Form 10-K

February 23, 2017

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

Form 10-K

x ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 30, 2016

or

.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number 001-10212

Anixter International Inc.

(Exact name of Registrant as Specified in Its Charter)

Delaware

94-1658138

(State or other jurisdiction of Incorporation or Organization) (I.R.S. Employer Identification No.)

2301 Patriot Blvd.

Glenview, IL 60026

(224) 521-8000

(Address and telephone number of principal executive offices in its charter)

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class on Which Registered	Name of Each Exchange on Which Registered
---	---

Common stock, \$1 par value	New York Stock Exchange
-----------------------------	-------------------------

Securities registered pursuant to Section 12(g) of the Act:

None.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer ☒

Accelerated Filer ☐

Non-Accelerated Filer ☐ (Do not check if a smaller reporting company) Smaller Reporting Company ☐

Edgar Filing: ANIXTER INTERNATIONAL INC - Form 10-K

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes ☐ No ☒

The aggregate market value of the shares of registrant's Common Stock, \$1 par value, held by nonaffiliates of the registrant was approximately \$1,546,247,517 as of July 1, 2016.

At February 15, 2017, 33,115,697 shares of registrant's Common Stock, \$1 par value, were outstanding.

Documents Incorporated by Reference:

Certain portions of the registrant's Proxy Statement for the 2017 Annual Meeting of Stockholders of Anixter International Inc. are incorporated by reference into Part III.

ITEM 1. BUSINESS.

Company Overview

Anixter International Inc. and its subsidiaries (collectively referred to as "Anixter" or the "Company") and sometimes referred to in this Annual Report on Form 10-K as "we", "our", "us", or "ourselves", founded in 1957, is headquartered near Chicago, Illinois and trades on the New York Stock Exchange under the symbol AXE. The Company was formerly known as Itel Corporation which was incorporated under Delaware law in 1967. Through Anixter Inc. and its subsidiaries, we are a leading distributor of network and security solutions, electrical and electronic solutions, and utility power solutions.

Through our global presence, technical expertise and supply chain solutions, we help our customers reduce the risk, cost and complexity of their supply chains. We add value to the distribution process by providing over 150,000 customers access to innovative inventory management programs, nearly 600,000 products and over \$1.0 billion in inventory, 320 warehouses/branch locations with approximately 9 million square feet of space, and locations in over 300 cities across approximately 50 countries. We are a leader in the provision of advanced inventory management services including procurement, just-in-time delivery, quality assurance testing, advisory engineering services, component kit production, small component assembly and e-commerce and electronic data interchange to a broad spectrum of customers.

Our customers are international, national, regional and local companies, covering a broad and diverse set of industry groups including manufacturing, resource extraction, telecommunications, internet service providers, finance, education, healthcare, retail, transportation, utilities (both public power and investor owned), defense and government; and include contractors, installers, system integrators, value-added resellers, architects, engineers and wholesale distributors. Our customer base is well-diversified with no single customer accounting for more than 2% of sales. Our differentiated operating model is premised on our belief that our customers and suppliers value a partner with consistent global product offerings, technical expertise (including product and application knowledge and support) and customized supply chain solutions, all supported by a common operating system and business practices that ensure the same "look, touch and feel" worldwide.

Our growth strategy is driven by constant refresh and expansion of our product and solution offerings to meet marketplace needs. This organic growth approach extends to a constantly evolving set of supply chain services that are designed to lower the customer's total cost of procuring, owning and deploying the products we sell. We have identified security solutions, emerging markets, utilities, industrial communications and control and in-building wireless as growth opportunities we are pursuing. Organic growth will periodically be supplemented with acquisitions where the benefits associated with geographic expansion, market penetration or new product line additions are weighted in favor of "buying versus building."

In the third quarter of 2014, we acquired all of the outstanding shares of Tri-Northern Acquisition Holdings, Inc. ("Tri-Ed"), a leading independent distributor of security and low-voltage technology products headquartered in Woodbury, NY. The acquisition of Tri-Ed offers a strategic opportunity for us and our security business, consistent with our vision to create a leading global security platform. Through expanding our offering into highly complementary products lines, our customers benefit from a broader set of products and solutions in the areas of video, access control, fire/life safety, and intrusion detection. In addition, this transaction provides access to the residential construction end-market and a community of security integrators and dealers we did not historically service. For further information regarding Tri-Ed, refer to Note 3. "Business Combinations" in the notes to the Consolidated Financial Statements.

During the second quarter of 2015, we completed the sale of the OEM Supply - Fasteners ("Fasteners") business to American Industrial Partners ("AIP"), excluding certain foreign locations which were subsequently sold. This transaction sharpened our focus on our then core Enterprise Cabling and Security Solutions ("ECS") and Electrical and Electronic Wire and Cable ("W&C") segments and provided additional financial flexibility to build on these strong global platforms. For further information regarding the sale of our Fasteners business, refer to Note 2.

"Discontinued Operations" in the notes to the Consolidated Financial Statements.

In the fourth quarter of 2015, we completed the acquisition of the Power Solutions business ("Power Solutions") from HD Supply, Inc. Power Solutions represents the largest acquisition in Anixter's history and transforms Anixter into a leading North American distributor to the utility sector, enhances our competitive position in the electrical wire and cable markets and further strengthens our overall customer and supplier value proposition. For further information regarding Power Solutions, refer to Note 3. "Business Combinations" in the notes to the Consolidated Financial Statements.

Business Segments and Products

Beginning in the fourth quarter of 2012 and through the first quarter of 2015, the Company's operating and reportable segments were ECS, W&C, and Fasteners. Following the sale of the Fasteners business in the second quarter of 2015, our remaining operating segments were ECS and W&C. In the fourth quarter of 2015, in connection with the acquisition of Power Solutions, we renamed our legacy ECS segment to Network & Security Solutions ("NSS"). The low voltage business of Power Solutions was combined into our legacy W&C segment to form the Electrical & Electronic Solutions ("EES") segment. The high voltage business of Power Solutions formed our Utility Power Solutions ("UPS") segment. The following is a brief description of each of our reportable segments and business activities.

Within our segments, we are also organized by geographies. Our geographies consist of North America, which includes the U.S. and Canada, EMEA, which includes Europe, the Middle East and Africa, and Emerging Markets, which includes Asia Pacific and Central and Latin America ("CALA").

Network & Security Solutions ("NSS")

The Network & Security Solutions segment, with operations in approximately 46 countries, supplies products and customized Supply Chain Solutions to customers in a diverse range of industries including technology, finance, telecommunications service providers, transportation, education, government, healthcare and retail. NSS provides solutions to end-users and sells the products through various channels including data communications contractors, security, network and systems integrators, and directly to end users. NSS has a broad product portfolio that includes copper and fiber optic cable and connectivity, access control, video surveillance, intrusion and fire/life safety, cabinets, power, cable management, wireless, professional audio/video, voice and networking switches and other ancillary products. The NSS segment includes more than 2,100 technically trained salespeople, approximately 40 Supply Chain Solutions specialists and a global technical support organization that provides support across all three reportable segments to aid in design, product specification and complete bills of materials inclusive of all Anixter solutions.

Through a variety of value-added supply chain solutions, including inventory management, product packaging and enhancement, financial and other customized supply chain services, NSS helps customers reduce the risk, complexity and cost associated with their IT infrastructure and physical security deployments. The NSS commitment to quality products and services and technical leadership is demonstrated by its participation in many global standards organizations. NSS technical expertise extends to performance and interoperability testing at our Infrastructure Solutions LabSM, which provides NSS the opportunity to demonstrate solutions and proof-of-concepts to customers. Anixter's Infrastructure as a Platform and ipAssuredSM programs help customers make intelligent buying decisions around network and security infrastructure and improve efficiency to meet their sustainability goals.

Electrical & Electronic Solutions ("EES")

The Electrical & Electronic Solutions segment, with operations in over 30 countries, supplies a broad range of wire and cable, control, power/gear, lighting and electrical bulk products and customized supply chain solutions to the Commercial and Industrial ("C&I") and Original Equipment Manufacturer ("OEM") markets. The C&I group supplies products for the transmission of power and signals in industrial applications to customers in key markets including oil, gas and petrochemical, alternative energy, utility, power generation and distribution, transportation, commercial, industrial, natural resource and water and wastewater treatment. It sells through channels including electrical contractors, security and automation integrators, and engineering, procurement and construction firms. The OEM group supplies products used in the manufacturing of automotive, industrial, medical, transportation, marine, military and communications equipment, selling to OEM and panel, cable and harness shops. The product portfolio in this global business includes electrical and electronic wire and cable, shipboard cable, support and supply products, low-voltage cable, instrumentation cable, industrial communication and control products, security cable, connectors, industrial Ethernet switches, and voice and data cable. Value-added services, including supply chain management services and engineering support are tailored to position us as a specialist in fast growing emerging markets, OEMs and industrial verticals. EES helps customers achieve their sustainability goals by using its value-added services to minimize scrap, reduce lead times and improve operational efficiency.

The EES team of more than 1,100 technical experts includes its sales personnel, supply chain specialists, industrial communication specialists and engineers. EES provides world-class technical assistance, products and support through code and standards interpretation, product selection assistance, on-site customer training and customer specification reviews. EES brings value to its customers through its global reach, ability to provide global infrastructure project coordination, technical and engineering support, financial strength, and sourcing and supplier relationships. These capabilities help customers reduce costs and risks and gain competitive advantage in their marketplace.

Utility Power Solutions ("UPS")

The Utility Power Solutions segment, with primary operations in the U.S. and Canada, supplies electrical transmission and distribution products, power plant maintenance, repair and operations supplies and smart-grid products, and arranges materials management and procurement outsourcing for the power generation and electricity distribution industries. The UPS segment serves the utilities (both public power and investor owned) and electrical markets. It serves electric power plant customers primarily through a bid-based model and, to a lesser extent, sells maintenance, repair and operations products through an e-commerce platform. Products include conductors such as wire and cable, transformers, overhead transmission and distribution hardware, switches, protective devices and underground distribution, connectors used in the construction or maintenance and repair of electricity transmission and substation distribution infrastructure, and supplies, lighting and conduit used in non-residential and residential construction. UPS also provides materials management and procurement outsourcing services. Its capabilities allow us to integrate with our customers and perform part of our customers' sourcing and procurement function. The UPS segment includes more than 300 technically trained salespeople and nearly 60 Supply Chain Solutions specialists.

For more information concerning our business segments, foreign and domestic operations and export sales, see Note 8. "Income Taxes" and Note 11. "Business Segments" in the Notes to the Consolidated Financial Statements.

Suppliers

We source products from thousands of suppliers, with approximately one-quarter of our annual dollar volume purchases sourced from our five largest suppliers. An important element of our overall business strategy is to develop and maintain close relationships with our key suppliers, which include the world's leading manufacturers of communication cabling, connectivity, support and supply products, electrical wire and cable, and utility products. Such relationships emphasize joint product planning, inventory management, technical support, advertising and marketing. In support of this strategy, we generally do not compete with our suppliers in product design or manufacturing activities. We do sell a small amount of private label products that carry a brand name exclusive to us. Our typical distribution agreement generally includes the following significant terms:

- a non-exclusive right to resell products to any customer in a geographical area (typically defined as a country, with the exception of our UPS business which is typically defined as a county);
- cancelable upon 60 to 90 days notice by either party for any reason;
- no minimum purchase requirements, although pricing may change with volume on a prospective basis; and
- the right to pass through the manufacturer's warranty to our customers.

Distribution and Service Platform

We cost-effectively serve our customers' needs through our proprietary computer systems, which connect the majority of our warehouses and sales offices throughout the world. The systems are designed for sales support, order entry, inventory status, order tracking, credit review and material management. Customers may also conduct business through our e-commerce platform, which we believe is one of the most comprehensive and user-friendly websites in the industry.

We operate a series of large, modern, regional distribution centers in key geographic locations in North America, EMEA and Emerging Markets that provide for cost-effective, reliable storage and delivery of products to our customers. We have designated 17 warehouses as regional distribution centers. Collectively, these facilities store approximately 30% of our inventory. In certain cities, some smaller warehouses are also maintained to maximize transportation efficiency and to provide for the local needs of customers. Our network of regional distribution centers, local distribution centers, service centers, branch locations and sales offices consists of 264 locations in the United States, 33 in Canada, 25 in the United Kingdom, 25 in Continental Europe and the Middle East, 34 in Latin America, 11 in Asia and 6 in Australia/New Zealand.

We have developed close relationships with certain freight, package delivery and courier services to minimize transit times between our facilities and customer locations, as well as a dedicated delivery fleet of over 500 vehicles with the Power Solutions acquisition. The combination of our information systems, distribution network and delivery partnerships allows us to provide a high level of customer service while maintaining a reasonable level of investment in inventory and facilities.

Employees

At December 30, 2016, we employed over 8,900 people. Approximately 50% of the employees are engaged in sales or sales-related activities, 30% are engaged in warehousing and distribution operations and 20% are engaged in support activities, including inventory management, information services, finance, human resources and general management. We do not have any significant concentrations of employees subject to collective bargaining agreements within any of our segments.

Competition

Given our role as an aggregator of many different types of products from many different sources and because these products are sold to many different industry groups, there is no well-defined industry group against which we compete. We view the competitive environment as highly fragmented with hundreds of distributors and manufacturers that sell products directly or through multiple distribution channels to end users or other resellers. There is significant competition within each end market and geography served that creates pricing pressure and the need for constant attention to improve services. Competition is based primarily on breadth of products, quality, services, relationships, price and geographic proximity. We believe that we have a significant competitive advantage due to our comprehensive product and service offerings, global distribution network, technically-trained sales team and customized supply chain solutions. We believe our global distribution platform provides a competitive advantage to serving multinational customers' needs. Our operations and logistics platform gives us the ability to ship orders from inventory for delivery within 24 to 48 hours to all major global markets. In addition, we have common systems and processes throughout the majority of our operations in approximately 50 countries that provide our customers and suppliers with global consistency.

We enhance our value proposition to both key suppliers and customers through our technical expertise, global standards participation testing and demonstration facilities and numerous quality assurance certification programs such as ISO 9001:2008 and ISO/TS 16949:2009. Our NSS and EES segments leverage our certified Infrastructure Solutions Lab located at our suburban Chicago headquarters to support customers with technology needs related to enterprise networks, data centers, physical security, building technologies and industrial communications and control. At this lab, we evaluate performance and interoperability to help customers reduce risk through informed purchasing decisions. Our Solutions Briefing Centers, premier technology education and demonstration facilities located in various regions around the globe, focus on enabling our customers with the necessary information to make informed decisions around complex, end-to-end technology solutions.

Because privately held companies account for a significant share of our markets, reliable competitive information is not available.

Contract Sales and Backlog

We have a number of customers who purchase products under long-term contractual arrangements. In such circumstances, the relationship with the customer typically involves a high degree of material requirements planning and information systems interfaces and, in some cases, may require the maintenance of a dedicated distribution facility or dedicated personnel and inventory at, or in close proximity to, the customer site to meet the needs of the customer. Such contracts do not generally require the customer to purchase any minimum amount of goods from us, but would require that materials acquired by us, as a result of joint material requirements planning between us and the customer, be purchased by the customer. Backlog orders, excluding large contractual orders, represent approximately four weeks of sales and ship to customers within 30 to 60 days from order date.

Seasonality

The operating results are not significantly affected by seasonal fluctuations except for the impact resulting from variations in the number of billing days from quarter to quarter. Consecutive quarter sales from the third to fourth quarters are generally lower due to the holidays and lower number of billing days as compared to other consecutive quarter comparisons. There were 254 billing days in 2016 and 253 billing days in both 2015 and 2014.

Available Information

We maintain an Internet website at <http://www.anixter.com> which includes an Investor Relations section that links to our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and all amendments to these reports. These forms are available without charge as soon as reasonably practical following the time they are filed with or furnished to the Securities and Exchange Commission ("SEC"). Shareholders and other interested parties may request email notifications of the posting of these documents through the Investor Relations section of our website. In addition, copies of our reports will be made available, free of charge, upon written request. Our website also contains corporate governance information including corporate governance guidelines; audit, compensation and nominating and governance committee charters; nomination process for directors; and our business ethics and conduct policy.

ITEM 1A. RISK FACTORS.

The following factors could materially adversely affect our operating results and financial condition. Although we have tried to discuss key factors, please be aware that other risks may prove to be important in the future. New risks may emerge at any time, and we cannot predict those risks or estimate the extent to which they may affect our financial performance.

A change in sales strategy or financial viability of our suppliers could adversely affect our sales or earnings.

Most of our agreements with suppliers are terminable by either party on short notice for any reason. We currently source products from thousands of suppliers. However, approximately one-quarter of our annual dollar volume purchases are sourced from our five largest suppliers. If any of these suppliers changes its sales strategy to reduce its reliance on distribution channels, or decides to terminate its business relationship with us, our sales and earnings could be adversely affected until we are able to establish relationships with suppliers of comparable products. Although we believe our relationships with these key suppliers are good, they could change their strategies as a result of a change in control, expansion of their direct sales force, changes in the marketplace or other factors beyond our control, including a key supplier becoming financially distressed.

We have risks associated with the sale of nonconforming products and services.

Historically, we have experienced a small number of cases in which our vendors supplied us with products that did not conform to the agreed upon specifications without our knowledge. Additionally, we may inadvertently sell a product not suitable for a customer's application. We address this risk through our quality control processes, by seeking to limit liability and our warranty in our customer contracts, by obtaining indemnification rights from vendors and by maintaining insurance responsive to these risks. However, there can be no assurance that we will be able to include protective provisions in all of our contracts, that vendors will have the financial capability to fulfill their indemnification obligations to us, or that insurance can be obtained with sufficiently broad coverage or in amounts sufficient to fully protect us.

Our foreign operations are subject to political, economic and currency risks.

We derive over 25% of our revenues from sales outside of the U.S.. Economic and political conditions in some of these foreign markets may adversely affect our results of operations, cash flows and financial condition in these foreign markets. Our results of operations and the value of our foreign assets are affected by fluctuations in foreign currency exchange rates (as further discussed in "Item 7A. Quantitative and Qualitative Disclosures About Market Risk") and different legal, tax, accounting and regulatory requirements. In addition, some of the products that we distribute are produced in foreign countries, which involve longer and more complex supply chains that are vulnerable to numerous risks that could cause significant interruptions or delays in delivery of such products. Many of these factors are beyond our control and include risks, such as as political instability, financial instability of suppliers, suppliers' noncompliance with applicable laws, trade restrictions, labor disputes, currency fluctuations, changes in tariff or import policies, severe weather, terrorist attacks and transport capacity and cost. A significant interruption in our supply chains caused by any of the above factors could result in increased costs or delivery delays and result in a decrease in our net sales and profitability.

We have risks associated with inventory.

We must identify the right product mix and maintain sufficient inventory on hand to meet customer orders. Failure to do so could adversely affect our sales and earnings. However, if circumstances change (for example, an unexpected shift in market demand, pricing or customer defaults) there could be a material impact on the net realizable value of our inventory. To guard against inventory obsolescence, we have negotiated various return rights and price protection agreements with certain key suppliers. We also maintain an inventory valuation reserve account against declines in the value or salability of our inventory. However, there is no guaranty that these arrangements will be sufficient to avoid write-offs in excess of our reserves in all circumstances.

Our operating results are affected by copper prices.

Our operating results have been affected by changes in prices of copper, which is a major component in a portion of the electrical wire and cable products we sell. As our purchase costs with suppliers change to reflect the changing copper prices, our percent mark-up to customers remains relatively constant, resulting in higher or lower sales revenue and gross profit depending upon whether copper prices are increasing or decreasing.

The degree to which price changes in the copper commodity spot market correlate to product price changes, is a factor of market demand for products. When demand is strong, there is a high degree of correlation but when demand is weak, there can be significant time lags between spot price changes and market price changes.

We have risks associated with the integration of acquired businesses.

In connection with recent and future acquisitions, it is necessary for us to continue to create an integrated business from the various acquired entities. This requires the establishment of a common management team to guide the acquired businesses, the conversion of numerous information systems to a common operating system, the establishment of a brand identity for the acquired businesses, the streamlining of the operating structure to optimize efficiency and customer service and a reassessment of the inventory and supplier base to ensure the availability of products at competitive prices. No assurance can be given that these various actions can be completed without disruption to the business, in a short period of time or that anticipated improvements in operating performance can be achieved. Any inability on our part to successfully implement strategic transactions could have an adverse impact on our reputation, business, financial condition, operating results and cash flows. There can be no assurance that any businesses acquired will perform in accordance with expectations or that business judgments concerning the value, strengths and weaknesses of businesses acquired will prove to be correct. In addition, any acquisition that we make may not provide us with the synergies and other benefits that were anticipated when entering into such acquisition. Our debt agreements could impose restrictions on our business.

Our debt agreements contain certain financial and operating covenants that limit our discretion with respect to certain business matters. These covenants restrict our ability to, among other things:

- incur additional indebtedness;
- create liens on assets;
- make certain investments;
- transfer, lease or dispose of assets; and
- engage in certain mergers, acquisitions, consolidations or other fundamental changes.

These covenants also limit the amount of dividends or share repurchases we may make. As a result of these restrictions, we are limited in how we may conduct business and may be unable to compete effectively or take advantage of new business opportunities. Our ability to comply with the covenants and restrictions contained in our debt agreements may be affected by economic, financial and industry conditions or regulatory changes beyond our control. The breach of any of these covenants or restrictions could result in a default under either the Inventory Facility, the Canadian Term Loan, the Receivables Facility or the indentures governing our outstanding notes that would permit the applicable lenders or noteholders, as the case may be, to declare all outstanding amounts to be due and payable, together with accrued and unpaid interest. If we are unable to repay indebtedness, lenders having secured obligations, such as the lenders under the Inventory Facility, the Canadian Term Loan, or the Receivables Facility, could proceed against the collateral securing these obligations. This could have a significant negative impact on our financial condition and operating results.

We have substantial debt which could adversely affect our profitability, limit our ability to obtain financing in the future and pursue certain business opportunities.

As of December 30, 2016, we had an aggregate principal amount of \$1.4 billion of outstanding debt. As a result, a substantial portion of our cash flow from operations must be dedicated to the payment of principal and interest on our indebtedness, thereby reducing the funds available to us for other purposes. This may also limit our ability to obtain additional financing for working capital, capital expenditures, acquisitions, debt service requirements, and general corporate purposes in the future. Our indebtedness also reduces our flexibility to adjust to changing market conditions or may prevent us from making capital investments that are necessary or important to our operations and strategic growth.

If our cash flow and capital resources are not sufficient to fund our debt service obligations, we could face substantial liquidity problems and may be required to reduce or delay capital expenditures, sell assets, seek to obtain additional equity capital or refinance our debt. We cannot make assurances that we will be able to refinance our debt on terms acceptable to us, or at all. Our debt agreements and the indentures governing our outstanding notes restrict our ability to dispose of assets and how we use the proceeds from any such dispositions. We cannot make assurances that we will be able to consummate those dispositions, or if we do, what the timing of the dispositions will be or whether the proceeds that we realize will be adequate to meet our debt service obligations when due.

We have risks associated with accounts receivable.

A significant portion our working capital consists of accounts receivable. Although no single customer accounts for more than 2% of our sales, a payment default by one of our larger customers could have a short-term impact on earnings or liquidity. A financial or industry downturn could have an adverse effect on the collectability of our accounts receivable, which could result in longer payment cycles, increased collection costs and defaults. Given the current economic environment, constrained access to capital and general market uncertainties, our exposure to customer defaults may be heightened.

A decline in project volume could adversely affect our sales and earnings.

While most of our sales and earnings are generated by comparatively smaller and more frequent orders, the fulfillment of large orders for capital projects generates significant sales and earnings. Slow macro-economic growth rates, difficult credit market conditions for our customers, weak demand for our customers' products or other customer spending constraints can result in project delays or cancellations, potentially having a material adverse effect on our financial results.

The level of returns on pension plan assets and the actuarial assumptions used for valuation purposes could affect our earnings and cash flows in future periods. Changes in government regulations could also affect our pension plan expenses and funding requirements.

The funding obligations for our pension plans are impacted by the performance of the financial markets, particularly the equity markets, and interest rates. Funding obligations are determined under government regulations and are measured each year based on the value of assets and liabilities on a specific date. If the financial markets do not provide the long-term returns that are expected under the governmental funding calculations, we could be required to make larger contributions. The equity markets can be, and recently have been, very volatile, and therefore our estimate of future contribution requirements can change dramatically in relatively short periods of time. Similarly, changes in interest rates and legislation enacted by governmental authorities can impact the timing and amounts of contribution requirements. An adverse change in the funded status of the plans could significantly increase our required contributions in the future and adversely impact our liquidity. At December 30, 2016, our projected benefit obligations exceeded the fair value of plan assets by \$69.1 million.

Assumptions used in determining projected benefit obligations and the fair value of plan assets for our pension plans are determined by us in consultation with outside actuaries. In the event that we determine that changes are warranted in the assumptions used, such as the discount rate, expected long-term rate of return on assets, or mortality rates, our future pension benefit expenses could increase or decrease. Due to changing market conditions, the assumptions that we use may differ from actual results, which could have a significant impact on our pension liabilities and related costs and funding requirements.

We may experience a failure in or breach of our operational or information security systems, or those of our third-party service providers, as a result of cyber attacks or information security breaches.

Information security risks have generally increased in recent years because of the proliferation of new technologies and the increased sophistication and activities of perpetrators of cyber-attacks. A failure in or breach of our operational or information security systems, or those of our third-party service providers, as a result of cyber attacks or information security breaches could disrupt our business, result in the disclosure or misuse of confidential or proprietary information, damage our reputation, increase our costs and/or cause losses. As a result, cyber security and the continued development and enhancement of the controls and processes designed to protect our systems, computers, software, data and networks from attack, damage or unauthorized access remain a priority for us. Although we believe that we have robust information security procedures and other safeguards in place, as cyber threats continue to evolve, we may be required to expend additional resources to continue to enhance our information security measures and/or investigate and remediate any information security vulnerabilities.

We may be adversely affected by the U.K. determination to leave the European Union (Brexit).

On June 23, 2016, voters in the United Kingdom approved an advisory referendum to withdraw from the European Union ("Brexit"). Such withdrawal will occur after a process of negotiation regarding the future terms of the United Kingdom's relationship with the European Union with respect to reciprocal market access and other matters. These negotiations on withdrawal and post-exit arrangements have been and will likely continue to be complex and

protracted.

7

We have significant operations in the United Kingdom and other member countries of the European Union. The proposed withdrawal by the United Kingdom could have an adverse effect on the tax, tax treaty, currency, operational, legal and regulatory regimes to which our businesses in the region are subject. The withdrawal could also, among other potential outcomes, disrupt the free movement of goods, services and people between the United Kingdom and the European Union and significantly disrupt trade between the United Kingdom and the European Union and other parties. The uncertainty concerning the timing and terms of the exit could also have a negative impact on the business activity, political stability and economic conditions in the United Kingdom, the European Union and the other economies in which we operate, which could result in customers reducing or delaying spending decisions on our products. Our UK business has deferred tax assets totaling \$6.6 million. A downturn in our UK business caused by a material adverse effect could require us to record a valuation allowance against those deferred tax assets. Any of these developments could have a material adverse effect on our business, financial position, liquidity and results of operations.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

None.

ITEM 2. PROPERTIES.

Our distribution network consists of 320 warehouses/branch locations in approximately 50 countries with approximately 9 million square feet of space. This includes 17 regional distribution centers (100,000 — 500,000 square feet), 45 local distribution centers (35,000 — 100,000 square feet), 189 service centers and 69 branch locations. Additionally, we have 78 sales offices throughout the world. All but seven of these facilities are leased. No one facility is material to our overall operations, and we believe there is ample supply of alternative warehousing space available on similar terms and conditions in each of our markets.

ITEM 3. LEGAL PROCEEDINGS.

Incorporated by reference to Note 7. "Commitments and Contingencies" in the notes to the Consolidated Financial Statements of this Annual Report on Form 10-K.

ITEM 4. MINE SAFETY DISCLOSURES.

Not applicable.

EXECUTIVE OFFICERS OF THE REGISTRANT

The following table lists the name, age as of February 23, 2017, position, offices and certain other information with respect to our executive officers. The term of office of each executive officer will expire upon the appointment of his successor by the Board of Directors.

	Director of the Company since 2008; President and Chief Executive Officer of the Company since July
Robert J. Eck, 58	2008. Mr. Eck has served in a variety of senior management positions since joining the Company in 1990. Mr. Eck has also been a Director of Ryder Systems, Inc. since 2011 and a member of the Board of Trustees for Marquette University since September 2014.
Theodore A. Dosch, 57	Executive Vice President - Finance and Chief Financial Officer of the Company since July 2011; Senior Vice President - Global Finance of the Company from January 2009 to June 2011; CFO - North America and Vice President - Maytag Integration at Whirlpool Corporation from 2006 to 2008; Corporate Controller at Whirlpool Corporation from 2004 to 2006; CFO - North America at Whirlpool Corporation from 1999 to 2004.
Justin C. Choi, 51	Executive Vice President - General Counsel & Corporate Secretary of the Company since May 2013; Vice President - General Counsel & Corporate Secretary of the Company from June 2012 to May 2013; Executive Vice President, General Counsel and Secretary - Trustwave Holdings from January 2011 to June 2012; Senior Vice President, General Counsel & Secretary - Andrew Corporation from March 2006 to December 2007; Vice President of Law - Avaya Inc. from September 2000 to February 2006.
Ian Clarke, 54	Executive Vice President - Utility Power Solutions of the Company since June 2016; Senior Vice President - North America Sales - Utility Power Solutions from May 2016 to June 2016; Executive Vice President - OEM Supply - Fasteners of the Company from December 2012 to May 2015; Executive Vice President - Global Sales and Marketing from July 2012 to December 2012; Senior Vice President - OEM Supply - Fasteners - Americas from November 2010 to June 2012; Senior Vice President - Global Marketing from March 2010 to October 2010. Mr. Clarke was CEO of Optimas OE Solutions, LLC from May 2015 to March 2016.
William Galvin, 54	Executive Vice President - Network & Security Solutions of the Company since 2012; Executive Vice President - North America and EMEA Enterprise Cabling and Security Solutions from 2007 to 2012. Mr. Galvin has held several sales and marketing management roles over his 26 years of experience with the Company.
Robert M. Graham, 49	Executive Vice President - Electrical & Electronic Solutions of the Company since July 2015; Senior Vice President - U.S. Electrical and Electronic Wire and Cable from 2011 to 2015. Mr. Graham came to Anixter with the acquisition of the Pentacon business in September 2002, and since then, he has held various senior leadership roles for Anixter's former OEM Fastener business with his most recent position before joining the Wire & Cable division being Senior Vice President for the North American business.
Scott Ramsbottom, 43	Executive Vice President - Chief Information Officer since February 2015; Senior Vice President Global Information Service from February 2014 to February 2015. Mr. Ramsbottom held various roles in the information services group since joining the Company in 1999.
Rodney A. Smith, 59	Executive Vice President - Human Resources of the Company since May 2013; Vice President - Human Resources from August 2006 to May 2013.
William Standish, 62	Executive Vice President - Operations of the Company since 2004. Since joining the Company in 1984, Mr. Standish has held several corporate and reporting unit senior management roles.
Rodney A. Shoemaker, 59	Senior Vice President - Treasurer of the Company since May 2014; Vice President - Treasury since July 1999. Mr. Shoemaker has been with the Company since 1986.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

Anixter International Inc.'s Common Stock is traded on the New York Stock Exchange under the symbol AXE. Stock price information, dividend information and shareholders of record are set forth in Note 13. "Selected Quarterly Financial Data (Unaudited)" in the Notes to the Consolidated Financial Statements. There have been no sales of unregistered securities.

PERFORMANCE GRAPH

The following graph sets forth the annual changes for the five-year period indicated in a theoretical cumulative total shareholder return of an investment of \$100 in our common stock and each comparison index, assuming reinvestment of dividends. This graph reflects the comparison of shareholder return on our common stock with that of a broad market index and a peer group index consistent with the prior year. Our Peer Group Index for 2016 consists of the following companies: Arrow Electronics Inc., Avnet Inc., Belden Inc., Fastenal Company, General Cable Corp., Houston Wire and Cable Company, MSC Industrial Direct Co. Inc., Rexel, Scansource Inc., Tech Data Corp, WESCO International, Inc., and W.W. Grainger Inc. This peer group was selected based on a review of publicly available information about these companies and our determination that they are engaged in distribution businesses similar to ours.

ITEM 6. SELECTED FINANCIAL DATA.

(In millions, except per share amounts)

	Fiscal Year				
	2016	2015	2014	2013	2012
Selected Income Statement Data:					
Net sales	\$7,622.8	\$6,190.5	\$5,507.0	\$5,291.1	\$5,347.6

Discontinued operations	\$(0.02)	\$0.91	\$0.94	\$0.77	\$(0.89)
Net income	\$3.59	\$3.81	\$5.84	\$6.04	\$3.69
Dividend declared per common share	\$—	\$—	\$—	\$5.00	\$4.50
Selected Balance Sheet Data:					
Total assets (a)	\$4,093.6	\$4,142.0	\$3,580.8	\$2,851.3	\$3,078.7
Total short-term debt	\$—	\$—	\$—	\$—	\$0.9
Total long-term debt (a)	\$1,378.8	\$1,642.9	\$1,202.0	\$826.5	\$971.3
Stockholders' equity	\$1,292.2	\$1,179.4	\$1,133.0	\$1,027.4	\$969.9
Book value per diluted share	\$38.51	\$35.26	\$33.99	\$30.95	\$28.70
Weighted-average diluted shares	33.6	33.4	33.3	33.2	33.8
Year-end outstanding shares	33.4	33.3	33.1	32.9	32.5
Other Financial Data:					
Working capital (a)	\$1,424.6	\$1,571.6	\$1,559.3	\$1,373.3	\$1,482.8
Capital expenditures	\$32.6	\$26.7	\$34.2	\$27.3	\$28.9
Depreciation	\$27.9	\$22.2	\$20.0	\$18.6	\$17.3
Amortization of intangible assets (a)	\$37.6	\$24.9	\$10.6	\$6.7	\$4.7

(a) Year-over-year changes from fiscal 2013 to fiscal 2014 and fiscal 2014 to fiscal 2015 are primarily due to the acquisitions of Tri-Ed and Power Solutions, respectively, and related financing costs such as interest on borrowings.

Items Impacting Comparability of Results

Over the last five years, we have completed three acquisitions and the respective sales and operating income have impacted the comparability of the results as reflected below. The acquisitions were accounted for as purchases and the results of operations of the acquired businesses are included in the Consolidated Financial Statements from the dates of acquisition. The following represents the incremental impact of the results for the one year period following the acquisitions:

(In millions)	Years Ended				
	December 30, 2016	January 1, 2016	January 2, 2015	January 3, 2014	December 28, 2012
	(a)	(a)(b)	(b)	(c)	(c)
Net sales	\$1,501.9	\$921.2	\$176.0	\$60.7	\$62.8
Operating income	43.3	29.3	6.4	1.9	5.2

(a) October 2015 acquisition of Power Solutions for \$829.4 million.

(b) September 2014 acquisition of Tri-Ed for \$418.4 million.

(c) June 2012 acquisition of Jorvex, S.A. ("Jorvex") for \$55.3 million.

In 2015, we sold our Fasteners business for \$371.8 million in cash, resulting in a pre-tax gain of \$40.3 million (\$23.3 million, net of tax). As a result of this divestiture, results of this business is reflected as "discontinued operations" and

all prior periods have been revised to reflect this classification.

11

The following reflects various items that impact the comparability of the results for the last five fiscal years:

Items Impacting Comparability of Results from Continuing Operations:

(In millions, except per share amounts)

	Years Ended				
	December 30, 2016	January 1, 2016	January 2, 2015	January 3, 2014	December 28, 2012

ANIXTER INTERNATIONAL INC.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Executive Overview

Due to solid growth strategies, combined with financial discipline, we experienced organic sales growth of 0.2% in 2016. As a result of the acquisition of Tri-Ed in the third quarter of 2014 combined with the 2015 sale of the Fasteners business and the acquisition of Power Solutions in the fourth quarter of 2015, we have transformed Anixter into a leading North American electrical products distribution platform, enhanced our competitive position in the electrical wire and cable business, and further strengthened our overall customer and supplier value proposition.

As we enter 2017, we continue to experience a broad-based momentum in the business. Following several years of challenging industrial end markets, we are optimistic that the underlying economic environment is slowly improving, reflected by recent increases in numerous forward-looking indicators. In addition, we remain focused on the successful integration of our acquired businesses and maximizing the synergistic value, while we continue to improve our working capital efficiency.

Organic sales growth from 2015 to 2016 excludes the impact of the following items and is summarized by segment and geography below:

\$1,542.9 million favorable impact from the acquisition of Power Solutions;

\$81.1 million unfavorable impact from the fluctuation in foreign exchange; and

\$44.2 million unfavorable impact from the lower average price of copper.

Sales Growth Trends

* Revised due to change in composition of our reportable segments in the first quarter of 2016.

Table of Contents

ANIXTER INTERNATIONAL INC.

We achieved organic sales growth of 0.2% for the year ended December 30, 2016, excluding the unfavorable impact from foreign exchange and lower copper prices and the \$1,542.9 million favorable impact from the Power Solutions acquisition.

Our organic growth of 0.2% in 2016 compared to the prior year was driven by strong growth in our NSS segment of 3.9%, reflecting solid trends in sales in our North American and EMEA geographies. Organic NSS security sales increased 4.3% in 2016 compared to 2015. The continued soft industrial economy caused organic sales to decline compared to the prior year in our EES segment, especially in EMEA and Emerging Markets. UPS organic net sales declined 5.2% in 2016 on a pro forma basis. Sales in the UPS segment continue to be adversely impacted by the Canadian oil and gas industry and by utility customers deferring investment based on lower power consumption. Additional highlights of the year included:

Record sales of \$7,622.8 million, up 23.1%, driven by the Power Solutions acquisition;

Approximately \$278.8 million of cash flow from operations due to improved working capital efficiency;

Adjusted earnings per diluted share from continuing operations of \$4.93.

As we enter 2017, we expect the positive momentum we experienced in the fourth quarter of 2016 to continue. We see indications that the underlying economic environment is slowly improving, reflected by recent increases in both commodity prices and global growth forecasts, despite several years of weak industrial end markets. Based on our current sales trend, backlog, and robust pipeline across all three segments, we expect continued solid growth in NSS and a return to full year growth in both our EES and UPS segments. Overall we expect first quarter 2017 organic sales growth in the 1 - 3% range and full year 2017 organic sales growth in the 1 - 4% range.

Acquisitions and Divestiture of Businesses

On October 5, 2015, through our wholly-owned subsidiaries, Anixter Inc. and Anixter Canada Inc., we completed the acquisition of the Power Solutions business from HD Supply, Inc. and certain subsidiaries of HD Supply, Inc. in exchange for \$829.4 million.

On June 1, 2015, we completed the sale of the Fasteners business to AIP, excluding certain foreign locations which were subsequently sold. In connection with the divestiture, we received cash proceeds of \$371.8 million. Including transaction related costs of \$16.4 million, the sale resulted in a pre-tax gain of \$40.3 million (\$23.3 million, net of tax). The assets and liabilities and operating results of the Fasteners business are presented as "discontinued operations" in our Consolidated Financial Statements for all years presented.

On September 17, 2014, we acquired Tri-Ed, a leading independent distributor of security and low-voltage technology products, from Tri-NVS Holdings, LLC for \$418.4 million. A portion of the proceeds from a subsequent issuance of \$400.0 million principal amount of senior notes were used to repay certain incurred borrowings to finance the Tri-Ed acquisition.

Net income	\$3.59	\$3.81	\$5.84

Items Impacting Comparability of Results

In addition to the results provided in accordance with U.S. Generally Accepted Accounting Principles ("GAAP") above, this report includes certain non-GAAP financial measures as defined by the Securities and Exchange Commission. Specifically, net sales comparisons to the prior corresponding period, both worldwide and in relevant segments, are discussed in this report both on a U.S. GAAP and non-GAAP basis. We believe that by providing non-GAAP organic growth, which adjusts for the impact of acquisitions (when applicable), foreign exchange fluctuations, copper prices and the number of billing days, both management and investors are provided with meaningful supplemental sales information to understand and analyze our underlying trends and other aspects of our financial performance. We calculate the year over year organic sales growth and operating expenses impact relating to the Power Solutions acquisition by including its 2015 comparable period results prior to the acquisition with our results (on a "pro forma" basis), as we believe this represents the most accurate representation of organic growth, considering the nature of the company we acquired and the synergistic revenues that have been or will be achieved. Historically, and from time to time, we may also exclude other items from reported financial results (e.g., impairment charges, inventory adjustments, restructuring charges, tax items, currency devaluations, pension settlements, etc.) in presenting adjusted operating expense, adjusted operating income, adjusted income taxes and adjusted net income so that both management and financial statement users can use these non-GAAP financial measures to better understand and evaluate our performance period over period and to analyze the underlying trends of our business. As a result of the recent acquisitions, we have also excluded amortization of intangible assets associated with purchase accounting from acquisitions from the adjusted amounts for comparison of the non-GAAP financial measures period over period.

Table of Contents

ANIXTER INTERNATIONAL INC.

EBITDA is defined as net income from continuing operations before interest, income taxes, depreciation and amortization. Adjusted EBITDA is defined as EBITDA before foreign exchange and other non-operating expense and non-cash stock-based compensation, excluding the other items from reported financial results, as defined above. We believe that adjusted operating income, EBITDA and Adjusted EBITDA provide relevant and useful information, which is widely used by analysts, investors and competitors in our industry as well as by our management in assessing both consolidated and business segment performance. Adjusted operating income provides an understanding of the results from the primary operations of our business by excluding the effects of certain items that do not reflect the ordinary earnings of our operations. We use adjusted operating income to evaluate our period over period operating performance because we believe this provides a more comparable measure of our continuing business excluding certain items that are not reflective of expected ongoing operations. This measure may be useful to an investor in evaluating the underlying performance of our business. EBITDA provides us with an understanding of earnings before the impact of investing and financing charges and income taxes. Adjusted EBITDA further excludes the effects of foreign exchange and other non-cash stock-based compensation, and certain items that do not reflect the ordinary earnings of our operations and that are also excluded for purposes of calculating adjusted net income, adjusted earnings per share and adjusted operating income. EBITDA and Adjusted EBITDA are used by our management for various purposes including as measures of performance of our operating entities and as a basis for strategic planning and forecasting. Adjusted EBITDA may be useful to an investor because this measure is widely used to evaluate a company's operating performance without regard to items excluded from the calculation of such measure, which can vary substantially from company to company depending on the accounting methods, book value of assets, capital structure and the method by which the assets were acquired, among other factors. They are not, however, intended as an alternative measure of operating results or cash flow from operations as determined in accordance with U.S. GAAP.

Non-GAAP financial measures provide insight into selected financial information and should be evaluated in the context in which they are presented. These non-GAAP financial measures have limitations as analytical tools, and should not be considered in isolation from, or as a substitute for, financial information presented in compliance with U.S. GAAP, and non-GAAP financial measures as reported by us may not be comparable to similarly titled amounts reported by other companies. The non-GAAP financial measures should be considered in conjunction with the Consolidated Financial Statements, including the related notes, and Management's Discussion and Analysis of Financial Condition and Results of Operations included in this report. Management does not use these non-GAAP financial measures for any purpose other than the reasons stated above.

Our operating results can be affected by changes in prices of commodities, primarily copper, which are components in some of the electrical wire and cable products sold. Generally, as the costs of inventory purchases increase due to higher commodity prices, our mark-up percentage to customers remains relatively constant, resulting in higher sales revenue and gross profit. In addition, existing inventory purchased at previously lower prices and sold as prices increase may result in a higher gross profit margin. Conversely, a decrease in commodity prices in a short period of time would have the opposite effect, negatively affecting financial results. The degree to which spot market copper prices change affects product prices and the amount of gross profit earned will be affected by end market demand and overall economic conditions. Importantly, however, there is no exact measure of the impact of changes in copper prices, as there are thousands of transactions in any given year, each of which has various factors involved in the individual pricing decisions. Therefore, all references to the effect of copper prices are estimates.

In 2016, we changed the composition of our reportable segments and we no longer allocate certain corporate costs. Accordingly, prior period segment financial information has been revised to reflect these changes.

Table of Contents

ANIXTER INTERNATIONAL INC.

We recorded the following items that impacted the comparability of the results for the last three fiscal years:
Items Impacting Comparability of Results from Continuing Operations:

(In millions, except per share amounts)

	Years Ended		
	December 31, 2016	January 1, 2016	January 2, 2015
	(As revised*)	(As revised*)	(As revised*)
	Favorable / (Unfavorable)		
Items impacting operating income:

Diluted EPS from continuing operations – Non-GAAP	\$4.93	\$ 4.46	\$ 5.17

* Revised due to change in composition of items impacting comparability of results to include amortization of intangible assets.

The Power Solutions and Tri-Ed acquisitions were accounted for as purchases and their results of operations are included in the Consolidated Financial Statements from the date of the acquisition. Had the acquisitions of Power Solutions and Tri-Ed been completed as of the beginning of fiscal 2014, our pro forma net sales, net income from continuing operations and diluted income per share from continuing operations would have been the following as compared to our reported results.

	As Reported		Pro Forma	
	Years Ended		Years Ended	
(In millions, except per share amounts)	January 1, 2016	January 2, 2015	January 1, 2016	January 2, 2015
Net sales	\$6,190.5	\$5,507.0	\$7,733.4	\$7,831.0
Net income from continuing operations	\$96.9	\$163.4	\$107.1	\$180.5
Income per diluted share from continuing operations	\$2.90	\$4.90	\$3.20	\$5.41

Table of Contents

ANIXTER INTERNATIONAL INC.

Excluding the unfavorable impact of items impacting net income from continuing operations of \$52.4 million and \$9.1 million in 2015 and 2014, respectively, as described above, the pro forma diluted earnings per share from continuing operations would have been the following as compared to our non-GAAP diluted earnings per share from continuing operations.

	As Adjusted		Pro Forma As Adjusted	
	Years Ended		Years Ended

The current year had 254 billing days compared to 253 billing days in the prior year.

Table of Contents

ANIXTER INTERNATIONAL INC.

NSS – Sales of \$4,083.8 million increased 2.9% from \$3,968.2 million in the prior year period. NSS organic sales increased 3.9%, adjusting for the unfavorable impact from foreign exchange, driven by growth across our North America and EMEA geographies, due to continued strength with global accounts, including with technology customers, financial institutions and service providers, partially offset by weakness in CALA. NSS security sales in the twelve months ended December 30, 2016 of \$1,620.2 million, which represents 39.7% of total segment sales, increased 2.9% from the prior year period. Adjusted for the \$21.3 million negative currency impact, organic security sales growth was 4.3% compared to the twelve months ended January 1, 2016.

EES – Sales of \$2,103.2 million increased 15.8% from \$1,816.5 million in the prior year period due to the low voltage business of the Power Solutions acquisition, partially offset by the unfavorable impacts from copper and foreign exchange. EES organic sales decreased by 2.7%, with declines across all of our geographies, reflecting weakness with industrial customers and relatively flat performance with OEM customers, along with the weakness in Latin America. UPS – Sales were \$1,435.8 million in the twelve months ended December 30, 2016, a decrease of 5.2% on an organic basis.

2015 vs. 2014

(In millions)	NSS	EES	UPS	Total
Net sales, 2015	\$3,968.2	\$1,816.5	\$405.8	\$6,190.5
Net sales, 2014	3,526.0	1,911.1	69.9	\$5,507.0
\$ Change	\$442.2	\$(94.6)	\$335.9	\$683.5
% Change	12.5	% (5.0)%	nm	12.4 %

Impact of Acquisition of Power Solutions and Tri-Ed	\$419.7	\$138.0	\$341.6	\$899.3
Net sales, 2014 (Pro Forma)	\$3,945.7	\$2,049.1	\$411.5	\$6,406.3

Adjusted % Change (Pro Forma)	0.6	% (11.4)%	(1.4)%	(3.4)%
Plus the % impact of:				
Foreign exchange	3.3	% 4.0	% 2.0	% 3.5 %
Copper pricing	—	% 3.8	% 0.1	% 1.2 %
Organic (non-GAAP)	3.9	% (3.6)%	0.7	% 1.3 %

* Revised due to change in composition of our reportable segments in the first quarter of 2016.

** nm - percentages are not meaningful.

There were 253 billing days in both 2015 and 2014.

NSS – Sales of \$3,968.2 million in 2015 compared to \$3,526.0 million in 2014, an increase of 12.5%, primarily attributable to the Tri-Ed acquisition. Excluding the \$419.7 million favorable impact of Tri-Ed sales and the \$131.2 million unfavorable impact from foreign exchange, NSS organic sales increased 3.9%, driven by strength in all regions. North America sales increased by 3.2% on an organic basis, led by strength in the U.S. business partially offset by continued weakness in Canada. Sales grew 14.1% and 1.5% in EMEA and Emerging Markets, respectively, on an organic basis in 2015. Record NSS security sales for the year ended January 1, 2016 of \$1,574.0 million, which represented 39.7% of total segment sales, increased 39.5% from the prior year. Adjusted for the acquisition impact of Tri-Ed and the \$62.2 million unfavorable impact from foreign exchange, security sales grew 5.4% on an organic basis. EES – Sales of \$1,816.5 million in 2015 compared to \$1,911.1 million in 2014. Excluding the \$138.0 million favorable impact of Power Solutions sales, the \$81.6 million unfavorable impact from foreign exchange and the \$77.1 million unfavorable impact from lower average copper prices, EES organic sales decreased by 3.6%. The decline in organic sales reflected weakness with our industrial customers, partially offset by modest growth with our OEM customers. After adjusting for pro forma Power Solutions low voltage sales and the unfavorable impact of currency and copper, organic sales in North America decreased by 2.1%, reflecting the slowdown in business with our industrial customers. EES organic sales declined 8.4% in EMEA due to a decline with both our industrial and OEM customers. Emerging Markets organic sales decreased 6.4% compared to prior year primarily due to lower project business.

UPS - Sales were \$405.8 million in 2015. Excluding the \$8.4 million unfavorable impact from foreign exchange and the \$0.3 million unfavorable impact from lower average copper prices, UPS organic sales increased by 0.7% compared to the prior year. Sales were negatively impacted by slower sales growth in Canada and weakness in oil and gas related markets.

Table of Contents

ANIXTER INTERNATIONAL INC.

Gross Margin

Gross margin of 20.3% in 2016 decreased from 21.7% in 2015 and 22.5% in 2014. The lower gross margin in 2016 and 2015 is primarily due to the lower margin sales attributed to the Power Solutions acquisition. The effects of lower copper prices did not impact gross margin percentages significantly in any year.

Operating Expenses

Operating expenses were \$1,262.7 million, \$1,072.7 million and \$929.2 million in 2016, 2015 and 2014, respectively. Operating expense in 2016 includes \$37.6 million of intangible asset amortization expense, \$9.6 million related to the UK pension pension settlement, \$5.4 million of restructuring charges, \$7.6 million of Latin America bad debt provision and \$5.1 million of acquisition and integration costs. Operating expense in 2015 includes \$24.9 million of intangible asset amortization expense, acquisition and integration costs of \$13.2 million, \$8.2 million of restructuring charges, a \$3.1 million write-off of capitalized software that has no ongoing economic benefit to continuing operations, \$11.7 million of Latin America bad debt provision, a \$1.7 million dilapidation provision related to our leasehold properties, and \$0.4 million related to the pension obligations in the UK. Excluding these items, adjusted operating expenses in 2016 of \$1,197.4 million, or 15.7% of sales, compares to prior year adjusted operating expense of \$1,009.5 million, or 16.3% of sales. Further adjusting operating expenses for a favorable \$15.4 million impact of foreign currency in the twelve months ended 2016, and including \$190.5 million of pro forma Power Solutions expenses in the prior year, adjusted operating expenses would have decreased by 1.1%.

Operating Income

** nm - Percentages are not meaningful.

NSS – Operating income was \$275.8 million, or 6.8% of sales, in 2016, compared to \$258.2 million, or 6.5% of sales, in 2015 and \$261.1 million, or 7.4% of sales, in 2014. The increase in operating income in 2016 compared to 2015 was primarily due to an increase in net sales, partially offset by the unfavorable impact of foreign exchange. Currency headwinds, product mix and competitive pricing pressures caused the decline in operating income from 2014 to 2015. NSS delivered adjusted operating income of \$295.5 million, \$286.0 million, and \$273.0 million in 2016, 2015 and 2014, respectively, resulting in adjusted operating margin of 7.2% in both 2016 and 2015, and 7.7% in 2014.

EES – Operating income was \$97.5 million, or 4.6% of sales, in 2016, compared to \$121.1 million, or 6.7% of sales, in 2015 and \$162.5 million, or 8.5% of sales, in 2014. The decrease in operating income is primarily attributable to negative copper prices, currency impact and weaker demand in oil and gas as well as the broader industries, partially offset by operating income contributed by the low voltage business of the Power Solutions acquisition. The decline in operating income in 2015 versus 2014 was due to a slowdown in spending by industrial customers, combined with the unfavorable impacts of lower copper prices of approximately \$0.61 per pound during the year and currency headwinds, together creating significant negative operating expense leverage. EES adjusted operating income of \$111.0 million in 2016 compares to operating income of \$131.6 million in 2015 and \$168.4 million in 2014, resulting in adjusted operating margin of 5.3%, 7.2% and 8.8% in 2016, 2015 and 2014, respectively.

UPS - Operating income was \$56.7 million, or 3.9% of sales, compared to \$22.4 million, or 5.5%, in 2015 and \$10.9 million, or 15.6% of sales, in 2014. The increase in operating income in 2016 is primarily attributable to the operating income contributed by the Power Solutions acquisition. UPS adjusted operating income of \$74.1 million in 2016 compares to operating income of \$26.6 million in 2015 and \$10.9 million in 2014, resulting in adjusted operating

margin of 5.2%, 6.6% and 15.6% in 2016, 2015 and 2014, respectively.

Table of Contents

ANIXTER INTERNATIONAL INC.

Interest Expense and Other

Interest expense was \$78.7 million, \$63.8 million and \$44.5 million in 2016, 2015 and 2014, respectively. Our weighted-average cost of borrowings was 4.8% in 2016 and 2015, and 4.7% in 2014. The increase in interest expense in 2016 results from the issuance of incremental debt used to finance the Power Solutions acquisition being outstanding for the full year compared to incremental debt being outstanding for only four months in 2015. The increase in interest expense for 2015 was due to the issuance of the Notes due 2023 in August 2015, the balances drawn on the Receivables Facility and Inventory Facility and the Canadian Term Loan in October 2015 to fund the Power Solutions acquisition, the Senior notes due 2021 ("Notes due 2021") issued in September 2014 to fund the Tri-Ed acquisition and incremental interest expense from the \$200.0 million term loan received in August 2014, partially offset by the repayment of the 5.95% Senior notes due 2015 in the first quarter of 2015.

Foreign exchange and other expense was \$9.1 million, \$21.1 million and \$16.0 million in 2016, 2015 and 2014, respectively. During 2016, the Venezuelan bolivar was devalued from approximately 200.0 bolivars to one U.S. dollar ("USD") to approximately 673.0 bolivars to one USD, which we believe will be the rate available to us in the event we repatriate cash from Venezuela. This devaluation did not have a material impact on our Consolidated Financial Statements as we have significantly less exposure in Venezuela in 2016.

In the fourth quarter of 2015, the Argentine peso was devalued by approximately 40% against the USD due to the loosening of currency controls. In the first quarter of 2015, the Venezuelan government changed its policy regarding the bolivar, which required us to use the Sistema Marginal de Divisas or Marginal Exchange System ("SIMADI") a "completely free floating" rate. As a result of these devaluations, we recorded a foreign exchange loss of \$3.6 million in 2015.

In the first quarter of 2014, the Venezuelan government changed its policies regarding the bolivar, which required us to use the Complementary System for the Administration of Foreign Currency ("SICAD") rate of 49.0 bolivars to one USD to repatriate cash from Venezuela. In the first quarter of 2014, the Argentine peso was devalued from 6.5 pesos to one USD to approximately 8.0 peso to one USD after the central bank scaled back its intervention in a bid to preserve USD cash reserves. As a result of these devaluations, we recorded foreign exchange losses in these two countries of \$8.0 million in the first quarter of 2014.

Due to the strengthening of the USD against certain foreign currencies, primarily in Europe and Latin America, we recorded additional foreign exchange losses of \$10.8 million, \$14.9 million and \$8.2 million in 2016, 2015 and 2014, respectively.

The combined effect of changes in both the equity and bond markets resulted in changes in the cash surrender value of our company owned life insurance policies associated with our sponsored deferred compensation program. We recorded a gain on the cash surrender value of life insurance policies of \$1.2 million in 2016, loss of \$0.8 million in 2015 and gain of \$0.8 million in 2014, respectively.

Income Taxes

The income tax provision from continuing operations for 2016 was \$76.4 million compared to \$86.0 million in 2015 and \$86.2 million in 2014. Our effective tax rate from continuing operations was 38.7%, 47.0% and 34.5% in 2016, 2015 and 2014, respectively. Our effective tax rate for 2016 included a \$3.2 million net tax benefit related to prior year tax positions, partially offset by the establishment of deferred income tax valuation allowances of \$1.1 million. During 2015, we recorded \$11.3 million of additional income tax expense primarily related to the establishment of deferred income tax valuation allowances and \$0.5 million of other tax items. During 2014, we recorded a net tax benefit of \$6.9 million primarily related to the reversal of deferred income tax valuation allowances in Europe and a net benefit of \$1.9 million primarily related to closing prior tax years, partially offset by a tax cost of \$1.3 million related to certain acquisition costs that were capitalized for tax purposes. Excluding the impact of these items as well as the other items impacting the comparability of results discussed above, the adjusted effective tax rate in 2016 was 37.0% compared to 40.5% in 2015 and 37.4% in 2014. The change in adjusted effective tax rate was due to the change in the country mix of earnings.

As of January 2, 2015, we asserted permanent reinvestment of all non-U.S. earnings, including the non-U.S. earnings of the Fasteners business. As a result of the disposition of the Fasteners business during February 2015, we were no

longer permanently reinvested with respect to the non-U.S. earnings of the Fasteners business, because we repatriated to the U.S. most of the net proceeds attributable to the sale of the non-U.S. Fasteners business via intercompany debt repayment, dividend or other means. During the second quarter of 2015, we refined the anticipated repatriation amount and the estimated tax impact of the change in the reinvestment assertion, and we reduced the first quarter estimate by \$4.9 million. Therefore, our 2015 results included, as a component of discontinued operations, \$10.0 million of expense for U.S. federal and state, and foreign income taxes and withholding taxes related to this change in our reinvestment assertion. As of December 30, 2016, we consider the remaining undistributed earnings of our foreign subsidiaries, along with future earnings, to be indefinitely reinvested and, accordingly, no provision for U.S. federal and state income taxes or any withholding taxes has been recorded.

Stock-based compensation	1.7	1.3	—	9.6	12.6
Adjusted EBITDA	\$277.7	\$170.9	\$10.9	\$(99.0)	\$360.5

* Revised due to change in composition of our reportable segments in the first quarter of 2016.

** Items impacting operating income excludes amortization of intangible assets in the calculation of adjusted EBITDA as amortization is already added back in the EBITDA calculation above.

NSS - NSS adjusted EBITDA of \$300.5 million in 2016 compares to \$291.5 million in 2015 and \$277.7 million in 2014. The increase in adjusted EBITDA in 2016 compared to 2015 was due to product and customer mix. The year-over-year increase in 2015 adjusted EBITDA reflects strong sales growth and effective expense control.

EES - EES adjusted EBITDA of \$114.7 million in 2016 compares to \$134.3 million in 2015 and \$170.9 million in 2014. The decrease in adjusted EBITDA in 2016 compared to 2015 was due to the unfavorable impacts of lower copper prices combined with the overall weaker industrial environment. The year-over-year decrease in 2015 adjusted EBITDA was due to a slowdown in spending by industrial customers, combined with the unfavorable impacts of lower copper prices and currency headwinds, together creating significant negative operating expense leverage.

UPS - UPS adjusted EBITDA of \$79.7 million in 2016 compares to \$27.9 million in 2015 and \$10.9 million in 2014. The increase in adjusted EBITDA in 2016 compared to 2015 and 2014 is due to the Power Solutions acquisition.

Financial Liquidity and Capital Resources

Cash Flow

As a distributor, our use of capital is largely for working capital to support our revenue growth. Capital commitments for property and equipment are limited to information technology assets, warehouse equipment, office furniture and fixtures and leasehold improvements, since we operate almost entirely from leased facilities. Therefore, in any given reporting period, the amount of cash consumed or generated by operations other than from net earnings will primarily be due to changes in working capital as a result of the rate of increases or decreases in sales.

In periods when sales are increasing, the expanded working capital needs will be funded first by cash from operations, then from additional borrowings and lastly from additional equity offerings. In periods when sales are decreasing, we will have improved cash flows due to reduced working capital requirements. During such periods, we will use the expanded cash flow to reduce the amount of leverage in our capital structure until such time as economic conditions improve and growth resumes. Also, we will, from time to time, issue or retire borrowings or equity in an effort to maintain a cost-effective capital structure consistent with our anticipated capital requirements.

Net cash provided by operations was \$278.8 million in 2016, which compares to \$91.9 million of cash provided by operations in 2015. The increase reflects an improvement in working capital efficiencies. Net cash provided by operations in 2015 of \$91.9 million compares to \$104.2 million in 2014. The decrease in net cash provided by operations in 2015 compared to 2014 reflects a decline in earnings, which includes a \$40.0 million non-cash net gain from the sale of Fasteners, partially offset by an improvement in working capital efficiency.

Table of Contents

ANIXTER INTERNATIONAL INC.

Net cash used in investing activities was \$37.3 million in 2016, primarily related to capital expenditures. This compares to net cash used in investing activities of \$479.3 million in 2015, which included \$824.7 million for the acquisition of Power Solutions and \$28.6 million for capital expenditures, partially offset by \$371.8 million of net cash proceeds from the sale of the Fasteners business. Net cash used in investing activities was \$458.7 million in 2014 which included \$418.4 million for the acquisition of Tri-Ed and \$40.3 million for capital expenditures. Capital expenditures are expected to be approximately \$35 - \$40 million in 2017 as we continue to invest in the warehouse equipment, information system upgrades and integration of acquired businesses, and new software to support our infrastructure.

Net cash used in financing activities was \$273.0 million in 2016 compared to net cash provided by financing activities of \$449.8 million and \$385.7 million in 2015 and 2014, respectively. During 2016, we had net repayments from our revolving lines of credit of \$191.4 million and a repayment of our Canadian term loan of \$83.7 million. During 2015, we received net proceeds of \$326.1 million from our revolving lines of credit, \$345.6 million from the issuance of the Notes due 2023 and \$229.1 million from the issuance of the Canadian Term Loan, partially offset by repayments of borrowings under the \$200.0 million term loan, the repayment of our Senior notes due 2015, which had a maturity value of \$200.0 million, and repayments of borrowings under the Canadian Term Loan of \$45.1 million. During 2014, we received proceeds of \$200.0 million and \$394.0 million from the \$200.0 million term loan and issuance of the Senior notes due 2021, respectively. Additionally, we had net repayments of borrowings on revolving lines of credit of \$183.8 million, a \$1.2 million repayment of the \$200.0 million term loan along with the repayment of our Senior notes due 2014 which had a maturity value of \$32.3 million.

Liquidity and Capital Resources

We maintain the flexibility to utilize future cash flows to invest in the growth of the business, and we believe that the current leverage on the balance sheet positions us to effectively capitalize on current organic growth opportunities. We will continue to balance our focus on sales and earnings growth with continuing efforts in cost control and working capital management. Maintaining a strong and flexible financial position continues to be vital to funding investment in strategic long-term growth initiatives.

At December 30, 2016, our primary liquidity source was the Receivables Facility in an aggregate committed amount of \$600.0 million and the Inventory Facility in an aggregate committed amount of \$150.0 million. At December 30, 2016, there was \$197.1 million of borrowings under the Receivables Facility, and there were no borrowings under the Inventory Facility.

Receivables Facility

On October 5, 2015, we, through our wholly-owned subsidiary, Anixter Receivables Corporation ("ARC"), entered into a Receivables Facility, which is a receivables based five-year revolving credit facility in an aggregate committed amount of \$600.0 million. Borrowings under the Receivables Facility are secured by a first lien on all assets of ARC and supported by an unsecured guarantee by Anixter International.

The Receivables Facility has a borrowing base of 85% of eligible receivables, subject to certain reserves.

In connection with the entry into the Receivables Facility, Anixter Inc. and ARC terminated its existing Second Amended and Restated Receivables Purchase Agreement (the "RPA").

In connection with the entry into the Receivables Facility, on October 5, 2015, Anixter Inc. and ARC entered into a Third Amended and Restated Receivables Sale Agreement (the "Amended and Restated RSA"), which amended and restated the existing Second Amended and Restated Sales Agreement. The purpose of the Amended and Restated RSA is (i) to reflect the entry into the Receivables Facility and the termination of the RPA; and (ii) to include in the receivables sold by Anixter Inc. to ARC receivables originated by Tri-Northern Holdings, Inc. and its subsidiaries (collectively, the "Tri-Ed Subsidiaries") and subsidiaries acquired in the Power Solutions acquisition (the "Power

Solutions Subsidiaries").

Inventory Facility

On October 5, 2015, we and certain of our wholly-owned subsidiaries, including the Tri-Ed Subsidiaries and Power Solutions Subsidiaries, entered into the Inventory Facility, an asset based lending five-year revolving credit facility, in an aggregate committed amount of \$150.0 million. Borrowings under the Inventory Facility are secured by a first lien on Anixter Inc.'s and certain of its subsidiaries' personal property and supported by a guarantee by Anixter International.

The Inventory Facility has a borrowing base, (a) with respect to appraised eligible domestic inventory, of the lesser of (i) 85% of the net orderly liquidation value of such inventory and (ii) 75% of book value of such inventory, plus, (b) with respect to eligible domestic inventory not appraised, 40% of the net orderly liquidation value of such inventory, less (c) certain reserves.

Table of Contents

ANIXTER INTERNATIONAL INC.

The Receivables Facility and the Inventory Facility (collectively, the "Combined Facilities")

The Combined Facilities drawn pricing will range from LIBOR plus 125 basis points when the combined unused availability (the "Combined Availability") under the Combined Facilities is greater than \$500 million to LIBOR plus 175 basis points when Combined Availability is less than \$250 million. Undrawn fees will be 25 basis points if greater than/equal to 50% of the Combined Commitment is drawn and 37.5 basis points if less than 50% of the Combined Commitment is drawn.

Acquisitions and restricted payments will be permitted, subject to, among other things, (i) Combined Availability of at least \$150.0 million after giving pro forma effect to any acquisition or restricted payment or (ii) (a) Combined Availability of at least \$112.5 million and (b) maintenance of a minimum fixed charge coverage ratio of at least 1.1x, after giving pro forma effect to the acquisition or restricted payment.

The Combined Facilities provides for customary representations and warranties and customary events of default, generally with corresponding grace periods, including, without limitation, payment defaults with respect to the facility, covenant defaults, cross-defaults to other agreements evidencing material indebtedness, certain judgments and events of bankruptcy.

Canadian Term Loan

On October 5, 2015, we, through our wholly-owned subsidiaries, Anixter Canada Inc. and Tri-Ed ULC, entered into a \$300.0 million Canadian dollars (equivalent to approximately \$225.0 million USD) Canadian Term Loan. The Canadian Term Loan is and will be guaranteed by all present and future material Canadian subsidiaries of Anixter Canada Inc. and Tri-Ed ULC as well as Anixter Mid Holdings BV. The Canadian Term Loan is secured by a first priority security interest in all of the assets of Anixter Canada Inc. and each of its Canadian subsidiaries, which comprise the borrowing group.

The Canadian Term Loan has a five-year maturity. The drawn pricing will range from 0.375% to 1.250% over prime and 1.375% to 2.250% over the banker's acceptance rate, depending on consolidated leverage ranging from less than or equal to 1.25x to equal to or greater than 3.00x. The Canadian Term Loan amortizes 5% in each of years 1 and 2, 10% in each of years 3 and 4 and 70% in year 5. Due to our prepayment of the Canadian Term Loan, no amortization is required before the loan's maturity in 2020.

The borrowing group for the Canadian Term Loan initially will be subject to a maximum leverage ratio of 4.25x and a minimum fixed charge coverage ratio of 3.0x.

The Canadian Term Loan provides for customary representations and warranties and customary events of default, generally with corresponding grace periods, including, without limitation, payment defaults with respect to the facility, covenant defaults, cross-defaults to other agreements evidencing material indebtedness, certain judgments and events of bankruptcy.

We continue to have a strong focus on improving our margin, cost structure and working capital efficiency. Our capital allocation priorities include achieving our debt-to-capital target range of 45 - 50% by the second half of 2017, from the strong free cash flow we expect to generate from our repositioned platform as evidenced by this debt-to-capital ratio decreasing from 58.2% at January 1, 2016 to 51.6% at December 30, 2016.

We are in compliance with all of our covenant ratios and believe that there is adequate margin between the covenant ratios and the actual ratios given the current trends of the business. For further information, including information regarding our credit arrangements, see Note 6. "Debt" in the Notes to the Consolidated Financial Statements.

Table of Contents

ANIXTER INTERNATIONAL INC.

Contractual Cash Obligations and Commitments

At the end of fiscal 2016, we have various contractual cash obligations and commitments and the following table represents the associated payments due by period. The amounts due by period will not necessarily correlate to amounts reflected as short-term and long-term liabilities on our Consolidated Balance Sheets at the end of any given period. This is due to the difference in the recognition of liabilities of non-cancellable obligations for accounting purposes at the end of a given period as well giving consideration to our intent and ability to settle such contractual commitments that might be considered short term.

(In millions)	Payments due by period						Total
	2017	2018	2019	2020	2021	Beyond 2021	
Debt ^a	\$3.5	\$—	\$347.7	\$292.5	\$395.7	\$346.3	\$1,385.7
Contractual Interest ^b	68.3	67.6	54.4	45.9	34.6	22.5	293.3
Purchase Obligations ^c	523.2	6.1	26.1	0.2	2.3	—	557.9
Operating Leases	64.5	57.8	43.3	33.9	27.1	43.1	269.7
Deferred Compensation Liability ^d	4.9	4.9	3.2	3.1	3.2	26.3	45.6
Pension Plans ^e	17.4	—	—	—	—	—	17.4
Total Obligations	\$681.8	\$136.4	\$474.7	\$375.6	\$462.9	\$438.2	\$2,569.6

Liabilities related to unrecognized tax benefits of \$3.5 million were excluded from the table above, as we cannot reasonably estimate the timing of cash settlements with taxing authorities. Various of our foreign subsidiaries had aggregate cumulative net operating loss ("NOL") carryforwards for foreign income tax purposes of approximately \$95.6 million at December 30, 2016, which are subject to various provisions of each respective country.

Approximately \$80.4 million of the NOL carryforwards may be carried forward indefinitely. The remaining NOL carryforwards expire at various times between 2017 and 2026. See Note 8. "Income Taxes" in the Notes to the Consolidated Financial Statements for further information related to unrecognized tax benefits.

The Canadian Term Loan requires principal payments of \$95.4 million in 2020 upon maturity of the loan due to our prepayments of \$83.7 million and \$45.1 million in 2016 and 2015, respectively. The Notes due 2019, the Notes (a) due 2021 and the Notes due 2023 require payments upon retirement of \$350.0 million in 2019, \$400.0 million in 2021 and \$350.0 million in 2023, respectively. The \$197.1 million outstanding on our revolving lines of credit requires payment in 2020.

(b) Interest payments on debt outstanding at December 30, 2016 through maturity. For variable rate debt, we computed contractual interest payments based on the borrowing rate at December 30, 2016.

Purchase obligations primarily consist of purchase orders for products sourced from unaffiliated third party (c) suppliers, in addition to commitments related to various capital expenditures. Many of these obligations may be canceled with limited or no financial penalties.

(d) A non-qualified deferred compensation plan was implemented on January 1, 1995. The plan provides for benefit payments upon retirement, death, disability, termination or other scheduled dates determined by the participant. At December 30, 2016, the deferred compensation liability was \$45.6 million. In an effort to ensure that adequate resources are available to fund the deferred compensation liability, we have purchased variable, separate account life insurance policies on the plan participants with benefits accruing to us. At December 30, 2016, the cash surrender value of these company-owned life insurance policies was \$35.9 million.

(e) The majority of our various pension plans are non-contributory and cover substantially all full-time domestic employees and certain employees in other countries. Retirement benefits are provided based on compensation as defined in the plans. Our policy is to fund these plans as required by the Employee Retirement Income Security Act, the Internal Revenue Service and local statutory law. At December 30, 2016 the current portion of our net pension liability of \$69.1 million was \$0.9 million. We currently estimate that we will contribute \$17.4 million to our foreign and domestic pension plans in 2017, which includes \$0.9 million of benefit payments directly to

participants of our two domestic unfunded non-qualified pension plans. Due to the future impact of various market conditions, rates of return and changes in plan participants, we cannot provide a meaningful estimate of our future contributions beyond 2017.

Critical Accounting Policies and Estimates

We believe that the following are critical areas of accounting that either require significant judgment by management or may be affected by changes in general market conditions outside the control of management. As a result, changes in estimates and general market conditions could cause actual results to differ materially from future expected results. Historically, with the exception of any goodwill and related long-lived asset impairment charges, our estimates in these critical areas have not differed materially from actual results.

Table of Contents

ANIXTER INTERNATIONAL INC.

Acquisitions

We account for acquired businesses using the acquisition method of accounting. This method requires that most assets acquired and liabilities assumed be recognized as of the acquisition date. We allocate the purchase price of acquired businesses to the tangible and intangible assets acquired and liabilities assumed based on estimated fair values. The excess of the purchase price over the identifiable assets acquired and liabilities assumed is recorded as goodwill. We engage a third party professional service provider to assist us in determining the fair values of the assets acquired and liabilities assumed. Such valuations require management to make significant estimates and assumptions, especially with respect to intangible assets. Critical estimates in valuing certain intangible assets include, but are not limited to, future expected cash flows from customer relationships, customer attrition rates and discount rates. Management's estimates of fair value are based upon assumptions believed to be reasonable, but which are inherently uncertain and unpredictable.

Allowance for Doubtful Accounts

At December 30, 2016 and January 1, 2016, we reported net accounts receivable of \$1,353.2 million and \$1,326.4 million, respectively. We carry our accounts receivable at their face amounts less an allowance for doubtful accounts which was \$43.6 million and \$37.5 million at the end of 2016 and 2015, respectively. On a regular basis, we evaluate our accounts receivable and establish the allowance for doubtful accounts based on a combination of specific customer circumstances, as well as credit conditions and history of write-offs and collections. Each quarter we segregate the doubtful receivable balances into the following major categories and determine the bad debt reserve required as outlined below:

- Customers that are no longer paying their balances are reserved based on the historical write-off percentages;
- Risk accounts are individually reviewed and the reserve is based on the probability of potential default. We continually monitor payment patterns of customers, investigate past due accounts to assess the likelihood of collection and monitor industry and economic trends to estimate required allowances; and
- The outstanding balance for customers who have declared bankruptcy is reserved at the outstanding balance less the estimated net realizable value.

If circumstances related to the above factors change, our estimates of the recoverability of amounts due to us could be reduced or increased by a material amount.

Inventory Obsolescence

At December 30, 2016 and January 1, 2016, we reported inventory of \$1,178.3 million and \$1,182.6 million, respectively (net of inventory reserves of \$48.3 million and \$42.4 million, respectively). Each quarter we review for excess inventories and make an assessment of the net realizable value. There are many factors that management considers in determining whether or not the amount by which a reserve should be established. These factors include the following:

- Return or rotation privileges with vendors
- Price protection from vendors
- Expected future usage
- Whether or not a customer is obligated by contract to purchase the inventory
- Current market pricing
- Historical consumption experience
- Risk of obsolescence

If circumstances related to the above factors change, there could be a material impact on the net realizable value of the inventories.

Pension Expense

Accounting rules related to pensions and the policies we use generally reduce the recognition of actuarial gains and losses in the net benefit cost, as any significant actuarial gains/losses are amortized over the remaining service lives of the plan participants. These actuarial gains and losses are mainly attributable to the return on plan assets that differ

from that assumed and differences in the obligation due to changes in the discount rate, plan demographic changes and other assumptions.

Table of Contents

ANIXTER INTERNATIONAL INC.

The measurement date for all of our plans is December 31st. Accordingly, at the end of each fiscal year, we determine the discount rate to be used to discount the plan liabilities to their present value. The discount rate reflects the current rate at which the pension liabilities could be effectively settled at the end of the year. In estimating this rate at the end of 2016, 2015 and 2014, we reviewed rates of return on relevant market indices and concluded the Ryan ALM Above Median yield curves are more consistent with observable market conditions and industry standards for developing spot rate curves. These rates are adjusted to match the duration of the liabilities associated with the pension plans.

In the fourth quarter of 2016, the Anixter Inc. Pension Plan was amended to allow for the benefits of certain retirees or beneficiaries to be transferred to a third-party annuity provider. We paid \$10.5 million of additional contributions into the plan using excess cash from operations to fund the contributions. The plan purchased a \$10.5 million annuity contract with a third-party insurance carrier and transferred the related pension obligations to the carrier. The funding of the premiums did not result in a settlement charge as the amount did not exceed the service and interest costs of the plan in 2016.

In the fourth quarter of 2015, we commenced settlement of the liabilities of one of our Europe pension plans. At that time, we entered into a buy-in policy with an insurance carrier for that plan. In the second quarter of 2016, we terminated the buy-in policy and entered into an agreement for issuance of a buy-out policy and settled the pension obligation. Accumulated other comprehensive losses of approximately \$9.6 million (£6.9 million) were realized as a result of the settlement and are reflected in our Consolidated Statement of Comprehensive Income (Loss).

In the third quarter of 2015, we took two actions related to the Anixter Inc. Pension Plan in the U.S.. First, the plan was frozen to entrants first hired or rehired on or after July 1, 2015. Anixter Inc. will make an annual contribution to the Employee Savings Plan on behalf of each active participant who is first hired or rehired on or after July 1, 2015, or is not participating in the Anixter Inc. Pension Plan. The amount of the employer annual contribution to each active participant's account will be an amount determined by multiplying the participant's salary for the Plan year by either: (1) 2% if such participant's years of service as of August 1 of the Plan year is fewer than five, or (2) 2.5% if such participant's years of service as of August 1 of the Plan year is five or greater. This contribution is in lieu of being eligible for the Anixter Inc. Pension Plan. The total expense related to the amendment was \$0.8 million. Second, we amended the Anixter Inc. Pension Plan in the U.S. to allow for terminated Fasteners employees to become immediately vested, if they were hired before February 12, 2015 and are not already fully vested. Furthermore, the amendment allows for employees who were terminated in connection with the sale of the Fastener business, the one-time option to receive a cash payout of their vested benefits. This resulted in \$10.2 million of additional contributions paid by us using excess cash from operations to fund \$10.2 million of payments. The funding of the cash payments did not result in a settlement charge as the amount did not exceed the service and interest costs of the plan in 2015.

All non-union domestic employees earn a benefit under a personal retirement account (hypothetical account balance). Each year, a participant's account receives a credit equal to 2.0% of the participant's salary (2.5% if the participant's years of service at August 1 of the plan year are 5 years or more). Active participants become fully vested in their hypothetical personal retirement account after 3 years of service. Interest earned on the credited amount is not credited to the personal retirement account but is contributed to the participant's account in the Anixter Inc. Employee Savings Plan. The interest contribution equals the interest earned on the personal retirement account balance as of January 1st in the Domestic Plan and is based on the 10 year Treasury note rate as of the last business day of December. This benefit was modified for entrants hired or rehired on or after July 1, 2015 as described above.

Effective December 31, 2013, we froze benefits provided under the Anixter Inc. Pension Plan to employees hired before June 1, 2004. These employees are covered under the personal retirement account pension formula described above for non-union domestic employees hired or rehired before July 1, 2015.

In 2014, we adopted new U.S. mortality tables for purposes of determining our mortality assumption used in the U.S. defined benefit plans' liability calculation. The new assumptions were based on the Society of Actuaries' recent mortality experience study and reflected future mortality improvements based on the Social Security's expectations. In 2015 and 2016, the the Society of Actuaries released new mortality improvement projection scales. As a result, we again updated U.S. mortality improvement assumptions in 2015 and 2016 for purposes of determining our mortality

assumption used in the U.S. defined benefit plans' liability calculation. For the 2016 year end, we moved to the Society of Actuaries mortality improvement scale for improvements beyond the measurement date. The updated U.S. mortality assumptions resulted in a decrease of \$0.8 million and \$1.9 million to the benefit obligation as of the end of 2016 and 2015, respectively, prior to reflecting the discount rate change.

We recognized net periodic cost of \$20.8 million in 2016, \$11.1 million in 2015 and \$4.6 million in 2014. The increase in pension cost in 2016 is primarily due to the amendments to the U.S. pension plan described above and the impact of the increase in the consolidated weighted average discount rate from 3.79% in 2015 to 3.98% in 2016.

Table of Contents

ANIXTER INTERNATIONAL INC.

A significant element in determining our net periodic benefit cost in accordance with U.S. GAAP is the expected return on plan assets. For 2016, we had assumed that the weighted-average expected long-term rate of return on plan assets would be 5.50%. This expected return on plan assets is included in the net periodic benefit cost for the fiscal year ended 2016. As a result of the combined effect of valuation changes in both the equity and bond markets, the plan assets produced an actual gain of approximately 11.9% in 2016 and an actual loss of approximately 1.9% in 2015. The fair value of plan assets is \$412.7 million at the end of fiscal 2016, compared to \$446.2 million at the end of fiscal 2015. The difference between the expected return and the actual return on plan assets is amortized into expense over the service lives of the plan participants. These amounts are reflected on the balance sheet through charges to "Accumulated other comprehensive loss," a component of "Stockholders' Equity" in the Consolidated Balance Sheets. At December 30, 2016 and January 1, 2016, we determined the consolidated weighted-average discount rate of all plans to be 3.73% and 3.98%, respectively, and used these rates to measure the pension benefit obligation ("PBO") at the end of each respective fiscal year end. Due primarily to the purchase of annuities by our U.S. and Europe plans, the PBO decreased to \$481.8 million at the end of fiscal 2016 from \$516.1 million at the end of fiscal 2015. Our consolidated net unfunded status was \$69.1 million at the end of fiscal 2016 compared to \$69.9 million at the end of 2015.

The assets of the various defined benefit plans are held in separate independent trusts and managed by independent third party advisors. The investment objective of both the Domestic and Foreign Plans is to ensure, over the long-term life of the plans, an adequate level of assets to fund the benefits to employees and their beneficiaries at the time they are payable. In meeting this objective, we seek to achieve a level of absolute investment return consistent with a prudent level of portfolio risk. Our risk preference is to refrain from exposing the plans to higher volatility in pursuit of potential higher returns.

Due to its long duration, the pension liability is very sensitive to changes in the discount rate. As a sensitivity measure, the effect of a 50-basis-point decline in the assumed discount rate would result in an increase in the 2017 pension expense of approximately \$3.5 million and an increase in the projected benefit obligations at December 30, 2016 of \$45.3 million. A 50-basis-point decline in the assumed rate of return on assets would result in an increase in the 2017 expense of approximately \$2.1 million.

Goodwill and Indefinite-Lived Intangible Assets

We evaluate goodwill for impairment annually in the third quarter and when events or changes in circumstances indicate the carrying value of these assets might exceed their current fair values. We assess goodwill for impairment by first performing a qualitative assessment, which considers specific factors, based on the weight of evidence, and the significance of all identified events and circumstances in the context of determining whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If it is determined that it is more likely than not that the fair value of a reporting unit is less than its carrying amount using the qualitative assessment, we perform the two-step impairment test. From time to time, we may also bypass the qualitative assessment and proceed directly to the two-step impairment test. The first step of the impairment test is to identify a potential impairment by comparing the fair value of a reporting unit with its carrying amount. The estimates of fair value of a reporting unit are determined using the income approach and/or the market approach as described below. If step one of the test indicates a carrying value above the estimated fair value, the second step of the goodwill impairment test is performed by comparing the implied fair value of the reporting unit's goodwill with the carrying amount of that goodwill. The implied residual value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination.

In connection with our annual assessment of goodwill at the beginning of the third quarter of 2016, we bypassed the qualitative assessment and performed a quantitative test for all reporting units and utilized a combination of the income and market approaches to estimate the fair value of each reporting unit, both of which are broadly defined below. As a result of this assessment, we concluded that no impairment existed and the carrying amount of goodwill to be fully recoverable.

The income approach is a quantitative evaluation to determine the fair value of the reporting unit. Under the income approach we determine the fair value based on estimated future cash flows discounted by an estimated

weighted-average cost of capital plus a forecast risk, which reflects the overall level of inherent risk of the reporting unit and the rate of return a market participant would expect to earn. The inputs used for the income approach were significant unobservable inputs, or Level 3 inputs, as described in the accounting fair value hierarchy. Estimated future cash flows were based on our internal projection models, industry projections and other assumptions deemed reasonable by management.

The market approach measures the fair value of a reporting unit through the analysis of recent sales, offerings, and financial multiples (sales or earnings before interest, tax, depreciation and amortization ("EBITDA")) of comparable businesses. Consideration is given to the financial conditions and operating performance of the reporting unit being valued relative to those publicly-traded companies operating in the same or similar lines of business.

Table of Contents

ANIXTER INTERNATIONAL INC.

During the fourth quarter, we performed an interim goodwill impairment assessment for our NSS, EES and UPS reporting units. The estimated fair values of our NSS and UPS reporting units were at least 10% greater than their respective carrying values. Our EES reporting unit with goodwill of \$181.0 million had a fair value that was less than 10% over its carrying value. In performing our quantitative assessment for this reporting unit, under the income approach, we used revenue growth rates of 4.8% to 6.1%, a terminal growth rate of 3.0% and a discount rate of 10.0%. Management believes that the terminal growth rate is supported by our historical growth rate, near-term projections and long-term expected market growth. The discount rate reflects marketplace participants' cost of capital. Had we used a discount rate that was 60 basis points higher or a terminal growth rate that was 80 basis points lower than those assumed, the fair value of this reporting unit would have continued to exceed its carrying amount. Had we more heavily weighed the market approach in estimating the fair value of this reporting unit, the excess fair value over the carrying amount would have increased.

A possible indicator of goodwill impairment is the relationship of a company's market capitalization to its book value. During the fourth quarter, our market capitalization exceeded our book value and there were no impairment losses identified as a result of our interim test. Fair value determinations require considerable judgment and are sensitive to changes in underlying assumptions and factors. As a result, there can be no assurance that the estimates and assumptions made for purposes of the goodwill and indefinite-lived intangible impairment test will prove to be an accurate prediction of future results.

Other than goodwill, our only indefinite-lived intangible assets are trade names acquired during the Tri-Ed acquisition. See Note 3. "Business Combinations" in the Notes to the Consolidated Financial Statements for further information. Our long-lived assets consist of definite-lived intangible assets which are primarily related to customer relationships, as well as property and equipment which consists of office furniture and equipment, buildings, computer software and hardware, warehouse equipment and leasehold improvements. We continually evaluate whether events or circumstances have occurred that would indicate the remaining estimated useful lives of our long-lived assets warrant revision or that the remaining balance of such assets may not be recoverable. If impairment indicators are present, we assess whether the future estimated undiscounted cash flows attributable to the assets in question are greater than their carrying amounts. If these future estimated cash flows are less than carrying value, we then measure an impairment loss for the amount that carrying value exceeds fair value of the assets.

Deferred Tax Assets

At December 30, 2016 and January 1, 2016, our valuation allowance for deferred tax assets was \$20.7 million and \$24.0 million, respectively. We maintain valuation allowances to reduce deferred tax assets if it is more likely than not that some portion or all of the deferred tax asset will not be realized. Changes in valuation allowances are included in our tax provision in the period of change. In determining whether a valuation allowance is warranted, management evaluates factors such as prior earnings history, expected future earnings, carryback and carryforward periods and tax strategies that could potentially enhance the likelihood of realization of a deferred tax asset. Assessments are made at each balance sheet date to determine how much of each deferred tax asset is realizable. These estimates are subject to change in the future, particularly if earnings of a particular subsidiary are significantly higher or lower than expected, or if management takes operational or tax planning actions that could impact the future taxable earnings of a subsidiary.

Uncertain Tax Positions

In the normal course of business, we are audited by federal, state and foreign tax authorities, and are periodically challenged regarding the amount of taxes due. These challenges relate primarily to the timing and amount of deductions and the allocation of income among various tax jurisdictions. Management believes our tax positions comply with applicable tax law and we intend to defend our positions. We recognize the benefit of tax positions when a benefit is more likely than not (i.e., greater than 50% likely) to be sustained on its technical merits. Recognized tax benefits are measured at the largest amount that is more likely than not to be sustained, based on cumulative probability, in final settlement of the position. Our effective tax rate in a given period could be impacted if, upon final resolution with taxing authorities, we prevail on positions for which unrecognized tax benefits have been accrued, or are required to pay amounts in excess of accrued unrecognized tax benefits.

As of December 30, 2016, the aggregate amount of global uncertain unrecognized tax benefits and related interest and penalties recorded was approximately \$6.5 million, of which \$2.9 million was acquired in connection with the Power Solutions acquisition and is fully indemnified by the seller and offset by an indemnification asset recorded on the balance sheet. The uncertain tax positions cover a range of issues, including intercompany charges and withholding taxes, and involve various taxing jurisdictions.

New Accounting Pronouncements

For information about recently issued accounting pronouncements, see Note 1. "Summary of Significant Accounting Policies" in the Notes to the Consolidated Financial Statements.

Table of Contents

ANIXTER INTERNATIONAL INC.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We are exposed to the impact of fluctuations in foreign currencies and interest rate changes, as well as changes in the market value of our financial instruments. We periodically enter into derivatives in order to minimize these risks, but not for trading purposes. Our strategy is to negotiate terms for our derivatives and other financial instruments to be highly effective, such that the change in the value of the derivative perfectly offsets the impact of the underlying hedged item (e.g., various foreign currency denominated accounts). The counterparties to our derivative contracts have investment-grade credit ratings. We expect the creditworthiness of our counterparties to remain intact through the term of the transactions. We regularly monitor the creditworthiness of our counterparties to ensure no issues exist which could affect the value of the derivatives. Any resulting gains or losses from hedge ineffectiveness are reflected directly in "Other, net" in our Consolidated Statements of Income. During periods of volatility in foreign exchange rates, we can be subject to significant foreign exchange gains and losses since there is a time lag between when we incur the foreign exchange exposure and when we have the information to properly hedge the exposure.

Foreign Exchange Risk

Historically, our foreign currency-denominated sales have been approximately one-third of consolidated sales. Our exposure to currency rate fluctuations primarily relate to Europe (euro and British pound) and Canada (Canadian dollar). We also have exposure to currency rate fluctuations related to more volatile markets including Argentina (peso), Australia (dollar), Brazil (real), Chile (peso), Colombia (peso), Mexico (peso), Turkey (lira) and Venezuela (bolivar).

Our investments in several subsidiaries are recorded in currencies other than the USD. As these foreign currency denominated investments are translated at the end of each period during consolidation using period-end exchange rates, fluctuations of exchange rates between the foreign currency and the USD increase or decrease the value of those investments. These fluctuations and the results of operations for foreign subsidiaries, where the functional currency is not the USD, are translated into USD using the average exchange rates during the year, while the assets and liabilities are translated using period end exchange rates. The assets and liabilities-related translation adjustments are recorded as a separate component of Stockholders' Equity, "Foreign currency translation," which is a component of "Accumulated other comprehensive loss" in our Consolidated Balance Sheets. In addition, as our subsidiaries maintain investments denominated in currencies other than local currencies, exchange rate fluctuations will occur. Borrowings are raised in certain foreign currencies to minimize the exchange rate translation adjustment risk.

Several of our subsidiaries conduct business in a currency other than the legal entity's functional currency.

Transactions may produce receivables or payables that are fixed in terms of the amount of foreign currency that will be received or paid. A change in exchange rates between the functional currency and the currency in which a transaction is denominated increases or decreases the expected amount of functional currency cash flows upon settlement of the transaction. That increase or decrease in expected functional currency cash flows is a foreign exchange transaction gain or loss that is included in "Other, net" in the Consolidated Statements of Income.

We purchase foreign currency forward contracts to minimize the effect of fluctuating foreign currency-denominated accounts on our reported income. The foreign currency forward contracts are not designated as hedges for accounting purposes. At December 30, 2016 and January 1, 2016, the gross notional amount of the foreign currency forward contracts outstanding was approximately \$114.8 million and \$196.1 million, respectively. All of our foreign currency forward contracts are subject to master netting arrangements with our counterparties. As a result, at December 30, 2016 and January 1, 2016, the net notional amount of the foreign currency forward contracts outstanding was approximately \$90.9 million and \$132.8 million, respectively. We prepared a sensitivity analysis of our foreign currency forward contracts assuming a 10% adverse change in the value of foreign currency contracts outstanding. The hypothetical adverse changes would have resulted in us recording a \$15.7 million and \$16.8 million loss in fiscal 2016 and 2015, respectively. However, as these forward contracts are intended to be perfectly effective economic hedges, we would record offsetting gains as a result of the remeasurement of the underlying foreign currency denominated monetary accounts being hedged.

Venezuela Foreign Exchange

Our functional currency for financial reporting purposes in Venezuela is the USD. In prior years, inventory is sourced from vendors in the U.S. (including Anixter Inc., the parent company of the Venezuelan subsidiary) and paid for in USD, while sales to customers are invoiced and collected in the local bolivar currency. Local government restrictions have made it increasingly difficult to transfer cash out of Venezuela. To prevent having further cash trapped in Venezuela and reduce our exposure to the bolivar we now export to customers located in Venezuela. These export sales are invoiced and payable to us in USD.

In the first quarter of 2014, the Venezuelan government changed its policies regarding the bolivar, which required us to use the SICAD rate of 49.0 bolivars to one USD to repatriate cash from Venezuela. As a result of this change, we recorded a \$6.9 million pre-tax foreign exchange loss in the first quarter of 2014.

Table of Contents

ANIXTER INTERNATIONAL INC.

In the first quarter of 2015, the Venezuelan government changed its policy again regarding the bolivar, which required us to use the SIMADI a "completely free floating" rate. As a result, the Venezuelan bolivar was devalued from approximately 52.0 bolivars to one USD to approximately 200.0 bolivars to one USD in the year ended January 1, 2016. Due to this devaluation, we recorded a foreign exchange loss of \$0.7 million for the year ended January 1, 2016. During 2016, the Venezuelan bolivar was devalued from approximately 200.0 bolivars to one USD to approximately 673.0 bolivars to one USD, which we believe will be the rate available to us in the event we repatriate cash from Venezuela. This devaluation did not have a material impact on our Consolidated Financial Statements as we have significantly less exposure in Venezuela in 2016.

Argentina Foreign Exchange

Our functional currency for financial reporting purposes in Argentina is USD. Inventory is sourced from vendors in the U.S. (including Anixter Inc., the parent company of the Argentina subsidiary) and paid for in USD. Sales to customers are invoiced in the local peso currency and pesos are collected from customers to settle outstanding receivables.

In the first quarter of 2014, the Argentine peso was devalued from 6.5 pesos to one USD to approximately 8.0 pesos to one USD after the central bank scaled back its intervention in a bid to preserve USD cash reserves. As a result of the devaluation, we recorded a \$1.1 million pre-tax foreign exchange loss in the first quarter of 2014.

In the fourth quarter of 2015, the Argentine peso was devalued by approximately 40% against the USD due to the loosening of currency controls, resulting in a pre-tax foreign exchange loss of \$2.9 million.

Fair Market Value of Debt Instruments

The fair value of our debt instruments is measured using observable market information which would be considered Level 2 in the fair value hierarchy.

The carrying value of our fixed-rate debt (specifically, Notes due 2023, Notes due 2021, and Notes due 2019) was \$1,089.7 million and \$1,087.5 million at December 30, 2016 and January 1, 2016, respectively. The fair value of the fixed-rate debt instruments was \$1,435.6 million and \$1,669.5 million at December 30, 2016 and January 1, 2016, respectively. Our Notes due 2023, Notes due 2021 and Notes due 2019 bear interest at fixed rates of 5.50%, 5.125% and 5.625%, respectively. Therefore, changes in interest rates do not affect interest expense incurred on the fixed-rate debt but interest rates do affect the fair value. If interest rates were to increase by 10.0%, the fair market value of the fixed-rate debt would decrease by 1.6% and 2.2% at December 30, 2016 and January 1, 2016, respectively. If interest rates were to decrease by 10.0%, the fair market value of the fixed-rate debt would increase by 1.7% and 2.4% at December 30, 2016 and January 1, 2016, respectively.

Changes in the fair market value of our debt do not affect the reported results of operations unless we are retiring such obligations prior to their maturity. This analysis did not consider the effects of a changed level of economic activity that could exist in such an environment and certain other factors. Further, in the event of a change of this magnitude, management would likely take actions to further mitigate its exposure to possible changes. However, due to the uncertainty of the specific actions that would be taken and their possible effects, this sensitivity analysis assumes no changes in our financial structure.

See Note 6. "Debt" in the Notes to the Consolidated Financial Statements for further detail on outstanding debt obligations.

FORWARD-LOOKING INFORMATION

The Management's Discussion and Analysis of Financial Condition and Results of Operations may contain various "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements can be identified by the use of forward-looking terminology such as "believe," "expect," "intend," "anticipate," "contemplate," "estimate," "plan," "project," "should," "may," "will," or the negative thereof or other variations thereon or comparable terminology indicating our expectations or beliefs concerning future events. We caution that such statements are qualified by important factors that could cause actual results to differ materially from those in the forward-looking statements, a number of which are identified in this report under Item 1A. "Risk Factors." The information contained in this

financial review should be read in conjunction with the Consolidated Financial Statements, including the notes thereto, on pages 34 to 78 of this Report.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders

Anixter International Inc.:

We have audited the accompanying consolidated balance sheets of Anixter International Inc. as of December 30, 2016 and January 1, 2016 and the related consolidated statements of income, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended December 30, 2016. Our audits also included the financial statement schedules listed in the Index at Item 15(a)(2). These financial statements and schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Anixter International Inc. at December 30, 2016 and January 1, 2016, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 30, 2016, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedules, when considered in relation to the basic financial statements taken as a whole, present fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Anixter International Inc.'s internal control over financial reporting as of December 30, 2016, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 23, 2017 expressed an unqualified opinion thereon.

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization: Anixter International Inc. and its subsidiaries (collectively referred to as "Anixter" or the "Company") and sometimes referred to in these Notes to the Consolidated Financial Statements as "we", "our", "us", or "ourselves", formerly known as Itel Corporation, which was incorporated in Delaware in 1967, is a leading distributor of enterprise cabling and security solutions, electrical and electronic wire and cable products and utility power solutions through Anixter Inc. and its subsidiaries.

Basis of presentation: The Consolidated Financial Statements include the accounts of Anixter International Inc. and its subsidiaries. Our fiscal year ends on the Friday nearest December 31 and includes 52 weeks in 2016, 2015 and 2014. Certain prior period amounts have been reclassified to conform to the current year presentation.

In 2015, we sold the OEM Supply - Fasteners ("Fasteners") business, as described in Note 2. "Discontinued Operations". The assets and liabilities and operating results of the Fasteners business are presented as "discontinued operations" in our Consolidated Financial Statements, and all prior periods have been revised to reflect this classification.

In the fourth quarter of 2015, in connection with the acquisition of Power Solutions, we renamed our legacy Enterprise Cabling and Security Solutions segment to Network & Security Solutions ("NSS"). The low voltage business of Power Solutions was combined into our historical Electrical and Electronic Wire and Cable ("W&C") segment to form the Electrical & Electronic Solutions ("EES") segment. The high voltage business of Power Solutions formed the Utility Power Solutions ("UPS") segment.

Use of estimates: The preparation of financial statements in conformity with generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. Our significant estimates include allowance for doubtful accounts, inventory obsolescence, pension obligations, goodwill and indefinite-lived intangible assets, deferred tax assets and uncertain tax positions.

Cash and cash equivalents: Cash equivalents consist of short-term, highly liquid investments that mature within three months or less. Such investments are stated at cost, which approximates fair value.

Receivables and allowance for doubtful accounts: We carry our accounts receivable at their face amounts less an allowance for doubtful accounts, which was \$43.6 million and \$37.5 million at the end of 2016 and 2015, respectively. On a regular basis, we evaluate our accounts receivable and establish the allowance for doubtful accounts based on a combination of specific customer circumstances, as well as credit conditions and history of write-offs and collections. The provision for doubtful accounts was \$20.1 million, \$25.8 million and \$11.4 million in 2016, 2015 and 2014, respectively. A receivable is considered past due if payments have not been received within the agreed upon invoice terms. Receivables are written off and deducted from the allowance account when the receivables are deemed uncollectible.

Inventories: Inventories, consisting primarily of purchased finished goods, are stated at the lower of cost or market. Cost is determined using the average-cost method. We have agreements with some of our vendors that provide a right to return products. This right is typically limited to a small percentage of our total purchases from that vendor. Such rights provide that we can return slow-moving product and the vendor will replace it with faster-moving product chosen by us. Some vendor agreements contain price protection provisions that require the manufacturer to issue a credit in an amount sufficient to reduce our current inventory carrying cost down to the manufacturer's current price. We consider these agreements in determining our reserve for obsolescence.

At December 30, 2016 and January 1, 2016, we reported inventory of \$1,178.3 million and \$1,182.6 million, respectively (net of inventory reserves of \$48.3 million and \$42.4 million, respectively). Each quarter we review for excess inventories and make an assessment of the net realizable value. There are many factors that management considers in determining whether or not the amount by which a reserve should be established. These factors include the following:

Return or rotation privileges with vendors

Price protection from vendors

Expected future usage

Whether or not a customer is obligated by contract to purchase the inventory

Current market pricing

Historical consumption experience

Risk of obsolescence

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

If circumstances related to the above factors change, there could be a material impact on the net realizable value of the inventories.

Property and equipment: At December 30, 2016, net property and equipment consisted of \$101.9 million of equipment and computer software, \$36.0 million of buildings and leasehold improvements and \$2.4 million of land. At January 1, 2016, net property and equipment consisted of \$90.4 million of equipment and computer software, \$40.6 million of buildings and leasehold improvements and \$0.8 million of land. Equipment and computer software are recorded at cost and depreciated by applying the straight-line method over their estimated useful lives, which range from 3 to 20 years. Buildings are recorded at cost and depreciated by applying the straight-line method over their estimated useful lives, which range from 7 to 40 years. Leasehold improvements are depreciated over the useful life or over the term of the related lease, whichever is shorter. Upon sale or retirement, the cost and related depreciation are removed from the respective accounts and any gain or loss is included in income. Maintenance and repair costs are expensed as incurred. Depreciation expense charged to continuing operations, including an immaterial amount of capital lease depreciation, was \$27.9 million, \$22.2 million and \$20.0 million in 2016, 2015 and 2014, respectively. We continually evaluate whether events or circumstances have occurred that would indicate the remaining useful lives of our property and equipment warrant revision or that the remaining balance of such assets may not be recoverable. In order to measure an impairment loss of property and equipment, we estimate the fair value by using an orderly liquidation valuation. An orderly liquidation value is the amount that could be realized from a liquidation sale, given a reasonable period of time to find a purchaser (or purchasers), with the seller being compelled to sell the asset in the existing condition where it is located, as of a specific date, assuming the highest and best use of the asset by market participants. The valuation method also considers that it is physically possible, legally permissible and financially feasible to use the asset at the measurement date. The inputs used for the valuation include significant unobservable inputs, or Level 3 inputs, as described in the accounting fair value hierarchy, based on our assumptions about the assumptions market participants would use. A second step of the analysis is performed by comparing the orderly liquidation value to the carrying amount of that asset. The orderly liquidation values are applied against the original cost of the assets and the impairment loss measured as the difference between the liquidation value of the assets and the net book value of the assets.

Costs for software developed for internal use are capitalized when the preliminary project stage is complete and we have committed funding for projects that are likely to be completed. Costs that are incurred during the preliminary project stage are expensed as incurred. Once the capitalization criteria has been met, external direct costs of materials and services consumed in developing internal-use computer software, payroll and payroll-related costs for employees who are directly associated with and who devote time to the internal-use computer software project (to the extent of their time spent directly on the project) and interest costs incurred when developing computer software for internal use are capitalized. At December 30, 2016 and January 1, 2016, capitalized costs, net of accumulated amortization, for software developed for internal use were approximately \$57.7 million and \$49.5 million, respectively. Amortization expense charged to continuing operations for capitalized costs was \$3.7 million, \$2.8 million and \$2.5 million in 2016, 2015 and 2014, respectively. Interest expense incurred in connection with the development of internal use software is capitalized based on the amounts of accumulated expenditures and the weighted-average cost of borrowings for the period. Interest costs capitalized for fiscal 2016, 2015 and 2014 were \$0.7 million, \$1.2 million and \$0.8 million, respectively.

Goodwill: We evaluate goodwill for impairment annually at the beginning of the third quarter and when events or changes in circumstances indicate the carrying value of these assets might exceed their current fair values. We assess goodwill for impairment by first performing a qualitative assessment, which considers specific factors, based on the weight of evidence, and the significance of all identified events and circumstances in the context of determining whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If it is determined that it is more likely than not that the fair value of a reporting unit is less than its carrying amount using the qualitative assessment, we perform the two-step impairment test. From time to time, we may also bypass the

qualitative assessment and proceed directly to the two-step impairment test. The first step of the impairment test is to identify a potential impairment by comparing the fair value of a reporting unit with its carrying amount. The estimates of fair value of a reporting unit are determined using the income approach and/or the market approach as described below. If step one of the test indicates a carrying value above the estimated fair value, the second step of the goodwill impairment test is performed by comparing the implied fair value of the reporting unit's goodwill with the carrying amount of that goodwill. The implied residual value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination.

As a result of the reclassification of net sales of various product categories between our segments during the first half of 2016, we reassigned the carrying amount of goodwill based on the relative fair value of our reporting units. We then performed the quantitative two-step impairment test of goodwill for all reporting units before and after the change in composition of our segments utilizing a combination of the income and market approaches, both of which are broadly defined below. We concluded that no impairment of goodwill existed and the carrying amount of goodwill to be fully recoverable.

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

In connection with our annual assessment of goodwill at the beginning of the third quarter of 2016, we bypassed the qualitative assessment and performed a quantitative test for all reporting units and utilized a combination of the income and market approaches, both of which are broadly defined below. As a result of this assessment, we concluded that no impairment existed and the carrying amount of goodwill to be fully recoverable.

The income approach is a quantitative evaluation to determine the fair value of the reporting unit. Under the income approach we determine the fair value based on estimated future cash flows discounted by an estimated weighted-average cost of capital plus a forecast risk, which reflects the overall level of inherent risk of the reporting unit and the rate of return a market participant would expect to earn. The inputs used for the income approach were significant unobservable inputs, or Level 3 inputs, as described in the accounting fair value hierarchy. Estimated future cash flows were based on our internal projection models, industry projections and other assumptions deemed reasonable by management.

The market approach measures the fair value of a reporting unit through the analysis of recent sales, offerings, and financial multiples (sales or earnings before interest, tax, depreciation and amortization ("EBITDA")) of comparable businesses. Consideration is given to the financial conditions and operating performance of the reporting unit being valued relative to those publicly-traded companies operating in the same or similar lines of business.

During the fourth quarter, we performed an interim goodwill impairment assessment for our NSS, EES and UPS reporting units. Although all of our reporting units have fair values that currently exceed the underlying carrying values, the margin of fair value over carrying value of our NSS and UPS reporting units were greater than 10%, while the fair value of our EES reporting unit was less than 10% over its carrying value due to the combined effects of the weaker industrial economy and lower commodity prices on a year over year basis. As a result, this unit is more susceptible to impairment risk from further adverse macroeconomic conditions. Any such adverse changes in the future could reduce the underlying cash flows used to estimate fair values and could result in a decline in fair value that could trigger future impairment charges relating to the EES reporting unit.

Intangible assets: As of December 30, 2016 and January 1, 2016, our intangible asset balances are as follows:

(In millions)	Average useful life (in years)	December 30, 2016		January 1, 2016	
		Gross carrying amount	Accumulated amortization	Gross carrying amount	Accumulated amortization
Customer relationships	6-20	\$458.5	\$ (80.1)	\$461.4	\$ (48.4)
Exclusive supplier agreement	21	22.1	(2.4)	22.0	(1.6)
Trade names	3-10	12.6	(7.5)	13.3	(5.8)
Trade names	Indefinite	10.6	—	10.6	—
Non-compete agreements	1-5	6.2	(4.6)	4.5	(2.2)
Total		\$510.0	\$ (94.6)	\$511.8	\$ (58.0)

We continually evaluate whether events or circumstances have occurred that would indicate the remaining estimated useful lives of our intangible assets warrant revision or that the remaining balance of such assets may not be recoverable. For definite-lived intangible assets, we use an estimate of the related undiscounted cash flows over the remaining life of the asset in measuring whether the asset is recoverable. Trade names that have been identified to have indefinite lives are not being amortized based on our expectation that the trade name products will generate future cash flows for us for the foreseeable future. We expect to maintain use of these trade names on existing products.

Our definite-lived intangible assets are primarily related to customer relationships. In order to measure an impairment loss of customer relationships, we estimate the fair value by using an excess earnings model, a form of the income approach. The analysis requires us to make various judgmental assumptions, including assumptions about future cash flows based on projected growth rates of revenue and expense, expectations of rates of customer attrition and working capital needs. The assumptions about future cash flows and growth rates are based on management's forecast of the

asset group. The key inputs utilized in determining the fair value of customer relationships include significant unobservable inputs, or Level 3 inputs, as described in the accounting fair value hierarchy. Inputs included discount rates derived from an estimated weighted-average cost of capital, which reflected the overall level of inherent risk of the asset group and the rate of return a market participant would expect to earn, as well as customer attrition rates.

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Intangible amortization expense is expected to average \$31.8 million per year for the next five years, of which \$16.2 million and \$11.9 million relate to intangible assets recorded for the Power Solutions and Tri-Ed acquisitions, respectively. See Note 3. "Business Combinations" for further details. Our definite lived intangible assets are amortized over a straight line basis as it approximates the customer attrition patterns and best estimates the use pattern of the assets.

Other, net: The following represents the components of "Other, net" as reflected in the Consolidated Statements of Income:

(In millions)	Twelve Months Ended		
	December 31, 2016	January 1, 2016	January 2, 2015
Other, net:			
Foreign exchange	\$(10.8)	\$(14.9)	\$(8.2)
Foreign exchange devaluations	—	(3.6)	(8.0)
Cash surrender value of life insurance policies	1.2	(0.8)	0.8
Other	0.5	(1.8)	(0.6)
Total other, net	\$(9.1)	\$(21.1)	\$(16.0)

In the fourth quarter of 2015, the Argentine peso was devalued by approximately 40% against the U.S. dollar ("USD") due to the loosening of currency controls. In the first quarter of 2015, the Venezuelan government changed its policy again regarding the bolivar, which required us to use the Sistema Marginal de Divisas or Marginal Exchange System ("SIMADI") a "completely free floating" rate. As a result, the Venezuelan bolivar was devalued from approximately 52.0 bolivars to one USD to approximately 200.0 bolivars to one USD in the year ended January 1, 2016. Due to these devaluations, we recorded a foreign exchange loss of \$3.6 million for the year ended January 1, 2016. During 2016, the Venezuelan bolivar was devalued from approximately 200.0 bolivars to one USD to approximately 673.0 bolivars to one USD, which we believe will be the rate available to us in the event we repatriate cash from Venezuela. This devaluation did not have a material impact on our Consolidated Financial Statements as we have significantly less exposure in Venezuela in 2016.

In the first quarter of 2014, the Venezuelan government changed its policies regarding the bolivar, which required us to use the Complementary System for the Administration of Foreign Currency ("SICAD") rate of 49.0 bolivars to one USD to repatriate cash from Venezuela. In the first quarter of 2014, the Argentine peso was also devalued from 6.5 pesos to one USD to approximately 8.0 pesos to one USD after the central bank scaled back its intervention in a bid to preserve USD cash reserves. As a result of these devaluations, we recorded foreign exchange losses in these two countries of \$8.0 million in the first quarter of 2014.

Due to the strengthening of the USD against certain foreign currencies, primarily in Europe and Latin America, we recorded additional foreign exchange losses of \$10.8 million, \$14.9 million and \$8.2 million in 2016, 2015 and 2014, respectively.

Several of our subsidiaries conduct business in a currency other than the legal entity's functional currency.

Transactions may produce receivables or payables that are fixed in terms of the amount of foreign currency that will be received or paid. A change in exchange rates between the functional currency and the currency in which a transaction is denominated increases or decreases the expected amount of functional currency cash flows upon settlement of the transaction. The increase or decrease in expected functional currency cash flows is a foreign currency transaction gain or loss that is included in "Other, net" in the Consolidated Statements of Income.

We purchase foreign currency forward contracts to minimize the effect of fluctuating foreign currency-denominated accounts on our reported income. The foreign currency forward contracts are not designated as hedges for accounting purposes. Our strategy is to negotiate terms for our derivatives and other financial instruments to be highly effective, such that the change in the value of the derivative perfectly offsets the impact of the underlying hedged item (e.g., various foreign currency-denominated accounts). Our counterparties to foreign currency forward contracts have

investment-grade credit ratings. We expect the creditworthiness of our counterparties to remain intact through the term of the transactions. We regularly monitor the creditworthiness of our counterparties to ensure no issues exist which could affect the value of the derivatives.

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

We do not hedge 100% of our foreign currency-denominated accounts. In addition, the results of hedging can vary significantly based on various factors, such as the timing of executing the foreign currency forward contracts versus the movement of the currencies as well as the fluctuations in the account balances throughout each reporting period. The fair value of the foreign currency forward contracts is based on the difference between the contract rate and the current exchange rate. The fair value of the foreign currency forward contracts is measured using observable market information. These inputs would be considered Level 2 in the fair value hierarchy. At December 30, 2016 and January 1, 2016, foreign currency forward contracts were revalued at then-current foreign exchange rates with the changes in valuation reflected directly in "Other, net" in the Consolidated Statements of Income offsetting the transaction gain/loss recorded on the foreign currency-denominated accounts. At December 30, 2016 and January 1, 2016, the gross notional amount of the foreign currency forward contracts outstanding was approximately \$114.8 million and \$196.1 million, respectively. At December 30, 2016 and January 1, 2016, the net notional amount of the foreign currency forward contracts outstanding was approximately \$90.9 million and \$132.8 million, respectively. While all of our foreign currency forward contracts are subject to master netting arrangements with our counterparties, we present our assets and liabilities related to derivative instruments on a gross basis within the Consolidated Balance Sheets. The gross fair value of our derivative assets and liabilities are immaterial.

The combined effect of changes in both the equity and bond markets resulted in changes in the cash surrender value of our company owned life insurance policies associated with our sponsored deferred compensation program.

Fair value measurement: Our assets and liabilities measured at fair value on a recurring basis consist of foreign currency forward contracts and the assets of our defined benefit plans. The fair value of the foreign currency forward contracts is discussed above in the section titled "Other, net." The fair value of the assets of our defined benefit plans is discussed in Note 9. "Pension Plans, Post-Retirement Benefits and Other Benefits". Fair value disclosures of debt are discussed in Note 6. "Debt".

We measure the fair values of goodwill, intangible assets and property and equipment on a nonrecurring basis if required by impairment tests applicable to these assets. The fair value measurements of goodwill, intangible assets and property and equipment are discussed above.

The inputs used in the determination of fair values are categorized according to the fair value hierarchy as being Level 1, Level 2 or Level 3. In general, fair values determined by Level 1 inputs use quoted prices in active markets for identical assets or liabilities. Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets or liabilities in active markets, and other inputs such as interest rates and yield curves that are observable at commonly quoted intervals. Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset or liability. In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset or liability.

Revenue recognition: Sales to customers, resellers and distributors and related cost of sales are recognized upon transfer of title, which generally occurs upon shipment of products, when the price is fixed and determinable and when collectability is reasonably assured. Revenue is recorded net of sales taxes, customer discounts, rebates and similar charges. We also establish a reserve for returns and credits provided to customers in certain instances. The reserve is established based on an analysis of historical experience and was \$34.9 million and \$29.1 million at December 30, 2016 and January 1, 2016, respectively.

In connection with the sales of our products, we often provide certain supply chain services. These services are provided exclusively in connection with the sales of products, and as such, the price of such services is included in the price of the products delivered to the customer. We do not account for these services as a separate element, as the services do not have stand-alone value and cannot be separated from the product element of the arrangement. There are no significant post-delivery obligations associated with these services.

In instances where we do not have goods in stock and delivery times are critical, product is purchased from the manufacturer and drop-shipped to the customer. We generally take title to the goods when shipped by the manufacturer and then we bill the customer for the product upon transfer of the title to the customer.

Sales taxes: Sales tax amounts collected from customers for remittance to governmental authorities are presented on a net basis in the Consolidated Statements of Income.

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Advertising and sales promotion: Advertising and sales promotion costs are expensed as incurred. Advertising and promotion costs included in operating expenses on the Consolidated Statements of Income were \$12.4 million, \$13.2 million and \$12.6 million in 2016, 2015 and 2014, respectively. The majority of the advertising and sales promotion costs are recouped through various cooperative advertising programs with vendors.

Shipping and handling fees and costs: We include shipping and handling fees billed to customers in net sales.

Shipping and handling costs associated with outbound freight are included in "Operating expenses" on the Consolidated Statements of Income, which were \$113.9 million, \$102.7 million and \$99.5 million in 2016, 2015 and 2014, respectively.

Stock-based compensation: We measure the cost of all share-based payments to employees, including grants of employee stock options, using a fair-value-based method. Compensation costs are determined based on the fair value at the grant date and amortized over the respective vesting period representing the requisite service period.

Accumulated other comprehensive loss: We accumulate unrealized gains and losses in "Accumulated other comprehensive loss" ("AOCI"). These changes are also reported in "Other comprehensive loss" on the Consolidated Statements of Comprehensive Income. These include unrealized gains and losses related to our defined benefit obligations, certain immaterial derivative transactions that have been designated as cash flow hedges and foreign currency translation. See Note 9. "Pension Plans, Post-Retirement Benefits and Other Benefits" for pension related amounts reclassified into net income.

Our investments in several subsidiaries are recorded in currencies other than the USD. As these foreign currency denominated investments are translated at the end of each period during consolidation using period-end exchange rates, fluctuations of exchange rates between the foreign currency and the USD increase or decrease the value of those investments. These fluctuations and the results of operations for foreign subsidiaries, where the functional currency is not the USD, are translated into USD using the average exchange rates during the periods reported, while the assets and liabilities are translated using period-end exchange rates. The assets and liabilities-related translation adjustments are recorded as a separate component of AOCI, "Foreign currency translation." In addition, as our subsidiaries maintain investments denominated in currencies other than local currencies, exchange rate fluctuations will occur.

Borrowings are raised in certain foreign currencies to minimize the exchange rate translation adjustment risk.

Income taxes: Deferred taxes are recognized for the future tax effects of temporary differences between financial and income tax reporting based upon enacted tax laws and rates. We maintain valuation allowances to reduce deferred tax assets if it is more likely than not that some portion or all of the deferred tax asset will not be realized based on available evidence. We recognize the benefit of tax positions when a benefit is more likely than not (i.e., greater than 50% likely) to be sustained on its technical merits. Recognized tax benefits are measured at the largest amount that is more likely than not to be sustained, based on cumulative probability, in final settlement of the position.

Net income per share: Diluted net income per share reflects the potential dilution that would occur if securities or other contracts to issue common stock were exercised or converted into common stock.

We had 0.2 million in 2016 and 2015 and 0.3 million in 2014, of additional shares related to stock options and stock units included in the computation of diluted earnings per share because the effect of those common stock equivalents were dilutive during these periods. We exclude antidilutive stock options and units from the calculation of weighted-average shares for diluted earnings per share. For 2016, 2015 and 2014, the antidilutive stock options and units were immaterial.

Recently issued and adopted accounting pronouncements: In August 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2016-15, Statement of Cash Flows: Classification of Certain Cash Receipts and Cash Payments, which makes eight targeted changes to how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The update provides specific guidance on cash flow classification issues that are not currently addressed by U.S. Generally Accepted Accounting Principles and thereby reduces the current diversity in practice. The standard is effective for our financial statements issued for fiscal

years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted. We adopted ASU 2016-15 as of September 30, 2016 on a retrospective basis for all cash flow statement periods presented. The adoption of this standard had no impact on the Company's previously reported cash flows.

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Recently issued accounting pronouncements not yet adopted: In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers, and issued subsequent amendments to the initial guidance in August 2015, March 2016, April 2016 and May 2016 within ASU 2015-14, ASU 2016-08, ASU 2016-10 and ASU 2016-12, respectively. The core principle of this new revenue recognition guidance is that a company will recognize revenue when promised goods or services are transferred to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. The new guidance defines a five-step process to achieve this core principle, and in doing so, it is possible more judgment and estimates may be required within the revenue recognition process than are required under current guidance, including identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation, among others. The new guidance also requires more detailed disclosures to enable users of financial statements to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. The new guidance provides for two transition methods: a full retrospective approach and a modified retrospective approach. We will adopt the new revenue recognition guidance in the first quarter of our fiscal year 2018 and anticipate utilizing the modified retrospective method of adoption. We are continuing to evaluate the impact of this guidance on our consolidated results of operations and financial condition. We have developed a multi-phase plan to assess the impact of adoption on our material revenue streams, evaluate the new disclosure requirements, and identify and implement appropriate changes to our business processes, systems and controls to support recognition and disclosure under the new guidance. We are currently in the process of completing our initial analysis and performing detailed reviews of significant contracts to determine any adjustments necessary to existing accounting policies and to support an evaluation of the impact on our results of operations and financial condition.

In February 2016, the FASB issued ASU 2016-02, Leases, which requires lessees to recognize assets and liabilities on the balance sheet for the rights and obligations created by all leases with terms of more than 12 months. The guidance modifies the classification criteria and the accounting for sales-type and direct financing leases for lessors. The standard is effective for our financial statements issued for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Early adoption is permitted. We are currently evaluating the impact of adoption of this ASU on our Consolidated Financial Statements.

In March 2016, the FASB issued ASU 2016-09, Compensation - Stock Compensation: Improvements to Employee Share-Based Payment Accounting, which changes how companies account for certain aspects of share-based payments to employees. The new guidance requires all income tax effects of awards to be recognized in the income statement when the awards vest or are settled, allows an employer to repurchase more of an employee's shares than previously allowed for tax withholding purposes without triggering liability accounting, allows a company to make a policy election to account for forfeitures as they occur, and eliminates the requirement that excess tax benefits be realized before companies can recognize them. The new guidance also requires excess tax benefits and tax shortfalls to be presented on the cash flow statement as an operating activity rather than as a financing activity, and clarifies that cash paid to a tax authority when shares are withheld to satisfy its statutory income tax withholding obligation are to be presented as a financing activity. The standard is effective for our financial statements issued for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years. Early adoption is permitted. We are currently evaluating the impact of adoption of this ASU on our Consolidated Financial Statements.

In June 2016, the FASB issued ASU 2016-13, Financial Instruments - Credit Losses, which requires the measurement of expected credit losses for financial instruments held at the reporting date based on historical experience, current conditions and reasonable forecasts. The main objective of this ASU is to provide financial statement users with more decision-useful information about the expected credit losses on financial instruments and other commitments to extend credit held by a reporting entity at each reporting date. The standard is effective for our financial statements issued for fiscal years beginning after December 15, 2019, and interim periods within those fiscal years. Early adoption is permitted for fiscal years beginning after December 15, 2018, and interim periods within those fiscal

years. We are currently evaluating the impact of adoption of this ASU on our Consolidated Financial Statements. We do not believe that any other recently issued, but not yet effective, accounting pronouncements, if adopted, would have a material impact on our Consolidated Financial Statements or disclosures.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 2. DISCONTINUED OPERATIONS

On February 9, 2015, our Board of Directors approved the disposition of the OEM Supply - Fasteners ("Fasteners") business. On February 11, 2015, through our wholly-owned subsidiary Anixter Inc., we entered into a definitive asset purchase agreement with American Industrial Partners ("AIP") to sell the Fasteners business for \$380.0 million in cash, subject to certain post-closing adjustments. We closed the sale of the Fasteners business to AIP, excluding certain foreign locations which we subsequently sold, on June 1, 2015 and settled all net working capital adjustments relating to these entities in the fourth quarter of 2015. We received cash of \$371.8 million on the sale of the Fasteners business. Including transaction related costs of \$16.4 million, the sale resulted in a pre-tax gain of \$40.3 million (\$23.3 million, net of tax).

The assets and liabilities and operating results of the Fasteners business are presented as "discontinued operations" in our Consolidated Financial Statements. Current assets of discontinued operations are presented within "Other current assets" in the Consolidated Balance Sheets. Current and long-term liabilities of discontinued operations are presented within "Accrued expenses" and "Other liabilities," respectively, in the Consolidated Balance Sheets. The components of the results from discontinued operations reflected in our Consolidated Statements of Cash Flows were immaterial.

We allocated interest costs to discontinued operations as a result of the sale of the Fasteners business. There were no allocated interest costs in the year ended December 30, 2016. The allocated interest costs were \$1.1 million and \$3.6 million in the twelve months ended January 1, 2016 and January 2, 2015, respectively. This represents the amount of interest costs not directly attributable to our other operations that would not have been incurred if we had the proceeds from the sale of the Fasteners business at the beginning of the period.

In connection with the disposition of the Fasteners business, we recognized a pension curtailment gain of \$5.1 million and special termination benefit costs of \$0.3 million in 2015.

The following represents the components of the results from discontinued operations as reflected in our Consolidated Statements of Income:

(In millions)	Twelve Months Ended		
	December 30, 2016	January 1, 2016	January 2, 2015
Net sales	\$1.7	\$ 405.9	\$ 938.5
Operating (loss) income	\$(0.2)	\$ 14.2	\$ 50.8
(Loss) income from discontinued operations before income taxes	\$(0.1)	\$ 11.9	\$ 45.2
(Loss) gain on sale of discontinued operations	\$(0.7)	\$ 41.0	\$ —
Income tax (benefit) expense from discontinued operations	\$(0.2)	\$ 22.2	\$ 13.8
Net (loss) income from discontinued operations	\$(0.6)	\$ 30.7	\$ 31.4

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

As reflected on our Consolidated Balance Sheets as of December 30, 2016 and January 1, 2016, the components of assets and liabilities of the Fasteners businesses classified as "discontinued operations" are as follows:

(In millions)	December 30, 2016	January 1, 2016
Assets of discontinued operations:		
Accounts receivable	\$ 0.1	\$ 2.6
Inventories	—	1.2
Other current assets	0.1	—
Total assets of discontinued operations	\$ 0.2	\$ 3.8
Liabilities of discontinued operations:		
Accounts payable	\$ 0.2	\$ 1.3
Accrued expenses	2.2	4.0
Other liabilities	—	1.7
Total liabilities of discontinued operations	\$ 2.4	\$ 7.0

NOTE 3. BUSINESS COMBINATIONS**Power Solutions Acquisition**

On October 5, 2015, we completed the acquisition of the Power Solutions business ("Power Solutions") from HD Supply, Inc. in exchange for \$829.4 million (net of cash and outstanding checks of \$11.7 million). The acquisition was financed using borrowings under new financing arrangements and cash on hand.

Power Solutions was a compelling strategic acquisition for us that significantly enhances our competitive position in the electrical wire and cable business and further strengthens our customer and supplier value proposition. In addition to transforming our existing utility business into a leading North American distributor to the utility sector, this acquisition enables us to provide a full line electrical solution to our existing customers and provides us with broader access to the mid-size electrical construction market. The high voltage business of Power Solutions forms the Utility Power Solutions ("UPS") segment within our realigned reportable segments. The low voltage business of Power Solutions was combined into our historical Electrical and Electronic Wire and Cable ("W&C") segment to form the Electrical & Electronic Solutions ("EES") segment.

The following table sets forth the final purchase price allocation, as of the acquisition date, for Power Solutions. The purchase price allocation, including the valuation of the acquired leases, intangible assets and related deferred tax liabilities was completed in the third quarter of 2016.

(In millions)

Cash	\$ 11.7
Current assets, net	560.1
Property and equipment, net	30.6
Goodwill	194.8
Intangible assets	280.9
Non-current assets	5.6
Current liabilities	(234.1)
Non-current liabilities	(8.5)
Total purchase price	\$ 841.1

51

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Power Solutions goodwill of \$35.4 million and \$159.4 million was recorded in the EES and UPS reportable segments, respectively. The goodwill resulting from the acquisition largely consists of our expected future product sales and synergies from combining Power Solutions products with our existing product offerings. Other than \$81.0 million, the remaining goodwill is not deductible for tax purposes. The following table sets forth the components of identifiable intangible assets acquired and their estimated useful lives as of the date of the acquisition:

(In millions)	Average useful life (in years)	Fair value
Customer relationships	14-18	\$278.5
Non-compete agreements	1	2.4
Total intangible assets		\$280.9

Tri-Ed Acquisition

On September 17, 2014, we acquired 100% of the outstanding capital stock of Tri-Northern Acquisition Holdings, Inc. ("Tri-Ed"), a leading independent distributor of security and low-voltage technology products, from Tri-NVS Holdings, LLC for \$418.4 million (net of cash acquired of \$11.6 million and a favorable net assets adjustment of \$2.2 million). The acquisition was financed using borrowings under the 5-year senior unsecured revolving credit agreement, the accounts receivable securitization facility, available cash and the \$200.0 million term loan, as more fully described in Note 6. "Debt". A portion of the proceeds from a subsequent issuance of \$400.0 million principal amount of senior notes were used to repay certain incurred borrowings to finance the Tri-Ed acquisition.

The acquisition of Tri-Ed presents a strategic opportunity for us and our security business, consistent with our vision to create a leading global security platform and to accelerate profitable revenue growth. Through expanding our offering into highly complementary product lines, we believe our customers will benefit from a broader set of products and solutions in the areas of video, access control, fire/life safety, and intrusion detection. In addition, this transaction provides access to the residential construction end market at an attractive point in the recovery cycle as well as security integrators and dealers we do not currently service.

The following table sets forth the purchase price allocation, as of the acquisition date, for Tri-Ed. The purchase price allocation and valuation of the acquired intangible assets and related deferred tax liabilities was completed in the third quarter of 2015.

(In millions)	
Cash	\$11.6
Current assets, net	203.9
Property and equipment, net	2.7
Goodwill	242.2
Intangible assets	166.8
Current liabilities	(143.3)
Non-current liabilities	(56.1)
Total purchase price	\$427.8

All Tri-Ed goodwill, other assets and liabilities were recorded in the NSS reportable segment. The goodwill resulting from the acquisition largely consists of our expected future product sales and synergies from combining Tri-Ed's products with our existing product offerings. Other than \$12.2 million, the remaining goodwill is not deductible for tax purposes. The following table sets forth the components of identifiable intangible assets acquired and their estimated useful lives as of the date of the acquisition:

(In millions)	Average useful life (in years)	Fair value
Customer relationships	11-18	\$120.6
Exclusive supplier agreement	21	23.2
Trade names	Indefinite	10.6

Tri-Ed trade names	4	9.2
Non-compete agreements	4-5	3.2
Total intangible assets		\$166.8

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Since the date of acquisition, the Tri-Ed results are reflected in our Consolidated Financial Statements.
Pro Forma Information

The following unaudited pro forma information shows our results of operations as if the acquisitions of Power Solutions and Tri-Ed had been completed as of the beginning of fiscal 2014. Adjustments have been made for the pro forma effects of interest expense and deferred financing costs related to the financing for the acquisition, depreciation and amortization of tangible and intangible assets recognized as part of the business combinations, related income taxes and various other costs which would not have been incurred had we, Power Solutions and Tri-Ed operated as a combined entity (i.e., management fees paid by Power Solutions and Tri-Ed to their former owners).

(In millions, except per share amounts)	Twelve Months Ended	
	January 1, 2016	January 2, 2015
Net sales	\$7,733.4	\$7,831.0
Net income from continuing operations	\$107.1	\$180.5
Income per share from continuing operations:		
Basic	\$3.22	\$5.46
Diluted	\$3.20	\$5.41

NOTE 4. ACCRUED EXPENSES

Accrued expenses consisted of the following:

	December 31, 2016	January 1, 2016
(In millions)		
Salaries and fringe benefits	\$105.2	\$87.5
Other accrued expenses	150.3	157.8
Total accrued expenses	\$255.5	\$245.3

NOTE 5. RESTRUCTURING CHARGES

We consider restructuring activities to be programs whereby we fundamentally change our operations, such as closing and consolidating facilities, reducing headcount and realigning operations in response to changing market conditions. The following table summarizes activity related to liabilities associated with our restructuring activities:

	Restructuring Activity							
	Q2 2016		Q4 2015		Q2 2015	Q4 2012	Total	
	Plan		Plan		Plan	Plan		
	Employee-Related Costs (a)	Facility and Other Costs (b)	Employee-Related Costs (a)	Facility and Other Costs (b)	Employee-Related Costs (a)	Facility Exit and Other Costs (b)	Employee-Related Costs (a)	Facility Exit and Other Costs (b)
Balance at January 2, 2015	\$—	\$ —	\$ —	\$ —	\$ —	\$ 0.8	\$ —	\$ 0.8
Charges	—	—	3.2	0.2	4.8	—	8.0	0.2
Payments and other	—	—	(0.2)	—	(3.8)	(0.4)	(4.0)	(0.4)
Balance at January 1, 2016	\$—	\$ —	\$ 3.0	\$ 0.2	\$ 1.0	\$ 0.4	\$ 4.0	\$ 0.6
Charges	4.3	1.5	(0.4)	—	—	—	3.9	1.5
Payments and other	(2.4)	(0.3)	(1.3)	(0.2)	(0.7)	(0.2)	(4.4)	(0.7)
	\$1.9	\$ 1.2	\$ 1.3	\$ —	\$ 0.3	\$ 0.2	\$ 3.5	\$ 1.4

Balance at December 30,
2016

- (a) Employee-related costs primarily consist of severance benefits provided to employees who have been involuntarily terminated.
- (b) Facility exit and other costs primarily consist of lease termination costs.

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Q2 2016 Restructuring Plan

In the second quarter of 2016, we recorded a pre-tax charge of \$2.1 million, \$1.4 million, and \$2.2 million in our NSS, EES, and UPS segments, respectively, and an additional \$0.1 million at our corporate headquarters, primarily for severance-related expenses associated with a reduction of approximately 150 positions. The \$5.8 million charge primarily reflects actions we are taking to improve efficiencies in Canada and Latin America as well with the acquisition of Power Solutions. This charge was included in "Operating expenses" in our Consolidated Statement of Comprehensive Income (Loss) in the second quarter of 2016. The majority of the remaining charge included in accrued expenses of \$3.1 million as of December 30, 2016 is expected to be paid by the second quarter of 2017.

Q4 2015 Restructuring Plan

In the fourth quarter of 2015, we recorded a pre-tax charge of \$1.0 million, \$2.3 million and \$0.1 million in our NSS, EES, and UPS segments, respectively, primarily for severance-related expenses associated with a reduction of approximately 80 positions. The \$3.4 million charge primarily reflects actions we are taking to improve efficiencies in conjunction with the acquisition of Power Solutions. This charge was included in "Operating expenses" in our Consolidated Statement of Comprehensive Income (Loss) for fiscal year 2015. The majority of the remaining charge included in accrued expenses of \$1.3 million as of December 30, 2016 is expected to be paid by the second quarter of 2017.

Q2 2015 Restructuring Plan

In the second quarter of 2015, we recorded a pre-tax charge of \$3.0 million and \$2.2 million in our NSS and EES segments, respectively, and an additional \$0.1 million at our corporate headquarters for severance-related expenses associated with a reduction of approximately 100 positions. The \$5.3 million charge reflects actions we took to improve efficiencies and eliminate the stranded costs in conjunction with the sale of the Fasteners business. In the fourth quarter of 2015, we reduced the charge by \$0.5 million, primarily in our EES segment, due to a reduction in estimated future obligations under the plan. This charge was included in "Operating expenses" in our Consolidated Statement of Comprehensive Income (Loss) for fiscal year 2015. The majority of the remaining charge included in accrued expenses of \$0.3 million as of December 30, 2016 is expected to be paid by the second quarter of 2017.

Q4 2012 Restructuring Plan

In the fourth quarter of 2012, recognizing the ongoing challenging global economic conditions, we took aggressive actions to restructure our costs across all segments and geographies, resulting in a pre-tax charge of \$4.1 million and \$2.8 million in our NSS and EES segments, respectively. The \$6.9 million restructuring charge primarily consisted of severance-related expenses associated with a reduction of over 200 positions. This charge was included in "Operating expenses" in our Consolidated Statement of Income for fiscal year 2012. At December 30, 2016, the majority of the remaining charge included in accrued expenses of \$0.2 million is expected to be paid by the second quarter of 2017.

NOTE 6. DEBT

Debt is summarized below:

(In millions)	December 30, 2016	January 1, 2016
Long-term debt:		
5.50% Senior notes due 2023	\$ 346.3	\$345.8
5.125% Senior notes due 2021	395.7	394.9
5.625% Senior notes due 2019	347.7	346.8
Canadian term loan	95.4	172.9
Revolving lines of credit	197.1	390.1
Other	3.5	2.6
Unamortized deferred financing costs	(6.9)	(10.2)
Total long-term debt	\$ 1,378.8	\$1,642.9

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Certain debt agreements entered into by our operating subsidiaries contain various restrictions, including restrictions on payments to us. These restrictions have not had, nor are expected to have, an adverse impact on our ability to meet cash obligations. Anixter International Inc. has guaranteed substantially all of the debt of our subsidiaries.

Aggregate annual maturities of debt before accretion of debt discount as reflected on the Consolidated Balance Sheet at December 30, 2016 are as follows: 2017 - \$3.5 million, 2018 - \$0.0 million, 2019 - \$347.7 million, 2020 - \$292.5 million, 2021 - \$395.7 million and \$346.3 million thereafter.

Our average borrowings outstanding were \$1,649.0 million and \$1,338.4 million for the fiscal years ending December 30, 2016 and January 1, 2016, respectively. Our weighted-average cost of borrowings was 4.8% for the years ended December 30, 2016 and January 1, 2016, and 4.7% for the year ended January 2, 2015. Interest paid in 2016, 2015 and 2014 was \$75.7 million, \$56.0 million and \$37.6 million, respectively.

At the end of fiscal 2016, we had approximately \$352.0 million and \$132.5 million in available, committed, unused borrowings under our \$600.0 million U.S. accounts receivable asset based five-year revolving credit facility and \$150.0 million U.S. inventory asset based five-year revolving credit facility, respectively. All credit lines are with financial institutions with investment grade credit ratings. Borrowings under these facilities are limited based on the borrowing base criteria as described below.

We are in compliance with all of our covenant ratios and believe that there is adequate margin between the covenant ratios and the actual ratios given the current trends of the business.

Revolving Lines of Credit and Canadian Term Loan

On October 5, 2015, we, through our wholly-owned subsidiaries, Anixter Inc., Anixter Receivables Corporation ("ARC") and Anixter Canada Inc., entered into certain financing transactions in connection with the consummation of the acquisition of Power Solutions, including a U.S. accounts receivable asset based five-year revolving credit facility in an aggregate committed amount of \$600.0 million ("Receivables Facility"), a U.S. inventory asset based five-year revolving credit facility in an aggregate committed amount of \$150.0 million ("Inventory Facility") for a U.S. combined commitment of \$750.0 million ("Combined Commitment"). Additionally, we entered into a Canadian term loan facility in Canada in an aggregate principal amount of \$300.0 million Canadian dollars, the equivalent to approximately \$225.0 million USD, with a five-year maturity ("Canadian Term Loan"). In connection with these financing transactions, we incurred approximately \$6.7 million in financing transaction costs, of which approximately \$5.4 million was capitalized as deferred financing costs and will be amortized through maturity using the straight-line method, and approximately \$1.3 million was expensed as incurred. These financing arrangements are described in greater detail below.

Receivables Facility

On October 5, 2015, we, through our wholly-owned subsidiary, ARC, entered into a Receivables Facility, which is a receivables based five-year revolving credit facility in an aggregate committed amount of \$600.0 million. Borrowings under the Receivables Facility are secured by a first lien on all assets of ARC and supported by an unsecured guarantee by Anixter International, Inc.

The Receivables Facility has a borrowing base of 85% of eligible receivables, subject to certain reserves.

In connection with the entry into the Receivables Facility, Anixter Inc. and ARC terminated its existing Second Amended and Restated Receivables Purchase Agreement (the "RPA").

In connection with the entry into the Receivables Facility, on October 5, 2015, Anixter Inc. and ARC entered into a Third Amended and Restated Receivables Sale Agreement (the "Amended and Restated RSA"), which amended and restated the existing Second Amended and Restated Sales Agreement. The purpose of the Amended and Restated RSA is (i) to reflect the entry into the Receivables Facility and the termination of the RPA, and (ii) to include in the receivables sold by Anixter Inc. to ARC receivables originated by Tri-Northern Holdings, Inc. and its subsidiaries (collectively, the "Tri-Ed Subsidiaries") and subsidiaries acquired in the Power Solutions acquisition (the "Power Solutions Subsidiaries").

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Inventory Facility

On October 5, 2015, we and certain of our wholly-owned subsidiaries, including the Tri-Ed Subsidiaries and Power Solutions Subsidiaries, entered into the Inventory Facility, an asset based lending five-year revolving credit facility, in an aggregate committed amount of \$150.0 million. Borrowings under the Inventory Facility are secured by a first lien on Anixter Inc.'s and certain of its subsidiaries' personal property and supported by a guarantee by Anixter International Inc.

The Inventory Facility has a borrowing base, (a) with respect to appraised eligible domestic inventory, of the lesser of (i) 85% of the net orderly liquidation value of such inventory; and (ii) 75% of book value of such inventory, plus, (b) with respect to eligible domestic inventory not appraised, 40% of the net orderly liquidation value of such inventory, less (c) certain reserves.

The Receivables Facility and the Inventory Facility (collectively, the "Combined Facilities")

The Combined Facilities drawn pricing will range from LIBOR plus 125 basis points when the combined unused availability (the "Combined Availability") under the Combined Facilities is greater than \$500.0 million to LIBOR plus 175 basis points when Combined Availability is less than \$250.0 million. Undrawn fees will be 25 basis points if greater than/equal to 50% of the Combined Commitment is drawn and 37.5 basis points if less than 50% of the Combined Commitment is drawn.

Acquisitions and restricted payments will be permitted, subject to, among other things, (i) Combined Availability of at least \$150.0 million after giving pro forma effect to any acquisition or restricted payment or (ii) (a) Combined Availability of at least \$112.5 million and (b) maintenance of a minimum fixed charge coverage ratio of at least 1.1x, after giving pro forma effect to the acquisition or restricted payment.

The Combined Facilities provides for customary representations and warranties and customary events of default, generally with corresponding grace periods, including, without limitation, payment defaults with respect to the facility, covenant defaults, cross-defaults to other agreements evidencing material indebtedness, certain judgments and events of bankruptcy.

In connection with the new financing arrangements described above, on October 5, 2015, we terminated our \$400.0 million (or the equivalent in euro) 5-year senior unsecured revolving credit agreement and repaid our borrowings under the \$200.0 million term loan in connection with the new financing arrangements.

Canadian Term Loan

On October 5, 2015, we, through our wholly-owned subsidiaries, Anixter Canada Inc. and Tri-Ed ULC, entered into a \$300.0 million Canadian dollars (equivalent to approximately \$225.0 million USD) Canadian Term Loan. During 2016 and 2015, we repaid \$83.7 million and \$45.1 million, respectively, of the outstanding balance. We incurred \$0.5 million and \$0.3 million of additional interest expense in 2016 and 2015, respectively, due to the write-off of deferred financing costs on the early payment of debt. The Canadian Term Loan is and will be guaranteed by all present and future material Canadian subsidiaries of Anixter Canada Inc. and Tri-Ed ULC as well as Anixter Mid Holdings BV. The Canadian Term Loan is secured by a first priority security interest in all of the assets of Anixter Canada Inc. and each of its Canadian subsidiaries, which comprise the borrowing group.

The Canadian Term Loan has a five-year maturity. The drawn pricing will range from 0.375% to 1.250% over prime and 1.375% to 2.250% over the banker's acceptance rate, depending on consolidated leverage ranging from less than or equal to 1.25x to equal to or greater than 3.00x. The Canadian Term Loan amortizes 5% in each of years 1 and 2, 10% in each of years 3 and 4 and 70% in year 5. Due to our prepayment of the Canadian Term Loan, no amortization is required before the loan's maturity in 2020.

The borrowing group for the Canadian Term Loan initially will be subject to a maximum leverage ratio of 4.25x and a minimum fixed charge coverage ratio of 3.0x.

The Canadian Term Loan provides for customary representations and warranties and customary events of default, generally with corresponding grace periods, including, without limitation, payment defaults with respect to the facility, covenant defaults, cross-defaults to other agreements evidencing material indebtedness, certain judgments and events of bankruptcy.

We are in compliance with all of the covenant ratios and we believe there is adequate margin between the covenant ratios and the actual ratios given the current trends of the business.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

5.50% Senior Notes Due 2023

On August 18, 2015, our primary operating subsidiary, Anixter Inc., completed the issuance of \$350.0 million principal amount of Senior notes due 2023 ("Notes due 2023"). The Notes due 2023 were issued at a price that was 98.75% of par, which resulted in a discount related to underwriting fees of \$4.4 million. The discount is reported on the Consolidated Balance Sheet as a reduction to the face amount of the Notes due 2023 and is being amortized to interest expense over the term of the related debt, using the effective interest method. In addition, \$1.7 million of deferred financing costs were paid, which are being amortized through maturity using the straight-line method. The Notes due 2023 pay interest semi-annually at a rate of 5.5% per annum and will mature on March 1, 2023. In addition, Anixter Inc. may at any time redeem some or all of the Notes due 2023 at a price equal to 100% of the principal amount plus a "make whole" premium. If we experience certain kinds of changes of control, Anixter Inc. must offer to repurchase all of the Notes due 2023 outstanding at 101% of the aggregate principal amount repurchased, plus accrued and unpaid interest. The proceeds were used to partially finance the Power Solutions acquisition. Anixter International Inc. fully and unconditionally guarantees the Notes due 2023, which are unsecured obligations of Anixter Inc.

5.125% Senior Notes Due 2021

On September 23, 2014, our primary operating subsidiary, Anixter Inc., completed the issuance of \$400.0 million principal amount of Senior notes due 2021 ("Notes due 2021"). The Notes due 2021 were issued at a price that was 98.50% of par, which resulted in a discount related to underwriting fees of \$6.0 million. Net proceeds from this offering were approximately \$393.1 million after also deducting for approximately \$0.9 million of deferred financing costs paid that are being amortized through maturity using the straight-line method. The discount is reported on the Consolidated Balance Sheet as a reduction to the face amount of the Notes due 2021 and is being amortized to interest expense over the term of the related debt, using the effective interest method. The Notes due 2021 pay interest semi-annually at a rate of 5.125% per annum and will mature on October 1, 2021. In addition, Anixter Inc. may at any time redeem some or all of the Notes due 2021 at a price equal to 100% of the principal amount plus a "make whole" premium. If Anixter Inc. and/or we experience certain kinds of changes of control, it must offer to repurchase all of the Notes due 2021 outstanding at 101% of the aggregate principal amount repurchased, plus accrued and unpaid interest. The proceeds were used by Anixter Inc. to repay amounts outstanding under the accounts receivable credit facility, to repay certain additional borrowings under the 5-year senior unsecured revolving credit agreement that had been incurred for the specific purpose of funding the Tri-Ed acquisition, to provide additional liquidity for maturing indebtedness and for general corporate purposes. Anixter International Inc. fully and unconditionally guarantees the Notes due 2021, which are unsecured obligations of Anixter Inc.

5.625% Senior Notes Due 2019

On April 30, 2012, our primary operating subsidiary, Anixter Inc., completed the issuance of \$350.0 million principal amount of Senior notes due 2019 ("Notes due 2019"). The Notes due 2019 were issued at a price that was 98.25% of par, which resulted in a discount related to underwriting fees of \$6.1 million. Net proceeds from this offering were approximately \$342.9 million after also deducting for approximately \$1.0 million of deferred financing costs paid that are being amortized through maturity using the straight-line method. The discounts are reported on the Consolidated Balance Sheet as a reduction to the face amount of the Notes due 2019 and are being amortized to interest expense over the term of the related debt, using the effective interest method. The Notes due 2019 pay interest semi-annually at a rate of 5.625% per annum and will mature on May 1, 2019. In addition, Anixter Inc. may at any time redeem some or all of the Notes due 2019 at a price equal to 100% of the principal amount plus a "make whole" premium. If Anixter Inc. and/or we experience certain kinds of changes of control, it must offer to repurchase all of the Notes due 2019 outstanding at 101% of the aggregate principal amount repurchased, plus accrued and unpaid interest. The proceeds were used by Anixter Inc. to repay amounts outstanding under the accounts receivable securitization facility, to repay certain borrowings under the 5-year senior unsecured revolving credit agreement, to provide additional liquidity for our maturing indebtedness and for general corporate purposes. Anixter International Inc. fully and unconditionally guarantees the Notes due 2019, which are unsecured obligations of Anixter Inc.

Accounts Receivable Securitization Program

Under our prior accounts receivable securitization program, we sold, on an ongoing basis without recourse, a portion of our accounts receivables originating in the U.S. to ARC, which was considered a wholly-owned, bankruptcy-remote variable interest entity ("VIE"). We had the authority to direct the activities of the VIE and, as a result, we concluded that we maintained control of the VIE, were the primary beneficiary (as defined by accounting guidance) and, therefore, consolidated the account balances of ARC. In connection with the new financing arrangements described above, on October 5, 2015 we terminated this accounts receivable securitization facility.

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Short-term borrowings

We have borrowings under other bank revolving lines of credit totaling \$3.5 million and \$2.6 million at the end of fiscal 2016 and 2015, respectively. Our short-term borrowings have maturity dates within the next fiscal year. However, all of the borrowings at the end of fiscal 2016 have been classified as long-term at December 30, 2016, as we have the intent and ability to refinance the debt under existing long-term financing agreements.

Retirement of Debt

In connection with the new financing arrangements described above, on October 5, 2015, we terminated our \$300.0 million accounts receivable securitization facility and \$400.0 million (or the equivalent in euro) 5-year senior unsecured revolving credit agreement and repaid our borrowings under the \$200.0 million term loan. Upon the termination of these facilities and repayment of the \$200.0 million term loan, we incurred a \$0.9 million loss on the extinguishment of debt in the fourth quarter of 2015, representing a write-off of a portion of unamortized deferred financing costs. The remaining unamortized deferred financing costs are being amortized through maturity of the new financing arrangements using the straight-line method.

In the first quarter of 2015, we retired our 5.95% Senior notes due 2015 upon maturity for \$200.0 million. Available borrowings under existing long-term financing agreements were used to settle the maturity value.

In March 2009, our primary operating subsidiary, Anixter Inc., issued \$200.0 million in principal of 10% Senior notes due 2014 ("Notes due 2014") which were priced at a discount to par that resulted in a yield to maturity of 12%. The Notes due 2014 paid interest semiannually at a rate of 10% per annum and matured on March 15, 2014. During the first quarter of 2014, we retired the maturity value of \$32.3 million with available borrowings under existing long-term financing agreements.

The retirement of debt did not have a significant impact on our Consolidated Statements of Income.

Fair Value of Debt

The fair value of our debt instruments is measured using observable market information which would be considered Level 2 in the fair value hierarchy described in accounting guidance on fair value measurements. Our fixed-rate debt consists of the Notes due 2023, Notes due 2021 and Notes due 2019.

At December 30, 2016, our total carrying value and estimated fair value of debt outstanding was \$1,378.8 million and \$1,435.6 million, respectively. This compares to a carrying value and estimated fair value of debt outstanding at January 1, 2016 of \$1,642.9 million and \$1,669.5 million, respectively. The decrease in the carrying value and estimated fair value is primarily due to lower outstanding borrowings under our revolving lines of credit and partial repayment of our Canadian term loan.

NOTE 7. COMMITMENTS AND CONTINGENCIES

Substantially all of our office and warehouse facilities are leased under operating leases. A certain number of these leases are long-term operating leases containing rent escalation clauses and expire at various dates through 2027. Most operating leases entered into contain renewal options. The gross amount of assets recorded under capital leases was immaterial as of December 30, 2016 and January 1, 2016.

Minimum lease commitments under operating leases at December 30, 2016 are as follows:

(In millions)

2017	\$64.5
2018	57.8
2019	43.3
2020	33.9
2021	27.1
2022 and thereafter	43.1
Total	\$269.7

Total rental expense was \$97.8 million, \$78.0 million and \$70.9 million in 2016, 2015 and 2014, respectively. Aggregate future minimum rentals to be received under non-cancelable subleases at December 30, 2016 were \$6.8 million.

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

As of December 30, 2016, we had \$44.7 million in outstanding letters of credit and guarantees.

From time to time, we are party to legal proceedings and matters that arise in the ordinary course of business. As of December 30, 2016, we do not believe there is a reasonable possibility that any material loss exceeding the amounts already recognized for these proceedings and matters has been incurred. However, the ultimate resolutions of these proceedings and matters are inherently unpredictable. As such, our financial condition and results of operations could be adversely affected in any particular period by the unfavorable resolution of one or more of these proceedings or matters.

NOTE 8. INCOME TAXES

Income Before Tax Expense: Domestic income before income taxes was \$162.4 million, \$167.3 million and \$173.0 million for 2016, 2015 and 2014, respectively. Foreign income before income taxes was \$35.1 million, \$15.6 million and \$76.6 million for fiscal years 2016, 2015 and 2014, respectively.

Tax Provisions and Reconciliation to the Statutory Rate: The components of our tax expense from continuing operations and the reconciliation to the statutory federal rate are identified below. Income tax expense was comprised of:

(In millions)	Years Ended		
	December 30, 2016	January 1, 2016	January 2, 2015
Current:			
Foreign	\$18.5	\$ 14.1	\$ 22.6
State	7.0	7.2	4.7
Federal	50.2	58.8	33.2
	75.7	80.1	60.5
Deferred:			
Foreign	(2.8)	7.1	(1.0)
State	0.2	(0.7)	3.3
Federal	3.3	(0.5)	23.4
	0.7	5.9	25.7
Income tax expense	\$76.4	\$ 86.0	\$ 86.2

Reconciliations of income tax expense to the statutory corporate federal tax rate of 35% were as follows:

(In millions)	Years Ended		
	December 30, 2016	January 1, 2016	January 2, 2015
Statutory tax expense	\$69.1	\$ 64.0	\$ 87.4
Increase (reduction) in taxes resulting from:			
State income taxes, net	4.5	4.7	5.4
Foreign tax effects	1.8	6.3	1.2
Change in valuation allowance	1.6	9.3	(9.2)
Other, net	(0.6)	1.7	1.4
Income tax expense	\$76.4	\$ 86.0	\$ 86.2

Tax Payments: We made net payments for income taxes in 2016, 2015 and 2014 of \$63.4 million, \$103.5 million and \$117.0 million, respectively.

Net Operating Losses: Anixter International Inc. and its U.S. subsidiaries file a U.S. federal corporate income tax return on a consolidated basis. There are no tax credit carryforwards for U.S. federal income tax purposes as of the balance sheet date.

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

At December 30, 2016, various of our foreign subsidiaries had aggregate cumulative net operating losses ("NOL") carryforwards for foreign income tax purposes of approximately \$95.6 million which are subject to various provisions of each respective country. Approximately \$80.4 million of the NOL carryforwards may be carried forward indefinitely. The remaining NOL carryforwards expire at various times between 2017 and 2026.

Undistributed Earnings: As a result of our Board of Directors' approval of the disposition of the Fasteners business during February 2015, we were no longer permanently reinvested with respect to the non-U.S. earnings of the Fasteners business, because, following the disposition, we intended to repatriate to the U.S. most of the net proceeds attributable to the sale of the non-U.S. Fasteners business via intercompany debt repayment, dividend or other means. Therefore, our 2015 results included, as a component of discontinued operations, \$10.0 million of expense for U.S. federal and state, and foreign income taxes and withholding taxes related to this change in our reinvestment assertion. The remaining undistributed earnings of our foreign subsidiaries amounted to approximately \$656.0 million at December 30, 2016. We consider those earnings to be indefinitely reinvested and, accordingly, no provision for U.S. federal and state income taxes or any withholding taxes has been recorded. Upon distribution of those earnings in the form of dividends or otherwise, we may be subject to both U.S. income taxes (subject to adjustment for foreign tax credits) and withholding taxes payable to the various foreign countries. With respect to the countries that have undistributed earnings as of December 30, 2016, according to the foreign laws and treaties in place at that time, estimated U.S. federal income tax of approximately \$60.2 million and various foreign jurisdiction withholding taxes of approximately \$31.3 million would be payable upon the remittance of all earnings at December 30, 2016.

Deferred Income Taxes: Significant components of our deferred tax assets (liabilities) included in "Other assets" and "Other liabilities" on the Consolidated Balance Sheets were as follows:

(In millions)	December 30, January 1,	
	2016	2016
Deferred compensation and other postretirement benefits	46.9	36.0
Foreign NOL carryforwards and other	27.7	24.8
Accrued expenses and other	15.2	10.4
Inventory reserves	13.4	7.7
Unrealized foreign exchange	—	5.8
Allowance for doubtful accounts	11.1	10.2
Gross deferred tax assets	114.3	94.9
Property, equipment, intangibles and other	(107.1) (83.7)
Gross deferred tax liabilities	(107.1) (83.7)
Deferred tax assets, net of deferred tax liabilities	7.2	11.2
Valuation allowance	(20.7) (24.0)
Net deferred tax liabilities	\$ (13.5) \$ (12.8)

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Uncertain Tax Positions and Jurisdictions Subject to Examinations: A reconciliation of the beginning and ending amount of unrecognized tax benefits for fiscal 2014, 2015 and 2016 is as follows:

(In millions)

Balance at January 3, 2014	\$3.4
Additions for tax positions of prior years	0.4
Reductions for tax positions of prior years	(0.8)
Balance at January 2, 2015	\$3.0
Additions for tax positions of prior years	0.4
Addition for Power Solutions acquisition	2.2
Reductions for tax positions of prior years	(0.3)
Balance at January 1, 2016	\$5.3
Additions for tax positions of prior years	0.4
Reductions for tax positions of prior years	(0.7)
Balance at December 30, 2016	\$5.0

Interest and penalties accrued for unrecognized tax benefits were \$0.2 million in 2016 and 2015, and \$0.3 million in 2014. In the fourth quarter of 2015, we acquired Power Solutions and brought forward the existing uncertain tax positions in the amount of \$2.9 million of which \$0.7 million is related to interest and penalties. The liability of the uncertain tax positions is fully indemnified and offset by a corresponding indemnification asset recorded on the balance sheet.

Excluding the fully indemnified unrecognized tax benefit balance mentioned above, we estimate that of the unrecognized tax benefit balance of \$2.8 million, all of which would affect the effective tax rate, \$0.3 million may be resolved in a manner that would impact the effective rate within the next twelve months. The reserves for uncertain tax positions, including interest and penalties, of \$3.5 million cover a range of issues, including intercompany charges and withholding taxes, and involve various taxing jurisdictions.

Only the returns for fiscal tax years 2012 and later have not been examined by the Internal Revenue Service ("IRS") in the U.S., which is our most significant tax jurisdiction. For most states, fiscal tax years 2012 and later remain subject to examination. In Canada, the fiscal tax years 2012 and later are still subject to examination, while in the United Kingdom, the fiscal tax years 2015 and later remain subject to examination.

NOTE 9. PENSION PLANS, POST-RETIREMENT BENEFITS AND OTHER BENEFITS

Our defined benefit pension plans are the plans in the U.S., which consist of the Anixter Inc. Pension Plan, the Executive Benefit Plan and the Supplemental Executive Retirement Plan ("SERP") (together the "Domestic Plans") and various defined benefit pension plans covering employees of foreign subsidiaries in Canada and Europe (together the "Foreign Plans"). The majority of our defined benefit pension plans are non-contributory and cover substantially all full-time domestic employees and certain employees in other countries. Retirement benefits are provided based on compensation as defined in both the Domestic Plans and the Foreign Plans. Our policy is to fund all Domestic Plans as required by the Employee Retirement Income Security Act of 1974 ("ERISA") and the IRS and all Foreign Plans as required by applicable foreign laws. The Executive Benefit Plan and SERP are the only two plans that are unfunded. Assets in the various plans consist primarily of equity securities and fixed income investments.

Accounting rules related to pensions and the policies we use generally reduce the recognition of actuarial gains and losses in the net benefit cost, as any significant actuarial gains/losses are amortized over the remaining service lives of the plan participants. These actuarial gains and losses are mainly attributable to the return on plan assets that differ from that assumed and differences in the obligation due to changes in the discount rate, plan demographic changes and other assumptions.

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The measurement date for all of our plans is December 31st. Accordingly, at the end of each fiscal year, we determine the discount rate to be used to discount the plan liabilities to their present value. The discount rate reflects the current rate at which the pension liabilities could be effectively settled at the end of the year. In estimating this rate at the end of 2016, 2015 and 2014, we reviewed rates of return on relevant market indices (i.e., the Citigroup pension liability index and the Ryan ALM Above Median yield curves). At the end of 2016, 2015 and 2014, we concluded the Ryan ALM Above Median yield curves are more consistent with observable market conditions and industry standards for developing spot rate curves. These rates are adjusted to match the duration of the liabilities associated with the pension plans.

At December 30, 2016 and January 1, 2016, we determined the consolidated weighted-average discount rate of all plans to be 3.73% and 3.98%, respectively, and used these rates to measure the projected benefit obligation ("PBO") at the end of each respective fiscal year end. Due primarily to the purchase of annuities by our U.S. and Europe plans, the PBO decreased to \$481.8 million at the end of fiscal 2016 from \$516.1 million at the end of fiscal 2015. Our consolidated net unfunded status was \$69.1 million at the end of fiscal 2016 compared to \$69.9 million at the end of 2015.

A significant element in determining our net periodic benefit cost in accordance with U.S. GAAP is the expected return on plan assets. For 2016, we had assumed that the weighted-average expected long-term rate of return on plan assets would be 5.50%. This expected return on plan assets is included in the net periodic benefit cost for the fiscal year ended 2016. As a result of the combined effect of valuation changes in both the equity and bond markets, the plan assets produced an actual gain of approximately 11.9% and a loss of 1.9% in 2016 and 2015, respectively. The fair value of plan assets is \$412.7 million at the end of fiscal 2016, compared to \$446.2 million at the end of fiscal 2015. The difference between the expected return and the actual return on plan assets is amortized into expense over the service lives of the plan participants. These amounts are reflected on the balance sheet through charges to "Accumulated other comprehensive loss," a component of "Stockholders' Equity" in the Consolidated Balance Sheets. In the fourth quarter of 2016, the Anixter Inc. Pension Plan was amended to allow for the benefits of certain retirees or beneficiaries to be transferred to a third-party annuity provider. We paid \$10.5 million of additional contributions into the plan using excess cash from operations to fund the contributions. The plan purchased a \$10.5 million annuity contract with a third-party insurance carrier and transferred the related pension obligations to the carrier. The funding of the premiums did not result in a settlement charge as the amount did not exceed the service and interest costs of the plan in 2016.

In the fourth quarter of 2015, we commenced settlement of the liabilities of one of our Europe pension plans. At that time, we entered into a buy-in policy with an insurance carrier for that plan. In the second quarter of 2016, we terminated the buy-in policy and entered into an agreement for issuance of a buy-out policy with the insurance carrier for the pension obligation. Accumulated other comprehensive losses of approximately \$9.6 million (£6.9 million) were realized as a result of the buy-out policy and are reflected in our Consolidated Statements of Comprehensive Income.

In the third quarter of 2015, we took two actions related to the Anixter Inc. Pension Plan in the U.S.. First, the plan was frozen to entrants first hired or rehired on or after July 1, 2015. Anixter Inc. will make an annual contribution to the Employee Savings Plan on behalf of each active participant who is first hired or rehired on or after July 1, 2015, or is not participating in the Anixter Inc. Pension Plan. The amount of the employer annual contribution to each active participant's account will be an amount determined by multiplying the participant's salary for the Plan year by either: (1) 2% if such participant's years of service as of August 1 of the Plan year is fewer than five, or (2) 2.5% if such participant's years of service as of August 1 of the Plan year is five or greater. This contribution is in lieu of being eligible for the Anixter Inc. Pension Plan. The total expense related to the amendment was \$0.8 million. Second, we

amended the Anixter Inc. Pension Plan in the U.S. to allow for terminated Fasteners employees to become immediately vested, if they were hired before February 12, 2015 and are not already fully vested. Furthermore, the amendment allows for employees who were terminated in connection with the sale of the Fastener business, the one-time option to receive a cash payout of their vested benefits. This resulted in \$10.2 million of additional contributions paid by us using excess cash from operations to fund \$10.2 million of payments. The funding of the cash payments did not result in a settlement charge as the amount did not exceed the service and interest costs of the plan in 2015.

All non-union domestic employees hired or rehired before July 1, 2015, earn a benefit under a personal retirement account (hypothetical account balance). Each year, a participant's account receives a credit equal to 2% of the participant's salary (2.5% if the participant's years of service at August 1 of the plan year are 5 years or more). Active participants become fully vested in their hypothetical personal retirement account after 3 years of service. Interest earned on the credited amount is not credited to the personal retirement account but is contributed to the participant's account in the Anixter Inc. Employee Savings Plan. The interest contribution equals the interest earned on the personal retirement account balance as of January 1st in the Domestic Plan and is based on the 10-year Treasury note rate as of the last business day of December.

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Effective December 31, 2013, we froze benefits provided under the Anixter Inc. Pension Plan to employees hired before June 1, 2004. These employees are covered under the personal retirement account pension formula described above for non-union domestic employees hired or rehired before July 1, 2015.

In 2014, we adopted new U.S. mortality tables for purposes of determining our mortality assumption used in the U.S. defined benefit plans' liability calculation. The new assumptions were based on the Society of Actuaries' recent mortality experience study and reflected future mortality improvements based on the Social Security's expectations. In 2015 and 2016, the Society of Actuaries released new mortality improvement projection scales. As a result, we again updated U.S. mortality improvement assumptions in 2015 and 2016 for purposes of determining our mortality assumption used in the U.S. defined benefit plans' liability calculation. For the 2016 year end, we moved to the Society of Actuaries mortality improvement scale for improvements beyond the measurement date. The updated U.S. mortality assumptions resulted in a decrease of \$0.8 million and \$1.9 million to the benefit obligation as of the end of 2016 and 2015, respectively, prior to reflecting the discount rate change.

The assets of the various defined benefit plans are held in separate independent trusts and managed by independent third party advisors. The investment objective of both the Domestic and Foreign Plans is to ensure, over the long-term life of the plans, an adequate level of assets to fund the benefits to employees and their beneficiaries at the time they are payable. In meeting this objective, we seek to achieve a level of absolute investment return consistent with a prudent level of portfolio risk. Our risk preference is to refrain from exposing the plans to higher volatility in pursuit of potential higher returns.

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The Domestic Plans' and Foreign Plans' asset mixes as of December 30, 2016 and January 1, 2016 and our asset allocation guidelines for such plans are summarized as follows.

	Domestic Plans					
	December 30, 2016	January 1, 2016	Allocation Guidelines			
			Min	Target	Max	
Large capitalization U.S. stocks	22.7 %	23.0 %	17 %	22 %	27 %	
Small to mid capitalization U.S. stocks	29.1	27.1	20	30	40	
Emerging market equity	10.0	7.6	5	10	15	
Total equity securities	61.8	57.7		62		
Fixed income investments	35.0	37.9	31	38	45	
Cash equivalents	3.2	4.4	—	—	10	
	100.0%	100.0%		100 %		

	Foreign Plans	
	December 30, 2016	Allocation Guidelines
		Target
Equity securities	61 %	60 %
Fixed income investments	29	30
Other investments	10	10
	100%	100 %

	Foreign Plans	
	January 1, 2016	Allocation Guidelines
		Target
Equity securities	43 %	44 %
Fixed income investments	22	22
Other investments	35	34
	100%	100 %

The pension committees meet regularly to assess investment performance and reallocate assets that fall outside of its allocation guidelines. The variations between the allocation guidelines and actual asset allocations reflect relative performance differences in asset classes. From time to time, we periodically rebalance our asset portfolios to be in line with our allocation guidelines.

For 2016 and 2015, the U.S. investment policy guidelines were as follows:

Each asset class is actively managed by one investment manager

Each asset class may be invested in a commingled fund, mutual fund, or separately managed account

Investment in Exchange Traded Funds (ETFs) is permissible

Each manager is expected to be "fully invested" with minimal cash holdings

The use of options and futures is limited to covered hedges only

Each equity asset manager has a minimum number of individual company stocks that need to be held and there are restrictions on the total market value that can be invested in any one industry and the percentage that any one company can be of the portfolio total

The fixed income funds are diversified by issuer and industry, with maximum limits on investment in U.S. Treasuries and U.S. Government Agencies

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The investment policies for the Foreign plans are the responsibility of the various trustees. Generally, the investment policy guidelines are as follows:

• Make sure that the obligations to the beneficiaries of the Plan can be met

• Maintain funds at a level to meet the minimum funding requirements

• The investment managers are expected to provide a return, within certain tracking tolerances, close to that of the relevant market's indices

The expected long-term rate of return on both the Domestic and Foreign Plans' assets reflects the average rate of earnings expected on the invested assets and future assets to be invested to provide for the benefits included in the projected benefit obligation. We use historic plan asset returns combined with current market conditions to estimate the rate of return. The expected rate of return on plan assets is a long-term assumption based on an analysis of historical and forward looking returns considering the respective plan's actual and target asset mix. The weighted-average expected rate of return on plan assets used in the determination of net periodic pension cost for 2016 is 5.50%.

The following table sets forth the changes and the end of year components of "Accumulated other comprehensive loss" for the defined benefit plans:

(In millions)	December 30, 2016	January 1, 2016
Changes to Balance:		
Beginning balance	\$ 112.5	\$ 106.8
Recognized prior service cost	4.0	9.1
Recognized transition obligation	(0.9)	—
Recognized net actuarial gain	(14.8)	(8.3)
Prior service credit arising in current year	(2.2)	(29.8)
Net actuarial loss arising in current year	20.6	34.7
Ending balance	\$ 119.2	\$ 112.5
Components of Balance:

Net periodic cost (benefit)	\$4.4	\$3.0	\$(0.5)	\$16.4	\$8.1	\$5.1	\$20.8	\$11.1	\$4.6
Weighted-average assumption used to measure net periodic cost:									
Discount rate	4.65%	4.14%	4.81%	3.35%	3.44%	4.49%	3.98%	3.79%	4.64%
Expected return on plan assets	6.50%	6.50%	6.50%	4.54%	4.77%	5.67%	5.50%	5.63%	6.08%
Salary growth rate	4.60%	4.60%	4.63%	3.08%	3.12%	3.27%	3.75%	3.79%	4.04%

In connection with the disposition of the Fasteners business, we recognized a pension curtailment gain of \$5.1 million related to the Anixter pension plan in the U.S. and special termination benefit costs of \$0.3 million in 2015 in discontinued operations.

Fair Value Measurements

The following presents information about the Plan's assets measured at fair value on a recurring basis at the end of fiscal 2016, and the valuation techniques used by the Plan to determine those fair values. The inputs used in the determination of these fair values are categorized according to the fair value hierarchy as being Level 1, Level 2 or Level 3.

In general, fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access. The majority of our pension assets valued by Level 1 inputs are primarily comprised of Domestic equity which are traded actively on public exchanges and valued at quoted prices at the end of the fiscal year.

Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, and other inputs such as interest rates and yield curves that are observable at commonly quoted intervals. The majority of our pension assets valued by Level 2 inputs are comprised of common/collective/pool funds (i.e., mutual funds). These assets are valued at their net asset values and considered observable inputs, or Level 2.

Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. The only pension assets valued by Level 3 inputs relate to the buy-in policy in connection with the Fasteners disposition.

In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

(In millions)	January 2, 2015 Balance	Net purchases, Issuances and Settlements		January 1, 2016 Balance
Asset Categories:				
Insurance funds	\$	—\$	58.9	\$ 58.9
Total Level 3 investments	\$	—\$	58.9	\$ 58.9

We estimated future benefits payments are as follows at the end of 2016:

(In millions)	Estimated Future Benefit Payments		
	Domestic	Foreign	Total
2017	\$9.0	\$ 4.0	\$13.0
2018	9.8	4.3	14.1
2019	10.8	4.4	15.2
2020	11.6	4.5	16.1
2021	12.3	4.8	17.1
2022-2026	72.4	31.2	103.6
Total	\$125.9	\$ 53.2	\$179.1

The accumulated benefit obligation in 2016 and 2015 was \$256.4 million and \$248.1 million, respectively, for the Domestic Plans and \$192.9 million and \$235.7 million, respectively, for the Foreign Plans. We had 10 plans in 2016 and 2015 where the accumulated benefit obligation was in excess of the fair value of plan assets. For pension plans with accumulated benefit obligations in excess of plan assets the aggregate pension accumulated benefit obligation was \$390.2 million and \$368.7 million for 2016 and 2015, respectively, and aggregate fair value of plan assets was \$347.1 million and \$324.7 million for 2016 and 2015, respectively.

We currently estimate that we will make contributions of approximately \$9.0 million to our Domestic Plans and \$7.5 million to our Foreign Plans in 2017. In addition, we estimate that we will make \$0.9 million of benefit payments directly to participants of our two domestic unfunded non-qualified pension plans.

Defined Contribution Plan

Anixter Inc. adopted the Anixter Inc. Employee Savings Plan effective January 1, 1994. The Plan is a defined-contribution plan covering all of our non-union domestic employees. Participants are eligible and encouraged to enroll in the tax-deferred plan on their date of hire and are automatically enrolled approximately 60 days after their date of hire unless they opt out. The savings plan is subject to the provisions of ERISA.

In the third quarter of 2015, Anixter Inc. amended the Anixter Inc. Pension Plan in the U.S. whereby employees first hired or rehired on or after July 1, 2015 are no longer eligible to participate in the Anixter Inc. Pension Plan. Anixter Inc. will make an annual contribution to the Employee Savings Plan on behalf of each active participant who is first hired or rehired on or after July 1, 2015, or is not participating in the Anixter Inc. Pension Plan. The amount of the employer annual contribution to each active participant's account will be an amount determined by multiplying the participant's salary for the Plan year by either: (1) 2% if such participant's years of service as of August 1 of the Plan year is fewer than five, or (2) 2.5% if such participant's years of service as of August 1 of the Plan year is five years or greater. This contribution is in lieu of being eligible for the Anixter Inc. Pension Plan.

Effective January 1, 2014, we began matching contributions to equal 50% of a participant's contribution up to 5% of the participant's compensation. We also have certain foreign defined contribution plans. Our contributions to these plans are based upon various levels of employee participation and legal requirements. The total expense from continuing operations related to defined contribution plans was \$12.2 million, \$9.3 million and \$9.2 million in 2016,

2015 and 2014, respectively.

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Deferred Compensation Plan

A non-qualified deferred compensation plan was implemented on January 1, 1995. The plan permits selected employees to make pre-tax deferrals of salary and bonus. Interest is accrued monthly on the deferred compensation balances based on the average ten-year Treasury note rate for the previous three months times a factor of 1.4, and the rate is further adjusted if certain of our financial goals are achieved. The plan provides for benefit payments upon retirement, death, disability, termination or other scheduled dates determined by the participant. At December 30, 2016, the deferred compensation liability included in "Accrued expenses" and "Other liabilities" on the Consolidated Balance Sheet was \$4.9 million and \$40.7 million, respectively. At January 1, 2016, the deferred compensation liability included in "Accrued expenses" and "Other liabilities" on the Consolidated Balance Sheet was \$3.5 million and \$42.9 million, respectively.

Concurrent with the implementation of the deferred compensation plan, we purchased variable, separate account life insurance policies on the plan participants with benefits accruing to us. To provide for the liabilities associated with the deferred compensation plan and an executive non-qualified defined benefit plan, fixed general account "increasing whole life" insurance policies were purchased on the lives of certain participants. Prior to 2006, we paid annual premiums on the above company-owned policies. The last premium was paid in 2005. Policy proceeds are payable to us upon the insured participant's death. At December 30, 2016 and January 1, 2016, the cash surrender value of \$35.9 million and \$34.3 million, respectively, was recorded under this program and reflected in "Other assets" on the Consolidated Balance Sheets.

We have no other post-retirement benefits other than the pension and savings plans described herein.

NOTE 10. STOCKHOLDERS' EQUITY

Preferred Stock

We have the authority to issue 15.0 million shares of preferred stock, par value \$1.00 per share, none of which were outstanding at the end of fiscal 2016 and 2015.

Common Stock

We have the authority to issue 100.0 million shares of common stock, par value \$1.00 per share, of which 33.4 million shares and 33.3 million shares were outstanding at the end of fiscal 2016 and 2015, respectively.

Share Repurchases

We did not repurchase any shares during any of the periods presented in these Consolidated Financial Statements.

Stock-Based Compensation

At December 30, 2016, there were 1.2 million shares reserved for issuance under all incentive plans.

Restricted Stock Units and Performance Units

The grant-date value of the stock units is amortized and converted to outstanding shares of common stock on a one-for-one basis over a three, four or six-year vesting period from the date of grant based on the specific terms of the grant. Compensation expense, net of the reversal of costs associated with forfeitures, associated with the stock units was \$13.7 million, \$11.3 million and \$10.2 million in 2016, 2015 and 2014, respectively.

During the first quarter of 2016, we initiated a performance-based restricted stock unit ("performance units") program that will vest in one-third tranches to be evaluated on the anniversary of the first, second and third performance cycles. Each evaluation period will be based on the achievement of our total shareholder return ("TSR") relative to the TSR of the S&P Mid Cap 400 index. The issuance of the vested shares will be on the final vesting date of year three. The granted units will be adjusted based on the specific payout percentage of the grant agreement. The fair value of each tranche related to the performance units were estimated at the grant date using the Monte Carlo Simulation pricing model.

Under the current stock incentive plans, we pay our non-employee directors annual retainer fees and, at their election, meeting fees in the form of stock units. Currently, these units are granted quarterly and vest immediately. Therefore, we include these units in our common stock outstanding on the date of vesting as the conditions for conversion are

met. However, the actual issuance of shares related to all director units are deferred until a pre-arranged time selected by each director. Compensation expense associated with the director stock units was \$2.3 million, \$2.0 million and \$1.9 million in 2016, 2015 and 2014, respectively.

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The total fair value of stock units that vested was \$12.0 million, \$13.4 million and \$11.7 million in 2016, 2015 and 2014, respectively.

The following table summarizes the activity under the director and employee stock unit plans:

(units in thousands)	Director Stock Units (a)	Weighted Average Grant Date Fair Value (b)	Employee Stock Units (c)	Weighted Average Grant Date Fair Value (b)
Outstanding balance at January 3, 2014	302.5	\$ 47.81	453.3	\$ 65.64
Granted	20.3	93.26	126.8	106.90
Converted	(39.5)	45.82	(163.1)	59.92
Canceled	—	—	(11.9)	72.53
Outstanding balance at January 2, 2015	283.3	51.42	405.1	80.65
Granted	32.2	63.99	217.0	75.53
Converted	(7.7)	59.56	(157.6)	71.71
Canceled	—	—	(28.4)	77.15
Outstanding balance at January 1, 2016	307.8	52.53	436.1	81.56
Granted	33.3	56.34	491.5	39.93
Converted	—	—	(125.2)	80.58
Canceled	—	—	(75.0)	55.89
Outstanding balance at December 30, 2016	341.1	\$ 52.90	727.4	\$ 56.25

All director units are considered convertible although each individual has elected to defer conversion until a (a) pre-arranged time. This is because all stock units, including director units, are included in our common stock outstanding on the date of vesting as the conditions for conversion have been met.

(b) Director and employee stock units are granted at no cost to the participants.

(c) All employee stock units outstanding are not vested at year end and are expected to vest.

The weighted-average remaining contractual term for outstanding employee units is 2.3 years.

The aggregate intrinsic value of units converted into stock represents the total pre-tax intrinsic value (calculated using our stock price on the date of conversion multiplied by the number of units converted) that was received by unit holders. The aggregate intrinsic value of units converted into stock for 2016, 2015 and 2014 was \$5.4 million, \$12.8 million and \$21.0 million, respectively.

The aggregate intrinsic value of units outstanding represents the total pre-tax intrinsic value (calculated using our closing stock price on the last trading day of the fiscal year multiplied by the number of units outstanding) that will be received by the unit recipients upon vesting. The aggregate intrinsic value of units outstanding for 2016, 2015 and 2014 was \$79.9 million, \$44.9 million and \$60.7 million, respectively.

The aggregate intrinsic value of units convertible represents the total pre-tax intrinsic value (calculated using our closing stock price on the last trading day of the fiscal year multiplied by the number of units convertible) that would have been received by the unit holders. The aggregate intrinsic value of units convertible for 2016, 2015 and 2014 was \$27.6 million, \$18.6 million and \$25.0 million, respectively.

Stock Options

Options previously granted under these plans have been granted with exercise prices at the fair market value of the common stock on the date of grant. All options expire ten years after the date of grant. These options were granted with vesting periods of four years representing the requisite service period based on the specific terms of the grant. We generally issue new shares to satisfy stock option exercises as opposed to adjusting treasury shares. The fair value of stock option grants is amortized over the respective vesting period representing the requisite service period. We did

not grant any stock options to employees during 2016, 2015 or 2014.

Our compensation expense associated with the stock options in 2016, 2015 and 2014 was \$0.5 million, \$0.9 million and \$1.3 million, respectively. The total fair value of stock options that vested was \$1.0 million, \$1.7 million and \$1.7 million in 2016, 2015 and 2014, respectively.

Table of Contents

ANIXTER INTERNATIONAL INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The following table summarizes the activity under the employee option plans:

(options in thousands)	Employee Options	Weighted Average Exercise Price
Balance at January 3, 2014	695.4	\$ 47.93
Exercised	(162.4)	44.40
Balance at January 2, 2015	533.0	\$ 49.00
Exercised	—	—
Balance at January 1, 2016	533.0	\$ 49.00
Exercised	(44.8)	52.55
Balance at December 30, 2016	488.2	\$ 48.68
Options exercisable at year-end:		
2014	405.6	\$ 44.65
2015	472.5	\$ 47.15
2016	468.4	\$ 48.00

The weighted-average remaining contractual term for options outstanding for 2016 was 4.2 years. The weighted-average remaining contractual term for options exercisable for 2016 was 4.1 years.

The aggregate intrinsic value of options exercised represents the total pre-tax intrinsic value (calculated as the difference between our stock price on the date of exercise and the exercise price, multiplied by the number of options exercised) that was received by the option holders. For 2015, there were no option exercises. The aggregate intrinsic value of options exercised for 2016 and 2014 was \$1.0 million and \$7.9 million, respectively.

The aggregate intrinsic value of options outstanding represents the total pre-tax intrinsic value (calculated as the difference between our closing stock price on the last trading day of each fiscal year and the weighted-average exercise price, multiplied by the number of options outstanding at the end of the fiscal year) that could be received by the option holders if such option holders exercised all options outstanding at fiscal year-end. The aggregate intrinsic value of options outstanding for 2016, 2015 and 2014 was \$15.8 million, \$19.6 million and \$20.9 million respectively. The aggregate intrinsic value of options exercisable represents the total pre-tax intrinsic value (calculated as the difference between our closing stock price on the last trading day of each fiscal year and the weighted-average exercise price, multiplied by the number of options exercisable at the end of the fiscal year) that would have been received by the option holders had all option holders elected to exercise the options at fiscal year-end. The aggregate intrinsic value of options exercisable for 2016, 2015 and 2014 was \$15.5 million, \$15.9 million and \$17.7 million, respectively.

Summary of Non-Vested Shares

The following table summarizes the changes to the unvested shares:

(shares in thousands)	Non-vested Option Shares (a)	Weighted-average Grant Date Fair Value	Non-vested Performance Shares (a)	Weighted-average Grant Date Fair Value
Balance at January 1, 2016	60.5	\$ 26.18	—	—
Granted	—	—	85.8	\$ 21.53
Vested	(40.7)	\$ 25.80	—	—
Canceled	—	—	(3.0)	\$ 21.53
Balance at December 30, 2016	19.8	\$ 26.95	82.8	\$ 21.53

(a) All non-vested stock options and performance units are expected to vest.

As of December 30, 2016, there was \$17.4 million and \$0.1 million of total unrecognized compensation cost related to non-vested stock units and options granted to employees, respectively, which is expected to be recognized over a

weighted-average period of 1.5 years and 1.0 year, respectively.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 11. BUSINESS SEGMENTS

We are a leading distributor of enterprise cabling and security solutions, electrical and electronic wire and cable products and utility power solutions. We have identified Network & Security Solutions ("NSS"), Electrical and Electronic Solutions ("EES") and Utility Power Solutions ("UPS") as reportable segments.

We incur corporate expenses to obtain and coordinate financing, tax, information technology, legal and other related services, certain of which were rebilled to subsidiaries. These corporate expenses were historically allocated to our business segments based primarily on projected sales and estimated use of time. A portion of these corporate expenses were reported in corporate as they historically had been allocated to the Fasteners segment but were not considered directly related to the discontinued operations. Beginning in the first quarter of 2016, we no longer allocate corporate expenses to our business segments. We also have various corporate assets which are reported in corporate. Segment assets may not include jointly used assets, but segment results include depreciation expense or other allocations related to those assets as such allocation is made for internal reporting. Interest expense and other non-operating items are not allocated to the segments or reviewed on a segment basis, except as previously discussed in Note 2.

"Discontinued Operations." Intercompany transactions are not significant. No customer accounted for more than 2% of sales in 2016.

The categorization of net sales by end market is determined using a variety of data points including the technical characteristic of the product, the "sold to" customer information, the "ship to" customer information and the end customer product or application into which our product will be incorporated. We also have largely specialized our sales organization by segment. As data systems for capturing and tracking this data evolve and improve, the categorization of products by end market can vary over time. When this occurs, we reclassify net sales by end market for prior periods. Such reclassifications typically do not materially change the sizing of, or the underlying trends of results within, each end market.

Segment Financial Information

Segment information for 2016, 2015 and 2014 are as follows:

2016	NSS	EES	UPS	Corporate (a)	Total
Net Sales	\$4,083.8	\$2,103.2	\$1,435.8	\$ —	\$7,622.8
Operating income	275.8	97.5	56.7	(144.7)	285.3
Depreciation	3.2	2.7	4.2	17.8	27.9

Total assets	1,863.7	972.4	—	337.8	3,173.9
Capital expenditures	2.6	1.3	—	30.3	34.2

(a) Corporate "Total assets" primarily consists of cash and cash equivalents, deferred tax assets, and corporate fixed assets.

(b) At the beginning of the fourth quarter of 2015, we acquired Power Solutions which is reported in both the EES and UPS business segments. For further information, see Note 3. "Business Combinations".

(c) At the end of the third quarter of 2014, we acquired Tri-Ed which is reported in the NSS business segments. For further information, see Note 3. "Business Combinations".

Net sales and operating income included in the tables above in our UPS segment were previously reported in our EES segment prior to the Power Solutions acquisition on October 5, 2015. Operating results were restated for the years ended January 1, 2016 and January 2, 2015 due to change in composition of our reportable segments in the first quarter of 2016.

The items impacting operating income by segment in 2016, 2015 and 2014 are reflected in the tables below. All other items impacted consolidated results only and were not allocated to segments.

Geographic Information

We attribute foreign sales based on the location of the customer purchasing the product. In North America (U.S. and Canada), sales in the U.S. were \$5,613.6 million, \$4,137.9 million and \$3,287.4 million in 2016, 2015 and 2014, respectively. Canadian sales were \$771.0 million, \$691.3 million and \$751.8 million in 2016, 2015 and 2014, respectively. No other individual foreign country's net sales within EMEA (Europe, Middle East and Africa) or the Emerging Markets (Asia Pacific and Latin America) were material in 2016, 2015 and 2014. Our tangible long-lived assets primarily consist of \$121.0 million of property and equipment in the U.S. No other individual foreign country's tangible long-lived assets are material to us.

The following table summarizes net sales, total assets and property and equipment by geographic areas for the years ended December 30, 2016, January 1, 2016 and January 2, 2015:

(In millions)	Years Ended

(a) In the first quarter of 2015, we recorded intangible asset amortization expense of \$5.1 million and foreign exchange losses due to the devaluation of the Venezuelan bolivar of \$0.7 million.

In the second quarter of 2015, "Operating income" includes \$19.3 million of expense, which includes \$5.2 million of intangible asset amortization expense, \$5.3 million of restructuring charges, a write-off of capitalized software of \$3.1 million that has no ongoing economic benefit to continuing operations, \$2.6 million of assets write-off in Latin America, a \$1.7 million dilapidation provision related to our leasehold properties, acquisition and integration costs of \$1.0 million and \$0.4 million related to pension divestiture costs.

In the third quarter of 2015, "Operating income" includes \$5.0 million of intangible asset amortization expense and \$8.1 million of acquisition and integration costs related to the Power Solutions acquisition. For further information, see Note 3. "Business Combinations".

In the fourth quarter of 2015, "Operating income" includes \$9.6 million of intangible asset amortization expense, \$9.1 million of assets write-off in Latin America, \$2.9 million of restructuring charges, and \$4.1 million of acquisition and integration costs related to the Power Solutions acquisition. For further information, see Note 3.

(d) "Business Combinations". "Income from continuing operations before income taxes" includes foreign exchange losses of \$2.9 million due to the devaluation of the Argentine peso, a \$0.9 million loss on the extinguishment of debt and \$0.3 million of additional interest expense due to the write-off of deferred financing costs on the early payment of debt, as described in Note 6. "Debt".

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

ITEM 9A. CONTROLS AND PROCEDURES.

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

Under the supervision and the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation as of December 30, 2016 of the effectiveness of the design and operation of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended ("Exchange Act"). Based on this evaluation, the principal executive officer and the principal financial officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this annual report.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Our internal control over financial reporting is designed to provide reasonable assurance to our management and board of directors regarding the preparation and fair presentation of published financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control — Integrated Framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework). Based on the evaluation under the framework in Internal Control — Integrated Framework, our management concluded that our internal control over financial reporting was effective as of December 30, 2016.

Ernst & Young LLP, an independent registered public accounting firm, has audited our Consolidated Financial Statements and our internal control over financial reporting. The Ernst & Young LLP reports are included herein.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON INTERNAL CONTROL OVER FINANCIAL REPORTING

To the Board of Directors and Stockholders of Anixter International Inc.:

We have audited Anixter International Inc.'s (the Company) internal control over financial reporting as of December 30, 2016, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). Anixter International Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Anixter International Inc. maintained, in all material respects, effective internal control over financial reporting as of December 30, 2016, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Anixter International Inc. as of December 30, 2016 and January 1, 2016, and the related consolidated statements of income, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended December 30, 2016, and our report dated February 23, 2017, expressed an unqualified opinion thereon.

Note A — Basis of Presentation

In the parent company condensed financial statements, our investment in subsidiaries is stated at cost plus equity in undistributed earnings of subsidiaries since the date of acquisition. Our share of net income of our unconsolidated subsidiaries is included in consolidated income using the equity method. The parent company financial statements should be read in conjunction with our Consolidated Financial Statements. See Note 6. "Debt" in the notes to the Consolidated Financial Statements for details on dividend restrictions from Anixter Inc. to the parent company.
