Certain prior period amounts included in these Consolidated Financial Highlights have been reclassified to conform with the current period presentation.

- (a) The interest income earned on certain earning assets is completely or partially exempt from federal income tax. As such, these tax-exempt instruments typically yield lower returns than a taxable investment. To provide more meaningful comparisons of yields and margins for all earning assets, we also provide revenue on a taxable-equivalent basis by increasing the interest income earned on tax-exempt assets to make it fully equivalent to interest income on other taxable investments. This adjustment is not permitted under generally accepted accounting principles (GAAP) in the Consolidated Income Statement.

The following is a reconciliation of net interest income as reported in the Consolidated Income Statement to net interest income on a taxable-equivalent basis (in millions):

	Three months ended June 30		Six months ended June 30	
	2006	2005	2006	2005
Net interest income, GAAP basis	\$556	\$534	\$1,112	\$1,040

FINANCIAL REVIEW

THE PNC FINANCIAL SERVICES GROUP, INC.

This Financial Review should be read together with our unaudited Consolidated Financial Statements and unaudited Statistical Information included elsewhere in this Report and with Items 6, 7, 8 and 9A of our 2005 Annual Report on Form 10-K (2005 Form 10-K). We have reclassified certain prior period amounts to conform with the current period presentation. For information regarding certain business and regulatory risks, see the Risk Factors and Risk Management sections in this Financial Review and Items 1A and 7 of our 2005 Form 10-K. Also, see the Cautionary Statement Regarding Forward-Looking Information and Critical Accounting Policies And Judgments sections in this Financial Review for certain other factors that could cause actual results or future events to differ, perhaps materially, from those anticipated in the forward-looking statements included in this Report or from historical performance. See Note 13 Segment Reporting in the Notes To Consolidated Financial Statements included in Part I, Item 1 of this Report for a reconciliation of total business segment earnings to total PNC consolidated net income as reported on a generally accepted accounting principles (GAAP) basis.

EXECUTIVE SUMMARY

THE PNC FINANCIAL SERVICES GROUP, INC.

PNC is one of the largest diversified financial services companies in the United States, operating businesses engaged in retail banking, corporate and institutional banking, asset management and global fund processing services. We operate directly and through numerous subsidiaries, providing many of our products and services nationally and others in our primary geographic markets in Pennsylvania; New Jersey; the greater Washington, DC area, including Virginia and Maryland; Ohio; Kentucky and Delaware. We also provide certain asset management and global fund processing services internationally.

KEY STRATEGIC GOALS

Our strategy to enhance shareholder value centers on achieving revenue growth in our various businesses underpinned by prudent management of risk, capital and expenses. In each of our business segments, the primary drivers of growth are the acquisition, expansion and retention of customer relationships. We strive to achieve such growth in our customer base by providing convenient banking options, leading technological systems and a broad range of asset management products and services. We also intend to grow through appropriate and targeted acquisitions and, in certain businesses, by expanding into new geographical markets.

In recent years, we have managed our interest rate risk to achieve a moderate risk profile with limited exposure to earnings volatility resulting from interest rate fluctuations. Our actions have created a balance sheet characterized by strong asset quality and significant flexibility to take advantage, where appropriate, of changing interest rates and to adjust to changing market conditions.

On February 15, 2006, we announced that BlackRock and Merrill Lynch had entered into a definitive agreement pursuant to which Merrill Lynch will contribute its investment management business to BlackRock in exchange for newly issued BlackRock common and preferred stock. Upon the closing of this transaction, which we expect to occur around September 30, 2006, BlackRock's assets under management would increase to approximately \$1 trillion and Merrill Lynch would own 65 million equity shares, or approximately 49%, of the combined company. At the closing of the transaction, we expect to continue to own approximately 44 million shares of BlackRock common stock, representing an ownership interest of approximately 34%. In addition, upon closing, the carrying value of our investment in BlackRock would

increase, based on the price of BlackRock stock at the time of announcement of this transaction and other factors, resulting in our recognizing an after-tax gain we currently estimate to be approximately \$1.6 billion. This gain would significantly enhance our capital position and our tangible common equity ratio.

This transaction must be approved by BlackRock shareholders and is subject to obtaining appropriate regulatory and other approvals. We currently control more than 80% of the voting interest in BlackRock and will vote our interest in support of the transaction.

Additional information on this transaction is included in Note 2 Acquisitions in the Notes To Consolidated Financial Statements in this Report. To the extent that statements we make in this Report about our expectations for future results include results from BlackRock, those expectations

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

do not give any effect to the impact to PNC from the change to the equity method of accounting for PNC's interest in BlackRock that would take place when BlackRock and Merrill Lynch close this transaction.

THE ONE PNC INITIATIVE

As further described in our 2005 Form 10-K, the One PNC initiative began in January 2005 and is an ongoing, company-wide initiative with goals of moving closer to the customer, improving our overall efficiency and targeting resources to more value-added activities. PNC expects to realize \$400 million of total annual pretax earnings benefit by mid-2007 from this initiative.

PNC plans to achieve approximately \$300 million of cost savings through a combination of workforce reduction and other efficiencies. Of the approximately 3,000 positions to be eliminated, approximately 2,400 had been eliminated as of June 30, 2006. We estimate that these changes will result in employee severance and other implementation costs of approximately \$74 million, including \$54 million recognized during the second half of 2005 and \$9 million recognized during the first six months of 2006. We expect that the remaining charges of approximately \$11 million will be incurred later in 2006 and early 2007. In addition, PNC intends to achieve at least \$100 million in net revenue growth through the implementation of various pricing and business growth enhancements driven by the One PNC initiative. Initiatives are progressing according to plan.

Table of Contents

We realized a net pretax financial benefit from the One PNC program of approximately \$120 million in the first six months of 2006, including \$60 million in the second quarter. We expect to capture approximately \$265 million in cumulative value by the end of 2006 as originally planned.

KEY FACTORS AFFECTING FINANCIAL PERFORMANCE

Our financial performance is substantially affected by several external factors outside of our control, including:

- General economic conditions,
- Loan demand and utilization of credit commitments,
- The level of interest rates, and the shape of the interest rate yield curve,
- The performance of the capital markets, and
- Customer demand for other products and services.

In addition to changes in general economic conditions, including the direction, timing and magnitude of movement in interest rates and the performance of the capital markets, our success in the remainder of 2006 will depend, among other things, upon:

- Further success in the acquisition, growth and retention of customers,
- Successful execution of the One PNC initiative,
- Revenue growth,
- A sustained focus on expense management and improved efficiency,
- Maintaining strong overall asset quality, and
- Prudent risk and capital management.

SUMMARY FINANCIAL RESULTS

In millions, except per share data	Three months ended		Six months ended	
	June 30 2006	June 30 2005	June 30 2006	June 30 2005
Net income	\$381	\$282	\$735	\$636
Diluted earnings per share	\$1.28	\$.98	\$2.47	\$2.22
Return on				
Average common				
shareholders' equity	17.49%	14.34%	17.08%	16.68%
Average assets	1.64%	1.29%	1.60%	1.50%

Results for the first six months of 2005 reflected the impact of the reversal of deferred tax liabilities that benefited earnings by \$45 million, or \$.16 per diluted share, in the first quarter of 2005 related to our transfer of ownership in BlackRock from PNC Bank, National Association (PNC Bank, N.A.) to PNC Bancorp, Inc. that occurred in January 2005.

Our second quarter 2006 performance included the following accomplishments:

- Net income for the second quarter increased 35% compared with the second quarter of 2005, substantially due to a 32% increase in total noninterest income.
- Solid growth in revenue and well-managed expenses propelled strong improvement in operating leverage compared with the prior year second quarter.
- Average loans for the second quarter of 2006 increased \$2.8 billion, or 6%, compared with the second quarter of 2005, primarily as a result of increased residential mortgage, commercial and commercial real estate loans, in part due to our expansion into the greater Washington, DC area. In addition, average loans for the second quarter of 2005 included \$2.0 billion related to the Market Street Funding commercial paper conduit that was deconsolidated in October 2005.
- Average deposits for the second quarter increased \$6.0 billion, or 11%, compared with the same quarter in the prior year, primarily as the result of an increase in Eurodollar deposits, retail certificates of deposit, money market deposits, and demand and other noninterest-bearing deposits, in part due to our expansion into the greater Washington, DC area.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

- Asset quality remained very strong, with the ratio of nonperforming assets to loans, loans held for sale and foreclosed assets at .44%. The ratio of net charge-offs to average loans was .24% for the quarter.
- We increased the common stock dividend 10%, to 55 cents per share, and repurchased approximately 1.8 million of our common shares during the second quarter of 2006.

Table of Contents

BALANCE SHEET HIGHLIGHTS

Total assets were \$94.9 billion at June 30, 2006. Total average assets were \$92.8 billion for the first six months of 2006 compared with \$85.5 billion for the first six months of 2005. This increase was primarily attributable to a \$6.8 billion increase in interest-earning assets. An increase of \$3.9 billion in average loans was the primary factor for the increase in average interest-earning assets. In addition, average total securities increased \$3.3 billion in the first half of 2006 compared with the prior year period.

Average total loans were \$49.5 billion for the first six months of 2006 and \$45.6 billion in the first six months of 2005. This increase was driven by continued improvements in market loan demand and targeted sales efforts across our banking businesses, as well as our expansion into the greater Washington, DC area that began in May 2005. The increase in average total loans reflected growth in residential mortgages of approximately \$2.0 billion, commercial loans of approximately \$1.4 billion, and commercial real estate loans of approximately \$.8 billion. In addition, average loans for the first half of 2005 included \$2.1 billion related to Market Street Funding (Market Street) which was deconsolidated in October 2005. Loans represented 64% of average interest-earning assets for the first six months of 2006 and 65% for the first six months of 2005.

Average securities totaled \$21.2 billion for the first six months of 2006 and \$17.9 billion for the first six months of 2005. Of this increase, \$3.0 billion was attributable to increases in mortgage-backed, asset-backed, and other debt securities. The higher average securities balances reflected our desire to continue investing through the interest rate cycle and the Riggs acquisition. Securities comprised 28% of average interest-earning assets for the first half of 2006 and 26% for the first half of 2005.

Average total deposits were \$61.8 billion for the first six months of 2006, an increase of \$6.8 billion over the first six months of 2005. The increase in average total deposits was primarily driven by the impact of higher certificates of deposit, money market account and noninterest-bearing deposit balances, and by higher Eurodollar deposits. Similar to its impact on average loans and securities described above, our expansion into the greater Washington, DC area also contributed to the increase in average total deposits. Average total deposits represented 67% of average total assets for the first half of 2006 and 64% for the first half of 2005. Average transaction deposits were \$41.0 billion for the first six months of 2006 compared with \$37.8 billion for the first six months of 2005.

Average borrowed funds were \$15.4 billion for the first six months of 2006 and \$15.7 billion for the first six months of 2005. This decrease was primarily due to a significant decline in commercial paper due to the deconsolidation of Market Street in October 2005, partially offset by net increases in bank notes and senior debt, subordinated debt and federal funds purchased.

Shareholders' equity totaled \$8.8 billion at June 30, 2006, compared with \$8.6 billion at December 31, 2005. See the Consolidated Balance Sheet Review section of this Financial Review for additional information.

Table of Contents***BUSINESS SEGMENT HIGHLIGHTS***

	Three months ended June 30		Six months ended June 30	
		June 30		June 30
In millions	2006	2005	2006	2005
Total segment earnings	\$390	\$383	\$783	\$712

Total business segment earnings for the second quarter and first half of 2005 included the benefit of a \$53 million loan recovery included in the Corporate & Institutional Banking business segment. A summary of results for both the first half and second quarter of 2006 comparisons with the prior year periods follows. Further analysis of business segment results for the six-month periods is found on pages 15 through 23.

We provide a reconciliation of total business segment earnings to total PNC consolidated net income as reported on a GAAP basis in Note 13 Segment Reporting in the Notes To Consolidated Financial Statements in this Report and in the Results of Businesses - Summary table on page 15.

Retail Banking

Retail Banking's earnings were \$375 million for the first six months of 2006 compared with \$311 million for the same period in 2005. Compared with the prior year, revenues increased 12% and noninterest expenses increased 5%, resulting in a 21% earnings improvement. The increase in earnings was driven by higher taxable-equivalent net interest income fueled by continued customer and balance sheet growth along with improved fee income from customers and a sustained focus on expense management.

Earnings from Retail Banking totaled \$185 million in the second quarter of 2006 compared with \$162 million in the second quarter of 2005. Revenue increased 10% compared with the second quarter of 2005, while noninterest expense increased only 4%, driving a 14% increase in earnings.

Corporate & Institutional Banking

Earnings from Corporate & Institutional Banking for the first six months of 2006 totaled \$221 million compared with \$254 million for the first six months of 2005. This decline was primarily attributable to a \$53 million loan recovery recognized in the second quarter of 2005 compared with a \$29 million provision for credit losses in the first half of 2006. In addition to the \$81 million swing in the provision for credit losses, total revenue increased \$91 million and noninterest expenses grew by \$59 million for the first six months of 2006 compared with the comparable 2005 period.

Corporate & Institutional Banking earned \$116 million in the second quarter of 2006 compared with \$144 million in the second quarter of 2005. The earnings decrease compared with the prior year quarter was largely the result of an increase in the provision for credit losses, primarily due to a \$53 million loan recovery referred to above that benefited the prior year quarter. Revenue increased \$61 million in the second quarter of 2005, driven by an increase in noninterest income, while noninterest expense increased \$37 million.

BlackRock

Earnings totaled \$134 million for BlackRock for the first half of 2006 compared with \$100 million for the prior year first half. Higher earnings in 2006 reflected higher investment

advisory and administration fees due to an increase in assets under management and increased performance fees which more than offset higher expenses primarily associated with business growth.

BlackRock earned \$63 million in the second quarter of 2006, an increase of \$10 million, or 19%, compared with the second quarter of 2005. The increase compared with the prior year quarter was largely the result of growth in investment advisory and administrative fees. BlackRock's assets under management increased to \$464 billion at June 30, 2006 compared with \$414 billion at June 30, 2005.

PNC owns approximately 69% of BlackRock and we consolidate BlackRock into our financial statements. Accordingly, approximately 31% of BlackRock's earnings are recognized as minority interest expense in the Consolidated Income Statement. BlackRock financial information

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

included in the Financial Review section of this Report is presented on a stand-alone basis. The market value of our BlackRock shares was approximately \$6.2 billion at June 30, 2006 while the book value at that date was approximately \$767 million.

PFPC

PFPC's earnings of \$53 million in the first six months of 2006 increased \$6 million, or 13%, compared with the first six months of 2005. Higher earnings in the first half of 2006 reflected servicing revenue contributions from several growth areas of the business and the successful implementation of expense control initiatives which improved the company's operating margin.

PFPC earned \$26 million in the second quarter of 2006 compared with \$24 million in the second quarter of 2005. The earnings increase from the second quarter of 2005 was a result of continued emphasis on cost reductions and process efficiencies as competitive factors impacted revenue growth.

Other

Other for the first half of 2006 was a net loss of \$7 million, while Other for the first half of 2005 was a net loss of \$46 million. The first six months of 2005 included the impact of Riggs acquisition integration costs totaling \$19 million after-tax. In addition, the first half of 2006 benefited in the comparison with higher equity management gains and lower net securities losses. Net securities losses for the first six months of 2005 reflected actions taken during the second quarter of that year regarding our securities portfolio that resulted in realized net securities and other losses of approximately \$20 million after-tax. These factors were partially offset by the first quarter 2005 benefit recognized from a \$45 million deferred tax liability reversal related to the internal transfer of our investment in BlackRock as described above under Summary Financial Results.

We recorded earnings of \$10 million in Other for the second quarter of 2006 primarily as a result of \$54 million of pretax equity management gains. Other for the second quarter of 2005 was a net loss of \$85 million. The increase in earnings compared with the second quarter of 2005 reflected higher equity management gains and lower net securities losses in the 2006 period, along with the impact of the nonrecurring Riggs costs referred to above in second quarter 2005 results.

Table of Contents**CONSOLIDATED INCOME STATEMENT REVIEW****NET INTEREST INCOME AND NET INTEREST MARGIN**

	Three months ended		Six months ended	
	June 30	June 30	June 30	June 30
Dollars in millions	2006	2005	2006	2005
Taxable-equivalent net interest income	\$562	\$541	\$1,125	\$1,053
Net interest margin	2.90%	3.00%	2.93%	3.01%

We provide a reconciliation of net interest income as reported under GAAP to net interest income presented on a taxable-equivalent basis in the Consolidated Financial Highlights section on page 1 of this Report.

Changes in net interest income and margin result from the interaction of the volume and composition of interest-earning assets and related yields, interest-bearing liabilities and related rates paid, and noninterest-bearing sources. See Statistical Information-Average Consolidated Balance Sheet And Net Interest Analysis included on pages 63 and 64 of this Report for additional information.

The increase in taxable-equivalent net interest income for the first six months of 2006 compared with the first six months of 2005 reflected the impact of a \$6.8 billion increase in average interest-earning assets in 2006, driven by organic growth and our expansion into the greater Washington, DC area. The \$5.2 billion increase in average interest-earning assets for the second quarter of 2006 compared with the second quarter of 2005 drove the increase in taxable-equivalent net interest income in the second quarter of 2006.

The following factors contributed to the decline in net interest margin for the first half of 2006 compared with the first half of 2005:

- An increase in the average rate paid on deposits of 103 basis points for the first six months of 2006 compared with the 2005 period. The average rate paid on money market accounts, the largest single component of interest-bearing deposits, increased 117 basis points.
- An increase in the average rate paid on borrowed funds of 156 basis points for the first half of 2006 compared with the first half of 2005.
- By comparison, the yield on interest-earning assets increased only 84 basis points. Loans, the single largest component, increased 87 basis points.
- These factors were partially offset by the favorable impact on net interest margin in 2006 of an increase of 20 basis points related to noninterest-bearing sources of funding.

The decline in net interest margin for the second quarter of 2006 compared with the second quarter of 2005 reflected the following:

- An increase in the average rate paid on deposits of 106 basis points for the second quarter of 2006 compared with the second quarter of 2005. The average rate paid on money market accounts, the largest single component of interest-bearing deposits, increased 115 basis points.
- An increase in the average rate paid on borrowed funds of 158 basis points for the second quarter of 2006 compared with the prior year period.
- By comparison, the yield on interest-earning assets increased only 81 basis points. Loans, the single largest component, increased 90 basis points.
- These factors were partially offset by the favorable impact on net interest margin in 2006 of an increase of 21 basis points related to noninterest-bearing sources of funding.

We believe that net interest margins for our industry will continue to be challenged if the yield curve remains flat or inverted, as competition for loans and deposits remains intense and as customers continue to migrate from lower cost to higher cost deposits. Consequently, we believe that our taxable-equivalent net interest income will be relatively flat to up through the remainder of 2006 and that our net interest margin may continue to be under pressure in the latter half of 2006. This outlook includes the impact of financing costs associated with share repurchases.

PROVISION FOR CREDIT LOSSES

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

The provision for credit losses increased \$85 million, to \$66 million, in the first half of 2006 compared with the first half of 2005. For the second quarter of 2006, the provision for credit losses increased \$71 million, to \$44 million, compared with the prior year second quarter. The increases in both comparisons reflected the following:

- A \$53 million loan recovery in the second quarter of 2005 resulting from a litigation settlement,
- The impact of overall loan growth, as total average loans grew \$3.9 billion in the first half of 2006 and \$2.8 billion in the second quarter of 2006 compared with the respective prior year periods, and
- The effect of a single large overdraft situation during the second quarter of 2006.

We do not expect to sustain asset quality at its current level. However, based on the assets we currently hold and current business trends and activities, we believe that overall asset quality will remain strong by historical standards for at least the near term. See the Credit Risk Management portion of the Risk Management section of this Financial Review for additional information regarding factors that impact the provision for credit losses.

NONINTEREST INCOME

Summary

Noninterest income was \$2.415 billion for the first six months of 2006, an increase of \$512 million, or 27%, compared with the first six months of 2005. Noninterest income for the second quarter of 2006 totaled \$1.230 billion and totaled \$929 million in the prior year second quarter, an increase of \$301 million, or 32%. Higher asset management fees was the largest factor in both comparisons. In addition, noninterest income in both 2006 periods reflected increases in most other major categories.

Table of Contents

Additional Analysis

Asset management fees totaled \$890 million in the first half of 2006, an increase of \$242 million compared with the first half of 2005. Asset management fees increased \$95 million, to \$429 million, for the second quarter of 2006 compared with the second quarter of 2005. The increase reflected the impact of higher performance fees, BlackRock's first quarter 2005 acquisition of SSRM and other growth in assets managed. Assets under management at June 30, 2006 totaled \$506 billion compared with \$456 billion at June 30, 2005.

Fund servicing fees of \$431 million for the first six months of 2006 represented an \$8 million decline from the prior year period. For the second quarter of 2006, fund servicing fees totaled \$210 million, a decline of \$9 million from the second quarter of 2005. The decrease in fund servicing fees in both comparisons is primarily due to lower fund accounting and transfer agent fees during 2006 due to loss of clients and price concessions.

PFPC provided fund accounting/administration services for \$743 billion of net fund investment assets and provided custody services for \$389 billion of fund investment assets at June 30, 2006, compared with \$766 billion and \$462 billion, respectively, at June 30, 2005. The decreases in domestic accounting/administration net fund assets and custody fund assets at June 30, 2006 resulted primarily from the deconversion of a major client during the first quarter of 2006 which was partially offset by new business, asset inflows from existing customers and equity market appreciation.

Service charges on deposits grew \$27 million, to \$153 million, in the first half of 2006 compared with the prior year first half. Service charges on deposits increased \$13 million in the second quarter of 2006 compared with the prior year second quarter. These increases can be attributed to customer growth, expansion of the branch network, including the expansion into the greater Washington, DC area that began in May 2005, and various pricing actions resulting from the One PNC initiative.

Brokerage fees totaled \$122 million in the first six months of 2006 and \$112 million in the first six months of 2005. Brokerage fees increased \$6 million, to \$63 million, for the second quarter of 2006 compared with the second quarter of 2005. These increases reflected higher annuity income, along with higher brokerage commissions and mutual fund-related revenues in 2006.

Consumer services fees grew \$46 million, to \$183 million, for the first half of 2006 compared with the prior year first half. Consumer services fees increased \$21 million, to \$94 million, in the second quarter of 2006 compared with the second quarter of 2005. Higher fees reflected the impact of consolidating our merchant services activities in the fourth quarter of 2005 as a result of our increased ownership interest in the merchant services business. The increases in fees were also due to higher debit card revenues resulting from higher transaction volumes, our expansion into the greater Washington, DC area and pricing actions related to the One PNC initiative. These factors were partially offset by lower ATM surcharge revenue in the 2006

periods compared with the respective prior year periods as a result of changing customer behavior and a strategic decision to reduce the out-of-footprint ATM network.

Corporate services revenue totaling \$292 million in the first six months of 2006 represented a \$71 million, or 32%, increase over the comparable prior year period. Corporate services revenue increased \$44 million, or 39%, in the second quarter of 2006 compared with the second quarter of 2005. Both 2006 periods benefited from the impact of our October 2005 Harris Williams acquisition that resulted in higher revenues.

Equity management (private equity) net gains on portfolio investments totaled \$61 million for the first half of 2006 compared with \$44 million for the first half of 2005. For the second quarter of 2006, net gains on portfolio investments totaled \$54 million compared with \$12 million in the prior year quarter. Based on the nature of private equity activities, net gains or losses may be volatile from period to period.

Net securities losses amounted to \$12 million for the first six months of 2006 compared with net securities losses of \$35 million in the first six months of 2005. Net securities losses totaled \$8 million in the second quarter of 2006 and \$26 million in the second quarter of 2005. Amounts for both 2005 periods reflect actions taken during the second quarter of that year regarding our securities portfolio that resulted in realized net securities and other losses of approximately \$31 million.

Noninterest revenue from trading activities, which is primarily customer-related, was \$112 million for the first half of 2006 compared with \$61 million for the first half of 2005. For the second quarter of 2006, noninterest revenue from trading activities was \$55 million, compared with \$11 million in the prior year second quarter. We provide additional information on our trading activities under Market Risk Management Trading Risk in the Risk Management section of this Financial Review.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Other noninterest income of \$183 million for the first six months of 2006 represented a \$33 million increase compared with the prior year first half. Other noninterest income increased \$27 million, to \$96 million, in the second quarter of 2006 compared with the second quarter of 2005. Other noninterest income typically fluctuates from period to period depending on the nature and magnitude of transactions completed.

Other noninterest income for the first half of 2006 included gains totaling \$26 million, including \$13 million recognized in the second quarter, related to our contributions of BlackRock stock to the PNC Foundation. These transactions also impacted noninterest expense in each of those periods.

PRODUCT REVENUE

In addition to credit products to commercial customers, Corporate & Institutional Banking offers treasury management and capital markets-related products and services, commercial loan servicing and equipment leasing products that are marketed by several businesses across PNC.

Treasury management revenue, which includes fees as well as net interest income from customer deposit balances, totaled \$208 million for first six months of 2006 and \$200 million for first six months of 2005. For the second quarter of 2006,

Table of Contents

revenue totaled \$106 million compared with \$103 million for the second quarter of 2005. The higher revenue in both comparisons reflected continued expansion and client utilization of commercial payment card services, strong revenue growth in various electronic payment and information services, and a steady increase in business-to-business processing volumes.

Revenue from capital markets products and services was \$140 million for the first half of 2006, compared with \$71 million in the first half of 2005. Consolidated revenue from capital markets products and services, including mergers and acquisitions advisory activities, for the second quarter of 2006 totaled \$76 million compared with \$29 million for the second quarter of 2005. The acquisition of Harris Williams together with improved customer and proprietary trading activities drove the increase in capital markets revenue in both comparisons.

Midland Loan Services offers servicing, real estate advisory and technology solutions for the commercial real estate finance industry. Midland's revenue, which includes fees and net interest income from servicing portfolio deposit balances, totaled \$84 million for first six months of 2006 and \$64 million for first six months of 2005. Second quarter 2006 revenue totaled \$42 million compared with \$32 million for the second quarter of 2005. Revenue growth in both comparisons was primarily driven by growth in the commercial mortgage servicing portfolio and related services.

Revenue from equipment leasing products was \$38 million for the first half of 2006 and \$36 million for the first half of 2005. Second quarter 2006 revenue from equipment leasing products totaled \$20 million compared with \$18 million for the second quarter of 2005. The impact of the interest cost of funding the potential tax exposure on the cross-border leasing portfolio had, and is expected to continue to have, a negative impact on leasing revenue in 2006. See Cross-Border Leases and Related Tax and Accounting Matters within the Consolidated Balance Sheet Review section of this Financial Review for further information.

As a component of our advisory services to clients, we provide a select set of insurance products to fulfill specific customer financial needs. Primary insurance offerings include:

- Annuities,
- Life,
- Credit life,
- Health,
- Disability, and
- Commercial lines coverage.

Client segments served by these insurance solutions include those in Retail Banking and Corporate & Institutional Banking. Insurance products are sold by licensed PNC insurance agents and through licensed third-party arrangements. Revenue from these products was \$35 million in the first six months of 2006 and \$31 million in first six months of 2005. Revenue for the second quarter of 2006 totaled \$18 million compared with \$17 million for the second quarter of 2005. The increases resulted from higher annuity fee revenue.

PNC, through subsidiary companies Alpine Indemnity Limited and PNC Insurance Corp., participates as a reinsurer for its general liability, automobile liability and workers

compensation programs and as a direct writer for its property and terrorism programs.

In the normal course of business, Alpine Indemnity Limited and PNC Insurance Corp. maintain insurance reserves for reported claims and for claims incurred but not reported based on actuarial assessments. We believe these reserves were adequate at June 30, 2006.

NONINTEREST EXPENSE

Year-to-date June 30, 2006 and 2005

Total noninterest expense was \$2.320 billion for the first six months of 2006 and \$2.040 billion for the first six months of 2005. The efficiency ratio was 66% for the first six months of 2006 compared with 69% for the first six months of 2005.

Noninterest expense for the first half of 2006 included the following:

- An increase of \$185 million in BlackRock operating expenses, reflecting growth in that business and integration costs related to the pending Merrill Lynch transaction,
- Expenses totaling \$43 million related to Harris Williams, which we acquired in October 2005, and

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

- An increase of \$30 million related to the consolidation of our merchant services activities in the fourth quarter of 2005. Apart from the impact of these items, noninterest expense for the first six months of 2006 increased \$22 million over the prior year period primarily due to the impact of our expansion into the greater Washington, DC area and contributions of BlackRock stock to the PNC Foundation, partially offset by the benefit of the One PNC initiative.

Second quarter 2006 and 2005

Total noninterest expense was \$1.149 billion for the second quarter of 2006 and \$1.040 billion for the second quarter of 2005. The efficiency ratio was 64% for the second quarter of 2006 and 71% for the second quarter of 2005.

Noninterest expense for the second quarter of 2006 reflected a \$74 million increase in operating expenses at BlackRock, \$24 million of expenses related to Harris Williams, and an increase of \$14 million related to the fourth quarter 2005 consolidation of our merchant services activities. Apart from the impact of these items, noninterest expense for the second quarter of 2006 decreased \$3 million compared with the prior year second quarter.

We expect that the percentage increase in total noninterest expense for full year 2006 compared with 2005, excluding BlackRock, will be in the low single-digit range, with the increase primarily attributable to the acquisition of Harris Williams and the consolidation of merchant services in the fourth quarter of 2005. However, noninterest expense will continue to be impacted by ongoing investments in our businesses.

Table of Contents

Period-end employees totaled 26,032 at June 30, 2006 (comprised of 23,791 full-time and 2,241 part-time) compared with 25,348 at December 31, 2005 (comprised of 23,593 full-time and 1,755 part-time) and 25,874 at June 30, 2005 (comprised of 24,397 full-time and 1,477 part-time). The increase in part-time employees reflects Retail Banking initiatives to utilize more customer-facing employees during peak business hours versus full-time employees for the entire day.

EFFECTIVE TAX RATE

Our effective tax rate for the first six months of 2006 was 33.1% compared with 29.4% for the first six months of 2005. The lower effective rate for first half of 2005 was attributable to the impact of the reversal of deferred tax liabilities in connection with the transfer of our ownership in BlackRock to our intermediate bank holding company. This transaction reduced our first quarter 2005 tax provision by \$45 million.

CONSOLIDATED BALANCE SHEET REVIEW**SUMMARIZED BALANCE SHEET DATA**

In millions	June 30 2006	December 31 2005
Assets		
Loans, net of unearned income	\$50,548	\$49,101

Total liabilities, minority and noncontrolling interests, and shareholders' equity	\$94,914	\$91,954

Our Consolidated Balance Sheet is presented in Part I, Item 1 on page 38 of this Report.

Various seasonal and other factors impact our period-end balances whereas average balances (discussed under the Balance Sheet Highlights section of this Financial Review above and included in the Statistical Information section of this Report on pages 63 and 64) are more indicative of underlying business trends.

An analysis of changes in certain balance sheet categories follows.

LOANS, NET OF UNEARNED INCOME

Loans increased \$1.4 billion, to \$50.5 billion, at June 30, 2006 compared with the balance at December 31, 2005, with the majority of the increase due to higher total commercial loans. Targeted sales efforts across our banking businesses drove the increase in total loans.

Details Of Loans

In millions	June 30 2006	December 31 2005

As the table above indicates, our total loan portfolio continued to be diversified among types of loan products and numerous industries and businesses. The loans that we hold are also diversified across the geographic areas where we do business.

Commercial Lending Exposure (a)

	June 30	December 31
	2006	2005
Investment grade or equivalent	48%	46%
<u>Non-investment grade</u>		
\$50 million or greater	2	2
All other non-investment grade	50	52
Total	100%	100%

(a) Includes total commercial lending in the Retail Banking and Corporate & Institutional Banking business segments.

Table of Contents

Commercial loans are the largest category and are the most sensitive to changes in assumptions and judgments underlying the determination of the allowance for loan and lease losses. We have allocated approximately \$502 million, or 82%, of the total allowance for loan and lease losses at June 30, 2006 to the commercial loan category. This allocation also considers other relevant factors such as:

- Actual versus estimated losses,
- Regional and national economic conditions,
- Business segment and portfolio concentrations,
- Industry competition and consolidation,
- The impact of government regulations, and
- Risk of potential estimation or judgmental errors, including the accuracy of risk ratings.

Net Unfunded Credit Commitments

	June 30	December 31
In millions	2006	2005
Commercial	\$28,175	\$27,774
Consumer	9,975	9,471
Commercial real estate	2,419	2,337
Other	335	596
Total	\$40,904	\$40,178

Commitments to extend credit represent arrangements to lend funds or provide liquidity subject to specified contractual conditions. Commercial commitments are reported net of participations, assignments and syndications, primarily to financial institutions, totaling \$7.1 billion at June 30, 2006 and \$6.7 billion at December 31, 2005.

Unfunded liquidity commitments totaled \$4.6 billion at June 30, 2006 and December 31, 2005 and are included in the preceding table primarily within the Commercial and Consumer categories.

In addition to credit commitments, our net outstanding standby letters of credit totaled \$4.3 billion at June 30, 2006 and \$4.2 billion at December 31, 2005. Standby letters of credit commit us to make payments on behalf of our customers if specified future events occur.

Cross-Border Leases and Related Tax and Accounting Matters

The equipment lease portfolio totaled \$3.6 billion at June 30, 2006. Aggregate residual value at risk on the lease portfolio at June 30, 2006 was \$1.1 billion. We have taken steps to mitigate \$.6 billion of this residual risk, including residual value insurance coverage with third parties, third party guarantees, and other actions. The portfolio included approximately \$1.7 billion of cross-border leases at June 30, 2006. Cross-border leases are leveraged leases of equipment located in foreign countries, primarily in western Europe and Australia. We have not entered into cross-border lease transactions since 2003.

Upon completing examination of our 1998-2000 consolidated federal income tax returns, the IRS provided us with an examination report which proposes increases in our tax liability, principally arising from adjustments to several of our cross-border lease transactions.

The IRS has begun an audit of our 2001-2003 consolidated federal income tax returns. We expect them to again make adjustments to the cross-border lease transactions referred to above as well as to new cross-border lease transactions entered into during those years. We believe our reserves for these exposures were adequate at June 30, 2006.

In July 2006, the Financial Accounting Standards Board (FASB) issued FASB Staff Position No. FAS 13-2, *Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction* (FSP 13-2). FSP 13-2 is effective January 1, 2007 and will require a recalculation of the timing of income recognition and the reevaluation of lease classification for actual or projected changes in the timing of tax benefits for leveraged leases. Any cumulative adjustment will be recognized through retained earnings upon adoption of FSP 13-2. See Note 1 Accounting Policies in the Notes To Consolidated Financial Statements in this Report for additional information. We estimate that the cumulative adjustment that we will record effective January 1, 2007 from the recalculations required by FSP 13-2 will be in the range of approximately \$140 million to \$160 million, after-tax. Any immediate or future reductions in

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

earnings from our adoption of FSP 13-2 would be recovered in subsequent years.

In addition to these transactions, three lease-to-service contract transactions that we were party to were structured as partnerships for tax purposes. These partnerships are under audit by the IRS. However, we do not believe that our exposure from these transactions is material to our consolidated results of operations or financial position.

Additional information on cross-border lease transactions is included under **Cross-Border Leases and Related Tax and Accounting Matters** in the Consolidated Balance Sheet Review section of Item 7 of our 2005 Form 10-K.

Table of Contents**SECURITIES****Details Of Securities (a)**

Other debt	90	88
Corporate stocks and other	223	223
Total securities available for sale	\$22,415	\$21,724
December 31, 2005		
<i>SECURITIES AVAILABLE FOR SALE</i>		
Debt securities		
Mortgage-backed	\$13,794	\$13,544
US Treasury and government agencies	3,816	3,744
Commercial mortgage-backed	1,955	1,919
Asset-backed	1,073	1,063
State and municipal	159	158
Other debt	87	86
Corporate stocks and other	196	196
Total securities available for sale	\$21,080	\$20,710

(a) Securities held to maturity at June 30, 2006 and December 31, 2005 were less than \$.5 million.

Securities represented 23% of total assets at June 30, 2006 and December 31, 2005.

At June 30, 2006, securities available for sale included a net unrealized loss of \$691 million, which represented the difference between fair value and amortized cost. The comparable amount at December 31, 2005 was a net unrealized loss of \$370 million. The impact on bond prices of increases in interest rates and tightening asset spreads during the first six months of 2006 was reflected in the net unrealized loss position at June 30, 2006.

The fair value of securities available for sale decreases when interest rates increase and vice versa. Further increases in interest rates after June 30, 2006, if sustained, will adversely impact the fair value of securities available for sale compared with the balance at June 30, 2006. Net unrealized gains and losses in the securities available for sale portfolio are included in shareholders' equity as accumulated other comprehensive income or loss, net of tax.

We evaluate our portfolio of securities available for sale in light of changing market conditions and other factors and, where appropriate, take steps intended to improve our overall positioning.

The expected weighted-average life of securities available for sale was 4 years and 5 months at June 30, 2006 and 4 years and 1 month at December 31, 2005.

We estimate that at June 30, 2006 the effective duration of securities available for sale is 3.2 years for an immediate 50 basis points parallel increase in interest rates and 3.0 years for an immediate 50 basis points parallel decrease in interest rates. Comparable amounts at December 31, 2005 were 2.7 years and 2.4 years, respectively.

LOANS HELD FOR SALE

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Education loans held for sale totaled \$1.5 billion at June 30, 2006 and \$1.9 billion at December 31, 2005 and represented the majority of our loans held for sale at each date. We classify substantially all of our education loans as loans held for sale. Generally, we sell education loans when the loans are placed into repayment status. Gains on sales of education loans are reflected in the Other noninterest income line item in our Consolidated Income Statement and in the results for the Retail Banking business segment.

FUNDING AND CAPITAL SOURCES

Details Of Funding Sources

In millions	June 30 2006	December 31 2005
Deposits		
Money market	\$26,801	\$24,462
Demand	16,104	17,157
Retail certificates of deposit	13,775	13,010
Savings	2,114	2,295
Other time	1,452	1,313
Time deposits in foreign offices	3,247	2,038
Total deposits	63,493	60,275
Borrowed funds		
Federal funds purchased	3,320	4,128
Repurchase agreements	2,136	1,691
Bank notes and senior debt	3,503	3,875
Subordinated debt	4,329	4,469
Other	2,363	2,734
Total borrowed funds	15,651	16,897
Total	\$79,144	\$77,172

The decline in total borrowed funds compared with the balance at December 31, 2005 reflects a decrease in federal funds purchased and maturities of \$850 million of bank notes during the first half of 2006 partially offset by an issuance of \$500 million of bank notes in June 2006 and an increase in repurchase agreements.

Capital

We manage our capital position by making adjustments to our balance sheet size and composition, issuing debt and equity instruments, making treasury stock transactions, maintaining dividend policies and retaining earnings.

The increase of \$264 million in total shareholders' equity at June 30, 2006 compared with December 31, 2005 reflected the impact of earnings and a reduction in shares held in treasury, partially offset by a higher accumulated other comprehensive loss.

Common shares outstanding at June 30, 2006 were 294.7 million compared with 292.9 million at December 31, 2005. The increase in shares outstanding during the first half of 2006

Table of Contents

reflected share issuances related to various employee stock-based compensation plans and the exercise of employee stock options.

We purchased 1.8 million common shares under our common stock repurchase program during the first six months of 2006, with all purchases occurring in the second quarter. Our current program, which permits us to purchase up to 20 million shares on the open market or in privately negotiated transactions, will remain in effect until fully utilized or until modified, superseded or terminated. As of June 30, 2006, remaining availability for purchases under this program was 17.8 million shares. The extent and timing of additional share repurchases under this program will depend on a number of factors including, among others, market and general economic conditions, economic and regulatory capital considerations, alternative uses of capital, and the potential impact on our credit rating. We expect to continue to be active in share repurchases under favorable market conditions.

The access to, and cost of, funding new business initiatives including acquisitions, the ability to engage in expanded business activities, the ability to pay dividends, the level of deposit insurance costs, and the level and nature of regulatory oversight depend, in part, on a financial institution's capital strength. At June 30, 2006, each of our banking subsidiaries was considered well-capitalized based on regulatory capital ratio requirements. We believe our bank subsidiaries will continue to meet these requirements during the remainder of 2006.

Table of Contents***OFF-BALANCE SHEET ARRANGEMENTS AND VARIABLE INTEREST ENTITIES***

We engage in a variety of activities in the normal course of business that involve unconsolidated entities or that are otherwise not reflected in our Consolidated Balance Sheet that are generally referred to as off-balance sheet arrangements. Further information on these types of activities is included in Note 14 Commitments And Guarantees included in the Notes To Consolidated Financial Statements in Part I, Item 1 of this Report.

Further information on the variable interest entities (VIEs) in the following tables is included in our 2005 Form 10-K under this same heading in Part I, Item 7 and in Note 3 Variable Interest Entities in the Notes To Consolidated Financial Statements included in Part II, Item 8 of that report.

We hold significant variable interests in VIEs that have not been consolidated because we are not considered the primary beneficiary. Information on these VIEs follows:

Non-Consolidated VIEs - Significant Variable Interests

In millions	Aggregate Assets	Aggregate Liabilities	PNC Risk of Loss

PNC's risk of loss in the tables above includes equity investments and unfunded commitments.

Table of Contents***BUSINESS SEGMENTS REVIEW***

We operate four major businesses engaged in providing banking, asset management and global fund processing services. Business segment results, including inter-segment revenues, and a description of each business are included in Note 13 Segment Reporting included in the Notes To Consolidated Financial Statements under Part I, Item 1 of this Report.

Results of individual businesses are presented based on our management accounting practices and our management structure. There is no comprehensive, authoritative body of guidance for management accounting equivalent to GAAP; therefore, the financial results of individual businesses are not necessarily comparable with similar information for any other company. We refine our methodologies from time to time as our management accounting practices are enhanced and our businesses and management structure change. Financial results are presented, to the extent practicable, as if each business operated on a stand-alone basis. As permitted under GAAP, we have aggregated the business results for certain operating segments for financial reporting purposes.

Our capital measurement methodology is based on the concept of economic capital for our banking businesses. However, we have increased the capital assigned to Retail Banking to 6% of funds to reflect the capital required for well-capitalized banks and to approximate market comparables for this business. The capital for BlackRock and PFPC currently reflects legal entity shareholders' equity, which exceeds required economic capital.

RESULTS OF BUSINESSES - SUMMARY

(Unaudited)

We have allocated the allowance for loan and lease losses and unfunded loan commitments and letters of credit based on our assessment of risk inherent in the loan portfolios. Our allocation of the costs incurred by operations and other support areas not directly aligned with the businesses is primarily based on the use of services.

Total business segment financial results differ from total consolidated results. The impact of these differences is primarily reflected in minority interest in income of BlackRock and in the Other category in the Results of Businesses Summary table that follows. Other includes residual activities that do not meet the criteria for disclosure as a separate reportable business, such as asset and liability management activities, related net securities gains or losses, certain trading activities, equity management activities, differences between business segment performance reporting and financial statement reporting (GAAP), most corporate overhead and intercompany eliminations.

The period-end employee statistics disclosed for each business segment in the tables that follow reflect staff directly employed by the respective business segment and may exclude operations, technology and staff services employees not directly managed by the respective business segment.

- (e) Excludes certain satellite branches that provide limited products and service hours.

- (f) Excludes brokerage account assets.

Table of Contents

Retail Banking's earnings were \$375 million for the first six months of 2006 compared with \$311 million for the same period in 2005. Compared with the prior year, revenues increased 12% and noninterest expenses increased 5%, resulting in a 21% earnings improvement. The increase in earnings was driven by improved fee income from customers, higher taxable-equivalent net interest income fueled by continued customer and balance sheet growth, and a sustained focus on expense management.

Highlights of Retail Banking's performance during the first six months of 2006 include:

- Consumer and small business checking relationships increased by 74,000, or 4%, compared with June 30, 2005.
- Consumer-related new checking relationships increased 4%, average consumer demand deposits increased 6% and home equity loans increased 6% compared with the prior year amounts.
- Since June 30, 2005, consumer-related checking households using on-line banking increased 13% and checking households using on-line bill payment increased 83%.
- The small business area continued its positive momentum. Average small business loans increased 14% over the first six months of 2005 on the strength of increased demand from both existing customers and new relationships. Small business checking relationships increased 5%.
- Customer assets in brokerage accounts totaled \$43 billion at June 30, 2006 compared with \$41 billion at June 30, 2005. Brokerage fees increased \$8 million or 7% over the first six months of 2005 as a result of increased distribution of investment products.
- Retail Banking's efficiency ratio improved to 58% compared with 62% a year earlier.
- The branch network increased a net 19 branches to a total of 846 branches at June 30, 2006 compared with June 30, 2005. This increase was comprised of 26 new branches with 7 branch consolidations. Our strategy is to continue to optimize our network by opening new branches in high growth areas and consolidating branches in areas of declining market opportunity and/or growth.
- Asset quality remains very strong.

Total revenue for the first six months of 2006 was \$1.535 billion compared with \$1.373 billion for the same period last year. Taxable-equivalent net interest income of \$832 million increased \$63 million, or 8%, compared with 2005 due to an 11% increase in average deposits and a 9% increase in average loan balances. The net interest income growth has been somewhat mitigated by declining spreads on the loan portfolio.

Noninterest income increased \$99 million, or 16%, compared with the first six months of 2005 primarily driven by increased consumer services fees and service charges on deposits. This growth can be attributed primarily to the following:

- Customer growth,
- Expansion of the branch network, including a new market,
- Consolidation of our merchant services activities,
- Increased brokerage account assets and activities,
- Increased asset management fees,
- Increased third party loan servicing activities, and
- Various pricing actions resulting from the One PNC initiative.

The provision for credit losses increased \$8 million in the first six months of 2006 compared with 2005. Overall asset quality remained strong despite the increase in nonperforming loans, net charge-offs, and provision, which was primarily driven by a single large overdraft situation.

Noninterest expense in the first six months of 2006 totaled \$891 million, an increase of \$43 million, or 5%, compared with the first six months of 2005. Operating costs increased \$42 million compared with the prior year period as a result of our expansion into the greater Washington, DC area. Other expense increases were primarily attributable to continued growth of the company's branch network, the consolidation of the company's merchant services activities and an increase in volume related expenses tied to revenue, offset by lower staff-related expense as a result of One PNC initiatives.

Full-time employees at June 30, 2006 totaled 9,674, a decline of 405 from June 30, 2005. Part-time employees have increased by 694 since June 30, 2005. The decline in full-time employees and increase in part-time employees is a direct result of various cost-saving initiatives. These initiatives include utilizing more part-time customer-facing employees during peak business hours versus full-time employees for the entire day.

Table of Contents

We have adopted a relationship-based lending strategy to target specific customer sectors (homeowners, small businesses and auto dealerships) while seeking to maintain a moderate risk profile in the loan portfolio.

- Average commercial loans grew \$647 million, or 13%, on the strength of increased loan demand from existing small business customers and the acquisition of new relationships through our sales efforts.
 - Average home equity loans grew by \$760 million, or 6%, compared with the first six months of 2005. Consumer loan demand is starting to slow as a result of the rising rate environment.
 - Average indirect loans grew \$99 million, or 11%, compared with the first six months of 2005. The indirect auto business benefited from increased sales and marketing efforts.
 - Average residential mortgage loans increased \$559 million, or 53%, primarily due to the addition of loans from the greater Washington, DC area acquisition. Payoffs in our existing portfolio, which will continue throughout 2006, reduced the impact of the additional loans acquired.
- Growing core checking deposits as a lower cost-funding source and as the cornerstone product to build customer relationships is the primary objective of our deposit strategy. Average total deposits increased \$4.4 billion, or 11%, compared with the first six months of 2005. The deposit growth was driven by increases in the number of checking relationships and the recapture of consumer certificate of deposit balances as interest rates have risen.

During this rising rate environment, we expect the rate of growth in demand deposit balances to be less than the rate of growth for customer checking relationships. Additionally, we expect to see customers shift their funds from lower yielding interest-bearing deposits to higher yielding deposits or investment products, and to

pay off loans. The shift has been evident during the last three to four quarters and has impacted the level of average demand deposits in that period.

- Certificates of deposits increased \$2.7 billion and money market deposits increased \$1.6 billion. These increases were attributable to the rising interest rate environment attracting customers back into these products.
- Average demand deposit growth of \$.6 billion, or 4%, was driven by a \$.8 billion increase from the expansion into the greater Washington, DC area and a decline of \$.2 billion in the core business due to customers shifting funds into higher yielding deposits, business sweep products, and investment products.
- Small business and consumer-related checking relationships retention remains strong and stable. Consumer-related checking relationship retention has benefited from improved penetration rates of debit cards, online banking and online bill payment.

Assets under management of \$50 billion at June 30, 2006 remained unchanged compared with the balance at June 30, 2005. The effect of comparatively higher equity markets was offset by client net asset outflows. Client net asset outflows are the result of ordinary course distributions from trust and investment management accounts and account closures exceeding investment additions from new and existing clients.

Nondiscretionary assets under administration of \$85 billion at June 30, 2006 also remained unchanged compared with the balance at June 30, 2005. The effect of comparatively higher equity markets was offset by the loss of a sizeable master custody agreement in the first quarter of 2006.

Earnings from Corporate & Institutional Banking for the first six months of 2006 totaled \$221 million compared with \$254 million for the first six months of 2005. This decline was primarily attributable to a \$53 million loan recovery recognized in the second quarter of 2005 compared with a \$29 million provision for credit losses in the first half of 2006. In addition to the \$81 million swing in the provision for credit losses, total revenue increased \$91 million and noninterest expenses grew by \$59 million for the first six months of 2006 compared with the comparable 2005 period.

(a) Includes lease financing and Market Street. Effective October 17, 2005, Market Street was deconsolidated from our Consolidated Balance Sheet.

(b) Amount for 2005 includes Market Street.

(c) Represents consolidated PNC amounts.

(d) At June 30.

(e) Includes nonperforming loans of \$112 million at June 30, 2006 and \$57 million at June 30, 2005.

Highlights of the first six months of 2006 for Corporate & Institutional Banking included:

- Average loan balances increased \$575 million, or 3%, over 2005. The prior year average included \$2.1 billion in loans from the Market Street Funding commercial paper conduit that was deconsolidated in October 2005. Excluding the impact of deconsolidating the conduit, average loan balances increased 16%. The growth in loans was driven by continuing customer demand, increasing utilization and our expansion into the greater Washington, DC area in May 2005. Based upon the impact of increasing competitive pressures and shrinking loan spreads on PNC's risk/reward criteria, we expect slower growth in loans during the remainder of 2006.
- Average deposits increased \$594 million, or 7%, over the prior year first half driven by growth in our commercial mortgage servicing portfolio and related deposits and the sale of treasury management products. As more clients improve the management of their overall liquidity given the higher rate environment, we anticipate slower growth in deposits for the remainder of 2006.
- Total revenue increased 14% compared with 2005 as strong growth in fee income offset a modest decline in taxable-equivalent net interest income. This growth was driven by increases in capital markets activities, including mergers and acquisitions advisory activities, Midland Loan Services and treasury management products and services.

Table of Contents

- Commercial mortgage servicing revenue, which includes fees and net interest income, totaled \$84 million for the first six months of 2006. The 31% revenue growth was primarily driven by growth in the commercial mortgage servicing portfolio, which increased to \$151 billion, or 27%, and in other commercial real estate related services.
- Noninterest expense increased 19% compared with the first half of 2005. The increases in noninterest expenses and full-time employees were primarily due to acquisition activity and customer growth.

Taxable-equivalent net interest income declined \$13 million, to \$348 million, for the first six months of 2006 compared with the first six months of 2005. This decline was attributable to narrowing loan spreads partially offset by an increase in average loans outstanding.

Noninterest income totaled \$374 million in the first half of 2006, an increase of \$104 million, or 39%, compared with the prior year first half. The increase in corporate service fees reflected fee income attributable to the Harris Williams acquisition completed in October 2005 and growth in commercial mortgage servicing and treasury management revenues, partially offset by lower loan syndications income. Improved trading results partially offset by a decline in net gains on commercial mortgage loan sales drove the increase in other noninterest income.

The provision for credit losses was \$29 million for the first six month months of 2006 compared with a credit of \$52 million for the first six months of 2005. The prior year provision credit reflected the impact of the \$53 million loan recovery referred to above. The higher provision for credit losses in the first half of 2006 reflected loan growth compared with the prior year first half and \$16 million of net charge-offs during this period. Due to increases in nonperforming loans, nonperforming assets at June 30, 2006 increased \$48 million compared with June 30, 2005, and were flat compared with the level at December 31, 2005. Based on the assets we currently hold and current business trends and activities, we believe that overall asset quality will remain strong at least for the near term. However, we anticipate that credit loss provisioning will continue with the growth of the loan portfolio and nonperforming loans will increase in future quarters.

See the additional revenue discussion regarding treasury management and capital markets-related products and services, commercial loan servicing, and equipment leasing products on page 8.

Full-time employees (b)	2,317	2,141

- (a) While BlackRock reports its financial results on a GAAP basis, management believes that in evaluating its results, it is also useful to review additional non-GAAP measures, including operating margin, as adjusted, which is calculated as operating income excluding, net of tax, the State Street Research and Management (SSRM) fee-sharing payment, the LTIP expense, SSRM acquisition costs, Merrill Lynch Investment Managers (MLIM) transaction costs, and appreciation on Rabbi trust assets related to BlackRock's deferred compensation plans divided by total revenue less, net of tax, reimbursable property management compensation and fund administration and servicing costs. We do not advocate that investors consider such non-GAAP financial measures in isolation from, or as a substitute for, financial information prepared in accordance with GAAP. The following is a reconciliation of this presentation to operating margin calculated on a GAAP basis (operating income divided by total revenue) in millions.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Six months ended June 30	2006	2005
Operating income, GAAP basis	\$196	\$148
Add back: SSRM fee-sharing payment	34	
Add back: LTIP expense	29	30
Less: portion of LTIP to be funded by BlackRock	(5)	(6)
Add back: SSRM acquisition costs		9
Add back: MLIM transaction costs	19	
Add back: appreciation on assets related to deferred compensation plans	6	2
Operating income, as adjusted	\$279	\$183
Total revenue, GAAP basis	\$756	\$521
Less: reimbursable property management compensation	11	10
Less: fund administration and servicing costs	21	19
Revenue used for operating margin calculation, as reported	\$724	\$492
Operating margin, GAAP basis	26%	28%
Operating margin, as adjusted	39%	37%

We believe that operating margin, as adjusted, is an effective indicator of management's ability to, and useful to management in deciding how to, effectively employ BlackRock's resources. As such, we believe operating margin, as adjusted, provides useful disclosure to investors. The 2006 SSRM fee-sharing payment was excluded because it represents a non-recurring payment (based on a performance fee) pursuant to the SSRM acquisition agreement. The portion of the LTIP expense associated with awards to be met by the distribution to the LTIP participants of shares of BlackRock stock currently held by PNC has been excluded from operating income, as adjusted, because, exclusive of the potential impact related to LTIP participants' put options, these charges will not impact BlackRock's book value. SSRM acquisition costs consist of certain compensation costs and professional fees incurred in 2005. Compensation expense reflected in this amount represents direct incentives related to alternative product performance fees generated in 2004 by SSRM employees, assumed in conjunction with the acquisition and settled by BlackRock with no future service requirement. Compensation expense associated with appreciation on Rabbi trust assets related to BlackRock's deferred compensation plans has been excluded because investment returns on these assets reported in nonoperating income, net of the related impact on compensation expense, result in a nominal impact on net income. MLIM transaction costs consist of compensation costs and certain professional fees incurred in 2006 related to the pending MLIM transaction. We have excluded fund administration and servicing costs from the operating margin, as adjusted, calculation because BlackRock receives offsetting revenue and expense for these services. Reimbursable property management compensation represents compensation and benefits paid to certain BlackRock Realty Advisors, Inc. (Realty) personnel. These employees are retained on Realty's payroll when properties are acquired for Realty's clients. The related compensation and benefits are fully reimbursed by Realty's clients and have been excluded from revenue used for operating margin measurement, as adjusted, because they bear no economic cost to BlackRock.

(b) At June 30.

(c) Includes BlackRock Funds, BlackRock Liquidity Funds, BlackRock Closed-End Funds, PNC Investment Contract Fund and BlackRock Global Series plc.

Table of Contents

BlackRock reported earnings of \$134 million for the first six months of 2006 compared with \$100 million for the first six months of 2005. Higher earnings in 2006 reflected higher investment advisory and administration fees due to an increase in assets under management and increased performance fees. These factors more than offset the increase in expense due to increased compensation and benefits, general and administration expense, and a one-time expense of \$34 million incurred in the first quarter of 2006 related to the January 2005 acquisition of SSRM. Earnings for the first half of 2005 included nonrecurring pretax expenses of \$9 million associated with the SSRM acquisition.

Total operating revenue increased \$235 million, or 45%, in the first six months of 2006 compared with the prior year period. The impact of higher assets under management and increased investment advisory and administration fees in 2006 was reflected in the significantly higher revenue. The increase in investment advisory and administration fees was the result of increases in fees earned across all asset classes as well as increased performance fees principally related to a large institutional real estate equity client account and an energy equity hedge fund acquired in the 2005 SSRM transaction.

Total expense for the first half of 2006 increased \$187 million, or 50%, compared with the first half of 2005, primarily due to an increase in compensation and benefits. This increase reflected higher incentive compensation associated with higher performance fees and increased operating income growth, and higher salaries and benefits primarily attributable to higher staffing levels associated with business growth. Higher general and administration expense and the SSRM one-time expense of \$34 million recognized in 2006 were also evident in the increase over the first half of 2005.

Assets under management at June 30, 2006 increased \$50 billion, or 12%, compared with June 30, 2005. The increase was primarily attributable to net new business. The increase in assets under management reflected net subscriptions of \$42 billion and market appreciation of \$8 billion in the 12-month period.

The Executive Summary section of this Financial Review has further information related to BlackRock's first quarter 2006 announcement of the pending transaction pursuant to which Merrill Lynch would contribute its investment management business to BlackRock in exchange for newly issued BlackRock common and preferred stock. Additional information on this transaction is also included in Note 2 Acquisitions in the Notes To Consolidated Financial Statements included in this Report.

BlackRock is listed on the New York Stock Exchange under the symbol BLK. Additional information about BlackRock is available in its SEC filings, which can be found at www.sec.gov and on BlackRock's website, www.blackrock.com.

(a) Net of nonoperating expense.

(b) Operating income divided by total operating revenue.

(c) Includes alternative investment net assets serviced.

PFPC's earnings of \$53 million in the first six months of 2006 increased \$6 million, or 13%, compared with the first six months of 2005. Higher earnings in the first half of 2006 reflected servicing revenue contributions from several growth areas of the business and the successful implementation of expense control initiatives which improved the company's operating margin.

Highlights of PFPC's performance in the first six months of 2006 included:

- Offshore revenues increased 40% compared with the first half of 2005 fueled by new business in the alternative arena.
- Managed account service revenue increased 31% due to a 72% increase in assets serviced.
- Subaccounting revenues were up 12% as shareholder accounts grew by 24%.

Servicing revenue for the first six months of 2006 increased \$4 million over the prior year first half, to \$445 million. Excluding the \$5 million comparative decline in revenue related to out-of-pocket and pass-through items that had no impact on earnings, servicing revenue increased \$9 million compared with the first six months of 2005. Revenue increases related to offshore activities, custody, securities lending, subaccounting, and managed account services drove the higher servicing revenue in 2006, partially offset by a decline in fund accounting and transfer agency revenue due to loss of clients and price concessions.

In January 2005 PFPC accepted approximately \$10 million to resolve a client contract dispute, which is reflected as other revenue in the table on this page.

Operating expense declined \$9 million, to \$333 million, in the first six months of 2006 compared with the first six months of 2005. Out-of-pocket and pass-through items declined by \$5 million. The remainder of the decline is attributable to expense control and efficiencies implemented during the past year which resulted in a lower head count and the associated lower compensation costs.

Effective January 2005, PFPC restructured its remaining intercompany term debt obligations given the comparatively favorable interest rate environment at that time. PFPC recorded intercompany debt prepayment penalties, which are reflected as nonoperating expense in the preceding table, totaling \$8 million on a pretax basis in the first quarter of 2005 to effect the restructuring. The current rising rate environment has caused debt expense to increase on a year to year comparison despite a reduction in outstandings.

The decreases in domestic accounting/administration net fund assets and custody fund assets at June 30, 2006 compared with June 30, 2005 resulted primarily from the deconversion of a major client during the first quarter of 2006, which was partially offset by new business, asset inflows from existing customers and equity market appreciation. Subaccounting shareholder accounts serviced by PFPC increased over the year-earlier period due to net new business and growth in existing client accounts. Total assets serviced by PFPC amounted to \$1.9 trillion at both June 30, 2006 and June 30, 2005.

PFPC's performance is partially dependent on the underlying performance of its fund clients and, in particular, their ability to attract and retain customers. As a result, to the extent that PFPC clients' businesses are adversely affected by ongoing governmental investigations into the practices of the mutual and hedge fund industries, PFPC's results also could be adversely impacted. In addition, this regulatory and business environment is likely to continue to result in operating margin pressure for our various services.

Table of Contents

CRITICAL ACCOUNTING POLICIES AND JUDGMENTS

Note 1 Accounting Policies in the Notes To Consolidated Financial Statements included in Part I, Item 1 of this Report and in Part II, Item 8 of our 2005 Form 10-K describe the most significant accounting policies that we use. Certain of these policies require us to make estimates and strategic or economic assumptions that may prove inaccurate or be subject to variations that may significantly affect our reported results and financial position for the period or in future periods.

We must use estimates, assumptions, and judgments when financial assets and liabilities are required to be recorded at, or adjusted to reflect, fair value. Assets and liabilities carried at fair value inherently result in a higher degree of financial statement volatility. Fair values and the information used to record valuation adjustments for certain assets and liabilities are based on either quoted market prices or are provided by other independent third-party sources, when available. When such third-party information is not available, we estimate fair value primarily by using cash flow and other financial modeling techniques. Changes in underlying factors, assumptions, or estimates in any of these areas could materially impact our future financial condition and results of operations.

We discuss the following critical accounting policies and judgments under this same heading in Item 7 of our 2005 Form 10-K:

- Allowances for loan and lease losses and unfunded loan commitments and letters of credit
- Private equity asset valuation
- Lease residuals
- Goodwill
- Revenue recognition
- Income taxes
- Legal contingencies

Additional discussion and information on the application of these policies is found in other portions of this Financial Review and in the Notes To Consolidated Financial Statements in Part I, Item 1 of this Report.

2002 BLACKROCK LONG-TERM

RETENTION AND INCENTIVE PLAN

We describe BlackRock's long-term retention and incentive plan (LTIP) in Note 18 Stock-Based Compensation Plans in the Notes To Consolidated Financial Statements included in Part II, Item 8 of our 2005 Form 10-K. We reported pretax expense of \$26 million in the first six months of 2006 and \$32 million in the first six months of 2005 related to LTIP awards.

STATUS OF DEFINED BENEFIT PENSION PLAN

We have a noncontributory, qualified defined benefit pension plan (plan or pension plan) covering eligible employees. Retirement benefits are derived from a cash balance formula based on compensation levels, age and length of service. Pension contributions are based on an actuarially determined amount necessary to fund total benefits payable to plan participants. Plan assets are currently approximately 60% invested in equity investments with most of the remainder invested in fixed income instruments. Plan fiduciaries determine and review the plan's investment policy.

We calculate the expense associated with the pension plan in accordance with Statement of Financial Accounting Standards No. (SFAS) 87, Employers Accounting for Pensions, and we use assumptions and methods that are compatible with the requirements of SFAS 87, including a policy of reflecting trust assets at their fair market value. On an annual basis, we review the actuarial assumptions related to the pension plan, including the discount rate, rate of compensation increase and the expected return on plan assets. Neither the discount rate nor the compensation increase assumptions significantly affect pension expense.

The expected long-term return on assets assumption does significantly affect pension expense. We decreased the expected long-term return on plan assets assumption from the 8.5% used for 2005 to 8.25% for determining net periodic cost for 2006. This change will increase estimated pension expense in 2006 by approximately \$4 million. Also, under current accounting rules, the differences between expected long-term returns and actual returns are accumulated and amortized to pension expense over future periods. Each one percentage point difference between our actual return and the expected return causes our expense in the following year to change by up to \$3 million.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

The table below reflects the estimated effects on current year pension expense of certain changes in assumptions, using 2006 estimated expense as a baseline.

	Estimated Increase to 2006 Pension Expense
Change in Assumption	(in millions)
.5% decrease in discount rate	\$2
.5% decrease in expected long-term return on assets	8
.5% increase in compensation rate	1

We currently estimate a pretax pension benefit of \$12 million in 2006 compared with a pretax benefit of \$8 million in 2005. Actual pension benefit recognized for the first six months of 2006 totaled \$6 million.

Table of Contents

In accordance with SFAS 87 and SFAS 132 (Revised 2003), Employers Disclosures about Pensions and Other Postretirement Benefits, we may have to eliminate any prepaid pension asset and recognize a minimum pension liability if the accumulated benefit obligation exceeds the fair value of plan assets at year-end. We would recognize the corresponding charge as a component of other comprehensive income and it would reduce total shareholders' equity, but it would not affect net income. At December 31, 2005, the fair value of plan assets was \$1.627 billion, which exceeded the accumulated benefit obligation of \$1.232 billion. The status at year-end 2006 will depend primarily upon 2006 investment returns and the level of contributions, if any, we make to the plan during 2006.

Plan asset investment performance has the most impact on contribution requirements. However, contribution requirements are not particularly sensitive to actuarial assumptions. Investment performance will drive the amount of permitted contributions in future years. Also, current law sets limits as to both minimum and maximum contributions to the plan. In any event, any large near-term contributions to the plan will be at our discretion, as we currently expect that the minimum required contributions under the law will be minimal or zero for several years.

We maintain other defined benefit plans that have a less significant effect on financial results, including various nonqualified supplemental retirement plans for certain employees.

In March 2006, the FASB issued an Exposure Draft on a Proposed Statement of Financial Accounting Standards, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans - an amendment of FASB Statements No. 87, 88, 106, and 132(R) proposing changes that would affect the accounting and reporting for our qualified pension plan, our nonqualified retirement plans, and our postretirement welfare benefit plans. The FASB expects to issue a final standard during the third quarter of 2006 with the changes applied prospectively at December 31, 2006. For additional information on the Exposure Draft, see the Recent Accounting Pronouncements section of Note 1 Accounting Policies in the Notes To Consolidated Financial Statements in this Report.

RISK MANAGEMENT

We encounter risk as part of the normal course of our business and we design risk management processes to help manage these risks. The Risk Management section included in Item 7 of our 2005 Form 10-K provides a general overview of the risk measurement, control strategies and monitoring aspects of our corporate-level risk management processes. Additionally, our 2005 Form 10-K provides an analysis of the risk management processes for what we view as our primary areas of risk: credit, operational, market and liquidity, as well as a discussion of our use of financial derivatives as part of our overall asset and liability risk management process. In appropriate places within that section, historical performance is also addressed. The following information in this Risk Management section updates our 2005 Form 10-K disclosures in these areas.

CREDIT RISK MANAGEMENT

Credit risk represents the possibility that a customer, counterparty or issuer may not perform in accordance with contractual terms. Credit risk is inherent in the financial services business and results from extending credit to customers, purchasing securities, and entering into financial derivative transactions. Credit risk is one of the most common risks in banking and is one of our most significant risks.

Nonperforming, Past Due And Potential Problem Assets

See Note 4 Asset Quality in the Notes To Consolidated Financial Statements of this Report and included here by reference for details of the types of nonperforming assets that we held at June 30, 2006 and December 31, 2005. In addition, certain performing assets have interest payments that are past due or have the potential for future repayment problems.

Total nonperforming assets at June 30, 2006 increased \$15 million, to \$231 million, compared with December 31, 2005 driven by an \$18 million increase in nonperforming loans.

Foreclosed lease assets of \$12 million at June 30, 2006 and \$13 million at December 31, 2005 primarily represent our repossession of collateral related to a single airline industry credit. This repossessed collateral is currently being leased.

The amount of nonperforming loans that was current as to principal and interest was \$121 million at June 30, 2006 and \$115 million at December 31, 2005. While we believe that overall asset quality will remain strong for the near term, we anticipate an increase in nonperforming loans going forward. The current level of asset quality is not sustainable.

Table of Contents**Nonperforming Assets By Business**

	June 30	December 31

Accruing Loans And Loans Held For Sale Past Due 90 Days Or More

	Percent of Total			
	Amount		Outstandings	
	June 30	Dec. 31	June 30	Dec. 31
Dollars in millions	2006	2005	2006	2005
Commercial	\$5	\$12	.02%	.06%
Commercial real estate	2	2	.06	.06
Consumer	19	22	.12	.14
Residential mortgage	7	10	.09	.14
Other	2		.56	
Total loans	35	46	.07	.09
Loans held for sale	27	47	1.25	1.92
Total loans and loans held for sale	\$62	\$93	.12%	.18%

Loans and loans held for sale that are not included in nonperforming or past due categories but cause us to be uncertain about the borrower's ability to comply with existing repayment terms over the next six months totaled \$30 million and zero, respectively, at June 30, 2006 compared with \$67 million and zero, respectively, at December 31, 2005. Approximately 63% of these loans are in the Corporate & Institutional Banking portfolio.

Allowances For Loan And Lease Losses And Unfunded Loan Commitments And Letters Of Credit

We maintain an allowance for loan and lease losses to absorb losses from the loan portfolio. We determine the allowance based on quarterly assessments of the probable estimated losses inherent in the loan portfolio. While we make allocations to specific loans and pools of loans, the total reserve is available for all loan and lease losses.

We refer you to Note 4 Asset Quality in the Notes To Consolidated Financial Statements in this Report regarding changes in the allowance for loan and lease losses and the allowance for unfunded loan commitments and letters of credit for additional information which is included herein by reference.

Allocation Of Allowance For Loan And Lease Losses

	June 30, 2006		December 31, 2005	
	Loans to		Loans to	
	Total		Total	
Dollars in millions	Allowance	Loans	Allowance	Loans
Commercial	\$502	40.5%	\$489	39.2%
Commercial real estate	29	6.3	32	6.4
Consumer	25	32.3	24	33.1
Residential mortgage	7	14.7	7	14.9
Lease financing	45	5.5	41	5.7
Other	3	.7	3	.7
Total	\$611	100.0%	\$596	100.0%

In addition to the allowance for loan and lease losses, we maintain an allowance for unfunded loan commitments and letters of credit. We report this allowance as a liability on our Consolidated Balance Sheet. We determine this amount using estimates of the probability of the ultimate funding and losses related to those credit exposures. This methodology is similar to the one we use for determining the adequacy of our allowance for loan and lease losses.

The provision for credit losses for the first six months of 2006 and the evaluation of the allowances for loan and lease losses and unfunded loan commitments and letters of credit as of June 30, 2006 reflected loan growth, changes in loan portfolio composition, the impact of refinements to our reserve methodology, and changes in asset quality. The provision includes amounts for probable losses on loans and credit exposure related to unfunded loan commitments and letters of credit.

We do not expect to sustain asset quality at its current level. However, based on the assets we currently hold and current business trends and activities, we believe that overall asset quality will remain strong by historical standards for at least the near term. This outlook, combined with expected loan growth, may result in an increase in the allowance for loan and lease losses in future periods.

The allowance as a percent of nonperforming loans was 294% and as a percent of total loans was 1.21% at June 30, 2006. The comparable percentages at December 31, 2005 were 314% and 1.21%.

Charge-Offs And Recoveries

			Percent of	
			Average	
Six months ended	Net		Loans	
June 30 Dollars in millions	Charge-offs	Recoveries	Charge-offs	Loans
2006				
Commercial	\$46	\$10	\$36	.36%
Consumer	24	8	16	.20
Lease financing		4	(4)	(.29)
Total	\$70	\$22	\$48	.20
2005				
Commercial (a)	\$28	\$68	\$(40)	(.43)%
Consumer	21	7	14	.18
Residential mortgage	1		1	.04
Lease financing		1	(1)	(.07)
Total	\$50	\$76	\$(26)	(.12)

(a) Includes a \$53 million loan recovery.

Table of Contents

We establish reserves to provide coverage for probable losses not considered in the specific, pool and consumer reserve methodologies, such as, but not limited to, industry concentrations and conditions; credit quality trends; recent loss experience in particular sectors of the portfolio; ability and depth of lending management; changes in risk selection and underwriting standards; and the timing of available information. The amount of reserves for these qualitative factors is assigned to loan categories and to business segments based on the relative specific and pool allocation amounts. The amount of reserve allocated for qualitative factors represented 8% of the total allowance and .1% of total loans at June 30, 2006.

CREDIT DEFAULT SWAPS

Credit default swaps provide, for a fee, an assumption by a third party of a portion of the credit risk related to the underlying financial instruments. We use the contracts to mitigate credit risk associated with commercial lending activities as well as proprietary derivative and convertible bond trading. Credit default swaps are included in the Free-Standing Derivatives table in the Financial Derivatives section of this Risk Management discussion. We realized a net loss of \$4.5 million during the first six months of 2006 and minimal net gains during the same period of 2005 in connection with credit default swaps.

MARKET RISK MANAGEMENT OVERVIEW

Market risk is the risk of a loss in earnings or economic value due to adverse movements in market factors such as interest rates, credit spreads, foreign exchange rates, and equity prices.

MARKET RISK MANAGEMENT INTEREST RATE RISK

Interest rate risk results primarily from our traditional banking activities of gathering deposits and extending loans. Many factors, including economic and financial conditions, movements in interest rates, and consumer preferences, affect the difference between the interest that we earn on assets and the interest that we pay on liabilities. Because of repricing term mismatches and embedded options inherent in certain of these products, changes in market interest rates not only affect expected near-term earnings, but the economic values of these assets and liabilities as well.

PNC's Asset and Liability Management group centrally manages interest rate risk subject to interest rate risk limits and certain policies approved by the Asset and Liability Committee and the Risk Committee of the Board.

Sensitivity estimates and market interest rate benchmarks for the second quarter of 2006 and 2005 follow:

Interest Sensitivity Analysis

	Second Quarter 2006	Second Quarter 2005
Net Interest Income Sensitivity Simulation		
Effect on net interest income in first year from gradual interest rate change over following 12 months of:		
100 basis point increase	(1.3)%	1.5%
100 basis point decrease	1.2%	(2.0)%
Effect on net interest income in second year from gradual interest rate change over the preceding 12 months of:		
100 basis point increase	(3.6)%	3.1%
100 basis point decrease	2.8%	(6.9)%
Duration of Equity Model		
Base case duration of equity (in years):	1.0	(2.0)

Key Period-End Interest Rates

One-month LIBOR	5.33%	3.34%
Three-year swap	5.62%	4.03%

In addition to measuring the effect on net interest income assuming parallel changes in current interest rates, we routinely simulate the effects of a number of nonparallel interest rate environments. The following Net Interest Income Sensitivity To Alternate Rate Scenarios table reflects the estimated percentage change in net interest income over the next two 12-month periods assuming (i) the PNC Economist's most likely rate forecast, (ii) implied forward rates, which result in an essentially flat rate scenario, and (iii) a Two-Ten Inversion (200 basis points differential between two-year and ten-year rates) scenario. We are inherently sensitive to a flatter or inverted yield curve.

Net Interest Income Sensitivity To Alternate Rate Scenarios (for second quarter 2006)

	PNC	Market	Two-Ten
	Economist	Forward	Inversion
First year sensitivity	.9%	(.3)%	(4.5)%
Second year sensitivity	5.7%	.2%	(4.3)%

Table of Contents

When forecasting net interest income, we make assumptions about interest rates and the shape of the yield curve, the volume and characteristics of new business, and the behavior of existing positions. These assumptions determine the future level of simulated net interest income in the base interest rate scenario and the other interest rate scenarios presented in the table above. These simulations assume that as assets and liabilities mature, they are replaced or repriced at market rates.

All changes in forecasted net interest income are relative to results in a base rate scenario where current market rates are assumed to remain unchanged over the forecast horizon.

The graph below presents the yield curves for the base rate scenario and each of the alternative scenarios one year forward.

Our risk position has become increasingly liability sensitive in part due to the increase in market interest rates and in part due to our balance sheet management strategy. We believe that we have the deposit funding base and balance sheet flexibility to take advantage, where appropriate, of changing interest rates and to adjust to changing market conditions.

MARKET RISK MANAGEMENT TRADING RISK

Our trading activities primarily include customer-driven trading in fixed income securities, equities, derivatives, and foreign exchange contracts. They also include the underwriting of fixed income and equity securities and proprietary trading.

We use value-at-risk (VaR) as the primary means to measure and monitor market risk in trading activities. The Risk Committee of the Board establishes an enterprise-wide VaR limit on our trading activities.

The following table shows VaR usage for the second quarter of 2006 by product type:

VaR Usage by Product Type

In millions	Min	Max	Avg
Fixed Income	\$2.9	\$5.0	\$3.8
Equity	.6	2.5	1.1
Foreign Exchange	.1	.5	.2
Total	3.8	6.8	5.1

To help ensure the integrity of the models used to calculate VaR for each portfolio and enterprise-wide, we use a process known as backtesting. The backtesting process consists of comparing actual observations of trading-related gains or losses against the VaR levels that were calculated at the close of the prior day. We would expect a maximum of two to three instances a year in which actual losses exceeded the prior day VaR measure. During the first six months of 2006, there were no such instances at the enterprise-wide level.

The following graph shows a comparison of enterprise-wide trading-related gains and losses against prior day VaR for the period.

Table of Contents

Total trading revenue for the first half and second quarter of 2006 and 2005 was as follows:

Six months ended June 30 in millions	2006	2005
Net interest income	(\$3)	\$6
Noninterest income	112	61
Total trading revenue	\$109	\$67
Securities underwriting and trading (a)	\$6	\$10
Foreign exchange	31	17
Financial derivatives	72	40
Total trading revenue	\$109	\$67
Three months ended June 30 in millions	2006	2005
Net interest income	(\$3)	\$4
Noninterest income	55	11
Total trading revenue	\$52	\$15
Securities underwriting and trading (a)	\$2	\$5
Foreign exchange	17	9
Financial derivatives	33	1
Total trading revenue	\$52	\$15

(a) Includes changes in fair value for certain loans accounted for at fair value.

Average trading assets and liabilities consisted of the following:

Six months ended June 30 - in millions	2006	2005
Assets		
Securities (a)	\$1,636	\$1,907
Resale agreements (b)	350	828
Financial derivatives (c)	1,080	772
Loans at fair value (c)	86	
Total assets	\$3,152	\$3,507
Liabilities		
Securities sold short (d)	\$716	\$1,104
Repurchase agreements and other borrowings (e)	763	1,131
Financial derivatives (f)	1,052	789
Borrowings at fair value (f)	24	
Total liabilities	\$2,555	\$3,024
Three months ended June 30 - in millions	2006	2005
Assets		
Securities (a)	\$1,477	\$1,932
Resale agreements (b)	378	411
Financial derivatives (c)	1,251	864
Loans at fair value (c)	170	
Total assets	\$3,276	\$3,207
Liabilities		
Securities sold short (d)	\$769	\$750
Repurchase agreements and other borrowings (e)	641	1,078
Financial derivatives (f)	1,200	909
Borrowings at fair value (f)	48	
Total liabilities	\$2,658	\$2,737

(a) Included in Interest-earning assets-Other on the Average Consolidated Balance Sheet and Net Interest Analysis.

(b) Included in Federal funds sold and resale agreements.

(c) Included in Noninterest-earning assets-Other.

(d) Included in Other borrowed funds.

(e) Included in Repurchase agreements and Other borrowed funds.

(f) Included in Accrued expenses and other liabilities.

MARKET RISK MANAGEMENT EQUITY AND OTHER

INVESTMENT RISK

Equity investment risk is the risk of potential losses associated with investing in both private and public equity markets.

Private Equity

The private equity portfolio is comprised of investments that vary by industry, stage and type of investment.

At June 30, 2006, private equity investments carried at estimated fair value totaled \$506 million compared with \$449 million at December 31, 2005. As of June 30, 2006, approximately 44% of the amount was invested directly in a variety of companies and approximately 56% was invested in various limited partnerships. Private equity unfunded commitments totaled \$140 million at June 30, 2006 compared with \$78 million at December 31, 2005. The increase resulted from our \$74 million commitment to a new equity fund, PNC Equity Partners II, LP, which had a first closing in June 2006. Our commitment is expected to be funded over a five-year period. This fund is not consolidated as we have less than a 50% ownership interest. See Note 14 Commitments And Guarantees in the Notes To Consolidated Financial Statements regarding our commitment to PNC Mezzanine Partners III, LP.

Other Investments

We also make investments in affiliated and non-affiliated funds with both traditional and alternative investment strategies. Such investments include investments in BlackRock's mutual funds, hedge funds, and CDOs. The economic values could be driven by either the fixed-income market or the equity markets, or both.

LIQUIDITY RISK MANAGEMENT

Liquidity risk is the risk of potential loss if we were unable to meet our funding requirements at a reasonable cost. We manage liquidity risk to help ensure that we can obtain cost-effective funding to meet current and future obligations under both normal business as usual and stressful circumstances.

Our largest source of funding on a consolidated basis is the deposit base that comes from our retail and wholesale banking activities. Other borrowed funds come from a diverse mix of long and short-term funding sources. Liquid assets and unused borrowing capacity from a number of sources are also available to maintain our liquidity position.

Liquid assets consist of short-term investments (federal funds sold, resale agreements and other short-term investments) and securities available for sale. At June 30, 2006, our liquid assets totaled \$24.4 billion, with \$10.3 billion pledged as collateral for borrowings, trust, and other commitments.

PNC Bank, N.A. is a member of the Federal Home Loan Bank of Pittsburgh (FHLB-Pittsburgh) and as such has access to advances from FHLB-Pittsburgh secured generally by residential mortgages, other real estate related loans, and mortgage-backed securities. At June 30, 2006, our total unused borrowing capacity from FHLB-Pittsburgh under current collateral requirements was \$24.8 billion.

Table of Contents

We can also obtain funding through alternative forms of borrowing, including federal funds purchased, repurchase agreements, and short-term and long-term debt issuances. In July 2004, PNC Bank, N.A. established a program to offer up to \$20 billion in senior and subordinated unsecured debt obligations with maturities of more than nine months. Through June 30, 2006, PNC Bank, N.A. had issued \$2.9 billion of debt under this program, including \$500 million of 18-month floating rate notes, due January 2, 2008, issued during the second quarter of 2006 with interest payable monthly at the rate of 1-month LIBOR minus 5.5 basis points. These notes are not redeemable or subject to repayment at the option of the holder prior to maturity.

PNC Bank, N.A. established a program in December 2004 to offer up to \$3.0 billion of its commercial paper. As of June 30, 2006, \$10 million of commercial paper was outstanding under this program.

Our parent company's routine funding needs consist primarily of dividends to PNC shareholders, share repurchases, debt service, the funding of non-bank affiliates, and acquisitions.

Parent company liquidity guidelines are designed to help ensure that sufficient liquidity is available to meet these requirements over the succeeding 12-month period. In managing parent company liquidity we consider funding sources, such as expected dividends to be received from PNC Bank, N.A. and potential debt issuance, and discretionary funding uses, the most significant of which is the external dividend to be paid on PNC's stock.

The principal source of parent company cash flow is the dividends it receives from PNC Bank, N.A., which may be impacted by the following:

- Capital needs,
- Laws and regulations,
- Corporate policies,
- Contractual restrictions, and
- Other factors.

Also, there are statutory and regulatory limitations on the ability of national banks to pay dividends or make other capital distributions or to extend credit to the parent company or its non-bank subsidiaries. The amount available for dividend payments to the parent company by PNC Bank, N.A. without prior regulatory approval was approximately \$532 million at June 30, 2006.

In addition to dividends from PNC Bank, N.A., other sources of parent company liquidity include cash and short-term investments, as well as dividends and loan repayments from other subsidiaries. As of June 30, 2006, the parent company had approximately \$1.6 billion in funds available from its cash and short-term investments.

We can also generate liquidity for the parent company and PNC's non-bank subsidiaries through the issuance of securities in public or private markets. At June 30, 2006, we had unused capacity under effective shelf registration statements of approximately \$1.6 billion of debt or equity securities. BlackRock, one of our majority-owned non-bank subsidiaries, also has access to public and private financing. In July 2006, PNC Funding Corp established a program to offer up to \$3.0 billion of commercial paper to provide the parent company with additional liquidity.

As of June 30, 2006, there were \$1.1 billion of parent company contractual obligations with maturities of less than one year, all of which mature in the third quarter of 2006.

Commitments

The following tables set forth contractual obligations and various other commitments representing required and potential cash outflows as of June 30, 2006.

Contractual Obligations

June 30, 2006 - in millions	Total
Remaining contractual maturities of time deposits	\$18,474
Borrowed funds	15,651
Minimum annual rentals on noncancellable leases	1,144
Nonqualified pension and postretirement benefits	299
Purchase obligations (a)	316

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Total contractual cash obligations **\$35,884**
 (a) Includes purchase obligations for goods and services covered by noncancellable contracts and contracts including cancellation fees.
Other Commitments (a)

	Total
June 30, 2006 - in millions	Amounts Committed
Loan commitments	\$40,904
Standby letters of credit	4,292
Other commitments (b)	5,265
Total commitments	\$50,461
(a) Other commitments are funding commitments that could potentially require performance in the event of demands by third parties or contingent events. Loan commitments are reported net of participations, assignments and syndications.	
(b) Includes liquidity facilities commitments, standby bond repurchase agreements, equity funding commitments related to equity management and affordable housing, as well as BlackRock's investment commitments and obligation under an acquired management contract.	

FINANCIAL DERIVATIVES

We use a variety of financial derivatives as part of the overall asset and liability risk management process to help manage interest rate, market and credit risk inherent in our business activities. Substantially all such instruments are used to manage risk related to changes in interest rates. Interest rate and total return swaps, interest rate caps and floors and futures contracts are the primary instruments used by us for interest rate risk management.

Financial derivatives involve, to varying degrees, interest rate, market and credit risk. For interest rate swaps and total return swaps, options and futures contracts, only periodic cash payments and, with respect to options, premiums, are exchanged. Therefore, cash requirements and exposure to credit risk are significantly less than the notional amount on these instruments. Further information on our financial derivatives, including the credit risk amounts of these derivatives as of June 30, 2006 and December 31, 2005, is presented in Note 1 Accounting Policies and Note 9 Financial Derivatives in the Notes To Consolidated Financial Statements in Part I, Item 1 of this Report.

Not all elements of interest rate, market and credit risk are addressed through the use of financial or other derivatives, and such instruments may be ineffective for their intended purposes due to unanticipated market characteristics, among other reasons.

Table of Contents

The following tables provide the notional amount and fair value of financial derivatives used for risk management and designated as accounting hedges as well as free-standing derivatives at June 30, 2006 and December 31, 2005. Weighted-average interest rates presented are based on contractual terms, if fixed, or the implied forward yield curve at each respective date, if floating.

Table of Contents

INTERNAL CONTROLS AND DISCLOSURE CONTROLS AND PROCEDURES

As of June 30, 2006, we performed an evaluation under the supervision and with the participation of our management, including the Chairman and Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures and of changes in our internal control over financial reporting.

Based on that evaluation, our management, including the Chairman and Chief Executive Officer and the Chief Financial Officer, concluded that our disclosure controls and procedures were effective as of June 30, 2006, and that there has been no change in internal control over financial reporting that occurred during the second quarter of 2006 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

GLOSSARY OF TERMS

Accounting/administration net fund assets - Net domestic and foreign fund investment assets for which we provide accounting and administration services. We do not include these assets on our Consolidated Balance Sheet.

Adjusted average total assets - Primarily comprised of total average quarterly (or annual) assets plus (less) unrealized losses (gains) on available-for-sale debt securities, less goodwill and certain other intangible assets.

Annualized - Adjusted to reflect a full year of activity.

Assets under management - Assets over which we have sole or shared investment authority for our customers/clients. We do not include these assets on our Consolidated Balance Sheet.

Basis point - One hundredth of a percentage point.

Charge-off - Process of removing a loan or portion of a loan from our balance sheet because it is considered uncollectible. We also record a charge-off when a loan is transferred to held for sale and the loan's market value is less than its carrying amount.

Common shareholders' equity to total assets - Common shareholders' equity divided by total assets. Common shareholders' equity equals total shareholders' equity less the liquidation value of preferred stock.

Credit derivatives - Contractual agreements that provide protection against a credit event of one or more referenced credits. The nature of a credit event is established by the protection buyer and protection seller at the inception of a transaction, and such events include bankruptcy, insolvency and failure to meet payment obligations when due. The buyer of the credit derivative pays a periodic fee in return for a payment by the protection seller upon the occurrence, if any, of a credit event.

Custody assets - Investment assets held on behalf of clients under safekeeping arrangements. We do not include these assets on our Consolidated Balance Sheet. Investment assets held in custody at other institutions on our behalf are included in the appropriate asset categories on the Consolidated Balance Sheet as if physically held by us.

Derivatives - Financial contracts whose value is derived from publicly traded securities, interest rates, currency exchange rates or market indices. Derivatives cover a wide assortment of financial contracts, including forward contracts, futures, options and swaps.

Duration of equity - An estimate of the rate sensitivity of our economic value of equity. A negative duration of equity is associated with asset sensitivity (*i.e.*, positioned for rising interest rates), while a positive value implies liability sensitivity (*i.e.*, vulnerable to rising rates). For example, if the duration of equity is +1.5 years, the economic value of equity declines by 1.5% for each 100 basis point increase in interest rates.

Earning assets - Assets that generate income, which include: federal funds sold; resale agreements; other short-term investments, including trading securities; loans held for sale; loans, net of unearned income; securities; and certain other assets.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Economic capital - Represents the amount of resources that our business segments should hold to guard against potentially large losses that could cause insolvency. It is based on a measurement of economic risk, as opposed to risk as defined by regulatory bodies. The economic capital measurement process involves converting a risk distribution to the capital that is required to support the risk, consistent with our target credit rating. As such, economic risk serves as a common currency of risk that allows us to compare different risks on a similar basis.

Economic value of equity (EVE) - The present value of the expected cash flows of our existing assets less the present value of the expected cash flows of our existing liabilities, plus the present value of the net cash flows of our existing off-balance sheet positions.

Effective duration - A measurement, expressed in years, that, when multiplied by a change in interest rates, would approximate the percentage change in value of on- and off- balance sheet positions.

Efficiency - Noninterest expense divided by the sum of net interest income and noninterest income.

Foreign exchange contracts - Contracts that provide for the future receipt and delivery of foreign currency at previously agreed-upon terms.

Funds transfer pricing - A management accounting methodology designed to recognize the net interest income effects of sources and uses of funds provided by the assets and liabilities of our business segments. We assign these balances LIBOR-based funding rates at origination that represent the interest cost for us to raise/invest funds with similar maturity and repricing structures.

Table of Contents

Futures and forward contracts - Contracts in which the buyer agrees to purchase and the seller agrees to deliver a specific financial instrument at a predetermined price or yield. May be settled either in cash or by delivery of the underlying financial instrument.

GAAP - Accounting principles generally accepted in the United States of America.

Interest rate floors and caps - Interest rate protection instruments that involve payment from the seller to the buyer of an interest differential, which represents the difference between a short-term rate (e.g., three-month LIBOR) and an agreed-upon rate (the strike rate) applied to a notional principal amount.

Interest rate swap contracts - Contracts that are entered into primarily as an asset/liability management strategy to reduce interest rate risk. Interest rate swap contracts are exchanges of interest rate payments, such as fixed-rate payments for floating-rate payments, based on notional principal amounts.

Intrinsic value - The amount by which the fair value of an underlying stock exceeds the exercise price of an option on that stock.

Leverage ratio - Tier 1 risk-based capital divided by adjusted average total assets.

Net interest margin - Annualized taxable-equivalent net interest income divided by average earning assets.

Nondiscretionary assets under administration - Assets we hold for our customers/clients in a non-discretionary, custodial capacity. We do not include these assets on our Consolidated Balance Sheet.

Noninterest income to total revenue - Noninterest income divided by the sum of net interest income and noninterest income.

Nonperforming assets - Nonperforming assets include nonaccrual loans, troubled debt restructured loans, nonaccrual loans held for sale, foreclosed assets and other assets. We do not accrue interest income on assets classified as nonperforming.

Nonperforming loans - Nonperforming loans include loans to commercial, equipment lease financing, consumer, commercial real estate and residential mortgage customers as well as troubled debt restructured loans. Nonperforming loans do not include nonaccrual loans held for sale or foreclosed and other assets. We do not accrue interest income on loans classified as nonperforming.

Notional amount - A number of currency units, shares, or other units specified in a derivatives contract.

Operating leverage - The period to period percentage change in total revenue less the percentage change in noninterest expense. A positive percentage indicates that revenue growth exceeded expense growth (*i.e.*, positive operating leverage) while a negative percentage implies expense growth exceeded revenue growth (*i.e.*, negative operating leverage).

Options - Contracts that grant the purchaser, for a premium payment, the right, but not the obligation, to either purchase or sell the associated financial instrument at a set price during a period or at a specified date in the future.

Recovery - Cash proceeds received on a loan that we had previously charged off. We credit the amount received to the allowance for loan and lease losses.

Return on average capital - Annualized net income divided by average capital.

Return on average assets - Annualized net income divided by average assets.

Return on average common equity - Annualized net income divided by average common shareholders' equity.

Risk-weighted assets - Primarily computed by the assignment of specific risk-weights (as defined by The Board of Governors of the Federal Reserve System) to assets and off-balance sheet instruments.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Securitization - The process of legally transforming financial assets into securities.

Swaptions - Contracts that grant the purchaser, for a premium payment, the right, but not the obligation, to enter into an interest rate swap agreement during a period or at a specified date in the future.

Tangible common equity ratio - Common shareholders' equity less goodwill and other intangible assets (excluding mortgage servicing rights) divided by period-end assets less goodwill and other intangible assets (excluding mortgage servicing rights).

Taxable-equivalent interest - The interest income earned on certain assets is completely or partially exempt from federal income tax. As such, these tax-exempt instruments typically yield lower returns than a taxable investment. To provide more meaningful comparisons of yields and margins for all interest-earning assets, we also provide revenue on a taxable-equivalent basis by increasing the interest income earned on tax-exempt assets to make it fully equivalent to interest income on other taxable investments. This adjustment is not permitted under GAAP on the Consolidated Income Statement.

Tier 1 risk-based capital - Tier 1 risk-based capital equals: total shareholders' equity, plus trust preferred capital securities, plus certain minority interests that are held by others; less goodwill and certain other intangible assets, less equity investments in nonfinancial companies and less net unrealized holding losses on available-for-sale equity securities. Net unrealized holding gains on available-for-sale equity securities, net unrealized holding gains (losses) on available-for-sale debt securities and net unrealized holding gains (losses) on cash flow hedge derivatives are excluded from total shareholders' equity for tier 1 risk-based capital purposes.

Table of Contents

Tier 1 risk-based capital ratio - Tier 1 risk-based capital divided by period-end risk-weighted assets.

Total fund assets serviced - Total domestic and offshore fund investment assets for which we provide related processing services. We do not include these assets on our Consolidated Balance Sheet.

Total return swap - A non-traditional swap where one party agrees to pay the other the total return of a defined underlying asset (e.g., a loan), usually in return for receiving a stream of LIBOR-based cash flows. The total returns of the asset, including interest and any default shortfall, are passed through to the counterparty. The counterparty is therefore assuming the credit and economic risk of the underlying asset.

Total risk-based capital - Tier 1 risk-based capital plus qualifying senior and subordinated debt, other minority interest not qualified as tier 1, and the allowance for loan and lease losses, subject to certain limitations.

Total risk-based capital ratio - Total risk-based capital divided by period-end risk-weighted assets.

Transaction deposits - The sum of money market and interest-bearing demand deposits and demand and other noninterest-bearing deposits.

Value-at-risk (VaR) - A statistically-based measure of risk which describes the amount of potential loss which may be incurred due to severe and adverse market movements. The measure is of the maximum loss which should not be exceeded on 99 out of 100 days.

Yield curve - A graph showing the relationship between the yields on financial instruments or market indices of the same credit quality with different maturities. For example, a normal or positive yield curve exists when long-term bonds have higher yields than short-term bonds. A flat yield curve exists when yields are the same for short-term and long-term bonds. A steep yield curve exists when yields on long-term bonds are significantly higher than on short-term bonds. An inverted or negative yield curve exists when short-term bonds have higher yields than long-term bonds.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

We make statements in this Report, and we may from time to time make other statements, regarding our outlook or expectations for earnings, revenues, expenses and/or other matters regarding or affecting PNC that are forward-looking statements within the meaning of the Private Securities Litigation Reform Act. Forward-looking statements are typically identified by words such as believe, expect, anticipate, intend, outlook, estimate, forecast, project and other similar words and expressions.

Forward-looking statements are subject to numerous assumptions, risks and uncertainties, which change over time. Forward-looking statements speak only as of the date they are made. We do not assume any duty and do not undertake to update our forward-looking statements. Actual results or future events could differ, possibly materially, from those that we anticipated in our forward-looking statements, and future results could differ materially from our historical performance.

Our forward-looking statements are subject to the following principal risks and uncertainties. We provide greater detail regarding these factors in our 2005 Form 10-K, including in the Risk Factors and Risk Management sections. Our forward-looking statements may also be subject to other risks and uncertainties, including those discussed elsewhere in this Report or in our other filings with the SEC.

- Our business and operating results are affected by business and economic conditions generally or specifically in the principal markets in which we do business. We are affected by changes in our customers' financial performance, as well as changes in customer preferences and behavior, including as a result of changing economic conditions.
- The value of our assets and liabilities as well as our overall financial performance are affected by changes in interest rates or in valuations in the debt and equity markets. Actions by the Federal Reserve and other government agencies, including those that impact money supply and market interest rates, can affect our activities and financial results.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

- Competition can have an impact on customer acquisition, growth and retention, as well as on our credit spreads and product pricing, which can affect market share, deposits and revenues.
- Our ability to implement our One PNC initiative, as well as other business initiatives and strategies we may pursue, could affect our financial performance over the next several years.

Table of Contents

- Our ability to grow successfully through acquisitions is impacted by a number of risks and uncertainties related both to the acquisition transactions themselves and to the integration of the acquired businesses into PNC after closing. These uncertainties are present in transactions such as the pending acquisition by BlackRock of Merrill Lynch's investment management business.
- Legal and regulatory developments could have an impact on our ability to operate our businesses or our financial condition or results of operations or our competitive position or reputation. Reputational impacts, in turn, could affect matters such as business generation and retention, our ability to attract and retain management, liquidity and funding. These legal and regulatory developments could include: (a) the unfavorable resolution of legal proceedings or regulatory and other governmental inquiries; (b) increased litigation risk from recent regulatory and other governmental developments; (c) the results of the regulatory examination process, our failure to satisfy the requirements of agreements with governmental agencies, and regulators' future use of supervisory and enforcement tools; (d) legislative and regulatory reforms, including changes to laws and regulations involving tax, pension, and the protection of confidential customer information; and (e) changes in accounting policies and principles.
- Our business and operating results are affected by our ability to identify and effectively manage risks inherent in our businesses, including, where appropriate, through the effective use of third-party insurance and capital management techniques.
- Our ability to anticipate and respond to technological changes can have an impact on our ability to respond to customer needs and to meet competitive demands.
- The adequacy of our intellectual property protection, and the extent of any costs associated with obtaining rights in intellectual property claimed by others, can impact our business and operating results.
- Our business and operating results can be affected by widespread natural disasters, terrorist activities or international hostilities, either as a result of the impact on the economy and financial and capital markets generally or on us or on our customers, suppliers or other counterparties specifically.

Also, risks and uncertainties that could affect the results anticipated in forward-looking statements or from historical performance relating to our majority-owned subsidiary BlackRock, Inc. are discussed in more detail in BlackRock's 2005 Annual Report on Form 10-K, including in the Risk Factors section, and in BlackRock's other filings with the SEC, accessible on the SEC's website at www.sec.gov and on or through BlackRock's website at www.blackrock.com.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

THE PNC FINANCIAL SERVICES GROUP, INC.

BUSINESS

We are one of the largest diversified financial services companies in the United States, operating businesses engaged in:

- Retail banking,
- Corporate and institutional banking,
- Asset management, and
- Global fund processing services.

We provide many of our products and services nationally and others in our primary geographic markets located in Pennsylvania; New Jersey; the greater Washington, DC area, including Maryland and Virginia; Ohio; Kentucky and Delaware. We also provide certain asset management and global fund processing services internationally. We are subject to intense competition from other financial services companies and are subject to regulation by various domestic and international authorities.

NOTE 1 ACCOUNTING POLICIES

BASIS OF FINANCIAL STATEMENT PRESENTATION

Our unaudited interim consolidated financial statements include the accounts of the parent company and its subsidiaries, most of which are wholly owned, and certain partnership interests and variable interest entities. We prepared these unaudited interim consolidated financial statements in accordance with accounting principles generally accepted in the United States of America (generally accepted accounting principles or GAAP). We have eliminated all significant intercompany accounts and transactions. We have also reclassified certain prior period amounts to conform with the 2006 presentation. These reclassifications did not have a material impact on our consolidated financial condition or results of operations.

In our opinion, the unaudited interim consolidated financial statements reflect all normal, recurring adjustments needed to present fairly our results for the interim periods.

When preparing these unaudited interim consolidated financial statements, we have assumed that you have read the audited consolidated financial statements included in our 2005 Annual Report on Form 10-K.

SPECIAL PURPOSE ENTITIES

Special purpose entities are broadly defined as legal entities structured for a particular purpose. We use special purpose entities in various legal forms to conduct normal business activities. Special purpose entities that meet the criteria for a Qualifying Special Purpose Entity (QSPE) as defined in Statement of Financial Accounting Standards No. (SFAS) 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities, are not required to be consolidated. We review special purpose entities that are not QSPEs for consolidation in accordance with Financial Accounting Standards Board (FASB) Interpretation No. 46

(Revised 2003), Consolidation of Variable Interest Entities (FIN 46R).

In general, a variable interest entity (VIE) is a special purpose entity formed as a corporation, partnership, limited liability corporation, or any other legal structure used to conduct activities or hold assets that either:

- Does not have equity investors with voting rights that can directly or indirectly make decisions about the entity's activities through those voting rights or similar rights, or
- Has equity investors that do not provide enough cash or other financial resources for the entity to support its activities.

A VIE often holds financial assets, including loans or receivables, real estate or other property.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

We consolidate a VIE if we are considered to be its primary beneficiary. The primary beneficiary is subject to a majority of the risk of loss from the VIE's activities, is entitled to receive a majority of the entity's residual returns, or both. Upon consolidation of a VIE, we generally record all of the VIE's assets, liabilities and noncontrolling interests at fair value, with future changes based upon consolidation accounting principles. See Note 6 Variable Interest Entities for more information about non-consolidated VIEs in which we hold a significant interest.

BUSINESS COMBINATIONS

We record the net assets of companies that we acquire at their estimated fair value at the date of acquisition and we include the results of operations of the acquired business in our consolidated income statement from the date of acquisition. We recognize as goodwill the excess of the purchase price over the estimated fair value of the net assets acquired.

USE OF ESTIMATES

We prepare the unaudited interim consolidated financial statements using financial information available at the time, which requires us to make estimates and assumptions that affect the amounts reported. Actual results will differ from these estimates and the differences may be material to the consolidated financial statements.

REVENUE RECOGNITION

We earn net interest and noninterest income from various sources, including:

- Lending,
- Securities portfolio,
- Investment management and fund servicing,
- Customer deposits,
- Loan servicing,
- Brokerage services, and
- Securities and derivatives trading activities, including foreign exchange.

Table of Contents

We also earn revenue from selling loans and securities, and we recognize income or loss from certain private equity activities. We also earn fees and commissions from:

- Issuing loan commitments, standby letters of credit and financial guarantees,
- Selling various insurance products,
- Providing treasury management services, and
- Participating in certain capital markets transactions.

Revenue earned on interest-earning assets is recognized based on the effective yield of the financial instrument.

We recognize asset management and fund servicing fees primarily as the services are performed. Asset management fees are generally based on a percentage of the fair value of the assets under management and performance fees are generally based on a percentage of the returns on such assets. Certain performance fees are earned upon attaining specified investment return thresholds and are recorded as earned. Fund servicing fees are primarily based on a percentage of the fair value of the fund assets and the number of shareholder accounts we service.

Service charges on deposit accounts are recognized as charged. Brokerage fees and gains on the sale of securities and certain derivatives are recognized on a trade-date basis.

We record private equity income or loss based on changes in the valuation of the underlying investments or when we dispose of our interest. Dividend income from private equity investments is generally recognized when received.

We recognize revenue from loan servicing, securities and derivatives and foreign exchange trading, and securities underwriting activities as they are earned based on contractual terms, as transactions occur or as services are provided. We recognize revenue from the sale of loans upon closing of the transaction.

In certain circumstances, revenue is reported net of associated expenses in accordance with applicable accounting guidance and industry practice.

INVESTMENTS

We have interests in various types of investments. The accounting for these investments is dependent on a number of factors including, but not limited to, items such as:

- Marketability of the investment,
- Ownership interest,
- Our plans for the investment, and
- The nature of the investment.

Private Equity Investments

We report private equity investments, which include direct investments in companies, interests in limited partnerships, and affiliated partnership interests, at estimated fair values. These estimates are based on available information and may not necessarily represent amounts that we will ultimately realize through distribution, sale or liquidation of the investments. The valuation procedures applied to direct investments include techniques such as multiples of cash flow of the entity, independent appraisals of the entity or the pricing used to value the entity in a recent financing transaction. We value affiliated partnership interests based on the underlying investments of the partnership using procedures consistent with those applied to direct investments. We generally value limited partnership investments based on the financial

statements we receive from the general partner. We include all private equity investments in the consolidated balance sheet in other assets. Changes in the fair value of these assets are recognized in noninterest income.

We consolidate private equity investments when we are the general partner in a limited partnership and have determined that we have control of the partnership.

Equity Securities and Partnership Interests

We account for equity investments other than private equity investments under one of the following methods:

- Marketable equity securities are recorded on a trade-date basis and are accounted for at fair value based on the securities' quoted market prices from a national securities exchange. Dividend income on these securities is recognized in net interest income. Those purchased with the intention of recognizing short-term profits are placed in the trading account, carried at market value and classified as short-term investments. Gains and losses on trading securities are included in noninterest income. Marketable equity securities not classified as trading are designated as securities available for sale and are carried at fair value with unrealized gains and losses, net of income taxes, reflected in accumulated other comprehensive income or loss. Any unrealized losses that we have determined to be other-than-temporary are recognized in the period that the determination is made.
- Investments in nonmarketable equity securities are recorded using the cost or equity method of accounting. The cost method is used for those investments in which we do not have significant influence over the investee. Under this method, there is no change to the cost basis unless there is an other-than-temporary decline in value. If the decline is determined to be other than temporary, we write down the cost basis of the investment to a new cost basis that represents realizable value. The amount of the write-down is accounted for as a loss included in noninterest income in the period the determination is made. Distributions received from income on cost method investments are included in interest or noninterest income depending on the type of investment. We use the equity method for those investments in which we have significant influence over the operations of the investee. Under the equity method, we record our equity ownership share of the net income or loss of the investee in noninterest income. We include nonmarketable equity securities in other assets in the consolidated balance sheet.

For investments in limited partnerships that are not required to be consolidated, we use either the cost method or the equity method as described above for nonmarketable equity securities. We use the equity method if our limited partner ownership interest in the partnership is greater than 3%. We use the cost method for the remaining limited partnership investments. We account for general partnership interests under the equity method when we have determined that we do not have control over these entities and are not required to consolidate them. General and limited partnership investments are included in other assets on the consolidated balance sheet.

Table of Contents

Debt Securities

Debt securities are recorded on a trade-date basis. We classify debt securities as securities and carry them at amortized cost if we have the positive intent and ability to hold the securities to maturity. Debt securities that we purchase for short-term appreciation or other trading purposes are carried at market value and classified as short-term investments. Gains and losses on these securities are included in noninterest income. Debt securities not classified as held to maturity or trading are designated as securities available for sale and carried at fair value with unrealized gains and losses, net of income taxes, reflected in accumulated other comprehensive income or loss. Other-than-temporary declines in the fair value of available for sale debt securities are recognized as a securities loss included in noninterest income in the period in which the determination is made. We review for impairment on a quarterly basis all debt securities that are in an unrealized loss position.

We include all interest on debt securities, including amortization of premiums and accretion of discounts using the interest method, in net interest income. We compute gains and losses realized on the sale of debt securities available for sale on a specific security basis and include them in noninterest income.

LOANS AND LEASES

Except as described below, loans are stated at the principal amounts outstanding, net of unearned income, unamortized deferred fees and costs on originated loans, and premiums or discounts on loans purchased. Interest income related to loans other than nonaccrual loans is accrued based on the principal amount outstanding and credited to net interest income as earned. Loan origination fees, direct loan origination costs, and loan premiums and discounts are deferred and amortized to income, over periods not exceeding the contractual life of the loan, using methods that approximate the interest method.

On January 1, 2006, we adopted SFAS 155, *Accounting for Certain Hybrid Instruments* an amendment of FASB Statements No. 133 and 140, which was issued in February 2006. SFAS 155 permits a fair value election for previously bifurcated hybrid financial instruments on an instrument-by-instrument basis, clarifies the scope of SFAS 133, *Accounting for Derivative Instruments and Hedging Activities*, regarding interest-only and principal-only strips, and provides further guidance on certain issues regarding beneficial interests in securitized financial assets, concentrations of credit risk and qualifying special purpose entities. Beginning January 1, 2006, we elected to account for certain previously bifurcated hybrid instruments with loan host contracts under this standard. As such, certain loans are accounted for at fair value with changes in fair value reported in trading revenue. The fair value of these loans was \$168 million, or less than .5% of the total loan portfolio, at June 30, 2006.

We also provide financing for various types of equipment, aircraft, energy and power systems, and rolling stock through a variety of lease arrangements. Direct financing leases are carried at the aggregate of lease payments plus estimated

residual value of the leased property, less unearned income. Leveraged leases, a form of financing lease, are carried net of nonrecourse debt. We recognize income over the term of the lease using methods that approximate the interest method. Lease residual values are reviewed for other-than-temporary impairment on at least an annual basis. Gains or losses on the sale of leased assets are included in other noninterest income while valuation adjustments on lease residuals are included in other noninterest expense.

LOAN SALES, SECURITIZATIONS AND RETAINED INTERESTS

We recognize the sale of loans or other financial assets when the transferred assets are legally isolated from our creditors and the appropriate accounting criteria are met. We also sell mortgage and other loans through secondary market securitizations. In certain cases, we may retain a portion or all of the securities issued, interest-only strips, one or more subordinated tranches, servicing rights and, in some cases, cash reserve accounts, all of which are considered retained interests in the transferred assets. Our loan sales and securitizations are generally structured without recourse to us and with no restrictions on the retained interests. In the event we are obligated for recourse liabilities in a sale, our policy is to record such liabilities at fair value upon closing of the transaction. Gains or losses recognized on the sale of the loans depend on the allocation of carrying value between the loans sold and the retained interests, based on their relative fair market values at the date of sale. We generally estimate fair value based on the present value of future expected cash flows using assumptions as to discount rates, interest rates, prepayment speeds, credit losses and servicing costs, if applicable. Gains or losses on these transactions are reported in noninterest income.

On January 1, 2006, we adopted SFAS 156, *Accounting for Servicing of Financial Assets* an amendment of FASB Statement No. 140. SFAS 156 was issued in March 2006 and requires all newly recognized servicing rights and obligations to be initially measured at fair value. For each class of separately recognized servicing rights and obligations retained, we have elected to continue to account for each under the amortization method which requires us to amortize servicing assets or liabilities in proportion to and over the periods of estimated net servicing income or net servicing loss.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Each quarter, we evaluate our servicing assets for impairment by categorizing the pools of assets underlying servicing rights by product type. A valuation allowance is recorded and reduces current income when the carrying amount of a specific asset category exceeds its fair value.

We classify other securities retained as debt securities available for sale or other assets, depending on the form of the retained interest. Retained interests that are subject to prepayment risk are reviewed on a quarterly basis for impairment. If the fair value of the retained interest is below its carrying amount and the decline is determined to be other-than-temporary, then the decline is reflected as a charge to noninterest income. We recognize other adjustments to the fair market value of retained interests classified as available for sale securities through accumulated other comprehensive income or loss.

Table of Contents

NONPERFORMING ASSETS

Nonperforming assets include:

- Nonaccrual loans,
- Troubled debt restructurings,
- Nonaccrual loans held for sale, and
- Foreclosed assets.

Other than consumer loans, we generally classify loans and loans held for sale as nonaccrual when we determine that the collection of interest or principal is doubtful or when a default of interest or principal has existed for 90 days or more and the loans are not well-secured or in the process of collection. When the accrual of interest is discontinued, accrued but uncollected interest credited to income in the current year is reversed and unpaid interest accrued in the prior year, if any, is charged against the allowance for loan and lease losses. We charge off loans other than consumer loans based on the facts and circumstances of the individual loan.

Consumer loans well-secured by residential real estate, including home equity and home equity lines of credit, are classified as nonaccrual at 12 months past due. We charge off these loans based on the facts and circumstances of the individual loan.

Consumer loans not well-secured or in the process of collection are classified as nonaccrual at 120 days past due if they are home equity loans and at 180 days past due if they are home equity lines of credit. These loans are recorded at the lower of cost or market value, less liquidation costs and the unsecured portion of these loans is generally charged off in the month they become nonaccrual.

A loan is categorized as a troubled debt restructuring in the period of restructuring if a significant concession is granted due to deterioration in the financial condition of the borrower.

Nonperforming loans are generally not returned to performing status until the obligation is brought current and the borrower has performed in accordance with the contractual terms for a reasonable period of time and collection of the contractual principal and interest is no longer doubtful. Nonaccrual commercial and commercial real estate loans and troubled debt restructurings are designated as impaired loans. We recognize interest collected on these loans on the cash basis or cost recovery method.

Foreclosed assets are comprised of any asset seized or property acquired through a foreclosure proceeding or acceptance of a deed-in-lieu of foreclosure. These assets are recorded on the date acquired at the lower of the related loan balance or market value of the collateral less estimated disposition costs. We estimate market values primarily based on appraisals when available or quoted market prices on liquid assets. Subsequently, foreclosed assets are valued at the lower of the amount recorded at acquisition date or the current market value less estimated disposition costs. Valuation adjustments on these assets and gains or losses realized from disposition of such property are reflected in noninterest expense.

ALLOWANCE FOR LOAN AND LEASE LOSSES

We maintain the allowance for loan and lease losses at a level that we believe to be adequate to absorb estimated probable credit losses inherent in the loan portfolio. The allowance is increased by the provision for credit losses, which is charged against operating results, and decreased by the amount of charge-offs, net of recoveries. Our determination of the adequacy of the allowance is based on periodic evaluations of the loan and lease portfolios and other relevant factors. This evaluation is inherently subjective as it requires material estimates, all of which may be susceptible to significant change, including, among others:

- Expected default probabilities,
- Loss given default,
- Exposure at default,
- Amounts and timing of expected future cash flows on impaired loans,
- Value of collateral,
- Estimated losses on consumer loans and residential mortgages, and
- Amounts for changes in economic conditions and potential estimation or judgmental errors.

In determining the adequacy of the allowance for loan and lease losses, we make specific allocations to impaired loans, to pools of watchlist and nonwatchlist loans and to consumer and residential mortgage loans. We also allocate reserves to provide coverage for probable losses not covered in specific, pool and consumer reserve methodologies related to qualitative and measurement factors. While allocations are made to

specific loans and pools of loans, the total reserve is available for all credit losses.

Specific allocations are made to significant impaired loans and are determined in accordance with SFAS 114, Accounting by Creditors for Impairment of a Loan, with impairment measured generally based on the present value of the loan's expected cash flows, the loan's observable market price or the fair value of the loan's collateral. We establish a specific allowance on all other impaired loans based on their loss given default credit risk rating.

Allocations to loan pools are developed by business segment based on probability of default and loss given default risk ratings by using historical loss trends and our judgment concerning those trends and other relevant factors. These factors may include, among others:

- Actual versus estimated losses,
- Regional and national economic conditions, and
- Business segment and portfolio concentrations.

Loss factors are based on industry and/or internal experience and may be adjusted for significant factors that, based on our judgment, impact the collectibility of the portfolio as of the balance sheet date. Consumer and residential mortgage loan allocations are made at a total portfolio level based on historical loss experience adjusted for portfolio activity.

Table of Contents

While our pool reserve methodologies strive to reflect all risk factors, there continues to be a certain element of uncertainty associated with, but not limited to, potential estimation errors and imprecision in the estimation process due to the inherent lag of information. We provide additional reserves that are designed to provide coverage for expected losses attributable to such risks. In addition, these incremental reserves also include factors which may not be directly measured in the determination of specific or pooled reserves. These factors include:

- Industry concentration and conditions,
- Credit quality trends,
- Recent loss experience in particular segments of the portfolio,
- Ability and depth of lending management,
- Changes in risk selection and underwriting standards, and
- Bank regulatory considerations.

COMMERCIAL MORTGAGE SERVICING RIGHTS

We provide servicing under various commercial loan servicing contracts. These contracts are either purchased in the market place or retained as part of a commercial mortgage loan securitization or loan sale. Prior to January 1, 2006, purchased contracts were recorded at cost and the servicing rights retained from the sale or securitization of loans were recorded based on their relative fair value to all of the assets securitized or sold. As a result of the adoption of SFAS 156, beginning January 1, 2006 all newly acquired servicing rights are initially measured at fair value. Fair value is based on the present value of the expected future cash flows, including assumptions as to:

- Interest rates for escrow and deposit balance earnings,
- Discount rates,
- Estimated prepayment speeds, and
- Estimated servicing costs.

We have elected to account for our commercial mortgage servicing rights as a class of assets under the amortization method. This determination was made based on the unique characteristics of the commercial mortgages underlying these servicing rights with regard to market inputs used in determining fair value and how we manage the risks inherent in the commercial mortgage servicing rights asset. We record the servicing asset as an other intangible asset and amortize it over its estimated life in proportion to estimated net servicing income. On a quarterly basis, we test the asset for impairment. If the estimated fair value of the asset is less than the carrying value, an impairment loss is recognized. Servicing fees are recognized as they are earned and are reported net of amortization expense in noninterest income.

DEPRECIATION AND AMORTIZATION

For financial reporting purposes, we depreciate premises and equipment principally using the straight-line method over their estimated useful lives.

We use estimated useful lives for furniture and equipment ranging from one to 10 years, and depreciate buildings over an estimated useful life of up to 40 years. We amortize leasehold improvements over their estimated useful lives of up to 15 years or the respective lease terms, whichever is shorter.

We purchase, as well as internally develop and customize, certain software to enhance or perform internal business

functions. Software development costs incurred in the planning and post-development project stages are charged to noninterest expense. Costs associated with designing software configuration and interfaces, installation, coding programs and testing systems are capitalized and amortized using the straight-line method over periods ranging from one to five years.

DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

We use a variety of financial derivatives as part of our overall asset and liability risk management process to manage interest rate, market and credit risk inherent in our business activities. We use substantially all such instruments to manage risk related to changes in interest rates. Interest rate and total return swaps, interest rate caps and floors and futures contracts are the primary instruments we use for interest rate risk management.

Financial derivatives involve, to varying degrees, interest rate, market and credit risk. We manage these risks as part of our asset and liability management process and through credit policies and procedures. We seek to minimize counterparty credit risk by entering into transactions with only high-quality institutions, establishing credit limits, and generally requiring bilateral netting and collateral agreements.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

We recognize all derivative instruments at fair value as either assets or liabilities in other assets or other liabilities. The accounting for changes in the fair value of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship. For derivatives not designated as an accounting hedge, the gain or loss is recognized in trading noninterest income.

For those derivative instruments that are designated and qualify as hedging instruments, we must designate the hedging instrument, based on the exposure being hedged, as a fair value hedge, a cash flow hedge or a hedge of a net investment in a foreign operation. We have no derivatives that hedge the net investment in a foreign operation.

We formally document the relationship between the hedging instruments and hedged items, as well as the risk management objective and strategy before undertaking a hedge. To qualify for hedge accounting, the derivatives and related hedged items must be designated as a hedge. For hedging relationships in which effectiveness is measured, we formally assess, both at the inception of the hedge and on an ongoing basis, if the derivatives are highly effective in offsetting changes in fair values or cash flows of the hedged item. If it is determined that the derivative instrument is not highly effective as a hedge, hedge accounting is discontinued.

For derivatives that are designated as fair value hedges (i.e., hedging the exposure to changes in the fair value of an asset or a liability attributable to a particular risk), changes in the fair value of the hedging derivative are recognized in earnings and offset by recognizing changes in the fair value of the hedged item attributable to the risk being hedged. To the extent the hedge is ineffective, the changes in fair value will not offset and the difference is reflected in the same financial statement category as the hedged item.

For derivatives designated as cash flow hedges (i.e., hedging the exposure to variability in expected future cash flows), the effective portions of the gain or loss on derivatives are reported as a component of accumulated other comprehensive

Table of Contents

income or loss and subsequently reclassified in interest income in the same period or periods during which the hedged transaction affects earnings. The change in fair value of any ineffective portion of the hedging derivative is recognized immediately as a charge to earnings.

We discontinue hedge accounting when it is determined that the derivative is no longer an effective hedge; the derivative expires or is sold, terminated or exercised; or the derivative is de-designated as a fair value or cash flow hedge or it is no longer probable that the forecasted transaction will occur by the end of the originally specified time period. If we determine that the derivative no longer qualifies as a fair value or cash flow hedge and therefore hedge accounting is discontinued, the derivative will continue to be recorded on the balance sheet at its fair value with changes in fair value included in current earnings. For a discontinued fair value hedge, the previously hedged item is no longer adjusted for changes in fair value.

When hedge accounting is discontinued because it is no longer probable that a forecasted transaction will occur, the derivative will continue to be recorded on the balance sheet at its fair value with changes in fair value included in current earnings, and the gains and losses in accumulated other comprehensive income or loss will be recognized immediately into earnings. When we discontinue hedge accounting because the hedging instrument is sold, terminated or no longer designated, the amount reported in other comprehensive income or loss up to the date of sale, termination or de-designation continues to be reported in other comprehensive income or loss until the forecasted transaction affects earnings.

We occasionally purchase or originate financial instruments that contain an embedded derivative. Prior to January 1, 2006, we assessed at the inception of the transaction if economic characteristics of the embedded derivative were clearly and closely related to the economic characteristics of the financial instrument (host contract), whether the financial instrument that embodied both the embedded derivative and the host contract were measured at fair value with changes in fair value reported in earnings, and whether a separate instrument with the same terms as the embedded instrument would not meet the definition of a derivative. If the embedded derivative did not meet these three conditions, the embedded derivative would qualify as a derivative instrument and be recorded apart from the host contract and carried at fair value with changes recorded in current earnings. On January 1, 2006, we adopted SFAS 155 which, among other provisions, permits a fair value election for hybrid financial instruments requiring bifurcation on an instrument-by-instrument basis. Beginning January 1, 2006, we elected to account for certain previously bifurcated hybrid instruments and certain newly acquired hybrid instruments under this fair value election on an instrument-by-instrument basis. As such, certain previously reported embedded derivatives are now reported with their host contracts in loans or other borrowed funds.

We enter into commitments to make loans whereby the interest rate on the loan is set prior to funding (interest rate lock commitments). We also enter into commitments to purchase mortgage loans (purchase commitments). Both interest rate lock commitments and purchase commitments on mortgage loans that will be held for resale are accounted for as free-standing derivatives. Interest rate lock commitments and purchase commitments that are considered to be derivatives are recorded at fair value in other assets or other liabilities. Fair value of interest rate lock commitments and purchase commitments is determined as the change in value that occurs after the inception of the commitment considering the projected security price, fees collected from the borrower and costs to originate, adjusted for anticipated fallout risk. We recognize the gain or loss from the change in fair value of these derivatives in trading noninterest income.

STOCK-BASED COMPENSATION

We did not recognize stock-based employee compensation expense related to stock options before 2003 under prior GAAP.

Effective January 1, 2003, we adopted the fair value recognition provisions of SFAS 123, Accounting for Stock-Based Compensation, as amended by SFAS 148, Accounting for Stock-Based Compensation-Transition and Disclosure, prospectively to all employee awards granted, modified or settled after January 1, 2003. We did not restate results for prior years upon our adoption of SFAS 123. Since we adopted SFAS 123 prospectively, the cost related to stock-based employee compensation included in net income for the three months and six months ended June 30, 2005 is less than what we would have recognized if we had applied the fair value based method to all awards since the original effective date of the standard.

In December 2004, the FASB issued SFAS 123R, which replaced SFAS 123 and superseded APB 25. SFAS 123R requires compensation cost related to share-based payments to employees to be recognized in the financial statements based on their fair value. We adopted SFAS 123R effective January 1, 2006, using the modified prospective method of transition, which requires the provisions of SFAS 123R be applied to new awards and awards modified, repurchased or cancelled after the effective date. It also requires changes in the timing of expense recognition for awards granted to retirement-eligible employees and clarifies the accounting for the tax effects of stock awards. The adoption of SFAS 123R did not have a significant impact on our consolidated financial statements.

Table of Contents

The following table shows the effect on net income and earnings per share if we had applied the fair value recognition provisions of SFAS 123, as amended, to all outstanding and unvested awards in each period.

Pro Forma Net Income And Earnings Per Share

See Note 8 Certain Employee Benefit and Stock-Based Compensation Plans for additional information.

Recent Accounting Pronouncements

In July 2006, the FASB issued the following:

- FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in the financial statements and sets forth recognition, derecognition and measurement criteria for tax positions taken or expected to be taken in a tax filing. For PNC, this guidance will apply to all tax positions taken or expected to be taken beginning on January 1, 2007. We do not expect the adoption of FIN 48 to have a significant impact on our consolidated financial statements.
- FASB Staff Position No. (FSP) FAS 13-2, Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction. This guidance requires a recalculation of the timing of income recognition for a leveraged lease under SFAS 13, Accounting for Leases, when a change in the timing of income tax deductions directly related to the leveraged lease transaction occurs or is projected to occur. Any tax positions taken regarding the leveraged lease transaction must be recognized and measured in accordance with FIN 48 described above. This guidance will be effective for PNC beginning January 1, 2007 with the cumulative effect of applying the provisions of this FSP being recognized through an adjustment to opening retained earnings. Based on our preliminary assessment, we believe the adoption of the guidance in FSP 13-2 would result in an after-tax charge to opening retained earnings at January 1, 2007 in the range of approximately \$140 million to

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

\$160 million. Any immediate or future reductions in earnings from the change in accounting would be recovered in subsequent years.

In March 2006, the FASB issued an Exposure Draft (ED) on a Proposed Statement of Financial Accounting Standards, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans an amendment of FASB Statements No. 87, 88, 106, and 132(R). The changes proposed in the ED would affect the accounting and reporting for our qualified pension plan, our nonqualified retirement plans, and our postretirement welfare benefit plans. The proposed ED would require recognition on the balance sheet of the overfunded or underfunded position of these plans as the difference between the fair value of plan assets and the related benefit obligations. To the extent that a plan's net funded status differs from the amounts currently recognized on the balance sheet, the difference, net of tax, would be recorded as part of accumulated other comprehensive income or loss (AOCI) within the shareholders' equity section of the balance sheet. The proposal would also require the reclassification of any unrecognized actuarial gains and losses and unrecognized prior service costs to AOCI, net of tax. Post-adoption changes in unrecognized actuarial gains and losses as well as unrecognized prior service costs would be recognized in other comprehensive income, net of tax. The FASB expects to issue a final standard during the third quarter of 2006 with the changes applied prospectively at December 31, 2006.

As described under the Loan Sales, Securitizations And Retained Interests section of this Note 1, we adopted SFAS 156 as of January 1, 2006. As described under the Loans And Leases section of this Note 1, we also adopted SFAS 155 as of January 1, 2006. The adoption of neither SFAS 156 nor SFAS 155 had a material impact on our consolidated financial statements.

Table of Contents

In November 2005, the FASB issued FSP FAS 115-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments*. This FSP clarified and reaffirmed existing guidance as to when an investment is considered impaired, whether that impairment is other than temporary, and the measurement of an impairment loss. Certain disclosures about unrealized losses on available for sale debt and equity securities that have not been recognized as other-than-temporary impairments are required under FSP 115-1. Application of this guidance, which was effective January 1, 2006, did not have a significant impact on our consolidated financial statements.

In June 2005, the Emerging Issues Task Force (EITF) of the FASB issued EITF Issue 04-5, *Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights*. EITF 04-5 provides that the general partner(s) is presumed to control the limited partnership (including certain limited liability companies), unless the limited partners possess either substantive participating rights or the substantive ability to dissolve the limited partnership or otherwise remove the general partner(s) without cause (kick-out rights). Kick-out rights are substantive if they can be exercised by a simple majority of the limited partners voting interests. The guidance was effective for all limited partnerships as of January 1, 2006. The adoption of this guidance did not have a material impact on our consolidated financial statements.

In May 2005, the FASB issued SFAS 154, *Accounting Changes and Error Corrections* a replacement of APB Opinion No. 20 and FASB Statement No. 3. SFAS 154 generally requires retrospective application to prior periods financial statements of all voluntary changes in accounting principle and changes required when a new pronouncement does not include specific transition provisions. This standard was effective for PNC beginning January 1, 2006.

See the *Stock-Based Compensation* section of this Note 1 for a discussion of SFAS 123R.

NOTE 2 ACQUISITIONS

On February 15, 2006, we announced that BlackRock and Merrill Lynch had entered into a definitive agreement pursuant to which Merrill Lynch will contribute its investment management business to BlackRock in exchange for newly issued BlackRock common and preferred stock. Upon the closing of this transaction, which we expect to occur around September 30, 2006, Merrill Lynch would own 65 million equity shares, or approximately 49% of the combined company.

As of June 30, 2006, we owned approximately 69% of BlackRock. Upon closing of this transaction, the carrying value of our investment in BlackRock would increase and, as a result, we would recognize an after-tax gain. We would deconsolidate BlackRock from PNC's financial statements as required under generally accepted accounting principles and account for our investment in BlackRock under the equity method of accounting. At the closing of the transaction, we expect to continue to own approximately 44 million shares of BlackRock common stock, representing an ownership interest of approximately 34% of the larger company, and would have two seats on BlackRock's board of directors, including one director on the executive committee.

This transaction must be approved by BlackRock shareholders and is subject to obtaining appropriate regulatory and other approvals. We currently control more than 80% of the voting interest in BlackRock and will vote our interest in support of the transaction.

Additional information on this transaction is included in Current Reports on Form 8-K filed by us and by BlackRock on February 15, 2006 and February 22, 2006, in our 2005 Form 10-K and first quarter 2006 Form 10-Q, and in BlackRock's 2005 Form 10-K and first quarter 2006 Form 10-Q.

Table of Contents**NOTE 3 SECURITIES**

In millions	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
June 30, 2006 (a)				
SECURITIES AVAILABLE FOR SALE				
Debt securities				
Mortgage-backed	\$14,939	\$2	\$(449)	\$14,492
US Treasury and government agencies	3,297		(128)	3,169
Commercial mortgage-backed	2,274		(94)	2,180
Asset-backed	1,442		(17)	1,425
State and municipal	150		(3)	147
Other debt	90		(2)	88
Total debt securities	22,192	2	(693)	21,501
Corporate stocks and other	223	1	(1)	223
Total securities available for sale	\$22,415	\$3	\$(694)	\$21,724
December 31, 2005 (a)				
SECURITIES AVAILABLE FOR SALE				
Debt securities				
Mortgage-backed	\$13,794	\$1	\$(251)	\$13,544
US Treasury and government agencies	3,816		(72)	3,744
Commercial mortgage-backed	1,955	1	(37)	1,919
Asset-backed	1,073		(10)	1,063
State and municipal	159	1	(2)	158
Other debt	87		(1)	86
Total debt securities	20,884	3	(373)	20,514
Corporate stocks and other	196			196
Total securities available for sale	\$21,080	\$3	\$(373)	\$20,710

(a) Securities held to maturity at June 30, 2006 and December 31, 2005 totaled less than \$.5 million at each date.

Securities represented 23% of total assets at both June 30, 2006 and December 31, 2005.

At June 30, 2006, securities available for sale included a net unrealized loss of \$691 million, which represented the difference between fair value and amortized cost. The comparable amount at December 31, 2005 was a net unrealized loss of \$370 million. The impact on bond prices of increases in interest rates and tightening asset spreads during the first half of 2006 was reflected in the net unrealized loss position at June 30, 2006.

We do not believe that any individual unrealized losses as of June 30, 2006 represent an other-than-temporary impairment. The \$449 million unrealized losses reported for mortgage-backed securities relate primarily to securities issued by the

Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation and private institutions. The \$128 million unrealized losses reported for US Treasuries and government agencies relate primarily to agency debenture securities. The \$94 million unrealized losses reported for commercial mortgage-backed securities relate primarily to fixed rate securities. The \$17 million unrealized losses associated with asset-backed securities relate primarily to securities collateralized by home equity, automobile and credit card loans. The majority of the unrealized losses reported are attributable to changes in interest rates and not from the deterioration of the credit quality of the issuer.

We evaluate our portfolio of securities available for sale in light of changing market conditions and other factors and, where appropriate, take steps intended to improve our overall positioning.

Table of Contents

Net unrealized gains and losses in the securities available for sale portfolio are included in shareholders' equity as accumulated other comprehensive income or loss, net of tax.

The expected weighted-average life of securities available for sale was 4 years and 5 months as of June 30, 2006 and 4 years and 1 month at December 31, 2005.

Information relating to securities sold is set forth in the following table:

Securities Sold

Six months ended				Income Tax
June 30		Gross	Gross	Net
In millions	Proceeds	Gains	Losses	Gains (Losses)
				Expense/ (Benefit)
2006	\$3,433	\$1	\$(13)	\$(12)
2005	9,993	16	(51)	(35)
				(12)

The carrying value of securities pledged to secure public and trust deposits and repurchase agreements and for other purposes was \$10.3 billion at June 30, 2006 and \$10.8 billion at December 31, 2005. The fair value of securities accepted as collateral that we are permitted by contract or custom to sell or repledge was \$445 million at June 30, 2006 and \$273 million at December 31, 2005 and is a component of federal funds sold and resale agreements on our Consolidated Balance Sheet. Of the permitted amount, all was repledged to others at June 30, 2006 and December 31, 2005.

NOTE 4 ASSET QUALITY

The following table sets forth nonperforming assets and related information.

Dollars in millions	June 30 2006	December 31 2005
Nonaccrual loans		
Commercial	\$151	\$134
Commercial real estate	12	14
Consumer	14	10
Residential mortgage	14	15
Lease financing	16	17
Total nonaccrual loans	207	190
Troubled debt restructured loan	1	
Total nonperforming loans	208	190
Nonperforming loans held for sale (a)		1
Foreclosed and other assets		
Lease	12	13
Residential mortgage	8	9
Other	3	3
Total foreclosed and other assets	23	25
Total nonperforming assets (b)	\$231	\$216
Nonperforming loans to total loans	.41%	.39%
Nonperforming assets to total loans, loans held for sale and foreclosed assets	.44	.42
Nonperforming assets to total assets	.24	.23

(a) Amount represents troubled debt restructured loans held for sale.

(b) Excludes equity management assets carried at estimated fair value of \$18 million as of June 30, 2006 and \$25 million as of December 31, 2005. These assets included troubled debt restructured assets of \$7 million at both dates.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Changes in the allowance for loan and lease losses were as follows:

In millions	2006	2005
Allowance at January 1	\$596	\$607
Charge-offs		
Commercial	(46)	(28)
Consumer	(24)	(21)
Residential mortgage		(1)
Total charge-offs	(70)	(50)
Recoveries		
Commercial (a)	10	68
Consumer	8	7
Lease financing	4	1
Total recoveries (a)	22	76
Net recoveries (charge-offs)		
Commercial (a)	(36)	40
Consumer	(16)	(14)
Residential mortgage		(1)
Lease financing	4	1
Total net recoveries (charge-offs) (a)	(48)	26
Provision for (recoveries of) credit losses	66	(19)
Acquired allowance (b)		23
Net change in allowance for unfunded loan commitments and letters of credit	(3)	(9)
Allowance at June 30	\$611	\$628

(a) Amounts for 2005 reflect a \$53 million loan recovery received during the second quarter.

(b) Related to the May 2005 acquisition of Riggs National Corporation.

Changes in the allowance for unfunded loan commitments and letters of credit were as follows:

In millions	2006	2005
Allowance at January 1	\$100	\$75
Net change in allowance for unfunded loan commitments and letters of credit	3	9
Allowance at June 30	\$103	\$84

NOTE 5 GOODWILL AND OTHER INTANGIBLE ASSETS

A summary of the changes in goodwill by business for the six months ended June 30, 2006 follows:

Goodwill

	December 31	Additions/	June 30
In millions	2005	Adjustments	2006
Retail Banking	\$1,471	\$11	\$1,482
Corporate & Institutional Banking	935	3	938
BlackRock	190	9	199
PFPC	968		968
Other	55	(6)	49
Total	\$3,619	\$17	\$3,636

Table of Contents

The gross carrying amount, accumulated amortization and net carrying amount of other intangible assets by major category consisted of the following:

Other Intangible Assets

	June 30	December 31
In millions	2006	2005
Customer-related and other intangibles		
Gross carrying amount	\$647	\$646
Accumulated amortization	(170)	(143)
Net carrying amount	\$477	\$503
Mortgage and other loan servicing rights		
Gross carrying amount (a)	\$572	\$511
Accumulated amortization (a)	(187)	(167)
Net carrying amount	\$385	\$344
Total	\$862	\$847

(a) Amounts for June 30, 2006 were reduced by retirements totaling \$2 million for Corporate & Institutional Banking.

Most of our other intangible assets have finite lives and are amortized primarily on a straight-line basis or, in the case of mortgage and other loan servicing rights and certain core deposit intangibles, on an accelerated basis.

For customer-related intangibles, the estimated remaining useful lives range from approximately one year to 20 years, with a weighted-average remaining useful life of approximately 6 years. Our mortgage and other loan servicing rights are amortized primarily over a period of seven to ten years in proportion to the estimated net servicing income from the related loans.

The changes in the carrying amount of goodwill and net other intangible assets for the six months ended June 30, 2006, are as follows:

Changes in Goodwill and Other Intangibles

	Goodwill	Customer-Related	Servicing Rights
In millions			
Balance at December 31, 2005	\$3,619	\$503	\$344
Additions/adjustments:			
Riggs acquisition	11		
BlackRock acquisition of SSRM	9		
BlackRock stock activity, net	(6)		
Corporate & Institutional Banking (a)	3	1	61
Reduction of accumulated amortization (a)			2
Amortization		(27)	(22)
Balance at June 30, 2006	\$3,636	\$477	\$385

(a) See note (a) under the Other Intangible Assets table above.

Servicing revenue from mortgage servicing rights reflected on our balance sheet, including servicing fees, net interest income from servicing portfolio deposit balances and ancillary fees, was \$64 million and \$31 million for the six months and three months ended June 30, 2006, respectively. We also generate servicing revenue from fee-based activities provided to others.

Our ownership of BlackRock continues to change primarily when BlackRock repurchases its shares in the open market and issues shares for an acquisition or pursuant to its employee compensation plans. We recognize goodwill because BlackRock repurchases its shares at an amount greater than book value per share and this results in an increase in our percentage ownership interest.

Amortization expense on intangible assets for the first half of 2006 was \$49 million. Amortization expense on existing intangible assets for the remainder of 2006 and for 2007 through 2011 is estimated to be as follows:

- Remainder of 2006: \$46 million,

- 2007: \$93 million,
- 2008: \$88 million,
- 2009: \$83 million,
- 2010: \$62 million, and
- 2011: \$48 million.

NOTE 6 VARIABLE INTEREST ENTITIES

As discussed in our 2005 Form 10-K, we are involved with various entities in the normal course of business that may be deemed to be VIEs. We consolidated certain VIEs at June 30, 2006 and December 31, 2005 for which we were determined to be the primary beneficiary. These consolidated VIEs and relationships with PNC are described in our 2005 Form 10-K.

We hold significant variable interests in VIEs that have not been consolidated because we are not considered the primary beneficiary. Information on these VIEs follows:

Non-Consolidated VIEs Significant Variable Interests

In millions	Aggregate Assets	Aggregate Liabilities	PNC Risk of Loss
June 30, 2006			
Collateralized debt obligations (a)	\$6,362	\$5,888	\$49(b)
Private investment funds (a)	5,740	1,180	13(b)
Market Street	3,458	3,458	5,095(c)
Partnership interests in low income housing projects	35	29	7
Total	\$15,595	\$10,555	\$5,164
December 31, 2005			
Collateralized debt obligations (a)	\$6,290	\$5,491	\$51(b)
Private investment funds (a)	5,186	1,051	13(b)
Market Street	3,519	3,519	5,089(c)
Partnership interests in low income housing projects	35	29	2
Total	\$15,030	\$10,090	\$5,155

(a) Held by BlackRock.

(b) Includes both PNC's risk of loss and BlackRock's risk of loss, limited to PNC's ownership interest in BlackRock.

(c) Includes off-balance sheet liquidity commitments to Market Street of \$4.6 billion and other credit enhancements of \$462 million at June 30, 2006. The comparable amounts were \$4.6 billion and \$444 million at December 31, 2005.

Table of Contents

The aggregate assets and liabilities of VIEs that we have consolidated in our financial statements are as follows:

Consolidated VIEs PNC Is Primary Beneficiary

In millions	Aggregate Assets	Aggregate Liabilities
June 30, 2006		
Partnership interests in low income housing projects	\$619	\$619
Other	33	30
Total	\$652	\$649
December 31, 2005		
Partnership interests in low income housing projects	\$680	\$680
Other	12	10
Total	\$692	\$690

We also have subsidiaries that invest in and act as the investment manager for private equity funds organized as limited partnerships as part of our equity management activities. The funds invest in private equity investments to generate capital appreciation and profits. As permitted by FIN 46R, we have deferred applying the provisions of the interpretation for these entities pending further action by the FASB. Information on these entities follows:

Investment Company Accounting Deferred Application

In millions	Aggregate Assets	Aggregate Equity	PNC Risk of Loss
Private Equity Funds			
June 30, 2006	\$124	\$124	\$113
December 31, 2005	\$109	\$109	\$35

PNC's risk of loss in the tables above includes equity investments and unfunded commitments.

NOTE 7 CAPITAL SECURITIES OF SUBSIDIARY TRUSTS

These capital securities represent non-voting preferred beneficial interests in the assets of PNC Institutional Capital Trusts A and B, PNC Capital Trusts C and D, UNB Capital Trust I and Capital Statutory Trust II, and the Riggs Capital Trust and Capital Trust II (the Trusts). Trust A is a wholly owned finance subsidiary of PNC Bank, N.A., PNC's principal bank subsidiary. All other Trusts are wholly owned finance subsidiaries of PNC. With the exception of the Riggs Capital Trust, the financial statements of the Trusts are not included in PNC's consolidated financial statements.

The obligations of the respective parent of each Trust, when taken collectively, are the equivalent of a full and unconditional guarantee of the obligations of such Trust under the terms of the Capital Securities. Such guarantee is subordinate in right of payment in the same manner as other junior subordinated debt. There are certain restrictions on PNC's overall ability to obtain funds from its subsidiaries. For additional disclosure on these funding restrictions, including an explanation of dividend and intercompany loan limitations, see Note 4 Regulatory Matters in our 2005 Form 10-K.

We have more information on the Trusts in Note 14 Capital Securities of Subsidiary Trusts in our 2005 Form 10-K.

NOTE 8 CERTAIN EMPLOYEE BENEFIT AND STOCK-BASED COMPENSATION PLANS**Pension and Post-Retirement Plans**

As more fully described in our 2005 Form 10-K, we have a noncontributory, qualified defined benefit pension plan covering eligible employees. Retirement benefits are derived from a cash balance formula based on compensation levels, age and length of service. Pension contributions are based on an actuarially determined amount necessary to fund total benefits payable to plan participants.

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

We also maintain nonqualified supplemental retirement plans for certain employees. All retirement benefits provided under these plans are unfunded and we make any payments to plan participants. We also provide certain health care and life insurance benefits for qualifying retired employees (post-retirement benefits) through various plans.

The components of our net periodic pension and post-retirement benefit cost for the second quarter and first six months of 2006 and 2005 were as follows:

	Qualified Pension Plan		Nonqualified Pension Plan		Post-retirement Benefits	
Three months ended						
June 30						
In millions	2006	2005	2006	2005	2006	2005
Service cost	\$8	\$7	\$1	\$1	\$1	
Interest cost	17	14	1	1	3	\$3
Expected return on plan assets	(33)	(30)				
Amortization of prior service cost					(2)	(1)
Recognized net actuarial loss	2	6				1
Net periodic cost	\$(6)	\$(3)	\$2	\$2	\$2	\$3

	Qualified Pension Plan		Nonqualified Pension Plan		Post-retirement Benefits

Interest cost	34	30	2	2	7	7
Expected return on plan assets	(65)	(61)				
Amortization of prior service cost					(4)	(3)
Recognized net actuarial loss	8	12	1	1	1	2
Net periodic cost	\$(6)	\$(3)	\$4	\$4	\$5	\$7
Stock-Based Compensation Plans						

We have long-term incentive award plans (Incentive Plans) that provide for the granting of incentive stock options, nonqualified stock options, stock appreciation rights, incentive shares/performance units, restricted stock, other share-based awards and dollar-denominated awards to executives and, other than incentive stock options, to non-employee directors.

Table of Contents

As of June 30, 2006, no incentive stock options or stock appreciation rights were outstanding.

Nonqualified Stock Options

Options are granted at exercise prices not less than the market value of common stock on the grant date. Generally, options granted since 1999 become exercisable in installments after the grant date. Options granted prior to 1999 are mainly exercisable 12 months after grant date. No option may be exercisable after 10 years from its grant date. Payment of the option price may be in cash or previously owned shares of common stock at market value on the exercise date.

Generally, options granted under the Incentive Plans vest ratably over a three-year period as long as the grantee remains an employee or, in certain cases, retires from PNC. For all options granted prior to the adoption of SFAS 123R, we recognized compensation expense over the three-year vesting period. If an employee retired prior to the end of the three-year vesting period, we accelerated the expensing of all unrecognized compensation costs at the retirement date. As required under SFAS 123R, we recognize compensation expense for options granted to retirement-eligible employees after January 1, 2006 within the first year of the grant date, in accordance with the service period provisions of the options. Total compensation expense recognized related to PNC stock options during the second quarter and first half of 2006 was approximately \$6 million and \$13 million, respectively.

For purposes of computing stock option expense and pro forma results, we estimated the fair value of stock options using the Black-Scholes option pricing model. The model requires the use of numerous assumptions, many of which are very subjective. Therefore, the pro forma results are estimates of results of operations as if compensation expense had been recognized for all stock-based compensation awards and are not indicative of the impact on future periods.

We used the following assumptions in the option pricing model for purposes of estimating pro forma results in 2005 and to determine 2006 and 2005 stock option expense:

- The risk-free interest rate is based on the US Treasury yield curve,
- The dividend yield represents average yields over the previous three-year period,
- Volatility is measured using the fluctuation in month-end closing stock prices over a five-year period, and
- The expected life assumption represents the period of time that options granted are expected to be outstanding and is based on a weighted average of historical option activity.

Option Pricing Assumptions

	2006	2005
Weighted average for the six months ended June 30		
Risk-free interest rate	4.4%	3.7%
Dividend yield	3.7%	3.8%
Volatility	20.6%	26.1%
Expected life	5.5 yrs.	4.9 yrs.

The status of PNC stock options at June 30, 2006 follows:

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Life	Aggregate Intrinsic Value
	(thousands)		(years)	(millions)
Outstanding	16,703	\$57.86	5.9	\$223
Vested and expected to vest	15,763	\$58.13	5.8	\$207

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Exercisable	12,669	\$57.27	5.5	\$179
-------------	--------	---------	-----	-------

During the first six months of 2006 we issued approximately 3.2 million shares from treasury stock in connection with stock option exercise activity, including .8 million shares in the second quarter. As with past exercise activity, we intend to utilize treasury stock for future stock option exercises.

Incentive Share and Restricted Stock Awards

The fair value of nonvested incentive shares and restricted stock awards is initially determined based on the average of the high and low of our common stock price on the date of grant. Incentive shares are subsequently valued subject to the achievement of one or more financial and other performance goals over a three-year period. The Personnel and Compensation Committee of the Board of Directors approve the final award of incentive shares. Restricted stock awards have various vesting periods ranging from 36 months to 60 months. There are no financial or performance goals associated with any of our restricted stock awards.

We recognize compensation expense for incentive shares and restricted stock awards ratably over the corresponding vesting and/or performance periods for each type of program. Total compensation expense recognized related to PNC incentive share and restricted stock awards during the first six months of 2006 was approximately \$24 million, including \$12 million during the second quarter.

The status of PNC nonvested incentive shares and restricted stock awards at June 30, 2006, follows:

		Weighted-Average Grant Date
Shares in thousands	Shares	Fair Value
Nonvested incentive shares	183	\$69.60
Nonvested restricted stock	2,839	\$56.67

Table of Contents

At June 30, 2006, there was \$60 million of unrecognized deferred compensation expense related to nonvested share-based compensation arrangements granted under the Incentive Plans. This cost is expected to be recognized as expense over a period of no longer than five years.

NOTE 9 FINANCIAL DERIVATIVES

We use a variety of derivative financial instruments to help manage interest rate, market and credit risk and reduce the effects that changes in interest rates may have on net income, fair value of assets and liabilities, and cash flows caused by interest rate volatility. These instruments include interest rate swaps, interest rate caps and floors, futures contracts, and total return swaps.

Fair Value Hedging Strategies

We enter into interest rate and total return swaps, interest rate caps, floors and futures derivative contracts to hedge designated commercial mortgage loans held for sale, commercial loans, bank notes, senior debt and subordinated debt for changes in fair value primarily due to changes in interest rates. Adjustments related to the ineffective portion of fair value hedging instruments are recorded in interest income, interest expense or noninterest income depending on the hedged item.

Cash Flow Hedging Strategy

We enter into interest rate swap contracts to modify the interest rate characteristics of designated commercial loans from variable to fixed in order to reduce the impact of interest rate changes on future interest income. We are hedging our exposure to the variability of future cash flows for all forecasted transactions for a maximum of 10 years for hedges converting floating-rate commercial loans to fixed. The fair value of these derivatives is reported in other assets or other liabilities and offset in accumulated other comprehensive income (loss) for the effective portion of the derivatives. When the hedged transaction culminates, any unrealized gains or losses related to these swap contracts are reclassified from accumulated other comprehensive income (loss) into earnings in the same period or periods during which the hedged forecasted transaction affects earnings and are included in interest income. Ineffectiveness of the strategy, as defined by risk management policies and procedures, if any, is reported in interest income.

During the next twelve months, we expect to reclassify to earnings \$25 million of pretax net losses, or \$16 million after-tax, on cash flow hedge derivatives currently reported in accumulated other comprehensive income (loss). This amount could differ from amounts actually recognized due to changes in interest rates and the addition of other hedges subsequent to June 30, 2006. These net losses are anticipated to result from net cash flows on receive fixed interest rate swaps that would impact interest income recognized on the related floating rate commercial loans.

As of June 30, 2006 we have determined that there were no hedging positions where it was probable that certain forecasted transactions may not occur within the originally designated time period.

For those hedge relationships that require testing for ineffectiveness, any ineffectiveness present in the hedge relationship is recognized in current earnings. The ineffective portion of the change in value of these derivatives resulted in a \$2 million net loss for the six months ended June 30, 2006 and 2005.

Free-Standing Derivatives

To accommodate customer needs, we also enter into financial derivative transactions primarily consisting of interest rate swaps, interest rate caps and floors, futures, swaptions, and foreign exchange and equity contracts. We primarily manage our market risk exposure from customer positions through transactions with third-party dealers. The credit risk associated with derivatives executed with customers is essentially the same as that involved in extending loans and is subject to normal credit policies. We may obtain collateral based on our assessment of the customer. For derivatives not designated as an accounting hedge, the gain or loss is recognized in trading noninterest income.

Also included in free-standing derivatives are transactions that we enter into for risk management and proprietary purposes that are not designated as accounting hedges, primarily interest rate and basis swaps, interest rate caps and floors, credit default swaps, option contracts and certain interest rate-locked loan origination commitments as well as commitments to buy or sell mortgage loans.

Basis swaps are agreements involving the exchange of payments, based on notional amounts, of two floating rate financial instruments denominated in the same currency, one pegged to one reference rate and the other tied to a second reference rate (e.g., swapping payments tied

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

to one-month LIBOR for payments tied to three-month LIBOR). We use these contracts to mitigate the impact on earnings of exposure to a certain referenced interest rate.

We purchase and sell credit default swaps to mitigate the economic impact of credit losses on specifically identified existing lending relationships or to generate revenue from proprietary trading activities. These derivatives typically are based on the change in value, due to changing credit spreads.

Interest rate lock commitments for, as well as commitments to buy or sell, mortgage loans that we intend to sell are considered free-standing derivatives. Our interest rate exposure on certain commercial mortgage interest rate lock commitments is economically hedged with pay-fixed interest rate swaps and forward sales agreements. These contracts mitigate the impact on earnings of exposure to a certain referenced rate.

Table of Contents

Free-standing derivatives also include positions we take based on market expectations or to benefit from price differentials between financial instruments and the market based on stated risk management objectives.

Derivative Counterparty Credit Risk

By purchasing and writing derivative contracts we are exposed to credit risk if the counterparties fail to perform. Our credit risk is equal to the fair value gain in the derivative contract. We minimize credit risk through credit approvals, limits, monitoring procedures and collateral requirements. We generally enter into transactions with counterparties that carry high quality credit ratings.

We enter into risk participation agreements to share some of the credit exposure with other counterparties related to interest rate derivative contracts or to take on credit exposure to generate revenue. We will make/receive payments under these guarantees if a

customer defaults on its obligation to perform under certain credit agreements. Risk participation agreements entered into prior to July 1, 2003 are considered financial guarantees and therefore are not included in derivatives. Agreements entered into subsequent to June 30, 2003 are included in the derivatives table that follows. We determine that we meet our objective of reducing credit risk associated with certain counterparties to derivative contracts when the participation agreements share in their proportional credit losses of those counterparties.

We generally have established agreements with our major derivative dealer counterparties that provide for exchanges of marketable securities or cash to collateralize either party's positions. At June 30, 2006 we held cash and US government and mortgage-backed securities with a fair value of \$115 million and pledged mortgage-backed securities with a fair value of \$153 million under these agreements.

Table of Contents

The total notional or contractual amounts, net fair value and credit risk for derivatives at June 30, 2006 and December 31, 2005 were as follows:

In millions	June 30, 2006			December 31, 2005

A summary of the components of the change in accumulated other comprehensive income (loss) follows:

Six months ended June 30, 2006

In millions	Pretax	Tax Benefit	After-tax
Change in net unrealized securities losses			
Increase in net unrealized losses on securities held at period end	\$(331)	\$115	\$(216)
Less: Net losses realized in net income (b)	(10)	3	(7)
Change in net unrealized securities losses	(321)	112	(209)
Change in net unrealized losses on cash flow hedge derivatives			
Increase in net unrealized losses on cash flow hedge derivatives	(55)	19	(36)
Less: Net losses realized in net income	(4)	1	(3)
Change in net unrealized losses on cash flow hedge derivatives	(51)	18	(33)
Other (a)	(1)		(1)
Other comprehensive income (loss)	\$(373)	\$130	\$(243)

The accumulated balances related to each component of other comprehensive income (loss) are as follows:

In millions	June 30, 2006		December 31, 2005	
	Pretax	After-tax	Pretax	After-tax
Net unrealized securities losses	\$(691)	\$(449)	\$(370)	\$(240)
Net unrealized losses on cash flow hedge derivatives	(91)	(59)	(40)	(26)

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

Other, net (a)	(3)	(2)	(2)	(1)
Accumulated other comprehensive loss	\$(785)	\$(510)	\$(412)	\$(267)
(a) Consists of interest-only strip valuation adjustments, foreign currency translation adjustments and minimum pension liability adjustments.				
(b) The pretax amount represents net unrealized losses at December 31, 2005 that were realized in 2006 when the related securities were sold. This amount differs from net securities losses included in the Consolidated Income Statement primarily because it does not include gains or losses realized on securities that were purchased and then sold during 2006.				

Table of Contents

NOTE 12 LEGAL PROCEEDINGS

On July 13, 2006, the United States District Court for the Western District of Pennsylvania approved the settlement of the consolidated class action arising out of the three 2001 PAGIC transactions. This settlement and related matters arising out of the PAGIC transactions are described in our 2005 Annual Report on Form 10-K for the year ended December 31, 2005. The non-settling defendant in that class action had objected to this settlement and currently has the right to appeal the decision of the district court approving the settlement to the United States Court of Appeals for the Third Circuit.

Some of our subsidiaries are defendants (or have potential contractual contribution obligations to other defendants) in several pending lawsuits brought during late 2002 and 2003 arising out of the bankruptcy of Adelphia Communications Corporation and its subsidiaries. There also are threatened additional proceedings arising out of the same matters. One of the lawsuits was brought, on Adelphia's behalf by the unsecured creditors' committee and equity committee in Adelphia's consolidated bankruptcy proceeding and was removed to the United States District Court for the Southern District of New York by order dated February 9, 2006. The other lawsuits, one of which is a putative consolidated class action, were brought by holders of debt and equity securities of Adelphia and have been consolidated for pretrial purposes in that district court. These lawsuits arise out of lending and securities underwriting activities engaged in by these PNC subsidiaries together with other financial services companies. In the aggregate, more than 400 other financial services companies and numerous other companies and individuals have been named as defendants in one or more of the lawsuits. Collectively, with respect to some or all of the defendants, the lawsuits allege federal law claims, including violations of federal securities and other federal laws, violations of common law duties, aiding and abetting such violations, voidable preference payments, and fraudulent transfers, among other matters. The lawsuits seek unquantified monetary damages, interest, attorneys' fees and other expenses, and a return of the alleged voidable preference and fraudulent transfer payments, among other remedies. The bank defendants, including the PNC defendants, have entered into a tentative settlement of the consolidated class action referred to above. This settlement is subject to conditions, including court approval. The amount for which we would be responsible under this settlement is insignificant. We believe that we have defenses to the claims against us in these lawsuits, as well as potential claims against third parties, and intend to defend the remaining lawsuits vigorously. These lawsuits involve complex issues of law and fact, presenting complicated relationships among the many financial and other participants in the events giving rise to these lawsuits, and have not progressed to the point where we can predict the outcome of the lawsuits other than the one for which a tentative settlement is pending. It is not possible to determine what the likely aggregate recoveries on the part of the plaintiffs in these

remaining matters might be or the portion of any such recoveries for which we would ultimately be responsible, but the final consequences to PNC could be material.

On April 29, 2005, an amended complaint was filed in the putative class action against PNC, PNC Bank, N.A., our Pension Plan and its Pension Committee in the United States District Court for the Eastern District of Pennsylvania (originally filed in December 2004). The complaint claims violations of the Employee Retirement Income Security Act of 1974, as amended (ERISA), arising out of the January 1, 1999 conversion of our Pension Plan from a traditional defined benefit formula into a cash balance formula, the design and continued operation of the Plan, and other related matters. Plaintiffs seek to represent a class of all current and former employee-participants in and beneficiaries of the Plan as of December 31, 1998 and thereafter. Plaintiffs also seek to represent a subclass of all current and former employee-participants in and beneficiaries of the Plan as of December 31, 1998 and thereafter who were or would have become eligible for an early retirement subsidy under the former Plan at some time prior to the date of the amended complaint. The plaintiffs are seeking unquantified damages and equitable relief available under ERISA, including interest, costs, and attorneys' fees. On November 21, 2005, the court granted our motion to dismiss the amended complaint. Plaintiffs have appealed this ruling to the United States Court of Appeals for the Third Circuit. We believe that we have substantial defenses to the claims against us in this lawsuit and intend to defend it vigorously.

On March 28, 2006, a first amended complaint was filed in the United States District Court for the Eastern District of Texas by Data Treasury Corporation against PNC and PNC Bank, N.A., as well as more than 50 other financial institutions, vendors, and other companies, claiming that the defendants are infringing, and inducing or contributing to the infringement of, the plaintiff's patents, which allegedly involve check imaging, storage and transfer. The plaintiff seeks unspecified damages (including treble damages), interest, attorneys' fees and other expenses, and injunctive relief against the alleged infringement. We are not in a position to assess the likely outcome of this matter, including our exposure, if any. We believe that we have defenses to the claims against us in this lawsuit and intend to defend it vigorously.

In its Form 10-Q for the quarter ended March 31, 2005, Riggs National Corporation (Riggs) disclosed a number of pending lawsuits. All material lawsuits have been finally resolved or settlement agreements have been reached, in one case subject to final documentation. None of the pending settlements where the settlement has not been completed is material to PNC.

Table of Contents

As a result of the acquisition of Riggs, PNC is now responsible for Riggs' obligations to provide indemnification to its directors, officers, and, in some cases, employees and agents against certain liabilities incurred as a result of their service on behalf of or at the request of Riggs. PNC is also now responsible for Riggs' obligations to advance on behalf of covered individuals costs incurred in connection with certain claims or proceedings, subject to written undertakings to repay all amounts so advanced if it is ultimately determined that the individual is not entitled to indemnification. Since the acquisition, we have advanced such costs on behalf of covered individuals from Riggs and expect to continue to do so in the future at least with respect to lawsuits and other legal matters identified in Riggs' first quarter 2005 Form 10-Q.

In connection with industry-wide investigations of practices in the mutual fund industry including market timing, late day trading, employee trading in mutual funds and other matters, several of our subsidiaries have received requests for information and other inquiries from state and federal governmental and regulatory authorities. These subsidiaries are fully cooperating in all of these matters.

In addition to the proceedings or other matters described above, PNC and persons to whom we may have indemnification obligations, in the normal course of business, are subject to various other pending and threatened legal proceedings in which claims for monetary damages and other relief are asserted. We do not anticipate, at the present time, that the ultimate aggregate liability, if any, arising out of such other legal proceedings will have a material adverse effect on our financial position. However, we cannot now determine whether or not any claims asserted against us or others to whom we may have indemnification obligations, whether in the proceedings or other matters specifically described above or otherwise, will have a material adverse effect on our results of operations in any future reporting period.

NOTE 13 SEGMENT REPORTING

We operate four major businesses engaged in providing banking, asset management and global fund processing products and services:

- Retail Banking,
- Corporate & Institutional Banking,
- BlackRock, and
- PFPC.

Results of individual businesses are presented based on our management accounting practices and our management structure. There is no comprehensive, authoritative body of guidance for management accounting equivalent to GAAP; therefore, the financial results of individual businesses are not necessarily comparable with similar information for any other company. We refine our methodologies from time to time as our management accounting practices are enhanced and our businesses and management structure change. Financial results are presented, to the extent practicable, as if each business operated on a stand-alone basis. As permitted under GAAP, we have aggregated the business results for certain operating segments for financial reporting purposes.

Assets receive a funding charge and liabilities and capital receive a funding credit based on a transfer pricing methodology that incorporates product maturities, duration and other factors. Capital is intended to cover unexpected losses and is assigned to the banking and processing businesses using our risk-based economic capital model. We have increased the capital assigned to Retail Banking to 6% of funds to reflect the capital required for well-capitalized banks and to approximate market comparables for this business. The capital for BlackRock and PFPC reflects legal entity shareholders' equity, which exceeds required economic capital.

We have allocated the allowances for loan and lease losses and unfunded loan commitments and letters of credit based on our assessment of risk inherent in the loan portfolios. Our allocation of the costs incurred by operations and other support areas not directly aligned with the businesses is primarily based on the use of services.

Total business segment financial results differ from total consolidated results. The impact of these differences is reflected in the Intercompany Eliminations and Other categories. Intercompany Eliminations reflects activities conducted among our businesses that are eliminated in the consolidated results. Other includes residual activities that do not meet the criteria for disclosure as a separate reportable business, such as asset and liability management activities, related net securities gains or losses, certain trading activities, equity management activities and minority interest in income of BlackRock, differences between business segment performance reporting and financial statement reporting (GAAP), and corporate overhead.

Assets, revenue and earnings attributable to foreign activities were not material in the periods presented.

Table of Contents

BUSINESS SEGMENT PRODUCTS AND SERVICES

Retail Banking provides deposit, lending, brokerage, trust, investment management and cash management services to approximately 2.5 million consumer and small business customers within our primary geographic area. Our customers are serviced through approximately 850 offices in our branch network, the call center located in Pittsburgh and the Internet www.pncbank.com. The branch network is located primarily in Pennsylvania; New Jersey; the greater Washington, DC area, including Virginia and Maryland; Ohio; Kentucky and Delaware. Brokerage services are provided through PNC Investments, LLC, and J.J.B. Hilliard, W.L. Lyons, Inc. Retail Banking also serves as investment manager and trustee for employee benefit plans and charitable and endowment assets and provides nondiscretionary defined contribution plan services and investment options through its *Vested Interest*® product. These services are provided to individuals and corporations primarily within our primary geographic markets.

Corporate & Institutional Banking provides lending, treasury management, and capital markets products and services to mid-sized corporations, government entities and selectively to large corporations. Lending products include secured and unsecured loans, letters of credit and equipment leases. Treasury management services include cash and investment management, receivables management, disbursement services, funds transfer services, information reporting, and global trade services. Capital markets products and services include foreign exchange, derivatives, loan syndications, mergers and acquisitions advisory and related services to middle-market companies, securities underwriting, and securities sales and trading. Corporate & Institutional Banking also provides commercial loan servicing, real estate advisory and technology solutions for the commercial real estate finance

industry. Corporate & Institutional Banking provides products and services generally within our primary geographic markets with certain products and services provided nationally.

BlackRock is one of the largest publicly traded investment management firms in the United States with approximately \$464 billion of assets under management at June 30, 2006. BlackRock provides diversified investment management services to institutional and individual investors worldwide through a variety of fixed income, cash management, equity, and alternative investment products. Mutual funds include the flagship fund families, *BlackRock Funds* and *BlackRock Liquidity Funds*. In addition, BlackRock provides risk management, investment system outsourcing and financial advisory services to institutional investors under the BlackRock Solutions® brand name. See Note 2 Acquisitions regarding the pending Merrill Lynch transaction.

PFPC is a leading full service provider of processing, technology and business solutions for the global investment industry. Securities services include custody, securities lending and accounting and administration for funds registered under the 1940 Act and alternative investments. Investor services include transfer agency, managed accounts, subaccounting, and distribution. PFPC services \$1.9 trillion in total assets and 65 million shareholder accounts as of June 30, 2006 both domestically and internationally through its Ireland and Luxembourg operations.

(a) Period-end balances for BlackRock and PFPC.

Certain revenue and expense amounts shown in the preceding table differ from amounts included in the Business Segments Review section of Part I, Item 2 of this Form 10-Q due to the presentation in Item 2 of business revenues on a taxable-equivalent basis and classification differences related to BlackRock and PFPC.

BlackRock income classified as net interest income in the preceding table represents the net of investment income and interest expense as presented in the Business Segments Review section. PFPC income classified as net interest income (expense) in the preceding table represents the interest components of other nonoperating income (net of nonoperating expense) and debt financing as disclosed in the Business Segments Review section.

Table of Contents

NOTE 14 COMMITMENTS AND GUARANTEES

EQUITY FUNDING COMMITMENTS

We had commitments to make additional equity investments in certain equity management entities of \$140 million and affordable housing limited partnerships of \$45 million at June 30, 2006.

Additionally, in October 2005, we committed \$200 million to PNC Mezzanine Partners III, L.P., a \$350 million mezzanine fund that invests principally in subordinated debt securities with an equity component. Funding of this investment is expected to occur over a five-year period. The remaining unfunded commitment on June 30, 2006 was \$182 million. The limited partnership is consolidated for financial reporting purposes as PNC has a 57% ownership interest.

STANDBY LETTERS OF CREDIT

We issue standby letters of credit and have risk participations in standby letters of credit and bankers' acceptances issued by other financial institutions, in each case to support obligations of our customers to third parties. If the customer fails to meet its financial or performance obligation to the third party under the terms of the contract, then upon the request of the guaranteed party, we would be obligated to make payment to them. The standby letters of credit and risk participations in standby letters of credit and bankers' acceptances outstanding on June 30, 2006 had terms ranging from less than one year to 11 years. The aggregate maximum amount of future payments we could be required to make under outstanding standby letters of credit and risk participations in standby letters of credit and bankers' acceptances was \$6.7 billion at June 30, 2006.

Assets valued as of June 30, 2006 of approximately \$1 billion secured certain specifically identified standby letters of credit. Approximately \$2.4 billion in recourse provisions from third parties was also available for this purpose as of June 30, 2006. In addition, a portion of the remaining standby letters of credit and letter of credit risk participations issued on behalf of specific customers is also secured by collateral or guarantees that secure the customers' other obligations to us. The carrying amount of the liability for our obligations related to standby letters of credit and risk participations in standby letters of credit and bankers' acceptances was \$62 million at June 30, 2006.

STANDBY BOND PURCHASE AGREEMENTS AND OTHER LIQUIDITY FACILITIES

We enter into standby bond purchase agreements to support municipal bond obligations. At June 30, 2006, the aggregate of PNC's commitments under these facilities was \$242 million. PNC also enters into certain other liquidity facilities to support individual pools of receivables acquired by commercial paper conduits including Market Street. At June 30, 2006, our total commitments under these facilities were \$4.8 billion, of which \$4.6 billion was related to Market Street.

INDEMNIFICATIONS

We are a party to numerous acquisition or divestiture agreements under which we have purchased or sold, or agreed to purchase or sell, various types of assets. These agreements can cover the purchase or sale of:

- Entire businesses,
- Loan portfolios,
- Branch banks,
- Partial interests in companies, or
- Other types of assets.

These agreements generally include indemnification provisions under which we indemnify the third parties to these agreements against a variety of risks to the indemnified parties as a result of the transaction in question. When PNC is the seller, the indemnification provisions will generally also provide the buyer with protection relating to the quality of the assets we are selling and the extent of any liabilities being assumed by the buyer. Due to the nature of these indemnification provisions, we cannot quantify the total potential exposure to us resulting from them.

We provide indemnification in connection with securities offering transactions in which we are involved. When we are the issuer of the securities, we provide indemnification to the underwriters or placement agents analogous to the indemnification provided to the purchasers of businesses from us, as described above. When we are an underwriter or placement agent, we provide a limited indemnification to the issuer

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

related to our actions in connection with the offering and, if there are other underwriters, indemnification to the other underwriters intended to result in an appropriate sharing of the risk of participating in the offering. Due to the nature of these indemnification provisions, we cannot quantify the total potential exposure to us resulting from them.

We enter into certain types of agreements that include provisions for indemnifying third parties, such as:

- Agreements relating to providing various servicing and processing functions to third parties,
- Agreements relating to the creation of trusts or other legal entities to facilitate leasing transactions, commercial mortgage-backed securities transactions (loan securitizations) and certain other off-balance sheet transactions,
- Confidentiality agreements,
- Syndicated credit agreements, as a syndicate member,
- Sales of individual loans and equipment leases,
- Arrangements with brokers to facilitate the hedging of derivative and convertible arbitrage activities, and
- Litigation settlement agreements.

Due to the nature of these indemnification provisions, we cannot calculate our aggregate potential exposure under them.

Table of Contents

We enter into certain types of agreements, including leases, assignments of leases, and subleases, in which we agree to indemnify third parties for acts by our agents, assignees and/or sublessees, and employees. While we do not believe these indemnification liabilities are material, either individually or in total, we cannot calculate our potential exposure.

We enter into contracts for the delivery of technology service in which we indemnify the other party against claims of patent and copyright infringement by third parties. Due to the nature of these indemnification provisions, we cannot calculate our aggregate potential exposure under this type of indemnification.

We engage in certain insurance activities which require our employees to be bonded. We satisfy this bonding requirement by issuing letters of credit in a total amount of approximately \$5 million.

In the ordinary course of business, we enter into contracts with third parties under which the third parties provide services on behalf of PNC. In many of these contracts, we agree to indemnify the third party service provider under certain circumstances. The terms of the indemnity vary from contract to contract and the amount of the indemnification liability, if any, cannot be determined.

We are a general or limited partner in certain asset management and investment limited partnerships, many of which contain indemnification provisions that would require us to make payments in excess of our remaining funding commitments. While in certain of these partnerships the maximum liability to us is limited to the sum of our unfunded commitments and partnership distributions received by us, in the others the indemnification liability is unlimited. As a result, we cannot determine our aggregate potential exposure for these indemnifications.

Pursuant to their bylaws, PNC and its subsidiaries provide indemnification to directors, officers and, in some cases, employees and agents against certain liabilities incurred as a result of their service on behalf of or at the request of PNC and its subsidiaries. PNC and its subsidiaries also advance on behalf of covered individuals costs incurred in connection with certain claims or proceedings, subject to written undertakings by each such individual to repay all amounts so advanced if it is ultimately determined that the individual is not entitled to indemnification. We generally are responsible for similar indemnifications and advancement obligations that companies we acquire, including Riggs, had to their officers, directors and sometimes employees and agents at the time of acquisition. We advanced such costs on behalf of several such individuals (including some from Riggs) with respect to pending litigation or investigations during the first six months of 2006. It is not possible for us to determine the aggregate potential exposure resulting from the obligation to provide this indemnity or to advance such costs.

In connection with the lending of securities held by PFPC as an intermediary on behalf of certain of its clients, we provide indemnification to those clients against the failure of the borrowers to return the securities. The market value of the securities lent is fully secured on a daily basis; therefore, the exposure to us is limited to temporary shortfalls in the collateral as a result of short-term fluctuations in trading prices of the loaned securities. At June 30, 2006, the total maximum potential exposure as a result of these indemnity obligations was \$10.9 billion, although we held collateral at the time in excess of that amount.

OTHER GUARANTEES

We write caps and floors for customers, risk management and proprietary trading purposes. At June 30, 2006, the fair value of the written caps and floors liability on our Consolidated Balance Sheet was \$22 million. Our ultimate obligation under written options is based on future market conditions and is only quantifiable at settlement. We manage our market risk exposure from customer positions through transactions with third-party dealers.

We also enter into credit default swaps under which we buy loss protection from or sell loss protection to a counterparty for the occurrence of a credit event of a reference entity. The fair value of the contracts sold on our Consolidated Balance Sheet was a net asset of \$7 million at June 30, 2006. The maximum amount we would be required to pay under the credit default swaps in which we sold protection, assuming all reference obligations experience a credit event at a total loss, without recoveries, was \$769 million at June 30, 2006.

We have entered into various contingent performance guarantees through credit risk participation arrangements with terms ranging from less than 1 year to 12 years. We will be required to make payments under these guarantees if a customer defaults on its obligation to perform under certain credit agreements with third parties. Our exposure under these agreements is approximately \$388 million at June 30, 2006.

CONTINGENT PAYMENTS IN CONNECTION WITH CERTAIN ACQUISITIONS

Edgar Filing: PNC FINANCIAL SERVICES GROUP INC - Form 10-Q

A number of the acquisition agreements to which we are a party and under which we have purchased various types of assets, including the purchase of entire businesses, partial interests in companies, or other types of assets, require us to make additional payments in future years if certain predetermined goals are achieved or not achieved within a specific time period. Due to the nature of the contract provisions, we cannot quantify our total exposure that may result from these agreements.
