Flaherty & Crumrine PREFERRED SECURITIES INCOME FUND INC Form N-30B-2 October 28, 2013 FLAHERTY & CRUMRINE PREFERRED SECURITIES INCOME FUND

To the Shareholders of Flaherty & Crumrine Preferred Securities Income Fund:

Total return on net asset value ( NAV was -4.7% during the third fiscal quarter<sup>2</sup>, reducing total return on NAV fiscal year-to-date to +3.0%. In addition, during the quarter the Fund, like many other closed-end income-oriented funds, saw the relationship between its market price and NAV swing from a premium to a discount, resulting in total return on market value of -3.2%. Clearly, this represented a setback in what had been a sustained period of positive returns in both the Fund s NAV and market valuation. During the quarter, prices of all fixed-income securities, including preferred securities, declined and yields increased as markets reacted swiftly to expectations that the Federal Reserve might taper its quantitative easing earlier than anticipated.

Virtually all sectors of the fixed-income market turned in negative results during the quarter. U.S. Treasury 10-year notes and 30-year bonds experienced the largest declines with total returns of -4.6% and -6.5%, as their yields increased by 0.7% and 0.4%, respectively. Long-term corporate bonds performed moderately better than long-term U.S. Treasuries, with a total return of -4.7% for the Barclays Long U.S. Corporate Bond Index. Even including the impact of expenses and leverage, the Fund s NAV performed as well as *unlevered* total returns on those other long-term segments of fixed-income markets.

The quarter began with the Federal Open Market Committee (FOMC) having just indicated that it might begin tapering the pace of its program of securities purchases sooner than the market was expecting. Longer-term interest rates moved higher with a fair amount of consistency throughout the quarter, as markets digested the news and adjusted expectations for future monetary policy actions. Markets are driven by *expectations* more than actual results, and while we believe the market priced in more risk than was justified based on the outlook for growth in the U.S. economy, uncertainty surrounding a potential change in policy outlook led investors to reduce portfolio duration substantially. At its September meeting, the FOMC surprised the market yet again by continuing its program of securities purchases without tapering its pace. Since then, we have seen some recovery in fixed-income markets. Although we do not expect long-term Treasury rates to decline significantly, interest-rate risk premiums still appear high, providing investors with some protection against eventual removal of highly accommodative monetary policy.

The preferred securities market was not immune to the change in outlook for interest rates and a desire by many investors to reduce duration in their portfolios. In many cases, spreads on preferred securities widened relative to Treasuries, adding to price declines already associated with higher rates. Retail preferred securities were particularly weak as we witnessed meaningful reductions in the sizes of preferred-securities exchange-traded funds which had grown in size to represent about 9% of the retail market at the beginning of this quarter. Preferred securities issued in the early part of the year, most with very low coupons, were among the worst performers. Fortunately, we weren t tempted by many of those new issues much preferring the higher coupons available in the secondary market. Institutional preferred securities fared much better, and as they have a larger allocation in the portfolio they were partially responsible for limiting negative returns during the quarter.

<sup>&</sup>lt;sup>1</sup> Following the methodology required by the SEC, total return assumes dividend reinvestment and includes income and principal change, plus the impact of the Fund s leverage and expenses.

<sup>&</sup>lt;sup>2</sup> June 1st August 3st.

Creditworthiness of most preferred-securities issuers continues to improve. Corporate earnings are growing at a moderate pace and corporate leverage remains low. Banks problem loans are declining, capital levels are healthy (especially in the U.S.) and new lending is slowly picking up. Rising home prices are bolstering consumer balance sheets and trimming foreclosure losses. These favorable credit developments should continue to benefit preferred securities.

While prices have fallen, market conditions for preferred securities remain healthy. Higher interest rates and wider spreads have resulted in a material slowdown in issuer redemptions. For the year, redemptions are still running ahead of new supply, with the preferred-securities market shrinking more than \$10 billion, but the pace of redemptions slowed significantly this past quarter with the Fund seeing approximately 90% of its redemptions this fiscal year occurring during the first half. This recent slowdown in issuer redemptions has been welcome news on the income side of the equation, as the Fund is able to keep more of the higher-coupon preferred securities longer than we expected earlier in the year.

After a long wait, we now have largely final rules on the regulatory treatment of preferred securities issued by banks, foreign and domestic. Crafted in response to the financial crisis, new legislation and regulations shift loss burdens towards investors and away from taxpayers (government support). Under the new rules, banks will have an incentive to replace debt-like preferred securities with ones that have more characteristics of equity (deeper subordination, non-cumulative dividends, and no maturity date). The new rules include various implementation schedules, depending on the jurisdiction, with most being fully implemented within the next 3-8 years.

To conform to the new rules, we estimate U.S. banks will need to issue an additional \$60 billion or more of new preferred stock. That is certainly a big number compared to \$73 billion of currently outstanding bank preferred stock. While we think issuance will be manageable and spread out over several years, it will influence preferred securities prices when it happens. We are also likely to see more contingent capital issued in the coming years, as issuers look to fill different buckets of loss-absorbing capital required under the new rules. This market has so far been limited in size and breadth, but it is likely to grow and is part of the ongoing evolution of the broader subordinated capital market.

Looking ahead, moderate economic growth should provide a constructive environment for preferred-securities investors. We anticipate that economic growth will be fast enough to facilitate continued improvement in corporate and household balance sheets and better loan performance, while being slow enough to restrain inflation and keep monetary policy accommodative for some time. Spreads on preferred securities should recover as fears of further rapid increases in long-term interest rates recede and investors refocus on steadily improving credit

conditions. Volatility is likely to remain elevated over the coming months, but we believe the preferred-securities market has priced	ın a
amount of risk related to the end of quantitative easing.	

As always, we encourage you to visit the Fund s websitewww.preferredincome.com.

Sincerely,

Donald F. Crumrine Robert M. Ettinger

Chairman President

- \* Securities eligible for the Dividends Received Deduction and distributing Qualified Dividend Income.
- \*\* Securities distributing Qualified Dividend Income only.
- \*\*\* Aggregate cost of securities held.
- \*\*\*\* Securities exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional buyers. At August 31, 2013, these securities amounted to \$281,147,603 or 23.1% of total managed assets.
- (1) All or a portion of this security is pledged as collateral for the Fund s loan. The total value of such securities was \$738,828,682 at August 31, 2013.
- All or a portion of this security has been rehypothecated. The total value of such securities was \$400,616,610 at August 31, 2013.
- (3) Foreign Issuer.
- (4) Illiquid.
- (5) Valued at fair value as determined in good faith by or under the direction of the Board of Directors as of August 31, 2013.
- (6) Represents the rate in effect as of the reporting date.
  - Non-income producing.

The issuer has filed for bankruptcy protection. As a result, the Fund may not be able to recover the principal invested and also does not expect to receive income on this security going forward.

The percentage shown for each investment category is the total value of that category as a percentage of total managed assets.

August 30, 2013	0.1360	18.21	17.85	18.08	

<sup>(1)</sup> Whenever the net asset value per share of the Fund s Common Stock is less than or equal to the market price per share on the reinvestment date, new shares issued will be valued at the higher of net asset value or 95% of the then current market price. Otherwise, the reinvestment shares of Common Stock will be purchased in the open market.

## **NOTES TO FINANCIAL STATEMENTS (Unaudited)**

## 1. Aggregate Information for Federal Income Tax Purposes

At August 31, 2013, the aggregate cost of securities for federal income tax purposes was \$1,184,399,771, the aggregate gross unrealized appreciation for all securities in which there is an excess of value over tax cost was \$90,775,278 and the aggregate gross unrealized depreciation for all securities in which there is an excess of tax cost over value was \$73,585,852.

#### 2. Additional Accounting Standards

Fair Value Measurements: The Fund has performed an analysis of all existing investments and derivative instruments to determine the significance and character of all inputs to their fair value determination. The levels of fair value inputs used to measure the Fund s investments are characterized into a fair value hierarchy. Where inputs for an asset or liability fall into more than one level in the fair value hierarchy, the investment is classified in its entirety based on the lowest level input that is significant to that investment s valuation. The three levels of the fair value hierarchy are described below:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Funds own assumptions in determining the fair value of investments). The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Transfers in and out of levels are recognized at market value at the end of the period. A summary of the inputs used to value the Funds investments as of August 31, 2013 is as follows:

	Total Value at August 31, 2013	Level 1 Quoted Price	Level 2 Significant Observable Inputs	Level 3 Significant Unobservable Inputs
Preferred Securities				
Banking	\$ 424,831,228	\$ 314,743,781	\$ 110,034,797	\$ 52,650
Financial Services	25,009,729	15,889,080	9,120,649	
Insurance	344,845,356	220,119,819	124,725,537	
Utilities	196,586,540	62,612,886	133,973,654	
Energy	57,609,811	55,744,811	1,865,000	
Real Estate Investment Trust (REIT)	36,978,028	36,978,028		
Miscellaneous Industries	21,703,963	1,835,000	19,868,963	
Corporate Debt Securities	88,304,279	37,194,094	50,510,454	599,731
Common Stock				
Banking	2,620,404	2,620,404		
Insurance	245,389	245,389		
Utilities	1,369,916	1,369,916		
Money Market Fund	1,484,554	1,484,554		

Total Investments \$1,201,589,197 \$750,837,762 \$450,099,054 \$652,381

# NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

During the reporting period, there were no transfers into Level 1 from Level 2. During the reporting period, securities with an aggregate market value of \$19,631,128 were transferred into Level 2 from Level 1. The securities were transferred because of a reduction in the amount of observable market data, resulting from: a decrease in market activity for the securities, reduced availability of quoted prices for the securities, or de-listing of securities from a national securities exchange that resulted in a material decrease in activity.

The fair values of the Funds investments are generally based on market information and quotes received from brokers or independent pricing services approved by the Board and unaffiliated with the Adviser. To assess the continuing appropriateness of security valuations, management, in consultation with the Adviser, regularly compares current prices to prior prices, prices across comparable securities, actual sale prices for securities in the Funds portfolio, and market information obtained by the Adviser as a function of being an active participant in the markets.

Securities with quotes that are based on actual trades or actionable bids and offers with a sufficient level of activity on or near the measurement date are classified as Level 1. Securities that are priced using quotes derived from implied values, indicative bids and offers, or a limited number of actual trades or the same information for securities that are similar in many respects to those being valued are classified as Level 2. If market information is not available for securities being valued, or materially-comparable securities, then those securities are classified as Level 3. In considering market information, management evaluates changes in liquidity, willingness of a broker to execute at the quoted price, the depth and consistency of prices from pricing services, and the existence of observable trades in the market.

The following is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

		Preferred S	ecurities		
	Total Investments	Banking	Financial Services	Corporate Del Securities	bt
Balance as of 11/30/12	\$ 8,136,116	\$ 67,050	\$ 7,541,170	\$ 527,890	6
Accrued discounts/premiums					
Realized gain/(loss)	(33,773,383)	(28,731,250)	(5,042,133)		
Change in unrealized appreciation/(depreciation)	34,581,367	28,716,850	5,792,682	71,835	5
Purchases					
Sales	(8,291,719)		(8,291,719)		
Transfer in					
Transfer out					
Balance as of 8/31/13	\$ 652,381	\$ 52,650	\$	\$ 599,73	1

For the nine months ended August 31, 2013 total change in unrealized gain/(loss) on Level 3 securities still held at period-end and included in the change in net assets was \$71,835.

## **NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)**

The following table summarizes the valuation techniques used and unobservable inputs developed to determine the fair value of Level 3 investments:

Category	Fair Value at 8/31/13				Valuation Technique	Unobservable Input	Input Range (Wgt Avg)	
Preferred Securities								
Banking	\$	52,650	Bankruptcy recovery	Credit/Structure-specific recovery	0.00% - 0.50% (0.15%)			
Corporate Debt								
Securities		599,731	Bankruptcy recovery	Credit/Structure-specific recovery	10% - 20% (13%)			

The significant unobservable inputs used in the fair value measurement technique for bankruptcy recovery are based on recovery analysis that is specific to the security being valued, including the level of subordination and structural features of the security, and the current status of any bankruptcy or liquidation proceedings. Observable market trades in bankruptcy claims are utilized by management, when available, to assess the appropriateness of valuations, although the frequency of trading depends on the specific credit and seniority of the claim. Expected recoveries in bankruptcy by security type and industry do not tend to deviate much from historical recovery rates, which are very low (sometimes zero) for preferred securities and more moderate for senior debt. Significant changes in these inputs would result in a significantly higher or lower fair value measurement.
