SECURITY VALUATION The net asset value of the Fund is determined daily as of the close of regular trading on the New York Stock Exchange, Inc. (the Exchange) on each day the Exchange is open for business. The valuations for fixed income securities (which may include, but are not limited to, corporate, government, municipal, mortgage-backed, collateralized mortgage obligations and asset-backed securities) and certain derivative instruments are typically the prices supplied by independent third party pricing services, which may use market prices or broker/dealer quotations or a variety of valuation techniques and methodologies. The independent third party pricing services use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar securities. Structured note agreements are valued in accordance with a dealer-supplied valuation based on changes in the value of the underlying index. Forward contracts are valued at the London closing spot rates and the London closing forward point rates on a daily basis. The currency forward contract pricing model derives the differential in point rates to the expiration date of the forward and calculates its present value. Equity securities for which market quotations are available are valued at the last reported sales price or official closing price on the primary market or exchange on which they trade. The Fund may utilize a service provided by an independent third party which has been approved by the Board of Trustees (the Board) to fair value certain securities. When fair value pricing is employed, the prices of securities used by the Fund to calculate its net asset value may differ from quoted or published prices for the same securities. If independent third party pricing services are unable to supply prices for a portfolio investment, or if the prices supplied are deemed by the investment adviser to be unreliable, the market price may be determined by the investment adviser using quotations from one or more broker/dealers or at the transaction price if the security has recently been purchased and no value has yet been obtained from a pricing service or pricing broker. When reliable prices are not readily available, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its net asset value, the Fund values these securities as determined in accordance with procedures approved and established by the Board.

The Fund uses valuation techniques to measure fair value that are consistent with the market approach and/or income approach, depending on the type of security and the particular circumstance. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable securities. The income approach uses valuation techniques to discount estimated future cash flows to present value.

Accounting principles generally accepted in the United States of America (GAAP) established a disclosure hierarchy that categorizes the inputs to valuation techniques used to value assets and liabilities at each measurement date. These inputs are summarized in the three broad levels listed below:

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodologies used to value securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of January 31, 2015 in valuing the Fund's assets and liabilities carried at fair value:

Assets	Level 1	Level 2	Level 3	Total
Investments in Securities				
Corporate Bonds	\$	\$ 343,428,392	\$ 3,592	\$ 343,431,984
Bank Loans		62,004,111	6,241,300	68,245,411

Other Financial Instruments*				
Forward Foreign Currency Contracts	\$	\$ 409,307	\$	\$ 409,307

¹ Included a zero valued security.

* Other financial instruments include unrealized appreciation (depreciation) on Forward Foreign Currency Contracts. The following is a reconciliation of investments as of January 31, 2015 in which significant unobservable inputs were used in determining value. Transfers in or out of Level 3 represent the end of the period value of any security or instrument where a change in the level has occurred from the beginning to the end of the period.

The Fund follows Financial Accounting Standards Board (FASB) amendments to authoritative guidance which requires the Fund to disclose details of transfers in and out of Level 1 and Level 2 measurements and Level 2 and Level 3 measurements and the reasons for the transfers. For the quarter ended January 31, 2015 there were no transfers in and out of Level 1 and Level 2, but there were \$1,450,000 transferred out from Level 2 to Level 3, due to lack of observable market data because of decrease in market activity. All transfers are assumed to occur at the end of the reporting period.
