on market supply and demand at any given time, agencies may allocate more resources either to finding potential employers or potential workers. Permanent placement agencies work either on a retainer or a contingency basis. Clients may retain an agency for a specific job search or on contract for a specific period. Temporary help services charge customers a fixed price per hour or a standard markup on prevailing hourly rates.

For many staffing companies, demand is lower late in the fourth calendar quarter and early in the first calendar quarter, partly because of holidays, and higher during the rest of the year. Staffing companies may have high receivables from customers. Temp agencies and PEOs must manage a high cash flow and may maintain high cash balances because they funnel payroll payments from employers.

Staffing companies are regulated by the U.S. Department of Labor (DOL) and the Equal Employment Opportunity Commission (EEOC), and often by state authorities. At issue is the relationship between the agency and the temporary employees, or employee candidates. Many federal anti-discrimination rules regulate the type of information that employment firms can request from candidates or provide to customers about candidates. PEOs are often considered co-employers along with the client, but the PEO is responsible for employee wages, taxes and benefits. State regulation aims to ensure that PEOs provide the benefits they promise to workers.

The revenue of personnel agencies depends on the number of jobs they fill, which in turn depends on economic growth. During economic slowdowns, many client companies stop hiring altogether. Internet employment sites expand a company’s ability to find workers without the help of traditional agencies. Personnel agencies often work as intermediaries, helping employers accurately describe job openings and screen candidates. Increasing the use of sophisticated, automated job description and candidate screening tools could make many traditional functions of personnel agencies obsolete. Free social networking sites such as LinkedIn and Facebook are also becoming a common way for recruiters and employees to connect without the assistance of a staffing agency.

To avoid large placement agency fees, big companies may use in-house personnel staff, current employee referrals, or human resources consulting companies to find and hire new personnel. Because placement agencies typically charge a fee based on a percentage of the first year's salary of a new worker, companies with many jobs to fill have a large financial incentive to avoid agencies.

Many personnel agencies are small and may depend heavily on a few big customers for a large portion of revenue. Large customers may lead to increased revenue, but also expose agencies to higher risks. When major accounts experience financial hardships, and have less need for temporary employment services, agencies stand to lose large portions of revenue.

The loss of a staff member who handles a large volume of business may result in a large loss of revenue for an agency. Individual staff members, rather than the agency itself, usually develop strong relationships with customers. Staff members who move to another agency are often able to move customers with them.

Some of the best opportunities for temporary employment are in industries traditionally active in seasonal cycles, such as manufacturing, construction, wholesale and retail. However, seasonal demand for workers creates cash flow fluctuations throughout the year. Cash flow imbalances also occur because agencies must pay workers even though they haven't been paid by customers.

Trends in the Staffing Business

Start-up costs for a personnel agency are very low. Individual offices can be profitable, but consolidation is driven mainly by the opportunity for large agencies to develop national relationships with big customers. Some agencies expand by starting new offices in promising markets, but most prefer to buy existing independent offices with proven staff and an existing customer roster.

Temporary workers are becoming such a large factor at some companies that personnel agency staff sometimes work at the customer's site to recruit, train, and manage. The Company has a number of on-sight relationships with its customers. Agencies try to match the best qualified employees for the customer's needs, but often provide additional training specific to that company, such as instruction in the use of proprietary software.

Some personnel consulting firms and human resource departments are increasingly using psychological tests to evaluate potential job candidates. Psychological, or liability, testing has gained popularity due to fraud scandals. In addition to stiffer background checks, headhunters check the credit of prospective employees.

We believe the trends of outsourcing entire departments and dependence on temporary and leased workers will expand opportunities for personnel agencies. Taking advantage of their expertise in assessing worker capabilities, some agencies manage clients' entire human resource functions. Human resources outsourcing (HRO) may include management of payroll, tax filings, and benefit administration services. HRO may also include recruitment process outsourcing (RPO), where an agency manages all recruitment activities for a client.

New online technology is improving staffing efficiency. For example, some online applications coordinate workflow for staffing agencies, their clients and temporary workers, and allow agencies and customers to share work order requests, submit and track candidates, approve timesheets and expenses, and run reports. Interaction between candidates and potential employers is increasingly being handled online.

Initially viewed as rivals, some Internet job-search companies and traditional employment agencies are now collaborating. While some Internet sites do not allow agencies to use their services to post jobs or look through resumes, others find that agencies are their biggest customers, earning the sites a large percentage of their revenue. Some staffing companies contract to help client employers find workers online.

Competition

The Company's staffing divisions face competition in attracting clients as well as temporary candidates. The staffing business is highly competitive, with a number of firms offering services similar to those provided by the Company, on a national, regional or local basis. In many areas the local companies are the strongest competitors. The most significant competitive factors in the staffing business are price and reliability of service. The Company believes its competitive advantage is from its experience in niche markets, and commitment to the specialized employment market, along with its growing global presence.

The staffing industry is characterized by a large number of competing companies in a fragmented sector. Major competitors also exist across the sector, but as the industry affords low barriers to entry, new entrants are constantly introduced to the marketplace.

The top layer of competitors are large corporate staffing and employment companies which have yearly revenue of \$75 million or more. The next (middle) layer of the competition consists of medium-sized entities with yearly revenue of \$10 million or more. The largest portion of the marketplace is the bottom rung of this competitive landscape consisting of small individual-sized or family-run operations. As barriers to entry are low, sole proprietors, partnerships and small entities routinely enter the industry.

ITEM 3. LEGAL PROCEEDINGS.

Staffing 360 Solutions, Inc. (claim by NewCSI, Inc.)

On May 22, 2014, NewCSI Inc. (“NCSI”), the former owners of Control Solutions International, filed a complaint in the United States District Court for the Western District of Texas, Austin Division, against the Company arising from the terms of the CSI Stock Purchase Agreement dated August 14, 2013. NCSI claims that the Company breached a provision of the CSI Stock Purchase Agreement (“SPA § 2.7”) which required the Company to calculate within 90 days after December 31, 2013 and pay to NCSI fifty percent (50%) of certain “Deferred Tax Assets”. The Complaint sought payment of the amount allegedly owed under SPA § 2.7 and acceleration of earn-out payments provided for in the CSI Stock Purchase Agreement of \$1,400,000, less amounts paid to date, and attorneys’ fees. The Company responded denying the material allegations and interposing numerous affirmative defenses. On October 8, 2014, NCSI filed a Motion of Summary Judgment (the “Motion”). On March 30, 2015, a Magistrate Judge of the District Court issued a Report and Recommendation that the District Court deny the Motion. The Recommendation became a final decision on April 13, 2015.

On December 31, 2014, NCSI filed an amended complaint to which NCSI added an additional count asserting an “Adjustment Event” had occurred requiring an acceleration of earn-out payments provided for in the CSI Stock Purchase Agreement of \$2,100,000, less amounts paid to date (\$1,670,635 at December 31, 2014), required should S360 or NCSI “be unable, or admit in in writing, its inability, to its debts as they become due.” The Company responded denying the material allegations and interposing numerous affirmative defenses. The Earn-out liability was fully expensed at the time of the acquisition and fully accrued for on the Company’s balance sheet as part of the purchase accounting at the time of the acquisition.

The final pretrial conference in this matter was held April 22, 2015. A jury was selected on May 14, 2015, and the trial was held May 18-20, 2015. On May 20, 2015, the jury rendered a verdict, finding that S360 had not complied with SPA § 2.7 and owed \$154,433, but that NCSI had not proved that S360 or NCSI had become unable to pay debts as they came due. The Court had held that it was not a question for the jury to decide if damages for breach of SPA § 2.7 should include accelerated earn-out payments.

On June 3, 2015, NCSI filed a Motion for Entry of Judgment as Matter of Law seeking entry of a judgment in the amount of \$154,433, plus accelerated earn-out in the amount of \$1,152,143, plus statutory interest. NCSI did not challenge the jury verdict on the ability to pay issue. Also on June 3, 2015, S360 filed a Motion for Entry of Judgment as a Matter of Law seeking entry of judgment against NCSI on the jury’s finding that it had not complied with SPA § 2.7, or, in the alternative, for a reduction of damages to \$54,452 and to hold that NCSI may not be awarded accelerated earn-out payments as that would result in an illegal penalty. As of July 1, 2015, the motions have been fully briefed and submitted to the Court.

We believe that the Company acted in a manner consistent with our contractual rights, and we intend to aggressively defend the Company against this claim which we believe is not meritorious. Nevertheless, there can be no assurance that the outcome of this litigation will be favorable to the Company.

Restructuring Plan and Implementation:

During the first and second quarters of fiscal 2015, the Company conducted a thorough review and evaluation of its business operations and strategies, the forecast for the staffing industry, and the business environment in general. The Company concluded that it was imperative to take immediate action to reduce short and medium-term debt service obligations, consulting/advisory agreements, employment costs and other corporate commitments that were overburdening the Company's working capital and ability to fund continuing business operations, raise additional equity capital and/or debt, and execute its business plan. As such, on September 3, 2014, the Company formally established a Restructuring Committee, comprised of a Chairman and four (4) others selected from its board of directors to evaluate and formalize a Restructuring Plan. The Restructuring Plan was presented and adopted by the board of directors on September 3, 2014. Management planned to pursue each of the initiatives of the Restructuring Plan, some of which were contingent upon third parties' acceptance of the restructuring terms and may not be fully achieved.

Cost Reduction or Restructuring Goals and Key Initiatives:

Certain targeted initiatives have been and are being achieved through the following actions:

Short- and Medium-term debt service: The approved Restructuring Plan authorized management to approach existing debt holders with this proposal. The Company offered equity in the form of common stock and/or warrants in exchange for conversion or deferral of existing notes/obligations. The Company exchanged equity with a fair value in excess of the aggregate amount of debt being extinguished. Upon execution of all necessary agreements, the Company recognized a loss on the transaction. In accordance with ASC 470-40-2, the difference between the reacquisition price of debt and the net carrying amount of the extinguished debt shall be recognized currently in the period of extinguishment as losses or gains. Gains and losses shall not be amortized to future periods. The modification expense was measured at fair value on the date of the agreement and recorded in accordance with ASC 470-40-2; and

Notes Payable and Other Debt obligations: The Restructuring Plan offered a meaningful incentive to outstanding Notes Payable holders to convert their principal and accrued interest to common stock and/or warrants rather than a cash payment; Note holders converted \$3,056,030 of principal and interest into 3,358,391 common stock shares and 3,694,230 warrants exercisable for a term of ten (10) years at \$1.25. This action is anticipated to reduce the Company's future cash outflows by approximately \$889,000 in the calendar year of 2015, and by a further \$2,313,000 in the calendar year of 2016.

Modification of Series A Bonds: The Restructuring Plan modified the terms of the Series A Bonds conversion price from \$1.50 to \$1.00 with the intention of providing a meaningful incentive for the Series A Bond holders to convert their principal and interest to common stock and/or warrants on or before the maturity date of October 15, 2014, rather than redeem for cash; Bondholders converted \$3,709,655 of principal and interest into 3,709,687 common stock shares and 1,854,859 warrants exercisable for a term of three (3) years at \$2.00. The Company recorded a modification expense of \$2,927,959 related to changing the conversion price of these bonds.

Modification of Series B Bonds: The Restructuring Plan modified the terms of the Series B Bonds conversion price from \$1.50 to \$1.20 with the intention of providing a meaningful incentive for the Series B Bond holders to convert their principal and interest to common stock by the maturity date of September 15, 2015, rather than redeem for cash. No Bondholders have elected to convert as of May 31, 2015. The Company recorded a modification expense of \$154,489 related to changing the conversion price of these bonds;

Earn-out Liabilities: The Restructuring Plan offered a meaningful incentive to the Earn-out liability holders to convert their contingent future payments to common stock rather than cash payments. In conjunction with the sale of Cyber 360, effective January 1, 2015, the former shareholders of TRG were offered the opportunity and elected to convert their remaining Earn-out liability of \$1,134,050 into common stock shares at \$1.00 per share. As a result, the Company issued 1,134,050 common stock shares and recorded a gain on conversion of earn-out of \$485,835 on February 27, 2015.

Operational and Corporate commitments: The approved Restructuring Plan authorized management to cancel various on-going consulting and employment agreements and incur certain costs associated with this restructuring. In accordance with ASC 470-25-12, which states, *a liability for costs to terminate a contract before the end of its term shall be recognized when the entity terminates the contract in accordance with the contract terms*. These amounts were recorded in the operating section of the Statement of Operations on a line item titled Reorganization of Business Expenses and a liability for the amount owed on the balance sheet.

Consulting Agreements: The Company cancelled various on-going consulting agreements. The measurement date to record the expense was the date upon which the Company decided to cancel the agreement. The Company expensed \$73,875 as a result of the cancellation of these agreements. This action is anticipated to reduce the Company's future cash outflows by approximately \$432,000 in the calendar year of 2015.

Employment: The Company severed employment with an employee. The measurement date to record the expense was the date upon which the Company agreed to separate employment. The Company expensed \$691,966 related to the aforementioned severed employment. This action is anticipated to increase the Company's future cash outflows by approximately \$50,000 during the calendar year of 2015, and thereafter to reduce the Company's future cash outflows by approximately \$624,000 annually in perpetuity.

- o Restructuring Fees: The Company estimated the cost associated with this restructuring to be approximately \$175,000. U.S. GAAP does not allow for a general accrual for restructuring costs.

Therefore, any such costs have been and will continue to be expensed as incurred. To date, these fees have totaled \$792,650 and are properly classified in Professional fees - Restructuring.

Results of Operations

The Company continues to aggressively pursue and acquire staffing companies. To date the Company has acquired seven (7) staffing companies. As a consequence of this, and specifically the transaction costs of the acquisition program and the cost of obtaining financing, the Company generated a loss of \$18.0 million in the year-ended May 31, 2015. In addition, during 2015, the Company recorded approximately \$703,000 of non-cash impairment charges against its Intangible assets relating to the acquisition of CSI. Additionally, the Company incurred approximately \$2.5 million of non-cash amortization of intangibles. While we accept that two (2) of our acquisitions have under-performed from a GAAP perspective, and we have since divested Cyber360, we view our M&A program in its totality as a success. In the medium to long-term we will view this impairment as a cost of getting our growth program in place.

From a revenue perspective, the Company delivered \$128.8 million for the year, of which \$32.2 million was in the final quarter of the year. The Company believes the acquisitions consummated during calendar year 2014 are performing as expected. We are confident that we can continue to grow these businesses and that they will allow us to attract further acquisitions in line with our stated Strategic Plan of achieving \$300 million of annualized revenue.

The Company is vigilant in managing its operations and has developed a “Pathway to Profitability” program that is monitored constantly. This Pathway to Profitability includes overhead control, operational reviews, cash management, adequate capitalization, and our merger & acquisition program. Young, growing companies often confront struggles such as integration, financing, etc. We have invested for our future in building a strong corporate team which allows stronger financial reporting, compliance and commercial management. This investment has contributed to our losses in the short-term but would not need material additions to it as we grow, both organically and through acquisition.

The following table sets forth the results of our operations for the years ended May 31, 2015 and 2014 indicated as a percentage of revenue:

	Years Ended May 31,			
	2015		2014

Service revenue

We began to generate revenue in October 2012. As of May 31, 2015, the Company had five (5) operating entities – CSI, Staffing (UK), Poolia UK, PSI and PRS.

CSI was acquired on November 4, 2013. It provides consulting and risk advisory services principally in the U.S. and Canada but also has a network of affiliated entities across thirty-three (33) countries through which our services are provided. It recognizes revenue ratably over the period in which the service is provided. The costs of the service provision are recognized as the cost and time is incurred.

Staffing (UK) (including its subsidiary Monroe) was acquired on January 3, 2014. It provides temporary staffing and permanent placement services in the U.S. and the U.K. Revenue is derived from gross billings, which are based on (i) the payroll cost of its worksite employees; and (ii) a markup computed as a percentage of the payroll cost. The gross billings are invoiced concurrently with each periodic payroll of its worksite employees.

Poolia UK was acquired on February 28, 2014. Poolia UK operates its professional staffing services from its office in London and focuses on providing temporary, contract and permanent qualified professionals to various banking, financial and commercial clients across the U.K.

PSI was acquired on May 17, 2014. It provides temporary staffing and permanent placement services primarily in the IT sector. Revenue is derived from gross billings, which are based on (i) the payroll cost of its worksite employees; and (ii) a markup computed as a percentage of the payroll cost. The gross billings are invoiced concurrently with each periodic payroll of its worksite employees.

PRS was acquired on May 17, 2014. It provides temporary staffing and payrolling services primarily in the IT sector. Revenue is derived from gross billings, which are based on (i) the payroll cost of its worksite employees; and (ii) a markup computed as a percentage of the payroll cost. The gross billings are invoiced concurrently with each periodic payroll of its worksite employees.

For the year ended May 31, 2015, we had revenue of \$128,829,330 compared to \$41,198,162 for the year ended May 31, 2014. The increase in revenue is due to the full year impact of the five (5) acquisitions combined with strong organic growth.

Direct cost of services

Cost of revenue includes the cost of labor and other overhead costs (payroll wages, taxes and related insurance) as they relate to employees (temporary and permanent) as well as sub-contractors and consultants. For the years ended May 31, 2015 and 2014, cost of revenue was \$106,280,617 and \$33,394,503, respectively. The increase is related to the cost of revenue of the Company's five (5) acquisitions, a full year of which was recorded for the first time in the fiscal year ended May 31, 2015.

Gross profit and gross margin

Our gross profit for the years ended May 31, 2015 and 2014 was \$22,548,713 and \$7,803,659, respectively, representing gross margin of 18% and 19% respectively. The decrease in margin is related to the gross profit margin of the Company's five (5) acquisitions, all of which took place during the fiscal year ended May 31, 2014. Gross margin as a percentage of revenue for the year ended May 31, 2015 represents a full year for each of our acquisitions, and is approximately in line with our expectations for gross margin as a percentage of revenue if our business mix remains as it is currently.

Operating expenses

For the year ended May 31, 2015, operating expenses amounted to \$30,018,209 as compared to \$17,686,323 for the year ended May 31, 2014, an increase of \$12,331,886 or 70%. While operating expenses increased significantly on an absolute basis, as a percentage of revenue, we saw an improvement from 43% for the year ended May 31, 2014 to 23% for the year ended May 31, 2015. As we continue to grow revenue, and further leverage our existing support functions, we expect operating expenses as a percentage of revenue to continue to trend lower. For the years ended May 31, 2015 and 2014, operating expenses consisted of the following:

	Years Ended May 31,	
	2015	2014
General and administrative	\$5,122,180	\$2,598,105
Compensation	16,579,759	6,618,051
Director and consulting fees – Related parties	445,630	458,968
Impairment of goodwill	-	2,700,255
Impairment of intangible assets	703,222	833,592
Depreciation and amortization	2,711,476	1,198,117

Salaries and wages – Restructuring	74,619	-
Professional fees – Restructuring	792,650	-
Total operating expenses	\$30,018,209	\$17,686,323

For the year ended May 31, 2015, the increase in our operating expenses as compared to the year ended May 31, 2014 was primarily attributable to:

An increase of \$2,524,075 in general and administrative expenses for the year ended May 31, 2015 as compared to the year ended May 31, 2014. The increase is primarily attributable to the implementation of the Company's business plan in relation to costs incurred for the full year May 31, 2015, whereas the year ended May 31, 2014 only included partial years for each acquired company. General and administrative expenses declined from 6.3% of revenue to 4.0% from the year ended May 31, 2014 to the year ended May 31, 2015, respectively.

An increase in compensation of \$9,961,708. The increase is primarily attributable to the implementation of the Company's business plan in relation to costs incurred for the full year ended May 31, 2015, whereas the year ended May 31, 2014 only included partial years for each acquired company. For the years ended May 31, 2014 and 2015, compensation expense declined as a percentage of revenue from 16.1% to 12.9%. This decline was consistent with our expectation, and we expect compensation expense as a percentage of revenue to continue to decline as revenue grows.

A decrease of \$13,338 in director and consulting fees to related parties incurred for administrative overhead services and business development services is primarily attributable to the Company's review of and subsequent decrease in consulting agreements primarily related to investor relations and raising capital.

An increase of \$1,513,359 in depreciation and amortization expense for the year ended May 31, 2015 as compared to the year ended May 31, 2014. Amortization expense relates to the amortization of intangible assets related to the acquisitions of Control Solutions International on November 4, 2013, Staffing UK on January 3, 2014, Poolia on February 28, 2014 and PeopleSERVE, Inc. and PeopleSERVE PRS, Inc. on May 17, 2014. The Company's intangible assets are being amortized on a straight line basis over the estimated life of four (4) years except for Trade Names which are being amortized over fifteen (15) years. Depreciation expense relates to the fixed assets of the Company's subsidiaries and the fixed assets the Company acquired. The increase is primarily driven by expenses being recognized for each company for the full year ended May 31, 2015, whereas the year ended May 31, 2014 only included partial years for each acquired company.

An increase of \$309,438 in professional fees in the year ended May 31, 2015 as compared to the year ended May 31, 2014. The increase primarily relates to increases in accounting, consulting and legal fees related to the implementation of the Company's business plan, specifically due diligence (legal and accounting) of potential acquisition targets, as well as, litigation, legal and auditing costs associated with acquisitions. This is expected to continue as the Company continues to acquire new businesses. The increase also relates to the professional fees relating to running a public company (accounting, auditing, legal, transfer agent, and filing fees). For the years ended May 31, 2014 and 2015, professional fees declined as a percentage of revenue from 8.0% to 2.8%.

For the year ended May 31, 2015, the Company recorded no impairment in its goodwill, compared to \$2,700,225 for the year ended May 31, 2014. During the year ended May 31, 2014 the Company fully impaired its goodwill asset related to the acquisition of Cyber 360 for a total of \$1,412,646 and impaired \$1,287,609 related to the full

impairment associated with the acquisition of CSI. The Company periodically reviews its goodwill for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be fully recoverable or annually if not done earlier. The valuations provided were performed by an independent professional valuation services' calculations.

For the year ended May 31, 2015, the Company recorded an impairment to its intangible assets totaling \$703,222 compared to an impairment charge of \$833,592 for the year ended May 31, 2014. For the year ended May 31, 2014, the Company fully impaired its intangible assets related to the acquisition of Cyber 360 for a total of \$823,567 and impaired \$10,025 related to the acquisition of CSI. For the year ended May 31, 2015, the Company impaired the remaining balance of its intangible assets related to the acquisition of CSI totaling \$703,222. The Company periodically reviews its intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be fully recoverable or annually if not done earlier. The valuations provided were performed by an independent professional valuation services' calculations.

Other Expenses

For the years ended May 31, 2015 and 2014, we incurred interest and financing expense of \$5,865,499 and \$2,725,646, respectively, relating to interest for convertible notes and other notes payable, accounts receivable financing, amortization of beneficial conversion feature, debt discount and amortization of deferred financing costs. In addition, for the years ended May 31, 2015 and 2014, the Company incurred restructuring costs totaling \$4,369,723 and \$0, respectively. The restructuring charges in fiscal 2015 were due to the Company's implementation of its restructuring plan.

Net Loss

As a result of the factors described above, our net losses for the years ended May 31, 2015 and 2014 were \$18,020,763 and \$12,667,376, respectively, or a net loss per common share of \$0.46 and \$0.65 (basic and diluted), respectively.

Liquidity and Capital Resources

Liquidity is the ability of a company to generate funds to support its current and future operations, satisfy its obligations, and otherwise operate on an ongoing basis. Historically, we funded our operations through promissory notes, bonds, convertible notes, private placement offerings and from advances from our majority shareholders/officers/directors.

As of May 31, 2015, the Company had a working capital deficiency of \$6,594,882, and had an accumulated deficit of \$34,407,771 and for the year ended May 31, 2015 has a net loss and net cash used in operations of \$18,020,763 and \$4,556,742, respectively.

Our primary uses of cash have been for professional fees related to our operations and financial reporting requirements and for the payment of compensation and benefits and consulting fees to related parties. All funds received have been expended in growing the business, implementing our business plan and funding operations. The following trends are reasonably likely to result in a material decrease in our liquidity over the near to long term:

- An increase in working capital requirements to finance targeted acquisitions,

- Addition of administrative and sales personnel as the business grows,
- Increases in advertising, public relations and sales promotions for existing and new brands as we expand within existing markets or enter new markets,
- The costs associated with being a public company, and
- Capital expenditures to add technologies.

As a result of our financings, we believe that we will be able to implement our business plan and pursue the acquisition of a broad spectrum of staffing agencies primarily in the accounting and finance, IT, engineering, administration and light industrial sectors. Financing transactions may include the issuance of equity or debt securities, obtaining credit facilities, or other financing mechanisms. However, the trading price of our common stock and a downturn in the U.S. equity and debt markets could make it more difficult to obtain financing through the issuance of equity or debt securities. Even if we are able to raise the funds required, it is possible that we could incur unexpected costs and expenses, fail to collect amounts owed to us, or experience unexpected cash requirements that would force us to seek alternative financing. Furthermore, if we issue additional equity or debt securities, stockholders may experience additional dilution or the new equity securities may have rights, preferences or privileges senior to those of existing holders of our common stock. Currently, dilutive common share equivalents totaling 31,908,424 consist of shares issuable upon the conversion of existing convertible notes, convertible Preferred Stock and the exercise of stock options and warrants.

Our liquidity may be negatively impacted by the significant costs associated with our public company reporting requirements, costs associated with newly applicable corporate governance requirements, including requirements under the Sarbanes-Oxley Act of 2002 and other rules implemented by the Securities and Exchange Commission. We expect all of these applicable rules and regulations to significantly increase our legal and financial compliance costs and to make some activities more time consuming and costly.

Critical Accounting Policies and Estimates

Our significant accounting policies are fully described in Note 3 to our consolidated financial statements for the fiscal year ended May 31, 2015 contained herein.

Recent Accounting Pronouncements

In April 2015, the FASB issued authoritative guidance regarding Interest - Imputation of Interest, which requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The guidance is effective for fiscal years and interim reporting periods within those years beginning after December 31, 2015, with early adoption permitted. The standard will be effective for the Company's fiscal year beginning April 1, 2016. The Company does not expect the adoption of this guidance to have a material effect on our consolidated financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders

Staffing 360 Solutions, Inc.

We have audited the accompanying consolidated balance sheets of Staffing 360 Solutions, Inc. (the “Company”) as of May 31, 2015 and 2014, and the related consolidated statements of operations, stockholders’ equity and cash flows for each of the years in the two year period ended May 31, 2015. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company’s internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Staffing 360 Solutions, Inc. at May 31, 2015 and 2014, and the consolidated results of its operations and its cash flows for each of the years in the two (2) year period ended May 31, 2015, in conformity with U.S. generally accepted accounting principles.

STAFFING 360 SOLUTIONS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 – ORGANIZATION AND DESCRIPTION OF BUSINESS

Staffing 360 Solutions, Inc. (“we,” “us,” “our,” “Staffing 360,” or the “Company”) was incorporated in the State of Nevada on December 22, 2009, as Golden Fork Corporation (“Golden Fork”), which changed its name to Staffing 360 Solutions, Inc., ticker symbol “STAF”, on March 16, 2012.

On July 31, 2012, the Company formed Staffing 360 Alliance, Inc. (“Staffing Alliance”), a wholly-owned subsidiary incorporated in the State of Nevada, which had operations in the staffing sector for a short period of time before ceasing operations in February 2014.

On April 26, 2013, the Company purchased all of the issued and outstanding common stock (“TRG Acquisition”) of The Revolution Group, Ltd. (“TRG”), a Massachusetts corporation (subsequently renamed “Cyber 360, Inc.”). The aggregate consideration paid was approximately \$2.5 million, payable in cash, common stock and a percentage of future gross profits. TRG operated under the name Cyber 360, Inc. until it was disposed of on January 1, 2015. (See Note 14 - Acquisitions).

On June 28, 2013, the Company filed a Certificate of Amendment to its Articles of Incorporation with the State of Nevada, whereby increasing the authorized number of common stock shares from 75,000,000 to 200,000,000. Additionally, this amendment authorized the issuance of up to 20,000,000 shares of Blank Check Preferred Stock.

On November 4, 2013, the Company purchased all of the issued and outstanding common stock (“CSI Acquisition”) of Control Solutions International, Inc. (“CSI”), a Florida corporation, and its wholly owned subsidiary, Canada Control Solutions International, Inc., an Ontario, Canada corporation (“CCSI”), from NewCSI, Inc., a Delaware corporation (“NCSI”), and the shareholders of NCSI. The aggregate consideration paid was approximately \$3.5 million, payable in cash, common stock and a percentage of future gross profits. (See Note 14 - Acquisitions).

On January 3, 2014, the Company purchased all of the issued and outstanding common stock of Initio International Holdings Limited (“Initio”), a company organized under the laws of England and Wales, and its subsidiaries, including

Monroe Staffing Services, LLC, a Delaware limited liability company (“Monroe”) (Monroe together with all of Initio’s subsidiaries is the “Subsidiaries”). The aggregate consideration paid was approximately \$13.29 million, payable in cash, common stock and promissory notes. Subsequently, Initio was renamed Staffing 360 Solutions Limited (“Staffing (UK)”). (See Note 14 - Acquisitions).

Initio is a United Kingdom domiciled full-service staffing company with established brands in the U.K. and U.S. Initio’s U.K. division, Longbridge, was established in 1989 as an international multi-sector recruitment company with a long successful history of catering to the sales and marketing, technology, legal and IT solutions sectors. Initio’s U.S. division, Monroe, was established in 1969 as a full-service consulting and staffing agency serving companies ranging from Fortune 100 to new start-ups. Monroe has fifteen (15) offices and five (5) on-site locations throughout Connecticut, Massachusetts, Rhode Island, New Hampshire and North Carolina.

On February 28, 2014, the Company, through its wholly owned subsidiary, Staffing (UK), purchased substantially all of the business assets (“Poolia Acquisition”) of Poolia UK Ltd. (“Poolia UK”). All subsequent business activity is under a Staffing (UK) subsidiary. The aggregate consideration paid was £500,000 (“Fixed Consideration”), plus an amount equal to the net asset value at the completion date of the acquisition (“NAV Consideration,” together with the Fixed Consideration, collectively, the “Poolia Purchase Price”). The Fixed Consideration and a sum of £250,000, being an advance payment of the NAV Consideration, was paid at closing. On May 17, 2014, the Company purchased all of the issued and outstanding common stock of PeopleSERVE, Inc., a Massachusetts corporation (“PSI”), and forty-nine percent (49%) of the issued and outstanding common stock of PeopleSERVE PRS, Inc., a Massachusetts corporation (“PRS”) (PSI and PRS collectively are the “PS”). The aggregate consideration (“PS Purchase Price”) paid was approximately \$8.4 million. (See Note 14 - Acquisitions).

At closing, the Company paid: (i) cash of approximately \$2.7 million; (ii) 1,127,365 common stock shares based on the market closing price on the date of purchase of \$1.93 for a total fair value of approximately \$2.2 million; (iii) an unsecured promissory note in the amount of approximately \$2.4 million; and (iv) approximately \$1.1 million of Net Working Capital.

NOTE 2 – RESTRUCTURING PLAN AND IMPLEMENTATION

During the first and second quarters of fiscal 2015, the Company conducted a thorough review and evaluation of its business operations and strategies, a forecast for the staffing industry, and the business environment in general. The Company concluded that it was imperative to take immediate action to reduce short and medium-term debt service obligations, consulting/advisory agreements, employment costs and other corporate commitments that were overburdening the Company’s working capital and ability to fund continuing business operations, raise additional equity capital and/or debt, and execute its business plan. As such, on September 3, 2014, the Company formally established a Restructuring Committee, comprised of a Chairman and four (4) others selected from its board of directors to evaluate and formalize a Restructuring Plan. The Restructuring Plan was presented and adopted by the board of directors on September 3, 2014. Management planned to pursue each of the initiatives of the Restructuring Plan, some of which were contingent upon third parties’ acceptance of the restructuring terms and may not be fully achieved.

Cost Reduction or Restructuring Goals and Key Initiatives:

Certain targeted initiatives have been and are being achieved through the following actions:

Short- and Medium-term debt service: The approved Restructuring Plan authorized management to approach existing debt holders with this proposal. The Company offered equity in the form of common stock and/or warrants in exchange for conversion or deferral of existing notes/obligations. The Company exchanged equity with a fair value in excess of the aggregate amount of debt being extinguished. Upon execution of all necessary agreements, the Company recognized a loss on the transaction. In accordance with ASC 470-40-2, the difference between the reacquisition price of debt and the net carrying amount of the extinguished debt shall be recognized currently in the period of extinguishment as losses or gains. Gains and losses shall not be amortized to future periods. The modification expense was measured at fair value on the date of the agreement and recorded in accordance with ASC 470-40-2; and

Notes payable and Other debt obligations: The Restructuring Plan offered a meaningful incentive to outstanding Notes payable holders to convert their principal and accrued interest to common stock and/or warrants rather than a cash payment; Note holders converted \$3,056,030 of principal and interest to 3,358,391 common stock shares and 3,694,230 warrants exercisable for a term of ten (10) years at \$1.25. This action is anticipated to reduce the Company's future cash outflows by approximately \$889,000 in the calendar year of 2015, and by a further \$2,313,000 in the calendar year of 2016.

Modification of Series A Bonds: The Restructuring Plan modified the terms of the Series A Bonds conversion price from \$1.50 to \$1.00 with the intention of providing a meaningful incentive for the Series A Bond holders to convert their principal and interest to common stock and/or warrants on or before the maturity date of October 15, 2014, rather than redeem for cash; Bondholders converted \$3,709,655 of principal and interest to 3,709,687 common stock shares and 1,854,859 warrants exercisable for a term of three (3) years at \$2.00. The Company recorded a modification expense of \$2,927,959 related to changing the conversion price of these bonds.

Modification of Series B Bonds: The Restructuring Plan modified the terms of the Series B Bonds conversion price from \$1.50 to \$1.20 with the intention of providing a meaningful incentive for the Series B Bond holders to convert their principal and interest to common stock by the maturity date of September 15, 2015, rather than redeem for cash. No Bondholders have elected to convert as of May 31, 2015. The Company recorded a modification expense of \$154,489 related to changing the conversion price of these bonds;

o Earn-out liabilities: The Restructuring Plan offered a meaningful incentive to the Earn-out liability holders to convert their contingent future payments to common stock rather than cash payments. In conjunction with the sale of Cyber 360, effective January 1, 2015, the former shareholders of TRG were offered the opportunity and elected to convert their remaining Earn-out liability of \$1,134,050 into common stock shares at \$1.00 per share. As a result, the Company issued 1,134,050 common stock shares and recorded a gain on conversion of earn-out of

\$485,835 on February 27, 2015.

Operational and Corporate commitments: The approved Restructuring Plan authorized management to cancel various on-going consulting and employment agreements and incur certain costs associated with this restructuring. In accordance with ASC 470-25-12, which states, *a liability for costs to terminate a contract before the end of its term shall be recognized when the entity terminates the contract in accordance with the contract terms*. These amounts were recorded in the operating section of the Statement of Operations on a line item titled Reorganization of Business Expenses and a liability for the amount owed on the balance sheet.

F-9

Consulting agreements: The Company cancelled various on-going consulting agreements. The measurement date to record the expense was the date upon which the Company decided to cancel the agreement. The Company expensed \$73,875 as a result of the cancellation of these agreements. This action is anticipated to reduce the Company's future cash outflows by approximately \$432,000 in the calendar year of 2015.

Employment: The Company severed employment with an employee. The measurement date to record the expense was the date upon which the Company agreed to separate employment; The Company expensed \$691,966 related to the aforementioned severed employment. This action is anticipated to increase the Company's future cash outflows by approximately \$50,000 during the calendar year of 2015, and thereafter to reduce the Company's future cash outflows by approximately \$624,000 annually in perpetuity.

Restructuring fees: The Company estimated the cost associated with this restructuring to be approximately \$175,000. U.S. GAAP does not allow for a general accrual for restructuring costs. Therefore, any such costs have been and will continue to be expensed as incurred. To date, these fees have totaled \$792,650 and are properly classified in Professional fees - Restructuring.

Discontinued Operations

On January 27, 2015, the board of directors of the Company met without any representation of the officers, former owners or Earn-out liability holders of Cyber 360 and discussed the possibility of discontinuing the Cyber 360 operations. Their independent decision was that they approved and authorized the discontinuance of Cyber 360 operations and to move immediately thereafter towards selling the Cyber 360 operations. Subsequently, the Company presented an arm's length transaction to some of the former TRG owners. On February 27, 2015, the Company entered into a Stock Purchase Agreement to sell Cyber 360 to some of the former TRG owners with an effective date of January 1, 2015 for an aggregate purchase price of \$1.00 and the settlement of the remaining earn-out obligation under the original purchase agreement. In connection with the sale, all agreements executed in connection with the original acquisition of Cyber 360's business (previously known as The Revolution Group) in April 2013 ("Original Sale") and all obligations thereunder, except as set forth below, were terminated. As a result of the sale, the Company no longer owns Cyber 360, Inc. (FKA: Staffing 360 Group, Inc.), a Nevada corporation, or its subsidiary Cyber 360 Inc. (FKA: TRG), a Massachusetts corporation.

In connection with the sale and in full settlement of the remaining earn-out obligations, the Company issued 1,134,050 shares of the Company's common stock with a fair value of \$0.30 per share. These shares are entitled to customary piggy-back registration rights but are subject to a lock-up restriction until the earlier of February 27, 2016 or a sale, liquidation, merger or similar reorganization of the Company resulting in the exchange of all outstanding Company shares for other property.

Edgar Filing: Staffing 360 Solutions, Inc. - Form 10-K

In accordance with ASC 205-20, the results of the discontinued business have been presented as discontinued operations for the fiscal year ended May 31, 2015. Previously reported results for comparable periods in fiscal year 2014 have also been restated to reflect this reclassification.

The operational results of Cyber 360 are presented in the “Net income from discontinued operations” line item on the Condensed Consolidated Statements of Operations. The assets and liabilities of the discontinued business are presented on the Condensed Consolidated Balance Sheets as assets and/or liabilities from discontinued operations.

Other than consolidated amounts reflecting operating results and balances for both the continuing and discontinued operations, all remaining amounts presented in the accompanying condensed consolidated financial statements and notes reflect the financial results and financial position of the Company's continuing operations.

NOTE 3 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Year End and Principles of Consolidation

These consolidated financial statements and related notes are presented in accordance with generally accepted accounting principles (“GAAP”) in the United States, and are expressed in U.S. dollars. The Company’s consolidated fiscal year-end is May 31. Some of the Company’s subsidiaries have varying year-ends.

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. As described below, the Company consolidates PRS, an entity of which it owns 49%, since the Company is deemed to be

the primary beneficiary of this entity. All significant inter-company transactions are eliminated.

Variable Interest Entities

Current accounting guidance provides a framework for identifying a Variable Interest Entity (“VIE”) and determining when a company should include the assets, liabilities, non-controlling interests, and results of activities of the VIE in its consolidated financial statements. In general, a VIE is an entity or other legal structure used to conduct activities or hold assets that either (1) has an insufficient amount of equity to carry out its principal activities without additional subordinated financial support, (2) has a group of equity owners that are unable to make significant decisions about its activities, or (3) has a group of equity owners that do not have the obligation to absorb losses or the right to receive returns generated by its operations. Generally, a VIE should be consolidated if a party with an ownership, contractual, or other financial interest in the VIE has the power to direct the VIE’s most significant activities and the obligation to absorb losses or right to receive benefits of the VIE that could be significant to the VIE. A variable interest holder that consolidates the VIE is called the primary beneficiary. Upon consolidation, the primary beneficiary generally must initially record all of the VIE’s assets, liabilities, and non-controlling interest at fair value and subsequently account for the VIE as if it were consolidated based on majority voting interest. On May 17, 2014, the Company purchased 49% of the issued and outstanding common stock of PRS. Pursuant to ASC 810, PRS is deemed to be a variable interest entity since the Company is the primary beneficiary of PRS. Accordingly, the Company consolidated the results of PRS from May 17, 2014 through May 31, 2014 and May 31, 2015. As of May 31, 2015 the total assets and liabilities of PRS, which are consolidated, are \$2,531,166 and \$1,610,498, respectively. The total revenue and expenses consolidated for fiscal 2014 (since May 17, 2014) were \$300,879 and \$281,983, respectively, and for fiscal 2015 are \$11,176,809 and \$10,253,656, respectively.

Non-controlling Interests

Non-controlling interest in our subsidiary is recorded in accordance with the provisions of ASC 810 “Consolidation”, and is reported as a component of equity, separate from the parent company’s equity. Purchase or sale of equity interests that does not result in a change of control is accounted for as equity transactions. Results of operations attributable to the non-controlling interest is included in our consolidated results of operations and, upon loss of control, the interest sold, as well as interest retained, if any, will be reported at fair value with any gain or loss recognized in earnings.

Use of Estimates

The preparation of consolidated financial statements in accordance with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses in the reporting period. We regularly evaluate our estimates and assumptions related to valuation, impairment testing, Earn-out liabilities, stock-based compensation and deferred income tax assets valuation allowances. We base our estimates and assumptions on current facts, historical experience and various other factors that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources. The actual results experienced by us may differ materially and adversely from our estimates. To the extent there are material differences between our estimates and the actual results, our future results of operations will be affected. Significant estimates for the years ended May 31, 2015 and 2014, respectively, include the valuation of intangible assets, including goodwill, liabilities associated with earn-out obligations and testing our long-lived assets for impairment.

Cash and Cash Equivalents

The Company considers all highly liquid instruments with original maturities of three months or less when acquired, to be cash equivalents. The Company had no cash equivalents at May 31, 2015 or 2014.

Accounts Receivable

Accounts receivable are presented net of an allowance for doubtful accounts. The Company maintains allowances for doubtful accounts for estimated losses. The Company reviews the accounts receivable on a periodic basis and makes general and specific allowances when there is doubt as to the collectability of individual balances. In evaluating the

collectability of individual receivable balances, the Company considers many factors, including the age of the balance, a customer's historical payment history, its current credit-worthiness and current economic trends. Accounts are written off after exhaustive efforts at collection. At May 31, 2015 and 2014, the Company had an allowance for doubtful accounts of \$270,045 and \$561,311, respectively.

Income Taxes

The Company is governed by the Income Tax Law of the United States. The Company utilizes ASC Topic 740, "Accounting for Income Taxes," which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred income taxes are recognized for the tax consequences in future years of differences between the tax bases of assets and liabilities and their financial reporting amounts at each period end based on enacted tax laws and statutory tax rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized.

The Company applied the provisions of ASC 740-10-50, "Accounting for Uncertainty in Income Taxes", which provides clarification related to the process associated with accounting for uncertain tax positions recognized in the financial statements. Audit periods remain open for review until the statute of limitations has passed. The completion of review or the expiration of the statute of limitations for a given audit period could result in an adjustment to the Company's liability for income taxes. Any such adjustment could be material to the Company's results of operations for any given quarterly or annual period based, in part, upon the results of operations for the given period. As of the date of this filing, the Company is current on all corporate, federal and state tax returns.

The U.K. and Canadian domiciled entities file separate tax returns in their respective jurisdictions.

Foreign Currency Translation

Assets and liabilities of subsidiaries operating in foreign countries are translated into U.S. dollars using both the exchange rate in effect at the balance sheet date or historical rate, as applicable. Results of operations are translated using the average exchange rates prevailing throughout the year. The effects of exchange rate fluctuations on translating foreign currency assets and liabilities into U.S. dollars are included in a separate component of stockholders' equity (accumulated other comprehensive loss), while gains and losses resulting from foreign currency transactions are included in operations.

Amortization of Deferred Financing Costs

Costs incurred in connection with obtaining financing are deferred and amortized on a straight-line basis over the term of the related loan, which is not materially different than the effective interest method. As of May 31, 2015 and 2014, accumulated amortization of deferred financing costs totaled \$646,838 and \$1,006,383, respectively.

Business Combinations

In accordance with Accounting Standards Codification 805, "Business Combinations" ("ASC 805") the Company records acquisitions under the purchase method of accounting, under which the acquisition purchase price is allocated to the assets acquired and liabilities assumed based upon their respective fair values. The Company utilizes management estimates and, in some instances, may retain the services of an independent third-party valuation firm to assist in determining the fair values of assets acquired, liabilities assumed and contingent consideration granted. Such estimates and valuations require us to make significant assumptions, including projections of future events and operating performance.

Fair Value of Financial Instruments

In accordance with Accounting Standards Codification 820, “Fair Value Measurements and Disclosures” (“ASC 820”), the Company measures and accounts for certain assets and liabilities at fair value on a recurring basis. ASC 820 establishes a common definition for fair value to be applied to existing generally accepted accounting principles that require the use of fair value measurements, and establishes a framework for measuring fair value and standards for disclosure about such fair value measurements.

ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Additionally, ASC 820 requires the use of valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. These inputs are prioritized below:

- Level 1: Observable inputs such as quoted market prices in active markets for identical assets or liabilities
- Level 2: Observable market-based inputs or unobservable inputs that are corroborated by market data
- Level 3: Unobservable inputs for which there is little or no market data, which require the use of the reporting entity’s own assumptions.

The Company did not have any Level 2 or Level 3 assets or liabilities as of May 31, 2015 or 2014, with the exception of its notes payable (See Note 6), convertible notes payable (See Note 5), bonds payable (See Note 7) and its Earn-out liabilities (See Note 12).

Cash is considered to be highly liquid and easily tradable as of May 31, 2015 and 2014 and therefore classified as Level 1 within our fair value hierarchy.

Accounting Standards Codification 825-10-25, "Fair Value Option" (ASC 825-10-25) expands opportunities to use fair value measurements in financial reporting and permits entities to choose to measure many financial instruments and certain other items at fair value. The Company did not elect the fair value options for any of its qualifying financial instruments.

Convertible Instruments

The Company evaluates and accounts for conversion options embedded in its convertible instruments in accordance with accounting standards for "Accounting for Derivative Instruments and Hedging Activities."

Accounting standards generally provides three criteria that, if met, require companies to bifurcate conversion options from their host instruments and account for them as free standing derivative financial instruments. These three criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instrument are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur, and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument. Professional standards also provide an exception to this rule when the host instrument is deemed to be conventional as defined under professional standards as "The Meaning of Conventional Convertible Debt Instrument."

The Company accounts for convertible instruments (when it has determined that the embedded conversion options should not be bifurcated from their host instruments) in accordance with professional standards when "Accounting for Convertible Securities with Beneficial Conversion Features," as those professional standards pertain to "Certain Convertible Instruments." Accordingly, the Company records, when necessary, discounts to convertible notes for the intrinsic value of conversion options embedded in debt instruments based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note. Debt discounts under these arrangements are amortized over the term of the related debt to their earliest date of redemption. The Company also records when necessary deemed dividends for the intrinsic value of conversion options embedded in preferred shares based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note.

ASC 815-40 provides that, among other things, generally, if an event is not within the entity's control could or require net cash settlement, then the contract shall be classified as an asset or a liability.

Revenue Recognition

Control Solutions International Inc.: CSI recognizes revenue primarily on a time and materials basis as the services are performed and amounts are earned. The Company considers amounts earned once evidence of an arrangement has been obtained, services are rendered, fees are fixed or determinable, and collectability is reasonably assured.

Revenue earned in excess of billings is recorded as unbilled accounts receivable until billed. Billings in excess of revenue is recorded as advanced billings until revenue recognition criteria are met. Deposits and prepayments from customers are carried as deferred revenue until the requirements for revenue recognition are met.

Reimbursements, including those relating to travel, other out-of-pocket expenses and third-party costs, are not included in revenue. They are applied to Cost of services resulting in Cost of services reflecting the net amount of expenses not reimbursed by clients.

Staffing 360 Solutions (UK) Limited: Staffing (UK) and its various subsidiaries, follow paragraph 605-10-S99-1 of the FASB Accounting Standards Codification for revenue recognition. The Company recognizes revenue when it is realized or realizable and earned. The Company considers revenue realized or realizable and earned when all of the following criteria are met: (i) persuasive evidence of an arrangement exists, and (ii) the services have been rendered to the customer, and (iii) the sales price is fixed or determinable, and (iv) collectability is reasonably assured.

PeopleSERVE, Inc. and PeopleSERVE PRS, Inc.: PS recognizes revenue from the sale of staffing services as the services are performed, along with related labor costs and payroll taxes. The Company recognizes revenue for permanent employee placements when contractual contingencies, generally the passage of time, are satisfied. The Company's revenue recognition policies comply with ASC 605, "Revenue Recognition." The Company is the primary obligor in its transactions, and has responsibility for fulfillment, including the acceptability of services ordered and purchased by customers. In addition, the Company has all credit risk, retains substantially all risk and rewards of the services rendered, has sole discretion in staffing engagements and sets the billing rates of its consultants. Accordingly, the Company records all transactions at the gross revenue amount billed, consistent with the provisions of ASC 605. Typically, contracts require clients to pay for out-of-pocket expenses, principally travel related expenses. Accordingly, revenue includes amounts billed for these costs and the cost of revenue includes the corresponding actual costs. The Company provides certain customers a five percent (5.0%) discount on certain contracts if paid within thirty (30) days of the invoice date. Accounts receivable result from services provided to clients. The Company carries its accounts receivable at net realizable value. At the closing of the Company's fiscal period, a portion of receivables may not be invoiced. These unbilled receivables are typically billed within thirty (30) days of the close of the fiscal period.

Stock-Based Compensation

The Company accounts for stock-based instruments issued to employees in accordance with ASC Topic 718. ASC Topic 718 requires companies to recognize in the statement of operations the grant-date fair value of stock options and other equity based compensation issued to employees. The Company accounts for non-employee share-based awards in accordance with ASC Topic 505-50.

Earnings (Loss) per Common Share

The Company utilizes the guidance per FASB Codification ASC 260 - Earnings per Share ("ASC 260"). Basic earnings per share are calculated by dividing income available to stockholders by the weighted average number of common stock shares outstanding during each period. Diluted earnings per share are computed using the weighted average number of common stock shares and dilutive common share equivalents outstanding during the period. Dilutive common stock share equivalents consist of common shares issuable upon the conversion of convertible notes and the exercise of stock options and warrants (calculated using the modified treasury stock method). Such securities, shown below, presented on a common share equivalent basis and outstanding as of May 31, 2015 and 2014 have been excluded from the per share computations, since its inclusion would be anti-dilutive:

	For the Fiscal Year Ended May 31,	
	2015	2014
Convertible bonds - Series A	193,758	2,021,779
Convertible bonds - Series B	834,324	-
Convertible promissory notes	641,367	1,073,494
Convertible preferred shares	2,161,910	-
Warrants	12,459,029	6,760,809
Options	3,375,000	1,900,000
Total	19,665,388	11,756,082

Property and Equipment

Property and equipment are stated at cost. Depreciation is computed on the straight-line method. The depreciation and amortization methods are designed to amortize the cost of the assets over their estimated useful lives, in years, of the respective assets as follows:

Computers	3-5 years
Computer equipment	3-5 years
Network equipment	3-5 years
Software	3-5 years
Office equipment	3-7 years
Furniture and fixtures	3-7 years
Leasehold improvements	3-5 years

Amortization of leasehold improvements is computed using the straight-line method over the shorter of the life of the lease or the estimated useful life of the assets. Maintenance and repairs are charged to expense as incurred. Major improvements are capitalized. At the time of retirement or disposition of property and equipment, the cost and accumulated depreciation are removed from the accounts and any gains or losses are reflected in Other income/ (loss).

Long-Lived Assets

In accordance with ASC 360 - Property, Plant, and Equipment (“ASC 360”), the Company periodically reviews its long-lived assets, including goodwill and other intangible assets, for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be fully recoverable. The Company recognizes an impairment loss when the sum of expected undiscounted future cash flows will not be sufficient to recover an asset’s carrying amount. The amount of impairment is measured as the difference between the estimated fair value and the book value of the underlying asset.

Goodwill

Goodwill represents the excess of the purchase price over the fair value of net assets acquired in business combinations. ASC 350-30-35-4 requires that goodwill be tested for impairment at the reporting unit level (operating segment or one level below an operating segment) on an annual basis and between annual tests when circumstances indicate that the recoverability of the carrying amount of goodwill may be in doubt. Application of the goodwill impairment test requires judgment, including the identification of reporting units, assigning assets and liabilities to reporting units, assigning goodwill to reporting units, and determining the fair value. Significant judgments required to estimate the fair value of reporting units include estimating future cash flows, determining appropriate discount rates and other assumptions. Changes in these estimates and assumptions could materially affect the determination of fair value and/or goodwill impairment for each reporting unit. During fiscal years 2015 and 2014, the Company impaired \$0 and \$2,700,255, respectively, of goodwill associated with the Cyber 360 and CSI acquisitions.

In recording the purchase accounting for previous acquisitions the Company estimated the fair value of identifiable intangible assets and goodwill. In fiscal 2014, the Company retained the services of an independent valuation

consultant to test the previously estimated allocations. The valuation resulted in the revisions of the Company's estimated allocations which were retroactively reflected in the Company's consolidated financial statements for the fiscal year ended May 31, 2014. In fiscal 2015, the Company again retained the services of an independent valuation consultant to test the Goodwill and Intangible Assets values for the year ended May 31, 2015.

Goodwill represents the excess of the purchase price over the estimated fair market value of identifiable net assets at the date of acquisition in a business combination. Other intangible assets are identifiable assets that lack physical substance, which are acquired as part of a business combination or other transaction. Intangible assets with definite lives are amortized on a straight-line basis over their useful lives. Goodwill and other intangible assets with indefinite lives are not amortized and are tested for impairment at least annually.

The Company has the option to perform a qualitative assessment for impairment of its goodwill and indefinite-lived intangible assets to determine if it is more likely than not that the fair value of a reporting unit or indefinite-lived intangible asset is below its carrying value. If the Company determines based on a qualitative assessment that it is more likely than not that the fair value of a reporting unit or indefinite-lived intangible asset is greater than its carrying value, then it would not be required to perform the two-step quantitative impairment test described below. If necessary, the Company will perform a quantitative assessment for impairment of its goodwill and indefinite-lived intangible assets using the two-step approach.

The first step of the quantitative impairment test requires that the Company determine the fair value of each reporting unit and then compare that fair value to the reporting unit's carrying amount. The Company uses the income approach to determine the fair value of its reporting units. The Company applies a valuation technique consistent with the income approach to measure the fair value of its indefinite-lived intangible assets. The income approach is based on the present value of estimated discounted cash flows and terminal value projected for each reporting unit. The income approach requires significant judgments, including the projected results of operations, the weighted-average cost of capital ("WACC") used to discount the cash flows and terminal value assumptions. The projected results of operations are based on the Company's best estimates of future economic and market conditions, including growth rates, estimated earnings and cash expenditures. The WACC is determined based on the Company's capital structure, cost of capital, inherent business risk profile and long-term growth expectations, as reflected in the terminal value.

The second step of the quantitative impairment test is performed if the first step indicates that impairment exists. The second step of the impairment assessment involves allocating the reporting unit's fair value to all of its recognized and unrecognized assets and liabilities in order to determine the implied fair value of the reporting unit's goodwill and intangible assets as of the assessment date. The implied fair value of the reporting unit's goodwill and other intangible assets is then compared to the carrying amount of goodwill and other intangible assets to quantify an impairment charge as of the assessment date.

Based upon the results of the independent valuation, the Company did not impair or adjust the goodwill and intangible totals for the fiscal year ended May 31, 2015.

Intangible Assets

In connection with the CSI Acquisition (See Note 14 - Acquisitions), the Company identified and recognized an intangible asset of \$912,000 representing trade name, customer relationships and employment agreements/non-competes. The assets were being amortized on a straight line basis over their estimated life of four (4) years, other than the trade name which was amortized over fifteen (15) years. CSI customer relationships were valued based on the discounted cash flow method applied to projected future cash flows as estimated by Company management. This method resulted in the sum of the future net cash flows discounted to its present day value. The valuation provided for the trade name, customer relationships and employment agreements/non-competes was based on independent professional valuation services' calculations. The Company recorded amortization expense of \$91,099 and \$107,654 for the fiscal years ended May 31, 2015 and 2014, respectively. Based upon the impairment analysis performed as of November 30, 2014, the Company impaired the trade name, customer relationships and employment agreements/non-competes in the amount of \$703,222. The intangible asset balance, net of impairment and accumulated amortization, at May 31, 2015 and 2014 was \$0 and \$794,321, respectively.

In connection with the acquisition of Staffing (UK) (See Note 14 - Acquisitions), the Company identified and recognized an intangible asset of \$10,311,465 representing trade name, customer relationships and employment

agreements/non-competes. The assets are being amortized on a straight line basis over their estimated life of four (4) years, other than the trade name which is amortized over fifteen (15) years. Staffing (UK) customer relationships were valued based on an estimate of the discounted cash flow method applied to projected future cash flows as estimated by Company management. This method results in the sum of the future net cash flows discounted to its present day value. The valuation provided for the trade name, customer relationships and employment agreements/non-competes was based on independent professional valuation services' calculations. At May 31, 2015 and 2014, the intangible asset balance, net of accumulated amortization, was \$7,889,933 and \$9,599,250, respectively.

In connection with the Poolia Acquisition (See Note 14 - Acquisitions), the Company identified and recognized an intangible asset of \$465,321 representing customer relationships and employment agreements/non-competes. The assets are being amortized on a straight line basis over their estimated life of four (4) years. Poolia customer relationships were valued based on an estimate of the discounted cash flow method applied to projected future cash flows as estimated by Company management. This method results in the sum of the future net cash flows discounted to its present day value. The valuation provided for the trade name, customer relationships and employment agreements/non-competes was based on independent professional valuation services' calculations. At May 31, 2015 and 2014, the intangible asset balance, net of accumulated amortization, was \$319,908 and \$436,238, respectively.

In connection with the acquisition of PSI and PRS (See Note 14 - Acquisitions), the Company identified and recognized an intangible asset of \$2,999,100 representing trade name, customer relationships and employment agreements/non-competes. The assets are being amortized on a straight line basis over their estimated life of four (4) years, other than the trade name which is amortized over fifteen (15) years. PS customer relationships were valued using the discounted replacement cost approach. This method is based on acquisition costs invested to attract each customer and relied on the actual selling costs incurred and allocated to new customer generation over the preceding four (4) years. The valuation provided for the trade name, customer relationships and employment agreements/non-competes was based on independent professional valuation services' calculations. At May 31, 2015 and 2014, the intangible asset balance, net of accumulated amortization, is \$2,359,022 and \$2,973,497, respectively.

Recent Accounting Pronouncements

In April 2015, the FASB issued authoritative guidance regarding Interest - Imputation of Interest, which requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The guidance is effective for fiscal years and interim reporting periods within those years beginning after December 31, 2015, with early adoption permitted. The standard will be effective for the Company's fiscal year beginning April 1, 2016. The Company does not expect the adoption of this guidance to have a material effect on our consolidated financial statements.

The Company responded denying the material allegations and interposing numerous affirmative defenses. On October 8, 2014, NCSI filed a Motion of Summary Judgment (the "Motion"). On March 30, 2015, a Magistrate Judge of the District Court issued a Report and Recommendation that the District Court deny the Motion. The Recommendation became a final decision on April 13, 2015.

On December 31, 2014, NCSI filed an amended complaint to which NCSI added an additional count asserting an “Adjustment Event” had occurred requiring an acceleration of earn-out payments provided for in the CSI Stock Purchase Agreement of \$2,100,000, less amounts paid to date (\$1,670,635 at December 31, 2014), required should S360 or NCSI “be unable, or admit in writing, its inability, to its debts as they become due.” The Company responded denying the material allegations and interposing numerous affirmative defenses. The Earn-out liability was fully expensed at the time of the acquisition and fully accrued for on the Company’s balance sheet as part of the purchase accounting at the time of the acquisition.

The final pretrial conference in this matter was held April 22, 2015. A jury was selected on May 14, 2015, and the trial was held May 18-20, 2015. On May 20, 2015, the jury rendered a verdict, finding that S360 had not complied with SPA § 2.7 and owed \$154,433, but that NCSI had not proved that S360 or NCSI had become unable to pay debts as they came due. The Court had held that it was not a question for the jury to decide if damages for breach of SPA § 2.7 should include accelerated earn-out payments.

On June 3, 2015, NCSI filed a Motion for Entry of Judgment as Matter of Law seeking entry of a judgment in the amount of \$154, 433, plus accelerated earn-out payments in the amount of \$1,152,143, plus statutory interest. NCSI did not challenge the jury verdict on the ability to pay issue. Also on June 3, 2015, S360 filed a Motion for Entry of Judgment as a Matter of Law seeking entry of judgment against NCSI on the jury’s finding that it had not complied with SPA § 2.7, or, in the alternative, for a reduction of damages to \$54,452 and to hold that NCSI may not be awarded accelerated earn-out payments as that would result in an illegal penalty. As of July 1, 2015, the motions were fully briefed and submitted to the Court.

We believe that the Company acted in a manner consistent with our contractual rights, and we intend to aggressively defend the Company against this claim which we believe is not meritorious. Nevertheless, there can be no assurance that the outcome of this litigation will be favorable to the Company.

NOTE 15 - INCOME TAXES

The Company accounts for income taxes under ASC 740, “Expenses – Income Taxes”. ASC 740 requires the recognition of deferred tax assets and liabilities for both the expected impact of differences between the financial statements and the tax basis of assets and liabilities, and for the expected future tax benefit to be derived from tax losses and tax credit carry forwards. ASC 740 additionally requires the establishment of a valuation allowance to reflect the likelihood of realization of deferred tax assets. Realization is dependent upon future taxable income during the periods in which those temporary differences become deductible or are utilized. All of the Company’s tax returns have been filed through the fiscal year ended May 31, 2014. These returns remain subject to examination by major tax jurisdictions as of May 31, 2015.

The Company has not recorded a deferred tax liability with respect to its investment in certain foreign corporate subsidiaries as an exception to ASC 740, since the underlying earnings of the foreign subsidiaries are indefinitely reinvested in accordance with ASC 740-10-25-3(a)(1).

During previous fiscal years, the Company acquired both CSI and Monroe which businesses had acquired net operating losses aggregating approximately \$3,800,000. Pursuant to IRC section 382, the amount of taxable income that can be offset by these pre-acquisition net operating losses of both the Company and these subsidiaries is limited due to the change in ownership that occurred. The deferred tax asset derived from these tax loss carry-forwards have been included in the consolidated deferred tax asset from net operating losses shown below.

The table below summarizes the reconciliation of our income tax provision (benefit) computed at the statutory Federal rate and the actual tax provision:

As of May 31, 2015 the Company has a net operating loss (“NOL”) carry forward for income tax purposes of approximately \$11,168,000 expiring through the year 2035. The NOL’s may be available to reduce future years’ taxable income.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Included in the deferred tax

asset is the aforementioned NOL. The realization of the deferred tax assets is dependent on future taxable income. The Company is not able to predict if such future taxable income will be more likely than not sufficient to utilize the benefit. As such, The Company does not believe the benefit is more likely than not to be realized and they have recognized a full valuation allowance for those deferred tax assets. Management will review this valuation allowance periodically and make adjustments as necessary. The significant components of the deferred tax asset as of May 31, 2015 and 2014 are as follows:

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS.

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES.

Disclosure Controls and Procedures

We carried out an evaluation required by Rule 13a-15 of the Securities Exchange Act of 1934, as amended (“Exchange Act”) under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, of the effectiveness of the design and operation of the Company’s “disclosure controls and procedures” and “internal control over financial reporting” as of the end of the period covered by this Annual Report.

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act that are designed to ensure that information required to be disclosed in our reports filed or submitted to the SEC under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by the SEC’s rules and forms, and that information is accumulated and communicated to management, including the principal executive and financial officer as appropriate, to allow timely decisions regarding required disclosures. Our principal executive officer and principal financial officer evaluated the effectiveness of disclosure controls and procedures as of the end of the period covered by this Annual Report (“Evaluation Date”), pursuant to Rule 13a-15(b) under the Exchange Act. Based on that evaluation, our principal executive officer and principal financial officer concluded that, as of the Evaluation Date, our disclosure controls and procedures were not effective to ensure that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC’s rules and forms, and that such information is accumulated and communicated to management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure, due to material weaknesses in our control environment and financial reporting process.

Notwithstanding the existence of these material weaknesses, management believes that the consolidated financial statements in this annual report on Form 10-K fairly present, in all material respects, the Company’s financial condition as of the Evaluation Date, and results of its operations and cash flows for the Evaluation Date, in conformity with United States Generally Accepted Accounting Principles (GAAP).

Management's Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework Company to confirm what framework was used in connection with its evaluation of internal controls over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that

- a) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- b) provide reasonable assurance that transactions are recorded as necessary to permit the preparation of financial statements in accordance with generally accepted accounting principles and that receipts and expenditures of the Company are being made only in accordance with authorizations of the our management and directors; and
- c) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Based on our evaluation under the framework described above, our management concluded that our internal controls over financial reporting are not effective in accordance with Item 308(a)(3) of Regulation S-K and we had “material weaknesses” (as such term is defined below) in our control environment and financial reporting process consisting of the following as of the Evaluation Date:

- 1) inadequate segregation of duties consistent with control objectives;
- 2) ineffective controls over period end financial disclosure and reporting processes; and
- 3) lack of accounting personnel with adequate experience and training.

A “material weakness” is defined under SEC rules as a deficiency, or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of a company’s annual or interim financial statements will not be prevented or detected on a timely basis by the company’s internal controls.

As of the date of this Annual Report, the Company does not intend to remedy the foregoing and therefore such material weaknesses in our control environment and financial reporting process will continue. A system of controls, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the system of controls are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

Attestation report of the registered public accounting firm

This Annual Report does not include an attestation report of the Company’s independent registered public accounting firm regarding internal control over financial reporting. Management’s report was not subject to attestation by the Company’s independent registered public accounting firm pursuant to the rules of the SEC that permit the Company to provide only management’s report on internal control in this Annual Report.

Changes in Internal Control over Financial Reporting

No change in our system of internal control over financial reporting occurred during the fourth quarter of the fiscal year ended May 31, 2015 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

2014 Equity Plan

On January 28, 2014, our Board adopted the 2014 Equity Plan. This plan has not been approved by our stockholders. Under this plan, we may grant options to employees, directors, senior management of the company and, under certain circumstances, consultants. The purpose of the 2014 Equity Plan is to retain the services of the group of persons eligible to receive option awards, to secure and retain the services of new members of this group and to provide incentives for such persons to exert maximum efforts for the success of the company and its affiliates. A maximum of 2,500,000 shares of common stock has been reserved for issuance under this plan. The plan expires on January 28, 2024. Our board of directors will administer the plan unless and until the board of directors delegates administration to a committee, consisting of one or more members, that has been appointed by the board of directors, except that once our common stock begins trading publicly, the committee will consist solely of two or more outside directors as defined in the Treasury Regulations promulgated under Section 162(m) of the Internal Revenue Code of 1986, as amended. The authority to administer the 2014 Equity Plan currently resides with the Compensation Committee. (ii) In the event any surviving corporation or acquiring corporation does not assume or continue any option awards or substitute to similar stock awards, for those outstanding under the plan, then: (a) all unvested option awards will expire (b) vested options will terminate if not exercised at or prior to such change in control; or

(iii) Upon change in control the board of directors may, in its sole discretion, accelerate the vesting, partially or in full, in the sole discretion of the board of directors and on a case-by-case basis of one or more option awards as the board of directors may determine to be appropriate prior to such events.

Notwithstanding the above, in case of change in control, in the event all or substantially all of the shares of common stock of the company are to be exchanged for securities of another company, then each holder of an option award shall be obliged to sell or exchange, as the case may be, any shares such holder hold or purchased under the plan, in accordance with the instructions issued by the board of directors, whose determination shall be final.

In the event of termination of the option holders employment with the Company or any of its affiliates, or if applicable, the termination of services given to the Company or any of its affiliates by consultants of the Company or any of its affiliates for cause (as defined in the plan), all outstanding option awards granted to such option holder (whether vested or not) will immediately expire and terminate on the date of such termination and the holder of option awards will not have any right in connection to such outstanding option awards, unless otherwise determined by the board of directors.
