São Paulo, Brazil, October 27, 2016 - GPA [BM&FBOVESPA: PCAR4 (PN); NYSE: CBD] announces its results for the third quarter of 2016 (3Q16). The comments refer to the consolidated results of the Group or of its business units. All comparisons are with the same period in 2015, except where stated otherwise.

Third-quarter 2016 Results

Consolidated net sales reached R\$15.1 billion, driven mainly by the following factors:

- **Assaí's total sales growth accelerates to 45.7%, with double-digit SSS growth**
- **Extra's sales volume and market share begin to recover, primarily in the Hyper format**
- **Via Varejo's sales growth outperforms the market average**
- **40 stores opened in the last 12 months**

Consolidated adjusted EBITDA of R\$619 million, with margin of 4.1%, an improvement compared to 2Q16^(a):

- **Multivarejo's adjusted EBITDA margin expands 140 bps, driven by the 230 bps recovery in EBITDA margin at Extra stores vs. 2Q16^(a)**
- **Assaí's existing and new store base posts a solid performance, supporting Adjusted EBITDA growth of 62.2%**
- **Via Varejo's adjusted EBITDA margin^(a) expands 140 bps to 3.6%, reflecting its capacity to adapt to market conditions**

Solid cash position of R\$5.2 billion^(b) in highly liquid resources, besides R\$1.3 billion in pre-approved/confirmed credit facilities. Reduction of net debt of brick-and-mortar stores compared to June 2016:

- **Improvement in Food segment of R\$130 million^(b), even with the organic expansion at Assaí**
- **Via Varejo continues to strengthen its solid financial position, with improvement of R\$180 million^{(b)(c)}**

Multivarejo:

- Effectiveness of new commercial strategy confirmed by a stronger sales trend at Extra (Hyper and Super), with Extra Hiper's SSS growth accelerating 720 bps and its sales volume recovering 1210 bps vs. 1Q16, with market share volume gains in the Hyper format in the last 5 measurements (April to August);
- Adjusted EBITDA of R\$313 million with margin of 4.9%, up 140 bps from 2Q16^(a), led by the strong decrease in SG&A. The highlight was the 230 bps EBITDA margin recovery at Extra stores (Hyper and Super)
- Continued profitability at Pão de Açúcar and gradual improvement in the Proximity business

Assaí:

- Strong growth of 45.7% in total sales: double-digit SSS growth, with solid double-digit growth in customer traffic and continued organic expansion
- Focus on expansion: 8 stores under construction, including 2 conversions of Extra Hiper to Assaí
- Adjusted EBITDA Margin of 4.4% (+40 bps vs. 3Q15), despite the opening of 12 stores in the last 12 months
- Net income growth of 75.6% to R\$65 million supported by the higher operational leverage

Via Varejo:

- Consistent market share gains combined with growing profitability
- Adjusted EBITDA margin expansion of 30 bps, demonstrating the better trend compared to 2Q16^(a)

Cnova Brasil:

- Expansion in marketplace share of GMV to 21.2% (up 930 bps vs. 3Q15), with significant acceleration when compared to previous quarters;
- Focus on increasing traffic, capturing logistics efficiency gains and encouraging active clients to return.

(a) Excluding non-recurring tax credits. (b) Includes credit card receivables available for sale, (c) Excludes CDCI.

(1) Due to the ongoing ownership restructuring, GPA will no longer control of Cnova NV activities outside Brazil. As a result, in September 2016, the net result after taxes from these activities was reported as a single line of the income statement and the balances of assets and liabilities as held-for-sale assets and discontinued operations. The September 2015 income statement has been adjusted using the same concept, in accordance with IFRS 5/CPC31. (2) Sums and percentages may present discrepancies due to rounding. All margins were calculated as a ratio of net sales; (3) Earnings before interest, tax, depreciation and amortization; (4) EBITDA adjusted by the line "Other Operating Income and Expenses" to eliminate nonrecurring income and expenses. (5) Net Income Adjusted for the total of "Other Operating Income and Expenses," which eliminates nonrecurring income and expenses, as well as the respective effects from associated income tax.

(1) Excludes revenue from intercompany transactions; (2) Extra and Pão de Açúcar. Includes revenue from the leasing of commercial centers; (3) Includes revenue from intercompany transactions. (4) Due to the ongoing ownership restructuring, as announced on September 12, 2016, GPA will no longer control Cnova NV activities outside Brazil. As a result, at September 30, 2016, these activities are classified as discontinued operations, with a retrospective adjustment of sales through January 1, 2015, as required under IFRS 5/CPC31 – Non-current Assets Held for Sale and Discontinued Operations.

Sales Performance – Consolidated

§ Consolidated net sales grew 4.4% to R\$15.1 billion, supported by the recovery in sales at Multivarejo, the acceleration in sales growth at Assaí and the continued recovery at Via Varejo.

§ The Food segment (Multivarejo + Assaí) posted strong growth in total net sales of 14.0%, driven by the acceleration in sales growth at Assaí (+45.7%) and by the gradual recovery in sales at Multivarejo (+1.1%) due to the better performance of Extra. Same-store sales growth in Food categories was 11.4%.

§ Continued sales recovery at Via Varejo, with same-store sales growth of 1.8% and the marketplace share of GMV near the highest level ever, demonstrating the format's capacity to adapt to current market conditions.

§ Four stores opened in the quarter (3 Assaí and 1 Casas Bahia), bringing total store openings in the last 12 months to 40. At present, 14 stores are under construction: 8 Assaí stores, including 2 conversions from Extra Hiper, 1 Pão de Açúcar and 5 Minuto Pão de Açúcar stores. Higher-return formats remain the priority of both expansions and format conversions.

Food Segment (Multivarejo + Assaí)

§ Net sales in the quarter were R\$10.1 billion, advancing 14.0%, the strongest growth pace since 3Q14. Food categories posted total sales growth of 18.6%. This acceleration is explained by the continued strong growth of Assaí and by the sales recovery at Multivarejo, driven by the commercial actions implemented at Extra in 2Q16. The opening of 36 stores in the last 12 months also helped drive sales growth in the period.

§ Same-store sales growth in the Food segment was 8.9%, the best performance in three years, driven by sales volume growth at Multivarejo and the strong sales performance by Assaí, whose double-digit growth significantly outpaced inflation. Meanwhile, Food categories posted same-store sales growth of 11.4%.

§ The better performance at Multivarejo reflects the initial results of the new commercial strategy implemented at Extra (Extra Super and Extra Hiper) during 2Q16 to reinforce the banner's low-price reputation through the following actions:

- “1,2,3 Savings Steps”: progressive discounts, starting with 20% on the purchase of the first unit and increasing to 33% on the third unit, to meet all the food, home care and personal care needs;
- "Hyper Fair": competitive everyday prices in the Fresh Produce category; and
- “The Lowest Price”: lowest price on a selection of staples.

§ These three initiatives supported recoveries in sales and volumes in the food category at Extra, which registered an acceleration in same-store sales growth of 500 bps (from around 1% in 1H16 to over 6% in 3Q16). The banner will continue to focus on initiatives to grow its sales volume. The non-food category at Extra showed signs of recovery, though sales performance was still negative, in line with the market, reflecting the adverse macroeconomic scenario.

§ The performance of Pão de Açúcar and Proximity stores (Minuto Pão de Açúcar and Minimercado Extra) was stable in the quarter compared to the first half of the year.

§ Assaí registered net sales growth in the quarter of 45.7% to R\$3.7 billion. The result reflects the strong double-digit growth in same-store sales, significantly outpacing inflation, as well as the substantial double-digit increase in customer traffic and organic expansion (12 new stores in the last 12 months). Another highlight is the continued growth in the format's share of the Food segment, which already accounts for 37% of sales (vs. 29% in 3Q15).

Via Varejo

§ Same-store sales growth of 1.8% and total sales growth of 0.4%, despite the impact from store closures in 2H15 and 1Q16. This growth was driven by the performance of the Technology category, especially mobile phones, televisions and washing machines, and by the continuation of the effective and unique product assortment at stores, which gives sales teams the tools needed to boost conversion rates. Financial services also helped the format maintain its contribution to total sales in the quarter.

§ Via Varejo remains focused on improving its sales performance. This quarter, it found a better balance between sales growth, market share gain and profitability, despite the challenging macroeconomic scenario and the still weak market for electronics and home appliances.

§ According to the Monthly Retail Survey (PMC) published by the IBGE, the furniture and electronics/home appliances market contracted by 6.8% in July compared to the same period in 2015, which, given the positive growth in net sales in 3Q16, suggests that Via Varejo continues to capture structural market share gains in both the specialty and total markets, despite the strategy adopted in 3Q16 to boost margins.

§ Via Varejo will continue to focus on capturing operating efficiency gains at its stores by integrating the brick-and-mortar and e-commerce businesses, capturing the synergies already announced, continually improving the quality of customer service in both channels and monitoring the cost and expense structure to optimize its results and profitability in 2016 and the coming years.

Cnova

Due to the ongoing ownership restructuring, as announced through the material fact notice of September 12, 2016, GPA will no longer control Cnova NV activities outside Brazil. As a result, at September 30, 2016, these activities were classified as discontinued operations, with a retrospective adjustment of sales through January 1, 2015, as required under IFRS 5/CPC31 – Non-current Assets Held for Sale and Discontinued Operations.

§ GMV in 3Q16 amounted to R\$1.5 billion, down 24.2% from 3Q15. In addition to the severe impact from Brazil's current macroeconomic conditions on consumer spending, the contraction is explained by the commercial dynamics adopted by Cnova Brasil in the quarter. Compared to 2Q16, and consistent with Via Varejo's strategy, Cnova Brasil pursued a better balance between its GMV, market share and profitability in the quarter.

§ The marketplace share of GMV reached 21.2% in 3Q16 (+930 bps vs. 3Q15).

§ Customer traffic was stable compared to the same period last year at 210.8 million visits in 3Q16, 45.7% of which originated from mobile devices, compared to 32.4% in 3Q15.

§ This quarter, Cnova Brasil focused exclusively on improving its customer service. This led to a reduction in cart abandonment rates to near zero and to a 39.6% drop in the customer contact rate (% of customers seeking assistance from the call center).

Adjusted EBITDA Margin	4.1%	4.7%	-60 bps	4.1%	5.7%	-160 bps

(1) EBITDA adjusted for “Other Operating Income and Expenses,” thus eliminating nonrecurring income and expenses.

Due to the ongoing ownership restructuring, as announced through the material fact notice of September 12, 2016, GPA will no longer control of Cnova NV activities outside Brazil. As a result, in September 2016, the net result after taxes from these activities was reported as a single line of the income statement and the balances of assets and liabilities were reported as held-for-sale assets and discontinued operations. The September 2015 statements of income and cash flow have been adjusted using the same concept, in accordance with IFRS 5/CPC31.

Adjusted EBITDA reached R\$619 million with margin of 4.1%, an evolution in compared to 2Q16 excluding tax credits mainly due to:

- i) Adjusted EBITDA margin expansion of 140 bps at Multivarejo to 4.9%, led by a 230 bps recovery in EBITDA margin at Extra stores compared to 2Q16. Assaí's adjusted EBITDA margin expanded 40 bps, due to the solid performance of existing and new stores;
- ii) EBITDA margin expansion of 140 bps at Via Varejo to 3.6%, excluding non-recurring tax credits, demonstrating its capacity to adjust to market conditions.

Note that the end of tax relief under the law to benefit technology and IT products (*Lei do Bem*) generated a significant negative impact on Consolidated EBITDA margin in 3Q16 of 100 bps, which corresponds to approximately R\$137 million. In 9M16, this impact corresponded to approximately R\$430 million. Note that GPA is one of the segment's only players to adopt this practice and continues to evaluate its position regarding the law, which should be concluded in 4Q16.

The main factors impacting EBITDA in the quarter were:

§ **Gross profit** of R\$3,789 million, with margin expansion of 20 bps to 25.1%, led by the shift in gross margin mix at each business, as follows:

- (i) Assaí: gross margin was practically stable compared to 3Q15 (14.5%), with margin gain of 10 bps;
- (ii) Multivarejo: margin contraction of 130 bps, due to the continued price competitiveness initiatives at Extra and to the change in consumer behavior arising from the current economic scenario;
- (iii) Via Varejo: margin expansion of 180 bps explained by the better balance among sales growth, market share gains and profitability, despite the challenging scenario and weak market;

§ **Selling, general and administrative expenses** were R\$3,216 million, increasing 8.2% in the quarter, in line with period inflation. The streamlining initiatives at Multivarejo and Via Varejo led expenses to increase significantly slower than inflation, by 4.4% and 4.2%, respectively. Assaí's expenses increased 40.8%, still lagging sales growth, reflecting the strong organic expansion with 12 store openings in the last 12 months.

In the quarter, Other Operating Income and Expenses came to R\$116 million, most of which involved expenses with integration and restructuring (R\$ 77 million) and the result from property and equipment (R\$20 million).

Multivarejo

Adjusted EBITDA Margin	4.9%	6.9%	-200 bps	5.2%	7.1%	-190 bps

(1) EBITDA adjusted for "Other Operating Income and Expenses," thus eliminating nonrecurring income and expenses

The effectiveness of the new commercial strategy was confirmed by the stronger sales trend at Extra (Hyper and Super), with Extra Hiper's same-store sales growth accelerating 720 bps and its sales volume recovering 1210 bps compared to 1Q16, with market share gains in volume in the Hyper format in the last 5 measurements (April to August).

On a total-store basis, net sales grew 1.1%, reflecting the closure of 41 stores, net of openings, in the last 12 months, which consisted of 25 convenience stores, 5 Extra Super and 3 Extra Hiper (2 stores to be converted into Assaí), in addition to 6 service stations and 2 drugstores.

Adjusted EBITDA came to R\$313 million, with margin of 4.9%, expanding 140 bps from 2Q16 (excluding tax credits), due to the strong decrease in SG&A. The highlight was the 230 bps recovery in EBITDA margin at Extra stores (Hyper and Super).

The main factors influencing EBITDA in the period were:

§ **Gross profit** of R\$1,697 million, with margin of 26.7%, remains stable compared to 2Q16 (excluding tax credits). The decrease compared to 3Q15 reflects the price competitiveness initiatives implemented at Extra since 2Q16 and the changes in consumer habits due to the current economic scenario.

§ **Selling, general and administrative expenses** fell 6.7% compared to 2Q16, to R\$ 1,411 million, with the highlight the 7.9% decrease in selling expenses, which was mainly due to:

i) 5.4% reduction in personnel expenses due to the reviews of processes conducted at stores, which led to the streamlining of approximately 7,000 employees (FTE criteria) since the beginning of the year;

ii) Streamlining of marketing efforts, leading to a decrease of 8.8%;

iii) Energy efficiency projects led to a sharp drop in consumption that supported to a 19.1% decrease in electricity expenses.

Compared to 3Q15, **SG&A expenses** rose 4.4%, or by half the rate of inflation, reflecting the expense-streamlining projects.

Other Operating Income and Expenses came to R\$42 million in the quarter and are mainly related to restructuring expenses and the result of property and equipment.

(1) EBITDA adjusted for “Other Operating Income and Expenses,” thus eliminating nonrecurring income and expenses

For yet another quarter, Assaí posted strong net sales growth, of 45.7%, driven by double-digit same-store sales growth, significantly outpacing inflation, solid double-digit growth in customer traffic and the ongoing organic expansion. The banner already accounts for the largest share of sales in the Food segment, of 37% (vs. 29% in 3Q15), and will continue to focus its efforts on organic expansion, with 8 stores currently under construction, including 2 conversions from Extra Hyper to Assaí stores.

Assaí registered a significant improvement in profitability in the quarter, given the stability in gross margin and dilution of selling, general and administrative expenses by 30 bps supported by sales growth and the more disciplined control of expenses.

Consequently, Adjusted EBITDA was R\$165 million, representing robust growth of 62.2% and outpacing sales growth in the period. Meanwhile, Adjusted EBITDA margin expanded 40 bps to 4.4%.

The improvement in profitability was achieved despite the opening of 12 stores in the last 12 months.

As a result of the increased operational leverage, Assaí posted net income of R\$65 million, an increase of 75.6% on the prior-year period.

Adjusted EBITDA Margin	5.1%	4.8%	30 bps	6.0%	7.2%	-120 bps

(1) Some figures in this earnings release differ from those presented in the Via Varejo release due to the effects of intercompany transactions; (2) EBITDA adjusted for “Other Operating Income and Expenses,” thus eliminating nonrecurring income and expenses.

In the quarter, Via Varejo registered consistent market share gains accompanied by higher profitability, reflecting the better adjustment to the assortment at stores, the solid performance of the technology and services categories and the better balance between sales and results.

Adjusted EBITDA amounted to R\$208 million, with margin of 5.1%, expanding 30 bps from 3Q15. The main factors contributing to this result were:

§ **Gross profit** of R\$1,407 million, growing by 4.8% or R\$ 64 million from 3Q15, impacted by:

- positive effect of R\$39 million from the recognition of tax credits;
- negative effect of R\$ 43 million related to the impact from the end of tax relief on payroll charges;
- on a comparable basis, i.e., adjusted for the aforementioned impacts, gross margin in 3Q16 was stable compared to 3Q15 (33.5%), an improvement from gross margin adjusted for tax credits in 1H16, reflecting

Edgar Filing: BRAZILIAN DISTRIBUTION CO COMPANHIA BRASILEIRA DE DISTR CBD - Form 6-K
the better balancing of sales and profitability, as well as the higher penetration of the technology category.

§ **Selling, general and administrative expenses** increased 4.2% compared to 3Q15 to R\$ 1,216 million:

- on a comparable basis, i.e., adjusted for the impact of R\$61 million in 3Q15, and partially offset by the reversal of the provision of R\$16 million in 3Q16, expenses were virtually stable as a ratio of net sales, reflecting Via Varejo's capacity to adapt to current market conditions.

A highlight was the better trend in adjusted EBITDA margin excluding non-recurring tax credits of 140 bps compared to 2Q16, to 3.6%, reflecting the capacity to adapt to market conditions.

Via Varejo will continue to focus on capturing operating efficiency gains at its stores, implementing strategic projects and monitoring its cost and expense structure to continue delivering better results and higher profitability in the coming periods.

Financial Result

Consolidated							
(R\$ million)	3Q16	3Q15	Δ		9M16	9M15	Δ
Financial Revenue	101	168	-39.6%		382	581	-34.3%
Financial Expenses	(579)	(513)	12.8%		(1,713)	(1,645)	4.2%
Net Financial Revenue (Expenses)	(477)	(345)	38.4%		(1,332)	(1,064)	25.2%
% of Net Revenue	3.2%	2.4%	80 bps		2.9%	2.4%	50 bps
Charges on Net Bank Debt	(196)	(153)	28.6%		(511)	(388)	31.6%
Cost of Discount of Receivables of Payment Book	(91)	(78)	16.6%		(263)	(246)	6.9%
Cost of Sale of Receivables of Credit Card	(139)	(114)	22.0%		(463)	(432)	7.0%
Restatement of Other Assets and Liabilities	(51)	(0)	n.a.		(95)	3	n.a.
Net Financial Revenue (Expenses)	(477)	(345)	38.4%		(1,332)	(1,064)	25.2%

In 3Q16, the net financial result was an expense of R\$477 million, increasing 38.4% on the same period last year. For a better understanding of the financial result and to eliminate potential distortions between quarters, the following explanations refer to the main variations in the year to date (9M16).

In 9M16, the net financial result was an expense of R\$1,332 million, increasing 25.2%, or faster than the variation in the basic interest rate (average CDI rate in period), which is basically explained by the deterioration in net debt at Cnova and by the effects on the comparison base in the line Restatement of Other Assets and Liabilities. The main variations in the net financial result were:

§ increase of R\$123 million, or 31.6%, in charges on net debt, reflecting the lower average cash balance held in the period, which is basically explained by the deterioration in Cnova's net debt, among other factors;

§ increase of R\$48 million, or 6.9%, in the cost of sale of receivables from cards and payment books, or slower than the variation in the CDI rate in the period. The Company held approximately R\$1.8 billion in credit card receivables available for sale, consistent with its cash management strategy;

§ increase of R\$98 million in the line Restatement of Other Assets and Liabilities, which is mainly related to the positive impacts in 2015 from the inflation adjustment of recoverable taxes and real estate projects (INCC inflation).

In the current scenario marked by expectations of lower interest rates (based on target SELIC rate), the net financial result at the end of the year is expected to correspond to approximately 3% of net revenue. From an annualized perspective, a reduction of 50 bps in the interest rate would generate savings of R\$40 to R\$60 million in the financial result.

Adjusted Net Income (Loss) - Controlling Shareholders - continuing operations ⁽¹⁾	(27)	108	n.a.	26	113	-77.2%	(1)	29	n.a.
Adjusted Net Margin - Controlling Shareholders	-0.2%	0.7%	-90 bps	0.3%	1.3%	-100 bps	0.0%	0.7%	-70 bps

(1) Net Income adjusted for “Other Operating Income and Expenses,” thus eliminating nonrecurring income and expenses, excluding the effects of Income and social contribution taxes.

The consolidated net loss attributable to controlling shareholders of continuing operations was R\$85 million in the quarter, which was affected primarily by Cnova Brasil. However, the improvement compared to 2Q16 demonstrates the Company’s gradual recovery despite the adverse economic scenario.

A highlight was the net income growth of 75.6% to R\$65 million at Assaí, driven by the banner's increased operational leverage.

In the Food segment, net income attributable to controlling shareholders and adjusted by other operating income and expenses was R\$26 million, while Via Varejo's result was virtually breakeven.

Due to the ongoing ownership restructuring, as announced through the material fact notice of September 12, 2016, GPA will no longer control of Cnova NV activities outside Brazil. As a result, in September 2016, the net result after taxes from these activities was reported as a single line on the income statement and the balances of assets and liabilities were reported as held-for-sale assets and discontinued operations. The September 2015 statements of income and cash flow were adjusted using the same concept, in accordance with IFRS 5/CPC31. However, said technical rule does not require restatement of the balance sheet in such cases. To improve comparisons between periods, a column presenting comparable results for September 2015 was added to the above indebtedness table.

The Company ended September 2016 with a cash balance of R\$3.4 billion and a balance of R\$1.8 billion in receivables available for sale, bringing the aggregate amount of funds with immediately liquidity (if needed) to R\$5.2 billion. In the same period of 2015, the cash position was R\$5.6 billion. The Company also has approximately R\$1.3 billion in pre-approved/confirmed credit facilities.

Gross debt ended the period at R\$6.7 billion, increasing R\$320 million, or 5%, from September 2015, although with an average cost below the interest rate in the period (9%). The payment book operation (CDCI) increased R\$414 million, surpassing the growth in gross debt.

Consequently, net debt, including the payment book operation and receivables available for sale, stood at R\$4.2 billion at end-September. The increase of R\$ 1.1 billion in net debt⁽²⁾ compared to September 2015 is mainly due to the higher debt at Cnova in 2016 (increase of around R\$1.1 billion).

(1) EBITDA in the last 12 months.

(2) Includes unsold credit card receivables of R\$1,824 million in 3Q16 and R\$1,069 million in 3Q15.

Due to the ongoing ownership restructuring, as announced through the material fact notice of September 12, 2016, GPA will no longer control of Cnova NV activities outside Brazil. The above cash flow includes Cnova NV activities outside Brazil in all periods

The Company's cash position ended September 2016 at R\$4 billion, down some R\$1.4 billion from a year earlier. In the last nine months, the main variations were as follows:

§ Deterioration in working capital, which is mainly explained by (i) the comparison-base effect from the increased gap between inventories and suppliers in 2015; (ii) weaker growth in Non-Food segments; and

(iii) higher volume of receivables not sold in 2016;

§ EBITDA suffered an impact of R\$1 billion, which is mainly explained by the reduction of approximately R\$500 million in Cnova's operating result;

§ Specific payments at Multivarejo;

§ These effects were partially mitigated by (i) higher net financing (comparison-base effect due to the higher volume of maturities in 2015); (ii) lower investments, given the focus on profitability; and (iii) lower cash out of dividends and taxes.

Capital Expenditure

Total	410	510	-19.6%	1,071	1,496	-28.4%	339	376	-10.0%	862	1,039	-17.1%

The Group's investment amounted R\$410 million in 3Q16, of which 83% was allocated to the Food segment. In the first nine months of the year, investment came to R\$1.1 billion, 80% of which was allocated to the Food segment.

Three Assaí stores and 1 Casas Bahia were opened in the quarter.

New stores accounted for 26% of total investment, or R\$108 million, which was almost entirely allocated to the Food segment, given the current macroeconomic scenario, which is not as favorable for the Non-Food segment. There are currently 14 stores under construction, with priority given to higher-return formats.

Renovations and store conversions accounted for 43%, or R\$177 million, of investment. The 14.1% increase reflects the need to renovate older stores and the energy efficiency project in partnership with Green Yellow, especially at Extra.

Infrastructure and other investments consumed R\$133 million, or 32% of total investment, and were chiefly allocated to IT modernization projects and to improving logistics infrastructure.

Appendix II – Definitions used in this document

Company's Business Units: The Company's business is divided into four units - Retail, Cash & Carry, Bricks and mortar (sale of home appliances and furniture) and E-commerce – grouped as follows:

Same-Store Sales: The basis for calculating same-store sales is defined by the sales registered in stores open for at least 12 consecutive months. Acquisitions in their first 12 months of operation are not included in the same-store calculation base.

Growth and changes: The growth and changes presented in this document refer to variations from the same period of the previous year, except where stated otherwise.

EBITDA: EBITDA is calculated in accordance with Instruction 527 issued by the Securities and Exchange Commission of Brazil (CVM) on October 4, 2012.

Adjusted EBITDA: Measure of profitability calculated by excluding Other Operating Income and Expenses from EBITDA. Management uses this measure because it believes it eliminates nonrecurring expenses and revenues and other nonrecurring items that could compromise the comparability and analysis of results.

Adjusted net income: Measure of profitability calculated as Net Income excluding Other Operating Income and Expenses and excluding the effects of Income and Social Contribution Taxes. Also excluded are the effects of nonrecurring direct income tax. Management uses this metric in its analyses given its belief that it eliminates any nonrecurring expenses and revenues and other nonrecurring items that could compromise the comparability and analysis of results.

The individual and parent company financial statements are presented in accordance with IFRS and the accounting practices adopted in Brazil and refer to the third quarter of 2016 (3Q16), except where stated otherwise, with comparisons in relation to the prior-year period.

About GPA: GPA is Brazil's largest retailer, with a distribution network comprising over 2,000 points of sale as well as electronic channels. Established in 1948 in São Paulo, it has its head office in the city and operations in 20 Brazilian states and the Federal District. With a strategy of focusing its decisions on customers and better serving them

Any and all non-accounting information or derived from non-accounting figures has not been reviewed by independent auditors.

To calculate EBITDA, we use earnings before interest, taxes, depreciation and amortization. The base used to calculate "same-store" gross sales revenue is determined by the sales made in stores open for at least 12 consecutive months and which did not remain closed for seven or more consecutive days in the period. Acquisitions in their first 12 months of operation are not included in the same-store calculation base.

GPA adopts the IPCA consumer price index as its benchmark inflation index, which is also used by the Brazilian Supermarkets Association (ABRAS), since it more accurately reflects the mix of products and brands sold by the Company. The IPCA in the 12 months ended September 2016 was 8.48%.

Disclaimer: Statements contained in this release relating to the business outlook of the Company, projections of operating/financial results, the growth potential of the Company and the market and macroeconomic estimates are mere forecasts and were based on the expectations of Management in relation to the Company's future. These expectations are highly dependent on changes in the market, Brazil's general economic performance, the industry and international markets, and are thus subject to change.

based on their consumer profile in the wide variety of shopping experiences it offers, GPA adopts a multi-business and multi-channel platform with brick-and-mortar stores and e-commerce operations divided into five business units: Multivarejo, which operates the supermarket, hypermarket and Minimercado store formats, as well as fuel stations and drugstores under the Pão de Açúcar and Extra banners; Assaí, which operates in the cash-and-carry wholesale segment; Via Varejo, with its bricks and mortar electronics and home appliances stores under the Casas Bahia and Pontofrio banners; GPA Malls, which is responsible for managing the real estate assets, expansion projects and new store openings; and the e-commerce segment.

SIGNATURES

Pursuant to the requirement of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
