We are very pleased with our results for the third quarter and the year to date, said Bill Star, President & Chief Executive Officer. Over the last few quarters we have experienced competitive conditions in several of our U.S. markets, however, we believe the recent industry events will lead to an increased focus on underwriting profitability. As a result, we anticipate profitable growth opportunities will arise in the next several quarters particularly in the fragmented U.S. markets.

Net unrealized gains at September 30, 2005 on the investment portfolio were \$45.0 million (US\$38.7 million) or \$0.80 (US\$0.68) per share outstanding as compared to \$73.7 million (US\$61.3 million) or \$1.31 (US\$1.09) per share outstanding at the end of 2004. Duration is a measure used to estimate the extent market values of fixed maturity investments change with changes in interest rates. Using this measure, it is estimated that an immediate hypothetical 100 basis point parallel increase in interest rates would decrease the market value of our fixed maturity investments by \$75.7 million at September 30, 2005, representing 2.8% of the \$2,711.3 million fair value fixed maturity investment portfolio.

Balance Sheet

Total assets as at September 30, 2005 are \$4.3 billion (US\$3.7 billion) compared to \$4.2 billion (US\$3.5 billion) at the end of 2004. Despite unrealized currency translation adjustment decreasing book value per share by \$0.59 in the quarter (\$0.39 year to date), book value per share increased by 11% since the beginning of the year to \$15.87 (US\$13.65).

The investment portfolio, including cash increased 7% to \$3,309.5 million (US\$2,846.4 million), compared to \$3,104.5 million (US\$2,582.8 million) as at December 31, 2004. At September 30, 2005, 29% of the fixed income portfolio matures in less than one year and 53% matures after one year and in less than five years. The fair value of the investment portfolio including cash represents \$59.40 (US\$51.09) per common share at September 30, 2005.

The Company reported net favourable development in the provision for unpaid claims occurring prior to December 31, 2004 of approximately \$1.9 million (US\$1.6 million) during the third quarter of 2005. During the first nine months of 2005 net unfavourable reserve development decreased to \$6.4 million (US\$4.9 million) or 0.3% of unpaid claims at the beginning of the year. Provisions for unpaid claims have been increased by 4% to \$2,102.6 million (US\$1,808.4 million) compared to \$2,030.4 million (US\$1,689.2 million) at the end of 2004.

Currency

The supplementary information contained in this press release contains selected financial information expressed in U.S. dollars. For the quarter ended September 30, 2005 net income and diluted earnings per share increased by 34% to US\$31.3 million and US\$0.55 respectively and for the year to date increased 39% to US\$99.1 million and US\$1.74, respectively. Book value per share grew by 15% from December 31, 2004 to US\$13.65.

A significant portion of the Company's operations and net assets are denominated in U.S. dollars whereas the Company reports in Canadian dollars. During the third quarter of 2005, the Canadian dollar has continued to appreciate against the U.S. dollar thereby affecting the comparability of results. Had the results of the U.S. operations been translated at the same exchange rates as last year, net income and earnings per share for the quarter would have been further increased by \$1.8 million (\$6.7 million year to date) and \$0.03 (\$0.12 year to date),

respectively.

PRESIDENT'S MESSAGE TO SHAREHOLDERS

Dear Shareholders:

On behalf of the Board of Directors, I am pleased to report our financial results for the third quarter and nine months ended September 30, 2005 in Canadian dollars except where indicated.

For the three months ended September 30, 2005, net income increased 23% to \$37.5 million (US\$31.3 million) compared to \$30.6 million (US\$23.4 million) in the third quarter of 2004. Net income for the nine months ended September 30, 2005 was a record \$121.0 million (US\$99.1 million), an increase of 28% over the \$94.7 million (US\$71.2 million) reported last year. Our annualized return on equity was 16.8% in the quarter compared to 15.4% in the same quarter of 2004, and 19.0% for the year to date compared to 16.8% for the same period last year. Diluted earnings per share increased 22% to \$0.66 (US\$0.55) compared to \$0.54 (US\$0.41) for the third quarter of 2004. For the nine month period, diluted earnings per share increased by 27% to a record \$2.13 (US\$1.74) over the \$1.68 (US\$1.26) for the same period last year.

The combined ratio for the quarter was 97.8% (97.0% year to date) compared to 97.0% (97.6% year to date) for the third quarter of 2004 producing a quarterly underwriting profit of \$12.1 million (US\$10.0 million) a decrease of 32% over the same period last year. At the end of the quarter, our book value per share was at \$15.87 (US\$13.65), an increase of 12% from Q3 2004 and the fair value of our investment portfolio, including cash, increased to \$3.4 billion (US\$2.9 billion) or \$59.40 (US\$51.09) per common share at September 30, 2005.

We are very pleased with our results for the third quarter and the year to date. These results are a reflection of the Company's strong geographical and product diversification. Once again, severe storm losses in the United States are reminders that underwriting discipline must be maintained to provide acceptable returns for shareholders.

Outlook

Over the last few quarters we have experienced competitive conditions in several of our U.S. markets, however, we believe the recent industry events will lead to an increased focus on underwriting profitability. As a result, we anticipate profitable growth opportunities will arise in the next several quarters particularly in the fragmented U.S. markets.

We are pleased that we have completed the acquisition of Zephyr Insurance Company in October. Zephyr is the premier provider of residential hurricane coverage in the State of Hawaii. This acquisition is consistent with our interest in acquiring profitable businesses that add to our geographic and product diversification and we expect that the acquisition will be immediately accretive to our earnings.

/s/ William G. Star

Management's Discussion and Analysis
For the Three and Nine Month Periods Ended September 30, 2005 and 2004
(In thousands of Canadian dollars)**

Edgar Filing: KINGSWAY FINANCIAL SERVICES INC - Form 6-K

The following management's discussion and analysis (MD&A) should be read in conjunction with the Company's unaudited interim consolidated financial statements for the third quarter of fiscal 2005 and 2004; with the MD&A set out on pages 16 to 54 in the Company's 2004 Annual Report, including the section on risk factors; and with the notes to the interim consolidated financial statements for the second quarter of fiscal 2005 and the notes to the audited consolidated financial statements for fiscal 2004 set out on pages 62 to 74 of the Company's 2004 Annual Report.

The Company has indicated its intention to convert its financial statements to U.S. dollar reporting during 2005. The Company has decided to implement its change to U.S. dollar reporting at the end of 2005 in order to present complete financial statements and MD&A for the current year and for all prior periods included in the Annual Report. The Company believes that this will allow shareholders to more fully understand the Company's historical and current operating trends, results and financial position. Unless otherwise indicated, all amounts are in Canadian dollars and have been derived from financial statements prepared in accordance with Canadian generally accepted accounting principles (GAAP).

Non-GAAP Measures

The Company uses both GAAP and certain non-GAAP measures to assess performance. Securities regulators require that companies caution readers about non-GAAP measures that do not have a standardized meaning under GAAP and are unlikely to be comparable to similar measures used by other companies. Kingsway, like many insurance companies, analyzes performance based on underwriting ratios such as combined, expense and loss ratios. These terms are defined in the glossary of terms section beginning on page 79 of the 2004 Annual Report. The Company also uses investment portfolio per share information which is calculated based on the fair value of the investment portfolio divided by the number of issued and outstanding common shares. The Company uses net operating income information which is calculated as net income excluding after-tax net realized gains and losses on investments. A reconciliation of net income to net operating income is presented below in thousands of Canadian dollars.

Net realized gains include adjustment to carrying value for declines in the market value considered other than temporary of \$3.3 million for the year to date on investments still held compared to \$0.2 million for the same period of 2004. On an after-tax basis, net realized gains were \$27.0 million (US\$22.3 million) or \$0.48 (US\$0.39) diluted earnings per share compared with \$14.9 million (US\$11.0 million) or \$0.26 (US\$0.19) diluted earnings per share for the first nine months of last year.

Claims Incurred. The claims ratio was 68.1% for the first nine months of the year compared to 70.4% for the same period last year. The claims ratio for the U.S. operations improved to 67.2% compared with 70.5% for the first nine months of 2004. During the third quarter the Company incurred losses of approximately \$2.6 million (US\$2.1 million) related to storms in the United States which increased the loss ratio for the U.S. operations by 0.2% year to date. The claims ratio for Canadian operations was 70.1% year to date compared to 70.4% last year. During the year the Company incurred losses of approximately \$5.0 million (\$4.8 million last year) related to storms in Canada in both the second and third quarter which increased the loss ratio for the Canadian operations by 0.9% year to date.

Edgar Filing: KINGSWAY FINANCIAL SERVICES INC - Form 6-K

Underwriting Expenses. The combined ratio improved to 97.0% from 97.6% in the first nine months of 2004 which produced an underwriting profit of \$48.7 million (US\$39.7 million) compared with the \$41.5 million (US\$31.3 million) reported in the first nine months of last year. For the year to date, U.S. operations combined ratio improved to 97.0% (98.5% last year) which produced an underwriting profit of \$33.6 million (\$19.3 million last year). As a result of improved loss ratios on U.S. program business, the accrual for profit-sharing commission for the year to date has been increased to \$39.2 million (US\$33.1 million) compared to \$6.6 million (US\$5.2 million) for the nine months of 2004. The increased accrual for profit-sharing commission increased the U.S. operations and consolidated expense ratio by 3.5% and 2.4%, respectively for the year to date in 2005. The combined ratio for Canadian operations was 97.2% (95.5% last year), with an underwriting profit of \$15.1 million (\$22.2 million last year).

Interest Expense. Interest expense was \$23.1 million (US\$18.9 million) year to date compared to \$20.5 million (US\$15.5 million) in the first nine months of 2004 reflecting the increase in interest rates in the U.S.

Income taxes. The income tax provision for the year to date was \$23.8 million (US\$19.5 million) or 16% of income before income taxes for the year to date compared with \$15.2 million (US\$11.4 million) or 14% for the same period last year. The increase in the tax rate for the nine months is attributable to the improved profitability of the Canadian operations.

Net Income and Earnings Per Share. Net income for the nine months increased 28% to \$121.0 million (increased 39% to US\$99.1 million) over \$94.7 million (US\$71.2 million) reported last year. Diluted earnings per share increased by 27% to a record \$2.13 (increased 38% to US\$1.74) compared to \$1.68 (US\$1.26) for the same period last year.

Net Operating Income. Net operating income for the first nine months of 2005 increased 18% to \$94.0 million (increased 28% to US\$76.8 million) or \$1.65 (US\$1.35) diluted earnings per share compared with \$79.8 million (US\$60.2 million) or \$1.41 (US\$1.07) diluted earnings per share for the first nine months of 2004.

Book Value Per Share and Return on Equity. Book value per share increased by 12% to \$15.87 (22% to US\$13.65) from \$14.12 (US\$11.19) as at September 30, 2004. Our annualized return on equity was 19.0% for the first nine months of 2005 compared to 16.8% for the same period last year.

Balance Sheet. Total assets as at September 30, 2005 were \$4.3 billion (US\$3.7 billion) compared to \$4.2 billion (US\$3.5 billion) at the end of 2004. The investment portfolio, including cash increased 7% to \$3,309.5 million (increased 10% to US\$2,846.4 million), compared to \$3,104.5 million (US\$2,582.8 million) as at December 31, 2004. The fair value of the investment portfolio including cash represents \$59.40 (US\$51.09) per common share at September 30, 2005. Net unrealized gains at September 30, 2005 on the investment portfolio were \$45.0 million (US\$38.7 million) or \$0.80 (US\$0.68) per share outstanding as compared to \$73.7 million (US\$61.3 million) or \$1.31 (US\$1.09) per share outstanding at the end of 2004. Net unrealized gains on the common shares portfolio were \$60.1 million (US\$51.7 million) or \$1.07 (US\$0.92) per share outstanding at September 30, 2005 compared to \$67.6 million (US\$56.3 million) or \$1.20 (US\$1.00) per share outstanding at the end of 2004.

At September 30, 2005, 29% of the fixed income portfolio matures in less than one year and 53% matures after one year and in less than five years. Duration is a measure used to estimate the extent market values of fixed maturity investments change with changes in interest rates. Using this measure, it is estimated that an immediate hypothetical 100 basis point parallel increase in interest rates would decrease the market value of our fixed maturity investments by \$75.7 million at September 30, 2005, representing 2.8% of the \$2,711.3 million fair value fixed maturity investment portfolio.

Unearned premiums as at September 30, 2005 was \$759.0 million (US\$652.8 million), compared to \$762.5 million (US\$634.3 million) at the end of 2004. During the first nine months of 2005 net unfavourable development in the provision for unpaid claims occurring prior to December 31, 2004 was approximately \$6.4 million (US\$4.9 million) or 0.3% of unpaid claims at the beginning of the year. The net unfavourable development was primarily attributable to a terminated U.S. trucking program, Alberta personal automobile and Canadian trucking. Provisions for unpaid claims have been increased by 4% to \$2,102.6 million (increased 7% to US\$1,808.4 million) compared to \$2,030.4 million (US\$1,689.2 million) at the end of 2004.

For further details on the Company's long term debt and interest obligations, refer to note 11 to the Company's 2004 audited consolidated financial statements and page 42 of the 2004 Annual Report which sets out the Company's contractual obligations as at December 31, 2004.

Liquidity and Capital Resources. During the nine months ended September 30, 2005, the net cash provided from operations was \$261.2 million compared to \$364.2 million last year. The Company believes that the cash generated from the operating activities will be sufficient to meet our ongoing cash requirements, including interest payment obligations. Net cash provided by financing activities during the first nine months of 2005 was \$8.8 million compared to \$87.8 million for the first nine months of 2004. During the third quarter of 2005, the Company completed the Kingsway Linked Return of Capital Trust transaction of which the Company was a promoter. The net proceeds received from this transaction were utilized to reduce bank indebtedness. This transaction is more fully described in Note 5 of the attached unaudited interim consolidated financial statements.

As at September 30, 2005 the Company was sufficiently capitalized to support the premium volume of our insurance subsidiaries. Our Canadian property and casualty insurance companies are regulated by the Office of the Superintendent of Financial Institutions (OSFI) and the Financial Services Commission of Ontario (FSCO) and are required to maintain a level of capital sufficient to achieve a target of 150% of a minimum capital test (MCT) formula. As at September 30, 2005 the MCT of our Canadian subsidiaries are well in excess of the target MCT level, with MCT margins ranging between 192% and 257%.

In the United States, a risk based capital (RBC) formula is used by the National Association of Insurance Commissioners (NAIC) to identify property and casualty insurance companies that may not be adequately capitalized. The NAIC requires that capital and surplus exceed the regulatory minimum by 200% of the authorized control level. As at September 30, 2005 the RBC of our U.S. subsidiaries are well in excess of the NAIC requirement with RBC ratios ranging between 287% and 1,424%.

Our reinsurance subsidiaries, which are domiciled in Barbados and Bermuda are required by the regulator in the jurisdictions in which they operate to maintain minimum capital levels. As at September 30, 2005 the capital maintained by Kingsway Reinsurance Corporation was \$323.0 million in excess of the regulatory requirements in Barbados and the capital maintained by Kingsway Reinsurance (Bermuda) Limited was \$11.3 million in excess of regulatory requirements in Bermuda.

Off-Balance Sheet Financing. The Company entered into an off-balance sheet transaction through the Kingsway Linked Return of Capital Trust transaction that was completed on July 14, 2005 which is more fully described in Note 5 of the attached unaudited interim consolidated financial statements. The net proceeds from this offering were invested into a Kingsway controlled entity which is not consolidated based on accounting standards. The effect of this transaction is to show additional debt on the Company's financial statements and an off-setting equity investment of \$8.3 million into the non-consolidated affiliated entity. The Company does not have any other off-balance sheet financing arrangements.

KINGSWAY FINANCIAL SERVICES INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
For the three and nine months ended September 30, 2005 and 2004
(Unaudited tabular amounts in thousands of Canadian dollars)

1. Basis of presentation

These interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles using the same accounting policies as were used for the Company's consolidated financial statements for the year ended December 31, 2004. These interim consolidated financial statements do not contain all disclosures required by generally accepted accounting principles and accordingly should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2004 as set out on pages 55 to 74 of the Company's 2004 Annual Report. The results of the operations for the interim periods are not necessarily indicative of the full-year results.

2. Stock-based compensation

As reported on pages 63 of the Company's 2004 Annual Report, effective January 1, 2003 the Company adopted on a prospective basis the fair-value method of accounting for stock-based compensation awards granted to employees and non-employee directors. During the third quarter 2005, the Company recorded \$584,000 of stock-based compensation expense included in employee compensation expense.

For stock options granted in years prior to 2003, the Company must provide the following pro forma disclosures of net income and earnings per share as if the Company had measured the additional compensation element of stock options granted based on the fair value on the date of grant. Such proforma disclosure follows:

**Three months ended

2. Stock-based compensation continued:

	Nine months ended September 30,

As reported	\$120,997	\$94,661
Pro forma	120,914	93,226

Pro forma	2.14	1.66
Diluted earnings per share		
As reported	\$ 2.13	\$ 1.68
Pro forma	2.13	1.65

The per share weighted average fair value of options granted during 2005 and 2004 was \$3.58 and \$3.79, respectively. The fair value of the options granted was estimated at the date of grant using a Black-Scholes option pricing model with the following weighted average assumptions:

	As at September 30	
	2005	2004
Risk-free interest rate	3.53%	4.34%
Dividend yield	1.02%	0.0%
Volatility of the expected market price of the Company's common shares	22.5%	45.7%
Expected option life (in years)	3.9	4.7

The Black-Scholes option valuation model was developed for use in estimating fair value of traded options which have no vesting restrictions and are fully transferable. As the Company's employee stock options have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, in management's opinion, the above pro forma adjustments are not necessarily a reliable single measure of the fair value of the Company's employee stock options.

3. Segmented information

The Company provides property and casualty insurance and other insurance related services in three reportable segments, Canada, the United States and corporate and other insurance related services. The Company's Canadian and United States segments include transactions with the Company's reinsurance subsidiaries. At the present time, other insurance related services are not significant. Results for the Company's operating segments are based on the Company's internal financial reporting systems and are consistent with those followed in the preparation of the consolidated financial statements.
