CARDTRONICS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

(1) General and Basis of Presentation

General

Cardtronics, Inc., along with its wholly- and majority-owned subsidiaries (collectively, the “Company”) provides convenient automated consumer financial services through its network of automated teller machines (“ATMs”) and multi-function financial services kiosks. As of June 30, 2010, the Company operated over 33,700 devices across its portfolio, which included over 28,000 devices located in all 50 states of the United States (“U.S.”) (including the U.S. territories of Puerto Rico and the U.S. Virgin Islands), approximately 2,800 devices throughout the United Kingdom (“U.K.”), and approximately 2,900 devices throughout Mexico. Included within this number are approximately 2,200 multi-function financial services kiosks deployed in the U.S. that, in addition to traditional ATM functions such as cash dispensing and bank account balance inquiries, perform other consumer financial services, including bill payments, check cashing, remote deposit capture (which is deposit taking at off-premise ATMs using electronic imaging), and money transfers.

Through its network, the Company provides ATM management and equipment-related services (typically under multi-year contracts) to large, nationally-known retail merchants as well as smaller retailers and operators of facilities such as shopping malls and airports. Additionally, the Company operates the largest surcharge-free network of ATMs within the United States (based on the number of participating ATMs) and works with financial institutions to place their logos on the Company’s ATM machines, thus providing convenient surcharge-free access to the financial institutions’ customers. The Company’s surcharge-free network, which operates under the Allpoint brand name, has more than 37,000 participating ATMs, including a majority of the Company’s ATMs in the United States and all of the Company’s ATMs in the United Kingdom. Finally, the Company provides electronic funds transfer (“EFT”) transaction processing services to its network of ATMs as well as approximately 1,900 ATMs owned and operated by third parties.

Basis of Presentation

This Quarterly Report on Form 10-Q (this “Form 10-Q”) has been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”) applicable to interim financial information. Because this is an interim period filing presented using a condensed format, it does not include all of the disclosures required by accounting principles generally accepted in the United States (“U.S. GAAP”), although the Company believes that the disclosures are adequate to make the information not misleading. You should read this Form 10-Q along with the Company’s Annual Report on Form 10-K for the year ended December 31, 2009 (“2009 Form 10-K”), which includes a summary of the Company’s significant accounting policies and other disclosures.

The financial statements as of June 30, 2010 and for the three and six month periods ended June 30, 2010 and 2009 are unaudited. The Consolidated Balance Sheet as of December 31, 2009 was derived from the audited balance sheet filed in the Company’s 2009 Form 10-K. In management’s opinion, all normal recurring adjustments necessary for a fair presentation of the Company’s interim and prior period results have been made. The results of operations for the three and six month periods ended June 30, 2010 and 2009 are not necessarily indicative of results that may be expected for any other interim period or for the full fiscal year. Additionally, the financial statements for prior periods include certain minor reclassifications. Those reclassifications did not impact the Company’s total reported net income (loss) or stockholders’ deficit.

Edgar Filing: CARDTRONICS INC - Form 10-Q

The unaudited interim consolidated financial statements include the accounts of Cardtronics, Inc. and its wholly- and majority-owned subsidiaries. All material intercompany accounts and transactions have been eliminated in consolidation. Because the Company owns a majority (51.0%) interest in and realizes a majority of the earnings and/or losses of Cardtronics Mexico, S.A. de C.V. (“Cardtronics Mexico”), this entity is reflected as a consolidated subsidiary in the accompanying consolidated financial statements, with the remaining ownership interest not held by the Company being reflected as a noncontrolling interest.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates, and these differences could be material to the financial statements.

Cost of ATM Operating Revenues and Gross Profit Presentation

The Company presents “Cost of ATM operating revenues” and “Gross profit” within its Consolidated Statements of Operations exclusive of depreciation, accretion, and amortization expense related to ATMs and ATM-related assets. The following table sets forth the amounts excluded from Cost of ATM operating revenues and Gross profit for the periods indicated:

	Three Months Ended		Six Months Ended	
	June 30, 2010	2009	June 30, 2010	2009
	(In thousands)			
Depreciation and accretion expenses related to ATMs and ATM-related assets	\$8,337	\$8,236	\$16,636	\$16,273
Amortization expense	3,765	4,504	7,744	9,031
Total depreciation, accretion, and amortization expenses excluded from Cost of ATM operating revenues and Gross profit	\$12,102	\$12,740	\$24,380	\$25,304

Property and Equipment, net

In accounting for property and equipment, the Company is required to make estimates regarding the expected useful lives of its assets, which ranged historically from three to seven years. To ensure its useful life estimates accurately reflect the economic use of the assets, the Company periodically evaluates whether changes to the assigned estimated useful lives are necessary. As a result of its most recent evaluation in the first quarter of 2010, which was based on historical information on its existing and disposed assets, the Company revised the estimated useful lives of several asset classes. Specifically, the Company determined that it was appropriate to extend the estimated useful life of new ATMs by one year and reduce the estimated useful life of used ATMs by two years starting January 1, 2010. The Company also decreased the estimated useful lives of deployment costs and asset retirement obligations by two years each, to more accurately align the periods over which these assets are depreciated with the average time period an ATM is installed in a location before being deinstalled. The Company anticipates that the above changes will increase its future depreciation expense amounts slightly relative to prior years, and reduce the frequency and amount of losses on disposals of assets in future periods.

(2) Stock-Based Compensation

The Company calculates the fair value of stock-based awards granted to employees and directors on the date of grant and recognizes the calculated fair value, net of estimated forfeitures, as compensation expense over the requisite service periods of the related awards. The following table reflects the total stock-based compensation expense amounts included in the Company’s Consolidated Statements of Operations for the periods indicated:

	Three Months Ended		Six Months Ended	
	June 30, 2010	2009	June 30, 2010	2009

	(In thousands)			
Cost of ATM operating revenues	\$ 169	\$ 193	\$ 368	\$ 384
Selling, general, and administrative expenses	1,268	869	2,528	1,736
Total stock-based compensation expense	\$ 1,437	\$ 1,062	\$ 2,896	\$ 2,120

The increase in stock-based compensation expense during the three and six month periods ended June 30, 2010 was due to the issuance of additional shares of restricted stock and stock options to certain of the Company's employees and directors during 2009 and 2010. Both the restricted shares and the stock options were granted under the Company's Amended and Restated 2007 Stock Incentive Plan (the "2007 Stock Incentive Plan").

At the Company's 2010 Annual Meeting of Shareholders held on June 15, 2010, stockholders approved the amendment and restatement of the 2007 Stock Incentive Plan. Among other things, changes to the 2007 Stock Incentive Plan included increasing in the maximum number of shares of common stock that may be granted as equity incentive awards under the plan by 2,000,000 shares, from 3,179,393 to 5,179,393. As a result of the increased number of shares eligible for grant under the 2007 Stock Incentive Plan, in the event the Company makes additional grants under the plan, stock-based compensation expense would increase in future periods.

In addition to increasing the number of shares eligible for grant, stockholders voted to (i) adjust the existing provisions regarding performance-based awards granted and conform a number of administration provisions of the 2007 Stock Incentive Plan necessary to effectuate the modified performance-based awards, (ii) modify the annual award limitations for any individual participant of the plan as well as the performance criteria that may be utilized to structure performance-based awards, (iii) increase the term of the plan from a 10-year period beginning on the original adoption date (which was August 22, 2007) to a 10-year period beginning on the adoption of the amendment to the plan, and (iv) add two types of awards eligible for grant under the plan: a restricted stock unit award and an annual incentive award.

Options. The number of the Company's outstanding stock options as of June 30, 2010, and changes during the six month period ended June 30, 2010, are presented below:

	Number of Shares	Weighted Average Exercise Price
Options outstanding as of January 1, 2010	3,803,771	\$8.34
Granted	23,000	\$10.95
Exercised	(267,471)	\$1.31
Forfeited	(52,500)	\$7.73
Options outstanding as of June 30, 2010	3,506,800	\$8.90
Options vested and exercisable as of June 30, 2010	2,976,276	\$8.65

The options granted during the six month period ended June 30, 2010 had a total grant-date fair value of approximately \$126,500, or \$5.50 per share. As of June 30, 2010, the unrecognized compensation expense associated with outstanding options was approximately \$1.1 million.

Restricted Stock. The number of the Company's outstanding restricted shares as of June 30, 2010, and changes during the six month period ended June 30, 2010, are presented below:

	Number of Shares
Restricted shares outstanding as of January 1, 2010	1,114,437
Granted	729,940
Vested	(354,437)
Forfeited	(14,250)
Restricted shares outstanding as of June 30, 2010	1,475,690

The restricted shares granted to employees and directors during the six month period ended June 30, 2010 had a total grant-date fair value of approximately \$7.9 million, or \$10.89 per share. As of June 30, 2010, the unrecognized compensation expense associated with restricted share grants was approximately \$12.9 million.

(3) Earnings per Share

The Company reports its earnings per share under the two-class method. Under this method, potentially dilutive securities are excluded from the calculation of diluted earnings per share (as well as their related income statement impacts) when their impact on net income (loss) available to common stockholders is anti-dilutive. For the six month period ended June 30, 2009, the Company incurred a net loss and, accordingly, excluded all potentially dilutive

securities from the calculation of diluted earnings per share as their impact on the net loss available to common stockholders was anti-dilutive. Such securities included all outstanding stock options and shares of restricted stock. However, dilutive securities were included in the calculation of diluted earnings per share for the three and six month periods ended June 30, 2010 and the three month period ended June 30, 2009 as the Company reported net income for these periods.

Additionally, the shares of restricted stock issued by the Company have a non-forfeitable right to cash dividends, if and when declared by the Company. Accordingly, such restricted shares are considered to be participating securities and as such, the Company has allocated the undistributed earnings for the three and six month periods ended June 30, 2010 and the three month period ended June 30, 2009 among the Company's outstanding shares of common stock and issued but unvested restricted shares, as follows:

Edgar Filing: CARDTRONICS INC - Form 10-Q

Earnings per Share (in thousands, excluding share and per share amounts):

	Three Months Ended June 30, 2010			Six Months Ended June 30, 2010		
	Income	Weighted Average Shares Outstanding	Earnings Per Share	Income	Weighted Average Shares Outstanding	Earnings Per Share
Basic:						
Net income attributable to controlling interests and available to common stockholders	\$ 8,203			\$ 12,168		
Less: undistributed earnings allocated to unvested restricted shares	(347)			(499)		
Net income available to common stockholders	\$ 7,856	40,017,215	\$ 0.20	\$ 11,669	39,910,928	\$ 0.29
Diluted:						
Effect of dilutive securities:						
Add: Undistributed earnings allocated to restricted shares	\$ 347			\$ 499		
Stock options added to the denominator under the treasury stock method		1,075,043			983,578	
Less: Undistributed earnings reallocated to restricted shares	(338)			(487)		
Net income available to common stockholders and assumed conversions	\$ 7,865	41,092,258	\$ 0.19	\$ 11,681	40,894,506	\$ 0.29

Three Months Ended June 30, 2009

	Income	Weighted Average Shares Outstanding	Earnings Per Share
Basic:			
Net income attributable to controlling interests and available to common stockholders	\$2,488		
	(90)		

Edgar Filing: CARDTRONICS INC - Form 10-Q

Less: undistributed earnings allocated to unvested restricted shares			
Net income available to common stockholders	\$2,398	39,032,087	\$0.06
Diluted:			
Effect of dilutive securities:			
Add: Undistributed earnings allocated to restricted shares	\$90		
Stock options added to the denominator under the treasury stock method		619,276	
Less: Undistributed earnings reallocated to restricted shares	(89)		
Net income available to common stockholders and assumed conversions	\$2,399	39,651,363	\$0.06

The computation of diluted earnings per share excluded potentially dilutive common shares related to restricted stock of 558,585 and 339,481 shares for the three and six month periods ended June 30, 2010, respectively, and 5,805 shares for the three month period ended June 30, 2009, because the effect of including these shares in the computation would have been anti-dilutive.

(4) Comprehensive Income (Loss)

Total comprehensive income (loss) consisted of the following:

	Three Months Ended		Six Months Ended	
	June 30, 2010	2009	June 30, 2010	2009
	(In thousands)

Unrealized (losses) gains on interest rate swap contracts	(7,717)) 343	(11,101)) 1,536
Foreign currency translation adjustments	(487)) 10,113	(3,822)) 8,697
Total comprehensive income (loss)	44	13,055	(2,445)) 7,795
Less: comprehensive (loss) income attributable to noncontrolling interests	(25)) 162	329	171
Comprehensive income (loss) attributable to controlling interests	\$69	\$12,893	\$(2,774)) \$7,624

Accumulated other comprehensive loss is displayed as a separate component of stockholders' deficit in the Consolidated Balance Sheets and consisted of the following:

	June 30, 2010	December 31, 2009
	(In thousands)	
Foreign currency translation adjustments	\$(28,242)) \$(24,420)
Unrealized losses on interest rate swap contracts	(44,299)) (33,198)
Total accumulated other comprehensive loss	\$(72,541)) \$(57,618)

The Company currently believes that the unremitted earnings of its United Kingdom and Mexico subsidiaries will be reinvested in the corresponding country of origin for an indefinite period of time. While the Company's United Kingdom subsidiary has recently begun repaying certain working capital advances provided by the Company's domestic entities during the past few years, the Company's original capital investment amounts are not expected to be repaid in the foreseeable future. Accordingly, no deferred taxes have been provided for on the differences between the Company's book basis and underlying tax basis in those subsidiaries or on the foreign currency translation adjustment amounts.

Additionally, as a result of the Company's overall net loss position for tax purposes, the Company has not recorded deferred tax benefits on the unrealized loss amounts related to its interest rate swaps, as management does not currently believe the Company will be able to realize the benefits associated with its net deferred tax asset positions. However, if the Company continues to generate pre-tax operating profits, as it has during recent periods, its existing and future valuation allowances may no longer be necessary, including those related to the unrealized losses associated with the Company's interest rate swaps. Any release of the valuation allowances associated with the Company's interest rate swap agreements will be accounted for as a reduction of the unrealized loss amounts currently reflected in the accumulated other comprehensive loss line item within stockholders' deficit in the accompanying Consolidated Balance Sheets.

(5) Intangible Assets

Intangible Assets with Indefinite Lives

The following table presents the net carrying amount of the Company's intangible assets with indefinite lives as of June 30, 2010, as well as the changes in the net carrying amounts for the six month period ended June 30, 2010, by segment:

8

Edgar Filing: CARDTRONICS INC - Form 10-Q

Intangible Assets with Definite Lives

The following is a summary of the Company's intangible assets that are subject to amortization as of June 30, 2010:

	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
(In thousands)			
Customer and branding contracts/relationships	\$156,264	\$(87,783)	\$68,481
Deferred financing costs	14,535	(8,555)	5,980
Exclusive license agreements	5,545	(3,627)	1,918
Non-compete agreements	509	(212)	297
Total	\$176,853	\$(100,177)	\$76,676

(6) Accrued Liabilities

Accrued liabilities consisted of the following:

	June 30, 2010	December 31, 2009
(In thousands)		
Accrued merchant commissions	\$12,581	\$11,470
Accrued interest expense	10,406	10,406
Accrued compensation	4,017	8,470
Accrued armored fees	3,265	5,234
Accrued merchant settlement amounts	3,203	3,603
Accrued cash rental and management fees	2,824	2,866
Accrued interest rate swap payments	2,119	1,937
Accrued maintenance fees	1,794	4,133
Accrued ATM telecommunications costs	1,243	1,169
Accrued processing costs	1,084	1,556
Other accrued expenses	8,843	6,739
Total	\$51,379	\$57,583

(7) Long-Term Debt

The Company's long-term debt consisted of the following:

	June 30, 2010	December 31, 2009
	(In thousands)	
Senior subordinated notes due August 2013 (net of unamortized discounts of \$2.4 million and \$2.8 million as of June 30, 2010 and December 31, 2009)	\$297,567	\$297,242
Other	9,474	9,810
Total	307,041	307,052
Less: current portion	2,481	2,122
Total long-term debt, excluding current portion	\$304,560	\$304,930

Revolving Credit Facility

As of June 30, 2010 and December 31, 2009, no borrowings were outstanding under the Company's \$175.0 million revolving credit facility. However, as of June 30, 2010, the Company had a \$4.3 million letter of credit posted under the facility to secure borrowings under the Company's United Kingdom subsidiary's overdraft facility (discussed below). This letter of credit, which may be drawn upon in the event the Company defaults under the overdraft facility, reduces the Company's borrowing capacity under its revolving credit facility. As of June 30, 2010, the Company's available borrowing capacity under the facility, as determined under the earnings before interest expense, income taxes, depreciation and accretion expense, and amortization expense ("EBITDA") and interest expense covenants contained in the credit agreement, totaled \$170.7 million, and the Company was in compliance with all applicable covenants and ratios under the facility.

In July 2010, in conjunction with entering into a new \$175.0 million revolving credit facility, the Company terminated its previous \$175.0 million credit facility. Additionally, the Company announced its plans to redeem all \$100.0 million of its existing outstanding 9.25% Senior Subordinated Notes – Series B due August 2013 (the "Series B Notes"). See Note 17, Subsequent Events, for additional details on the new revolving credit facility, the termination of the previous facility, and the Company's bond redemption plans.

Other Facilities

Cardtronics Mexico equipment financing agreements. As of June 30, 2010, other long-term debt consisted of 10 separate equipment financing agreements entered into by Cardtronics Mexico. These agreements, each of which had an original term of five-years, are denominated in Mexican pesos and bear interest at an average fixed rate of 10.49%. Proceeds from these agreements were utilized for the purchase of additional ATMs to support the Company's Mexico operations. Pursuant to the terms of the equipment financing agreements, the Company has issued guarantees for 51.0% of the obligations under such agreements (consistent with its ownership percentage in Cardtronics Mexico.) As of June 30, 2010, the total amount of the guarantees was \$62.0 million pesos (or approximately \$4.8 million U.S.).

Bank Machine overdraft facility. Bank Machine, Ltd., the Company's wholly-owned subsidiary operating in the United Kingdom, currently has a £1.0 million overdraft facility in place. This facility, which bears interest at 1.75% over the Bank of England's base rate (0.5% as of June 30, 2010) and is secured by a letter of credit posted under the Company's corporate revolving credit facility, is utilized for general corporate purposes for the Company's United Kingdom operations. As of June 30, 2010, no amount was outstanding under this facility.

(8) Asset Retirement Obligations

Asset retirement obligations consist primarily of costs to deinstall the Company's ATMs and costs to restore the ATM sites to their original condition. In most cases, the Company is legally required to perform this deinstallation and restoration work. For each group of ATMs, the Company has recognized the fair value of the asset retirement obligation as a liability on its balance sheet and capitalized that cost as part of the cost basis of the related asset. The related assets are being depreciated on a straight-line basis over five years, which is the average time period an ATM is installed in a location before being deinstalled, and the related liabilities are being accreted to their full value over the same period of time.

The following table is a summary of the changes in the Company's asset retirement obligation liability for the six month period ended June 30, 2010 (in thousands):

Asset retirement obligation as of January 1, 2010	\$24,003
---	----------

Additional obligations	1,967
Accretion expense	1,252
Change in estimate	61
Payments	(1,341)
Foreign currency translation adjustments	(601)
Asset retirement obligation as of June 30, 2010	\$25,341

The change in estimate during the six month period ended June 30, 2010 related to the Company's most recent evaluation of the useful lives of its various asset classes. For additional information on this change, see Note 1, General and Basis of Presentation – Property and Equipment, net. Additionally, see Note 11, Fair Value Measurements for additional disclosures on the Company's asset retirement obligations in respect to its fair value measurements.

(9) Other Liabilities

Other liabilities consisted of the following:

	June 30, 2010	December 31, 2009
	(In thousands)	
Current Portion of Other Long-Term Liabilities:		
Interest rate swaps	\$22,409	\$23,423
Deferred revenue	2,030	2,464
Other	160	160
Total	\$24,599	\$26,047
Other Long-Term Liabilities:		
Interest rate swaps	\$24,850	\$12,656
Deferred revenue	1,781	2,393
Other	3,016	3,450
Total	\$29,647	\$18,499

The increase in the non-current portion of other long-term liabilities was attributable to the Company's interest rate swaps, the liabilities for which increased as a result of additional swap agreements entered into this quarter. Also contributing to the increase was a significant flattening of the forward interest rate curve, which was utilized to value the interest rate swap contracts and resulted in an increase in the Company's estimated future liabilities under such contracts.

(10) Derivative Financial Instruments

Accounting Policy

The Company recognizes all of its derivative instruments as either assets or liabilities in the accompanying Consolidated Balance Sheets at fair value. The accounting for changes in the fair value (e.g., gains or losses) of those derivative instruments depends on (i) whether these instruments have been designated (and qualify) as part of a hedging relationship and (ii) the type of hedging relationship actually designated. For derivative instruments that are designated and qualify as hedging instruments, the Company designates the hedging instrument, based upon the exposure being hedged, as a cash flow hedge, a fair value hedge, or a hedge of a net investment in a foreign operation.

The Company is exposed to certain risks relating to its ongoing business operations, including interest rate risk associated with its vault cash rental obligations and, to a lesser extent, borrowings under its revolving credit facility, if and when outstanding. The Company is also exposed to foreign currency rate risk with respect to its investments in its foreign subsidiaries, most notably its investment in Bank Machine, Ltd. in the United Kingdom. While the Company does not currently utilize derivative instruments to hedge its foreign currency rate risk, it does utilize interest rate swap contracts to manage the interest rate risk associated with its vault cash rental obligations in the United States and the United Kingdom. The Company does not currently utilize any derivative instruments to manage the interest rate risk associated with its vault cash rental obligations in Mexico, nor does it utilize derivative instruments to manage the interest rate risk associated with borrowings outstanding under its revolving credit facility.

The notional amounts, weighted average fixed rates, and terms associated with the Company's interest rate swap contracts accounted for as cash flow hedges that are currently in place are as follows:

Notional Amounts United States	Notional Amounts United Kingdom (In thousands)	Notional Amounts Consolidated (1)	Weighted Average Fixed Rate	Terms
\$ 600,000	£ 75,000	\$ 712,585	3.77	% July 1, 2010 – December 31, 2010
\$ 625,000	£ 75,000	\$ 737,585	3.44	% January 1, 2011 – December 31, 2011
\$ 525,000	£ 50,000	\$ 600,057	3.56	% January 1, 2012 – December 31, 2012
\$ 275,000	£ 25,000	\$ 312,528	3.53	% January 1, 2013 – December 31, 2013
\$ 100,000	£ —	\$ 100,000	3.61	% January 1, 2014 – December 31, 2014

- (1) United Kingdom pound sterling amounts have been converted into United States dollars at approximately \$1.50 to £1.00, which was the exchange rate in effect as of June 30, 2010.

The Company has designated a majority of its interest rate swap contracts as cash flow hedges of the Company's forecasted vault cash rental obligations. Accordingly, changes in the fair values of the related interest rate swap contracts have been reported in accumulated other comprehensive loss in the Consolidated Balance Sheets. As a result of the Company's overall net loss position for tax purposes, the Company has not recorded any deferred tax benefits on the loss amounts related to these interest rate swap contracts, as management does not currently believe that it is more likely than not that the Company will be able to realize the benefits associated with its net deferred tax asset positions. However, if the Company continues to generate substantial pre-tax operating profits, as it has during recent periods, its existing and future valuation allowances may no longer be necessary, including those related to the unrealized losses associated with the Company's interest rate swaps. Any release of the valuation allowances associated with the Company's interest rate swap agreements will be accounted for as a reduction of the unrealized loss amounts currently reflected in the accumulated other comprehensive loss line item within stockholders' deficit in the accompanying Consolidated Balance Sheets.

Cash Flow Hedging Strategy

For each derivative instrument that is designated and qualifies as a cash flow hedge (i.e., hedging the exposure to variability in expected future cash flows attributable to a particular risk), the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income/loss ("OCI") and reclassified into earnings in the same line item associated with the forecasted transaction and in the same period or periods during which the hedge transaction affects earnings. Gains and losses on the derivative instrument representing either hedge ineffectiveness or hedge components that are excluded from the assessment of effectiveness are recognized in earnings. However, because the Company currently only utilizes fixed-for-floating interest rate swaps in which the underlying pricing terms agree, in all material respects, with the pricing terms of the Company's vault cash rental obligations, the amount of ineffectiveness associated with such interest rate swap contracts has historically been immaterial. Accordingly, no ineffectiveness amounts associated with the Company's cash flow hedges have been recorded in the Company's consolidated financial statements. For derivative instruments not designated as hedging

instruments, the gain or loss is recognized in the Consolidated Statements of Operations during the current period.

The interest rate swap contracts entered into with respect to the Company's vault cash rental obligations effectively modify the Company's exposure to interest rate risk by converting a portion of the Company's monthly floating rate vault cash rental obligations to a fixed rate. Such contracts are in place through December 31, 2014 for the Company's United States vault cash rental obligations, and December 31, 2013 for the Company's United Kingdom vault cash rental obligations. By converting such amounts to a fixed rate, the impact of future interest rate changes (both favorable and unfavorable) on the Company's monthly vault cash rental expense amounts has been reduced. The interest rate swap contracts typically involve the receipt of floating rate amounts from the Company's counterparties that match, in all material respects, the floating rate amounts required to be paid by the Company to its vault cash providers for the portions of the Company's outstanding vault cash obligations that have been hedged. In return, the Company typically pays the interest rate swap counterparties a fixed rate amount per month based on the same notional amounts outstanding. At no point is there an exchange of the underlying principal or notional amounts associated with the interest rate swaps. Additionally, none of the Company's existing interest rate swap contracts contain credit-risk-related contingent features.

The Company is also a party to certain derivative instruments that were originally, but are no longer, designated as cash flow hedges. Specifically, during 2009, the Company entered into a number of interest rate swaps to hedge its exposure to changes in market rates of interest on its vault cash rental expense in the United Kingdom. During the fourth quarter of 2009, the Company's vault cash provider in that market exercised its rights under the contract to modify the pricing terms and changed the target vault cash rental rate within the agreement. As a result of this change, the Company was no longer able to apply cash flow hedge accounting treatment to the underlying interest rate swap agreements. In December 2009, the Company entered into a series of additional trades, the effects of which were to offset the existing swaps and establish new swaps to match the modified underlying vault cash rental rate. Since the underlying swaps were not deemed to be effective hedges of the Company's underlying vault cash rental costs, during the three and six months ended June 30, 2010, an unrealized gain and a corresponding realized loss of \$0.3 million and \$0.5 million, respectively, related to these swaps have been reflected in the other expense (income) line item in the accompanying Consolidated Statements of Operations.

Tabular Disclosures

The following tables depict the effects of the use of the Company's derivative contracts on its Consolidated Balance Sheets and Consolidated Statements of Operations.

The Company does not currently have any derivative instruments that have been designated as fair value or net investment hedges. The Company has not historically, and does not currently anticipate, discontinuing its existing derivative instruments prior to their expiration date. If the Company concludes that it is no longer probable that the anticipated future vault cash rental obligations that have been hedged will occur, or if changes are made to the underlying terms and conditions of the Company's vault cash rental agreements, thus creating some amount of ineffectiveness associated with the Company's current interest rate swap contracts, as occurred during the fourth quarter of 2009, any resulting gains or losses will be recognized within the Other expense (income) line item of the Company's Consolidated Statements of Operations.

As of June 30, 2010, the Company expects to reclassify \$21.2 million of net derivative-related losses contained within accumulated OCI to earnings during the next twelve months concurrent with the recording of the related vault cash rental expense amounts.

See Note 11, Fair Value Measurements for additional disclosures on the Company's interest rate swap contracts in respect to its fair value measurements.

(11) Fair Value Measurements

The fair value hierarchy has three levels based on the reliability of the inputs used to determine fair value. Level 1 refers to fair values determined based on quoted prices in active markets for identical assets. Level 2 refers to fair values estimated using significant other observable inputs, and Level 3 includes fair values estimated using significant non-observable inputs. An asset's or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement.

The following tables provide the assets and liabilities carried at fair value measured on a recurring basis using the fair value hierarchy prescribed by U.S. GAAP.

	Total	Fair Value Measurements at June 30, 2010		
		Level 1	Level 2	Level 3
(In thousands)				
Assets:				
Assets associated with interest rate swaps	\$ 1,207	\$ —	\$ 1,207	\$ —
Liabilities:				
Liabilities associated with interest rate swaps	\$ 47,259	\$ —	\$ 47,259	\$ —
	Total	Fair Value Measurements at December 31, 2009		
		Level 1	Level 2	Level 3
(In thousands)				
Assets:				
Assets associated with interest rate swaps	\$ 1,445	\$ —	\$ 1,445	\$ —
Liabilities:				
Liabilities associated with interest rate swaps	\$ 36,079	\$ —	\$ 36,079	\$ —

Liabilities added to the asset retirement obligations line in the Company's Consolidated Balance Sheets are measured at fair value on a non-recurring basis using Level 3 inputs. The liabilities added during the six month periods ended June 30, 2010 and 2009 were \$2.0 million and \$1.5 million, respectively.

Additionally, below are descriptions of the Company's valuation methodologies for assets and liabilities measured at fair value. The methods described below may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Cash and cash equivalents, accounts and notes receivable, net of the allowance for doubtful accounts, other current assets, accounts payable, accrued expenses, and other current liabilities. These financial instruments are not carried at fair value, but are carried at amounts that approximate fair value due to their short-term nature and generally negligible credit risk.

Interest rate swaps. The fair value of the Company's interest rate swaps was a net liability of \$46.1 million as of June 30, 2010. These financial instruments are carried at fair value, calculated as the present value of amounts estimated to be received or paid to a marketplace participant in a selling transaction. These derivatives are valued using pricing models based on significant other observable inputs (Level 2 inputs), while taking into account the creditworthiness of the party that is in the liability position with respect to each trade.

Additions to asset retirement obligation liability. The Company estimates the fair value of additions to its asset retirement obligation liability using expected future cash outflows discounted at the Company's credit-adjusted risk-free interest rate.

Long-term debt. The carrying amount of the long-term debt balance related to borrowings under the Company's revolving credit facility, if and when there is an amount outstanding, approximates fair value due to the fact that any

borrowings are subject to short-term floating market interest rates. As of June 30, 2010, the fair value of the Company's \$300.0 million senior subordinated notes (see Note 7, Long-Term Debt) totaled \$303.0 million, based on the quoted market price for such notes as of that date.

(12) Commitments and Contingencies

Legal Matters

In June 2004, the Company acquired from E*Trade Access, Inc. (“E*Trade”) a portfolio of several thousand ATMs. In connection with that acquisition, the Company assumed E*Trade’s position in a lawsuit in the United States District Court for the District of Massachusetts (the “Court”) wherein the Commonwealth of Massachusetts (the “Commonwealth”) and the National Federation of the Blind (the “NFB”) had sued E*Trade alleging that E*Trade had the obligation to make its ATMs accessible to blind patrons via voice guidance. In June 2007, the Company, the Commonwealth, and the NFB entered into a class action settlement agreement (the “June 2007 Settlement Agreement”) regarding this matter. The Court approved the Settlement Agreement in December 2007. In 2009, the Company requested a modification to the Settlement Agreement so as to permit it to complete the upgrading or replacement of approximately 2,200 non-voice-guided ATMs by June 30, 2010, with respect to that portion of the non-voice-guided ATMs located in the Commonwealth, and by December 31, 2010, with respect to that portion of the non-voice-guided ATMs located in other states. The Commonwealth, the NFB, and the Company have reached an agreement on a proposed modification to the Settlement Agreement and have submitted a joint motion to the Court requesting its approval. The material terms of the proposed modification include that the Company must: (i) ensure all Company-owned ATMs in the state of Massachusetts are voice-guided no later than June 30, 2010, which the Company has accomplished; (ii) ensure all of its Company-owned ATMs located anywhere but in 7-Eleven locations are voice-guided by December 31, 2010; (iii) ensure all of its ATMs located in 7-Eleven locations are voice-guided by March 31, 2011; (iv) affix Braille signage on all Company-owned ATMs; (v) distribute Braille signage to non-Company-owned voice-guided ATMs in its portfolio that have not previously been provided such signage by the Company; (vi) keep the Company’s internet-based ATM Locator updated as to the location of the Company’s voice-guided ATMs; and (vii) ensure that all voice-guided ATMs in its portfolio have tactilely discernable controls, a headphone jack, and a voice script that enables the consumer to complete an ATM transaction. Currently, the Company expects the proposed modification to the Settlement Agreement to be approved by both the class of plaintiffs indentified in the lawsuit and the Court within the next 120 days. As the proposed settlement modification does not impact the Company’s obligations under the June 2007 Settlement Agreement but rather only the timing of fulfilling its obligations, the Company does not believe that the proposed settlement modification, if approved, will have a material impact on its financial condition or results of operations.

In addition to the above item, the Company is subject to various legal proceedings and claims arising in the ordinary course of its business. The Company has provided reserves where necessary for all claims and the Company’s management does not expect the outcome in any of these legal proceedings, individually or collectively, to have a material adverse impact on the Company’s financial condition or results of operations.

Regulatory Matters

Financial Regulatory Reform in the United States. The Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Act”), which contains broad measures aimed at overhauling existing financial regulations within the United States, was signed into law on July 21, 2010. Among many other things, the Act includes provisions that (i) call for the establishment of a new Bureau of Consumer Financial Protection, (ii) limit the activities that banking entities may engage in, and (iii) give the Federal Reserve the authority to regulate interchange transaction fees charged by electronic funds transfer networks for electronic debit transactions. Many of the detailed regulations required under the Act have yet to be finalized and will likely not be finalized for some time. Accordingly, at this point, the Company does not believe that the regulations that are likely to arise from the Act will have a material impact on the Company’s operations. However, based on the current language contained within the Act, it is uncertain whether the regulation of interchange fees for electronic debit transactions will apply to ATM cash withdrawal transactions. If ATM cash withdrawal transactions were to fall under the proposed regulatory framework, and the related interchange

fees were reduced from their current levels, such change would likely have a negative impact on the Company's future revenues and operating profits. Conversely, additional proposed regulations contained within the Act are aimed at providing merchants with additional flexibility in terms of allowing certain point-of-sale transactions to be paid for in cash rather than with debit or credit cards. Such a change could result in the increased use of cash at the point-of-sale for some merchants, and thus, could positively impact the Company's future revenues and operating profits (through increased transaction levels at the Company's ATMs).

Change in Mexico Fee Structure. In October 2009, the Central Bank of Mexico adopted new rules regarding how ATM operators disclose and levy fees to consumers who use their ATMs. These rules, which became effective in May 2010, require ATM operators to elect between receiving an interchange fee from the consumer's card issuer or a surcharge fee from the consumer. The Company's majority-owned subsidiary, Cardtronics Mexico, elected to assess a surcharge fee on the consumer rather than select the interchange fee-only option, and subsequently raised the level of its surcharge fees in order to recoup the interchange fees it is no longer receiving. Because these changes were just recently enacted, the Company cannot be certain what impact such fee changes will have on the long-term withdrawal transaction levels in that market. However, based on very early indications, withdrawal transaction levels in Mexico have declined by amounts greater than those originally anticipated. If such initial transaction declines continue or worsen from their current levels, the additional surcharge fee amounts may not be sufficient to offset the lost interchange revenues, resulting in lower revenues and profitability per ATM in that market.

As a result of the above developments, the Company has decided to reduce the number of planned ATM deployments in Mexico for the remainder of 2010 in order to gauge the impact of the above rules on its ATM transaction levels and related profits. If transaction levels continue to worsen, and if the Company is unsuccessful in its efforts to implement certain measures to mitigate the effects of such transaction declines, the Company's overall profitability in that market will decline. If such declines are significant, the Company may be required to record an impairment charge in future periods to write-down the carrying value of certain existing tangible and intangible assets associated with that operation.

Other Commitments

Asset Retirement Obligations. The Company's asset retirement obligations consist primarily of deinstallation costs of the ATM and costs to restore the ATM site to its original condition. In most cases, the Company is legally required to perform this deinstallation and restoration work. The Company had \$25.3 million accrued for these liabilities as of June 30, 2010. For additional information, see Note 8, Asset Retirement Obligations.

Other Contingencies

On or about February 8, 2010, the United States government arrested on a charge of conspiring to commit bank fraud the President and principal owner of Mount Vernon Money Center ("MVMC"), one of the Company's third-party armored service providers in the Northeast United States. On or about February 12, 2010, United States' law enforcement personnel seized all vault cash in the possession of MVMC, and the U.S. District Court for the Southern District of New York (the "SDNY") appointed a receiver (the "Receiver") to, among other things, immediately take possession and control of all the assets and property of MVMC and affiliated entities. As a result of these events, by on or about February 12, 2010, MVMC ceased substantially all of its operations. Accordingly, the Company was required to convert over 1,000 ATMs that were being serviced by MVMC to another third-party armored service provider, resulting in a minor amount of downtime being experienced by those ATMs. Further, based upon a federal indictment in the SDNY of MVMC's President and of its Chief Operating Officer (the "Indictment"), it appears that all or some of the cash which was delivered to MVMC's vaults for the sole purpose of loading such cash into the Company's ATMs was misappropriated by MVMC. The Company estimates that, immediately prior to the cessation of MVMC's operations, the amount of vault cash that MVMC should have been holding for loading into the Company's ATMs totaled approximately \$16.2 million.

The Indictment alleges that the defendants defrauded multiple financial institutions and seeks the forfeiture to the United States government from the defendants in an amount of at least \$75 million. If the defendants are convicted and forfeiture directed, it is the belief of the Company that it is highly likely that the U.S. government will distribute forfeited assets it obtains to the victims. The Company intends to seek recovery from such forfeited assets. Additionally, on May 27, 2010, MVMC, under the control of the Receiver, filed a voluntary petition for relief

under Chapter 11 of the United States Bankruptcy Code. Accordingly, at this point, it is uncertain what amount, if any, may ultimately be made available to the Company from the vault cash seized by law enforcement authorities, other assets that may be forfeited to the United States government, other assets controlled by the Receiver or in the MVMC bankruptcy estate, or from other potential sources of recovery, including proceeds from any insurance policies held by MVMC and/or its owner. Regardless, the Company currently believes that its existing insurance policies will cover any residual cash losses resulting from this incident, less related deductible payments. Because the Company cannot reasonably estimate the amount of residual cash losses that may ultimately result from this incident at this point in time, no contingent loss has been reflected in the accompanying Consolidated Statements of Operations. If new information comes to light and the recovery of any resulting cash losses is no longer deemed to be probable, the Company may be required to recognize such losses without a corresponding insurance receivable.

(13) Income Taxes

Income tax expense based on the Company's income (loss) before income taxes was as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
	(In thousands)			
Income tax expense	\$ 1,952	\$ 1,016	\$ 3,391	\$ 2,033
Effective tax rate	19.1	% 28.1	% 21.4	% (502.0) %

The Company has established valuation allowances for its net deferred tax asset positions in all of its jurisdictions as it currently believes it is more likely than not that such benefits will not be realized. In addition, during each of the three and six month periods ended June 30, 2010, the Company increased its domestic valuation allowance by approximately \$0.9 million and \$1.8 million, respectively; and during each of the three and six month periods ended June 30, 2009, the Company increased its domestic valuation allowance by approximately \$0.9 million and \$1.9 million, respectively. The recording of such valuation allowances, along with current state income tax amounts, resulted in the negative effective tax rate reflected above for the six month period ended June 30, 2009.

Although the Company continued to establish valuation allowances in all of its operating segments during the three and six month periods ended June 30, 2010, if the Company continues to generate substantial pre-tax operating profits, as it has during recent periods, its existing and future valuation allowances may no longer be necessary. It should also be noted that as of December 31, 2009, the Company had approximately \$38.0 million in federal net operating loss carryforwards that can be utilized to reduce the Company's taxable income in future periods, subject to certain restrictions and limitations. The anticipated utilization of a portion of such carryforwards has been factored into the income tax provision estimate reflected above for the three and six month periods ended June 30, 2010.

(14) Segment Information

As of June 30, 2010, the Company's operations consisted of its United States, United Kingdom, and Mexico segments. The Company's operations in Puerto Rico and the U.S. Virgin Islands are included in its United States segment. While each of these reporting segments provides similar kiosk-based and/or ATM-related services, each segment is currently managed separately as they require different marketing and business strategies.

Management uses EBITDA to assess the operating results and effectiveness of its segments. Management believes EBITDA is useful because it allows them to more effectively evaluate the Company's operating performance and compare the results of its operations from period to period without regard to its financing methods or capital structure. Additionally, the Company excludes depreciation, accretion, and amortization expense as these amounts can vary substantially from company to company within its industry depending upon accounting methods and book values of assets, capital structures and the method by which the assets were acquired. EBITDA, as defined by the Company, may not be comparable to similarly titled measures employed by other companies and is not a measure of performance calculated in accordance with U.S. GAAP. In evaluating the Company's performance as measured by EBITDA, management recognizes and considers the limitations of this measurement. EBITDA does not reflect the Company's obligations for the payment of income taxes, interest expense or other obligations such as capital expenditures. Accordingly, EBITDA is only one of the measurements that management utilizes. Therefore, EBITDA should not be considered in isolation or as a substitute for operating income, net income, cash flows from operating, investing, and financing activities or other income or cash flow statement data prepared in accordance with U.S. GAAP.

Below is a reconciliation of EBITDA to net income (loss) attributable to controlling interests:

	Three Months Ended		Six Months Ended	
	June 30, 2010	2009	June 30, 2010	2009
	(In thousands)			
EBITDA	\$32,140	\$26,190	\$59,693	\$44,584
Depreciation and accretion expense	10,264	9,935	20,486	19,574
Amortization expense	3,765	4,504	7,744	9,031
Interest expense, net, including amortization of deferred				
financing costs and bond discounts	7,956	8,247	15,904	16,526
Income tax expense	1,952	1,016	3,391	2,033
Net income (loss) attributable to controlling interests	\$8,203	\$2,488	\$12,168	\$(2,580)

The following tables reflect certain financial information for each of the Company's reporting segments for the three and six month periods ended June 30, 2010 and 2009. All intercompany transactions between the Company's reporting segments have been eliminated.

Capital expenditures (1)	\$ 6,312	\$ 3,873	\$ 614	\$ —	\$ 10,799

- (1) Capital expenditure amounts include payments made for exclusive license agreements and site acquisition costs, and capital expenditures financed by direct debt. Additionally, capital expenditure amounts for Mexico are reflected gross of any noncontrolling interest amounts.
- (2) Selling, general, and administrative expenses for the three and six months ended June 30, 2010 includes \$0.6 million and \$0.7 million, respectively, of costs associated with the preparation and filing of a shelf registration statement and the completion of a secondary equity offering. Selling, general, and administrative expenses for the six month period ended June 30, 2009 includes \$1.2 million in severance costs associated with the departure of the Company's former Chief Executive Officer in March 2009. These items negatively impacted the Company's EBITDA during the periods.

Eliminations	(95,164)	(83,350)
Total	\$472,647	\$460,404

(15) New Accounting Pronouncements

Adopted

Subsequent Events. In March 2010, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2010-09, Subsequent Events, which amended FASB Accounting Standards Codification ("ASC") 855, Subsequent Events. Under this updated guidance, SEC filers, as defined in the ASU, no longer are required to disclose the date through which subsequent events have been evaluated in originally issued and revised financial statements. The ASU became effective immediately after it was issued, and except for the removal of the date, the adoption of ASU 2010-09 did not have any impact on the Company's consolidated financial statements.

Disclosures about Fair Value Measurements. In January 2010, the FASB issued ASU 2010-06, which amended ASC 820, Fair Value Measurements and Disclosures. This update added new requirements for disclosures about transfers into and out of Level 1 and 2 of the fair value hierarchy and activity in Level 3 of the hierarchy. Additionally, it clarified existing fair value measurement disclosures about the level of disaggregation and about inputs and valuation techniques used to measure fair value. The Company adopted the provisions of ASU 2010-06 on January 1, 2010, except for the disclosures about the activity in Level 3 fair value measurements, which is effective for the Company beginning January 1, 2011. The Company's adoption of ASU 2010-06 did not, and is not expected to, have a material impact on the Company's consolidated financial position or results of operations.

Issued but Not Yet Adopted

Multiple-Deliverable Revenue Arrangements. In October 2009, the FASB issued ASU 2009-13, which amends ASC 605, Revenue Recognition. This update removes the criterion that entities must use objective and reliable evidence of fair value in accounting for each deliverable separately. Instead, ASU 2009-13 requires entities to allocate revenue in an arrangement using estimated selling prices of the delivered goods and services based on a selling price hierarchy.

ASU 2009-13 is effective for the Company beginning January 1, 2011 and may be applied on either a prospective or retrospective basis, with early adoption permitted. The Company does not expect the adoption of ASU 2009-13 to have a material impact on its consolidated financial position or results of operations.

(16) Supplemental Guarantor Financial Information

The Company's \$300.0 million of senior subordinated notes are guaranteed on a full and unconditional basis by all of the Company's domestic subsidiaries. The following information sets forth the condensed consolidating statements of operations and cash flows for the three and six month periods ended June 30, 2010 and 2009 and the condensed consolidating balance sheets as of June 30, 2010 and December 31, 2009 of (1) Cardtronics, Inc., the parent company and issuer of the senior subordinated notes ("Parent"); (2) the Company's domestic subsidiaries on a combined basis (collectively, the "Guarantors"); and (3) the Company's international subsidiaries on a combined basis (collectively, the "Non-Guarantors"):

(17) Subsequent Events

Execution of New Credit Agreement

On July 15, 2010, the Company entered into a new \$175.0 million revolving credit agreement. Under the terms of the agreement, outstanding borrowings will bear interest at either the London Interbank Offered Rate (“LIBOR”) or base rate, at the Company’s election, plus an applicable margin, based on the Company’s “Total Leverage Ratio,” as defined in the agreement. The facility, which includes a \$15.0 million swing line facility, a \$60.0 million foreign currency sub-limit, and a \$20.0 million letter of credit sub-limit, provides for \$175.0 million in borrowings and letters of credit, but also contains a feature that allows the Company to expand the facility up to an amount of \$250.0 million, subject to the availability of additional bank commitments. The initial termination date of the facility is February 2013; however, such date can be extended to July 2015 in the event the Company’s existing senior subordinated notes are no longer outstanding or have been refinanced with a maturity date later than December 2015.

The credit agreement contains representations, warranties and covenants that are customary for similar credit arrangements, including, among other things, covenants relating to (i) financial reporting and notification, (ii) payment of obligations, (iii) compliance with applicable laws and (iv) notification of certain events. Financial covenants in the facility require the Company to maintain:

- A ratio of (i) the sum of (a) Consolidated Funded Indebtedness (as defined in the agreement) as of such date minus (b) subordinated indebtedness as of such date to (ii) Consolidated Adjusted Pro Forma EBITDA (as defined in the agreement) for the four quarter period then ended (the “Senior Leverage Ratio”) of no more than 2.25 to 1.00;
 - A Total Leverage Ratio of no more than 4.00 to 1.00; and
- A ratio of (a) the sum of (i) Consolidated Adjusted Pro Forma EBITDA for the four quarter period then ended, minus (ii) capital expenditures of the Company and the restricted subsidiaries for such period, minus (iii) dividends and distributions in respect of its equity interests paid by the Company and the restricted subsidiaries during such period (excluding any such dividends and distributions paid to an obligor or restricted subsidiary), minus (iv) consideration paid by the Company for repurchase or redemption of its equity interests held by its employees, directors and officers during such period in excess of \$5.0 million minus (v) consideration paid by the Company for repurchase or redemption of its equity interests held by other persons during such period in excess of \$10.0 million, minus (vi) cash taxes paid by the Company and the restricted subsidiaries during such period, to (b) cash interest expense (the “Fixed Charge Coverage Ratio”) of at least 1.50 to 1.00.

In addition to the above financial covenants, the credit agreement also contains various customary restrictive covenants, subject to certain exceptions that prohibit the Company from, among other things, incurring additional indebtedness or guarantees, creating liens or other encumbrances on property or granting negative pledges, entering into a merger or similar transaction, selling or transferring certain property, making certain restricted payments and entering into transactions with affiliates.

The failure to comply with the covenants will constitute an event of default (subject, in the case of certain covenants, to applicable notice and/or cure periods) under the agreement. Other events of default under the agreement include, among other things, (i) the failure to timely pay principal, interest, fees or other amounts due and owing, (ii) the inaccuracy of representations or warranties in any material respect, (iii) the occurrence of certain bankruptcy or insolvency events, (iv) loss of lien perfection or priority and (v) the occurrence of a change in control. The occurrence and continuance of an event of default could result in, among other things, termination of the lenders' commitments and acceleration of all amounts outstanding. The Company's obligations under the credit agreement are guaranteed by certain of the Company's existing and future domestic subsidiaries, subject to certain limitations. In addition, the Company's obligations under the agreement, subject to certain exceptions, are secured on a first-priority basis by liens on substantially all of the tangible and intangible assets of the Company and the guarantors.

Termination of Previous Credit Facility

Concurrent with entering into its new revolving credit facility, the Company terminated its previous \$175.0 million credit facility. No material termination fees or penalties were incurred by the Company in connection with the termination of the previously-existing credit facility, which was due to mature in May 2012. However, the Company does expect to record a \$0.4 million pre-tax charge during the third quarter of 2010 to write-off certain deferred financing costs associated with the previous revolving credit facility.

Issuance of Notice of Redemption of \$100.0 million Senior Subordinated Notes – Series B

In July 2010, the Company issued a "Notice of Redemption" for its Series B Notes. The call notice, which was issued on July 21, 2010, provides holders with a 30-day notice that the Series B Notes will be redeemed on August 20, 2010, at a redemption price of 102.313% of the principal amount, plus accrued but unpaid interest through August 20. The redemption of the Series B Notes will be funded with approximately \$30.0 million of available cash on hand and approximately \$70.0 million of borrowings under the Company's recently-executed revolving credit facility (discussed above). In connection with the redemption, the Company expects to record a \$3.2 million pre-tax charge during the third quarter of 2010 to write-off the remaining unamortized discount and deferred financing costs associated with the Series B Notes, which will result in an increase in the Company's amortization of deferred financing costs and bond discounts during the period. In addition, the Company expects to recognize a \$2.3 million pre-tax charge during the third quarter related to the anticipated call premium.

Cautionary Statement Regarding Forward-Looking Statements

Certain statements and information in this Quarterly Report on Form 10-Q (this “Form 10-Q”) may constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. The words “believe,” “expect,” “anticipate,” “plan,” “intend,” “foresee,” “should,” “would,” “could” or other similar expressions are intended to identify forward-looking statements, which are generally not historical in nature. These forward-looking statements are based on our current expectations and beliefs concerning future developments and their potential effect on us. While management believes that these forward-looking statements are reasonable as and when made, there can be no assurance that future developments affecting us will be those that we currently anticipate. All comments concerning our expectations for future revenues and operating results are based on our forecasts for our existing operations and do not include the potential impact of any future acquisitions. Our forward-looking statements involve significant risks and uncertainties (some of which are beyond our control) and assumptions that could cause actual results to differ materially from our historical experience and our present expectations or projections. Important factors that could cause actual results to differ materially from those in the forward-looking statements include, but are not limited to, those summarized below:

- our financial outlook and the financial outlook of the ATM industry;
- our ability to respond to recent and future regulatory changes that may impact the ATM and financial services industries;
 - our ability to respond to potential reductions in the amount of interchange fees that we receive from global and regional debit networks for transactions conducted on our ATMs;
 - our ability to provide new ATM solutions to financial institutions;
 - our ATM vault cash rental needs, including potential liquidity issues with our vault cash providers;
 - the implementation of our corporate strategy;
 - our ability to compete successfully with new and existing competitors;
 - our ability to renew and strengthen our existing customer relationships and add new customers;
 - our ability to meet the service levels required by our service level agreements with our customers;
 - our ability to pursue and successfully integrate acquisitions;
- our ability to successfully manage our existing international operations and to continue to expand internationally;
 - our ability to prevent security breaches;
- our ability to manage the risks associated with our third-party service providers failing to perform their contractual obligations;
 - changes in interest rates and foreign currency rates; and
 - the additional risks we are exposed to in our armored transport business.

Other factors that could cause our actual results to differ from our projected results are described in (1) Part II, Item 1A. Risk Factors and elsewhere in this Form 10-Q, (2) our Annual Report on Form 10-K for the fiscal year ended December 31, 2009 (“2009 Form 10-K”), (3) our Quarterly Report on Form 10-Q for the quarter ended March 31, 2010, (4) our reports and registration statements filed from time to time with the Securities and Exchange Commission (“SEC”) and (5) other announcements we make from time to time.

Readers are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date hereof. We undertake no obligation to publicly update or revise any forward-looking statements after the date they are made, whether as a result of new information, future events or otherwise.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Cardtronics, Inc. owns the world's largest non-bank network of automated teller machines ("ATM") and multi-function financial services kiosks. As of June 30, 2010, our network included over 33,700 devices throughout the United States (including the U.S. territories of Puerto Rico and the U.S. Virgin Islands), the United Kingdom, and Mexico, primarily within national and regional merchant locations. Included within this number are approximately 2,200 multi-function financial services kiosks that, in addition to traditional ATM functions such as cash dispensing and bank account balance inquiries, perform other consumer financial services, including bill payments, check cashing, remote deposit capture (which represents deposits taken using electronic imaging at ATMs not physically located at a bank), and money transfers.

More recently, we have started offering a managed services solution. Under a managed services arrangement, retailers and financial institutions rely on us to handle some or all of the operational aspects associated with operating and maintaining, as well as potentially owning, their ATM fleets. Under these types of arrangements, we will typically receive a fixed monthly management fee in return for providing certain services, including monitoring, maintenance, cash management, customer service, and transaction processing services. Finally, we own and operate an electronic funds transfer ("EFT") transaction processing platform that provides transaction processing services to our network of ATMs and financial services kiosks as well as ATMs owned and operated by third parties. For a more detailed discussion of our operations and the manners in which we derive revenues, please refer to our 2009 Form 10-K.

Business Update

Over the past several years, we made significant capital investments in our business, including (1) the acquisition of our United Kingdom operations in 2005, (2) our expansion into Mexico in 2006, (3) the launch of our EFT transaction processing platform in 2006, (4) our acquisition of the ATM and consumer financial services business of 7-Eleven, Inc. ("7-Eleven") in 2007, and (5) the launch of our armored courier operation in the United Kingdom in 2008. Additionally, during this same period of time, we continued to deploy ATMs in high-traffic locations under our contracts with large, well-known retailers, which has led to the development of relationships with large financial institutions through bank branding opportunities and enhanced the value of our wholly-owned surcharge-free network, Allpoint.

During 2009, we consciously reduced our level of capital investments relative to prior years and focused on extracting additional value from our existing network of ATMs and financial services kiosks. As a result, during the year ended December 31, 2009, we experienced significant improvements in many of our key operating and financial metrics, as follows:

- Total transactions conducted on our network increased over 8% from 354.4 million in 2008 to 383.3 million in 2009;
 - Monthly cash withdrawal transactions per ATM increased over 6% from 579 in 2008 to 616 in 2009;
 - Gross profit margins increased from 23.2% in 2008 to 30.2% in 2009; and
- Net cash provided by operating activities increased from \$16.2 million in 2008 to \$74.9 million in 2009, allowing us to pay down the entire amount previously outstanding under our revolving credit facility at the end of 2008.

During the three and six month periods ended June 30, 2010, we saw a continuation of many of the same positive operating trends outlined above. For the remainder of 2010, we plan to continue maximizing the value of our existing network while looking for opportunities to selectively expand that network within our existing geographic

segments. In particular, we hope to increase our future revenues by focusing on the following:

- Deploying additional ATMs within our existing retail merchant partner locations and implementing selective surcharge rate (or “convenience fee”) increases;
 - Adding new retail merchant partners to our portfolio of existing retail locations;
- Driving incremental transactions to our devices through the continued expansion of our existing bank and Allpoint network branding offerings, as well as through other initiatives that we expect to undertake in the near future;

- Continuing to expand the number of issuing financial institutions that participate in Allpoint;
- Providing ATM management services (generally on a fixed-fee basis) for fleets of ATMs of financial institutions and large retailers; and
- Selectively expanding our existing ATM estates within the United Kingdom and Mexico, while also considering additional market entries outside of the United States.

In addition to the above, we plan to continue to invest in our technology and infrastructure so that we can offer additional services to financial institutions and retailers, while at the same time, focusing on optimizing the efficiency of our existing platform to ensure that we remain one of the lowest cost and highest quality service providers within the industry.

Recent Events

Withdrawal Transaction and Revenue Trends – United States. For the six month period ended June 30, 2010, total same-store cash withdrawal transactions conducted on our domestic ATMs increased by 2.6% when compared to the prior year. For the three month period ended June 30, 2010, total same-store cash withdrawal transactions conducted on our domestic ATMs increased by 2.2%. We define same-store ATMs as all ATMs that were continuously transacting for the trailing 13-month period to ensure the exclusion of any new growth or mid-month installations.

The year-over-year same-store withdrawal transaction increases noted above were primarily due to two key factors: (1) a continued shift in the mix of withdrawal transactions being conducted on our domestic network of ATMs (i.e., more surcharge-free and less surcharge-based withdrawal transactions) resulting from the continued evolution and growth of our surcharge-free product offerings, and (2) the proliferation in the use of network-branded stored-value cards by employers and governmental agencies for payroll and other benefit-related payments. With respect to the latter, the increase in the number of stored-value cards in circulation has served to increase our potential customer base, as these stored-value cards are capable of being used in ATMs, and many of the individuals to whom the cards have been issued are traditionally unbanked or underbanked and have not historically been able to utilize ATMs. We expect to continue to see an increase in the number of stored-value cards in the future, which we believe will result in an increase in the number of cash withdrawal transactions being conducted on our domestic ATMs.

For the three and six month periods ended June 30, 2010, total transactions conducted on our domestic ATMs decreased slightly when compared to the same periods in prior year due to a decrease in surcharge transactions. Such decrease was primarily due to a loss of a major merchant customer during the fourth quarter of 2009 and planned surcharge rate increases that were implemented in certain retail partner locations during the latter half of 2009 and the first half of 2010. Although these surcharge rate increases resulted in a decrease in surcharge transaction counts, due to the incremental revenue earned on each transaction, surcharge revenues actually increased during both periods.

As our surcharge-free offerings continue to grow in the United States, so do the interchange revenues we earn from the networks and card-issuing financial institutions whose customers utilize our ATMs. The interchange rates paid to independent ATM deployers, such as ourselves, are set by the various EFT networks over which the underlying transactions are routed. Recently, certain networks have reduced the net interchange fees paid to ATM deployers for transactions routed through their networks. For example, during April 2010, a global network brand reduced the interchange rates it pays to domestic ATM deployers for ATM transactions routed across its debit network. As a result, we have recently seen certain financial institutions migrate their volume away from other networks to take advantage of the lower pricing offered by these networks. Such rate change is currently expected to reduce our ATM operating gross profits by approximately \$1.9 million over the remainder of 2010. Furthermore, if additional financial institutions move to take advantage of this lower pricing, or if additional networks reduce the interchange rates they currently pay to ATM deployers, our future revenues and gross profits would be negatively impacted. For additional details on this rate change and other risks associated with interchange revenues, see Part II, Item 1A. Risk Factors –

Interchange fees, which comprise a substantial portion of our transaction revenues, may be lowered at the discretion of the various EFT networks through which our transactions are routed, or through potential regulatory changes, thus reducing our future revenues.

Withdrawal Transaction and Revenue Trends – United Kingdom. For the six month period ended June 30, 2010, total same-store cash withdrawal transactions conducted on our United Kingdom ATMs increased by 3.6% relative to the prior year. For the three month period ended June 30, 2010, total same-store cash withdrawal transactions conducted on our United Kingdom ATMs increased by 3.8%.

The increases noted above are due to the continued shift in the mix of ATMs in the United Kingdom (i.e., less pay-to-use ATMs and more surcharge-free, or “free-to-use” ATMs). While the number of free-to-use ATMs within our portfolio increased significantly when compared to the prior year, our pay-to-use ATMs in that market continued to show year-over-year transaction declines, partially offsetting the year-over-year transaction gains that were generated by our free-to-use machines. As a result of this trend, most of our recent ATM installations in the United Kingdom have been, and will likely continue to be, free-to-use locations.

Although we earn less revenue per cash withdrawal transaction in a free-to-use location, the higher transactions from our free-to-use locations are expected to generate interchange revenues that are sufficient to offset the anticipated decline in surcharge revenues in 2010 resulting from the negative pay-to-use transaction trends noted above. However, interchange rates, which are set by LINK, the United Kingdom’s primary ATM debit network, are expected to decline beginning in 2011 as a result of declining interest rates during the past two years. If these interchange rate declines occur, the interchange revenues generated by our free-to-use ATMs subsequent to 2010 may be negatively impacted. For additional details on the potential change in interchange rates in the United Kingdom beginning in 2011 and other risks associated with interchange revenues, see Part II, Item 1A. Risk Factors – Interchange fees, which comprise a substantial portion of our transaction revenues, may be lowered at the discretion of the various EFT networks through which our transactions are routed, or through potential regulatory changes, thus reducing our future revenues.

Financial Regulatory Reform in the United States. The Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Act”), which contains broad measures aimed at overhauling existing financial regulations within the United States, was signed into law on July 21, 2010. Among many other things, the Act includes provisions that (i) call for the establishment of a new Bureau of Consumer Financial Protection, (ii) limit the activities that banking entities may engage in, and (iii) give the Federal Reserve the authority to regulate interchange transaction fees charged by electronic funds transfer networks for electronic debit transactions. Many of the detailed regulations required under the Act have yet to be finalized and will likely not be finalized for some time. Accordingly, at this point, we do not believe that the regulations that are likely to arise from the Act will have a material impact on our operations. However, based on the current language contained within the Act, it is uncertain whether the regulation of interchange fees for electronic debit transactions will apply to ATM cash withdrawal transactions. If ATM cash withdrawal transactions were to fall under the proposed regulatory framework, and the related interchange fees were reduced from their current levels, such change would likely have a negative impact on our future revenues and operating profits. Conversely, additional proposed regulations contained within the Act are aimed at providing merchants with additional flexibility in terms of allowing certain point-of-sale transactions to be paid for in cash rather than with debit or credit cards. Such a change would likely result in the increased use of cash at the point-of-sale for some merchants, and thus, could positively impact our future revenues and operating profits (through increased transaction levels at our ATMs).

Change in Mexico Fee Structure. In October 2009, the Central Bank of Mexico adopted new rules regarding how ATM operators disclose and levy fees to consumers who use their ATMs. These rules, which became effective in May 2010, require ATM operators to elect between receiving an interchange fee from the consumer’s card issuer or a surcharge fee from the consumer. Our majority-owned subsidiary, Cardtronics Mexico, S.A. de C.V. (“Cardtronics Mexico”), elected to assess a surcharge fee on the consumer rather than select the interchange fee-only option, and subsequently raised the level of its surcharge fees in order to recoup the interchange fees it is no longer receiving. Because these changes were just recently enacted, we cannot be certain what impact such rate changes will

have on the long-term withdrawal transaction levels in that market. However, based on very early indications, withdrawal transaction levels in Mexico have declined by amounts greater than those originally anticipated. If such initial transaction declines continue or worsen from their current levels, the additional surcharge fee amounts may not be sufficient to offset the lost interchange revenues, resulting in lower revenues and profitability per ATM in that market.

As a result of the above developments, we have decided to reduce the number of planned ATM deployments in Mexico for the remainder of 2010 in order to gauge the impact of the above rules on our ATM transaction levels and related profits. If transaction levels continue to worsen, and if we are unsuccessful in its efforts to implement certain measures to mitigate the effects of such transaction declines, our overall profitability in that market will decline. If such declines are significant, we may be required to record an impairment charge in future periods to write-down the carrying value of certain existing tangible and intangible assets associated with that operation.

Revolving Credit Facilities. In July, we entered into a new \$175.0 million revolving credit facility. The new facility, which is led by a syndicate of banks including JPMorgan Chase and Bank of America, provides us with access to \$175.0 million in borrowings and letters of credit (subject to the covenants contained within the facility) and has an initial termination date of February 2013; however, this date can be extended to July 2015 in the event our existing 9.25% senior subordinated notes are no longer outstanding or have been refinanced with a maturity date later than December 2015. Additionally, the credit facility contains a feature that allows us to expand the facility up to \$250.0 million, subject to the availability of additional bank commitments by existing or new syndicate participants.

Concurrent with the execution of the agreement governing our new revolving credit facility (discussed above) we terminated our previous credit facility of the same amount. We did not incur any material termination fees or penalties in connection with the termination of the previously-existing credit facility, which was due to mature in May 2012. However, we expect to record a \$0.4 million pre-tax charge during the third quarter of 2010 to write-off certain deferred financing costs associated with the previous revolving credit facility.

For additional information on these transactions, see Item 1, Notes to Consolidated Financial Statements, Note 17, Subsequent Events.

Notice of Redemption of \$100.0 Million 9.25% Senior Subordinated Notes – Series B. In July 2010, we issued a “Notice of Redemption” for our \$100.0 million 9.25% senior subordinated notes – Series B due in 2013 (the “Series B Notes”). The call notice, which was issued on July 21, 2010, provides holders with a 30-day notice that the Series B Notes will be redeemed on August 20, 2010, at a redemption price of 102.313% of the principal amount, plus accrued but unpaid interest through August 20. The redemption will be funded with approximately \$30.0 million of available cash on hand and approximately \$70.0 million of borrowings under our recently-executed credit facility (discussed above). We expect that the redemption of the Series B Notes combined with the execution of our new credit facility will enhance our financial flexibility by reducing our overall leverage and interest expense amounts. Based on the current interest rate environment, we expect that our annual cash interest expense savings will be roughly \$8.0 million. However, during the third quarter of 2010, we expect to record a \$3.2 million pre-tax charge to write-off the remaining unamortized discount and deferred financing costs associated with the Series B Notes, which will result in an increase in our amortization of deferred financing costs and bond discounts during the period. In addition, we expect to recognize a \$2.3 million pre-tax charge during the third quarter related to the anticipated call premium.

Results of Operations

The following table sets forth line items from our Consolidated Statements of Operations as a percentage of total revenues for the periods indicated. Percentages may not add due to rounding.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
Revenues:				
ATM operating revenues	98.2	% 97.4	% 98.3	% 97.9
ATM product sales and other revenues	1.8	2.6	1.7	2.1
Total revenues	100.0	100.0	100.0	100.0
Cost of revenues:				
Cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization shown separately below) (1)	65.8	67.4	66.5	69.3
Cost of ATM product sales and other revenues	1.7	2.5	1.7	2.1
Total cost of revenues	67.5	69.9	68.2	71.3
Gross profit	32.5	30.1	31.8	28.7
Operating expenses:				
Selling, general, and administrative expenses (2)	7.7	8.5	8.2	8.9
Depreciation and accretion expense	7.7	8.0	7.9	8.2
Amortization expense	2.8	3.6	3.0	3.8
Loss on disposal of assets	0.8	1.3	0.6	1.6

(1) Excludes effects of depreciation, accretion, and amortization expense of \$12.1 million and \$12.7 million for the three month periods ended June 30, 2010 and 2009, respectively, and \$24.4 million and \$25.3 million for the six month periods ended June 30, 2010 and 2009, respectively. The inclusion of this depreciation, accretion, and amortization expense in Cost of ATM operating

revenues would have increased our Cost of ATM operating revenues as a percentage of total revenues by 9.1% and 10.2% for the three month periods ended June 30, 2010 and 2009, respectively, and by 9.4% and 10.5% for the six month periods ended June 30, 2010 and 2009, respectively.

- (2) The three and six month periods ended June 30, 2010 includes \$0.6 million and \$0.7 million, respectively, of costs associated with the preparation and filing of a shelf registration statement and the completion of a secondary equity offering, and approximately \$0.4 million and \$0.8 million, respectively, in incremental stock-based compensation expense (when compared to the same period in the prior year). The six month period ended June 30, 2009 includes the effect of \$1.2 million in severance costs associated with the departure of our former Chief Executive Officer in March 2009.

Key Operating Metrics

We rely on certain key measures to gauge our operating performance, including total transactions, total cash withdrawal transactions, ATM operating revenues per ATM per month, and ATM operating gross profit margin. The following table sets forth information regarding certain of these key measures for the periods indicated:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
Average number of transacting ATMs:				
United States: Company-owned	18,257	18,183	18,194	18,207
United States: Merchant-owned	9,944	10,130	9,933	10,141
United Kingdom	2,795	2,572	2,754	2,554
Mexico	2,881	2,117	2,803	2,106
Total average number of transacting ATMs	33,877	33,002	33,684	33,008
Total transactions (in thousands)				
Total transactions (in thousands)	105,393	96,482	202,036	185,853
Total cash withdrawal transactions (in thousands)				
Total cash withdrawal transactions (in thousands)	65,545	62,047	126,429	119,611
Average monthly cash withdrawal transactions per average transacting ATM				
Average monthly cash withdrawal transactions per average transacting ATM	645	627	626	604
Per ATM per month:				
ATM operating revenues	\$1,285	\$1,226	\$1,268	\$1,186
Cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization) (1)				
Cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization) (1)	860	848	858	839
ATM operating gross profit (1) (2)	\$425	\$378	\$410	\$347
ATM operating gross profit margin (exclusive of depreciation, accretion, and amortization)				
ATM operating gross profit margin (exclusive of depreciation, accretion, and amortization)	33.0	% 30.8	% 32.4	% 29.3
ATM operating gross profit margin (inclusive of depreciation, accretion, and amortization)				
ATM operating gross profit margin (inclusive of depreciation, accretion, and amortization)	23.8	% 20.3	% 22.9	% 18.5

(1) Excludes effects of depreciation, accretion, and amortization expense of \$12.1 million and \$12.7 million for the three month periods ended June 30, 2010 and 2009, respectively, and \$24.4 million and \$25.3 million for the six month periods ended June 30, 2010 and 2009, respectively. The inclusion of this depreciation, accretion, and amortization expense in Cost of ATM operating revenues would have increased our Cost of ATM operating revenues per ATM per month and decreased our ATM operating gross profit per ATM per month by \$119 and -\$129 for the three month periods ended June 30, 2010 and 2009, respectively, and by \$121 and \$128 for the six month periods ended June 30, 2010 and 2009, respectively.

- (2) ATM operating gross profit is a measure of profitability that uses only the revenues and expenses that relate to operating the ATMs in our portfolio. Revenues and expenses from ATM equipment sales and other ATM-related services are not included.

Revenues

	Three Months Ended June 30,			Six Months Ended June 30,		
	2010 (In thousands)	2009	% Change	2010 (In thousands)	2009	% Change
ATM operating revenues	\$ 130,560	\$ 121,362	7.6 %	\$ 256,247	\$ 234,942	9.1 %
ATM product sales and other revenues	2,388	3,286	(27.3)%	4,477	5,051	(11.4)%
Total revenues	\$ 132,948	\$ 124,648	6.7 %	\$ 260,724	\$ 239,993	8.6 %

Three Months Ended June 30, 2010 Compared to Three Months Ended June 30, 2009

ATM operating revenues. ATM operating revenues generated during the three month periods ended June 30, 2010 increased \$9.2 million from the three months ended June 30, 2009. Below is the detail, by segment, of the changes in the various components of ATM operating revenues:

	Variance: Three Months Ended June 30, 2009 to Three Months Ended June 30, 2010			
	U.S.	U.K.	Mexico	Total
	Increase (decrease) (In thousands)			
Surcharge revenues	\$436	\$(956)	\$3,088	\$2,568
Interchange revenues	(589)	3,258	(533)	2,136
Bank branding and surcharge-free network revenues	3,905	—	—	3,905
Other revenues	359	—	230	589
Total increase in ATM operating revenues	\$4,111	\$2,302	\$2,785	\$9,198

United States. During the three month period ended June 30, 2010, our United States operations experienced a \$4.1 million, or 4%, increase in ATM operating revenues compared to the same period in 2009. The majority of this increase was due to the continued growth of participating banks and other financial institutions in our bank branding programs and our Allpoint surcharge-free network, which resulted in a 24% increase in those related revenues. Additionally, the increased level of participation in these programs positively impacted our interchange revenues due to the increase in the total number of withdrawal transactions conducted on our branded ATMs and routed through our Allpoint network; however, the impact of these incremental transactions on our interchange revenues was more than offset by the reduced interchange rates paid by one of the global EFT networks, as discussed above in Recent Events - Withdrawal Transaction and Revenue Trends – United States, and the impact of the loss of a significant merchant customer in the fourth quarter of 2009. Also contributing to the decrease in interchange revenues was the planned surcharge rate increases that were implemented in certain retail partner locations during the latter half of 2009 and the first half of 2010. Although these surcharge rate increases resulted in an increase in surcharge revenues, the rate increases somewhat negatively impacted the level of surcharge transactions conducted on our machines, contributing to the decrease in interchange revenues earned during the period. Finally, the expansion of our surcharge-free programs, which allow participants' cardholders to make surcharge-free cash withdrawals at our ATMs, and a decline in our merchant-owned account base further contributed to the decline in the number of surcharge transactions conducted on our machines, which partially offset the impact of the surcharge rate increases.

For additional information on recent trends that have impacted, and may continue to impact, the revenues generated by our United States operations, see Recent Events - Withdrawal Transaction and Revenue Trends – United States

above.

United Kingdom. Our United Kingdom operations experienced a \$2.3 million, or 13%, increase in ATM operating revenues for the three month period ended June 30, 2010, when compared to the same period in 2009, due primarily to a 43% increase in the total number of transactions conducted on our ATMs in that market. The increased level of transactions was primarily attributable to two factors: (1) a 9% increase in the average number of transacting ATMs, which was the result of additional ATM deployments made throughout 2009 and the first half of 2010 at locations of new and existing customers, and (2) a 79% increase in cash withdrawal transactions conducted on our free-to-use ATMs. The installation of free-to-use ATMs in a majority of the new locations, combined with a decrease in our pay-to-use ATMs, decreased the surcharge revenues generated by our United Kingdom operations. However, such lost surcharge fees were more than offset by an increase in interchange revenues. Excluding the unfavorable impact of foreign currency exchange rate movements between the two periods, the total increase in ATM operating revenues for the period would have been \$3.1 million, or 17%, when compared to the same period in 2009.

For additional information on recent trends that have impacted, and may continue to impact, the revenues generated by our United Kingdom operations, see Recent Events - Withdrawal Transaction and Revenue Trends – United Kingdom above.

Mexico. The \$2.8 million, or 74%, increase in ATM operating revenues generated by our Mexico operations during the three month period ended June 30, 2010, was in part the result of a 36% increase in the average number of transacting ATMs associated with these operations. The new ATMs, many of which were installed during the fourth quarter of 2009 and the first quarter of 2010, contributed to a 28% increase in total transactions during the period as compared to the same period in 2009. Also contributing to the year-over-year increase in ATM operating revenues was increased revenues per transaction from our ATMs deployed in resort locations during 2010. Although these ATMs positively contributed to our results during the three month period ended June 30, 2010, as a result of higher transaction volumes and higher convenience fees, we cannot be certain that this trend will continue. Finally, foreign currency exchange rate movements between the two periods favorably impacted the revenues earned by our Mexico business during the three month period ended June 30, 2010, contributing approximately 10% of the total increase.

Also impacting our results for the period were the new ATM fee rules adopted by the Central Bank of Mexico, which went into effect in May 2010 and negatively impacted our results for the three month period ended June 30, 2010. These rules require ATM operators to choose between receiving surcharge fees or interchange fees for transactions conducted on their machines. In response to the new rules, we elected to increase the surcharge rates charged at our ATMs beginning in May 2010 to compensate for the lost interchange revenues associated with such decision. Although it is still very early on in the transition phase for the new rules, it appears that surcharge transaction levels (subsequent to the new rules going into effect) declined by amounts greater than those originally anticipated. If this trend continues, the additional surcharge fee amounts charged per transaction may not be sufficient to offset the lost interchange revenues, resulting in lower ATM operating revenues and profits in Mexico. As a result of these recent developments, we have decided to reduce the number of planned ATM deployments in Mexico for the remainder of 2010 in order to gauge the impact of the above rules on our ATM transaction levels and related profits. Accordingly, the year-over-year revenue growth rates for the remainder of 2010 in Mexico will likely be lower than those seen during the first half of 2010. For additional information on these new rules, see Recent Events – Change in Mexico Fee Structure above.

ATM product sales and other revenues. ATM product sales and other revenues for the three month period ended June 30, 2010 were 27.3% lower than those generated during the same period in 2009 primarily due to lower equipment and value-added reseller (“VAR”) program sales in the United States. Under our VAR program, we primarily sell ATMs to Associate VARs who in turn resell the ATMs to various financial institutions throughout the United States in territories authorized by the equipment manufacturer. The reduced sales levels during the most recent quarter were the result of manufacturing and shipment delays experienced from overseas suppliers, and we currently anticipate that such delays will continue to negatively impact our results for the remainder of the year.

Six Months Ended June 30, 2010 Compared to Six Months Ended June 30, 2009

ATM operating revenues. ATM operating revenues generated during the six month period ended June 30, 2010 increased \$21.3 million from the six month period ended June 30, 2009. Below is the detail, by segment, of changes in the various components of ATM operating revenues:

	Variance: Six Months Ended June 30, 2009 to Six Months Ended June 30, 2010			
U.S.	U.K.	Mexico		Total
	Increase (decrease)			
	(In thousands)			

Edgar Filing: CARDTRONICS INC - Form 10-Q

Surcharge revenues	\$1,616	\$(449) \$6,340	\$7,507
Interchange revenues	(368) 6,551	(390) 5,793
Bank branding and surcharge-free network revenues	7,006	—	—	7,006
Other revenues	535	1	463	999
Total increase in ATM operating revenues	\$8,789	\$6,103	\$6,413	\$21,305

United States. During the six month period ended June 30, 2010, our United States operations experienced an \$8.8 million, or 5%, increase in ATM operating revenues compared to the same period in 2009. This increase was primarily due to higher bank branding and surcharge-free network revenues attributable to increase participation in these programs by banks and other financial institutions. Additionally, as was the case during the three months ended June 30, 2010, we generated increased surcharge revenues during the six months ended June 30, 2010 as a result of surcharge rate increases implemented at select merchant locations.

United Kingdom. Our United Kingdom operations also contributed to the higher ATM operating revenues for the six month period ended June 30, 2010, increasing by \$6.1 million, or 19%, from the first six months of 2009. In contrast with the three month period, foreign currency exchange rate movements between the two six-month periods positively impacted our revenues. Excluding the impact of foreign currency movements, the total increase in ATM operating revenues for the six months ended June 30, 2010 would have been \$5.4 million, or 16%, compared to the same period in 2009. This increase was primarily driven by an 8% increase in the average number of transacting ATMs in the United Kingdom, which resulted from additional ATM deployments made throughout 2009 and the first six months of 2010, and a 76% increase in withdrawal transactions on our free-to-use ATMs.

Mexico. Also contributing to the higher ATM operating revenues were our Mexico operations, which experienced a \$6.4 million, or 88%, increase in revenues during the six month period ended June 30, 2010 over the same period in 2009. This increase was the result of a 33% increase in the average number of transacting ATMs associated with our Mexico operations, which contributed to a 23% increase in the number of total transactions conducted on our machines in that market during the six months ended June 30, 2010. As was the case during the three months ended June 30, 2010, foreign currency exchange rate movements between the two periods favorably impacted the revenues earned by our Mexico business during the first six months of 2010, representing approximately 15% of the total increase. Finally, as noted above, certain ATM fee rule changes enacted in Mexico in May 2010 are likely to have a negative impact on our ATM operating revenue for the remainder of 2010. For additional information on these new rules, see Recent Events – Change in Mexico Fee Structure above.

ATM product sales and other revenues. ATM product sales and other revenues for the six month period ended June 30, 2010 were lower than those generated during the same period in 2010 primarily due to lower equipment and VAR program sales in the second quarter of 2010, as discussed above for the three month period ended June 30, 2010. This decrease was partially offset by increased equipment and VAR program sales in the first quarter of 2010 as a result of our recent expansion into Puerto Rico and into additional managed services arrangements.

Cost of Revenues

	Three Months Ended June 30,			Six Months Ended June 30,			% Change
	2010 (In thousands)	2009	% Change	2010 (In thousands)	2009	% Change	
Cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization)	\$ 87,414	\$ 83,975	4.1 %	\$ 173,293	\$ 166,204	4.3 %	
Cost of ATM product sales and other revenues	2,314	3,153	(26.6) %	4,507	4,967	(9.3) %	
Total cost of revenues (exclusive of depreciation, accretion, and amortization)	\$ 89,728	\$ 87,128	3.0 %	\$ 177,800	\$ 171,171	3.9 %	

Three Months Ended June 30, 2010 Compared to Three Months Ended June 30, 2009

Edgar Filing: CARDTRONICS INC - Form 10-Q

Cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization). The cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization) for the three month period ended June 30, 2010 increased \$3.4 million when compared to the same period in 2009. Below is the detail, by segment, of changes in the various components of our cost of ATM operating revenues:

	Variance: Three Months Ended June 30, 2009 to Three Months Ended June 30, 2010			
	U.S.	U.K.	Mexico	Total
	Increase (decrease)			
	(In thousands)			
Merchant commissions	\$1,190	\$914	\$821	\$2,925
Vault cash rental expense	518	576	142	1,236
Other costs of cash	(791)	173	990	372
Repairs and maintenance	(695)	(441)	(114)	(1,250)
Communications	(18)	93	124	199
Transaction processing	(653)	264	193	(196)
Stock-based compensation	(24)	—	—	(24)
Other expenses	(145)	247	75	177
Total (decrease) increase in cost of ATM operating revenues	\$(618)	\$1,826	\$2,231	\$3,439

United States. During the three month period ended June 30, 2010, the cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization) incurred by our United States operations decreased \$0.6 million when compared to the same period in 2009. The majority of this decrease was due to a decline in armored courier expense, which is included in the other costs of cash line item above, resulting from more favorable pricing terms in place with our armored service providers and fewer cash fills during the period as a result of our efforts to aggressively manage our costs. Similarly, our primary domestic maintenance service agreements were renewed on more favorable terms in 2009; however, the benefits from the improved pricing terms during the three month period were somewhat offset by additional costs incurred to load certain software upgrades on a number of our ATMs. Additionally, the transaction processing costs incurred during the period decreased due to the conversion of our ATMs located in 7-Eleven locations over to our EFT processing platform from a third-party processor. Offsetting these decreases were higher merchant commissions, which resulted from the higher surcharge revenues earned during the quarter, and higher vault cash rental expense, which resulted from additional interest rate swap contracts entered into during the latter half of 2009 and the first half of 2010.

United Kingdom. Our United Kingdom operations experienced an overall increase in the cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization) during the most recent quarter. The \$1.8 million increase was due primarily to an 18% increase in merchant commissions during the period, which resulted from a 43% increase in total transactions during the three month period ended June 30, 2010, when compared to the same period a year ago.
