2. Basis of preparation and presentation of quarterly information

a) Quarterly Information

The individual (parent company) and consolidated quarterly information were prepared and are presented according to the rules issued by the Brazilian Securities and Exchange Commission (CVM), the provisions of the Brazilian Corporation Law (Law 6,404/76), including provisions amended by Laws 11,638/07 and 11,941/09, as well as pronouncements, guidelines and interpretations issued by the Brazilian Committee on Accounting Pronouncements (CPC). This quarterly information was approved at the board of executive officers meeting held at July 22, 2010.

During 2009, the Brazilian Committee on Accounting Pronouncements (CPC) issued and the Brazilian Securities and Exchange Commission (CVM) approved several Technical Pronouncements, Interpretations and Guidelines whose effectiveness is only mandatory for the fiscal year ended December 31, 2010, requiring that the companies file again the financial statements of the comparative year.

The Company decided not to exercise its eligibility concerning the quarterly information of June 30, 2010, and at its best judgment, the Company below shows a brief description of the eventual material changes to the accounting practices previously adopted for the quarterly information of June 30, 2010 and comparative period.

- CPC 15 Business Combination, approved by CVM Deliberation 580/09 of July 31, 2009: It mainly establishes the buyer's principles and requirements in a business combination. The Company expects that the figures referring to the acquisition of Globex Utilidades S.A. will change when applying this Pronouncement retrospectively to January 1, 2009, due to the new measurement of goodwill by the expectation of future profitability, resulting from the measurement of Globex's net assets by the fair value of assets acquired (including identified intangible assets) and obligations assumed.

- CPC 22 Information by Segment, approved by CVM Deliberation 582 of July 31, 2009: It sets forth that reporting shall be divided by the Company's operating segment. Operating segment is defined as an entity's component: (a) that develops business activities generating revenues and incurring in expenses; (b) whose operational results are regularly reviewed by the top manager of the Company's operations in the decision-making process; and (c) to which the financial information is available.

The Company's Management will analyze additional reporting in its financial statements resulting from the data and indicators of assets, liabilities and results identifiable for each one of its operating segments.

- CPC 24 Subsequent Event, approved by CVM Deliberation 593 of September 15, 2009: The main impact for applying this rule refers to the recording of dividends. According to CPC 24 at the end of the fiscal year, the Company shall recognize as liability only the mandatory minimum dividend established in its Bylaws. Additional minimum dividends will be recorded as liability as these are approved by the Company's appropriate bodies.

- CPC 26 Presentation of the Financial Statements, approved by CVM Deliberation 595, of September 15, 2009: It sets forth the basis for presenting the financial statements, by determining the presentation overall requirements, structuring guidelines and the minimum content to be included in the financial statements. Two new requirements were added in relation to the previous practice; i) comprehensive statement of income; ii) presentation of three balance

sheets in the situations in which the Company applies an accounting policy retroactively or files again items in its financial statements.

- CPC 27 Fixed Assets, approved by CVM Deliberation 583 of July 31, 2009: The Company understands that this rule may cause eventual effects on its financial statements, mainly due to said CPC that requires deducting the estimated residual value from fixed assets in order to calculate depreciation. Currently, the Company depreciates assets by their whole formation cost, not deducting the estimated residual value. The Company is assessing the useful life taking into account the residual value of its assets and will apply this change of depreciation rate retrospectively as of January 1, 2010, in compliance with IPCP 10.

CPC 38, 39 and 40 Financial Instruments: Recognition and Measurement, Presentation, Reporting, approved by CVM Deliberation 604 of November 19, 2009:

- CPC 38 Financial Instruments: Recognition and Measurement: It rules the recognition and measurement of financial instruments operations including derivatives. It shall be applied to all companies and all types of financial instruments, aside from specific exceptions. A financial instrument is any agreement originating a financial asset for an entity and a financial liability or equity instrument for another.

CPC 39 Financial Instruments: Presentation it aims at establishing the principles for presenting the financial instruments as liability or shareholders equity and offsetting the financial assets and liabilities. It applies to the classification of financial instruments, under the issuer's viewpoint, into financial assets, financial liabilities and equity instruments; the classification of corresponding interest, dividends, gains and losses; the circumstance in which the financial assets and liabilities shall be offset.

CPC 40 Financial Instruments: Reporting It introduces the need of detailed reporting on financial statements for the Company's equity and financial situation and its performance.

The Company's installment sales occur with the intermediation of FIC, whose receivables do not remain in the Company (Note 10 b (vi)).

The Company carries out securitization operations of the accounts receivable through PAFIDC

These assets are recorded at acquisition or construction cost (monetarily restated until December 31, 1995) deducted from the related accumulated depreciation, calculated on a straight-line basis at the rates mentioned in Note 11. In leasehold improvements, amortization is calculated considering the shortest term between the term of the lease agreement or assets useful life is utilized.

3. Summary of main accounting practices (Continued)

h) Property and equipment (Continued)

Expenditures for repairs and maintenance are recorded as expenses when they do not significantly affect the useful lives of related assets; or they do not aggregate to the value of assets when they materially contribute to the increase of useful lives of existing facilities and equipment.

i) Leasing

Financial leasing agreements are recorded in property and equipment against liabilities from loans and financing, by the lower amount between the present value of mandatory minimum installments of the agreement or the fair value of asset, accrued, where applicable of initial direct costs incurred on transaction. Implied interest rates recognized in loans and financing are appropriated to income for the year according to the duration of the agreement by the effective interest rate method.

Operating leasing agreements are recognized as expense based on the determination period of the benefit over leased asset by the Company, regardless of the basis used to determine leasing payments.

If the Company does not intend to acquire the asset, the depreciation is calculated considering the least term between the effectiveness of the agreement or the assets' useful life.

j) Intangible assets

Goodwill calculated in the acquisition of investments occurred until December 31, 2008, having future profitability as economic fundamental, was amortized on a straight-line basis for a term of 5 to 10 years until that date. As of January 1, 2009 goodwill balances are submitted to an annual test for impairment analysis, as set forth by CPC 01.

Intangible assets with defined useful life term are amortized according to such term and when sign of any impairment signs is verified these assets are submitted to impairment tests. Intangible assets with indeterminate useful life are not amortized, they are submitted to annual test for impairment analysis.

k) Provision for recovery of assets

The Management yearly reviews the net book value of assets with a view to identifying events or changes in economic, operating or technological circumstances that may indicate deterioration, obsolescence or impairment. When this evidence is identified and the net book value exceeds the recoverable value, a provision is recorded for impairment by adjusting the net book value to the recoverable value. These losses are classified as other operating expenses.

3. Summary of main accounting practices (Continued)

l) Other assets and liabilities (Continued)

An asset is recognized in the balance sheet when it is probable that its future economic benefits will be advantageous for the Company and its cost or value can be safely measured. Assets and liabilities are classified as current when their realization or settlement is probable to occur over the next 12 months, otherwise, these are stated as noncurrent.

The credits derived from non-cumulative PIS and COFINS are deducted from cost of goods sold in the statement of income for the year.

PIS and COFINS refer to the financial revenues and expenses recorded in the corresponding items.

The advances or amounts subject to offsetting are shown in the current and noncurrent assets, in accordance with the estimate for their realization.

Income and social contribution taxes are calculated according to the taxable income based on accounting records and are classified as current or deferred, as follows:

Current Income and social contribution taxes in Brazil, when opted for the taxable income regime, are calculated at the (i) 25% taxable income (15% increased by 10% surcharge on taxable income exceeding R\$240) for income tax, and (ii) 9% on taxable income for social contribution. Brazilian tax laws in force allows to carry forward tax losses referring to previous years with current tax income, limited to 30% of the taxable income of each year.

Deferred Deferred income and social contribution taxes are calculated based on tax losses and negative basis of social contribution, as well as temporary differences mainly composed of provisions related to the recording of litigations that are not deductible for calculation purposes of taxable income and calculation basis of social contribution only on the date of its financial realization.

n) Share-based compensation

Part of the compensation of the Company's main executives and managers is paid as stock option plan, measured by their fair value, calculated on the plan granting date, based on the market's pricing models, considering the share market value, the stock option exercise price and term of the agreement. 3. Summary of main accounting practices (Continued)

o) Present value adjustment of assets and liabilities

Noncurrent monetary assets and liabilities and current assets and liabilities, when relevant, are adjusted to their present value. The present value adjustment is calculated taking into account contractual cash flows and the respective explicit or implied interest rates.

The present value adjustment is recorded in those items, subject to the application of rule and financial result as corresponding entry.

p) Provision for litigations

As per CVM Deliberation 489/05, the Company adopts the concepts established in NPC 22 on Provisions, Liabilities, Contingent Assets and Liabilities when setting up its provisions and disclosure on matters regarding litigations and lawsuits. 3. Summary of main accounting practices (Continued)

r) Consolidated quarterly information (Continued)

Pursuant to CVM Ruling 408/04, the Company, since the first quarter of 2005, consolidates the PAFIDC quarterly information, as it represents a special purpose entity, organized with exclusive purpose of conducting the securitization of receivables of the Company and its subsidiaries, once the Company is exposed to most of risks and benefits related to the ownership of PAFIDC subordinated quotas.

Consistently with the economic valuation techniques, the usage value valuation is made for a 5-year period. Revenue growth rates used are compatible with long-term macroeconomic expectations, which are yearly reviewed based on the historical performance and prospects for the sector where the Company operates.

Future cash flows estimated were discounted at a single discount rate of 9.7% this year.

The Company's intangible assets impairment test did not require the recognition of losses since the estimated usage value exceeds its net book value on the valuation date.

* Weighted average rate

The Company uses swap operations to translate U.S. dollar-denominated, yen-denominated obligations and fixed interest rate to Brazilian *reais* liabilities pegged to CDI (floating) variation.

CDI annual benchmark rate at June 30, 2010 stood at 8.79% (8.61% at March 31, 2010).

b) BNDES

The line of credit obtained from the National Bank for Economic and Social Development (BNDES) is subject to indexation based on TJLP rate (long-term interest rate), accrued of annual interest rates. In the event the TJLP exceeds 6% p.a., the surplus will be added to the principal outstanding balance. The Company also has agreements indexed based on a basket of foreign currencies, in addition to the respective charges, plus the outstanding balance and annual interest rates. Financing is paid in monthly installments after a grace period, as mentioned below.

In the quarter ended June 30, 2010, the Company had two agreements entered into with BNDES at May 9, 2007, and July 28, 2009, which are indexed by TJLP.

13. Loans and financing (Continued)b) BNDES (Continued)

In addition to BNDES Resolutions 665/87 (Provisions Applicable to BNDES Agreements) and 660/87 (Follow-up Rules and Instructions), the Company must observe certain debt covenants indexes calculated based on its consolidated information, in accordance with Brazilian GAAP. At March 3, 2010, the Company renegotiated the ratios to be observed, which now are as follows: (i) maintenance of a capitalization ratio (shareholders' equity/total assets) equal to or in excess of 0.30 and (ii) maintenance of a current ratio (current assets/current liabilities) equal to or in excess of 1.05. The Management effectively controls and monitors debt covenants, and has been fully performing the ratios required on a contractual basis.

The funding obtained by subsidiary Globex with financial institutions (BNDES, Banco IBM and Unibanco) includes event of early maturity related to the change in the share control. Said financial institutions have already officially declared that they will not exercise this right referring to the declaration of early maturity.

14. Financial instruments

GPA uses financial instruments operations with a view to increase its capacity of investments in order to sustain its growth strategy. Derivatives operations are exclusively used to reduce the exposure to risks resulting from the foreign currency fluctuation and interest rates, aiming at maintaining the balanced capital structure.

Parent company's financial instruments and consolidated are reported pursuant to CVM Deliberations 478/08 and 566/08, which approved the Technical Pronouncement CPC 14.

Main financial instruments and their amounts recorded in the quarterly information by category are summarized as follows:

(*) (*) loans and derivative financial instruments classified as fair value hedge are recorded by fair value.

The Company adopts risk control policies and procedures, as outlined below:

a) Considerations on risk factors that may affect the business of the Company and its subsidiaries

(i) *Credit risk*

- *Cash and cash equivalents*: in order to minimize credit risk of these investments, the Company adopts policies restricting the marketable securities that may be allocated to a single financial institution, and which take into consideration monetary limits and financial institution ratings, which are frequently restated (Note 4).

- *Receivables*: The credit risk related to accounts receivable is mitigated by the fact that most of sales of the Company and its subsidiaries are carried out via credit cards. In the quarter ended June 30, 2010, direct sales to individuals through post-dated checks accounted for nearly 0.26% of total sales in the period (0.37% at June 30, 2009). Credit card and/or tickets sales are mostly assigned to PAFIDC, the risk of which is related and limited to the amount of subordinated quotas held by the Company (Note 8).

(ii) *Interest rate risk*

The Company and its subsidiaries obtain loans and financing from major financial institutions in order to meet its cash needs for investments and growth. As a result, the Company and its subsidiaries are exposed to material interest rate fluctuation risks, mainly due to the liabilities component of derivative operations (currency hedge) and CDI-related debts. The balance of marketable securities indexed to CDI, partially offsets this effect.

14. Financial instruments (Continued)

a) Considerations on risk factors that may affect the business of the Company and its subsidiaries (Continued)

(iii) *Exchange rate risk*

The Company and its subsidiaries are exposed to exchange rate fluctuations, which may result in the increase of liabilities balances of foreign currency-denominated loans. The Company and its subsidiaries use derivatives, such as swaps, which aim at annulling the exchange rate risk, turning the cost of debt into local currency and interest rates.

- *Derivative financial instruments*

The swap agreements mentioned above are classified as fair value hedges. At June 30, 2010, these agreements amount to a reference value of R\$1,680,720 (R\$1,000,753 in March 2010). Usually, these operations are contracted on a matched basis, in terms of value, term and rates, and preferably with the same financial institution, observing the limits established by the Management.

Other swap operations carried out by the Company and its subsidiaries are substantially related to debentures and BNDES loans, aiming at changing fixed and variable interest rates into variable interest rates (CDI). These instruments are classified as measured at fair value to income .

According to the Company s treasury policy, swaps with caps are not allowed, as well as margins, regret clauses, double index, flexible options or any other types of options different from traditional swaps for the hedge of debts, including for speculative purposes.

The Company s internal control environment was designed so as to ensure that transactions executed are in compliance with this treasury policy.

The Company calculates the effectiveness of these hedge operations upon their contracting and on a continued basis (at least, quarterly). Hedge operations contracted in the period ended June 30, 2010

showed effectiveness in relation to the debts, purpose of this hedge. For derivative operations qualified as hedge accounting, pursuant to CPC 14, the hedged debt is also adjusted at fair value as per fair value hedge rules.

14. Financial instruments (Continued)

a) Considerations on risk factors that may affect the business of the Company and its subsidiaries (Continued)

(iv) *Fair values of derivative financial instruments*

Fair values are calculated by projecting the future flows of operations, based on the projected CDI curves of BM&F Bovespa and carrying them at present value, using DI market rates to swaps published by BM&F Bovespa.

The market values of swaps exchange coupon x CDI were obtained by using exchange rates prevailing on the market on the date the financial information is drawn up and on rates projected by the market calculated based on the currency coupon curves. In order to determine the coupon of foreign currency indexed-positions the straight line convention of 360 consecutive days was adopted and to determine the coupon of CDI indexed-position the exponential convention of 252 business days was adopted.

b) Analysis of sensitivity of derivative financial instruments

CVM Ruling sets forth that publicly-held companies, supplementing the provision of item 59 of CPC 14 Financial Instruments: Recognition, Measurement and Supporting Documentation should disclose a sensitivity analysis chart, for each type of market risk deemed as relevant by the Management, originated by derivative financial instruments, to which the entity is exposed on each period closing date.

Pursuant to the provision above, according to the Management's evaluation, the most probable scenario is to realize on the maturity dates of each operation what the market has been signaling through market curves (currency and interest rates) of BM&F Bovespa. Therefore, in the probable scenario, there is no impact over the fair value of financial instruments mentioned above. For scenarios II and III, for exclusive effect of sensitivity analysis, a deterioration of 25% and 50%, respectively, was considered on derivative financial instruments until the maturity date of financial instruments.

For derivative instruments (destined to hedge its financial debt), variations in scenarios are accompanied by respective purposes of hedge, thus, evidencing that effects are practically null.

For these operations, the Company disclosed the balance of purpose (debt) and hedged derivative financial instrument in separate items of a Sensitivity Analysis Chart, so that to inform about the net exposure of the Company, in each one of the three scenarios mentioned:

Net effect			(45,343)	(91,568)

The Company's net exposure corresponds to CDI-related debt and the total net effect represents the deterioration of scenario II and III in relation to scenario I, which the Company considers as the most probable scenario.

(ii) *Measured at fair value through income*

Operations	Risk	Scenario I	Scenario II	Scenario III

Total net effect	(16)	(2,179)	(4,340)
-------------------------	-------------	----------------	----------------

The total net effect of scenarios mentioned above is basically due to the Company's exposure to CDI.

The subsidiary Globex has, at June 30, 2010, the amount of R\$116 (US\$64 thousand) related to Balance at Banks and R\$8,643 (US\$4,798 thousand) related to U.S. dollar-denominated foreign investment. As a result, the Company's Management does not deem as relevant the forex exposure risk.

f) Stock option plan for preferred shares

(i) *Original stock option plan*

The Company granted stock option plans for the purchase of preferred shares to the Management. Shares issued due to the exercise of stock option plans will grant its holders the same rights of existing PNA shares. The Stock Option Plans are managed by an internal committee designated by the Board of Directors.

The granting price for each share is, at least, 60% of the weighted average price of the preferred shares traded in the week the option is granted.

The number of shares may vary for each beneficiary or series. The vesting right to exercise the option may occur as follows and according to the following terms: (i) 50% in the last month of third year subsequent to the granting date (1st tranche) and ii) until 50% in the last month of fifth year subsequent to the granting date (2nd tranche), and the remaining portion of the second tranche subject to restraint on alienation until the beneficiary's retirement, as per formula defined in the regulation.

Shares subject to restraint on alienation (Q), upon the options exercise are calculated using the following formula:

Where:

Q = Number of shares to be encumbered by restraint on alienation.

$Q1$ = 50% of the Company total shares on the granting date.

Pm = Company share market price on the exercise date.

Pe = Share original exercise price, determined on the granting date, observing the terms of the Plan.

The option price is updated by reference to the General Market Price Index (IGP-M) variation to the date of its actual exercise, less dividends attributed for the period.

(ii) *New stock option plan for preferred shares.*

The price for the Silver-type share will correspond to the average of trading closing price of the Company preferred shares occurred over the last 20 trading sessions of BOVESPA, prior to the date on which the Committee resolves on the granting of option, with a 20% discount. The price for the Gold-type share will correspond to R\$0.01 and the granting of these options are additional to the Silver options, and the granting or the exercise of Gold options is not possible separately. In both cases, the prices will not be restated.

The Silver and Gold options shall be effective as of the date of the respective agreement. The number of shares resulting from the Silver option is fixed (established in the agreement). The number of shares resulting from the Gold option is variable, establishing on the granting date a number of shares that may be increased or decreased, according to the ROIC verified at the end of the 36th month as of the granting date.

The criteria to calculate the reducer or accelerator index of the amount of options granted, classified as gold-type in each series of the Plan, according to the analysis of observance to the concept of return on invested capital (ROIC), as follows:

(a) Accelerator: from 3%, at every 1% plus rate of return, increase by 0.5% the number of shares granted classified as gold-type.

(b) Reducer: from -3%, at every 1% less rate of return, decrease by 5% the number of shares granted classified as gold-type.

The series of previous plans continue in force until their respective maturity dates.

Operating Performance

The numbers related to Grupo Pão de Açúcar's operating and financial performance commented on below are presented: (i) on a **consolidated basis**, which includes the full operating and financial results of Sendas Distribuidora (a joint venture with the Sendas chain in Rio de Janeiro), Assaí (Rede Atacadista Assaí) and, as of the third quarter of 2009, Globex Utilidades S.A. (Ponto Frio); and (ii) on a **comparable basis**, which entirely excludes the operating and financial results of Globex Utilidades S.A. (Ponto Frio).

On December 4, 2009, Grupo Pão de Açúcar and Casas Bahia entered into a Joint Venture Agreement which established the terms and conditions governing the association between Globex and Casas Bahia.

On February 3, 2010, GPA and Casas Bahia informed their shareholders and the market in general of the main terms of the Provisional Transaction Reversal Agreement (APRO), entered into with CADE, the Brazilian antitrust authority. **On April 13, 2010**, GPA and Globex published a Material Fact announcing that Casas Bahia and its partners had manifested their intention of reviewing the association that was the object of the Joint Venture Agreement.

On July 1, 2010, GPA and Globex executed an addendum to the Joint Venture Agreement, announced in a Material Fact on July 2, 2010. This addendum altered certain conditions of the association between Globex and Casas Bahia, guaranteeing the implementation of the transaction.

In July, 2010, GPA's new organizational structure was implemented, with the adoption of a new integrated business management model. With the adoption of the new model, GPA seeks to evolve from a retail food company into a Multibusiness Conglomerate, which adheres to the group strategy, has a regional approach and seeks to capture synergies.

In the second quarter of 2010, Grupo Pão de Açúcar's gross sales increased by 11.5% over the same period last year to R\$6,287.3 million, while net sales climbed by 12.7% to R\$5,641.9 million.

In same-store terms (i.e. stores that have been operational for at least 12 months, therefore excluding the Ponto Frio stores), gross sales grew by 9.9%⁽¹⁾, giving real growth of 4.6% when deflated by the IPCA consumer price index⁽²⁾. This performance was adversely impacted by the seasonal effect of the Easter holiday in April and substantial gross same-store sales growth of 13.2% in 2Q09. Net sales recorded nominal growth of 11.3%.

Also on a same-store basis, gross food sales grew by 7.9% in the period, with beverages and perishables doing particularly well. Non-food sales climbed by 16.2%, led by the electronics/household appliance category, which was boosted by the World Cup, as well as the drugstore and textile categories, which recorded higher increases than the non-food average.

The Group's best-performing formats were Extra Supermercados, Extra Eletro and Assaí, which posted sales growth above the Group's average.

In the first half, Grupo Pão de Açúcar reported gross sales of R\$12,630.2 million and net sales of R\$11,357.9 million, 15.5% and 17.7% up, respectively, on the first six months of 2009.

In same-store terms, gross sales climbed by 12.4%, giving real growth of 7.0% when deflated by the IPCA⁽²⁾, while net sales recorded nominal growth of 14.6%. Sales of food and non-food products increased by 10.6% and 17.8%, respectively.

[Consolidated comments including Globex]

In the second quarter, Grupo Pão de Açúcar's consolidated gross sales grew by 38.5% year-on-year to R\$7,815.4 million, while net sales moved up by 39.4% to R\$6,977.9 million.

Globex's gross sales, including e-commerce operations, climbed by 55.8% over 2Q09 to R\$1,528.2 million, while net sales increased by 71.6% to R\$1,336.0 million. In same-store terms⁽³⁾, gross sales grew by 54.6%, driven by Mother's Day and the World Cup.

The Group's gross e-commerce sales (Pontofrio.com.br and Extra.com.br) recorded period growth of 45.4% in the quarter.

In the first half, Grupo Pão de Açúcar recorded consolidated gross sales of R\$15,601.1 million and net sales of R\$13,951.4 million, 42.7% and 44.6% up, respectively, on the same period last year.

Globex's gross sales climbed by 52.8% over 1H09 to R\$2,970.9 million, while net sales increased by 69.5% to R\$2,593.5 million. In same-store terms⁽³⁾, Globex's gross sales increased by 51.5%. Gross e-commerce sales (Pontofrio.com.br and Extra.com.br) posted period growth of 57.4%.

(1) Note that as of 2Q10, the sales of Extra.com.br were consolidated into Globex's operations. However, for same-store comparative purposes, these sales are still reflected in GPA's figures.

(2) Like ABRAS (the Brazilian Supermarket Association), the Company has adopted the IPCA consumer price Index as its inflation indicator, since it gives a more accurate reflection of the Company's product and brand mix.

(3) Ponto Frio's same-store concept includes physical and electronic/wholesale sales.

In the second quarter, gross profit totaled R\$1,398.2 million, 10.3% up year-on-year, accompanied by a gross margin of 24.8%, down by 50 bps over 2Q09 but an improvement over the 24.6% recorded in the 1Q10. The main factors contributing to the year-on-year reduction were:

(i) the increased share of Assaí in the Group's sales, which had a negative impact of 40 bps, partially offset by higher gross profit in absolute terms (cash margin);

(ii) the expansion of the ICMS tax substitution regime, which had a negative impact of 20 bps.

These impacts were also partially offset in the amount of 10 bps by more advantageous negotiations with suppliers and a more profitable product mix.

In the first half, gross profit amounted to R\$2,804.7 million, 14.8% up on the same period last year, accompanied by a gross margin of 24.7%, 60 bps less than the 25.3% recorded in 1H09, chiefly due to the change in the ICMS tax substitution regime, which accounted for 50 bps.

[Consolidated comments including Globex]

In the second quarter, consolidated gross profit came to R\$1,635.3 million, with a margin of 23.4%. The reduction over the comparable-basis gross margin was primarily due to the higher share of electronics/household appliances in the Group's total sales. These items have lower margins than food products.

In the first half, gross profit totaled R\$3,307.1 million, a 35.3% improvement over the first six months of 2009, while the gross margin stood at 23.7%.

[Comparable-basis comments excluding Globex]

In the second quarter, total operating expenses (including selling, general and administrative expenses) increased by 12.6% year-on-year to R\$1,038.4 million, chiefly due to two factors: (i) the opening of 62 stores in the last 12 months; and (ii) higher expenses with advertising, marketing and IT. As a percentage of net sales, operating expenses remained flat at 18.4% the same on 2Q09.

In the first half, total operating expenses totaled R\$2,067.7 million, 15.8% more than in 1H09, and represented 18.2% of net sales, 30 bps down on the same period last year.

[Consolidated comments including Globex]

In the second quarter, operating expenses amounted to R\$1,240.4 million, equivalent to 17.8% of net sales.

In the first half, total operating expenses stood at R\$2,501.8 million, equivalent to 17.9% of net sales.

In the second quarter, financial revenue grew by 22.6% over 2Q09 thanks to the higher average cash position, while financial expenses moved up from 37.1% to R\$159.2 million, due to: (i) the period R\$12.6 million increase in the average gross debt; (ii) the mark-to-market effect of financial instruments in the amount of R\$9.7 million; and (iii) the monetary restatement of tax installment payments totaling R\$8.4 million. Consequently, the net financial result was an expense of R\$91.8 million, 50.2% higher than in 2Q09.

The Group's capital structure remains solid, with stable cash flow, although net debt has increased, leading to a net debt/EBITDA ratio of 0.97x.

[Consolidated comments including Globex]

In the second quarter, the consolidated net financial result was an expense of R\$169.0 million. The net debt/EBITDA ratio stood at 1.1x, due to Globex's limited contribution to the Group's total EBITDA.

Equity Income***FIC's result came to R\$14.6 million in the quarter***

With the incorporation of Banco Investcred (Financeira Globex) by FIC (Financeira Itaú CBD) on October 1, 2009 and given their respective shareholders' equities, GPA now retains a 36% interest in FIC, excluding Globex, while Globex retains a 14% stake. The Group's consolidated interest in FIC remains at 50%.

In the second quarter, FIC, including Globex's operations, accounted for 15.0% of total sales, closing the period with 7.4 million clients and a receivables portfolio of R\$3.1 billion. Default remained under control, thanks to a rigorous credit-granting policy and the acceptance of the Ponto Frio Flex Card in GPA stores and vice-versa.

As a result, FIC's equity income was R\$14.6 million, a hefty 332.3% more than the same period a year earlier. Of this total, R\$10.7 million went to Grupo Pão de Açúcar and R\$4.0 million to Globex.

In the first half, equity income's results, including Globex's, totaled R\$24.2 million, of which R\$16.9 million went to Grupo Pão de Açúcar and R\$7.3 million to Globex. Note that FIC's results on a comparable basis, thus excluding Globex, more than doubled over the same period in 2009, thanks to several competitive initiatives, including exclusive benefits, advantages and promotional campaigns for FIC card holders.

In the second quarter, consolidated net income stood at R\$62.3 million, accompanied by a net margin of 0.9%, impacted by the non-recurring installment payment of tax debts. This amount, net of income tax and minority interest, comes to R\$40.8 million, giving an adjusted net income of R\$103.1 million and a net margin of 1.5%.

In the first half, consolidated net income came to R\$188.5 million, equivalent to 1.4% of net sales. Excluding the effects mentioned above, adjusted net income stood at R\$229.3 million, with a margin of 1.6%.

Assaí Atacadista

EBITDA margin widened by 50 bps in the quarter

In the second quarter, Assaí recorded **gross sales** of R\$742.5 million, including the stores in São Paulo, Ceará, Rio de Janeiro, Pernambuco and Tocantins, 47.1% up on 2Q09, fueled by the opening of new stores and the conversion of existing ones in the last 12 months and the format's improved operating result. **Net sales** climbed by 46.7% to R\$668.0 million.

Gross profit totaled R\$103.3 million, with a margin of 15.5%, same level as in 2Q09. **Total operating expenses** came to R\$80.5 million, 40.3% up on 2Q09, but still less than the 47.1% upturn in net sales in the same period. As a percentage of net sales, total operating expenses fell from 12.6% in 2Q09 to 12.1%, due to stringent control over expenses and synergy gains with Grupo Pão De Açúcar, enabling the Company to reinvest in price competitiveness without jeopardizing profit margins.

EBITDA amounted to R\$22.8 million, with a **margin** of 3.4%, up by 50 bps, thanks to substantial sales growth, more advantageous negotiations with suppliers and the rationalization of expenses.

In the first half, Assaí posted **gross sales** of R\$1,412.4 million and net sales of R\$1,276.7 million, 49.4% and 50.6% up, respectively, on 1H09.

Gross profit totaled R\$181.7 million, with a margin of 14.2%, down 40 bps on 1H09. **Total operating expenses** amounted to R\$142.9 million, representing 11.2% of net sales.

EBITDA came to R\$38.8 million, 216.7% up year-on-year, with an **EBITDA margin** of 3.0%, an improvement of 160 bps over the same period in the previous year.

Globex Utilidades S.A.

In same-store terms, gross sales increased by 54.6%

In the second quarter of 2010, gross sales climbed by 55.8% over 2Q09 to R\$1,528.2 million, while net sales came to R\$1,336.0 million, up by 71.6%.

Gross profit totaled R\$237.2 million, 80.5% up on the same period last year, with a gross margin of 17.8%, a 90 bps improvement, chiefly due to more advantageous negotiations with suppliers and the incorporation of a more profitable mix, reflecting the measures introduced in the first quarter and which continued to generate positive results in the second.

Total operating expenses (including selling, general and administrative expenses) fell by 35.6% year-on-year to R\$202.0 million. Excluding non-recurring effects occurred in 2Q09, amounting to R\$97.0 million, total operating expenses would have come to R\$216.8 million in 2Q09, R\$14.8 million higher than 2Q10. In percentage-of-net-sales terms, however, there was a 1270 bps improvement over 2Q09.

EBITDA was a positive R\$35.2 million, with a margin of 2.6%, versus a negative R\$182.4 million posted in 2Q09.

The **net financial result** was a negative R\$77.2 million, versus a negative R\$25.4 million in 2Q09, impacted chiefly by: (i) the increased share of non-interest-bearing installment sales, leading to an upturn in the volume of discounted receivables in relation to 2Q09; (ii) the higher debt due to new working capital funding; and (iii) changes in the criterion for booking the cost of new discounted receivables, which are now recognized in the same month as the discount, given that the Company is no longer subject to the risk that these credits may not be realized.

Equity income, considering Globex's 14% interest in FIC and 50% interest in the remaining equity of BINV, came to R\$4.0 million, thanks to rigorous credit granting criteria and the acceptance of Ponto Frio cards in Grupo Pão de Açúcar stores and vice-versa. It is also worth mentioning several competitive initiatives, such as exclusive benefits, advantages and promotional campaigns for FIC card users.

Net income totaled R\$36.0 million, a R\$318.7 million improvement over the loss recorded in 2Q09.

Excluding the non-recurring items in 2Q10 related to: (i) the reversal of provisions constituted due to the adherence to state and municipal tax repayment installment plans; and, chiefly, (iii) the amount arising from the First Addendum to the Joint Venture Agreement between Globex, CBD and Casas Bahia, which granted Globex the right to indemnification by CBD of certain recognized contingencies owed by Globex as of June 30, 2010, the result would be impacted in R\$59.9 million, net of taxes, which would bring to a negative R\$23.9 million in 2Q10, versus a negative R\$94.0 million in 2Q09, also adjusted for non-recurring items, and an improvement of R\$70.1 million.

In the first half, gross sales totaled R\$2,970.9 million, 52.8% up on the same period last year, while net sales grew by 69.5% to R\$2,593.5 million. In same-store terms, gross sales increased by 51.5% over 1H09. **Gross profit** climbed by 77.1% year-on-year, while the gross margin widened by 80 bps.

Total operating expenses amounted to R\$434.1 million, 12.0% down on 1H09 and equivalent to 16.7% of net sales, versus 32.3% in the same period last year.

Excluding non-recurring items totaling R\$97.0 million in 1H09, these expenses would come to R\$396.4 million in 1H09, an increase of R\$37.7 million in absolute terms and a reduction of 920 bps in percentage-of-net-revenue terms in 1H10 thanks to improved expense management and controls in this semester.

EBITDA came to R\$68.3 million, with a margin of 2.6%, versus the negative R\$209.7 million posted in 1H09.

The **net financial result** totaled R\$104.3 million, R\$68.9 million up year-on-year in absolute terms.

Equity income amounted to R\$7.3 million.

Net income came to R\$32.3 million, versus the R\$318.2 million loss recorded in 1H09. Excluding non-recurring effects, Globex would have declared a net loss of R\$27.6 million in 1H10, versus a loss of R\$129.5 million in 1H09, an improvement of R\$101.9 million.

21.01 SPECIAL REVIEW REPORT - UNQUALIFIED OPINION

REVIEW REPORT OF INDEPENDENT AUDITORS

To the Board of Directors and Shareholders of

Companhia Brasileira de Distribuição

São Paulo - SP

1. We have performed a review of the accompanying unconsolidated and consolidated Quarterly Financial Information (ITR) of Companhia Brasileira de Distribuição and the Company and subsidiaries for the quarter ended June 30, 2010, including the balance sheets, statements of income, shareholders equity, cash flows, added value, notes to the quarterly financial information and Company s performance comments prepared under responsibility of Management of the Company.

2. Our review was conducted in accordance with the specific procedures determined by the Institute of Independent Auditors of Brazil (IBRACON) and the Federal Board of Accountancy (CFC), and included principally: (a) inquiries of and discussions with the management responsible for the Company s and subsidiaries accounting, financial and operating areas regarding the criteria adopted for the preparation of the quarterly information and (b) review of information and subsequent events which have or might have significant effects on the Company s and subsidiaries operations and financial position.

3. Based on our review, we are not aware of any material modification that should be made to the Quarterly Financial Information referred in paragraph 1 for it to comply with accounting practices adopted in Brazil and Brazilian Securities Exchange Commission (CVM) instructions, applicable to the preparation of Quarterly Financial Information.

4. As mentioned in Note 2, during 2009, CVM approved several accounting pronouncements, interpretations and guidances, which were issued by the Accounting Pronouncements Committee (CPC), with mandatory application in 2010. These accounting pronouncements, interpretations and guidance change the accounting practices adopted in Brazil. According to the Deliberation CVM no. 603/09, Management of the Company chose to present the Quarterly Financial Information (ITR) prepared according to the accounting practices adopted in Brazil until December 31, 2009, not adopting the new accounting rules applicable for 2010. As required by the Deliberation CVM no. 603/09, the Company described in Note 2 the main changes that could have impact over the financial statements for December 31, 2010, and clarifications over the reasons that preclude the estimation of impacts in the shareholders equity and net income.
