For the twenty-six weeks ended July 4, 2006, \$140 in stock-based compensation related to the development and construction of our new restaurants in accordance with FASB Statement No. 123(R), *Share-Based Payment* was capitalized.

Edgar Filing: BJs RESTAURANTS INC - Form 10-Q

See accompanying notes to unaudited consolidated financial statements.

Table of Contents**BJ'S RESTAURANTS, INC.****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****1. BASIS OF PRESENTATION**

The accompanying unaudited consolidated financial statements include the accounts of BJ's Restaurants, Inc. and its wholly owned subsidiaries. Our consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information, and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X.

Certain information and footnote disclosures normally included in consolidated financial statements in accordance with U.S. generally accepted accounting principles have been omitted pursuant to requirements of the Securities and Exchange Commission (SEC). A description of our accounting policies and other financial information is included in our audited consolidated financial statements as filed with the SEC on Form 10-K for the year ended January 3, 2006. We believe that the disclosures included in our accompanying interim financial statements and footnotes are adequate to make the information not misleading, but should be read in conjunction with our consolidated financial statements and notes thereto included in the Annual Report on Form 10-K. The accompanying consolidated balance sheet as of January 3, 2006 has been derived from our audited financial statements.

Effective the fiscal third quarter of 2005, the Company changed its fiscal week-end from Sunday to Tuesday. This change was completed to facilitate operational efficiencies by transferring certain administrative tasks away from the weekends when its restaurants are busiest. Accordingly, the thirteen and twenty-six weeks ended July 4, 2006 ended on a Tuesday and the thirteen and twenty-six weeks ended July 3, 2005 ended on a Sunday.

To conform to the prevalent practice in the casual dining segment of the restaurant industry, we have reclassified certain non food related items from cost of sales to operating and occupancy expenses and manager-in-training salaries from restaurant labor to general and administrative expenses for the current year. These reclassifications have been made to the prior year's financial statements to conform to the current period presentation.

2. INVESTMENTS

All investments are classified as held-to-maturity and are reported at amortized cost. Realized gains and losses are reflected in earnings.

Investments consist of the following (in thousands):

	July 4, 2006	January 3, 2006
U.S. and government agency securities	\$ 2,963	\$ 982
U.S. corporate notes and bonds	19,014	40,721
Total investments	\$ 21,977	\$ 41,703

Average maturities for our total investment portfolio as of July 4, 2006 and January 3, 2006 were approximately 6 months and 3 months, respectively. All short term investments are investment grade securities.

3. NET INCOME PER SHARE

Basic net income per share is computed by dividing the net income attributable to common shareholders by the weighted average number of common shares outstanding during the period. Diluted net income per share reflects the potential dilution that could occur if stock options issued by us to sell common stock at set prices were exercised. The financial statements present basic and diluted net income per share. Common share equivalents included in the diluted computation represent shares issuable upon assumed exercises of outstanding stock options using the treasury stock method.

Table of Contents

The following table presents a reconciliation of basic and diluted net income per share computations and the number of dilutive securities (stock options) that were included in the dilutive net income per share computation (in thousands).

	For The Thirteen Weeks Ended		For The Twenty-Six Weeks Ended	
	July 4, 2006	July 3, 2005	July 4, 2006	July 3, 2005
Numerator:				
Net income for basic and diluted net income per share	\$ 2,340	\$ 2,061	\$ 4,651	\$ 3,727
Denominator:				
Weighted average shares outstanding - basic	22,909	22,593	22,845	21,552
Effect of dilutive common stock options	903	1,252	929	1,184
Weighted average shares outstanding - diluted	23,812	23,845	23,774	22,736

For the thirteen weeks and twenty-six weeks ended July 4, 2006 and July 3, 2005, there were approximately 2,500 and 215,380 stock options outstanding whereby the exercise price exceeded the average common stock market value, respectively. The effects of the shares which would be issued upon the exercise of these options have been excluded from the calculation of diluted net income per share because they are anti-dilutive.

4. RELATED PARTY

As of July 4, 2006, we believe that Jacmar Companies and their affiliates (collectively referred to herein as "Jacmar") owned approximately 19.9% of our outstanding common stock. Jacmar, through its specialty wholesale food distributorship, is our largest supplier of food, beverage and paper products. We believe that Jacmar sells products to us at prices comparable to those offered by unrelated third parties. Jacmar supplied us with approximately \$13.7 million and \$12.0 million of food, beverage and paper products for the twenty-six weeks ended July 4, 2006 and July 3, 2005, respectively, which represents 48.1% and 58.3% of our total costs for these products. We had trade payables related to these products of approximately \$2.6 million and \$2.3 million at July 4, 2006 and July 3, 2005, respectively.

5. STOCK-BASED COMPENSATION

We have two stock-based compensation plans—the 2005 Equity Incentive Plan and the 1996 Stock Option Plan—under which we may issue shares of our common stock to employees, officers, directors and consultants. Upon effectiveness of the 2005 Equity Incentive Plan, the 1996 Stock Option Plan was closed for purposes of new grants. Both of these plans have been approved by our shareholders.

Prior to January 4, 2006, we accounted for those plans under the recognition and measurement provisions of APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and related Interpretations, as permitted by FASB Statement No. 123, *Accounting for Stock-Based Compensation* (Statement No. 123). No stock-based employee compensation cost was recognized in our Statement of Income for the thirteen weeks and twenty-six weeks ended July 3, 2005 as all options granted under our plans had an exercise price equal to the market value of the underlying common stock on the date of grant. Effective January 4, 2006, we adopted the fair value recognition provisions of FASB Statement No. 123(R), *Share-Based Payment* (Statement No. 123(R)), using the modified-prospective-transition method. Under that transition method, compensation cost recognized in the thirteen weeks and twenty-six weeks ended July 4, 2006 includes; (a) compensation cost for all share-based payments granted prior to, but not yet vested as of January 4, 2006, based on the grant date fair value estimated in accordance with the original provisions of Statement No. 123, and (b) compensation cost for all share-based payments granted subsequent to January 4, 2006, based on the grant date fair value estimated in accordance with the provisions of Statement No. 123(R). Results for prior periods have not been restated.

Prior to the adoption of Statement No. 123(R), we presented all tax benefits of deductions resulting from the exercise of stock options as operating cash flows in our Statement of Cash Flows. Statement No. 123(R) requires the cash flows resulting from the tax benefits resulting from tax deductions in excess of the compensation cost recognized for those options (excess tax benefits) to be classified as financing cash flows. For the twenty-six weeks ended July 4, 2006, the \$1.5 million excess tax benefit classified as financing cash inflow would have been classified as an operating cash inflow if we had not adopted Statement No. 123(R).

Table of Contents

The following tables illustrate the effect on net income and net income per share if we had applied the fair value recognition provisions of Statement 123(R) to all periods presented. For the purposes of this pro forma disclosure, the value of the options for fiscal 2005 are estimated using a Black-Scholes option-pricing formula and amortized to expense over the options' vesting periods. Management believes that the adjusted presentation may be useful to investors to permit them to compare the Company's results using consistent assumptions regarding stock-based compensation.

	For The Thirteen		For The Twenty-Six	
	Weeks Ended		Weeks Ended	
	July 4,	July 3,	July 4,	July 3,
	2006	2005	2006	2005
	As Reported	Pro Forma	As Reported	Pro Forma
Net income before stock based compensation	\$ 2,605	\$ 2,061	\$ 5,214	\$ 3,727
Stock based compensation:				
Labor and benefits	(9)	(6)	(19)	(19)
General and administrative	(399)	(993)	(848)	(1,964)
Tax benefit of stock based compensation	143	361	304	716
Net income	\$ 2,340	\$ 1,423	\$ 4,651	\$ 2,460
Basic net income per share:				
Net income before stock based compensation	\$ 0.11	\$ 0.09	\$ 0.23	\$ 0.17
Stock based compensation, net	(0.01)	(0.03)	(0.03)	(0.06)
Basic net income per share	\$ 0.10	\$ 0.06	\$ 0.20	\$ 0.11
Diluted net income per share:				
Net income before stock based compensation	\$ 0.11	\$ 0.09	\$ 0.22	\$ 0.16
Stock based compensation, net	(0.01)	(0.03)	(0.02)	(0.05)
Diluted net income per share	\$ 0.10	\$ 0.06	\$ 0.20	\$ 0.11

The fair value of each option grant issued is estimated at the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions:

	For the Twenty-Six	
	Weeks Ended	
	July 4, 2006	July 3, 2005
Expected volatility	37.5%	42.5%
Risk free interest rate	4.38%	3.73%
Expected option life	5 years	5 years
Dividend yield	0%	0%
Fair value of options granted	\$ 9.72	\$ 6.96

FASB Statement No. 123(R) requires us to make certain assumptions and judgments regarding the grant date fair value. These judgments include expected volatility, risk free interest rate, expected option life, dividend yield and vesting percentage. These estimations and judgments are determined by us using many different variables that, in many cases, are outside of our control. The changes in these variables or trends, including stock price volatility and risk free interest rate, may significantly impact the grant date fair value resulting in a significant impact to our financial results.

6. COMMON STOCK

On March 11, 2005, we sold 2.75 million shares of common stock to institutional investors at a purchase price of \$15.50 per share for \$40.3 million (net of approximately \$2.2 million in related fees and expenses). The proceeds are currently being utilized to fund the expansion of the Company's restaurant operations.

Table of Contents

7. DIVIDEND POLICY

We have not paid any cash dividends since our inception and have currently not allocated any funds for the payment of dividends. Rather, it is our current policy to retain earnings, if any, for expansion of our restaurant and brewing operations, remodeling of existing restaurants and other general corporate purposes. We have no plans to pay any cash dividends in the foreseeable future. Should we decide to pay cash dividends in the future, such payments would be at the discretion of the Board of Directors.

8. RECENT ACCOUNTING PRONOUNCEMENTS

On October 6, 2005, the FASB issued Staff Position No. 13-1 (FSP 13-1), *Accounting for Rental Costs Incurred During a Construction Period*. Generally, FSP 13-1 requires companies to expense rental costs incurred during a construction period. As permitted prior to the adoption of FSP 13-1, we capitalized rental costs during construction. We adopted FSP 13-1 on January 4, 2006. The financial statement impact of the adoption of FSP 13-1 is expected to range from approximately \$50,000 to \$60,000 in additional pre-opening rent expense per restaurant during 2006 which may vary based on lease terms, restaurant openings and the length of construction periods.

In December 2004, the FASB issued Statement No. 153, *Exchanges of Nonmonetary Assets*, an amendment of APB Opinion No. 29, *Accounting for Nonmonetary Transactions*. This Statement amends the principle that exchanges of nonmonetary assets should be measured based on the fair value of the assets exchanged and more broadly provides for exceptions regarding exchanges of nonmonetary assets that do not have commercial substance. This Statement is effective for nonmonetary asset exchanges occurring during our fiscal year beginning January 4, 2006. The adoption of this Statement did not have a material impact on our results of operations or financial position.

In May 2005, the FASB issued Statement No. 154, *Accounting Changes and Error Corrections*, which changes the accounting for and reporting of a change in accounting principle. This Statement applies to all voluntary changes in accounting principle and changes required by an accounting pronouncement in the usual instance that the pronouncement does not include specific transition provisions. This Statement requires retrospective application to prior period financial statements of changes in accounting principle, unless it is impractical to determine either the period specific or cumulative effects of the change. Statement No. 154 is effective for accounting changes made in our fiscal year beginning January 4, 2006. The adoption of this Statement did not have a material impact on our results of operation or financial position.

In July 2006, FASB issued FASB Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes*, an interpretation of FASB Statement No. 109, *Accounting for Income Taxes*, which is effective for fiscal years beginning after December 15, 2006, and clarifies the accounting for uncertainty in tax positions. FIN 48 requires that we recognize the impact of a tax position in our financial statements if that position is more likely than not of being sustained on audit, based on the technical merits of the position. The cumulative effect of the change in accounting principle is recorded as an adjustment to opening retained earnings. We are currently evaluating the impact of the adoption of FIN 48 on our financial statements.

**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
STATEMENT REGARDING FORWARD LOOKING DISCLOSURE**

The following discussion and analysis should be read in conjunction with our consolidated financial statements and notes thereto included elsewhere in this Form 10-Q. Except for the historical information contained herein, the discussion in this Form 10-Q contains certain forward-looking statements that involve known and unknown risks and uncertainties, such as statements of our plans, objectives, expectations and intentions. The cautionary statements made in this Form 10-Q should be read as being applicable to all related forward-looking statements wherever they appear in this Form 10-Q. Our actual results could differ materially from those discussed in forward-looking statements. Factors that could cause or contribute to such differences include, without limitation, those factors discussed herein: (i) our ability to manage an increasing number of new restaurant openings, (ii) construction delays, (iii) labor shortages, (iv) minimum wage increases, (v) food quality and health concerns, (vi) factors that impact California, where 33 of our current 50 restaurants are located, (vii) restaurant and brewery industry competition, (viii) impact of certain brewery business considerations, including, without limitation, dependence upon suppliers and related hazards, (ix) consumer trends, (x) potential uninsured losses and liabilities, (xi) fluctuating commodity costs including food and energy, (xii) trademark and servicemark risks, (xiii) government regulations, (xiv) licensing costs (xv) beer and liquor regulations, (xvi) loss of key personnel, (xvii) inability to secure acceptable sites, (xviii) limitations on insurance coverage, (xix) legal proceedings, (xx) other general economic and regulatory conditions and requirements and (xxi) numerous other matters discussed in this Form 10-Q and our Annual Report on Form 10-K for the fiscal year ended January 3, 2006.

Table of Contents**GENERAL**

On August 7, 2006, we owned and operated 50 restaurants located in California, Oregon, Colorado, Arizona, Texas and Nevada. A licensee also operates one restaurant in Lahaina, Maui. Each of our restaurants is operated either as a BJ's Restaurant & Brewery® which includes a brewery within the restaurant, a BJ's Restaurant & Brewhouse® which receives the beer it sells from one of our breweries or an approved third party craft brewer of our proprietary recipe beers (contract brewer), or a BJ's Pizza & Grill® which is a smaller format, full service restaurant. Our menu features our BJ's® award-winning, signature deep-dish pizza, our own hand-crafted beers as well as a wide selection of appetizers, entrees, pastas, sandwiches, specialty salads and desserts including our unique Pizookie® dessert. Our 11 BJ's Restaurant & Brewery restaurants feature in-house brewing facilities where BJ's proprietary hand-crafted beers are produced and sold.

Our revenues are comprised of food and beverage sales at our restaurants. Revenues from restaurant sales are recognized when payment is tendered at the point of sale. Revenues from our gift cards are recognized upon redemption in our restaurants. Until the redemption of gift cards occurs, all outstanding balances on such cards are included as a liability in our consolidated balance sheets.

Cost of sales is comprised of food and beverage supplies. The components of cost of sales are variable and typically fluctuate with sales volumes. Labor and benefit costs include direct hourly and management wages, bonuses and payroll taxes and fringe benefits for restaurant employees. Occupancy and operating expenses include restaurant supplies, credit card fees, marketing costs, fixed rent, percentage rent, common area maintenance charges, utilities, real estate taxes, repairs and maintenance and other related restaurant costs.

General and administrative expenses include all corporate, field supervision and administrative functions that support existing operations and provide infrastructure to facilitate our future growth. Components of this category include management, supervisory and staff salaries and related employee benefits (including stock-based compensation), travel and relocation costs, information systems, restaurant manager recruitment and training, corporate rent and professional, legal and consulting fees. Depreciation and amortization principally include depreciation on capital expenditures for restaurants. Restaurant opening expenses, which are expensed as incurred, consist of the costs of hiring and training the initial work force for each new restaurant, travel, the cost of food and supplies used in training, marketing costs, the cost of the initial stocking of office supplies and other direct costs related to the opening of a new restaurant.

In calculating comparable company-owned restaurant sales, we include a restaurant in the comparable base once it has been open for 18 months.

RESULTS OF OPERATIONS

The following table sets forth, for the periods indicated, our unaudited Consolidated Statements of Income expressed as percentages of total revenues. The results of operations for the thirteen and twenty-six weeks ended July 4, 2006 and July 3, 2005 are not necessarily indicative of the results to be expected for the full fiscal year.

Table of Contents

Thirteen Weeks Ended July 4, 2006 Compared to Thirteen Weeks Ended July 3, 2005.

Revenues. Total revenues increased by \$13.9 million, or 31.5%, to \$57.8 million during the thirteen weeks ended July 4, 2006 from \$44.0 million during the comparable thirteen week period of 2005. The \$13.9 million increase in revenues consisted of an approximate \$11.5 million increase in restaurant sales from new restaurants not yet in our comparable sales base, and an approximate \$2.2 million, or 5.9%, increase from comparable restaurant sales. The increase in comparable restaurant sales benefited from a menu price increase of approximately 1.8% with the rest due to increased customer counts and menu mix shifts.

Cost of Sales. Cost of sales increased by \$3.5 million, or 31.4%, to \$14.8 million during the thirteen weeks ended July 4, 2006 from \$11.3 million during the comparable thirteen week period of 2005. As a percentage of revenues, cost of sales remained at 25.6% for the current thirteen week period and the prior year comparable thirteen week period. Increased costs for seafood, general grocery items, produce and fuel surcharges from our distributors were essentially offset by the impact of menu price increases.

In our new restaurants, our cost of sales will typically be higher during the first 90-120 days of operations versus our mature restaurants, as our restaurant management teams become accustomed to optimally predicting, managing and servicing sales volumes at our restaurants. As such, the timing of new restaurant openings has had and will continue to have an effect on our cost of sales.

We provide our restaurant guests with a large variety of menu items and therefore we are not overly dependent on a single group of commodities. We continue to work with our suppliers to control food costs; however, there can be no assurance that future supplies and costs for commodities used in our restaurants will not fluctuate due to weather and other market conditions outside of our control.

Labor and Benefits. Labor and benefit costs for our restaurants increased by \$4.6 million, or 29.1%, to \$20.3 million during the thirteen weeks ended July 4, 2006 from \$15.7 million during the comparable thirteen week period of 2005. This increase was primarily due to the opening of nine new restaurants since the thirteen weeks ended July 3, 2005. As a percentage of revenues, labor and benefit costs decreased to 35.1% for the current thirteen week period from 35.8% for the prior year comparable thirteen week period. This percentage decrease is primarily due to increased efficiencies and productivity related to hourly labor and our ability to leverage the fixed nature of management labor as a result of higher comparable sales.

For new restaurants, labor and benefit costs will typically be higher than normal during the first 90-120 days of operations until our management team at each new restaurant becomes more accustomed to optimally predicting, managing and servicing the sales volumes and resulting staff requirements at our new restaurants. As such, the timing of new restaurant openings has had and will continue to have an effect on labor and benefit costs.

Occupancy and Operating Expenses. Occupancy and operating expenses increased by \$2.6 million, or 30.7%, to \$10.9 million during the thirteen weeks ended July 4, 2006 from \$8.3 million during the comparable thirteen week period of 2005. The increase reflects additional operating and occupancy expenses related to the nine new restaurants we opened since the thirteen weeks ended July 3, 2005. As a percentage of revenues, occupancy and operating expenses decreased to 18.8% for the thirteen week period from 18.9% for the prior year comparable thirteen week period. This slight decrease is primarily due to leverage from higher comparable sales.

General and Administrative Expenses. General and administrative expenses increased by \$1.9 million, or 58.2%, to \$5.0 million during the thirteen weeks ended July 4, 2006 from \$3.2 million during the comparable thirteen week period of 2005. Included in general and administrative costs for the thirteen weeks ended July 4, 2006 is \$399,000

Table of Contents

of stock-based compensation expense related to the adoption of Statement No. 123(R). Excluding this amount, general and administrative costs increased \$1.5 million, or 45.7%. This increase was principally due to planned investments in additional field supervision and corporate infrastructure to support our growth, increased investments in our restaurant management recruiting and training program and training expenses related to the rollout of our new kitchen display system and our labor scheduling system to our restaurants. During 2006, we expect to continue to add resources to the corporate support and field supervision activities in preparation for the planned openings of as many as 11 new restaurants this year and as many as 13 new restaurants during 2007. As a percentage of revenues, general and administrative expenses increased to 8.7% for the thirteen week period from 7.2% for the prior year comparable thirteen week period. Approximately 70 basis points of this percentage increase is the result of stock-based compensation due to the adoption of Statement No. 123(R) in the quarter, with the remaining increase being due primarily to the factors noted above.

Depreciation and Amortization. Depreciation and amortization increased by \$630,000, or 37.9%, to \$2.3 million during the thirteen weeks ended July 4, 2006 from \$1.7 million during the comparable thirteen week period of 2005. The increase was primarily due to our acquisition of restaurant equipment, furniture, leasehold improvements and brewery equipment related to new restaurant development. As a percentage of revenues, depreciation and amortization remained relatively flat compared to the same period last year.

Restaurant Opening Expense. Restaurant opening expense increased by \$166,000, or 14.6%, to \$1.3 million during the thirteen weeks ended July 4, 2006 from \$1.1 million during the comparable thirteen week period of 2005. The increase was primarily due to the new restaurants we opened during the period, opening costs for three other restaurants that were either opened prior to this quarter or will subsequently open this year and pre-opening rent related to the adoption of FSP 13-1 (described below). During the thirteen weeks ended July 4, 2006 and July 3, 2005, we opened two and four restaurants, respectively. Our opening costs will fluctuate from period to period, depending upon, but not limited to, the number of restaurant openings, the size and concept of the restaurants being opened, the location of the restaurants and the complexity of the staff hiring and training process.

Effective January 4, 2006, we began expensing non-cash holiday rent during each restaurant's construction period to restaurant opening expense in accordance with the adoption of FSP13-1, *Accounting for Rental Costs Incurred During a Construction Period*. We anticipate this non-cash rent to average approximately \$50,000 to \$60,000 per restaurant. As a result, we anticipate higher restaurant opening costs this year compared to prior years.

Interest Income, Net. Net interest income increased by \$33,000, or 11.3%, to \$325,000 during the thirteen weeks ended July 4, 2006 from \$292,000 during the comparable thirteen week period of 2005. This increase is primarily due to higher interest rates earned on our investments in marketable securities.

Other Income, Net. Net other income decreased to \$4,000 during comparable thirteen weeks ended July 4, 2006 from \$70,000 during the comparable thirteen week period of 2005, a decrease of \$66,000. This decrease is primarily due to our decision to discontinue lottery ticket sales in our Oregon restaurants.

Income Tax Expense. Our effective income tax rate for the thirteen weeks ended July 4, 2006 was 34.0% compared to 32.3% for the comparable thirteen week period of 2005. The effective income tax rate for the thirteen weeks ended July 4, 2006 differs from the statutory income tax rate primarily due to anticipated FICA tip credits and the non-deductibility of incentive stock options. We currently estimate our effective tax rate to be approximately 34.0% to 35.0% for fiscal 2006. However, the actual effective tax rate for fiscal 2006 may be different than our current estimate due to actual revenues, pre-tax income and tax credits achieved during the year.

Twenty-Six Weeks Ended July 4, 2006 Compared to Twenty-Six Weeks Ended July 3, 2005.

Revenues. Total revenues increased by \$29.8 million, or 36.6%, to \$111.2 million during the twenty-six weeks ended July 4, 2006 from \$81.4 million during the comparable twenty-six week period of 2005. The \$29.8 million increase in revenues consisted of an approximate \$25.1 million increase in restaurant sales from new restaurants not yet in our comparable sales base, and an approximate \$4.3 million or 6.3% increase from comparable restaurant sales. The increase in comparable restaurant sales benefited from a menu price increase of approximately 1.7% with the rest due to increased customer counts and menu mix shifts.

Cost of Sales. Cost of sales increased by \$7.9 million, or 38.2%, to \$28.4 million during the twenty-six weeks ended July 4, 2006 from \$20.6 million during the comparable twenty-six week period of 2005. As a percentage of revenues,

Table of Contents

cost of sales increased to 25.6% for the current twenty-six week period from 25.3% for the prior year comparable twenty-six week period. This increase is primarily a result of increased costs for seafood, general grocery items and fuel surcharges from our distributors, partially offset by the impact of menu price increases.

Labor and Benefits. Labor and benefit costs for our restaurants increased by \$9.6 million, or 33.1%, to \$38.7 million during the twenty-six weeks ended July 4, 2006 from \$29.1 million during the comparable twenty-six week period of 2005. This increase was primarily due to the opening of nine new restaurants since the twenty-six weeks ended July 3, 2005. As a percentage of revenues, labor and benefit costs decreased to 34.8% for the current twenty-six week period from 35.7% for the prior year comparable twenty-six week period. This percentage decrease is primarily due to increased efficiencies and productivity related to hourly labor and our ability to leverage the fixed nature of management labor as a result of higher comparable sales.

Occupancy and Operating Expenses. Occupancy and operating expenses increased by \$5.8 million, or 37.7%, to \$21.2 million during the twenty-six weeks ended July 4, 2006 from \$15.4 million during the comparable twenty-six week period of 2005. The increase reflects additional operating and occupancy expenses related to the nine new restaurants we opened since the twenty-six weeks ended July 3, 2005. As a percentage of revenues, occupancy and operating expenses increased to 19.1% for the twenty-six week period from 18.9% for the prior year comparable twenty-six week period. This slight increase is primarily due to higher energy costs and increased dining and kitchen supplies partially offset by higher leverage from comparable sales.

General and Administrative Expenses. General and administrative expenses increased by \$3.6 million, or 58.7%, to \$9.7 million during the twenty-six weeks ended July 4, 2006 from \$6.1 million during the comparable twenty-six week period of 2005. Included in general and administrative costs for the twenty-six weeks ended July 4, 2006 is \$848,000 of stock-based compensation expense related to the adoption of Statement No. 123(R). Excluding this amount, general and administrative costs increased \$2.7 million, or 44.9%. This increase was the result of our planned investments in field supervision and corporate infrastructure to support our growth coupled with higher restaurant management recruiting and training costs. As a percentage of revenues, general and administrative expenses increased to 8.7% for the twenty-six week period from 7.5% for the prior year comparable twenty-six week period. Approximately 70 basis points of this percentage increase is the result of stock-based compensation due to the adoption of Statement No. 123(R) in the first quarter of 2006, with the remaining increase being due primarily to the factors noted above.

Depreciation and Amortization. Depreciation and amortization increased by \$1.4 million, or 45.0%, to \$4.4 million during the twenty-six weeks ended July 4, 2006 from \$3.1 million during the comparable twenty-six week period of 2005. The increase was primarily due to our acquisition of restaurant equipment, furniture, leasehold improvements and brewery equipment related to new restaurant development. As a percentage of revenues, depreciation and amortization remained relatively flat compared to the same period last year.

Restaurant Opening Expense. Restaurant opening expense increased by \$235,000, or 11.2%, to \$2.3 million during the twenty-six weeks ended July 4, 2006 from \$2.1 million during the comparable twenty-six week period of 2005. We opened five new restaurants during each of the twenty-six week periods of 2006 and 2005. This increase is primarily due to construction rent expensed related to the adoption of FSP 13-1. Our opening costs will fluctuate from period to period, depending upon, but not limited to, the number of restaurant openings, the size and concept of the restaurants being opened, the location of the restaurants and the complexity of the staff hiring and training process.

Interest Income, Net. Net interest income increased by \$375,000, or 95.4%, to \$768,000 during the twenty-six weeks ended July 4, 2006 from \$393,000 during the comparable twenty-six week period of 2005. This increase is primarily due to increased investments after the completion of our private placement in March 2005 coupled with higher interest rates.

Other Income, Net. Net other income decreased to \$32,000 during comparable twenty-six weeks ended July 4, 2006 from \$117,000 during the comparable twenty-six week period of 2005, a decrease of \$85,000. This decrease is primarily due to our decision to discontinue lottery ticket sales in our Oregon restaurants.

Income Tax Expense. Our effective income tax rate for the twenty-six weeks ended July 4, 2006 was 34.4% compared to 32.2% for the comparable twenty-six week period of 2005. The effective income tax rate for the twenty-six weeks ended July 4, 2006 differs from the statutory income tax rate primarily due to FICA tip credits and the

Table of Contents

non-deductibility of incentive stock options. We currently estimate our effective tax rate to be approximately 34.0% to 35.0% for fiscal 2006. However, the actual effective tax rate for fiscal 2006 may be different than our current estimate due to actual revenues, pre-tax income and tax credits achieved during the year.

LIQUIDITY AND CAPITAL RESOURCES

Our capital requirements are principally related to our restaurant growth plans. Our primary growth objective is to achieve a 20% to 25% increase in total restaurant operating weeks during each of fiscal 2006 and 2007. Similar to many restaurant chains, we typically utilize operating lease arrangements (principally ground leases) for substantially all of our restaurant locations. We are typically required to expend cash to construct and furnish new restaurant facilities. We currently expect to open as many as 11 and 13 new restaurants during fiscal 2006 and 2007, respectively. We believe that our operating lease arrangements continue to provide appropriate leverage for our capital structure in a financially efficient manner. However, we are not limited to the use of lease arrangements as our only method of opening new restaurants. While our operating lease obligations are not currently required to be reflected as indebtedness on our consolidated balance sheets, the minimum rents and related fixed asset obligations under our lease agreements must be satisfied by cash flows from our ongoing operations. Accordingly, our lease arrangements reduce, to some extent, our capacity to utilize funded indebtedness in our capital structure. We also require capital resources to maintain our existing base of restaurants and brewery operations and to further expand and strengthen the capabilities of our corporate and information technology infrastructures. Our requirement for working capital is not significant since our restaurant guests pay for their food and beverage purchases in cash or credit cards at the time of the sale. Thus, we are able to sell many of our inventory items before we have to pay our suppliers for such items.

Our cash flows from operating activities, as detailed in the consolidated statements of cash flows, provided \$8.2 million of net cash during the twenty-six weeks ended July 4, 2006, a \$100,000 decrease from the \$8.3 million generated during the comparable twenty-six week period of 2005. The decrease in cash from operating activities is primarily due to the timing of payments to vendors included in accrued expenses partially offset by increased net income, higher depreciation expense due to more restaurants, increased credit card receipts in-transit classified as receivables and non-cash stock-based compensation expense.

For the twenty-six weeks ended July 4, 2006, total capital expenditures were \$24.5 million of which expenditures for the acquisition of restaurant and brewery equipment and leasehold improvements to construct new restaurants were \$19.6 million. These expenditures were primarily related to the construction of our new restaurants in Westminster, Colorado and Elk Grove, Natomas and Temecula, California, Reno, Nevada and El Paso, Texas. El Paso, Texas opened on July 11, 2006 and Temecula, California is expected to open later this year. In addition, total capital expenditures related to the maintenance of existing restaurants and expenditures related to restaurant and corporate systems were \$2.5 million and \$2.4 million, respectively.

On March 11, 2005, we sold 2.75 million shares of common stock at a purchase price of \$15.50 per share for \$40.3 million (net of approximately \$2.2 million in related fees and expenses). The proceeds are currently being utilized to fund the expansion of our restaurant operations.

On December 15, 2005, we established a \$10 million unsecured revolving line of credit (the Line of Credit) which expires on December 31, 2008. Availability under the Line of Credit is reduced by outstanding letters of credit primarily supporting our self insurance programs. As of July 4, 2006, there were no funded borrowings outstanding under the Line of Credit; however there was \$1.4 million outstanding in letters of credit. Borrowings under the Line of Credit will bear interest at 1% per annum in excess of the applicable LIBOR rate.

Prior to the March 2005 equity offering, we funded our capital requirements primarily through cash flows from operations and proceeds received from the exercise of redeemable warrants during 2002. As of August 1, 2006, we have entered into 10 signed leases, for which the restaurants have not yet began operations, and we expect to enter into additional leases for new restaurant locations. Our capital requirements related to opening additional restaurants will continue to be significant. We currently anticipate our capital expenditures for 2006 to be approximately \$50 million related to the construction of our new restaurants and a 15,000 barrel brewery in Reno, Nevada, the purchase of land underlying two new restaurants, image enhancement remodels in some of our older restaurants as well as normal maintenance capital expenditures and the investment in our restaurant toolsets.

Table of Contents

Our future cash requirements and the adequacy of available funds will depend on many factors, including the pace of expansion, real estate markets, site locations and the nature of the arrangements negotiated with landlords. We believe that our current cash flow and our cash and investments balances together with anticipated cash flows from operations should be sufficient to satisfy our working capital and capital expenditure requirements through fiscal 2006. Based on our current restaurant expansion plan and subject to market conditions, we expect to seek additional funds to finance our future growth and operations in the future. There can be no assurance that such funds will be available when required or available on terms acceptable to us.

CONTRACTUAL OBLIGATIONS

There have been no material changes during the period covered by this report, outside of the ordinary course of our business, to the contractual obligations specified in the table of contractual obligations included in the section Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Fiscal 2005 Annual Report on Form 10-K.

IMPACT OF INFLATION

The impact of inflation on food, labor, energy and occupancy costs can significantly affect our operations. Many of our employees are paid hourly rates related to federal and state minimum wage laws. Minimum wages have been increased numerous times and remain subject to future increases.

While we have been able to react to inflation and other changes in our costs of key operating expenses by gradually increasing prices for our menu items, combined with reduced purchasing costs, and greater economies of scale, there can be no assurance that we will be able to continue to do so in the future. Competitive conditions could limit our menu pricing flexibility. We cannot guarantee that all future cost increases can be offset by increased menu prices or that increased menu prices will be fully absorbed by our restaurant guests without any resulting changes in their visit frequencies or purchasing patterns. Many of the leases for our restaurants provide for contingent rent obligations based on a percentage of sales. As a result, rent expense will absorb a proportionate share of any menu price increases in our restaurants. There can be no assurance that we will continue to generate increases in comparable restaurant sales in amounts sufficient to offset inflationary or other cost pressures.

SEASONALITY AND ADVERSE WEATHER

Our results of operations have historically been impacted by seasonality, which directly impacts tourism at our coastal California locations. The summer months (June through August) have traditionally been higher sales volume periods than other periods of the year. Quarterly results have been and will continue to be significantly impacted by the timing of new restaurant openings and their associated restaurant opening costs. As a result of these and other factors, our financial results for any given quarter may not be indicative of the results that may be achieved for a full fiscal year.

CRITICAL ACCOUNTING POLICIES

Critical accounting policies require the greatest amount of subjective or complex judgments by management and are important to portraying our financial condition and results of operations. Judgments or uncertainties regarding the application of these policies may result in materially different amounts being reported under different conditions or using different assumptions. We consider the following policies to be the most critical in understanding the judgments that are involved in preparing our consolidated financial statements.

Property and Equipment

We record all property and equipment at cost. Property and equipment accounting requires estimates of the useful lives for the assets for depreciation purposes and selection of depreciation methods. We believe the useful lives reflect the actual economic life of the underlying assets. We have elected to use the straight-line method of depreciation over the estimated useful life of an asset or the primary lease term of the respective lease, whichever is shorter. Renewals and betterments that materially extend the useful life of an asset are capitalized while maintenance and repair costs are charged to operations as incurred. Judgment is often required in the decision to distinguish between an asset which qualifies for capitalization versus an expenditure which is for maintenance and repairs.

Table of Contents

We review property and equipment (which includes leasehold improvements) and intangible assets with finite lives for impairment when events or circumstances indicate these assets might be impaired. We test impairment using historical cash flows and other relevant facts and circumstances as the primary basis for our estimates of future cash flows. The analysis is performed at the restaurant level for indicators of impairment. If impairment indicators were identified, then assets would be recorded at fair value. This process requires the use of estimates and assumptions, which are subject to a high degree of judgment. If these assumptions change in the future, we may be required to record impairment charges for these assets. As of July 4, 2006, no impairment indicators have been identified.

Self Insurance Liability

We are self-insured for a portion of our employee workers' compensation program. We maintain coverage with a third party insurer to limit our total exposure for this program. The accrued liability associated with this program is based on our estimate of the ultimate costs to settle known claims as well as claims incurred but not yet reported to us (IBNR claims) as of the balance sheet date. Our estimated liability is not discounted and is based on information provided by our insurance broker and insurer, combined with our judgments regarding a number of assumptions and factors, including the frequency and severity of claims, our claims development history, case jurisdiction, related legislation, and our claims settlement practice. Significant judgment is required to estimate IBNR claims as parties have yet to assert such claims. If actual claims trends, including the severity or frequency of claims, differ from our estimates, our financial results could be significantly impacted.

Income Taxes

We provide for income taxes based on our estimate of federal and state tax liabilities. Our estimates include, but are not limited to, effective state and local income tax rates, allowable tax credits for items such as FICA taxes paid on reported tip income and estimates related to depreciation expense allowable for tax purposes. We usually file our income tax returns several months after our fiscal year-end. We file our tax returns with the advice and compilation of tax consultants. All tax returns are subject to audit by federal and state governments, usually years after the returns are filed, and could be subject to differing interpretation of the tax laws.

Deferred tax accounting requires that we evaluate net deferred tax assets to determine if these assets will more likely than not be realized in the foreseeable future. This test requires projection of our taxable income into future years to determine if there will be taxable income sufficient to realize the tax assets (future tax deductions and FICA tax credit carryforwards). The preparation of the projections requires considerable judgment and is subject to change to reflect future events and changes in the tax laws.

Leases

We lease the majority of our restaurant locations. We account for our leases under the provisions of FASB Statement No. 13, *Accounting for Leases* (SFAS 13) and subsequent amendments, which require that our leases be evaluated and classified as operating or capital leases for financial reporting purposes. All of our restaurant leases are classified as operating leases pursuant to the requirements of SFAS 13. We disburse cash for leasehold improvements, furniture and fixtures and equipment to build out and equip our leased premises. We may also expend cash for permanent improvements that we make to leased premises that may be reimbursed to us by our landlords as construction contributions (also known as tenant improvement allowances) pursuant to agreed-upon terms in our leases. Landlord construction contributions can take the form of up-front cash, full or partial credits against minimum or percentage rents otherwise payable by us or a combination thereof.

Stock-based Compensation

We have two stock-based compensation plans – the 2005 Equity Incentive Plan and the 1996 Stock Option Plan – under which we may issue shares of our common stock to employees, officers, directors and consultants. Upon effectiveness of the 2005 Equity Incentive Plan, the 1996 Stock Option Plan was closed for purposes of new grants. Both of these plans have been approved by our shareholders.

Prior to January 4, 2006, we accounted for those plans under the recognition and measurement provisions of APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and related Interpretations, as permitted by FASB Statement No. 123, *Accounting for Stock-Based Compensation* (Statement No. 123). No stock-based employee compensation cost was recognized in our Statement of Income for the thirteen weeks and twenty-six weeks ended July 3, 2005 as all options granted under our plans had an exercise price equal to the market value of the underlying common

Table of Contents

stock on the date of grant. Effective January 4, 2006, we adopted the fair value recognition provisions of FASB Statement No. 123(R), *Share-Based Payment* (Statement No. 123(R)), using the modified-prospective-transition method. Under that transition method, compensation cost recognized in the thirteen weeks and twenty-six weeks ended July 4, 2006 includes; (a) compensation cost for all share-based payments granted prior to, but not yet vested as of January 4, 2006, based on the grant date fair value estimated in accordance with the original provisions of Statement No. 123, and (b) compensation cost for all share-based payments granted subsequent to January 4, 2006, based on the grant date fair value estimated in accordance with the provisions of Statement No. 123(R). Results for prior periods have not been restated.

FASB Statement No. 123(R) requires us to make certain assumptions and judgments regarding the grant date fair value. These judgments include expected volatility, risk free interest rate, expected option life, dividend yield and vesting percentage. These estimations and judgments are determined by us using many different variables that, in many cases, are outside of our control. The changes in these variables or trends, including stock price volatility and risk free interest rate, may significantly impact the grant date fair value resulting in a significant impact to our financial results.

Prior to the adoption of Statement No. 123(R), we presented all tax benefits of deductions resulting from the exercise of stock options as operating cash flows in our Statement of Cash Flows. Statement No. 123(R) requires the cash flows resulting from the tax benefits resulting from tax deductions in excess of the compensation cost recognized for those options (excess tax benefits) to be classified as financing cash flows.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our market risk exposures are related to cash and cash equivalents and investments. We invest our excess cash in highly liquid short-term investments with maturities of less than twelve months as of the date of purchase. These investments are not held for trading or other speculative purposes. Changes in interest rates affect the investment income we earn on our investments and, therefore, impact our cash flows and results of operations. For the twenty-six weeks ended July 4, 2006, the average pre-tax interest rate earned on cash and cash equivalents and investments was approximately 4.3%.

We purchase food and other commodities for use in our operations, based upon market prices established with our suppliers. Many of the commodities purchased by us can be subject to volatility due to market supply and demand factors outside of our control. To manage this risk in part, we attempt to enter into fixed price purchase commitments, with terms typically up to one year, for many of our commodity requirements. Dairy costs can also fluctuate due to government regulation. We believe that substantially all of our food and supplies are available from several sources, which helps to diversify our overall commodity cost risk. We also believe that we have the ability to increase certain menu prices, or vary certain menu items offered, in response to food commodity price increases. Some of our commodity purchase arrangements may contain contractual features that limit the price paid by establishing certain price floors or caps. We do not use financial instruments to hedge commodity prices, since our purchase arrangements with suppliers, to the extent that we can enter into such arrangements, help control the ultimate cost that we pay.

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, we have evaluated the effectiveness of our disclosure controls and procedures pursuant to Rules 13a-15 and 15d-15 promulgated under the Securities Exchange Act of 1934 as amended, as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that these disclosure controls and procedures are effective.

Changes in Internal Control over Financial Reporting

There has not been any change in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during our second fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****Item 1. LEGAL PROCEEDINGS**

Restaurants such as those operated by us are subject to litigation in the ordinary course of business, most of which we expect to be covered by our general liability insurance, subject to certain deductibles and coverage limits. Punitive damages awards and employee unfair practice claims, however, are not covered by our general liability insurance. To date, we have not paid punitive damages with respect to any claims, but there can be no assurance that punitive damages will not be awarded with respect to any future claims, employee unfair practice claims or any other actions. We could be affected by the adverse publicity resulting from allegations, regardless of whether or not such allegations are valid or whether we are determined to be liable. We believe that the final disposition of any such lawsuits and claims will not have a material adverse effect on our financial positions, results of operations or liquidity.

Item 1A. RISK FACTORS

A discussion of the significant risks associated with investments in our securities are set forth in Item 1A of our Annual Report on Form 10-K for the fiscal year ended January 3, 2006. There have been no material changes in the risks related to us from those disclosed in such Annual Report.

Item 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

On June 28, 2006, we held our Annual Meeting of Shareholders. Shareholders voted upon the election of directors and the ratification of Ernst & Young LLP as the Company's independent registered public accounting firm for the fiscal year ending January 2, 2007.

Paul A. Motenko, Jeremiah J. Hennessy, Gerald W. Deitchle, James A. Dal Pozzo, Shann M. Brassfield, John F. Grundhofer, J. Roger King, Peter A. Bassi and Larry D. Bouts all of whom were directors prior to the Annual Meeting and were nominated for re-election, were re-elected at the meeting. The following votes were cast for each of the nominees:

Name	For	Authority Withheld
Paul A. Motenko	18,709,033	207,172
Jeremiah J. Hennessy	18,708,933	207,272
