II capital adequacy framework

31 March 2008 ratios have not been restated to include HSBC Financial.

Financial Commentary

Overview

HSBC Bank Canada recorded net income attributable to common shares for the three months ended 31 March 2009 of C\$85 million, a decrease of 52.8 per cent compared to C\$180 million reported in the same period in 2008, and a decrease of C\$30 million, or 26.1 per cent, from C\$115 million for the fourth quarter of 2008.

This includes the results o

f

the Consumer Finance

b

usiness

which made a net loss attributable to

common

share

311

s of

\$16 million in the first quarter of 2009 compared to net income attributable to

common

share

S

of

C

\$25 million reco

r

ded in the same period of 2008

and

C

\$9 million in the fourth quarter of 2008.

Commenting on the results, Lindsay Gordon, President and Chief Executive Officer of HSBC Bank Canada

, said:

"

Canada

, along with

most developed economies

is in recession and this inevitably affected our results in the first quarter. Credit provisions increased and net interest margins declined due to falling interest

rates and a very competitive market for deposits.

While t

he economic outlook for the

rest of 2009

remains challenging, we remain committed to supporting our

core

customer

relationships and focusing on costs in a less certain environment for revenues

. We have a strong

and liquid

balance sheet

further

enhanced by a successful preferred share offering completed

after

the quarter end

, and remain committed to maintaining our traditional financial strength.

,,

Net interest income

Net interest income for the three months ended 31 March 2009 was C\$350 million compared with C\$425 million for the same period last year, a decrease of C\$75 million, or 17.6 per cent. Although average interest earning assets decreased only marginally to C\$62.4 billion from C\$62.9 billion, there was a considerable decrease in net interest margin to 2.27 per cent compared with 2.72 per cent in 2008.

Net interest income from banking operations, which consists of Personal Financial Services, Commercial Banking and Global Banking and Markets, decreased by C\$49 million and net interest margin decreased to 1.73 per cent in the quarter from 2.08 per cent in the same period last year. Multiple reductions in prime interest

rates during 2008 and 2009 resulted in reduced interest income on our floating rate loans, which was not offset by an equal reduction in interest expense as our deposit

rates

repriced downwards

more slowly

. Also impacting net interest margin was the reduction in the value of interest free funds and low interest deposits in a falling interest rate environment as well as the lower rates earned on government and other securities. Wider credit spreads experienced across the banking industry also adversely impacted the relative cost of wholesale funding compared with the same period in the prior year. The reduction in average interest earning assets reflected

the sale of the automobile loan portfolio in July 2008. Net interest income for the Consumer Finance business decreased by C\$26 million compared to the same quarter in 2008 mainly as a result of a reduction in average receivables including consumer finance automobile and other loans.

Net interest income for the first quarter of 2009 was C\$25 million, or 6.7 per cent lower compared with the fourth quarter of 2008 of which C\$18 million arose from banking operations and C\$7 million from

 \mathbf{C}

onsumer

F

inance

business

. Although average interest earning assets increased to C\$62.4 billion from C\$61.1 billion in the previous quarter, this was offset by a 17 basis points reduction in net interest margin to 2.27 per cent. This was primarily as a result of factors noted above, particularly further reductions in the prime rate recorded in the first quarter of 2009 and lower yields on securities.

Non-interest revenue

For the three months ended 31 March 2009, non-interest revenue was C\$243 million, C\$4 million, or 1.7 per cent, higher compared with C\$239 million for the same period last year.

Revenues from customer banking activities, including deposit and payment service charges, trade finance and credit fees, were comparable to the prior year reflecting the underlying strength and robustness of our core banking business. Securiti

S

ation income increased, partially due to increased activity

and

falling interest rates

also genera

ted

a benefit

Volatility in market interest rates and credit spreads continued to affect the valuation of trading assets and liabilities, which have significantly impacted reported results.

Trading revenue was higher mainly as a result of the impact of mark to market gains from interest rate derivatives used as economic hedges

. These gains were

offset by the impact of narrowing credit spreads on the value of certain debt obligations recorded at fair value

. This generated

a charge to income in the first quarter of

2009 of

C\$9 million compared to a credit of C\$18 million in the first quarter of 2008. Capital market fees were higher due to increased underwriting activity in 2009, particularly from Canadian Bank preferred share and public sector debt issues. Investment administration fees were lower

reflecting the reduced

market values of customer portfolios.

A

s a result of

further

economic

weakness

in the first quarter of 2009, the bank recorded, as a reduction of other income, a provision of C\$20 million in respect of

a loss

contingency arising from a transa

c

tion occurring in a previous year.

Non-interest revenue

in the first quarter of 2009

was C\$20 million or 9.0 per cent higher compared with C\$223 million in the last quarter of 2008.

A C\$1 million

provision for other than temporary impairment of available-for-sale securities

has been recorded

during

the quarter

compared to an impairment of C\$49 million on Canadian non-bank

S

ponsored Asset Backed Commercial Paper ("non-bank ABCP") and provisions for other than temporary impairment of available-for-sale securities of C\$8 million that were recorded in the fourth quarter of 2008. Securiti

S

ation income

in the first quarter of 2009

was C\$13 million higher

than the fourth quarter of 2008

due to increased activity as well as the continuing benefit from falling interest rates. Trading revenue was C\$28 million lower than the fourth quarter of 2008. Higher mark

to

market gains

in the first quarter of 2009

from interest rate derivatives used for economic hedges and balance sheet management were offset by very strong foreign exchange revenue arising from volatile foreign exchange markets and the favourable impact of foreign currency funding in a lower interest rate environment in the fourth quarter of 2008. Trading revenue was also adversely impacted

in the first quarter of 2009

by C\$9 million arising from the impact of narrowing credit spreads on the value of certain debt obligations recorded at fair value compared to a credit of C\$73 million recorded in the fourth quarter of 2008. Other non-interest revenue in the first quarter of 2009 was negatively impacted by the effect of the

loss

contingency

referred to above.

There was no material income statement impact

arising from

the restructuring of the

bank's

non-bank

ABCP a

s a result of

t

he implementation of the Montreal Accord in the first quarter of 2009.

For further details on the restructuring plan, refer to the first quarter 2009

r

eport to

S

hareholders.

Non-interest expenses

For the three months ended 31 March 2009, non-interest expenses were C\$291 million compared with C\$310 million for the same period last year, a decrease of C\$19 million, or 6.1 per cent. Salaries and benefits were lower, reflecting a lower number of staff, particularly in the Consumer Finance business

as a result of changes in its branch network

. Premises costs increased

modestly, in part as

a

result of

increase

d

amorti

S

ation costs. Other non-interest expenses were lower due to reductions in a number of expense categories, particularly IT expenses and marketing.

The cost efficiency ratio for the first quarter of 2009 increased to 49.1 per cent from 46.7 per cent in the same period in 2008, as a result of the decrease in total revenue.

Non-interest expenses for the first quarter were C\$291 million compared to C\$295 million for the fourth quarter of 2008. Salaries and benefits were higher due to

reduced

variable compensation recorded in the fourth quarter of 2008 as well as

lower

pension and benefits expenses arising from the release of the pension plan valuation allowance. Premises and equipment expenses were

in line with

the fourth quarter of 2008. Other expenses were C\$2

7

million lower as a result of lower marketing expenditure

s and an increased focus on

containment initiatives on other discretionary expenditures.

The cost efficiency ratio improved slightly from 49.3 per cent in the fourth quarter of 2008 to 49.1 per cent in the current period.

Credit quality and provision for credit losses

For the three months ended 31 March 2009, the provision for credit losses was C\$161 million compared with C\$75 million for the same period in 2008 and C\$136 million recorded in the fourth quarter of 2008. Included in these amounts were provisions of

C

\$77 million

f

or the three months ended 31 March 2009

related to the C

onsumer

F

inance

business

compared with C\$

50 million and

C

\$57

million for the same period in 2008 and

for

the fourth quarter of 2008

respectively

. The

se

increase

S

ha

ve

been driven by continuing economic weakness and deterioration in credit conditions for certain borrowers as well as deterioration in the Consumer Finance business sector.

Gross impaired credit exposures were C\$1,157 million compared with C\$932 million at 31 December 2008, and C\$467 million at 31 March 2008. Total impaired exposures, net of specific allowances for credit losses, were C\$923 million at 31 March 2009 compared with C\$770 million at 31 December 2008 and C\$366 million at 31 March 2008.

The general allowance for credit losses of C\$475 million at 31 March 2009 is C\$22 million higher than C\$453 million at 31 December 2008 and C\$37 million higher than C\$438 million at 31 March 2008 mainly due to higher provisions in the Consumer Finance business due to worsening economic conditions. The total allowance for credit losses, as a percentage of loans and acceptances outstanding, was 1.46 per cent at 31 March 2009 compared with 1.24 per cent at 31 December 2008 and 1.06 per cent at 31 March 2008. The bank considers the total allowance for credit losses to be appropriate given the credit quality of its portfolios and the current credit environment.

Income taxes

The effective tax rate in the first quarter of 2009 was 28.9 per cent, which compared to 32.6 per cent in the same quarter of 2008 and 23.8 per cent in the fourth quarter of 2008, which benefited from the non-taxable release of a pension plan allowance.

Balance sheet

Total assets at 31 March 2009 were C\$70.1 billion, a decrease of C\$1.9 billion from 31 December 2008, and C\$1.6 billion from 31 March 2008.

Global and credit market conditions have caused a tightening of available credit, as well as an extremely competitive environment for both personal and commercial deposits.

Commercial loans decreased by C\$0.

6

billion from the end of 2008. Residential mortgage originations decreased by C\$0.2 billion and

, when combined with a C\$0.2 billion increase in securiti s ations in the first quarter of $2009\,$,

resulted in an overall decrease of C\$0.4 billion. Consumer loans and personal lines of credit in the

Р

ersonal

F

inancial

S

ervices business were up slightly to C\$5.4 billion while receivables of the Consumer Finance business decreased by C\$0.2 billion. Liquidity remained strong at 31 March 2009, with more than C\$17.0 billion of securities and reverse repurchase agreements compared to C\$17.5 billion at 31 December 2008 and C\$14.8 billion at 31 March 2008.

Total deposits decreased by C\$2.2 billion to C\$49.8 billion at 31 March 2009 from C\$52.0 billion at 31 December 2008 and were C\$0.2 billion lower compared with C\$50.0 billion at 31 March 2008. Personal deposits grew by C\$1.0 billion over 31 December 2008 mainly driven by growth in the number of High Rate and Direct Savings accounts, while

higher cost

wholesale deposits decreased by C\$2.5 billion as a result of lower client borrowings and securiti

S

ations of C\$1.3 billion

.

Total assets under administration

Funds under management were C\$21.5 billion at 31 March 2009 largely unchanged from C\$21.3 billion at 31 December 2008. However, declines in equity markets during 2008 caused a decrease from C\$26.3 billion at 31 March 2008. Including custody and administration balances, total assets under administration were C\$30.8 billion compared with C\$30.5 billion at 31 December 2008 and C\$37.3 billion at 31 March 2008.

Capital management

and regulatory capital ratios

C apital a dequacy ratios calculated in accordance with the Basel II framework were 10. 2

```
per cent
for tier 1
and
12.
6
per cent
overall
31 March 2009
up marginally from
31 December 200
, and
compared to
9.1
per cent and
11.3
per cent respectively at 31 March 200
, which were not restated to reflect the acquisition of HSBC Financial.
Subsequent to the quarter end, on 8 April 2009, the
bank's
issue of 10,000,000 Class 1 Preferred Shares Series E of
$25 each for cash was completed at a coupon of 6.60 per cent and raised approximately

Caution regarding forward-looking financial statements

This document may contain forward-looking statements, including statements regarding the business and anticipated financial performance of HSBC Bank

Canada

. These statements are subject to a number of risks and uncertainties that may cause actual results to differ materially from those contemplated by the forward-looking statements. Some of the factors that could cause such differences include legislative or regulatory developments, technological change, global capital market activity, changes in government monetary and economic policies, changes in prevailing interest rates, inflation level and general economic conditions in geographic areas where HSBC Bank

Canada

operates.

Canada

is an extremely competitive banking environment and pressures on interest rates and the bank's net interest margin may arise from actions taken by individual banks acting alone. Varying economic conditions may also affect equity and foreign exchange markets, which could also have an impact on the bank's revenues.

In addition, there may be a number of factors relating to the valuation of non-bank ABCP.

The factors disclosed above may not be complete and there could be other uncertainties and potential risk factors not considered here which may impact the bank's results and financial condition.
