ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended September 26, 2015

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-36743

Apple Inc.

(Exact name of Registrant as specified in its charter)

California
(State or other jurisdiction of incorporation or organization)

94-2404110
(I.R.S. Employer Identification No.)

1 Infinite Loop

Cupertino, California
(Address of principal executive offices)

95014
(Zip Code)

(408) 996-1010

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Common Stock, \$0.00001 par value per share	The NASDAQ Stock Market LLC
1.000% Notes due 2022	New York Stock Exchange LLC
1.625% Notes due 2026	New York Stock Exchange LLC
3.05% Notes due 2029	New York Stock Exchange LLC
3.60% Notes due 2042	New York Stock Exchange LLC
1.375% Notes due 2024	New York Stock Exchange LLC
2.000% Notes due 2027	New York Stock Exchange LLC
(Title of class)	(Name of exchange on which registered)
Securities registered pursuant to Section 12(g) of the Act: None	

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Edgar Filing: APPLE INC - Form 10-K

Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files).

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of the Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes No

The aggregate market value of the voting and non-voting stock held by non-affiliates of the Registrant, as of March 27, 2015, the last business day of the Registrant's most recently completed second fiscal quarter, was approximately \$709,923,000,000. Solely for purposes of this disclosure, shares of common stock held by executive officers and directors of the Registrant as of such date have been excluded because such persons may be deemed to be affiliates. This determination of executive officers and directors as affiliates is not necessarily a conclusive determination for any other purposes.

5,575,331,000 shares of common stock were issued and outstanding as of October 9, 2015.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Registrant's definitive proxy statement relating to its 2016 annual meeting of shareholders (the 2016 Proxy Statement) are incorporated by reference into Part III of this Annual Report on Form 10-K where indicated. The 2016 Proxy Statement will be filed with the U.S. Securities and Exchange Commission within 120 days after the end of the fiscal year to which this report relates.

Table of Contents

This Annual Report on Form 10-K (Form 10-K) contains forward-looking statements, within the meaning of the Private Securities Litigation Reform Act of 1995, that involve risks and uncertainties. Many of the forward-looking statements are located in Part II, Item 7 of this Form 10-K under the heading Management's Discussion and Analysis of Financial Condition and Results of Operations. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Forward-looking statements can also be identified by words such as future, anticipates, believes, estimates, expects, intends, will, would, could, can, may, and similar terms. Forward-looking statements are not guarantees of future performance and the Company's actual results may differ significantly from the results discussed in the forward-looking statements. Factors that might cause such differences include, but are not limited to, those discussed in Part I, Item 1A of this Form 10-K under the heading Risk Factors, which are incorporated herein by reference. All information presented herein is based on the Company's fiscal calendar. Unless otherwise stated, references to particular years, quarters, months or periods refer to the Company's fiscal years ended in September and the associated quarters, months and periods of those fiscal years. Each of the terms the Company and Apple as used herein refers collectively to Apple Inc. and its wholly-owned subsidiaries, unless otherwise stated. The Company assumes no obligation to revise or update any forward-looking statements for any reason, except as required by law.

PART I**Item 1. Business****Company Background**

The Company designs, manufactures and markets mobile communication and media devices, personal computers and portable digital music players, and sells a variety of related software, services, accessories, networking solutions and third-party digital content and applications. The Company's products and services include iPhone®, iPad®, Mac®, iPod®, Apple Watch®, Apple TV®, a portfolio of consumer and professional software applications, iOS, OS X® and watchOS operating systems, iCloud®, Apple Pay® and a variety of accessory, service and support offerings. In September 2015, the Company announced a new Apple TV, tvOS operating system and Apple TV App Store®, which are expected to be available by the end of October 2015. The Company sells and delivers digital content and applications through the iTunes Store®, App Store, Mac App Store, iBooks Store and Apple Music (collectively Internet Services). The Company sells its products worldwide through its retail stores, online stores and direct sales force, as well as through third-party cellular network carriers, wholesalers, retailers and value-added resellers. In addition, the Company sells a variety of third-party Apple compatible products, including application software and various accessories through its online and retail stores. The Company sells to consumers, small and mid-sized businesses and education, enterprise and government customers. The Company's fiscal year is the 52 or 53-week period that ends on the last Saturday of September. The Company is a California corporation established in 1977.

Business Strategy

The Company is committed to bringing the best user experience to its customers through its innovative hardware, software and services. The Company's business strategy leverages its unique ability to design and develop its own operating systems, hardware, application software and services to provide its customers products and solutions with innovative design, superior ease-of-use and seamless integration. As part of its strategy, the Company continues to expand its platform for the discovery and delivery of digital content and applications through its Internet Services, which allows customers to discover and download digital content, iOS, Mac and Apple Watch applications, and books through either a Mac or Windows-based computer or through iPhone, iPad and iPod touch® devices (iOS devices) and

Apple Watch. The Company also supports a community for the development of third-party software and hardware products and digital content that complement the Company's offerings. The Company believes a high-quality buying experience with knowledgeable salespersons who can convey the value of the Company's products and services greatly enhances its ability to attract and retain customers. Therefore, the Company's strategy also includes building and expanding its own retail and online stores and its third-party distribution network to effectively reach more customers and provide them with a high-quality sales and post-sales support experience. The Company believes ongoing investment in research and development (R&D), marketing and advertising is critical to the development and sale of innovative products and technologies.

Table of Contents**Business Organization**

The Company manages its business primarily on a geographic basis. In 2015, the Company changed its reportable operating segments as management began reporting business performance and making decisions primarily on a geographic basis, including the results of its retail stores in each respective geographic segment. Accordingly, the Company's reportable operating segments consist of the Americas, Europe, Greater China, Japan and Rest of Asia Pacific. The Americas segment includes both North and South America. The Europe segment includes European countries, as well as India, the Middle East and Africa. The Greater China segment includes China, Hong Kong and Taiwan. The Rest of Asia Pacific segment includes Australia and those Asian countries not included in the Company's other reportable operating segments. Although each reportable operating segment provides similar hardware and software products and similar services, they are managed separately to better align with the location of the Company's customers and distribution partners and the unique market dynamics of each geographic region. Further information regarding the Company's reportable operating segments may be found in Part II, Item 7 of this Form 10-K under the subheading Segment Operating Performance, and in Part II, Item 8 of this Form 10-K in the Notes to Consolidated Financial Statements in Note 11, Segment Information and Geographic Data.

Products*iPhone*

iPhone is the Company's line of smartphones based on its iOS operating system. iPhone includes Siri®, a voice activated intelligent assistant, and Apple Pay and Touch ID on qualifying devices. In September 2015, the Company introduced iPhone 6s and 6s Plus, featuring 3D Touch, which senses force to access features and interact with content and apps. iPhone works with the iTunes Store, App Store and iBooks Store for purchasing, organizing and playing digital content and apps. iPhone is compatible with both Mac and Windows personal computers and Apple's iCloud services, which provide synchronization across users' devices.

iPad

iPad is the Company's line of multi-purpose tablets based on its iOS operating system, which includes iPad Air® and iPad mini. iPad includes Siri and also includes Touch ID on qualifying devices. In September 2015, the Company announced the new iPad Pro, featuring a 12.9-inch Retina® display, which is expected to be available in November 2015. iPad works with the iTunes Store, App Store and iBooks Store for purchasing, organizing and playing digital content and apps. iPad is compatible with both Mac and Windows personal computers and Apple's iCloud services.

Mac

Mac is the Company's line of desktop and portable personal computers based on its OS X operating system. The Company's desktop computers include iMac®, 21.5" iMac with Retina 4K Display, 27" iMac with Retina 5K Display, Mac Pro® and Mac mini. The Company's portable computers include MacBook®, MacBook Air®, MacBook Pro® and MacBook Pro with Retina display.

*Operating System Software**iOS*

iOS is the Company's Multi-Touch operating system that serves as the foundation for iOS devices. Devices running iOS are compatible with both Mac and Windows personal computers and Apple's iCloud services. In September 2015,

the Company released iOS 9, which provides more search abilities and improved Siri features. iOS 9 also introduced new multitasking features designed specifically for iPad, including Slide Over and Split View, which allow users to work with two apps simultaneously, and Picture-in-Picture that allows users to watch a video while using another application.

OS X

OS X is the Company's Mac operating system and is built on an open-source UNIX-based foundation and provides an intuitive and integrated computer experience. Support for iCloud is built into OS X so users can access content and information from Mac, iOS devices and other supported devices and access downloaded content and apps from the iTunes Store. OS X El Capitan, released in September 2015, is the 12th major release of OS X and incorporates additional window management features, including Split View and the new Spaces Bar in Mission Control[®], which provides users an intuitive way to group applications.

Table of Contents

watchOS

watchOS is the Company's operating system for Apple Watch. Released in September 2015, watchOS 2 is the first major software update for Apple Watch, providing users with new features, including new watch faces, the ability to add third-party app information on watch faces, Time Travel, and additional communication capabilities in Mail, Friends and Digital Touch. watchOS 2 also gives developers the ability to build native apps for Apple Watch.

tvOS

In September 2015, the Company announced tvOS, its operating system for the new Apple TV, which is expected to be available at the end of October 2015. The tvOS operating system is based on the Company's iOS platform and will enable developers to create new apps and games specifically for Apple TV and deliver them to customers through the new Apple TV App Store.

Application Software

The Company's application software includes iLife®, iWork® and various other software, including Final Cut Pro®, Logic® Pro X and FileMaker® Pro. iLife is the Company's consumer-oriented digital lifestyle software application suite included with all Mac computers and features iMovie®, a digital video editing application, and GarageBand®, a music creation application that allows users to play, record and create music. iWork is the Company's integrated productivity suite included with all Mac computers and is designed to help users create, present and publish documents through Pages®, presentations through Keynote® and spreadsheets through Numbers®. The Company also has Multi-Touch versions of iLife and iWork applications designed specifically for use on iOS devices, which are available as free downloads for all new iPhones and iPads.

Services

Internet Services

The iTunes Store, available for iOS devices, Mac and Windows personal computers and Apple TV, allows customers to purchase and download music and TV shows, rent or purchase movies and download free podcasts. The App Store, available for iOS devices, allows customers to discover and download apps and purchase in-app content. The Mac App Store, available for Mac computers, allows customers to discover, download and install Mac applications. The iBooks Store, available for iOS devices and Mac computers, features e-books from major and independent publishers. Apple Music offers users a curated listening experience with on-demand radio stations that evolve based on a user's play or download activity and a subscription-based internet streaming service that also provides unlimited access to the Apple Music library. In September 2015, the Company announced the Apple TV App Store, which provides customers access to apps and games specifically for the new Apple TV.

iCloud

iCloud is the Company's cloud service which stores music, photos, contacts, calendars, mail, documents and more, keeping them up-to-date and available across multiple iOS devices, Mac and Windows personal computers and Apple TV. iCloud services include iCloud DriveSM, iCloud Photo Library, Family Sharing, Find My iPhone, Find My Friends, Notes, iCloud Keychain® and iCloud Backup for iOS devices.

AppleCare

AppleCare® offers a range of support options for the Company's customers. These include assistance that is built into software products, printed and electronic product manuals, online support including comprehensive product information as well as technical assistance, the AppleCare Protection Plan (APP) and the AppleCare+ Protection Plan (AC+). APP is a fee-based service that typically extends the service coverage of phone support, hardware repairs and dedicated web-based support resources for Mac, Apple TV and display products. AC+ is a fee-based service offering additional coverage under some circumstances for instances of accidental damage in addition to the services offered by APP and is available in certain countries for iPhone, iPad, Apple Watch and iPod.

Apple Pay

Apple Pay is the Company's mobile payment service available in the U.S. and U.K. that offers an easy, secure and private way to pay. Apple Pay allows users to pay for purchases in stores accepting contactless payments and to pay for purchases within participating apps on qualifying devices. Apple Pay accepts credit and debit cards across major card networks and also supports reward programs and store-issued credit and debit cards.

Table of Contents

Other Products

Accessories

The Company sells a variety of Apple-branded and third-party Mac-compatible and iOS-compatible accessories, including Apple TV, Apple Watch, headphones, displays, storage devices, Beats products, and various other connectivity and computing products and supplies.

Apple TV

Apple TV connects to consumers' TVs and enables them to access digital content directly for streaming high definition video, playing music and games, and viewing photos. Content from Apple Music and other media services are also available on Apple TV. Apple TV allows streaming digital content from Mac and Windows personal computers through Home Share and through AirPlay® from compatible Mac and iOS devices. In September 2015, the Company announced the new Apple TV running on the Company's tvOS operating system and based on apps built for the television. Additionally, the new Apple TV remote features Siri, allowing users to search and access content with their voice. The new Apple TV is expected to be available at the end of October 2015.

Apple Watch

Apple Watch is a personal electronic device that combines the watchOS user interface and technologies created specifically for a smaller device, including the Digital Crown, a unique navigation tool that allows users to seamlessly scroll, zoom and navigate, and Force Touch, a technology that senses the difference between a tap and a press and allows users to access controls within apps. Apple Watch enables users to communicate in new ways from their wrist, track their health and fitness through activity and workout apps, and includes Siri and Apple Pay.

iPod

iPod is the Company's line of portable digital music and media players, which includes iPod touch, iPod nano® and iPod shuffle®. All iPods work with iTunes to purchase and synchronize content. iPod touch, based on the Company's iOS operating system, is a flash-memory-based iPod that works with the iTunes Store, App Store and iBooks Store for purchasing and playing digital content and apps.

Developer Programs

The Company's developer programs support app developers with building, testing and distributing apps for iOS, Mac, Apple Watch and the new Apple TV. Developer program membership provides access to beta software, the ability to integrate advanced app capabilities (e.g., iCloud, Game Center and Apple Pay), distribution on the App Store, access to App Analytics, and code-level technical support. Developer programs also exist for businesses creating apps for internal use (the Apple Developer Enterprise Program) and developers creating accessories for Apple devices (the MFi Program). All developers, even those who are not developer program members, can sign in with their Apple ID to post on the Apple Developer Forums and use Xcode®, the Company's integrated development environment for creating apps for Apple platforms. Xcode includes project management tools; analysis tools to collect, display and compare app performance data; simulation tools to locally run, test and debug apps; and tools to simplify the design and development of user interfaces. All developers also have access to extensive technical documentation and sample code.

Markets and Distribution

The Company's customers are primarily in the consumer, small and mid-sized business, education, enterprise and government markets. The Company sells its products and resells third-party products in most of its major markets directly to consumers and small and mid-sized businesses through its retail and online stores and its direct sales force. The Company also employs a variety of indirect distribution channels, such as third-party cellular network carriers, wholesalers, retailers and value-added resellers. During 2015, the Company's net sales through its direct and indirect distribution channels accounted for 26% and 74%, respectively, of total net sales.

The Company believes that sales of its innovative and differentiated products are enhanced by knowledgeable salespersons who can convey the value of the hardware and software integration and demonstrate the unique solutions that are available on its products. The Company further believes providing direct contact with its targeted customers is an effective way to demonstrate the advantages of its products over those of its competitors and providing a high-quality sales and after-sales support experience is critical to attracting new and retaining existing customers.

To ensure a high-quality buying experience for its products in which service and education are emphasized, the Company continues to build and improve its distribution capabilities by expanding the number of its own retail stores worldwide. The Company's retail stores are typically located at high-traffic locations in quality shopping malls and urban shopping districts. By operating its own stores and locating them in desirable high-traffic locations the Company is better positioned to ensure a high quality customer buying experience and attract new customers. The stores are designed to simplify and enhance the presentation and marketing of the Company's products and related solutions. The retail stores employ experienced and knowledgeable personnel who provide product advice, service and training and offer a wide selection of third-party hardware, software and other accessories that complement the Company's products.

Table of Contents

The Company has also invested in programs to enhance reseller sales by placing high-quality Apple fixtures, merchandising materials and other resources within selected third-party reseller locations. Through the Apple Premium Reseller Program, certain third-party resellers focus on the Apple platform by providing a high level of product expertise, integration and support services.

The Company is committed to delivering solutions to help educators teach and students learn. The Company believes effective integration of technology into classroom instruction can result in higher levels of student achievement and has designed a range of products, services and programs to address the needs of education customers. The Company also supports mobile learning and real-time distribution of, and access to, education related materials through iTunes U, a platform that allows students and teachers to share and distribute educational media online. The Company sells its products to the education market through its direct sales force, select third-party resellers and its online and retail stores.

The Company also sells its hardware and software products to enterprise and government customers in each of its reportable operating segments. The Company's products are deployed in these markets because of their performance, productivity, ease of use and seamless integration into information technology environments. The Company's products are compatible with thousands of third-party business applications and services, and its tools enable the development and secure deployment of custom applications as well as remote device administration.

No single customer accounted for more than 10% of net sales in 2015, 2014 or 2013.

Competition

The markets for the Company's products and services are highly competitive and the Company is confronted by aggressive competition in all areas of its business. These markets are characterized by frequent product introductions and rapid technological advances that have substantially increased the capabilities and use of mobile communication and media devices, personal computers and other digital electronic devices. The Company's competitors that sell mobile devices and personal computers based on other operating systems have aggressively cut prices and lowered their product margins to gain or maintain market share. The Company's financial condition and operating results can be adversely affected by these and other industry-wide downward pressures on gross margins. Principal competitive factors important to the Company include price, product features (including security features), relative price and performance, product quality and reliability, design innovation, a strong third-party software and accessories ecosystem, marketing and distribution capability, service and support and corporate reputation.

The Company is focused on expanding its market opportunities related to personal computers and mobile communication and media devices. These markets are highly competitive and include many large, well-funded and experienced participants. The Company expects competition in these markets to intensify significantly as competitors attempt to imitate some of the features of the Company's products and applications within their own products or, alternatively, collaborate with each other to offer solutions that are more competitive than those they currently offer. These markets are characterized by aggressive pricing practices, frequent product introductions, evolving design approaches and technologies, rapid adoption of technological and product advancements by competitors and price sensitivity on the part of consumers and businesses.

The Company's digital content services have faced significant competition from other companies promoting their own digital music and content products and services, including those offering free peer-to-peer music and video services.

The Company's future financial condition and operating results depend on the Company's ability to continue to develop and offer new innovative products and services in each of the markets in which it competes. The Company believes it

offers superior innovation and integration of the entire solution including the hardware (iOS devices, Mac, Apple Watch and Apple TV), software (iOS, OS X, watchOS and tvOS), online services and distribution of digital content and applications (Internet Services). Some of the Company's current and potential competitors have substantial resources and may be able to provide such products and services at little or no profit or even at a loss to compete with the Company's offerings.

Supply of Components

Although most components essential to the Company's business are generally available from multiple sources, a number of components are currently obtained from single or limited sources. In addition, the Company competes for various components with other participants in the markets for mobile communication and media devices and personal computers. Therefore, many components used by the Company, including those that are available from multiple sources, are at times subject to industry-wide shortage and significant pricing fluctuations that could materially adversely affect the Company's financial condition and operating results.

Table of Contents

The Company uses some custom components that are not commonly used by its competitors, and the Company often utilizes custom components available from only one source. When a component or product uses new technologies, initial capacity constraints may exist until the suppliers' yields have matured or manufacturing capacity has increased. If the Company's supply of components were delayed or constrained, or if an outsourcing partner delayed shipments of completed products to the Company, the Company's financial condition and operating results could be materially adversely affected. The Company's business and financial performance could also be materially adversely affected depending on the time required to obtain sufficient quantities from the original source, or to identify and obtain sufficient quantities from an alternative source. Continued availability of these components at acceptable prices, or at all, may be affected if those suppliers concentrated on the production of common components instead of components customized to meet the Company's requirements.

The Company has entered into agreements for the supply of many components; however, there can be no guarantee that the Company will be able to extend or renew these agreements on similar terms, or at all. Therefore, the Company remains subject to significant risks of supply shortages and price increases that could materially adversely affect its financial condition and operating results.

While some Mac computers are manufactured in the U.S. and Ireland, substantially all of the Company's hardware products are currently manufactured by outsourcing partners that are located primarily in Asia. A significant concentration of this manufacturing is currently performed by a small number of outsourcing partners, often in single locations. Certain of these outsourcing partners are the sole-sourced suppliers of components and manufacturers for many of the Company's products. Although the Company works closely with its outsourcing partners on manufacturing schedules, the Company's operating results could be adversely affected if its outsourcing partners were unable to meet their production commitments. The Company's purchase commitments typically cover its requirements for periods up to 150 days.

Research and Development

Because the industries in which the Company competes are characterized by rapid technological advances, the Company's ability to compete successfully depends heavily upon its ability to ensure a continual and timely flow of competitive products, services and technologies to the marketplace. The Company continues to develop new technologies to enhance existing products and to expand the range of its product offerings through R&D, licensing of intellectual property and acquisition of third-party businesses and technology. Total R&D expense was \$8.1 billion, \$6.0 billion and \$4.5 billion in 2015, 2014 and 2013, respectively.

Patents, Trademarks, Copyrights and Licenses

The Company currently holds rights to patents and copyrights relating to certain aspects of its hardware devices, accessories, software and services. The Company has registered or has applied for trademarks and service marks in the U.S. and a number of foreign countries. Although the Company believes the ownership of such patents, copyrights, trademarks and service marks is an important factor in its business and that its success does depend in part on such ownership, the Company relies primarily on the innovative skills, technical competence and marketing abilities of its personnel.

The Company regularly files patent applications to protect innovations arising from its research, development and design, and is currently pursuing thousands of patent applications around the world. Over time, the Company has accumulated a large portfolio of issued patents around the world. The Company holds copyrights relating to certain aspects of its products and services. No single patent or copyright is solely responsible for protecting the Company's products. The Company believes the duration of its patents is adequate relative to the expected lives of its products.

Many of the Company's products are designed to include intellectual property obtained from third parties. It may be necessary in the future to seek or renew licenses relating to various aspects of its products, processes and services. While the Company has generally been able to obtain such licenses on commercially reasonable terms in the past, there is no guarantee that such licenses could be obtained in the future on reasonable terms or at all. Because of technological changes in the industries in which the Company competes, current extensive patent coverage and the rapid rate of issuance of new patents, it is possible that certain components of the Company's products, processes and services may unknowingly infringe existing patents or intellectual property rights of others. From time to time, the Company has been notified that it may be infringing certain patents or other intellectual property rights of third parties.

Foreign and Domestic Operations and Geographic Data

During 2015, the Company's domestic and international net sales accounted for 35% and 65%, respectively, of total net sales. Information regarding financial data by geographic segment is set forth in Part II, Item 7 of this Form 10-K under the subheading "Segment Operating Performance," and in Part II, Item 8 of this Form 10-K in the Notes to Consolidated Financial Statements in Note 11, "Segment Information and Geographic Data."

Table of Contents

While some Mac computers are manufactured in the U.S. and Ireland, substantially all of the Company's hardware products are currently manufactured by outsourcing partners that are located primarily in Asia. The supply and manufacture of a number of components is performed by sole-sourced outsourcing partners in the U.S., Asia and Europe. Margins on sales of the Company's products in foreign countries and on sales of products that include components obtained from foreign suppliers, can be adversely affected by foreign currency exchange rate fluctuations and by international trade regulations, including tariffs and antidumping penalties. Information regarding concentration in the available sources of supply of materials and products is set forth in Part II, Item 8 of this Form 10-K in the Notes to Consolidated Financial Statements in Note 10, Commitments and Contingencies.

Business Seasonality and Product Introductions

The Company has historically experienced higher net sales in its first quarter compared to other quarters in its fiscal year due in part to seasonal holiday demand. Additionally, new product introductions can significantly impact net sales, product costs and operating expenses. Product introductions can also impact the Company's net sales to its indirect distribution channels as these channels are filled with new product inventory following a product introduction, and often, channel inventory of a particular product declines as the next related major product launch approaches. Net sales can also be affected when consumers and distributors anticipate a product introduction. However, neither historical seasonal patterns nor historical patterns of product introductions should be considered reliable indicators of the Company's future pattern of product introductions, future net sales or financial performance.

Warranty

The Company offers a limited parts and labor warranty on most of its hardware products. The basic warranty period is typically one year from the date of purchase by the original end-user. The Company also offers a 90-day basic warranty for its service parts used to repair the Company's hardware products. In certain jurisdictions, local law requires that manufacturers guarantee their products for a period prescribed by statute, typically at least two years. In addition, where available, consumers may purchase APP or AC+, which extends service coverage on many of the Company's hardware products.

Backlog

In the Company's experience, the actual amount of product backlog at any particular time is not a meaningful indication of its future business prospects. In particular, backlog often increases immediately following new product introductions as customers anticipate shortages. Backlog is often reduced once customers believe they can obtain sufficient supply. Because of the foregoing, backlog should not be considered a reliable indicator of the Company's ability to achieve any particular level of revenue or financial performance.

Employees

As of September 26, 2015, the Company had approximately 110,000 full-time equivalent employees.

Available Information

The Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments to reports filed pursuant to Sections 13(a) and 15(d) of the Securities Exchange Act of 1934, as amended (the Exchange Act), are filed with the Securities and Exchange Commission (the SEC). The Company is subject to the informational requirements of the Exchange Act and files or furnishes reports, proxy statements and other information with the SEC. Such reports and other information filed by the Company with the SEC are available free of charge on

Edgar Filing: APPLE INC - Form 10-K

the Company's website at investor.apple.com/sec.cfm when such reports are available on the SEC's website. The public may read and copy any materials filed by the Company with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Room 1580, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an internet site that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC at www.sec.gov. The contents of these websites are not incorporated into this filing. Further, the Company's references to website URLs are intended to be inactive textual references only.

Apple Inc. | 2015 Form 10-K | 7

Table of Contents

Item 1A. Risk Factors

The following discussion of risk factors contains forward-looking statements. These risk factors may be important to understanding other statements in this Form 10-K. The following information should be read in conjunction with Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations and the consolidated financial statements and related notes in Part II, Item 8, Financial Statements and Supplementary Data of this Form 10-K.

The business, financial condition and operating results of the Company can be affected by a number of factors, whether currently known or unknown, including but not limited to those described below, any one or more of which could, directly or indirectly, cause the Company's actual financial condition and operating results to vary materially from past, or from anticipated future, financial condition and operating results. Any of these factors, in whole or in part, could materially and adversely affect the Company's business, financial condition, operating results and stock price.

Because of the following factors, as well as other factors affecting the Company's financial condition and operating results, past financial performance should not be considered to be a reliable indicator of future performance, and investors should not use historical trends to anticipate results or trends in future periods.

Global and regional economic conditions could materially adversely affect the Company.

The Company's operations and performance depend significantly on global and regional economic conditions. Uncertainty about global and regional economic conditions poses a risk as consumers and businesses may postpone spending in response to tighter credit, higher unemployment, financial market volatility, government austerity programs, negative financial news, declines in income or asset values and/or other factors. These worldwide and regional economic conditions could have a material adverse effect on demand for the Company's products and services. Demand also could differ materially from the Company's expectations as a result of currency fluctuations because the Company generally raises prices on goods and services sold outside the U.S. to correspond with the effect of a strengthening of the U.S. dollar. Other factors that could influence worldwide or regional demand include changes in fuel and other energy costs, conditions in the real estate and mortgage markets, unemployment, labor and healthcare costs, access to credit, consumer confidence and other macroeconomic factors affecting consumer spending behavior. These and other economic factors could materially adversely affect demand for the Company's products and services.

In the event of financial turmoil affecting the banking system and financial markets, additional consolidation of the financial services industry, or significant financial service institution failures, there could be tightening in the credit markets, low liquidity and extreme volatility in fixed income, credit, currency and equity markets. This could have a number of effects on the Company's business, including the insolvency or financial instability of outsourcing partners or suppliers or their inability to obtain credit to finance development and/or manufacture products resulting in product delays; inability of customers, including channel partners, to obtain credit to finance purchases of the Company's products; failure of derivative counterparties and other financial institutions; and restrictions on the Company's ability to issue new debt. Other income and expense also could vary materially from expectations depending on gains or losses realized on the sale or exchange of financial instruments; impairment charges resulting from revaluations of debt and equity securities and other investments; changes in interest rates; increases or decreases in cash balances; volatility in foreign exchange rates; and changes in fair value of derivative instruments. Increased volatility in the financial markets and overall economic uncertainty would increase the risk of the actual amounts realized in the future on the Company's financial instruments differing significantly from the fair values currently assigned to them.

Global markets for the Company's products and services are highly competitive and subject to rapid technological change, and the Company may be unable to compete effectively in these markets.

The Company's products and services compete in highly competitive global markets characterized by aggressive price cutting and resulting downward pressure on gross margins, frequent introduction of new products, short product life cycles, evolving industry standards, continual improvement in product price/performance characteristics, rapid adoption of technological and product advancements by competitors and price sensitivity on the part of consumers.

The Company's ability to compete successfully depends heavily on its ability to ensure a continuing and timely introduction of innovative new products, services and technologies to the marketplace. The Company believes it is unique in that it designs and develops nearly the entire solution for its products, including the hardware, operating system, numerous software applications and related services. As a result, the Company must make significant investments in R&D. The Company currently holds a significant number of patents and copyrights and has registered and/or has applied to register numerous patents, trademarks and service marks. In contrast, many of the Company's competitors seek to compete primarily through aggressive pricing and very low cost structures, and emulating the Company's products and infringing on its intellectual property. If the Company is unable to continue to develop and sell innovative new products with attractive margins or if competitors infringe on the Company's intellectual property, the Company's ability to maintain a competitive advantage could be adversely affected.

Table of Contents

The Company markets certain mobile communication and media devices based on the iOS mobile operating system and also markets related third-party digital content and applications. The Company faces substantial competition in these markets from companies that have significant technical, marketing, distribution and other resources, as well as established hardware, software and digital content supplier relationships; and the Company has a minority market share in the global smartphone market. Additionally, the Company faces significant price competition as competitors reduce their selling prices and attempt to imitate the Company's product features and applications within their own products or, alternatively, collaborate with each other to offer solutions that are more competitive than those they currently offer. The Company competes with business models that include content provided to users for free. The Company also competes with illegitimate ways to obtain third-party digital content and applications. Some of the Company's competitors have greater experience, product breadth and distribution channels than the Company. Because some current and potential competitors have substantial resources and/or experience and a lower cost structure, they may be able to provide products and services at little or no profit or even at a loss. The Company also expects competition to intensify as competitors attempt to imitate the Company's approach to providing components seamlessly within their individual offerings or work collaboratively to offer integrated solutions. The Company's financial condition and operating results depend substantially on the Company's ability to continually improve iOS and iOS devices in order to maintain their functional and design advantages.

The Company is the only authorized maker of hardware using OS X, which has a minority market share in the personal computer market. This market has been contracting and is dominated by computer makers using competing operating systems, most notably Windows. In the market for personal computers and accessories, the Company faces a significant number of competitors, many of which have broader product lines, lower priced products and a larger installed customer base. Historically, consolidation in this market has resulted in larger competitors. Price competition has been particularly intense as competitors selling Windows-based personal computers have aggressively cut prices and lowered product margins. An increasing number of internet-enabled devices that include software applications and are smaller and simpler than traditional personal computers compete for market share with the Company's existing products. The Company's financial condition and operating results also depend on its ability to continually improve the Mac platform to maintain its functional and design advantages.

There can be no assurance the Company will be able to continue to provide products and services that compete effectively.

To remain competitive and stimulate customer demand, the Company must successfully manage frequent product introductions and transitions.

Due to the highly volatile and competitive nature of the industries in which the Company competes, the Company must continually introduce new products, services and technologies, enhance existing products and services, effectively stimulate customer demand for new and upgraded products and successfully manage the transition to these new and upgraded products. The success of new product introductions depends on a number of factors including, but not limited to, timely and successful product development, market acceptance, the Company's ability to manage the risks associated with new product production ramp-up issues, the availability of application software for new products, the effective management of purchase commitments and inventory levels in line with anticipated product demand, the availability of products in appropriate quantities and at expected costs to meet anticipated demand and the risk that new products may have quality or other defects or deficiencies in the early stages of introduction. Accordingly, the Company cannot determine in advance the ultimate effect of new product introductions and transitions.

The Company depends on the performance of distributors, carriers and other resellers.

The Company distributes its products through cellular network carriers, wholesalers, national and regional retailers and value-added resellers, many of whom distribute products from competing manufacturers. The Company also sells its products and third-party products in most of its major markets directly to education, enterprise and government customers and consumers and small and mid-sized businesses through its online and retail stores.

Carriers providing cellular network service for iPhone typically subsidize users' purchases of the device. There is no assurance that such subsidies will be continued at all or in the same amounts upon renewal of the Company's agreements with these carriers or in agreements the Company enters into with new carriers.

Table of Contents

Many resellers have narrow operating margins and have been adversely affected in the past by weak economic conditions. Some resellers have perceived the expansion of the Company's direct sales as conflicting with their business interests as distributors and resellers of the Company's products. Such a perception could discourage resellers from investing resources in the distribution and sale of the Company's products or lead them to limit or cease distribution of those products. The Company has invested and will continue to invest in programs to enhance reseller sales, including staffing selected resellers' stores with Company employees and contractors, and improving product placement displays. These programs could require a substantial investment while providing no assurance of return or incremental revenue. The financial condition of these resellers could weaken, these resellers could stop distributing the Company's products, or uncertainty regarding demand for some or all of the Company's products could cause resellers to reduce their ordering and marketing of the Company's products.

The Company faces substantial inventory and other asset risk in addition to purchase commitment cancellation risk.

The Company records a write-down for product and component inventories that have become obsolete or exceed anticipated demand or net realizable value and accrues necessary cancellation fee reserves for orders of excess products and components. The Company also reviews its long-lived assets, including capital assets held at its suppliers' facilities and inventory prepayments, for impairment whenever events or circumstances indicate the carrying amount of an asset may not be recoverable. If the Company determines that impairment has occurred, it records a write-down equal to the amount by which the carrying value of the assets exceeds its fair value. Although the Company believes its provisions related to inventory, capital assets, inventory prepayments and other assets and purchase commitments are currently adequate, no assurance can be given that the Company will not incur additional related charges given the rapid and unpredictable pace of product obsolescence in the industries in which the Company competes.

The Company must order components for its products and build inventory in advance of product announcements and shipments. Consistent with industry practice, components are normally acquired through a combination of purchase orders, supplier contracts and open orders, in each case based on projected demand. Where appropriate, the purchases are applied to inventory component prepayments that are outstanding with the respective supplier. Purchase commitments typically cover forecasted component and manufacturing requirements for periods up to 150 days. Because the Company's markets are volatile, competitive and subject to rapid technology and price changes, there is a risk the Company will forecast incorrectly and order or produce excess or insufficient amounts of components or products, or not fully utilize firm purchase commitments.

Future operating results depend upon the Company's ability to obtain components in sufficient quantities.

Because the Company currently obtains components from single or limited sources, the Company is subject to significant supply and pricing risks. Many components, including those that are available from multiple sources, are at times subject to industry-wide shortages and significant commodity pricing fluctuations. While the Company has entered into agreements for the supply of many components, there can be no assurance that the Company will be able to extend or renew these agreements on similar terms, or at all. A number of suppliers of components may suffer from poor financial conditions, which can lead to business failure for the supplier or consolidation within a particular industry, further limiting the Company's ability to obtain sufficient quantities of components. The effects of global or regional economic conditions on the Company's suppliers, described in *Global and regional economic conditions could materially adversely affect the Company* above, also could affect the Company's ability to obtain components. Therefore, the Company remains subject to significant risks of supply shortages and price increases.

The Company and other participants in the markets for mobile communication and media devices and personal computers also compete for various components with other industries that have experienced increased demand for their products. The Company uses some custom components that are not common to the rest of these industries. The Company's new products often utilize custom components available from only one source. When a component or product uses new technologies, initial capacity constraints may exist until the suppliers' yields have matured or manufacturing capacity has increased. Continued availability of these components at acceptable prices, or at all, may be affected for any number of reasons, including if those suppliers decide to concentrate on the production of common components instead of components customized to meet the Company's requirements. The supply of components for a new or existing product could be delayed or constrained, or a key manufacturing vendor could delay shipments of completed products to the Company.

Table of Contents

The Company depends on component and product manufacturing and logistical services provided by outsourcing partners, many of which are located outside of the U.S.

Substantially all of the Company's manufacturing is performed in whole or in part by a few outsourcing partners located primarily in Asia. The Company has also outsourced much of its transportation and logistics management. While these arrangements may lower operating costs, they also reduce the Company's direct control over production and distribution. It is uncertain what effect such diminished control will have on the quality or quantity of products or services, or the Company's flexibility to respond to changing conditions. Although arrangements with these partners may contain provisions for warranty expense reimbursement, the Company may remain responsible to the consumer for warranty service in the event of product defects and could experience an unanticipated product defect or warranty liability. While the Company relies on its partners to adhere to its supplier code of conduct, material violations of the supplier code of conduct could occur.

The Company relies on sole-sourced outsourcing partners in the U.S., Asia and Europe to supply and manufacture many critical components, and on outsourcing partners primarily located in Asia, for final assembly of substantially all of the Company's hardware products. Any failure of these partners to perform may have a negative impact on the Company's cost or supply of components or finished goods. In addition, manufacturing or logistics in these locations or transit to final destinations may be disrupted for a variety of reasons including, but not limited to, natural and man-made disasters, information technology system failures, commercial disputes, military actions or economic, business, labor, environmental, public health, or political issues.

The Company has invested in manufacturing process equipment, much of which is held at certain of its outsourcing partners, and has made prepayments to certain of its suppliers associated with long-term supply agreements. While these arrangements help ensure the supply of components and finished goods, if these outsourcing partners or suppliers experience severe financial problems or other disruptions in their business, such continued supply could be reduced or terminated and the net realizable value of these assets could be negatively impacted.

The Company's products and services may experience quality problems from time to time that can result in decreased sales and operating margin and harm to the Company's reputation.

The Company sells complex hardware and software products and services that can contain design and manufacturing defects. Sophisticated operating system software and applications, such as those sold by the Company, often contain bugs that can unexpectedly interfere with the software's intended operation. The Company's online services may from time to time experience outages, service slowdowns, or errors. Defects may also occur in components and products the Company purchases from third parties. There can be no assurance the Company will be able to detect and fix all defects in the hardware, software and services it sells. Failure to do so could result in lost revenue, significant warranty and other expenses and harm to the Company's reputation.

The Company relies on access to third-party digital content, which may not be available to the Company on commercially reasonable terms or at all.

The Company contracts with numerous third parties to offer their digital content. This includes the right to sell currently available music, movies, TV shows and books. The licensing or other distribution arrangements with these third parties are for relatively short terms and do not guarantee the continuation or renewal of these arrangements on reasonable terms, if at all. Some third-party content providers and distributors currently or in the future may offer competing products and services, and could take action to make it more difficult or impossible for the Company to license or otherwise distribute their content in the future. Other content owners, providers or distributors may seek to limit the Company's access to, or increase the cost of, such content. The Company may be unable to continue to offer a

wide variety of content at reasonable prices with acceptable usage rules, or continue to expand its geographic reach. Failure to obtain the right to make available third-party digital content, or to make available such content on commercially reasonable terms, could have a material adverse impact on the Company's financial condition and operating results.

Some third-party digital content providers require the Company to provide digital rights management and other security solutions. If requirements change, the Company may have to develop or license new technology to provide these solutions. There is no assurance the Company will be able to develop or license such solutions at a reasonable cost and in a timely manner. In addition, certain countries have passed or may propose and adopt legislation that would force the Company to license its digital rights management, which could lessen the protection of content and subject it to piracy and also could negatively affect arrangements with the Company's content providers.

Table of Contents

The Company's future performance depends in part on support from third-party software developers.

The Company believes decisions by customers to purchase its hardware products depend in part on the availability of third-party software applications and services. There is no assurance that third-party developers will continue to develop and maintain software applications and services for the Company's products. If third-party software applications and services cease to be developed and maintained for the Company's products, customers may choose not to buy the Company's products.

With respect to its Mac products, the Company believes the availability of third-party software applications and services depends in part on the developers' perception and analysis of the relative benefits of developing, maintaining and upgrading such software for the Company's products compared to Windows-based products. This analysis may be based on factors such as the market position of the Company and its products, the anticipated revenue that may be generated, expected future growth of Mac sales and the costs of developing such applications and services. If the Company's minority share of the global personal computer market causes developers to question the Mac's prospects, developers could be less inclined to develop or upgrade software for the Company's Mac products and more inclined to devote their resources to developing and upgrading software for the larger Windows market.

With respect to iOS devices, the Company relies on the continued availability and development of compelling and innovative software applications, which are distributed through a single distribution channel, the App Store. iOS devices are subject to rapid technological change, and, if third-party developers are unable to or choose not to keep up with this pace of change, third-party applications might not successfully operate and may result in dissatisfied customers. As with applications for the Company's Mac products, the availability and development of these applications also depend on developers' perceptions and analysis of the relative benefits of developing, maintaining or upgrading software for the Company's iOS devices rather than its competitors' platforms, such as Android. If developers focus their efforts on these competing platforms, the availability and quality of applications for the Company's iOS devices may suffer.

The Company relies on access to third-party intellectual property, which may not be available to the Company on commercially reasonable terms or at all.

Many of the Company's products include third-party intellectual property, which requires licenses from those third parties. Based on past experience and industry practice, the Company believes such licenses generally can be obtained on reasonable terms. There is, however, no assurance that the necessary licenses can be obtained on acceptable terms or at all. Failure to obtain the right to use third-party intellectual property, or to use such intellectual property on commercially reasonable terms, could preclude the Company from selling certain products or otherwise have a material adverse impact on the Company's financial condition and operating results.

The Company could be impacted by unfavorable results of legal proceedings, such as being found to have infringed on intellectual property rights.

The Company is subject to various legal proceedings and claims that have not yet been fully resolved and that have arisen in the ordinary course of business, and additional claims may arise in the future.

For example, technology companies, including many of the Company's competitors, frequently enter into litigation based on allegations of patent infringement or other violations of intellectual property rights. In addition, patent holding companies seek to monetize patents they have purchased or otherwise obtained. As the Company has grown, the intellectual property rights claims against it have increased and may continue to increase. In particular, the Company's cellular enabled products compete with products from mobile communication and media device companies

that hold significant patent portfolios, and the number of patent claims against the Company has significantly increased. The Company is vigorously defending infringement actions in courts in a number of U.S. jurisdictions and before the U.S. International Trade Commission, as well as internationally in various countries. The plaintiffs in these actions frequently seek injunctions and substantial damages.

Regardless of the scope or validity of such patents or other intellectual property rights, or the merits of any claims by potential or actual litigants, the Company may have to engage in protracted litigation. If the Company is found to infringe one or more patents or other intellectual property rights, regardless of whether it can develop non-infringing technology, it may be required to pay substantial damages or royalties to a third-party, or it may be subject to a temporary or permanent injunction prohibiting the Company from marketing or selling certain products.

In certain cases, the Company may consider the desirability of entering into licensing agreements, although no assurance can be given that such licenses can be obtained on acceptable terms or that litigation will not occur. These licenses may also significantly increase the Company's operating expenses.

Table of Contents

Regardless of the merit of particular claims, litigation may be expensive, time-consuming, disruptive to the Company's operations and distracting to management. In recognition of these considerations, the Company may enter into arrangements to settle litigation.

In management's opinion, there is not at least a reasonable possibility the Company may have incurred a material loss, or a material loss in excess of a recorded accrual, with respect to loss contingencies, including matters related to infringement of intellectual property rights. However, the outcome of litigation is inherently uncertain.

Although management considers the likelihood of such an outcome to be remote, if one or more legal matters were resolved against the Company in a reporting period for amounts in excess of management's expectations, the Company's consolidated financial statements for that reporting period could be materially adversely affected. Further, such an outcome could result in significant compensatory, punitive or trebled monetary damages, disgorgement of revenue or profits, remedial corporate measures or injunctive relief against the Company that could materially adversely affect its financial condition and operating results.

The Company is subject to laws and regulations worldwide, changes to which could increase the Company's costs and individually or in the aggregate adversely affect the Company's business.

The Company is subject to laws and regulations affecting its domestic and international operations in a number of areas. These U.S. and foreign laws and regulations affect the Company's activities including, but not limited to, in areas of labor, advertising, digital content, consumer protection, real estate, billing, e-commerce, promotions, quality of services, telecommunications, mobile communications and media, television, intellectual property ownership and infringement, tax, import and export requirements, anti-corruption, foreign exchange controls and cash repatriation restrictions, data privacy requirements, anti-competition, environmental, health and safety.

By way of example, laws and regulations related to mobile communications and media devices in the many jurisdictions in which the Company operates are extensive and subject to change. Such changes could include, among others, restrictions on the production, manufacture, distribution and use of devices, locking devices to a carrier's network, or mandating the use of devices on more than one carrier's network. These devices are also subject to certification and regulation by governmental and standardization bodies, as well as by cellular network carriers for use on their networks. These certification processes are extensive and time consuming, and could result in additional testing requirements, product modifications, or delays in product shipment dates, or could preclude the Company from selling certain products.

Compliance with these laws, regulations and similar requirements may be onerous and expensive, and they may be inconsistent from jurisdiction to jurisdiction, further increasing the cost of compliance and doing business. Any such costs, which may rise in the future as a result of changes in these laws and regulations or in their interpretation, could individually or in the aggregate make the Company's products and services less attractive to the Company's customers, delay the introduction of new products in one or more regions, or cause the Company to change or limit its business practices. The Company has implemented policies and procedures designed to ensure compliance with applicable laws and regulations, but there can be no assurance that the Company's employees, contractors, or agents will not violate such laws and regulations or the Company's policies and procedures.

The Company's business is subject to the risks of international operations.

The Company derives a significant portion of its revenue and earnings from its international operations. Compliance with applicable U.S. and foreign laws and regulations, such as import and export requirements, anti-corruption laws, tax laws, foreign exchange controls and cash repatriation restrictions, data privacy requirements, environmental laws,

labor laws and anti-competition regulations, increases the costs of doing business in foreign jurisdictions. Although the Company has implemented policies and procedures to comply with these laws and regulations, a violation by the Company's employees, contractors, or agents could nevertheless occur. Violations of these laws and regulations could materially adversely affect the Company's brand, international growth efforts and business.

The Company also could be significantly affected by other risks associated with international activities including, but not limited to, economic and labor conditions, increased duties, taxes and other costs and political instability. Margins on sales of the Company's products in foreign countries, and on sales of products that include components obtained from foreign suppliers, could be materially adversely affected by international trade regulations, including duties, tariffs and antidumping penalties. The Company is also exposed to credit and collectability risk on its trade receivables with customers in certain international markets. There can be no assurance the Company can effectively limit its credit risk and avoid losses.

Table of Contents

The Company's retail stores have required and will continue to require a substantial investment and commitment of resources and are subject to numerous risks and uncertainties.

The Company's retail stores have required substantial investment in equipment and leasehold improvements, information systems, inventory and personnel. The Company also has entered into substantial operating lease commitments for retail space. Certain stores have been designed and built to serve as high-profile venues to promote brand awareness and serve as vehicles for corporate sales and marketing activities. Because of their unique design elements, locations and size, these stores require substantially more investment than the Company's more typical retail stores. Due to the high cost structure associated with the Company's retail stores, a decline in sales or the closure or poor performance of individual or multiple stores could result in significant lease termination costs, write-offs of equipment and leasehold improvements and severance costs.

Many factors unique to retail operations, some of which are beyond the Company's control, pose risks and uncertainties. These risks and uncertainties include, but are not limited to, macro-economic factors that could have an adverse effect on general retail activity, as well as the Company's inability to manage costs associated with store construction and operation, the Company's failure to manage relationships with its existing retail partners, more challenging environments in managing retail operations outside the U.S., costs associated with unanticipated fluctuations in the value of retail inventory, and the Company's inability to obtain and renew leases in quality retail locations at a reasonable cost.

Investment in new business strategies and acquisitions could disrupt the Company's ongoing business and present risks not originally contemplated.

The Company has invested, and in the future may invest, in new business strategies or acquisitions. Such endeavors may involve significant risks and uncertainties, including distraction of management from current operations, greater than expected liabilities and expenses, inadequate return of capital and unidentified issues not discovered in the Company's due diligence. These new ventures are inherently risky and may not be successful.

The Company's business and reputation may be impacted by information technology system failures or network disruptions.

The Company may be subject to information technology system failures and network disruptions. These may be caused by natural disasters, accidents, power disruptions, telecommunications failures, acts of terrorism or war, computer viruses, physical or electronic break-ins, or other events or disruptions. System redundancy may be ineffective or inadequate, and the Company's disaster recovery planning may not be sufficient for all eventualities. Such failures or disruptions could, among other things, prevent access to the Company's online stores and services, preclude retail store transactions, compromise Company or customer data, and result in delayed or cancelled orders. System failures and disruptions could also impede the manufacturing and shipping of products, delivery of online services, transactions processing and financial reporting.

There may be breaches of the Company's information technology systems that materially damage business partner and customer relationships, curtail or otherwise adversely impact access to online stores and services, or subject the Company to significant reputational, financial, legal and operational consequences.

The Company's business requires it to use and store customer, employee and business partner personally identifiable information (PII). This may include, among other information, names, addresses, phone numbers, email addresses, contact preferences, tax identification numbers and payment account information. Although malicious attacks to gain access to PII affect many companies across various industries, the Company is at a relatively greater risk of being

targeted because of its high profile and the amount of PII it manages.

The Company requires user names and passwords in order to access its information technology systems. The Company also uses encryption and authentication technologies designed to secure the transmission and storage of data and prevent access to Company data or accounts. As with all companies, these security measures are subject to third-party security breaches, employee error, malfeasance, faulty password management, or other irregularities. For example, third parties may attempt to fraudulently induce employees or customers into disclosing user names, passwords or other sensitive information, which may in turn be used to access the Company's information technology systems. To help protect customers and the Company, the Company monitors accounts and systems for unusual activity and may freeze accounts under suspicious circumstances, which may result in the delay or loss of customer orders.

Table of Contents

The Company devotes significant resources to network security, data encryption and other security measures to protect its systems and data, but these security measures cannot provide absolute security. To the extent the Company was to experience a breach of its systems and was unable to protect sensitive data, such a breach could materially damage business partner and customer relationships, and curtail or otherwise adversely impact access to online stores and services. Moreover, if a computer security breach affects the Company's systems or results in the unauthorized release of PII, the Company's reputation and brand could be materially damaged, use of the Company's products and services could decrease, and the Company could be exposed to a risk of loss or litigation and possible liability. While the Company maintains insurance coverage that, subject to policy terms and conditions and subject to a significant self-insured retention, is designed to address certain aspects of cyber risks, such insurance coverage may be insufficient to cover all losses or all types of claims that may arise in the continually evolving area of cyber risk.

The Company's business is subject to a variety of U.S. and international laws, rules, policies and other obligations regarding data protection.

The Company is subject to federal, state and international laws relating to the collection, use, retention, security and transfer of PII. In many cases, these laws apply not only to third-party transactions, but also to transfers of information between the Company and its subsidiaries, and among the Company, its subsidiaries and other parties with which the Company has commercial relations. Several jurisdictions have passed laws in this area, and other jurisdictions are considering imposing additional restrictions. These laws continue to develop and may be inconsistent from jurisdiction to jurisdiction. Complying with emerging and changing international requirements may cause the Company to incur substantial costs or require the Company to change its business practices. Noncompliance could result in penalties or significant legal liability.

The Company's privacy policy, which includes related practices concerning the use and disclosure of data, is posted on its website. Any failure by the Company, its suppliers or other parties with whom the Company does business to comply with its posted privacy policy or with other federal, state or international privacy-related or data protection laws and regulations could result in proceedings against the Company by governmental entities or others.

The Company is also subject to payment card association rules and obligations under its contracts with payment card processors. Under these rules and obligations, if information is compromised, the Company could be liable to payment card issuers for associated expenses and penalties. In addition, if the Company fails to follow payment card industry security standards, even if no customer information is compromised, the Company could incur significant fines or experience a significant increase in payment card transaction costs.

The Company's success depends largely on the continued service and availability of key personnel.

Much of the Company's future success depends on the continued availability and service of key personnel, including its Chief Executive Officer, executive team and other highly skilled employees. Experienced personnel in the technology industry are in high demand and competition for their talents is intense, especially in Silicon Valley, where most of the Company's key personnel are located.

The Company's business may be impacted by political events, war, terrorism, public health issues, natural disasters and other business interruptions.

War, terrorism, geopolitical uncertainties, public health issues and other business interruptions have caused and could cause damage or disruption to international commerce and the global economy, and thus could have a material adverse effect on the Company, its suppliers, logistics providers, manufacturing vendors and customers, including channel partners. The Company's business operations are subject to interruption by, among others, natural disasters,

whether as a result of climate change or otherwise, fire, power shortages, nuclear power plant accidents, terrorist attacks and other hostile acts, labor disputes, public health issues and other events beyond its control. Such events could decrease demand for the Company's products, make it difficult or impossible for the Company to make and deliver products to its customers, including channel partners, or to receive components from its suppliers, and create delays and inefficiencies in the Company's supply chain. Should major public health issues, including pandemics, arise, the Company could be adversely affected by more stringent employee travel restrictions, additional limitations in freight services, governmental actions limiting the movement of products between regions, delays in production ramps of new products and disruptions in the operations of the Company's manufacturing vendors and component suppliers. The majority of the Company's R&D activities, its corporate headquarters, information technology systems and other critical business operations, including certain component suppliers and manufacturing vendors, are in locations that could be affected by natural disasters. In the event of a natural disaster, the Company could incur significant losses, require substantial recovery time and experience significant expenditures in order to resume operations.

Table of Contents***The Company expects its quarterly revenue and operating results to fluctuate.***

The Company's profit margins vary across its products and distribution channels. The Company's software, accessories, and service and support contracts generally have higher gross margins than certain of the Company's other products. Gross margins on the Company's hardware products vary across product lines and can change over time as a result of product transitions, pricing and configuration changes, and component, warranty, and other cost fluctuations. The Company's direct sales generally have higher associated gross margins than its indirect sales through its channel partners. In addition, the Company's gross margin and operating margin percentages, as well as overall profitability, may be materially adversely impacted as a result of a shift in product, geographic or channel mix, component cost increases, the strengthening U.S. dollar, price competition, or the introduction of new products, including those that have higher cost structures with flat or reduced pricing.

The Company has typically experienced higher net sales in its first quarter compared to other quarters due in part to seasonal holiday demand. Additionally, new product introductions can significantly impact net sales, product costs and operating expenses. Further, the Company generates a majority of its net sales from a single product and a decline in demand for that product could significantly impact quarterly net sales. The Company could also be subject to unexpected developments late in a quarter, such as lower-than-anticipated demand for the Company's products, issues with new product introductions, an internal systems failure, or failure of one of the Company's logistics, components supply, or manufacturing partners.

The Company's stock price is subject to volatility.

The Company's stock price has experienced substantial price volatility in the past and may continue to do so in the future. Additionally, the Company, the technology industry and the stock market as a whole have experienced extreme stock price and volume fluctuations that have affected stock prices in ways that may have been unrelated to these companies' operating performance. Price volatility over a given period may cause the average price at which the Company repurchases its own stock to exceed the stock's price at a given point in time. The Company believes its stock price should reflect expectations of future growth and profitability. The Company also believes its stock price should reflect expectations that its cash dividend will continue at current levels or grow and that its current share repurchase program will be fully consummated. Future dividends are subject to declaration by the Company's Board of Directors, and the Company's share repurchase program does not obligate it to acquire any specific number of shares. If the Company fails to meet expectations related to future growth, profitability, dividends, share repurchases or other market expectations, its stock price may decline significantly, which could have a material adverse impact on investor confidence and employee retention.

The Company's financial performance is subject to risks associated with changes in the value of the U.S. dollar versus local currencies.

The Company's primary exposure to movements in foreign currency exchange rates relates to non-U.S. dollar-denominated sales and operating expenses worldwide. Weakening of foreign currencies relative to the U.S. dollar adversely affects the U.S. dollar value of the Company's foreign currency-denominated sales and earnings, and generally leads the Company to raise international pricing, potentially reducing demand for the Company's products. Margins on sales of the Company's products in foreign countries and on sales of products that include components obtained from foreign suppliers, could be materially adversely affected by foreign currency exchange rate fluctuations. In some circumstances, for competitive or other reasons, the Company may decide not to raise local prices to fully offset the dollar's strengthening, or at all, which would adversely affect the U.S. dollar value of the Company's foreign currency-denominated sales and earnings. Conversely, a strengthening of foreign currencies relative to the U.S. dollar, while generally beneficial to the Company's foreign currency-denominated sales and earnings, could cause the

Company to reduce international pricing and incur losses on its foreign currency derivative instruments, thereby limiting the benefit. Additionally, strengthening of foreign currencies may also increase the Company's cost of product components denominated in those currencies, thus adversely affecting gross margins.

The Company uses derivative instruments, such as foreign currency forward and option contracts, to hedge certain exposures to fluctuations in foreign currency exchange rates. The use of such hedging activities may not offset any, or more than a portion, of the adverse financial effects of unfavorable movements in foreign exchange rates over the limited time the hedges are in place.

The Company is exposed to credit risk and fluctuations in the market values of its investment portfolio.

Given the global nature of its business, the Company has both domestic and international investments. Credit ratings and pricing of the Company's investments can be negatively affected by liquidity, credit deterioration, financial results, economic risk, political risk, sovereign risk or other factors. As a result, the value and liquidity of the Company's cash, cash equivalents and marketable securities may fluctuate substantially. Therefore, although the Company has not realized any significant losses on its cash, cash equivalents and marketable securities, future fluctuations in their value could result in a significant realized loss.

Table of Contents

The Company is exposed to credit risk on its trade accounts receivable, vendor non-trade receivables and prepayments related to long-term supply agreements, and this risk is heightened during periods when economic conditions worsen.

The Company distributes its products through third-party cellular network carriers, wholesalers, retailers and value-added resellers. The Company also sells its products directly to small and mid-sized businesses and education, enterprise and government customers. A substantial majority of the Company's outstanding trade receivables are not covered by collateral, third-party financing arrangements or credit insurance. The Company's exposure to credit and collectability risk on its trade receivables is higher in certain international markets and its ability to mitigate such risks may be limited. The Company also has unsecured vendor non-trade receivables resulting from purchases of components by outsourcing partners and other vendors that manufacture sub-assemblies or assemble final products for the Company. In addition, the Company has made prepayments associated with long-term supply agreements to secure supply of inventory components. As of September 26, 2015, a significant portion of the Company's trade receivables was concentrated within cellular network carriers, and its vendor non-trade receivables and prepayments related to long-term supply agreements were concentrated among a few individual vendors located primarily in Asia. While the Company has procedures to monitor and limit exposure to credit risk on its trade and vendor non-trade receivables, as well as long-term prepayments, there can be no assurance such procedures will effectively limit its credit risk and avoid losses.

The Company could be subject to changes in its tax rates, the adoption of new U.S. or international tax legislation or exposure to additional tax liabilities.

The Company is subject to taxes in the U.S. and numerous foreign jurisdictions, including Ireland, where a number of the Company's subsidiaries are organized. Due to economic and political conditions, tax rates in various jurisdictions may be subject to significant change. The Company's effective tax rates could be affected by changes in the mix of earnings in countries with differing statutory tax rates, changes in the valuation of deferred tax assets and liabilities, or changes in tax laws or their interpretation, including in the U.S. and Ireland. For example, in June 2014, the European Commission opened a formal investigation of Ireland to examine whether decisions by the tax authorities with regard to the corporate income tax to be paid by two of the Company's Irish subsidiaries comply with European Union rules on state aid. If the European Commission were to conclude against Ireland, it could require Ireland to recover from the Company past taxes covering a period of up to 10 years reflective of the disallowed state aid, and such amount could be material.

The Company is also subject to the examination of its tax returns and other tax matters by the Internal Revenue Service and other tax authorities and governmental bodies. The Company regularly assesses the likelihood of an adverse outcome resulting from these examinations to determine the adequacy of its provision for taxes. There can be no assurance as to the outcome of these examinations. If the Company's effective tax rates were to increase, particularly in the U.S. or Ireland, or if the ultimate determination of the Company's taxes owed is for an amount in excess of amounts previously accrued, the Company's financial condition, operating results and cash flows could be adversely affected.

Table of Contents

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The Company's headquarters are located in Cupertino, California. As of September 26, 2015, the Company owned or leased 25.6 million square feet of building space, primarily in the U.S. The Company also owned or leased building space in various locations, including throughout Europe, China, Singapore and Japan. Of the total owned or leased building space 18.5 million square feet was leased building space, which includes approximately 5.3 million square feet related to retail store space. Additionally, the Company owns a total of 1,757 acres of land in various locations.

As of September 26, 2015, the Company owned a manufacturing facility in Cork, Ireland that also housed a customer support call center; facilities in Elk Grove, California that included warehousing and distribution operations and a customer support call center; and a facility in Mesa, Arizona. The Company also owned land in Austin, Texas where it is expanding its existing office space and customer support call center. In addition, the Company owned facilities and land for R&D and corporate functions in San Jose, California and Cupertino, California, including land that is being developed for the Company's second corporate campus. The Company also owned data centers in Newark, California; Maiden, North Carolina; Prineville, Oregon; and Reno, Nevada. Outside the U.S., the Company owned additional facilities for various purposes.

The Company believes its existing facilities and equipment, which are used by all operating segments, are in good operating condition and are suitable for the conduct of its business. The Company has invested in internal capacity and strategic relationships with outside manufacturing vendors and continues to make investments in capital equipment as needed to meet anticipated demand for its products.

Item 3. Legal Proceedings

The Company is subject to the legal proceedings and claims discussed below as well as certain other legal proceedings and claims that have not been fully resolved and that have arisen in the ordinary course of business. In the opinion of management, there was not at least a reasonable possibility the Company may have incurred a material loss, or a material loss in excess of a recorded accrual, with respect to loss contingencies for asserted legal and other claims. However, the outcome of legal proceedings and claims brought against the Company is subject to significant uncertainty. Therefore, although management considers the likelihood of such an outcome to be remote, if one or more of these legal matters were resolved against the Company in a reporting period for amounts in excess of management's expectations, the Company's consolidated financial statements for that reporting period could be materially adversely affected. See the risk factor *The Company could be impacted by unfavorable results of legal proceedings, such as being found to have infringed on intellectual property rights* in Part I, Item 1A of this Form 10-K under the heading *Risk Factors*. The Company settled certain matters during the fourth quarter of 2015 that did not individually or in the aggregate have a material impact on the Company's financial condition or operating results.

Apple eBooks Antitrust Litigation (United States of America v. Apple Inc., et al.)

On April 11, 2012, the U.S. Department of Justice filed a civil antitrust action against the Company and five major book publishers in the U.S. District Court for the Southern District of New York, alleging an unreasonable restraint of interstate trade and commerce in violation of §1 of the Sherman Act and seeking, among other things, injunctive relief, the District Court's declaration that the Company's agency agreements with the publishers are null and void

and/or the District Court's reformation of such agreements. On July 10, 2013, the District Court found, following a bench trial, that the Company conspired to restrain trade in violation of §1 of the Sherman Act and relevant state statutes to the extent those laws are congruent with §1 of the Sherman Act. The District Court entered a permanent injunction, which took effect on October 6, 2013 and will be in effect for five years unless the judgment is overturned on appeal. The Company has taken the necessary steps to comply with the terms of the District Court's order, including renegotiating agreements with the five major eBook publishers, updating its antitrust training program and completing a two-year monitorship with a court-appointed antitrust compliance monitor, whose appointment the District Court ended in October 2015. The Company appealed the District Court's decision. Pursuant to a settlement agreement reached in June 2014, any damages the Company may be obligated to pay will be determined by the outcome of the final adjudication following exhaustion of all appeals.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

The Company's common stock is traded on the NASDAQ Stock Market LLC (NASDAQ) under the symbol AAPL.

Price Range of Common Stock

The price range per share of common stock presented below represents the highest and lowest intraday sales prices for the Company's common stock on the NASDAQ during each quarter of the two most recent years.

	Fourth Quarter	Third Quarter	Second Quarter	First Quarter
2015 price range per share	\$ 132.97 - \$ 92.00	\$ 134.54 - \$ 123.10	\$ 133.60 - \$ 104.63	\$ 119.75 - \$ 95.18
2014 price range per share	\$ 103.74 - \$ 92.09	\$ 95.05 - \$ 73.05	\$ 80.18 - \$ 70.51	\$ 82.16 - \$ 67.77

Holder

As of October 9, 2015, there were 25,924 shareholders of record.

Dividends

The Company paid a total of \$11.4 billion and \$11.0 billion in dividends during 2015 and 2014, respectively, and expects to pay quarterly dividends of \$0.52 per common share each quarter, subject to declaration by the Board of Directors. The Company also plans to increase its dividend on an annual basis, subject to declaration by the Board of Directors.

Table of Contents**Purchases of Equity Securities by the Issuer and Affiliated Purchasers**

Share repurchase activity during the three months ended September 26, 2015 was as follows (in millions, except number of shares, which are reflected in thousands, and per share amounts):

Periods	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs ⁽¹⁾
June 28, 2015 to August 1, 2015:				
May 2015 ASR	9,973 ⁽²⁾	⁽²⁾	9,973 ⁽²⁾	
Open market and privately negotiated purchases	15,882	\$ 124.66	15,882	
August 2, 2015 to August 29, 2015:				
Open market and privately negotiated purchases	68,526	\$ 114.15	68,526	
August 30, 2015 to September 26, 2015:				
Open market and privately negotiated purchases	37,394	\$ 112.94	37,394	
Total	131,775			\$ 36,024

⁽¹⁾ In 2012, the Company's Board of Directors authorized a program to repurchase up to \$10 billion of the Company's common stock beginning in 2013. The Company's Board of Directors increased the authorization to repurchase the Company's common stock to \$60 billion in April 2013, to \$90 billion in April 2014 and to \$140 billion in April 2015. As of September 26, 2015, \$104 billion of the \$140 billion had been utilized. The remaining \$36 billion in the table represents the amount available to repurchase shares under the authorized repurchase program as of September 26, 2015. The Company's share repurchase program does not obligate it to acquire any specific number of shares. Under the program, shares may be repurchased in privately negotiated and/or open market transactions, including under plans complying with Rule 10b5-1 under the Exchange Act.

⁽²⁾ In May 2015, the Company entered into an accelerated share repurchase arrangement (ASR) to purchase up to \$6.0 billion of the Company's common stock. In July 2015, the purchase period for this ASR ended and an additional 10.0 million shares were delivered and retired. In total, 48.3 million net shares were delivered under this ASR at an average repurchase price of \$124.24.

Table of Contents**Company Stock Performance**

The following graph shows a comparison of cumulative total shareholder return, calculated on a dividend reinvested basis, for the Company, the S&P 500 Index, the S&P Information Technology Index and the Dow Jones U.S. Technology Supersector Index for the five years ended September 26, 2015. The graph assumes \$100 was invested in each of the Company's common stock, the S&P 500 Index, the S&P Information Technology Index and the Dow Jones U.S. Technology Supersector Index as of the market close on September 24, 2010. Note that historic stock price performance is not necessarily indicative of future stock price performance.

* \$100 invested on 9/25/10 in stock or index, including reinvestment of dividends. Data points are the last day of each fiscal year for the Company's common stock and September 30th for indexes.

Table of Contents**Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations**

This section and other parts of this Annual Report on Form 10-K (Form 10-K) contain forward-looking statements, within the meaning of the Private Securities Litigation Reform Act of 1995, that involve risks and uncertainties. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Forward-looking statements can also be identified by words such as future, anticipates, believes, estimates, expects, intends, plans, predicts, will, would, could, can, may, and similar terms. Forward-looking statements are not guarantees of future performance and the Company's actual results may differ significantly from the results discussed in the forward-looking statements. Factors that might cause such differences include, but are not limited to, those discussed in Part I, Item 1A of this Form 10-K under the heading Risk Factors, which are incorporated herein by reference. The following discussion should be read in conjunction with the consolidated financial statements and notes thereto included in Part II, Item 8 of this Form 10-K. All information presented herein is based on the Company's fiscal calendar. Unless otherwise stated, references to particular years, quarters, months or periods refer to the Company's fiscal years ended in September and the associated quarters, months and periods of those fiscal years. Each of the terms the Company and Apple as used herein refers collectively to Apple Inc. and its wholly-owned subsidiaries, unless otherwise stated. The Company assumes no obligation to revise or update any forward-looking statements for any reason, except as required by law.

Overview and Highlights

The Company designs, manufactures and markets mobile communication and media devices, personal computers and portable digital music players, and sells a variety of related software, services, accessories, networking solutions and third-party digital content and applications. The Company sells its products worldwide through its retail stores, online stores and direct sales force, as well as through third-party cellular network carriers, wholesalers, retailers and value-added resellers. In addition, the Company sells a variety of third-party Apple compatible products, including application software and various accessories through its online and retail stores. The Company sells to consumers, small and mid-sized businesses and education, enterprise and government customers.

Fiscal 2015 Highlights

Net sales rose 28% or \$50.9 billion during 2015 compared to 2014, driven by a 52% year-over-year increase in iPhone® net sales. iPhone net sales and unit sales in 2015 increased in all of the Company's reportable operating segments. The Company also experienced year-over-year net sales increases in Mac®, Services and Other Products. Apple Watch®, which launched during the third quarter of 2015, accounted for more than 100% of the year-over-year growth in net sales of Other Products. Net sales growth during 2015 was partially offset by the effect of weakness in most foreign currencies relative to the U.S. dollar and lower iPad® net sales. Total net sales increased in each of the Company's reportable operating segments, with particularly strong growth in Greater China where year-over-year net sales increased 84%.

In April 2015, the Company announced a significant increase to its capital return program by raising the expected total size of the program to \$200 billion through March 2017. This included increasing its share repurchase authorization to \$140 billion and raising its quarterly dividend to \$0.52 per share beginning in May 2015. During 2015, the Company spent \$36.0 billion to repurchase shares of its common stock and paid dividends and dividend equivalents of \$11.6 billion. Additionally, the Company issued \$14.5 billion of U.S. dollar-denominated, 4.8 billion of euro-denominated, SFr1.3 billion of Swiss franc-denominated, £1.3 billion of British pound-denominated, A\$2.3 billion of Australian dollar-denominated and ¥250.0 billion of Japanese yen-denominated term debt during 2015.

Fiscal 2014 Highlights

Net sales rose 7% or \$11.9 billion during 2014 compared to 2013. This was driven by increases in net sales of iPhone, Mac and Services. Net sales and unit sales increased for iPhone primarily due to the successful introduction of iPhone 5s and 5c in the latter half of calendar year 2013, the successful launch of iPhone 6 and 6 Plus beginning in the fourth quarter of 2014, and expanded distribution. Mac net sales and unit sales increased primarily due to strong demand for MacBook Air® and MacBook Pro® which were updated in 2014 with faster processors and offered at lower prices. Net sales of Services grew primarily due to increased revenue from sales through the App Store®, AppleCare® and licensing. Growth in these areas was partially offset by the year-over-year decline in net sales for iPad due to lower unit sales in many markets, and a decline in net sales of Other Products. All of the Company's operating segments other than the Rest of Asia Pacific segment experienced increased net sales in 2014, with growth being strongest in the Greater China and Japan operating segments.

During 2014, the Company completed various business acquisitions, including the acquisitions of Beats Music, LLC, which offers a subscription streaming music service, and Beats Electronics, LLC, which makes Beats® headphones, speakers and audio software.

Table of Contents

In April 2014, the Company increased its share repurchase authorization to \$90 billion and the quarterly dividend was raised to \$0.47 per common share, resulting in an overall increase in its capital return program from \$100 billion to over \$130 billion. During 2014, the Company utilized \$45 billion to repurchase its common stock and paid dividends and dividend equivalents of \$11.1 billion. The Company also issued \$12.0 billion of long-term debt during 2014, with varying maturities through 2044, and launched a commercial paper program, with \$6.3 billion outstanding as of September 27, 2014.

Sales Data

The following table shows net sales by operating segment and net sales and unit sales by product during 2015, 2014 and 2013 (dollars in millions and units in thousands):

	2015	Change	2014	Change	2013
Net Sales by Operating Segment:					
Americas	\$ 93,864	17%	\$ 80,095	4%	\$ 77,093
Europe	50,337	14%	44,285	8%	40,980
Greater China	58,715	84%	31,853	18%	27,016
Japan	15,706	3%	15,314	11%	13,782
Rest of Asia Pacific	15,093	34%	11,248	(7)%	12,039
Total net sales	\$ 233,715	28%	\$ 182,795	7%	\$ 170,910
Net Sales by Product:					
iPhone ⁽¹⁾	\$ 155,041	52%	\$ 101,991	12%	\$ 91,279
iPad ⁽¹⁾	23,227	(23)%	30,283	(5)%	31,980
Mac ⁽¹⁾	25,471	6%	24,079	12%	21,483
Services ⁽²⁾	19,909	10%	18,063	13%	16,051
Other Products ⁽¹⁾⁽³⁾	10,067	20%	8,379	(17)%	10,117
Total net sales	\$ 233,715	28%	\$ 182,795	7%	\$ 170,910
Unit Sales by Product:					
iPhone	231,218	37%	169,219	13%	150,257
iPad	54,856	(19)%	67,977	(4)%	71,033
Mac	20,587	9%	18,906	16%	16,341

(1) Includes deferrals and amortization of related software upgrade rights and non-software services.

(2) Includes revenue from the iTunes Store®, App Store, Mac App Store, iBooks Store and Apple Music (collectively Internet Services), AppleCare, Apple Pay, Licensing and other services.

- (3) Includes sales of Apple TV®, Apple Watch, Beats products, iPod and Apple-branded and third-party accessories.

Table of Contents**Product Performance***iPhone*

The following table presents iPhone net sales and unit sales information for 2015, 2014 and 2013 (dollars in millions and units in thousands):

	2015	Change	2014	Change	2013
Net sales	\$ 155,041	52%	\$ 101,991	12%	\$ 91,279
Percentage of total net sales	66%		56%		53%
Unit sales	231,218	37%	169,219	13%	150,257

The year-over-year growth in iPhone net sales and unit sales during 2015 primarily resulted from strong demand for iPhone 6 and 6 Plus during 2015. Overall average selling prices (ASPs) for iPhone increased by 11% during 2015 compared to 2014, due primarily to the introduction of iPhone 6 and 6 Plus in September 2014, partially offset by the effect of weakness in most foreign currencies relative to the U.S. dollar.

The year-over-year growth in iPhone net sales and unit sales in 2014 resulted primarily from the successful introduction of new iPhones in the latter half of calendar year 2013, the successful launch of iPhone 6 and 6 Plus beginning in September 2014, and expanded distribution. iPhone unit sales grew in all of the Company's operating segments, while iPhone net sales grew in all segments except Rest of Asia Pacific. Overall ASPs for iPhone were relatively flat in 2014 compared to 2013, with growth in ASPs in the Americas segment being offset by a decline in ASPs in the Greater China, Japan and Rest of Asia Pacific segments.

iPad

The following table presents iPad net sales and unit sales information for 2015, 2014 and 2013 (dollars in millions and units in thousands):

	2015	Change	2014	Change	2013
Net sales	\$ 23,227	(23)%	\$ 30,283	(5)%	\$ 31,980
Percentage of total net sales	10%		17%		19%
Unit sales	54,856	(19)%	67,977	(4)%	71,033

Net sales and unit sales for iPad declined during 2015 compared to 2014. The Company believes the decline in iPad sales is due in part to a longer repurchase cycle for iPads and some level of cannibalization from the Company's other products. iPad ASPs declined by 5% during 2015 compared to 2014, primarily as a result of the effect of weakness in most foreign currencies relative to the U.S. dollar and a shift in mix to lower-priced iPads.

Net sales and unit sales for iPad declined in 2014 compared to 2013. iPad net sales and unit sales grew in the Greater China and Japan segments but this growth was more than offset by a decline in all other segments. Overall iPad ASPs were relatively flat in 2014 compared to 2013 with a shift in mix to higher-priced iPads being offset by the October 2013 price reduction of iPad mini . ASPs increased in the Japan and Rest of Asia Pacific segments but were slightly down in other segments.

Mac

The following table presents Mac net sales and unit sales information for 2015, 2014 and 2013 (dollars in millions and units in thousands):

	2015	Change	2014	Change	2013
Net sales	\$ 25,471	6%	\$ 24,079	12%	\$ 21,483
Percentage of total net sales	11%		13%		13%
Unit sales	20,587	9%	18,906	16%	16,341

The year-over-year growth in Mac net sales and unit sales during 2015 was driven by strong demand for Mac portables. Mac ASPs declined 3% during 2015 compared to 2014 largely due to the effect of weakness in most foreign currencies relative to the U.S. dollar.

The year-over-year growth in Mac net sales and unit sales for 2014 was primarily driven by increased sales of MacBook Air, MacBook Pro and Mac Pro. Mac net sales and unit sales increased in all of the Company's operating segments. Mac ASPs decreased during 2014 compared to 2013 primarily due to price reductions on certain Mac models and a shift in mix towards Mac portable systems.

Table of Contents*Services*

The following table presents net sales information of Services for 2015, 2014 and 2013 (dollars in millions):

	2015	Change	2014	Change	2013
Net sales	\$ 19,909	10%	\$ 18,063	13%	\$ 16,051
Percentage of total net sales	9%		10%		9%

The increase in net sales of Services during 2015 compared to 2014 was primarily due to growth from Internet Services and licensing. The App Store, included within Internet Services, generated strong year-over-year net sales growth of 29%.

The increase in net sales of Services in 2014 compared to 2013 was primarily due to growth in net sales from Internet Services, AppleCare and licensing. Internet Services generated a total of \$10.2 billion in net sales during 2014 compared to \$9.3 billion during 2013. Growth in net sales from Internet Services was driven by increases in revenue from app sales reflecting continued growth in the installed base of iOS devices and the expanded offerings of iOS apps and related in-app purchases. This was partially offset by a decline in sales of digital music.

Segment Operating Performance

The Company manages its business primarily on a geographic basis. The Company's reportable operating segments consist of the Americas, Europe, Greater China, Japan and Rest of Asia Pacific. The Americas segment includes both North and South America. The Europe segment includes European countries, as well as India, the Middle East and Africa. The Greater China segment includes China, Hong Kong and Taiwan. The Rest of Asia Pacific segment includes Australia and those Asian countries not included in the Company's other reportable operating segments. Although, each reportable operating segment provides similar hardware and software products and similar services, they are managed separately to better align with the location of the Company's customers and distribution partners and the unique market dynamics of each geographic region. Further information regarding the Company's reportable operating segments can be found in Part II, Item 8 of this Form 10-K in the Notes to Consolidated Financial Statements in Note 11, Segment Information and Geographic Data.

Americas

The following table presents Americas net sales information for 2015, 2014 and 2013 (dollars in millions):

	2015	Change	2014	Change	2013
Net sales	\$ 93,864	17%	\$ 80,095	4%	\$ 77,093
Percentage of total net sales	40%		44%		45%

The year-over-year growth in Americas net sales during 2015 was driven primarily by growth in net sales and unit sales of iPhone, partially offset by a decline in net sales and unit sales of iPad.

The growth in the Americas segment in 2014 was due to increased net sales of iPhone, Mac and Services that was partially offset by a decline in net sales of iPad and Other Products and weakness in foreign currencies relative to the

U.S. dollar compared to 2013. iPhone growth resulted primarily from the successful introduction of iPhone 5s and 5c in September 2013 and the successful launch of iPhone 6 and 6 Plus in September 2014. Mac growth was driven primarily by increased net sales and unit sales of MacBook Air and Mac Pro.

Europe

The following table presents Europe net sales information for 2015, 2014 and 2013 (dollars in millions):

	2015	Change	2014	Change	2013
Net sales	\$ 50,337	14%	\$ 44,285	8%	\$ 40,980
Percentage of total net sales	22%		24%		24%

The year-over-year increase in Europe net sales during 2015 was driven primarily by growth in net sales and unit sales of iPhone, partially offset by the effect of weakness in foreign currencies relative to the U.S. dollar and a decline in net sales and unit sales of iPad.

The growth in the Europe segment in 2014 was due to increased net sales of iPhone, Mac and Services, as well as strength in European currencies relative to the U.S. dollar, partially offset by a decline in net sales of iPad. iPhone growth resulted primarily from the successful introduction of iPhone 5s and 5c in the second half of calendar 2013 and the successful launch of iPhone 6 and 6 Plus in over 20 countries in Europe in September 2014. Mac growth was driven primarily by increased net sales and unit sales of MacBook Air, MacBook Pro and Mac Pro.

Table of Contents*Greater China*

The following table presents Greater China net sales information for 2015, 2014 and 2013 (dollars in millions):

	2015	Change	2014	Change	2013
Net sales	\$ 58,715	84%	\$ 31,853	18%	\$ 27,016
Percentage of total net sales	25%		17%		16%

Greater China experienced strong year-over-year increases in net sales during 2015 driven primarily by iPhone sales.

The Greater China segment experienced year-over-year growth in net sales in 2014 that was significantly higher than the growth rate for the Company overall. Greater China growth was driven by higher unit sales and net sales of all major product categories, in addition to higher net sales of Services. Growth in net sales and unit sales of iPhone was especially strong, driven by the successful launch of iPhone 5s and 5c in Mainland China and Hong Kong in September 2013, the successful launch of iPhone 6 and 6 Plus in Hong Kong in September 2014, increased demand for the Company's entry-priced iPhones and the addition of a significant new carrier in the second quarter of 2014.

Japan

The following table presents Japan net sales information for 2015, 2014 and 2013 (dollars in millions):

	2015	Change	2014	Change	2013
Net sales	\$ 15,706	3%	\$ 15,314	11%	\$ 13,782
Percentage of total net sales	7%		8%		8%

The year-over-year increase in Japan net sales during 2015 was driven primarily by growth in Services largely associated with strong App Store sales, partially offset by the effect of weakness in the Japanese yen relative to the U.S. dollar.

In 2014 the Japan segment generated year-over-year increases in net sales and unit sales of every major product category and experienced growth in net sales of Services. The year-over-year growth in iPhone was driven by the successful launch of iPhone 5s and 5c in September 2013, the successful launch of iPhone 6 and 6 Plus in September 2014, increased demand for the Company's entry-priced iPhones and the addition of a significant new carrier in the fourth quarter of 2013. These positive factors were partially offset by weakness in the Japanese Yen relative to the U.S. dollar.

Rest of Asia Pacific

The following table presents Rest of Asia Pacific net sales information for 2015, 2014 and 2013 (dollars in millions):

	2015	Change	2014	Change	2013
--	-------------	---------------	-------------	---------------	-------------

Edgar Filing: APPLE INC - Form 10-K

Net sales	\$	15,093	34%	\$	11,248	(7)%	\$	12,039
Percentage of total net sales		6%			6%			7%

The year-over-year increase in Rest of Asia Pacific net sales during 2015 primarily reflects strong growth in net sales and unit sales of iPhone, partially offset by the effect of weakness in foreign currencies relative to the U.S. dollar and a decline in net sales and unit sales of iPad.

Net sales in the Rest of Asia Pacific segment declined in 2014 compared to 2013 due to year-over-year reductions in net sales in all major product categories except Mac and reductions in unit sales of iPad. Net sales in 2014 were also negatively affected by the weakness in several foreign currencies relative to the U.S. dollar, including the Australian dollar.

Table of Contents**Gross Margin**

Gross margin for 2015, 2014 and 2013 is as follows (dollars in millions):

	2015	2014	2013
Net sales	\$ 233,715	\$ 182,795	\$ 170,910
Cost of sales	140,089	112,258	106,606
Gross margin	\$ 93,626	\$ 70,537	\$ 64,304
Gross margin percentage	40.1%	38.6%	37.6%

The year-over-year increase in the gross margin percentage in 2015 was driven primarily by a favorable shift in mix to products with higher margins and, to a lesser extent, by improved leverage on fixed costs from higher net sales. These positive factors were partially offset primarily by higher product cost structures and, to a lesser extent, by the effect of weakness in most foreign currencies relative to the U.S. dollar.

The year-over-year increase in the gross margin percentage in 2014 was driven by multiple factors including lower commodity costs, a favorable shift in mix to products with higher margins and improved leverage on fixed costs from higher net sales, which was partially offset by the weakness in several foreign currencies relative to the U.S. dollar, price reductions on select products and higher cost structures on certain new products.

The Company anticipates gross margin during the first quarter of 2016 to be between 39% and 40%. The foregoing statement regarding the Company's expected gross margin percentage in the first quarter of 2016 is forward-looking and could differ from actual results. The Company's future gross margins can be impacted by multiple factors including, but not limited to, those set forth in Part I, Item 1A of this Form 10-K under the heading "Risk Factors" and those described in this paragraph. In general, the Company believes gross margins will remain under downward pressure due to a variety of factors, including continued industry wide global product pricing pressures, increased competition, compressed product life cycles, product transitions, potential increases in the cost of components, and potential strengthening of the U.S. dollar, as well as potential increases in the costs of outside manufacturing services and a potential shift in the Company's sales mix towards products with lower gross margins. In response to competitive pressures, the Company expects it will continue to take product pricing actions, which would adversely affect gross margins. Gross margins could also be affected by the Company's ability to manage product quality and warranty costs effectively and to stimulate demand for certain of its products. Due to the Company's significant international operations, its financial condition and operating results, including gross margins, could be significantly affected by fluctuations in exchange rates.

Operating Expenses

Operating expenses for 2015, 2014 and 2013 are as follows (dollars in millions):

	2015	Change	2014	Change	2013
Research and development	\$ 8,067	34%	\$ 6,041	35%	\$ 4,475

Edgar Filing: APPLE INC - Form 10-K

Percentage of total net sales		3%		3%		3%
Selling, general and administrative	\$	14,329	19%	\$	11,993	11%
Percentage of total net sales		6%		7%		6%
Total operating expenses	\$	22,396	24%	\$	18,034	18%
Percentage of total net sales		10%		10%		9%

Research and Development

The year-over-year growth in R&D expense in 2015 and 2014 was driven primarily by an increase in headcount and related expenses, including share-based compensation costs, and material costs to support expanded R&D activities. The Company continues to believe that focused investments in R&D are critical to its future growth and competitive position in the marketplace and are directly related to timely development of new and updated products that are central to the Company's core business strategy.

Selling, General and Administrative

The year-over-year growth in selling, general and administrative expense in 2015 and 2014 was primarily due to increased headcount and related expenses, including share-based compensation costs, and higher spending on marketing and advertising.

Table of Contents**Other Income/(Expense), Net**

Other income/(expense), net for 2015, 2014 and 2013 are as follows (dollars in millions):

	2015	Change	2014	Change	2013
Interest and dividend income	\$ 2,921		\$ 1,795		\$ 1,616
Interest expense	(733)		(384)		(136)
Other expense, net	(903)		(431)		(324)
Total other income/(expense), net	\$ 1,285	31%	\$ 980	(15)%	\$ 1,156

The increase in other income/(expense), net during 2015 compared to 2014 was due primarily to higher interest income, partially offset by higher expenses associated with foreign exchange activity and higher interest expense on debt. The decrease in other income and expense during 2014 compared to 2013 was due primarily to higher interest expense on debt and higher expenses associated with foreign exchange rate movements, partially offset by lower premium expenses on foreign exchange contracts and higher interest income. The weighted-average interest rate earned by the Company on its cash, cash equivalents and marketable securities was 1.49%, 1.11% and 1.03% in 2015, 2014 and 2013, respectively.

Provision for Income Taxes

Provision for income taxes and effective tax rates for 2015, 2014 and 2013 are as follows (dollars in millions):

	2015	2014	2013
Provision for income taxes	\$ 19,121	\$ 13,973	\$ 13,118
Effective tax rate	26.4%	26.1%	26.2%

The Company's effective tax rates for 2015, 2014 and 2013 differ from the statutory federal income tax rate of 35% due primarily to certain undistributed foreign earnings, a substantial portion of which was generated by subsidiaries organized in Ireland, for which no U.S. taxes are provided when such earnings are intended to be indefinitely reinvested outside the U.S. The higher effective tax rate during 2015 compared to 2014 was due primarily to higher foreign taxes. The effective tax rate in 2014 compared to 2013 was relatively flat.

As of September 26, 2015, the Company had deferred tax assets arising from deductible temporary differences, tax losses and tax credits of \$7.8 billion and deferred tax liabilities of \$24.1 billion. Management believes it is more likely than not that forecasted income, including income that may be generated as a result of certain tax planning strategies, together with future reversals of existing taxable temporary differences, will be sufficient to fully recover the deferred tax assets. The Company will continue to evaluate the realizability of deferred tax assets quarterly by assessing the need for and the amount of a valuation allowance.

The U.S. Internal Revenue Service is currently examining the years 2010 through 2012, and all years prior to 2010 are closed. In addition, the Company is subject to audits by state, local and foreign tax authorities. In major states and major foreign jurisdictions, the years subsequent to 2003 generally remain open and could be subject to examination

by the taxing authorities. Management believes that adequate provisions have been made for any adjustments that may result from tax examinations. However, the outcome of tax audits cannot be predicted with certainty. If any issues addressed in the Company's tax audits are resolved in a manner not consistent with management's expectations, the Company could be required to adjust its provision for income taxes in the period such resolution occurs.

On June 11, 2014, the European Commission issued an opening decision initiating a formal investigation against Ireland for alleged state aid to the Company. The opening decision concerns the allocation of profits for taxation purposes of the Irish branches of two subsidiaries of the Company. The Company believes the European Commission's assertions are without merit. If the European Commission were to conclude against Ireland, the European Commission could require Ireland to recover from the Company past taxes covering a period of up to 10 years reflective of the disallowed state aid. While such amount could be material, as of September 26, 2015 the Company is unable to estimate the impact.

Table of Contents**Recent Accounting Pronouncements**

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09, Revenue from Contracts with Customers (Topic 606) (ASU 2014-09), which amends the existing accounting standards for revenue recognition. ASU 2014-09 is based on principles that govern the recognition of revenue at an amount an entity expects to be entitled when products are transferred to customers.

The original effective date for ASU 2014-09 would have required the Company to adopt beginning in its first quarter of 2018. In August 2015, the FASB issued ASU No. 2015-14, Revenue from Contracts with Customers (Topic 606) Deferral of the Effective Date, which defers the effective date of ASU 2014-09 for one year and permits early adoption as early as the original effective date of ASU 2014-09. Accordingly, the Company may adopt the standard in either its first quarter of 2018 or 2019. The new revenue standard may be applied retrospectively to each prior period presented or retrospectively with the cumulative effect recognized as of the date of adoption. The Company is currently evaluating the timing of its adoption and the impact of adopting the new revenue standard on its consolidated financial statements.

Liquidity and Capital Resources

The following table presents selected financial information and statistics as of and for the years ended September 26, 2015, September 27, 2014 and September 28, 2013 (in millions):

	2015	2014	2013
Cash, cash equivalents and marketable securities	\$ 205,666	\$ 155,239	\$ 146,761
Property, plant and equipment, net	\$ 22,471	\$ 20,624	\$ 16,597
Commercial paper	\$ 8,499	\$ 6,308	\$ 0
Total term debt	\$ 55,963	\$ 28,987	\$ 16,960
Working capital	\$ 8,768	\$ 5,083	\$ 29,628
Cash generated by operating activities	\$ 81,266	\$ 59,713	\$ 53,666
Cash used in investing activities	\$ (56,274)	\$ (22,579)	\$ (33,774)
Cash used in financing activities	\$ (17,716)	\$ (37,549)	\$ (16,379)

The Company believes its existing balances of cash, cash equivalents and marketable securities will be sufficient to satisfy its working capital needs, capital asset purchases, outstanding commitments and other liquidity requirements associated with its existing operations over the next 12 months. The Company currently anticipates the cash used for future dividends, the share repurchase program and debt repayments will come from its current domestic cash, cash generated from on-going U.S. operating activities and from borrowings.

As of September 26, 2015 and September 27, 2014, the Company's cash, cash equivalents and marketable securities held by foreign subsidiaries were \$186.9 billion and \$137.1 billion, respectively, and are generally based in U.S. dollar-denominated holdings. Amounts held by foreign subsidiaries are generally subject to U.S. income taxation on repatriation to the U.S. The Company's marketable securities investment portfolio is invested primarily in highly-rated securities and its investment policy generally limits the amount of credit exposure to any one issuer. The policy requires investments generally to be investment grade with the objective of minimizing the potential risk of principal loss.

During 2015, cash generated from operating activities of \$81.3 billion was a result of \$53.4 billion of net income, non-cash adjustments to net income of \$16.2 billion and an increase in the net change in operating assets and liabilities of \$11.7 billion. Cash used in investing activities of \$56.3 billion during 2015 consisted primarily of cash used for purchases of marketable securities, net of sales and maturities, of \$44.4 billion and cash used to acquire property, plant and equipment of \$11.2 billion. Cash used in financing activities of \$17.7 billion during 2015 consisted primarily of cash used to repurchase common stock of \$35.3 billion and cash used to pay dividends and dividend equivalents of \$11.6 billion, partially offset by net proceeds from the issuance of term debt of \$27.1 billion.

During 2014, cash generated from operating activities of \$59.7 billion was a result of \$39.5 billion of net income, non-cash adjustments to net income of \$13.2 billion and an increase in net change in operating assets and liabilities of \$7.0 billion. Cash used in investing activities of \$22.6 billion during 2014 consisted primarily of cash used for purchases of marketable securities, net of sales and maturities, of \$9.0 billion; cash used to acquire property, plant and equipment of \$9.6 billion; and cash paid for business acquisitions, net of cash acquired, of \$3.8 billion. Cash used in financing activities of \$37.5 billion during 2014 consisted primarily of cash used to repurchase common stock of \$45.0 billion and cash used to pay dividends and dividend equivalents of \$11.1 billion, partially offset by net proceeds from the issuance of term debt and commercial paper of \$12.0 billion and \$6.3 billion, respectively.

Table of Contents*Capital Assets*

The Company's capital expenditures were \$11.2 billion during 2015. The Company anticipates utilizing approximately \$15.0 billion for capital expenditures during 2016, which includes product tooling and manufacturing process equipment; data centers; corporate facilities and infrastructure, including information systems hardware, software and enhancements; and retail store facilities.

Debt

In 2014, the Board of Directors authorized the Company to issue unsecured short-term promissory notes (Commercial Paper) pursuant to a commercial paper program. The Company intends to use the net proceeds from the commercial paper program for general corporate purposes, including dividends and share repurchases. As of September 26, 2015, the Company had \$8.5 billion of Commercial Paper outstanding, with a weighted-average interest rate of 0.14% and maturities generally less than nine months.

As of September 26, 2015, the Company has outstanding floating- and fixed-rate notes for an aggregate principal amount of \$55.7 billion (collectively the Notes). The Company has entered, and in the future may enter, into interest rate swaps to manage interest rate risk on the Notes. In addition, the Company has entered, and in the future may enter, into currency swaps to manage foreign currency risk on the Notes. The future principal payments for the Company's Notes as of September 26, 2015 are as follows (in millions):

2016	\$ 2,500
2017	3,500
2018	6,000
2019	3,775
2020	5,581
Thereafter	34,345
Total term debt	\$ 55,701

Further information regarding the Company's debt issuances and related hedging activity can be found in Part II, Item 8 of this Form 10-K in the Notes to the Consolidated Financial Statements in Note 2, Financial Instruments and Note 6, Debt.

Capital Return Program

In April 2015, the Company's Board of Directors increased the share repurchase program authorization from \$90 billion to \$140 billion of the Company's common stock, increasing the expected total size of the capital return program to \$200 billion. The Company expects to execute the capital return program by the end of March 2017 by paying dividends and dividend equivalents, repurchasing shares and remitting withheld taxes related to net share settlement of restricted stock units. To assist in funding its capital return program, the Company expects to continue to access the debt markets, both domestically and internationally. As of September 26, 2015, \$104 billion of the share repurchase program has been utilized. The Company's share repurchase program does not obligate it to acquire any specific number of shares. Under the program, shares may be repurchased in privately negotiated or open market transactions, including under plans complying with Rule 10b5-1 under the Securities Exchange Act of 1934, as amended.

In April 2015, the Company's Board of Directors raised the quarterly cash dividend by 11%. The Company plans to increase its dividend on an annual basis subject to declaration by the Board of Directors.

The following table presents the Company's dividends, dividend equivalents, share repurchases and net share settlement activity from the start of the capital return program in August 2012 through September 26, 2015 (in millions):

	Dividends and Dividend Equivalents Paid	Accelerated Share Repurchases	Open Market Share Repurchases	Taxes Related to Settlement of Equity Awards	Total
2015	\$ 11,561	\$ 6,000	\$ 30,026	\$ 1,499	\$ 49,086
2014	11,126	21,000	24,000	1,158	57,284
2013	10,564	13,950	9,000	1,082	34,596
2012	2,488	0	0	56	2,544
Total	\$ 35,739	\$ 40,950	\$ 63,026	\$ 3,795	\$ 143,510

Apple Inc. | 2015 Form 10-K | 31

Table of Contents**Off-Balance Sheet Arrangements and Contractual Obligations**

The Company has not entered into any transactions with unconsolidated entities whereby the Company has financial guarantees, subordinated retained interests, derivative instruments, or other contingent arrangements that expose the Company to material continuing risks, contingent liabilities, or any other obligation under a variable interest in an unconsolidated entity that provides financing, liquidity, market risk, or credit risk support to the Company, or engages in leasing, hedging, or R&D services with the Company.

The following table presents certain payments due by the Company under contractual obligations with minimum firm commitments as of September 26, 2015, and excludes amounts already recorded on the Consolidated Balance Sheet, except for term debt (in millions):

	Payments Due in Less Than 1 Year	Payments Due in 1-3 Years	Payments Due in 4-5 Years	Payments Due in More Than 5 Years	Total
Term debt	\$ 2,500	\$ 9,500	\$ 9,356	\$ 34,345	\$ 55,701
Operating leases	772	1,518	1,389	2,592	6,271
Purchase commitments	29,464	0	0	0	29,464
Other obligations	4,553	1,898	53	757	7,261
Total	\$ 37,289	\$ 12,916	\$ 10,798	\$ 37,694	\$ 98,697

Operating Leases

The Company's major facility leases are typically for terms not exceeding 10 years and generally contain multi-year renewal options. As of September 26, 2015, the Company had a total of 463 retail stores. Leases for retail space are for terms ranging from five to 20 years, the majority of which are for 10 years, and often contain multi-year renewal options. As of September 26, 2015, the Company's total future minimum lease payments under noncancelable operating leases were \$6.3 billion, of which \$3.6 billion related to leases for retail space.

Purchase Commitments

The Company utilizes several outsourcing partners to manufacture sub-assemblies for the Company's products and to perform final assembly and testing of finished products. These outsourcing partners acquire components and build product based on demand information supplied by the Company, which typically covers periods up to 150 days. The Company also obtains individual components for its products from a wide variety of individual suppliers. Consistent with industry practice, the Company acquires components through a combination of purchase orders, supplier contracts, and open orders based on projected demand information. Where appropriate, the purchases are applied to inventory component prepayments that are outstanding with the respective supplier. As of September 26, 2015, the Company had outstanding off-balance sheet third-party manufacturing commitments and component purchase commitments of \$29.5 billion.

Other Obligations

The Company's other off-balance sheet obligations were comprised of commitments to acquire capital assets, including product tooling and manufacturing process equipment, and commitments related to inventory prepayments, advertising, licensing, R&D, internet and telecommunications services, energy and other obligations.

The Company's other non-current liabilities in the Consolidated Balance Sheets consist primarily of deferred tax liabilities, gross unrecognized tax benefits and the related gross interest and penalties. As of September 26, 2015, the Company had non-current deferred tax liabilities of \$24.1 billion. Additionally, as of September 26, 2015, the Company had gross unrecognized tax benefits of \$6.9 billion and an additional \$1.3 billion for gross interest and penalties classified as non-current liabilities. At this time, the Company is unable to make a reasonably reliable estimate of the timing of payments in individual years in connection with these tax liabilities; therefore, such amounts are not included in the above contractual obligation table.

Indemnification

The Company generally does not indemnify end-users of its operating system and application software against legal claims that the software infringes third-party intellectual property rights. Other agreements entered into by the Company sometimes include indemnification provisions under which the Company could be subject to costs and/or damages in the event of an infringement claim against the Company or an indemnified third-party. In the opinion of management, there was not at least a reasonable possibility the Company may have incurred a material loss with respect to indemnification of end-users of its operating system or application software for infringement of third-party intellectual property rights. The Company did not record a liability for infringement costs related to indemnification as of September 26, 2015 or September 27, 2014.

Table of Contents

In September 2015, the Company introduced the iPhone Upgrade Program, which is available to customers who purchase an iPhone 6s and 6s Plus in one of its U.S. physical retail stores and activate the purchased iPhone with one of the four national carriers. The iPhone Upgrade Program provides customers the right to trade in that iPhone for a new iPhone, provided certain conditions are met. One of the conditions of this program requires the customer to finance the initial purchase price of the iPhone with a third-party lender. Upon exercise of the trade-in right and purchase of a new iPhone, the Company satisfies the customer's outstanding balance due to the third-party lender on the original device. The Company accounts for the trade-in right as a guarantee liability and recognizes arrangement revenue net of the fair value of such right with subsequent changes to the guarantee liability recognized within revenue.

The Company has entered into indemnification agreements with its directors and executive officers. Under these agreements, the Company has agreed to indemnify such individuals to the fullest extent permitted by law against liabilities that arise by reason of their status as directors or officers and to advance expenses incurred by such individuals in connection with related legal proceedings. It is not possible to determine the maximum potential amount of payments the Company could be required to make under these agreements due to the limited history of prior indemnification claims and the unique facts and circumstances involved in each claim. However, the Company maintains directors and officers liability insurance coverage to reduce its exposure to such obligations.

Critical Accounting Policies and Estimates

The preparation of financial statements and related disclosures in conformity with U.S. generally accepted accounting principles (GAAP) and the Company's discussion and analysis of its financial condition and operating results require the Company's management to make judgments, assumptions and estimates that affect the amounts reported in its consolidated financial statements and accompanying notes. Note 1, Summary of Significant Accounting Policies, of the Notes to Consolidated Financial Statements in Part II, Item 8 of this Form 10-K describes the significant accounting policies and methods used in the preparation of the Company's consolidated financial statements. Management bases its estimates on historical experience and on various other assumptions it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities. Actual results may differ from these estimates, and such differences may be material.

Management believes the Company's critical accounting policies and estimates are those related to revenue recognition, valuation and impairment of marketable securities, inventory valuation and valuation of manufacturing-related assets and estimated purchase commitment cancellation fees, warranty costs, income taxes, and legal and other contingencies. Management considers these policies critical because they are both important to the portrayal of the Company's financial condition and operating results, and they require management to make judgments and estimates about inherently uncertain matters. The Company's senior management has reviewed these critical accounting policies and related disclosures with the Audit and Finance Committee of the Company's Board of Directors.

Revenue Recognition

Net sales consist primarily of revenue from the sale of hardware, software, digital content and applications, accessories, and service and support contracts. The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable and collection is probable. Product is considered delivered to the customer once it has been shipped and title, risk of loss and rewards of ownership have been transferred. For most of the Company's product sales, these criteria are met at the time the product is shipped. For online sales to individuals, for some sales to education customers in the U.S., and for certain other sales, the Company defers revenue until the customer receives the product because the Company retains a portion of the risk of loss on

these sales during transit. For payment terms in excess of the Company's standard payment terms, revenue is recognized as payments become due unless the Company has positive evidence that the sales price is fixed or determinable, such as a successful history of collection, without concession, on comparable arrangements. The Company recognizes revenue from the sale of hardware products, software bundled with hardware that is essential to the functionality of the hardware and third-party digital content sold on the iTunes Store in accordance with general revenue recognition accounting guidance. The Company recognizes revenue in accordance with industry-specific software accounting guidance for the following types of sales transactions: (i) standalone sales of software products, (ii) sales of software upgrades and (iii) sales of software bundled with hardware not essential to the functionality of the hardware.

For multi-element arrangements that include hardware products containing software essential to the hardware product's functionality, undelivered software elements that relate to the hardware product's essential software and/or undelivered non-software services, the Company allocates revenue to all deliverables based on their relative selling prices. In such circumstances, the Company uses a hierarchy to determine the selling price to be used for allocating revenue to deliverables: (i) vendor-specific objective evidence of fair value (VSOE), (ii) third-party evidence of selling price (TPE) and (iii) best estimate of selling price (ESP). VSOE generally exists only when the Company sells the deliverable separately and is the price actually charged by the Company for that deliverable. ESPs reflect the Company's best estimates of what the selling prices of elements would be if they were sold regularly on a stand-alone basis.

Table of Contents

For sales of qualifying versions of iOS devices, Mac, Apple Watch and Apple TV, the Company has indicated it may from time to time provide future unspecified software upgrades to the device's essential software and/or non-software services free of charge. Because the Company has neither VSOE nor TPE for the unspecified software upgrade rights or the non-software services, revenue is allocated to these rights and services based on the Company's ESPs. Revenue allocated to the unspecified software upgrade rights and non-software services based on the Company's ESPs is deferred and recognized on a straight-line basis over the estimated period the software upgrades and non-software services are expected to be provided.

The Company's process for determining ESPs involves management's judgment and considers multiple factors that may vary over time depending upon the unique facts and circumstances related to each deliverable. Should future facts and circumstances change, the Company's ESPs and the future rate of related amortization for unspecified software upgrades and non-software services related to future sales of these devices could change. Factors subject to change include the unspecified software upgrade rights and non-software services offered, the estimated value of unspecified software upgrade rights and non-software services and the estimated period unspecified software upgrades and non-software services are expected to be provided.

The Company records reductions to revenue for estimated commitments related to price protection and other customer incentive programs. For transactions involving price protection, the Company recognizes revenue net of the estimated amount to be refunded, provided the refund amount can be reasonably and reliably estimated and the other conditions for revenue recognition have been met. The Company's policy requires that, if refunds cannot be reliably estimated, revenue is not recognized until reliable estimates can be made or the price protection lapses. For the Company's other customer incentive programs, the estimated cost is recognized at the later of the date at which the Company has sold the product or the date at which the program is offered. The Company also records reductions to revenue for expected future product returns based on the Company's historical experience. Future market conditions and product transitions may require the Company to increase customer incentive programs that could result in reductions to future revenue. Additionally, certain customer incentive programs require management to estimate the number of customers who will actually redeem the incentive. Management's estimates are based on historical experience and the specific terms and conditions of particular incentive programs. If a greater than estimated proportion of customers redeems such incentives, the Company would be required to record additional reductions to revenue, which would have an adverse impact on the Company's operating results.

Valuation and Impairment of Marketable Securities

The Company's investments in available-for-sale securities are reported at fair value. Unrealized gains and losses related to changes in the fair value of securities are recognized in accumulated other comprehensive income, net of tax, in the Company's Consolidated Balance Sheets. Changes in the fair value of available-for-sale securities impact the Company's net income only when such securities are sold or an other-than-temporary impairment is recognized. Realized gains and losses on the sale of securities are determined by specific identification of each security's cost basis. The Company regularly reviews its investment portfolio to determine if any security is other-than-temporarily impaired, which would require the Company to record an impairment charge in the period any such determination is made. In making this judgment, the Company evaluates, among other things, the duration and extent to which the fair value of a security is less than its cost; the financial condition of the issuer and any changes thereto; and the Company's intent to sell, or whether it will more likely than not be required to sell, the security before recovery of its amortized cost basis. The Company's assessment on whether a security is other-than-temporarily impaired could change in the future due to new developments or changes in assumptions related to any particular security, which would have an adverse impact on the Company's operating results.

Inventory Valuation and Valuation of Manufacturing-Related Assets and Estimated Purchase Commitment Cancellation Fees

The Company must purchase components and build inventory in advance of product shipments and has invested in manufacturing-related assets, including capital assets held at its suppliers' facilities. In addition, the Company has made prepayments to certain of its suppliers associated with long-term supply agreements to secure supply of inventory components. The Company records a write-down for inventories of components and products, including third-party products held for resale, which have become obsolete or are in excess of anticipated demand or net realizable value. The Company performs a detailed review of inventory that considers multiple factors including demand forecasts, product life cycle status, product development plans, current sales levels and component cost trends. The Company also reviews its manufacturing-related capital assets and inventory prepayments for impairment whenever events or circumstances indicate the carrying amount of such assets may not be recoverable. If the Company determines that an asset is not recoverable, it records an impairment loss equal to the amount by which the carrying value of such an asset exceeds its fair value.

The industries in which the Company competes are subject to a rapid and unpredictable pace of product and component obsolescence and demand changes. In certain circumstances the Company may be required to record additional write-downs of inventory and/or manufacturing-related assets. These circumstances include future demand or market conditions for the Company's products being less favorable than forecasted, unforeseen technological changes or changes to the Company's product development plans that negatively impact the utility of any of these assets, or significant deterioration in the financial condition of one or more of the Company's suppliers that hold any of the Company's manufacturing-related assets or to whom the Company has made an inventory prepayment. Such write-downs would adversely affect the Company's financial condition and operating results in the period when the write-downs were recorded.

Table of Contents

The Company accrues for estimated cancellation fees related to inventory orders that have been cancelled or are expected to be cancelled. Consistent with industry practice, the Company acquires components through a combination of purchase orders, supplier contracts, and open orders in each case based on projected demand. Where appropriate, the purchases are applied to inventory component prepayments that are outstanding with the respective supplier. Purchase commitments typically cover the Company's forecasted component and manufacturing requirements for periods up to 150 days. If there is an abrupt and substantial decline in demand for one or more of the Company's products, a change in the Company's product development plans, or an unanticipated change in technological requirements for any of the Company's products, the Company may be required to record additional accruals for cancellation fees that would adversely affect its results of operations in the period when the cancellation fees are identified and recorded.

Warranty Costs

The Company accrues for the estimated cost of warranties at the time the related revenue is recognized based on historical and projected warranty claim rates, historical and projected cost-per-claim and knowledge of specific product failures that are outside of the Company's typical experience. The Company regularly reviews these estimates to assess the adequacy of its recorded warranty liabilities or the current installed base of products subject to warranty protection and adjusts the amounts as necessary. If actual product failure rates or repair costs differ from estimates, revisions to the estimated warranty liabilities would be required and could materially affect the Company's financial condition and operating results.

Income Taxes

The Company records a tax provision for the anticipated tax consequences of its reported operating results. The provision for income taxes is computed using the asset and liability method, under which deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities, and for operating losses and tax credit carryforwards. Deferred tax assets and liabilities are measured using the currently enacted tax rates that apply to taxable income in effect for the years in which those tax assets and liabilities are expected to be realized or settled. The Company records a valuation allowance to reduce deferred tax assets to the amount that is believed more likely than not to be realized.

The Company recognizes tax benefits from uncertain tax positions only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such positions are then measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement.

Management believes it is more likely than not that forecasted income, including income that may be generated as a result of certain tax planning strategies, together with future reversals of existing taxable temporary differences, will be sufficient to fully recover the deferred tax assets. In the event that the Company determines all or part of the net deferred tax assets are not realizable in the future, the Company will record an adjustment to the valuation allowance that would be charged to earnings in the period such determination is made. In addition, the calculation of tax liabilities involves significant judgment in estimating the impact of uncertainties in the application of GAAP and complex tax laws. Resolution of these uncertainties in a manner inconsistent with management's expectations could have a material impact on the Company's financial condition and operating results.

Legal and Other Contingencies

As discussed in Part I, Item 3 of this Form 10-K under the heading "Legal Proceedings" and in Part II, Item 8 of this Form 10-K in the Notes to Consolidated Financial Statements in Note 10, "Commitments and Contingencies," the Company is subject to various legal proceedings and claims that arise in the ordinary course of business. The Company records a liability when it is probable that a loss has been incurred and the amount is reasonably estimable. There is significant judgment required in both the probability determination and as to whether an exposure can be reasonably estimated. In the opinion of management, there was not at least a reasonable possibility the Company may have incurred a material loss, or a material loss in excess of a recorded accrual, with respect to loss contingencies for asserted legal and other claims. However, the outcome of legal proceedings and claims brought against the Company is subject to significant uncertainty. Therefore, although management considers the likelihood of such an outcome to be remote, if one or more of these legal matters were resolved against the Company in a reporting period for amounts in excess of management's expectations, the Company's consolidated financial statements for that reporting period could be materially adversely affected.

Table of Contents**Item 7A. Quantitative and Qualitative Disclosures About Market Risk
Interest Rate and Foreign Currency Risk Management**

The Company regularly reviews its foreign exchange forward and option positions and interest rate swaps, both on a stand-alone basis and in conjunction with its underlying foreign currency and interest rate related exposures. Given the effective horizons of the Company's risk management activities and the anticipatory nature of the exposures, there can be no assurance these positions will offset more than a portion of the financial impact resulting from movements in either foreign exchange or interest rates. Further, the recognition of the gains and losses related to these instruments may not coincide with the timing of gains and losses related to the underlying economic exposures and, therefore, may adversely affect the Company's financial condition and operating results.

Interest Rate Risk

The Company's exposure to changes in interest rates relates primarily to the Company's investment portfolio and outstanding debt. While the Company is exposed to global interest rate fluctuations, the Company's interest income and expense are most sensitive to fluctuations in U.S. interest rates. Changes in U.S. interest rates affect the interest earned on the Company's cash, cash equivalents and marketable securities and the fair value of those securities, as well as costs associated with hedging and interest paid on the Company's debt.

The Company's investment policy and strategy are focused on preservation of capital and supporting the Company's liquidity requirements. The Company uses a combination of internal and external management to execute its investment strategy and achieve its investment objectives. The Company typically invests in highly-rated securities, and its investment policy generally limits the amount of credit exposure to any one issuer. The policy requires investments generally to be investment grade, with the primary objective of minimizing the potential risk of principal loss. To provide a meaningful assessment of the interest rate risk associated with the Company's investment portfolio, the Company performed a sensitivity analysis to determine the impact a change in interest rates would have on the value of the investment portfolio assuming a 100 basis point parallel shift in the yield curve. Based on investment positions as of September 26, 2015 and September 27, 2014, a hypothetical 100 basis point increase in interest rates across all maturities would result in a \$4.3 billion and \$3.4 billion incremental decline in the fair market value of the portfolio, respectively. Such losses would only be realized if the Company sold the investments prior to maturity.

As of September 26, 2015 and September 27, 2014, the Company had outstanding floating- and fixed-rate notes with varying maturities for an aggregate carrying amount of \$56.0 billion and \$29.0 billion, respectively. The Company has entered, and may enter in the future, into interest rate swaps to manage interest rate risk on its outstanding term debt. Interest rate swaps allow the Company to effectively convert fixed-rate payments into floating-rate payments or floating-rate payments into fixed-rate payments. Gains and losses on these instruments are generally offset by the corresponding losses and gains on the related hedging instrument. A 100 basis point increase in market interest rates would cause interest expense on the Company's debt as of September 26, 2015 and September 27, 2014 to increase by \$200 million and \$110 million on an annualized basis, respectively.

Further details regarding the Company's debt is provided in Part II, Item 8 of this Form 10-K in the Notes to Consolidated Financial Statements in Note 6, Debt.

Foreign Currency Risk

In general, the Company is a net receiver of currencies other than the U.S. dollar. Accordingly, changes in exchange rates, and in particular a strengthening of the U.S. dollar, will negatively affect the Company's net sales and gross margins as expressed in U.S. dollars. There is a risk that the Company will have to adjust local currency product

pricing due to competitive pressures when there have been significant volatility in foreign currency exchange rates.

The Company may enter into foreign currency forward and option contracts with financial institutions to protect against foreign exchange risks associated with certain existing assets and liabilities, certain firmly committed transactions, forecasted future cash flows and net investments in foreign subsidiaries. In addition, the Company has entered, and may enter in the future, into non-designated foreign currency contracts to partially offset the foreign currency exchange gains and losses on its foreign-denominated debt issuances. The Company's practice is to hedge a portion of its material foreign exchange exposures, typically for up to 12 months. However, the Company may choose not to hedge certain foreign exchange exposures for a variety of reasons, including but not limited to accounting considerations and the prohibitive economic cost of hedging particular exposures.

Table of Contents

To provide a meaningful assessment of the foreign currency risk associated with certain of the Company's foreign currency derivative positions, the Company performed a sensitivity analysis using a value-at-risk (VAR) model to assess the potential impact of fluctuations in exchange rates. The VAR model consisted of using a Monte Carlo simulation to generate thousands of random market price paths assuming normal market conditions. The VAR is the maximum expected loss in fair value, for a given confidence interval, to the Company's foreign currency derivative positions due to adverse movements in rates. The VAR model is not intended to represent actual losses but is used as a risk estimation and management tool. The model assumes normal market conditions. Forecasted transactions, firm commitments and assets and liabilities denominated in foreign currencies were excluded from the model. Based on the results of the model, the Company estimates with 95% confidence a maximum one-day loss in fair value of \$342 million as of September 26, 2015 compared to a maximum one-day loss in fair value of \$240 million as of September 27, 2014. Because the Company uses foreign currency instruments for hedging purposes, the loss in fair value incurred on those instruments are generally offset by increases in the fair value of the underlying exposures.

Actual future gains and losses associated with the Company's investment portfolio and derivative positions may differ materially from the sensitivity analyses performed as of September 26, 2015 due to the inherent limitations associated with predicting the timing and amount of changes in interest rates, foreign currency exchanges rates and the Company's actual exposures and positions.

Apple Inc. | 2015 Form 10-K | 43

Table of Contents**Notes to Consolidated Financial Statements****Note 1 Summary of Significant Accounting Policies**

Apple Inc. and its wholly-owned subsidiaries (collectively Apple or the Company) designs, manufactures and markets mobile communication and media devices, personal computers and portable digital music players, and sells a variety of related software, services, accessories, networking solutions and third-party digital content and applications. The Company sells its products worldwide through its retail stores, online stores and direct sales force, as well as through third-party cellular network carriers, wholesalers, retailers and value-added resellers. In addition, the Company sells a variety of third-party Apple-compatible products, including application software and various accessories through its online and retail stores. The Company sells to consumers, small and mid-sized businesses and education, enterprise and government customers.

Basis of Presentation and Preparation

The accompanying consolidated financial statements include the accounts of the Company. Intercompany accounts and transactions have been eliminated. In the opinion of the Company's management, the consolidated financial statements reflect all adjustments, which are normal and recurring in nature, necessary for fair financial statement presentation. The preparation of these consolidated financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the amounts reported in these consolidated financial statements and accompanying notes. Actual results could differ materially from those estimates.

The Company's fiscal year is the 52 or 53-week period that ends on the last Saturday of September. The Company's fiscal years 2015, 2014 and 2013 ended on September 26, 2015, September 27, 2014 and September 28, 2013, respectively. An additional week is included in the first fiscal quarter approximately every six years to realign fiscal quarters with calendar quarters. Fiscal years 2015, 2014 and 2013 each spanned 52 weeks. Unless otherwise stated, references to particular years, quarters, months and periods refer to the Company's fiscal years ended in September and the associated quarters, months and periods of those fiscal years.

Revenue Recognition

Net sales consist primarily of revenue from the sale of hardware, software, digital content and applications, accessories, and service and support contracts. The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable and collection is probable. Product is considered delivered to the customer once it has been shipped and title, risk of loss and rewards of ownership have been transferred. For most of the Company's product sales, these criteria are met at the time the product is shipped. For online sales to individuals, for some sales to education customers in the U.S., and for certain other sales, the Company defers revenue until the customer receives the product because the Company retains a portion of the risk of loss on these sales during transit. For payment terms in excess of the Company's standard payment terms, revenue is recognized as payments become due unless the Company has positive evidence that the sales price is fixed or determinable, such as a successful history of collection, without concession, on comparable arrangements. The Company recognizes revenue from the sale of hardware products, software bundled with hardware that is essential to the functionality of the hardware and third-party digital content sold on the iTunes Store in accordance with general revenue recognition accounting guidance. The Company recognizes revenue in accordance with industry specific software accounting guidance for the following types of sales transactions: (i) standalone sales of software products, (ii) sales of software upgrades and (iii) sales of software bundled with hardware not essential to the functionality of the hardware.

For the sale of most third-party products, the Company recognizes revenue based on the gross amount billed to customers because the Company establishes its own pricing for such products, retains related inventory risk for physical products, is the primary obligor to the customer and assumes the credit risk for amounts billed to its customers. For third-party applications sold through the App Store and Mac App Store and certain digital content sold through the iTunes Store, the Company does not determine the selling price of the products and is not the primary obligor to the customer. Therefore, the Company accounts for such sales on a net basis by recognizing in net sales only the commission it retains from each sale. The portion of the gross amount billed to customers that is remitted by the Company to third-party app developers and certain digital content owners is not reflected in the Company's Consolidated Statements of Operations.

Table of Contents

The Company records deferred revenue when it receives payments in advance of the delivery of products or the performance of services. This includes amounts that have been deferred for unspecified and specified software upgrade rights and non-software services that are attached to hardware and software products. The Company sells gift cards redeemable at its retail and online stores, and also sells gift cards redeemable on iTunes Store, App Store, Mac App Store and iBooks Store for the purchase of digital content and software. The Company records deferred revenue upon the sale of the card, which is relieved upon redemption of the card by the customer. Revenue from AppleCare service and support contracts is deferred and recognized over the service coverage periods. AppleCare service and support contracts typically include extended phone support, repair services, web-based support resources and diagnostic tools offered under the Company's standard limited warranty.

The Company records reductions to revenue for estimated commitments related to price protection and other customer incentive programs. For transactions involving price protection, the Company recognizes revenue net of the estimated amount to be refunded. For the Company's other customer incentive programs, the estimated cost of these programs is recognized at the later of the date at which the Company has sold the product or the date at which the program is offered. The Company also records reductions to revenue for expected future product returns based on the Company's historical experience. Revenue is recorded net of taxes collected from customers that are remitted to governmental authorities, with the collected taxes recorded as current liabilities until remitted to the relevant government authority.

Revenue Recognition for Arrangements with Multiple Deliverables

For multi-element arrangements that include hardware products containing software essential to the hardware product's functionality, undelivered software elements that relate to the hardware product's essential software, and undelivered non-software services, the Company allocates revenue to all deliverables based on their relative selling prices. In such circumstances, the Company uses a hierarchy to determine the selling price to be used for allocating revenue to deliverables: (i) vendor-specific objective evidence of fair value (VSOE), (ii) third-party evidence of selling price (TPE) and (iii) best estimate of selling price (ESP). VSOE generally exists only when the Company sells the deliverable separately and is the price actually charged by the Company for that deliverable. ESPs reflect the Company's best estimates of what the selling prices of elements would be if they were sold regularly on a stand-alone basis. For multi-element arrangements accounted for in accordance with industry specific software accounting guidance, the Company allocates revenue to all deliverables based on the VSOE of each element, and if VSOE does not exist revenue is recognized when elements lacking VSOE are delivered.

For sales of qualifying versions of iPhone, iPad and iPod touch (iOS devices), Mac, Apple Watch and Apple TV, the Company has indicated it may from time to time provide future unspecified software upgrades to the device's essential software and/or non-software services free of charge. The Company has identified up to three deliverables regularly included in arrangements involving the sale of these devices. The first deliverable, which represents the substantial portion of the allocated sales price, is the hardware and software essential to the functionality of the hardware device delivered at the time of sale. The second deliverable is the embedded right included with qualifying devices to receive on a when-and-if-available basis, future unspecified software upgrades relating to the product's essential software. The third deliverable is the non-software services to be provided to qualifying devices. The Company allocates revenue between these deliverables using the relative selling price method. Because the Company has neither VSOE nor TPE for these deliverables, the allocation of revenue is based on the Company's ESPs. Revenue allocated to the delivered hardware and the related essential software is recognized at the time of sale provided the other conditions for revenue recognition have been met. Revenue allocated to the embedded unspecified software upgrade rights and the non-software services is deferred and recognized on a straight-line basis over the estimated period the software upgrades and non-software services are expected to be provided. Cost of sales related to delivered hardware and related essential software, including estimated warranty costs, are recognized at the time of sale. Costs incurred to provide non-software services are recognized as cost of sales as incurred, and engineering and sales and marketing

costs are recognized as operating expenses as incurred.

The Company's process for determining its ESP for deliverables without VSOE or TPE considers multiple factors that may vary depending upon the unique facts and circumstances related to each deliverable including, where applicable, prices charged by the Company and market trends in the pricing for similar offerings, product specific business objectives, length of time a particular version of a device has been available, estimated cost to provide the non-software services and the relative ESP of the upgrade rights and non-software services as compared to the total selling price of the product.

Beginning in September 2015, the Company reduced the combined ESPs for iOS devices and Mac between \$5 and \$10 to reflect the increase in competitive offers for similar products at little to no cost for users, which reduces the amount the Company could reasonably charge for these deliverables on a standalone basis.

Shipping Costs

Amounts billed to customers related to shipping and handling are classified as revenue, and the Company's shipping and handling costs are classified as cost of sales.

Table of Contents

Warranty Costs

The Company generally provides for the estimated cost of hardware and software warranties at the time the related revenue is recognized. The Company assesses the adequacy of its accrued warranty liabilities and adjusts the amounts as necessary based on actual experience and changes in future estimates.

Software Development Costs

Research and development (R&D) costs are expensed as incurred. Development costs of computer software to be sold, leased, or otherwise marketed are subject to capitalization beginning when a product's technological feasibility has been established and ending when a product is available for general release to customers. In most instances, the Company's products are released soon after technological feasibility has been established and as a result software development costs were expensed as incurred.

Advertising Costs

Advertising costs are expensed as incurred and included in selling, general and administrative expenses. Advertising expense was \$1.8 billion, \$1.2 billion and \$1.1 billion for 2015, 2014 and 2013, respectively.

Share-based Compensation

The Company recognizes expense related to share-based payment transactions in which it receives employee services in exchange for (a) equity instruments of the Company or (b) liabilities that are based on the fair value of the Company's equity instruments or that may be settled by the issuance of such equity instruments. Share-based compensation cost for restricted stock and restricted stock units (RSUs) is measured based on the closing fair market value of the Company's common stock on the date of grant. The Company recognizes share-based compensation cost over the award's requisite service period on a straight-line basis for time-based RSUs and on a graded basis for RSUs that are contingent on the achievement of performance conditions. The Company recognizes a benefit from share-based compensation in the Consolidated Statements of Shareholders' Equity if an excess tax benefit is realized. In addition, the Company recognizes the indirect effects of share-based compensation on R&D tax credits, foreign tax credits and domestic manufacturing deductions in the Consolidated Statements of Operations. Further information regarding share-based compensation can be found in Note 9, Benefit Plans.

Income Taxes

The provision for income taxes is computed using the asset and liability method, under which deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities and for operating losses and tax credit carryforwards. Deferred tax assets and liabilities are measured using the currently enacted tax rates that apply to taxable income in effect for the years in which those tax assets and liabilities are expected to be realized or settled. The Company records a valuation allowance to reduce deferred tax assets to the amount that is believed more likely than not to be realized.

The Company recognizes the tax benefit from an uncertain tax position only if it is more likely than not the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such positions are then measured based on the largest benefit that has a greater than 50% likelihood of being realized upon settlement. See Note 5, Income Taxes for additional information.

Earnings Per Share

Basic earnings per share is computed by dividing income available to common shareholders by the weighted-average number of shares of common stock outstanding during the period. Diluted earnings per share is computed by dividing income available to common shareholders by the weighted-average number of shares of common stock outstanding during the period increased to include the number of additional shares of common stock that would have been outstanding if the potentially dilutive securities had been issued. Potentially dilutive securities include outstanding stock options, shares to be purchased under the Company's employee stock purchase plan, unvested restricted stock and unvested RSUs. The dilutive effect of potentially dilutive securities is reflected in diluted earnings per share by application of the treasury stock method. Under the treasury stock method, an increase in the fair market value of the Company's common stock can result in a greater dilutive effect from potentially dilutive securities.

Apple Inc. | 2015 Form 10-K | 46

Table of Contents

The following table shows the computation of basic and diluted earnings per share for 2015, 2014 and 2013 (net income in millions and shares in thousands):

	2015	2014	2013
Numerator:			
Net income	\$ 53,394	\$ 39,510	\$ 37,037
Denominator:			
Weighted-average shares outstanding	5,753,421	6,085,572	6,477,320
Effect of dilutive securities	39,648	37,091	44,314
Weighted-average diluted shares	5,793,069	6,122,663	6,521,634
Basic earnings per share	\$ 9.28	\$ 6.49	\$ 5.72
Diluted earnings per share	\$ 9.22	\$ 6.45	\$ 5.68

Potentially dilutive securities whose effect would have been antidilutive are excluded from the computation of diluted earnings per share.

Financial Instruments*Cash Equivalents and Marketable Securities*

All highly liquid investments with maturities of three months or less at the date of purchase are classified as cash equivalents. The Company's marketable debt and equity securities have been classified and accounted for as available-for-sale. Management determines the appropriate classification of its investments at the time of purchase and reevaluates the classifications at each balance sheet date. The Company classifies its marketable debt securities as either short-term or long-term based on each instrument's underlying contractual maturity date. Marketable debt securities with maturities of 12 months or less are classified as short-term and marketable debt securities with maturities greater than 12 months are classified as long-term. Marketable equity securities, including mutual funds, are classified as either short-term or long-term based on the nature of each security and its availability for use in current operations. The Company's marketable debt and equity securities are carried at fair value, with unrealized gains and losses, net of taxes, reported as a component of accumulated other comprehensive income (AOCI) in shareholders equity, with the exception of unrealized losses believed to be other-than-temporary which are reported in earnings in the current period. The cost of securities sold is based upon the specific identification method.

Derivative Financial Instruments

The Company accounts for its derivative instruments as either assets or liabilities and carries them at fair value.

For derivative instruments that hedge the exposure to variability in expected future cash flows that are designated as cash flow hedges, the effective portion of the gain or loss on the derivative instrument is reported as a component of AOCI in shareholders equity and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. The ineffective portion of the gain or loss on the derivative instrument, if any, is recognized in earnings in the current period. To receive hedge accounting treatment, cash flow hedges must be highly effective in offsetting changes to expected future cash flows on hedged transactions. For options designated as cash flow hedges, changes in the time value are excluded from the assessment of hedge effectiveness and are recognized in

earnings.

For derivative instruments that hedge the exposure to changes in the fair value of an asset or a liability and that are designated as fair value hedges, both the net gain or loss on the derivative instrument as well as the offsetting gain or loss on the hedged item are recognized in earnings in the current period.

For derivative instruments and foreign currency debt that hedge the exposure to changes in foreign currency exchange rates used for translation of the net investment in a foreign operation and that are designated as a net investment hedge, the net gain or loss on the effective portion of the derivative instrument is reported in the same manner as a foreign currency translation adjustment. For forward exchange contracts designated as net investment hedges, the Company excludes changes in fair value relating to changes in the forward carry component from its definition of effectiveness. Accordingly, any gains or losses related to this forward carry component are recognized in earnings in the current period.

Derivatives that do not qualify as hedges are adjusted to fair value through earnings in the current period.

Table of Contents

Allowance for Doubtful Accounts

The Company records its allowance for doubtful accounts based upon its assessment of various factors, including historical experience, age of the accounts receivable balances, credit quality of the Company's customers, current economic conditions and other factors that may affect the customers' ability to pay.

Inventories

Inventories are stated at the lower of cost, computed using the first-in, first-out method and net realizable value. Any adjustments to reduce the cost of inventories to their net realizable value are recognized in earnings in the current period. As of September 26, 2015 and September 27, 2014, the Company's inventories consist primarily of finished goods.

Property, Plant and Equipment

Property, plant and equipment are stated at cost. Depreciation is computed by use of the straight-line method over the estimated useful lives of the assets, which for buildings is the lesser of 30 years or the remaining life of the underlying building; between one to five years for machinery and equipment, including product tooling and manufacturing process equipment; and the shorter of lease terms or ten years for leasehold improvements. The Company capitalizes eligible costs to acquire or develop internal-use software that are incurred subsequent to the preliminary project stage. Capitalized costs related to internal-use software are amortized using the straight-line method over the estimated useful lives of the assets, which range from three to five years. Depreciation and amortization expense on property and equipment was \$9.2 billion, \$6.9 billion and \$5.8 billion during 2015, 2014 and 2013, respectively.

Long-Lived Assets Including Goodwill and Other Acquired Intangible Assets

The Company reviews property, plant and equipment, inventory component prepayments and certain identifiable intangibles, excluding goodwill, for impairment. Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Recoverability of these assets is measured by comparison of their carrying amounts to future undiscounted cash flows the assets are expected to generate. If property, plant and equipment, inventory component prepayments and certain identifiable intangibles are considered to be impaired, the impairment to be recognized equals the amount by which the carrying value of the assets exceeds its fair value.

The Company does not amortize goodwill and intangible assets with indefinite useful lives, rather such assets are required to be tested for impairment at least annually or sooner whenever events or changes in circumstances indicate that the assets may be impaired. The Company performs its goodwill and intangible asset impairment tests in the fourth quarter of each year. The Company did not recognize any impairment charges related to goodwill or indefinite lived intangible assets during 2015, 2014 and 2013. The Company established reporting units based on its current reporting structure. For purposes of testing goodwill for impairment, goodwill has been allocated to these reporting units to the extent it relates to each reporting unit. In 2015 and 2014, the Company's goodwill was primarily allocated to the Americas and Europe reporting units.

The Company amortizes its intangible assets with definite useful lives over their estimated useful lives and reviews these assets for impairment. The Company typically amortizes its acquired intangible assets with definite useful lives over periods from three to seven years.

Fair Value Measurements

The Company applies fair value accounting for all financial assets and liabilities and non-financial assets and liabilities that are recognized or disclosed at fair value in the financial statements on a recurring basis. The Company defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities, which are required to be recorded at fair value, the Company considers the principal or most advantageous market in which the Company would transact and the market-based risk measurements or assumptions that market participants would use in pricing the asset or liability, such as risks inherent in valuation techniques, transfer restrictions and credit risk. Fair value is estimated by applying the following hierarchy, which prioritizes the inputs used to measure fair value into three levels and bases the categorization within the hierarchy upon the lowest level of input that is available and significant to the fair value measurement:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Observable inputs other than quoted prices in active markets for identical assets and liabilities, quoted prices for identical or similar assets or liabilities in inactive markets, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Inputs that are generally unobservable and typically reflect management's estimate of assumptions that market participants would use in pricing the asset or liability.

Table of Contents

The Company's valuation techniques used to measure the fair value of money market funds and certain marketable equity securities were derived from quoted prices in active markets for identical assets or liabilities. The valuation techniques used to measure the fair value of the Company's debt instruments and all other financial instruments, all of which have counterparties with high credit ratings, were valued based on quoted market prices or model driven valuations using significant inputs derived from or corroborated by observable market data.

In accordance with the fair value accounting requirements, companies may choose to measure eligible financial instruments and certain other items at fair value. The Company has not elected the fair value option for any eligible financial instruments.

Foreign Currency Translation and Remeasurement

The Company translates the assets and liabilities of its non-U.S. dollar functional currency subsidiaries into U.S. dollars using exchange rates in effect at the end of each period. Revenue and expenses for these subsidiaries are translated using rates that approximate those in effect during the period. Gains and losses from these translations are recognized in foreign currency translation included in AOCI in shareholders' equity. The Company's subsidiaries that use the U.S. dollar as their functional currency remeasure monetary assets and liabilities at exchange rates in effect at the end of each period, and inventories, property and nonmonetary assets and liabilities at historical rates.

Note 2 Financial Instruments**Cash, Cash Equivalents and Marketable Securities**

The following tables show the Company's cash and available-for-sale securities' adjusted cost, gross unrealized gains, gross unrealized losses and fair value by significant investment category recorded as cash and cash equivalents or short- or long-term marketable securities as of September 26, 2015 and September 27, 2014 (in millions):

The Company may sell certain of its marketable securities prior to their stated maturities for strategic reasons including, but not limited to, anticipation of credit deterioration and duration management. The maturities of the Company's long-term marketable securities generally range from one to five ye
