2. Accounting policies specifically applied for quarterly consolidated financial statements

(a) Income taxes

Honda computes interim income tax expense (benefit) by multiplying reasonably estimated annual effective tax rate, which includes the effects of deferred taxes, by year-to-date income before income taxes and equity in income of affiliates for the fiscal first quarter ended June 30, 2010. If a reliable estimate cannot be made, Honda utilizes the actual year-to-date effective tax rate.

3. Changes in accounting procedures for consolidated quarterly financial results

(a) Transfers of Financial Assets, and Consolidation of Variable Interest Entities

Honda adopted Accounting Standards Update (ASU) 2009-16 Accounting for Transfers of Financial Assets, and ASU 2009-17 Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities, effective April 1, 2010. These standards amend the FASB Accounting Standards Codification (ASC) 860 Transfers and Servicing, and ASC 810 Consolidation. ASU 2009-16 removes the concept of a qualifying special purpose entity (QSPE) and removes the exception from applying consolidation accounting standards to QSPEs. ASU 2009-17 requires reporting entities to evaluate former QSPEs for consolidation, changes the approach to determining a variable interest entity's primary beneficiary from a mainly quantitative assessment to an exclusively qualitative assessment designed to identify a controlling financial interest, and increases the frequency of required reassessments to determine whether a company is the primary beneficiary of a variable interest entity.

Upon the adoption of these standards, former 10 QSPEs treated as legacy off-balance sheet prior to the year ended March 31, 2010 were consolidated by the Company as of April 1, 2010. As a result, previously derecognized assets held by former QSPEs including finance subsidiaries receivables of JPY 282,353 million and their related secured debt of JPY 274,329 million were included in the Company's consolidated balance sheet as of April 1, 2010. The assets and liabilities associated with former legacy off-balance sheet securitizations including retained interests in securitizations and servicing assets were removed from the Company's consolidated balance sheet from April 1, 2010. The cumulative effect adjustment upon the adoption of these standards increased the Company's beginning retained earnings for the three months ended June 30, 2010 by JPY 1,432 million, net of tax effect.

Due primarily to this accounting treatment, net income attributable to Honda Motor Co., Ltd. is now expected to exceed the forecast announced on April 28, 2010.
