I. Operating Results and Financial Conditions 2008 First Half in Review

Looking back at the global economy in the first half of 2008, in the United States, housing investment remained lackluster during the period due to the subprime loan crisis while escalating crude oil prices led to slack consumer spending. In Europe, growth of consumer spending was sluggish due to a rise in prices, and exports suffered a slowdown due to the appreciation of the euro. Within Asia, although the effects of the U.S. and European economies resulted in a slight slowdown, the Asian economy, led by China, continued to realize a high rate of growth. In Japan, consumer spending floundered amid uncertainty over the future while export growth was limited due to the slowdown in the global economy and the appreciation of the yen.

As for the markets in which Canon operates, within the office imaging product market, amid the shift toward color models and advanced functionality, demand for network digital multifunction devices (MFDs) remained low primarily in the U.S. market due to the deterioration of the business climate. As for computer peripherals, including printers, demand for laser beam printers continued to display growth, mainly for color models. With regard to inkjet printers, demand continued to shift from single-function to multifunction models amid fierce price competition within the market. Within the digital camera segment, demand for digital single-lens reflex (SLR) cameras and digital compact cameras grew steadily during the term. In the optical equipment segment, while demand for steppers, utilized in the production of semiconductors, remained low due to restrained facility investment by device manufacturers, the market for aligners, used to produce liquid crystal display (LCD) panels, improved dramatically thanks to a recovery in capital spending by LCD panel manufacturers. The average value of the yen for the first half was ¥104.69 to the U.S. dollar, a year-on-year appreciation of about 13%, and ¥160.69 to the euro, approximately the same level as the year-ago period.

Amid these conditions, Canon has been working steadily to strengthen the company s management foundation by bolstering competitiveness in each business field through management innovations. During the first six months of the year, sales volumes of digital cameras, color network MFDs and other products increased supported by the enhancement of market share and recording sales increases on a local-currency basis. The negative effect, however, of the sharp and sudden appreciation of the yen against the U.S. dollar resulted in consolidated net sales for the first half of \(\pmax2,113.4\) billion (U.S.\(\pmax19,938\) million), a year-on-year decrease of 2.5\%. Despite the continued launch of new products and ongoing cost-cutting efforts, the gross profit ratio for the first half was 49.3%, a decline of 1.8 points due to such factors as the rapid appreciation of the yen against the U.S. dollar and escalating resource and materials costs. As such, first-half gross profit declined by 6.0% to \(\pm\)1,041.5 billion (U.S.\(\pm\)9,825 million) from the year-ago period. While R&D expenditures grew by 3.1% compared with the same period for the previous year, group-wide expense-reduction efforts supported a decrease in operating expenses of 1.1% year on year. Consequently, operating profit in the first half totaled ¥331.0 billion (U.S.\$3,122 million), a decline of 14.9% compared with last year. Other income (deductions) decreased by ¥9.0 billion (U.S.\$85 million), mainly due to a reduced interest income and a drop in earnings on investments in affiliates accounted for by the equity method. As a result, while income before income taxes and minority interests for the first half totaled ¥339.2 billion (U.S.\$3,200 million), a decline of 16.5%, and first-half net income also recorded a decrease of 15.9% to ¥214.5 billion (U.S.\$2,023 million), the net income ratio, at 10.1%, remained at a double-digit level.

Basic net income per share for the first half was \(\frac{\pm}{170.08}\) (U.S.\(\frac{\pm}{1.60}\)), a year-on-year decline of \(\frac{\pm}{24.30}\) (U.S.\(\pm\)0.23).

Results by Product Segment

Reviewing first-half consolidated results by business sector, within the business machine segment, despite sales growth for such products as the competitively priced iR C3580 series of color network digital MFDs, the appreciation of the yen along with restrained investment in office equipment as a result of concerns regarding business performance had a negative impact on sales led by the U.S. market. Consequently, business machine sales overall declined by 5.3% year on year. In the field of computer peripherals, despite a steady increase in sales of laser beam printers on a local-currency basis, the significant impact of the yen—s appreciation against the U.S. dollar resulted in a decrease in sales of 3.9% from the year-ago period. As for inkjet printers, however, home-use multifunction models such as the PIXMA MP610, as well as business-use MFDs equipped with a facsimile function, recorded an increase in unit sales with sales of related consumables also expanding, which contributed to a sales increase of 2.8% despite the impact of the yen—s appreciation. As a result, first-half profit for computer peripherals overall declined by 2.3%. As for business information products, a drop in demand for personal computer sales in the Japanese domestic market resulted in a reduction in sales of 12.6%. Collectively, sales of business machines overall during the term totaled \(\frac{\frac{1}{2}}{3}, and willion), dropping 4.0% from the year-ago period. Operating profit for the segment totaled \(\frac{1}{2}303.0 billion (U.S.\(\frac{1}{2}\)38.9 million), a year-on-year decrease of 9.7%, as a result of lower gross profit ratio due to the appreciation of the yen.

Within the digital camera segment, the high-resolution, competitively priced EOS Digital Rebel XSi and advanced-amateur model EOS 40D contributed to robust sales while also boosting sales of interchangeable lenses and other accessories. Sales volume of digital compact cameras also maintained stable growth, bolstered by the launch of 7 new models, including 4 new stylish ELPH (IXUS)-series models and 3 new PowerShot-series models that cater to a range of photographic demands. As a result, while year-on-year sales volume for digital cameras rose by 16%, overall camera sales for the first half grew by only 1.9% from the year-ago period to ¥529.4 billion (U.S.\$4,994 million) due to the dramatic appreciation of the yen against the U.S. dollar along with fierce price competition. Additionally, operating profit for the camera segment decreased by 18.0% year on year to ¥112.6 billion (U.S.\$1,062 million) as a result of the significant decline in the gross profit ratio for the sector.

In the optical and other products segment, while sales of aligners, used to produce LCD panels, gained momentum owing to a recovery in demand by LCD panel manufacturers, sales of steppers, used in the production of semiconductors, remained stagnant throughout the period due to market shrinkage. As a result, sales for the segment totaled ¥195.0 billion (U.S.\$1,840 million), a year-on-year decrease of 2.8%, while operating profit for the segment fell by 74.2% to ¥5.5 billion (U.S.\$52 million).

Cash Flow

In the first half of 2008, Canon generated cash flow from operating activities of \(\pm\)335.6 billion (U.S.\(\pm\)3,166 million), a decrease of \(\pm\)104.7 billion (U.S.\(\pm\)988 million) compared with the corresponding period for last year, reflecting the decrease in net income. Cash flow from investing activities totaled \(\pm\)289.5 billion (U.S.\(\pm\)2,732 million), a year-on-year increase of \(\pm\)80.2 billion (U.S.\(\pm\)756 million), due to such factors as aggressive facility investment to reinforce production capabilities and the payment to acquire shares of Hitachi Displays, Ltd. toward the launch of Canon s display business. As a result, free cash flow totaled \(\pm\)46.1 billion (U.S.\(\pm\)435 million), deteriorating by \(\pm\)184.9 billion (U.S.\(\pm\)1,744 million).

Cash flow from financing activities recorded an outlay of ¥85.0 billion (U.S.\$802 million), mainly resulting from the dividend payout of ¥75.7 billion (U.S.\$714 million). Consequently, cash and cash equivalents decreased by ¥78.1 billion (U.S.\$736 million) to ¥866.4 billion (U.S.\$8,174 million) from the end of the previous year, including the ¥39.2 billion (U.S.\$369 million) negative impact of currency translation due to the appreciation of the yen against the U.S. dollar.

Non-consolidated Results

While first-half non-consolidated net sales totaled \(\pm\)1,395.3 billion (U.S.\(\pm\)13,164 million), a year-on-year increase of 1.8%, ordinary profit declined by 15.2% to \(\pm\)256.2 billion (U.S.\(\pm\)2,417 million) and net income fell by 16.2% to \(\pm\)168.4 billion (U.S.\(\pm\)1,589 million) due to the impact of foreign currency exchange rates, which also had a similar impact on the company s consolidated financial results.

Outlook

As for the outlook for the global economy in the third quarter and thereafter, fallout from the subprime loan crisis, including financial instability and escalating prices of crude oil and raw materials, have led to rising anxiety over an economic slowdown and uncertainty about the future. Amid this environment, while the economic slowdown is likely to continue among developed countries for the time being, these economies are expected to gradually move toward recovery as the effects of financial policies and economic stimulus measures in the U.S. and other countries begin to materialize from the end of the year. As for emerging-market economies, including those of Asia and Russia, despite the negative economic influence of developed countries, these regions are expected to continue enjoying high rates of growth.

In the businesses in which the Canon is involved, the market for digital SLR and digital compact cameras is projected to continue achieving healthy expansion amid intensifying price competition. Demand for color network digital MFDs and color laser beam printers is also expected to remain solid amid continued price competition and shifting market demand toward lower priced models. While the market for steppers will likely remain depressed, the market for aligners is expected to stage a healthy recovery owing to large-scale facility investment by LCD panel manufacturers. As for currency exchange rates from the third quarter onward, on which Canon s performance outlook for the full year is based, while uncertainty over future interest rate policies and economic prospects for major countries is likely to continue, Canon anticipates exchange rates of ¥105 to the U.S. dollar and ¥165 to the euro, representing year-on-year appreciation of approximately 9% against the U.S. dollar and depreciation of about 1% against the euro. Upon taking into consideration first-half business results as well as the expected business climate based on these foreign exchange rate assumptions, the company has slightly revised its projected consolidated net sales upwards to ¥4,590.0 billion (U.S.\$43,302 million), while maintaining earlier announced projections for operating profit of ¥770.0 billion (U.S.\$7,264 million), income before income taxes and minority interests of ¥785.0 billion (U.S.\$7,406 million), and net income of ¥500.0 billion (U.S.\$4,717 million).

Basic Policy Regarding Profit Distribution

Canon is being more proactive in returning profits to shareholders, mainly in the form of a dividend, taking into consideration planned future investments, free cash flow, and the company s consolidated business performance. Specifically, Canon s medium- to long-term objective is to continuously strive to raise its consolidated payout ratio to approximately 30%.

The company plans to distribute a full-year dividend for fiscal 2008 totaling \(\frac{\pma}{110.00}\) (U.S.\(\frac{\pma}{1.04}\)), comprising an interim dividend of \(\frac{\pma}{55.00}\) (U.S.\(\frac{\pma}{0.52}\)) per share, and a year-end dividend of \(\frac{\pma}{55.00}\) (U.S.\(\pma\).

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management s views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, or should and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many

factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon s targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon s annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.

II. Management Policy

(1) Basic Policy

Under the corporate philosophy of *kyosei* living and working together for the common good Canon s basic management policy is to contribute to the prosperity and well-being of the world while endeavoring to become a truly excellent global corporate group targeting continued growth and development.

(2) Management Goals

Based on this basic management policy, Canon launched two consecutive five-year management plans Phase I of its Excellent Global Corporation Plan in 1996, and Phase II in 2001 with the aim of becoming a truly excellent global corporation. Through these two management plans, the company promoted a range of management reforms, thoroughly strengthening its product competitiveness and financial base. Since 2006, under a new five-year management plan Phase III, which targets further growth and improved corporate value Canon is pursuing sound growth, making use of the solid management foundation achieved through the two preceding plans, and further expanding its corporate scale while maintaining a high level of profitability. In particular, the company is focusing on the following five important management objectives.

- 1) Achieving the overwhelming No. 1 position worldwide in all current core businesses
- 2) Expanding business operations through diversification
- 3) Identifying new business domains and accumulating required technologies
- 4) Establishing new production systems to sustain international competitiveness
- 5) Nurturing truly autonomous and strong individuals promoting everlasting corporate reforms

(3) Business Challenges and Countermeasures

At Canon, the creation of new businesses and maintaining a high profitability structure represent two very important management objectives to ensure continuous future growth.

As for new businesses, the company is promoting research based on leading-edge technologies in its areas of expertise, such as biotechnology, nanotechnology and life sciences. At the same time, Canon is also looking into M&A opportunities and business tie-ups toward launching such businesses. Additionally, the company aims to enter the display business, moving away from a focus on still images while strengthening the ability to deliver video images, which will play an increasingly important role in the broadband era.

With regard to maintaining the company s current high profitability structure, in order to effectively respond to the intensifying price competition centered on the consumer goods market and the investment burden that accompanies the launch of competitive new businesses, Canon believes that it is important to further improve the profit-earning ability of current businesses. To facilitate this, the company is promoting the development of new products and actively carrying out cost-reduction activities.

Canon also views its approach to the environment as an important management issue. From the product planning stage through to design, development, production, sales, use, recovery and recycling, the company focuses its energies on such areas as creating environmentally conscious products that realize energy efficiency, resource efficiency, and eliminate the use of hazardous substances. Additionally, Canon actively promotes the development of recycling systems, the expansion of green procurement policies, the disclosure of environmental information, and participation in environmental conservation activities at the community level.

Notes: 1. The primary products included in each of the product segments are as follows:

Business machines:

Office imaging products: Office network digital multifunction devices (MFDs) / Color network digital

MFDs /

Office copying machines / Personal-use copying machines / Full-color copying

machines

Computer peripherals: Laser beam printers / Inkjet multifunction peripherals / Single function inkjet

printers / Image scanners

Business information products: Computer information systems / Document scanners / Personal

information products

Cameras: Digital SLR cameras / Digital compact cameras / Interchangeable lenses / Digital video

camcorders

Optical and other products: Semiconductor production equipment / Mirror projection mask aligners for

LCD panels / Broadcasting equipment / Medical equipment / Large format

printers / Components

2. The principal countries and regions included in each regional category are as follows:

Americas: United States of America, Canada, Latin America / Europe: England, Germany, France, Netherlands /

Other Areas: Asian regions, China, Oceania

NON-CONSOLIDATED

14. STANDARD FOR ALLOWANCES

(Parent company only)

Accrued long service rewards for employees

Accrued long service rewards is maintained based on expected amounts to cover the rewards payable under the byelaw applied to long-service employee.

15. CHANGES OF BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

(Parent company only)

Note to change in Accounting Policy

The Company has a byelaw for Refresh Leave to grant long service reward and refresh leave at a regular period to the employees who have been serving the company for long years in order to refresh mind and body as well as generating new energy. As the significance of amounts rose due to the increase in numbers of employees, and reinforcement of attendance record systems enabled to estimate the rational amounts of reward payable, the company changed the accounting policy for long service reward from the expense of the term in which the reward was paid, to recognization of accrued long service reward based on expected amounts under the byelaw from this interim accounting period, in order to calculate periodical profit and loss more appropriately. As a result, operating profit, ordinary profit and income before taxes have decreased by JPY 1,232million, and net income has decreased by JPY 739 million for the interim accounting period ended June 30, 2008.

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management s views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe. estimate. or should and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon s targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon s annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.

^{*} Figures related to analog personal copying machines, which were included in Monochrome copying machines of Office imaging products, are now included in Others of Office imaging products. Past figures have been reclassified to conform with the new presentation.

^{*} The segment previously named
Film cameras / Lenses
is now named
Interchangeable lenses
and others.
