Kazakhtelecom expands its Gilat VSAT network to include cellular backhaul solution

Petah Tikva, Israel, October 28, 2009 Gilat Satellite Networks Ltd. (Nasdaq: GILT) today announced that its long-time customer Kazakhtelecom JSC, (KT), has added Gilat's cellular backhaul solution to its satellite communications network. KT is Kazakhstan's largest telecommunications operator. Gilat is the largest provider of satellite communications networks in Kazakhstan.

Gilat integrated its SkyAbis cellular backhaul solution with Huawei's native IP 3G base stations to enable KT's expansion of communications services to regions where it was not economically feasible before. The cellular backhaul solution will be deployed at an initial 36 base station sites to provide the country's remote citizens with high-quality telephony and data services similar to those offered in more highly developed regions of the country. Gilat's cellular backhaul solution has been successfully tested for integration within Huawei's 2G and 3G BSS platforms.

Since 1998, KT has been deploying Gilat VSATs to provide telephony and broadband Internet services for businesses and consumers in remote locations nationwide. Part of this deployment serves KT's Universal Service Obligation.

Gilat's solution for cellular backhaul, based on the Gilat SkyEdge and SkyEdge II multi-service platforms, enables operators to deploy hybrid networks that extend the reach of their terrestrial and cellular infrastructure to remote communities. Gilat's solution features traffic optimization and dynamic bandwidth allocation for GSM, CDMA 2000 and UMTS backhaul, with much higher space-segment efficiencies when compared to SCPC.

Gilat's SkyEdge and SkyEdge II platforms can be deployed quickly in harsh terrain and perform well in severe weather conditions—important attributes for many remote Kazakhstan villages, where the mountainous terrain and cold weather make it difficult to implement a communications infrastructure.

Our selection of Gilat's integrated VSAT-based cellular backhaul solution is based on Gilat's proven record for providing us with advanced satellite communications technology and dedicated customer support," said KT Chief Technical Director Lezgovko Aleksandr Vladimirovich. "By extending our services to improve communications connectivity in Kazakhstan, we expect to help improve productivity for numerous consumers and businesses. Our ongoing relationship with Gilat has helped us build a significant customer base as we continue to provide superior telecommunications services."

Arie Rozichner, Gilat's Regional Vice President, Eurasia, said, "This new development with KT is a good example of how Gilat partners with its customers to provide custom, integrated solutions that fit their specific requirements. In this case, Gilat combined its advanced satellite communications technology with its CDMA 2000 cellular backhaul application. This provides KT with a solution that can increase its business and service offering, while opening the door to new telecommunication markets and growth opportunities."

Gilat's SkyEdge and SkyEdge II multi-service platforms enable the delivery of high-quality voice, broadband data and video services for different environments including enterprises, rural networks, cellular backhaul and government network applications. Gilat's diverse portfolio of VSATs offers service providers a most suitable product choice for their application needs as well as the flexibility to evolve their networks. The newest addition to Gilat's SkyEdge II portfolio is NetEdge, a dedicated solution for multi-star networks, specifically designed to meet the needs of corporate networks and cellular backhaul applications.

About Kazakhtelecom JSC

Kazakhtelecom JSC (KT) is Kazakhstan's largest provider of telecommunications services. As an international operator, KT maintains close cooperation with 154 overseas operators and 23 operators in the CIS and Baltic states, ensuring communication with more than 230 countries worldwide. In addition to serving a wide range of businesses and government agencies, KT serves more than two million urban telephone subscribers and more than 450,000 rural households. For more information, please visit KT at www.telecom.kz.

About Gilat Satellite Networks Ltd.

Gilat Satellite Networks Ltd. (Nasdaq: GILT) is a leading provider of products and services for satellite-based communications networks. The Company operates under three business units: (i) Gilat Network Systems, a provider of network systems and associated professional services to service providers and operators worldwide; (ii) Spacenet Inc., a provider of managed services in North America to the business and government segments; and (iii) Spacenet Rural Communications, a provider of rural telephony and Internet access solutions to remote areas primarily in Latin America.

Edgar Filing: GILAT SATELLITE NETWORKS LTD - Form 6-K

Gilat was founded in 1987 and has shipped over 750,000 Very Small Aperture Terminals (VSATs) to more than 85 countries across six continents. Gilat's headquarters is located in Petah Tikva, Israel. The Company has 16 sales and service offices worldwide. Gilat markets a full line of high-performance VSATs under the SkyEdge™ and SkyEdge II Product Family.
