AMERICAN ELECTRIC TECHNOLOGIES, INC. AND SUBSIDIARIES

Notes to Condensed Unaudited Consolidated Financial Statements

September 30, 2008

1. Basis of Presentation

The accompanying condensed unaudited consolidated financial statements of American Electric Technologies, Inc. and Subsidiaries ("AETI" , the Company , our , we , us) as of September 30, 2008 and for the nine and three months then ended have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and reflect all adjustments which, in the opinion of management, are necessary for a fair presentation of financial position as of September 30, 2008 and results of operations for the nine months and three months ending September 30, 2008 and 2007. All adjustments are of a normal recurring nature. The results of operations for interim periods are not necessarily indicative of the results to be expected for a full year. Certain information and footnote disclosures normally included in the financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. The statements should be read in conjunction with the Company's financial statements filed on our Annual Report on Form 10-K for the year ended December 31, 2007 which was filed on March 31, 2008.

The accompanying interim consolidated financial statements include the accounts of American Electric Technologies, Inc. and its Subsidiaries from May 15, 2007. We have eliminated all significant inter-company balances and transactions in consolidation.

Effective January 1, 2008 the Company formed a new wholly owned subsidiary, American Access Technologies, Inc. ("American Access" or "AAT"), through which the AAT segment's business is conducted.

2. Merger

American Electric Technologies, Inc. is the surviving financial reporting entity from a reverse acquisition of an 80% interest in American Access Technologies, Inc. by the shareholders of M&I Electric Industries, Inc. ("M&I") on May 15, 2007. Immediately upon the completion of the reverse acquisition, American Access Technologies, Inc. changed its name to American Electric Technologies, Inc.

Because the stockholders of M&I were issued approximately 80% of the voting stock of the combined company in the merger, for accounting purposes, AAT was deemed to be the acquired entity in the merger, and the merger was accounted for as a reverse acquisition. Upon completion of the merger, all outstanding shares of M&I stock were exchanged for 6,079,692 shares (as adjusted for a 1-for-5 reverse stock split) of American Access common stock at par value of \$0.001. All share and per share disclosures have been retroactively adjusted to reflect the exchange of shares in the merger, and the 1-for-5 reverse split of our common stock on May 15, 2007.

Table of Contents

AETI is a Florida corporation and M&I, AETI's wholly owned subsidiary, is a Texas corporation. M&I has a wholly owned subsidiary, South Coast Electric Systems, LLC (SC), a Delaware Limited Liability Company, and joint venture interests in Singapore and China.

Our financial statements reflect the historical results of M&I prior to the merger and that of the combined company following the merger, and do not include the historical results of AAT prior to the merger.

The allocation of the purchase price as of May 15, 2007 for the acquired assets and liabilities of the merger is as follows:

Assets acquired:	
Accounts receivable, net	\$ 1,011,615
Inventories, net	1,104,936
Other current assets	101,657
Property and equipment	2,540,518
Intangible assets	48,000
Customer agreements	135,000
Deferred tax assets	2,858,000
Other assets	39,000
Total assets acquired	\$ 7,838,726
Liabilities assumed and consideration paid:	
Accounts payable and accrued liabilities	\$ 648,610
Common stock and options issued	6,850,372
Net cash transaction costs paid	339,744
Total liabilities assumed and consideration paid	\$ 7,838,726

The following unaudited pro forma information for the nine and three months ended September 30, 2007 presents a summary of our consolidated results of operations as if the merger had been completed on January 1, 2007:

	Nine Months Ended September 30,		Three Months Ended September 30,	
	2008	2007	2008	2007
Revenue	\$ 48,377,640	\$ 42,161,862	\$ 14,827,591	\$ 13,117,377
Net income	\$ 731,881	\$ 1,411,636	\$ 13,129	\$ 309,414
Pro forma income per share - basic	\$ 0.096	\$ 0.206	\$ 0.002	\$ 0.040

Weighted-average shares - diluted	7,667,500	6,867,209	7,668,849	7,666,825

Table of Contents

3. Net Income per Common Share

The Company follows Statement of Financial Accounting Standards (SFAS) No. 128, *Earnings per Share*, which requires the presentation of both basic and diluted income per share. In accordance with SFAS Statement No. 128, basic earnings per common share is based on the weighted average number of common shares outstanding. Diluted earnings per share is based on the weighted average number of common shares outstanding, plus the incremental shares that would have been outstanding upon the assumed exercise of all potentially dilutive stock options subject to anti-dilution limitations.

Basic net income per common share has been computed based upon the weighted average number of shares of common stock outstanding for the nine months and three months ended September 30, 2008 and 2007.

4. Stock-Based Compensation

On February 8, 2008, the Board of Directors approved the grant of 83,750 non-qualified stock options and 83,750 shares of restricted stock to members of management and key employees. The valuation date of these grants was February 29, 2008 when the stock had a value of \$4.09. The grants will vest 25% on each of the next four anniversary dates. The grants are subject to the substantial achievement of 2008 budgeted performance and other individual metrics. The ultimate number of both the stock options and restricted stock units will be determined based on the attainment of certain company and individual performance targets during the 2008 fiscal year.

The annual cost for these grants will approximate \$130,000 for each of the next four years based on the assumption that 2008 performance measurements are achieved which does not appear likely at this time.

The Company instituted an Employee Stock Purchase Plan in April, 2008 that is non compensatory under the guidelines of SFAS 123R. During the three months ending September 30, 2008, 2,193 shares were issued under this plan.

5. Recent Accounting Pronouncements

There are no recent financial pronouncements that management expects to have a material impact on the Company's financial position or results of operations.

6. Segment Information

The Company follows the guidance of SFAS No. 131, *Disclosures About Segments of an Enterprise and Related Information*, in reporting operating segment information.

Table of Contents

Management has organized the Company around products and services and has three reportable segments: Technical Products and Services (TP&S), Electrical and Instrumentation Construction (E&I) and American Access Technologies (AAT). TP&S develops, manufactures, provides and markets switchgear and variable speed drives. The service component of this segment includes retrofitting equipment upgrades, startups, testing and troubleshooting electrical substations, switchgear, drives and control systems. Additionally, joint venture equity income is included in TP&S income before income taxes because their operations are exclusively involved in TP&S activities. The E&I segment installs electrical equipment for the energy, water, industrial, marine and commercial markets. The AAT segment manufactures and markets zone cabling products and manufactures formed metal products of varying designs.

Following are selected financial details regarding the Company's reportable segments:

	Nine Months Ended September 30		Three Months Ended September 30	
	2008	2007	2008	2007
Revenues				
Technical Products and Services	\$ 24,843,482	\$ 21,145,100	\$ 7,821,536	\$ 6,037,700
Electrical and Instrumentation Const.	17,402,649	14,644,900	4,945,321	4,908,300
AAT	6,131,509	3,401,900	2,060,733	2,171,400
Total	\$ 48,377,640	\$ 39,191,900	\$ 14,827,591	\$ 13,117,400
Gross Profit				
Technical Products and Services	\$ 3,387,572	\$ 2,686,900	\$ 912,149	\$ 488,700
Electrical and Instrumentation Const.	1,128,804	1,199,600	127,244	498,300
AAT	1,419,681	842,600	425,297	545,500
Total	\$ 5,936,057	\$ 4,729,100	\$ 1,464,690	\$ 1,532,500
Income before Income taxes:				
Technical Products and Services	\$ 2,453,749	\$ 2,504,200	\$ 657,602	\$ 560,900
Electrical and Instrumentation Const.	(320,593)	546,100	(261,291)	170,300
AAT	204,041	247,400	39,471	144,300
Corporate and Other Unallocated Expenses	(1,175,453)	(618,200)	(414,942)	(400,000)
Total	\$ 1,161,744	\$ 2,679,500	\$ 20,839	\$ 475,500

The Company's management does not separately review and analyze its assets on a segment basis for TP&S and E&I and all assets for the segments are recorded within the corporate segment's records. Depreciation expense is apportioned to the segments based on management's best estimate. Corporate unallocated expenses include compensation costs and other expenses that cannot be meaningfully associated with the individual segments, i.e. except for equity in joint venture income attributable to TP&S, all other costs, expenses and other income have been allocated to the segments based on sales, which management believes is the best available basis to apportion these elements of income and expense to the segments.

Approximately 35% to 40% of TP&S sales are sold into international markets. These sales are made in US dollars and are generally settled prior to shipment or are secured by irrevocable letters of credit; all E&I sales are made in the United States although some services are performed internationally; and all of AAT's sales are made in the United States.

Table of Contents

7. Advances to and Investment in Joint Ventures

Assets held by the Company outside of the United States consist of two joint ventures:

a 49% interest in M&I Electric Far East, Ltd. (MIEFE), a joint venture with Oakwell Engineering, Ltd., in Singapore, and;

BOMAY Electric Industries Company, Ltd., in which M&I holds a 40% interest with Baoji Oilfield Machinery Co., Ltd. (a subsidiary of China National Petroleum Corporation), holds 51%, and AA Energies, Inc., headquartered in Katy, Texas, holds 9%; The functional currencies of MIEFE and BOMAY are the Singapore dollar and the Chinese Yuan, respectively.

Equity in income of joint ventures includes \$1,476,425 and \$494,651 for the nine month and three month periods ending September 30, 2008, respectively, from the China joint venture compared to \$829,000 and \$ 529,000 for the comparable prior year periods. Net income from the Singapore joint venture resulted in \$ 28,000 and \$0 in equity income for the nine months and quarter ending September 30, 2008 in comparison to \$287,000 and \$87,000 for the comparable prior year periods.

The Company reported Comprehensive Income (Loss) of \$158,946 and \$(13,080) for the nine and three month periods ending September 30, 2008, respectively, arising from the translation of the aforementioned investee company balance sheets presented in their functional currencies.

As of September 30, 2008 the Company had accounts receivable from these affiliates of approximately \$676,000. AETI received a dividend from BOMAY of \$1,014,000 during the quarter.

8. Costs, Estimated Earnings, and Related Billings on Uncompleted Contracts

The Company reports earnings from firm-price and modified firm price long-term contracts on the percentage-of-completion method. Earnings are recorded based on the ratio of costs incurred to total estimated costs except that the Company has determined that labor incurred provides an improved measure of percentage of completion for its TP&S segment projects. Costs include direct material, direct labor, and job related overhead. Losses expected to be incurred on contracts are charged to operations in the period such losses are determined. A contract is considered complete when all costs except insignificant items have been incurred and the customer has accepted the product or project. Revenue from non-time and material jobs that will be completed within approximately one month is recognized on the completed-contract method. This method is used because these contracts are typically completed in a short period and the financial position and results of operations do not vary materially from those that would result from use of the percentage-of-completion method.

The TP&S segment records revenue from its field and technical service and repair operations on a completed service basis after customer acknowledgement that the service has been completed and accepted. Approximately 9.4 % of the Company's consolidated revenues are recorded on this basis. In addition, the TP&S segment sells certain purchased parts and products. These revenues are recorded when the product is shipped and title passes to the customer. Less than 2% of the

Table of Contents

Company's consolidated revenues are recorded on this basis. The Company's AAT segment recognizes revenue when ownership of the manufactured product passes to their customer which generally occurs upon product shipment.

The asset, Work-in-process, which is included in inventories, represents the cost of labor, material, and overhead on jobs for which no revenue has been recognized on contracts accounted for under the completed-contract method. For contracts accounted for under the percentage-of-completion method, the asset, Costs and estimated earnings in excess of billing on uncompleted contracts, represents revenue recognized in excess of amounts billed and the liability, Billings in excess of costs and estimated earnings on uncompleted contracts, represents billings in excess of revenue recognized.

Contract revenue recognition inherently involves estimation, including the contemplated level of effort to accomplish the tasks under the contract, the cost of the effort, and an ongoing assessment of progress toward completing the contract. From time to time, as part of the normal management processes, facts develop that require revisions to estimated total costs or revenues expected. The cumulative impact of any revisions to estimates and the full impact of anticipated losses on contracts accounted for under SOP 81-1 are recognized in the period in which they become known. Projected losses on all other contracts are recognized as the services and materials are provided.

9. Revolving Credit Agreement

Effective June 30, 2008, the Company amended its revolving credit agreement with JP Morgan Chase Bank, N.A. As amended, the bank provides us with a revolving credit line not to exceed \$10,000,000 or the sum of 80% of eligible accounts receivable plus 40% of the aggregate amount of eligible inventory, whichever is less. As of September 30, 2008, \$4,000,000 was borrowed under this line of credit.

Borrowings under the agreement bear interest at the 30 day LIBOR rate (3.975% at September 30, 2008) plus 1.75% per year. The agreement is collateralized by trade accounts receivable, inventories, and work-in-process. Our M&I and AAT subsidiaries are guarantors of the loan. Loans under the agreement must be repaid no later than June 30, 2010.

The terms of the agreement contain covenants which provide for customary restrictions and limitations, the maintenance of certain financial ratios and a restriction from paying dividends without prior written consent of the bank. At September 30, 2008, we were in compliance with all restrictive covenants.

10. Taxes on Income

Income taxes are accounted for under the asset and liability method. Under this method, deferred tax assets and liabilities are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to be reported to the taxing authorities. Deferred tax assets are evaluated annually and a valuation allowance is provided if it is more likely than not that, the deferred tax assets will not give rise to future benefits in the Company's tax returns. There were no significant changes in the Company's deferred tax assets and liabilities in the current quarter except for the recognition of the current liability arising from the receipt of the \$1 million dividend from the Chinese joint venture.

Table of Contents

The effective tax rate was 37% for the nine months and three months September 30, 2008 and 2007, reflecting the Federal statutory rate of 34% and the effect of state and foreign income taxes.

We are subject to income tax in jurisdictions outside the United States, none of which are individually material to our financial position, cash flows, or results of operations.

11. Finance Lease Arrangement

In March, 2008, the Company's American Access segment entered into a capital lease in order to finance shop equipment and related training expenses. The lease term commenced in June, 2008 when the equipment was installed and operational. The lease obligation and capitalized amount at inception were \$ 681,690, the lease term is 60 months and the monthly payments are approximately \$14,000 per month. Depreciation expense related to the capitalized lease will approximate \$68,000 per year and \$23,000 is included in the 2008 results to date.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with the financial statements and notes thereto included elsewhere in this Form 10-Q and the financial statements in the 2007 Annual Report on Form 10-K filed on March 31, 2008. Historical results and percentage relationships set forth in the statement of operations, including trends that might appear, are not necessarily indicative of future operations.

FORWARD-LOOKING STATEMENTS

Except for historical and factual information, this document contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include statements that address activities, events or developments that we expect, believe or anticipate will or may occur in the future, such as predictions of future financial performance. All forward-looking statements are based on assumptions made by us based on our experience and perception of historical trends, current conditions, expected future developments and other factors we believe are appropriate under the circumstances.

These statements, including statements regarding our capital needs, business strategy, expectations and intentions, are subject to numerous risks and uncertainties, many of which are beyond our control, including our ability to maintain key products sales or effectively react to other risks including those discussed in Part I, Item 1A, Risk Factors, of our 2007 Annual Report on Form 10-K filed on March 31, 2008. We urge you to consider that statements that use the terms believe, do not believe, anticipate, expect, plan, estimate, intend and similar expressions are to identify forward-looking statements. No forward-looking statement can be guaranteed, and actual results may differ materially from those projected. We undertake no obligation to publicly update any forward-looking statement, whether as a result of new information, future events or otherwise.

Table of Contents

BUSINESS

American Electric Technologies, Inc. is comprised of three segments: Technical Products and Services (TP&S), Electrical and Instrumentation Construction (E&I) and American Access Technologies (AAT). The TP&S segment designs, manufactures, markets and provides products designed to distribute the flow of electricity and protect electrical equipment such as motors, transformers and cables, and also provides variable speed drives to both AC (alternating current) and DC (direct current) motors. Products offered by this segment include low and medium voltage switchgear, generator control and distribution switchgear, motor control centers, powerhouses, bus duct, variable frequency AC drives, variable speed DC drives, program logic control (PLC) based automation systems, human machine interface (HMI) and specialty panels. The products are built for application voltages from 480 volts to 38,000 volts and are used in a wide variety of industries. Services provided by TP&S include electrical equipment retrofits, upgrades, startups, testing and troubleshooting of substations, switchgear, drives and control systems.

The E&I segment provides a full range of electrical and instrumentation construction and installation services to both land and marine based markets of the oil and gas industry, the water and wastewater facilities industry and other commercial and industrial markets. The E&I segment provides services on both a fixed-price and a time-and-materials basis. The segment's services include electrical and instrumentation turnarounds, maintenance, renovation and new construction. Applications include installation of switchgear, AC and DC motors, drives, motor controls, lighting systems and high voltage cable. Marine based oil and gas services include complete electrical system rig-ups, modifications, start-ups and testing for vessels, drilling rigs, and production modules. These services can be manufactured and installed utilizing NEMA (National Electrical Manufacturers Association) and ANSI (American National Standards Institute) or IEC (International Electrotechnical Commission) equipment to meet ABS (American Bureau of Shipping), USCG (United States Coast Guard), Lloyd's Register, a provider of marine certification services, and DNV (a leading certification body/registrar for management systems certification services) standards.

The AAT segment manufactures and markets zone cabling enclosures and manufactures formed metals products. The zone cabling product line develops and manufactures patented zone cabling and wireless telecommunication enclosures. These enclosures mount in ceilings, walls, raised floors, and certain modular furniture to facilitate the routing of telecommunications network cabling, fiber optics and wireless solutions to the workspace environment. AAT also operates a precision sheet metal fabrication and assembly operation and provides services such as precision CNC (Computer Numerical Controlled) stamping, bending, assembling, painting, powder coating and silk screening to a diverse client base including, but not limited to, engineering, technology and electronics companies, primarily in the Southeast.

The Company has facilities, sales offices and repair depots in Texas, Mississippi and Florida. We have minority interests in joint ventures which have facilities in Singapore and Xian, China.

Table of Contents

The Company owns the Texas manufacturing and service facility, which is comprised of nine acres and 85,000 square feet under roof; the Florida facility, which is eight and one-half acres with two buildings totaling 67,500 square feet; and the Mississippi facility which is three acres with an 11,000 square foot building. The Company also owns the Houston facility which consists of three acres and 26,000 square feet of office, service and storage space.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

We have adopted various accounting policies that govern the application of accounting principles generally accepted in the United States of America in the preparation of our financial statements. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Although these estimates are based on management's knowledge of current events and actions it may undertake in the future, they may ultimately differ from actual results.

Our significant accounting policies are more fully described in the financial statements filed in our 2007 Annual Report on Form 10-K filed with the Securities and Exchange Commission March 31, 2008. Certain accounting policies involve significant judgments and assumptions by us that have a material impact on the carrying value of certain assets and liabilities. Management believes the following critical accounting policies reflect its most significant estimates and assumptions used in the presentation of our financial statements. We do not have off-balance sheet arrangements, financings, or other relationships with unconsolidated entities or other persons, also known as "special purpose entities" (SPEs), nor do we have any variable interest entities (VIEs), as defined by FASB's Interpretation No. 46(R), *Consolidation of Variable Interest Entities - an interpretation of ARB No. 51*.

Inventory Valuation - Inventories are stated at the lower of cost or market, with material value determined using an average cost method. Inventory costs for finished goods and work-in-process include direct material, direct labor, production overhead and outside services. TP&S and E&I indirect overhead is apportioned to work in process based on direct labor incurred. AAT production overhead, including indirect labor, is allocated to finished goods and work-in-process based on material consumption which is an estimate that could be subject to change in the near term as additional information is obtained and as our operating environment changes.

Reserve for Obsolete and Slow-Moving Inventory - We regularly review the value of inventory on hand, using specific aging categories, and record a provision for obsolete and slow-moving inventory based on historical usage and estimated future usage. As actual future demand or market conditions may vary from those projected, adjustments to our inventory reserve may be required.

Allowance for Doubtful Accounts - The Company maintains an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. The estimate is based on management's assessment of the collectability of specific customer accounts and includes consideration for credit worthiness and financial condition of those specific customers. We also will review historical experience with the customer, the general economic environment and the aging of our receivables. We record an allowance to reduce receivables to the amount that we reasonably believe to be collectible. Based on our historical collection experience, we currently feel our allowance for doubtful accounts is adequate.

Table of Contents

Revenue Recognition - The Company recognizes earnings from both fixed price and modified fixed price contracts. Earnings on certain contracts are recognized on the percentage-of-completion method following the guidelines in the AICPA's Statement of Position (SOP) No. 81-1, *Accounting for Performance of Construction Type and Certain Production Type Contracts*. The Company recognizes revenue from product sales at the time the product is shipped and title passes to the customer. The Company believes that recognizing revenue at time of shipment is appropriate because the Company's sales policies meet the four criteria of FASB's Staff Accounting Bulletin No. 104, *Revenue Recognition*, which are: (i) persuasive evidence that an arrangement exists, (ii) delivery has occurred, (iii) the seller's price to the buyer is fixed and determinable, and (iv) collectability is reasonably assured.

Foreign Currency Gains and Losses - Foreign currency translations are included as a separate component of comprehensive income. We have determined the local currency of our foreign joint ventures to be the functional currency. In accordance with Statement of Financial Accounting Standard No. 52, Foreign Currency Translation, the assets and liabilities of our foreign equity investees, denominated in foreign currency, are translated into United States dollars at exchange rates in effect at the consolidated balance sheet date; revenues and expenses are translated at the average exchange rate for the period. Related translation adjustments are reported as comprehensive income which is a separate component of stockholders' equity, whereas gains and losses resulting from foreign currency transactions are included in results of operations.

Federal Income Taxes - The asset and liability method is used in accounting for federal income taxes (see Note 10). Under this method, deferred tax assets and liabilities are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. The estimated value of deferred tax assets are reviewed annually and a valuation allowance is provided if it is more likely than not that the deferred tax assets will not give rise to future benefits in our tax returns.

Contingencies - In accordance with SFAS No. 5, *Accounting for Contingencies*, we record an estimated loss from a loss contingency when information indicates that it is probable that an asset has been impaired or a liability has been incurred and the amount of loss can be reasonably estimated. Contingencies are often resolved over long time periods, are based on unique facts and circumstances, and are inherently uncertain. We regularly evaluate current information available to us to determine whether such accruals should be adjusted or other disclosures related to contingencies are required.

Equity in Joint Venture Income - The Company accounts for its investments in the joint ventures using the equity method. Under the equity method, the Company records its pro-rata share of joint venture income or losses and adjusts the basis of its investment accordingly. The Company's investment in China, BOMAY, did not commence operation until early 2007 and, therefore, no amounts were reflected for its operating activities until the second quarter of 2007.

Table of Contents

THE NINE AND THREE MONTHS ENDED SEPTEMBER 30, 2008 AS COMPARED WITH THE NINE AND THREE MONTHS ENDED SEPTEMBER 30, 2007

OVERALL RESULTS OF OPERATIONS

The 2007 reporting period with respect to the operations of American Access Technologies segment for this report consists solely from the date of the Merger, May 15, 2007 through September 30, 2007.

Consolidated comparison of the nine months ended September 30, 2008 and 2007 (in thousands of dollars).

Revenues and Gross Profit. Total consolidated net sales increased \$9,185.8 or 23.4%, to \$48,377.6 for the nine months ended September 30, 2008 over the comparable period in 2007. The increase occurred across all segments as E&I Construction (E&I), Technical Products and Services (TP&S) and American Access Technologies (AAT) reflected increases of \$3,698.4, \$2,757.7, and \$2,729.7, respectively. The AAT increase is attributable to the merger on May 15, 2007, as the results of operations do not include results prior to that date. The two hurricanes that struck the Gulf Coast in September, 2008 caused sales delays of approximately \$2,500.0.

Consolidated cost of sales for the nine months ended September 30, 2008 was \$42,441.6, an increase of \$7,978.9, or 23.1 %, over the prior year period. The increase in cost of sales is primarily due to increases in net sales over the prior year period. Cost of goods sold, as a percentage of revenues, was 87.8%, a decline of 0.17% from the prior year period. Improvements in cost of good sold percentages in the TP&S segment (.93%) were offset by deterioration in the E&I Construction segment (1.70%). E&I results in 2008 were negatively impacted by the further completion of the lower margin new school construction projects.

Consolidated gross profit during the nine month period ended September 30, 2008 increased by \$1,206.9 to \$5,936.1 as compared to \$4,729.1 in 2007. The increase in consolidated gross margin is a result, primarily, of the increased sales levels. The gross margin percentage for the nine month period was 12.2% as compared to 12.1% for the comparable period in 2007. This improvement is primarily due to two contracts completed in 2007 that incurred cost overruns of \$0.6 million. Gross margins in 2008 were impacted negatively by 3.0% due to its remaining backlog in new school electrical contracting. The Company will have \$1.3 million in new school construction backlog as of the end of this year.

Selling, General and Administrative Expenses. Total consolidated selling, general and administrative expenses were \$6,114.6 during the nine month period ended September 30, 2008, an increase of \$2,002.3 from the prior year period. The increase is primarily attributable to the additional expenses associated with the consolidation of AAT's results (\$664.3) as well as increased selling expenses (\$261.8), increased incentive compensation accruals (\$162.5), and compensation associated with management and support staff additions (\$223.2). The enterprise resource system implemented in 2007 resulted in \$84.6 additional cost in 2008. The other cost increases (\$567.3) primarily relate to expenses associated with being a public company.

Other Income and Expense. Consolidated other income and expense declined by \$722.4 from the prior year period reflecting the net increase of \$387.6 equity income from joint ventures offset by a decrease in realized gains of \$1,022.2 on marketable securities. The increase in equity income relates to the Chinese joint venture that commenced operations in early 2007. The joint venture paid a dividend of \$1,014.0 to AETI in July, 2008. All of the Company's investment in marketable securities was disposed of in 2007.

Table of Contents

Provision for Income Taxes. Income tax expense declined by \$515.4 as compared to the prior year due to the decline in earnings before income taxes. The effective tax rate of 37% was slightly higher than the prior year due to a lower estimate of deemed foreign tax credits in the current period.

Net Income. Net income for the nine months ended September 30, 2008 was \$731.9, a decrease of \$1,001.8 as compared to \$1,733.7 for the prior year period. The decrease in net income is a reflection of lower income before income taxes and slightly higher income tax expense during the third quarter of 2008. As noted above, the decline in income is substantially attributable to the non-recurring realized gain from security sales during 2007.

Consolidated comparison of the three months ended September 30, 2008 and 2007 (in thousands of dollars).

Revenues and Gross Profit. Total consolidated net sales increased \$1,710.2 or 13.0%, to \$14,827.6 for the three months ended September 30, 2008 over the comparable period in 2007. The increase occurred due to AETI's TP&S segment. The E&I Construction and AAT segments were essentially flat. The Company estimates that its revenues were negatively impacted by \$2,500.0 as a result of the two hurricanes that struck the Gulf Coast in September 2008.

Consolidated cost of sales for the three months ended September 30, 2008 was \$13,362.9, a \$1,778.6 increase, or 15.4%, over the third quarter of 2007. The increase in cost of sales is primarily due to the additional sales referred to above and increases in labor, material and related costs associated with the higher sales activity. Cost of sales, as a percentage of net sales

increased from 88.3 to 90.1% which primarily relates to cost overruns in the new school construction business. The Company's 2008 gross profits were negatively impacted by the continuation of indirect costs associated with the sales delays occasioned by the hurricanes.

Consolidated gross profit during the three-month period ended September 30, 2008 decreased by \$67.8. This decrease is related to the cost overruns cited above related to the new school construction business (\$414.0) partially offset by improved margins in the TP&S segment. Consolidated gross profit as a percent of net sales was 9.8% during the three-month period, compared to 11.7% in the prior year and this slight deterioration is related to the overall percentage cost increase noted above. Gross profit percentages in the TP&S segment increased and AAT and E&I Construction reported declines. The Company expects prospective overall margins to improve, particularly due to the reduced sales from the new school construction market.

Selling, General and Administrative Expenses. Total consolidated selling, general and administrative expenses were \$1,921.1 during the three-month period ended September 30, 2008, an increase of \$245.5 from the prior year period. This increase is principally attributable to increased selling expenses (\$51.0) as well as increased management and support staff salaries (\$10.0) and additional provisions for performance-based compensation (\$36.0). Additional increases occurred due to Sarbanes Oxley compliance (\$50.0), severance costs (\$45.0), additional costs associated with the ERP system maintenance (\$56.0) and safety training expense (\$8.0). The 2007 period benefitted from a favorable adjustment to the Company's medical benefit reserve (\$16.0).

Table of Contents

Other Income and Expense. Consolidated other income and expense decreased by \$141.3 due to the decrease of \$121.4 in equity in joint venture income, primarily due to reduced earnings in Singapore and lower realized gains on sale of marketable securities (\$59.8), partially offset by job training credits(\$20).

Provision for Income Taxes. The consolidated income tax expense was substantially reduced because of the reduction in earnings before income taxes as explained above. The slight increase in the effective tax rate to 37% is due to a decrease in the estimated credits from deemed foreign income taxes because of reduced earnings from the Singapore affiliate.

Net Income. Net income for the three months ended September 30, 2008 was \$13.1 compared to \$309.4 for the prior year period. The decrease in net income is primarily attributable to the higher cost of goods sold, increased selling, general and administrative expenses, lower other income partially offset by reduced taxes on income.

SEGMENT COMPARISON:

Technical Products and Services. The TP&S segment revenues increased \$1,783.8 from \$6,037.7 for the third quarter of 2007 to \$7,821.5 for the third quarter of 2008. The 29.5% increase in revenues for this segment reflects consistent demand for the company's products and services as well as a \$5 million marine propulsion contract which contributed an additional \$2 million to quarterly revenues.

Gross profits for the TP&S segment for the third quarter of 2008 were \$912.1, an increase of \$423.4 over the prior year level of \$488.7 due primarily to the revenue impact noted above as well as an improvement in the gross margin percentage of 3.5%. Technical Products & Services income before taxes for the third quarter of 2008 was \$657.6, an increase of \$96.7 over 2007 of \$560.9 due to the increased gross profit offset by reduced equity income and increased corporate overhead allocations.

The backlog for the TP&S segment was approximately \$15.9 million as of September 30, 2008, an increase of approximately \$0.6 million since December 31, 2007. Approximately three quarters of this backlog should be realized in revenues for the remainder of the fiscal year.

Electrical & Instrumentation Construction. The E&I segment reported sales of \$4,945.3 in the third quarter of 2008, an increase of \$37.0 over the third quarter of 2007. The moderation in rate of increase from prior quarters was due to working down the backlog in the new school electrical projects. Increases in the wastewater treatment plant business were offset by a decline in the marine market.

Gross profits for the E&I segment during the third quarter of 2008 were \$127.2, a \$371.1 decline from the prior year. The reduced gross profit is attributable to the \$414.0 decrease in gross profits from the new school construction market. The gross profit percentage declined from 10.1% to 2.6% during the current year quarter due to the unfavorable performance in the new school sector.

Table of Contents

The E&I segment loss before taxes for the third quarter of 2008 was \$261.3, a decline of \$431.6 from 2007. This occurred primarily due to the reduced gross profits explained above.

The backlog for the E&I segment was approximately \$8.9 million as of September 30, 2008, a decrease of \$9.8 million since the beginning of the year. Approximately one half of this backlog should be realized in revenues for the remainder of the fiscal year. The substantial decline in backlog is attributable to completion of most of the work in the new school construction market that the company plans to finalize during the early part of 2009.

American Access Technologies. The American Access segment sales declined \$110.6 from the comparable prior year reporting period for this quarter primarily due to a reduction in custom fabrication associated with the general economic slowdown. Much of this decline was offset by improved sales to value-added manufacturing customers. Gross profits declined by 120.2 due to the decline in sales and a reduced gross profit. The reduced gross profit percentage is associated with higher direct utility costs and increased indirect expenses as a percentage of sales. Income before income taxes declined \$103.8 due to reduction in gross profits partially offset by lower overall corporate overheads. The segment has been able to replace some weakness in its custom fabrication market with improvements in contract fabrication and patented zone cabling products.

LIQUIDITY AND CAPITAL RESOURCES

As of September 30, 2008, AETI's cash and cash equivalents were \$799.5 compared to \$593.5 as of December 31, 2007. As of September 30, 2008, AETI had outstanding borrowings of \$4,000 under its revolving credit facility or \$1 million lower than the balance as of December 31, 2007. Net current assets were approximately \$13,764.8 and \$14,178.8 as of September 30, 2008 and December 31, 2007, respectively. As of September 30, 2008, AETI's current ratio and long term debt to total capitalization ratios were 2.4 and 20.1%, respectively. The comparable ratios at December 31, 2007 were 2.4 and 19.1%.

AETI's long term debt as of September 30, 2008 was \$4,550.7, on which interest payments are current. This amount includes the long term portion of a capitalized lease obligation described in the financial statement notes. AETI amended its revolving credit facility, effective June 30, 2008 to, amongst other things, increase the line to \$10,000 and extend the maturity date to June 30, 2010.

Operating Activities

During the nine months ending September 30, 2008, AETI generated cash flows from operations of \$573.7 as compared to utilization of \$4,562.4 in 2007. Operating cash flow from net income and depreciation was essentially offset by the equity income from joint ventures in 2008. Reduced accounts receivable and prepaid expenses and increased income tax payable and accounts payable and accrued liabilities were partially offset by decreased net milestone billings and increased inventories. The 2007 period can be explained by the same factors except that \$1,022.2 in 2007 income was occasioned by a nonoperating sale of marketable securities. In addition, accounts receivable and inventories reflected large increases partially offset by increased accounts payable and net milestone billings.

Table of Contents

Investing Activities

During the nine months ending September 30, 2008, the Company generated \$668.1 in cash from net investing activities compared to utilization of \$438.5 in 2007. In 2008, capital expenditures have been \$533.2 which is comprised primarily of maintenance capital. The Company received \$1,193.8 in dividends from its joint ventures of which \$1,014 came from the China affiliate. Investing activities do not include the \$681.7 in machinery acquired for AAT that was financed through a finance lease.

In 2007, the Company made its final capital contribution to the Chinese joint venture in the amount of \$1,033.0 funded by proceeds from the sale of marketable securities of \$1,033.0. The Company invested \$947.1 in capital expenditures in 2007, received a dividend from Singapore of \$262.6 and received cash of \$84.8, net of merger costs relating to the merger with American Access Technologies, Inc.

Financing Activities

The Company acquired \$681.7 in plant machinery under a five year finance lease in 2008. The Company paid down \$1,046.2 in long term debt in 2008 and received \$10.3 in proceeds from issuance of common stock.

In 2007, AETI received \$245.7 from the exercise of employee stock options and borrowed \$4,000.0 under its revolving credit facility.

AETI has been able to generate cash flow from operations during 2008 due to increased focus on working capital management. This improvement, coupled with the dividend from its China joint venture enabled the Company to reduce its revolving credit balance outstanding by \$1,000. The Company believes its existing cash, working capital and unused credit facility combined with operating earnings will be sufficient to meet its working capital needs for the next twelve months.

Outlook for Fiscal 2008

The company's sales so far this year represent a 23 % increase over the comparable prior year period of which 9 % of that increase reflects the impact of the merger with AAT. Management expects that sales will exceed \$63 million for the year and that full year profitability will reflect a substantial improvement over 2007. AETI expects recent improvements in margins to continue, particularly in light of the reduced exposure to the new school construction market.

Operations have been impacted to a minor degree due to supplier delivery delays, particularly in the TP&S business. Inflationary pressure on raw materials and components has moderated recently in the face of the turmoil in the global financial markets. Although the Company has not experienced any decline in its backlog as a result of the recent volatility in the financial and commodity markets, management does believe that a slowdown in economic activity is likely and accordingly has recently initiated action plans to reduce base costs and conserve working capital. The Company believes these actions will sustain its strong financial position in the future without negatively impacting growth opportunities. Moreover, management believes that traditional energy and Chinese markets will moderate but remain healthy and that alternative energy markets will continue to be promising. Accordingly, the Company's recent product development commitments to these markets will continue.

Table of Contents

AAT's sales levels have remained relatively stable during the last year as declines in custom fabricating markets have been offset by increases in its contract manufacturing and patented zone cabling markets.

Effects of Inflation

AETI has experienced significant price increases in its crucial raw materials, particularly copper, steel, aluminum and electrical components since the beginning of 2005. At this point, the Company has been generally successful in recovering these increases from its customers in the form of increased prices. As a result, the Company has not experienced margin erosion due to inflationary pressures. We cannot be assured that the competitive environment will enable us to recover these cost increases in the future.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Interest Rates

Our market risk sensitive instruments do not subject us to material risk exposures. Our revolving credit facility remains available through June 30, 2010, subject to optional prepayment in accordance with its terms. At September 30, 2008, the Company had \$4,000,000 of variable-rate debt outstanding. At this borrowing level, a hypothetical 10 percent increase in interest rates would have had an insignificant unfavorable impact on the Company's pretax earnings and cash flows. The primary interest rate exposure on floating-rate debt is based on LIBOR (5.07% at September 30, 2008) plus 1.75% per year. The agreement is collateralized by trade accounts receivable, inventory and work-in-process.

Foreign Currency Transaction Risk

AETI maintains an investment in its Singapore joint venture, M&I Electric Far East PTE, Ltd. The functional currency of this joint venture is the Singapore dollar. The amount of its investment is translated into United States dollars at the exchange rate in effect at the end of each quarterly reporting period. The resulting translation adjustment is recorded as accumulated other comprehensive income in AETI's consolidated balance sheet.

The Company completed its investment of 16.0 million Yuan (approximately \$2.0 million) in its Chinese joint venture, BOMAY, in March, 2007. The functional currency of this joint venture is the Chinese Yuan. BOMAY's financial statements will be translated into United States dollars at the rate prevailing at the end of each quarterly reporting period and any resulting adjustment will be recorded as accumulated other comprehensive income in the Company's consolidated balance sheet. Under the terms of the Equity Joint Venture Contract, the Company was obligated to make a total investment of 16.0 million Yuan (approximately \$2.0 million) during the initial two years of the joint venture.

Other than the aforementioned items, the Company does not believe it is exposed to foreign currency exchange risk because all of its sales and purchases are denominated in United States dollars.

Table of Contents

Commodity Price Risk

The Company is subject to market risk from fluctuating market prices of certain raw materials. While such materials are typically available from numerous suppliers, commodity raw materials are subject to price fluctuations. We endeavor to recoup these price increases from our customers on an individual contract basis to avoid operating margin erosion. Although historically we have not entered into any contracts to hedge our commodity risk, we may do so in the future.

Commodity price changes can have a material impact on our prospective earnings and cash flows. Copper, steel and aluminum represent a significant element of our material cost. Significant increases in the prices of these materials can reduce our estimated operating margins if we are unable to recover such increases from customer revenues.

ITEM 4T. CONTROLS AND PROCEDURES

An evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer (CEO) and our Chief Financial Officer (CFO), of the effectiveness of our disclosure controls and procedures as of September 30, 2008. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective as of September 30, 2008.

No change in internal control over financial reporting occurred during the quarter ended September 30, 2008 that has materially affected, or is reasonably likely to materially affect internal control over financial reporting.
