

TRUSTMARK CORP
Form 10-K
February 20, 2018

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
for the fiscal year ended December 31, 2017

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

Commission file number 000-3683

TRUSTMARK CORPORATION

(Exact name of Registrant as specified in its charter)

MISSISSIPPI	64-0471500
(State or other jurisdiction of incorporation or organization)	(IRS Employer Identification Number)

248 East Capitol Street, Jackson, Mississippi	39201
(Address of principal executive offices)	(Zip Code)

Registrant's telephone number, including area code:	(601) 208-5111
---	----------------

Securities registered pursuant to Section 12(b) of the Act:

Common Stock, no par value	NASDAQ Stock Market
(Title of Class)	(Name of Exchange on Which Registered)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was

Edgar Filing: TRUSTMARK CORP - Form 10-K

required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act.) Yes No

Based on the closing sales price at June 30, 2017, the last business day of the registrant's most recently completed second fiscal quarter, the aggregate market value of the shares of common stock held by nonaffiliates of the registrant was approximately \$1.306 billion.

As of January 31, 2018, there were issued and outstanding 67,818,093 shares of the registrant's Common Stock.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Proxy Statement for Trustmark's 2018 Annual Meeting of Shareholders to be held April 24, 2018 are incorporated by reference into Part III of the Form 10-K report.

Forward-Looking Statements

Certain statements contained in this Annual Report on Form 10-K constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. You can identify forward-looking statements by words such as “may,” “hope,” “will,” “should,” “expect,” “plan,” “anticipate,” “intend,” “believe,” “estimate,” “predict,” “potential,” “could,” “future” or the negative of those terms or other words of similar meaning. You should read statements that contain these words carefully because they discuss our future expectations or state other “forward-looking” information. These forward-looking statements include, but are not limited to, statements relating to anticipated future operating and financial performance measures, including net interest margin, credit quality, business initiatives, growth opportunities and growth rates, among other things, and encompass any estimate, prediction, expectation, projection, opinion, anticipation, outlook or statement of belief included therein as well as the management assumptions underlying these forward-looking statements. You should be aware that the occurrence of the events described under the caption Item 1A. Risk Factors in this report could have an adverse effect on our business, results of operations and financial condition. Should one or more of these risks materialize, or should any such underlying assumptions prove to be significantly different, actual results may vary significantly from those anticipated, estimated, projected or expected.

Risks that could cause actual results to differ materially from current expectations of Management include, but are not limited to, changes in the level of nonperforming assets and charge-offs, local, state and national economic and market conditions, including potential market impacts of efforts by the Federal Reserve Board to reduce the size of its balance sheet and conditions in the housing and real estate markets in the regions in which Trustmark operates and the extent and duration of the current volatility in the credit and financial markets as well as crude oil prices, changes in our ability to measure the fair value of assets in our portfolio, material changes in the level and/or volatility of market interest rates, the performance and demand for the products and services we offer, including the level and timing of withdrawals from our deposit accounts, the costs and effects of litigation and of unexpected or adverse outcomes in such litigation, our ability to attract noninterest-bearing deposits and other low-cost funds, competition in loan and deposit pricing, as well as the entry of new competitors into our markets through de novo expansion and acquisitions, economic conditions, including the potential impact of monetary and other governmental actions designed to address the level and volatility of interest rates and the volatility of securities, currency and other markets, the enactment of legislation and changes in existing regulations or enforcement practices or the adoption of new regulations, changes in accounting standards and practices, including changes in the interpretation of existing standards, that affect our consolidated financial statements, changes in consumer spending, borrowings and savings habits, technological changes, changes in the financial performance or condition of our borrowers, changes in our ability to control expenses, changes in our compensation and benefit plans, greater than expected costs or difficulties related to the integration of acquisitions or new products and lines of business, cyber-attacks and other breaches which could affect our information system security, natural disasters, environmental disasters, acts of war or terrorism, and other risks described in our filings with the Securities and Exchange Commission.

Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to be correct. Except as required by law, we undertake no obligation to update or revise any of this information, whether as the result of new information, future events or developments or otherwise.

PART I

ITEM 1. BUSINESS

The Corporation

Description of Business

Trustmark Corporation (Trustmark), a Mississippi business corporation incorporated in 1968, is a bank holding company headquartered in Jackson, Mississippi. Trustmark's principal subsidiary is Trustmark National Bank (TNB), initially chartered by the State of Mississippi in 1889. At December 31, 2017, TNB had total assets of \$13.796 billion, which represented approximately 99.98% of the consolidated assets of Trustmark.

Through TNB and its subsidiaries, Trustmark operates as a financial services organization providing banking and other financial solutions through 198 offices and 2,893 full-time equivalent associates (measured at December 31, 2017) located in the states of Alabama, Florida (primarily in the northwest or "Panhandle" region of that state, which is referred to herein as Trustmark's Florida market), Mississippi, Tennessee (in Memphis and the Northern Mississippi regions, which are collectively referred to herein as Trustmark's Tennessee market), and Texas (primarily in Houston, which is referred to herein as Trustmark's Texas market). The principal products produced and services rendered by TNB and Trustmark's other subsidiaries are as follows:

Trustmark National Bank

Commercial Banking – TNB provides a full range of commercial banking services to corporations and other business customers. Loans are provided for a variety of general corporate purposes, including financing for commercial and industrial projects, income producing commercial real estate, owner-occupied real estate and construction and land development. TNB also provides deposit services, including checking, savings and money market accounts and certificates of deposit as well as treasury management services.

Consumer Banking – TNB provides banking services to consumers, including checking, savings, and money market accounts as well as certificates of deposit and individual retirement accounts. In addition, TNB provides consumer customers with installment and real estate loans and lines of credit.

Mortgage Banking – TNB provides mortgage banking services, including construction financing, production of conventional and government insured mortgages, secondary marketing and mortgage servicing.

Insurance – TNB provides a competitive array of insurance solutions for business and individual risk management needs. Business insurance offerings include services and specialized products for medical professionals, construction, manufacturing, hospitality, real estate and group life and health plans. Individual customers are also provided life and health insurance, and personal line policies. TNB provides these services through Fisher Brown Bottrell Insurance, Inc. (FBI), a Mississippi corporation and a wholly-owned subsidiary of TNB, which is based in Jackson, Mississippi.

Wealth Management and Trust Services – TNB offers specialized services and expertise in the areas of wealth management, trust, investment and custodial services for corporate and individual customers. These services include the administration of personal trusts and estates as well as the management of investment accounts for individuals, employee benefit plans and charitable foundations. TNB also provides corporate trust and institutional custody, securities brokerage, financial and estate planning and retirement plan services. TNB's wealth management division is also assisted by Trustmark Investment Advisors, Inc. (TIA), a Securities and Exchange Commission (SEC)-registered investment adviser and a wholly-owned subsidiary of TNB. TIA provides customized investment management services to TNB's Wealth Management Division, which in turn relies upon that advice to provide investment management services to TNB's wealth management customers.

New Market Tax Credits (NMTC) – TNB provides an intermediary vehicle for the provision of loans or investments in Low-Income Communities (LICs) through its subsidiary Southern Community Capital, LLC (SCC). SCC is a Mississippi single member limited liability company, a certified Community Development Entity (CDE) and a wholly-owned subsidiary of TNB. The primary mission of SCC is to provide investment capital for LICs, as defined by Section 45D of the Internal Revenue Code, or for Low-Income Persons (LIPs). As a certified CDE, SCC is able to apply to the Community Development Financial Institutions Fund (CDFI Fund) to receive NMTC allocations to offer investors in exchange for equity investments in qualified projects.

Capital Trust

Trustmark Preferred Capital Trust I (the Trust) is a Delaware trust affiliate and a wholly-owned subsidiary of Trustmark formed in 2006 to facilitate a private placement of \$60.0 million in trust preferred securities. As defined in applicable accounting standards, the Trust is considered a variable interest entity for which Trustmark is not the primary beneficiary. Accordingly, the accounts of the Trust are not included in Trustmark's consolidated financial statements.

Strategy

Trustmark seeks to be a premier diversified financial services company in its markets, providing a broad range of banking, wealth management and insurance solutions to its customers. Trustmark's products and services are designed

to strengthen and expand customer relationships and enhance the organization's competitive advantages in its markets as well as to provide cross-selling opportunities that will enable Trustmark to continue to diversify its revenue and earnings streams.

Segment Information

For the year ended December 31, 2017, Trustmark operated through three operating segments: General Banking Division, Insurance Division and Wealth Management Division. The table below presents a summary of segment financial data for each segment for the last three years (\$ in thousands):

	Years Ended December 31,		
	2017	2016	2015
General Banking			
Net interest income	\$406,406	\$386,596	\$391,092
Provision for loan losses, net	7,699	14,714	11,800
Noninterest income	116,180	107,059	105,477
Net income	97,706	99,083	106,738
Total assets	13,724,193	13,278,668	12,604,112
Wealth Management			
Net interest income	\$910	\$726	\$337
Noninterest income	30,285	30,117	31,245
Net income	2,244	4,124	3,850
Total assets	5,592	7,501	7,471
Insurance			
Net interest income	\$234	\$211	\$336
Noninterest income	38,198	36,767	36,427
Net income	5,680	5,204	5,450
Total assets	68,168	66,164	67,313

For more information on Trustmark's operating segments, please see the section captioned "Results of Segment Operations" in Part II. Item 7. - Management's Discussion and Analysis of Financial Condition and Results of Operations and Note 20 - Segment Information included in Part II. Item 8. - Financial Statements and Supplementary Data of this report.

Overview of Lending Business

Trustmark categorizes loans on its balance sheet into three categories. These categories are described in more detail in Note 1 – Significant Accounting Policies included in Part II. Item 8. - Financial Statements and Supplementary Data of this report.

• **Loans Held for Investment (LHFI)** – Loans originally underwritten by Trustmark that do not constitute loans held for sale, acquired loans.

• **Loans Held for Sale (LHFS)** – Mortgage loans purchased from wholesale customers or originated in Trustmark's General Banking Division, other than mortgage loans that are retained in the LHFI portfolio based on banking relationships or certain investment strategies.

• **Acquired Loans** – Loans acquired by Trustmark, either pursuant to the acquisition of another bank or pursuant to an acquisition of some or all of another bank's loan portfolio as well as loans acquired by Trustmark in a Federal Deposit Insurance Corporation (FDIC)-assisted transaction and that are covered under a loss-share agreement with the FDIC. The following discussion briefly summarizes Trustmark's lending business by focusing on LHFI and LHFS, and includes a discussion of the risks inherent in these loans, Trustmark's underwriting policies for its loans and the characteristics of the real estate loan component of these loans. Acquired loans and covered loans are excluded from this summary, as Trustmark did not underwrite those loans at inception. Discussion of Trustmark's acquired loans,

including covered loans, is contained elsewhere in this report.

As a general matter, extending credit to businesses and consumers exposes Trustmark to credit risk, which is the risk that the principal balance and any related interest may not be collected according to the original terms due to the inability or unwillingness of the borrower to repay the loan. Trustmark mitigates credit risk through a set of internal controls, which includes adherence to conservative lending practices and underwriting guidelines, collateral monitoring, and oversight of its borrower's financial performance and collateral. The risks inherent in specific subsets of lending are discussed below.

LHFI Secured by Construction, Land Development, and Other Land – Construction and land development loans include loans for both commercial and residential properties to builders/developers and to consumers. This category also includes loans secured by vacant land, except land known to be used or usable for agricultural purposes, such as crop and livestock production. Repayment is normally derived from the sale of the underlying property or from permanent financing, which refinances Trustmark's initial loan. Trustmark's

engagement in this type of lending is generally extended to those builders and developers exhibiting the highest credit quality with significant equity invested in the project and is primarily restricted to projects within its geographic markets. The underwriting process for these loans includes analysis of the financial position and strength of both the borrower and guarantor, experience with similar projects in the past, market demand and prospects for successful completion of the proposed project within the established budget and schedule, values of underlying collateral and availability of permanent financing. Risk within this portfolio is mitigated through adherence to policies and lending limits, periodic target credit reviews of the different segments of this portfolio, inspection of projects throughout the life of the loan and routine monitoring of financial information and collateral values as they are updated.

Inherent in real estate construction lending is the risk that the full value of the collateral does not exist at the time the loan is granted. Construction lending also inherently includes the risk associated with a borrower's ability to successfully complete a proposed project on time and within budget. Further, adverse changes in the market occurring between the start of construction and completion of the projects can result in slower sales or rental rates and lower sales prices than originally anticipated which could impact the underlying real estate collateral values and timely and full repayment of these loans. Rising interest rates can adversely affect the cost of construction and the financial viability of real estate projects. Higher interest rates may also result in higher capitalization rates, thereby reducing a property's value. As a result of this risk profile, LHFI secured by construction, land development and other land are considered to be higher risks than other real estate loans.

LHFI and LHFS Secured by Residential Properties – Residential real estate loans consist of first and junior liens on residential properties that are extended in the geographic markets in which Trustmark operates as well as mortgage products, originated and purchased, that are underwritten to secondary market standards. Credit underwriting standards include evaluation of the borrower's credit history and repayment capacity, including verification of income and valuation of collateral. Portfolio performance is continuously evaluated through updated credit bureau scores and monitoring of repayment performance.

Credit performance of consumer residential real estate loans is highly dependent on housing values and household income which, in turn are highly dependent on national, regional and local economic factors. Rising interest rates, rising unemployment rates and other adverse changes in these economies may have a negative effect on the ability of Trustmark's borrowers to repay these loans and negatively affect value of the underlying residential real estate collateral.

LHFI Secured by Nonfarm, Nonresidential Properties – Trustmark provides financing for both owner-occupied commercial real estate as well as income-producing commercial real estate. Trustmark seeks to maintain a balance of owner-occupied and income-producing real estate loans that moderates its risk to the specific risks of each type of loan. Commercial real estate term loans are typically collateralized by liens on real property. Both types of commercial real estate loans are underwritten to lending policies that include maximum loan-to-value ratios, minimum equity requirements, acceptable amortization periods and minimum debt service coverage requirements, based on property type. Income-producing commercial real estate loans also generally require substantial equity and are subject to exposure limits for a single project. All exceptions to established guidelines are subject to stringent internal review and require specific approval. As with commercial loans, the borrower's financial strength and capacity to repay their obligations remain the primary focus of underwriting. Financial strength is evaluated based upon analytical tools that consider historical and projected cash flows and performance in addition to analysis of the proposed project for income-producing properties. Additional support offered by guarantors is also considered.

Risk for owner-occupied commercial real estate is driven by the creditworthiness of the underlying borrowers, particularly cash flow from the borrowers' business operations as well as the risk of a shortfall in collateral. Credit performance of loans secured by commercial income-producing real estate can be negatively affected by national, regional and local economic conditions, which may result in deteriorating tenant credit profiles, tenant losses, reduced rental/lease rates and higher than anticipated vacancy rates, all contributing to declines in value or liquidity of the underlying real estate collateral. Other factors, such as increasing interest rates, may result in higher capitalization

rates, thereby reducing a property's value.

Commercial and Industrial LHFI – Commercial loans (other than commercial loans related to real estate assets, which are summarized above) are made to many types of businesses for various purposes, such as short-term working capital loans that are usually secured by accounts receivable and inventory, equipment and fixed asset purchases that are secured by those assets and term financing for those within Trustmark's geographic markets. Trustmark's credit underwriting process for commercial loans includes analysis of historical and projected cash flows and performance, evaluation of financial strength of both borrowers and guarantors as reflected in current and detailed financial information and evaluation of underlying collateral to support the credit. Credit risk within the commercial loan portfolio is managed through adherence to specific commercial lending policies and internally established lending authorities, diversification within the portfolio and monitoring of the portfolio on a continuing basis.

Credit risk in commercial and industrial loans can arise due to fluctuations in borrowers' financial condition, deterioration in collateral values and changes in market conditions. The credit risk inherent in these loans depends on, to a significant degree, the general economic conditions of these areas. Further, credit risk can increase if Trustmark's loans are concentrated to borrowers engaged in the

same or similar activities, or to groups of borrowers who may be uniquely or disproportionately affected by market or economic conditions.

Consumer LHFI – Consumer credit includes loans to individuals for household and personal items, automobile purchases, unsecured loans, personal lines of credit and credit cards. All consumer loans are subject to a standardized underwriting process through Trustmark’s consumer loan center, which uses a custom credit scoring model with emphasis placed upon the borrower’s credit evaluation and historical performance, income evaluation and valuation of collateral (where applicable). Updated credit bureau scores are obtained on all existing consumer loans/lines on a periodic basis in order to monitor portfolio credit quality changes and mitigate risk.

Similar to residential real estate loan portfolios, an inherent risk factor in consumer loans is that they are dependent on national, regional and local economic factors that affect employment in the markets where these loans are originated. Generally, consumer loan portfolios consist of a large number of relatively small-balance loans, some of which are originated as unsecured credit (credit cards and some personal lines of credit), and as such, do not have collateral as a secondary source of repayment. Consumer loans generally pose heightened risks of collectability and loss when compared to other loan types.

Other LHFI – Other loans primarily consist of loans to non-depository financial institutions, such as mortgage companies, finance companies and other financial intermediaries, loans to state and political subdivisions, and loans to non-profit and charitable organizations. These loans are underwritten based on the specific nature or purpose of the loan and underlying collateral with special consideration given to the specific source of repayment for the loan.

Similar to commercial and industrial loans, inherent risk in other loans can arise due to fluctuations in borrowers’ financial condition, deterioration in collateral values and changes in market and economic conditions. Loans to state and political subdivisions have the added inherent risk of being somewhat dependent on the ability and capacity of those entities to generate tax and other revenue to repay the loans. Loans to non-profit and charitable organizations are dependent on those organizations’ ability to generate revenue through their fundraising efforts and other forms of financial support, which can be susceptible to economic downturns.

Recent Economic and Industry Developments

The economy continued to show moderate signs of improvement in 2017; however, economic concerns remain as a result of the cumulative weight of volatility in crude oil prices and uncertain growth prospects in Russia and other emerging markets, combined with uncertainty regarding the impact of further tightening of the monetary policy by the Board of Governors of the Federal Reserve System (FRB), the consequences of the decision of the United Kingdom to exit the European Union, and the potential impact on the economy of the current presidential administration’s policies. Doubts surrounding the near-term direction of global markets, and the potential impact of these trends on the United States economy, are expected to persist for the near term. While Trustmark’s customer base is wholly domestic, international economic conditions affect domestic conditions, and thus may have an impact upon Trustmark’s financial condition or results of operations.

In the January 2018 “Summary of Commentary on Current Economic Conditions by Federal Reserve Districts,” the twelve Federal Reserve Districts’ reports suggested national economic activity continued to expand at a modest to moderate pace during the reporting period. Reports by the twelve Federal Reserve Districts noted modest growth in manufacturing activity, retail sales expanded, residential real estate activity remained constrained with most districts reporting little growth in home sales due to limited housing inventory, commercial construction continued to experience slight growth, loan demand was generally stable and growth in the energy sector increased slightly. Reports by the three Federal Reserve Districts covering the southeast United States, which include Trustmark’s five key market regions, suggested that economic activity increased at a modest pace, with most businesses reporting positive outlooks for the near term. The Federal Reserve’s Sixth District, Atlanta (which includes Trustmark’s Alabama, Florida and Mississippi market regions), reported that economic activity expanded at a modest

pace with optimistic outlooks for steady growth in the near-term, labor markets remained tight and wage growth was stable, holiday retail sales exceeded expectations and increased demand in commercial construction. The Federal Reserve's Sixth District also reported that residential real estate activity increased modestly and commercial real estate demand continued to improve, but cautioned that the rate of improvement varied by metropolitan area, submarket, and property type. The Federal Reserve's Sixth District noted increased business activity in manufacturing and that credit remained readily available for qualified borrowers. The Federal Reserve's Eighth District, St. Louis (which includes Trustmark's Tennessee market region), reported that economic conditions improved at a modest pace, labor markets remained tight with moderate growth in wages, improvements in consumer spending, modest improvements in residential real estate conditions, slight improvements in commercial construction and continued growth in the banking sectors. The Federal Reserve's Eighth District also reported that loan growth, which had slowed gradually since the start of 2017, levelled off at year-end and noted that lending activity improved moderately with positive loan growth across all categories other than open-ended home equity loans. The Federal Reserve's Eleventh District, Dallas (which includes Trustmark's Texas market region), reported economic activity expanded at a robust pace at year-end and accelerated growth across the manufacturing, retail, nonfinancial services and energy sectors. The Federal Reserve's Eleventh District also reported increased demand for loans, loan pricing and a tightening in credit standards and terms and

noted that overall loan volumes increased at a faster pace. The Federal Reserve's Eleventh District also noted that home sales were returning to a normal pace after Hurricane Harvey. The Federal Reserve's Eleventh District also reported drilling activity increased, well completions continued to grow, demand for oil field services remained steady and outlooks for 2018 improved.

During June 2017, the FRB increased the target range for the federal funds rate for the third consecutive quarter. In December 2017, the FRB further increased rates and commenced reducing the size of its balance sheet. In December 2017, the FRB predicted an additional three interest rate hikes in 2018. It is not possible to predict the impact, if any, on market interest rates of efforts by the FRB to reduce the size of its balance sheet. The extended period of low interest rates continues to place pressure on net interest margins for Trustmark (as well as its competitors); however, interest rates have increased during 2017 and the FRB has indicated that it intends to continue to raise rates in 2018. Any increases in interest rates will place competitive pressures on the deposit cost of funds. It is not possible to predict the pace and magnitude of rising interest rates, or the impact rising rates will have on Trustmark's results of operations.

For additional discussion of the impact of the current economic environment on the financial condition and results of operations of Trustmark and its subsidiaries, see Part II. Item 7. – Management's Discussion and Analysis of Financial Condition and Results of Operations of this report.

Competition

There is significant competition within the banking and financial services industry in the markets in which Trustmark operates. Changes in regulation, technology and product delivery systems have resulted in an increasingly competitive environment. Trustmark expects to continue to face increasing competition from online and traditional financial institutions seeking to attract customers by providing access to similar services and products.

Trustmark and its subsidiaries compete with national and state chartered banking institutions of comparable or larger size and resources and with smaller community banking organizations. Trustmark has numerous local, regional and national nonbank competitors, including savings and loan associations, credit unions, mortgage companies, insurance companies, finance companies, financial service operations of major retailers, investment brokerage and financial advisory firms and mutual fund companies. Because nonbank financial institutions are not subject to the same regulatory restrictions as banks and bank holding companies, they can often operate with greater flexibility and lower cost structures. Currently, Trustmark does not face meaningful competition from international banks in its markets, although that could change in the future.

At June 30, 2017, Trustmark's deposit market share ranked within the top three positions in 58% of the 55 counties served and within the top five positions in 73% of the counties served. The table below presents FDIC deposit data regarding TNB's deposit market share by state as of June 30, 2017. The FDIC deposit market share data presented below does not align with Trustmark's reported geographic market regions, which in some instances cross state lines, and Trustmark's geographic coverage within certain states presented below is not statewide (see the sections captioned "Description of Business" and "Geographic Information" above).

State	Deposit Market Share
Alabama	1.59%
Florida	0.13%
Mississippi	13.43%
Tennessee	0.36%
Texas	0.06%

Services provided by the Wealth Management Division face competition from many national, regional and local financial institutions. Companies that offer broad services similar to those provided by Trustmark, such as other banks, trust companies and full service brokerage firms, as well as companies that specialize in particular services offered by Trustmark, such as investment advisors and mutual fund providers, all compete with Trustmark's Wealth Management Division.

Trustmark's insurance subsidiary faces competition from local, regional and national insurance companies, independent insurance agencies as well as from other financial institutions offering insurance products.

Trustmark's ability to compete effectively is a result of providing customers with desired products and services in a convenient and cost effective manner. Customers for commercial, consumer and mortgage banking as well as wealth management and insurance services are influenced by convenience, quality of service, personal contacts, availability of products and services and competitive pricing. Trustmark continually reviews its products, locations, alternative delivery channels, and pricing strategies to maintain and enhance its competitive position. While Trustmark's position varies by market, Management believes it can compete effectively as a result of the quality of Trustmark's products and services, local market knowledge and awareness of customer needs.

Supervision and Regulation

The following discussion sets forth material elements of the regulatory framework applicable to bank holding companies and their subsidiaries and provides specific information relevant to Trustmark. The discussion is a summary of detailed statutes, regulations and policies. The descriptions are not intended to be complete summaries of the statutes, regulations and policies referenced therein. Such statutes, regulations and policies are continually under the review of the United States Congress and state legislatures as well as federal and state regulatory agencies. A change in statutes, regulations or policies could have a material impact on the business of Trustmark and its subsidiaries.

Regulation of Trustmark

Trustmark is a registered bank holding company under the Bank Holding Company Act of 1956 (BHC Act). Trustmark and its nonbank subsidiaries are therefore subject to the supervision, examination, enforcement and reporting requirements of the BHC Act, the Federal Deposit Insurance Act (FDI Act), the regulations of the FRB and certain of the requirements imposed by the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act).

Federal Oversight Over Mergers and Acquisitions, Investments and Branching

The BHC Act requires every bank holding company to obtain the prior approval of the FRB before: (i) it may acquire direct or indirect ownership or control of any voting shares of any bank if, after such acquisition, the bank holding company will directly or indirectly own or control 5.0% or more of the voting shares of the bank; (ii) it or any of its subsidiaries, other than a bank, may acquire all or substantially all of the assets of any bank; or (iii) it may merge or consolidate with any other bank holding company. The BHC Act further provides that the FRB may not approve any such transaction that would result in a monopoly or would be in furtherance of any combination or conspiracy to monopolize or attempt to monopolize the business of banking in any section of the United States, or the effect of which may be substantially to lessen competition or to tend to create a monopoly in any section of the country, or that in any other manner would be in restraint of trade, unless the anticompetitive effects of the proposed transaction are clearly outweighed by the public interest in meeting the convenience and needs of the community to be served. The FRB is also required to consider the financial and managerial resources and future prospects of the bank holding companies and banks concerned and the convenience and needs of the community to be served. The FRB is also required to take into account in evaluating such a transaction the effectiveness of the parties in combatting money laundering activities. Consideration of financial resources generally focuses on capital adequacy, and consideration of convenience and needs issues includes the parties' performance under the Community Reinvestment Act of 1977 (CRA). Provisions of the FDI Act known as the Bank Merger Act impose similar approval standards for an insured depository institution to merge with another insured depository institution.

The BHC Act also generally requires FRB approval for a bank holding company's acquisition of a company that is not an insured depository institution. Bank holding companies generally may engage, directly or indirectly, only in banking and such other activities as are determined by the FRB to be closely related to banking. The FRB must generally consider whether performance of the activity by a bank holding company can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices. The FRB has express statutory authority to also consider the "risk to the stability of the United States banking or financial system" when reviewing the acquisition of such a company by a bank holding company.

The BHC Act, as amended by the interstate banking provisions of the Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994 (Riegle-Neal Act), permits Trustmark to acquire a bank located in any other state, regardless of state law to the contrary, subject to certain deposit-percentage, aging requirements, and other restrictions. The

Riegle-Neal Act also generally permits national and state-chartered banks to branch interstate through acquisitions of banks in other states. Bank holding companies must be well-capitalized and well-managed to obtain federal bank regulatory approval of an interstate acquisition without regard to state law prohibiting the transaction.

Under provisions of the BHC Act referred to as the “Volcker Rule,” limitations are placed on the ability of insured depository institutions, insured depository institution holding companies and their affiliates (“Banking Entities”) to acquire or retain ownership interests in, or act as sponsor to, certain investment funds, including hedge funds and private equity funds. The Volcker Rule also places restrictions on proprietary trading by a Banking Entity.

The Office of the Comptroller of the Currency (OCC) has the authority to approve applications by national banks to establish de novo branches, including, under the Riegle-Neal Act, in states other than the bank’s home state if the law of the State in which the branch is located, or is to be located, would permit establishment of the branch if the bank were a State bank chartered by such State.

Certain acquisitions of Trustmark's voting stock may be subject to regulatory approval or notice under federal law. Investors are responsible for ensuring that they do not, directly or indirectly, acquire shares of Trustmark's stock in excess of the amount that can be acquired without regulatory approval under the Change in Bank Control Act and the BHC Act, which prohibit any person or company from acquiring control of Trustmark without, in most cases, the prior written approval of the FRB.

Source of Strength

Under the FDI Act, Trustmark is expected to act as a source of financial and managerial strength to TNB. Under this policy, a bank holding company is expected to commit resources to support its bank subsidiary, including at times when the holding company may not be inclined or in a financial position to provide it.

Capital Adequacy

Bank holding companies and banks are subject to various regulatory capital requirements administered by state and federal bank regulatory agencies. Capital adequacy regulations and, additionally for banks, prompt corrective action regulations, involve quantitative measures of assets, liabilities, and certain off-balance sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weighting and other factors. United States capital regulations were substantially revised in 2013 as a result of changes in the Dodd-Frank Act and the Basel Committee on Banking Supervision's December 2010 final capital framework, referred to as "Basel III." The FRB and the OCC, the primary regulators of Trustmark and TNB, respectively, have substantially similar risk-based capital ratio and leverage ratio requirements.

Under capital requirements applicable to Trustmark and TNB as of January 1, 2015, Trustmark and TNB are required to meet a common equity Tier 1 capital to risk-weighted assets ratio of 7.0% (a minimum of 4.5% plus a capital conservation buffer of 2.5%, which will be fully phased in by January 1, 2019), a Tier 1 capital to risk-weighted assets ratio of 8.5% (a minimum of 6.0% plus a phased-in capital conservation buffer of 2.5%), a total capital to risk-weighted assets ratio of 10.5% (a minimum of 8% plus a phased-in capital conservation buffer of 2.5%), and a leverage ratio of Tier 1 capital to total consolidated assets of 4.0%. In addition, for an insured depository institution to be "well-capitalized" under the banking agencies' prompt corrective action framework, it must have a common equity Tier 1 capital ratio of 6.5%, Tier 1 capital ratio of 8.0%, a total capital ratio of 10.0%, and a leverage ratio of 5.0%, and must not be subject to any written agreement, order or capital directive, or prompt corrective action directive issued by its primary federal regulator to meet and maintain a specific capital level for any capital measure.

For purposes of calculating the denominator of the risk-based capital ratios, a banking institution's assets and some of its specified off-balance sheet commitments and obligations are assigned to various risk categories. For purposes of calculating the numerator of the capital ratios, capital, at both the holding company and bank level, is classified in one of three tiers depending on the "quality" and loss-absorbing features of the capital instrument. Common equity Tier 1 capital is predominantly comprised of common stock instruments (including related surplus) and retained earnings, net of treasury stock, and after making necessary capital deductions and adjustments. Tier 1 capital is comprised of common equity Tier 1 capital and additional Tier 1 capital, which includes non-cumulative perpetual preferred stock and similar instruments meeting specified eligibility criteria (including related surplus) and "TARP" preferred stock and other instruments issued under the Emergency Economic Stabilization Act of 2008. Newly issued trust preferred securities and cumulative perpetual preferred stock may not be included in Tier 1 capital. However, smaller depository institution holding companies (those with assets less than \$15 billion as of year-end 2009) and most mutual holding companies are allowed to continue to count as Tier 1 capital most outstanding trust preferred securities and other non-qualifying securities that were issued prior to May 19, 2010 (up to a limit of 25% of Tier 1 capital, excluding non-qualifying capital instruments) rather than phasing such securities out of regulatory capital. Trustmark currently has outstanding trust preferred securities that is permitted to continue to count as Tier 1 capital up to the regulatory limit. Total capital is comprised of Tier 1 capital and Tier 2 capital, which includes certain subordinated debt with a minimum original maturity of five years (including related surplus) and a limited amount of allowance for

loan losses. Newly issued trust preferred securities and cumulative perpetual preferred stock generally may be included in Tier 2 capital, provided they do not include features that are disallowed by the capital rules, such as the acceleration of principal other than in the event of a bankruptcy, insolvency, or receivership of the issuer.

Failure to meet minimum capital requirements could subject a bank to a variety of enforcement remedies. The FDI Act identifies five capital categories for insured depository institutions: well-capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized. An insured depository institution is subject to differential regulation corresponding to the capital category within which the institution falls. The FDI Act requires banking regulators to take prompt corrective action whenever financial institutions do not meet minimum capital requirements. Failure to meet the capital guidelines could also subject an insured depository institution to capital raising requirements. In addition, an insured depository institution is generally prohibited from making capital distributions, including paying dividends, or paying management fees to a holding company, if the institution would thereafter be undercapitalized. In addition, the FDI Act requires the various regulatory agencies to prescribe certain noncapital

standards for safety and soundness relating generally to operations and management, asset quality and executive compensation, and permits regulatory action against an insured depository institution that does not meet such standards.

An institution's failure to exceed the capital conservation buffer with common equity Tier 1 capital would result in limitations on an institution's ability to make capital distributions and discretionary bonus payments. The capital conservation buffer is being phased in until January 1, 2019.

At December 31, 2017, Trustmark exceeded its minimum capital requirements with common equity Tier 1 capital, Tier 1 capital and total capital equal to 11.77%, 12.33% and 13.10% of its total risk-weighted assets, respectively. At December 31, 2017, TNB also exceeded these requirements with common equity Tier 1 capital, Tier 1 capital and total capital equal to 12.16%, 12.16% and 12.93% of its total risk-weighted assets, respectively. At December 31, 2017, the leverage ratios for Trustmark and TNB were 9.67% and 9.54%, respectively. As of December 31, 2017, the most recent notification from the OCC categorized TNB as well-capitalized based on the ratios and guidelines described above.

Stress Testing

Bank holding companies and national banks with average total consolidated assets between \$10 billion and \$50 billion must conduct annual company-run stress tests using data as of December 31 of each year under one baseline and at least two stress scenarios as provided by the FRB and the OCC, respectively. Stress test results must be provided to the FRB and OCC by July 31 of the following year. Trustmark has been subject to annual company-run stress test requirements since September 2014.

Trustmark anticipates that capital ratios, as reflected in the stress test calculations under the required stress test scenarios, will be an important factor considered by the agencies in evaluating the capital adequacy of Trustmark and TNB and whether proposed payments of dividends or stock repurchases are consistent with prudential expectations.

Payment of Dividends and Stock Repurchases

Trustmark is limited in its ability to pay dividends or repurchase its stock by the FRB, including if doing so would be an unsafe or unsound banking practice. Where a bank holding company intends to declare or pay a dividend that could raise safety and soundness concerns, it generally will be required to inform and consult with the FRB in advance. It is the policy of the FRB that a bank holding company should generally pay dividends on common stock only out of earnings, and only if prospective earnings retention is consistent with the company's capital needs and overall current and prospective financial condition.

According to guidance from the FRB, a bank holding company's dividend policies will be assessed against, among other things, its ability to achieve applicable capital ratio requirements. If a bank holding company does not achieve applicable capital ratio requirements, it may not be able to pay dividends. Although Trustmark currently meets applicable capital ratio requirements, inclusive of the phased-in capital conservation buffer, Trustmark cannot be sure that it will continue to meet those requirements or that even if it does, it will be able to pay dividends.

Trustmark also is required to obtain the approval of the FRB in advance of redeeming or repurchasing its stock. In evaluating the appropriateness of a proposed redemption or repurchase of stock, the FRB will consider, among other things, the potential loss that a bank holding company may suffer from the prospective need to increase reserves and write down assets as a result of continued asset deterioration, and its ability to raise additional common equity and other capital to replace the stock that will be redeemed or repurchased. The FRB also will consider the potential negative effects on the bank holding company's capital structure of replacing common stock with any lower-tier form of regulatory capital issued.

Anti-Money Laundering Initiatives and Sanctions Compliance

Trustmark and TNB are subject to extensive regulations aimed at combatting money laundering and terrorist financing. The USA Patriot Act of 2001 (USA Patriot Act) substantially broadened the scope of United States anti-money laundering laws and regulations by imposing significant compliance and due diligence obligations, creating new crimes and penalties and expanding the extra-territorial jurisdiction of the United States. United States Department of the Treasury regulations implementing the USA Patriot Act impose obligations on financial institutions to maintain appropriate policies, procedures and controls to detect, prevent and report money laundering and terrorist financing and to verify the identity of their customers. Failure of a financial institution to maintain and implement adequate programs to combat money laundering and terrorist financing, or to comply with all of the relevant laws or regulations, could have serious legal and financial consequences for the institution.

The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is responsible for helping to insure that U.S. entities do not engage in transactions with certain prohibited parties, as defined by various Executive Orders and Acts of Congress. OFAC publishes lists of persons, organizations, and countries suspected of aiding, harboring or engaging in terrorist acts, known as Specially

Designated Nationals and Blocked Persons. OFAC administers and enforces applicable economic and trade sanctions programs. These sanctions are usually targeted against foreign countries, terrorists, international narcotics traffickers and those believed to be involved in the proliferation of weapons of mass destruction. These regulations generally require either the blocking of accounts or other property of specified entities or individuals, but they may also require the rejection of certain transactions involving specified entities or individuals. Trustmark maintains policies, procedures and other internal controls designed to comply with these sanctions programs.

Other Federal Regulation of Trustmark

In addition to being regulated as a bank holding company, Trustmark is subject to regulation by the State of Mississippi under its general business corporation laws. Trustmark is also subject to the disclosure and other regulatory requirements of the Securities Act of 1933 and the Securities Exchange Act of 1934, as administered by the SEC.

Regulation of TNB

TNB is a national bank and, as such, is subject to extensive regulation by the OCC and, to a lesser extent, by the FDIC. In addition, as a large provider of consumer financial services, TNB is subject to regulation, supervision, enforcement and examination by the Consumer Financial Protection Bureau (CFPB). Almost every area of the operations and financial condition of TNB is subject to extensive regulation and supervision and to various requirements and restrictions under federal and state law including loans, reserves, investments, issuance of securities, establishment of branches, capital adequacy, liquidity, earnings, dividends, management practices and the provision of services. TNB is subject to supervision, examination, enforcement and reporting requirements under the National Bank Act, the Federal Reserve Act, the FDI Act, regulations of the OCC and certain of the requirements imposed by the Dodd-Frank Act. Trustmark and TNB are also subject to a wide range of consumer protection laws and regulations.

Restrictions on Lending, Insider Transactions and Affiliate Transactions

National banks are limited in the amounts they may lend to one borrower and the amount they may lend to insiders. These single counterparty and insider lending limits extend to loans, derivative transactions, repurchase agreements, reverse repurchase agreements and securities lending or borrowing transactions. In addition, the FDI Act imposes restrictions on insured depository institutions' purchases of assets from insiders.

Sections 23A and 23B of the Federal Reserve Act establish parameters for an insured bank to conduct "covered transactions" with its affiliates, generally (i) limiting the extent to which the bank or its subsidiaries may engage in "covered transactions" with any one affiliate to an amount equal to 10 percent of the bank's capital stock and surplus, and limiting the aggregate of all such transactions with all affiliates to an amount equal to 20 percent of the bank's capital stock and surplus, and (ii) requiring that all such transactions be on terms substantially the same, or at least as favorable, to the bank or subsidiary as those that would be provided to a non-affiliate. In addition, an insured bank's loans to affiliates must be fully collateralized. The term "covered transaction" includes the making of loans to the affiliate, purchase of assets from the affiliate, issuance of a guarantee on behalf of the affiliate and several other types of transactions.

Payment of Dividends

The principal source of Trustmark's cash revenue is dividends from TNB. There are various legal and regulatory provisions that limit the amount of dividends TNB can pay to Trustmark without regulatory approval. Under the National Bank Act, approval of the OCC is required if the total of all dividends declared in any calendar year exceeds the total of TNB's net income for that year combined with its retained net income from the preceding two years. Also under the National Bank Act, TNB may not pay any dividends in excess of undivided profits (retained earnings). In

addition, subsidiary banks of a bank holding company are subject to certain restrictions imposed by the Federal Reserve Act on extensions of credit to the bank holding company or any of its subsidiaries. Further, subsidiary banks of a bank holding company are prohibited from engaging in certain tie-in arrangements in connection with any extension of credit, lease or sale of property or furnishing of any services to the bank holding company. Moreover, an institution's failure to exceed the capital conservation buffer set forth in the capital rules with common equity Tier 1 capital would result in limitations on an institution's ability to make capital distributions and discretionary bonus payments.

CFPB

The Dodd-Frank Act established the CFPB within the Federal Reserve System as an independent bureau with responsibility for consumer financial protection. The CFPB is responsible for issuing rules, orders and guidance implementing federal consumer financial laws. The CFPB has primary enforcement authority over "very large" insured depository institutions or insured credit unions and their affiliates. An insured depository institution is deemed "very large" if it reports assets of more than \$10 billion in its quarterly Call Report for four consecutive quarters. The CFPB has near exclusive supervision authority, including examination authority, over

these “very large” institutions and their affiliates to assess compliance with federal consumer financial laws, to obtain information about the institutions’ activities and compliance systems and procedures, and to detect and assess risks to consumers and markets. The CFPB has broad authority to prevent “unfair, deceptive or abusive acts or practices” and ensure consistent enforcement of laws so that all consumers have access to markets for consumer financial products and services that are fair, transparent and competitive. The CFPB has rulemaking and interpretive authority under the Dodd-Frank Act and other federal consumer financial services laws, as well as broad supervisory, examination and enforcement authority over large providers of consumer financial products and services, such as TNB. TNB’s total assets exceeded \$10 billion at December 31, 2017 and 2016, and therefore, TNB is subject to CFPB supervision.

In October 2017, the CFPB issued a final rule generally requiring lenders that make certain covered short-term loans, longer-term balloon-payment loans, or longer-term loans with certain costs and features, to reasonably determine that a borrower of a covered loan has the ability to repay such a loan, make certain disclosures to the borrower before attempting to withdraw payment from the borrower’s account, forego from making three consecutive attempts to withdraw payments and report covered loans to registered information systems. Most of the requirements of the final rule will take effect in the third quarter of 2019. Based on TNB’s current credit portfolio, any covered loans made by TNB are considered exempt “accommodation loans” under the CFPB’s final rule, and accordingly, Trustmark does not expect that the final rule will have a material impact on its operations.

Other Federal and State Laws

Banking organizations are subject to numerous laws and regulations intended to protect consumers in addition to those discussed above. These laws include, among others: the Truth in Lending Act (TILA); Truth in Savings Act; Electronic Funds Transfer Act (EFTA); Expedited Funds Availability Act; Equal Credit Opportunity Act; Fair and Accurate Credit Transactions Act; Fair Housing Act; Fair Credit Reporting Act; Fair Debt Collection Act; Gramm-Leach-Bliley Act; Home Mortgage Disclosure Act; Right to Financial Privacy Act; Real Estate Settlement Procedures Act; laws regarding unfair and deceptive acts and practices; and usury laws.

Many states and local jurisdictions have consumer protection laws analogous, and in addition to, those listed above. While TNB’s activities are governed primarily by federal law, the Dodd-Frank Act potentially narrowed National Bank Act preemption of state consumer financial laws, thereby making TNB and other national banks potentially subject to increased state regulation. The Dodd-Frank Act also codified the Supreme Court’s decision in *Cuomo v. Clearing House Association*. As a result, State Attorneys General may enforce in a court action “an applicable law” against federally-chartered depository institutions like TNB. In addition, under the Dodd-Frank Act, State Attorneys General are authorized to bring civil actions against federally-chartered institutions, like TNB, to enforce regulations prescribed by the CFPB or to secure other remedies.

Finally, the Dodd-Frank Act potentially expanded state regulation over banks by eliminating National Bank Act preemption for national bank operating subsidiaries, including operating subsidiaries of TNB.

Mortgage Regulation

The Dodd-Frank Act imposed new standards for mortgage loan originations on lenders. The statute amended TILA to restrict the payment of fees to real-estate mortgage originators. Furthermore, the statute amended TILA to impose minimum underwriting standards on real-estate mortgage creditors (including nonbanks as well as bank creditors) and verifications to check borrowers’ income and their ability to repay.

Financial Privacy Laws

The Gramm-Leach-Bliley Financial Services Modernization Act of 1999 (GLB Act) imposed requirements related to the privacy of customer financial information. In accordance with the GLB Act, federal bank regulators adopted rules that limit the ability of banks and other financial institutions to disclose nonpublic information about consumers to

nonaffiliated third parties. The GLB Act also requires disclosure of privacy policies to consumers and, in some circumstances, allows consumers to prevent disclosure of certain personal information to a nonaffiliated third party. The privacy provisions of the GLB Act affect how consumer information is transmitted through diversified financial companies and conveyed to outside vendors. Trustmark recognizes the need to comply with legal and regulatory requirements that affect its customers' privacy.

Debit Interchange Regulation

The FRB has issued rules under the EFTA, as amended by the Dodd-Frank Act, to limit interchange fees that an issuer may receive or charge for an electronic debit card transaction. Under the FRB's rules, the maximum permissible interchange fee that an issuer may receive for an electronic debit transaction is the sum of 21 cents per transaction and five basis points multiplied by the value of the transaction. In addition, the FRB's rules allow for an upward adjustment of no more than one cent to an issuer's debit card interchange fee if the issuer develops and implements policies and procedures reasonably designed to achieve the fraud-prevention standards set out in the rule.

Issuers that, together with their affiliates, have assets of less than \$10.0 billion on the annual measurement date (December 31) are exempt from the debit card interchange fee standards. At the December 31, 2013 annual measurement date, Trustmark had assets greater than \$10.0 billion; and, therefore, was required to comply with the debit card interchange fee standards by July 1, 2014.

FDIC Deposit Insurance Assessments

The deposits of TNB are insured by the Deposit Insurance Fund (DIF), as administered by the FDIC, and, accordingly, are subject to deposit insurance assessments to maintain the DIF at minimum levels required by statute. The Dodd-Frank Act increased the minimum reserve ratio requirement for the DIF to 1.35 percent of total estimated insured deposits or the comparable percentage of the deposit assessment base.

The FDIC uses a risk based assessment system that imposes insurance premiums as determined by multiplying an insured bank's assessment base by its assessment rate. The Dodd-Frank Act revised the deposit insurance assessment base to be equal to a bank's total assets minus the sum of (1) its average tangible equity during the assessment period, and (2) any additional amount the FDIC determines is warranted for custodial and banker's banks.

The FDIC determines a bank's assessment rate within a range of base assessment rates using a risk scorecard that takes into account the bank's financial ratios and supervisory rating (the CAMELS composite rating), among other factors. The CAMELS rating system is a supervisory rating system developed to classify a bank's overall condition by taking into account capital adequacy, assets, management capability, earnings, liquidity and sensitivity to market and interest rate risk.

Under a rule adopted by the FDIC in 2011, the range of base assessment rates for all banks is to decrease in phases as the DIF's reserve ratio grows to 1.15 percent, 2.00 percent and 2.50 percent. The reserve ratio reached 1.17 percent as of June 30, 2016. In March 2016, the Board of Directors of the FDIC approved a final rule to impose a surcharge of 4.5 cents per \$100 of the assessment base, after making certain adjustments, on banks with \$10.0 billion or more in assets, through the quarter that the DIF's reserve ratio reaches the statutorily required minimum level of 1.35 percent, which the FDIC expects will occur after approximately two years of payments of these surcharges. The surcharges became effective and began on July 1, 2016. Following the effectiveness of the decrease in base assessment rates and surcharges on July 1, 2016, the total base assessment rate for an institution with \$10.0 billion or more in assets ranges from a minimum of 1.5 basis points to a maximum of 40.0 basis points, plus applicable surcharges, but this range is subject to change as the DIF's reserve ratio continues to grow.

TNB's FDIC assessment expenses declined during 2017 as the lower regular assessment rates and the allowable adjustments more than offset the surcharge of 4.5 cents per \$100 of assessment base. In 2017, TNB's expenses related to deposit insurance premiums totaled \$10.4 million.

TNB also paid approximately \$660 thousand in Financing Corporation (FICO) assessments related to outstanding FICO bonds for which the FDIC serves as collection agent. The bonds issued by FICO are due to mature from 2018 through 2019. For the quarter ended December 31, 2017, the FICO assessment rate was equal to 0.46 basis points.

The Dodd-Frank Act permanently increased the deposit insurance level to \$250 thousand per depositor for each insured depository institution.

TNB Subsidiaries

TNB's nonbanking subsidiaries are subject to a variety of state and federal laws and regulations. TIA, a registered investment adviser, is subject to regulation by the SEC under the Investment Advisers Act of 1940 and by the State of Mississippi. FBBI is subject to the insurance laws and regulations of the states in which its divisions are active. SCC is subject to the supervision and regulation of the CDFI Fund and the State of Mississippi.

During April 2016, the Department of Labor (DOL) issued a final rule related to fiduciary standards that apply to the provision of advice to clients with respect to the investing of certain of their retirement accounts. The final rule expands the definition of a fiduciary under the Employee Retirement Income Security Act of 1974, as amended. Those who provide investment advice to plans, plan sponsors, fiduciaries, plan participants, beneficiaries and IRAs and IRA owners generally must either avoid payments that create conflicts of interest or satisfy an exemption from these requirements issued by the DOL. Under exemptions adopted with the rule, financial institutions will generally be obligated to acknowledge their status and the status of their individual advisers as “fiduciaries.” Among other obligations, firms and advisers will be required to make prudent investment recommendations that are in their clients’ best interests and charge only reasonable compensation. Additionally, the rule requires certain disclosures to be made to the client, and ongoing compliance must be monitored and documented. On June 9, 2017, following a 60-day extension of the final rule’s applicability date, certain provisions of the final rule became applicable, including provisions that apply to Trustmark. The remaining provisions of the final rule are scheduled to be phased in by July 1, 2019. It is not clear if that applicability date will be further

delayed, and it is also possible that the Securities and Exchange Commission or another governmental entity could impose separate regulations regarding the provision of investment advice with respect to retirement accounts. Management does not expect the final DOL rule to have a significant impact on the results of operations or financial condition of Trustmark or TNB.

The GLB Act authorizes national banks to own or control a “financial subsidiary” that engages in activities that are not permissible for national banks to engage in directly. The GLB Act contains a number of provisions dealing with insurance activities by bank subsidiaries. Generally, the GLB Act affirms the role of the states in regulating insurance activities, including the insurance activities of financial subsidiaries of banks, but the GLB Act also preempts certain state laws. As a result of the GLB Act, TNB elected for predecessor subsidiaries that now constitute FBBI to become financial subsidiaries. This enables FBBI to engage in insurance agency activities at any location.

Available Information

Trustmark’s internet address is www.trustmark.com. Information contained on this website is not a part of this report. Trustmark makes available through this address, free of charge, its Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after such material is electronically filed, or furnished to, the SEC.

Employees

At December 31, 2017, Trustmark employed 2,893 full-time equivalent associates, none of which are represented by a collective bargaining agreement. Trustmark believes its employee relations to be satisfactory.

Executive Officers of the Registrant

The executive officers of Trustmark (the Registrant) and its primary bank subsidiary, TNB, including their ages, positions and principal occupations for the last five years are as follows:

Gerard R. Host, 63

Trustmark Corporation

President and Chief Executive Officer since January 2011

Trustmark National Bank

President and Chief Executive Officer since January 2011

Louis E. Greer, 63

Trustmark Corporation

Treasurer and Principal Financial Officer since January 2007

Trustmark National Bank

Executive Vice President and Chief Financial Officer since February 2007

Granville Tate, Jr., 61

Trustmark Corporation

Secretary since December 2015

Trustmark National Bank

Executive Vice President, Secretary, General Counsel and Chief Risk Officer since June 2016

Executive Vice President, Secretary and General Counsel from December 2015 to June 2016

Brunini, Grantham, Grower & Hewes, PLLC

Partner from January 2010 to December 2015

Board of Directors from January 2010 to November 2015

Chairman of the Board of Directors from January 2010 to May 2015

Monica A. Day, 57

Trustmark National Bank

Executive Vice President and Real Estate Banking Manager since May 2017

Senior Vice President and Corporate Commercial Real Estate Manager from October 2008 to May 2017

Duane A. Dewey, 59

Trustmark National Bank

President – Corporate Banking since September 2011

Robert Barry Harvey, 58

Trustmark National Bank

Executive Vice President and Chief Credit Officer since March 2010

Donald Glynn Ingram, 66

Trustmark National Bank

Executive Vice President and Chief Information Officer since September 2008

James M. Outlaw, Jr., 65

Trustmark National Bank

Executive Vice President and Chief Administrative Officer since August 2014

President and Chief Operating Officer – Texas from August 2006 to August 2014

Thomas C. Owens, 53

Trustmark National Bank

Executive Vice President and Bank Treasurer since September 2013

Webster Financial Corporation – Waterbury, Connecticut

Assistant Treasurer – Asset Liability Management from 2008 to September 2013

W. Arthur Stevens, 53

Trustmark National Bank

President – Retail Banking since September 2011

Breck W. Tyler, 59

Trustmark National Bank

President – Mortgage Services since March 2012

C. Scott Woods, 61

Trustmark National Bank

President – Insurance and Wealth Management since November 2017

President – Insurance Services from March 2012 to November 2017

ITEM 1A. RISK FACTORS

Trustmark and its subsidiaries could be adversely impacted by various risks and uncertainties, which are difficult to predict. As a financial institution, Trustmark has significant exposure to market risks, including interest rate risk, liquidity risk and credit risk. This section includes a description of the risks, uncertainties and assumptions identified by Management that could, individually or in combination, materially affect Trustmark's financial condition and results of operations, as well as the value of Trustmark's financial instruments in general, and Trustmark common stock, in particular. Additional risks and uncertainties that Management currently deems immaterial or is unaware of may also impair Trustmark's financial condition and results of operations. This report is qualified in its entirety by the risk factors that are identified below.

Trustmark's largest source of revenue (net interest income) is subject to interest rate risk.

Trustmark's profitability depends to a large extent on net interest income, which is the difference between income on interest-earning assets, such as loans and investment securities, and expense on interest-bearing liabilities, such as deposits and borrowings. Trustmark is exposed to interest rate risk in its core banking activities of lending and deposit taking, since assets and liabilities reprice at different times and by different amounts as interest rates change. Trustmark is unable to predict changes in market interest rates, which are affected by many factors beyond Trustmark's control, including inflation, recession, unemployment, money supply, domestic and international events and changes in the United States and other financial markets. During June 2017, the FRB increased the target range for the federal funds rate for the third consecutive quarter. In December 2017, the FRB further increased rates and commenced reducing the size of its balance sheet. In December 2017, the FRB also predicted an additional three interest rate hikes in 2018. It is not possible to predict the impact, if any, on market interest rates of efforts by the FRB to reduce the size of its balance sheet.

Financial simulation models are the primary tools used by Trustmark to measure interest rate exposure. Using a wide range of scenarios, Management is provided with extensive information on the potential impact to net interest income caused by changes in interest rates. Models are structured to simulate cash flows and accrual characteristics of Trustmark's balance sheet. Assumptions are made about the direction and volatility of interest rates, the slope of the yield curve and the changing composition of Trustmark's balance sheet, resulting from both strategic plans and customer behavior. In addition, the model incorporates Management's assumptions and expectations regarding such factors as loan and deposit growth, pricing, prepayment speeds and spreads between

interest rates. Trustmark's simulation model using static balances at December 31, 2017, estimated that in the event of a hypothetical 200 basis point increase in interest rates, net interest income may decrease 2.1%, while a hypothetical 100 basis point increase in interest rates, may decrease net interest income 1.0%. In the event of a hypothetical 100 basis point decrease in interest rates using static balances at December 31, 2017, it is estimated net interest income may decrease by 4.2%.

Net interest income is Trustmark's largest revenue source, and it is important to discuss how Trustmark's interest rate risk may be influenced by the various factors shown below:

In general, for a given change in interest rates, the amount of the change in value (positive or negative) is larger for assets and liabilities with longer remaining maturities. The shape of the yield curve may affect new loan yields, funding costs and investment income differently.

The remaining maturity of various assets or liabilities may shorten or lengthen as payment behavior changes in response to changes in interest rates. For example, if interest rates decline sharply, fixed-rate loans may pre-pay, or pay down, faster than anticipated, thus reducing future cash flows and interest income. Conversely, if interest rates increase, depositors may cash in their certificates of deposit prior to term (notwithstanding any applicable early withdrawal penalties) or otherwise reduce their deposits to pursue higher yielding investment alternatives. Repricing frequencies and maturity profiles for assets and liabilities may occur at different times. For example, in a falling rate environment, if assets reprice faster than liabilities, there will be an initial decline in earnings. Moreover, if assets and liabilities reprice at the same time, they may not be by the same increment. For instance, if the federal funds rate increased 50 basis points, rates on demand deposits may rise by 10 basis points, whereas rates on prime-based loans will instantly rise 50 basis points.

Financial instruments do not respond in a parallel fashion to rising or falling interest rates. This causes asymmetry in the magnitude of changes in net interest income, net economic value and investment income resulting from the hypothetical increases and decreases in interest rates. Therefore, Management monitors interest rate risk and adjusts Trustmark's investment, funding and hedging strategies to mitigate adverse effects of interest rate shifts on Trustmark's balance sheet.

Trustmark utilizes derivative contracts to hedge the mortgage servicing rights (MSR) in order to offset changes in fair value resulting from changes in interest rate environments. In spite of Trustmark's due diligence in regard to these hedging strategies, significant risks are involved that, if realized, may prove such strategies to be ineffective, which could adversely affect Trustmark's financial condition or results of operations. Risks associated with these strategies include the risk that counterparties in any such derivative and other hedging transactions may not perform; the risk that these hedging strategies rely on Management's assumptions and projections regarding these assets and general market factors, including prepayment risk, basis risk, market volatility and changes in the shape of the yield curve, and that these assumptions and projections may prove to be incorrect; the risk that these hedging strategies do not adequately mitigate the impact of changes in interest rates, prepayment speeds or other forecasted inputs to the hedging model; and the risk that the models used to forecast the effectiveness of hedging instruments may project expectations that differ from actual results. In addition, increased regulation of the derivative markets may increase the cost to Trustmark to implement and maintain an effective hedging strategy.

Trustmark closely monitors the sensitivity of net interest income and investment income to changes in interest rates and attempts to limit the variability of net interest income as interest rates change. Trustmark makes use of both on- and off-balance sheet financial instruments to mitigate exposure to interest rate risk.

Trustmark's business may be adversely affected by conditions in the financial markets and economic conditions in general.

The economy continued to show moderate signs of improvement in 2017; however, economic concerns remain as a result of the cumulative weight of volatility in crude oil prices and uncertain growth prospects in Russia and other emerging markets, combined with uncertainty regarding the impact of further tightening of the monetary policy by the

FRB, the consequences of the decision of the United Kingdom to exit the European Union, and the potential impact on the economy of the current presidential administration's policies. Doubts surrounding the near-term direction of global markets, and the potential impact of these trends on the United States economy, are expected to persist for the near term. While Trustmark's customer base is wholly domestic, international economic conditions affect domestic conditions, and thus may have an impact upon Trustmark's financial condition or results of operations. While domestic demand for loans has improved, particularly for commercial loans, further meaningful gains will depend on sustained economic growth. Strategic risk, including threats to business models from rising rates and modest economic growth, remains high. Management's ability to plan, prioritize and allocate resources in this new environment will be critical to Trustmark's ability to sustain earnings that will attract capital. Because of the complexities presented by current economic conditions, Management will continue to be challenged in identifying alternative sources of revenue, prudently diversifying assets, liabilities and revenue and effectively managing the costs of compliance.

During June 2017, the FRB increased the target range for the federal funds rate for the third consecutive quarter. In December 2017, the FRB further increased rates and commenced reducing the size of its balance sheet. In December 2017, the FRB predicted an additional three interest rate hikes in 2018. It is not possible to predict the impact, if any, on market interest rates of efforts by the FRB to reduce the size of its balance sheet. The extended period of low interest rates continues to place pressure on net interest margins for Trustmark (as well as its competitors); however, interest rates have increased during 2017 and the FRB has indicated that it intends to continue to raise rates in 2018. Any increases in interest rates will place competitive pressures on the deposit cost of funds. It is not possible to predict the pace and magnitude of rising interest rates, or the impact rising rates will have on Trustmark's results of operations.

Despite recent optimism resulting from stabilization in the housing sector, improvement of unemployment data and credit quality improvement, Trustmark does not assume that current uncertain conditions in the economy will improve significantly in the near future. A further weakened economy could affect Trustmark in a variety of substantial and unpredictable ways. In particular, Trustmark may face the following risks in connection with these events:

- Market developments and the resulting economic pressure on consumers may affect consumer confidence levels and may cause increases in delinquencies and default rates, which, among other effects, could further affect Trustmark's charge-offs and provision for loan losses.

- Loan performance could experience a significantly extended deterioration or loan default levels could accelerate, foreclosure activity could significantly increase, or Trustmark's assets (including loans and investment securities) could materially decline in value, any one of which, or any combination of more than one of which, could have a material adverse effect on Trustmark's financial condition or results of operations.

- Management's ability to measure the fair value of Trustmark's assets could be adversely affected by market disruptions that could make valuation of assets more difficult and subjective. If Management determines that a significant portion of its assets have values that are significantly below their recorded carrying value, Trustmark could recognize a material charge to earnings in the quarter during which such determination was made, Trustmark's capital ratios would be adversely affected by any such charge, and a rating agency might downgrade Trustmark's credit rating or put Trustmark on credit watch.

- The price per barrel of crude oil remained volatile during 2017. As of December 31, 2017, energy-related LHFI represented approximately 2.6% of Trustmark's total LHFI portfolio, and consisted principally of loans within the oilfield services and midstream segments. Additionally, as of December 31, 2017, approximately 9.7% of Trustmark's energy-related LHFI, or 0.3% of Trustmark's total LHFI portfolio, were classified as nonperforming or nonaccrual. Trustmark has no loan exposure where the source of repayment, or the underlying security of such exposure, is tied to the realization of value from energy reserves. Nonetheless, if oil prices remain at current levels or below for an extended period of time, Trustmark could experience weakening or increased losses within its energy-related LHFI portfolio.

It is difficult to predict the extent to which these challenging economic conditions will persist or whether recent progress in the economic recovery will instead shift to the potential for further decline. If the economy does weaken in the future, it is uncertain how Trustmark's business would be affected and whether Trustmark would be able successfully to mitigate any such effects on its business. Accordingly, these factors in the United States (and, indirectly, global) economy could have a material adverse effect on Trustmark's financial condition and results of operations.

Trustmark is subject to lending risk, which could impact the adequacy of the allowance for loan losses and results of operations.

There are inherent risks associated with Trustmark's lending activities. While the housing and real estate markets have shown continued improvement, they remain at depressed levels in certain regions. If trends in the housing and real estate markets were to revert or further decline below recession levels, Trustmark may experience higher than normal delinquencies and credit losses. Moreover, if the United States economy returns to a recessionary state, Management expects that it could severely affect economic conditions in Trustmark's market areas and that Trustmark could

experience significantly higher delinquencies and credit losses. In addition, bank regulatory agencies periodically review Trustmark's allowance for loan losses and may require an increase in the provision for loan losses or the recognition of further charge-offs, based on judgments different from those of Management. As a result, Trustmark may elect, or be required to, to make further increases in its provision for loan losses in the future, particularly if economic conditions deteriorate.

Additionally, Trustmark may rely on information furnished by or on behalf of customers and counterparties in deciding whether to extend credit or enter into other transactions. This information could include financial statements, credit reports, business plans, and other information. Trustmark may also rely on representations of those customers, counterparties, or other third parties, such as independent auditors, as to the accuracy and completeness of that information. Reliance on inaccurate or misleading financial

statements, credit reports, or other information could have a material adverse impact on Trustmark's business, financial condition, and results of operations.

Trustmark is subject to liquidity risk, which could disrupt its ability to meet its financial obligations.

Liquidity refers to Trustmark's ability to ensure that sufficient cash flow and liquid assets are available to satisfy current and future financial obligations, including demand for loans and deposit withdrawals, funding operating costs and other corporate purposes. Liquidity risk arises whenever the maturities of financial instruments included in assets and liabilities differ or when assets cannot be liquidated at fair market value as needed. Trustmark obtains funding through deposits and various short-term and long-term wholesale borrowings, including federal funds purchased and securities sold under agreements to repurchase, the Federal Reserve Discount Window (Discount Window) and Federal Home Loan Bank (FHLB) advances. Any significant restriction or disruption of Trustmark's ability to obtain funding from these or other sources could have a negative effect on Trustmark's ability to satisfy its current and future financial obligations, which could materially affect Trustmark's financial condition or results of operations.

In addition to the risk that one or more of the funding sources may become constrained due to market conditions unrelated to Trustmark, there is the risk that Trustmark's credit profile may decline such that one or more of these funding sources becomes partially or wholly unavailable to Trustmark.

Trustmark attempts to quantify such credit event risk by modeling bank specific and systemic scenarios that estimate the liquidity impact. Trustmark estimates such impact by attempting to measure the effect on available unsecured lines of credit, available capacity from secured borrowing sources and securitizable assets. To mitigate such risk, Trustmark maintains available lines of credit with the Federal Reserve Bank of Atlanta and the FHLB of Dallas that are secured by loans and investment securities. Management continuously monitors Trustmark's liquidity position for compliance with internal policies.

Trustmark is subject to extensive government regulation and supervision and possible enforcement and other legal actions.

Trustmark, primarily through TNB and certain nonbank subsidiaries, is subject to extensive federal and state regulation and supervision, which vests a significant amount of discretion in the various regulatory authorities. Banking regulations are primarily intended to protect depositors' funds, federal deposit insurance funds and the banking system as a whole, not security holders. These regulations and supervisory guidance affect Trustmark's lending practices, capital structure, investment practices, dividend policy and growth, among other things. Congress and federal regulatory agencies continually review banking laws, regulations, and policies for possible changes. Changes to statutes, regulations or regulatory policies or supervisory guidance, including changes in interpretation or implementation of statutes, regulations, policies and supervisory guidance, could affect Trustmark in substantial and unpredictable ways. Such changes could subject Trustmark to additional costs, limit the types of financial services and products Trustmark may offer and/or increase the ability of nonbanks to offer competing financial services and products, among other things. Failure to comply with laws, regulations, policies or supervisory guidance could result in enforcement and other legal actions by Federal or state authorities, including criminal and civil penalties, the loss of FDIC insurance, the revocation of a banking charter, civil money penalties, other sanctions by regulatory agencies and/or reputational damage. In this regard, government authorities, including bank regulatory agencies, continue to pursue enforcement agendas with respect to compliance and other legal matters involving financial activities, which heightens the risks associated with actual and perceived compliance failures. Any of the foregoing could have a material adverse effect on Trustmark's financial condition or results of operations.

Trustmark is subject to stringent capital requirements.

On September 12, 2010, the Group of Governors and Heads of Supervision, the oversight body of the Basel Committee on Banking Supervision, announced agreement on the calibration and phase-in arrangements for a

strengthened set of capital requirements, known as Basel III. The FRB, OCC, and FDIC issued final rules establishing regulatory capital requirements consistent with Basel III and implementing the capital requirements in the Dodd-Frank Act in July 2013. These capital rules require, among other things, a minimum common equity Tier 1 capital ratio of 4.5%, net of regulatory deductions, and establish a capital conservation buffer of an additional 2.5% of common equity to risk-weighted assets above the regulatory minimum capital requirement, effectively establishing a minimum common equity Tier 1 ratio of 7%. In addition, the capital rules increased the minimum Tier 1 capital requirement from 4% to 6% of risk-weighted assets. The capital rules also specify that a banking organization with a capital conservation buffer that does not exceed 2.5% shall face limitations on capital distributions and bonus payments to executives.

The capital rules also include stringent criteria for capital instruments to qualify as Tier 1 or Tier 2 capital. For instance, the rules effectively disallow newly-issued trust preferred securities to be a component of a holding company's Tier 1 capital. Trustmark will continue to count \$60.0 million in outstanding trust preferred securities issued by the Trust as Tier 1 capital up to the regulatory limit, as permitted by a grandfather provision in the capital rules.

Trustmark and TNB were required to comply with the revised capital rules beginning January 1, 2015. Certain of the requirements of the revised capital rules, such as the capital conservation buffer, will be phased in until January 1, 2019. Once the revised capital requirements are fully phased in, Trustmark and TNB will be required to hold a greater amount of capital and a greater amount of common equity than they were previously required to hold. Management does not expect the capital rules to have a significant impact on Trustmark or TNB.

Unfavorable results from ongoing stress test analyses conducted on Trustmark and TNB may adversely affect Trustmark's ability to approve, declare and pay dividends to shareholders or compete for new business opportunities.

The FRB and OCC require Trustmark and TNB to perform periodic stress tests and analysis to evaluate their ability to absorb losses in various economic and financial scenarios. This stress test analysis uses three economic and financial scenarios generated by the FRB and OCC, including baseline, adverse and severely adverse scenarios. Trustmark and TNB are required to make certain assumptions in modeling future performance and must support these assumptions through statistical analysis and observed market behavior where applicable. Results of the stress tests and analysis performed by Trustmark and TNB must be submitted to the FRB and the OCC annually to be used in the regulators' analysis.

The outcome of the FRB's analysis of Trustmark's projected performance (including capital, earnings and balance sheet changes) could hinder Trustmark's ability to pay cash dividends to shareholders at levels consistent with prior practice, or at all. The results of the stress tests could also impact decision making regarding future acquisitions by Trustmark as well as Trustmark's ability to effectively compete for new business opportunities.

Additionally, the FRB and OCC may require Trustmark and TNB to raise additional capital or take other actions, or may impose restrictions on its business, based on the results of the stress tests, including requiring revisions or changes to capital plans. Trustmark and TNB may not be able to raise additional capital if required to do so, or may not be able to do so on favorable terms. Any such capital raises, if required, may also be dilutive to existing shareholders.

There may be risks resulting from the extensive use of models in Trustmark's business.

Trustmark relies on quantitative models to measure risks and to estimate certain financial values. Models may be used in such processes as determining the pricing of various products, assessing potential acquisition opportunities, developing presentations made to market analysts and others, creating loans and extending credit, measuring interest rate and other market risks, predicting losses, assessing capital adequacy, conducting capital stress testing, calculating regulatory capital levels and estimating the fair value of financial instruments and balance sheet items. These models reflect assumptions that may not be accurate, particularly in times of market stress or other unforeseen circumstances. Even if these assumptions are adequate, the models may prove to be inadequate or inaccurate because of other flaws in their design or their implementation. If models for determining interest rate risk and asset-liability management are inadequate, Trustmark may incur increased or unexpected losses upon changes in market interest rates or other market measures. If models for determining probable loan losses are inadequate, the allowance for loan losses may not be sufficient to support future charge-offs. If models to measure the fair value of financial instruments are inadequate, the fair value of such financial instruments may fluctuate unexpectedly or may not accurately reflect what Trustmark could realize upon sale or settlement of such financial instruments. Any such failure in the analytical or forecasting models could have a material adverse effect on Trustmark's financial condition or results of operations.

Also, information Trustmark provides to its regulators based on poorly designed or implemented models could be inaccurate or misleading. Certain decisions that the regulators make, including those related to capital distributions and dividends to Trustmark's shareholders, could be adversely affected due to the regulator's perception that the quality of Trustmark's models used to generate the relevant information is insufficient.

Trustmark could be required to write down goodwill and other intangible assets.

When Trustmark consummates an acquisition, a portion of the purchase price is generally allocated to goodwill and other identifiable intangible assets. The amount of the purchase price that is allocated to goodwill and other intangible assets is determined by the excess of the purchase price over the net identifiable assets acquired. At December 31, 2017, goodwill and other identifiable intangible assets were \$396.0 million. Under current accounting standards, if Trustmark determines goodwill or intangible assets are impaired, Trustmark would be required to write down the carrying value of these assets. Trustmark's annual goodwill impairment evaluation performed during the fourth quarter of 2017 indicated no impairment of goodwill for any reporting segment. Management cannot provide assurance, however, that Trustmark will not be required to take an impairment charge in the future. Any impairment charge would have an adverse effect on Trustmark's shareholders' equity and financial condition and could cause a decline in Trustmark's stock price.

Trustmark holds a significant amount of other real estate and may acquire and hold significant additional amounts, which could lead to increased operating expenses and vulnerability to additional declines in real property values.

As business necessitates, Trustmark forecloses on and takes title to real estate serving as collateral for loans. At December 31, 2017, Trustmark held \$43.2 million of other real estate, compared to \$62.1 million at December 31, 2016. The amount of other real estate held by Trustmark may increase in the future as a result of, among other things, business combinations, increased uncertainties in the housing market or increased levels of credit stress in residential real estate loan portfolios. Increased other real estate balances could lead to greater expenses as Trustmark incurs costs to manage, maintain and dispose of real properties as well as to remediate any environmental cleanup costs incurred in connection with any contamination discovered on real property on which Trustmark has foreclosed and to which Trustmark has taken title. As a result, Trustmark's earnings could be negatively affected by various expenses associated with other real estate owned, including personnel costs, insurance and taxes, completion and repair costs, valuation adjustments and other expenses associated with real property ownership, as well as by the funding costs associated with other real estate assets. The expenses associated with holding a significant amount of other real estate could have a material adverse effect on Trustmark's financial condition or results of operations.

Declines in asset values may result in impairment charges and adversely affect the value of Trustmark's investments.

Trustmark maintains an investment portfolio that includes, among other asset classes, obligations of states and municipalities, agency debt securities and agency mortgage-related securities. The market value of investments in Trustmark's investment portfolio may be affected by factors other than interest rates or the underlying performance of the issuer of the securities, such as ratings downgrades, adverse changes in the business climate and a lack of pricing information or liquidity in the secondary market for certain investment securities. In addition, government involvement or intervention in the financial markets or the lack thereof or market perceptions regarding the existence or absence of such activities could affect the market and the market prices for these securities.

On a quarterly basis, Trustmark evaluates investments and other assets for impairment indicators. As of December 31, 2017, gross unrealized losses on temporarily impaired securities totaled \$42.1 million. Trustmark may be required to record impairment charges if these investments suffer a decline in value that is other-than-temporary. If it is determined that a significant impairment has occurred, Trustmark would be required to charge against earnings the credit-related portion of the other-than-temporary impairment, which could have a material adverse effect on results of operations in the period in which a write-off, if any, occurs.

If Trustmark is required to repurchase a significant number of mortgage loans that it had previously sold, such repurchases could negatively affect earnings.

One of Trustmark's primary business operations is mortgage banking under which residential mortgage loans are sold in the secondary market under agreements that contain representations and warranties related to, among other things, the origination and characteristics of the mortgage loans. Trustmark may be required to either repurchase the outstanding principal balance of a loan or make the purchaser whole for the anticipated economic benefits of a loan if it is determined that the loan sold was in violation of representations or warranties made by Trustmark at the time of the sale, herein referred to as mortgage loan servicing putback expenses. Such representations and warranties typically include those made regarding loans that had missing or insufficient file documentation, loans that do not meet investor guidelines, loans in which the appraisal does not support the value and/or loans obtained through fraud by the borrowers or other third parties. Generally, putback requests may be made until the loan is paid in full. However, mortgage loans delivered to the Federal National Mortgage Association (FNMA) and the Federal Home Loan Mortgage Corporation (FHLMC) on or after January 1, 2013 are subject to the Lending and Selling Representations and Warranties Framework updated in May 2014, which provides certain instances in which FNMA and FHLMC will not exercise their remedies, including a putback request, for breaches of certain selling representations and warranties, such as payment history and quality control review.

Trustmark operates in a highly competitive financial services industry.

Trustmark faces substantial competition in all areas of its operations from a variety of different competitors, many of which are larger and may have greater financial resources. Such competitors primarily include national and regional banks, as well as community banks within the various markets in which Trustmark operates. At this time, major international banks do not materially compete directly with Trustmark in its markets, although they may do so in the future. Trustmark also faces competition from many other types of financial institutions, including savings and loans, credit unions, finance companies, brokerage firms, insurance companies, factoring companies and other financial intermediaries. Additionally, fintech developments, such as blockchain and other distributed ledger technologies, have the potential to disrupt the financial industry and change the way banks do business. The financial services industry could become even more competitive as a result of legislative, regulatory and technological changes and continued consolidation.

Some of Trustmark's competitors have fewer regulatory constraints and may have lower cost structures. Additionally, due to their size, many of Trustmark's larger competitors may be able to achieve economies of scale and, as a result, may offer a broader range of products and services as well as better pricing for those products and services than Trustmark.

Trustmark's ability to compete successfully depends on a number of factors, including: the ability to develop, maintain and build upon long-term customer relationships based on top quality service, high ethical standards and safe, sound assets; the ability to continue to expand Trustmark's market position through organic growth and acquisitions; the scope, relevance and pricing of products and services offered to meet customer needs and demands; the rate at which Trustmark introduces new products and services relative to its competitors; and industry and general economic trends. Failure to perform in any of these areas could significantly weaken Trustmark's competitive position, which could adversely affect Trustmark's financial condition or results of operations.

Potential acquisitions by Trustmark may disrupt Trustmark's business and dilute shareholder value.

Trustmark seeks merger or acquisition partners that are culturally similar and have experienced management and possess either significant market presence or have potential for improved profitability through financial management, economies of scale or expanded services, and Trustmark will likely continue to seek to acquire such businesses in the future. Acquiring other banks, businesses, or branches involves various risks commonly associated with acquisitions, including: potential exposure to unknown or contingent liabilities of the target company, exposure to potential asset quality issues of the target company, difficulty and expense of integrating the operations and personnel of the target company, potential disruption to Trustmark's business, potential diversion of Trustmark's Management's time and attention, the possible loss of key employees and customers of the target company, difficulty in estimating the value of the target company and potential changes in banking or tax laws or regulations that may affect the target company. Acquisitions may involve the payment of a premium over book and market values, and, therefore, some dilution of Trustmark's tangible book value and net income per share of common stock may occur in connection with any future transaction. Furthermore, failure to realize the expected revenue projections, cost savings, increases in geographic or product presence, and/or other projected benefits from an acquisition could have a material adverse effect on Trustmark's financial condition or results of operations.

In addition, the acquisition of an insured depository institution that subsequently fails could significantly adversely affect an affiliated insured depository institution. Under cross-guarantee provisions of the FDI Act, the FDIC may recoup losses to the DIF by assessing a claim against insured depository institutions under common control for losses caused by the failure of an affiliated insured depository institution.

The soundness of other financial institutions could adversely affect Trustmark.

Financial services institutions are interrelated as a result of trading, clearing, counterparty or other relationships. As a result, defaults by, or questions or rumors about, one or more financial services institutions or the financial services industry in general, could lead to market-wide liquidity problems, which could, in turn, lead to defaults or losses by Trustmark and by other institutions. Trustmark has exposure to many different industries and counterparties, and routinely executes transactions with counterparties in the financial services industry, including commercial banks, brokers and dealers, investment banks, mutual funds, and other institutional clients. Many of these transactions expose Trustmark to credit risk in the event of default of its counterparty or client. In addition, Trustmark's credit risk may be exacerbated when the collateral it holds cannot be realized upon or is liquidated at prices not sufficient to recover the full amount of the credit or derivative exposure owed to Trustmark. Losses related to these credit risks could materially and adversely affect Trustmark's results of operations.

Trustmark may experience disruptions of its operating systems or breaches in its information system security.

Trustmark is dependent upon communications and information systems to conduct business as such systems are used to manage virtually all aspects of Trustmark's business. Trustmark's operations rely on the secure processing, storage and transmission of confidential and other information within its computer systems and networks. Trustmark has taken protective measures, which are continuously monitored and modified as warranted; however, Trustmark's computer systems, software and networks may fail to operate properly or become disabled or damaged as a result of a number of factors, including events that are wholly or partially beyond Trustmark's control. There could be sudden increases in customer transaction volume; electrical, telecommunications or other major physical infrastructure outages; natural disasters; and events arising from local or larger scale political or social matters, including terrorist acts. Further, Trustmark's operational and security systems and infrastructure may be vulnerable to breaches, unauthorized access, misuse, computer viruses or other malicious codes and cyber-attacks that could affect their information system security. If one or more of these events were to occur, Trustmark's or its customers' confidential and other information would be jeopardized, or such an event could cause interruptions or malfunctions in Trustmark's or its customers' or counterparties' operations. Trustmark may be required to expend significant additional resources to modify its protective measures or to investigate and remediate vulnerabilities or other exposures in its computer systems and networks, and Trustmark may be subject to litigation and financial losses that are either not insured against or not fully covered through any insurance maintained by Trustmark. Any such losses, which

may be difficult to detect, could adversely affect Trustmark's financial condition or results of operations. In addition, the occurrence of such a loss could expose Trustmark to reputational risk, the loss of customer business and additional regulatory scrutiny.

Security breaches in Trustmark's internet and mobile banking activities (myTrustmarkSM) could further expose Trustmark to possible liability and reputational risk. Any compromise in security could deter customers from using Trustmark's internet and mobile banking services that involve the transmission of confidential information. Trustmark relies on standard internet security systems to provide the security and authentication necessary to effect secure transmission of data. However, these precautions may not protect Trustmark's systems from compromise or breaches of security, which could result in significant legal liability and significant damage to Trustmark's reputation and business.

Trustmark relies upon certain third-party vendors to provide products and services necessary to maintain day-to-day operations. Accordingly, Trustmark's operations are exposed to the risk that these vendors might not perform in accordance with applicable contractual arrangements or service level agreements or that the security of the third-party vendors' computer systems, software and networks may be vulnerable to compromises that could impact information system security. Trustmark maintains a system of policies and procedures designed to monitor vendor risks. While Trustmark believes these policies and procedures effectively mitigate risk, the failure of an external vendor to perform in accordance with applicable contractual arrangements or service level agreements or any compromise in the security of an external vendor's information systems could be disruptive to Trustmark's operations, which could have a material adverse effect on its financial condition or results of operations.

Trustmark must utilize new technologies to deliver its products and services, which could require significant resources and expose Trustmark to additional risks, including cyber-security risks.

In order to deliver new products and services and to improve the productivity of existing products and services, the banking industry relies on rapidly evolving technologies. Trustmark's ability to effectively utilize new technologies to address customer needs and create operating efficiencies could materially affect future prospects. Management cannot provide any assurances that Trustmark will be successful in utilizing such new technologies. Incorporation of new products and services, such as internet and mobile banking services, may require significant resources and expose Trustmark to additional risks, including cyber-security risks.

Trustmark's use of third-party service providers and Trustmark's other ongoing third-party business relationships are subject to increasing regulatory requirements and attention.

Trustmark regularly uses third-party service providers and subcontractors as part of its business. Trustmark also has substantial ongoing business relationships with partners and other third-parties, and relies on certain third-parties to provide products and services necessary to maintain day-to-day operations. These types of third-party relationships are subject to increasingly demanding regulatory requirements and attention by regulators, including the FRB, OCC, CFPB and FDIC. Under regulatory guidance, Trustmark is required to apply stringent due diligence, conduct ongoing monitoring and maintain effective control over third-party service providers and subcontractors and other ongoing third-party business relationships. Trustmark expects that the regulators will hold Trustmark responsible for deficiencies in its oversight and control of its third-party relationships and in the performance of the parties with which Trustmark has these relationships. Trustmark maintains a system of policies and procedures designed to ensure adequate due diligence is performed and to monitor vendor risks. While Trustmark believes these policies and procedures effectively mitigate risk, if the regulators conclude that Trustmark has not exercised adequate oversight and control over third-party service providers and subcontractors or other ongoing third-party business relationships or that such third-parties have not performed appropriately, Trustmark could be subject to enforcement actions, including civil monetary penalties or other administrative or judicial penalties or fines as well as requirements for customer remediation.

Trustmark's controls and procedures may fail or be circumvented.

Trustmark's internal controls, disclosure controls and procedures, and corporate governance policies and procedures are based in part on assumptions, and can provide only reasonable, not absolute, assurances that the objectives of the system are met. Any failure or circumvention of Trustmark's controls and procedures or failure to comply with regulations related to controls and procedures could have a material adverse effect on Trustmark's business, financial condition and results of operations.

The stock price of financial institutions, like Trustmark, can be volatile.

The volatility in the stock prices of companies in the financial services industry, such as Trustmark, may make it more difficult for shareholders to resell Trustmark common stock at attractive prices in a timely manner. Trustmark's stock price can fluctuate significantly in response to a variety of factors, including factors affecting the financial industry as a whole. The factors affecting financial stocks generally and Trustmark's stock price in particular include:

- actual or anticipated variations in earnings;
- changes in analysts' recommendations or projections;
- operating and stock performance of other companies deemed to be peers;
- perception in the marketplace regarding Trustmark, its competitors and/or the industry as a whole;
- significant acquisitions or business combinations involving Trustmark or its competitors;
- provisions in Trustmark's by-laws and articles of incorporation that may discourage takeover attempts, which may make Trustmark less attractive to a potential purchaser;
- changes in government regulation;
- failure to integrate acquisitions or realize anticipated benefits from acquisitions; and
- volatility affecting the financial markets in general.

General market fluctuations, the potential for breakdowns on electronic trading or other platforms for executing securities transactions, industry factors and general economic and political conditions could also cause Trustmark's stock price to decrease regardless of operating results.

Changes in accounting standards may affect how Trustmark reports its financial condition and results of operations.

Trustmark's accounting policies and methods are fundamental to how Trustmark records and reports its financial condition and results of operations. From time to time, the Financial Accounting Standards Board (FASB) changes the financial accounting and reporting standards that govern the preparation of Trustmark's financial statements. The most recent economic recession resulted in increased scrutiny of accounting standards by regulators and legislators, particularly as they relate to fair value accounting principles. In addition, ongoing efforts to achieve convergence between U.S. generally accepted accounting principles (GAAP) and International Financial Reporting Standards may result in changes to GAAP. Any such changes can be difficult to predict and can materially affect how Trustmark records and reports its financial condition or results of operations. For example, in June 2016, the FASB issued Accounting Standards Update (ASU) 2016-13, "Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments," which replaces the current incurred loss impairment methodology with a methodology that reflects all current expected credit losses (CECL) and requires consideration of a broader range of reasonable and supportable information to determine credit loss estimates. Trustmark intends to adopt ASU 2016-13 during the first quarter of 2020, and adoption of this ASU could materially affect its allowance for loan losses methodology, financial condition, capital levels and results of operations, including expenses Trustmark may incur in implementing this ASU. For additional details regarding recently adopted and pending accounting pronouncements, see Note 1 – Significant Accounting Policies included in Part II. Item 8. - Financial Statements and Supplementary Data of this report.

Trustmark may not be able to attract or retain key employees.

Trustmark's success depends substantially on its ability to attract and retain skilled, experienced personnel. Competition for qualified candidates in the activities and markets that Trustmark serves is intense. While Trustmark invests significantly in the training and developments of its employees, it is possible that Trustmark may not be able to retain key employees. If Trustmark were unable to retain its most qualified employees, its performance and competitive positioning could be materially adversely affected.

Natural disasters, such as hurricanes, could have a significant negative impact on Trustmark's business.

Many of Trustmark's loans are secured by property or are made to businesses in or near the Gulf Coast regions of Alabama, Florida, Mississippi and Texas, which are often in the path of seasonal hurricanes. Natural disasters, such as hurricanes, could have a significant negative impact on the stability of Trustmark's deposit base, the ability of borrowers to repay outstanding loans and the value of collateral securing loans, and could cause Trustmark to incur material additional expenses. Although Management has established disaster recovery policies and procedures, the occurrence of a natural disaster, especially if any applicable insurance coverage is not adequate to enable Trustmark's borrowers to recover from the effects of the event, could have a material adverse effect on Trustmark's financial condition or results of operations.

Trustmark may be subject to increased claims and litigation, which could result in legal liability and reputational damage.

Trustmark has been named from time to time as a defendant in litigation relating to its businesses and activities. Litigation may include claims for substantial compensatory or punitive damages or claims for indeterminate amounts of damages.

In recent years, a number of judicial decisions have upheld the right of borrowers to sue lending institutions on the basis of various evolving legal theories, collectively termed “lender liability.” Generally, lender liability is founded on the premise that a lender has either violated a duty, whether implied or contractual, of good faith and fair dealing owed to the borrower or has assumed a degree of control over the borrower resulting in the creation of a fiduciary duty owed to the borrower or its other creditors or shareholders.

Substantial legal liability against Trustmark, including its subsidiaries, could materially adversely affect Trustmark’s business, financial condition or results of operations, or cause significant harm to our reputation.

Damage to Trustmark’s reputation could have a significant negative impact on Trustmark’s business.

Trustmark’s ability to attract and retain customers, clients, investors, and highly-skilled management and employees is affected by its reputation. Public perception of the financial services industry declined as a result of the economic downturn and related government response. Trustmark faces increased public and regulatory scrutiny resulting from the financial crisis and economic downturn. Significant harm to Trustmark’s reputation can also arise from other sources, including employee misconduct, actual or perceived unethical behavior, litigation or regulatory outcomes, failing to deliver minimum or required standards of service and quality, compliance failures, disclosure of confidential information, significant or numerous failures, interruptions or breaches of its information systems and the activities of its clients, customers and counterparties, including vendors. Actions by the financial services industry generally or by certain members or individuals in the industry may have a significant adverse effect on Trustmark’s reputation. Trustmark could also suffer significant reputational harm if it fails to properly identify and manage potential conflicts of interest. Management of potential conflicts of interests has become increasingly complex as Trustmark expands its business activities through more numerous transactions, obligations and interests with and among its clients. The actual or perceived failure to adequately address conflicts of interest could affect the willingness of clients to deal with Trustmark, which could adversely affect Trustmark’s businesses.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None

ITEM 2. PROPERTIES

Trustmark’s principal offices are housed in its complex located in downtown Jackson, Mississippi and owned by TNB. Approximately 235,000 square feet, or 89%, of the available space in the main office building is allocated to bank use with the remainder occupied or available for occupancy by tenants on a lease basis. As of December 31, 2017, Trustmark, through TNB, also operated 178 full-service branches, 20 limited-service branches and an ATM network, which included 180 ATMs at on-premise locations, 66 ATMs located at off-premise sites and three interactive teller machines (ITMs) located at off-premise sites. In addition, Trustmark’s Mortgage Banking Group utilized six off-site locations, the Wealth Management Division utilized one off-site location and the Insurance Division utilized five off-site locations. Trustmark leases 90 of its 279 locations with the remainder being owned. Trustmark believes its properties are suitable and adequate to operate its financial services business.

ITEM 3. LEGAL PROCEEDINGS

Trustmark’s wholly-owned subsidiary, TNB, has been named as a defendant in three lawsuits related to the collapse of the Stanford Financial Group. The first is a purported class action complaint that was filed on August 23, 2009 in the District Court of Harris County, Texas, by Peggy Roif Rotstain, Guthrie Abbott, Catherine Burnell, Steven

Queyrouze, Jaime Alexis Arroyo Bornstein and Juan C. Olano (collectively, Class Plaintiffs), on behalf of themselves and all others similarly situated, naming TNB and four other financial institutions unaffiliated with Trustmark as defendants. The complaint seeks to recover (i) alleged fraudulent transfers from each of the defendants in the amount of fees and other monies received by each defendant from entities controlled by R. Allen Stanford (collectively, the Stanford Financial Group) and (ii) damages allegedly attributable to alleged conspiracies by one or more of the defendants with the Stanford Financial Group to commit fraud and/or aid and abet fraud on the asserted grounds that defendants knew or should have known the Stanford Financial Group was conducting an illegal and fraudulent scheme. Plaintiffs have demanded a jury trial. Plaintiffs did not quantify damages.

In November 2009, the lawsuit was removed to federal court by certain defendants and then transferred by the United States Panel on Multidistrict Litigation to federal court in the Northern District of Texas (Dallas) where multiple Stanford related matters are being consolidated for pre-trial proceedings. In May 2010, all defendants (including TNB) filed motions to dismiss the lawsuit. In August

2010, the court authorized and approved the formation of an Official Stanford Investors Committee (OSIC) to represent the interests of Stanford investors and, under certain circumstances, to file legal actions for the benefit of Stanford investors. In December 2011, the OSIC filed a motion to intervene in this action. In September 2012, the district court referred the case to a magistrate judge for hearing and determination of certain pretrial issues. In December 2012, the court granted the OSIC's motion to intervene, and the OSIC filed an Intervenor Complaint against one of the other defendant financial institutions. In February 2013, the OSIC filed a second Intervenor Complaint that asserts claims against TNB and the remaining defendant financial institutions. The OSIC seeks to recover: (i) alleged fraudulent transfers in the amount of the fees each of the defendants allegedly received from Stanford Financial Group, the profits each of the defendants allegedly made from Stanford Financial Group deposits, and other monies each of the defendants allegedly received from Stanford Financial Group; (ii) damages attributable to alleged conspiracies by each of the defendants with the Stanford Financial Group to commit fraud and/or aid and abet fraud and conversion on the asserted grounds that the defendants knew or should have known the Stanford Financial Group was conducting an illegal and fraudulent scheme; and (iii) punitive damages. The OSIC did not quantify damages.

In July 2013, all defendants (including TNB) filed motions to dismiss the OSIC's claims. In March 2015, the court entered an order authorizing the parties to conduct discovery regarding class certification, staying all other discovery and setting a deadline for the parties to complete briefing on class certification issues. In April 2015, the court granted in part and denied in part the defendants' motions to dismiss the Class Plaintiffs' claims and the OSIC's claims. The court dismissed all of the Class Plaintiffs' fraudulent transfer claims and dismissed certain of the OSIC's claims. The court denied the motions by TNB and the other financial institution defendants to dismiss the OSIC's constructive fraudulent transfer claims.

On June 23, 2015, the court allowed the Class Plaintiffs to file a Second Amended Class Action Complaint (SAC), which asserted new claims against TNB and certain of the other defendants for (i) aiding, abetting and participating in a fraudulent scheme, (ii) aiding, abetting and participating in violations of the Texas Securities Act, (iii) aiding, abetting and participating in breaches of fiduciary duty, (iv) aiding, abetting and participating in conversion and (v) conspiracy. On July 14, 2015, the defendants (including TNB) filed motions to dismiss the SAC and to reconsider the court's prior denial to dismiss the OSIC's constructive fraudulent transfer claims against TNB and the other financial institutions that are defendants in the action. On July 27, 2016, the court denied the motion by TNB and the other financial institution defendants to dismiss the SAC and also denied the motion by TNB and the other financial institution defendants to reconsider the court's prior denial to dismiss the OSIC's constructive fraudulent transfer claims. On August 24, 2016, TNB filed its answer to the SAC. On October 20, 2017, the OSIC filed a motion seeking an order lifting the discovery stay and establishing a trial schedule. On November 7, 2017, the court denied the OSIC's motion seeking class certification and designation of class representatives and counsel, finding that common issues of fact did not predominate. The court granted the OSIC's motion to lift the discovery stay that it had previously ordered.

The second Stanford-related lawsuit was filed on December 14, 2009 in the District Court of Ascension Parish, Louisiana, individually by Harold Jackson, Paul Blaine, Carolyn Bass Smith, Christine Nichols, and Ronald and Ramona Hebert naming TNB (misnamed as Trust National Bank) and other individuals and entities not affiliated with Trustmark as defendants. The complaint seeks to recover the money lost by these individual plaintiffs as a result of the collapse of the Stanford Financial Group (in addition to other damages) under various theories and causes of action, including negligence, breach of contract, breach of fiduciary duty, negligent misrepresentation, detrimental reliance, conspiracy, and violation of Louisiana's uniform fiduciary, securities, and racketeering laws. The complaint does not quantify the amount of money the plaintiffs seek to recover. In January 2010, the lawsuit was removed to federal court by certain defendants and then transferred by the United States Panel on Multidistrict Litigation to federal court in the Northern District of Texas (Dallas) where multiple Stanford related matters are being consolidated for pre-trial proceedings. On March 29, 2010, the court stayed the case. TNB filed a motion to lift the stay, which was denied on February 28, 2012. In September 2012, the district court referred the case to a magistrate judge for hearing and determination of certain pretrial issues.

On April 11, 2016, Trustmark learned that a third Stanford-related lawsuit had been filed on that date in the Superior Court of Justice in Ontario, Canada, by The Toronto-Dominion Bank (TD Bank), naming TNB and three other financial institutions not affiliated with Trustmark as defendants. The complaint seeks a declaration specifying the degree to which each of TNB and the other defendants are liable in respect of any loss and damage for which TD Bank is found to be liable in a litigation commenced against TD Bank brought by the Joint Liquidators of Stanford International Bank Limited in the Superior Court of Justice, Commercial List in Ontario, Canada (the Joint Liquidators' Action), as well as contribution and indemnity in respect of any judgment, interest and costs TD Bank is ordered to pay in the Joint Liquidators' Action. To date, TNB has not been served in connection with this action.

TNB's relationship with the Stanford Financial Group began as a result of Trustmark's acquisition of a Houston-based bank in August 2006, and consisted of correspondent banking and other traditional banking services in the ordinary course of business. All Stanford-related lawsuits are in pre-trial stages.

Trustmark and its subsidiaries are also parties to other lawsuits and other claims that arise in the ordinary course of business. Some of the lawsuits assert claims related to the lending, collection, servicing, investment, trust and other business activities, and some of the lawsuits allege substantial claims for damages.

All pending legal proceedings described above are being vigorously contested. In accordance FASB Accounting Standards Codification (ASC) Topic 450-20, "Loss Contingencies," Trustmark will establish an accrued liability for litigation matters when those matters present loss contingencies that are both probable and reasonably estimable. At the present time, Management believes, based on the advice of legal counsel and Management's evaluation, that a loss in any such proceeding is not probable and reasonably estimable. All matters will continue to be monitored for further developments that would make such loss contingency both probable and reasonably estimable. In view of the inherent difficulty of predicting the outcome of legal proceedings, Trustmark cannot predict the eventual outcomes of the currently pending matters or the timing of their ultimate resolution. Management currently believes, however, based upon the advice of legal counsel and Management's evaluation and after taking into account its current insurance coverage, that the legal proceedings currently pending should not have a material adverse effect on Trustmark's consolidated financial condition.

Not applicable.

PART II

ITEM MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS

5. AND ISSUER PURCHASES OF EQUITY SECURITIES

Common Stock Prices and Dividends

Trustmark's common stock is listed on the NASDAQ Stock Market and is traded under the symbol TRMK. The table below represents, for each quarter of 2017 and 2016, the high and low intra-day sales price per share of Trustmark's common stock and the cash dividends declared per common share.

Sales Price Per Share	2017		2016	
	High	Low	High	Low
First quarter	\$36.58	\$30.03	\$23.64	\$19.75
Second quarter	34.15	29.99	25.29	21.93
Third quarter	33.42	28.16	28.70	23.67
Fourth quarter	35.09	31.24	36.79	26.81

Dividends Per Share	2017	2016
First quarter	\$0.23	\$0.23
Second quarter	0.23	0.23
Third quarter	0.23	0.23
Fourth quarter	0.23	0.23
Total	\$0.92	\$0.92

At January 31, 2018, there were approximately 3,700 registered shareholders of record and approximately 38,000 beneficial account holders of shares in nominee name of Trustmark's common stock. Other information required by this item can be found in Note 17 - Shareholders' Equity included in Part II. Item 8. - Financial Statements and Supplementary Data of this report.

Stock Repurchase Program

On March 11, 2016, the Board of Directors of Trustmark authorized a stock repurchase program under which \$100.0 million of Trustmark's outstanding common stock may be acquired through March 31, 2019. The shares may be purchased from time to time at prevailing market prices, through open market or privately negotiated transactions, depending on market conditions. Trustmark repurchased none of its common stock during the year ended December 31, 2017. Trustmark repurchased approximately 34 thousand shares of its common stock valued at approximately \$750 thousand during the year ended December 31, 2016.

Performance Graph

The following graph compares Trustmark's annual percentage change in cumulative total return on common shares over the past five years with the cumulative total return of companies comprising the NASDAQ market value index and the Morningstar Banks – Regional – US index. The Morningstar Banks – Regional – US index is an industry index published by Morningstar and consists of 1,000 large, regional, diverse financial institutions serving the corporate, government and consumer needs of retail banking, investment banking, trust management, credit cards and mortgage banking in the United States. This presentation assumes that \$100 was invested in shares of the relevant issuers on December 31, 2012, and that dividends received were immediately invested in additional shares. The graph plots the value of the initial \$100 investment at one-year intervals for the fiscal years shown.

Company	2012	2013	2014	2015	2016	2017
Trustmark	100.00	123.88	117.73	114.87	183.94	169.18
Morningstar Banks - Regional - US	100.00	138.74	149.60	156.82	212.44	231.79
NASDAQ	100.00	140.12	160.78	171.97	187.22	242.71

ITEM 6. SELECTED FINANCIAL DATA

The following unaudited consolidated financial data is derived from Trustmark's audited financial statements as of and for the five years ended December 31, 2017 (\$ in thousands, except per share data). The data should be read in conjunction with Part II. Item 7. - Management's Discussion and Analysis of Financial Condition and Results of Operations and Item 8. - Financial Statements and Supplementary Data.

ITEM 7.MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following provides a narrative discussion and analysis of Trustmark's financial condition and results of operations. This discussion should be read in conjunction with the consolidated financial statements and the supplemental financial data included in Part II. Item 8. – Financial Statements and Supplementary Data of this report.

Executive Overview

Trustmark continued to achieve solid financial results with total revenue of \$148.0 million and \$592.2 million for the three months and year ended December 31, 2017, respectively. Trustmark continued to maintain and expand customer relationships as reflected by growth across all five market regions in the LHFI portfolio, which increased \$718.8 million, or 9.2%, during year ended December 31, 2017. During the first quarter of 2017, Trustmark reclassified \$36.7 million of acquired loans not accounted for under FASB ASC Topic 310-30, "Loans and Debt Securities Acquired with Deteriorated Credit Quality" to LHFI due to the discount on these loans being fully amortized. Excluding the reclassified acquired loans, LHFI increased \$682.0 million, or 8.7%, during 2017. Credit quality remained strong and continued to be an important contributor to Trustmark's financial success. Trustmark is committed to investments to support profitable revenue growth as well as reengineering and efficiency opportunities to enhance shareholder value. Trustmark's capital position remained solid, reflecting the consistent profitability of its diversified financial services businesses. Trustmark's Board of Directors declared a quarterly cash dividend of \$0.23 per share. The dividend is payable March 15, 2018, to shareholders of record on March 1, 2018.

During August 2017, the Texas Gulf Coast region was severely impacted by Hurricane Harvey. None of Trustmark's banking facilities in its Texas market region sustained damage, and all were able to reopen as soon as practical following the storm. In the aftermath of Hurricane Harvey, Trustmark initiated a process to assess the storm's impact on its customers. Trustmark identified all loans where the collateral, project or mailing addresses were located within Federal Emergency Management Association (FEMA) designated disaster zip codes and proactively surveyed these customers to determine the extent of any damages. Potential loss exposure was calculated based upon customer responses as to the extent of damage suffered and applicable insurance coverage. As a result, Trustmark increased its allowance for loan losses for LHFI during the third quarter of 2017 by \$1.1 million due to the potential loss exposure caused by Hurricane Harvey.

On April 7, 2017, Trustmark completed its previously announced merger with RB Bancorporation (Reliance). Reliance was the holding company for Reliance Bank, which had seven offices serving the Huntsville, Alabama metropolitan service area in northern Alabama. Reliance Bank was merged into TNB simultaneously with the merger of Trustmark and Reliance. Under the terms of the merger agreement dated November 14, 2016, Trustmark paid \$22.00 in cash for each share of Reliance common stock outstanding, which represented payment to Reliance common shareholders of approximately \$23.7 million. In addition, Trustmark paid off Reliance preferred stock of \$1.1 million bringing the total consideration paid to \$24.8 million. The operations of Reliance are included in Trustmark's operating results from April 7, 2017 and did not have a material impact on Trustmark's results of operations. During the second quarter of 2017, Trustmark included non-routine merger transaction expenses in other expense totaling \$3.2 million.

As previously reported, on July 26, 2016, the Board of Directors of Trustmark authorized the termination of the Trustmark Capital Accumulation Plan (the Plan), a noncontributory tax-qualified defined benefit pension plan, effective as of December 31, 2016. The final distributions were made from current plan assets and a one-time pension settlement expense of \$17.6 million was recognized when paid by Trustmark during the second quarter of 2017.

Financial Highlights

Trustmark reported net income of \$15.8 million, or basic and diluted earnings per share (EPS) of \$0.23, in the fourth quarter of 2017, compared to \$28.9 million, or basic and diluted EPS of \$0.43, in the fourth quarter of 2016. The

decrease in net income when the fourth quarter of 2017 is compared to the same time period in 2016 was principally due to an one-time charge to income taxes resulting from the re-measurement of Trustmark's net deferred tax assets due to the enactment of the Tax Cuts and Jobs Act of 2017 (Tax Reform Act) and the elimination of a deferred tax valuation allowance related to a prior merger, which collectively reduced net income by \$17.0 million, or \$0.25 per diluted share. Excluding these non-routine transactions, net income for the fourth quarter of 2017 totaled \$32.7 million, or diluted EPS of \$0.48. The increase in net income, excluding the non-routine transactions, when the fourth quarter of 2017 is compared to the same time period in 2016 was principally due to an increase in total revenue (primarily due to increases in interest and fees on LHFS and LHFI, mortgage banking, net and other income, net principally as a result of proceeds received related to bank-owned life insurance) partially offset by an increase in noninterest expense. These factors are discussed in greater detail below. Trustmark's reported performance during the quarter ended December 31, 2017, produced a return on average tangible equity of 5.60%, a return on average assets of 0.45%, an average equity to average assets ratio of 11.40% and a dividend payout ratio of 100.00%, compared to a return on average tangible equity of 10.41%, a return on average assets of 0.87%, an average

equity to average assets ratio of 11.63% and a dividend payout ratio of 53.49% during the quarter ended December 31, 2016. For a reconciliation between the reported net income and the net income adjusted for significant non-routine transactions as well as select financial ratios, please see the section captioned “Significant Non-routine Transactions.”

Revenue, which is defined as net interest income plus noninterest income, totaled \$148.0 million for the quarter ended December 31, 2017 compared to \$140.6 million for the quarter ended December 31, 2016, an increase of \$7.4 million, or 5.3%. The increase in total revenue for the fourth quarter of 2017 was principally the result of increases in interest and fees on LHFS and LHFI, mortgage banking, net and other income, net, partially offset by an increase in total interest expense.

Interest and fees on LHFS and LHFI increased \$14.0 million, or 18.2%, when the fourth quarter of 2017 is compared to the same time period in 2016, primarily due to an increase in the LHFI portfolio and higher interest rates. LHFI totaled \$8.570 billion at December 31, 2017, an increase of \$718.8 million, or 9.2%, when compared to December 31, 2016, as a result of net growth across all of Trustmark’s market regions and all categories in its LHFI portfolio. Mortgage banking, net for the fourth quarter of 2017 increased \$856 thousand, or 15.8%, when compared to the same time period in 2016, principally due to a decrease in the net negative mortgage valuation adjustment, partially offset by a decline in gain on sales of loans, net. Other income, net for the three months ended December 31, 2017 increased \$589 thousand, or 28.2%, when compared to the same time period in 2016 primarily due to non-taxable proceeds of \$1.7 million related to bank-owned life insurance received during the fourth quarter of 2017. Interest expense for the fourth quarter of 2017 increased \$6.4 million, or 98.9%, when compared to the same time period in 2016 principally due to rising interest rates in general, which result in increases in interest on deposits and other interest expense. Interest expense on deposits for the three months ended December 31, 2017 increased \$3.9 million when compared to the same time period in 2016, principally due to rising interest rates in general, accompanied by increases in average balances of all categories of interest-bearing accounts. Other interest expense increased \$1.9 million, or 71.1%, when the fourth quarter of 2017 is compared to the same time period in 2016, principally due to increases in rates in general and average balances of short-term FHLB advances partially offset by the decline in interest expense on the subordinated notes.

Trustmark’s provision for loan losses, LHFI for the three months ended December 31, 2017 totaled \$5.7 million, an increase of \$3.9 million when compared to a provision for loan losses, LHFI of \$1.8 million for the three months ended December 31, 2016. The increase in the provision for loan losses, LHFI for the fourth quarter of 2017 when compared to the same time period in 2016 was primarily due to an increase in the amount of provision required for existing and newly impaired LHFI, primarily in the Texas and Mississippi market regions, and an increase in the amount of provision related to quantitative reserve factors. Please see the section captioned “Provision for Loan Losses, LHFI,” for additional information regarding the provision for loan losses, LHFI. The provision for loan losses, acquired loans for the three months ended December 31, 2017 totaled a negative \$1.6 million, a decrease of \$2.7 million when compared to the same time period in 2016 principally due to changes in expectations based on the periodic re-estimations performed during the respective periods and a decline in acquired loan balances. Please see the section captioned “Provision for Loan Losses, Acquired Loans,” for additional information regarding the provision for loan losses, acquired loans. In total, the provision for loan losses, net was \$4.2 million for the fourth quarter of 2017, an increase of \$1.2 million, or 39.6%, when compared to the same time period in 2016.

For the year ended December 31, 2017, Trustmark reported net income of \$105.6 million, or basic and diluted EPS of \$1.56, compared to \$108.4 million, or basic and diluted EPS of \$1.60, for the year ended December 31, 2016 and \$116.0 million, or basic and diluted EPS of \$1.72 and \$1.71, respectively, for the year ended December 31, 2015. The decrease in net income when 2017 is compared to 2016 was primarily due to increases in income taxes and noninterest expense (principally due to non-routine transaction expenses), which was partially offset by an increase in total revenue (principally due to increases in interest and fees on LHFS and LHFI and other income, net principally as a result of proceeds received related to life insurance) and the decline in the provision for loan losses, acquired loans. These factors are discussed in greater detail below. During the fourth quarter of 2017, Trustmark incurred non-routine income tax expenses of \$17.0 million related to the re-measurement of Trustmark’s net deferred tax assets

due to the enactment of the Tax Reform Act and the elimination of a deferred tax valuation allowance related to a prior merger. During the second quarter of 2017, Trustmark received \$4.9 million in non-routine, nontaxable proceeds related to life insurance acquired in a previous acquisition. Additionally, Trustmark incurred non-routine transaction expenses of \$17.6 million related to the termination of the defined benefit pension plan and \$3.2 million related to the completion of the Reliance merger during the second quarter of 2017. Excluding these non-routine transactions, net income for 2017 totaled \$130.6 million, or diluted EPS of \$1.92. Trustmark's reported performance for the year ended December 31, 2017, produced a return on average tangible equity of 9.39%, a return on average assets of 0.77% and a dividend payout ratio of 58.97%, compared to a return on average tangible equity of 9.99%, a return on average assets of 0.84% and a dividend payout ratio of 57.50% for the year ended December 31, 2016 and a return on average tangible equity of 11.36%, a return on average assets of 0.95% and a dividend payout ratio of 53.49% for the year ended December 31, 2015. Trustmark's average equity to average assets ratio was 11.38%, 11.73% and 11.90% for the years ended December 31, 2017, 2016 and 2015, respectively. For a reconciliation between the reported net income and the net income adjusted for significant non-routine transactions as well as select financial ratios, please see the section captioned "Significant Non-routine Transactions."

Revenue totaled \$592.2 million for the year ended December 31, 2017, compared to \$561.5 million and \$564.9 million for the years ended December 31, 2016 and 2015, respectively. The increase in total revenue for 2017 compared to 2016 was principally the result of increases in interest and fees on LHFS and LHFI and other income, net partially offset by an increase in total interest expense.

Interest and fees on LHFS and LHFI for 2017 increased \$45.0 million, or 15.0%, compared to 2016, primarily due to the year-over-year increase in the LHFI portfolio. Other income, net for 2017 increased \$8.3 million when compared to 2016 primarily due to non-taxable proceeds of \$4.4 million related to bank-owned life insurance received during 2017 and the \$4.9 million in non-routine, non-taxable proceeds related to life insurance acquired in a previous acquisition received during the second quarter of 2017. Interest expense for 2017 increased \$17.7 million, or 72.1%, when compared to 2016 due to rising interest rates in general. Interest expense on deposits for 2017 increased \$10.0 million, or 78.2%, when compared to 2016, principally due to rising rates in general, accompanied by increases in average balances of all categories of interest-bearing deposits. Interest on federal funds purchased and securities sold under repurchase agreements increased \$2.4 million when 2017 is compared to 2016 principally due to increases in the target range for the federal funds rate by the FRB. Other interest expense increased \$5.3 million, or 52.5%, when the year ended December 31, 2017 is compared to the year ended December 31, 2016, principally due to increases in rates in general, accompanied by increases in average balances of short-term FHLB advances partially offset by the decline in interest expense on the subordinated notes.

Trustmark's provision for loan losses, LHFI, for 2017 totaled \$15.1 million, an increase of \$4.1 million, or 37.8%, when compared to a provision for loan losses, LHFI of \$11.0 million for 2016. The increase in the provision for loan losses, LHFI for 2017 when compared to 2016 was primarily due to an increase in the amount of provision required related to existing and newly impaired LHFI, and the \$1.1 million of additional reserves due to the potential loss exposure caused by Hurricane Harvey. Please see the section captioned "Provision for Loan Losses, LHFI," for additional information regarding the provision for loan losses, LHFI. The provision for loan losses, acquired loans for 2017 totaled a negative \$7.4 million, a decrease of \$11.2 million when compared to 2016 principally due to changes in expectations based on the periodic re-estimations performed during the respective periods and a decline in acquired loan balances. Please see the section captioned "Provision for Loan Losses, Acquired Loans," for additional information regarding the provision for loan losses, acquired loans. In total, the provision for loan losses, net was \$7.7 million for 2017, a decrease of \$7.0 million, or 47.7%, when compared to 2016.

At December 31, 2017, nonperforming assets, excluding acquired loans, totaled \$110.8 million, a decrease of \$482 thousand, or 0.4%, compared to December 31, 2016 due to a decline in other real estate, which was largely offset by an increase in nonaccrual LHFI. Total nonaccrual LHFI were \$67.6 million at December 31, 2017, representing an increase of \$18.3 million, or 37.3%, relative to December 31, 2016 principally due to three large substandard credits moving to nonaccrual status during 2017. The percentage of loans, excluding acquired loans, that are 30 days or more past due and nonaccrual LHFI increased in 2017 to 1.53% compared to 1.33% in 2016 and 1.44% in 2015. Other real estate declined \$18.8 million, or 30.3%, during 2017 primarily due to properties sold in all five market of Trustmark's market regions as well as write-downs of properties in Trustmark's Mississippi, Florida and Alabama market regions partially offset by properties foreclosed in all five market regions.

LHFI totaled \$8.570 billion at December 31, 2017, an increase of \$718.8 million, or 9.2%, compared to December 31, 2016. During the first quarter of 2017, Trustmark reclassified \$36.7 million of acquired loans not accounted for under FASB ASC Topic 310-30 to LHFI due to the discount on these loans being fully amortized. Excluding the reclassified acquired loans, LHFI increased \$682.0 million, or 8.7%, during 2017. The increase in LHFI, excluding the reclassified acquired loans, during 2017 represented net growth across all five of Trustmark's market regions and all loan categories. For additional information regarding changes in LHFI and comparative balances by loan category, see the section captioned "LHFI."

Both classified and criticized LHFI balances remain at low levels and continue to reflect strong credit quality. As of December 31, 2017, classified LHFI balances decreased \$13.9 million, or 6.2%, while criticized LHFI balances

decreased \$602 thousand, or 0.2%, when compared to balances at December 31, 2016. All of the credits have been appropriately reserved.

Management has continued its practice of maintaining excess funding capacity to provide Trustmark with adequate liquidity for its ongoing operations. In this regard, Trustmark benefits from its strong deposit base, its highly liquid investment portfolio and its access to funding from a variety of external funding sources such as upstream federal funds lines, FHLB advances and, on a limited basis, brokered deposits.

Total deposits were \$10.578 billion at December 31, 2017, an increase of \$521.5 million, or 5.2% compared to December 31, 2016, primarily due to growth in interest-bearing deposits. During 2017, noninterest-bearing deposits increased \$4.8 million, or 0.2%, primarily due to growth in consumer and public demand deposit accounts, which were largely offset by a decline in commercial demand deposit accounts, while interest-bearing deposits increased \$516.7 million, or 7.3%, primarily due to growth in all categories of interest-bearing demand deposit accounts with the exception of public interest checking and money market accounts, reflecting the Reliance merger and increases in interest rates. At December 31, 2017, the balance of deposits for branches associated with the

Reliance merger was \$163.6 million. Excluding these Reliance deposits, total deposits at December 31, 2017 increased \$357.9 million, or 3.6%.

Trustmark uses short-term borrowings to fund growth of earning assets in excess of deposits growth. Short-term borrowings totaled \$1.441 billion at December 31, 2017, an increase of \$131.3 million, or 10.0%, when compared to December 31, 2016 as a result of the increase in earning assets, principally LHFI, out-pacing the growth in deposits. The increase in short-term borrowings was primarily due to an increase in the outstanding balance of short-term FHLB advances as Trustmark continues to utilize this funding source to fund the difference between loan and deposit growth. Short-term FHLB advances increased \$200.0 million during 2017 as a result of a \$450.0 million increase in outstanding short-term advances with the FHLB of Dallas as well as the \$250.0 million long-term FHLB advance with the FHLB of Dallas which was reclassified to short-term in May 2017 partially offset by the \$500.0 million advance with the FHLB of Dallas that matured in December 2017.

Critical Accounting Policies

Trustmark's consolidated financial statements are prepared in accordance with GAAP and follow general practices within the financial services industry. Application of these accounting principles requires Management to make estimates, assumptions and judgments that affect the amounts reported in the consolidated financial statements and accompanying notes. These estimates, assumptions and judgments are based on information available as of the date of the consolidated financial statements; accordingly, as this information changes, actual financial results could differ from those estimates.

Certain policies inherently have a greater reliance on the use of estimates, assumptions and judgments and, as such, have a greater possibility of producing results that could be materially different than originally reported. These critical accounting policies are described below.

For additional information regarding the accounting policies discussed below, please see Note 1 – Significant Accounting Policies set forth in Part II. Item 8. – Financial Statements and Supplementary Data of this report.

Allowance for Loan Losses, LHFI

The allowance for loan losses, LHFI is established through provisions for estimated loan losses charged against net income. The allowance reflects Management's best estimate of the probable loan losses related to specifically identified LHFI as well as probable incurred loan losses in the remaining loan portfolio and requires considerable judgment. The allowance is based upon Management's current judgments about the credit quality of the loan portfolio, including all internal and external factors that impact loan collectibility. Accordingly, the allowance is based upon both past events and current economic conditions.

A significant shift in one or more factors included in the allowance for loan loss methodology could result in a material change to Trustmark's allowance for loan losses, LHFI. For example, if there were changes in one or more of the estimates, assumptions or judgments used as they relate to a portfolio of commercial LHFI, Trustmark could find that it needs to increase the level of future provisions for possible loan losses with respect to that portfolio. Additionally, credit deterioration of specific borrowers due to changes in these factors could cause the internally assigned risk rating to shift to a more severe category. As a result, Trustmark could find that it needs to increase the level of future provisions for possible loan losses with respect to these LHFI. Given the nature of many of these estimates, assumptions and judgments, it is not possible to provide meaningful estimates of the impact of any such potential shifts.

For a complete description of Trustmark's allowance for loan loss methodology, please see Note 5 – LHFI and Allowance for Loan Losses, LHFI included in Part II. Item 8. – Financial Statements and Supplementary Data of this report.

Acquired Loans

Acquired loans are recorded at their estimated fair value as of the acquisition date. The fair value of acquired loans is determined using a discounted cash flow model based on assumptions regarding the amount and timing of principal and interest payments, estimated prepayments, estimated default rates, estimated loss severity in the event of defaults, and current market rates. Estimated credit losses are included in the determination of fair value; therefore, an allowance for loan losses is not recorded on the acquisition date.

For acquired impaired loans, Trustmark (i) calculates the contractual amount and timing of undiscounted principal and interest payments (the undiscounted contractual cash flows) and (ii) estimates the amount and timing of undiscounted expected principal and interest payments (the undiscounted expected cash flows). Under FASB ASC Topic 310-30 the difference between the undiscounted contractual cash flows and the undiscounted expected cash flows is the nonaccretable difference. The nonaccretable difference represents an estimate of the loss exposure of principal and interest related to the acquired impaired loan portfolio, and such amount is

subject to change over time based on the performance of such loans. The excess of undiscounted expected cash flows at acquisition over the initial fair value of acquired impaired loans is referred to as the “accretable yield” and is recorded as interest income over the estimated life of the loans using the effective yield method if the timing and amount of the future cash flows is reasonably estimable. Under the effective yield method, the accretable yield is recorded as an accretion of interest income over the life of the loan.

As required by FASB ASC Topic 310-30, Trustmark periodically re-estimates the expected cash flows to be collected over the life of the acquired impaired loans. If, based on current information and events, it is probable that Trustmark will be unable to collect all cash flows expected at acquisition plus additional cash flows expected to be collected arising from changes in estimate after acquisition, the acquired loans are considered impaired. The decrease in the expected cash flows reduces the carrying value of the acquired impaired loans as well as the accretable yield and results in a charge-off through the allowance for loan losses, acquired loans or the establishment of an allowance for loan losses, acquired loans with a charge to income through the provision for loan losses, acquired loans. If, based on current information and events, it is probable that there is a significant increase in the cash flows previously expected to be collected or if actual cash flows are significantly greater than cash flows previously expected, Trustmark will reduce any remaining allowance for loan losses, acquired loans established on the acquired impaired loans for the increase in the present value of cash flows expected to be collected. The increase in the expected cash flows for the acquired impaired loans over those originally estimated at acquisition increases the carrying value of the acquired impaired loans as well as the accretable yield.

Mortgage Servicing Rights (MSR)

Trustmark recognizes as assets the rights to service mortgage loans based on the estimated fair value of the MSR when loans are sold and the associated servicing rights are retained. Trustmark has elected to account for the MSR at fair value.

The fair value of the MSR is determined using a valuation model administered by a third party that calculates the present value of estimated future net servicing income. The model incorporates assumptions that market participants use in estimating future net servicing income, including estimates of prepayment speeds, discount rate, default rates, cost to service (including delinquency and foreclosure costs), escrow account earnings, contractual servicing fee income and other ancillary income such as late fees. Management reviews all significant assumptions quarterly. Mortgage loan prepayment speeds, a key assumption in the model, is the annual rate at which borrowers are forecasted to repay their mortgage loan principal. The discount rate used to determine the present value of estimated future net servicing income, another key assumption in the model, is an estimate of the required rate of return investors in the market would require for an asset with similar risk. Both assumptions can, and generally will, change as market conditions and interest rates change.

By way of example, an increase in either the prepayment speed or discount rate assumption will result in a decrease in the fair value of the MSR, while a decrease in either assumption will result in an increase in the fair value of the MSR. In recent years, there have been significant market-driven fluctuations in loan prepayment speeds and discount rates. These fluctuations can be rapid and may continue to be significant. Therefore, estimating prepayment speed and/or discount rates within ranges that market participants would use in determining the fair value of the MSR requires significant management judgment.

At December 31, 2017, the MSR fair value was approximately \$84.3 million. The impact on the MSR fair value of either a 10% adverse change in prepayment speeds or a 100 basis point increase in discount rates at December 31, 2017, would be a decline in fair value of approximately \$3.1 million. Changes of equal magnitude in the opposite direction would produce similar increases in fair value in the respective amounts.

Goodwill and Identifiable Intangible Assets

Trustmark records all assets and liabilities acquired in purchase acquisitions, including goodwill and other intangible assets, at fair value as required by FASB ASC Topic 805. The carrying amount of goodwill at December 31, 2017 totaled \$334.6 million for the General Banking Division and \$45.0 million for the Insurance Division, a consolidated total of \$379.6 million. Trustmark's goodwill is not amortized but is subject to annual tests for impairment or more often if events or circumstances indicate it may be impaired. Trustmark's identifiable intangible assets, which totaled \$16.4 million at December 31, 2017, are amortized over their estimated useful lives and are subject to impairment tests if events or circumstances indicate a possible inability to realize the carrying amount.

The initial recording and subsequent impairment testing of goodwill requires subjective judgments concerning estimates of the fair value of the acquired assets. The goodwill impairment test is performed in two phases. The first step compares the fair value of the reporting unit with its carrying amount, including goodwill. If the fair value of the reporting unit exceeds its carrying amount, goodwill of the reporting unit is considered not impaired; however, if the carrying amount of the reporting unit exceeds its fair value, an additional procedure must be performed. That additional procedure, or a second step, compares the implied fair value of the reporting unit's goodwill with the carrying amount of that goodwill. An impairment loss would be recorded to the extent that the carrying amount of goodwill exceeds its implied fair value. Trustmark performed an annual impairment test of goodwill for reporting units contained in both the General Banking and Insurance Divisions as of October 1, 2017, 2016, and 2015, respectively, which

indicated that no impairment charge was required. The impairment test for the General Banking Division utilized valuations based on comparable deal values for financial institutions while the test for the Insurance Division utilizes varying valuation scenarios for the multiple of earnings before interest, income taxes, depreciation and amortization method based on recent acquisition activity. Based on this analysis, Trustmark concluded that the fair value of the reporting units exceeded the carrying value for both the General Banking Division and the Insurance Division; therefore, no impairment charge was required. Significant changes in future profitability and value of our reporting units could affect Trustmark's impairment evaluation.

The carrying amount of Trustmark's identifiable intangible assets subject to amortization is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition. That assessment shall be based on the carrying amount of the intangible assets subject to amortization at the date it is tested for recoverability. Intangible assets subject to amortization shall be tested for recoverability whenever events or changes in circumstances indicate that its carrying amount may not be recoverable.

Fair value may be determined using market prices, comparison to similar assets, market multiples and other determinants. Factors that may significantly affect the estimates include, among others, competitive forces, customer behavior and attrition, changes in revenue growth trends and specific industry or market sector conditions. Other key judgments in accounting for intangibles include determining the useful life of the particular asset and classifying assets as either goodwill (which does not require amortization) or identifiable intangible assets (which does require amortization).

Other Real Estate

Other real estate includes assets that have been acquired in satisfaction of debt through foreclosure and is carried at the lower of cost or estimated fair value less the estimated cost of disposition. Fair value is based on independent appraisals and other relevant factors. Valuation adjustments required at foreclosure are charged to the allowance for loan losses. Other real estate is revalued on an annual basis or more often if market conditions necessitate. An other real estate specific reserve may be recorded through other real estate expense for declines in fair value subsequent to foreclosure based on recent appraisals or changes in market conditions. Subsequent to foreclosure, losses on the periodic revaluation of the property are charged against a reserve specific to other real estate or to noninterest expense in other real estate expense if a reserve does not exist. Significant judgments and complex estimates are required in estimating the fair value of other real estate, and the period of time within which such estimates can be considered current is significantly shortened during periods of market volatility. As a result, the net proceeds realized from sales transactions could differ significantly from appraisals, comparable sales, and other estimates used to determine the fair value of other real estate.

Defined Benefit Plans

Trustmark's plan assets, projected benefit liabilities and cost are determined utilizing actuarially-determined present value calculations. The valuation of the projected benefit obligation and net periodic benefit cost for the Trustmark Corporation Pension Plan for certain Employees of Acquired Financial Institutions (the Continuing Plan) and Trustmark's nonqualified supplemental retirement plans requires Management to make estimates regarding the amount and timing of expected cash outflows. Several variables affect these calculations, including (i) size and characteristics of the participant population, (ii) discount rate, (iii) expected long-term rate of return on plan assets and (iv) recognition of actual returns on plan assets. Below is a brief description of the variables that introduce material uncertainty into Management's estimates and the effect they have on estimated benefit cost.

- Population and Characteristics of Participants. Benefit cost is directly related to the number of participants covered by the plan and characteristics such as salary, age, years of service and benefit terms. At December 31, 2017, the census for Trustmark's plans totaled 124 participants.
-

Discount Rate. The discount rate utilized in determining the present value of the future benefit obligation was 3.32% at December 31, 2017 (as compared to 3.71% at December 31, 2016). The discount rate for the plans is determined by matching the expected cash flows of the plans to a yield curve based on long term, high quality fixed income debt instruments available as of the measurement date (December 31, 2017). The discount rate is reset annually on the measurement date to reflect current economic conditions. If Trustmark assumes a 1.00% increase or decrease in the discount rate for Trustmark's plans and kept all other assumptions constant, the benefit cost associated with Trustmark's plans would decrease or increase by approximately \$281 thousand and \$314 thousand, respectively.

Expected Long-Term Rate of Return on Plan Assets. Based on historical experience and market projection of the target asset allocation set forth in the investment policy for the Continuing Plan, the pre-tax expected rate of return on the plan assets used in 2017 was 5.00%, versus 6.00% for the first half of the year and 2.50% thereafter in 2016 as a result of Trustmark's de-risking investment strategy. This expected rate of return is dependent upon the asset allocation decisions made with respect to plan assets. Annual differences, if any, between expected and actual return are included in the unrecognized net actuarial gain or loss amount. Trustmark generally amortizes any cumulative unrecognized net actuarial gain or loss in excess of 10% of the greater of the projected benefit obligation or the fair value of plan assets. If

Trustmark assumes a 1.00% increase or decrease in the expected long-term rate of return for the Continuing Plan, holding all other actuarial assumptions constant, the pension cost would decrease or increase by approximately \$40 thousand.

Other Actuarial Assumptions. To estimate the projected benefit obligation, actuarial assumptions are required to be made by Management, including mortality rate, retirement rate, disability rate and the rate of compensation increases.

Contingent Liabilities

Trustmark estimates contingent liabilities based on Management's evaluation of the probability of outcomes and their ability to estimate the range of exposure. As stated in FASB ASC Topic 450, "Contingencies," a liability is contingent if the amount is not presently known but may become known in the future as a result of the occurrence of some uncertain future event. Accounting standards require that a liability be recorded if Management determines that it is probable that a loss has occurred, and the loss can be reasonably estimated. It is implicit in this standard that it must be probable that the loss will be confirmed by some future event. As part of the estimation process, Management is required to make assumptions about matters that are, by their nature, highly uncertain. The assessment of contingent liabilities, including legal contingencies and income tax liabilities, involves the use of critical estimates, assumptions and judgments. Management's estimates are based on their belief that future events will validate the current assumptions regarding the ultimate outcome of these exposures. However, there can be no assurance that future events, such as court decisions or Internal Revenue Service (IRS) positions, will not differ from Management's assessments. Whenever practicable, Management consults with outside experts (attorneys, consultants, claims administrators, etc.) to assist with the gathering and evaluation of information related to contingent liabilities.

Recent Legislative and Regulatory Developments

For information regarding legislation and regulation applicable to Trustmark, see the section captioned "Supervision and Regulation" included in Part I. Item 1. – Business of this report.

Non-GAAP Financial Measures

In addition to capital ratios defined by GAAP and banking regulators, Trustmark utilizes various tangible common equity measures when evaluating capital utilization and adequacy. Tangible common equity, as defined by Trustmark, represents common equity less goodwill and identifiable intangible assets.

Trustmark believes these measures are important because they reflect the level of capital available to withstand unexpected market conditions. Additionally, presentation of these measures allows readers to compare certain aspects of Trustmark's capitalization to other organizations. These ratios differ from capital measures defined by banking regulators principally in that the numerator excludes shareholders' equity associated with preferred securities, the nature and extent of which varies across organizations. In Management's experience, many stock analysts use tangible common equity measures in conjunction with more traditional bank capital ratios to compare capital adequacy of banking organizations with significant amounts of goodwill or other intangible assets, typically stemming from the use of the purchase accounting method in accounting for mergers and acquisitions.

These calculations are intended to complement the capital ratios defined by GAAP and banking regulators. Because GAAP does not include these capital ratio measures, Trustmark believes there are no comparable GAAP financial measures to these tangible common equity ratios. Despite the importance of these measures to Trustmark, there are no standardized definitions for them and, as a result, Trustmark's calculations may not be comparable with other organizations. Also, there may be limits in the usefulness of these measures to investors. As a result, Trustmark encourages readers to consider its audited consolidated financial statements and the notes related thereto in their entirety and not to rely on any single financial measure.

Edgar Filing: TRUSTMARK CORP - Form 10-K

The following table reconciles Trustmark's calculation of these measures to amounts reported under GAAP for the periods presented (\$ in thousands, except per share data):

	Years Ended December 31,					
	2017		2016		2015	
TANGIBLE EQUITY						
AVERAGE BALANCES						
Total shareholders' equity	\$1,560,884		\$1,517,955		\$1,460,650	
Less: Goodwill	(375,947)		(366,156)		(365,613)	
Identifiable intangible assets	(18,885)		(24,132)		(30,686)	
Total average tangible equity	\$1,166,052		\$1,127,667		\$1,064,351

Common equity tier 1 risk-based capital ratio (e)/(c)	11.77	%	12.16	%	12.57	%

(1) Calculated using net income adjusted for intangible amortization divided by total average tangible equity

(2) Includes other intangible assets, net of DTLs, disallowed deferred tax assets, threshold deductions and transition adjustments, as applicable

Significant Non-routine Transactions

Trustmark discloses certain non-GAAP financial measures, including net income adjusted for significant non-routine transactions, because Management uses these measures for business planning purposes, including to manage Trustmark's business against internal projected results of operations and to measure Trustmark's performance. Trustmark views net income adjusted for significant non-routine transactions as a measure of its core operating business, which excludes the impact of the items detailed below, as these items are generally not operational in nature. This non-GAAP measure also provides another basis for comparing period-to-period results as presented in the accompanying selected financial data table and the audited consolidated financial statements by excluding potential differences caused by non-operational and unusual or non-recurring items. Readers are cautioned that these adjustments are not permitted under GAAP. Trustmark encourages readers to consider its audited consolidated financial statements and the notes related thereto, included in Part II. Item 8. – Financial Statements and Supplementary Data of this report, in their entirety, and not to rely on any single financial measure.

Edgar Filing: TRUSTMARK CORP - Form 10-K

The following table presents adjustments to net income and select financial ratios as reported in accordance with GAAP resulting from significant non-routine items occurring during the periods presented (\$ in thousands, except per share data):

	Years Ended December 31,					
	2017		2016		2015	
	Amount	Diluted EPS	Amount	Diluted EPS	Amount	Diluted EPS
Net Income (GAAP)	\$105,630	\$ 1.556	\$108,411	\$ 1.599	\$116,038	\$ 1.714

Return on average assets	0.77 %	0.95 %	0.84 %	0.89 %	0.95 %	n/a

Re-measurement of Net Deferred Taxes

During the fourth quarter of 2017, Trustmark re-measured its net deferred tax assets subsequent to the enactment of the Tax Reform Act which resulted in the reduction of the corporate federal income tax rate. In accordance with FASB ASC Topic 740, "Income Taxes," Trustmark recorded a one-time increase in deferred income tax expense of \$25.6 million for the year ended December 31, 2017.

Elimination of Deferred Tax Valuation Allowance

During 2013, a deferred tax valuation allowance was created as a result of Trustmark's merger with BancTrust Financial Group, Inc. (BancTrust) and was established to reduce deferred tax assets to the amount that was more likely than not to be realized in future years. Trustmark has continually evaluated this allowance since inception and, based on the weight of the available evidence, has determined that the deferred tax assets will not be subject to the limitations of Internal Revenue Code, Section 382 on the deductibility of built-in losses in future years. During the fourth quarter of 2017, Trustmark eliminated the valuation allowance and recorded a one-time decrease in deferred income tax expense of \$8.7 million.

Defined Benefit Pension Plan Termination Expense

As previously reported, on July 26, 2016, the Board of Directors of Trustmark authorized the termination of the Plan, a noncontributory tax-qualified defined benefit pension plan, effective as of December 31, 2016. The final distributions were made from current plan assets and a one-time pension settlement expense of \$17.6 million, before taxes, which is included in noninterest expense for the year ended December 31, 2017.

Reliance Merger Transaction Expenses

On April 7, 2017, Trustmark completed its previously announced merger with Reliance. The operations of Reliance are included in Trustmark's operating results from April 7, 2017 and did not have a material impact on Trustmark's results of operations. During the second quarter of 2017, Trustmark included non-routine merger transaction expenses in other expense totaling \$3.2 million, before tax.

Non-taxable Gain on Acquired Life Insurance Proceeds

During the second quarter of 2017, Trustmark received non-routine, non-taxable proceeds related to life insurance acquired in a previous acquisition. Included in other income, net for the year ended December 31, 2017 were non-routine, non-taxable proceeds of \$4.9 million.

Early Retirement Program Expense

During the second quarter of 2016, Trustmark completed a voluntary early retirement program (ERP) as a proactive measure to manage noninterest expense. Included in noninterest expense for the year ended December 31, 2016 were non-routine expenses related to the ERP totaling \$9.8 million, before taxes, (\$9.6 million included in salaries and employee benefits expense and \$213 thousand included in other expense).

Pension Expense Due to De-risking Strategy in Plan Assets Portfolio

On July 26, 2016, the Board of Directors of Trustmark authorized the termination of the Plan effective December 31, 2016. As a result of Trustmark's de-risking investment strategy for the Plan as of June 30, 2016, the expected rate of return on plan assets during the second half of 2016 decreased from 6.0% to 2.5%, which resulted in increased periodic benefit costs for the Plan. Included in salaries and employee benefits expense for the year ended December 31, 2016, were non-routine pension expenses related to the de-risking investment strategy for the plan assets totaling \$1.3 million, before tax.

Results of Operations

Net Interest Income

Net interest income is the principal component of Trustmark's income stream and represents the difference, or spread, between interest and fee income generated from earning assets and the interest expense paid on deposits and borrowed funds. Fluctuations in interest rates, as well as volume and mix changes in earning assets and interest-bearing liabilities, can materially impact net interest income. The net interest margin is computed by dividing fully taxable equivalent (FTE) net interest income by average interest-earning assets and measures how effectively Trustmark utilizes its interest-earning assets in relationship to the interest cost of funding them. The accompanying Yield/Rate Analysis Table shows the average balances for all assets and liabilities of Trustmark and the interest income or expense associated with earning assets and interest-bearing liabilities. The yields and rates have been computed based upon interest income and expense adjusted to a FTE basis using a 35.0% federal marginal tax rate for all periods shown. Loans on nonaccrual have been included in the average loan balances, and interest collected prior to these loans having been placed on nonaccrual has been included in interest income. Loan fees included in interest associated with the average loan balances are immaterial.

Net interest income-FTE for 2017 increased \$21.5 million, or 5.3%, when compared with 2016. The net interest margin decreased 5 basis points to 3.48% for 2017 when compared to 2016. The decrease in the net interest margin was primarily the result of increases in the cost of interest-bearing liabilities in conjunction with rising rates in general, partially offset by an increase in the yield on LHFS and LHFI. The net interest margin excluding acquired loans, which equals the reported net interest income-FTE excluding interest and fees on acquired loans, as a percentage of average earning assets excluding average acquired loans, for 2017 was 3.36%, a decrease of 1 basis point when compared to 2016, due to the factors discussed above.

Average interest-earning assets for 2017 were \$12.274 billion compared to \$11.485 billion for 2016 an increase of \$789.1 million, or 6.9%. The growth in average earning assets during 2017 was primarily due to an increase in average loans (LHFS and LHFI) of \$820.5 million, or 10.8%, partially offset by a decrease in average acquired loans of \$46.8 million, or 14.1%. The increase in average loans (LHFS and LHFI) was primarily attributable to the \$718.8

million, or 9.2%, increase in the LHFI portfolio when balances at December 31, 2017 are compared to balances at December 31, 2016. This increase represented net growth across all of Trustmark's market regions and all categories in its LHFI portfolio. The decline in average acquired loans during 2017 was primarily attributable to anticipated pay-offs of acquired loans, principally related to the BancTrust merger, as well as the reclassification of \$36.7 million of acquired loans not accounted for under FASB ASC Topic 310-30 to LHFI due to the discount on these loans being fully amortized, partially offset by the loans acquired in the Reliance merger.

During 2017, interest and fees on LHFS and LHFI-FTE increased \$46.8 million, or 14.8%, when compared to 2016, due to growth in LHFI, while the yield on loans (LHFS and LHFI) increased 15 basis points to 4.31% as a result of increases in interest rates. During 2017, interest and fees on acquired loans decreased \$5.7 million, or 18.8%, compared to 2016, due to declines in recoveries on settlement of debt and accretion income, primarily related to loans acquired in the BancTrust merger, as acquired loans continue to pay-down as anticipated, partially offset by interest and fees on loans acquired in the Reliance merger. As a result, the yield on acquired loans decreased 50 basis points to 8.59% when 2017 is compared to 2016. During 2017, interest on securities decreased \$2.5 million, or 3.0%, and the yield on securities declined 8 basis points to 2.31%, compared to 2016, principally due to calls, maturities

and pay-downs of the underlying loans of higher yielding securities being replaced with lower yielding securities as well as a decline in the yield maintenance payments on prepaid mortgage-backed securities. As a result of these factors, interest income-FTE increased \$39.2 million, or 9.1%, when 2017 is compared to 2016, while the yield on total earning assets increased 8 basis points to 3.83%.

Average interest-bearing liabilities for 2017 totaled \$8.963 billion compared to \$8.281 billion for 2016, an increase of \$682.1 million, or 8.2%. The increase in average interest-bearing liabilities was principally due to increases in average short-term borrowings and interest-bearing deposits, partially offset by a decline in average long-term FHLB advances. Average short-term borrowings for 2017 increased \$768.3 million when compared to 2016, principally due to the increased balance in outstanding short-term FHLB advances with the FHLB of Dallas. Average interest-bearing deposits for 2017 increased \$481.3 million, or 7.2%, when compared to 2016 principally due to growth in all categories of interest-bearing deposits as well as the deposits acquired in the Reliance merger. Average long-term FHLB advances decreased \$536.7 million, or 84.6%, during 2017, primarily due to the \$500.0 million long-term FHLB advance obtained from the FHLB of Dallas that was reclassified to short-term during December 2016 and the \$250.0 million long-term FHLB advance obtained from the FHLB of Dallas during May 2016 that was reclassified to short-term in May 2017.

Total interest expense for 2017 increased \$17.7 million, or 72.1%, when compared with 2016, principally due to rising interest rates in general. Interest expense on deposits for 2017 increased \$10.0 million, or 78.2%, when compared to 2016, principally due to rising rates in general, accompanied by increases in average balances of all categories of interest-bearing deposits. The rate on interest-bearing deposits increased 13 basis points to 0.32% for 2017 compared to 0.19% for 2016. Interest on federal funds purchased and securities sold under repurchase agreements increased \$2.4 million while the rate increased 46 basis points to 0.81% when 2017 is compared to 2016 principally due to increases in the target range for the federal funds rate by the FRB. Other interest expense increased \$5.3 million, or 52.5%, while the rate on other borrowings increased 27 basis points to 1.18% when the year ended December 31, 2017 is compared to the year ended December 31, 2016, principally due to increases in rates in general, accompanied by increases in average balances of short-term FHLB advances partially offset by the decline in interest expense on the subordinated notes which matured in December 2016. As a result of these factors, the overall rate on interest-bearing liabilities increased 17 basis points to 0.47% when 2017 is compared with 2016.

Net interest income-FTE for 2016 decreased \$2.3 million, or 0.6%, when compared with 2015. The net interest margin decreased 25 basis points to 3.53% for 2016 when compared to 2015. The decrease in the net interest margin reflected the prolonged low interest rate environment in the United States, and was primarily the result of decreases in the yield on acquired loans principally due to declines in accretion income and recoveries on settlement of debt related to acquired loans, downward repricing of LHFI in response to increased competitive pricing pressures and decreases in the yield on taxable securities. The net interest margin excluding acquired loans, which equals the reported net interest income-FTE excluding interest and fees on acquired loans, as a percentage of average earning assets excluding average acquired loans, for 2016 was 3.37%, a decrease of 9 basis points when compared to 2015, due to similar factors as discussed above.

Average interest-earning assets for 2016 were \$11.485 billion compared to \$10.791 billion for 2015 an increase of \$693.4 million, or 6.4%. The growth in average earning assets during 2016 was primarily due to an increase in average loans (LHFS and LHFI) of \$846.3 million, or 12.5%, partially offset by a decrease in average acquired loans of \$130.9 million, or 28.3% and a decline in average total securities of \$38.7 million, or 1.1%. The increase in average loans (LHFS and LHFI) was primarily attributable to the \$759.8 million, or 10.7%, increase in the LHFI portfolio when balances at December 31, 2016 are compared to balances at December 31, 2015. This increase represented net growth across all of Trustmark's market regions and all categories in its LHFI portfolio, with the exception of other loans. The decline in average acquired loans during 2016 was primarily attributable to anticipated pay-offs of acquired loans, principally related to the BancTrust merger. The decline in average total securities during 2016 was primarily attributable to calls, maturities and pay-downs of the loans underlying these securities.

During 2016, interest and fees on LHFS and LHFI-FTE increased \$27.5 million, or 9.5%, when compared to 2015, due to growth in LHFI, while the yield on loans (LHFS and LHFI) fell 12 basis points to 4.16% as a result of downward repricing of LHFI due to the current interest rate environment and related competitive pressures. During 2016, interest and fees on acquired loans decreased \$21.0 million, or 41.1%, compared to 2015, due to declines in accretion income and recoveries on settlement of debt as acquired loans continue to pay-down as anticipated. As a result, the yield on acquired loans decreased to 9.09% compared to 11.06% during 2015. During 2016, interest on securities-taxable decreased \$3.1 million, or 3.9%, and the yield on taxable securities declined 8 basis points to 2.31%, compared to 2015, principally due to calls, maturities and pay-downs of the underlying loans of higher yielding securities being replaced with lower yielding securities reflecting the current interest rate environment as well as a decline in the yield maintenance payments on prepaid mortgage-backed securities. As a result of these factors, interest income-FTE increased \$1.8 million, or 0.4%, when 2016 is compared to 2015. The impact of these changes is also illustrated by the decline in the yield on total earning assets, which fell from 3.97% for 2015 to 3.75% for 2016, a decrease of 22 basis points.

Average interest-bearing liabilities for 2016 totaled \$8.281 billion compared to \$7.890 billion for 2015, an increase of \$391.0 million, or 5.0%. The increase in average interest-bearing liabilities was attributable to an increase in average long-term FHLB advances partially offset by declines in all other categories of average interest-bearing liabilities. Average long-term FHLB advances increased

\$620.8 million during 2016, primarily due to the \$500.0 million long-term FHLB advance obtained from the FHLB of Dallas during December 2015 and the \$250.0 million long-term FHLB advance obtained from the FHLB of Dallas during May 2016. Average interest-bearing deposits for 2016 decreased \$174.5 million, or 2.5%, when compared to 2015, principally due to declines in average time deposits, reflecting Trustmark's continued efforts to reduce high-cost deposit balances and customers continued movement away from longer-term commitments as a result of the low interest rate environment. Average short-term borrowings decreased \$45.1 million, or 10.9%, when 2016 is compared to 2015, which was primarily attributable to a decrease in the amount of short-term FHLB advances obtained from the FHLB of Dallas during 2016 partially offset by the \$500.0 million FHLB advance with the FHLB of Dallas that was reclassified from long-term to short-term during December 2016.

Total interest expense during 2016 increased \$4.1 million, or 20.0%, when compared with 2015, principally due to the increase in other interest expense. Other interest expense increased \$3.0 million, or 42.8%, when 2016 is compared to 2015, primarily due to increases in interest expense on long-term FHLB advances and short-term borrowings. Interest expense on long-term FHLB advances increased \$2.1 million during 2016, while the rate on long-term FHLB advances decreased 3 basis points to 0.33%, compared to 2015, reflecting the increase in the outstanding long-term FHLB advances with the FHLB of Dallas. Interest expense on short-term borrowings increased \$836 thousand, or 29.2%, during 2016 primarily due to a \$1.1 million increase in interest expense on short-term FHLB advances, while the rate for short-term borrowings increased 31 basis points to 1.00%. Interest on federal funds purchased and securities sold under reverse repurchase agreements increased \$916 thousand when 2016 is compared to 2015, while the rate on federal funds purchased and securities sold under reverse repurchase agreements increased 19 basis points to 0.35%. The increase in the rate on federal funds purchased and securities sold under reverse repurchase agreements during 2016 was principally due to the increase in rates by the FRB. As a result of these factors, the overall yield on interest-bearing liabilities increased 4 basis points to 0.30% when 2016 is compared with 2015.

Edgar Filing: TRUSTMARK CORP - Form 10-K

The following table provides the tax equivalent basis yield or rate for each component of the tax equivalent net interest margin for the periods presented (\$ in thousands):

	Years Ended December 31, 2017			2016			2015		
	Average Balance	Interest	Yield/ Rate	Average Balance	Interest	Yield/ Rate	Average Balance	Interest	Yield/ Rate
Assets

Total interest-bearing liabilities	6,766	10,932	17,698	957	3,130	4,087
Change in net interest income on a tax						
equivalent basis	\$24,111	\$(2,649)	\$21,462	\$20,857	\$(23,181)	\$(2,324)

The change in interest due to both volume and yield or rate has been allocated to change due to volume and change due to yield or rate in proportion to the absolute value of the change in each. Tax-exempt income has been adjusted to a tax equivalent basis using a tax rate of 35.0% for each of the three years presented. The balances of nonaccrual loans and related income recognized have been included for purposes of these computations.

Provision for Loan Losses, LHFI

The provision for loan losses, LHFI is determined by Management as the amount necessary to adjust the allowance for loan losses, LHFI to a level, which, in Management's best estimate, is necessary to absorb probable losses within the existing loan portfolio. The provision for loan losses, LHFI reflects loan quality trends, including the levels of and trends related to nonaccrual LHFI, past due LHFI, potential problem LHFI, criticized LHFI, net charge-offs or

recoveries and growth in the LHFI portfolio among other factors. Accordingly, the amount of the provision reflects the necessary increases or decreases in the allowance for loan losses, LHFI related to adjustments for specific loans or loan pools as a result of growth in the portfolio and evaluation of current impairment analyses, actions taken with respect to risk ratings on loans and other adjustments resulting from changes in qualitative factors. The provision for loan losses, LHFI totaled \$15.1 million for 2017, \$11.0 million for 2016 and \$8.4 million for 2015. See the section captioned “Allowance for Loan Losses, LHFI” for further analysis of the provision for loan losses, LHFI.

Provision for Loan Losses, Acquired Loans

The provision for loan losses, acquired loans is recognized subsequent to acquisition to the extent it is probable that Trustmark will be unable to collect all cash flows expected at acquisition plus additional cash flows expected to be collected arising from changes in estimates after acquisition, considering both the timing and amount of those expected cash flows. Provisions may be required when actual losses of unpaid principal incurred exceed previous loss expectations to date, or future cash flows previously expected to be collectible are no longer probable of collection. The provision for loan losses, acquired loans is reflected as a valuation allowance

netted against the carrying value of the acquired loans. The decrease in the provision for loan losses, acquired loans when 2017 is compared to 2016 was principally due to changes in expectations based on the periodic re-estimations performed during the respective periods and a decline in acquired loan balances. The increase in the provision for loan losses, acquired loans when 2016 is compared to 2015 was principally due to changes in expectations based on the periodic re-estimations performed during the year, primarily related to loans acquired from BancTrust.

The following table presents the provision for loan losses, acquired loans, by acquisition for the periods presented (\$ in thousands):

	Years Ended December 31,		
	2017	2016	2015
BancTrust	\$(6,089)	\$4,143	\$3,899
Bay Bank	(1,323)	(50)	(24)
Heritage	(122)	(336)	(450)
Reliance	139	—	—
Total provision for loan losses, acquired loans	\$(7,395)	\$3,757	\$3,425

Noninterest Income

Noninterest income represented 31.2%, 31.0% and 30.7% of total revenue, before securities gains (losses), net in 2017, 2016 and 2015, respectively. The following table provides the comparative components of noninterest income for the periods presented (\$ in thousands):

	Years Ended December 31,					
	2017		2016		2015	
	Amount	% Change	Amount	% Change	Amount	% Change
Service charges on deposit accounts	\$44,003	-2.8 %	\$45,253	-4.5 %	\$47,366	-2.7 %
Bank card and other fees	28,286	1.4 %	27,906	-1.4 %	28,298	-14.2 %
Mortgage banking, net	29,902	6.0 %	28,212	-6.5 %	30,176	21.8 %
Insurance commissions	38,168	3.8 %	36,764	0.9 %	36,424	8.8 %
Wealth management	30,340	-0.5 %	30,492	-2.8 %	31,369	-3.0 %

Total Noninterest Income	\$184,663	6.2 %	\$173,943	0.5 %	\$173,149	—

n/m - percentage changes greater than +/- 100% are not considered meaningful

Changes in various components of noninterest income are discussed in further detail below. For analysis of Trustmark's insurance commissions and wealth management income, please see the section captioned "Results of Segment Operations."

Service Charges on Deposit Accounts

The decline in service charges on deposit accounts when 2017 is compared to 2016 was principally due to decline in service charges of \$734 thousand, or 4.8%, primarily related to commercial and consumer demand deposit accounts and a decline in non-sufficient fund (NSF) and overdraft fees of \$516 thousand, or 1.7%, primarily related to commercial demand deposit accounts and consumer interest checking accounts.

The decline in service charges on deposit accounts when 2016 is compared to 2015 was principally due to a \$1.5 million, or 4.6%, decrease in NSF and overdraft charges on consumer deposit accounts and a \$436 thousand, or 4.7%, decrease in service charges on consumer deposit accounts. The decline in NSF and overdraft charges on deposit accounts during 2016 was primarily the result of balances in consumer deposit accounts increasing 3.5% during 2016 providing more available funds to complete banking transactions.

Mortgage Banking, Net

The following table illustrates the components of mortgage banking, net included in noninterest income for the periods presented (\$ in thousands):

	Years Ended December 31,							
	2017		2016		2015			
	Amount	% Change	Amount	% Change	Amount	% Change		
Mortgage servicing income, net	\$21,663	4.5 %	\$20,724	5.6 %	\$19,625	5.4 %		
Change in fair value-MSR from runoff	(10,780)	6.7 %	(10,106)	6.1 %	(9,527)	11.2 %		
Gain on sales of loans, net	18,934	-7.8 %	20,535	14.3 %	17,965	66.8 %		
Other, net	(169)	n/m	(84)	n/m	233	-74.2 %		
Mortgage banking income before hedge ineffectiveness	29,648	-4.6 %	31,069	9.8 %	28,296	30.2 %		
Change in fair value-MSR from market changes	(1,050)	n/m	(406)	n/m	1,577	n/m		
Change in fair value of derivatives	1,304	n/m	(2,451)	n/m	303	-97.0 %		
Net hedge ineffectiveness	254	n/m	(2,857)	n/m	1,880	-38.4 %		
Mortgage banking, net	\$29,902	6.0 %	\$28,212	-6.5 %	\$30,176	21.8 %		

n/m - percentage changes greater than +/- 100% are not considered meaningful

The increase in mortgage banking, net for 2017 when compared to 2016 was principally due to a net positive hedge ineffectiveness for 2017 compared to a net negative hedge ineffectiveness for 2016 and an increase in mortgage servicing income, net, partially offset by a decline in gains on sales of loans, net. The decrease in mortgage banking, net for 2016 when compared to 2015 was principally due to a net negative hedge ineffectiveness for 2016 compared to a net positive hedge ineffectiveness for 2015, partially offset by increases in gain on sales of loans, net and mortgage servicing income, net. Mortgage loan production decreased \$250.8 million, or 15.6%, during 2017 to total \$1.355 billion, reflecting the current rising interest rate environment. Mortgage loan production increased \$124.2 million, or 8.4%, during 2016 to total \$1.606 billion, which continued to reflect increased mortgage lending activity due to low mortgage rates. Loans serviced for others totaled \$6.624 billion at December 31, 2017, compared with \$6.371 billion at December 31, 2016, and \$5.971 billion at December 31, 2015.

Representing a significant component of mortgage banking income is gain on sales of loans, net. The decrease in the gain on sales of loans, net when 2017 is compared to 2016 resulted primarily from a decline in the volume of loans sold partially offset by higher profit margins from secondary marketing activities. The increase in the gain on sales of loans, net when 2016 is compared to 2015 resulted from both higher profit margins from secondary marketing activities as well as higher volumes of loans sold. Loan sales decreased \$205.4 million, or 14.8%, during 2017 to total \$1.179 billion compared to an increase of \$138.0 million, or 11.1%, during 2016 to total \$1.384 billion. The decrease in loan sales during 2017 was principally due to the decline in mortgage lending activity due to increasing interest rates. The increase in loans sales during 2016 was due to increased mortgage lending activity and Trustmark's decision during 2015 to sell the vast majority of these lower-rate, longer-term home mortgages in the secondary market, rather than replacing the run-off in its single-family loan portfolio.

Other Income, Net

The following table illustrates the components of other income, net included in noninterest income for the periods presented (\$ in thousands):

Edgar Filing: TRUSTMARK CORP - Form 10-K

	Years Ended December 31,						
	2017		2016		2015		
		%		%		%	
	Amount	Change	Amount	Change	Amount	Change	
Partnership amortization for tax credit purposes	\$ (9,560)	-3.6 %	\$ (9,916)	-1.3 %	\$ (10,050)	-15.0 %	
Increase in life insurance cash surrender value	7,125	3.4 %	6,891	2.8 %	6,702	-8.7 %	
Other miscellaneous income	16,384	89.4 %	8,651	n/m	2,864	-43.8 %	
Total other, net	\$ 13,949	n/m	\$ 5,626	n/m	\$ (484)	n/m	

n/m - percentage changes greater than +/- 100% are not considered meaningful

The increase in other income, net when 2017 is compared to 2016 was primarily due to an increase in other miscellaneous income as a result of \$4.4 million of non-taxable bank-owned life insurance proceeds and the \$4.9 million of non-routine, non-taxable proceeds related to life insurance acquired as part of a previous acquisition received during 2017. Excluding the non-taxable life insurance proceeds, other miscellaneous income for 2017 decreased \$734 thousand, or 23.0%, when compared to 2016. The increase in other income, net when 2016 is compared to 2015, was primarily due to a decrease in the net reduction of the FDIC indemnification asset related to the acquired covered loans and covered other real estate, a net gain on the sale of premises and equipment as a result of the

sale of a former bank branch during 2016 compared to a net loss on the sale of premises and equipment recorded during 2015 on the sale of a former bank branch acquired in the BancTrust merger and an increase in other miscellaneous income related to various vendor contract bonuses and settlements, an one-time arrangement fee and merchant service fees received during 2016.

Noninterest Expense

The following table illustrates the comparative components of noninterest expense for the periods presented (\$ in thousands):

	Years Ended December 31,		2016		2015	
	2017	%	2016	%	2015	%
	Amount	Change	Amount	Change	Amount	Change
Salaries and employee benefits	\$234,987	-1.9 %	\$239,637	4.1 %	\$230,198	1.5 %

Other real estate expense:						
Write-downs	3,296	-26.1 %	4,463	7.0 %	4,171	-50.7 %
Net (gain)/loss on sale	(2,091)	-70.3 %	(7,030)	74.0 %	(4,040)	8.6 %
Carrying costs	2,467	-21.8 %	3,153	-33.9 %	4,772	-27.5 %
Total other real estate expense	3,672	n/m	586	-88.0 %	4,903	-56.7 %
FDIC assessment expense	11,010	-2.1 %	11,243	4.8 %	10,728	5.2 %
Other expense	51,743	8.0 %	47,930	-2.4 %	49,122	-8.8 %
Total noninterest expense	\$430,169	5.6 %	\$407,298	1.4 %	\$401,662	-1.8 %

n/m - percentage changes greater than +/- 100% are not considered meaningful

Changes in the various component of noninterest expense are discussed in further detail below. Management considers disciplined expense management a key area of focus in the support of improving shareholder value.

Salaries and Employee Benefits

During the second quarter of 2016, Trustmark completed a voluntary ERP as a proactive measure to manage noninterest expense. As a result of the ERP, 188 of the eligible associates retired from Trustmark by June 30, 2016. The ERP resulted in non-routine expenses totaling \$9.8 million (\$9.6 million included in salaries and employee benefits expense and \$213 thousand included in other expense) during 2016. As a result of the ERP, Trustmark realized cost savings in salaries and employee benefits expense of \$4.4 million during 2016.

As previously announced, on July 26, 2016, the Board of Directors of Trustmark authorized the termination of the Plan, a noncontributory tax-qualified defined benefit pension plan, effective December 31, 2016. As a result of Trustmark's de-risking investment strategy for the Plan as of June 30, 2016, the expected rate of return on plan assets during the second half of 2016 decreased from 6.0% to 2.5%, which resulted in increased periodic benefit costs for the Plan. Included in salaries and employee benefits expense for the year ended December 31, 2016, were non-routine pension expenses related to the de-risking investment strategy for the plan assets totaling \$1.3 million.

The decrease in salaries and employee benefits, the largest component of noninterest expense, when 2017 is compared to 2016 was primarily due to the non-routine transaction expenses recorded in 2016. Excluding the non-routine transactions, salaries and employee benefits increased \$6.3 million, or 2.7%, when 2017 is compared to 2016 primarily due to increase in salaries and incentive compensation as a result of general merit increase and the addition of the employees from Reliance. The increase in salaries and employee benefits, the largest category of noninterest expense, when 2016 is compared to 2015, was primarily due to non-routine transaction expenses related to the ERP and Plan termination and higher commissions expense as a result of improvements in mortgage loan production, partially offset by cost savings realized related to the ERP.

Services and Fees

The increase in services and fees expense when 2017 is compared to 2016 was primarily to due to increases in data processing expenses related to software, partially offset by declines in other outside services and fees. The increase in services and fees expense when 2016 is compared to 2015, was primarily to due to increases in data processing expenses related to software, other outside services and fees and advertising, partially offset by declines in legal and communications expenses.

Other Real Estate Expense

The increase in other real estate expense for 2017 compared to 2016 was principally due to a decline in the net gain on sales of other real estate partially offset by a decline in write-downs on other real estate. The decrease in other real estate expense for 2016 compared to 2015 was principally due to an increase in the net gain on sales of other real estate and a decrease in other real estate carrying costs. The net gain on sale of other real estate for 2017 totaled \$2.1 million, compared to a net gain on the sale of other real estate of \$7.0 million for 2016 and \$4.0 million for 2015. For additional analysis of other real estate and foreclosure expenses, please see the section captioned “Nonperforming Assets, Excluding Acquired Loans and Covered Other Real Estate.”

Other Expense

The following table illustrates the comparative components of other noninterest expense for the periods presented (\$ in thousands):

	Years Ended December 31,							
	2017		2016		2015			
	Amount	% Change	Amount	% Change	Amount	% Change	Amount	% Change
Loan expense	\$10,908	-10.8 %	\$12,226	-4.7 %	\$12,835	-0.9 %		
Amortization of intangibles	6,169	-10.2 %	6,866	-12.2 %	7,819	-10.7 %		
Other miscellaneous expense	34,666	20.2 %	28,838	1.3 %	28,468	-11.5 %		
Total other expense	\$51,743	8.0 %	\$47,930	-2.4 %	\$49,122	-8.8 %		

The increased in other expense for 2017 when compared to 2016 was principally due to non-routine transaction expenses related to the Reliance merger completed on April 7, 2017 as well as increases in various other miscellaneous expenses. Excluding these non-routine transaction expenses, other expense for 2017 increased \$788 thousand, or 1.7%, compared to 2016.

The decline in other expense when 2016 is compared to 2015 was primarily due to decreases in franchise taxes, the amortization of the non-taxable core deposit intangible asset and loan expenses, partially offset by increases in customer related fraud losses and a property valuation adjustment recorded during 2016 related to properties transferred to assets held for sale. During 2016, Trustmark continued its measured approach to the optimization of its retail delivery channels by consolidated nine branch offices across the Alabama, Florida and Mississippi market regions, and reallocated a portion of those resources into a new banking center in Tuscaloosa, Alabama, and a new loan production office in Pensacola, Florida. Seven of the closed branches as well as two pieces of property previously purchased in anticipation of a future branch were transferred to assets held for sale during 2016 at the lower of the current book value or the fair value less costs to sell. A property valuation adjustment of \$750 thousand was recorded as a result of transferring these properties to assets held for sale.

Results of Segment Operations

Trustmark’s operations are managed along three operating segments: General Banking Division, Wealth Management Division and Insurance Division. A description of each segment and the methodologies used to measure financial performance and financial information by reportable segment are included in Note 20 – Segment Information located in Part II. Item 8. – Financial Statements and Supplementary Data of this report.

The following table provides the net income by reportable segment for the periods presented (\$ in thousands):

	Years Ended December 31,		
	2017	2016	2015
General Banking	\$97,706	\$99,083	\$106,738
Wealth Management	2,244	4,124	3,850
Insurance	5,680	5,204	5,450
Consolidated Net Income	\$105,630	\$108,411	\$116,038

General Banking

Net interest income for the General Banking Division for 2017 increased \$19.8 million, or 5.1%, when compared with 2016. The increase in net interest income was principally due to an increase in interest and fees on LHFS and LHFI, which were partially offset by declines in interest and fees on acquired loans and interest on securities and an increase in total interest expense. Net interest income for the General Banking Division for 2016 decreased \$4.5 million, or 1.1%, when compared with 2015. The decrease in net interest income was principally due to declines in interest and fees on acquired loans and interest on taxable securities and an increase in other interest expense, which were partially offset by an increase in interest and fees on LHFS and LHFI. The provision for loan losses, net during 2017 totaled \$7.7 million compared with \$14.7 million during 2016 and \$11.8 million during 2015. For more information on these net interest income items, please see the sections captioned “Financial Highlights” and “Results of Operations.”

Noninterest income for the General Banking Division increased \$9.1 million, or 8.5%, during 2017 compared to an increase of \$1.6 million, or 1.5%, during 2016. During 2017, Trustmark received \$4.9 million in non-taxable proceeds related to life insurance acquired in a previous acquisition and \$4.4 million of non-taxable proceeds related to bank-owned life insurance. Excluding these non-taxable proceeds, noninterest income for the General Banking Division was relatively unchanged when 2017 is compared to 2016. Noninterest income for the General Banking Division represented 22.2% of total revenue for 2017, 21.7% for 2016 and 21.2% for 2015. Noninterest income for the General Banking Division includes service charges on deposit accounts; bank card and other fees; mortgage banking, net; other, net and securities gains (losses), net. For more information on these noninterest income items, please see the analysis included in the section captioned "Noninterest Income."

Noninterest expense for the General Banking Division increased \$18.7 million, or 5.3%, during 2017 compared to an increase of \$6.3 million, or 1.8%, during 2016. The increase in noninterest expense for 2017 was principally due to non-routine transaction expenses related to the termination of the defined benefit pension plan and the Reliance merger. The increase in noninterest expense for 2016 was principally due to increases in salaries and employee benefits expense, primarily as a result of non-routine expenses related to the ERP, increased commission expense due to improved mortgage loan production and non-routine pension expense resulting from the de-risking strategy for plan assets in anticipation of the termination of the Plan, and services and fees, partially offset by declines in other real estate expense and other expense. For more information on these noninterest expense items, please see the analysis included in the section captioned "Noninterest Expense."

Wealth Management

During 2017, net income for the Wealth Management Division decreased \$1.9 million, or 45.6%, compared to an increase of \$274 thousand, or 7.1%, during 2016. Net interest income for the Wealth Management Division, which primarily consists of interest income earned on deposit accounts held by the Wealth Management Division, increased \$184 thousand, or 25.3%, during 2017 compared to an increase of \$389 thousand during 2016. Noninterest income, which includes income related to investment management, trust and brokerage services, increased \$168 thousand, or 0.6%, during 2017, compared to a decrease of \$1.1 million, or 3.6%, during 2016. The slight increase in noninterest income for the Wealth Management Division during 2017 was primarily attributable to an increase in commissions generated by the brokerage services unit, which was largely offset by declines in trust management fees as well as a decline in annuity income generated by the brokerage services unit. The decrease in noninterest income for the Wealth Management Division during 2016 was primarily attributable to declines in commissions and annuity income generated by the brokerage services unit and trust fees related to retirement planning and personal estate services, partially offset by growth in trust asset management fee income from mutual funds and custody services. Noninterest expense increased \$3.4 million, or 14.1%, during 2017 compared to a decrease of \$1.2 million, or 4.7%, during 2016. The increase in noninterest expense for the Wealth Management Division during 2017 was principally due to increases in outside services and fees, other miscellaneous expenses and allocated general overhead expense. The decrease in noninterest expense for the Wealth Management Division during 2016 was principally due to decreases in salaries and employee benefits, primarily due to lower commissions and salary expense partially offset by an increase in trust incentives expense, and data processing charges.

At December 31, 2017 and 2016, Trustmark held assets under management and administration of \$10.640 billion and \$10.255 billion and brokerage assets of \$1.780 billion and \$1.643 billion, respectively.

Insurance

Net income for the Insurance Division during 2017 increased \$476 thousand, or 9.1%, compared to a decrease of \$246 thousand, or 4.5%, during 2016. Noninterest income for the Insurance Division, which predominately consists of insurance commissions, increased \$1.4 million, or 3.9%, during 2017, compared to an increase of \$340 thousand, or 0.9%, during 2016. The increase in noninterest income for the Insurance Division during 2017 was primarily due to new business volume principally in property and casualty coverage as well as increases in other commission

income. The slight increase in insurance commissions during 2016 was primarily due to new business commission volume primarily in group health coverage and an increase in contingent commissions from insurance companies, which was mostly offset by declines in business commission volume in property and casualty coverage and policy fees and other income. General business activity in Trustmark's geographic markets continues to improve marginally, resulting in increases in the demand for coverage on inventories, property, equipment, general liability and workers' compensation.

Noninterest expense for the Insurance Division increased \$809 thousand, or 2.8%, during 2017 and \$532 thousand, or 1.9%, during 2016. The increase in noninterest expense for the Insurance Division during 2017 was primarily due to higher salaries and commissions expense resulting from modest general merit increases and improved performance as well as an increase in travel and entertainment expenses. The slight increase in noninterest expense for the Insurance Division during 2016 was principally due to increases in salaries and insurance expenses.

During 2017, business conditions improved slightly in the markets served by FBBI. Trustmark performed an annual impairment test of the book value of goodwill held in the Insurance Division as of October 1, 2017, 2016, and 2015. Based on this analysis,

Trustmark concluded that no impairment charge was required. A renewed period of falling prices and suppressed demand for the products of the Insurance Division may result in impairment of goodwill in the future. FBBI's ability to maintain the current income trend is dependent on the success of the subsidiary's continued initiatives to attract new business through cross referrals between practice units and bank relationships and seeking new business in other markets.

Income Taxes

For the year ended December 31, 2017, Trustmark's combined effective tax rate was 31.6% compared to 22.3% in 2016 and 23.4% in 2015. During the fourth quarter of 2017, Trustmark incurred non-routine income tax expenses of \$17.0 million related to the re-measurement of Trustmark's net deferred tax assets due to the enactment of the Tax Reform Act and the elimination of a deferred tax valuation allowance related to a prior merger. Excluding the effect of these non-routine income tax expenses, Trustmark's combined effective tax rate for 2017 was 20.6%. Trustmark invests in partnerships that provide income tax credits on a Federal and/or State basis (i.e., NMTC, low income housing tax credits and historical tax credits). The income tax credits related to these partnerships are utilized as specifically allowed by income tax law and are recorded as a reduction in income tax expense. The Tax Reform Act did not impact the availability or accounting for these income tax credits in general; however, as a result of the lower combined effective tax rate, Trustmark is limited in its ability to invest in any new tax credits. Trustmark estimates its combined effective tax rate will decrease to approximately 12.0% to 14.0% beginning in 2018, primarily as a result of the Tax Reform Act.

Financial Condition

Earning assets serve as the primary revenue streams for Trustmark and are comprised of securities, loans, federal funds sold, securities purchased under reverse repurchase agreements and other earning assets. Average earning assets totaled \$12.274 billion, or 89.5% of total average assets, at December 31, 2017, compared with \$11.485 billion, or 88.8% of total average assets, at December 31, 2016, an increase of \$789.1 million, or 6.9%.

Securities

The securities portfolio is utilized by Management to manage interest rate risk, generate interest income, provide liquidity and use as collateral for public and wholesale funding. Risk and return can be adjusted by altering duration, composition and/or balance of the portfolio. The weighted-average life of the portfolio decreased to 3.8 years at December 31, 2017, compared to 4.1 years at December 31, 2016.

When compared with December 31, 2016, total investment securities decreased by \$220.2 million, or 6.3%, during 2017. This decrease resulted primarily from calls, maturities and pay-downs of the underlying loans of GSE guaranteed securities partially offset by purchases of GSE securities. Trustmark sold \$27.7 million of securities during 2017, which generated a net gain of \$15 thousand, compared to \$25.0 million of securities sold during 2016, which generated a net loss of \$310 thousand.

During 2013, Trustmark reclassified approximately \$1.099 billion of securities available for sale as securities held to maturity to mitigate the potential adverse impact of a rising interest rate environment on the fair value of the available for sale securities and the related impact on tangible common equity. The securities were transferred at fair value, which became the cost basis for the securities held to maturity. At the date of transfer, the net unrealized holding loss on the available for sale securities totaled approximately \$46.6 million (\$28.8 million net of tax). The net unrealized holding loss is amortized over the remaining life of the securities as a yield adjustment in a manner consistent with the amortization or accretion of the original purchase premium or discount on the associated security. There were no gains or losses recognized as a result of the transfer. At December 31, 2017, the net unamortized, unrealized loss on the transferred securities included in accumulated other comprehensive loss (AOCL) in the accompanying consolidated balance sheets totaled \$19.5 million (\$12.0 million net of tax) compared to \$24.2 million (\$14.9 million

net of tax) at December 31, 2016.

Available for sale securities are carried at their estimated fair value with unrealized gains or losses recognized, net of taxes, in AOCL, a separate component of shareholders' equity. At December 31, 2017, available for sale securities totaled \$2.239 billion, which represented 67.9% of the securities portfolio, compared to \$2.357 billion, or 67.0%, at December 31, 2016. At December 31, 2017, unrealized losses, net on available for sale securities totaled \$23.5 million compared to unrealized losses, net of \$9.5 million at December 31, 2016. At December 31, 2017, available for sale securities consisted of obligations of states and political subdivisions, GSE guaranteed mortgage-related securities and direct obligations of government agencies and GSEs.

Held to maturity securities are carried at amortized cost and represent those securities that Trustmark both intends and has the ability to hold to maturity. At December 31, 2017, held to maturity securities totaled \$1.056 billion and represented 32.1% of the total securities portfolio, compared with \$1.159 billion, or 33.0%, at December 31, 2016.

The table below indicates the amortized cost of securities available for sale and held to maturity by type at December 31, 2017, 2016 and 2015 (\$ in thousands):

	December 31,		
	2017	2016	2015

Mortgage-backed securities and collateralized mortgage obligations are included in maturity categories based on their stated maturity date. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations.

Management continues to focus on asset quality as one of the strategic goals of the securities portfolio, which is evidenced by the investment of approximately 96% of the portfolio in GSE-backed obligations and other Aaa-rated securities as determined by Moody's Investors Services (Moody's). None of the securities owned by Trustmark are collateralized by assets which are considered sub-prime. Furthermore, outside of stock ownership in the FHLB of Dallas, FHLB of Atlanta and Federal Reserve Bank of Atlanta, Trustmark does not hold any other equity investment in a GSE.

As of December 31, 2017, Trustmark did not hold securities of any one issuer with a carrying value exceeding ten percent of total shareholders' equity, other than certain GSEs which are exempt from inclusion. Management continues to closely monitor the credit quality as well as the ratings of the debt and mortgage-backed securities issued by the GSEs and held in Trustmark's securities portfolio.

The following table presents Trustmark's securities portfolio by amortized cost and estimated fair value and by credit rating, as determined by Moody's, at December 31, 2017 (\$ in thousands):

	Amortized Cost		Estimated Fair Value		
	Amount	%	Amount	%	
Securities Available for Sale					
Aaa	\$2,183,697	96.5 %	\$2,159,407	96.5 %	
Aa1 to Aa3	55,456	2.5 %	56,072	2.5 %	
Baa1 to Baa3	213	—	208	—	
Not Rated (1)	22,764	1.0 %	22,948	1.0 %	
Total securities available for sale	\$2,262,130	100.0%	\$2,238,635	100.0%	
Securities Held to Maturity					
Aaa	\$1,010,446	95.6 %	\$999,223	95.5 %	
Aa1 to Aa3	33,504	3.2 %	34,319	3.3 %	
Baa1 to Baa3	410	—	416	—	
Not Rated (1)	12,126	1.2 %	12,289	1.2 %	
Total securities held to maturity	\$1,056,486	100.0%	\$1,046,247	100.0%	

(1) Not rated issues primarily consist of Mississippi municipal general obligations.

The table above presenting the credit rating of Trustmark's securities is formatted to show the securities according to the credit rating category, and not by category of the underlying security. At December 31, 2017, approximately 96.5% of the available for sale securities and 95.6% of held to maturity securities were rated Aaa.

LHFS

At December 31, 2017, LHFS totaled \$180.5 million, consisting of \$132.3 million of residential real estate mortgage loans in the process of being sold to third parties and \$48.2 million of Government National Mortgage Association (GNMA) optional repurchase loans. At December 31, 2016, LHFS totaled \$175.9 million, consisting of \$132.0 million of residential real estate mortgage loans in the process of being sold to third parties and \$43.9 million of GNMA optional repurchase loans. Please refer to the nonperforming assets table that follows for information on GNMA loans eligible for repurchase which are past due 90 days or more.

Trustmark did not exercise its buy-back option on any delinquent loans serviced for GNMA during 2017 or 2016.

For additional information regarding the GNMA optional repurchase loans, please see the section captioned "Past Due LHFS" included in Note 5 – LHFI and Allowance for Loan Losses, LHFI of Part II. Item 8. – Financial Statements and Supplementary Data of this report.

LHFI

The table below provides the carrying value of the LHFI portfolio by loan type for each year of the five-year period ended December 31, 2017 (\$ in thousands):

	December 31, 2017			2016			2015			2014			2013	
	Amount	%		Amount	%		Amount	%		Amount	%		Amount	%
Loans secured by real estate:														
Construction, land development														
and other land	\$987,624	11.5 %		\$831,437	10.6 %		\$824,723	11.6 %		\$619,877	9.6 %		\$596,889	10.3 %
Secured by 1-4 family residential properties	1,675,311	19.6 %		1,660,043	21.1 %		1,649,501	23.3 %		1,634,397	25.4 %		1,485,564	25.6 %
Secured by nonfarm, nonresidential properties	2,193,823	25.6 %		2,034,176	25.9 %		1,736,476	24.5 %		1,553,193	24.1 %		1,415,139	24.4 %
Other real estate secured	517,956	6.1 %		318,148	4.0 %		211,228	3.0 %		253,787	3.9 %		189,362	3.3 %
Commercial and industrial loans	1,570,345	18.3 %		1,528,434	19.5 %		1,343,211	18.9 %		1,270,350	19.7 %		1,157,614	20.0 %
Consumer loans	171,918	2.0 %		170,562	2.2 %		169,135	2.4 %		167,964	2.6 %		165,308	2.8 %
State and other political subdivision loans	952,483	11.1 %		917,515	11.7 %		734,615	10.4 %		602,727	9.3 %		499,963	8.6 %
Other loans	500,507	5.8 %		390,898	5.0 %		422,496	5.9 %		347,174	5.4 %		289,042	5.0 %
LHFI	\$8,569,967	100.0 %		\$7,851,213	100.0 %		\$7,091,385	100.0 %		\$6,449,469	100.0 %		\$5,798,881	100.0 %

LHFI increased \$718.8 million, or 9.2%, compared to December 31, 2016. During the first quarter of 2017, Trustmark reclassified \$36.7 million of acquired loans not accounted for under FASB ASC Topic 310-30 to LHFI due to the discount on these loans being fully amortized. Excluding the reclassified acquired loans, LHFI increased \$682.0 million, or 8.7%, during 2017. The increase in LHFI, excluding the reclassified acquired loans, during 2017 represented net growth across all five of Trustmark's market regions and all loans categories. The discussion below excludes the reclassified acquired loans.

During 2017, LHFI secured by real estate increased \$513.8 million, or 10.6%, as growth in the Alabama, Texas, Mississippi and Florida market regions was partially offset by declines in the Tennessee market region. LHFI secured by construction, land development and other land increased \$155.7 million, or 18.7%, during 2017, principally due to new loan growth in the other construction category, partially offset by other construction loans that were moved to the appropriate permanent categories upon completion of the related construction project. During 2017, \$523.6 million in other construction loans were moved to the appropriate permanent categories upon completion, including \$299.2 million in multi-family residential, \$184.2 million in non-owner occupied and \$40.7 million in owner occupied. Excluding all reclassifications between loan categories, growth in other construction loans across all five market regions totaled \$690.0 million for 2017.

LHFI secured by nonfarm, nonresidential properties (NFNR LHFI) increased \$155.7 million, or 7.7%, during 2017, principally due to other construction loans that moved to permanent financing. Excluding other construction loan reclassifications, the NFNR LHFI portfolio declined \$69.3 million, or 3.4%, during 2017. The decrease in the NFNR LHFI portfolio, excluding the other construction reclassifications, was primarily attributable to declines in non-owner occupied loans in Trustmark's Mississippi, Texas and Tennessee market regions as well as declines in owner occupied loans in the Mississippi and Florida market regions, partially offset by growth in non-owner occupied loans in the Florida and Alabama market regions and owner occupied loans in the Alabama, Tennessee and Texas market regions. Other real estate secured LHFI increased \$198.2 million, or 62.3%, during 2017, primarily due to multi-family residential loans in Trustmark's Texas, Mississippi, Alabama and Tennessee market regions that were moved from other construction loans to permanent financing. Excluding the other construction loan reclassifications, other real estate secured LHFI decreased \$101.1 million, or 31.8%, during 2017.

The commercial and industrial loan portfolio increased \$26.4 million, or 1.7%, during 2017, due to growth in the Alabama, Tennessee, Florida and Mississippi market regions, partially offset by declines in the Texas market region. Trustmark's exposure to the energy sector is primarily included in the commercial and industrial loan portfolio in Trustmark's Mississippi and Texas market regions. At December 31, 2017 and 2016, energy-related LHFI had outstanding balances of approximately \$226.5 million and \$271.5 million, respectively, which represented approximately 2.6% of Trustmark's total LHFI portfolio at December 31, 2017 compared to approximately 3.5% of the total LHFI portfolio at December 31, 2016. Trustmark has no loan exposure where the source of repayment, or the underlying security of such exposure, is tied to the realization of value from energy reserves. Should oil prices remain at current levels or below for a prolonged period of time, there is potential for downgrades to occur. Management will continue to monitor this exposure.

State and other political subdivision LHFI increased \$35.0 million, or 3.8%, during 2017 principally due to growth in the Mississippi and Alabama market regions, partially offset by declines in the Texas, Tennessee and Florida market regions. The other loan portfolio, which includes lending to nonprofits, financial intermediaries and real estate investment trusts, increased \$105.6 million, or 27.0%, during 2017, which represented growth in all of Trustmark's market regions with the exception of the Florida market region.

The following table provides information regarding Trustmark's home equity loans and home equity lines of credit which are included in the LHFI secured by 1-4 family residential properties as of December 31, 2017 and 2016 (\$ in thousands):

	December 31,			
	2017		2016	
Home equity loans	\$47,032		\$54,687	
Home equity lines of credit	407,627		390,629	
Percentage of loans and lines for which Trustmark holds first lien	60.7	%	59.7	%
Percentage of loans and lines for which Trustmark does not hold first lien	39.3	%	40.3	%

Due to the increased risk associated with second liens, loan terms and underwriting guidelines differ from those used for products secured by first liens. Loan amounts and loan-to-value ratios are limited and are lower for second liens than first liens. Also, interest rates and maximum amortization periods are adjusted accordingly. In addition, regardless of lien position, the passing credit score for approval of all home equity lines of credit is higher than that of term loans. The allowance for loan losses, LHFI is also reflective of the increased risk related to second liens through application of a greater loss factor to this portion of the portfolio.

In the following tables, LHFI reported by region (along with related nonperforming assets and net charge-offs) are associated with location of origination except for loans secured by 1-4 family residential properties (representing traditional mortgages) and credit cards. These loans are included in the Mississippi market region because they are centrally analyzed and approved as part of a specific line of business located at Trustmark's headquarters in Jackson, Mississippi.

Edgar Filing: TRUSTMARK CORP - Form 10-K

The following table presents the LHFI composition by region at December 31, 2017 and reflects a diversified mix of loans by region (\$ in thousands):

	December 31, 2017					
	Total	Alabama	Florida	Mississippi	Tennessee	Texas

Due to the short-term nature of most commercial real estate lending and the practice of annual renewal of commercial lines of credit, approximately one-third of Trustmark's portfolio matures in less than one year. Such a short-term maturity profile is not unusual for a

Edgar Filing: TRUSTMARK CORP - Form 10-K

commercial bank and provides Trustmark the opportunity to obtain updated financial information from its borrowers and to actively monitor its borrowers' creditworthiness. This maturity profile is well matched with many of Trustmark's sources of funding, which are also short-term in nature.

The following table provides information regarding Trustmark's LHFI maturities by loan type at December 31, 2017 (\$ in thousands):

	Maturing			
	Within One Year or Less	One Year Through Five Years	After Five Years	Total
Loans secured by real estate:				
Construction, land development and other land	\$606,224	\$327,854	\$53,546	\$987,624

Allowance for Loan Losses, LHFI

Trustmark's allowance for loan loss methodology is based on guidance provided in SEC Staff Accounting Bulletin (SAB) No. 102, "Selected Loan Loss Allowance Methodology and Documentation Issues," as well as other regulatory guidance. Trustmark's allowance has been developed using different factors to estimate losses based upon specific evaluation of identified individual LHFI considered impaired, estimated identified losses on various pools of LHFI and/or groups of risk rated LHFI with common risk characteristics and other external and internal factors of estimated probable losses based on other facts and circumstances. The level of Trustmark's allowance reflects Management's continuing evaluation of specific credit risks, loan loss experience, current loan portfolio growth, present economic, political and regulatory conditions and unidentified losses inherent in the current loan portfolio. For a complete description of Trustmark's allowance for loan loss methodology and the quantitative and qualitative factors included in the valuation allowance, please see Note 5 – LHFI and Allowance for Loan Losses, LHFI included in Part II. Item 8. – Financial Statements and Supplementary Data of this report.

Edgar Filing: TRUSTMARK CORP - Form 10-K

The table below illustrates the changes in Trustmark's allowance for loan losses, LHFI as well as Trustmark's loan loss experience for the periods presented (\$ in thousands):

	Years Ended December 31,				
	2017	2016	2015	2014	2013
Balance at beginning of period	\$71,265	\$67,619	\$69,616	\$66,448	\$78,738
LHFI charged off:					
Construction, land development and other land loans	(79)	(311)	(2,435)	(1,100)	(1,441)

Balance at end of period	\$76,733	\$71,265	\$67,619	\$69,616	\$66,448

Percentage of net charge-offs (recoveries) during

period to average loans (LHFS and LHFI)

outstanding during the period 0.11 % 0.10 % 0.15 % -0.03 % -0.02 %

At December 31, 2017, the allowance for loan losses, LHFI, was \$76.7 million, an increase of \$5.5 million, or 7.7%, when compared with December 31, 2016. The increase in the allowance for loan loss during 2017 was principally due to an increase in quantitative reserves for commercial LHFI in Trustmark's Mississippi and Texas market regions as well as qualitative reserves in the Alabama market region, partially offset by a decline in the required specific reserve for impaired LHFI in the Mississippi market region. Total allowance coverage of nonperforming LHFI, excluding specifically reviewed impaired LHFI, increased to 320.84% at December 31, 2017, compared to 267.40% at December 31, 2016 due to a \$7.2 million, or 10.5%, increase in the allowance for loan losses, LHFI excluding the specific reserves for impaired LHFI and a \$2.0 million, or 7.9%, decrease in nonperforming LHFI excluding the specifically reviewed impaired LHFI during 2017. Allocation of Trustmark's \$76.7 million allowance for loan losses, LHFI, represented 0.95% of commercial LHFI and 0.68% of consumer and home mortgage LHFI, resulting in an allowance to total LHFI of 0.90% as of December 31, 2017. This compares with an allowance to total LHFI of 0.91% at December 31, 2016, which was allocated to commercial LHFI at 0.97% and to consumer and mortgage LHFI at 0.68%.

Edgar Filing: TRUSTMARK CORP - Form 10-K

The following tables present changes in the allowance for loan losses, LHFI by geographic market region for the periods presented (\$ in thousands):

	Year Ended December 31, 2017					
	Total	Alabama	Florida	Mississippi	Tennessee	Texas
Balance at beginning of period	\$71,265	\$7,188	\$2,900	\$43,010	\$5,801	\$12,366

Recoveries	11,521	439	3,209	6,555	764	554
Net (charge-offs) recoveries	(9,626)	(547)	2,870	(7,355)	(393)	(4,201)
Provision for loan losses, LHFI	15,094	3,832	(2,951)	8,733	19	5,461
Balance at end of period	\$76,733	\$10,473	\$2,819	\$44,388	\$5,427	\$13,626

	Year Ended December 31, 2016					
	Total	Alabama	Florida	Mississippi	Tennessee	Texas
Balance at beginning of period	\$67,619	\$5,469	\$2,766	\$43,183	\$5,230	\$10,971
LHFI charged-off	(18,930)	(1,238)	(658)	(10,228)	(1,274)	(5,532)
Recoveries	11,619	333	2,598	6,464	948	1,276
Net (charge-offs) recoveries	(7,311)	(905)	1,940	(3,764)	(326)	(4,256)
Provision for loan losses, LHFI	10,957	2,624	(1,806)	3,591	897	5,651
Balance at end of period	\$71,265	\$7,188	\$2,900	\$43,010	\$5,801	\$12,366

	Year Ended December 31, 2015					
	Total	Alabama	Florida	Mississippi	Tennessee	Texas
Balance at beginning of period	\$69,616	\$3,647	\$3,920	\$47,290	\$5,674	\$9,085
LHFI charged-off	(22,469)	(1,294)	(1,924)	(15,848)	(1,630)	(1,773)
Recoveries	12,097	349	2,892	6,361	1,105	1,390
Net (charge-offs) recoveries	(10,372)	(945)	968	(9,487)	(525)	(383)
Provision for loan losses, LHFI	8,375	2,767	(2,122)	5,380	81	2,269
Balance at end of period	\$67,619	\$5,469	\$2,766	\$43,183	\$5,230	\$10,971

Charge-offs exceeded recoveries for 2017 resulting in a net charge-off of \$9.6 million, or 0.11% of average loans (LHFS and LHFI), compared to a net charge-off of \$7.3 million, or 0.10% of average loans (LHFS and LHFI), in 2016, and a net charge-off of \$10.4 million, or 0.15% of average loans (LHFS and LHFI), in 2015. The increase in net charge-offs during 2017 was principally due to an increase in charge-offs in the Mississippi market region primarily due to two large substandard credits that were charged-off during 2017. The decrease in total net charge-offs during 2016 was principally due to declines in charge-offs in the Mississippi, Florida, Tennessee and Alabama market regions partially offset by an increase in charge-offs in the Texas market region, primarily due to three large substandard credits that were charged off during 2016.

The provision for loan losses, LHFI represents the change in the estimated loan losses determined utilizing Trustmark's allowance for loan loss methodology net of charge-offs and recoveries of LHFI charged against net income. The provision for loan losses, LHFI, for 2017 totaled 0.18% of average loans (LHFS and LHFI), compared to 0.14% of average loans (LHFS and LHFI) in 2016 and 0.12% of average loans (LHFS and LHFI) in 2015. The increase in the provision for loan losses, LHFI for 2017 when compared to 2016 was primarily due to an increase in the amount of provision required related to existing and newly impaired LHFI, and the \$1.1 million of additional reserves due to the potential loss exposure caused by Hurricane Harvey. The increase in the provision for loan losses, LHFI when 2016 is compared to 2015 primarily reflects the increase in the amount of required reserves for LHFI, partially offset by a decrease in net charge-offs and the additional provision expense recorded during 2015 as a result of revisions to the allowance for loan loss methodology.

During 2015, Trustmark made revisions to both the quantitative and qualitative portions of the allowance for loan loss methodology for commercial and consumer LHFI. In total, these revisions resulted in an additional provision expense of \$9.5 million during 2015. For a complete description of the revisions made to Trustmark's allowance for loan loss methodology during 2015, please see Note 5 – LHFI and Allowance for Loan Losses, LHFI included in Part II. Item 8. – Financial Statements and Supplementary Data of this report.

Nonperforming Assets, Excluding Acquired Loans and Covered Other Real Estate

The table below provides the components of the nonperforming assets, excluding acquired loans and covered other real estate, by geographic market region for each year in the five-year period ended December 31, 2017 (\$ in thousands):

	December 31,									
	2017		2016		2015		2014		2013	
Nonaccrual LHFI										
Alabama	\$3,083		\$665		\$1,776		\$852		\$14

See the previous discussion of LHFS for more information on Trustmark's serviced GNMA loans eligible for repurchase and the impact of Trustmark's repurchases of delinquent mortgage loans under the GNMA optional repurchase program.

Nonaccrual LHFI

At December 31, 2017, nonaccrual LHFI totaled \$67.6 million, or 0.77% of total LHFS and LHFI, reflecting an increase of \$18.3 million, or 0.23% of total LHFS and LHFI, relative to December 31, 2016. The increase in nonaccrual LHFI was principally due to three large substandard credits moving to nonaccrual status during 2017. As of December 31, 2017, nonaccrual energy-related LHFI totaled \$22.0 million and represented 9.7% of Trustmark's total energy-related portfolio, compared to \$11.4 million, or 4.2% of Trustmark's total energy-related portfolio at December 31, 2016. For additional information regarding nonaccrual LHFI, see the section captioned "Nonaccrual LHFI" in Note 5 – LHFI and Allowance for Loan Losses, LHFI included in Part II. Item 8. – Financial Statements and

Supplementary Data of this report.

Edgar Filing: TRUSTMARK CORP - Form 10-K

The following table illustrates nonaccrual LHFI by loan type for each year in the five-year period ended December 31, 2017 (\$ in thousands):

	December 31,				
	2017	2016	2015	2014	2013
Loans secured by real estate:					
Construction, land development and other land	\$2,105	\$3,323	\$6,123	\$13,867	\$13,327
Secured by 1-4 family residential properties	19,022	20,329	23,079	25,621	21,603
Secured by nonfarm, nonresidential properties	12,608	8,482	17,800	25,717	21,809
Other real estate secured	212	402	145	1,318	1,327
Commercial and industrial loans	33,338	15,824	7,622	12,104	6,286
Consumer loans	135	300	31	88	151
State and other political subdivision loans	—	—	—	—	—
Other loans	155	574	512	628	735
Total nonaccrual LHFI	\$67,575	\$49,234	\$55,312	\$79,343	\$65,238

Other Real Estate, Excluding Covered Other Real Estate

Other real estate, excluding covered other real estate, at December 31, 2017 decreased \$18.8 million, or 30.3%, when compared with December 31, 2016. The decrease in other real estate, excluding covered other real estate, during 2017 was primarily due to properties sold in all five market of Trustmark's market regions as well as write-downs of properties in Trustmark's Mississippi, Florida and Alabama market regions partially offset by properties foreclosed in all five market regions.

On July 1, 2016, \$388 thousand of covered other real estate was transferred to other real estate, excluding covered other real estate, as a result of the expiration of a loss-share agreement with the FDIC on June 30, 2016. At December 31, 2017 and 2016, Trustmark had no covered other real estate. The remaining loss-share agreement with the FDIC, which covers loans secured by 1-4 family residential properties, will expire in 2021. Should a loan covered by the remaining loss-share agreement be foreclosed, the related property would be classified as covered other real estate.

The following tables illustrate changes in other real estate, excluding covered other real estate, by geographic market region for the periods presented (\$ in thousands):

	Year Ended December 31, 2017					
	Total	Alabama	Florida	Mississippi	Tennessee	Texas
Balance at beginning of period	\$62,051	\$15,989	\$22,582	\$15,646	\$6,183	\$1,651
Additions	9,235	1,226	504	5,970	753	782
Disposals	(24,762)	(4,562)	(7,993)	(6,183)	(4,373)	(1,651)
Write-downs	(3,296)	(939)	(1,156)	(1,173)	(28)	—
Balance at end of period	\$43,228	\$11,714	\$13,937	\$14,260	\$2,535	\$782

	Year Ended December 31, 2016					
	Total	Alabama	Florida	Mississippi	Tennessee	Texas
Balance at beginning of period	\$77,177	\$21,578	\$29,579	\$14,312	\$9,974	\$1,734
Additions	24,348	2,363	10,523	9,514	1,849	99
Disposals	(35,075)	(6,934)	(16,815)	(6,841)	(4,303)	(182)
Write-downs	(4,399)	(1,018)	(705)	(1,339)	(1,337)	—
Balance at end of period	\$62,051	\$15,989	\$22,582	\$15,646	\$6,183	\$1,651

Edgar Filing: TRUSTMARK CORP - Form 10-K

	Year Ended December 31, 2015					
	Total	Alabama	Florida	Mississippi	Tennessee	Texas
Balance at beginning of period	\$92,509	\$21,196	\$35,324	\$ 17,397	\$ 10,292	\$8,300
Additions	33,396	8,791	8,330	6,004	1,374	8,897
Disposals	(45,826)	(8,506)	(12,689)	(7,504)	(1,701)	(15,426)
Write-downs	(2,902)	(745)	(1,386)	(743)	9	(37)
Adjustments	—	842	—	(842)	—	—
Balance at end of period	\$77,177	\$21,578	\$29,579	\$ 14,312	\$ 9,974	\$1,734

Write-downs of other real estate, excluding covered other real estate, decreased \$1.1 million during 2017, compared to an increase of \$1.5 million during 2016 and a decrease of \$4.8 million during 2015. The decrease in write-downs on other real estate, excluding covered other real estate, during 2017 was principally due to declines in other real estate write-downs in the Alabama and Tennessee

market regions partially offset by an increase in write-downs of other real estate in the Mississippi and Florida market regions. The increase in write-downs on other real estate, excluding covered other real estate, during 2016 was primarily due to \$2.2 million of reserves for other real estate write-downs used or released during 2015 in the Alabama, Tennessee and Mississippi market regions.

The following table illustrates other real estate, excluding covered other real estate, by type of property for each year in the five-year period ended December 31, 2017 (\$ in thousands):

	December 31,				
	2017	2016	2015	2014	2013
Construction, land development and other land properties	\$27,491	\$36,871	\$47,550	\$61,015	\$65,273
1-4 family residential properties	5,081	7,926	10,732	10,150	14,696
Nonfarm, nonresidential properties	10,468	16,817	16,717	19,696	26,433
Other real estate properties	188	437	2,178	1,648	137
Total other real estate, excluding covered other real estate	\$43,228	\$62,051	\$77,177	\$92,509	\$106,539

For additional information regarding other real estate, including covered other real estate, see Note 10 – Other Real Estate included in Part II. Item 8. – Financial Statements and Supplementary Data of this report.

Acquired Loans

During the first quarter of 2017, Trustmark modified the presentation of the acquired loans disclosures to eliminate the segmentation of acquired noncovered loans and acquired covered loans due to the significantly reduced size of the acquired covered loan portfolio. Trustmark's loss share agreement with the FDIC covering the acquired covered loans other than loans secured by 1-4 family residential properties expired on June 30, 2016. Trustmark's loss share agreement with the FDIC covering the acquired covered loans secured by 1-4 family residential properties will expire in 2021. Effective July 1, 2016, all acquired covered loans excluding the acquired covered loans secured by 1-4 family residential properties were reclassified to acquired noncovered loans. The revised presentation reflects total acquired loan information in the accompanying consolidated balance sheets and tables below. All prior period information has been reclassified to conform to the current period presentation.

The table below provides the carrying value of the acquired loan portfolio by loan type for each year of the five-year period ended December 31, 2017 (\$ in thousands):

	December 31,				
	2017	2016	2015	2014	2013
Loans secured by real estate:					
Construction, land development and other land	\$23,586	\$20,850	\$42,644	\$59,506	\$101,291
Secured by 1-4 family residential properties	61,751	69,540	97,008	130,100	174,330
Secured by nonfarm, nonresidential properties	114,694	103,820	140,264	209,995	298,081
Other real estate secured	16,746	19,010	25,146	28,909	36,592
Commercial and industrial loans	31,506	36,896	55,699	88,533	149,889
Consumer loans	2,600	3,365	5,641	9,772	18,547
Other loans	10,634	18,766	24,009	22,594	25,476
Acquired loans	261,517	272,247	390,411	549,409	804,206
Less allowance for loan losses, acquired loans	4,079	11,397	11,992	12,059	9,636
Net acquired loans	\$257,438	\$260,850	\$378,419	\$537,350	\$794,570

During 2017, acquired loans declined \$10.7 million, or 3.9%, compared to balances at December 31, 2016. During the first quarter of 2017, Trustmark reclassified \$36.7 million of acquired loans not accounted for under FASB ASC Topic 310-30 to LHFI due to the discount on these loans being fully amortized. Additionally, acquired loans as of December 31, 2017 included \$86.2 million of loans acquired in the Reliance merger completed on April 7, 2017. Excluding the reclassified acquired loans and the loans acquired in the Reliance merger, acquired loans decreased \$60.2 million, or 22.1%, during 2017, primarily due to pay-downs and pay-offs of these acquired loans. Based on the most recent re-estimation of expected cash flows, Trustmark anticipates that acquired loan balances, excluding any settlement of debt, will decline approximately \$15.0 million to \$25.0 million during the first quarter of 2018. Trustmark also expects the yield on the acquired loans, excluding any recoveries, to be approximately 6.0% to 7.0% for the first quarter of 2018. As the balances in the acquired loan portfolio continue to run-off, Trustmark expects that the income benefit provided by this portfolio will also decline.

Loans acquired in the Reliance merger were evaluated using a fair value process to determine the degree of credit deterioration since origination and the collectibility of contractually required payments. Approximately \$7.9 million of the loans acquired in the Reliance

merger exhibited evidence of significant credit deterioration since origination and for which it was probable at acquisition that Trustmark would not be able to collect all contractually required payments. These loans are accounted for as acquired impaired loans under FASB ASC Topic 310-30.

For additional information regarding acquired loans, including changes in the net carrying value, see Note 6 – Acquired Loans included in Part II. Item 8. – Financial Statements and Supplementary Data of this report.

Deposits

Trustmark's deposits are its primary source of funding and consist primarily of core deposits from the communities Trustmark serves. Deposits include interest-bearing and noninterest-bearing demand accounts, savings, money market, certificates of deposit and individual retirement accounts. Total deposits were \$10.578 billion at December 31, 2017 compared to \$10.056 billion at December 31, 2016, an increase of \$521.5 million, or 5.2%, primarily due to growth in interest-bearing deposits. During 2017, noninterest-bearing deposits increased \$4.8 million, or 0.2%, primarily due to growth in public and consumer demand deposit accounts, while interest-bearing deposits increased \$516.7 million, or 7.3%, primarily due to growth in all categories of interest-bearing deposits with the exception of public interest checking and money market accounts, reflecting the increase in interest rates in general and the Reliance merger. At December 31, 2017, the balance of deposits for branches associated with the Reliance merger was \$163.6 million. Excluding these Reliance deposits, total deposits at December 31, 2017 increased \$357.9 million, or 3.6%.

Short-term Borrowings

Trustmark uses short-term borrowings to fund growth of earning assets in excess of deposit growth. Short-term borrowings consist primarily of federal funds purchased, securities sold under repurchase agreements, short-term FHLB advances and GNMA optional repurchase loans. Short-term borrowings totaled \$1.441 billion at December 31, 2017, an increase of \$131.3 million, or 10.0%, when compared with \$1.310 billion at December 31, 2016, primarily due to an increase in the outstanding balance of short-term FHLB advances as Trustmark continues to utilize this funding source to fund the difference between loan and deposit growth. Short-term FHLB advances increased \$200.0 million during 2017 as a result of a \$450.0 million increase in outstanding short-term advances with the FHLB of Dallas as well as the \$250.0 million long-term FHLB advance with the FHLB of Dallas which was reclassified to short-term in May 2017 partially offset by the \$500.0 million advance with the FHLB of Dallas that matured in December 2017.

Federal funds purchased and securities sold under repurchase agreements totaled \$469.8 million at December 31, 2017 compared to \$539.8 million at December 31, 2016, a decrease of \$70.0 million, or 13.0%. Of these amounts \$139.8 million and \$140.5 million, respectively, represented customer related transactions, such as commercial sweep repurchase balances. Excluding customer related transactions, federal funds purchased totaled \$330.0 million at December 31, 2017, a decrease of \$69.4 million when compared with \$399.4 million at December 31, 2016.

The table below presents information concerning qualifying components of Trustmark's short-term borrowings for each of the last three years (\$ in thousands):

	2017	2016	2015
Federal funds purchased and securities sold under repurchase agreements:			
Amount outstanding at end of period	\$469,827	\$539,817	\$441,042
Weighted average interest rate at end of period	1.06 %	0.52 %	0.25 %
Maximum amount outstanding at any month end during each period	\$620,698	\$606,336	\$673,360
Average amount outstanding during each period	512,085	495,197	503,077

Edgar Filing: TRUSTMARK CORP - Form 10-K

Weighted average interest rate during each period	0.81	%	0.35	%	0.16	%
Short-term borrowings:						
Amount outstanding at end of period	\$971,049		\$769,778		\$412,617	
Weighted average interest rate at end of period	1.35	%	0.72	%	0.58	%
Maximum amount outstanding at any month end during each period	\$1,423,787		\$769,778		\$858,827	
Average amount outstanding during each period	1,138,353		370,008		415,081	
Weighted average interest rate during each period	1.14	%	1.00	%	0.69	%

Long-term FHLB Advances

Long-term FHLB advances totaled \$946 thousand at December 31, 2017, a decrease of \$250.1 million, or 99.6%, when compared with \$251.0 million at December 31, 2016. During May of 2016, Trustmark obtained a \$250.0 million variable rate long-term FHLB advance with a two-year maturity from the FHLB of Dallas. As noted above, during May 2017, the \$250.0 million long-term FHLB

advance was reclassified from long-term to short-term. Trustmark chose to utilize FHLB advances with the FHLB of Dallas as a funding source for loan growth due to the advantageous rates available in comparison to other sources of funding. For additional information regarding Trustmark's long-term FHLB advances, please see the section captioned "Liquidity."

Benefit Plans

Defined Benefit Plans

As disclosed in Note 14 – Defined Benefit and Other Postretirement Benefits included in Part II, Item 8. – Financial Statements and Supplementary Data of this report, Trustmark maintained a noncontributory tax-qualified defined benefit pension plan, the Plan, in which substantially all associates who began employment prior to 2007 participated. The Plan provided for retirement benefits based on the length of credited service and final average compensation, as defined in the Plan, which vested upon three years of service. Benefit accruals under the Plan were frozen in 2009, with the exception of benefit accruals for certain associates of acquired financial institutions covered through plans that were subsequently merged into the Plan. As previously reported, on July 26, 2016, the Board of Directors of Trustmark authorized the termination of the Plan, effective as of December 31, 2016.

During the second quarter of 2017, Trustmark fully funded the Plan on a termination basis by contributing additional assets in the amount of \$17.6 million in accordance with the IRS and Pension Benefit Guaranty Corporation requirements. Participants in the plan elected to receive either a lump sum cash payment or annuity payments under a group annuity contract purchased from an insurance carrier. Final distributions were made to participants from plan assets and a one-time pension settlement expense was recognized totaling \$17.6 million. After the distribution of plan assets during the second quarter of 2017, Trustmark estimates that the annual pension expense will be reduced by \$3.0 million to \$4.0 million.

Other than the associates covered through these acquired plans that were merged into the Plan, associates have not earned additional benefits, except for interest as required by law, since the Plan was frozen. Current and former associates who participated in the Plan retained their right to receive benefits that accrued before the Plan was frozen.

To satisfy commitments made by Trustmark to associates covered through plans obtained in acquisitions and subsequently merged into the Plan (collectively, the "Continuing Associates"), on July 26, 2016, the Board of Directors of Trustmark also approved the spin-off of the portion of the Plan associated with the accrued benefits of the Continuing Associates into a new plan, the Continuing Plan, effective as of December 30, 2016, immediately prior to the termination of the Plan.

At December 31, 2017, the fair value of the Continuing Plan's assets totaled \$4.6 million and was exceeded by the projected benefit obligation of \$10.1 million by \$5.5 million. Net periodic benefit cost equaled \$20.5 million in 2017, compared with \$7.5 million in 2016 and \$4.9 million in 2015. The increase in the net periodic benefit cost during 2017 was principally due to the \$17.6 million one-time pension settlement expense as a result of the termination of the Plan. Excluding this one-time pension settlement expense, net periodic benefit cost during 2017 totaled \$2.8 million.

The fair value of plan assets is determined utilizing current market quotes, while the benefit obligation and periodic benefit costs are determined utilizing actuarial methodology with certain weighted-average assumptions. For 2017, 2016 and 2015, the process used to select the discount rate assumption under FASB ASC Topic 715 takes into account the benefit cash flow and the segmented yields on high-quality corporate bonds that would be available to provide for the payment of the benefit cash flow. Assumptions, which have been chosen to represent the estimate of a particular event as required by GAAP, have been reviewed and approved by Management based on recommendations from its actuaries. For additional information regarding the assumptions used by Management, please refer to the section captioned "Critical Accounting Policies – Defined Benefit Plans."

The range of potential contributions to the Continuing Plan is determined annually by the Continuing Plan's actuary in accordance with applicable IRS rules and regulations. Trustmark's policy is to fund amounts that are sufficient to satisfy the annual minimum funding requirements and do not exceed the maximum that is deductible for federal income tax purposes. The actual amount of the contribution is determined annually based on the Continuing Plan's funded status and return on plan assets as of the measurement date, which is December 31. For the plan year ending December 31, 2017, Trustmark's minimum required contribution to the Continuing Plan was \$113 thousand. During 2017, Trustmark contributed \$200 thousand to the Continuing Plan for the plan year ended December 31 2017. For the plan year ending December 31, 2018, Trustmark's minimum required contribution to the Continuing Plan is expected to be \$175 thousand; however, Management and the Board of Directors of Trustmark will monitor the Continuing Plan throughout 2018 to determine any additional funding requirements by the plan's measurement date.

For the plan year ending December 31, 2016, Trustmark's minimum required contribution to the Plan was zero. Since the Plan has terminated, there were no additional contributions required other than amounts necessary to facilitate the Plan termination.

Supplemental Retirement Plans

As disclosed in Note 14 – Defined Benefit and Other Postretirement Benefits included in Part II. Item 8. – Financial Statements and Supplementary Data of this report, Trustmark maintains a nonqualified supplemental retirement plan covering key executive officers and senior officers as well as directors who have elected to defer fees. The plan provides for retirement and/or death benefits based on a participant’s covered salary or deferred fees. Although plan benefits may be paid from Trustmark’s general assets, Trustmark has purchased life insurance contracts on the participants covered under the plan, which may be used to fund future benefit payments under the plan. The measurement date for the plan is December 31. As a result of mergers prior to 2014, Trustmark became the administrator of small nonqualified supplemental retirement plans, for which the plan benefits were frozen prior to the merger date.

At December 31, 2017, the accrued benefit obligation for the supplemental retirement plans equaled \$57.9 million, while the net periodic benefit cost equaled \$3.4 million in 2017, \$3.6 million in 2016 and \$3.8 million in 2015. The net periodic benefit cost and projected benefit obligation are determined using actuarial assumptions as of the plans’ measurement date, which is December 31. The process used to select the discount rate assumption under FASB ASC Topic 715 takes into account the benefit cash flow and the segmented yields on high-quality corporate bonds that would be available to provide for the payment of the benefit cash flow. At December 31, 2017, unrecognized actuarial losses and unrecognized prior service costs continue to be amortized over future service periods.

Legal Environment

Information required in this section is set forth under the heading “Legal Proceedings” of Note 16 – Commitments and Contingencies in Part II. Item 8. – Financial Statements and Supplementary Data of this report.

Off-Balance Sheet Arrangements

Information required in this section is set forth under the heading “Lending Related” of Note 16 – Commitments and Contingencies in Part II. Item 8. – Financial Statements and Supplementary Data of this report.

Contractual Obligations

Trustmark is obligated to make payments under specific long-term and certain other binding contractual arrangements. The following table provides a schedule of the amount of the payments due under those obligations as of December 31, 2017 (\$ in thousands):

	Less than One Year	One to Three Years	Three to Five Years	After Five Years	Total
Time deposits	\$1,356,448	\$342,734	\$57,160	\$2,099	\$1,758,441
Securities sold under repurchase agreements	118,694	—	—	—	118,694
FHLB advances	900,013	—	774	171	900,958
Junior subordinated debt securities	—	—	—	61,856	61,856
Operating lease obligations	12,031	17,078	10,236	28,518	67,863
Total	\$2,387,186	\$359,812	\$68,170	\$92,644	\$2,907,812

Capital Resources

At December 31, 2017, Trustmark's total shareholders' equity was \$1.572 billion, an increase of \$51.5 million, or 3.4%, when compared to December 31, 2016. During 2017, shareholders' equity increased primarily as a result of net income of \$105.6 million and the net change in pension and other postretirement benefit plans of \$11.5 million, net of tax, partially offset by common stock dividends of \$62.8 million. Trustmark utilizes a capital model in order to provide Management with a monthly tool for analyzing changes in its strategic capital ratios. This allows Management to hold sufficient capital to provide for growth opportunities and protect the balance sheet against sudden adverse market conditions, while maintaining an attractive return on equity to shareholders.

Regulatory Capital

Trustmark and TNB are subject to minimum risk-based capital and leverage capital requirements, as described in the section captioned "Capital Adequacy" included in Part I. Item 1. – Business of this report, which are administered by the federal bank regulatory agencies. These capital requirements, as defined by federal regulations, involve quantitative and qualitative measures of assets, liabilities and certain off-balance sheet instruments. Trustmark's and TNB's minimum risk-based capital requirements include the phased in capital conservation buffer of 1.250% and 0.625% at December 31, 2017 and 2016, respectively. AOCL is not included in computing regulatory capital. Failure to meet minimum capital requirements can result in certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the financial statements of Trustmark and

TNB and limit Trustmark's and TNB's ability to pay dividends. As of December 31, 2017, Trustmark and TNB exceeded all applicable minimum capital standards. In addition, Trustmark and TNB met applicable regulatory guidelines to be considered well-capitalized at December 31, 2017. To be categorized in this manner, Trustmark and TNB maintained minimum common equity Tier 1 risk-based capital, Tier 1 risk-based capital, total risk-based capital and Tier 1 leverage ratios, and were not subject to any written agreement, order or capital directive, or prompt corrective action directive issued by their primary federal regulators to meet and maintain a specific capital level for any capital measures. There are no significant conditions or events that have occurred since December 31, 2017, which Management believes have affected Trustmark's or TNB's present classification.

In 2006, Trustmark enhanced its capital structure with the issuance of trust preferred securities. For regulatory capital purposes, the trust preferred securities qualified as Tier 1 capital at December 31, 2017 and 2016. Trustmark intends to continue to utilize \$60.0 million in trust preferred securities issued by the Trust as Tier 1 capital up to the regulatory limit, as permitted by the grandfather provision in the Dodd-Frank Act and the Basel III Final Rule.

Refer to the section captioned "Regulatory Capital" included in Note 17 – Shareholders' Equity in Part II. Item 8. – Financial Statements and Supplementary Data of this report for an illustration of Trustmark's and TNB's actual regulatory capital amounts and ratios under regulatory capital standards in effect at December 31, 2017 and 2016.

Dividends on Common Stock

Dividends per common share for each of the years ended December 31, 2017, 2016 and 2015 were \$0.92. Trustmark's dividend payout ratio for 2017, 2016 and 2015 was 58.97%, 57.50%, and 53.49%, respectively. Approval by TNB's regulators is required if the total of all dividends declared in any calendar year exceeds the total of its net income for that year combined with its retained net income of the preceding two years. TNB will have available in 2018 approximately \$87.0 million plus its net income for that year to pay as dividends to Trustmark. The actual amount of any dividends declared in 2018 by Trustmark will be determined by Trustmark's Board of Directors.

Liquidity

Liquidity is the ability to ensure that sufficient cash flow and liquid assets are available to satisfy current and future financial obligations, including demand for loans and deposit withdrawals, funding operating costs and other corporate purposes. Consistent cash flows from operations and adequate capital provide internally generated liquidity. Furthermore, Management maintains funding capacity from a variety of external sources to meet daily funding needs, such as those required to meet deposit withdrawals, loan disbursements and security settlements. Liquidity strategy also includes the use of wholesale funding sources to provide for the seasonal fluctuations of deposit and loan demand and the cyclical fluctuations of the economy that impact the availability of funds. Management keeps excess funding capacity available to meet potential demands associated with adverse circumstances.

The asset side of the balance sheet provides liquidity primarily through maturities and cash flows from loans and securities as well as the ability to sell certain loans and securities while the liability portion of the balance sheet provides liquidity primarily through noninterest and interest-bearing deposits. Trustmark utilizes federal funds purchased, FHLB advances, securities sold under repurchase agreements as well as the Discount Window and, on a limited basis as discussed below, brokered deposits to provide additional liquidity. Access to these additional sources represents Trustmark's incremental borrowing capacity.

Deposit accounts represent Trustmark's largest funding source. Average deposits totaled to \$10.182 billion for 2017 and represented approximately 74.2% of average liabilities and shareholders' equity, compared to average deposits of \$9.669 billion, which represented 74.7% of average liabilities and shareholders' equity for 2016.

Trustmark utilizes a limited amount of brokered deposits to supplement other wholesale funding sources. At December 31, 2017, brokered sweep Money Market Deposit Account (MMDA) deposits totaled \$38.6 million compared to \$34.2 million at December 31, 2016.

At December 31, 2017, Trustmark had \$330.0 million in upstream federal funds purchased, compared to \$399.4 million at December 31, 2016. Trustmark maintains adequate federal funds lines to provide sufficient short-term liquidity.

Trustmark maintains a relationship with the FHLB of Dallas, which provided \$900.0 million of outstanding short-term advances and no outstanding long-term advances at December 31, 2017 compared to \$700.0 million of outstanding short-term advances and \$250.0 million of outstanding long-term advances at December 31, 2016. The outstanding short-term FHLB advances at December 31, 2017 included the \$250.0 million FHLB advance that was reclassified from long-term to short-term during May 2017. Under the existing borrowing agreement, Trustmark had sufficient qualifying collateral to increase FHLB advances with the FHLB of Dallas by \$1.771 billion at December 31, 2017.

In addition, at December 31, 2017, Trustmark had \$958 thousand in FHLB advances outstanding with the FHLB of Atlanta, which were acquired in the BancTrust merger, compared to \$1.1 million at December 31, 2016. Trustmark has non-member status and thus no additional borrowing capacity with the FHLB of Atlanta.

Additionally, Trustmark has the ability to leverage its unencumbered investment securities as collateral. At December 31, 2017, Trustmark had approximately \$1.299 billion available in unencumbered agency securities compared to \$1.373 billion at December 31, 2016. The decrease was primarily due to Management's decision to suspend reinvestment of security cash flows during the fourth quarter of 2017.

Another borrowing source is the Discount Window. At December 31, 2017, Trustmark had approximately \$1.042 billion available in collateral capacity at the Discount Window from pledges of commercial and industrial LHFI, compared with \$998.1 million at December 31, 2016. This increase was due to the increase in the commercial and industrial LHFI portfolio during 2017.

During 2006, Trustmark completed a private placement of \$60.0 million of trust preferred securities through a newly formed Delaware trust affiliate, the Trust. The trust preferred securities mature September 30, 2036 and are redeemable at Trustmark's option. The proceeds from the sale of the trust preferred securities were used by the Trust to purchase \$61.9 million in aggregate principal amount of Trustmark's junior subordinated debentures.

The Board of Directors of Trustmark currently has the authority to issue up to 20.0 million preferred shares with no par value. The ability to issue preferred shares in the future will provide Trustmark with additional financial and management flexibility for general corporate and acquisition purposes. At December 31, 2017, Trustmark had no shares of preferred stock issued and outstanding.

Liquidity position and strategy are reviewed regularly by Management and continuously adjusted in relationship to Trustmark's overall strategy. Management believes that Trustmark has sufficient liquidity and capital resources to meet presently known cash flow requirements arising from ongoing business transactions.

Asset/Liability Management

Overview

Market risk reflects the potential risk of loss arising from adverse changes in interest rates and market prices. Trustmark has risk management policies to monitor and limit exposure to market risk. Trustmark's primary market risk is interest rate risk created by core banking activities. Interest rate risk is the potential variability of the income generated by Trustmark's financial products or services, which results from changes in various market interest rates. Market rate changes may take the form of absolute shifts, variances in the relationships between different rates and changes in the shape or slope of the interest rate term structure.

Management continually develops and applies cost-effective strategies to manage these risks. Management's Asset/Liability Committee sets the day-to-day operating guidelines, approves strategies affecting net interest income and coordinates activities within policy limits established by the Board of Directors of Trustmark. A key objective of the asset/liability management program is to quantify, monitor and manage interest rate risk and to assist Management in maintaining stability in the net interest margin under varying interest rate environments.

Derivatives

Trustmark uses financial derivatives for management of interest rate risk. Management's Asset/Liability Committee, in its oversight role for the management of interest rate risk, approves the use of derivatives in balance sheet hedging strategies. The most common derivatives employed by Trustmark are interest rate lock commitments, forward contracts (both futures contracts and options on futures contracts), interest rate swaps, interest rate caps and interest

rate floors. As a general matter, the values of these instruments are designed to be inversely related to the values of the assets that they hedge (i.e., if the value of the hedged asset falls, the value of the related hedge rises). In addition, Trustmark has entered into derivatives contracts as counterparty to one or more customers in connection with loans extended to those customers. These transactions are designed to hedge interest rate, currency or other exposures of the customers and are not entered into by Trustmark for speculative purposes. Increased federal regulation of the derivatives markets may increase the cost to Trustmark to administer derivatives programs.

On April 4, 2013, Trustmark entered into a forward interest rate swap contract on junior subordinated debentures with a total notional amount of \$60.0 million. The interest rate swap contract was designated as a derivative instrument in a cash flow hedge under FASB ASC Topic 815, with the objective of protecting the quarterly interest payments on Trustmark's \$60.0 million of junior subordinated debentures issued to the Trust throughout the five-year period beginning December 31, 2014 and ending December 31, 2019 from the risk of variability of those payments resulting from changes in the three-month LIBOR interest rate. Under the swap, which became

effective on December 31, 2014, Trustmark pays a fixed interest rate of 1.66% and receives a variable interest rate based on three-month LIBOR on a total notional amount of \$60.0 million, with quarterly net settlements.

No ineffectiveness related to the interest rate swap designated as a cash flow hedge was recognized in the consolidated statements of income during the years ended December 31, 2017, 2016 and 2015. The accumulated net after-tax gain related to the effective cash flow hedge included in AOCL totaled \$278 thousand at December 31, 2017 compared to a net after-tax loss of \$18 thousand at December 31, 2016. Amounts reported in AOCL related to this derivative are reclassified to other interest expense as interest payments are made on Trustmark's variable rate junior subordinated debentures. During the next twelve months, Trustmark estimates that \$125 thousand will be reclassified as an increase to other interest expense.

As part of Trustmark's risk management strategy in the mortgage banking business, various derivative instruments such as interest rate lock commitments and forward sales contracts are utilized. Rate lock commitments are residential mortgage loan commitments with customers, which guarantee a specified interest rate for a specified period of time. Trustmark's obligations under forward contracts consist of commitments to deliver mortgage loans, originated and/or purchased, in the secondary market at a future date. The gross notional amount of Trustmark's off-balance sheet obligations under these derivative instruments totaled \$265.0 million at December 31, 2017, with a positive valuation adjustment of \$663 thousand, compared to \$292.9 million, with a positive valuation adjustment of \$3.8 million at December 31, 2016.

Trustmark utilizes a portfolio of exchange-traded derivative instruments, such as Treasury note futures contracts and option contracts, to achieve a fair value return that economically hedges changes in fair value of the MSR attributable to interest rates. These transactions are considered freestanding derivatives that do not otherwise qualify for hedge accounting under GAAP. The total notional amount of these derivative instruments were \$349.0 million at December 31, 2017 compared to \$262.0 million at December 31, 2016. These exchange-traded derivative instruments are accounted for at fair value with changes in the fair value recorded in noninterest income in mortgage banking, net and are offset by the changes in the fair value of the MSR. The MSR fair value represents the present value of future cash flows, which among other things includes decay and the effect of changes in interest rates. Ineffectiveness of hedging the MSR fair value is measured by comparing the change in value of hedge instruments to the change in the fair value of the MSR asset attributable to changes in interest rates and other market driven changes in valuation inputs and assumptions. The impact of this strategy resulted in a net positive ineffectiveness of \$254 thousand for the year ended December 31, 2017, compared to a net negative ineffectiveness of \$2.9 million for the year ended December 31, 2016 and a net positive ineffectiveness of \$1.9 million for the year ended December 31, 2015, respectively. The net positive ineffectiveness was primarily due to the mortgage spread widening during 2017 compared to 2016. The net negative ineffectiveness was primarily due to the tightening in the mortgage spread during 2016 compared to 2015.

Trustmark offers certain interest rate derivatives products directly to qualified commercial lending clients seeking to manage their interest rate risk under loans they have entered into with TNB. Trustmark economically hedges interest rate swap transactions executed with commercial lending clients by entering into offsetting interest rate swap transactions with institutional derivatives market participants. Derivatives transactions executed as part of this program are not designated as qualifying hedging relationships under GAAP and are, therefore, carried on Trustmark's financial statements at fair value with the change in fair value recorded as noninterest income in bank card and other fees. Because these derivatives have mirror-image contractual terms, in addition to collateral provisions which mitigate the impact of non-performance risk, the changes in fair value are expected to substantially offset. As of December 31, 2017, Trustmark had interest rate swaps with an aggregate notional amount of \$351.9 million related to this program, compared to \$340.2 million as of December 31, 2016.

Trustmark has agreements with its financial institution counterparties that contain provisions where if Trustmark defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then Trustmark could also be deemed to be in default on its derivatives obligations.

As of December 31, 2017 and 2016, the termination value of interest rate swaps in a liability position, which includes accrued interest but excludes any adjustment for nonperformance risk, related to these agreements was \$80 thousand and \$1.2 million, respectively. As of December 31, 2017, Trustmark had posted collateral of \$100 thousand against its obligations because of negotiated thresholds and minimum transfer amounts under these agreements. If Trustmark had breached any of these triggering provisions at December 31, 2017, it could have been required to settle its obligations under the agreements at the termination value (which is expected to approximate fair market value).

Credit risk participation agreements arise when Trustmark contracts with other financial institutions, as a guarantor or beneficiary, to share credit risk associated with certain interest rate swaps. These agreements provide for reimbursement of losses resulting from a third party default on the underlying swap. At December 31, 2017 and 2016, Trustmark had entered into two risk participation agreements as a beneficiary with an aggregate notional amount of \$13.7 million and \$14.2 million, respectively. As of December 31, 2017, Trustmark had entered into six risk participation agreements as a guarantor with an aggregate notional amount of \$37.1 million

compared to five risk participation agreements as a guarantor with an aggregate notional amount of \$28.0 million at December 31, 2016. The aggregate fair values of these risk participation agreements were immaterial at December 31, 2017 and 2016.

Trustmark's participation in the derivatives markets is subject to increased federal regulation of these markets. Trustmark believes that it may continue to use financial derivatives to manage interest rate risk and also to offer derivatives products to certain qualified commercial lending clients in compliance with the Volcker Rule. However, the increased federal regulation of the derivatives markets has increased the cost to Trustmark of administering its derivatives programs. Some of these costs (particularly compliance costs related to the Volcker Rule and other federal regulations) are expected to recur in the future.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market/Interest Rate Risk Management

The primary purpose in managing interest rate risk is to invest capital effectively and preserve the value created by the core banking business. This is accomplished through the development and implementation of lending, funding, pricing and hedging strategies designed to maximize net interest income performance under varying interest rate environments subject to specific liquidity and interest rate risk guidelines.

Financial simulation models are the primary tools used by Management's Asset/Liability Committee to measure interest rate exposure. Using a wide range of scenarios, Management is provided with extensive information on the potential impact on net interest income caused by changes in interest rates. Models are structured to simulate cash flows and accrual characteristics of Trustmark's balance sheet. Assumptions are made about the direction and volatility of interest rates, the slope of the yield curve and the changing composition of Trustmark's balance sheet, resulting from both strategic plans and customer behavior. In addition, the model incorporates Management's assumptions and expectations regarding such factors as loan and deposit growth, pricing, prepayment speeds and spreads between interest rates.

Based on the results of the simulation models using static balances, the table below summarizes the effect various one-year interest rate shift scenarios would have on net interest income compared to a base case, flat scenario at December 31, 2017 and 2016. At December 31, 2017 and 2016, the impact of a 200 basis point drop scenario was not calculated due to the low interest rate environment.

	Estimated % Change in Net Interest Income	
Change in Interest Rates	2017	2016
+200 basis points	-2.1 %	-0.1 %
+100 basis points	-1.0 %	0.0 %
-100 basis points	-4.2 %	-6.3 %

As shown in the table above, the interest rate shocks for 2017 illustrate little change in net interest income in rising rate scenarios while displaying modest exposure to a falling rate environment. The exposure to falling rates is primarily due to a downward repricing of various earning assets with minimal contribution from liabilities given the already low cost of deposits in the base scenario. Management cannot provide any assurance about the actual effect of changes in interest rates on net interest income. The estimates provided do not include the effects of possible strategic

changes in the balances of various assets and liabilities throughout 2018 or additional actions Trustmark could undertake in response to changes in interest rates. Management will continue to prudently manage the balance sheet in an effort to control interest rate risk and maintain profitability over the long term.

Another component of interest rate risk management is measuring the economic value-at-risk for a given change in market interest rates. The economic value-at-risk may indicate risks associated with longer-term balance sheet items that may not affect net interest income at risk over shorter time periods. Trustmark uses computer-modeling techniques to determine the present value of all asset and liability cash flows (both on- and off-balance sheet), adjusted for prepayment expectations, using a market discount rate. The economic value of equity (EVE), also known as net portfolio value, is defined as the difference between the present value of asset cash flows and the present value of liability cash flows. The resulting change in EVE in different market rate environments, from the base case scenario, is the amount of EVE at risk from those rate environments. The following table summarizes the effect that various interest rate shifts would have on net portfolio value at December 31, 2017 and 2016. At December 31, 2017 and 2016, the impact of a 200 basis point drop scenario was not calculated due to the historically low interest rate environment.

	Estimated % Change in Net Portfolio Value			
Change in Interest Rates	2017		2016	
+200 basis points	3.3	%	7.0	%
+100 basis points	2.2	%	4.0	%
-100 basis points	-10.0	%	-11.3	%

Trustmark determines the fair value of the MSR using a valuation model administered by a third party that calculates the present value of estimated future net servicing income. The model incorporates assumptions that market participants use in estimating future net servicing income, including estimates of prepayment speeds, discount rate, default rates, cost to service (including delinquency and foreclosure costs), escrow account earnings, contractual servicing fee income and other ancillary income such as late fees. Management reviews all significant assumptions quarterly. Mortgage loan prepayment speeds, a key assumption in the model, is the annual rate at which borrowers are forecasted to repay their mortgage loan principal. The discount rate used to determine the present value of estimated future net servicing income, another key assumption in the model, is an estimate of the required rate of return investors in the market would require for an asset with similar risk. Both assumptions can, and generally will, change as market conditions and interest rates change.

By way of example, an increase in either the prepayment speed or discount rate assumption will result in a decrease in the fair value of the MSR, while a decrease in either assumption will result in an increase in the fair value of the MSR. In recent years, there have been significant market-driven fluctuations in loan prepayment speeds and discount rates. These fluctuations can be rapid and may continue to be significant. Therefore, estimating prepayment speed and/or discount rates within ranges that market participants would use in determining the fair value of the MSR requires significant management judgment.

At December 31, 2017, the MSR fair value was approximately \$84.3 million, compared to \$80.2 million at December 31, 2016. The impact on the MSR fair value of both a 10% adverse change in prepayment speeds or a 100 basis point increase in discount rates at December 31, 2017, would be a decline in fair value of approximately \$3.1 million, compared to a decline in fair value of approximately \$2.5 million and \$2.9 million, respectively, at December 31, 2016. Changes of equal magnitude in the opposite direction would produce similar increases in fair value in the respective amounts.

ITEM 8. FINANCIAL STATEMENTS AND
SUPPLEMENTARY DATA
Report of Independent Registered Public Accounting Firm

Shareholders and the Board of Directors of Trustmark Corporation

Jackson, Mississippi

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Trustmark Corporation and subsidiaries (the “Corporation”) as of December 31, 2017 and 2016, and the related consolidated statements of income, comprehensive income, changes in shareholders’ equity, and cash flows for each of the years in the two-year period ended December 31, 2017, and the related notes (collectively referred to as the “financial statements”). We also have audited the Corporation’s internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control—Integrated Framework: (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Corporation as of December 31, 2017 and 2016, and the results of its operations and its cash flows for each of the years in the two-year period ended December 31, 2017 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control—Integrated Framework: (2013) issued by the COSO.

Basis for Opinions

The Corporation’s management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion the Corporation’s financial statements and an opinion on the Corporation’s internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Corporation in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the financial statements included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statement. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

We have served as the Corporation's auditor since 2015, which is the year the engagement letter was signed for the audit of the 2016 financial statements.

Atlanta, Georgia

February 20, 2018

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

Trustmark Corporation:

We have audited the accompanying consolidated statements of income, comprehensive income, changes in shareholders' equity, and cash flows of Trustmark Corporation and subsidiaries (the Corporation) for the year ended December 31, 2015. These consolidated financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the results of operations and the cash flows of Trustmark Corporation and subsidiaries for the year ended December 31, 2015, in conformity with U.S. generally accepted accounting principles.

Note 1 – Significant Accounting Policies

Business

Trustmark Corporation (Trustmark) is a bank holding company headquartered in Jackson, Mississippi. Through its subsidiaries, Trustmark operates as a financial services organization providing banking and financial solutions to corporate institutions and individual customers through 198 offices in Alabama, Florida, Mississippi, Tennessee and Texas.

Basis of Financial Statement Presentation

The consolidated financial statements include the accounts of Trustmark and all other entities in which Trustmark has a controlling financial interest. All significant intercompany accounts and transactions have been eliminated in consolidation.

The consolidated financial statements have been prepared in conformity with U.S. generally accepted accounting principles (GAAP). The preparation of financial statements in conformity with these accounting principles requires Management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and income and expense during the reporting periods and the related disclosures. Although Management's estimates contemplate current conditions and how they are expected to change in the future, it is reasonably possible that in 2018 actual conditions could vary from those anticipated, which could affect Trustmark's financial condition and results of operations. Actual results could differ from those estimates.

Securities

Securities are classified as either held to maturity or available for sale. Securities are classified as held to maturity and carried at amortized cost when Management has the positive intent and the ability to hold them until maturity. Securities to be held for indefinite periods of time are classified as available for sale and carried at fair value, with the unrealized holding gains and losses reported as a component of other comprehensive income (loss), net of tax. Securities available for sale are used as part of Trustmark's interest rate risk management strategy and may be sold in response to changes in interest rates, changes in prepayment rates and other factors. Management determines the appropriate classification of securities at the time of purchase.

The amortized cost of debt securities classified as securities held to maturity or securities available for sale is adjusted for amortization of premiums and accretion of discounts to maturity of the security using the interest method. Such amortization or accretion is included in interest on securities. Realized gains and losses are determined using the specific identification method and are included in noninterest income as securities gains (losses), net.

Securities transferred from the available for sale category to the held to maturity category are recorded at fair value at the date of transfer. Unrealized holding gains or losses associated with the transfer of securities from available for sale to held to maturity are included in the balance of accumulated other comprehensive income (loss), net of tax, in the consolidated balance sheets. These unrealized holding gains or losses are amortized over the remaining life of the security as a yield adjustment in a manner consistent with the amortization or accretion of the original purchase premium or discount on the associated security.

Trustmark reviews securities for impairment quarterly. Declines in the fair value of held to maturity and available for sale securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses to the extent the impairment is related to credit losses. The amount of the impairment related to other factors is recognized as a component of other comprehensive income (loss), net of tax. In estimating other-than-temporary

impairment losses, Management considers, among other things, the length of time and the extent to which the fair value has been less than cost, the financial condition and near-term prospects of the issuer and Trustmark's intent and ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.

Loans Held for Sale (LHFS)

Primarily, all mortgage loans purchased from wholesale customers or originated in Trustmark's General Banking Division are considered to be held for sale. In certain circumstances, Trustmark will retain a mortgage loan in its portfolio based on banking relationships or certain investment strategies. Trustmark has elected to account for its LHFS under the fair value option permitted by Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 825, "Financial Instruments," with interest income on the LHFS reported in interest and fees on LHFS and LHFI. Trustmark reports unrealized gains and losses resulting from changes in the fair value of the LHFS accounted for under the fair value option as noninterest income in mortgage banking, net. LHFS are actively managed and monitored and certain market risks of the loans may be mitigated through the use of derivatives. These derivative instruments are carried at fair value with changes in the fair value reported as noninterest income in mortgage banking, net. Changes in the fair value of the LHFS are largely offset by changes in the fair value of the derivative instruments. Election of the fair value option allows Trustmark to reduce the accounting volatility that would otherwise result from the asymmetry

created by accounting for its LHFS at the lower of cost or fair value and the derivative instruments at fair value. Realized gains and losses upon ultimate sale of the loans are reported as noninterest income in mortgage banking, net.

Government National Mortgage Association (GNMA) optional repurchase programs allow financial institutions to buy back individual delinquent mortgage loans that meet certain criteria from the securitized loan pool for which the institution provides servicing. At the servicer's option and without GNMA's prior authorization, the servicer may repurchase such a delinquent loan for an amount equal to 100 percent of the remaining principal balance of the loan. Under FASB ASC Topic 860, "Transfers and Servicing," this buy-back option is considered a conditional option until the delinquency criteria are met, at which time the option becomes unconditional. When Trustmark is deemed to have regained effective control over these loans under the unconditional buy-back option, the loans can no longer be reported as sold and must be brought back onto the balance sheet as LHFS, regardless of whether Trustmark intends to exercise the buy-back option. These loans are reported as LHFS with the offsetting liability being reported as short-term borrowings. The fair value option election does not apply to the GNMA optional repurchase loans which do not meet the requirements under FASB ASC Topic 825 to be accounted for under the fair value option.

Trustmark defers the upfront loan fees and costs related to the LHFS. In general, the LHFS are only retained on Trustmark's balance sheet for 30 to 45 days before they are pooled and sold in the secondary market. The difference between deferring these loan fees and costs until the loans are sold and recognizing them in earnings as incurred as required by FASB ASC Topic 825-10 is considered immaterial. Deferred loan fees and costs are reflected in the basis of the LHFS and, as such, impact the resulting gain or loss when the loans are sold.

Loans Held for Investment (LHFI)

LHFI are stated at the amount of unpaid principal, adjusted for the net amount of direct costs and nonrefundable loan fees associated with lending. The net amount of nonrefundable loan origination fees and direct costs associated with the lending process, including commitment fees, is deferred and accreted to interest income over the lives of the loans using a method that approximates the interest method. Interest on LHFI is accrued and recorded as interest income based on the outstanding principal balance.

Past due LHFI are loans contractually past due 30 days or more as to principal or interest payments. A LHFI is classified as nonaccrual, and the accrual of interest on such loan is discontinued, when the contractual payment of principal or interest becomes 90 days past due on commercial credits and 120 days past due on non-business purpose credits. In addition, a credit may be placed on nonaccrual at any other time Management has serious doubts about further collectibility of principal or interest according to the contractual terms, even though the loan is currently performing. A LHFI may remain in accrual status if it is in the process of collection and well secured. When a LHFI is placed in nonaccrual status, interest accrued but not received is reversed against interest income. Interest payments received on nonaccrual LHFI are applied against principal under the cost-recovery method, until qualifying for return to accrual status. Under the cost-recovery method, interest income is not recognized until the principal balance is reduced to zero. LHFI are restored to accrual status when the obligation is brought current or has performed in accordance with the contractual terms for a reasonable period of time and the ultimate collectibility of the total contractual principal and interest is no longer in doubt.

A LHFI is considered impaired when, based on current information and events, it is probable that Trustmark will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Trustmark considers all nonaccrual LHFI and LHFI classified as a troubled debt restructuring (TDR) to be impaired loans. All commercial nonaccrual relationships of \$500 thousand or more and all LHFI classified as TDRs are individually reviewed for impairment (individually evaluated impaired LHFI). If a LHFI is deemed impaired, a specific valuation allowance is allocated, if necessary, so that the loan is reported net, at the present value of estimated future cash flows using the loan's existing rate or at the fair value of collateral if repayment is expected solely from the collateral. Commercial nonaccrual relationships under \$500 thousand are not individually evaluated

for impairment due to the insignificant number and dollar amount of these types of loans. Nonaccrual LHFI includes both individually evaluated impaired LHFI as well as smaller balance homogeneous loans that are collectively evaluated for impairment. Consistent with the policy for nonaccrual LHFI, interest payments on impaired LHFI are applied to principal. Impaired LHFI, or portions thereof, are charged off when deemed uncollectible.

Troubled Debt Restructuring

A TDR occurs when a borrower is experiencing financial difficulties, and for related economic or legal reasons, a concession is granted to the borrower that Trustmark would not otherwise consider. Whatever the form of concession that might be granted by Trustmark, Management's objective is to enhance collectibility by obtaining more cash or other value from the borrower or by increasing the probability of receipt by granting the concession than by not granting it. Other concessions may arise from court proceedings or may be imposed by law. In addition, TDRs also include those credits that are extended or renewed to a borrower who is not able to obtain funds from sources other than Trustmark at a market interest rate for new debt with similar risk.

A formal TDR may include, but is not necessarily limited to, one or a combination of the following situations:

- Trustmark accepts a third-party receivable or other asset(s) of the borrower, in lieu of the receivable from the borrower.
- Trustmark accepts an equity interest in the borrower in lieu of the receivable.
- Trustmark accepts modification of the terms of the debt including but not limited to:
 - Reduction (absolute or contingent) of the stated interest rate to below the current market rate.
 - Extension of the maturity date or dates at a stated interest rate lower than the current market rate for new debt with similar risk.
 - Reduction (absolute or contingent) of the face amount or maturity amount of the debt as stated in the note or other agreement.
 - Reduction (absolute or contingent) of accrued interest.

Troubled debt restructurings are addressed in Trustmark's loan policy, and in accordance with that policy, any modifications or concessions that may result in a TDR are subject to a special approval process which allows for control, identification, and monitoring of these arrangements. Prior to granting a concession, a revised borrowing arrangement is proposed which is structured so as to improve collectability of the loan in accordance with a reasonable repayment schedule with any loss promptly identified. It is supported by a thorough evaluation of the borrower's financial condition and prospects for repayment under those revised terms. Other TDRs arising from renewals or extensions of existing debt are routinely identified through the processes utilized in the Problem Loan Committees and in the Credit Quality Review Committee. TDRs are subsequently reported to the Director Credit Policy Committee on a quarterly basis and are disclosed in Trustmark's consolidated financial statements in accordance with GAAP and regulatory reporting guidance.

All loans whose terms have been modified in a troubled debt restructuring are evaluated for impairment under FASB ASC Topic 310, "Receivables." Accordingly, Trustmark measures any loss on the restructuring in accordance with that guidance. A TDR in which Trustmark receives physical possession of the borrower's assets, regardless of whether formal foreclosure or repossession proceedings take place, is accounted for in accordance with FASB ASC Subtopic 310-40, "Troubled Debt Restructurings by Creditors." Thus, the loan is treated as if assets have been received in satisfaction of the loan and reported as a foreclosed asset.

A TDR may be returned to accrual status if Trustmark is reasonably assured of repayment of principal and interest under the modified terms and the borrower has demonstrated sustained performance under those terms for a period of at least six months. Otherwise, the restructured loan must remain on nonaccrual.

Allowance for Loan Losses, LHFI

The allowance for loan losses, LHFI is established through provisions for estimated loan losses charged against net income. The allowance account is maintained at a level which is believed to be adequate by Management based on estimated probable losses within the LHFI portfolio. Evaluations of the portfolio and individual credits are inherently subjective, as they require estimates, assumptions and judgments as to the facts and circumstances of particular situations. Some of the factors considered, such as amounts and timing of future cash flows expected to be received, may be susceptible to significant change.

Trustmark's allowance methodology is based on guidance provided in Securities and Exchange Commission (SEC) Staff Accounting Bulletin (SAB) No. 102, "Selected Loan Loss Allowance Methodology and Documentation Issues," as well as other regulatory guidance. The allowance for loan losses, LHFI consists of three components: (i) a historical valuation allowance determined in accordance with FASB ASC Topic 450, "Contingencies," based on historical loan loss experience for LHFI with similar characteristics and trends, (ii) a specific valuation allowance determined in accordance with FASB ASC Topic 310 based on probable losses on specific LHFI and (iii) a qualitative risk valuation allowance determined in accordance with FASB ASC Topic 450 based on general economic conditions and other specific internal and external qualitative risk factors. Each of these components calls for estimates, assumptions and

judgments as described below.

Historical Valuation Allowance

The historical valuation allowance is derived by application of a historical net loss percentage to the outstanding balances of LHFI contained in designated pools and risk rating categories. Pools are established by grouping credits that display similar characteristics and trends such as commercial LHFI for working capital purposes and non-working capital purposes, commercial purpose LHFI secured by real estate (which are further segregated into 1-4 family construction, non 1-4 family construction, land, lots and development, owner-occupied and non-owner occupied categories), other commercial loans, 1-4 family LHFI, 1-4 family LHFI

secured by junior liens and other consumer LHFI. Within these pools, LHFI are further segregated based on Trustmark's internal credit risk rating process that evaluates, among other things: the obligor's ability and willingness to pay, the value of underlying collateral, the ability of guarantors to meet their payment obligations, management experience and effectiveness, and the economic environment and industry in which the borrower operates. The historical net loss percentages, calculated on a quarterly basis, are proportionally distributed to each risk rate within loan groups based upon degree of risk. Using third-party default data, which is updated annually to incorporate the most recent year's information, average cumulative issuer-weighted global default rates by alphanumeric rating are aggregated by Trustmark's commercial loan risk rates. Management uses the long-term default rates to measure the relative risk across the risk rates while the 12-quarter quantitative loss rate sets the absolute level of allowance for loan loss reserve. Further, given the volatility in the default data, the longer look-back period provides for a more stable allowance for loan loss estimate which better reflects the incremental risk across the risk rates.

The historical net loss percentages are calculated using a 12 quarter look-back period, which is the period that best reflects losses inherent in the current loan portfolio. The look-back period sufficiently captures the volatility in net charge-off rates from quarter to quarter and affects the qualitative adjustments that are required to capture the differences in conditions between the current period and those that were prevailing during the look-back period.

The loss emergence period (LEP) refers to the period of time between the events that trigger a loss and charge-off of that loss. Losses are usually not immediately known and determining the loss event can be difficult. It takes time for the borrower and extent of loss to be identified and determined. Management may not be aware that the loss event has occurred until the borrower exhibits the inability to pay or other evidence of credit deterioration. The LEP is evaluated annually to incorporate the most recent year's data and adjusted as necessary.

Loans-Specific Valuation Allowance

Once a LHFI is classified, it is subject to periodic review to determine whether or not the loan is impaired. If determined to be impaired, the loan is evaluated using one of the valuation criteria contained in FASB ASC Topic 310 (i.e., individually or collectively evaluated), and a specific valuation allowance is allocated, if necessary, so that the loan is reported at the net realizable value.

Qualitative Risk Valuation Allowance

The qualitative risk valuation allowance is based on general economic conditions and other internal and external factors affecting Trustmark as a whole as well as specific LHFI. Factors considered include the following within Trustmark's five key market regions: the experience, ability, and effectiveness of Trustmark's lending management and staff; adherence to Trustmark's loans policies, procedures and internal controls; the volume of exceptions relating to collateral, underwriting and financial documentation; credit concentrations; recent performance trends; regional economic trends; the impact of recent acquisitions; and the impact of significant natural disasters. These factors are evaluated on a quarterly basis with the results representing Trustmark's qualitative risk profile in the current period which is used to establish an appropriate allowance. The qualitative portion of the commercial and consumer LHFI allowance for loan loss methodology also incorporates the use of maximum observed gross historical losses observed through the last economic cycle as a way to calculate a maximum qualitative reserve limit. The maximum observed gross historical losses as a percentage of the loan balances results in a maximum observed gross historical loss rate. Once the quantitative component of the allowance for loan loss methodology is calculated, the quantitative reserve percentage is deducted from the maximum observed gross historical loss rate to determine the maximum possible qualitative reserve limit. Management uses its qualitative factor evaluation process in conjunction with this maximum to determine the appropriate estimate of the qualitative considerations not captured by Trustmark's historical loss rates.

Other factors included in the qualitative risk valuation allowance include consideration of: commercial loan facility risk that embodies the nature, frequency and duration of the repayment structure as it pertains to the actual source of

loan repayment, commercial nonaccrual relationships under \$500 thousand which are below the threshold to perform a specific impairment analysis, and independent consumer credit bureau scores that are monitored to identify shifts in risk that are represented in the retail portfolio. These factors are also evaluated on a quarterly basis with the exception of the commercial nonaccrual relationships under \$500 thousand which are evaluated monthly.

Commercial purpose LHFI are charged off when a determination is made that the loan is uncollectible and continuance as a bankable asset is not warranted. Consumer LHFI secured by 1-4 family residential real estate are generally charged off or written down to the fair value of the collateral less cost to sell at no later than 180 days of delinquency. Non-real estate consumer purpose LHFI, including both secured and unsecured loans, are generally charged off by 120 days of delinquency. Consumer revolving lines of credit and credit card debt are generally charged off on or prior to 180 days of delinquency. LHFI are charged off against the allowance for loan losses, LHFI, with any subsequent recoveries credited back to the allowance account.

Acquired Loans

Acquired loans are accounted for under the acquisition method of accounting. The acquired loans are recorded at their estimated fair value at the time of acquisition. The fair value of acquired loans is determined using a discounted cash flow model based on assumptions regarding the amount and timing of principal and interest payments, estimated prepayments, estimated default rates, estimated loss severity in the event of defaults and current market rates. Estimated credit losses are included in the determination of fair value; therefore, an allowance for loan losses is not recorded on the acquisition date.

Trustmark accounts for acquired impaired loans under FASB ASC Topic 310-30, “Loans and Debt Securities Acquired with Deteriorated Credit Quality.” An acquired loan is considered impaired when there is evidence of credit deterioration since origination and it is probable at the date of acquisition that Trustmark would be unable to collect all contractually required payments. Acquired loans accounted for under FASB ASC Topic 310-30 are referred to as “acquired impaired loans.” Revolving credit agreements, such as home equity lines, and commercial leases are excluded from acquired impaired loan accounting requirements.

For acquired impaired loans, Trustmark (i) calculates the contractual amount and timing of undiscounted principal and interest payments (the “undiscounted contractual cash flows”) and (ii) estimates the amount and timing of undiscounted expected principal and interest payments (the “undiscounted expected cash flows”). Under FASB ASC Topic 310-30, the difference between the undiscounted contractual cash flows and the undiscounted expected cash flows is the nonaccretable difference. The nonaccretable difference represents an estimate of the loss exposure of principal and interest related to the acquired impaired loan portfolio, and such amount is subject to change over time based on the performance of such loans. The excess of undiscounted expected cash flows at acquisition over the initial fair value of acquired impaired loans is referred to as the “accretable yield” and is recorded as interest income over the estimated life of the loans using the effective yield method if the timing and amount of the future cash flows is reasonably estimable. Under the effective yield method, the accretable yield is recorded as an accretion of interest income over the life of the loan.

Trustmark aggregates certain acquired impaired loans into pools of loans with common credit risk characteristics such as loan type and risk rating. To establish accounting pools of acquired impaired loans, loans are first categorized by similar purpose, collateral and geographic region. Within each category, the acquired impaired loans are further segmented by ranges of risk determinants observed at the time of acquisition. For commercial loans, the primary risk determinant is the risk rating as assigned by Trustmark. For consumer loans, the risk determinants include delinquency, delinquency history and FICO scores. Statistical comparison of the pools reflect that each pool is comprised of acquired impaired loans generally of similar characteristics, including loan type, loan risk and weighted average life. Each pool is then reviewed for similarity of the pool constituents, including standard deviation of purchase price, weighted average life and concentration of the largest loans. Loan pools are initially booked at the aggregate fair value of the loan pool constituents, based on the present value of Trustmark's expected cash flows from the acquired impaired loans. An acquired impaired loan is removed from a pool of loans only if the loan is sold, foreclosed, payment is received in full satisfaction of the loan or the loan is fully charged off. The acquired impaired loan is removed from the pool at the carrying value. When an individual acquired impaired loan is removed from a pool of loans, the difference between its relative carrying amount and the cash, collateral (measured at fair value) or other assets received will be recognized as a gain or loss immediately in interest income on acquired loans and would not affect the effective yield used to recognize the accretable yield on the remaining pool. Certain acquired impaired loans are not pooled and are accounted for individually. Such acquired impaired loans are withheld from pools due to the inherent uncertainty of the timing and amount of their cash flows or because they are not a suitable similar constituent to the established pools.

As required by FASB ASC Topic 310-30, Trustmark periodically re-estimates the expected cash flows to be collected over the life of the acquired impaired loans. If, based on current information and events, it is probable that Trustmark will be unable to collect all cash flows expected at acquisition plus additional cash flows expected to be collected

arising from changes in estimate after acquisition, the acquired loans are considered impaired. The decrease in the expected cash flows reduces the carrying value of the acquired impaired loans as well as the accretable yield and results in a charge-off through the allowance for loan losses, acquired loans or the establishment of an allowance for loan losses, acquired loans with a charge to income through the provision for loan losses, acquired loans. If, based on current information and events, it is probable that there is a significant increase in the cash flows previously expected to be collected or if actual cash flows are significantly greater than cash flows previously expected, Trustmark will reduce any remaining allowance for loan losses, acquired loans established on the acquired impaired loans for the increase in the present value of cash flows expected to be collected. The increase in the expected cash flows for the acquired impaired loans over those originally estimated at acquisition increases the carrying value of the acquired impaired loans as well as the accretable yield. The increase in the accretable yield is recognized as interest income prospectively over the remaining life of the acquired impaired loans. The carrying value of acquired impaired loans is reduced by payments received, both principal and interest, and increased by the portion of the accretable yield recognized as interest income.

Under FASB ASC Topic 310-30, acquired impaired loans are generally considered accruing and performing loans as the loans accrete interest income over the estimated life of the loan when expected cash flows are reasonably estimable. Accordingly, acquired impaired loans that are contractually past due are still considered to be accruing and performing loans as long as the estimated cash

flows are received as expected. If the timing and amount of cash flows is not reasonably estimable, the loans may be classified as nonaccrual loans and interest income may be recognized on a cash basis or as a reduction of the principal amount outstanding.

Premises and Equipment, Net

Premises and equipment are stated at cost, less accumulated depreciation and amortization. Depreciation is charged to expense over the estimated useful lives of the assets, which are up to thirty-nine years for buildings and three to ten years for furniture and equipment. Leasehold improvements are amortized over the terms of the respective leases or the estimated useful lives of the improvements, whichever is shorter. In cases where Trustmark has the right to renew the lease for additional periods, the lease term for the purpose of calculating amortization of the capitalized cost of the leasehold improvements is extended when Trustmark is “reasonably assured” that it will renew the lease. Depreciation and amortization expenses are computed using the straight-line method. Trustmark continually evaluates whether events and circumstances have occurred that indicate that such long-lived assets have become impaired. Measurement of any impairment of such long-lived assets is based on the fair values of those assets.

Branch closures and purchased land held for future branch expansion for more than five years are evaluated to determine if the related land, buildings and building improvements should be transferred to assets held for sale in accordance with FASB ASC Topic 360, “Property, Plant and Equipment.” The property is transferred to assets held for sale at the lower of its carrying value or fair value less cost to sell. An impairment loss is recorded at the time of transfer if the carrying value of the assets exceeds the fair value. Impairment losses are recorded as non-interest expense in other expense.

Mortgage Servicing Rights (MSR)

Trustmark recognizes as assets the rights to service mortgage loans based on the estimated fair value of the MSR when loans are sold and the associated servicing rights are retained. Trustmark has elected to account for the MSR at fair value.

The fair value of the MSR is determined using discounted cash flow techniques benchmarked against third-party valuations. Estimates of fair value involve several assumptions, including the key valuation assumptions about market expectations of future prepayment rates, interest rates and discount rates which are provided by a third-party firm. Prepayment rates are projected using an industry standard prepayment model. The model considers other key factors, such as a wide range of standard industry assumptions tied to specific portfolio characteristics such as remittance cycles, escrow payment requirements, geographic factors, foreclosure loss exposure, VA no-bid exposure, delinquency rates and cost of servicing, including base cost and cost to service delinquent mortgages. Prevailing market conditions at the time of analysis are factored into the accumulation of assumptions and determination of servicing value.

Trustmark economically hedges changes in the fair value of the MSR attributable to interest rates. See Note 1 – Significant Accounting Policies, “Derivative Financial Instruments – Derivatives not Designated as Hedging Instruments” for information regarding these derivative instruments.

Trustmark receives annual servicing fee income for loans serviced, which is recorded as noninterest income in mortgage banking, net. The fees are based on a contractual percentage of the outstanding principal or a fixed amount per loan and are recorded as income when earned. Late fees and ancillary fees related to loan servicing are not considered material.

Goodwill and Identifiable Intangible Assets

Trustmark accounts for goodwill and other intangible assets in accordance with FASB ASC Topic 350, “Intangibles – Goodwill and Other.” Goodwill, which represents the excess of cost over the fair value of the net assets of an acquired business, is not amortized but tested for impairment on an annual basis, which is October 1 for Trustmark, or more often if events or circumstances indicate that there may be impairment.

Identifiable intangible assets are acquired assets that lack physical substance but can be distinguished from goodwill because of contractual or legal rights or because the assets are capable of being sold or exchanged either on their own or in combination with a related contract, asset or liability. Trustmark’s identifiable intangible assets primarily relate to core deposits, insurance customer relationships and borrower relationships. These intangibles, which have definite useful lives, are amortized on an accelerated basis over their estimated useful lives. In addition, these intangibles are evaluated for impairment whenever events and changes in circumstances indicate that the carrying amount should be reevaluated. Trustmark also purchased banking charters in order to facilitate its entry into the states of Florida and Texas. These identifiable intangible assets are being amortized on a straight-line method over 20 years.

Other Real Estate

Other real estate includes assets that have been acquired in satisfaction of debt through foreclosure and is carried at the lower of cost or estimated fair value. Fair value is based on independent appraisals and other relevant factors. Valuation adjustments required at foreclosure are charged to the allowance for loan losses. Other real estate is revalued on an annual basis or more often if market conditions necessitate. An other real estate specific reserve may be recorded through other real estate expense for declines in fair value subsequent to foreclosure based on recent appraisals or changes in market conditions. Subsequent to foreclosure, losses on the periodic revaluation of the property are charged against an existing other real estate specific reserve or as noninterest expense in other real estate expense if a reserve does not exist. Costs of operating and maintaining the properties as well as gains or losses on their disposition are also included in other real estate expense as incurred. Improvements made to properties are capitalized if the expenditures are expected to be recovered upon the sale of the properties.

Federal Home Loan Bank (FHLB) and Federal Reserve Bank of Atlanta Stock

Securities with limited marketability, such as stock in the Federal Reserve Bank of Atlanta and the FHLB, are carried at cost. Trustmark's investment in member bank stock is included in other assets in the accompanying consolidated balance sheets because these equity securities do not have a readily determinable fair value, which places them outside the scope of FASB ASC Topic 320, "Investments – Debt and Equity Securities." At December 31, 2017 and 2016, Trustmark's investment in member bank stock totaled \$67.7 million and \$71.0 million, respectively. The carrying value of Trustmark's member bank stock gave rise to no other-than-temporary impairment for the years ended December 31, 2017, 2016 and 2015.

Insurance Commissions

Commission revenue is recognized as of the effective date of the insurance policy or the date the customer is billed, whichever is later. Trustmark also receives contingent commissions from insurance companies as additional incentive for achieving specified premium volume goals and/or the loss experience of the insurance placed by Trustmark. Contingent commissions from insurance companies are recognized throughout the calendar year using reasonable estimates that are continuously reviewed and revised to reflect current experience. Trustmark maintains reserves for commission adjustments and doubtful accounts receivable which were not considered significant at December 31, 2017 or 2016.

Wealth Management

Assets under administration held by Trustmark in a fiduciary or agency capacity for customers are not included in Trustmark's consolidated balance sheets. Investment management and trust fee income is recorded on a cash basis, which because of the regularity of the billing cycles, approximates the accrual method, in accordance with industry practice.

Derivative Financial Instruments

Trustmark maintains an overall interest rate risk management strategy that incorporates the use of derivative instruments to minimize significant unplanned fluctuations in earnings and cash flows caused by interest rate volatility. Trustmark's interest rate risk management strategy involves modifying the repricing characteristics of certain assets and liabilities so that changes in interest rates do not adversely affect the net interest margin and cash flows. Under the guidelines of FASB ASC Topic 815, "Derivatives and Hedging," all derivative instruments are required to be recognized as either assets or liabilities and carried at fair value on the balance sheet. The fair value of derivative positions outstanding is included in other assets and/or other liabilities in the accompanying consolidated balance sheets and in the net change in these financial statement line items in the accompanying consolidated statements of cash flows as well as included in noninterest income in the accompanying consolidated statements of

income and other comprehensive income (loss), net of tax in the accompanying consolidated statements of comprehensive income. Trustmark's interest rate swap derivative instruments are subject to master netting agreements, and therefore, eligible for offsetting in the consolidated balance sheets. Trustmark has elected to not offset any derivative instruments in its consolidated balance sheets.

Derivatives Designated as Hedging Instruments

Trustmark has entered into a forward interest rate swap contract on its junior subordinated debentures, with the objective of protecting the quarterly interest payments from the risk of variability of those payments resulting from changes in the three-month LIBOR interest rate for the five-year period beginning December 31, 2014 and ending December 31, 2019. This derivative instrument is designated as a cash flow hedge under FASB ASC Topic 815. Any accumulated net after-tax gains or losses related to effective cash flow hedge are included in accumulated other comprehensive income (loss), net of tax. Any ineffective portion of the interest rate swap is reclassified from accumulated other comprehensive income (loss), net of tax to noninterest expense in the consolidated statements of income for the relevant periods. Amounts reported in accumulated other comprehensive income (loss), net of tax related

to this derivative are reclassified to other interest expense as interest payments are made on Trustmark's variable rate junior subordinated debentures.

Derivatives not Designated as Hedging Instruments

As part of Trustmark's risk management strategy in the mortgage banking area, derivative instruments such as forward sales contracts are utilized. Trustmark's obligations under forward contracts consist of commitments to deliver mortgage loans, originated and/or purchased, in the secondary market at a future date. Changes in the fair value of these derivative instruments are recorded as noninterest income in mortgage banking, net and are offset by changes in the fair value of LHFS. See Note 1 – Significant Accounting Policies, "Loans Held for Sale (LHFS)" for information regarding the fair value option election.

Trustmark also utilizes derivative instruments such as interest rate lock commitments in its mortgage banking area. Rate lock commitments are residential mortgage loan commitments with customers, which guarantee a specified interest rate for a specified time period. Changes in the fair value of these derivative instruments are recorded as noninterest income in mortgage banking, net and are offset by the changes in the fair value of forward sales contracts.

Trustmark utilizes a portfolio of exchange-traded derivative instruments, such as Treasury note futures contracts and option contracts, to achieve a fair value return that economically hedges changes in the fair value of the MSR attributable to interest rates. These transactions are considered freestanding derivatives that do not otherwise qualify for hedge accounting. These exchange-traded derivative instruments are accounted for at fair value with changes in the fair value recorded as noninterest income in mortgage banking, net and are offset by changes in the fair value of the MSR. The MSR fair value represents the present value of future cash flows, which among other things includes decay and the effect of changes in interest rates. Ineffectiveness of hedging the MSR fair value is measured by comparing the change in the fair value of the hedge instruments to the change in the fair value of the MSR asset attributable to changes in interest rates and other market driven changes in valuation inputs and assumptions.

Trustmark offers certain derivatives products directly to qualified commercial lending clients seeking to manage their interest rate risk. Trustmark economically hedges interest rate swap transactions executed with commercial lending clients by entering into offsetting interest rate swap transactions with institutional derivatives market participants. Derivative transactions executed as part of this program are not designated as qualifying hedging relationships and are, therefore, carried at fair value with the change in fair value recorded as noninterest income in bank card and other fees. Because these derivatives have mirror-image contractual terms, in addition to collateral provisions which mitigate the impact of non-performance risk, the changes in fair value are expected to substantially offset.

Income Taxes

Trustmark accounts for uncertain tax positions in accordance with FASB ASC Topic 740, "Income Taxes," which clarifies the accounting and disclosure for uncertainty in tax positions. Under the guidance of FASB ASC Topic 740, Trustmark accounts for deferred income taxes using the liability method. Deferred tax assets and liabilities are based on temporary differences between the financial statement carrying amounts and the tax basis of Trustmark's assets and liabilities. Deferred tax assets and liabilities are measured using the enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be realized or settled and are presented net in the accompanying consolidated balance sheets in other assets.

Stock-Based Compensation

Trustmark accounts for the stock and incentive compensation under the provisions of FASB ASC Topic 718, "Compensation – Stock Compensation." Under this accounting guidance, fair value is established as the measurement objective in accounting for stock awards and requires the application of a fair value based measurement method in

accounting for compensation cost, which is recognized over the requisite service period. Trustmark has elected to account for forfeitures of stock awards as they occur.

Statements of Cash Flows

For purposes of reporting cash flows, cash and cash equivalents include cash on hand and amounts due from banks. The following table reflects specific transaction amounts for the periods presented (\$ in thousands):

	Years Ended December 31,		
	2017	2016	2015
Income taxes paid	\$7,371	\$24,836	\$16,321
Interest expense paid on deposits and borrowings	41,472	24,312	20,733
Noncash transfers from loans to other real estate (1)	8,760	23,965	32,782
Transfer of long-term FHLB advances to short-term	250,038	500,009	—
Assets acquired in business combination	196,265	—	—
Liabilities assumed in business combination	184,949	—	—

(1) Includes transfers from covered loans to foreclosed properties.

Per Share Data

Trustmark accounts for per share data in accordance with FASB ASC Topic 260, "Earnings Per Share," which provides that unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of earnings per share (EPS) pursuant to the two-class method. Trustmark has determined that its outstanding unvested stock awards and deferred stock units are not participating securities. Based on this determination, no change has been made to Trustmark's current computation for basic and diluted EPS.

Basic EPS is computed by dividing net income by the weighted-average shares of common stock outstanding. Diluted EPS is computed by dividing net income by the weighted-average shares of common stock outstanding, adjusted for the effect of potentially dilutive stock awards outstanding during the period.

The following table reflects weighted-average shares used to calculate basic and diluted EPS for the periods presented (in thousands):

	Years Ended December 31,		
	2017	2016	2015
Basic shares	67,727	67,620	67,550
Dilutive shares	160	164	142
Diluted shares	67,887	67,784	67,692

Weighted-average antidilutive stock awards were excluded in determining diluted EPS. The following table reflects weighted-average antidilutive stock awards for the periods presented (in thousands):

	Years Ended December 31,		
	2017	2016	2015
Weighted-average antidilutive stock awards	74	2	1

Fair Value Measurements

FASB ASC Topic 820, “Fair Value Measurements and Disclosures,” defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and requires certain disclosures about fair value measurements. The fair value of an asset or liability is the price that would be received to sell that asset or paid to transfer that liability in an orderly transaction occurring in the principal market (or most advantageous market in the absence of a principal market) for such asset or liability. Depending on the nature of the asset or liability, Trustmark uses various valuation techniques and assumptions when estimating fair value. Inputs to valuation techniques include the assumptions that market participants would use in pricing an asset or liability. FASB ASC Topic 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs – Valuation is based upon quoted prices (unadjusted) in active markets for identical assets or liabilities that Trustmark has the ability to access at the measurement date.

Level 2 Inputs – Valuation is based upon quoted prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability such as interest rates, yield curves, volatilities and default rates and inputs that are derived principally from or corroborated by observable market data.

Level 3 Inputs – Unobservable inputs reflecting the reporting entity’s own determination about the assumptions that market participants would use in pricing the asset or liability based on the best information available.

In instances where the determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the fair value measurement in its entirety is classified is based on the lowest level input that is significant to the fair value measurement in its entirety. Trustmark’s assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability. Transfers between levels of the fair value hierarchy are recognized on the actual date of the event or circumstances that caused the transfer.

Accounting Policies Recently Adopted and Pending Accounting Pronouncements

ASU 2018-02, “Income Statement-Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income.” Issued in February 2018, ASU 2018-02 seeks to help entities reclassify certain stranded income tax effects in accumulated other comprehensive income resulting from the Tax Cuts and Jobs Act of 2017 (Tax Reform Act), enacted on December 22, 2017. ASU 2018-02 was issued in response to concerns regarding current guidance in GAAP that requires deferred tax liabilities and assets to be adjusted for the effect of a change in tax laws or rates with the effect included in income from continuing operations in the reporting period that includes the enactment date, even in situations in which the related income tax effects of items in accumulated other comprehensive income were originally recognized in other comprehensive income, rather than net income, and as a result the stranded tax effects would not reflect the appropriate tax rate. The amendments of ASU 2018-02 allow an entity to make a reclassification from accumulated other comprehensive income to retained earnings for the stranded tax effects, which is the difference between the historical corporate income tax rate of 35.0% and the newly enacted corporate income tax rate of 21.0%. ASU 2018-02 is effective for fiscal years, and interim periods within those years, beginning after December 31, 2018; however, public business entities are allowed to early adopt the amendments of ASU 2018-02 in any interim period for which the financial statements have not yet been issued. The amendments of ASU 2018-02 may be applied either at the beginning of the period (annual or interim) of adoption or retrospectively to each of the period(s) in which the effect of the change in the U.S. federal corporate tax rate in the Tax Reform Act is recognized. As a result of the re-measurement of Trustmark’s deferred tax assets following the enactment of the Tax Reform Act, accumulated other comprehensive loss included \$8.5 million of stranded tax effects at December 31, 2017. Trustmark intends to early adopt the amendments of 2018-02 during the first quarter of 2018 and plans to make an election to reclassify the stranded tax effects from accumulated other comprehensive loss to retaining earnings at the beginning of the period of adoption. The reclassification of the stranded tax effects will result in an increase in accumulated other comprehensive loss and a corresponding increase in retained earnings. Disclosures required by the amendments of ASU 2018-02 will be presented in the Quarterly Report on Form 10-Q for the period ending March 31, 2018. Adoption of ASU 2018-02 is not expected to have a material impact on Trustmark’s consolidated financial statements.

ASU 2017-12, “Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities.” Issued in August 2017, ASU 2017-12 aims to improve the financial reporting of hedging relationships to better portray the economic results of an entity’s risk management activities in its financial statements. The amendments in ASU 2017-12 aim to better align an entity’s risk management activities and financial reporting for hedging relationships by expanding and refining hedge accounting for both non-financial and financial risk components and aligning the recognition and presentation of the effects of the hedging instrument and the hedged item in the financial statements. The amendments in ASU 2017-12 (i) permit hedge accounting for risk components in hedging relationships involving nonfinancial risk and interest rate risk; (ii) change the guidance for designating fair value hedges of interest rate risk and for measuring the change in fair value of the hedged item in fair value hedges of interest rate risk; (iii) continue to allow an entity to exclude option premiums and forward points from the assessment of hedge effectiveness; and (iv) permit an entity to exclude the portion of the change in fair value of a currency swap that is attributable to a cross-country basis spread from the assessment of hedge effectiveness. The amendments of ASU 2017-12 also include targeted improvements intended to simplify the application of hedge accounting. The

amendments of ASU 2017-12 are effective for fiscal years, and interim periods within those years, beginning after December 15, 2018. All transition requirements and elections must be applied to all hedging relationships existing at the date of adoption. Trustmark plans to adopt ASU 2017-12 during the first quarter of 2019 using the required modified retrospective transition method. Trustmark will recognize the cumulative effect of the change, if any, in the beginning balance of each affected component of equity as of January 1, 2019. Management is currently assessing all the potential impacts of the amendments in ASU 2017-12 on Trustmark's consolidated financial statements; however, the adoption of ASU 2017-12 is not expected to have a material impact on Trustmark's consolidated financial statements.

ASU 2017-09, "Compensation-Stock Compensation (Topic 718): Scope of Modification Accounting." ASU 2017-09 seeks to provide clarity, reduce diversity in practice, and reduce cost and complexity when applying the guidance in Topic 718, Compensation-Stock Compensation, regarding a change to the terms or conditions of a share-based payment award. In fact, ASU 2017-09 provides guidance concerning which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting in Topic 718. Specifically, an entity is to account for the effects of a modification, unless all of the following are satisfied: (1) the fair value (or calculated value or intrinsic value, if such an alternative measurement method is used) of the modified award is the same as the fair value (or calculated value or intrinsic value, if such an alternative measurement method is used) of the original

award immediately before the original award is modified; (2) the vesting conditions of the modified award are the same as the vesting conditions of the original award immediately before the original award is modified; and (3) the classification of the modified award as an equity instrument or as a liability instrument is the same as the classification of the original award immediately before the original award is modified. Note that the current disclosure requirements in Topic 718 apply regardless of whether an entity is required to apply modification accounting under the amendments in this ASU. The amendments of ASU 2017-09 became effective for Trustmark on January 1, 2018 and had no impact on Trustmark's consolidated financial statements. However, should Trustmark modify the terms or conditions of any share-based payment award in the future, this modification would be evaluated and disclosed as appropriate based on the amendments of ASU 2017-09.

ASU 2017-08, "Receivables-Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities." Issued in March 2017, ASU 2017-08 amends the amortization period for certain purchased callable debt securities held at a premium. In particular, the amendments in ASU 2017-08 require the premium to be amortized to the earliest call date. The amendments do not, however, require an accounting change for securities held at a discount; instead, the discount continues to be amortized to maturity. Notably, the amendments in this ASU more closely align the amortization period of premiums and discounts to expectations incorporated in market pricing on the underlying securities. Securities within the scope of ASU 2017-08 are purchased debt securities that have explicit, noncontingent call features that are callable at fixed prices and on preset dates. The amendments of ASU 2017-08 become effective for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2018. Trustmark plans to adopt these amendments during the first quarter of 2019. As of December 31, 2017, Trustmark's total unamortized premium for purchased debt securities within the scope of ASU 2017-08 was immaterial. Management will continue to evaluate the impact this ASU will have on Trustmark's consolidated financial statements through its effective date; however, the adoption of ASU 2017-08 is not expected to have a material impact on Trustmark's consolidated financial statements.

ASU 2017-07, "Compensation-Retirement Benefits (Topic 715)-Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost." Issued in March 2017, ASU 2017-07 is designed to improve guidance related to the presentation of defined benefit costs in the income statement. In particular, ASU No. 2017-07 requires that an employer report the service cost component in the same line item(s) as other compensation costs arising from services rendered by the pertinent employees during the period. The other components of net benefit cost are required to be presented in the income statement separately from the service cost component and outside a subtotal of income from operations, if one is presented. If a separate line item or items are used to present the other components of net benefit cost, then that line item or items must be appropriately described. However, if a separate line item or items are not used, then the line item(s) used in the income statement to present the other components of net benefit cost must be disclosed. Additionally, ASU 2017-07 allows only the service cost component to be eligible for capitalization, when applicable. The amendments of ASU 2017-07 must be applied retrospectively for the presentation of the service cost component and the other components of net periodic benefit cost in the income statement and prospectively, on or after the adoption date, for capitalization of the service cost component in assets. Management has evaluated the amendments of this ASU and determined that the amendments of ASU 2017-07 would require a reclassification of the net periodic benefit cost, with the exception of the service cost component, from salaries and employee benefits to other expense on the consolidated statements of income for each period presented, which is not considered material to Trustmark's consolidated financial statements. Trustmark adopted the amendments of ASU 2017-07 effective January 1, 2018. Trustmark has elected the available practical expedient which allows Trustmark to use the amounts disclosed in its pension and other postretirement benefits footnote for the prior comparative periods for applying the retrospective presentation requirements. This change in presentation will be presented beginning with the Quarterly Report on Form 10-Q for the period ending March 31, 2018.

ASU 2017-04, "Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment." Issued in January 2017, ASU 2017-04 simplifies the manner in which an entity is required to test goodwill for impairment by eliminating Step 2 from the goodwill impairment test. Step 2 measures a goodwill impairment loss by comparing the

implied fair value of a reporting unit's goodwill with the carrying amount of that goodwill. In computing the implied fair value of goodwill under Step 2, an entity, prior to the amendments in ASU 2017-04, had to perform procedures to determine the fair value at the impairment testing date of its assets and liabilities, including unrecognized assets and liabilities, in accordance with the procedure that would be required in determining the fair value of assets acquired and liabilities assumed in a business combination. However, under the amendments in ASU 2017-04, an entity should (1) perform its annual or interim goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount, and (2) recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value, with the understanding that the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. Additionally, ASU 2017-04 removes the requirements for any reporting unit with a zero or negative carrying amount to perform a qualitative assessment and, if it fails such qualitative test, to perform Step 2 of the goodwill impairment test. ASU 2017-04 is effective prospectively for annual, or any interim, goodwill impairment tests in fiscal years beginning after December 15, 2019. Based on Trustmark's annual goodwill impairment test performed as of October 1, 2017, the fair value of its reporting units exceeded the carrying value and, therefore, the related goodwill was not impaired. Management will continue to evaluate the impact this ASU will have on Trustmark's consolidated financial statements through its effective date; however, the adoption of ASU 2017-04 is not expected to have a material impact on Trustmark's consolidated financial statements.

ASU 2017-01, “Business Combinations (Topic 805) - Clarifying the Definition of a Business.” Issued in January 2017, ASU 2017-01 clarifies the definition of a business with the objective of adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses, which determines whether goodwill should be recorded or not. The amendments in ASU No. 2017-01 provide a screen to determine when a set of assets and activities (collectively, a “set”) is not a business. The screen requires that when substantially all of the fair value of the gross assets acquired (or disposed of) is concentrated in a single identifiable asset or a group of similar identifiable assets, the set is not a business. This screen reduces the number of transactions that need to be further evaluated. If, however, the screen is not met, then the amendments in ASU 2017-01 require that to be considered a business, a set must include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create output and remove the evaluation of whether a market participant could replace missing elements. The revised definition will result in more transactions being recorded as asset acquisitions or dispositions as opposed to business acquisitions or dispositions. The amendments of ASU 2017-01 must be applied prospectively to transactions occurring on or after the adoption date. The amendments of ASU 2017-01 became effective for Trustmark on January 1, 2018 and did not have any impact to Trustmark’s consolidated financial statements; however, any future business combinations will be evaluated and disclosed as appropriate based on the amendments of ASU 2017-01.

ASU 2016-15, “Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments.” Issued in August 2016, ASU 2016-15 provides guidance to reduce the diversity in practice of how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The amendments of ASU 2016-15 provide guidance on eight specific cash flow: (i) debt prepayment or debt extinguishment costs; (ii) settlement of zero-coupon bonds; (iii) contingent consideration payments made after a business combination; (iv) proceeds from the settlement of insurance claims; (v) proceeds from the settlement of corporate-owned life insurance policies, including bank-owned life insurance policies; (vi) distributions received from equity method investees; (vii) beneficial interests in securitization transactions and (viii) separately identifiable cash flows and application of the predominance principle. Trustmark adopted the amendments of ASU 2016-15 effective January 1, 2018, and adoption of this ASU did not have any impact to Trustmark’s existing presentation of the applicable cash receipts and cash payments on its consolidated statements of cash flows.

ASU 2016-13, “Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments.” Issued in June 2016, ASU 2016-13 will add FASB ASC Topic 326, “Financial Instruments-Credit Losses” and finalizes amendments to FASB ASC Subtopic 825-15, “Financial Instruments-Credit Losses.” The amendments of ASU 2016-13 are intended to provide financial statement users with more decision-useful information related to expected credit losses on financial instruments and other commitments to extend credit by replacing the current incurred loss impairment methodology with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to determine credit loss estimates. The amendments of ASU 2016-13 eliminate the probable initial recognition threshold and, in turn, reflect an entity’s current estimate of all expected credit losses. ASU 2016-13 does not specify the method for measuring expected credit losses, and an entity is allowed to apply methods that reasonably reflect its expectations of the credit loss estimate. Additionally, the amendments of ASU 2016-13 require that credit losses on available for sale debt securities be presented as an allowance rather than as a write-down. The amendments of ASU 2016-13 are effective for interim and annual periods beginning after December 15, 2019. Earlier application is permitted for interim and annual periods beginning after December 15, 2018. Trustmark has established a Current Expected Credit Loss (CECL) Steering Committee and a CECL Working Group which include the appropriate members of Management to evaluate the impact this ASU will have on Trustmark’s financial position, results of operations and financial statement disclosures and determine the most appropriate method of implementing the amendments in this ASU as well as any resources needed to implement the amendments. Trustmark selected a third-party vendor to provide an automated allowance for loan loss software as well as advisory services in developing a new allowance for loan loss methodology that would be compliant with amendments of ASU 2016-13, and is working with the approved third-party vendor to develop the CECL model and evaluate the impact to Trustmark. Trustmark intends to adopt the amendments of ASU 2016-13 during the first quarter of 2020. Management will continue to evaluate the impact this ASU will have on Trustmark’s

consolidated financial statements through its effective date.

ASU 2016-09, "Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting." Issued in March 2016, ASU 2016-09 seeks to reduce complexity in accounting standards by simplifying several aspects of the accounting for share-based payment transactions. The amendments of ASU 2016-09 include: (i) requiring all excess tax benefits and tax deficiencies to be recognized as income tax expense or benefit in the income statement; (ii) requiring excess tax benefits to be classified along with other income tax cash flows as an operating activity on the statement of cash flow; (iii) allowing an entity to make an entity-wide accounting policy election to either estimate the number of awards that expect to vest or account for forfeitures when they occur; (iv) change the threshold to qualify for equity classification to permit withholding up to the maximum statutory tax rates in the applicable jurisdictions; and (v) requiring that cash paid by an employer when directly withholding shares for tax-withholding purposes to be classified as a financing activity on the statement of cash flows. The amendments of ASU 2016-09 became effective for Trustmark on January 1, 2017. Trustmark elected to present changes to the consolidated statements of cash flows on a retrospective basis, which resulted in \$107 thousand and \$211 thousand of excess tax expense from stock-based compensation arrangements being reclassified from financing activities to other operating activities, net and \$1.0 million and \$863 thousand of withholding taxes paid for shares directly withheld being reclassified from other operating activities, net to financing activities for the

years ended December 31, 2016 and 2015, respectively. Adoption of ASU 2016-09 did not materially affect Trustmark's consolidated financial statements. Trustmark has made an entity-wide accounting policy election to account for forfeitures of stock awards as they occur. Changes as required by the amendments of ASU 2016-09 are presented in the accompanying consolidated statements of cash flows.

ASU 2016-02, "Leases (Topic 842)." Issued in February 2016, ASU 2016-02 was issued by the FASB to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet and by disclosing key information about leasing arrangements. ASU 2016-02 will, among other things, require lessees to recognize a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. ASU 2016-02 does not significantly change lease accounting requirements applicable to lessors; however, the ASU contains some targeted improvements that are intended to align, where necessary, lessor accounting with the lessee accounting model and with the updated revenue recognition guidance issued in 2014. The amendments of ASU 2016-02 are effective for interim and annual periods beginning after December 15, 2018. Trustmark plans to adopt the amendments of ASU 2016-02 beginning in the first quarter of 2019. At adoption, Trustmark will recognize a lease asset and a corresponding lease liability on its consolidated balance sheet for its total lease obligation measured on a discounted basis. As of December 31, 2017, all leases in which Trustmark was the lessee were classified as operating leases and the total outstanding lease obligation was \$67.9 million, or 0.5% of total assets. Management is currently evaluating these lease obligations as potential lease assets and liabilities as defined by ASU 2016-02. Trustmark does not anticipate any material impact to its consolidated statements of income as a result of the adoption of this ASU. Trustmark has an immaterial amount of leases in which it is the lessor. Based on Management's evaluation to date, Trustmark does not expect the amendments of ASU 2016-02 to have any material impact to these leases or the related income. Management will continue to evaluate the impact this ASU will have on Trustmark's consolidated financial statements; however, the adoption of ASU 2016-02 is not expected to have a material impact on Trustmark's consolidated financial statements.

ASU 2016-01, "Financial Instruments-Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities (An Amendment of the FASB Accounting Standards Codification)." Issued in January 2016, ASU 2016-01 is intended to enhance the reporting model for financial instruments to provide users of financial statements with improved decision-making information. The amendments of ASU 2016-01 include: (i) requiring equity investments, except those accounted for under the equity method of accounting or those that result in the consolidation of an investee, to be measured at fair value with changes in fair value recognized in net income; (ii) requiring a qualitative assessment to identify impairment of equity investments without readily determinable fair values; (iii) eliminating the requirement to disclose the method and significant assumptions used to estimate the fair value for financial instruments measured at amortized cost on the balance sheet; (iv) requiring the use of the exit price notion when measuring the fair value of financial instruments for disclosure purposes; (v) requiring an entity that has elected the fair value option to measure the fair value of a liability to present separately in other comprehensive income the portion of the change in the fair value resulting from a change in the instrument-specific credit risk; (vi) requiring separate presentation of financial assets and financial liabilities by measurement category and form of financial asset on the balance sheet or the accompanying notes to the financial statements and (vii) clarifying that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available for sale securities in combination with the entity's other deferred tax assets. The amendments of ASU 2016-01 became effective for Trustmark on January 1, 2018. Trustmark's investments in member bank stock, which are equity securities that do not have readily determinable fair values, are not within the scope of ASU 2016-01. See Note 1 – Significant Accounting Policies, "Federal Home Loan Bank (FHLB) and Federal Reserve Bank of Atlanta Stock" for information regarding Trustmark's investment in member bank stock. The amendments of ASU 2016-01, specifically amendments (iii) and (iv) described above, will require changes to Trustmark's fair value related disclosures. Trustmark has selected a third-party vendor to measure the fair value of the LHFI portfolio using the exit price notion as required by amendment (iv) above. The adoption of ASU 2016-01 did not have a material impact on Trustmark's consolidated financial statements. Changes to Trustmark's fair value related disclosures will be presented beginning with the Quarterly Report on Form 10-Q as of March 31, 2018.

ASU 2014-09, “Revenue from Contracts with Customers (Topic 606).” Issued in May 2014, ASU 2014-09 will add FASB ASC Topic 606, “Revenue from Contracts with Customers,” and will supersede revenue recognition requirements in FASB ASC Topic 605, “Revenue Recognition,” as well as certain cost guidance in FASB ASC Topic 605-35, “Revenue Recognition – Construction-Type and Production-Type Contracts.” ASU 2014-09 provides a framework for revenue recognition that replaces the existing industry and transaction specific requirements under the existing standards. ASU 2014-09 requires an entity to apply a five-step model to determine when to recognize revenue and at what amount. The model specifies that revenue should be recognized when (or as) an entity transfers control of goods or services to a customer at the amount in which the entity expects to be entitled. Depending on whether certain criteria are met, revenue should be recognized either over time, in a manner that depicts the entity’s performance, or at a point in time, when control of the goods or services are transferred to the customer. ASU 2014-09 provides that an entity should apply the following steps: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract; and (5) recognize revenue when, or as, the entity satisfies a performance obligation. In addition, the existing requirements for the recognition of a gain or loss on the transfer of non-financial assets that are not in a contract with a customer are amended to be consistent with the guidance

on recognition and measurement in ASU 2014-09. The amendments of ASU 2014-09 may be applied either retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of initially applying ASU 2014-09 recognized at the date of initial application. If the transition method of application is elected, the entity should also provide the additional disclosures in reporting periods that include the date of initial application of (1) the amount by which each financial statement line item is affected in the current reporting period, as compared to the guidance that was in effect before the change, and (2) an explanation of the reasons for significant changes. The amendments of ASU 2014-09 and all subsequently issued ASUs, which provided additional guidance and clarifications to various aspects of FASB ASC Topic 606, became effective for Trustmark on January 1, 2018. Trustmark elected to adopt these amendments using the modified retrospective method of application for only those contracts not completed as of the date of adoption. Trustmark's contracts with customers are primarily for a term of one year or less and substantially all of Trustmark's contracts were completed as of January 1, 2018. Management has determined that approximately 23% of the revenues earned by Trustmark are within the scope of ASU 2014-09, and, for most of the revenue streams within the scope of ASU 2014-09, the amendments do not change the timing or amount of revenue recognized. The adoption of ASU 2014-09 did not have a material impact on Trustmark's consolidated financial statements. No cumulative adjustment was recorded as a result of the adoption of ASU 2014-09. Disclosures required by the amendments of ASU 2014-09 will be presented beginning with the Quarterly Report on Form 10-Q for the period ending March 31, 2018.

Note 2 – Business Combinations

On April 7, 2017, Trustmark completed its merger with RB Bancorporation (Reliance), the holding company for Reliance Bank, which had seven offices serving the Huntsville, Alabama metropolitan service area (MSA). Reliance Bank was merged into Trustmark National Bank simultaneously with the merger of Trustmark and Reliance. Under the terms of the Merger Agreement dated November 14, 2016, Trustmark paid \$22.00 in cash for each share of Reliance common stock outstanding, which represented payment to Reliance common shareholders of approximately \$23.7 million. In addition, Trustmark paid off Reliance Preferred Stock of \$1.1 million bringing the total consideration paid to \$24.8 million.

The merger with Reliance was consistent with Trustmark's strategic plan to selectively expand the Trustmark franchise and enhance the Trustmark franchise in north Alabama.

This merger was accounted for in accordance with FASB ASC Topic 805, "Business Combinations." Accordingly, the assets and liabilities, both tangible and intangible, were recorded at their estimated fair values as of the merger date. The fair values of the assets acquired and liabilities assumed are subject to adjustment if additional information relative to the closing date fair values becomes available through the measurement period, which is not to exceed one year from the merger date of April 7, 2017.

The statement of assets purchased and liabilities assumed in the Reliance merger is presented below at their estimated fair values as of the merger date of April 7, 2017 (\$ in thousands):

Assets:	
Cash and due from banks	\$5,013
Federal funds sold and securities purchased under reverse repurchase agreements	6,900
Securities	54,843
Acquired loans	117,447
Premises and equipment, net	3,700
Identifiable intangible assets	1,850

Edgar Filing: TRUSTMARK CORP - Form 10-K

Other real estate	475
Other assets	6,037
Total Assets	196,265
Liabilities:	
Deposits	166,158
Other borrowings	17,469
Other liabilities	1,322
Total Liabilities	184,949
Net identified assets acquired at fair value	11,316
Goodwill	13,471
Total consideration paid	\$24,787

The excess of the consideration paid over the estimated fair value of the net assets acquired was \$13.5 million, which was recorded as goodwill under FASB ASC Topic 805. The identifiable intangible assets acquired represent the core deposit intangible at fair value at the merger date. The core deposit intangible is being amortized on an accelerated basis over the estimated useful life, currently expected to be approximately ten years.

Loans acquired from Reliance were evaluated under a fair value process. Loans with evidence of deterioration in credit quality and for which it was probable at acquisition that Trustmark would not be able to collect all contractually required payments are referred to as acquired impaired loans and accounted for in accordance with FASB ASC Topic 310-30. See Note 6 – Acquired Loans for additional information on acquired loans.

The operations of Reliance are included in Trustmark's operating results from April 7, 2017 and did not have a material impact on Trustmark's results of operations. During the second quarter of 2017, Trustmark included merger transaction expenses in other noninterest expense totaling \$3.2 million (change in control expense of \$1.3 million; professional fees, contract termination and other expenses of \$1.9 million).

Fair Value of Acquired Financial Instruments

For financial instruments measured at fair value, Trustmark utilized Level 2 inputs to determine the fair value of securities available for sale (included in securities above), time deposits (included in deposits above) and FHLB advances (included in other borrowings above). Level 3 inputs were used to determine the fair value of acquired loans, identifiable intangible assets and other real estate. The methodology and significant assumptions used in estimating the fair values of these financial assets and liabilities are as follows:

Securities Available for Sale

Estimated fair values for securities available for sale are based on quoted market prices where available. If quoted market prices are not available, estimated fair values are based on quoted market prices of comparable instruments.

Acquired Loans

Fair value of acquired loans is determined using a discounted cash flow model based on assumptions regarding the amount and timing of principal and interest payments, estimated prepayments, estimated default rates, estimated loss severity in the event of default and current market rates.

Identifiable Intangible Assets

The fair value assigned to the identifiable intangible assets, in this case the core deposit intangible, represents the future economic benefits of the potential cost savings from acquiring core deposits in the merger compared to the cost of obtaining alternative funding from market sources.

Other Real Estate

Other real estate was initially recorded at its estimated fair value on the merger date based on independent appraisals less estimated selling costs.

Time Deposits

Time deposits were valued by projecting expected cash flows into the future based on each account's contracted rate and then determining the present value of those expected cash flows using current rates for deposits with similar maturities.

FHLB Advances

FHLB advances were valued by projecting expected cash flows into the future based on each advance's contracted rate and then determining the present value of those expected cash flows using current rates for advances with similar maturities.

Please refer to Note 18 – Fair Value for more information on Trustmark's classification of financial instruments based on valuation inputs within the fair value hierarchy.

Note 3 – Cash and Due from Banks

Trustmark is required to maintain average reserve balances with the Federal Reserve Bank of Atlanta based on a percentage of deposits. The average amounts of those reserves for the years ended December 31, 2017 and 2016 were \$100.8 million and \$94.7 million, respectively.

Note 4 – Securities Available for Sale and Held to Maturity

The following tables are a summary of the amortized cost and estimated fair value of securities available for sale and held to maturity at December 31, 2017 and 2016 (\$ in thousands):

	Securities Available for Sale				Securities Held to Maturity			
	Amortized	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value

Edgar Filing: TRUSTMARK CORP - Form 10-K

During 2013, Trustmark reclassified approximately \$1.099 billion of securities available for sale to securities held to maturity. The securities were transferred at fair value, which became the cost basis for the securities held to maturity. At the date of transfer, the net unrealized holding loss on the available for sale securities totaled approximately \$46.6 million (\$28.8 million, net of tax). The net unrealized holding loss is amortized over the remaining life of the securities as a yield adjustment in a manner consistent with the amortization or accretion of the original purchase premium or discount on the associated security. There were no gains or losses recognized as a result of the transfer. At December 31, 2017, the net unamortized, unrealized loss on the transferred securities included in accumulated other comprehensive loss in the accompanying balance sheet totaled approximately \$19.5 million (\$12.0 million, net of tax).

Temporarily Impaired Securities

The table below includes securities with gross unrealized losses segregated by length of impairment at December 31, 2017 and 2016 (\$ in thousands):

	Less than 12 Months		12 Months or More		Total	
	Estimated	Gross	Estimated	Gross	Estimated	Gross

-------	-------------	--------------	------------	-------------	--------------	--------------

The unrealized losses shown above are due to increases in market rates over the yields available at the time of purchase of the underlying securities and not credit quality. Because Trustmark does not intend to sell these securities and it is more likely than not

that Trustmark will not be required to sell the investments before recovery of their amortized cost bases, which may be maturity, Trustmark does not consider these investments to be other-than-temporarily impaired at December 31, 2017. There were no other-than-temporary impairments for the years ended December 31, 2017, 2016 and 2015.

Security Gains and Losses

For the periods presented, gains and losses as a result of calls and dispositions of securities, as well as any associated proceeds, were as follows (\$ in thousands):

	Years Ended December 31,		
Available for Sale	2017	2016	2015
Proceeds from calls and sales of securities	\$27,682	\$24,693	\$ —
Gross realized gains	16	32	—
Gross realized losses	(1)	(342)	—

Securities Pledged

Securities with a carrying value of \$1.834 billion and \$1.999 billion at December 31, 2017 and 2016, respectively, were pledged to collateralize public deposits and securities sold under repurchase agreements and for other purposes as permitted by law. At both December 31, 2017 and 2016, none of these securities were pledged under the Federal Reserve Discount Window program to provide additional contingency funding capacity.

Contractual Maturities

The amortized cost and estimated fair value of securities available for sale and held to maturity at December 31, 2017, by contractual maturity, are shown below (\$ in thousands). Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Securities Available for Sale		Securities Held to Maturity	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
Due in one year or less	\$31,376	\$31,525	\$155	\$155
Due after one year through five years	57,372	58,343	40,594	41,450
Due after five years through ten years	3,866	3,845	8,982	9,293
Due after ten years	31,582	30,801	—	—
	124,196	124,514	49,731	50,898
Mortgage-backed securities	2,137,934	2,114,121	1,006,755	995,349
Total	\$2,262,130	\$2,238,635	\$1,056,486	\$1,046,247

Note 5 – LHFI and Allowance for Loan Losses, LHFI

At December 31, 2017 and 2016, LHFI consisted of the following (\$ in thousands):

Edgar Filing: TRUSTMARK CORP - Form 10-K

	December 31,	
	2017	2016
Loans secured by real estate:		
Construction, land development and other land	\$987,624	\$831,437
Secured by 1-4 family residential properties	1,675,311	1,660,043
Secured by nonfarm, nonresidential properties	2,193,823	2,034,176
Other real estate secured	517,956	318,148
Commercial and industrial loans	1,570,345	1,528,434
Consumer loans	171,918	170,562
State and other political subdivision loans	952,483	917,515
Other loans	500,507	390,898
LHFI (1)	8,569,967	7,851,213
Less allowance for loan losses, LHFI	76,733	71,265
Net LHFI	\$8,493,234	\$7,779,948

(1) During the first quarter of 2017, Trustmark reclassified \$36.7 million of acquired loans not accounted for under FASB ASC Topic 310-30 to LHFI due to the discount on these loans being fully amortized.

Loan Concentrations

Trustmark does not have any loan concentrations other than those reflected in the preceding table, which exceed 10% of total LHFI. At December 31, 2017, Trustmark's geographic loan distribution was concentrated primarily in its five key market regions: Alabama, Florida, Mississippi, Tennessee and Texas. Accordingly, the ultimate collectability of a substantial portion of these loans is susceptible to changes in market conditions in these areas.

Related Party Loans

At December 31, 2017 and 2016, loans to certain executive officers and directors, including their immediate families and companies in which they are principal owners, totaled \$59.9 million and \$47.1 million, respectively. During 2017, \$418.5 million of new loan advances were made, while repayments were \$405.8 million. In addition, increases in loans due to changes in executive officers and directors totaled \$12 thousand.

Nonaccrual and Past Due LHFI

At December 31, 2017 and 2016, the carrying amounts of nonaccrual LHFI were \$67.6 million and \$49.2 million, respectively. Included in these amounts were \$23.2 million and \$14.4 million, respectively, of nonaccrual LHFI classified as TDRs. No material interest income was recognized in the income statement on nonaccrual LHFI for each of the years in the three-year period ended December 31, 2017.

The following table details nonaccrual LHFI by loan type at December 31, 2017 and 2016 (\$ in thousands):

	December 31,	
	2017	2016
Loans secured by real estate:		
Construction, land development and other land	\$2,105	\$3,323
Secured by 1-4 family residential properties	19,022	20,329
Secured by nonfarm, nonresidential properties	12,608	8,482
Other real estate secured	212	402
Commercial and industrial loans	33,338	15,824
Consumer loans	135	300
State and other political subdivision loans	—	—
Other loans	155	574
Total nonaccrual LHFI	\$67,575	\$49,234

The following tables provide an aging analysis of past due and nonaccrual LHFI by loan type at December 31, 2017 and 2016 (\$ in thousands):

	December 31, 2017						Total LHFI

Impaired LHFI							

(1) Past due 90 days or more but still accruing interest.

Impaired LHFI

As of January 1, 2017, Trustmark modified its presentation of individually evaluated impaired LHFI in the accompanying notes to the consolidated financial statements to include all commercial nonaccrual relationships of \$500 thousand or more, which are specifically reviewed for impairment and deemed impaired, and all LHFI classified as TDRs in accordance with FASB ASC Topic 310-10-50-20. Previously, Trustmark presented all nonaccrual LHFI and LHFI classified as TDRs as impaired loans. Nonaccrual LHFI includes both individually evaluated impaired LHFI as well as smaller balance homogeneous loans that are collectively evaluated for impairment. As a result of this change in presentation, these smaller balance homogenous nonaccrual LHFI are included within the LHFI collectively evaluated for impairment category. All prior period information has been reclassified to conform to the current period presentation.

Trustmark's individually evaluated impaired LHFI are primarily collateral dependent loans. Fair value estimates for collateral dependent loans are derived from appraised values based on the current market value or as is value of the collateral, normally from recently received and reviewed appraisals. Current appraisals are ordered on an annual basis based on the inspection date or more often if market conditions necessitate. Appraisals are obtained from state-certified appraisers and are based on certain assumptions, which may include construction or development status and the highest and best use of the property. These appraisals are reviewed by Trustmark's Appraisal Review Department to ensure they are acceptable, and values are adjusted down for costs associated with asset disposal. Once this estimated net realizable value has been determined, the value used in the impairment assessment is updated. At the time a LHFI that has been individually evaluated for impairment is deemed to be impaired, the full difference between book value and the most likely estimate of the collateral's net realizable value is charged off. As subsequent events dictate and estimated net realizable values decline, required reserves may be established or further adjustments recorded.

No material interest income was recognized in the accompanying consolidated statements of income on impaired LHFI for each of the years in the three-year period ended December 31, 2017.

Edgar Filing: TRUSTMARK CORP - Form 10-K

At December 31, 2017 and 2016, the carrying amount of LHFI individually evaluated for impairment consisted of the following (\$ in thousands):

	December 31, 2017

Troubled Debt Restructurings

At December 31, 2017, 2016 and 2015, LHFI classified as TDRs totaled \$23.9 million, \$14.5 million and \$9.7 million, respectively, and were primarily comprised of credits with interest-only payments for an extended period of time which totaled \$20.5 million, \$9.8 million and \$5.9 million, respectively. The remaining TDRs at December 31, 2017, 2016 and 2015 resulted from real estate loans discharged through Chapter 7 bankruptcy that were not reaffirmed or from payment or maturity extensions.

For TDRs, Trustmark had a related loan loss allowance of \$458 thousand at December 31, 2017, \$2.2 million at December 31, 2016 and \$1.8 million at December 31, 2015. LHFI classified as TDRs are charged down to the most likely fair value estimate less an estimated cost to sell for collateral dependent loans, which would approximate net realizable value. Specific charge-offs related to TDRs totaled \$127 thousand, \$1.0 million and \$806 thousand for the years ended December 31, 2017, 2016 and 2015, respectively.

At December 31, 2017 and 2016, Trustmark held \$366 thousand and \$269 thousand, respectively, of foreclosed residential real estate as a result of foreclosure or in substance repossession of consumer mortgage LHFI classified as TDRs. There were no consumer mortgage LHFI classified as TDRs in the process of formal foreclosure proceedings at December 31, 2017 compared to \$101 thousand at December 31, 2016.

Edgar Filing: TRUSTMARK CORP - Form 10-K

The following tables illustrate the impact of modifications classified as TDRs as well as those TDRs modified within the last 12 months for which there was a payment default during the period for the periods presented (\$ in thousands):

	Year Ended December 31, 2017		
	Pre-Modification		Post-Modification
	Outstanding		Outstanding
	Number	Recorded	Recorded
Modifications Classified as TDRs	Contract	Investment	Investment
Loans secured by real estate:			
Construction, land development and other land	1	\$ 341	\$ 325
Secured by 1-4 family residential properties	22	1,478	1,487
Secured by nonfarm, nonresidential properties	1	426	426
Commercial and industrial loans	8	12,836	12,836
Other loans	1	556	556
Total	33	\$ 15,637	\$ 15,630

	Year Ended December 31, 2016		
	Pre-Modification		Post-Modification
	Outstanding		Outstanding
	Number	Recorded	Recorded
Modifications Classified as TDRs	Contract	Investment	Investment
Loans secured by real estate:			
Construction, land development and other land	1	\$ 14	\$ 14
Secured by 1-4 family residential properties	18	1,386	1,391
Secured by nonfarm, nonresidential properties	2	717	717
Commercial and industrial loans	5	10,043	9,982
Consumer loans	1	2	2
Total	27	\$ 12,162	\$ 12,106

	Year Ended December 31, 2015		
	Pre-Modification		Post-Modification
	Outstanding		Outstanding
	Number	Recorded	Recorded
Modifications Classified as TDRs	Contract	Investment	Investment
Loans secured by real estate:			
Secured by 1-4 family residential properties	13	\$ 688	\$ 688
Secured by nonfarm, nonresidential properties	5	3,613	3,613
Total	18	\$ 4,301	\$ 4,301

	Years Ended December 31,				2015	
	2017		2016		2015	
	Number		Number		Number	
	of Recorded		of Recorded		of Recorded	
TDRs that Subsequently Defaulted	Contract	Investment	Contract	Investment	Contract	Investment
Loans secured by 1-4 family residential properties	4	\$ 78	1	\$ —	5	\$ 260
Commercial and industrial loans	3	9,526	2	2,154	—	—
Total	7	\$ 9,604	3	\$ 2,154	5	\$ 260

Trustmark's TDRs have resulted primarily from allowing the borrower to pay interest-only for an extended period of time rather than from forgiveness. Accordingly, as shown above, these TDRs have a similar recorded investment for both the pre-modification and post-modification disclosure. Trustmark has utilized loans 90 days or more past due to define payment default in determining TDRs that have subsequently defaulted.

Edgar Filing: TRUSTMARK CORP - Form 10-K

The following tables detail LHFI classified as TDRs by loan type at December 31, 2017, 2016 and 2015 (\$ in thousands):

	December 31, 2017		
	Accruing	Nonaccrual	Total

Commercial and industrial loans	—	463	463
Total TDRs	\$2,235	\$ 7,418	\$9,653

Credit Quality Indicators

Trustmark's loan portfolio credit quality indicators focus on six key quality ratios that are compared against bank tolerances. The loan indicators are total classified outstanding, total criticized outstanding, nonperforming loans, nonperforming assets, delinquencies and net loan losses. Due to the homogenous nature of consumer loans, Trustmark does not assign a formal internal risk rating to each credit and therefore the criticized and classified measures are primarily composed of commercial loans.

In addition to monitoring portfolio credit quality indicators, Trustmark also measures how effectively the lending process is being managed and risks are being identified. As part of an ongoing monitoring process, Trustmark grades the commercial portfolio as it relates to credit file completion and financial statement exceptions, underwriting, collateral documentation and compliance with law as shown below:

◆ **Credit File Completeness and Financial Statement Exceptions** – evaluates the quality and condition of credit files in terms of content and completeness and focuses on efforts to obtain and document sufficient information to determine the quality and status of credits. Also included is an evaluation of the systems/procedures used to insure compliance with policy.

◆ **Underwriting** – evaluates whether credits are adequately analyzed, appropriately structured and properly approved within loan policy requirements. A properly approved credit is approved by adequate authority in a timely manner with all conditions of approval fulfilled. Total policy exceptions measure the level of underwriting and other policy exceptions within a loan portfolio.

◆ **Collateral Documentation** – focuses on the adequacy of documentation to perfect Trustmark's collateral position and substantiate collateral value. Collateral exceptions measure the level of documentation exceptions within a loan portfolio. Collateral exceptions occur when certain collateral documentation is either not present or not current.

◆ **Compliance with Law** – focuses on underwriting, documentation, approval and reporting in compliance with banking laws and regulations. Primary emphasis is directed to the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA), Regulation O requirements and regulations governing appraisals.

Commercial Credits

Trustmark has established a loan grading system that consists of ten individual credit risk grades (risk ratings) that encompass a range from loans where the expectation of loss is negligible to loans where loss has been established. The model is based on the risk of default for an individual credit and establishes certain criteria to delineate the level of risk across the ten unique credit risk grades. Credit risk grade definitions are as follows:

- **Risk Rate (RR) 1 through RR 6** – Grades one through six represent groups of loans that are not subject to criticism as defined in regulatory guidance. Loans in these groups exhibit characteristics that represent low to moderate risk measured by using a variety of credit risk criteria such as cash flow coverage, debt service coverage, balance sheet leverage, liquidity, management experience, industry position, prevailing economic conditions, support from secondary sources of repayment and other credit factors that may be relevant to a specific loan. In general, these loans are supported by properly margined collateral and guarantees of principal parties.

• **Other Assets Especially Mentioned (Special Mention) - (RR 7)** – a loan that has a potential weakness that if not corrected will lead to a more severe rating. This rating is for credits that are currently protected but potentially weak because of an adverse feature or condition that if not corrected will lead to a further downgrade.

• **Substandard (RR 8)** – a loan that has at least one identified weakness that is well defined. This rating is for credits where the primary sources of repayment are not viable at the time of evaluation or where either the capital or collateral is not adequate to support the loan and the secondary means of repayment do not provide a sufficient level of support to offset the identified weakness. Loss potential exists in the aggregate amount of substandard loans but does not necessarily exist in individual loans.

• **Doubtful (RR 9)** – a loan with an identified weakness that does not have a valid secondary source of repayment. Generally these credits have an impaired primary source of repayment and secondary sources are not sufficient to prevent a loss in the credit. The exact amount of the loss has not been determined at this time.

• **Loss (RR 10)** – a loan or a portion of a loan that is deemed to be uncollectible.

By definition, credit risk grades special mention (RR 7), substandard (RR 8), doubtful (RR 9) and loss (RR 10) are criticized loans while substandard (RR 8), doubtful (RR 9) and loss (RR 10) are classified loans. These definitions are standardized by all bank regulatory agencies and are generally equally applied to each individual lending institution. The remaining credit risk grades are considered pass credits and are solely defined by Trustmark.

Each commercial loan is assigned a credit risk grade that is an indication for the likelihood of default and is not a direct indication of loss at default. The loss at default aspect of the subject risk ratings is neither uniform across the nine primary commercial loan groups or constant between the geographic areas. To account for the variance in the loss at default aspects of the risk rating system, the loss expectations for each risk rating are integrated into the allowance for loan loss methodology where the calculated loss at default is allotted for each individual risk rating with respect to the individual loan group and unique geographic area. The loss at default aspect of the reserve methodology is calculated each quarter as a component of the overall reserve factor for each risk grade by loan group and geographic area.

To enhance this process, relationships of \$500 thousand or more that are rated in one of the criticized categories are routinely reviewed to establish an expectation of loss, if any, and if such examination indicates that the level of reserve is not adequate to cover the expectation of loss, a special reserve or impairment is generally applied.

The distribution of the losses is accomplished by means of a loss distribution model that assigns a loss factor to each risk rating (1 to 9) in each commercial loan pool. A factor is not applied to risk rate 10 as loans classified as losses are charged off within the period that the loss is determined and are not carried on Trustmark's books over quarter-end.

The expected loss distribution is spread across the various risk ratings by the perceived level of risk for loss. The nine grade scale described above ranges from a negligible risk of loss to an identified loss across its breadth. The loss distribution factors are graduated through the scale on a basis proportional to the degree of risk that appears manifest

in each individual rating and assumes that migration through the loan grading system will occur.

Each loan officer assesses the appropriateness of the internal risk rating assigned to their credits on an ongoing basis. Trustmark's Asset Review area conducts independent credit quality reviews of the majority of Trustmark's commercial loan portfolio both on the underlying credit quality of each individual loan portfolio as well as the adherence to Trustmark's loan policy and the loan administration process. In general, Asset Review conducts reviews of each lending area within a six to eighteen month window depending on the overall credit quality results of the individual area.

Edgar Filing: TRUSTMARK CORP - Form 10-K

In addition to the ongoing internal risk rate monitoring described above, Trustmark's Credit Quality Review Committee meets monthly and performs a review of all loans of \$100 thousand or more that are either delinquent thirty days or more or on nonaccrual. This review includes recommendations regarding risk ratings, accrual status, charge-offs and appropriate servicing officer as well as evaluation of problem credits for determination of TDRs. Quarterly, the Credit Quality Review Committee reviews and modifies continuous action plans for all credits risk rated seven or worse for relationships of \$100 thousand or more.

In addition, a semi-annual review of significant development, commercial construction, multi-family and non-owner occupied projects is performed. This review assesses each particular project with respect to location, project valuations, progress of completion, leasing status, current financial information, rents, operating expenses, cash flow, adherence to budget and projections and other information as applicable. Summary results are reviewed by Senior and Regional Credit Officers in addition to the Chief Credit Officer with a determination made as to the appropriateness of existing risk ratings and accrual status.

Consumer Credits

Consumer LHFIs that do not meet a minimum custom credit score are reviewed quarterly by Management. The Retail Credit Review Committee reviews the volume and percentage of approvals that did not meet the minimum passing custom score by region, individual location, and officer to ensure that Trustmark continues to originate quality loans.

Trustmark monitors the levels and severity of past due consumer LHFIs on a daily basis through its collection activities. A detailed assessment of consumer LFI delinquencies is performed monthly at both a product and market level by delivery channel, which incorporates the perceived level of risk at time of underwriting.

The tables below present LFI by loan type and credit quality indicator at December 31, 2017 and 2016 (\$ in thousands):

	December 31, 2017				
	Commercial LFI				
	Pass - Categories 1-6	Special Mention - Category 7	Substandard - Category 8	Doubtful - Category 9	Subtotal

Past Due LHFS

LHFS past due 90 days or more totaled \$35.5 million and \$28.3 million at December 31, 2017 and 2016, respectively.

Trustmark did not exercise its buy-back option on any delinquent loans serviced for GNMA during 2017 or 2016.

Allowance for Loan Losses, LHFI

Trustmark's allowance for loan loss methodology for commercial LHFI is based upon regulatory guidance from its primary regulator and GAAP. The methodology segregates the commercial purpose and commercial construction LHFI portfolios into nine separate loan types (or pools) which have similar characteristics such as repayment,

collateral and risk profiles. The nine basic loan pools are further segregated into Trustmark's five key market regions, Alabama, Florida, Mississippi, Tennessee and Texas, to take into consideration the uniqueness of each market. A 10-point risk rating system is utilized for each separate loan pool to apply a reserve factor consisting of quantitative and qualitative components to determine the needed allowance by each loan type. As a result, there are 450 risk rate factors for commercial loan types. The nine separate pools are shown below:

Commercial Purpose LHFI

- Real Estate – Owner-Occupied
- Real Estate – Non-Owner Occupied
- Working Capital
- Non-Working Capital
- Land
- Lots and Development
- Political Subdivisions

Commercial Construction LHFI

1 to 4 Family

Non-1 to 4 Family

The quantitative factors of the allowance methodology reflect a twelve-quarter rolling average of net charge-offs by loan type within each key market region. This allows for a greater sensitivity to current trends, such as economic changes, as well as current loss profiles and creates a more accurate depiction of historical losses.

During 2015, the LEP, a component of the quantitative portion of the allowance for loan loss methodology for commercial LHFI, was revised to reflect a 1.5 year period rather than a one year period. An additional provision of approximately \$2.3 million was recorded in 2015 as result of this revision to the quantitative portion of the allowance for loan loss methodology for commercial LHFI. The LEP refers to the period of time between the events that trigger a loss and a charge-off of that loss. Losses are usually not immediately known, and determining the loss event can be challenging. It takes time for the borrower and extent of loss to be identified and determined. Trustmark may not be aware that the loss trigger has occurred until the borrower exhibits the inability to pay or other evidence of credit deterioration. Trustmark estimates the loss event to have occurred within a nine month period prior to the event of default. The charge-off of the loss occurs within a ten month period after the event of default, resulting in a 1.5 year LEP.

During 2015, Trustmark also revised the quantitative portion of the allowance for loan loss methodology for commercial LHFI to incorporate third-party default data. The default data is used in conjunction with each market/commercial loan pool's loss rate and the commercial loan LEP in calculating a total quantitative loss factor for each risk rating within each market and pool. The quantitative reserves are a result of the total quantitative loss factor multiplied by the outstanding balances within each loan group and risk rate. An additional provision of approximately \$1.3 million was recorded in 2015 as a result of this revision to the quantitative portion of the allowance for loan loss methodology for commercial LHFI.

Qualitative factors used in the allowance methodology include the following:

- National and regional economic trends and conditions
- Impact of recent performance trends
- Experience, ability and effectiveness of management
- Adherence to Trustmark's loan policies, procedures and internal controls
- Collateral, financial and underwriting exception trends
- Credit concentrations
- Loan facility risk
- Acquisitions
- Catastrophe

Each qualitative factor is converted to a scale ranging from 0 (No risk) to 100 (High Risk), other than the last two factors, which are applied on a dollar-for-dollar basis to ensure that the combination of such factors is proportional. The resulting ratings from the individual factors are weighted and summed to establish the weighted-average qualitative factor within each key market region.

During 2015, Trustmark eliminated caps and floors from the criticized risk grades in the qualitative portion and adjusted the Florida market region's distribution factors in the qualitative and quantitative portions of the allowance for loan loss methodology for commercial LHFI. The caps and floors for criticized risk ratings were eliminated in order to allow the risk associated with those credits to be reflected without constraint of pre-existing limits (caps or floors) on the risk ratings. When the current allowance for loan loss methodology was originally established, the vast majority of the reserve for the Florida market region's assets was covered by the quantitative features of the allowance for loan loss methodology due to the amount of gross charge-offs at that time and captured the vast majority of the embedded risk in the portfolio. The distribution for the Florida market region was adjusted to be the same as

Trustmark's other key market regions since the credit metrics in the Florida market region now more closely resemble Trustmark as a whole. The elimination of the caps and floors for criticized risk ratings in the qualitative portion of the allowance for loan loss methodology for commercial LHFI resulted in a provision recapture of \$1.8 million in 2015. The change in the Florida market region distribution resulted in an additional provision expense of \$2.1 million related to the qualitative portion and an additional provision expense of \$785 thousand related to the quantitative portion of the allowance for loan loss methodology for commercial LHFI in 2015. Combined, these revisions to the allowance for loan loss methodology for commercial LHFI resulted in an additional provision of approximately \$1.1 million recorded during 2015.

In addition, Trustmark revised the qualitative portion of the commercial LHFI allowance for loan loss methodology to incorporate the use of maximum observed gross historical losses as a way to calculate a maximum qualitative reserve limit. The maximum observed gross historical losses for each market were observed for a three-year period reflecting the last economic downturn (i.e., 2008-2010). The aggregate of these losses as a percentage of the three-year average commercial LHFI balance results in an entity wide maximum observed gross historical loss rate for commercial LHFI. Once the quantitative component of the allowance for loan loss methodology is calculated, the quantitative reserve percentage is deducted from the maximum observed gross historical loss rate, resulting in the maximum possible qualitative reserve limit. The overall Qualitative Risk Factor (QRF) percentage is calculated by weighting each market's QRF and applied as a percentage to the maximum qualitative reserve limit. The result is the amount of qualitative adjustment to be distributed to each market. The distribution of qualitative reserves incorporates the nine separate commercial loan groups that are ranked in ascending order of risk by their respective weighted-average risk rates. The distribution of the qualitative adjustment among the risk rates was derived by an analysis that determines the probability of future credit deterioration. An additional provision of approximately \$4.4 million was recorded in 2015 as a result of these revisions.

During 2015, Trustmark also revised the qualitative portion of the allowance for loan loss methodology for commercial LHFI regarding the loan facility risk component. Loan facility risk embodies the nature, frequency and duration of the repayment structure as it pertains to the actual source of loan repayment. The underlying loan structure and nature of the credit either is risk neutral for traditional structures or adds risk to the credit for any variance that represents additional credit risk from the traditional structures. If the facility structure adds additional credit risk, qualitative reserves are added to individual loans based on their respective commercial loan pools. Factors considered in assigning facility risk include whether the principal is amortizing or not amortizing, revolving or not revolving, the payment frequency and the duration of the payment structure. In order to estimate the facility reserve for amortizing and interest only structures, loan level detail is used to estimate the incremental payment amount at risk, which is then assigned a reserve factor based upon probability of default, loss given default and the degree of deviation from the traditional structures. A provision recapture of approximately \$2.1 million was recorded in 2015 as a result of this revision to the qualitative portion of the allowance for loan loss methodology for commercial LHFI.

Trustmark made no revisions to the allowance for loan loss methodology for commercial LHFI during 2017 or 2016.

The allowance for loan loss methodology segregates the consumer LHFI portfolio into homogeneous pools of loans that contain similar structure, repayment, collateral and risk profiles. These homogeneous pools of loans are shown below:

- Residential Mortgage
- Direct Consumer
- Junior Lien on 1-4 Family Residential Properties
- Credit Cards
- Overdrafts

The historical loss experience for these pools is determined by calculating a 12-quarter rolling average of net charge-offs, which is applied to each pool to establish the quantitative aspect of the methodology. Where, in Management's estimation, the calculated loss experience does not fully cover the anticipated loss for a pool, an estimate is also applied to each pool to establish the qualitative aspect of the methodology, which represents the perceived risks across the loan portfolio at the current point in time. This qualitative methodology utilizes five separate factors made up of unique components that when weighted and combined produce an estimated level of reserve for each of the loan pools. The five qualitative factors include the following:

- Economic indicators
- Performance trends
- Management experience
- Credit concentrations

¶ Loan policy exceptions

The risk measure for each factor is converted to a scale ranging from 0 (No risk) to 100 (High Risk) to ensure that the combination of such factors is proportional. The determination of the risk measurement for each qualitative factor is done for all markets combined. The resulting estimated reserve factor is then applied to each pool.

During 2015, Trustmark revised the qualitative portion of the allowance for loan loss methodology for consumer LHFI by recalibrating the loss expectation component to be more representative of current conditions as well as recalculating the expected loss potential component, which reflects the consumer 12-quarter rolling average of net charge-offs, for each of the respective consumer

loan groups. An additional provision of \$2.2 million was recorded in 2015 as a result of these revisions to the qualitative portion of the allowance for loan loss methodology for consumer LHFI.

In addition, Trustmark revised the quantitative portion of the allowance for loan loss methodology for the consumer mortgage portfolio. When the current allowance for loan loss methodology was originally established, the Florida market mortgages and non-Florida mortgages were treated separately due to the vast difference in loss experience. Since the credit metrics in the Florida market region now more closely resemble Trustmark as a whole, the quantitative portion of the loan loss methodology was revised to no longer segregate the mortgage portfolio into Florida and non-Florida portions. A provision recapture of approximately \$455 thousand was recorded in 2015 as a result of this revision to the quantitative portion of the allowance for loan loss methodology for consumer LHFI.

During 2015, Trustmark also revised the qualitative portion of the consumer LHFI allowance for loan loss methodology to incorporate the use of maximum observed gross historical losses as a way to calculate a maximum qualitative reserve limit. The maximum observed gross historical losses for each consumer loan portfolio were observed for a three-year period reflecting the last economic downturn (i.e., 2008-2010). The aggregate of these losses as a percentage of the respective pool's loan balance results in a maximum observed gross historical loss rate. Once the quantitative component of the allowance for loan loss methodology is calculated, the quantitative reserve is deducted from the maximum observed gross historical loss rate, resulting in the maximum possible qualitative reserve limit. The QRF percentage is calculated and applied as a percentage to the maximum qualitative reserve limit. The result is the amount of qualitative adjustment to be distributed to each consumer loan pool, with the exception of overdrafts due to their specific nature. An additional provision of approximately \$750 thousand was recorded in 2015 as a result of this revision to the qualitative portion of the allowance for loan loss methodology for consumer LHFI.

Trustmark made no revisions to the allowance for loan loss methodology for consumer LHFI during 2017 or 2016.

The resulting ratings from the individual factors are weighted and summed to establish the weighted-average qualitative factor of a specific loan portfolio. This weighted-average qualitative factor is then applied over the five loan pools.

Trustmark's loan policy dictates the guidelines to be followed in determining when a loan is charged off. Commercial purpose loans are charged off when a determination is made that the loan is uncollectible and continuance as a bankable asset is not warranted or an impairment evaluation indicates that a value adjustment is necessary. Consumer loans secured by 1-4 family residential real estate are generally charged off or written down when the credit becomes severely delinquent and the balance exceeds the fair value of the property less costs to sell. Non-real estate consumer purpose loans, both secured and unsecured, are generally charged off in full during the month in which the loan becomes 120 days past due. Credit card loans are generally charged off in full when the loan becomes 180 days past due.

The following tables detail the balance in the allowance for loan losses, LHFI allocated to each loan type segmented by the impairment evaluation methodology used at December 31, 2017 and 2016 (\$ in thousands):

Note 6 – Acquired Loans

During the first quarter of 2017, Trustmark modified the presentation of the acquired loans disclosures to eliminate the segmentation of acquired noncovered loans and acquired covered loans due to the significantly reduced size of the acquired covered loan portfolio. Trustmark's loss share agreement with the FDIC covering the acquired covered loans other than loans secured by 1-4 family residential properties expired on June 30, 2016. Trustmark's loss share agreement with the FDIC covering the acquired covered loans secured by 1-4 family residential properties will expire in 2021. Effective July 1, 2016, all acquired covered loans excluding the acquired covered loans secured by 1-4 family residential properties were reclassified to acquired noncovered loans. The revised presentation reflects total acquired loan information in the accompanying consolidated balance sheets and tables below. All prior period information has

been reclassified to conform to the current period presentation.

Loans acquired in the Reliance merger completed on April 7, 2017 were evaluated using a fair value process to determine the degree of credit deterioration since origination and the collectibility of contractually required payments. Approximately \$7.9 million of the loans acquired in the Reliance merger exhibited evidence of significant credit deterioration since origination and for which it was probable at acquisition that Trustmark would not be able to collect all contractually required payments. These loans are accounted for as acquired impaired loans under FASB ASC Topic 310-30.

Edgar Filing: TRUSTMARK CORP - Form 10-K

At December 31, 2017 and 2016, acquired loans consisted of the following (\$ in thousands):

	December 31,	
	2017	2016
Loans secured by real estate:		
Construction, land development and other land	\$23,586	\$20,850
Secured by 1-4 family residential properties	61,751	69,540
Secured by nonfarm, nonresidential properties	114,694	103,820
Other real estate secured	16,746	19,010
Commercial and industrial loans	31,506	36,896
Consumer loans	2,600	3,365
Other loans	10,634	18,766
Acquired loans	261,517	272,247
Less allowance for loan losses, acquired loans	4,079	11,397
Net acquired loans	\$257,438	\$260,850

The following table presents changes in the net carrying value of the acquired loans for the periods presented (\$ in thousands):

	Acquired Impaired	Acquired Not ASC 310-30 (1)
Carrying value, net at January 1, 2016	\$310,762	\$ 67,657
Accretion to interest income	18,405	40
Payments received, net	(111,522)	(24,953)
Other (2)	(134)	—
Change in allowance for loan losses, acquired loans	596	(1)
Carrying value, net at December 31, 2016	218,107	42,743
Transfers (3)	—	(36,719)
Additions (4)	7,899	109,548
Accretion to interest income	14,924	1,578
Payments received, net	(68,317)	(39,208)
Other (2)	(361)	(74)
Change in allowance for loan losses, acquired loans	7,318	—
Carrying value, net at December 31, 2017	\$179,570	\$ 77,868

(1) “Acquired Not ASC 310-30” loans consist of loans that are not in scope for FASB ASC Topic 310-30.

(2) Includes miscellaneous timing adjustments as well as acquired loan terminations through foreclosure, charge-off and other terminations.

(3) “Acquired Not ASC 310-20” loans transferred to LHFI due to the discount on these loans being fully amortized.

(4) Loans acquired in the Reliance merger on April 7, 2017.

Under FASB ASC Topic 310-30, the accretable yield is the excess of expected cash flows at acquisition over the initial fair value of acquired impaired loans and is recorded as interest income over the estimated life of the loans using the effective yield method if the timing and amount of the future cash flows is reasonably estimable. The following table presents changes in the accretable yield for the periods presented (\$ in thousands):

Edgar Filing: TRUSTMARK CORP - Form 10-K

	Years Ended December 31,		
	2017	2016	2015
Accretable yield at beginning of period	\$(38,918)	\$(52,672)	\$(77,149)
Additions due to acquisition (1)	(784)	—	—
Accretion to interest income	14,924	18,405	30,501
Disposals	2,868	6,488	10,013
Reclassification from nonaccretable difference (2)	(9,516)	(11,139)	(16,037)
Accretable yield at end of period	\$(31,426)	\$(38,918)	\$(52,672)

(1) Accretable yield on loans acquired from Reliance on April 7, 2017.

(2) Reclassifications from nonaccretable difference are due to lower loss expectations and improvements in expected cash flows.

Edgar Filing: TRUSTMARK CORP - Form 10-K

The following tables present the components of the allowance for loan losses on acquired impaired loans for the periods presented (\$ in thousands):

	Years Ended December 31,		
	2017	2016	2015
Balance at beginning of period	\$11,397	\$11,992	\$12,059
Provision for loan losses, acquired loans	(7,395)	3,757	3,425
Loans charged-off	—	(6,616)	(7,200)
Recoveries	77	2,264	3,708
Net (charge-offs) recoveries	77	(4,352)	(3,492)
Balance at end of period	\$4,079	\$11,397	\$11,992

As discussed in Note 5 - LHFI and Allowance for Loan Losses, LHFI, Trustmark has established a loan grading system that consists of ten individual credit risk grades (risk ratings) that encompass a range from loans where the expectation of loss is negligible to loans where loss has been established. The model is based on the risk of default for an individual credit and establishes certain criteria to segregate the level of risk across the ten unique risk ratings. These credit quality measures are unique to commercial loans. Credit quality for consumer loans is based on individual credit scores, aging status of the loan and payment activity.

The tables below present the acquired loans by loan type and credit quality indicator at December 31, 2017 and 2016 (\$ in thousands):

	December 31, 2017

Note 7 – Premises and Equipment, Net

At December 31, 2017 and 2016, premises and equipment consisted of the following (\$ in thousands):

	December 31,	
	2017	2016
Land	\$52,335	\$51,097
Buildings and leasehold improvements	197,372	195,296
Furniture and equipment	166,071	172,170
Total cost of premises and equipment	415,778	418,563
Less accumulated depreciation and amortization	237,425	239,319
Premises and equipment, net	178,353	179,244
Assets held for sale	986	5,743
Total premises and equipment, net	\$179,339	\$184,987

Assets held for sale consisted of three closed branches at December 31, 2017 compared to five closed branches and two parcels of land previously purchased for expansion at December 31, 2016. These properties were transferred

from land and premises to assets held for sale due to Trustmark's intent to sell these properties over the next twelve months as a result of its strategic branch initiatives. As a result, property valuation adjustments of \$338 thousand and \$750 thousand were recognized and included in other expense for 2017 and 2016, respectively, with no property valuation adjustments recognized in 2015.

Depreciation and amortization of premises and equipment totaled \$14.3 million in 2017, \$13.2 million in 2016 and \$14.0 million in 2015.

Note 8 – Mortgage Banking

Mortgage Servicing Rights

The activity in the MSR is detailed in the table below for the periods presented (\$ in thousands):

	Years Ended December 31,	
	2017	2016
Balance at beginning of period	\$80,239	\$74,007
Origination of servicing assets	15,860	16,745
Change in fair value:		
Due to market changes	(1,050)	(407)
Due to runoff	(10,780)	(10,106)
Balance at end of period	\$84,269	\$80,239

In the determination of the fair value of the MSR at the date of securitization, certain key economic assumptions are made. For instance, Trustmark considers the conditional prepayment rate (CPR), which is an estimated loan prepayment rate that uses historical prepayment rates for previous loans similar to the loans being evaluated, and the discount rate in determining the fair value of the MSR. An increase in either the CPR or discount rate assumption will result in a decrease in the fair value of the MSR, while a decrease in either assumption will result in an increase in the fair value of the MSR. At December 31, 2017, the fair value of the MSR included an assumed average prepayment speed of 9.14 CPR and an average discount rate of 10.28% compared to an assumed average prepayment speed of 7.94 CPR and an average discount rate of 10.32% at December 31, 2016. In recent years, there have been significant market-driven fluctuations in loan prepayment speeds and discount rates. These fluctuations can be rapid and may continue to be significant. Therefore, estimating prepayment speed and/or discount rates within ranges that market participants would use in determining the fair value of the MSR requires significant management judgment.

Mortgage Loans Sold/Serviced

During 2017, 2016 and 2015, Trustmark sold \$1.179 billion, \$1.384 billion and \$1.246 billion, respectively, of residential mortgage loans. Pretax gains on these sales totaled \$18.9 million in 2017, \$20.5 million in 2016 and \$18.0 million in 2015. Trustmark receives annual servicing fee income approximating 0.33% of the outstanding balance of the underlying loans, which totaled \$21.4 million in 2017, \$20.4 million in 2016 and \$19.3 million in 2015. The pretax gains on the sale of residential mortgage loans and the annual servicing fee are both recorded to noninterest income in mortgage banking, net in the accompanying consolidated statements of income. The investors and the securitization trusts have no recourse to the assets of Trustmark for failure of debtors to pay when due. The table below details the mortgage loans sold and serviced for others at December 31, 2017 and 2016 (\$ in thousands):

	December 31,	
	2017	2016
Federal National Mortgage Association	\$4,128,614	\$3,992,349
Government National Mortgage Association	2,421,456	2,291,398
Federal Home Loan Mortgage Corporation	47,071	55,006
Other	26,864	32,589
Total mortgage loans sold and serviced for others	\$6,624,005	\$6,371,342

Trustmark is subject to losses in its loan servicing portfolio due to loan foreclosures. Trustmark has obligations to either repurchase the outstanding principal balance of a loan or make the purchaser whole for the economic benefits of a loan if it is determined that the loan sold was in violation of representations or warranties made by Trustmark at the time of the sale, herein referred to as mortgage loan servicing putback expenses. Such representations and warranties typically include those made regarding loans that had missing or insufficient file documentation, loans that do not meet investor guidelines, loans in which the appraisal does not support the value and/or loans obtained through fraud by the borrowers or other third parties. Generally, putback requests may be made until the loan is paid in full. However, mortgage loans delivered to Federal National Mortgage Association (FNMA) and Federal Home Loan Mortgage Corporation (FHLMC) on or after January 1, 2013 are subject to the Lending and Selling Representations and Warranties Framework updated in May 2014, which provides certain instances in which FNMA and FHLMC will not exercise their remedies, including a putback request, for breaches of certain selling representations and warranties, such as payment history and quality control review.

When a putback request is received, Trustmark evaluates the request and takes appropriate actions based on the nature of the request. Trustmark is required by FNMA and FHLMC to provide a response to putback requests within 60 days

of the date of receipt. Currently, putback requests primarily relate to 2009 through 2013 vintage mortgage loans. The total mortgage loan servicing putback expenses were included in other expense.

Changes in the reserve for mortgage loan servicing putback expense for mortgage loans were as follows for the periods presented (\$ in thousands):

	Years Ended December		
	31,		
	2017	2016	2015
Balance at beginning of period	\$1,130	\$1,685	\$1,170
Provision for putback expenses	(836)	420	315
Other (1)	706	(975)	200
Balance at end of period	\$1,000	\$1,130	\$1,685

(1) Includes fair value adjustments for loans transferred due to underwriting issues as well as adjustments based on Trustmark's mortgage loan servicing putback reserve analysis.

There is inherent uncertainty in reasonably estimating the requirement for reserves against potential future mortgage loan servicing putback expenses. Future putback expenses are dependent on many subjective factors, including the review procedures of the purchasers and the potential refinance activity on loans sold with servicing released and the subsequent consequences under the representations and warranties. Trustmark believes that it has appropriately reserved for potential mortgage loan servicing putback requests.

Note 9 – Goodwill and Identifiable Intangible Assets

Goodwill

The table below illustrates goodwill by segment for the years ended December 31, 2017 and 2016 (\$ in thousands):

	General Banking	Insurance	Total
Balance as of January 1, 2016	\$321,132	\$45,024	\$366,156
Adjustment during 2016	—	—	—
Balance as of December 31, 2016	321,132	45,024	366,156
Goodwill from Reliance merger during 2017	13,471	—	13,471
Balance as of December 31, 2017	\$334,603	\$45,024	\$379,627

Trustmark's General Banking Division delivers a full range of banking services to consumer, corporate, small and middle-market businesses through its extensive branch network. During 2017, Trustmark recorded \$13.5 million as goodwill from its merger with Reliance.

The Insurance Division includes TNB's wholly-owned retail insurance subsidiary that offers a diverse mix of insurance products and services. Trustmark performed goodwill impairment tests for the General Banking and Insurance Divisions during 2017, 2016 and 2015. Based on these tests, Trustmark concluded that the fair value of both the General Banking and Insurance Divisions substantially exceeded the book value and no impairment charge was required.

Identifiable Intangible Assets

At December 31, 2017 and 2016, identifiable intangible assets consisted of the following (\$ in thousands):

	December 31, 2017			December 31, 2016		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Core deposit intangibles	\$87,674	\$ 73,494	\$ 14,180	\$85,824	\$ 67,843	\$ 17,981
Insurance intangibles	13,824	12,026	1,798	13,824	11,615	2,209
Banking charters	1,325	943	382	1,325	877	448
Borrower relationship intangible	690	690	—	690	648	42
Total	\$103,513	\$ 87,153	\$ 16,360	\$101,663	\$ 80,983	\$ 20,680

Trustmark recorded \$6.2 million of amortization of identifiable intangible assets in 2017, \$6.9 million in 2016 and \$7.8 million in 2015. Trustmark estimates that amortization expense for identifiable intangible assets will be \$5.2 million in 2018, \$4.0 million in 2019, \$2.7 million in 2020, \$1.9 million in 2021 and \$1.1 million in 2022. Trustmark continually evaluates whether events and circumstances have occurred that indicate that identifiable intangible assets have become impaired. Measurement of any impairment of such identifiable intangible assets is based on the fair values of those assets. There were no impairment losses on identifiable intangible assets recorded during 2017, 2016 or 2015.

Edgar Filing: TRUSTMARK CORP - Form 10-K

The following table illustrates the carrying amounts and remaining weighted-average amortization periods of identifiable intangible assets as of December 31, 2017 (\$ in thousands):

	Net Carrying Amount	Remaining Weighted- Average Amortization Period in Years
Core deposit intangibles	\$ 14,180	5.2
Insurance intangibles	1,798	15.3
Banking charters	382	5.7
Total	\$ 16,360	6.3

Note 10 – Other Real Estate

At December 31, 2017, Trustmark's geographic other real estate distribution was concentrated primarily in its five key market regions: Alabama, Florida, Mississippi, Tennessee and Texas. The ultimate recovery of a substantial portion of the carrying amount of other real estate is susceptible to changes in market conditions in these areas.

For the periods presented, changes and gains, net on other real estate were as follows (\$ in thousands):

	Years Ended December 31,		
	2017	2016 (1)	2015 (1)
Balance at beginning of period	\$62,051	\$78,828	\$98,569
Additions (2)	9,235	24,525	32,782
Disposals	(24,762)	(36,801)	(48,352)
Write-downs	(3,296)	(4,501)	(4,171)
Balance at end of period	\$43,228	\$62,051	\$78,828
Gain, net on the sale of other real estate			
included in other real estate expense	\$2,087	\$7,031	\$4,041

(1) The changes and gains, net on other real estate for the years ended December 31, 2016 and 2015 include covered other real estate.

(2) For the year ended December 31, 2017, additions to other real estate included \$475 thousand of other real estate acquired in the Reliance merger on April 7, 2017.

At December 31, 2017 and 2016, other real estate by type of property consisted of the following (\$ in thousands):

	December 31,	
	2017	2016
Construction, land development and other land properties	\$27,491	\$36,871

Edgar Filing: TRUSTMARK CORP - Form 10-K

1-4 family residential properties	5,081	7,926
Nonfarm, nonresidential properties	10,468	16,817
Other real estate properties	188	437
Total other real estate	\$43,228	\$62,051

At December 31, 2017 and 2016, other real estate by geographic location consisted of the following (\$ in thousands):

	December 31,	
	2017	2016
Alabama	\$11,714	\$15,989
Florida	13,937	22,582
Mississippi (1)	14,260	15,646
Tennessee (2)	2,535	6,183
Texas	782	1,651
Total other real estate	\$43,228	\$62,051

(1)Mississippi includes Central and Southern Mississippi Regions

(2)Tennessee includes Memphis, Tennessee and Northern Mississippi Regions

Note 11 – Deposits

At December 31, 2017 and 2016, deposits consisted of the following (\$ in thousands):

	December 31,	
	2017	2016
Noninterest-bearing demand	\$2,978,074	\$2,973,238
Interest-bearing demand	2,432,814	1,875,312
Savings	3,408,183	3,586,369
Time	1,758,441	1,621,093
Total	\$10,577,512	\$10,056,012

Interest expense on deposits by type consisted of the following for the periods presented (\$ in thousands):

	Years Ended December 31,		
	2017	2016	2015
Interest-bearing demand	\$6,820	\$3,297	\$3,235
Savings	6,047	2,657	2,547
Time	9,850	6,794	6,816
Total	\$22,717	\$12,748	\$12,598

Time deposits that exceed the FDIC insurance limit of \$250 thousand totaled \$342.3 million and \$229.9 million at December 31, 2017 and 2016, respectively. The maturities of time deposits of \$100 thousand or more at December 31, 2017 and 2016 are as follows (\$ in thousands):

	December 31,	
	2017	2016
3 months or less	\$203,679	\$150,991
Over 3 months through 6 months	183,679	147,089
Over 6 months through 12 months	276,944	204,944
Over 12 months	179,237	179,469
Total	\$843,539	\$682,493

The maturities of interest-bearing deposits at December 31, 2017, are as follows (\$ in thousands):

2018	\$1,356,448
------	-------------

Edgar Filing: TRUSTMARK CORP - Form 10-K

2019	268,989
2020	73,745
2021	23,191
2022 and thereafter	36,068
Total time deposits	1,758,441
Interest-bearing deposits with no stated maturity	5,840,997
Total interest-bearing deposits	\$7,599,438

Note 12 - Borrowings

Securities Sold Under Repurchase Agreements

Trustmark utilizes securities sold under repurchase agreements as a source of borrowing in connection with overnight repurchase agreements offered to commercial deposit customers by using its unencumbered investment securities as collateral. Trustmark accounts for its securities sold under repurchase agreements as secured borrowings in accordance with FASB ASC Topic 860-30, "Transfers and Servicing – Secured Borrowing and Collateral." Securities sold under repurchase agreements are stated at the amount of cash received in connection with the transaction. Trustmark monitors collateral levels on a continual basis and may be required to provide additional collateral based on the fair value of the underlying securities. Securities sold under repurchase agreements are secured by securities with a carrying amount of \$200.9 million and \$284.4 million at December 31, 2017 and 2016, respectively. As

of December 31, 2017, all repurchase agreements were short-term and consisted primarily of sweep repurchase arrangements, under which excess deposits are “swept” into overnight repurchase agreements with Trustmark. The following table presents the securities sold under repurchase agreements by collateral pledged at December 31, 2017 and 2016 (\$ in thousands):

	December 31,	
	2017	2016
Mortgage-backed securities		
Other residential mortgage-backed securities		
Issued or guaranteed by FNMA, FHLMC or GNMA	\$68,246	\$75,795
Commercial mortgage-backed securities		
Issued or guaranteed by FNMA, FHLMC or GNMA	50,448	51,212
Total securities sold under repurchase agreements	\$118,694	\$127,007

Short-Term Borrowings

At December 31, 2017 and 2016, short-term borrowings consisted of the following (\$ in thousands):

	December 31,	
	2017	2016
FHLB advances	\$900,013	\$700,008
Serviced GNMA loans eligible for repurchase	48,211	43,925
Other	22,825	25,845
Total short-term borrowings	\$971,049	\$769,778

At December 31, 2017, Trustmark had four outstanding short-term FHLB advances totaling \$900.0 million with the FHLB of Dallas. Two of these outstanding advances with the FHLB of Dallas had fixed interest rates 1.44% and 1.48% and balances of \$250.0 million and \$150.0 million, respectively. At December 31, 2017, these two fixed rate advances had a weighted-average remaining maturity of 58 days with a weighted-average cost of 1.45% during 2017. At December 31, 2017, Trustmark had two outstanding short-term FHLB advances with a balance of \$250.0 million each with the FHLB of Dallas that reprice on a monthly basis and are set to mature on May 25, 2018 and October 19, 2018. These advances have a weighted-average remaining maturity of 219 days and had a weighted-average cost of 1.20% during 2017. Trustmark had three outstanding short-term FHLB advances totaling \$700.0 million with the FHLB of Dallas at December 31, 2016. Two of these outstanding advances with the FHLB of Dallas had fixed interest rates of 0.55% and 0.80% and balances of \$100.0 million each. At December 31, 2016, these two fixed rate advances had a weighted-average remaining maturity of seven days with a weighted-average cost of 0.68% during 2016. At December 31, 2016, Trustmark had one outstanding short-term FHLB advance with a balance of \$500.0 million with the FHLB of Dallas that repriced on a monthly basis and matured on December 20, 2017.

At December 31, 2017 and 2016, Trustmark had \$1.771 billion and \$1.511 billion, respectively, available in additional short and long-term borrowing capacity from the FHLB of Dallas.

At both December 31, 2017 and 2016, Trustmark had one outstanding short-term FHLB advance with the FHLB of Atlanta, which was assumed through the BancTrust merger. The short-term FHLB advance outstanding at December 31, 2017 had a balance of \$13 thousand with a fixed interest rate of 6.12% and a remaining maturity of 72 days. The short-term FHLB advance outstanding at December 31, 2016 had a balance of \$8 thousand with a fixed interest rate of 6.50% and a remaining maturity of 310 days. Trustmark has a non-member status and no additional borrowing

capacity with the FHLB of Atlanta.

Interest expense on short-term FHLB advances totaled \$11.4 million in 2017, \$1.8 million in 2016 and \$727 thousand in 2015.

Long-Term FHLB Advances

At December 31, 2017, Trustmark had no outstanding long-term FHLB advances with the FHLB of Dallas. At December 31, 2016, Trustmark had one outstanding long-term FHLB advance with the FHLB of Dallas totaling \$250.0 million. The long-term FHLB advance outstanding at December 31, 2016 repriced on a monthly basis and is set to mature on May 25, 2018. At December 31, 2016, this advance had a remaining maturity of 1.4 years and had an average cost of 0.24% during 2016.

At December 31, 2017, Trustmark had two outstanding long-term FHLB advances totaling \$946 thousand with the FHLB of Atlanta, compared to three outstanding long-term FHLB advances totaling \$1.0 million with the FHLB of Atlanta at December 31, 2016. All of these advances were assumed through the BancTrust merger. The advances outstanding had fixed interest rates of 0.08% and 0.75% with outstanding balances of \$171 thousand to \$775 thousand at December 31, 2017. At December 31, 2017, these advances

had a weighted-average remaining maturity of 4.44 years with a weighted-average cost of 0.63% during 2017. At December 31, 2016, the three outstanding long-term FHLB advances with the FHLB of Atlanta had interest rates ranging from 0.08% to 6.12% with outstanding balances ranging from \$38 thousand to \$800 thousand. At December 31, 2016, the outstanding long-term advances had a weighted-average remaining maturity of 5.32 years with a weighted-average cost of 0.82% during 2016. There was no fair market value adjustment associated with the BancTrust merger included in the long-term FHLB advances at December 31, 2017, compared to a fair market value adjustment of \$1 thousand at December 31, 2016. Trustmark's long-term FHLB advances are collateralized by securities held in safekeeping with the FHLB of Atlanta.

Trustmark incurred \$566 thousand of interest expense on long-term FHLB advances in 2017, compared to \$2.1 million of interest expense in 2016 and \$49 thousand of interest expense in 2015.

Junior Subordinated Debt Securities

On August 18, 2006, Trustmark completed a private placement of \$60.0 million of trust preferred securities through a newly formed Delaware trust affiliate, Trustmark Preferred Capital Trust I (the Trust). The trust preferred securities mature September 30, 2036, are redeemable at Trustmark's option and bear interest at a variable rate per annum equal to the three-month LIBOR plus 1.72%. Under applicable regulatory guidelines, these trust preferred securities qualify as Tier 1 capital. The proceeds from the sale of the trust preferred securities were used by the Trust to purchase \$61.9 million in aggregate principal amount of Trustmark's junior subordinated debentures.

The debentures were issued pursuant to a Junior Subordinated Indenture, dated August 18, 2006, between Trustmark, as issuer, and Wilmington Trust Company, National Association, as trustee. Like the trust preferred securities, the debentures bear interest at a variable rate per annum equal to the three-month LIBOR plus 1.72% and mature on September 30, 2036. The debentures may be redeemed at Trustmark's option at any time. The interest payments by Trustmark will be used to pay the quarterly distributions payable by the Trust to the holder of the trust preferred securities. However, so long as no event of default has occurred under the debentures, Trustmark may defer interest payments on the debentures (in which case the Trust will also defer distributions otherwise due on the trust preferred securities) for up to 20 consecutive quarters.

The debentures are subordinated to the prior payment of any other indebtedness of Trustmark that, by its terms, is not similarly subordinated. The trust preferred securities are recorded as a long-term liability on Trustmark's balance sheet; however, for regulatory purposes the trust preferred securities are treated as Tier 1 capital under the rules of the FRB, Trustmark's primary federal regulatory agency.

Trustmark also entered into a Guarantee Agreement, dated August 18, 2006, pursuant to which it has agreed to guarantee the payment by the Trust of distributions on the trust preferred securities and the payment of principal of the trust preferred securities when due, either at maturity or on redemption, but only if and to the extent that the Trust fails to pay distributions on or principal of the trust preferred securities after having received interest payments or principal payments on the junior subordinated debentures from Trustmark for the purpose of paying those distributions or the principal amount of the trust preferred securities.

As defined in applicable accounting standards, the Trust, a wholly-owned subsidiary of Trustmark, is considered a variable interest entity for which Trustmark is not the primary beneficiary. Accordingly, the accounts of the Trust are not included in Trustmark's consolidated financial statements.

At December 31, 2017 and 2016, assets for the Trust totaled \$61.9 million, resulting from the investment in junior subordinated debentures issued by Trustmark. Liabilities and shareholder's equity for the Trust also totaled \$61.9 million at December 31, 2017 and 2016, resulting from the issuance of trust preferred securities in the amount of \$60.0 million as well as \$1.9 million in common securities issued to Trustmark. During 2017, net income for the Trust equaled \$55 thousand resulting from interest income from the junior subordinated debt securities issued by

Trustmark to the Trust, compared with net income of \$45 thousand during 2016 and \$38 thousand during 2015. Dividends issued to Trustmark by the Trust during 2017 totaled \$55 thousand, compared to \$45 thousand during 2016 and \$38 thousand during 2015.

Note 13 – Income Taxes

The income tax provision included in the consolidated statements of income was as follows for the periods presented (\$ in thousands):

	Years Ended December 31,		
	2017	2016	2015
Current			
Federal	\$16,959	\$10,355	\$18,448
State	5,687	2,698	2,166
Deferred			
Federal	7,280	15,647	12,865
State	1,820	2,353	1,935
Income tax provision excluding deferred tax asset revaluation and reversal of valuation allowance	31,746	31,053	35,414
Deferred tax expense (benefit) - re-measurement of deferred tax assets	25,619	—	—
Deferred tax expense (benefit) - reversal of valuation allowance	(8,650)	—	—
Income tax provision	\$48,715	\$31,053	\$35,414

Trustmark maintained a valuation allowance for deferred tax assets of \$8.7 million at December 31, 2016 that was related to unrealized built-in losses from a prior acquisition. Trustmark has determined that based on the weight of the available evidence that it is more likely than not that all deferred tax assets will be realized as of December 31, 2017. Therefore, the valuation allowance was reversed as of December 31, 2017, resulting in a decrease of \$8.7 million to income tax expense for the year.

The re-measurement of the deferred tax assets and liabilities during 2017 resulted from the enactment of the Tax Reform Act, which was signed into law on December 22, 2017. Under the Tax Reform Act, corporate statutory income tax rates were reduced from 35.0% to 21.0% effective January 1, 2018. Trustmark re-measured its deferred tax assets and liabilities to reflect the future realization of these assets and liabilities at the lower tax rate. This re-measurement resulted in an increase to tax expense and a decrease to the net deferred tax asset of \$25.6 million for the year ended December 31, 2017.

For the periods presented, the income tax provision differs from the amount computed by applying the statutory federal income tax rate of 35.0% to income before income taxes as a result of the following (\$ in thousands):

	Years Ended December 31,		
	2017	2016	2015
Income tax computed at statutory tax rate	\$54,021	\$48,812	\$53,008
Tax exempt interest	(7,611)	(6,780)	(5,908)
Nondeductible interest expense	407	201	119
State income taxes, net	3,697	1,754	1,408

Reversal of valuation allowance	(8,650)	—	—
Re-measurement of deferred tax assets	25,619	—	—
Other	293	3,249	2,070
Income tax provision	\$48,715	\$31,053	\$35,414

Edgar Filing: TRUSTMARK CORP - Form 10-K

Temporary differences between the financial statement carrying amounts and the tax basis of assets and liabilities gave rise to the following net deferred tax assets at December 31, 2017 and 2016, which are included in other assets (\$ in thousands):

	December 31,	
	2017	2016
Deferred tax assets:		
Loan purchase accounting	\$3,638	\$9,341
Other real estate	13,403	25,750
Allowance for loan losses	20,203	31,618
Deferred compensation	15,184	21,893
Realized built-in losses	12,932	18,699
Securities	4,869	9,256
Pension and other postretirement benefit plans	5,453	15,545
Interest on nonaccrual loans	774	2,093
Unrealized losses on securities available for sale	5,874	3,629
Stock-based compensation	2,067	3,031
Federal carryovers	4,569	—
Other	8,964	13,731
Gross deferred tax asset	97,930	154,586
Valuation allowance	—	(8,650)
Deferred tax asset net of valuation allowance	97,930	145,936
Deferred tax liabilities:		
Goodwill and other identifiable intangibles	16,729	25,666
Premises and equipment	11,877	19,391
Mortgage servicing rights	9,964	12,159
Securities	1,345	1,697
Leases	—	60
Other	5,040	6,891
Gross deferred tax liability	44,955	65,864
Net deferred tax asset	\$52,975	\$80,072

Trustmark has completed its accounting for the effects of the Tax Reform Act on its deferred tax assets and liabilities. In the course of normal operations, Trustmark is required to make reasonable estimates for certain tax items which could not be fully determined at year-end, but will be finalized when its tax return is filed in October 2018. However, Trustmark does not believe that any adjustments resulting from the finalization of the tax return will have a material impact on its financial statements.

The following table provides a summary of the changes during the 2017 calendar year in the amount of unrecognized tax benefits that are included in other liabilities in the consolidated balance sheet (\$ in thousands):

Balance at January 1, 2017	\$1,734
Increases due to tax positions taken during the current year	303
Decreases due to tax positions taken during a prior year	(853)
Decreases due to the lapse of applicable statute of limitations during the current year	(79)

Edgar Filing: TRUSTMARK CORP - Form 10-K

Decreases due to settlements with taxing authorities during the current year	—
Balance at December 31, 2017	\$ 1,105
Accrued interest, net of federal benefit, at December 31, 2017	\$ 217
Unrecognized tax benefits that would impact the effective tax rate, if recognized, at December 31, 2017	\$ 883

Interest and penalties related to unrecognized tax benefits, if any, are recorded in income tax expense. With limited exception, Trustmark is no longer subject to U.S. federal, state and local audits by tax authorities for 2011 and earlier tax years. Trustmark does not anticipate a significant change to the total amount of unrecognized tax benefits within the next twelve months.

Note 14 – Defined Benefit and Other Postretirement Benefits

Qualified Pension Plans

Trustmark Capital Accumulation Plan

Trustmark maintained a noncontributory tax-qualified defined benefit pension plan titled the Trustmark Capital Accumulation Plan (the “Plan”) in which substantially all associates who began employment prior to 2007 participated. The Plan provided for retirement benefits based on the length of credited service and final average compensation, as defined in the Plan, which vested upon three years of service. Benefit accruals under the Plan were frozen in 2009, with the exception of benefit accruals for certain employees of acquired financial institutions covered through plans that were subsequently merged into the Plan. Other than certain employees of acquired financial institutions, associates have not earned additional benefits, except for interest as required by law, since the Plan was frozen. Current and former associates who participated in the Plan retained their right to receive benefits that accrued before the Plan was frozen. As previously reported, on July 26, 2016 the Board of Directors of Trustmark authorized the termination of the Plan, effective as of December 31, 2016. As a result of the termination of the Plan, each participant became fully vested in their accrued benefits under the Plan.

During the second quarter of 2017, Trustmark fully funded the Plan on a termination basis by contributing additional assets in the amount of \$17.6 million in accordance with Internal Revenue Service (IRS) and Pension Benefit Guaranty Corporation requirements. Participants in the Plan elected to receive either a lump sum cash payment or annuity payments under a group annuity contract purchased from an insurance carrier. Final distributions were made to participants from plan assets and a one-time pension settlement expense was recognized totaling \$17.6 million.

Trustmark Corporation Pension Plan for Certain Employees of Acquired Financial Institutions

To satisfy commitments made by Trustmark to associates covered through plans obtained in acquisitions and subsequently merged into the Plan (collectively, the “Continuing Associates”), on July 26, 2016, the Board of Directors of Trustmark also approved the spin-off of the portion of the Plan associated with the accrued benefits of the Continuing Associates into a new plan titled the Trustmark Corporation Pension Plan for Certain Employees of Acquired Financial Institutions (the “Continuing Plan”), effective as of December 30, 2016, immediately prior to the termination of the Plan.

The following tables present information regarding the benefit obligation, plan assets, funded status, amounts recognized in accumulated other comprehensive loss, net periodic benefit cost and other statistical disclosures for Trustmark’s tax-qualified defined benefit pension plans (the Continuing Plan and the Plan) for the periods presented (\$ in thousands):

	December 31,	
	2017	2016
Change in benefit obligation:		
Benefit obligation, beginning of year	\$75,900	\$91,403
Service cost	253	428
Interest cost	1,461	3,355
Actuarial loss (gain)	391	(893)
Benefits paid for the Plan	(68,583)	(18,393)
Settlement loss	680	—
Benefit obligation, end of year	\$10,102	\$75,900

Change in plan assets:

Fair value of plan assets, beginning of year	\$54,734	\$74,137
Actual return on plan assets	481	(1,079)
Employer contributions	17,964	69
Benefit payments for the Plan	(68,583)	(18,393)
Fair value of plan assets, end of year	\$4,596	\$54,734

Funded status at end of year - net liability	\$(5,506)	\$(21,166)
--	------------	------------

Amounts recognized in accumulated other comprehensive loss:

Net loss - amount recognized	\$3,187	\$21,355
------------------------------	---------	----------

Edgar Filing: TRUSTMARK CORP - Form 10-K

	Years Ended December 31,		
	2017	2016	2015
Net periodic benefit cost:			
Service cost	\$253	\$428	\$513
Interest cost	1,461	3,355	3,461
Expected return on plan assets	(317)	(2,897)	(5,187)
Recognized net loss due to defined benefit plan termination	17,662	—	—
Recognized net loss due to lump sum settlements	—	3,906	2,221
Recognized net actuarial loss	1,414	2,749	3,878
Net periodic benefit cost	\$20,473	\$7,541	\$4,886
Other changes in plan assets and benefit obligation recognized in other comprehensive income (loss), before taxes:			
Net loss - Total recognized in other comprehensive income (loss)	\$(18,168)	\$(3,572)	\$(3,173)
Total recognized in net periodic benefit cost and other comprehensive income (loss)	\$2,305	\$3,969	\$1,713
Weighted-average assumptions as of end of year:			
Discount rate for benefit obligation	3.32 %	3.71 %	3.86 %
Discount rate for net periodic benefit cost	3.71 %	3.86 %	3.57 %
Expected long-term return on plan assets	5.00 %	4.25 %	7.00 %

Plan Assets

The weighted-average asset allocations by asset category are presented below for the Continuing Plan at December 31, 2017 and 2016, and for the Plan at December 31, 2016. No assets remained in the Plan at December 31, 2017.

	December 31,	
	2017	2016
Money market fund	6.0 %	13.0 %
U.S. Treasuries	—	87.0 %
Exchange traded funds:		
Equity securities	48.0 %	—
Fixed income	32.0 %	—
International	14.0 %	—
Total	100.0 %	100.0 %

The strategic objective of the investments of the assets in the Continuing Plan aims to provide long-term capital growth with moderate income. The allocation is managed on a total return basis with the average participant age in mind. It is constructed with an intermediate investment time frame with a moderate to high risk tolerance or a long-term investment time frame with a low to moderate risk tolerance. The plan allocation is typically balanced between equity and fixed income. The equity exposure has the potential to earn a return greater than inflation while the fixed income exposure may reduce the risk and volatility of the portfolio to which the equity allocation contributes.

The strategic objective of the investments of the assets in the Plan was changed significantly after the decision to terminate the Plan. The Plan was no longer managed on a total return basis. The Plan was managed with as little market value fluctuation as possible. Given the known fixed actuarial discount rate used until termination to match liabilities, the asset allocation of the Plan was changed to reflect a very conservative posture. Money market and individual U.S. Treasury securities were used solely to maintain a stable market value and achieve a small level of interest income. The Treasury securities matured at or before the projected distribution date. Similarly, a money market allocation was maintained for liquidity purposes due to monthly reoccurring distributions and lump sum distributions until final termination.

Fair Value Measurements

At this time, Trustmark presents no fair values that are derived through internal modeling. Should positions requiring fair valuation arise that are not relevant to existing methodologies, Trustmark will make every reasonable effort to obtain market participant assumptions, or independent evaluation.

Edgar Filing: TRUSTMARK CORP - Form 10-K

The following table sets forth by level, within the fair value hierarchy, the Continuing Plan's assets measured at fair value at December 31, 2017 and 2016 and the Plan's assets at December 31, 2016 (\$ in thousands):

	December 31, 2017			
	Total	Level 1	Level 2	Level 3
Money market fund	\$269	\$269	\$ —	\$ —
Exchange traded funds:				
Equity securities	2,199	2,199	—	—
Fixed income	1,462	1,462	—	—
International	666	666	—	—
Total assets at fair value	\$4,596	\$4,596	\$ —	\$ —

	December 31, 2016			
	Total	Level 1	Level 2	Level 3
Money market fund	\$6,859	\$6,859	\$ —	\$ —
U.S. Treasuries	47,875	47,875	—	—
Total assets at fair value	\$54,734	\$54,734	\$ —	\$ —

There have been no changes in the methodologies used in estimating the fair value of plan assets at December 31, 2017. The money market fund approximates fair value due to its immediate maturity.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although Trustmark believes their valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Contributions

The range of potential contributions to the Continuing Plan is determined annually by the Continuing Plan's actuary in accordance with applicable IRS rules and regulations. Trustmark's policy is to fund amounts that are sufficient to satisfy the annual minimum funding requirements and do not exceed the maximum that is deductible for federal income tax purposes. The actual amount of the contribution is determined annually based on the Continuing Plan's funded status and return on plan assets as of the measurement date, which is December 31. For the plan year ending December 31, 2017, Trustmark's minimum required contribution to the Continuing Plan was \$113 thousand. During 2017, Trustmark contributed \$200 thousand to the Continuing Plan for the plan year ending December 31, 2017. For the plan year ending December 31, 2018, Trustmark's minimum required contribution to the Continuing Plan is expected to be \$175 thousand; however, Management and the Board of Directors of Trustmark will monitor the Continuing Plan throughout 2018 to determine any additional funding requirements by the plan's measurement date.

For the plan year ending December 31, 2016, Trustmark's minimum required contribution to the Plan was zero. Since the Plan was terminated, there were no additional contributions required other than amounts necessary to facilitate the Plan termination.

Estimated Future Benefit Payments and Other Disclosures

The following table presents the expected benefit payments, which reflect expected future service, for the Continuing Plan (\$ in thousands):

Year	Amount
2018	\$ 196
2019	282
2020	333
2021	394
2022	453
2023 - 2027	2,961

Amounts in accumulated other comprehensive loss expected to be recognized as components of net periodic benefit cost during 2018 include a net loss of \$571 thousand.

Supplemental Retirement Plans

Trustmark maintains a nonqualified supplemental retirement plan covering key executive officers and senior officers as well as directors who have elected to defer fees. The plan provides for retirement and/or death benefits based on a participant's covered salary or deferred fees. Although plan benefits may be paid from Trustmark's general assets, Trustmark has purchased life insurance contracts on the participants covered under the plan, which may be used to fund future benefit payments under the plan. The measurement date for the plan is December 31. As a result of mergers prior to 2014, Trustmark became the administrator of small nonqualified supplemental retirement plans, for which the plan benefits were frozen prior to the merger date.

The following tables present information regarding the benefit obligation, plan assets, funded status, amounts recognized in accumulated other comprehensive loss, net periodic benefit cost and other statistical disclosures for Trustmark's nonqualified supplemental retirement plans (\$ in thousands):

	December 31,	
	2017	2016

Total recognized in net periodic benefit cost and other comprehensive			
income (loss)	\$2,886	\$2,572	\$811
Weighted-average assumptions as of end of year:			
Discount rate for benefit obligation	3.32 %	3.71 %	3.86 %
Discount rate for net periodic benefit cost	3.71 %	3.86 %	3.57 %

Estimated Supplemental Retirement Plan Payments and Other Disclosures

The following table presents the expected benefits payments for Trustmark's supplemental retirement plans (\$ in thousands):

Year	Amount
2018	\$3,475
2019	3,591
2020	4,047
2021	4,105
2022	4,262
2023 - 2027	19,230

Amounts in accumulated other comprehensive loss expected to be recognized as components of net periodic benefit cost during 2018 include a loss of \$884 thousand and prior service cost of \$250 thousand.

Other Benefit Plans

Defined Contribution Plan

Trustmark provides associates with a self-directed 401(k) retirement plan that allows associates to contribute a percentage of base pay, within limits provided by the Internal Revenue Code and accompanying regulations, into the plan. Trustmark matches 100% of associate contributions to the plan based on the amount of each participant's contributions up to a maximum of 6% of eligible compensation. Associates may become eligible to make elective deferral contributions the first of the month following 30 days of employment. Eligible associates must complete one year of service in order to vest in Trustmark's matching contributions. Trustmark's contributions to this plan were \$7.5 million in 2017, \$7.2 million in 2016 and \$7.0 million in 2015.

Note 15 – Stock and Incentive Compensation Plans

Trustmark has granted stock and incentive compensation awards subject to the provisions of the Stock and Incentive Compensation Plan (the Stock Plan). Current outstanding and future grants of stock and incentive compensation awards are subject to the provisions of the Stock Plan, which is designed to provide flexibility to Trustmark regarding its ability to motivate, attract and retain the services of key associates and directors. The Stock Plan also allows Trustmark to grant nonqualified stock options, incentive stock options, stock appreciation rights, restricted stock, restricted stock units and performance units to key associates and directors. At December 31, 2017, the maximum number of shares of Trustmark's common stock available for issuance under the Plan was 1,110,739 shares.

Restricted Stock Grants

Performance Awards

Trustmark's performance awards vest over three years and are granted to Trustmark's executive and senior management teams. Performance awards granted vest based on performance goals of return on average tangible equity and total shareholder return compared to a defined peer group. Performance awards are valued utilizing a Monte Carlo simulation model to estimate fair value of the awards at the grant date. These awards are recognized using the

straight-line method over the requisite service period. These awards provide for achievement shares if performance measures exceed 100%. The restricted share agreement provides for voting rights and dividend privileges.

The following table summarizes Trustmark's performance award activity for the periods presented:

	Years Ended December 31,					
	2017		2016		2015	
	Shares	Weighted-Average Grant-Date Fair Value	Shares	Weighted-Average Grant-Date Fair Value	Shares	Weighted-Average Grant-Date Fair Value
Nonvested shares, beginning of year	237,136	\$ 26.27	212,309	\$ 24.14	181,195	\$ 24.98
Granted	58,406	33.31	99,116	20.18	84,899	22.71
Released from restriction	(67,279)	34.78	(40,888)	32.84	(47,360)	24.97
Forfeited	(14,747)	28.42	(33,401)	30.01	(6,425)	24.97
Nonvested shares, end of year	213,516	\$ 25.37	237,136	\$ 26.27	212,309	\$ 24.14

Time-Vested Awards

Trustmark's time-vested awards vest over three years and are granted to members of Trustmark's Board of Directors as well as Trustmark's executive and senior management teams. Time-vested awards are valued utilizing the fair value of Trustmark's stock at the grant date. These awards are recognized on the straight-line method over the requisite service period.

The following table summarizes Trustmark's time-vested award activity for the periods presented:

	Years Ended December 31,				2015	
	2017	2016	2015			
	Shares	Weighted-Average Grant-Date Fair Value	Shares	Weighted-Average Grant-Date Fair Value	Shares	Weighted-Average Grant-Date Fair Value
Nonvested shares, beginning of year	322,056	\$ 22.65	306,657	\$ 24.56	263,905	\$ 24.66
Granted	105,524	33.79	139,791	20.66	121,314	23.61
Released from restriction	(101,289)	25.35	(108,241)	23.74	(67,087)	24.31
Forfeited	(5,934)	26.52	(16,151)	22.24	(11,475)	24.22
Nonvested shares, end of year	320,357	\$ 25.40	322,056	\$ 22.65	306,657	\$ 24.56

The following table presents information regarding compensation expense for awards under the Plan for the periods presented (\$ in thousands):

	Recognized Compensation Expense for Years Ended December 31,			Unrecognized Compensation Expense		Weighted Average Life of Unrecognized Compensation Expense
	2017	2016	2015	2017	2016	
Performance awards	\$1,387	\$1,171	\$1,201	\$ 1,783		1.66
Time-vested awards	2,922	2,513	2,467	3,058		1.80
Total	\$4,309	\$3,684	\$3,668	\$ 4,841		

Note 16 – Commitments and Contingencies

Lending Related

Trustmark makes commitments to extend credit and issues standby and commercial letters of credit (letters of credit) in the normal course of business in order to fulfill the financing needs of its customers. The carrying amount of commitments to extend credit and letters of credit approximates the fair value of such financial instruments.

Commitments to extend credit are agreements to lend money to customers pursuant to certain specified conditions. Commitments generally have fixed expiration dates or other termination clauses. Because many of these

commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The exposure to credit loss in the event of nonperformance by the other party to the commitments to extend credit is represented by the contract amount of those instruments. Trustmark applies the same credit policies and standards as it does in the lending process when making these commitments. The collateral obtained is based upon the nature of the transaction and the assessed creditworthiness of the borrower. At December 31, 2017 and 2016, Trustmark had unused commitments to extend credit of \$3.172 billion and \$3.131 billion, respectively.

Letters of credit are conditional commitments issued by Trustmark to insure the performance of a customer to a third-party. A financial standby letter of credit irrevocably obligates Trustmark to pay a third-party beneficiary when a customer fails to repay an outstanding loan or debt instrument. A performance standby letter of credit irrevocably obligates Trustmark to pay a third-party beneficiary when a customer fails to perform some contractual, nonfinancial obligation. When issuing letters of credit, Trustmark uses the same policies regarding credit risk and collateral which are followed in the lending process. At December 31, 2017 and 2016, Trustmark's maximum exposure to credit loss in the event of nonperformance by the other party for letters of credit was \$104.1 million and \$111.3 million, respectively. These amounts consist primarily of commitments with maturities of less than three years, which have an immaterial carrying value. Trustmark holds collateral to support standby letters of credit when deemed necessary. As of December 31, 2017 and 2016, the fair value of collateral held was \$28.4 million and \$32.7 million, respectively.

Lease Commitments

Trustmark currently has operating lease commitments for banking premises and equipment, which expire from 2018 to 2038. It is expected that certain leases will be renewed, or equipment replaced, as leases expire. Rental expense totaled \$9.3 million in 2017, \$9.8 million in 2016 and \$9.3 million in 2015.

At December 31, 2017, future minimum rental commitments under non-cancellable operating leases are as follows (\$ in thousands):

Year	Amount
2018	12,031
2019	10,436
2020	6,642
2021	5,197
2022	5,039
Thereafter	28,518
Total	\$67,863

Legal Proceedings

Trustmark's wholly-owned subsidiary, TNB, has been named as a defendant in three lawsuits related to the collapse of the Stanford Financial Group. The first is a purported class action complaint that was filed on August 23, 2009 in the District Court of Harris County, Texas, by Peggy Roif Rotstain, Guthrie Abbott, Catherine Burnell, Steven Queyrouze, Jaime Alexis Arroyo Bornstein and Juan C. Olano (collectively, Class Plaintiffs), on behalf of themselves and all others similarly situated, naming TNB and four other financial institutions unaffiliated with Trustmark as defendants. The complaint seeks to recover (i) alleged fraudulent transfers from each of the defendants in the amount of fees and other monies received by each defendant from entities controlled by R. Allen Stanford (collectively, the Stanford Financial Group) and (ii) damages allegedly attributable to alleged conspiracies by one or more of the defendants with the Stanford Financial Group to commit fraud and/or aid and abet fraud on the asserted grounds that defendants knew or should have known the Stanford Financial Group was conducting an illegal and fraudulent scheme. Plaintiffs have demanded a jury trial. Plaintiffs did not quantify damages.

In November 2009, the lawsuit was removed to federal court by certain defendants and then transferred by the United States Panel on Multidistrict Litigation to federal court in the Northern District of Texas (Dallas) where multiple Stanford related matters are being consolidated for pre-trial proceedings. In May 2010, all defendants (including TNB) filed motions to dismiss the lawsuit. In August 2010, the court authorized and approved the formation of an Official Stanford Investors Committee (OSIC) to represent the interests of Stanford investors and, under certain circumstances, to file legal actions for the benefit of Stanford investors. In December 2011, the OSIC filed a motion to intervene in this action. In September 2012, the district court referred the case to a magistrate judge for hearing and determination of certain pretrial issues. In December 2012, the court granted the OSIC's motion to intervene, and the OSIC filed an Intervenor Complaint against one of the other defendant financial institutions. In February 2013, the OSIC filed a second Intervenor Complaint that asserts claims against TNB and the remaining defendant financial institutions. The OSIC seeks to recover: (i) alleged fraudulent transfers in the amount of the fees each of the defendants allegedly received from Stanford Financial Group, the profits each of the defendants allegedly made from Stanford Financial Group deposits, and other monies each of the defendants allegedly received from Stanford Financial Group; (ii) damages attributable to alleged conspiracies by each of the defendants with the Stanford Financial Group to commit fraud and/or aid and abet fraud and conversion on the asserted grounds that the defendants knew or should have known the Stanford Financial Group was conducting an illegal and fraudulent scheme; and (iii)

punitive damages. The OSIC did not quantify damages.

In July 2013, all defendants (including TNB) filed motions to dismiss the OSIC's claims. In March 2015, the court entered an order authorizing the parties to conduct discovery regarding class certification, staying all other discovery and setting a deadline for the parties to complete briefing on class certification issues. In April 2015, the court granted in part and denied in part the defendants' motions to dismiss the Class Plaintiffs' claims and the OSIC's claims. The court dismissed all of the Class Plaintiffs' fraudulent transfer claims and dismissed certain of the OSIC's claims. The court denied the motions by TNB and the other financial institution defendants to dismiss the OSIC's constructive fraudulent transfer claims.

On June 23, 2015, the court allowed the Class Plaintiffs to file a Second Amended Class Action Complaint (SAC), which asserted new claims against TNB and certain of the other defendants for (i) aiding, abetting and participating in a fraudulent scheme, (ii) aiding, abetting and participating in violations of the Texas Securities Act, (iii) aiding, abetting and participating in breaches of fiduciary duty, (iv) aiding, abetting and participating in conversion and (v) conspiracy. On July 14, 2015, the defendants (including TNB) filed motions to dismiss the SAC and to reconsider the court's prior denial to dismiss the OSIC's constructive fraudulent transfer claims against TNB and the other financial institutions that are defendants in the action. On July 27, 2016, the court denied the motion by TNB and the other financial institution defendants to dismiss the SAC and also denied the motion by TNB and the other financial

institution defendants to reconsider the court's prior denial to dismiss the OSIC's constructive fraudulent transfer claims. On August 24, 2016, TNB filed its answer to the SAC. On October 20, 2017, the OSIC filed a motion seeking an order lifting the discovery stay and establishing a trial schedule. On November 7, 2017, the court denied the OSIC's motion seeking class certification and designation of class representatives and counsel, finding that common issues of fact did not predominate. The court granted the OSIC's motion to lift the discovery stay that it had previously ordered.

The second Stanford-related lawsuit was filed on December 14, 2009 in the District Court of Ascension Parish, Louisiana, individually by Harold Jackson, Paul Blaine, Carolyn Bass Smith, Christine Nichols, and Ronald and Ramona Hebert naming TNB (misnamed as Trust National Bank) and other individuals and entities not affiliated with Trustmark as defendants. The complaint seeks to recover the money lost by these individual plaintiffs as a result of the collapse of the Stanford Financial Group (in addition to other damages) under various theories and causes of action, including negligence, breach of contract, breach of fiduciary duty, negligent misrepresentation, detrimental reliance, conspiracy, and violation of Louisiana's uniform fiduciary, securities, and racketeering laws. The complaint does not quantify the amount of money the plaintiffs seek to recover. In January 2010, the lawsuit was removed to federal court by certain defendants and then transferred by the United States Panel on Multidistrict Litigation to federal court in the Northern District of Texas (Dallas) where multiple Stanford related matters are being consolidated for pre-trial proceedings. On March 29, 2010, the court stayed the case. TNB filed a motion to lift the stay, which was denied on February 28, 2012. In September 2012, the district court referred the case to a magistrate judge for hearing and determination of certain pretrial issues.

On April 11, 2016, Trustmark learned that a third Stanford-related lawsuit had been filed on that date in the Superior Court of Justice in Ontario, Canada, by The Toronto-Dominion Bank ("TD Bank"), naming TNB and three other financial institutions not affiliated with Trustmark as defendants. The complaint seeks a declaration specifying the degree to which each of TNB and the other defendants are liable in respect of any loss and damage for which TD Bank is found to be liable in a litigation commenced against TD Bank brought by the Joint Liquidators of Stanford International Bank Limited in the Superior Court of Justice, Commercial List in Ontario, Canada (the "Joint Liquidators' Action"), as well as contribution and indemnity in respect of any judgment, interest and costs TD Bank is ordered to pay in the Joint Liquidators' Action. To date, TNB has not been served in connection with this action.

TNB's relationship with the Stanford Financial Group began as a result of Trustmark's acquisition of a Houston-based bank in August 2006, and consisted of correspondent banking and other traditional banking services in the ordinary course of business. All Stanford-related lawsuits are in pre-trial stages.

Trustmark and its subsidiaries are also parties to other lawsuits and other claims that arise in the ordinary course of business. Some of the lawsuits assert claims related to the lending, collection, servicing, investment, trust and other business activities, and some of the lawsuits allege substantial claims for damages.

All pending legal proceedings described above are being vigorously contested. In accordance FASB ASC Topic 450-20, "Loss Contingencies," Trustmark will establish an accrued liability for litigation matters when those matters present loss contingencies that are both probable and reasonably estimable. At the present time, Trustmark believes, based on its evaluation and the advice of legal counsel, that a loss in any such proceeding is not probable and a reasonable estimate cannot reasonably be made.

Note 17 – Shareholders' Equity

Regulatory Capital

Trustmark and TNB are subject to minimum risk-based capital and leverage capital requirements, as described in the section captioned “Capital Adequacy” included in Part I. Item 1. – Business of this report, which are administered by the federal bank regulatory agencies. These capital requirements, as defined by federal regulations, involve quantitative and qualitative measures of assets, liabilities and certain off-balance sheet instruments. Trustmark’s and TNB’s minimum risk-based capital requirements include the phased in capital conservation buffer of 1.250% at December 31, 2017 and 0.625% at December 31, 2016. Accumulated other comprehensive loss, net of tax, is not included in computing regulatory capital. Failure to meet minimum capital requirements can result in certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the financial statements of Trustmark and TNB and limit Trustmark’s and TNB’s ability to pay dividends. As of December 31, 2017, Trustmark and TNB exceeded all applicable minimum capital standards. In addition, Trustmark and TNB met applicable regulatory guidelines to be considered well-capitalized at December 31, 2017. To be categorized in this manner, Trustmark and TNB maintained minimum common equity Tier 1 risk-based capital, Tier 1 risk-based capital, total risk-based capital and Tier 1 leverage ratios as set forth in the accompanying table, and were not subject to any written agreement, order or capital directive, or prompt corrective action directive issued by their primary federal regulators to meet and maintain a specific capital level for any capital measures. There are no significant conditions or events that have occurred since December 31, 2017, which Management believes have affected Trustmark’s or TNB’s present classification.

Edgar Filing: TRUSTMARK CORP - Form 10-K

The regulatory capital ratios for December 31, 2017 contain a reclassification adjustment of \$8.5 million from accumulated other comprehensive loss to retained earnings as allowed by regulatory agencies in an interagency statement released January 18, 2018 to address disproportionate tax effect in accumulated other comprehensive loss resulting from the recent enactment of the Tax Reform Act and the application of FASB ASC Topic 740.

The following table provides Trustmark's and TNB's actual regulatory capital amounts and ratios under regulatory capital standards in effect at December 31, 2017 and 2016 (\$ in thousands):

	Actual			To Be	
	Regulatory Capital Amount	Ratio	Minimum Requirement	Well Capitalized	
At December 31, 2017:					
Common Equity Tier 1 Capital (to Risk Weighted Assets)					
Trustmark Corporation	\$ 1,243,240	11.77 %	5.750	% n/a	
Trustmark National Bank	1,284,575	12.16 %	5.750	% 6.50	%

Trustmark Corporation	\$ 1,269,660	9.90 %	4.00	% n/a	
Trustmark National Bank	1,251,329	9.77 %	4.00	% 5.00	%

Dividends on Common Stock

Dividends paid by Trustmark are substantially funded from dividends received from TNB. Approval by TNB's regulators is required if the total of all dividends declared in any calendar year exceeds the total of its net income for that year combined with its retained net income of the preceding two years. TNB will have available in 2018 approximately \$87.0 million plus its net income for that year to pay as dividends.

Stock Repurchase Program

On March 11, 2016, the Board of Directors of Trustmark authorized a stock repurchase program under which \$100.0 million of Trustmark's outstanding common stock may be acquired through March 31, 2019. The shares may be purchased from time to time at prevailing market prices, through open market or privately negotiated transactions, depending on market conditions. Trustmark did not repurchase any of its common stock during the year ended December 31, 2017, compared to approximately 34 thousand shares of its common stock valued at approximately \$750 thousand repurchased during the year ended December 31, 2016.

Other Comprehensive Income (Loss) and Accumulated Other Comprehensive Loss

The following tables present the net change in the components of accumulated other comprehensive loss and the related tax effects allocated to each component for the years ended December 31, 2017, 2016 and 2015 (\$ in thousands). Reclassification adjustments related to securities available for sale are included in securities gains (losses), net in the accompanying consolidated statements of income. The amortization of prior service cost, recognized net loss due to lump sum settlements, change in net actuarial loss and recognized net loss due to defined benefit plan termination for pension and other postretirement benefit plans are included in the computation of net periodic benefit cost (see Note 14 – Defined Benefit and Other Postretirement Benefits for additional details). Reclassification adjustments related to pension and other postretirement benefit plans are included in salaries and employee benefits, defined benefit plan termination and other expense in the accompanying consolidated statements of income. Reclassification adjustments related to the cash flow hedge derivative are included in other interest expense in the accompanying consolidated statements of income.

	Before Tax Amount	Tax (Expense) Benefit	Net of Tax Amount
Year Ended December 31, 2017			
Securities available for sale and transferred securities:

Balance, December 31, 2017	\$ (26,535)	\$(13,468)	\$ 278	\$(39,725)

Note 18 – Fair Value

Financial Instruments Measured at Fair Value

The methodologies Trustmark uses in determining the fair values are based primarily on the use of independent, market-based data to reflect a value that would be reasonably expected upon exchange of the position in an orderly transaction between market participants at the measurement date. The predominant portion of assets that are stated at fair value are of a nature that can be valued using prices or inputs that are readily observable through a variety of independent data providers. The providers selected by Trustmark for fair valuation data are widely recognized and accepted vendors whose evaluations support the pricing functions of financial institutions, investment and mutual funds, and portfolio managers. Trustmark has documented and evaluated the pricing methodologies used by the vendors and maintains internal processes that regularly test valuations for anomalies.

Trustmark utilizes an independent pricing service to advise it on the carrying value of the securities available for sale portfolio. As part of Trustmark's procedures, the price provided from the service is evaluated for reasonableness given market changes. When a questionable price exists, Trustmark investigates further to determine if the price is valid. If needed, other market participants may be utilized to determine the correct fair value. Trustmark has also reviewed and confirmed its determinations in thorough discussions with the pricing source regarding their methods of price discovery.

Mortgage loan commitments are valued based on the securities prices of similar collateral, term, rate and delivery for which the loan is eligible to deliver in place of the particular security. Trustmark acquires a broad array of mortgage security prices that are supplied by a market data vendor, which in turn accumulates prices from a broad list of securities dealers. Prices are processed through a mortgage pipeline management system that accumulates and segregates all loan commitment and forward-sale transactions according to the similarity of various characteristics (maturity, term, rate, and collateral). Prices are matched to those positions that are deemed to be an eligible substitute or offset (i.e., "deliverable") for a corresponding security observed in the market place.

Trustmark estimates fair value of the MSR through the use of prevailing market participant assumptions and market participant valuation processes. This valuation is periodically tested and validated against other third-party firm valuations.

Trustmark obtains the fair value of interest rate swaps from a third-party pricing service that uses an industry standard discounted cash flow methodology. In addition, credit valuation adjustments are incorporated in the fair values to account for potential nonperformance risk. In adjusting the fair value of its interest rate swap contracts for the effect of nonperformance risk, Trustmark has considered any applicable credit enhancements such as collateral postings, thresholds, mutual puts, and guarantees. In conjunction with the FASB's fair value measurement guidance, Trustmark made an accounting policy election to measure the credit risk of these derivative financial instruments, which are subject to master netting agreements, on a net basis by counterparty portfolio.

Trustmark has determined that the majority of the inputs used to value its interest rate swaps offered to qualified commercial borrowers fall within Level 2 of the fair value hierarchy, while the credit valuation adjustments associated with these derivatives utilize Level 3 inputs, such as estimates of current credit spreads. Trustmark has assessed the significance of the impact of the credit valuation adjustments on the overall valuation of its interest rate swaps and has determined that the credit valuation adjustment is not significant to the overall valuation of these derivatives. As a result, Trustmark classifies its interest rate swap valuations in Level 2 of the fair value hierarchy.

Trustmark also utilizes exchange-traded derivative instruments such as Treasury note futures contracts and option contracts to achieve a fair value return that offsets the changes in fair value of the MSR attributable to interest rates. Fair values of these derivative instruments are determined from quoted prices in active markets for identical assets therefore allowing them to be classified within Level 1 of the fair value hierarchy. In addition, Trustmark utilizes derivative instruments such as interest rate lock commitments in its mortgage banking area which lack observable inputs for valuation purposes resulting in their inclusion in Level 3 of the fair value hierarchy.

At this time, Trustmark presents no fair values that are derived through internal modeling. Should positions requiring fair valuation arise that are not relevant to existing methodologies, Trustmark will make every reasonable effort to obtain market participant assumptions, or independent evaluation.

Financial Assets and Liabilities

The following tables summarize financial assets and financial liabilities measured at fair value on a recurring basis as of December 31, 2017 and 2016, segregated by the level of valuation inputs within the fair value hierarchy utilized to measure fair value (\$ in thousands). There were no transfers between fair value levels for the years ended December 31, 2017 and 2016.

	December 31, 2017			
	Total	Level 1	Level 2	Level 3

Edgar Filing: TRUSTMARK CORP - Form 10-K

The changes in Level 3 assets measured at fair value on a recurring basis for the years ended December 31, 2017 and 2016 are summarized as follows (\$ in thousands):

	MSR	Other Assets - Derivatives
Balance, January 1, 2017	\$80,239	\$ 1,001
Total net (loss) gain included in Mortgage banking, net (1)	(11,830)	4,165
Additions	15,860	—
Sales	—	(4,266)
Balance, December 31, 2017	\$84,269	\$ 900

The amount of total gains (losses) for the period included in earnings that are

attributable to the change in unrealized gains or losses still held at

December 31, 2017 \$(1,050) \$ (1,569)

Balance, January 1, 2016	\$74,007	\$ 1,113
Total net (loss) gain included in Mortgage banking, net (1)	(10,513)	10,128
Additions	16,745	—
Sales	—	(10,240)
Balance, December 31, 2016	\$80,239	\$ 1,001

The amount of total gains (losses) for the period included in earnings that are

attributable to the change in unrealized gains or losses still held at

December 31, 2016 \$(407) \$ 753

(1) Total net (loss) gain included in Mortgage banking, net relating to the MSR includes changes in fair value due to market changes and due to run-off.

Trustmark may be required, from time to time, to measure certain assets at fair value on a nonrecurring basis in accordance with GAAP. Assets at December 31, 2017, which have been measured at fair value on a nonrecurring basis, include impaired LHFI. Loans for which it is probable Trustmark will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement are considered impaired. Specific allowances for impaired LHFI are based on comparisons of the recorded carrying values of the loans to the present value of the estimated cash flows of these loans at each loan's original effective interest rate, the fair value of the collateral or the observable market prices of the loans. Impaired LHFI are primarily collateral dependent loans and are assessed using a fair value approach. Fair value estimates for collateral dependent loans are derived from appraised values based on the current market value or as-is value of the property being appraised, normally from recently received and reviewed appraisals. Appraisals are obtained from state-certified appraisers and are based on certain assumptions, which may include construction or development status and the highest and best use of the property. These appraisals are reviewed by Trustmark's Appraisal Review Department to ensure they are acceptable. Appraised values are adjusted down for costs associated with asset disposal. At December 31, 2017, Trustmark had outstanding balances of \$48.9 million in impaired LHFI that were individually evaluated for impairment and written down to fair value of the underlying collateral less cost to sell based on the fair value of the collateral or other unobservable input compared to \$27.1 million at December 31, 2016. These individually evaluated impaired LHFI are classified as Level 3 in the fair value hierarchy. Impaired LHFI are periodically reviewed and

evaluated for additional impairment and adjusted accordingly based on the same factors identified above.

Nonfinancial Assets and Liabilities

Certain nonfinancial assets measured at fair value on a nonrecurring basis include foreclosed assets (upon initial recognition or subsequent impairment), nonfinancial assets and nonfinancial liabilities measured at fair value in the second step of a goodwill impairment test, and intangible assets and other nonfinancial long-lived assets measured at fair value for impairment assessment.

Other real estate includes assets that have been acquired in satisfaction of debt through foreclosure and is carried at the lower of cost or estimated fair value. Fair value is based on independent appraisals and other relevant factors. In the determination of fair value subsequent to foreclosure, Management also considers other factors or recent developments, such as changes in market conditions from the time of valuation and anticipated sales values considering plans for disposition, which could result in an adjustment to lower the collateral value estimates indicated in the appraisals. Periodic revaluations are classified as Level 3 in the fair value hierarchy since assumptions are used that may not be observable in the market.

Foreclosed assets of \$26.6 million were re-measured during 2017 requiring write-downs of \$3.3 million to reach their current fair values compared to \$32.2 million of foreclosed assets that were re-measured during 2016, requiring write-downs of \$4.4 million.

Fair Value of Financial Instruments

The carrying amounts and estimated fair values of financial instruments at December 31, 2017 and 2016 were as follows (\$ in thousands):

	December 31, 2017		December 31, 2016	
	Carrying	Estimated	Carrying	Estimated
	Value	Fair Value	Value	Fair Value
Financial Assets:				
Level 2 Inputs:				
Cash and short-term investments	\$336,383	\$336,383	\$328,206	\$328,206
Securities held to maturity	1,056,486	1,046,247	1,158,643	1,157,046
Level 3 Inputs:				
Net LHFI	8,493,234	8,507,469	7,779,948	7,825,009
Net acquired loans	257,438	257,438	260,850	260,850
Financial Liabilities:				
Level 2 Inputs:				
Deposits	10,577,512	10,577,858	10,056,012	10,059,794
Short-term liabilities	1,440,876	1,440,876	1,309,595	1,309,595
Long-term FHLB advances	946	946	251,049	251,050
Junior subordinated debt securities	61,856	45,773	61,856	41,057

FASB ASC Topic 825 requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. The methodology and significant assumptions used in estimating the fair values presented above are as follows:

In cases where quoted market prices are not available, fair values are generally based on estimates using present value techniques. Trustmark's premise in present value techniques is to represent the fair values on a basis of replacement value of the existing instrument given observed market rates on the measurement date. These techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates for those assets or liabilities cannot be necessarily substantiated by comparison to independent markets and, in many cases, may not be realizable in immediate settlement of the instruments. The estimated fair value of financial instruments with immediate and shorter-term maturities (generally 90 days or less) is assumed to be the same as the recorded book value. All nonfinancial instruments, by definition, have been excluded from these disclosure requirements. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of Trustmark.

Cash and Short-Term Investments

The carrying amounts for cash and due from banks and short-term investments (federal funds sold and securities purchased under reverse repurchase agreements) approximate fair values due to their immediate and shorter-term maturities.

Securities Held to Maturity

Estimated fair values for securities held to maturity are based on quoted market prices where available. If quoted market prices are not available, estimated fair values are based on quoted market prices of comparable instruments.

Net LHFI

The fair values of net LHFI are estimated for portfolios of loans with similar financial characteristics. For variable rate LHFI that reprice frequently with no significant change in credit risk, fair values are based on carrying values. The fair values of certain mortgage LHFI, such as 1-4 family residential properties, are based on quoted market prices of similar loans sold in conjunction with securitization transactions, adjusted for differences in loan characteristics. The fair values of other types of LHFI are estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. The processes for estimating the fair value of net LHFI described above do not represent an exit price under FASB ASC Topic 820 and such an exit price could potentially produce a different fair value estimate at December 31, 2017 and 2016.

Net Acquired Loans

The fair value of net acquired loans is based on estimates of future loan cash flows and appropriate discount rates, which incorporate Trustmark's assumptions about market funding cost and liquidity premium. The estimates of future loan cash flows are determined using Trustmark's assumptions concerning the amount and timing of principal and interest payments, prepayments and credit losses.

Deposits

The fair values of deposits with no stated maturity, such as noninterest-bearing demand deposits, NOW accounts, MMDA products and savings accounts are, by definition, equal to the amount payable on demand, which is the carrying value. Fair values for certificates of deposit are based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits with similar remaining maturities.

Short-Term Liabilities

The carrying amounts for federal funds purchased, securities sold under repurchase agreements and other borrowings, including short-term FHLB advances, approximate their fair values.

Long-Term FHLB Advances

FHLB advances were valued by projecting expected cash flows into the future based on each advance's contracted rate and then determining the present value of those expected cash flows using current rates for advances with similar maturities.

Junior Subordinated Debt Securities

The fair value of the junior subordinated debt securities equals quoted market prices, if available. If a quoted market price is not available, the fair value is estimated using quoted market prices for similar junior subordinated debt securities.

Fair Value Option

Trustmark has elected to account for its LHFS under the fair value option, with interest income on these LHFS reported in interest and fees on LHFS and LHFI. The fair value of the LHFS is determined using quoted prices for a similar asset, adjusted for specific attributes of that loan. The LHFS are actively managed and monitored and certain market risks of the loans may be mitigated through the use of derivatives. These derivative instruments are carried at fair value with changes in fair value recorded as noninterest income in mortgage banking, net. The changes in the fair value of the LHFS are largely offset by changes in the fair value of the derivative instruments. For the years ended December 31, 2017, 2016 and 2015, a net gain of \$3.0 million, a net loss of \$2.5 million and a net loss of \$857 thousand, respectively, was recorded as noninterest income in mortgage banking, net for changes in the fair value of the LHFS accounted for under the fair value option. Interest and fees on LHFS and LHFI for the years ended December 31, 2017, 2016 and 2015 included \$4.9 million, \$5.0 million and \$4.7 million, respectively, of interest earned on the LHFS accounted for under the fair value option. Election of the fair value option allows Trustmark to reduce the accounting volatility that would otherwise result from the asymmetry created by accounting for the financial instruments at the lower of cost or fair value and the derivatives at fair value. The fair value option election does not apply to the GNMA optional repurchase loans which do not meet the requirements under FASB ASC Topic 825 to be accounted for under the fair value option. GNMA optional repurchase loans totaled \$48.2 million and \$43.9 million at December 31, 2017 and 2016, respectively, and are included in LHFS on the accompanying consolidated balance sheets.

The following table provides information about the fair value and the contractual principal outstanding of the LHFS accounted for under the fair value option as of December 31, 2017 and 2016 (\$ in thousands):

	December 31,	
	2017	2016
Fair value of LHFS	\$ 132,300	\$ 132,002
LHFS contractual principal outstanding	129,347	132,047
Fair value less unpaid principal	\$ 2,953	\$ (45)

Note 19 – Derivative Financial Instruments

Derivatives Designated as Hedging Instruments

On April 4, 2013, Trustmark entered into a forward interest rate swap contract on junior subordinated debentures with a total notional amount of \$60.0 million. The interest rate swap contract was designated as a derivative instrument in a cash flow hedge under FASB

ASC Topic 815 with the objective of protecting the quarterly interest payments on Trustmark's \$60.0 million of junior subordinated debentures issued to Trustmark Preferred Capital Trust I throughout the five-year period beginning December 31, 2014 and ending December 31, 2019 from the risk of variability of those payments resulting from changes in the three-month LIBOR interest rate. Under the swap, which became effective on December 31, 2014, Trustmark will pay a fixed interest rate of 1.66% and receive a variable interest rate based on three-month LIBOR on a total notional amount of \$60.0 million, with quarterly net settlements.

No ineffectiveness related to the interest rate swap designated as a cash flow hedge was recognized in the consolidated statements of income for the years ended December 31, 2017, 2016 and 2015. The accumulated net after-tax gain related to the effective cash flow hedge included in accumulated other comprehensive loss totaled \$278 thousand at December 31, 2017 compared to a net after-tax loss of \$18 thousand at December 31, 2016. Amounts reported in accumulated other comprehensive loss related to this derivative are reclassified to other interest expense as interest payments are made on Trustmark's variable rate junior subordinated debentures. During the next twelve months, Trustmark estimates that \$125 thousand will be reclassified as a decrease to other interest expense.

Derivatives not Designated as Hedging Instruments

Trustmark utilizes a portfolio of exchange-traded derivative instruments, such as Treasury note futures contracts and option contracts, to achieve a fair value return that economically hedges changes in the fair value of the MSR attributable to interest rates. These transactions are considered freestanding derivatives that do not otherwise qualify for hedge accounting. The total notional amount of these derivative instruments was \$349.0 million at December 31, 2017 compared to \$262.0 million at December 31, 2016. Changes in the fair value of these exchange-traded derivative instruments are recorded as noninterest income in mortgage banking, net and are offset by changes in the fair value of the MSR. The impact of this strategy resulted in a net positive ineffectiveness of \$254 thousand for the year ended December 31, 2017, compared to a net negative ineffectiveness of \$2.9 million for the year ended December 31, 2016 and a net positive ineffectiveness of \$1.9 million for the year ended December 31, 2015.

As part of Trustmark's risk management strategy in the mortgage banking area, derivative instruments such as forward sales contracts are utilized. Trustmark's obligations under forward sales contracts consist of commitments to deliver mortgage loans, originated and/or purchased, in the secondary market at a future date. Changes in the fair value of these derivative instruments are recorded as noninterest income in mortgage banking, net and are offset by changes in the fair value of LHFS. Trustmark's off-balance sheet obligations under these derivative instruments totaled \$182.1 million at December 31, 2017, with a negative valuation adjustment of \$237 thousand, compared to \$195.0 million at December 31, 2016, with a positive valuation adjustment of \$2.8 million.

Trustmark also utilizes derivative instruments such as interest rate lock commitments in its mortgage banking area. Interest rate lock commitments are residential mortgage loan commitments with customers, which guarantee a specified interest rate for a specified time period. Changes in the fair value of these derivative instruments are recorded as noninterest income in mortgage banking, net and are offset by the changes in the fair value of forward sales contracts. Trustmark's off-balance sheet obligations under these derivative instruments totaled \$83.0 million at December 31, 2017, with a positive valuation adjustment of \$900 thousand, compared to \$97.9 million at December 31, 2016, with a positive valuation adjustment of \$1.0 million.

Trustmark offers certain derivatives products directly to qualified commercial lending clients seeking to manage their interest rate risk. Trustmark economically hedges interest rate swap transactions executed with commercial lending clients by entering into offsetting interest rate swap transactions with institutional derivatives market participants. Derivatives transactions executed as part of this program are not designated as qualifying hedging relationships and are, therefore, carried at fair value with the change in fair value recorded in noninterest income in bank card and other fees. Because these derivatives have mirror-image contractual terms, in addition to collateral provisions which mitigate the impact of non-performance risk, the changes in fair value are expected to substantially offset. As of December 31, 2017, Trustmark had interest rate swaps with an aggregate notional amount of \$351.9

million related to this program, compared to \$340.2 million as of December 31, 2016.

Credit-risk-related Contingent Features

Trustmark has agreements with its financial institution counterparties that contain provisions where if Trustmark defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then Trustmark could also be declared in default on its derivatives obligations.

As of December 31, 2017 and 2016, the termination value of interest rate swaps in a liability position, which includes accrued interest but excludes any adjustment for nonperformance risk, related to these agreements was \$80 thousand and \$1.2 million, respectively. As of December 31, 2017, Trustmark had posted collateral of \$100 thousand against its obligations because of negotiated thresholds and minimum transfer amounts under these agreements. If Trustmark had breached any of these triggering provisions at December 31, 2017, it could have been required to settle its obligations under the agreements at the termination value.

Edgar Filing: TRUSTMARK CORP - Form 10-K

Credit risk participation agreements arise when Trustmark contracts with other financial institutions, as a guarantor or beneficiary, to share credit risk associated with certain interest rate swaps. These agreements provide for reimbursement of losses resulting from a third party default on the underlying swap. At December 31, 2017 and 2016, Trustmark had entered into two risk participation agreements as a beneficiary with an aggregate notional amount of \$13.7 million and \$14.2 million, respectively. At December 31, 2017, Trustmark had entered into six risk participation agreements as a guarantor with an aggregate notional amount of \$37.1 million compared to five risk participation agreements as a guarantor with an aggregate notional amount of \$28.0 million at December 31, 2016. The aggregate fair values of these risk participation agreements were immaterial at December 31, 2017 and 2016.

Tabular Disclosures

The following tables disclose the fair value of derivative instruments in Trustmark's balance sheets as of December 31, 2017 and 2016 as well as the effect of these derivative instruments on Trustmark's results of operations for the periods presented (\$ in thousands):

Note 20 – Segment Information

Trustmark's management reporting structure includes three segments: General Banking, Wealth Management and Insurance. The General Banking Division is responsible for all traditional banking products and services, including loans and deposits. The General Banking Division also consists of internal operations such as Human Resources, Executive Administration, Treasury (Funds Management), Public Affairs and Corporate Finance. The Wealth Management Division provides customized solutions for customers by integrating financial services with traditional banking products and services such as money management, full-service brokerage, financial planning, personal and institutional trust and retirement services. Through Fisher Brown Bottrell Insurance, Inc. (FBBI), a wholly owned subsidiary of TNB, Trustmark's Insurance Division provides a full range of retail insurance products including commercial risk management products, bonding, group benefits and personal lines coverage.

The accounting policies of each reportable segment are the same as those of Trustmark except for its internal allocations. Noninterest expenses for back-office operations support are allocated to segments based on estimated uses of those services. Trustmark measures the net interest income of its business segments with a process that assigns cost of funds or earnings credit on a matched-term basis. This process, called "funds transfer pricing", charges an appropriate cost of funds to assets held by a business unit, or credits the business unit for potential earnings for carrying liabilities. The net of these charges and credits flows through to the General Banking Division, which contains the management team responsible for determining TNB's funding and interest rate risk strategies.

Trustmark (parent company only) paid income taxes of approximately \$7.4 million in 2017, \$24.8 million in 2016 and \$16.3 million in 2015. During 2017, interest paid was \$283 thousand compared to \$600 thousand of interest paid in 2016 and \$837 thousand of interest paid during 2015.

ITEM CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND
9. FINANCIAL DISCLOSURE

On December 16, 2015, the Audit and Finance Committee of the Board of Directors of Trustmark completed a competitive process to review the appointment of Trustmark's independent registered public accounting firm for the 2016 fiscal year. As a result of this process and following careful deliberation, on December 16, 2015, the Audit and Finance Committee notified KPMG LLP ("KPMG") that it had determined to dismiss KPMG as Trustmark's independent registered public accounting firm, effective as of the date of the filing of the Annual Report on Form 10-K for the fiscal year ending December 31, 2015. On December 21, 2015, based upon the recommendation of the Audit and Finance Committee, Trustmark retained Crowe Horwath LLP ("Crowe") as Trustmark's independent registered public accounting firm for the fiscal years ending December 31, 2017 and 2016.

KPMG's audit report on Trustmark's consolidated financial statements for the fiscal year ended December 31, 2015 did not contain an adverse opinion or a disclaimer of opinion, or a qualification or modification as to uncertainty, audit scope or accounting principles. KPMG's audit report on the effectiveness of internal control over financial reporting as of December 31, 2015 did not contain an adverse opinion or disclaimer of opinion, or a qualification or modification as to uncertainty, audit scope or accounting principles. During Trustmark's fiscal year ended December 31, 2015, (i) there were no disagreements with KPMG on any matter of accounting principles or practices, financial statement disclosure or auditing scope or procedure that, if not resolved to KPMG's satisfaction, would have caused KPMG to make reference to the subject matter in connection with their report on Trustmark's consolidated financial statements for such year and (ii) there were no reportable events, within the meaning set forth in Item 304(a)(1)(v) of Regulation S-K.

During Trustmark's fiscal year ended December 31, 2015, neither Trustmark, nor any party on behalf of Trustmark, consulted with Crowe with respect to (i) the application of accounting principles to a specified transaction, either completed or proposed, or the type of the audit opinion that might be rendered on Trustmark's consolidated financial statements, and no written report or oral advice was provided to Trustmark that Crowe concluded was an important factor considered by Trustmark in reaching a decision as to any accounting, auditing or financial reporting issue, or (ii) any matter that was subject to any disagreement, as defined in Item 304(a)(1)(iv) of Regulation S-K, or a reportable event within the meaning set forth in Item 304(a)(1)(v) of Regulation S-K.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this Annual Report on Form 10-K, an evaluation was carried out by Trustmark's management, with the participation of its Chief Executive Officer and Treasurer and Principal Financial Officer (Principal Financial Officer), of the effectiveness of Trustmark's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, the Chief Executive Officer and Principal Financial Officer concluded that the disclosure controls and procedures were effective as of the end of the period covered by this report. No changes were made to Trustmark's internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during the last fiscal quarter that materially affected, or are reasonably likely to materially affect, Trustmark's internal control over financial reporting.

Management Report on Internal Control over Financial Reporting

The management of Trustmark is responsible for establishing and maintaining adequate internal control over financial reporting. Trustmark's internal control over financial reporting was designed under the supervision of the Chief Executive Officer and Treasurer (Principal Financial Officer) to provide reasonable assurance regarding the reliability of financial reporting and the preparation of published financial statements in accordance with GAAP.

Management assessed the effectiveness of internal control over financial reporting as of December 31, 2017. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway

Commission (COSO) in Internal Control – Integrated Framework (2013). Based on our assessment, we believe that, as of December 31, 2017, Trustmark’s internal control over financial reporting was effective based on those criteria.

The effectiveness of Trustmark’s internal control over financial reporting as of December 31, 2017 was audited by Crowe Horwath LLP, an independent registered public accounting firm, as stated in their report appearing in the section captioned “Report of Independent Register Public Accounting Form” included in Part II. Item 8. – Financial Statements and Supplementary Data of this report.

ITEM 9B. OTHER INFORMATION

None

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Certain information regarding executive officers is included under the section captioned “Executive Officers of the Registrant” in Part I. Item 1. - Business, elsewhere in this Annual Report on Form 10-K. Other information required by this Item is incorporated herein by reference to Trustmark Corporation’s (Trustmark’s) Proxy Statement (Schedule 14A) for its 2018 Annual Meeting of Shareholders to be filed with the SEC within 120 days of Trustmark’s fiscal year-end.

ITEM 11. EXECUTIVE
COMPENSATION

The information required by this Item is incorporated herein by reference to Trustmark’s Proxy Statement (Schedule 14A) for its 2018 Annual Meeting of Shareholders to be filed with the SEC within 120 days of Trustmark’s fiscal year-end.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND
RELATED STOCKHOLDER MATTERS
Equity Compensation Plans

The table below contains summary information as of December 31, 2017 with respect to the Amended and Restated Stock and Incentive Compensation Plan, which is Trustmark’s only equity compensation plan under which shares of Trustmark common stock are authorized for issuance.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a) (1)	Weighted-average exercise price of outstanding options, warrants and rights (2)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (3)
Equity compensation plans approved by security holders	213,516	\$ —	1,110,739
Equity compensation plans not approved by security holders	—	—	—
Total	213,516	\$ —	1,110,739

(1) This number represents the maximum potential shares issuable in connection with the vesting in excess of 100% of unvested performance-based restricted stock and restricted stock unit awards previously granted.

(2) Potential achievement shares, to the extent issued, do not have an exercise price and, therefore, are excluded for purposes of computing the weighted-average exercise price.

(3) This number represents shares available for future awards under the Amended and Restated Stock and Incentive Compensation Plan as of December 31, 2017, in connection with stock options, stock appreciation rights, restricted

stock, restricted stock units and performance units.

All other information required by this Item is incorporated herein by reference to Trustmark's Proxy Statement (Schedule 14A) for its 2018 Annual Meeting of Shareholders to be filed with the SEC within 120 days of Trustmark's fiscal year-end.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this Item is incorporated herein by reference to Trustmark's Proxy Statement (Schedule 14A) for its 2018 Annual Meeting of Shareholders to be filed with the SEC within 120 days of Trustmark's fiscal year-end.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required by this Item is incorporated herein by reference to Trustmark's Proxy Statement (Schedule 14A) for its 2018 Annual Meeting of Shareholders to be filed with the SEC within 120 days of Trustmark's fiscal year-end.

PART IV

ITEM. 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

A-1. Financial Statements

The reports of Crowe Horwath LLP and KPMG LLP, independent registered public accounting firms, and the following consolidated financial statements of Trustmark Corporation (Trustmark) and subsidiaries are included in the Registrant's 2017 Annual Report to Shareholders and are incorporated into Part II. Item 8. – Financial Statements and Supplementary Data herein by reference:

Consolidated Balance Sheets as of December 31, 2017 and 2016

Consolidated Statements of Income for the Years Ended December 31, 2017, 2016 and 2015

Consolidated Statements of Comprehensive Income for the Years Ended December 31, 2017, 2016 and 2015

Consolidated Statements of Changes in Shareholders' Equity for the Years Ended December 31, 2017, 2016 and 2015

Consolidated Statements of Cash Flows for the Years Ended December 31, 2017, 2016 and 2015

Notes to Consolidated Financial Statements (Notes 1 through 21)

A-2. Financial Statement Schedules

The schedules to the consolidated financial statements set forth by Article 9 of Regulation S-X are not required under the related instructions or are inapplicable and therefore have been omitted.

A-3. Exhibits

The exhibits to this Annual Report on Form 10-K listed below have been included only with the copy of this report filed with the Securities and Exchange Commission. Copies of individual exhibits will be furnished to shareholders upon written request to Trustmark and payment of a reasonable fee.

ITEM. 16. SUMMARY

None.
