Our growth in earnings and excellent return on equity have also increased our capital strength, while reducing Kingsway's operating leverage. Market conditions continue to be competitive, but we are starting to see indications of improvements, particularly in the U.S.. Consistent with our operating strategy, we expect to continue to seize opportunities for profitable growth as they arise.

PRESIDENT'S MESSAGE TO SHAREHOLDERS

Dear Shareholders:

On behalf of the Board of Directors, I am pleased to report our financial results for the third quarter and nine months ended September 30, 2006 **in U.S. dollars except where indicated.**

Revenues and earnings continue to grow in line with our expectations. Strong operating results, in particular, from our Canadian operations and increased investment income have resulted in a solid third quarter and first nine months of 2006. Our growth in earnings and excellent return on equity have also increased our capital strength, while reducing Kingsway's operating leverage. Market conditions continue to be competitive, but we are starting to see indications of improvements, particularly in the U.S.. Consistent with our operating strategy, we expect to continue to seize opportunities for profitable growth as they arise.

Net income increased by 19% in the quarter to a third quarter record of \$37.4 million (C\$41.9 million), compared to \$31.3 million (C\$37.5 million) in the third quarter of last year. Net income for the nine months ended September 30, 2006 increased 7% to \$106.5 million (C\$120.2 million) compared to \$99.1 million (C\$121.0 million) reported last year.

In the third quarter, operating earnings increased 37% to a third quarter record of \$31.9 million (C\$35.8 million) compared to \$23.3 million (C\$28.0 million) in the same quarter last year. Operating earnings for the first nine months of 2006 increased 24% to \$95.1 million (C\$107.5 million) compared to \$76.8 million (C\$94.0 million) for the same period last year. Operating earnings are calculated as net income excluding after-tax net realized gains and losses on investments.

Return on equity (annualized) was 16.8% in the quarter compared to 16.7% in the same quarter of 2005, and 16.6% for the year to date compared to 18.4% for the same period last year. Diluted earnings per share increased 20% to \$0.66 (C\$0.74) for the quarter compared to \$0.55 (C\$0.66) for the third quarter of 2005. For the nine month period, diluted earnings per share increased by 7% to \$1.87 (C\$2.11) compared to \$1.74 (C\$2.13) for the same period last year.

Outlook

In Canada we continue to see rational pricing but increasing competition. The Government activism in Alberta is leading to a growing Facility (residual market) which is extremely unprofitable and we believe this will have a major impact on the profitability of the personal automobile product for the industry in that province. Ontario automobile continues to be a profitable but increasingly competitive market. We will continue our focus and maintain our underwriting discipline in these markets. Growth in capital in the industry is exceeding the growth in revenues, however, interest rates are stable and lower than in the U.S. which is driving rational behaviour.

Page 20 of 41

Page 2

In the U.S. the unprecedented hurricane losses in 2005 have had a significant impact on the availability and pricing of reinsurance. We believe that these conditions will create additional opportunities where many of our smaller competitors rely heavily on reinsurance to protect their surplus from the impact of large losses. The loss of capital sustained by reinsurers in 2005 has been partially replenished by new capital and by a profitable season in 2006, however the magnitude of price increases continues to put pressure on the industry leverage ratio of premiums written to surplus. We do not anticipate these trends will lead to lower reinsurance pricing for 2007.

The positive cash flow generated from our profitability and growing operations continues to increase the size of our investment portfolio. The rising interest rate environment has also led to increased yields on our investment portfolio. As 23% of our fixed income portfolio matures in the next year we anticipate that our investment income will continue to grow as we reinvest at yields which are higher than those on the maturing instruments.

I am pleased to announce that the Board of Directors has declared a quarterly dividend of C\$0.075 per common share, payable on December 29, 2006 to shareholders of record on December 15, 2006.

I am also pleased to announce the appointment of Mr. Robert T. E. Gillespie to the Company's Board of Directors. Mr. Gillespie is a graduate of the Heriot-Watt University in Edinburgh and the Harvard Business School. During his career, Mr. Gillespie was formerly the Chairman and Chief Executive Officer of General Electric Canada Inc. from 1992 to 2005. Mr. Gillespie also serves on the boards of several public and private companies as well as being an honorary trustee of the Royal Ontario Museum. He is a fellow of the Canadian Academy of Engineering and throughout his distinguished career received many awards including Canada's International Executive of the Year.

This President's Message contains forward looking statements that are subject to risks and uncertainties. The reader should review the Forward Looking Statements section of Management's Discussion and Analysis to assist in identifying risk factors that could cause actual results to differ materially from those anticipated in the forward looking statements.

Sincerely,

The following management's discussion and analysis (MD&A) should be read in conjunction with the Company's unaudited interim consolidated financial statements for the third quarter of fiscal 2006 and 2005; with the MD&A set out on pages 16 to 55 in the Company's 2005 Annual Report, including the section on risk factors; and with the notes to the interim consolidated financial statements for the third quarter of fiscal 2006 and the notes to the audited consolidated financial statements for fiscal 2005 set out on pages 63 to 76 of the Company's 2005 Annual Report.

The Company's financial results are reported in U.S. dollars. Unless otherwise indicated, all amounts are in U.S. dollars and have been derived from financial statements prepared in accordance with Canadian generally accepted accounting principles (GAAP).

Non-GAAP Financial Measures

The Company uses both GAAP and certain non-GAAP financial measures to assess performance. Securities regulators require that companies caution readers about non-GAAP financial measures that do not have a standardized meaning under GAAP and are unlikely to be comparable to similar measures used by other companies. Kingsway, like many insurance companies, analyzes performance based on underwriting ratios such as combined, expense and loss ratios. These terms are defined in the glossary of terms section beginning on page 81 of the 2005 Annual Report. The Company also uses investment portfolio per share information which is calculated based on the fair value of the investment portfolio divided by the number of issued and outstanding common shares. The Company uses operating earnings which are calculated as net income excluding after-tax net realized gains and losses on investments to assess the profitability of its operations. A reconciliation of net income to operating earnings is presented below in thousands of U.S. dollars.

Net unrealized losses on the total investment portfolio were \$20.2 million (C\$22.6 million) or \$0.36 (C\$0.40) per share outstanding at September 30, 2006, primarily as a result of increases in interest rates in the period, as compared to net unrealized gains of \$18.2 million (C\$21.2 million) or \$0.32 (C\$0.37) per share outstanding at the end of 2005. Net unrealized gains on the common shares portfolio were \$30.0 million (C\$33.5 million) or \$0.53 (C\$0.60) per share outstanding at September 30, 2006 compared to \$40.1 million (C\$46.6 million) or \$0.71 (C\$0.83) per share outstanding at the end of 2005.

At September 30, 2006, 23% of the fixed income portfolio matures in less than one year and 47% matures after one year and in less than five years. Duration is a measure used to estimate the extent market values of fixed maturity investments change with changes in interest rates. Using this measure, it is estimated that an immediate hypothetical 100 basis point parallel increase in interest rates would decrease the market value of our fixed maturity investments by \$80.4 million at September 30, 2006, representing 3.2% of the \$2,552.7 million fair value fixed maturity investment portfolio.

Unearned premiums as at September 30, 2006 was \$740.3 million (C\$827.4 million), compared to \$649.2 million (C\$755.1 million) at the end of 2005. During the year, provisions for unpaid claims increased by 5% to \$1.94 billion (C\$2.17 billion) compared to \$1.84 billion (C\$2.14 billion) at the end of 2005.

The Company has increased its investment in capital assets by \$29.0 million during the year, \$27.1 million of which is the result of the construction that continues on its new head office building in Mississauga and new facilities for Lincoln General in York, Pennsylvania. The head office building in Mississauga is scheduled for completion in the first quarter of 2007, and the York, Pennsylvania facility has been completed and is now occupied.

Liquidity and Capital Resources. During the nine months ended September 30, 2006, the net cash provided from operations was \$147.3 million compared to \$215.0 million last year. The Company believes that the cash generated from the operating activities will be sufficient to meet our ongoing cash requirements, including interest payment obligations and dividend payments.

During the quarter, the Company repurchased and cancelled 90,000 common shares under the normal course issuer bid for a total purchase price of \$1.9 million (C\$2.1 million). For the year to date, we have repurchased and cancelled 562,800 common shares or 1% of the shares outstanding at the beginning of the year for a total purchase price of \$11.1 million (C\$12.5 million) at an average price of \$19.66 (C\$22.13).

As at September 30, 2006 the Company was well capitalized to support the premium volume of our insurance subsidiaries. Our Canadian property and casualty insurance companies are regulated by the Office of the Superintendent of Financial Institutions (OSFI) and the Financial Services Commission of Ontario (FSCO) and are required to maintain a level of capital sufficient to achieve a target of 150% of a minimum capital test (MCT) formula. As at September 30, 2006 the MCT of our Canadian subsidiaries are well in excess of the target MCT level, with MCT margins ranging between 228% and 290%.

In the United States, a risk based capital (RBC) formula is used by the National Association of Insurance Commissioners (NAIC) to identify property and casualty insurance companies that may not be adequately capitalized. The NAIC requires that capital and surplus not fall below 200% of the authorized control level. As at September 30, 2006 the RBC ratios of our U.S. subsidiaries are well in excess of the NAIC requirement with RBC ratios ranging between 251% and 1,135%.

Our reinsurance subsidiaries, which are domiciled in Barbados and Bermuda are required by the regulator in the jurisdictions in which they operate to maintain minimum capital levels. As at September 30, 2006 the capital maintained by Kingsway Reinsurance Corporation was \$330.2 million in excess of the regulatory requirements in Barbados and the capital maintained by Kingsway Reinsurance (Bermuda) Limited was \$41.2 million in excess of regulatory requirements in Bermuda.

Off-Balance Sheet Financing The Company entered into an off-balance sheet transaction through the Kingsway Linked Return of Capital Trust transaction that was completed on July 14, 2005 which is more fully described in Note 13(d) of the 2005 audited consolidated financial statements. The net proceeds from this offering were invested into a Kingsway controlled entity which is not consolidated based on accounting standards. The effect of this transaction is to show additional debt on the Company's financial statements and an off-setting equity investment of \$7.5 million into the non-consolidated affiliated entity. The Company does not have any other off-balance sheet financing arrangements.

Table of Contents**KINGSWAY FINANCIAL SERVICES INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****For the three and nine months ended September 30, 2006 and 2005****(Unaudited - tabular amounts in thousands of U.S. dollars)****1. Basis of presentation**

These interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles using the same accounting policies as were used for the Company's consolidated financial statements for the year ended December 31, 2005. Effective December 31, 2005, the Company reported its consolidated financial statements in U.S. dollars. As a result of this change in reporting currency, the results of the third quarter of 2005 have been converted into U.S. dollars using the same methodology as described in note 1 of the 2005 audited consolidated financial statements. These interim consolidated financial statements do not contain all disclosures required by generally accepted accounting principles and accordingly should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2005 as set out on pages 56 to 76 of the Company's 2005 Annual Report. The results of the operations for the interim periods are not necessarily indicative of the full-year results.

2. Stock-based compensation

As reported on pages 64 of the Company's 2005 Annual Report, effective January 1, 2003 the Company adopted on a prospective basis the fair-value method of accounting for stock-based compensation awards granted to employees and non-employee directors. During the third quarter 2006, the Company recorded \$598,000 (\$1.6 million year to date) of stock-based compensation expense included in employee compensation expense.

For stock options granted in years prior to 2003, the Company must provide the following pro forma disclosures of net income and earnings per share as if the Company had measured the additional compensation element of stock options granted based on the fair value on the date of grant. Such proforma disclosure follows:

	Three months ended September 30,	
	2006	2005

The per share weighted average fair value of options granted during 2006 and 2005 was C\$6.88 and C\$3.58, respectively. The fair value of the options granted was estimated at the date of grant using a Black-Scholes option pricing model with the following weighted average assumptions:

	As at September 30	
	2006	2005
Risk-free interest rate	4.02%	3.53%
Dividend yield	1.02%	1.02%
Volatility of the expected market price of the Company's common shares	31.4%	22.5%
Expected option life (in years)	3.5	3.9

The Black-Scholes option valuation model was developed for use in estimating fair value of traded options which have no vesting restrictions and are fully transferable. As the Company's employee stock options have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, in management's opinion, the above pro forma adjustments are not necessarily a reliable single measure of the fair value of the Company's employee stock options.

3. Segmented information

The Company provides property and casualty insurance and other insurance related services in three reportable segments, Canada, the United States and corporate and other insurance related services. The Company's Canadian and United States segments include transactions with the Company's reinsurance subsidiaries. At the present time, other insurance related services are not significant. Results for the Company's operating segments are based on the Company's internal financial reporting systems and are consistent with those followed in the preparation of the consolidated financial statements.
