REPORT OF THE BOARD OF DIRECTORS

The following discussion and analysis should be read in conjunction with the Group's unaudited financial statements and the accompanying notes. The financial information presented in this section is derived from the Group's unaudited financial report that have been prepared in accordance with International Financial Reporting Standards (IFRS).

To All Shareholders

We hereby report the operating results of the Group for the six-month period ended 30 June 2005 (reporting period). For the six-month period ended 30 June 2005, the Group's turnover from principal operations amounted to RMB21,886.5 million (equivalent to HK\$20,552.6 million), an increase of RMB4,108.3 million (equivalent to HK\$3,857.9 million) or 23.11% as compared to the same period last year. Profit before tax amounted to RMB2,157.8 million (equivalent to HK\$2,026.3 million), representing an increase of 18.57% as compared to the same period last year. Profit after tax and minority interests amounted to RMB1,763.4 million (equivalent to HK\$1,655.9 million), an increase of 15.96% as compared to the same period last year.

Business Review

In the first half of 2005, the global economy was growing moderately, but the growth rate has slowed. The economy of the PRC maintained its growing trend at a fast and steady pace. As the effects of the State's macro-economic control measures slowly materialised, the domestic economy continued to operate steadily. In the first half of the year, the gross domestic product (GDP) grew by 9.5% as compared to the corresponding period last year. With sustained rapid growth in the domestic economy and with international crude oil prices continuing to increase and then fluctuating at a high level, the petroleum and petrochemical industry in the PRC continued to keep the momentum of strong production and sales in the first half year, resulting in an overall increase in output, prices and profits.

Capital Expenditure progressing smoothly

In the first half of 2005, the Company continued to work diligently on the construction of its major projects, while pushing forward the preparatory work for the next round of development projects. Overall, the progress on our development work was smooth. The newly built 3# atmosphere and vacuum distillation plant commenced operation in February, thus expanding the Company's once-through crude oil processing capabilities to 14 million ton per year. The feedstock mutual supply pipeline between the Company and Secco was mechanically completed in June and is now in operation. The construction of the 3.3 million ton per year diesel hydrogenation plant and the 380,000 ton per year EO/EG plant, both of which commenced construction in late 2004, is in full swing. At the same time, the Company is making pro-active efforts on the preliminary improvement work of the next round of development projects as well as actively seeking approvals for these projects.

During the reporting period, a Sino-foreign equity joint venture established between the Group, Sinopec Corp. and BP Chemicals East China Investments Limited was completed and commenced commercial operation.

Table of Contents

Market outlook and business plan for the second half of the year

In the second half of 2005, both the global economy and the PRC economy are expected to maintain steady growth, but the growth may slow. Due to limited capabilities in increasing production by OPEC countries, reduction in increased production by non-OPEC countries, geo-political risks and rampant trading activity by speculative funds, it is anticipated that the price of crude oil will continue to rise and reach new highs. Reflecting the above factors, the petrochemical industry should maintain its strong development trend but demand growth may slow down. At the same time, following the completion and operation of large ethylene projects such as Shanghai Secco and Nanjing Yangba, the imbalance in the supply and demand for petrochemical products in the PRC should subside, and the industry's profitability level could significantly decline. Given the above, in the second half of 2005, the Group will closely monitor market development, make timely adjustments to its sales strategies, strengthen internal management, improve operation efficiency, and make efforts to complete its various work targets for the whole year, so as to lay a good foundation for the Company's comprehensively coordinated and sustainable development. In this respect, the Group will focus on the following:

- (1) Strengthening three bases (infrastructure, basic tasks, basic capabilities training), emphasizing safety, stability and long-cycle operations of production facilities.
- (2) Optimizing resources deployment and enhancing integrated efficiency of production operations.
- (3) Implementing measures to reduce costs, and further enhancing resources saving and cost controls.
- (4) Speeding up reforms and development and maintaining corporate harmony and stability.

Management Discussion and Analysis

1. Management Discussion and Analysis of the Company's Operations During the Reporting Period

Operating Results

In the first half of 2005, the Company and its subsidiaries (the Group) actively captured the opportunities arising from the prosperous cycle of the global petrochemical industry, continued rapid growth of the domestic economy, and a steady and rapid growth of the petrochemical industry, and put in efforts to overcome various adverse factors such as the upsurge in the prices of fuel oil, electricity, coal and transportation and the decline in the prices of certain products. As a result, the Group maintained steady production and operation and improved performance to a large extent as compared to the corresponding period last year.

Table of Contents

In the first half of 2005, the Group processed 4,780,800 tons of crude oil, an increase of 5.52% or 250,000 tons as compared to the corresponding period last year, in which imported oil and offshore oil amounted to 4,585,200 tons and 195,600 tons, respectively. The output of gasoline amounted to 417,700 tons, a decrease of 13.01% as compared to the corresponding period last year. The output of diesel amounted to 1,602,400 tons, an increase of 18.23% as compared to the corresponding period last year. Production of jet fuel amounted to 360,900 tons, an increase of 9.24% as compared to the corresponding period last year. The output of ethylene amounted to 491,200 tons, an increase of 2.10% as compared to the corresponding period last year. Production of propylene amounted to 262,900 tons, a decrease of 1.23% as compared to the corresponding period last year. The output of synthetic resins and plastics amounted to 529,000 tons, a decrease of 2.08% as compared to the corresponding period last year. The output of synthetic fibre feed-stocks and synthetic fibre polymers amounted to 370,200 tons and 287,300 tons, respectively, representing increases of 14.16% and 9.88%, respectively, as compared to the corresponding period last year. The output of synthetic fibres amounted to 179,600 tons, a decrease of 2.93% as compared to the corresponding period last year. The Group's product-to-sale ratio in the first half of the year was 98.76%.

The following table sets forth the Group's sales volumes and net sales, net of sales taxes and surcharges, for the reporting period:

	For the Six-month periods ended 30 June					
	2005			2004		
	Sales volume 000 tons	Net Sales Millions of RMB	% of Total	Sales volume 000 tons	Net Sales Millions of RMB	% of Total
Self-produced products						
Synthetic fibres	181	2,439	11.34	204	2,406	13.80
Resins and plastics	735	6,900	32.08	708	5,413	31.06
Intermediate petrochemical products	531	3,464	16.11	474	2,272	13.04
Petroleum products	2,604	8,035	37.36	2,328	5,915	33.95
Trading and others		670	3.11		1,422	8.15
Total	4,051	21,508	100.00	3,714	17,428	100.00

In the first half of 2005, the Group realized net sales of RMB21,508.3 million an increase of 23.41% as compared to the corresponding period last year, in which net sales derived from refined petroleum products, intermediate petrochemicals, resins and plastics and synthetic fibres increased by 35.84%, 52.46%, 27.47% and 1.37%, respectively. This was mainly due to continued increases in the prices of energy and raw materials, which have compelled the sales prices of the products to follow. Compared to the first half of 2004, the average prices (excluding tax) of the Group's four major products - petroleum products, intermediate petrochemicals, resins and plastics and synthetic fibres - increased by 21.44%, 36.20%, 22.86% and 14.34%, respectively, during the reporting period.

A majority of the Group's products are sold in eastern China.

In the first half of 2005, the Group's cost of sales increased by 25.52% to RMB18,949.9 million as compared to the corresponding period last year, and it accounted for 88.11% of the net sales.

Table of Contents

Crude oil is the Group's major raw material. Under the impact of continued growth in global demand, limited capabilities to increase output by major oil producing countries, instability in the Middle East, and the impact of the US dollar exchange rates and trading activities of speculative funds during the year, prices of international crude oil reached a record high and fluctuated at a high level. As a result, the weighted average cost of crude oil increased by RMB744.71 per ton from the corresponding period last year to RMB2,875.79 per ton in the first half of the year, representing an increase of 34.95% as compared to the corresponding period last year. The increase in both the Group's volume of crude oil processed and the average price of crude oil purchased resulted in an increase in the total cost of crude oil processed to RMB13,205.4 million, an increase of 48.55% as compared to the corresponding period last year. The cost of crude oil of the Group accounted for 69.69% of cost of sales.

Expenses for other ancillary materials amounted to RMB3,401.0 million in the first half of 2005, a substantial increase of 31.84% as compared to the corresponding period last year, which was primarily due to increase in the volume of intermediate petrochemicals purchased to meet production needs. Depreciation and maintenance costs during the reporting period amounted to RMB864.5 million and RMB347.0 million, respectively, a slight decrease as compared to the corresponding period last year. Energy and power costs amounted to RMB436.4 million, an increase of RMB79.1 million as compared to the corresponding period last year, which was due to increases in both purchase volumes and purchase prices of thermal coal and external electricity to various degrees as compared to the corresponding period last year.

Selling and administrative expenses in the first half of 2005 amounted to RMB196.9 million, a decrease of 13.87% compared with RMB228.6 million in the first half of 2004.

Other operating expenses in the first half of 2005 amounted to RMB134.0 million, a decrease of RMB60.2 million as compared to the corresponding period last year, primarily due to the decrease in the loss from the Group's disposal of fixed assets during the reporting period.

Financial costs in the first half of 2005 amounted to RMB113.4 million, a decrease of 33.87% as compared to the corresponding period last year, which was primarily due to the decrease of our total amount of bank borrowings, in particular the reduction of long-term bank borrowings, thereby effectively reduced financial costs.

The Group's net profit after tax and minority interests increased by 15.96% from RMB1,520.7 million in the first half of 2004 to RMB1,763.4 million in the first half of 2005.

Liquidity and capital resources

Net cash inflow provided from operating activities amounted to RMB1,628.1 million in the first half of 2005, an increase of RMB117.6 million as compared to the corresponding period last year. Due to the growth in the profit before tax, the profit before tax net of depreciation has brought RMB3,014.5 million operating cash inflow, an increase of RMB259.6 million cash inflow as compared to the corresponding period last year. Increased inventories led to an increase in operating cash outflow by RMB715 million at the end of the reporting period (as compared to an increase in operating cash outflow by RMB197.5 million in the corresponding period last year). Change in accounts payable and other payables led to an increase in operating cash outflow by RMB190.5 million at the end of the period (as compared to an increase in operating cash outflow by RMB46.7 million in the corresponding period last year). Decrease in debtors, bills receivable and deposits led to an increase in operating cash inflow by RMB75.2 million (as compared to a decrease in operating cash inflow of RMB540.4 million in the corresponding period last year). In addition, as a result of the changes in the accounts balances at the end of the period of the parent company and the subsidiaries, the Group's cash outflow was increased to RMB178.9 million (as compared to a decrease in operating cash outflow of RMB263.1 million).

Table of Contents

Borrowings

The Group's long-term borrowings were mainly applied to capital expansion projects. In general, the Group arranges long-term borrowings according to capital expenditure plans, and in overall, there was no seasonal borrowings. Short-term borrowings was used to meet our needs for working capital during the normal production and operation process. Our borrowings at the end of the first half of 2005 amounted to RMB5,776.7 million, a decrease of RMB1,238.3 million compared to the beginning of the period, of which, short-term borrowings increased by RMB154.4 million, and long-term borrowings decreased by RMB1,392.7 million.

As at 30 June 2005, guarantees provided by the Group to the Company's subordinate joint ventures and associates in favor of the bank, and the contingent liabilities to be undertaken on the guarantees provided by the joint venture to third parties amounted to RMB78.6 million.

Foreign Exchange Risks

Since we purchase our major raw materials, particularly crude oil through Sinopec Corp. from overseas sources, and also export a portion of our petroleum products directly through Sinopec Corp., a change in exchange rates will indirectly affect the prices of our raw materials and products which will have a discernible impact on our profitability. In addition, as discussed above, since a small part of our debts are denominated in foreign currencies, a change in the relevant exchange rates will affect the level of our financial expense which will also have an impact on our profitability.

Capital Expenditures

In the first half of 2005, our capital expenditures amounted to RMB687.4 million, which includes renovation of No. 1 atmosphere and vacuum distillation facility, 12,000 ton/year polyester filament expansion project, renovation of 400,000 ton/year PTA facility, newly developed material supply pipeline between Shanghai Petrochemical and SECCO, and 380,000 ton/year ethylene glycol facility. In the second half of the year, other than the aforesaid projects, we will also push forward the diesel oil hydrogenization facility, the renovation of the oil refining process and other technological renovation projects and investment projects. The Group plans to fund the capital expenditures from operating cash income and credit facilities from banks.

During the reporting period, a Sino-foreign equity joint venture established between the Group, Sinopec Corp. and BP Chemicals East China Investments Limited was completed and commenced commercial operation. As at 30 June 2005, the Group invested RMB1,349.5 million in the joint venture.

Debt-equity ratio

As at 30 June 2005, our debt-equity ratio was 23.22% compared to 33.23% as at 30 June 2004. The ratio is computed by (total loans)/(total loans + shareholders' equity).

Employees

As at 30 June 2005, the number of our employees was approximately 26,460. Our staff costs for the period ended 30 June 2005 totaled RMB524.4 million.

Implementation of the Code on Corporate Governance Practices

The Group had complied with all Code Provisions set out in the Code of Corporate Governance Practices contained in Appendix 14 of the Hong Kong Stock Exchange Listing Rules, with certain deviations from the Code Provisions listed below (other than Code Provision C.2 relating to internal controls):

Code Provision A.1.3: Notice of at least 14 days should be given of a regular board meeting to give all directors an opportunity to attend. For all other board meetings, reasonable notice should be given.

Deviation: The Articles of Associate of the Company provides that a minimum 10-day notice period is applicable to all board meetings. Accordingly, the Company's usual practice is to provide notice of only 10 days for a board meeting.

Explanation: To ensure full compliance with provisions of the Code of Corporate Governance Practices, the Company has commenced giving 14 days' notice for regular board meetings.

Code Provision A.2.1: The roles of chairman and chief executive officer should be separate and should not be performed by the same individual. The division of responsibilities between the chairman and chief executive officer should be clearly established and set out in writing.

Deviation: Mr. Rong Guangdao is appointed as the Company's chairman and president.

Explanation: Mr. Rong has many years of experience in managing large scale petrochemical productions and is most suited to perform both roles of chairman and president. The Company is unable to locate any person of Mr. Rong's calibre to fill either role separately.

Independent Review Report to the Board of Directors of Sinopec Shanghai Petrochemical Company Limited For the six-month period ended 30 June 2005

Introduction

We have been instructed by the Company to review the interim financial report set out on pages 28 to 42.

Respective responsibilities of directors and auditors

The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of interim financial report to be in compliance with the relevant provisions thereof and International Accounting Standard 34 Interim Financial Reporting adopted by the International Accounting Standards Board. The interim financial report is the responsibility of, and has been approved by, the directors.

It is our responsibility to form an independent conclusion, based on our review, on the interim financial report and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Review work performed

We conducted our review in accordance with Statement of Auditing Standards 700 Engagements to review interim financial reports issued by the Hong Kong Institute of Certified Public Accountants. A review consists principally of making enquiries of group management and applying analytical procedures to the interim financial report and based thereon, assessing whether the accounting policies and presentation have been consistently applied unless otherwise disclosed. A review excludes audit procedures such as tests of controls and verification of assets, liabilities and transactions. It is substantially less in scope than an audit and therefore provides a lower level of assurance than an audit. Accordingly, we do not express an audit opinion on the interim financial report.

Review conclusion

On the basis of our review, which does not constitute an audit, we are not aware of any material modifications that should be made to the interim financial report for the six-month period ended 30 June 2005.

Notes to the Unaudited Interim Financial Report

1. Principal activities and basis of preparation

Sinopec Shanghai Petrochemical Company Limited (the Company) and its subsidiaries (the Group) is a highly integrated entity which processes crude oil into synthetic fibres, resins and plastics, intermediate petrochemicals and petroleum products. The Company is a subsidiary of China Petroleum & Chemical Corporation (Sinopec Corp).

This interim financial report is unaudited, but has been reviewed by KPMG in accordance with Statement of Auditing Standards 700

Engagements to review interim financial reports , issued by the Hong Kong Institute of Certified Public Accountants. KPMG 's independent review report to the Board of Directors is included on page 27.

The interim financial report has been prepared in accordance with the requirements of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited, including compliance with International Accounting Standards 34 Interim Financial Reporting adopted by the International Accounting Standards Board (IASB).

The financial information relating to the financial year ended 31 December 2004 included in the interim financial report do not constitute the Company 's statutory financial statements for that financial year but is derived from those financial statements. Statutory financial statements for the year ended 31 December 2004 are available from the Company 's registered office. The Company 's independent auditors have expressed an unqualified opinion on those financial statements in their report dated 23 March 2005.

Other than those set out in Note 2 below, the accounting policies have been consistently applied by the Group and are consistent with those adopted in the 2004 annual financial statements. The 2004 annual financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) promulgated by the IASB. IFRS includes International Accounting Standards (IAS) and related interpretations.

Notes to the Unaudited Interim Financial Report *(continued)*

2. Changes in accounting policies

The IASB has issued a number of new and revised IFRS that are effective for accounting periods beginning on or after 1 January 2005. The Board of Directors has determined the accounting policies to be adopted in the preparation of the Group's annual financial statements for the year ending 31 December 2005, on the basis of IFRS currently in issue.

The IFRS that will be effective in the annual financial statements for the year ending 31 December 2005 may be affected by the issue of additional interpretation(s) or other changes announced by the IASB subsequent to the date of issuance of this interim report. Therefore, the policies that will be applied in the Group's financial statements for that period cannot be determined with certainty at the date of issuance of this interim financial report.

The following sets out further information on the changes in accounting policies for the annual accounting period beginning on 1 January 2005 which have been reflected in this interim financial report.

(a) Amortisation of positive and negative goodwill (IFRS 3, Business combinations and IAS 36, Impairment of assets)

In prior periods:

positive goodwill was amortised on a straight line basis over its useful life and was subject to impairment testing when there were indications of impairment; and

negative goodwill was amortised over the useful life of the depreciable/amortisable non-monetary assets acquired, except to the extent it related to identified expected future losses as at the date of acquisition. In such cases it was recognised in the income statement as those expected losses were incurred.

With effect from the beginning of the first annual period beginning after 31 March 2004, i.e. 1 January 2005, in accordance with IFRS 3 and IAS 36, the Group no longer amortises positive goodwill. Such goodwill is tested annually for impairment, including in the year of its initial recognition, as well as when there are indication of impairment. Impairment losses are recognised when the carrying amount of the cash generating unit to which the goodwill has been allocated exceeds its recoverable amount.

Also with effect from the beginning of the first annual period beginning after 31 March 2004, i.e. 1 January 2005 and in accordance with IFRS 3, if the fair value of the net assets acquired in a business combination exceeds the consideration paid (i.e. an amount arises which would have been known as negative goodwill under the previous accounting policy), the excess is recognised immediately in the income statement as it arises.

Edgar Filing: SINOPEC SHANGHAI PETROCHEMICAL CO LTD - Form 6-K

The new policy in respect of positive goodwill has been applied prospectively in accordance with the transitional arrangements under IFRS 3. As a result, comparative amounts have not been restated, the cumulative amount of amortisation as at 1 January 2005 has been offset against the cost of the goodwill and no amortisation charge for goodwill has been recognised in the income statement for the six months ended 30 June 2005. As a result, this has increased the group's profit after tax for the six months ended 30 June 2005 by RMB 6,724,000.

Also in accordance with the transitional arrangements under IFRS 3, previous recognised negative goodwill shall be derecognised at the beginning of that period, with a corresponding adjustment to the opening balance of retained earnings. As a result, the retained earnings increased by RMB 2,549,000 as at 1 January 2005. This has decreased the group's profit after tax for the six months ended 30 June 2005 by RMB 425,000.

2. Changes in accounting policies *(continued)*

(b) Minority interests (IAS 1, Presentation of financial statements and IAS 27, Consolidated and separate financial statements)

In prior years, minority interests at the balance sheet date were presented in the consolidated balance sheet separately from liabilities and as deduction from net assets. Minority interests in the results of the Group for the year were also separately presented in the consolidated income statement as a deduction before arriving at the profit attributable to shareholders.

With effect from 1 January 2005, in order to comply with IAS 1 and IAS 27, minority interests at the balance sheet date are presented in the consolidated balance sheet within equity, separately from the equity attributable to the equity holders of the parent, and minority interests in the results of the Group for the period are presented on the face of the consolidated income statement as an allocation of the total profit or loss for the period between minority interests and the equity holders of the parent.

The presentation of minority interests in the consolidated balance sheet, income statement and statement of changes in equity for the comparative period has been restated accordingly.

(c) Related party disclosures (IAS 24 Related party disclosures)

The Group is a state-controlled enterprise and operates in an economic regime currently predominated by state-controlled enterprises. Apart from transactions with parent company and its fellow subsidiaries, the Group conducts certain business activities with enterprises directly or indirectly owned or controlled by the PRC government and government authorities and agencies (collectively state-controlled entities) in the ordinary course of business. In prior years, transactions with state-controlled entities other than Sinopec Corp and its fellow subsidiaries were not required to be disclosed as related party transactions.

With effect from 1 January 2005, in order to comply with IAS 24, the Group has made further disclosure of key management personnel compensation, contributions to post-retirement benefit plans and transactions with state-controlled entities in the PRC. The disclosure of such related party transactions in Note 13 for the comparative period has been made accordingly.

No transfers have been made to the statutory surplus reserve, the statutory public welfare fund nor the discretionary surplus reserve from the income statement for the period (period ended 30 June 2004: RMB Nil).

13. Related party transactions

- (a) Most of the transactions undertaken by the Group during the period ended 30 June 2005 have been effected with such counterparties and on such terms as determined by Sinopec Corp, the immediate parent company, and other relevant PRC authorities.

Sinopec Corp negotiates and agrees the terms of crude oil supply with suppliers on a group basis, which is then allocated among its subsidiaries, including the Group, on a discretionary basis. During the six-month periods ended 30 June 2005, the value of crude oil purchased in accordance with Sinopec Corp's allocation was as follows:

Six-month periods ended

30 June

	2005	2004
	RMB 000	RMB 000
Purchases of crude oil	12,424,946	8,871,835

	RMB 000	RMB 000
Short-term employee benefits	1,384	1,373
Post-employment benefits	16	13
	1,400	1,386

The Directors of the Group are of the opinion that the above related party transactions were conducted on normal commercial terms or, if there are not sufficient comparable transactions to judge whether they are on normal commercial terms, on terms no less favorable to the Group than terms available to or from independent third parties, and in the ordinary course of business. This has been confirmed by the non-executive Directors.

Although certain business activities of the Group are with PRC government authorities and affiliates and other state-controlled enterprises, the Group believes that it has provided meaningful disclosure of related party transactions in the above.

14. Commitments

(a) Capital commitments

The Group had capital commitments outstanding as at 30 June 2005 and 31 December 2004 not provided for in the financial statements as follows:

	At 30 June 2005	At 31 December 2004
	RMB 000	RMB 000
		(audited)
<u>Property, plant and equipment</u>		
Contracted but not provided for	171,910	322,797
Authorised by the Board but not contracted for	1,665,288	1,824,985
	1,837,198	2,147,782

	1,984,107	2,443,668

(b) Management fee commitments

At 30 June 2005, the Group had outstanding contracted obligation for management fee of approximately RMB3,793,070 (At 31 December 2004: RMB7,609,000).

Table of Contents**15. Contingent liabilities**

Contingent liabilities of the Group are as follows:

	At 30 June 2005	At 31 December 2004
	RMB 000	RMB 000
		(audited)
Guarantees issued to banks in favour of:		
- associates	40,000	40,000
- other unlisted investment companies	38,586	61,886
	<u>78,586</u>	<u>101,886</u>

Guarantees issued to banks in favour of associates and other unlisted investment companies are given to the extent of the Company's respective interest in these entities. The Company monitors the conditions that are subject to the guarantees to identify whether it is probable that a loss has occurred, and recognize any such losses under guarantees when those losses are estimable. At 30 June 2005, it is not probable that the Company will be required to make payments under the guarantees. Thus no liability has been accrued for a loss related to the Company's obligation under the guarantees arrangement.

16. Subsequent event

On 21 July 2005, the People's Bank of China announced that the PRC government reformed the exchange rate regime by moving into a managed floating exchange rate regime based on market supply and demand with reference to a basket of foreign currencies. Particularly, the exchange rate of US dollar against Renminbi was adjusted upward to 8.11 yuan per US dollar with effect from the time of 19:00 hour on 21 July 2005.

At 30 June 2005, the Group has the following significant cash and cash equivalents and bank loans, which are denominated in foreign currencies.

Notes to the Interim Financial Statements

(Prepared under PRC Accounting Rules and Regulations)

1. Background of the Company

Sinopec Shanghai Petrochemical Company Limited (the Company), formerly Shanghai Petrochemical Company Limited, was established in the People s Republic of China (the PRC) on 29 June 1993 as a joint stock limited company to hold the assets and liabilities of the production divisions and certain other units of the Shanghai Petrochemical Complex (SPC), a State-owned enterprise. SPC was under the direct supervision of China Petrochemical Corporation (CPC).

CPC finished its reorganisation on 25 February 2000. After the reorganisation, China Petroleum & Chemical Corporation (Sinopec Corp) was established. As a part of the reorganisation, CPC transferred its 4,000,000,000 of the Company s stated owned legal shares, which represented 55.56 percent of the issued share capital of the Company, to Sinopec Corp. Sinopec Corp became the largest shareholder of the Company.

The Company changed its name to Sinopec Shanghai Petrochemical Company Limited on 12 October 2000.

The Company and its subsidiaries (the Group) is a highly integrated entity which processes crude oil into synthetic fibres, resins and plastics, intermediate petrochemicals and petroleum products.

Details of the Company s principal subsidiaries are set out in Note 9(d) entitled Long-term equity investments .

2. Significant accounting policies

The significant accounting policies adopted in the preparation of the financial statement are in conformity with the Accounting Standards for Business Enterprises and Accounting Regulations for Business Enterprises and other relevant regulations issued by the Ministry of Finance (MOF).

(a) Accounting year

The accounting year of the Group is from 1 January to 31 December.

(b) Basis of consolidation

Edgar Filing: SINOPEC SHANGHAI PETROCHEMICAL CO LTD - Form 6-K

The Group prepared the consolidated financial statements according to Accounting Regulations for Business Enterprises and Cai Kuai Zi [1995] No.11 Provisional regulations on consolidated financial statements issued by the MOF.

The consolidated financial statements include the financial statements of the Company and all of its principal subsidiaries. Subsidiaries are those entities held by the Company, directly or indirectly, over 50% of the equity interests (not including 50%), or less than 50% but the Company has the power to effectively control the entities. The consolidated income statement of the Company only includes the results of the subsidiaries during the period when the Company holds, directly or indirectly, over 50% of the equity interests or the Company has effective control over the subsidiaries. The effect of minority interests on equity and profit/loss attributable to minority interests are separately shown in the consolidated financial statements. For those subsidiaries whose assets and results of operation are not significant and have no significant effect on the Group's consolidated financial statements, the Company does not consolidate these subsidiaries, but includes in the long-term equity investments.

2. Significant accounting policies (continued)

(b) Basis of consolidation (continued)

Where the accounting policies adopted by the subsidiaries are different from the policies adopted by the Company, the financial statements of the subsidiaries have been adjusted in accordance with the accounting policies adopted by the Company on consolidation. All significant inter-company balances and transactions, and any unrealised gains arising from inter-company transactions, have been eliminated on consolidation.

(c) Basis of preparation and measurement basis

The Group's financial statements are prepared on an accrual basis under the historical cost convention, unless otherwise stated.

(d) Reporting currency and translation of foreign currencies

The Group's financial statements are prepared in Renminbi. Foreign currencies transactions during the period are translated into Renminbi at exchange rates quoted by the People's Bank of China (PBOC rates) prevailing on the transaction dates. Foreign currency monetary assets and liabilities are translated into Renminbi at the PBOC rates at the balance sheet date. Exchange differences, other than those arising from foreign currency loans using to finance the construction of fixed assets before they are ready for their intended use are capitalised (see note2(i)), are recognised as income or expenses in the income statement.

(e) Cash equivalents

Cash equivalents are short-term and highly liquid investments which are readily convertible into known amounts of cash and are subject to an insignificant risk of change in value.

(f) Provision for bad debt

Trade accounts receivable showing signs of uncollectibility are identified individually and allowance is then made based on the probability of being uncollectible. Allowances for other receivables are determined based on the nature and corresponding collectibility.

(g) Inventories

Inventories, other than spare parts and consumables, are stated at the lower of cost and net realisable value. Difference between the cost and net realisable value of each category of inventories is recognised as provision for diminution in value of inventories. Cost of inventories includes the cost of purchase of raw materials, processing and other costs. Inventories are measured at their actual cost upon acquisition. The cost of inventories is calculated using weighted average method. In addition to the purchase cost of raw materials, work in progress and finished goods include direct labour and appropriate proportion of production overheads. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs and related taxes necessary to make the sale.

Spare parts and consumables are expensed when being consumed.

Inventories are recorded by perpetual method.

(h) Long-term equity investments

The Group's long-term equity investments in subsidiaries and associates are accounted for using the equity method. Equity method is to recognise the initial investment cost, subsequently adjusted in accordance with the share of shareholders' equity in respective investee companies. Equity investments difference, which is the difference between investment cost and the share of shareholders' funds of the investee companies is accounted for as follow.

Any excess of the initial investment cost over the share of shareholders' equity of the investee is amortised on a straight-line basis. The amortisation period is determined according to the investment period as stipulated in the relevant agreement, or 10 years if the investment period is not specified in the agreement. The amortisation is recognised as investment loss in the income statement in the relevant period.

Any shortfall of the initial investment cost over the share of shareholders' equity of the investee is recognised in capital reserve-reserve for equity investment. Such shortfall is amortised on a straight-line basis if the investment was acquired before the issuance of Cai Kuai [2003] No. 10 Questions and answers on implementing Accounting Regulations for Business Enterprises and related accounting standards (II) on 7 April 2003.

An associate is a company in which the Group holds, for long-term purposes, not less than 20% but not more than 50% of its equity interests and exercises significant influence in its management.

Long-term investments in entities in which the Group does not have control, joint control or does not exercise significant influence in their management are stated at cost. Investment income is recognised when an investee company declares cash dividend or distributes profit.

Disposals or transfers of long-term equity investments are recognised in the income statement based on the difference between the disposal proceeds and the carrying amount of the investments.

Long-term equity investments are valued at the lower of the carrying amount and the recoverable amount. A provision for impairment losses is made when the recoverable amount is lower than the carrying amount (see note 2(k)).

Table of Contents**2. Significant accounting policies (continued)****(i) Fixed assets and construction in progress**

Fixed assets represent the assets held by the Group for production of products and administrative purpose with useful life over 1 year and comparatively high unit value.

Fixed assets are stated in the balance sheet at cost or revalued amount less accumulated depreciation and impairment losses (see note 2(k)). Construction in progress is stated in the balance sheet at cost or revalued amount less impairment losses(see note 2(k)). Valuation is carried out in accordance with the relevant rules and regulations in the PRC and fixed assets are adjusted to the revalued amounts accordingly.

All direct and indirect costs related to the purchase or construction of fixed assets, incurred before the assets are ready for their intended uses, are capitalised as construction in progress. Those costs included borrowing costs, which include foreign exchange gains or losses on specific borrowings for the construction of the fixed assets during the construction period.

Construction in progress is transferred to fixed assets when the asset is ready for its intended use. No depreciation is provided in respect of construction in progress.

Depreciation is provided to write off the cost of fixed assets over their estimated useful lives on a straight-line basis, after taking into account their estimated residual values.

The respective estimated useful lives, residual values and annual depreciation rates on fixed assets are as follows:

	<u>Useful life</u>	<u>Residual value</u>	<u>Depreciation rate</u>
Land and buildings	15 to 40 years	3%-5%	2.4%-6.5%
Plant, machinery, equipment and others	5 to 26 years	3%-5%	3.7%-19.4%

(j) Intangible assets

Intangible assets are carried in the balance sheet at cost or valuation less accumulated amortisation and provision for impairment losses (see note 2(k)). Amortisation is provided on a straight-line basis. Amortisation period is the shorter of the beneficial period as specified in the related agreement and the legal life of the intangible assets. Amortisation is provided over 10 years if it is not specified in agreements or stipulated by law.

(k) Impairment loss

Edgar Filing: SINOPEC SHANGHAI PETROCHEMICAL CO LTD - Form 6-K

The carrying amounts of assets (including long-term equity investments, fixed assets, construction in progress, intangible assets and other assets) are reviewed regularly to determine whether their recoverable amounts have declined below their carrying amounts. Assets are tested for impairment whenever events or changes in circumstances indicate that their recorded carrying amounts may not be recoverable. When such a decline has occurred, the carrying amount is reduced to the recoverable amount. The amount by which the carrying amount is reduced is the impairment loss.

The recoverable amount is the greater of the net selling price and the present value of the estimated future cash flows arising from the continuous use of the asset and from the disposal of the asset at the end of its useful life.

2. Significant accounting policies (continued)

(k) Impairment loss (continued)

Provision for impairment loss is calculated on an item by item basis and recognised as an expense in the income statement. However, when a deficit between the initial investment cost and the Group's share of the shareholders' funds of the investee enterprise has been credited to the capital reserve, any impairment losses for long-term equity investment are firstly set off against the difference initially recognised in the capital reserve relating to the investment and any excess impairment losses are then recognised in the income statement.

If there is an indication that there has been a change in the estimates used to determine the recoverable amount and as a result the estimated recoverable amount is greater than the carrying amount of the asset, the impairment loss recognised in prior years is reversed. Reversals of impairment losses are recognised in the income statement. Impairment losses are reversed to the extent of the asset's carrying amount that would have been determined had no impairment loss been recognised in prior years. In respect of the reversal of an impairment loss for a long-term equity investment, the reversal starts with the impairment losses that had previously been recognised in the income statement and then the impairment losses that had been charged to capital reserve.

(l) Taxations

The principal taxes and the related rates are as follows:

(i) Income tax

Income tax is the provision for income tax recognised in the income statement for the period using the tax-effect accounting method. It comprises current and deferred tax.

Current tax

Current tax is the expected tax payable on the taxable income for the period, using tax rates enacted or substantially enacted at the balance sheet date.

Pursuant to the relevant PRC tax regulations, the income tax rate applicable to the Company is 15%. Other than those granted with tax concession as set out below, the subsidiaries are subject to income tax at a rate of 33% pursuant to the relevant PRC tax regulations.

The subsidiaries granted with tax concession are set out below:

Edgar Filing: SINOPEC SHANGHAI PETROCHEMICAL CO LTD - Form 6-K

<u>Name of subsidiaries</u>	<u>Applicable tax rate</u>	<u>Reasons for granting concession</u>
Shanghai Jindong Petrochemical Industrial Company Limited	15%	Preferential tax rate at Pudong new district
Shanghai Golden-Phillips Petrochemical Company Limited	27%	A Sino-foreign Joint-equity manufacturing enterprise in old urban district
Shanghai Jinhua Industrial Company Limited	15%	Preferential tax rate at Pudong new district
Shanghai Golden Way Petrochemical Company Limited	27%	A Sino-foreign Joint-equity manufacturing enterprise in old urban district
Shanghai Jinchang Engineering Plastics Company Limited	27%	A Sino-foreign Joint-equity manufacturing enterprise in old urban district
SPC Marketing Development Corporation	15%	Preferential tax rate at Pudong new district

(l) Taxations (continued)

Deferred tax

Deferred tax is provided under the liability method, for timing differences between the accounting profit before tax and the taxable income arising from the differences in the accounting and tax treatment of income and expenses or losses. When the tax rates change or new types of tax are levied, adjustments should be made to the amounts originally recognised for the timing differences. The enacted tax rates are used in arriving at the reversal amounts when the timing differences are reversed.

Deferred tax assets arising from the tax value of losses, which are expected to be utilised against future taxable income, are set off against the deferred tax liabilities of the same taxpayer and within the same jurisdiction. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(ii) Value-added tax (VAT)

The VAT rate applicable to the Group is 17%.

(iii) Consumption tax

Pursuant to the relevant PRC tax regulations, the Group's sales of gasoline and diesel oil are subject to the consumption tax at a rate of RMB277.61 per tonne and RMB117.61 per tonne respectively.

(m) Provisions and contingent liabilities

Provisions are recognised when the Group has a present obligation as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligations and a reliable estimate can be made.

Where it is not probable that the settlement of the above obligation will cause an outflow of economic benefits, or the amount of the outflow cannot be estimated reliably, the obligation is disclosed as a contingent liability.

(n) Deferred income

Deferred income is amortised to the income statement on a straight-line basis over 10 years.

(o) Revenue recognition

Revenue from the sale of goods is recognised when the significant risks and rewards of ownership have been transferred to the buyer. No revenue is recognised if there are significant uncertainties regarding recovery of the consideration due, the possible return of goods, or when the amount of revenue and the costs incurred or to be incurred in respect of the transaction cannot be measured reliably.

Revenue from the rendering of services is recognised upon performance of the services.

Interest income is recognised on a time-apportioned basis by reference to the principal outstanding and the rate applicable.

(p) Repairs and maintenance expenses

Repairs and maintenance expenses, including overhauling expense, are recognised as expenses in the period in which they are incurred.

(q) Research and development costs

Research and development costs are recognised as expenses in the period in which they are incurred.

(r) Borrowing costs

Borrowing costs incurred on specific borrowings for the construction of fixed assets are capitalised into the cost of the fixed assets during the construction period which brings the assets to their intended uses.

Except for the above, other borrowing costs are recognised as financial expenses in the income statement when incurred.

(s) Retirement scheme costs

Pursuant to the relevant laws and regulations in the PRC, the Group has joined a defined contribution retirement plan for the employees arranged by a governmental organisation. The Group makes contributions to the retirement scheme at the applicable rate(s) based on the employees salaries. The required contributions under the retirement plans are charged to the income statement. Further information is set out in Note 30.

(t) Profit distribution

Profit distribution is made in accordance with the relevant rules and regulations set out in the Company Law of the PRC and the Articles of Association of the Company and its subsidiaries.

Dividends appropriated to shareholders are recognised in the profit appropriation statement when approved. Dividends proposed or approved after the balance sheet date but before the date on which the financial statements are authorised for issue are separately disclosed under shareholders' equity on the balance sheet.

(u) Related parties

Parties are considered to be related to the Group if the Group has the ability, directly or indirectly, to control the party or exercise significant influence over the party in making financial and operating decisions, or vice versa, or where the Group and the party are subject to common

control or common significant influence. Related parties may be individuals or entities.

On 16 August 1996, the Company acquired the equity interest in Shanghai Jinyang Acrylic Fibre Plant (Jinyang) for consideration of RMB 38,800,000 satisfied in cash. Equity investment difference of RMB 134,482,000 on acquisition has been recognised in the financial statements. Such equity investment difference is amortised over 10 years which was the remaining economic useful life of the related plants of the subsidiary.

In 2002, Jinyang was deregistered and all its operations, assets and liabilities were transferred to the Company of carrying value. Accordingly, Jinyang has changed from a wholly owned subsidiary to a division of the Company. Since there was no investment in subsidiary after the deregistration of Jinyang, the unamortised amount of the equity investment difference at 31 December 2002 was transferred to intangible assets and amortised over its remaining useful life.

Table of Contents**14. Taxation**

Tax refund		(10,262)		(10,262)
	357,730	258,220	313,562	230,969

The charge for PRC income tax is calculated at the rate of 15% (2004: 15%) on the estimated assessable profit of the period determined in accordance with relevant income tax rules and regulations. The Group did not carry out business in overseas and Hong Kong and therefore no provision has been made for overseas and Hong Kong income tax.

The Company has not received notice from the Ministry of Finance that the 15% tax rate will be revoked in 2005. It is possible that the Company's tax rate will increase in the future. However, the Company continues to use the 15% tax rate in 2005.

Pursuant to the document 'Cai Shui Zi(1999) No. 290' issued by the Ministry of Finance and the State Administration of Taxation of the PRC on 8 December 1999, the Company received an income tax refund of RMB 10,262,000 during the period ended 30 June 2004 relating to the purchase of equipment produced in the PRC for technological improvements. During the period ended 30 June 2005, the Company did not receive an income tax refund relating to the purchase of equipment produced in the PRC for technological improvements.

Table of Contents**30. Retirement schemes**

As stipulated by the relevant regulations, the Group participates in a defined contribution retirement plan organised by the Shanghai Municipal Government for its staff. The Group is required to make contributions to the retirement plan at a rate of 22.5% of the salaries, bonuses and certain allowances of its staff. The contribution rate has been changed to 22% since 1 August 2004. A member of the plan is entitled to a pension equal to a fixed proportion of the salary prevailing at his retirement date. The Group has no other material obligation for the payment of pension benefits associated with this plan beyond the annual contributions described above. In addition, pursuant to a document Lao Bu Fa (1995) No.464 dated 29 December 1995 issued by the Ministry of Labour of the PRC, the Company has set up a supplementary defined contribution retirement plan for the benefit of employees. Employees who have served the Company for five years or more may participate in this plan. The Company and participating employees make defined contributions to their pension savings account according to the plan. The assets of this plan are held separately from those of the Company in an independent fund administered by a committee consisting of representatives from the employees and the Company. In April 2003, the Company revised certain terms of the plan and increased the amount of contributions. During the six-month period ended 30 June 2005, the Company's contribution to this plan amounted to RMB21,388,000 (period ended 30 June 2004: RMB21,230,000).

	78,586	101,886	816,539	848,059

Guarantees issued to banks in favour of subsidiaries are given to the extent of the Company's respective equity interest in these entities.

Guarantees issued to banks in favour of associates and other unlisted investment companies are given to the extent of the Group's and the Company's respective equity interest in these entities.

The Group monitors the conditions that are subject to the guarantees to identify whether it is probable that a loss has occurred, and recognised any such losses under guarantees when those losses are estimable. At 30 June 2005, it is not probable that the Group will be required to make payments under the guarantees. Thus no liability has been accrued for a loss related to the Group's and the Company's obligation under these guarantee arrangements.

33. Events after the balance sheet date

On 21 July 2005, the People's Bank of China announced that the PRC government reformed the exchange rate regime by moving into a managed floating exchange rate regime based on market supply and demand with reference to a basket of foreign currencies. Particularly, the exchange rate of US dollar against Renminbi was adjusted upward to 8.11 yuan per US dollar with effect from the time of 19:00 hour on 21 July 2005.

34. Segment reporting

Segment information is presented in respect of the Group's business segments, the format of which is based on the Group's management and internal reporting structure. In view of the fact that the Company and its subsidiaries operate mainly in the PRC, no geographical segment information is presented.

The Group evaluates performance based on operating profits before income tax and non-operating income and expenses. Certain administrative expenses are allocated based on the percentage of sales.

The Group principally operates in four operating segments: synthetic fibres, resins and plastics, intermediate petrochemicals and petroleum products. All of the Group's products are produced through intermediate steps from the principal raw material of crude oil. The specific products of each segment are as follows:

- (i) The synthetic fibres segment produces primarily polyester and acrylic fibres primarily used in the textile and apparel industries.
- (ii) The resins and plastics segment produces primarily polyester chips, low density polyethylene resins and films, polypropylene resins and PVA granules. The polyester chips are used in the processing of polyester fibres and construction coating materials and containers. Low density polyethylene resins and plastics are used in cable jacketing, sheeting, the manufacture of moulded products, such as housewares and toys and for agricultural and packaging uses. Polypropylene resins are used in the manufacturing of extruded films or sheets and injection moulded products such as housewares, toys and household electric appliance and automobile parts.
- (iii) The intermediate petrochemicals segment primarily produces ethylene and benzene. Most of the intermediate petrochemicals produced by the Group are used by the Group as raw materials in the production of other petrochemicals, resins, plastics and synthetic fibres. A portion of the intermediate petrochemicals as well as certain by-products of the production process are sold to outside customers.
- (iv) The Group's petroleum products segment has crude oil distillation facilities used to produce vacuum and atmospheric gas oils used as feedstocks of the Group's downstream processing facilities. Residual oil and low octane gasoline fuels are produced primarily as a co-product of the crude oil distillation process. A proportion of the residual oil is further processed into qualified refined gasoline and diesel oil. In addition, the Group produces a variety of other transportation, industrial and household heating fuels, such as diesel oils, jet fuels, heavy oils and liquefied petroleum gases.
- (v) All other operating segments represent the operating segments which do not meet the quantitative threshold for determining reportable segments. These include trading, consumer products and services and a variety of other commercial activities, which are not allocated to the above four operating segments.

C. Differences between Financial Statements prepared under PRC Accounting Rules and Regulations and IFRS

The below figures are extracted from the interim financial statements prepared in accordance with PRC Accounting Rules and Regulations and IFRS, both of which have not been audited.

The Company also prepares a set of financial statements which complies with PRC Accounting Rules and Regulations. A reconciliation of the Group's net profit and shareholders' equity prepared under PRC Accounting Rules and Regulations and IFRS is presented below.

Other than the differences in classification of certain financial statements assertions and the accounting treatment of the items described below, there are no material differences between the Group's financial statements prepared in accordance with PRC Accounting Rules and Regulations and IFRS. The major differences are:

(i) Capitalisation of general borrowing costs

Under IFRS, to the extent that funds are borrowed generally and used for the purpose of obtaining a qualifying asset, the borrowing costs should be capitalised as part of the cost of that asset. Under PRC Accounting Rules and Regulations, only borrowing costs on funds that are specially borrowed for construction are eligible for capitalisation as fixed assets.

(ii) Valuation surplus

Under PRC Accounting Rules and Regulations, the excess of fair value over the carrying value of assets given up in part exchange for investments should be credited to capital reserve fund. Under IFRS, it is inappropriate to recognise such excess as a gain as its realisation is uncertain.

(iii) Government grants

Under PRC Accounting Rules and Regulations, government grants should be credited to capital reserve. Under IFRS, such grants for the purchase of equipment used for technology improvements are offset against the cost of asset to which the grants related. Upon transfer to property, plant and equipment, the grant is recognised as income over the useful life of the property, plant and equipment by way of a reduced depreciation charge.

(iv) Revaluation of land use rights

Under IFRS, land use rights are carried at historical cost less accumulated amortisation. Under PRC Accounting Rules and Regulations, land use rights are carried at revalued amount less accumulated amortisation.

Table of Contents

C. Differences between Financial Statements prepared under PRC Accounting Rules and IFRS (continued)

(v) Pre-operating expenditure

Under IFRS, expenditure on start-up activities should be recognised as expenses when it is incurred. Under PRC Accounting Rules and Regulations, all expenses incurred during the start-up period are aggregated in long-term deferred expenses and then fully charged to the income statement in the month of commencement of operations.

(vi) Goodwill and negative goodwill amortization

Under PRC Accounting rules and regulations, goodwill and negative goodwill are amortized on a systematic basis over their useful lives.

Under IFRS, with reference to IFRS 3, Business combination, the Group no longer amortises positive goodwill effective 1 January 2005. Such goodwill is tested annually for impairment. Also in accordance with the transitional arrangements under IFRS 3, previous recognised negative goodwill was derecognised at the beginning of that period, with a corresponding adjustment to the opening balance of retained earnings.

D. Supplementary Information for North American Shareholders

The Group's accounting policies conform with IFRS which differ in certain significant respects from accounting principles generally accepted in the United States of America (U.S. GAAP). Information relating to the nature and effect of such differences is presented below. The U.S. GAAP reconciliation presented below is included as supplemental information and is not required as part of the basic interim financial reports. Such information has not been subjected to independent audit or review.

Notes:

(a) Foreign exchange gains and losses

Under IFRS, foreign exchange differences on funds borrowed for construction are capitalised as property, plant and equipment to the extent that they are regarded as an adjustment to interest costs during the construction period. In the periods ended 30 June 2004 and 2005, no foreign exchange differences were capitalised to property, plant and equipment. Under U.S. GAAP, all foreign exchange gains and losses on foreign currency debt are included in current earnings. In the period ended 30 June 2004, the U.S. GAAP adjustments represent the effect of amortisation of amounts previously capitalised. Accordingly, the balances of cost and accumulated depreciation of property, plant and equipment under IFRS were higher than the balances under US GAAP by RMB 365,258,000 and RMB 365,258,000 respectively on 30 June 2005 and 31 December 2004.

(b) Capitalisation of property, plant and equipment

In the periods prior of those presented herein, certain adjustments arose between IFRS and U.S. GAAP with regard to the capitalisation of interest and pre-production results under IFRS, that were reversed and expensed under U.S. GAAP. For the periods presented herein, no adjustments related to the capitalisation of construction costs, including capitalised interest, are necessary. The U.S. GAAP adjustments for 2004 represent the amortisation effect of such originating adjustments described above.

(c) Revaluation of property, plant and equipment

In the periods prior to those presented herein, the property, plant and equipment of the Company were revalued to reflect the then current fair value resulting in a revaluation surplus recorded in the Company's financial statements. Additional depreciation charges have been taken in the periods ended 30 June 2004 and 2005 on the revaluation surplus of RMB1,576,330,000.

Under U.S. GAAP, property, plant and equipment are stated at historical cost less accumulated depreciation. However, as a result of the tax deductibility of the revaluation, a deferred tax asset related to the reversal of the revaluation surplus is created under U.S. GAAP with a corresponding increase in shareholders' equity.

Notes (continued):

(d) Capitalised interest on investment in associates

Under IFRS, investment accounted for by the equity method is not considered a qualifying asset for which interest is capitalised. Under US GAAP, an investment accounted for by the equity method while the investee has activities in progress necessary to commence its planned principal operations, provided that the investee's activities include the use of funds to acquire qualifying assets for its operations, is a qualifying asset for which interest is initially capitalised and subsequently amortised when the operation of the qualifying assets begin.

(e) Goodwill and negative goodwill amortisation

With effect from the beginning of the first annual period beginning after 31 March 2004, i.e. 1 January 2005, in accordance with IFRS 3 and IAS 36, the Group no longer amortises positive goodwill. Such goodwill is tested annually for impairment, including in the year of its initial recognition, as well as when there are indication of impairment. Impairment losses are recognised when the carrying amount of the cash generating unit to which the goodwill has been allocated exceeds its recoverable amount.

Also with effect from the beginning of the first annual period beginning after 31 March 2004, i.e. 1 January 2005 and in accordance with IFRS 3, if the fair value of the net assets acquired in a business combination exceeds the consideration paid (i.e. an amount arises which would have been known as negative goodwill under the previous accounting policy), the excess is recognised immediately in the income statement as it arises.

The new policy in respect of positive goodwill has been applied prospectively in accordance with the transitional arrangements under IFRS 3. As a result, comparative amounts have not been restated, the cumulative amount of amortisation as at 1 January 2005 has been offset against the cost of the goodwill and no amortisation charge for goodwill has been recognised in the income statement for the six months ended 30 June 2005. As a result, this has increased the group's profit after tax for the six months ended 30 June 2005 by RMB 6,724,000.

Also in accordance with the transitional arrangements under IFRS 3, previous recognised negative goodwill shall be derecognised at the beginning of that period, with a corresponding adjustment to the opening balance of retained earnings. As a result, the retained earnings increased by RMB 2,549,000 as at 1 January 2005. This has decreased the group's profit after tax for the six months ended 30 June 2005 by RMB 425,000.

Under U.S. GAAP, with reference to Statement of Financial Accounting Standards No. 142, Goodwill and Other Intangible Assets (SFAS No. 142), goodwill is no longer amortised beginning 1 January 2002, the date that SFAS No. 142 was adopted. Instead, goodwill will be reviewed for impairment upon adoption of SFAS No. 142 and annually thereafter. In addition, under U.S. GAAP, the unallocated negative goodwill that existed at the date of adoption of SFAS No. 142 was written off effective 1 January 2002 as a cumulative effect of a change in accounting principle.

Edgar Filing: SINOPEC SHANGHAI PETROCHEMICAL CO LTD - Form 6-K

As a result, there are no differences in respect of goodwill and negative goodwill amortisation between IFRS and U.S. GAAP effective 1 January 2005. The difference in the shareholders' equity represents the three-year's amortization of positive goodwill during the period from 1 January 2002 to 31 December 2004 under IFRS.

Notes (continued):

(f) Basic earnings per share

The calculation of basic earnings per share is based on the net profit under U.S. GAAP of RMB 1,779,569,000 (period ended 30 June 2004: RMB 1,602,140,000) and the number of shares in issue during the period of 7,200,000,000 (period ended 30 June 2004: 7,200,000,000). Basic earnings per ADS is calculated on the basis that one ADS is equivalent to 100 shares.

The amount of diluted earnings per share is not presented as there were no dilutive potential ordinary shares in existence for both periods.

(g) United States dollar equivalents

For the convenience of the reader, amounts in Renminbi (RMB) have been translated into United States dollars at the rate of US\$1.000 = RMB 8.2765 being the average of the buying and selling rates quoted by the People's Bank of China on 30 June 2005. No representation is made that the RMB amounts could have been, or could be, converted into United States dollars at that rate.
