Notes to Consolidated Financial Statements (Unaudited)

NOTE 1 – SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation and Basis of Presentation

The unaudited consolidated financial statements have been prepared in accordance with U.S. GAAP for interim financial information. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete consolidated financial statements. In the opinion of management, all adjustments, consisting only of normal recurring adjustments, which are necessary for a fair presentation of the results of operations in these financial statements, have been made.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could vary from these estimates. Certain reclassifications have been made to prior period amounts to conform to the current period presentation.

The Company evaluated subsequent events through the date its financial statements were issued.

These financial statements should be read in conjunction with the Company's 2013 Annual Report on Form 10-K. There have been no significant changes to the Company's accounting policies as disclosed in the Company's 2013 Annual Report on Form 10-K.

Accounting Policies Recently Adopted and Pending Accounting Pronouncements

In March 2013, the FASB issued ASU 2013-04, "Liabilities (Topic 405): Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation Is Fixed at the Reporting Date (a consensus of the FASB Emerging Issues Task Force)." The ASU requires additional disclosures about joint and several liability arrangements and requires the Company to measure obligations resulting from joint and several liability arrangements as the sum of the amount the Company agreed to pay on the basis of its arrangement among its co-obligors and any additional amount the Company expects to pay on behalf of its co-obligors. The ASU is effective for the fiscal years and interim periods beginning after December 15, 2013. The Company adopted the ASU at January 1, 2014 and the adoption did not have an impact on the Company's financial position, results of operations, or EPS.

In June 2013, the FASB issued ASU 2013-08, "Financial Services—Investment Companies (Topic 946): Amendments to the Scope, Measurement, and Disclosure Requirements." The ASU clarifies the characteristics of an investment company and requires an investment company to measure noncontrolling ownership interests in other investment companies at fair value rather than using the equity method of accounting. The ASU is effective for fiscal years and interim periods beginning after December 15, 2013. The Company adopted the ASU at January 1, 2014 and the adoption did not have an impact on the Company's financial position, results of operations, or EPS.

In January 2014, the FASB issued ASU 2014-01, "Investments - Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Qualified Affordable Housing Projects (a consensus of the FASB Emerging Issues Task Force)." The ASU allows for use of the proportional amortization method for investments in qualified affordable housing projects if certain conditions are met. Under the proportional amortization method, the initial cost of the investment is amortized in proportion to the tax credits and other tax benefits received and the net investment performance is recognized in the income statement as a component of income tax expense. The ASU provides for a practical expedient, which allows for amortization of the investment in proportion to only the tax credits if it produces a measurement that is substantially similar to the measurement that would result from using both tax credits and other tax benefits. The ASU is effective for fiscal years and interim periods beginning after December 15, 2014. As early adoption is permitted, the Company adopted this ASU effective January 1, 2014, utilizing the practical expedient method. During the three and six months ended June 30, 2014, \$14 million and \$27 million, respectively, of

investment amortization expense has been recognized on a net basis with tax credits received as a component of income tax expense. The standard is required to be applied retrospectively; therefore prior period amounts included in noninterest expense prior to adoption have been reclassified. During the three and six months ended June 30, 2013, \$10 million and \$20 million, respectively, of investment amortization expense was included in other noninterest expense in the Consolidated Statements of Income which was reclassified to income tax expense upon adoption. There has been no other impact on the Company's financial position, results of operations, or EPS.

Notes to Consolidated Financial Statements (Unaudited), continued

In January 2014, the FASB issued ASU 2014-04, "Receivables—Troubled Debt Restructurings by Creditors (Subtopic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure (a consensus of the FASB Emerging Issues Task Force)." The update clarifies that an in substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either (1) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure or (2) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. The ASU is effective for fiscal years and interim periods beginning after December 15, 2014. The adoption of this ASU is not expected to have a significant impact on the Company's financial position, results of operations, or EPS.

In April 2014, the FASB issued ASU 2014-08, "Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity." The update changes the requirements for reporting discontinued operations. The ASU is effective for fiscal years and interim periods beginning after December 15, 2014. Early adoption is permitted only for disposals (or classifications as held for sale) that have not been reported in financial statements previously issued. The Company adopted the ASU upon issuance for prospective transactions. The adoption did not have an impact on the Company's financial position, results of operations, or EPS.

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers (Topic 606)." The guidance in this update supersedes the revenue recognition requirements in Topic 605, Revenue Recognition, and most industry-specific guidance throughout the Industry Topics of the Codification. The core principle of the ASU is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU is effective for fiscal years and interim periods beginning after December 15, 2016 and early adoption is not permitted. The Company is evaluating the impact of the ASU; however, it is not expected to have a significant impact on the Company's financial position, results of operations, or EPS.

In June 2014, the FASB issued ASU 2014-11, "Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures." The amendments in this update change the accounting for repurchase-to-maturity transactions to secured borrowing accounting. Also, for repurchase financing arrangements, the amendments require separate accounting for a transfer of a financial asset executed contemporaneously with a repurchase agreement with the same counterparty, which will result in secured borrowing accounting for the repurchase agreement. Additional disclosures are required for all types of repurchase agreements. The ASU is effective for fiscal years and interim periods beginning after December 15, 2014 and early adoption is not permitted. The Company is evaluating the impact of the ASU; however, it is not expected to have a significant impact on the Company's financial position, results of operations, or EPS.

In June 2014, the FASB issued ASU 2014-12, "Compensation—Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period." The amendments in this update require that a performance target that affects vesting and that could be achieved after the requisite service period shall be treated as a performance condition. Under existing guidance in Topic 718, a performance target that falls under the scope of this amendment should not be reflected in estimating the grant-date fair value of the award; but rather compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. The ASU is effective for fiscal years and interim periods beginning after December 15, 2015. Early adoption is permitted. The Company is evaluating

the impact of the ASU; however, it is not expected to have a significant impact on the Company's financial position, results of operations, or EPS.

NOTE 2 - ACQUISITIONS/DISPOSITIONS

(Dollars in millions)	Date	Cash Received	Goodwill	Other Intangibles	Gain
2014					
Sale of RidgeWorth	5/30/2014	\$193	(\$40)	(\$9)	\$105

On May 30, 2014, the Company completed the sale of RidgeWorth, its asset management subsidiary with approximately \$49.1 billion in assets under management, to an investor group led by a private equity fund managed by Lightyear Capital LLC. The Company received cash proceeds of \$193 million, removed \$96 million in net assets and \$23 million in noncontrolling interests, and recognized a pretax gain of \$105 million in connection with the sale, net of transaction-related expenses.

Notes to Consolidated Financial Statements (Unaudited), continued

The Company's results for the six months ended June 30, 2014, included income before provision for income taxes related to RidgeWorth, excluding the gain on sale, of \$22 million, comprised of \$81 million of revenue and \$59 million of expense. Income before provision for income taxes related to RidgeWorth, excluding the gain on sale, included \$20 million attributable to the Company and \$2 million attributable to noncontrolling interests during the six months ended June 30, 2014.

The Company's results for the six months ended June 30, 2013, included income before provision for income taxes related to RidgeWorth of \$32 million, comprised of \$96 million of revenue and \$64 million of expense. For the year ended December 31, 2013, the Company's income before provision for income taxes included \$64 million related to RidgeWorth, comprised of \$194 million of revenue and \$130 million of expense. In all periods presented, the financial results of RidgeWorth, including the gain on sale, are reflected in the Corporate Other segment. There were no other material acquisitions or dispositions during the three and six months ended June 30, 2014 and 2013.

NOTE 3 - FEDERAL FUNDS SOLD AND SECURITIES BORROWED OR PURCHASED UNDER AGREEMENTS TO RESELL AND SECURITIES SOLD UNDER AGREEMENTS TO REPURCHASE

Fed funds sold and securities borrowed or purchased under agreements to resell were as follows:

(Dollars in millions)	June 30, 2014	December 31, 2013
Fed funds sold	\$103	\$75
Securities borrowed or purchased	334	184
Resell agreements	719	724
Total fed funds sold and securities borrowed or purchased under agreements to resell	\$1,156	\$983

Securities purchased under agreements to resell are primarily collateralized by U.S. government or agency securities and are carried at the amounts at which securities will be subsequently resold. Securities borrowed are primarily collateralized by corporate securities. The Company takes possession of all securities purchased under agreements to resell and securities borrowed and performs the appropriate margin evaluation on the acquisition date based on market volatility, as necessary. It is the Company's policy to obtain possession of collateral with a fair value between 95% to 110% of the principal amount loaned under resale and securities borrowing agreements. At June 30, 2014 and December 31, 2013, the total market value of collateral held was \$1.1 billion and \$913 million, of which \$227 million and \$234 million was repledged, respectively.

At June 30, 2014 and December 31, 2013, the Company had \$814 million and \$731 million of trading assets pledged to secure \$819 million and \$717 million of repurchase agreements, respectively.

Netting of Securities - Repurchase and Resell Agreements

The Company has various financial assets and financial liabilities that are subject to enforceable master netting agreements or similar agreements. The Company's derivatives that are subject to enforceable master netting agreements or similar agreements are discussed in Note 12, "Derivative Financial Instruments." Securities purchased under agreements to resell and securities sold under agreements to repurchase are governed by a MRA. Under the terms of the MRA, all transactions between the Company and the counterparty constitute a single business relationship such that in the event of default, the nondefaulting party is entitled to set off claims and apply property held by that party in respect of any transaction against obligations owed. Any payments, deliveries, or other transfers may be applied against each other and netted. These amounts are limited to the contract asset/liability balance, and accordingly, do not include excess collateral received/pledged.

Notes to Consolidated Financial Statements (Unaudited), continued

The following table presents the Company's eligible securities borrowed or purchased under agreements to resell and securities sold under agreements to repurchase at June 30, 2014 and December 31, 2013:

(Dollars in millions)	Gross Amount	Amount Offset	Net Amount Presented in Consolidated Balance Sheets		Held/Pledged Financial Instruments	Net Amount
June 30, 2014						
Financial assets:						
Securities borrowed or purchased under agreements to resell	\$1,053	\$—	\$1,053	^{1,2}	\$1,040	\$13
Financial liabilities:						
Securities sold under agreements to repurchase	2,192	—	2,192	¹	2,192	—
December 31, 2013						
Financial assets:						
Securities borrowed or purchased under agreements to resell	\$908	\$—	\$908	^{1,2}	\$899	\$9
Financial liabilities:						
Securities sold under agreements to repurchase	1,759	—	1,759	¹	1,759	—

¹ None of the Company's repurchase and reverse repurchase transactions met the right of setoff criteria for net balance sheet presentation at June 30, 2014 and December 31, 2013.

² Excludes \$103 million and \$75 million of Fed funds sold which are not subject to a master netting agreement at June 30, 2014 and December 31, 2013, respectively.

NOTE 4 – SECURITIES AVAILABLE FOR SALE

The following table presents interest and dividends on securities AFS:

(Dollars in millions)	Three Months Ended June 30		Six Months Ended June 30	
	2014	2013	2014	2013
Taxable interest	\$138	\$133	\$279	\$265
Tax-exempt interest	2	3	5	5
Dividends	9	7	18	16
Total interest and dividends	\$149	\$143	\$302	\$286

Securities AFS pledged to secure public deposits, repurchase agreements, trusts, and other funds had a fair value of \$10.8 billion and \$11.0 billion at June 30, 2014 and December 31, 2013, respectively. At June 30, 2014, \$625 million of securities AFS were pledged against repurchase arrangements under which the secured party has possession of the collateral and has the right to sell or repledge that collateral. At December 31, 2013, there were no securities AFS pledged under secured borrowing arrangements under which the secured party has possession of the collateral and would customarily sell or repledge that collateral, other than in an event of default by the Company.

The amortized cost and fair value of investments in debt securities at June 30, 2014, by estimated average life, are shown below. Actual cash flows may differ from estimated average lives and contractual maturities because borrowers may have the right to call or prepay obligations with or without penalties.

(Dollars in millions)	Distribution of Maturities				Total

Securities in an Unrealized Loss Position

The Company held certain investment securities where amortized cost exceeded fair market value, resulting in unrealized loss positions. Market changes in interest rates and credit spreads may result in temporary unrealized losses

as the market price of securities fluctuates. At June 30, 2014, the Company did not intend to sell these securities nor was it more-likely-than-not that the Company would be required to sell these securities before their anticipated recovery or maturity. The Company has reviewed its portfolio for OTTI in accordance with the accounting policies described in the Company's 2013 Annual Report on Form 10-K.

Total OTTI securities	105	2	—	—	105	2
Total impaired securities	\$10,724	\$436	\$915	\$98	\$11,639	\$534

¹ Includes OTTI securities for which credit losses have been recorded in earnings in current or prior periods.

² Securities with unrealized losses less than \$0.5 million are shown as zero.

At June 30, 2014, unrealized losses on securities that have been in a temporarily impaired position for longer than twelve months included U.S. Treasury securities, federal agency securities, agency MBS, and one ABS collateralized by 2004 vintage home equity loans. Unrealized losses on U.S. Treasury securities, federal agency securities, and agency MBS securities are due to an increase in market interest rates. The ABS continues to receive timely principal and interest payments, and is evaluated quarterly for credit impairment. Cash flow analysis shows that the underlying collateral can withstand highly stressed loss assumptions without incurring a credit loss.

The portion of unrealized losses on securities that have been OTTI that relates to factors other than credit is recorded in AOCI. Losses related to credit impairment on these securities are determined through estimated cash flow analyses and have been recorded in earnings in current and prior periods.

Notes to Consolidated Financial Statements (Unaudited), continued

Credit impairment that is determined through the use of models is estimated using cash flows on security specific collateral and the transaction structure. Future expected credit losses are determined by using various assumptions, the most significant of which include default rates, prepayment rates, and loss severities. If, based on this analysis, the security is in an unrealized loss position and the Company does not expect to recover the entire amortized cost basis of the security, the expected cash flows are then discounted at the security's initial effective interest rate to arrive at a present value amount. OTTI credit losses reflect the difference between the present value of cash flows expected to be collected and the amortized cost basis of these securities. During the three and six months ended June 30, 2014, all OTTI recognized in earnings related to one private MBS that has underlying collateral of residential mortgage loans securitized in 2007.

The Company continues to reduce existing exposure primarily through paydowns. In certain instances, the amount of impairment losses recognized in earnings includes credit losses on debt securities that exceeds the total unrealized losses, and as a result, the securities may have unrealized gains in AOCI relating to factors other than credit.

The securities that gave rise to credit impairments recognized during the three and six months ended June 30, 2014, consisted of private MBS with a fair value of approximately \$19 million at June 30, 2014. The securities that gave rise to credit impairments recognized during the three and six months ended June 30, 2013, consisted of private MBS and ABS with a combined fair value of approximately \$2 million at June 30, 2013. Credit impairments recognized on securities during the three and six months ended June 30, 2014 and 2013, are shown below.

(Dollars in millions)	Three Months Ended June 30		Six Months Ended June 30	
	2014	2013	2014	2013
OTTI ¹	\$—	\$—	\$—	\$—
Portion of gains recognized in OCI (before taxes)	1	—	1	1
Net impairment losses recognized in earnings	\$1	\$—	\$1	\$1

¹ The initial OTTI amount represents the excess of the amortized cost over the fair value of AFS debt securities. For subsequent impairments of the same security, amount includes additional declines in the fair value subsequent to the previously recorded OTTI, if applicable, until such time the security is no longer in an unrealized loss position.

The following is a rollforward of credit losses recognized in earnings for the three and six months ended June 30, 2014 and 2013, related to securities for which the Company does not intend to sell and it is not more-likely-than-not that the Company will be required to sell as of the end of each period presented. Subsequent credit losses may be recorded on securities without a corresponding further decline in fair value when there has been a decline in expected cash flows.

(Dollars in millions)	Three Months Ended June 30		Six Months Ended June 30	
	2014	2013	2014	2013
Balance, beginning of period	\$25	\$32	\$25	\$31
Additions:				
OTTI credit losses on previously impaired securities	1	—	1	1
Reductions:				
Increases in expected cash flows recognized over the remaining life of the securities	(1) —	(1) —
Balance, end of period	\$25	\$32	\$25	\$32

The following table presents a summary of the significant inputs used in determining the measurement of credit losses recognized in earnings for private MBS and ABS for the six months ended June 30:

Edgar Filing: SUNTRUST BANKS INC - Form 10-Q

	2014 ¹	2013
Default rate	2%	6 - 9%
Prepayment rate	16%	7 - 8%
Loss severity	46%	61 - 74%

¹ During the six months ended June 30, 2014, all OTTI recognized in earnings related to one private MBS security.

Assumption ranges represent the lowest and highest lifetime average estimates of each security for which credit losses were recognized in earnings. Ranges may vary from period to period as the securities for which credit losses are recognized vary. Additionally, severity may vary widely when losses are few and large.

Notes to Consolidated Financial Statements (Unaudited), continued

NOTE 5 - LOANS

Composition of Loan Portfolio

The composition of the Company's loan portfolio is shown in the following table:

(Dollars in millions)	June 30, 2014	December 31, 2013
Commercial loans:		
C&I	\$61,337	\$57,974
CRE	6,105	5,481
Commercial construction	1,096	855
Total commercial loans	68,538	64,310
Residential loans:		
Residential mortgages - guaranteed	661	3,416
Residential mortgages - nonguaranteed ¹	24,173	24,412
Home equity products	14,519	14,809
Residential construction	508	553
Total residential loans	39,861	43,190
Consumer loans:		
Guaranteed student loans	5,420	5,545
Other direct	3,675	2,829
Indirect	11,501	11,272
Credit cards	749	731
Total consumer loans	21,345	20,377
LHFI	\$129,744	\$127,877
LHFS ²	\$4,046	\$1,699

¹ Includes \$292 million and \$302 million of loans carried at fair value at June 30, 2014 and December 31, 2013, respectively.

² Includes \$1.4 billion of LHFS carried at fair value at both June 30, 2014 and December 31, 2013.

At June 30, 2014 and December 31, 2013, the Company had \$57.9 billion and \$56.4 billion, respectively, of net eligible loan collateral pledged to the Federal Reserve Discount Window or the FHLB of Atlanta to support available borrowing capacity.

During the three months ended June 30, 2014 and 2013, the Company transferred \$2.7 billion and \$87 million in LHFI to LHFS, and \$3 million and \$5 million in LHFS to LHFI, respectively. Specifically, \$2.1 billion of guaranteed residential mortgages were transferred to LHFS during the three months ended June 30, 2014, in anticipation of the sale of these loans on a servicing retained basis in the third quarter. Additionally, during the three months ended June 30, 2014 and 2013, the Company sold \$534 million and \$159 million in loans and leases for gains of \$22 million and \$3 million, respectively.

During the six months ended June 30, 2014 and 2013, the Company transferred \$2.8 billion and \$144 million in LHFI to LHFS, and \$20 million and \$17 million in LHFS to LHFI, respectively. Additionally, during the six months ended June 30, 2014 and 2013, the Company sold \$619 million and \$662 million in loans and leases for gains of \$31 million and \$7 million, respectively.

Credit Quality Evaluation

The Company evaluates the credit quality of its loan portfolio by employing a dual internal risk rating system, which assigns both PD and LGD ratings to derive expected losses. Assignment of PD and LGD ratings are predicated upon

numerous factors, including consumer credit risk scores, rating agency information, borrower/guarantor financial capacity, LTV ratios, collateral type, debt service coverage ratios, collection experience, other internal metrics/analysis, and qualitative assessments.

For the commercial portfolio, the Company believes that the most appropriate credit quality indicator is an individual loan's risk assessment expressed according to the broad regulatory agency classifications of Pass or Criticized. The Company's risk rating system is granular, with multiple risk ratings in both the Pass and Criticized categories. Pass ratings reflect relatively low PDs; whereas, Criticized assets have a higher PD. The granularity in Pass ratings assists in the establishment of pricing, loan structures, approval requirements, reserves, and ongoing credit management requirements. The Company conforms to the following regulatory classifications for Criticized assets: Other Assets Especially Mentioned (or Special Mention), Adversely Classified, Doubtful, and Loss. However, for the purposes of disclosure, management believes the most meaningful distinction within the

Notes to Consolidated Financial Statements (Unaudited), continued

Criticized categories is between Accruing Criticized (which includes Special Mention and a portion of Adversely Classified) and Nonaccruing Criticized (which includes a portion of Adversely Classified and Doubtful and Loss). This distinction identifies those relatively higher risk loans for which there is a basis to believe that the Company will collect all amounts due from those where full collection is less certain.

Risk ratings are refreshed at least annually, or more frequently as appropriate, based upon considerations such as market conditions, loan characteristics, and portfolio trends. Additionally, management routinely reviews portfolio risk ratings, trends, and concentrations to support risk identification and mitigation activities.

For consumer and residential loans, the Company monitors credit risk based on indicators such as delinquencies and FICO scores. The Company believes that consumer credit risk, as assessed by the industry-wide FICO scoring method, is a relevant credit quality indicator. Borrower-specific FICO scores are obtained at origination as part of the Company's formal underwriting process, and refreshed FICO scores are obtained by the Company at least quarterly. For government-guaranteed loans, the Company monitors the credit quality based primarily on delinquency status, as it is a more relevant indicator of credit quality due to the government guarantee. At June 30, 2014 and December 31, 2013, 27% and 82%, respectively, of the guaranteed residential loan portfolio was current with respect to payments. The decline in the percentage of current loans in LHFI is solely due to approximately \$2.1 billion in accruing current guaranteed residential loan which were transferred to LHFS in June, 2014. At June 30, 2014 and December 31, 2013, 82% and 81%, respectively, of the guaranteed student loan portfolio was current with respect to payments. Loss exposure to the Company on these loans is mitigated by the government guarantee.

LHFI by credit quality indicator are shown in the tables below:

Notes to Consolidated Financial Statements (Unaudited), continued

Impaired Loans

A loan is considered impaired when it is probable that the Company will be unable to collect all amounts due, including principal and interest, according to the contractual terms of the agreement. Commercial nonaccrual loans greater than \$3 million and certain consumer, residential, and commercial loans whose terms have been modified in a TDR are individually evaluated for impairment. Smaller-balance homogeneous loans that are collectively evaluated for impairment are not included in the following tables. Additionally, the tables below exclude guaranteed student loans and guaranteed residential mortgages for which there was nominal risk of principal loss.

(Dollars in millions)	June 30, 2014			December 31, 2013

OREO ²	136	170
Other repossessed assets	6	7
Nonperforming LHFS	—	17
Total NPAs	\$1,041	\$1,165

¹ Nonaccruing restructured loans are included in total nonaccrual/NPLs.

² Does not include foreclosed real estate related to loans insured by the FHA or the VA. Proceeds due from the FHA and the VA are recorded as a receivable in other assets in the Consolidated Balance Sheets until the funds are received and the property is conveyed. The receivable amount related to proceeds due from the FHA or the VA totaled \$79 million and \$88 million at June 30, 2014 and December 31, 2013, respectively.

Restructured Loans

TDRs are loans in which the borrower is experiencing financial difficulty and the Company has granted an economic concession to the borrower that the Company would not otherwise consider. When loans are modified under the terms of a TDR, the Company typically offers the borrower an extension of the loan maturity date and/or a reduction in the original contractual interest rate. In certain situations, the Company may offer to restructure a loan in a manner that ultimately results in the forgiveness of contractually specified principal balances.

At both June 30, 2014 and December 31, 2013, the Company had \$8 million in commitments to lend additional funds to debtors whose terms have been modified in a TDR.

Notes to Consolidated Financial Statements (Unaudited), continued

The number and amortized cost of loans modified under the terms of a TDR by type of modification are shown in the following tables:

(Dollars in millions)	Three Months Ended June 30, 2014 ¹

Total TDRs	250	\$10	496	\$23

The majority of loans that were modified and subsequently became 90 days or more delinquent have remained on nonaccrual status since the time of modification.

Notes to Consolidated Financial Statements (Unaudited), continued

Concentrations of Credit Risk

The Company does not have a significant concentration of risk to any individual client except for the U.S. government and its agencies. However, a geographic concentration arises because the Company operates primarily in the Southeastern and Mid-Atlantic regions of the U.S. The Company engages in limited international banking activities. The Company's total cross-border outstanding loans were \$1.2 billion and \$1.0 billion at June 30, 2014 and December 31, 2013, respectively.

The major concentrations of credit risk for the Company arise by collateral type in relation to loans and credit commitments. The only significant concentration that exists is in loans secured by residential real estate. At June 30, 2014, the Company owned \$39.9 billion in residential loans, representing 31% of total LHFI, and had \$10.9 billion in commitments to extend credit on home equity lines and \$3.4 billion in mortgage loan commitments. At December 31, 2013, the Company owned \$43.2 billion in residential loans, representing 34% of total LHFI, and had \$11.2 billion in commitments to extend credit on home equity lines and \$2.7 billion in mortgage loan commitments. Of the residential loans owned at June 30, 2014 and December 31, 2013, 2% and 8%, respectively, were guaranteed by a federal agency or a GSE.

Included in the residential mortgage portfolio were \$11.9 billion and \$12.4 billion of mortgage loans at June 30, 2014 and December 31, 2013, respectively, that included terms such as an interest only feature, a high original LTV ratio, or a second lien position that may increase the Company's exposure to credit risk and result in a concentration of credit risk. Of these mortgage loans, \$4.7 billion and \$5.5 billion, respectively, were interest only loans, primarily with a ten year interest only period. Approximately \$1.0 billion and \$1.1 billion of those interest only loans at June 30, 2014 and December 31, 2013, respectively, were loans with no MI and were either first liens with combined original LTV ratios in excess of 80% or were second liens. Additionally, the Company owned approximately \$7.3 billion and \$6.9 billion of amortizing loans with no MI at June 30, 2014 and December 31, 2013, respectively, comprised of first liens with combined original LTV ratios in excess of 80% and second liens. Despite changes in underwriting guidelines that have curtailed the origination of high LTV loans, the balances of such loans have increased due to lending to high credit quality clients.

NOTE 6 - ALLOWANCE FOR CREDIT LOSSES

The allowance for credit losses consists of the ALLL and the reserve for unfunded commitments. Activity in the allowance for credit losses is summarized in the table below:

(Dollars in millions)	Three Months Ended June 30		Six Months Ended June 30	
	2014	2013	2014	2013

As discussed in Note 1, "Significant Accounting Policies," to the Company's 2013 Annual Report on Form 10-K, the ALLL is composed of both specific allowances for certain nonaccrual loans and TDRs and general allowances grouped into loan pools based on similar characteristics. No allowance is required for loans carried at fair value. Additionally, the Company records an immaterial allowance for loan products that are guaranteed by government agencies, as there is nominal risk of principal loss.

Notes to Consolidated Financial Statements (Unaudited), continued

The Company's LHFI portfolio and related ALLL is shown in the tables below:

NOTE 7 – GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill

Goodwill is required to be tested for impairment on an annual basis, which is performed by the Company as of September 30, 2014, or as events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount or indicate that it is more likely than not that a goodwill impairment exists when the carrying amount of a reporting unit is zero or negative. The Company monitored events and circumstances during the first six months of 2014 and did not observe any factors that would more likely than not reduce the fair value of a reporting unit below its respective carrying value. Accordingly, goodwill was not tested for impairment during the six months ended June 30, 2014.

As discussed in Note 2, "Acquisitions/Dispositions," the Company completed the sale of its asset management subsidiary, RidgeWorth, during the second quarter of 2014. Also, during the six months ended June 30, 2013, branch-managed business banking clients were transferred from Wholesale Banking to Consumer Banking and Private Wealth Management, resulting in the reallocation of \$300 million in goodwill. The changes in the carrying amount of goodwill by reportable segment for the six months ended June 30 are as follows:

(Dollars in millions)	Consumer Banking and Private Wealth Management	Wholesale Banking	Total
Balance, January 1, 2014	\$4,262	\$2,107	\$6,369
Acquisition of Lantana Oil and Gas Partners, Inc.	—	8	8

Notes to Consolidated Financial Statements (Unaudited), continued

Other Intangible Assets

Changes in the carrying amounts of other intangible assets for the six months ended June 30 are as follows:

(Dollars in millions)	Core Deposit Intangibles	MSRs - Fair Value	Other	Total
Balance, January 1, 2014	\$4	\$1,300	\$30	\$1,334
Amortization	(3)	—	(4)	(7)
MSRs originated	—	68	—	68
MSRs purchased	—	76	—	76
Changes in fair value:				
Due to changes in inputs and assumptions ¹	—	(107)	—	(107)
Other changes in fair value ²	—	(78)	—	(78)
Sale of RidgeWorth	—	—	(9)	(9)
Balance, June 30, 2014	\$1	\$1,259	\$17	\$1,277
Balance, January 1, 2013	\$17	\$899	\$40	\$956
Amortization	(7)	—	(5)	(12)
MSRs originated	—	203	—	203
Changes in fair value:				
Due to changes in inputs and assumptions ¹	—	250	—	250
Other changes in fair value ²	—	(152)	—	(152)
Sale of MSR	—	(1)	—	(1)
Balance, June 30, 2013	\$10	\$1,199	\$35	\$1,244

¹ Primarily reflects changes in discount rates and prepayment speed assumptions, due to changes in interest rates.

² Represents changes due to the collection of expected cash flows, net of accretion, due to the passage of time.

Mortgage Servicing Rights

The Company retains MSR from certain of its sales or securitizations of residential mortgage loans. MSR on residential mortgage loans are the only servicing assets capitalized by the Company and are classified within intangible assets on the Company's Consolidated Balance Sheets.

Income earned by the Company on its MSR is derived primarily from contractually specified mortgage servicing fees and late fees, net of curtailment costs. Such income earned for the three and six months ended June 30, 2014 was \$81 million and \$160 million, respectively, and \$77 million and \$153 million for the three and six months ended June 30, 2013, respectively. These amounts are reported in mortgage servicing related income in the Consolidated Statements of Income.

At June 30, 2014 and December 31, 2013, the total UPB of mortgage loans serviced was \$134.4 billion and \$136.7 billion, respectively. Included in these amounts were \$105.4 billion and \$106.8 billion at June 30, 2014 and December 31, 2013, respectively, of loans serviced for third parties. During the six months ended June 30, 2014 and 2013, the Company sold MSR, at a price approximating their fair value, on residential loans with a UPB of \$439 million and \$632 million, respectively. The Company purchased MSR on residential loans with a UPB of \$5.9 billion during the second quarter of 2014; however, only \$460 million of these loans are reflected in the UPB amounts above as the transfer of servicing for the remainder is scheduled for the third quarter of 2014.

The Company determines the fair value of the MSR using a valuation model that calculates the present value of the estimated future net servicing income. The model incorporates a number of assumptions as MSR do not trade in an active and open market with readily observable prices. The Company determines fair value using market based prepayment rates, discount rates, and other assumptions that are compared to various sources of market data including

independent third party valuations and industry surveys. Senior management and the STM Valuation Committee review all significant assumptions at least quarterly, since many factors can affect the fair value of MSRs. Changes to the valuation model inputs and assumptions are reflected in the periods' results.

Notes to Consolidated Financial Statements (Unaudited), continued

A summary of the key characteristics, inputs, and economic assumptions used to estimate the fair value of the Company's MSR's at June 30, 2014 and December 31, 2013, and the sensitivity of the fair values to immediate 10% and 20% adverse changes in those assumptions are shown in the table below. The overall change in MSR's during the six months ended June 30, 2014 was primarily due to a decrease in prevailing interest rates during the period.

(Dollars in millions)	June 30, 2014		December 31, 2013	
Fair value of retained MSR's	\$1,259		\$1,300	
Prepayment rate assumption (annual)	9	%	8	%
Decline in fair value from 10% adverse change	\$45		\$38	
Decline in fair value from 20% adverse change	88		74	
Discount rate (annual)	11	%	12	%
Decline in fair value from 10% adverse change	\$59		\$66	
Decline in fair value from 20% adverse change	114		126	
Weighted-average life (in years)	7.0		7.7	
Weighted-average coupon	4.3	%	4.4	%

The above sensitivities are hypothetical and should be used with caution. As the amounts indicate, changes in fair value based on variations in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, in this table, the effect of a variation in a particular assumption on the fair value of the retained interest is calculated without changing any other assumption. In reality, changes in one factor may result in changes in another, which might magnify or counteract the sensitivities. Additionally, the sensitivities above do not include the effect of hedging activity undertaken by the Company to offset changes in the fair value of MSR's. See Note 12, "Derivative Financial Instruments," for further information regarding these hedging activities.

NOTE 8 - CERTAIN TRANSFERS OF FINANCIAL ASSETS AND VARIABLE INTEREST ENTITIES**Certain Transfers of Financial Assets and related Variable Interest Entities**

As discussed in Note 10, "Certain Transfers of Financial Assets and Variable Interest Entities," to the Consolidated Financial Statements in the Company's 2013 Annual Report on Form 10-K, the Company has transferred loans and securities in sale or securitization transactions in which the Company has, or had, continuing involvement. Except as specifically noted herein, the Company is not required to provide additional financial support to any of the entities to which the Company has transferred financial assets, nor has the Company provided any support it was not otherwise obligated to provide. Further, during the six months ended June 30, 2014, the Company evaluated whether any of its previous conclusions regarding whether it is the primary beneficiary of the VIEs described below should be changed based upon events occurring during the period. These evaluations did not result in changes to previous consolidation conclusions except for one CLO entity which is described in detail in the "Commercial and Corporate Loans" section of this footnote. No events occurred during the six months ended June 30, 2014 that changed the Company's sale accounting conclusion in regards to the residential mortgage loans, student loans, commercial and corporate loans, or CDO securities.

When evaluating transfers and other transactions with VIEs for consolidation, the Company first determines if it has a VI in the VIE. A VI is typically in the form of securities representing retained interests in the transferred assets and, at times, servicing rights and collateral manager fees. If the Company has a VI in the entity, it then evaluates whether or not it has both (1) the power to direct the activities that most significantly impact the economic performance of the VIE, and (2) the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE to determine if the Company should consolidate the VIE.

Below is a summary of transfers of financial assets to VIEs for which the Company has retained some level of continuing involvement and supplements Note 10, "Certain Transfers of Financial Assets and Variable Interest

Entities," to the Consolidated Financial Statements in the Company's 2013 Annual Report on Form 10-K.

Residential Mortgage Loans

The Company typically transfers first lien residential mortgage loans in conjunction with Ginnie Mae, Fannie Mae, and Freddie Mac securitization transactions whereby the loans are exchanged for cash or securities that are readily redeemable for cash proceeds and servicing rights. The Company sold residential mortgage loans to these entities, which resulted in pre-tax net gains of \$61 million and \$124 million, including servicing rights, for the three months ended June 30, 2014 and 2013, respectively and \$105 million and \$281 million for the six months ended June 30,

Notes to Consolidated Financial Statements (Unaudited), continued

2014 and 2013, respectively. These net gains are included within mortgage production related income in the Consolidated Statements of Income. These net gains include the change in value of the loans as a result of changes in interest rates from the time the related IRLCs were issued to the borrowers but do not include the results of hedging activities initiated by the Company to mitigate this market risk. See Note 12, "Derivative Financial Instruments," for further discussion of the Company's hedging activities. As seller, the Company has made certain representations and warranties with respect to the originally transferred loans, including those transferred under Ginnie Mae, Fannie Mae, and Freddie Mac programs, and those representations and warranties are discussed in Note 13, "Guarantees." In a limited number of securitizations, the Company has received securities representing retained interests in the transferred loans in addition to cash and servicing rights in exchange for the transferred loans. The received securities are carried at fair value as either trading assets or securities AFS. At June 30, 2014 and December 31, 2013, the fair value of securities received totaled \$65 million and \$71 million, respectively, and was valued using a third party pricing service.

The Company evaluated these securitization transactions for consolidation under the VIE consolidation guidance. As servicer of the underlying loans, the Company is generally deemed to have power over the securitization. However, if a single party, such as the issuer or the master servicer, effectively controls the servicing activities or has the unilateral ability to terminate the Company as servicer without cause, then that party is deemed to have power over the securitization. In almost all of its securitization transactions, the Company does not have power over the VIE as a result of these rights held by the master servicer. In certain transactions, the Company does have power as the servicer; however, the Company does not also have an obligation to absorb losses or the right to receive benefits that could potentially be significant to the securitization. The absorption of losses and the receipt of benefits would generally manifest itself through the retention of senior or subordinated interests. Total assets at June 30, 2014 and December 31, 2013, of the unconsolidated trusts in which the Company has a VI are \$316 million and \$350 million, respectively.

The Company's maximum exposure to loss related to the unconsolidated VIEs in which it holds a VI is comprised of the loss of value of any interests it retains and any repurchase obligations it incurs as a result of a breach of its representations and warranties, discussed further in Note 13, "Guarantees."

Commercial and Corporate Loans

The Company has involvement with CLO entities that own commercial leveraged loans and bonds, certain of which were transferred by the Company to the CLOs. The Company currently holds certain securities issued by the CLOs and previously acted as collateral manager for these CLOs; however, upon the sale of RidgeWorth in May 2014, the Company is no longer the collateral manager. The Company previously determined that it was the primary beneficiary of, and thus, had consolidated one of these CLOs as it had both the power to direct the activities that most significantly impacted the entity's economic performance and the obligation to absorb losses and the right to receive benefits from the entity that could potentially be significant to the CLO. The Company's involvement with this CLO includes ownership in one of the senior interests in the CLO and certain preference shares of the CLO. Since the Company is no longer the collateral manager for the CLO, the Company no longer possesses the power to direct the activities that most significantly impact the economic performance of the VIE; therefore, the Company is no longer the primary beneficiary of this CLO and in connection with the sale of RidgeWorth, the CLO was deconsolidated. At December 31, 2013, the Company's Consolidated Balance Sheets reflected \$261 million of loans held by the CLO and \$256 million of debt issued by the CLO.

At June 30, 2014, all CLOs that the Company has involvement with are considered to be VIEs and are unconsolidated. The Company has determined that it is not the primary beneficiary as it does not possess the power to direct the activities that most significantly impact the economic performance of the VIE. The Company's preference share exposure was valued at \$5 million and \$3 million at June 30, 2014 and December 31, 2013, respectively. The Company's senior interest exposure was valued at \$22 million and \$26 million at June 30, 2014 and December 31, 2013, respectively. At June 30, 2014 and December 31, 2013, unconsolidated VIEs that the Company had involvement with had \$780 million and \$1.6 billion of estimated assets, respectively, and \$730 million and \$1.6

billion of estimated liabilities, respectively.

Student Loans

During 2006, the Company completed a securitization of government-guaranteed student loans through a transfer of loans to a securitization SPE, which previously qualified as a QSPE, and retained the related residual interest in the SPE. The Company concluded that this securitization of government-guaranteed student loans (the “Student Loan entity”) should be consolidated. At June 30, 2014 and December 31, 2013, the Company’s Consolidated Balance

28

Notes to Consolidated Financial Statements (Unaudited), continued

Sheets reflected \$326 million and \$344 million, respectively, of assets held by the Student Loan entity and \$322 million and \$341 million, respectively, of debt issued by the Student Loan entity.

Payments from the assets in the SPE must first be used to settle the obligations of the SPE, with any remaining payments remitted to the Company as the owner of the residual interest. To the extent that losses occur on the SPE's assets, the SPE has recourse to the federal government as the guarantor up to a maximum guarantee amount of 97%. Losses in excess of the government guarantee reduce the amount of available cash payable to the Company as the owner of the residual interest. To the extent that losses result from a breach of the master servicer's servicing responsibilities, the SPE has recourse to the Company; the SPE may require the Company to repurchase the loan from the SPE at par value. If the breach was caused by the subservicer, the Company has recourse to seek reimbursement from the subservicer up to the guaranteed amount. The Company's maximum exposure to loss related to the SPE is represented by the potential losses resulting from a breach of servicing responsibilities. To date, all loss claims filed with the guarantor that have been denied due to servicing errors have either been cured or reimbursement has been provided to the Company by the subservicer.

CDO Securities

The Company has transferred bank trust preferred securities in securitization transactions. The Company determined that it was not the primary beneficiary of any of these VIEs as the Company lacked the power to direct the significant activities of any of the VIEs. During the first quarter of 2014, the Company sold all remaining exposures to these VIEs. For further details on these VIEs refer to Note 10, "Certain Transfers of Financial Assets and Variable Interest Entities," to the Consolidated Financial Statements in the Company's 2013 Annual Report on Form 10-K.

The following tables present certain information related to the Company's asset transfers in which it has continuing economic involvement.

(Dollars in millions)	Three Months Ended June 30		Six Months Ended June 30	
	2014	2013	2014	2013

¹ Excludes \$4.0 billion and \$1.7 billion of LHFS at June 30, 2014 and December 31, 2013, respectively.

² Excludes \$1 million and \$17 million of past due LHFS at June 30, 2014 and December 31, 2013, respectively.

³ Excludes loans that have completed the foreclosure or short sale process (i.e. involuntary prepayments).

Other Variable Interest Entities

In addition to the Company's involvement with certain VIEs related to transfers of financial assets, the Company also has involvement with VIEs from other business activities.

Total Return Swaps

The Company has involvement with various VIEs related to its TRS business. At June 30, 2014 and December 31, 2013, the Company had \$1.4 billion and \$1.5 billion, respectively, in senior financing outstanding to VIEs, which was classified within trading assets and derivatives on the Consolidated Balance Sheets and carried at fair value. These VIEs had entered into TRS contracts with the Company with outstanding notional amounts of \$1.4 billion and \$1.5 billion at June 30, 2014 and December 31, 2013, respectively, and the Company had entered into mirror TRS contracts with third parties with the same outstanding notional amounts. At June 30, 2014, the fair values of these TRS assets and liabilities were \$19 million and \$16 million, respectively, and at December 31, 2013, the fair values of these TRS assets and liabilities were \$35 million and \$31 million, respectively, reflecting the pass-through nature of these structures. The notional amounts of the TRS contracts with the VIEs represent the Company's maximum exposure to loss, although such exposure to loss has been mitigated via the TRS contracts with third parties. For additional information on the Company's TRS with these VIEs, see Note 12, "Derivative Financial Instruments," as well as Note 10, "Certain Transfers of Financial Assets and Variable Interest Entities," to the Company's 2013 Annual Report on Form 10-K. There have been no changes to the Company's consolidation conclusions regarding the VIEs, as described in the Company's 2013 Annual Report on Form 10-K, since December 31, 2013.

Community Development Investments

As part of its community reinvestment initiatives, the Company invests primarily within its footprint in multi-family affordable housing developments and other community development entities as a limited and/or general partner and/or a debt provider. The Company receives tax credits for various investments. The Company has determined that the related partnerships are VIEs. For partnerships where the Company operates strictly as the general partner, the Company consolidates these partnerships on its Consolidated Balance Sheets. As the general partner, the Company

typically guarantees the tax credits due to the limited partner and is responsible for funding construction and operating deficits. At June 30, 2014 and December 31, 2013, total assets, which consist primarily of fixed assets and cash attributable to the consolidated entities, and total liabilities, were immaterial. While the obligations of the general partner are generally non-recourse to the Company, as the general partner, the Company may from time to time step in when needed to fund deficits. During the three and six months ended June 30, 2014 and 2013, the Company did not provide any significant amount of funding as the general partner or to cover any deficits the partnerships may have generated.

For other partnerships, the Company acts only in a limited partnership capacity. The Company has determined that it is not the primary beneficiary of these partnerships and accounts for its interests in accordance with the accounting

Notes to Consolidated Financial Statements (Unaudited), continued

guidance for investments in affordable housing projects. The general partner or an affiliate of the general partner provides guarantees to the limited partner, which protects the Company from losses attributable to operating deficits, construction deficits, and tax credit allocation deficits. Partnership assets of \$1.5 billion in these partnerships were not included in the Consolidated Balance Sheets at both June 30, 2014 and December 31, 2013. The limited partner interests had carrying values of \$270 million and \$252 million at June 30, 2014 and December 31, 2013, respectively, and are recorded in other assets in the Company's Consolidated Balance Sheets. The Company's maximum exposure to loss for these investments totaled \$766 million and \$697 million at June 30, 2014 and December 31, 2013, respectively. The Company's maximum exposure to loss would be borne by the loss of the equity investments along with \$346 million and \$303 million of loans, interest-rate swaps, or letters of credit issued by the Company to the entities at June 30, 2014 and December 31, 2013, respectively. The difference between the maximum exposure to loss and the investment and loan balances is primarily attributable to the unfunded equity commitments. Unfunded equity commitments are amounts that the Company has committed to the entities upon the entities meeting certain conditions. If these conditions are met, the Company will invest these additional amounts in the entities. The Company adopted ASU 2014-01 in the first quarter of 2014, which allowed amortization of qualified affordable housing investments within the scope of the ASU to be presented net of the income tax credits in the provision for income taxes. During the three months ended June 30, 2014 and 2013, the Company recognized \$15 million of tax credits, and \$14 million and \$10 million of amortization expense, respectively. During the six months ended June 30, 2014 and 2013, the Company recognized \$30 million and \$29 million of tax credits, respectively, and \$27 million and \$20 million of amortization expense, respectively, in the provision for income taxes. For community development investments not within the scope of ASU 2014-01, the Company continues to record amortization of the investment in noninterest expense.

Additionally, the Company owns noncontrolling interests in funds whose purpose is to invest in community developments. At June 30, 2014 and December 31, 2013, the Company's investment in these funds totaled \$145 million and \$138 million, respectively, and the Company's maximum exposure to loss on its equity investments, which is comprised of its investments in the funds plus any additional unfunded equity commitments, was \$234 million and \$217 million, respectively.

When the Company owns both the limited partner and general partner interests or acts as the indemnifying party, the Company consolidates the entities. At June 30, 2014 and December 31, 2013, total assets, which consist primarily of fixed assets and cash, attributable to the consolidated non-VIE partnerships were \$108 million and \$151 million, respectively, and total liabilities, excluding intercompany liabilities, primarily representing third party borrowings, were \$56 million and \$58 million, respectively.

The Company has designated certain consolidated affordable housing properties as held for sale, and accordingly recognizes them at the lower of their carrying value or estimated fair value less costs to sell. At June 30, 2014, the carrying value of properties held for sale was \$65 million. Disposition of these properties is targeted to be completed within the next nine months.

Notes to Consolidated Financial Statements (Unaudited), continued

NOTE 9 – NET INCOME PER COMMON SHARE

Equivalent shares of 16 million and 21 million related to common stock options and common stock warrants outstanding at June 30, 2014 and 2013, respectively, were excluded from the computations of diluted net income per average common share because they would have been anti-dilutive.

Reconciliations of net income to net income available to common shareholders and the difference between average basic common shares outstanding and average diluted common shares outstanding are included below.

	Three Months Ended		Six Months Ended June	
	June 30		30	
(In millions, except per share data)	2014	2013	2014	2013
Net income	\$399	\$377	\$804	\$729
Preferred dividends	(9) (9) (19) (18
Dividends and undistributed earnings allocated to unvested shares	(3) (3) (5) (6
Net income available to common shareholders	\$387	\$365	\$780	\$705
Average basic common shares	530	535	530	535
Effect of dilutive securities:				
Stock options	1	2	2	2
Restricted stock and warrants	4	3	4	3
Average diluted common shares	535	540	536	540
Net income per average common share - diluted	\$0.72	\$0.68	\$1.45	\$1.31
Net income per average common share - basic	\$0.73	\$0.68	\$1.47	\$1.32

NOTE 10 - INCOME TAXES

The provision for income taxes was \$173 million and \$156 million for the three months ended June 30, 2014 and 2013, respectively, representing effective tax rates of 30.2% and 29.3%, respectively. The provision for income taxes was \$298 million and \$317 million for the six months ended June 30, 2014 and 2013, respectively, representing effective tax rates of 27.0% and 30.3%, respectively. The Company calculated the provision for income taxes for the three and six months ended June 30, 2014 and 2013, by applying the estimated annual effective tax rate to year-to-date pre-tax income and adjusting for discrete items that occurred during the period.

The Company adopted accounting guidance effective January 1, 2014, which allowed amortization expense related to qualified affordable housing investments to be presented net of the income tax credits in the provision for income taxes. Prior to the first quarter of 2014, these amortization expenses were recognized in other noninterest expense. The standard is required to be applied retrospectively; therefore, prior periods have been restated in accordance with U.S. GAAP. See Note 1, "Significant Accounting Policies," for further information related to this new guidance.

The Company's liability for UTBs was \$274 million and \$291 million at June 30, 2014 and December 31, 2013, respectively. It is reasonably possible that the liability for UTBs could decrease by as much as \$180 million during the next 12 months due to the completion of tax authority examinations and expiration of statutes of limitations. A portion of the decrease may favorably impact the effective tax rate.

Notes to Consolidated Financial Statements (Unaudited), continued

NOTE 11 - EMPLOYEE BENEFIT PLANS

The Company sponsors various short-term incentive plans and LTI plans for eligible employees, which may be delivered through various incentive programs, such as RSUs, restricted stock, and LTI cash. AIP is the Company's short-term cash incentive plan for key employees that provides for potential annual cash awards based on the Company's performance and/or the achievement of business unit and individual performance objectives. Awards under the LTI cash plan generally cliff vest over a period of three years from the date of the award and are paid in cash. All incentive awards are subject to clawback provisions. Compensation expense for incentive plans with cash payouts was \$51 million and \$39 million for the three months ended June 30, 2014 and 2013, respectively and \$96 million and \$78 million for the six months ended June 30, 2014 and 2013.

Stock-Based Compensation

The Company provides stock-based awards through the 2009 Stock Plan under which the Compensation Committee of the Board of Directors has the authority to grant stock options, stock appreciation rights, restricted stock, and RSUs to key employees of the Company. Some awards may have performance or other conditions, such as vesting tied to the Company's total shareholder return relative to a peer group or vesting tied to the achievement of an absolute financial performance target.

In February 2014, the Compensation Committee and Board of Directors approved, subject to shareholder approval, an amendment to the 2009 Stock Plan to remove the sub-limit on shares available for grant that may be issued as restricted stock or RSUs. Following shareholder approval of the Plan amendment, which occurred on April 22, 2014, all of the 17 million remaining authorized shares previously under the Plan became available for grant as stock options, stock appreciation rights, restricted stock, or RSUs. Prior to the Plan amendment, only a portion of such shares were available to be granted as either restricted stock or RSUs. At June 30, 2014, approximately 17 million shares remained available for grant.

Stock options are granted at an exercise price that was no less than the fair market value of a share of SunTrust common stock on the grant date and were either tax-qualified incentive stock options or non-qualified stock options. Stock options typically vest pro-rata over three years and generally have a maximum contractual life of ten years. Upon exercise, shares are generally issued from treasury stock. No stock options were issued during the six months ended June 30, 2014, consistent with the Company's decision to discontinue the issuance of stock options in 2014. The weighted average fair value of options granted during the first six months of 2013 was \$7.37 per share. The fair value of each option grant was estimated on the date of grant using the Black-Scholes option pricing model based on the following assumptions for the six months ended June 30, 2013:

Dividend yield	1.28	%
Expected stock price volatility	30.98	
Risk-free interest rate (weighted average)	1.02	
Expected life of options	6 years	

Stock-based compensation expense recognized in noninterest expense for the three and six months ended June 30, were as follows:

(Dollars in millions)	Three Months Ended June 30		Six Months Ended June 30	
	2014	2013	2014	2013
Stock-based compensation expense:				
Stock options	\$—	\$1	\$1	\$4
Restricted stock	6	8	14	15
RSUs	7	4	21	13

Edgar Filing: SUNTRUST BANKS INC - Form 10-Q

Total stock-based compensation expense	\$13	\$13	\$36	\$32
----------------------------------------	------	------	------	------

The recognized stock-based compensation tax benefit was \$5 million for both the three months ended June 30, 2014 and 2013, and \$14 million and \$12 million for the six months ended June 30, 2014 and 2013, respectively.

33

Notes to Consolidated Financial Statements (Unaudited), continued

Retirement Plans

SunTrust did not contribute to either of its noncontributory qualified retirement plans ("Retirement Benefit Plans") during the six months ended June 30, 2014. The expected long-term rates of return on plan assets net of administrative fees for the Retirement Benefit Plans are 7.0% for the SunTrust Retirement Plan and 6.5% for the NCF Retirement Plan for 2014.

Anticipated employer contributions/benefit payments for 2014 are \$7 million for the SERP. During the three and six months ended June 30, 2014, the actual contributions/benefit payments were \$1 million and \$2 million, respectively. SunTrust contributed less than \$1 million to the Postretirement Welfare Plan during the three and six months ended June 30, 2014. Additionally, SunTrust expects to receive a Medicare Part D Subsidy reimbursement for 2014 of less than \$1 million. The expected pre-tax long-term rate of return on plan assets for the Postretirement Welfare Plan is 5.25% for 2014.

Components of net periodic benefit for the three and six months ended June 30, were as follows:

(Dollars in millions)	Three Months Ended June 30			
	2014		2013	
	Pension Benefits	Other Postretirement Benefits	Pension Benefits	Other Postretirement Benefits
Service cost	\$1	¹ \$—	\$1	¹ \$—
Interest cost	31	1	28	2
Expected return on plan assets	(50) ¹ (1	(48) ¹ (2
Amortization of prior service credit	—	(2	—	—
Recognized net actuarial loss	4	—	7	—
Net periodic benefit	(\$14) (\$2	(\$12) \$—

(Dollars in millions)	Six Months Ended June 30			
	2014		2013	
	Pension Benefits	Other Postretirement Benefits	Pension Benefits	Other Postretirement Benefits
Service cost	\$2	¹ \$—	\$2	¹ \$—
Interest cost	62	2	56	3
Expected return on plan assets	(100) ¹ (3	(95) ¹ (3
Amortization of prior service credit	—	(3	—	—
Recognized net actuarial loss	8	—	13	—
Net periodic benefit	(\$28) (\$4	(\$24) \$—

¹ Administrative fees are recognized in service cost for each of the periods presented. Prior to the second quarter of 2014, administrative fees were recognized in expected return on plan assets.

NOTE 12 - DERIVATIVE FINANCIAL INSTRUMENTS

The Company enters into various derivative financial instruments, both in a dealer capacity to facilitate client transactions and as an end user as a risk management tool. ALCO monitors all derivative activities. When derivatives have been entered into with clients, the Company generally manages the risk associated with these derivatives within the framework of its VAR approach that monitors total daily exposure and seeks to manage the exposure on an overall basis. Derivatives are also used as a risk management tool to hedge the Company's balance sheet exposure to changes in identified cash flow and fair value risks, either economically or in accordance with hedge accounting provisions. The Company's Corporate Treasury function is responsible for employing the various hedge accounting strategies to manage these objectives. Additionally, as a normal part of its operations, the Company enters into IRLCs on mortgage loans that are accounted for as freestanding derivatives and has certain contracts containing embedded derivatives that are carried, in their entirety, at fair value. All freestanding derivatives and any embedded derivatives that the Company bifurcates from the host contracts are carried at fair value in the Consolidated Balance Sheets in

Notes to Consolidated Financial Statements (Unaudited), continued

trading assets and derivatives and trading liabilities and derivatives. The associated gains and losses are either recognized in AOCI, net of tax, or within the Consolidated Statements of Income, depending upon the use and designation of the derivatives.

Credit and Market Risk Associated with Derivatives

Derivatives expose the Company to credit risk. The Company minimizes the credit risk of derivatives by entering into transactions with counterparties with defined exposure limits based on credit quality that are reviewed periodically by the Company's Credit Risk Management division. The Company's derivatives may also be governed by an ISDA or other master agreement, and depending on the nature of the derivative, bilateral collateral agreements are typically in place as well. In 2013, the Company became subject to OTC derivative clearing requirements as a registered swap dealer. As a result, certain derivatives are now required to be cleared through central clearing members in which the Company is required to post initial margin and, in addition, to further mitigate the risk of non-payment, variation margin is received or paid daily based on the net asset or liability position of the contracts. When the Company has more than one outstanding derivative transaction with a single counterparty and there exists a legal right of offset with that counterparty, the Company considers its exposure to the counterparty to be the net market value of its derivative positions with that counterparty if an asset, adjusted for held collateral. At June 30, 2014, these net derivative asset positions were \$1.0 billion, representing the \$1.4 billion of derivative net gains adjusted for cash and other collateral of \$0.4 billion that the Company held in relation to these gain positions. At December 31, 2013, net derivative asset positions were \$1.0 billion, representing \$1.5 billion of derivative net gains, adjusted for cash and other collateral of \$0.5 billion that the Company held in relation to these gain positions.

Derivatives also expose the Company to market risk. Market risk is the adverse effect that a change in market factors, such as interest rates, currency rates, equity prices, or implied volatility, has on the value of a derivative. The Company manages the market risk associated with its derivatives by establishing and monitoring limits on the types and degree of risk that may be undertaken. The Company continually measures this risk associated with its derivatives designated as trading instruments using a VAR methodology.

Derivative instruments are priced with observable market assumptions at a mid-market valuation point, with appropriate valuation adjustments for liquidity and credit risk. For purposes of valuation adjustments to its derivative positions, the Company has evaluated liquidity premiums that may be demanded by market participants, as well as the credit risk of its counterparties and its own credit. The Company has considered factors such as the likelihood of default by itself and its counterparties, its net exposures, and remaining maturities in determining the appropriate fair value adjustments to recognize. Generally, the expected loss of each counterparty is estimated using the Company's internal risk rating system. The risk rating system utilizes counterparty-specific PD and LGD estimates to derive the expected loss. For counterparties that are rated by national rating agencies, those ratings are also considered in estimating the credit risk. Additionally, counterparty exposure is evaluated by offsetting positions that are subject to master netting arrangements, as well as by considering the amount of marketable collateral securing the position. All counterparties and defined exposure limits are explicitly approved. Counterparties are regularly reviewed and appropriate business action is taken to adjust the exposure to certain counterparties, as necessary. This approach is also used by the Company to estimate its own credit risk on derivative liability positions. The Company adjusted the net fair value of its derivative contracts for estimates of net counterparty credit risk by approximately \$14 million and \$16 million at June 30, 2014 and December 31, 2013, respectively.

Currently the majority of the Company's derivatives contain contingencies that relate to the creditworthiness of the Bank. These contingencies, which are contained in industry standard master netting agreements, may be considered events of default. Should the Bank be in default under any of these provisions, the Bank's counterparties would be permitted to close-out net at amounts that would approximate the then-fair values of the derivatives resulting in a single sum due by one party to the other. The counterparties would have the right to apply any collateral posted by the Bank against any net amount owed by the Bank. Additionally, certain of the Company's derivative liability positions, totaling \$1.0 billion in fair value at June 30, 2014 and \$0.9 billion at December 31, 2013, contain provisions conditioned on downgrades of the Bank's credit rating. These provisions, if triggered, would either give rise to an ATE

that permits the counterparties to close-out net and apply collateral or, where a CSA is present, require the Bank to post additional collateral. At June 30, 2014, the Bank carried senior long-term debt ratings of A3/BBB+ from three of the major ratings agencies. At the current rating level, ATEs have been triggered for approximately \$6 million in fair value liabilities at June 30, 2014. For illustrative purposes, if the Bank were downgraded to BB+, ATEs would be triggered in derivative liability contracts that had a total fair value of \$2 million at June 30, 2014; ATEs do not exist at lower ratings levels. At June 30, 2014, \$995 million in fair value of derivative liabilities were subject to CSAs, against which the Bank has posted \$958 million in collateral, primarily in the form of cash. If requested by the counterparty pursuant to the terms of the CSA, the Bank would be required to post estimated additional collateral against these contracts at June 30, 2014, of \$7 million if the Bank were downgraded to Baa3/BBB-, and any further downgrades to Ba1/BB+ or below do not contain predetermined collateral posting levels.

Notes to Consolidated Financial Statements (Unaudited), continued

Notional and Fair Value of Derivative Positions

The following tables present the Company's derivative positions at June 30, 2014 and December 31, 2013. The notional amounts in the tables are presented on a gross basis and have been classified within Asset Derivatives or Liability Derivatives based on the estimated fair value of the individual contract at June 30, 2014 and December 31, 2013. Gross positive and gross negative fair value amounts associated with respective notional amounts are presented without consideration of any netting agreements, including collateral arrangements. Net fair value derivative amounts are adjusted on an aggregate basis, where applicable, to take into consideration the effects of legally enforceable master netting agreements, including any cash collateral received or paid, and are recognized in trading assets and derivatives or trading liabilities and derivatives on the Consolidated Balance Sheets. For contracts constituting a combination of options that contain a written option and a purchased option (such as a collar), the notional amount of each option is presented separately, with the purchased notional amount generally being presented as an Asset Derivative and the written notional amount being presented as a Liability Derivative. For contracts that contain a combination of options, the fair value is generally presented as a single value with the purchased notional amount if the combined fair value is positive, and with the written notional amount, if the combined fair value is negative.

Netting of Derivatives

The Company has various financial assets and financial liabilities that are subject to enforceable master netting agreements or similar agreements. The Company's securities borrowed or purchased under agreements to resell and securities sold under agreements to repurchase that are subject to enforceable master netting agreements or similar agreements are discussed in Note 3, "Federal Funds Sold and Securities Borrowed or Purchased Under Agreements to Resell and Securities Sold Under Agreements to Repurchase." The Company enters into ISDA or other legally enforceable industry standard master netting arrangements with derivative counterparties. Under the terms of the master netting arrangements, all transactions between the Company and the counterparty constitute a single business relationship such that in the event of default, the nondefaulting party is entitled to set off claims and apply property held by that party in respect of any transaction against obligations owed. Any payments, deliveries, or other transfers may be applied against each other and netted.

The table below shows total gross derivative assets and liabilities which are adjusted on an aggregate basis, where applicable to take into consideration the effects of legally enforceable master netting agreements, including any cash collateral received or paid, for the net reported amount in the Consolidated Balance Sheets. Also included in the table is financial instrument collateral related to legally enforceable master netting agreements that represents securities collateral received or pledged and customer cash collateral held at third-party custodians. These amounts are not offset on the Consolidated Balance Sheets but are shown as a reduction to total derivative assets and liabilities in the table to derive net derivative assets and liabilities. These amounts are limited to the derivative asset/liability balance, and accordingly, do not include excess collateral received/pledged.

The following tables present the Company's gross derivative financial assets and liabilities at June 30, 2014 and December 31, 2013, and the related impact of enforceable master netting arrangements and cash collateral, where applicable:

(Dollars in millions)	Gross Amount	Amount Offset	Net Amount Presented in Consolidated Balance Sheets	Held/Pledged Financial Instruments	Net Amount
June 30, 2014					
Derivative financial assets:					
Derivatives subject to master netting arrangement or similar arrangement	\$4,804	\$3,773	\$1,031	\$53	\$978
Derivatives not subject to master netting arrangement or similar arrangement	29	—	29	—	29
Exchange traded derivatives	744	471	273	—	273
Total derivative financial assets	\$5,577	\$4,244	\$1,333	¹ \$53	\$1,280
Derivative financial liabilities:					
Derivatives subject to master netting arrangement or similar arrangement	\$4,572	\$4,390	\$182	\$20	\$162
Derivatives not subject to master netting arrangement or similar arrangement	182	—	182	—	182

¹ At June 30, 2014, \$1.3 billion, net of \$355 million offsetting cash collateral, is recognized in trading assets and derivatives within the Company's Consolidated Balance Sheets. At December 31, 2013, \$1.4 billion, net of \$457 million offsetting cash collateral, is recognized in trading assets and derivatives within the Company's Consolidated Balance Sheets.

² At June 30, 2014, \$364 million, net of \$972 million offsetting cash collateral, is recognized in trading liabilities and derivatives within the Company's Consolidated Balance Sheets. At December 31, 2013, \$525 million, net of \$864 million offsetting cash collateral, is recognized in trading liabilities and derivatives within the Company's Consolidated Balance Sheets.

Notes to Consolidated Financial Statements (Unaudited), continued

Credit Derivatives

As part of its trading businesses, the Company enters into contracts that are, in form or substance, written guarantees: specifically, CDS, risk participations, and TRS. The Company accounts for these contracts as derivatives and, accordingly, recognizes these contracts at fair value, with changes in fair value recognized in trading income in the Consolidated Statements of Income.

The Company writes CDS, which are agreements under which the Company receives premium payments from its counterparty for protection against an event of default of a reference asset. In the event of default under the CDS, the Company would either net cash settle or make a cash payment to its counterparty and take delivery of the defaulted reference asset, from which the Company may recover all, a portion, or none of the credit loss, depending on the performance of the reference asset. Events of default, as defined in the CDS agreements, are generally triggered upon the failure to pay and similar events related to the issuer(s) of the reference asset. At June 30, 2014 and December 31, 2013, all written CDS contracts reference single name corporate credits or corporate credit indices. When the Company has written CDS, it has generally entered into offsetting CDS for the underlying reference asset, under which the Company paid a premium to its counterparty for protection against an event of default on the reference asset. The counterparties to these purchased CDS are generally of high creditworthiness and typically have ISDA master netting agreements in place that subject the CDS to master netting provisions, thereby, mitigating the risk of non-payment to the Company. As such, at June 30, 2014 the Company did not have any material risk of making a non-recoverable payment on any written CDS. During 2014 and 2013, the only instances of default on written CDS were driven by credit indices with constituent credit default. In all cases where the Company made resulting cash payments to settle, the Company collected like amounts from the counterparties to the offsetting purchased CDS. At June 30, 2014, there were no written CDS positions outstanding. The fair values of written CDS were \$3 million at December 31, 2013. The maximum guarantees outstanding at December 31, 2013, as measured by the gross notional amounts of written CDS, were \$60 million. At June 30, 2014 and December 31, 2013, the gross notional amounts of purchased CDS contracts, which represent benefits to, rather than obligations of, the Company, were \$15 million and \$70 million, respectively. The fair values of purchased CDS were less than \$1 million and \$3 million at June 30, 2014 and December 31, 2013, respectively.

The Company has also entered into TRS contracts on loans. The Company's TRS business consists of matched trades, such that when the Company pays depreciation on one TRS, it receives the same amount on the matched TRS. To mitigate its credit risk, the Company typically receives initial cash collateral from the counterparty upon entering into the TRS and is entitled to additional collateral if the fair value of the underlying reference assets deteriorates. At June 30, 2014 and December 31, 2013, there were \$1.4 billion and \$1.5 billion of outstanding and offsetting TRS notional balances, respectively. The fair values of the TRS derivative assets and liabilities at June 30, 2014, were \$19 million and \$16 million, respectively, and related collateral held at June 30, 2014, was \$198 million. The fair values of the TRS derivative assets and liabilities at December 31, 2013, were \$35 million and \$31 million, respectively, and related collateral held at December 31, 2013, was \$228 million.

The Company writes risk participations, which are credit derivatives, whereby the Company has guaranteed payment to a dealer counterparty in the event that the counterparty experiences a loss on a derivative, such as an interest rate swap, due to a failure to pay by the counterparty's customer (the "obligor") on that derivative. The Company monitors its payment risk on its risk participations by monitoring the creditworthiness of the obligors, which is based on the normal credit review process the Company would have performed had it entered into the derivatives directly with the obligors. The obligors are all corporations or partnerships. However, the Company continues to monitor the creditworthiness of its obligors and the likelihood of payment could change at any time due to unforeseen circumstances. To date, no material losses have been incurred related to the Company's written risk participations. At June 30, 2014, the remaining terms on these risk participations generally ranged from less than one year to nine years, with a weighted average on the maximum estimated exposure of 5.2 years. The Company's maximum estimated exposure to written risk participations, as measured by projecting a maximum value of the guaranteed derivative instruments based on interest rate curve simulations and assuming 100% default by all obligors on the maximum

values, was approximately \$27 million and \$33 million at June 30, 2014 and December 31, 2013, respectively. The fair values of the written risk participations were less than \$1 million at June 30, 2014 and December 31, 2013. As part of its trading activities, the Company may enter into purchased risk participations to mitigate credit exposure to a derivative counterparty.

Cash Flow Hedges

The Company utilizes a comprehensive risk management strategy to monitor sensitivity of earnings to movements in interest rates. Specific types of funding and principal amounts hedged are determined based on prevailing market conditions and the shape of the yield curve. In conjunction with this strategy, the Company may employ various interest rate derivatives as risk management tools to hedge interest rate risk from recognized assets and liabilities or from forecasted transactions. The terms and notional amounts of derivatives are determined based on management's assessment of future interest rates, as well as other factors.

Interest rate swaps have been designated as hedging the exposure to the benchmark interest rate risk associated with floating rate loans. At June 30, 2014, the range of hedge maturities for hedges of floating rate loans was between less than one year and five years, with the weighted average being 1.7 years. Ineffectiveness on these hedges was less than \$1 million during the three

Notes to Consolidated Financial Statements (Unaudited), continued

and six months ended June 30, 2014 and 2013. At June 30, 2014, \$264 million of the deferred net gains on derivatives that are recognized in AOCI are expected to be reclassified to net interest income over the next twelve months in connection with the recognition of interest income on these hedged items. The amount to be reclassified into income includes both active and terminated or de-designated cash flow hedges. The Company may choose to terminate or de-designate a hedging relationship in this program due to a change in the risk management objective for that specific hedge item, which may arise in conjunction with an overall balance sheet management strategy.

Fair Value Hedges

The Company enters into interest rate swap agreements as part of the Company's risk management objectives for hedging its exposure to changes in fair value due to changes in interest rates. These hedging arrangements convert Company-issued fixed rate long-term debt to floating rates. Consistent with this objective, the Company reflects the accrued contractual interest on the hedged item and the related swaps as part of current period interest. There were no components of derivative gains or losses excluded in the Company's assessment of hedge effectiveness related to the fair value hedges.

Economic Hedging and Trading Activities

In addition to designated hedging relationships, the Company also enters into derivatives as an end user as a risk management tool to economically hedge risks associated with certain non-derivative and derivative instruments, along with entering into derivatives in a trading capacity with its clients.

The primary risks that the Company economically hedges are interest rate risk, foreign exchange risk, and credit risk. Economic hedging objectives are accomplished by entering into offsetting derivatives either on an individual basis or collectively on a macro basis and generally accomplish the Company's goal of mitigating the targeted risk. To the extent that specific derivatives are associated with specific hedged items, the notional amounts, fair values, and gains/(losses) on the derivatives are illustrated in the tables in this footnote.

¶The Company utilizes interest rate derivatives to mitigate exposures from various instruments.

The Company is subject to interest rate risk on its fixed rate debt. As market interest rates move, the fair value of the Company's debt is affected. To protect against this risk on certain debt issuances that the Company has elected to carry at fair value, the Company has entered into pay variable-receive fixed interest rate swaps that decrease in value in a rising rate environment and increase in value in a declining rate environment.

The Company is exposed to risk on the returns of certain of its brokered deposits that are carried at fair value. To hedge against this risk, the Company has entered into interest rate derivatives that mirror the risk profile of the returns on these instruments.

The Company is exposed to interest rate risk associated with MSRs, which the Company hedges with a combination of mortgage and interest rate derivatives, including forward and option contracts, futures, and forward rate agreements.

The Company enters into mortgage and interest rate derivatives, including forward contracts, futures, and option contracts to mitigate interest rate risk associated with IRLCs and mortgage LHFS.

¶The Company is exposed to foreign exchange rate risk associated with certain commercial loans.

The Company enters into CDS to hedge credit risk associated with certain loans held within its Wholesale Banking segment. The Company accounts for these contracts as derivatives and, accordingly, recognizes these contracts at fair value, with changes in fair value recognized in other noninterest income in the Consolidated Statements of Income. Trading activity, as illustrated in the tables within this footnote, primarily includes interest rate swaps, equity derivatives, CDS, futures, options, foreign currency contracts, and commodities. These derivatives are entered into in a dealer capacity to facilitate client transactions or are utilized as a risk management tool by the Company as an end user in certain macro-hedging strategies. The macro-hedging strategies are focused on managing the Company's overall interest rate risk exposure that is not otherwise hedged by derivatives or in connection with specific hedges and, therefore, the Company does not specifically associate individual derivatives with specific assets or liabilities.

Notes to Consolidated Financial Statements (Unaudited), continued

NOTE 13 – GUARANTEES

The Company has undertaken certain guarantee obligations in the ordinary course of business. The issuance of a guarantee imposes an obligation for the Company to stand ready to perform and make future payments should certain triggering events occur. Payments may be in the form of cash, financial instruments, other assets, shares of stock, or provisions of the Company's services. The following is a discussion of the guarantees that the Company has issued at June 30, 2014. The Company has also entered into certain contracts that are similar to guarantees, but that are accounted for as derivatives as discussed in Note 12, "Derivative Financial Instruments."

Letters of Credit

Letters of credit are conditional commitments issued by the Company, generally to guarantee the performance of a client to a third party in borrowing arrangements, such as CP, bond financing, and similar transactions. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to clients and may be reduced by selling participations to third parties. The Company issues letters of credit that are classified as financial standby, performance standby, or commercial letters of credit.

At June 30, 2014 and December 31, 2013, the maximum potential amount of the Company's obligation was \$3.2 billion and \$3.3 billion for issued financial and performance standby letters of credit, respectively. The Company's outstanding letters of credit generally have a term of less than one year but may extend longer. If a letter of credit is drawn upon, the Company may seek recourse through the client's underlying obligation. If the client's line of credit is also in default, the Company may take possession of the collateral securing the line of credit, where applicable. The Company monitors its credit exposure under standby letters of credit in the same manner as it monitors other extensions of credit in accordance with its credit policies. Some standby letters of credit are designed to be drawn upon and others are drawn upon only under circumstances of dispute or default in the underlying transaction to which the Company is not a party. In all cases, the Company holds the right to reimbursement from the applicant and may or may not also hold collateral to secure that right. An internal assessment of the PD and loss severity in the event of default is performed consistent with the methodologies used for all commercial borrowers. The management of credit risk regarding letters of credit leverages the risk rating process to focus higher visibility on the higher risk and/or higher dollar letters of credit. The associated reserve is a component of the unfunded commitments reserve recorded in other liabilities in the Consolidated Balance Sheets and included in the allowance for credit losses as disclosed in Note 6, "Allowance for Credit Losses." Additionally, unearned fees relating to letters of credit are recorded in other liabilities. The net carrying amount of unearned fees was immaterial at June 30, 2014 and December 31, 2013.

Loan Sales

STM, a consolidated subsidiary of the Company, originates and purchases residential mortgage loans, a portion of which are sold to outside investors in the normal course of business, through a combination of whole loan sales to GSEs, Ginnie Mae, and non-agency investors. Prior to 2008, the Company also sold loans through a limited number of Company-sponsored securitizations. When mortgage loans are sold, representations and warranties regarding certain attributes of the loans sold are made to these third party purchasers. Subsequent to the sale, if a material underwriting deficiency or documentation defect is discovered, STM may be obligated to repurchase the mortgage loan or to reimburse the investor for losses incurred (make whole requests) if such deficiency or defect cannot be cured by STM within the specified period following discovery. Additionally, defects in the securitization process or breaches of underwriting and servicing representations and warranties can result in loan repurchases, as well as adversely affect the valuation of MSRs, servicing advances, or other mortgage loan-related exposures, such as OREO. These representations and warranties may extend through the life of the mortgage loan. STM's risk of loss under its representations and warranties is partially driven by borrower payment performance since investors will perform extensive reviews of delinquent loans as a means of mitigating losses.

Notes to Consolidated Financial Statements (Unaudited), continued

Loan repurchase requests generally arise from loans sold during the period from January 1, 2005 to June 30, 2014, which totaled \$301.4 billion at the time of sale, consisting of \$235.6 billion and \$35.5 billion of agency and non-agency loans, respectively, as well as \$30.3 billion of loans sold to Ginnie Mae. The composition of the remaining outstanding balance by vintage and type of buyer at June 30, 2014, is shown in the following table:

Remaining Outstanding Balance by Year of Sale											
(Dollars in billions)	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	Total
GSE ¹	\$1.6	\$1.8	\$3.4	\$3.2	\$10.1	\$6.7	\$7.6	\$16.8	\$20.5	\$4.7	\$76.4
Ginnie Mae ¹	0.4	0.2	0.2	1.0	2.8	2.3	1.9	3.7	3.4	1.2	17.1
Non-agency	3.1	4.5	2.9	—	—	—	—	—	—	—	10.5
Total	\$5.1	\$6.5	\$6.5	\$4.2	\$12.9	\$9.0	\$9.5	\$20.5	\$23.9	\$5.9	\$104.0

¹ Balances based on loans currently serviced by the Company and excludes loans serviced by others and certain loans in foreclosure.

Non-agency loan sales include whole loans and loans sold in private securitization transactions. While representations and warranties have been made related to these sales, they can differ in many cases from those made in connection with loans sold to the GSEs in that non-agency loans may not be required to meet the same underwriting standards and non-agency investors may be required to demonstrate that the alleged breach was material and caused the investors' loss. Loans sold to Ginnie Mae are insured by either the FHA or VA. As servicer, the Company may elect to repurchase delinquent loans in accordance with Ginnie Mae guidelines; however, the loans continue to be insured. The Company indemnifies the FHA and VA for losses related to loans not originated in accordance with their guidelines. See Note 15, "Contingencies," for additional information on current legal matters related to representations and warranties made in connection with loan sales and the final settlement of HUD's investigation of the Company's origination practices for FHA loans.

Repurchase requests from GSEs, Ginnie Mae, and non-agency investors, for all vintages, were \$113 million during the six months ended June 30, 2014, \$1.5 billion during the year ended December 31, 2013, and \$1.7 billion during the years ended 2012 and 2011, respectively, and requests received since 2005 on a cumulative basis for all vintages totaled \$8.5 billion. The majority of these requests were from GSEs, with a limited number of requests from non-agency investors. Repurchase requests from non-agency investors were less than \$1 million during the six months ended June 30, 2014, and were \$18 million, \$22 million, and \$50 million during the years ended 2013, 2012 and 2011, respectively. Additionally, loans originated during 2006 - 2008 have consistently comprised the vast majority of total repurchase requests during the past three years. During the third quarter of 2013, the Company reached agreements with Freddie Mac and Fannie Mae under which they released the Company from certain existing and future repurchase obligations for loans funded by Freddie Mac between 2000 and 2008 and Fannie Mae between 2000 and 2012. The Company recorded \$5 million and \$10 million of mortgage repurchase provision expenses during the three and six months ended June 30, 2014, respectively.

The repurchase and make whole requests received have been primarily due to alleged material breaches of representations related to compliance with the applicable underwriting standards, including borrower misrepresentation and appraisal issues. STM performs a loan by loan review of all requests and contests demands to the extent they are not considered valid.

At June 30, 2014, the original UPB of loans related to unresolved requests previously received from investors was \$52 million, comprised of \$49 million from the GSEs and \$3 million from non-agency investors. Comparable amounts at December 31, 2013, were \$126 million, comprised of \$122 million from the GSEs and \$4 million from non-agency investors.

A significant degree of judgment is used to estimate the mortgage repurchase liability as the estimation process is inherently uncertain and subject to imprecision. The Company believes that its reserve appropriately estimates incurred losses based on its current analysis and assumptions, inclusive of the Freddie Mac and Fannie Mae settlement agreements, GSE owned loans serviced by third party servicers, loans sold to private investors, and future indemnifications. At June 30, 2014 and December 31, 2013, the Company's estimate of the liability for incurred losses related to all vintages of mortgage loans sold totaled \$77 million and \$78 million, respectively. However, the 2013 agreements with Freddie Mac and Fannie Mae settling certain aspects of the Company's repurchase obligations preserve their right to require repurchases arising from certain types of events, and that preservation of rights can impact future losses of the Company. While the repurchase reserve includes the estimated cost of settling claims related to required repurchases, the Company's estimate of losses depends on its assumptions regarding GSE and other counterparty behavior, loan performance, home prices, and other factors. The liability is recorded in other liabilities in the Consolidated Balance Sheets, and the related repurchase provision is recognized as a contra-revenue item in mortgage production related income in the Consolidated Statements of Income.

Notes to Consolidated Financial Statements (Unaudited), continued

The following table summarizes the changes in the Company's reserve for mortgage loan repurchases:

(Dollars in millions)	Three Months Ended June 30		Six Months Ended June 30	
	2014	2013	2014	2013
Balance at beginning of period	\$83	\$513	\$78	\$632
Repurchase provision	5	15	10	29
Charge-offs, net of recoveries	(11) (165) (11) (298
Balance at end of period	\$77	\$363	\$77	\$363

During the six months ended June 30, 2014 and 2013, the Company repurchased or otherwise settled mortgages with original loan balances of \$13 million and \$571 million, respectively, related to investor demands. At June 30, 2014, the carrying value of outstanding repurchased mortgage LHFI, net of any allowance for loan losses, was \$327 million, of which \$57 million were nonperforming. At December 31, 2013, the carrying value of outstanding repurchased mortgage loans, net of any allowance for loan losses, was \$339 million, comprised of \$325 million LHFI and \$14 million LHFS, respectively, of which \$54 million LHFI and \$14 million LHFS, were nonperforming.

The Company normally retains servicing rights when loans are transferred. As servicer, the Company makes representations and warranties that it will service the loans in accordance with investor servicing guidelines and standards which may include (i) collection and remittance of principal and interest, (ii) administration of escrow for taxes and insurance, (iii) advancing principal, interest, taxes, insurance, and collection expenses on delinquent accounts, (iv) loss mitigation strategies including loan modifications, and (v) foreclosures. The Company recognizes a liability for contingent losses when MSR's are sold, which totaled \$26 million and \$21 million at June 30, 2014 and December 31, 2013, respectively.

Contingent Consideration

The Company has contingent payment obligations related to certain business combination transactions. Payments are calculated using certain post-acquisition performance criteria. The potential obligation and amount recorded as an other liability representing the fair value of the contingent payments was \$27 million and \$26 million at June 30, 2014 and December 31, 2013, respectively. If required, these contingent payments will be payable within the next two years.

Visa

The Company issues credit and debit transactions through Visa and MasterCard International. The Company is a defendant, along with Visa and MasterCard International (the "Card Associations"), as well as several other banks, in one of several antitrust lawsuits challenging the practices of the Card Associations (the "Litigation"). The Company entered into judgment and loss sharing agreements with Visa and certain other banks in order to apportion financial responsibilities arising from any potential adverse judgment or negotiated settlements related to the Litigation. Additionally, in connection with Visa's restructuring in 2007, a provision of the original Visa By-Laws, Section 2.05j, was restated in Visa's certificate of incorporation. Section 2.05j contains a general indemnification provision between a Visa member and Visa, and explicitly provides that after the closing of the restructuring, each member's indemnification obligation is limited to losses arising from its own conduct and the specifically defined Litigation. Agreements associated with Visa's IPO have provisions that Visa will fund a litigation escrow account, established for the purpose of funding judgments in, or settlements of, the Litigation. Since inception of the escrow account, Visa has funded over \$8.0 billion into the escrow account, approximately \$7.0 billion of which has been paid out in Litigation settlements or into a settlement fund, with approximately \$1.0 billion remaining in the escrow account. If the escrow account is insufficient to cover the Litigation losses, then Visa will issue additional Class A shares ("loss shares"). The proceeds from the sale of the loss shares would then be deposited in the escrow account. The issuance of the loss shares will cause a dilution of Visa's Class B shares as a result of an adjustment to lower the conversion factor of the Class B shares to Class A shares. Visa U.S.A.'s members are responsible for any portion of the settlement or loss on the Litigation after the escrow account is depleted and the value of the Class B shares is fully-diluted. In May 2009,

the Company sold its 3.2 million Class B shares to the Visa Counterparty and entered into a derivative with the Visa Counterparty. The Company received \$112 million and recognized a gain of \$112 million in connection with these transactions. Under the derivative, the Visa Counterparty is compensated by the Company for any decline in the conversion factor as a result of the outcome of the Litigation. Conversely, the Company is compensated by the Visa Counterparty for any increase in the conversion factor. The amount of payments made or received under the derivative is a function of the 3.2 million shares sold to the Visa Counterparty, the change in conversion rate, and Visa's share price. The Visa Counterparty, as a result of its ownership of the Class B shares, is impacted by dilutive adjustments to the conversion factor of the Class B shares caused by the Litigation losses. The conversion factor at the inception of the derivative in May 2009 was 0.6296 and at June 30, 2014 the conversion factor was 0.4206 due to Visa's funding of the litigation escrow account

Notes to Consolidated Financial Statements (Unaudited), continued

since 2009. There were no changes to the conversion factor during the six months ended June 30, 2014 and 2013; therefore, no payments were made by the Company to the Visa Counterparty, other than certain fixed payment charges which were approximately \$1 million for the six months ended June 30, 2014 and 2013. During 2012, the Card Associations and defendants signed a memorandum of understanding to enter into a settlement agreement to resolve the plaintiffs' claims in the Litigation. Visa's share of the claims represents approximately \$4.4 billion, which was paid from the escrow account into a settlement fund during 2012. During 2013, various members of the putative class elected to opt out of the settlement which resulted in a proportional decrease in the amount of the settlement and a deposit of approximately \$1.0 billion from the settlement fund back into the escrow account. The estimated fair value of the derivative liability was \$8 million and \$2 million at June 30, 2014 and December 31, 2013, respectively; however, the ultimate impact to the Company could be significantly different if the settlement is not approved and/or based on the ultimate resolution with the plaintiffs that opted out of the settlement.

Tax Credit Investments Sold

SunTrust Community Capital, one of the Company's subsidiaries, previously obtained state and federal tax credits through the construction and development of affordable housing properties and continues to obtain state and federal tax credits through investments in affordable housing developments. SunTrust Community Capital or its subsidiaries are limited and/or general partners in various partnerships established for the properties. Some of the investments that generate state tax credits may be sold to outside investors. At June 30, 2014, SunTrust Community Capital has completed six sales containing guarantee provisions stating that SunTrust Community Capital will make payment to the outside investors if the tax credits become ineligible. SunTrust Community Capital also guarantees that the general partner under the transaction will perform on the delivery of the credits. The guarantees are expected to expire within a fifteen year period from inception. At June 30, 2014, the maximum potential amount that SunTrust Community Capital could be obligated to pay under these guarantees is \$19 million; however, SunTrust Community Capital can seek recourse against the general partner. Additionally, SunTrust Community Capital can seek reimbursement from cash flow and residual values of the underlying affordable housing properties provided that the properties retain value. At June 30, 2014 and December 31, 2013, \$1 million was accrued for the remainder of tax credits to be delivered, and was recorded in other liabilities in the Consolidated Balance Sheets.

Notes to Consolidated Financial Statements (Unaudited), continued

NOTE 14 - FAIR VALUE ELECTION AND MEASUREMENT

The Company carries certain assets and liabilities at fair value on a recurring basis and appropriately classifies them as level 1, 2, or 3 within the fair value hierarchy. The Company's recurring fair value measurements are based on a requirement to carry such assets and liabilities at fair value or the Company's election to carry certain financial assets and liabilities at fair value. Assets and liabilities that are required to be carried at fair value on a recurring basis include trading securities, securities AFS, and derivative financial instruments. Assets and liabilities that the Company has elected to carry at fair value on a recurring basis include certain trading loans, LHFS and LHFI, MSRs, certain brokered time deposits, and certain issuances of fixed rate debt.

In certain circumstances, fair value enables a company to more accurately align its financial performance with the economic value of actively traded or hedged assets or liabilities. Fair value also enables a company to mitigate the non-economic earnings volatility caused from financial assets and liabilities being carried at different bases of accounting, as well as, to more accurately portray the active and dynamic management of a company's balance sheet. Depending on the nature of the asset or liability, the Company uses various valuation techniques and assumptions in estimating fair value. The assumptions used to estimate the value of an instrument have varying degrees of impact to the overall fair value of the asset or liability. This process involves the gathering of multiple sources of information, including broker quotes, values provided by pricing services, trading activity in other similar securities, market indices, pricing matrices along with employing various modeling techniques, such as discounted cash flow analyses, in arriving at the best estimate of fair value. All material models used to produce material financial reporting information are validated prior to use, and following any material change. Their performance is monitored quarterly, and any material deterioration in model performance is addressed. This review is performed by an internal group that separately reports to the Corporate Risk Function.

The Company has formal processes and controls in place to ensure the appropriateness of all fair value estimates. For fair values obtained from a third party or those that include certain trader estimates of fair value, there is an internal independent price validation function within the Finance organization that provides oversight for fair value estimates. For level 2 instruments and certain level 3 instruments, the validation generally involves evaluating pricing received from two or more other third party pricing sources that are widely used by market participants. The Company reviews pricing validation information from both a qualitative and quantitative perspective and determines whether pricing differences exceed acceptable thresholds. If the pricing differences exceed acceptable thresholds, then the Company reviews differences in valuation approaches used, which may include contacting a pricing service to gain further information on the valuation of a particular security or class of securities to determine the ultimate resolution of the pricing variance, which could include an adjustment to the price used for financial reporting purposes.

The Company classifies instruments as level 2 in the fair value hierarchy if it is able to determine that external pricing sources are using similar instruments trading in the markets as the basis for estimating fair value. One way the Company determines this is by the number of pricing services that will provide a quote on the instrument along with the range of values provided by those pricing services. A wide range of quoted values may indicate that significant adjustments to the trades in the market are being made by the pricing services.

The classification of an instrument as level 3 involves judgment and is based on a variety of subjective factors. These factors are used in the assessment of whether a market is inactive, resulting in the application of significant unobservable assumptions in the valuation of a financial instrument. A market is considered inactive if significant decreases in the volume and level of activity for the asset or liability have been observed. In determining whether a market is inactive, the Company evaluates such factors as the number of recent transactions in either the primary or secondary markets, whether price quotations are current, the nature of the market participants, the variability of price quotations, the significance of bid/ask spreads, declines in (or the absence of) new issuances, and the availability of public information. Inactive markets necessitate the use of additional judgment in valuing financial instruments, such

as pricing matrices, cash flow modeling, and the selection of an appropriate discount rate. The assumptions used to estimate the value of an instrument where the market was inactive are based on the Company's assessment of the assumptions a market participant would use to value the instrument in an orderly transaction and includes consideration of illiquidity in the current market environment.

Notes to Consolidated Financial Statements (Unaudited), continued

Recurring Fair Value Measurements

The following tables present certain information regarding assets and liabilities measured at fair value on a recurring basis and the changes in fair value for those specific financial instruments in which fair value has been elected.

June 30, 2014

Notes to Consolidated Financial Statements (Unaudited), continued

The following tables present the change in fair value during the three and six months ended June 30, 2014 and 2013, of financial instruments for which the FVO has been elected, as well as MSR. The tables do not reflect the change in fair value attributable to the related economic hedges the Company used to mitigate the market-related risks associated with the financial instruments. Generally, the changes in the fair value of economic hedges are also recognized in trading income, mortgage production related income, or mortgage servicing related income, as appropriate, and are designed to partially offset the change in fair value of the financial instruments referenced in the tables below. The Company's economic hedging activities are deployed at both the instrument and portfolio level.

(Dollars in millions)	Fair Value Gain/(Loss) for the Three Months Ended June 30, 2014, for Items Measured at Fair Value Pursuant to Election of the FVO				Fair Value Gain/(Loss) for the Six Months Ended June 30, 2014, for Items Measured at Fair Value Pursuant to Election of the FVO			
	Trading Income	Mortgage Production Related Income ¹	Mortgage Servicing Related Income	Total Changes in Fair Values Included in Current Period Earnings ²	Trading Income	Mortgage Production Related Income ¹	Mortgage Servicing Related Income	Total Changes in Fair Values Included in Current Period Earnings ²

¹ Income related to LHFS does not include income from IRLCs. For the three and six months ended June 30, 2013, income related to MSRs includes mortgage servicing income recognized upon the sale of loans reported at LOCOM.

² Changes in fair value for the three and six months ended June 30, 2013 exclude accrued interest for the period then ended. Interest income or interest expense on trading loans, LHFS, LHFI, brokered time deposits, and long-term debt that have been elected to be carried at fair value are recognized in interest income or interest expense in the Consolidated Statements of Income.

Notes to Consolidated Financial Statements (Unaudited), continued

The following is a discussion of the valuation techniques and inputs used in developing fair value measurements for assets and liabilities classified as level 2 or 3 that are measured at fair value on a recurring basis, based on the class of asset or liability as determined by the nature and risks of the instrument.

Trading Assets and Derivatives and Securities Available for Sale

Unless otherwise indicated, trading assets are priced by the trading desk and securities AFS are valued by an independent third party pricing service.

Federal agency securities

The Company includes in this classification securities issued by federal agencies and GSEs. Agency securities consist of debt obligations issued by HUD, FHLB, and other agencies or collateralized by loans that are guaranteed by the SBA and are, therefore, backed by the full faith and credit of the U.S. government. For SBA instruments, the Company estimated fair value based on pricing from observable trading activity for similar securities or obtained fair values from a third party pricing service; accordingly, the Company has classified these instruments as level 2.

U.S. states and political subdivisions

The Company's investments in U.S. states and political subdivisions (collectively "municipals") include obligations of county and municipal authorities and agency bonds, which are general obligations of the municipality or are supported by a specified revenue source. Holdings were geographically dispersed, with no significant concentrations in any one state or municipality. Additionally, all but an immaterial amount of AFS municipal obligations classified as level 2 are highly rated or are otherwise collateralized by securities backed by the full faith and credit of the federal government. Level 3 AFS municipal securities includes bonds that are only redeemable with the issuer at par and cannot be traded in the market. As such, no significant observable market data for these instruments is available.

MBS – agency

Agency MBS includes pass-through securities and collateralized mortgage obligations issued by GSEs and U.S. government agencies, such as Fannie Mae, Freddie Mac, and Ginnie Mae. Each security contains a guarantee by the issuing GSE or agency. For agency MBS, the Company estimated fair value based on pricing from observable trading activity for similar securities or obtained fair values from a third party pricing service; accordingly, the Company has classified these instruments as level 2.

MBS – private

Private MBS includes purchased interests in third party securitizations, as well as retained interests in Company-sponsored securitizations of 2006 and 2007 vintage residential mortgages; including both prime jumbo fixed rate collateral and floating rate collateral. At the time of purchase or origination, these securities had high investment grade ratings; however, through the credit crisis, they have experienced a deterioration in credit quality leading to downgrades to non-investment grade levels. Generally, the Company obtains pricing for its securities from an independent pricing service. The Company evaluates third party pricing to determine the reasonableness of the information relative to changes in market data, such as any recent trades, market information received from outside market participants and analysts, and/or changes in the underlying collateral performance. Even though third party pricing has been available, the Company continued to classify private MBS as level 3, as the Company believes that this third party pricing relies on significant unobservable assumptions, as evidenced by a persistently wide bid-ask price range and variability in pricing from the pricing services, particularly for the vintage and exposures held by the Company.

These securities that are classified as AFS are in an unrealized gain position at June 30, 2014; however, securities AFS that are in an unrealized loss position are included as part of the Company's quarterly OTTI evaluation process to determine whether OTTI exists. See Note 4, "Securities Available for Sale," for details regarding assumptions used to assess impairment and impairment amounts recognized through earnings on private MBS.

CLO securities

The Company has CLO preference share exposure valued at \$5 million at June 30, 2014. The Company estimated fair value based on pricing from observable trading activity for similar securities. Accordingly, the Company has classified these instruments as level 2.

Asset-Backed Securities

ABS classified as securities AFS includes purchased interests in third party securitizations. These securities are classified as level 3, as the fair value is based on third party pricing with significant unobservable assumptions.

Notes to Consolidated Financial Statements (Unaudited), continued

Corporate and other debt securities

Corporate debt securities are predominantly comprised of senior and subordinate debt obligations of domestic corporations and are classified as level 2. Other debt securities in level 3 primarily include bonds that are redeemable with the issuer at par and cannot be traded in the market; as such, no significant observable market data for these instruments is available.

Commercial Paper

From time to time, the Company trades third party CP that is generally short-term in nature (less than 30 days) and highly rated. The Company estimates the fair value of this CP based on observable pricing from executed trades of similar instruments; thus, CP is classified as level 2.

Equity securities

Level 3 equity securities classified as securities AFS include FHLB stock and Federal Reserve Bank stock, which are redeemable with the issuer at cost and cannot be traded in the market. As such, no significant observable market data for these instruments is available. The Company accounts for the stock based on industry guidance that requires these investments be carried at cost and evaluated for impairment based on the ultimate recovery of cost.

Derivative contracts

The Company holds derivative instruments used for both trading purposes and risk management purposes.

Level 1 derivative contracts generally include exchange-traded futures or option contracts for which pricing is readily available. The Company's level 2 instruments are predominantly standard OTC swaps, options, and forwards, with underlying market variables of interest rates, foreign exchange, equity, and credit. Because fair values for OTC contracts are not readily available, the Company estimates fair values using internal, but standard, valuation models that incorporate market-observable inputs. The valuation model is driven by the type of contract: for option-based products, the Company uses an appropriate option pricing model, such as Black-Scholes; for forward-based products, the Company's valuation methodology is generally a discounted cash flow approach. The primary drivers of the fair values of derivative instruments are the underlying variables, such as interest rates, exchange rates, equity, or credit. As such, the Company uses market-based assumptions for all of its significant inputs, such as interest rate yield curves, quoted exchange rates and spot prices, market implied volatilities, and credit curves.

Level 2 derivative instruments are primarily transacted in the institutional dealer market and priced with observable market assumptions at a mid-market valuation point, with appropriate valuation adjustments for liquidity and credit risk. For purposes of valuation adjustments to its derivative positions, the Company has evaluated liquidity premiums that may be demanded by market participants, as well as the credit risk of its counterparties and its own credit. The Company has considered factors such as the likelihood of default by itself and its counterparties, its net exposures, and remaining maturities in determining the appropriate fair value adjustments to record. Generally, the expected loss of each counterparty is estimated using the Company's proprietary internal risk rating system. The risk rating system utilizes counterparty-specific PD and LGD estimates to derive the expected loss. For counterparties that are rated by national rating agencies, those ratings are also considered in estimating the credit risk. In addition, counterparty exposure is evaluated by netting positions that are subject to master netting arrangements, as well as considering the amount of marketable collateral securing the position. Specifically approved counterparties and exposure limits are defined. Creditworthiness of the approved counterparties is regularly reviewed and appropriate business action is taken to adjust the exposure to certain counterparties, as necessary. This approach used to estimate exposures to counterparties is also used by the Company to estimate its own credit risk on derivative liability positions. See Note 12, "Derivative Financial Instruments," for additional information on the Company's derivative contracts.

The Company's level 3 derivatives include IRLCs that satisfy the criteria to be treated as derivative financial instruments. The fair value of IRLCs on residential LHFS, while based on interest rates observable in the market, is highly dependent on the ultimate closing of the loans. These "pull-through" rates are based on the Company's historical data and reflect the Company's best estimate of the likelihood that a commitment will ultimately result in a closed

loan. As pull-through rates increase, the fair value of IRLCs also increases. Servicing value is included in the fair value of IRLCs, and the fair value of servicing is determined by projecting cash flows, which are then discounted to estimate an expected fair value. The fair value of servicing is impacted by a variety of factors, including prepayment assumptions, discount rates, delinquency rates, contractually specified servicing fees, servicing costs, and underlying portfolio characteristics. Because these inputs are not transparent in market trades, IRLCs are considered to be level 3 assets. During the three and six months ended June 30, 2014, the Company transferred \$60 million and \$118 million, respectively, of IRLCs out of level 3 as the associated loans were closed. During the three and six months ended June 30, 2013, the Company transferred \$72 million and \$207 million, respectively, of IRLCs out of level 3 as the associated loans were closed.

Notes to Consolidated Financial Statements (Unaudited), continued

Trading loans

The Company engages in certain businesses whereby the election to carry loans at fair value for financial reporting aligns with the underlying business purpose. Specifically, the loans that are included within this classification are: (i) loans made or acquired in connection with the Company's TRS business (see Note 8, "Certain Transfers of Financial Assets and Variable Interest Entities," and Note 12, "Derivative Financial Instruments," for further discussion of this business), (ii) loans backed by the SBA, and (iii) the loan sales and trading business within the Company's Wholesale Banking segment. All of these loans are classified as level 2, due to the market data that the Company uses in the estimate of fair value.

The loans made in connection with the Company's TRS business are short-term, demand loans, whereby the repayment is senior in priority and whose value is collateralized. While these loans do not trade in the market, the Company believes that the par amount of the loans approximates fair value and no unobservable assumptions are made by the Company to arrive at this conclusion. At June 30, 2014 and December 31, 2013, the Company had outstanding \$1.4 billion and \$1.5 billion, respectively, of such short-term loans carried at fair value.

SBA loans are similar to SBA securities discussed herein under "Federal agency securities," except for their legal form. In both cases, the Company trades instruments that are fully guaranteed by the U.S. government as to contractual principal and interest and there is sufficient observable trading activity upon which to base the estimate of fair value. As these SBA loans are fully guaranteed, the changes in fair value are attributable to factors other than instrument-specific credit risk.

The loans from the Company's sales and trading business are commercial and corporate leveraged loans that are either traded in the market or for which similar loans trade. The Company elected to carry these loans at fair value since they are actively traded. For the three and six months ended June 30, 2014, and for the same periods in 2013, the Company recognized fair value gains attributable to instrument-specific credit risk of less than \$1 million and \$2 million, respectively. The Company is able to obtain fair value estimates for substantially all of these loans through a third party valuation service that is broadly used by market participants. While most of the loans are traded in the market, the Company does not believe that trading activity qualifies the loans as level 1 instruments, as the volume and level of trading activity is subject to variability and the loans are not exchange-traded, such that the Company believes that level 2 is a more appropriate presentation of the underlying market activity for the loans. At June 30, 2014 and December 31, 2013, \$321 million and \$313 million, respectively, of loans related to the Company's trading business were held in inventory.

Loans Held for Sale and Loans Held for Investment

Residential LHFS

The Company values certain newly-originated mortgage LHFS predominantly at fair value based upon defined product criteria. The Company chooses to fair value these mortgage LHFS to eliminate the complexities and inherent difficulties of achieving hedge accounting and to better align reported results with the underlying economic changes in value of the loans and related hedge instruments. Origination fees and costs are recognized in earnings when earned or incurred. The servicing value is included in the fair value of the loan and initially recognized at the time the Company enters into IRLCs with borrowers. The Company uses derivatives to economically hedge changes in interest rates and servicing value in the fair value of the loan. The mark-to-market adjustments related to LHFS and the associated economic hedges are captured in mortgage production related income.

Level 2 LHFS are primarily agency loans which trade in active secondary markets and are priced using current market pricing for similar securities adjusted for servicing, interest rate risk, and credit risk. Non-agency residential mortgages are also included in level 2 LHFS. Transfers of certain mortgage LHFS into level 3 during the three and six months ended June 30, 2014 and 2013 were not due to using alternative valuation approaches, but were largely due to borrower defaults or the identification of other loan defects impacting the marketability of the loans.

For residential loans that the Company has elected to carry at fair value, the Company considers the component of the fair value changes due to instrument-specific credit risk, which is intended to be an approximation of the fair value

change attributable to changes in borrower-specific credit risk. For the three months ended June 30, 2014, gains the Company recognized in the Consolidated Statements of Income due to changes in fair value attributable to borrower-specific credit risk were immaterial. For the six months ended June 30, 2014, the Company recognized gains of \$1 million in the Consolidated Statements of Income due to changes in fair value attributable to borrower-specific credit risk. For both the three and six months ended June 30, 2013, the Company recognized losses of \$2 million due to changes in fair value attributable to borrower-specific credit risk in the Consolidated Statements of Income. In addition to borrower-specific credit risk, there are other, more significant, variables that drive changes in the fair values of the loans, including interest rates and general conditions in the principal markets for the loans.

Notes to Consolidated Financial Statements (Unaudited), continued

Corporate and other LHFS

As discussed in Note 8, "Certain Transfers of Financial Assets and Variable Interest Entities," the Company was previously the primary beneficiary of a CLO vehicle, which resulted in the Company consolidating the loans of that vehicle. During the three months ended June 30, 2014, in connection with the sale of RidgeWorth, the Company determined it was no longer the primary beneficiary of the CLO, and accordingly, the CLO was deconsolidated. Prior to June 30, 2014, the Company elected to carry the loans of the CLO at fair value because the loans were sometimes traded by the CLO. For the three and six months ended June 30, 2014, the Company recognized no gains or losses due to changes in fair value attributable to borrower-specific credit risk in the Consolidated Statements of Income, compared to losses of \$1 million and gains of \$1 million, for the same periods in 2013, respectively.

LHFI

Level 3 LHFI predominantly includes mortgage loans that are deemed not marketable, largely due to the identification of loan defects. The Company values these loans using a discounted cash flow approach based on assumptions that are generally not observable in the current markets, such as prepayment speeds, default rates, loss severity rates, and discount rates. These assumptions have an inverse relationship to the overall fair value. Level 3 LHFI also includes mortgage loans that are valued using collateral based pricing. Changes in the applicable housing price index since the time of the loan origination are considered and applied to the loan's collateral value. An additional discount representing the return that a buyer would require is also considered in the overall fair value.

Other Intangible Assets

Other intangible assets that the Company records at fair value are the Company's MSR assets. The fair values of MSRs are determined by projecting cash flows, which are then discounted to estimate an expected fair value. The fair values of MSRs are impacted by a variety of factors, including prepayment assumptions, discount rates, delinquency rates, contractually specified servicing fees, servicing costs, and underlying portfolio characteristics. For additional information, see Note 7, "Goodwill and Other Intangible Assets." The underlying assumptions and estimated values are corroborated by values received from independent third parties based on their review of the servicing portfolio. Because these inputs are not transparent in market trades, MSRs are considered to be level 3 assets.

Liabilities

Trading liabilities and derivatives

Trading liabilities are primarily comprised of derivative contracts, but also include various contracts involving U.S. Treasury securities, equity securities, and corporate and other debt securities that the Company uses in certain of its trading businesses. The Company employs the same valuation methodologies for these derivative contracts and securities as are discussed within the corresponding sections herein under "Trading Assets and Derivatives and Securities Available for Sale."

During the second quarter of 2009, in connection with its sale of Visa Class B shares, the Company entered into a derivative contract whereby the ultimate cash payments received or paid, if any, under the contract are based on the ultimate resolution of litigation involving Visa. The value of the derivative was estimated based on the Company's expectations regarding the ultimate resolution of that litigation, which involved a high degree of judgment and subjectivity. Accordingly, the value of the derivative liability is classified as a level 3 instrument. See Note 13, "Guarantees," for a discussion of the valuation assumptions.

Brokered time deposits

The Company has elected to measure certain CDs at fair value. These debt instruments include embedded derivatives that are generally based on underlying equity securities or equity indices, but may be based on other underlyings that may or may not be clearly and closely related to the host debt instrument. The Company elected to carry certain of these instruments at fair value to better align the economics of the CDs with the Company's risk management strategies. The Company evaluated, on an instrument by instrument basis, whether a new issuance would be carried at fair value.

The Company classified these CDs as level 2 instruments due to the Company's ability to reasonably measure all significant inputs based on observable market variables. The Company employs a discounted cash flow approach to the host debt component of the CD, based on observable market interest rates for the term of the CD and an estimate of the Bank's credit risk. For the embedded derivative features, the Company uses the same valuation methodologies as if the derivative were a standalone derivative, as discussed herein under "Derivative contracts."

Notes to Consolidated Financial Statements (Unaudited), continued

For brokered time deposits carried at fair value, the Company estimated credit spreads above LIBOR, based on credit spreads from actual or estimated trading levels of the debt or other relevant market data. For the three and six months ended June 30, 2014, and for the same periods in 2013, the Company recognized an immaterial amount of losses due to changes in its own credit spread on its brokered time deposits carried at fair value.

Long-term debt

The Company has elected to carry at fair value certain fixed rate debt issuances of public debt which are valued by obtaining quotes from a third party pricing service and utilizing broker quotes to corroborate the reasonableness of those marks. Additionally, information from market data of recent observable trades and indications from buy side investors, if available, are taken into consideration as additional support for the value. Due to the availability of this information, the Company determined that the appropriate classification for the debt is level 2. The election to fair value the debt was made to align the accounting for the debt with the accounting for the derivatives without having to account for the debt under hedge accounting, thus avoiding the complex and time consuming fair value hedge accounting requirements.

The Company's public debt carried at fair value impacts earnings predominantly through changes in the Company's credit spreads as the Company has entered into derivative financial instruments that economically convert the interest rate on the debt from fixed to floating. The estimated earnings impact from changes in credit spreads above U.S. Treasury rates were losses of \$11 million and \$27 million for the three and six months ended June 30, 2014, respectively, and losses of \$1 million and \$19 million for the three and six months ended June 30, 2013, respectively. At June 30, 2014, the Company did not carry any issued securities of a CLO at fair value. Prior to June 30, 2014, the Company classified these types of securities as level 2, as the primary driver of their fair values were the loans owned by the CLO, which the Company also elected to carry at fair value prior to the deconsolidation of the CLO, as discussed herein under "Loans Held for Sale and Loans Held for Investment—Corporate and other LHFS."

Other liabilities

The Company's other liabilities that are carried at fair value on a recurring basis include contingent consideration obligations related to acquisitions. Contingent consideration associated with acquisitions is adjusted to fair value until settled. As the assumptions used to measure fair value are based on internal metrics that are not market observable, the earn-out is considered a level 3 liability.

Notes to Consolidated Financial Statements (Unaudited), continued

The following tables present a reconciliation of the beginning and ending balances for assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (other than MSR's which are disclosed in Note 7, "Goodwill and Other Intangible Assets"). Transfers into and out of the fair value hierarchy levels are assumed to be as of the end of the quarter in which the transfer occurred. None of the transfers into or out of level 3 have been the result of using alternative valuation approaches to estimate fair values. There were no transfers between level 1 and 2 during the three and six months ended June 30, 2014 and 2013.

Non-recurring Fair Value Measurements

The following tables present those assets measured at fair value on a non-recurring basis at June 30, 2014 and December 31, 2013, as well as corresponding gains/(losses) recognized during the three and six months ended June 30, 2014 and the year ended December 31, 2013. The changes in fair value when comparing balances at June 30, 2014 to those at December 31, 2013, generally result from the application of LOCOM or through write-downs of individual assets. The table does not reflect the change in fair value attributable to any related economic hedges the Company may have used to mitigate the interest rate risk associated with LHFS and MSRs.

(Dollars in millions)	June 30, 2014	Quoted Prices in Active Markets for Identical Assets/Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Losses for the Three Months Ended June 30, 2014	Gains/(Losses) for the Six Months Ended June 30, 2014

The following is a discussion of the valuation techniques and inputs used in developing fair value measurements for assets classified as level 2 or 3 that are measured at fair value on a non-recurring basis, as determined by the nature and risks of the instrument.

Loans Held for Sale

At June 30, 2014 and December 31, 2013, level 2 LHFS consisted primarily of agency and non-agency residential mortgages, which were measured using observable collateral valuations, and corporate loans that are accounted for at LOCOM. These loans were valued consistent with the methodology discussed in the Recurring Fair Value Measurement section of this footnote.

During the six months ended June 30, 2014, the Company sold \$10 million of nonperforming LHFS and eliminated an additional \$2 million of nonperforming LHFS resulting from the deconsolidation of the CLO. As discussed in Note 8, "Certain Transfers of Financial Assets and Variable Interest Entities," the Company was previously the primary beneficiary of a CLO vehicle, which resulted in the Company consolidating the loans of that vehicle. In connection with the sale of RidgeWorth during the three months ended June 30, 2014, the Company determined it was no longer the primary beneficiary of the CLO and deconsolidated it. During the six months ended June 30, 2013, the Company transferred \$22 million of residential mortgage NPLs to LHFS, as the Company elected to actively market these loans for sale. These loans were predominantly reported at amortized cost prior to transferring to LHFS; however, a portion

of the NPLs was carried at fair value. As a result of transferring the loans to LHFS, the Company recognized a \$3 million charge-off to reflect the loans' estimated market value. These transferred NPL loans were sold at approximately their carrying value during the six months ended June 30, 2013. The Company also sold an additional \$39 million of residential mortgage NPLs which had either been transferred to LHFS in a prior period or repurchased into LHFS directly. These additional loans were sold at a gain of approximately \$5 million during the second quarter of 2013.

Loans Held for Investment

At June 30, 2014 and December 31, 2013, LHFI consisted primarily of consumer and residential real estate loans discharged in Chapter 7 bankruptcy that had not been reaffirmed by the borrower, as well as nonperforming CRE loans for which specific reserves had been recognized. As these loans have been classified as nonperforming, cash proceeds from the sale of the underlying collateral is the expected source of repayment for a majority of these loans. Accordingly, the fair value of these loans is derived from the estimated fair value of the underlying collateral, incorporating market data if available. There were

Notes to Consolidated Financial Statements (Unaudited), continued

no gains or losses during the three and six months ended June 30, 2014 and 2013 as the charge-offs related to these loans are a component of the ALLL. Due to the lack of market data for similar assets, all of these loans are considered level 3.

OREO

OREO is measured at the lower of cost or its fair value less costs to sell. Level 2 OREO consists primarily of residential homes, commercial properties, and vacant lots and land for which binding purchase agreements exist. Level 3 OREO consists primarily of residential homes, commercial properties, and vacant lots and land for which initial valuations are based on property-specific appraisals, broker pricing opinions, or other available market information. Updated value estimates are received regularly on level 3 OREO.

Affordable Housing

The Company evaluates its consolidated affordable housing properties for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment is recognized if the carrying amount of the property exceeds its fair value. Fair value measurements for affordable housing properties are derived from internal analyses using market assumptions if available. Significant assumptions utilized in these analyses include cash flows, market capitalization rates, and tax credit market pricing. Due to the lack of comparable sales in the marketplace, these valuations are considered level 3. During the first quarter of 2014, the Company decided to actively market for sale certain consolidated affordable housing properties, and accordingly, recognized an impairment charge of \$36 million to adjust the carrying values of these properties to their estimated net realizable values obtained from a third party broker opinion. During the three months ended June 30, 2014, no further impairment was recognized on these properties as their carrying values were not in excess of the estimated net realizable values. The Company anticipates that the sale of these properties will occur within the next nine months. During the three and six months ended June 30, 2013, the Company recognized impairment charges of \$2 million on affordable housing properties.

Other Assets

Other assets consist of private equity and other equity method investments, other repossessed assets, assets under operating leases where the Company is the lessor, and land held for sale.

Other repossessed assets consist of repossessed personal property that is measured at fair value less cost to sell. These assets are considered level 3 as their fair value is determined based on a variety of subjective unobservable factors.

During the three and six months ended June 30, 2014 and 2013, no losses were recognized by the Company on other repossessed assets as the impairment charges on repossessed personal property are a component of the ALLL.

The Company monitors the fair value of assets under operating leases where the Company is the lessor and recognizes impairment to the extent the carrying value is not recoverable and the fair value is less than its carrying value. Fair value is determined using collateral specific pricing digests, external appraisals, broker opinions, and recent sales data from industry equipment dealers as well as the discounted cash flows derived from the underlying lease agreement. As market data for similar assets and lease arrangements is available and used in the valuation, these assets are considered level 2. During the three and six months ended June 30, 2014, the Company recognized impairment charges of \$2 million and \$8 million, respectively, attributable to the fair value of various personal property under operating leases. No impairment charges were recognized during the three months ended June 30, 2013. During the six months ended June 30, 2013, the Company recognized an immaterial amount of impairment charges attributable to the fair value of various personal property under operating leases.

Land held for sale is measured at the lesser of carrying value or fair value less cost to sell. Land held for sale is considered level 2 as its fair value is determined based on market comparables and broker opinions. The Company recognized \$5 million in impairment charges during the three and six months ended June 30, 2014. No impairment charges were recognized on land held for sale during the three and six months ended June 30, 2013.

Notes to Consolidated Financial Statements (Unaudited), continued

Fair Value of Financial Instruments

The carrying amounts and fair values of the Company's financial instruments are as follows:

(Dollars in millions)	June 30, 2014		Fair Value Measurement Using			
	Carrying Amount	Fair Value	Quoted Prices in Active Markets for Identical Assets/Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Financial assets:						
Cash and cash equivalents	\$6,859	\$6,859	\$6,859	\$—	\$—	(a)

Trading liabilities and derivatives	1,181	1,181	979	198	4	(b)

The following methods and assumptions were used by the Company in estimating the fair value of financial instruments:

- (a) Cash and cash equivalents are valued at their carrying amounts reported in the balance sheet, which are reasonable estimates of fair value due to the relatively short period to maturity of the instruments.
- (b)

Securities AFS, trading assets and derivatives, and trading liabilities and derivatives that are classified as level 1 are valued based on quoted market prices. For those instruments classified as level 2 or 3, refer to the respective valuation discussions within this footnote.

LHFS are generally valued based on observable current market prices or, if quoted market prices are not available, on quoted market prices of similar instruments. Refer to the LHFS section within this footnote for further

- (c) discussion of the LHFS carried at fair value. In instances for which significant valuation assumptions are not readily observable in the market, instruments are valued based on the best available data to approximate fair value. This data may be internally-developed and considers risk premiums that a market participant would require under then-current market conditions.

LHFI fair values are based on a hypothetical exit price, which does not represent the estimated intrinsic value of the loan if held for investment. The assumptions used are expected to approximate those that a market participant purchasing the loans would use to value the loans, including a market risk premium and liquidity discount.

- (d) Estimating the fair value of the loan portfolio when loan sales and trading markets are illiquid, or for certain loan types, nonexistent, requires significant judgment. Therefore, the estimated fair value can vary significantly depending on a market

Notes to Consolidated Financial Statements (Unaudited), continued

participant's ultimate considerations and assumptions. The final value yields a market participant's expected return on investment that is indicative of the current market conditions, but it does not take into consideration the Company's estimated value from continuing to hold these loans or its lack of willingness to transact at these estimated values. The Company generally estimated fair value for LHFI based on estimated future cash flows discounted, initially, at current origination rates for loans with similar terms and credit quality, which derived an estimated value of 100% and 99% on the loan portfolio's net carrying value at June 30, 2014 and December 31, 2013, respectively. The value derived from origination rates likely does not represent an exit price; therefore, an incremental market risk and liquidity discount was subtracted from the initial value at June 30, 2014 and December 31, 2013. The discounted value is a function of a market participant's required yield in the current environment and is not a reflection of the expected cumulative losses on the loans. Loan prepayments are used to adjust future cash flows based on historical experience and prepayment model forecasts. The value of related accrued interest on loans approximates fair value; however, it is not included in the carrying amount or fair value of loans. The value of long-term customer relationships is not permitted under current U.S. GAAP to be included in the estimated fair value.

Deposit liabilities with no defined maturity such as DDAs, NOW/money market accounts, and savings accounts have a fair value equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). Fair values for CDs are estimated using a discounted cash flow measurement that applies current interest rates to a schedule of aggregated expected maturities. The assumptions used in the discounted cash flow analysis are (e) expected to approximate those that market participants would use in valuing deposits. The value of long-term relationships with depositors is not taken into account in estimating fair values. For valuation of brokered time deposits that the Company carries at fair value as well as those that are carried at amortized cost, refer to the respective valuation section within this footnote.

Fair values for short-term borrowings and certain long-term debt are based on quoted market prices for similar instruments or estimated using discounted cash flow analysis and the Company's current incremental borrowing rates for similar types of instruments. For long-term debt that the Company carries at fair value, refer to the (f) respective valuation section within this footnote. For level 3 debt, the terms are unique in nature or there are otherwise no similar instruments that can be used to value the instrument without using significant unobservable assumptions. In this situation, the Company reviews current borrowing rates along with the collateral levels that secure the debt in determining an appropriate fair value adjustment.

Unfunded loan commitments and letters of credit are not included in the table above. At June 30, 2014 and December 31, 2013, the Company had \$53.0 billion and \$48.9 billion, respectively, of unfunded commercial loan commitments and letters of credit. A reasonable estimate of the fair value of these instruments is the carrying value of deferred fees plus the related unfunded commitments reserve, which was a combined \$45 million and \$53 million at June 30, 2014 and December 31, 2013, respectively. No active trading market exists for these instruments, and the estimated fair value does not include any value associated with the borrower relationship. The Company does not estimate the fair values of consumer unfunded lending commitments which can generally be canceled by providing notice to the borrower.

NOTE 15 – CONTINGENCIES**Litigation and Regulatory Matters**

In the ordinary course of business, the Company and its subsidiaries are parties to numerous civil claims and lawsuits and subject to regulatory examinations, investigations, and requests for information. Some of these matters involve claims for substantial amounts. The Company's experience has shown that the damages alleged by plaintiffs or claimants are often overstated, based on novel or unsubstantiated legal theories, unsupported by facts, and/or bear no relation to the ultimate award that a court might grant. Additionally, the outcome of litigation and regulatory matters and the timing of ultimate resolution are inherently difficult to predict. Because of these factors, the Company

typically cannot provide a meaningful estimate of the range of reasonably possible outcomes of claims in the aggregate or by individual claim. However, on a case-by-case basis, reserves are established for those legal claims in which it is probable that a loss will be incurred and the amount of such loss can be reasonably estimated. The actual costs of resolving these claims may be substantially higher or lower than the amounts reserved.

For a limited number of legal matters in which the Company is involved, the Company is able to estimate a range of reasonably possible losses. For other matters for which a loss is probable or reasonably possible, such an estimate is not possible. For those matters where a loss is both estimable and reasonably possible, management currently estimates the aggregate range of reasonably possible losses as \$0 to approximately \$200 million in excess of the reserves, if any, related to those matters. This estimated range of reasonably possible losses represents the estimated possible losses over the life of such legal matters, which may span a currently indeterminable number of years, and is based on information available at June 30, 2014. The matters

Notes to Consolidated Financial Statements (Unaudited), continued

underlying the estimated range will change from time to time, and actual results may vary significantly from this estimate. Those matters for which an estimate is not possible are not included within this estimated range; therefore, this estimated range does not represent the Company's maximum loss exposure. Based on current knowledge, it is the opinion of management that liabilities arising from legal claims in excess of the amounts currently reserved, if any, will not have a material impact on the Company's financial condition, results of operations, or cash flows. However, in light of the significant uncertainties involved in these matters and the large or indeterminate damages sought in some of these matters, an adverse outcome in one or more of these matters could be material to the Company's financial condition, results of operations, or cash flows for any given reporting period.

The following is a description of certain litigation and regulatory matters:

Card Association Antitrust Litigation

The Company is a defendant, along with Visa U.S.A. and MasterCard International, as well as several other banks, in several antitrust lawsuits challenging their practices. For a discussion regarding the Company's involvement in this litigation matter, see Note 13, "Guarantees."

Lehman Brothers Holdings, Inc. Litigation

Beginning in October 2008, STRH, along with other underwriters and individuals, were named as defendants in several individual and putative class action complaints filed in the U.S. District Court for the Southern District of New York and state and federal courts in Arkansas, California, Texas, and Washington. Plaintiffs alleged violations of Sections 11 and 12 of the Securities Act of 1933 and/or state law for allegedly false and misleading disclosures in connection with various debt and preferred stock offerings of Lehman Brothers Holdings, Inc. ("Lehman Brothers") and sought unspecified damages. All cases were transferred for coordination to the multi-district litigation captioned *In re Lehman Brothers Equity/Debt Securities Litigation* pending in the U.S. District Court for the Southern District of New York. Defendants filed a motion to dismiss all claims asserted in the class action. On July 27, 2011, the District Court granted in part and denied in part the motion to dismiss the claims against STRH and the other underwriter defendants in the class action. A settlement with the class plaintiffs was approved by the Court and the class settlement approval process was completed. A number of individual lawsuits and smaller putative class actions remained following the class settlement. STRH settled two such individual actions. The other individual lawsuits were dismissed. The appeal period for two of the individual actions will not expire until the plaintiffs' claims against a third party have been resolved.

Colonial BancGroup Securities Litigation

Beginning in July 2009, STRH, certain other underwriters, the Colonial BancGroup, Inc. ("Colonial BancGroup") and certain officers and directors of Colonial BancGroup were named as defendants in a putative class action filed in the U.S. District Court for the Middle District of Alabama entitled *In re Colonial BancGroup, Inc. Securities Litigation*. The complaint was brought by purchasers of certain debt and equity securities of Colonial BancGroup and seeks unspecified damages. Plaintiffs allege violations of Sections 11 and 12 of the Securities Act of 1933 due to allegedly false and misleading disclosures in the relevant registration statement and prospectus relating to Colonial BancGroup's goodwill impairment, mortgage underwriting standards, and credit quality. On August 28, 2009, the Colonial BancGroup filed for bankruptcy. The defendants' motion to dismiss was denied in May 2010, but the Court subsequently ordered Plaintiffs to file an amended complaint. This amended complaint was filed and the defendants filed a motion to dismiss. In October 2013, the Court granted in part and denied in part this motion.

Bickerstaff v. SunTrust Bank

This case was filed in the Fulton County State Court on July 12, 2010, and an amended complaint was filed on August 9, 2010. Plaintiff asserts that all overdraft fees charged to his account which related to debit card and ATM transactions are actually interest charges and therefore subject to the usury laws of Georgia. Plaintiff has brought

claims for violations of civil and criminal usury laws, conversion, and money had and received, and purports to bring the action on behalf of all Georgia citizens who have incurred such overdraft fees within the last four years where the overdraft fee resulted in an interest rate being charged in excess of the usury rate. SunTrust filed a motion to compel arbitration and on March 16, 2012, the Court entered an order holding that SunTrust's arbitration provision is enforceable but that the named plaintiff in the case had opted out of that provision pursuant to its terms. The Court explicitly stated that it was not ruling at that time on the question of whether the named plaintiff could have opted out for the putative class members. SunTrust filed an appeal of this decision, but this appeal was dismissed based on a finding that the appeal was prematurely granted. On April 8, 2013, the plaintiff filed a motion for class certification and that motion was denied on February 19, 2014. Plaintiff appealed the denial of class certification on February 26, 2014.

Notes to Consolidated Financial Statements (Unaudited), continued

Putative ERISA Class Actions

Company Stock Class Action

Beginning in July 2008, the Company and certain officers, directors, and employees of the Company were named in a putative class action alleging that they breached their fiduciary duties under ERISA by offering the Company's common stock as an investment option in the SunTrust Banks, Inc. 401(k) Plan (the "Plan"). The plaintiffs purport to represent all current and former Plan participants who held the Company stock in their Plan accounts from May 2007 to the present and seek to recover alleged losses these participants supposedly incurred as a result of their investment in Company stock.

The Company Stock Class Action was originally filed in the U.S. District Court for the Southern District of Florida but was transferred to the U.S. District Court for the Northern District of Georgia, Atlanta Division, (the "District Court") in November 2008.

On October 26, 2009, an amended complaint was filed. On December 9, 2009, defendants filed a motion to dismiss the amended complaint. On October 25, 2010, the District Court granted in part and denied in part defendants' motion to dismiss the amended complaint. Defendants and plaintiffs filed separate motions for the District Court to certify its October 25, 2010 order for immediate interlocutory appeal. On January 3, 2011, the District Court granted both motions.

On January 13, 2011, defendants and plaintiffs filed separate petitions seeking permission to pursue interlocutory appeals with the U.S. Court of Appeals for the Eleventh Circuit ("the Circuit Court"). On April 14, 2011, the Circuit Court granted defendants and plaintiffs permission to pursue interlocutory review in separate appeals. The Circuit Court subsequently stayed these appeals pending decision of a separate appeal involving The Home Depot in which substantially similar issues are presented. On May 8, 2012, the Circuit Court decided this appeal in favor of The Home Depot. On March 5, 2013, the Circuit Court issued an order remanding the case to the District Court for further proceedings in light of its decision in The Home Depot case. On September 26, 2013, the District Court granted the defendants' motion to dismiss plaintiffs' claims. Plaintiffs have filed an appeal of this decision in the Circuit Court.

Mutual Funds Class Actions

On March 11, 2011, the Company and certain officers, directors, and employees of the Company were named in a putative class action alleging that they breached their fiduciary duties under ERISA by offering certain STI Classic Mutual Funds as investment options in the Plan. The plaintiff purports to represent all current and former Plan participants who held the STI Classic Mutual Funds in their Plan accounts from April 2002 through December 2010 and seeks to recover alleged losses these Plan participants supposedly incurred as a result of their investment in the STI Classic Mutual Funds. This action was pending in the U.S. District Court for the Northern District of Georgia, Atlanta Division (the "District Court"). On June 6, 2011, plaintiff filed an amended complaint, and, on June 20, 2011, defendants filed a motion to dismiss the amended complaint. On March 12, 2012, the Court granted in part and denied in part the motion to dismiss. The Company filed a subsequent motion to dismiss the remainder of the case on the ground that the Court lacked subject matter jurisdiction over the remaining claims. On October 30, 2012, the Court dismissed all claims in this action. Immediately thereafter, plaintiffs' counsel initiated a substantially similar lawsuit against the Company substituting two new plaintiffs and also filed an appeal of the dismissal with the U.S. Court of Appeals for the Eleventh Circuit. SunTrust filed a motion to dismiss in the new action and this motion was granted. On February 26, 2014, the U.S. Court of Appeals for the Eleventh Circuit upheld the District Court's dismissal. On March 18, 2014, the Plaintiff's counsel filed a motion for reconsideration with the Eleventh Circuit. This motion remains pending.

On June 27, 2014, the Company and certain current and former officers, directors, and employees of the Company were named in another putative class action alleging breach of fiduciary duties associated with the inclusion of STI Classic Mutual Funds as investment options in the Plan. This case, *Brown, et al. v. SunTrust Banks, Inc., et al.*, was filed in the U.S. District Court for the District of Columbia.

Consent Order with the Federal Reserve

On April 13, 2011, SunTrust, SunTrust Bank, and STM entered into a Consent Order with the FRB in which SunTrust, SunTrust Bank, and STM agreed to strengthen oversight of, and improve risk management, internal audit, and compliance programs concerning, the residential mortgage loan servicing, loss mitigation, and foreclosure activities of STM. Under the terms of the Consent Order, SunTrust Bank and STM agreed, among other things, to: (a) strengthen the coordination of communications between borrowers and STM concerning ongoing loss mitigation and foreclosure activities; (b) submit a plan to enhance processes for oversight and management of third party vendors used in connection with residential mortgage servicing, loss mitigation and foreclosure activities; (c) enhance and strengthen the enterprise-wide compliance program with respect to oversight of residential mortgage loan servicing, loss mitigation and foreclosure activities; (d) ensure appropriate oversight of STM's activities with respect to the Mortgage Electronic Registration System; (e) review and remediate, if necessary, STM's management information systems for its residential mortgage loan servicing, loss mitigation, and foreclosure activities;

Notes to Consolidated Financial Statements (Unaudited), continued

(f) improve the training of STM officers and staff concerning applicable law, supervisory guidance and internal procedures concerning residential mortgage loan servicing, loss mitigation and foreclosure activities, including the single point of contact for foreclosure and loss mitigation; (g) retain an independent consultant to conduct a comprehensive assessment of STM's risks, including, but not limited to, operational, compliance, transaction, legal, and reputational risks particularly in the areas of residential mortgage loan servicing, loss mitigation and foreclosure; (h) enhance and strengthen the enterprise-wide risk management program with respect to oversight of residential mortgage loan servicing, loss mitigation and foreclosure activities; and (i) enhance and strengthen the internal audit program with respect to residential loan servicing, loss mitigation and foreclosure activities. The comprehensive third party risk assessment was completed in August 2011, action plans designed to complete the above enhancements were accepted by the FRB, and the Company has implemented enhancements consistent with such plans. During the second quarter of 2013, an independent third party consultant approved by the FRB completed its review and submitted to the FRB a validation report with respect to compliance with the aspects of the Consent Order referenced above. The Company continues its implementation of the recommendations noted in this report.

Under the terms of the Consent Order, SunTrust Bank and STM also retained an independent foreclosure consultant approved by the FRB to conduct a review of residential foreclosure actions pending at any time during the period from January 1, 2009 through December 31, 2010, for loans serviced by STM, to identify any errors, misrepresentations, or deficiencies, determine whether any instances so identified resulted in financial injury, and prepare a written report detailing the findings. On January 7, 2013, the Company, as well as nine other mortgage servicers, entered into an amendment to the Consent Order with the OCC and the FRB to amend the 2011 Consent Order. This agreement ended the independent foreclosure review process created by the Consent Order, replacing it with an accelerated remediation program. As a result of the amendment, the Company is no longer incurring the consulting and legal costs of the independent third parties providing file review, borrower outreach, and legal services associated with the Consent Order foreclosure file review. Consistent with the provisions of the Consent Order, the Company satisfied its remaining financial commitments under the amendment to the Consent Order in April 2014 by making cash contributions to non-profit organizations focused on foreclosure prevention, borrower counseling and education, and neighborhood stabilization and revitalization, thereby satisfying its financial obligations under the amendment to the Consent Order. The Company's financial statements at June 30, 2014 reflect the costs of these cash contributions.

As a result of the FRB's review of the Company's residential mortgage loan servicing and foreclosure processing practices that preceded the Consent Order, on July 25, 2014 the FRB imposed a \$160 million civil money penalty. The Company expects to satisfy this obligation by providing consumer relief and certain cash payments as contemplated by the settlement with the U.S. and the States Attorneys' General regarding certain mortgage servicing claims, which is discussed below at "United States Mortgage Servicing Settlement and HUD Investigation of Origination Practices (FHA)." The Company's financial statements at June 30, 2014 continued to reflect the Company's costs associated with this penalty.

United States Mortgage Servicing Settlement and HUD Investigation of Origination Practices (FHA)

In January 2012, the Company commenced discussions related to a mortgage servicing settlement with the U.S., through the DOJ, and Attorneys General for several states regarding various potential claims primarily relating to the Company's mortgage servicing activities. Since that time, the parties continued discussions regarding potential resolution. In September 2013, the Company reached agreements in principle with the HUD and the DOJ to settle certain alleged civil claims regarding its mortgage servicing and origination practices as part of the National Mortgage Servicing Settlement.

Separately, on April 25, 2012, the Company was informed of the commencement of an investigation by the HUD OIG relating to STM's origination practices for FHA loans. Since that time, STM has provided documents as part of the investigation. During the first quarter of 2013, the HUD OIG, together with the U.S. DOJ (collectively, the

“Government”), advised STM of their preliminary investigation findings, including alleged violations of the False Claims Act. Throughout 2013, the Government and the Company engaged in discussions that accelerated in the third quarter and resulted in agreements in principle to resolve certain civil and administrative claims arising from FHA-insured mortgage loans originated by STM from January 1, 2006 through March 31, 2012.

On June 17, 2014, the parties reached a final settlement agreement related to the National Mortgage Servicing Settlement and HUD's investigation of FHA origination practices, a copy of which is filed as Exhibit 10.3 to this report. Pursuant to the final settlements, the Company committed to provide \$500 million of consumer relief, to make a \$468 million cash payment, and to implement certain mortgage servicing standards. The financial statements at June 30, 2014 reflect the estimated cost of the anticipated requirements of fulfilling these commitments. Even with the settlements, the Company faces the risk of being unable to meet certain consumer relief commitments, which could result in increased costs to resolve this matter. The Company does not expect the consumer relief efforts or implementation of certain servicing standards associated with the settlements to have a material impact on its future financial results.

Notes to Consolidated Financial Statements (Unaudited), continued

DOJ Investigation of GSE Loan Origination Practices

In January 2014, the DOJ notified STM of an investigation regarding the origination and underwriting of single family residential mortgage loans sold by STM to Fannie Mae and Freddie Mac. STM continues to cooperate with the investigation. The DOJ and STM have not yet engaged in any material dialogue about how this matter may proceed and no allegations have been raised against STM.

Mortgage Modification Investigation

STM has been cooperating with the United States Attorney's Office for the Western District of Virginia and the Office of the Special Inspector General for the Troubled Asset Relief Program (collectively, the "Western District") in their investigation of STM's administration of HAMP. More specifically, the Western District's investigation focuses on whether, during 2009 and 2010, STM harmed borrowers and violated civil or criminal laws by failing to properly process applications for modifications of certain mortgages owned by the GSEs by devoting insufficient resources to its loss mitigation function and making misrepresentations to borrowers about timelines and other features associated with the HAMP modification process. On July 3, 2014, the parties reached an agreement to settle the claims at issue in the investigation, and a copy of the agreement is filed as Exhibit 10.4 to this report. STM's commitment under the agreement includes an estimated \$179 million in consumer remediation (up to a maximum of \$274 million), \$20 million to fund housing counseling for homeowners, \$10 million paid toward restitution to Fannie Mae and Freddie Mac, and a cash payment of \$16 million to the U.S. Treasury. The Company incurred a \$204 million pre-tax charge in connection with this matter, which reflects STM's commitment under the agreement, including its estimate of the consumer remediation obligation. The financial statements at June 30, 2014 reflect the estimated cost of the anticipated requirements of fulfilling these commitments.

Residential Funding Company, LLC v. SunTrust Mortgage, Inc.

STM has been named as a defendant in a complaint filed December 17, 2013 in the Southern District of New York by Residential Funding Company, LLC. ("RFC"), a Chapter 11 debtor-affiliate of GMAC Mortgage, LLC, alleging breaches of representations and warranties made in connection with loan sales and seeking indemnification against losses allegedly suffered by RFC as a result of such alleged breaches. The Company filed a motion to dismiss, which is pending.

SunTrust Mortgage Lender Placed Insurance Class Actions

STM has been named in three putative class actions similar to those that other financial institutions are facing which allege that the Company acted improperly in connection with the practice of force placing homeowners' insurance in certain instances. Generally, the plaintiffs in these actions allege that STM violated various duties by failing to properly negotiate pricing for force placed insurance and by receiving kickbacks or other improper benefits from the providers of such insurance. The first case, Timothy Smith v. SunTrust Mortgage, Inc. et al., is pending in the United States District Court for the Central District of California. STM filed a motion to dismiss this case and this motion was granted in part and denied in part. The second case, Carina Hamilton v. SunTrust Mortgage, Inc. et al., is pending in the U.S. District Court for the Southern District of Florida. The third case, Yaghoub Mahdavi et al. v. SunTrust Mortgage, Inc. et al., was filed in the U.S. District Court for the Northern District of Georgia. STM has filed a motion to dismiss and a motion to transfer the case. The Court granted the motion to transfer this case to the Southern District of Florida. STM has entered into an agreement to settle these cases in the context of a nationwide settlement class. This proposed settlement has been preliminarily approved by the Court and a hearing for the final approval of the settlement has been scheduled for October 17, 2014. STM's anticipated liability in this settlement has been fully accrued and is reflected in the Company's financial statements at June 30, 2014.

SunTrust Mortgage, Inc. v. United Guaranty Residential Insurance Company of North Carolina

STM filed suit in the Eastern District of Virginia in July 2009 against United Guaranty Residential Insurance Company of North Carolina (“UGRIC”) seeking payment of denied MI claims on second lien mortgages. STM's claims were in two counts. Count One involved a common reason for denial of claims by UGRIC for a group of loans. Count Two involved a group of loans with individualized reasons for the claim denials asserted by UGRIC. UGRIC counterclaimed for declaratory relief involving interpretation of the insurance policy with respect to certain caps on the amount of claims covered and whether STM was obligated to continue to pay premiums after any caps were met. The Court granted STM's motion for summary judgment as to liability on Count One and, after a trial on damages, awarded STM \$34 million along with \$6 million in prejudgment interest on August 19, 2011. The Court stayed Count Two pending final resolution of Count One. On September 13, 2011, the Court awarded an additional \$5 million to the Count One judgment for fees on certain issues. On UGRIC's counterclaim, the Court agreed that UGRIC's interpretation was correct regarding STM's continued obligations to pay premiums in the future after coverage caps are met. However, on August 19, 2011, the Court found for STM on its affirmative defense that UGRIC can no longer enforce the contract due to its prior breaches and, consequently, denied UGRIC's request for a declaration that it was entitled to continue to collect premiums after caps are met.

Notes to Consolidated Financial Statements (Unaudited), continued

On February 1, 2013, the Fourth Circuit Court of Appeals (i) upheld the judgment to STM of \$45 million (\$34 million in claims, \$6 million in interest, and \$5 million in additional fees); and (ii) vacated the ruling in STM's favor regarding the defense STM asserted to UGRIC's claim that STM owes continued premium after the caps are reached. On February 15, 2013, UGRIC filed a motion asking the Fourth Circuit Court of Appeals to re-hear its appeal. This request was denied on March 4, 2013. Upon return of the case, on March 13, 2014, the District Court denied UGRIC's counterclaim for a declaration that SunTrust continued to owe future premiums on the underlying insurance policy. UGRIC has filed an appeal of this decision in the Fourth Circuit Court of Appeals.

SunTrust Mortgage Reinsurance Class Actions

STM and Twin Rivers Insurance Company ("Twin Rivers") have been named as defendants in two putative class actions alleging that the companies entered into illegal "captive reinsurance" arrangements with private mortgage insurers. More specifically, plaintiffs allege that SunTrust's selection of private mortgage insurers who agree to reinsure loans referred to them by SunTrust with Twin Rivers results in illegal "kickbacks" in the form of the insurance premiums paid to Twin Rivers. Plaintiffs contend that this arrangement violates the Real Estate Settlement Procedures Act ("RESPA") and results in unjust enrichment to the detriment of borrowers. The first of these cases, Thurmond, Christopher, et al. v. SunTrust Banks, Inc. et al., was filed in February 2011 in the U.S. District Court for the Eastern District of Pennsylvania. This case was stayed by the Court pending the outcome of Edwards v. First American Financial Corporation, a captive reinsurance case that was pending before the U.S. Supreme Court at the time. The second of these cases, Acosta, Lemuel & Maria Ventrella et al. v. SunTrust Bank, SunTrust Mortgage, Inc., et al., was filed in the U.S. District Court for the Central District of California in December 2011. This case was stayed pending a decision in the Edwards case also. In June 2012, the U.S. Supreme Court withdrew its grant of certiorari in Edwards and, as a result, the stays in these cases were lifted. The plaintiffs in Acosta voluntarily dismissed this case. A motion to dismiss was filed in the Thurmond case. In June 2014, the Court granted the Motion to Dismiss in part and denied in part, allowing limited discovery surrounding the argument that the statute of limitations for certain claims should be equitably tolled.

United States Attorney's Office for the Southern District of New York Foreclosure Expense Investigation

STM has been cooperating with the United States Attorney's Office for the Southern District of New York (the "Southern District") in a broader based industry investigation regarding claims for foreclosure-related expenses charged by law firms in connection with the foreclosure of loans guaranteed or insured by Fannie Mae, Freddie Mac, or FHA. The investigation relates to a private litigant qui tam lawsuit filed under seal and remains in early stages. The Southern District and STM engaged in dialogue regarding potential resolution of this matter as part of the National Mortgage Servicing Settlement, but were unable to reach agreement. The Southern District has not yet advised STM how it may proceed in this matter. The Company's financial statements at June 30, 2014 reflect the Company's current estimate of probable losses associated with the matter.

Intellectual Ventures II v. SunTrust Banks, Inc. and SunTrust Bank

This action was filed in the United States District Court for the Northern District of Georgia on July 24, 2013. Plaintiff alleges that SunTrust violates one or more of several patents held by Plaintiff in connection with SunTrust's provision of online banking services and other systems and services. Plaintiff seeks damages for alleged patent infringement of an unspecified amount, as well as attorney's fees and expenses. Discovery in the matter is ongoing.

NOTE 16 - BUSINESS SEGMENT REPORTING

The Company has three segments used to measure business activity: Consumer Banking and Private Wealth Management, Wholesale Banking, and Mortgage Banking, with the remainder in Corporate Other. The business segments are determined based on the products and services provided or the type of client served, and they reflect the

manner in which financial information is evaluated by management. The following is a description of the segments and their composition, which reflects the transfer of branch-managed business banking clients.

The Consumer Banking and Private Wealth Management segment is made up of two primary businesses: Consumer Banking and Private Wealth Management.

Consumer Banking provides services to consumers and branch-managed small business clients through an extensive network of traditional and in-store branches, ATMs, the internet (www.suntrust.com), mobile banking, and telephone (1-800-SUNTRUST). Financial products and services offered to consumers and small business clients include deposits, home equity lines and loans, credit lines, indirect auto, student lending, bank card, other lending products, and various fee-based services. Consumer Banking also serves as an entry point for clients and provides services for other lines of business.

Notes to Consolidated Financial Statements (Unaudited), continued

Private Wealth Management provides a full array of wealth management products and professional services to both individual and institutional clients including loans, deposits, brokerage, professional investment management, and trust services to clients seeking active management of their financial resources. Institutional clients are served by the Institutional Investment Solutions business. Discount/online and full service brokerage products are offered to individual clients through STIS. Private Wealth Management also includes GenSpring, which provides family office solutions to ultra-high net worth individuals and their families. Utilizing teams of multi-disciplinary specialists with expertise in investments, tax, accounting, estate planning, and other wealth management disciplines, GenSpring helps families manage and sustain wealth across multiple generations.

The Wholesale Banking segment includes the following four businesses:

CIB delivers comprehensive capital markets, corporate and investment banking solutions, including advisory, capital raising, and financial risk management, to clients in the Wholesale Banking segment and Private Wealth Management business. Investment Banking and Corporate Banking teams within CIB serve clients across the nation, offering a full suite of traditional banking and investment banking products and services to companies with annual revenues typically greater than \$150 million. Investment Banking serves select industry segments including consumer and retail, energy, financial services, healthcare, industrials, media and communications, real estate, and technology. Corporate Banking serves clients across diversified industry sectors based on size, complexity, and frequency of capital markets issuance. Also managed within CIB is the Equipment Finance Group, which provides lease financing solutions (through SunTrust Equipment Finance & Leasing).

Commercial & Business Banking offers an array of traditional banking products and investment banking services as needed by Commercial clients with annual revenues generally from \$1 million to \$150 million as well as the dealer services (financing dealer floor plan inventories) and not-for-profit and government sectors. Also managed within the Commercial Bank is the Premium Assignment Corporation, which create corporate insurance premium financing solutions.

Commercial Real Estate provides a full range of financial solutions for commercial real estate developers, owners and investors including construction, mini-perm, and permanent real estate financing as well as tailored financing and equity investment solutions via STRH primarily through the REIT group focused on Real Estate Investment Trusts. The Institutional Real Estate team targets relationships with institutional advisors, private funds, sovereign wealth funds, and insurance companies and the Regional team focuses on real estate owners and developers through a regional delivery structure. Commercial Real Estate also offers tailored financing and equity investment solutions for community development and affordable housing owners/developers projects through SunTrust Community Capital with special expertise in Low Income Housing Tax Credits and New Market Tax Credits.

Treasury & Payment Solutions provides all SunTrust business clients with services required to manage their payments and receipts combined with the ability to manage and optimize their deposits across all aspects of their business. Treasury & Payment Solutions operates all electronic and paper payment types, including card, wire transfer, ACH, check, and cash, plus provides clients the means to manage their accounts electronically online both domestically and internationally.

Mortgage Banking offers residential mortgage products nationally through its retail and correspondent channels, as well as via the internet (www.suntrust.com) and by telephone (1-800-SUNTRUST). These products are either sold in the secondary market, primarily with servicing rights retained, or held in the Company's loan portfolio. Mortgage Banking services loans for itself and for other investors and includes ValuTree Real Estate Services, LLC, a tax

service subsidiary.

Corporate Other includes management of the Company's investment securities portfolio, long-term debt, end user derivative instruments, short-term liquidity and funding activities, balance sheet risk management, and most real estate assets. Additionally, it includes Enterprise Information Services, which is the primary information technology and operations group; Corporate Real Estate, Marketing, SunTrust Online, Human Resources, Finance, Corporate Risk Management, Legal and Compliance, Communications, Procurement, and Executive Management. In all periods presented, the financial results of RidgeWorth, including the gain on sale, are reflected in the Corporate Other segment. Prior to the sale of RidgeWorth, RidgeWorth's financial performance was reported in the Wholesale Banking segment. See Note 2, "Acquisitions/Dispositions," for additional information related to the sale of RidgeWorth.

Notes to Consolidated Financial Statements (Unaudited), continued

Because the business segment results are presented based on management accounting practices, the transition to the consolidated results, which are prepared under U.S. GAAP, creates certain differences which are reflected in Reconciling Items.

For business segment reporting purposes, the basis of presentation in the accompanying discussion includes the following:

Net interest income – Net interest income is presented on a FTE basis to make tax-exempt assets comparable to other taxable products. The segments have also been matched maturity funds transfer priced, generating credits or charges based on the economic value or cost created by the assets and liabilities of each segment. The mismatch between funds credits and funds charges at the segment level resides in Reconciling Items. The change in the matched maturity funds mismatch is generally attributable to corporate balance sheet management strategies.

Provision for credit losses – Represents net charge-offs by segment combined with an allocation to the segments of the provision attributable to each segment's quarterly change in the ALLL and unfunded commitment reserve balances.

Provision/(benefit) for income taxes – Calculated using a blended income tax rate for each segment. This calculation includes the impact of various income adjustments, such as the reversal of the FTE gross up on tax-exempt assets, tax adjustments, and credits that are unique to each segment. The difference between the calculated provision/(benefit) for income taxes at the segment level and the consolidated provision/(benefit) for income taxes is reported in Reconciling Items.

The segment's financial performance is comprised of direct financial results, as well as various allocations that for internal management reporting purposes provide an enhanced view of analyzing the segment's financial performance.

The internal allocations include the following:

Operational Costs – Expenses are charged to the segments based on various statistical volumes multiplied by activity based cost rates. As a result of the activity based costing process, planned residual expenses are also allocated to the segments. The recoveries for the majority of these costs are in Corporate Other.

Support and Overhead Costs – Expenses not directly attributable to a specific segment are allocated based on various drivers (e.g., number of full-time equivalent employees and volume of loans and deposits). The recoveries for these allocations are in Corporate Other.

Sales and Referral Credits – Segments may compensate another segment for referring or selling certain products. The majority of the revenue resides in the segment where the product is ultimately managed.

The application and development of management reporting methodologies is a dynamic process and is subject to periodic enhancements. The implementation of these enhancements to the internal management reporting methodology may materially affect the results disclosed for each segment with no impact on consolidated results. Whenever significant changes to management reporting methodologies take place, the impact of these changes is quantified and prior period information is reclassified wherever practicable. Prior year results have been restated to reflect the new provision for credit losses methodology.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Important Cautionary Statement About Forward-Looking Statements

This report contains forward-looking statements. Statements regarding: (1) expected share repurchases; (2) future levels of net interest margin; interest income; swap income; asset sensitivity; NPLs; net charge-offs, including net charge-offs in the residential, commercial, and consumer portfolios; the ALLL; and REO gains; (3) future changes in cyclical costs; (4) future improvements to asset quality in the residential portfolio; (5) future drivers of early stage delinquencies; (6) expectations that the impact of consumer relief efforts and the implementation of certain servicing standards associated with the national mortgage servicing settlement; (7) the impact of Basel III regulatory capital rules on our total capital ratio; and (8) the future impact of required enhanced servicing standards, are forward looking statements. Also, any statement that does not describe historical or current facts is a forward-looking statement. These statements often include the words "believes," "expects," "anticipates," "estimates," "intends," "plans," "targets," "initiatives," "potentially," "probably," "projects," "outlook" or similar expressions or future conditional verbs such as "may," "will," "should," "would," and "could"; such statements are based upon the current beliefs and expectations of management and on information currently available to management. Such statements speak as of the date hereof, and we do not assume any obligation to update the statements made herein or to update the reasons why actual results could differ from those contained in such statements in light of new information or future events.

Forward-looking statements are subject to significant risks and uncertainties. Investors are cautioned against placing undue reliance on such statements. Actual results may differ materially from those set forth in the forward-looking statements. Factors that could cause actual results to differ materially from those described in the forward-looking statements can be found in Part I, "Item 1A. Risk Factors" in our 2013 Annual Report on Form 10-K and include risks discussed in this MD&A and in other periodic reports that we file with the SEC. Additional factors include: as one of the largest lenders in the Southeast and Mid-Atlantic U.S. and a provider of financial products and services to consumers and businesses across the U.S., our financial results have been, and may continue to be, materially affected by general economic conditions, particularly unemployment levels and home prices in the U.S., and a deterioration of economic conditions or of the financial markets may materially adversely affect our lending and other businesses and our financial results and condition; legislation and regulation, including the Dodd-Frank Act, as well as future legislation and/or regulation, could require us to change certain of our business practices, reduce our revenue, impose additional costs on us, or otherwise adversely affect our business operations and/or competitive position; we are subject to capital adequacy and liquidity guidelines and, if we fail to meet these guidelines, our financial condition would be adversely affected; loss of customer deposits and market illiquidity could increase our funding costs; we rely on the mortgage secondary market and GSEs for some of our liquidity; our framework for managing risks may not be effective in mitigating risk and loss to us; we are subject to credit risk; our ALLL may not be adequate to cover our eventual losses; we may have more credit risk and higher credit losses to the extent that our loans are concentrated by loan type, industry segment, borrower type, or location of the borrower or collateral; we will realize future losses if the proceeds we receive upon liquidation of NPAs are less than the carrying value of such assets; a downgrade in the U.S. government's sovereign credit rating, or in the credit ratings of instruments issued, insured or guaranteed by related institutions, agencies or instrumentalities, could result in risks to us and general economic conditions that we are not able to predict; weakness in the real estate market, including the secondary residential mortgage loan markets, has adversely affected us and may continue to adversely affect us; we are subject to certain risks related to originating and selling mortgages, and may be required to repurchase mortgage loans or indemnify mortgage loan purchasers as a result of breaches of representations and warranties, borrower fraud, or certain breaches of our servicing agreements, and this could harm our liquidity, results of operations, and financial condition; we face certain risks as a servicer of loans, and may be terminated as a servicer or master servicer, be required to repurchase a mortgage loan or reimburse investors for credit losses on a mortgage loan, or incur costs, liabilities, fines and other sanctions, if we fail to satisfy our servicing obligations, including our obligations with respect to mortgage loan foreclosure actions; financial difficulties or credit downgrades of mortgage and bond insurers may adversely affect our servicing and investment

portfolios; we are subject to risks related to delays in the foreclosure process; we face risks related to recent mortgage settlements; we may continue to suffer increased losses in our loan portfolio despite enhancement of our underwriting policies and practices; our mortgage production and servicing revenue can be volatile; changes in market interest rates or capital markets could adversely affect our revenue and expense, the value of assets and obligations, and the availability and cost of capital and liquidity; changes in interest rates could also reduce the value of our MSR and mortgages held for sale, reducing our earnings; the fiscal and monetary policies of the federal government and its agencies could have a material adverse effect on our earnings; clients could pursue alternatives to bank deposits, causing us to lose a relatively inexpensive source of funding; consumers may decide not to use banks to complete their financial transactions, which could affect net income; we have businesses other than banking which subject us to a variety of risks; hurricanes and other disasters may adversely affect loan portfolios and operations and increase the cost of doing business; negative public opinion could damage our reputation and adversely impact business and revenues; we rely on other companies to provide key components of our business infrastructure; a failure in or breach of our operational or security systems or infrastructure, or those of our third party vendors and other service providers,

including as a result of cyber-attacks, could disrupt our businesses, result in the disclosure or misuse of confidential or proprietary information, damage our reputation, increase our costs and cause losses; the soundness of other financial institutions could adversely affect us; we depend on the accuracy and completeness of information about clients and counterparties; competition in the financial services industry is intense and could result in losing business or margin declines; maintaining or increasing market share depends on market acceptance and regulatory approval of new products and services; we might not pay dividends on our common stock; our ability to receive dividends from our subsidiaries could affect our liquidity and ability to pay dividends; disruptions in our ability to access global capital markets may adversely affect our capital resources and liquidity; any reduction in our credit rating could increase the cost of our funding from the capital markets; we have in the past and may in the future pursue acquisitions, which could affect costs and from which we may not be able to realize anticipated benefits; we are subject to certain litigation, and our expenses related to this litigation may adversely affect our results; we may incur fines, penalties and other negative consequences from regulatory violations, possibly even inadvertent or unintentional violations; we depend on the expertise of key personnel, and if these individuals leave or change their roles without effective replacements, operations may suffer; we may not be able to hire or retain additional qualified personnel and recruiting and compensation costs may increase as a result of turnover, both of which may increase costs and reduce profitability and may adversely impact our ability to implement our business strategies; our accounting policies and processes are critical to how we report our financial condition and results of operations, and require management to make estimates about matters that are uncertain; changes in our accounting policies or in accounting standards could materially affect how we report our financial results and condition; our stock price can be volatile; our disclosure controls and procedures may not prevent or detect all errors or acts of fraud; our financial instruments carried at fair value expose us to certain market risks; our revenues derived from our investment securities may be volatile and subject to a variety of risks; and we may enter into transactions with off-balance sheet affiliates or our subsidiaries.

INTRODUCTION

We are a leading provider of financial services, particularly in the Southeastern and Mid-Atlantic U.S., and our headquarters is located in Atlanta, Georgia. Our principal banking subsidiary, SunTrust Bank, offers a full line of financial services for consumers and businesses both through its branches located primarily in Florida, Georgia, Maryland, North Carolina, South Carolina, Tennessee, Virginia, and the District of Columbia, and through other national delivery channels. We operate three business segments: Consumer Banking and Private Wealth Management, Wholesale Banking, and Mortgage Banking, with the remainder in Corporate Other. Within each of our businesses, we have growth strategies both within our Southeastern and Mid-Atlantic footprint and targeted national markets. See Note 16, "Business Segment Reporting," to the Consolidated Financial Statements in this Form 10-Q for a description of our business segments. In addition to deposit, credit, mortgage banking, and trust and investment services offered by the Bank, our other subsidiaries provide asset management, securities brokerage, and capital market services. This MD&A is intended to assist readers in their analysis of the accompanying Consolidated Financial Statements and supplemental financial information. It should be read in conjunction with the Consolidated Financial Statements, Notes to the Consolidated Financial Statements, and other information contained in this document and our 2013 Annual Report on Form 10-K. When we refer to "SunTrust," "the Company," "we," "our," and "us" in this narrative, we mean SunTrust Banks, Inc. and subsidiaries (consolidated). In the MD&A, net interest income, net interest margin, total revenue, and efficiency ratios are presented on an FTE basis. The FTE basis adjusts for the tax-favored status of net interest income from certain loans and investments. We believe this measure to be the preferred industry measurement of net interest income and it enhances comparability of net interest income arising from taxable and tax-exempt sources. Additionally, we present certain non-U.S. GAAP metrics to assist investors in understanding management's view of particular financial measures, as well as to align presentation of these financial measures with peers in the industry who may also provide a similar presentation. Reconcilements for all non-U.S. GAAP measures are provided in Table 1.

EXECUTIVE OVERVIEW

Economic and regulatory

Moderate growth continued during the second quarter of 2014 as several key economic indicators continued to improve. Labor markets, stock markets, housing markets, corporate profits, and consumer confidence levels all displayed signs of improvement during the second quarter of 2014. While unemployment levels remained above historical averages, the overall unemployment rate continued to show improvement and was just above 6% at June 30, 2014, from just below 7% at March 31, 2014. Stock markets continued to rally, pushing indices towards all-time highs. The housing market that strengthened in 2013 continued to show sustainable signs of improvement in 2014. However, the modest rise in mortgage interest rates that began in the second quarter of 2013 resulted in the continued decline in refinancing activity. Corporate profits continued to improve as benefits from prior period operational rightsizing efforts were realized, but revenue growth remained constrained, consistent with the overall national Gross Domestic Product. Consumer confidence continued to improve as the Consumer Confidence Index in June was at its highest level since January 2008. Overall, the macroeconomic environment appears to be improving but the outlook remains somewhat unsettled with no clear consensus around the future strength of the U.S. economy in addition to increased uncertainty around the global economy.

The Federal Reserve continued to maintain a highly accommodative monetary policy and indicated that this policy would remain in effect for a considerable time after its asset purchase program ends and the economic recovery strengthens. In light of cumulative progress in unemployment and labor market conditions, the Federal Reserve again indicated that it would modestly reduce the monthly pace of Treasury and agency MBS purchases beginning in August 2014, and sequentially thereafter through October 2014, when the program would conclude. In addition, the Federal Reserve indicated that this further reduction of its asset purchases was against the backdrop of likely continued improving labor market and other economic indicators. The Federal Reserve indicated that, in its view, its sizable and still increasing holdings of longer-term government securities should maintain downward pressure on longer-term interest rates, support mortgage markets, and foster more accommodative financial conditions. The Federal Reserve outlook continues to include economic growth that will strengthen from current levels with appropriate policy accommodation, a gradual decline in unemployment, and the expectation of gradually increasing longer-term inflation.

Capital

During the first quarter, we announced capital plans upon completion of the Federal Reserve's review of and non-objection to our capital plan in conjunction with the 2014 CCAR. Accordingly, during the second quarter we increased the quarterly common stock dividend to \$0.20 per common share, which reflects an increase of \$0.10 per common share from the prior quarter. Additionally, we repurchased \$83 million of our outstanding common stock during the second quarter, bringing our total repurchased common stock during the first six months of 2014 to \$133 million. We currently expect to repurchase an additional \$300 million to \$350 million of outstanding common stock through the end of the first quarter of 2015. Our estimated repurchases are modestly lower than originally planned due to guidance that the industry received from the Federal Reserve in the second quarter related to the capital treatment of our forecast of certain share-based compensation, which was driven by a valuation adjustment to our noncontrolling interest in RidgeWorth and changes in employee option exercises. See additional details related to our common stock repurchases in the "Capital Resources" section of this MD&A.

Our capital position remained solid at June 30, 2014 as our capital ratios were well above the requirements to be considered "well capitalized" according to current and expected future regulatory standards. Our Tier 1 common equity ratio was 9.72% at June 30, 2014, compared to 9.82% at December 31, 2013. The decrease in the ratio compared to year end was primarily due to an increase in RWA as a result of growth in our loan portfolio and client lending commitments, partially offset by growth in retained earnings. Our Tier 1 capital and total capital ratios were 10.66% and 12.53%, respectively, at June 30, 2014 compared to 10.81% and 12.81%, respectively, at December 31, 2013. See additional discussion of our capital in the "Capital Resources" section of this MD&A.

The Federal Reserve published final rules on October 11, 2013 related to capital adequacy requirements to implement the BCBS's Basel III framework for financial institutions in the U.S. The final rules become effective for us on January 1, 2015. Based on our current and ongoing analysis of the final rules, we estimate our current Basel III CET 1 ratio at June 30, 2014, on a fully phased-in basis, to be approximately 9.7%, well above the regulatory requirement.

See the "Selected Quarterly Financial Data and Reconciliation of Non-U.S. GAAP Measures" section in this MD&A for a reconciliation of the current Basel I ratio to the estimated Basel III ratio. See additional discussion of Basel III in the "Capital Resources" section of this MD&A.

Financial performance

Net income available to common shareholders during the second quarter of 2014 was \$387 million, or \$0.72 per average diluted common share, compared to \$365 million, or \$0.68 per average common diluted share for the second quarter of 2013. During the six months ended June 30, 2014, our net income available to common shareholders was \$780 million, or \$1.45 per average common diluted share, compared to \$705 million, or \$1.31 per average common diluted share during the six months ended June 30, 2013. Both periods' results in 2014 were negatively impacted by \$49 million, or \$0.09 per average diluted common share, related to items announced in our July 3, 2014 Form 8-K and other legacy mortgage-related matters impacting the current period. A summary of the Form 8-K and other legacy mortgage-related items that impacted our current periods' results are as follows:

(Dollars in millions, except per share amounts)	Three Months Ended June 30, 2014	Six Months Ended June 30, 2014
Net income available to common shareholders	\$387	\$780
Form 8-K and other legacy mortgage-related items impacting the periods:		
Operating losses related to settlement of HAMP ¹	204	204
Gain on sale of RidgeWorth ²	(105)	(105)
Other legacy mortgage-related adjustments	(25)	(25)
Tax benefit related to above items	(25)	(25)
Net income available to common shareholders, excluding Form 8-K and other legacy mortgage-related items impacting the periods	\$436	\$829
Net income per average common share, diluted	\$0.72	\$1.45
Net income per average common share, diluted, excluding Form 8-K and other legacy mortgage-related items impacting the periods	\$0.81	\$1.54

¹ See additional discussion related to HAMP in the "Nonperforming Assets" section in this MD&A and in Note 15, "Contingencies," to the Consolidated Financial Statements in this Form 10-Q.

² See Note 2, "Acquisitions/Dispositions," to the Consolidated Financial Statements in this Form 10-Q for additional information.

The items noted above consist of operating losses related to the settlement of certain legal matters, further detailed in our Form 8-K that was filed with the SEC on July 3, 2014, partially offset by the gain on sale of RidgeWorth, our asset management subsidiary, as well as adjustments to other legacy mortgage-related matters during the quarter. When excluding these items from each period's results, our net income and diluted earnings per common share increased 19% and 18% during the three and six months ended June 30, 2014 compared to the same periods in 2013, respectively. The increase in EPS in the current year periods is a result of declines in the provision for credit losses and continued expense discipline, partially offset by a modest decline in total revenue and a return to a more normal effective tax rate in the second quarter of 2014. See Table 1, "Selected Quarterly Financial Data and Reconciliation of Non-U.S. GAAP Measures," in this MD&A for additional detail and resulting impacts of the Form 8-K and other legacy mortgage-related items.

Total revenue increased \$101 million and \$17 million during the three and six months ended June 30, 2014, compared to the same periods in 2013, respectively. During the three months ended June 30, 2014, total revenue, excluding the gain on sale of RidgeWorth, declined \$4 million compared to the same period in 2013, as higher investment banking and mortgage servicing income were offset by a decline in mortgage production income resulting from a 55% decline in production volume, driven by lower refinance activity, as well as a decrease in gain on sale margins. During the six months ended June 30, 2014, total revenue, excluding the gain on sale of RidgeWorth, declined \$88 million, or 2%, compared to the same period in 2013, as a result of a 1% decrease in net interest income, coupled with the same factors that affected the quarterly comparison. Total revenue, excluding the gain on sale of RidgeWorth, increased \$66 million compared to the first quarter of 2014 driven by higher noninterest income due to higher investment banking income and broad-based fee income growth.

Net interest income remained stable compared to the second quarter of 2013 and declined \$10 million compared to the first six months of 2013 as loan growth was offset by an overall 15 basis point and 16 basis point respective decline in

earning asset yields. Net interest margin for the current quarter was 3.11%, a decline of 14 basis points compared to the second quarter of 2013, and was 3.15% for the six months ended June 30, 2014, a 14 basis point decline from the same period in 2013. The decline in net interest margin was primarily due to a decline in loan yields. Net interest income remained relatively stable compared to the first quarter of 2014 due to higher average loan balances and one additional day, offset by a seven basis point decline in loan yields during the current quarter. Looking forward, we expect the net interest margin to decline further throughout 2014, primarily due to continued compression in loan yields and anticipated lower commercial loan swap income. We expect the overall full year decline in net interest margin during 2014 compared to 2013 to be slightly less than the 16 basis point decline during the full year of 2013 when compared to 2012. As our commercial loan swaps mature, we become more asset sensitive, which is part of our

balance sheet management strategy over the medium-term. See additional discussion related to revenue, net interest income and margin, and noninterest income in the "Net Interest Income/Margin" and "Noninterest Income" sections of this MD&A.

Noninterest expense during the second quarter was \$1.5 billion, which included the \$179 million of specific legacy mortgage-related operating losses. Excluding these operating losses, noninterest expense decreased \$49 million, or 4%, compared to the prior quarter and \$45 million, or 2%, compared to the six months ended June 30, 2013, primarily driven by lower cyclical costs and our continued focus on expense management, partially offset by higher personnel expenses, which is primarily the result of targeted hiring in revenue producing positions. Noninterest expense, excluding the specific legacy mortgage-related operating losses, decreased \$19 million, or 1%, during the three months ended June 30, 2014 compared to the first quarter of 2014 due to the \$36 million impairment of legacy affordable housing assets recognized in the first quarter of 2014 and the seasonal decline in employee compensation, partially offset by higher operating costs and other discrete charges recognized in the current quarter.

During the three and six months ended June 30, 2014, our efficiency ratio was 68.9% and 67.9%, respectively. Our tangible efficiency ratio during the three and six months ended June 30, 2014 was 68.8% and 67.8%, respectively, and when excluding the Form 8-K and other legacy mortgage-related items, our adjusted tangible efficiency ratio was 63.7% and 65.2%, respectively. We continue to target an adjusted tangible efficiency ratio of less than 64% for the full year of 2014, and our long-term tangible efficiency ratio target continues to be below 60%. See Table 1, "Selected Quarterly Financial Data and Reconciliation of Non-U.S. GAAP Measures," in this MD&A for additional information regarding our tangible efficiency ratio.

Our asset quality metrics continued to improve during the second quarter and first six months of 2014, though the pace of improvement in asset quality continues to moderate. Total NPLs declined 7% compared to December 31, 2013, driven by reduced inflows into nonaccrual status and continuing resolution of problem loans, primarily in our residential loan portfolio. Reductions in OREO continued, declining 20% from year end to \$136 million, the lowest level since 2006. We also sold \$149 million of accruing TDRs during the second quarter to further enhance our asset quality position. The financial impact of the TDR sale included \$10 million in net charge-offs and a \$16 million reduction in the ALLL, which drove a \$6 million reduction to the provision for loan losses during the second quarter of 2014. While the TDR sale will not materially change our reported asset quality metrics, it will have a modest benefit on certain rating agency and regulatory calculations. Early stage delinquencies, a leading indicator of asset quality, particularly for consumer loans, improved during the first half of 2014, both in total and when excluding government-guaranteed loan delinquencies.

At June 30, 2014, the ALLL was 1.55% of total loans, a decline of five basis points compared to December 31, 2013. The provision for loan losses decreased 50% and 49% and net charge-offs decreased 37% and 45% during the second quarter and first six months of 2014 compared to the same periods in 2013, respectively. The declines during 2014 were the result of improved credit quality. Annualized net charge-offs to total average loans decreased to 0.35% during both the second quarter and first six months of 2014 compared to 0.59% and 0.67% during the second quarter and first six months of 2013, respectively, driven by improved asset quality that resulted in a decline in charge-offs. During the second quarter, the provision for credit losses declined \$29 million, or 28%, while net charge-offs remained stable, compared to the first quarter of 2014. Going forward, we would expect continued, but modest improvements in NPLs, primarily driven by the residential portfolio. We also would expect net charge-offs in the residential portfolio to be modestly lower in the near-term; however, commercial and consumer net charge-offs are at or below normal levels and will, at some point, trend towards more normal levels. Over the near-term, we would expect the ALLL to remain generally stable, as any asset quality improvements may be offset by loan growth, and, as a result, the provision for loan losses should roughly approximate net charge-offs. See additional discussion of credit and asset quality in the "Loans," "Allowance for Credit Losses," and "Nonperforming Assets," sections of this MD&A. Average loans increased 2% during the quarter compared to the prior quarter and was primarily attributed to our C&I, CRE, and consumer direct portfolios. C&I growth was broad-based and driven by our commercial auto dealer group and other industry verticals. Growth in the CRE portfolio was driven by our institutional business, success in our REIT platform and a portfolio acquisition. This growth was partially offset by a \$574 million, or 1%, decline in average residential loans due to certain balance sheet management actions executed during the quarter. Specifically, we sold \$325 million in government guaranteed residential mortgages and \$149 million of accruing restructured

residential mortgages during the quarter. We also transferred \$2.1 billion of guaranteed mortgages to LHFS in anticipation of the sale of these loans on a servicing retained basis in the third quarter. We expect to use the proceeds from the government guaranteed residential mortgage sale to fund our investment in high-quality liquid securities in anticipation of forthcoming regulatory requirements regarding liquidity ratios. Compared to the second quarter and first half of 2013, average loans increased 8% and 7%, respectively, with broad-based growth across most loan portfolios, most notably in CRE, C&I, and consumer. Overall, loan growth was solid this quarter as we continue to execute targeted growth initiatives and as economic indicators continue to improve.

Average consumer and commercial deposits increased 3% and 2% during the second quarter and first half of 2014, compared to the second quarter and first half of 2013, respectively, as solid growth in lower cost deposits was partially offset by declines in time deposits due to maturities. Specifically, average lower cost deposits increased \$6.0 billion, or 5%, while average time deposits

declined \$2.1 billion, or 15%, compared to the second quarter of 2013. Average lower cost deposits increased \$4.3 billion, or 4%, while average time deposits declined \$2.0 billion, or 14%, compared to the first half of 2013. The continued favorable shift in consumer and commercial deposit mix helped reduce interest-bearing deposit costs by six basis points compared to both the second quarter and first six months of 2013. Additionally, consumer and commercial deposits increased 2% compared to the first quarter of 2014, as the favorable shift in deposit mix also drove interest-bearing deposit costs down by two basis points. See additional discussion in the "Net Interest Income/Margin" section of this MD&A.

Business segments highlights

We achieved solid core operating momentum across each of our businesses, while maintaining improved asset quality and a strong capital position. In addition, we are firmly focusing our efforts on expanding and deepening our client relationships as a key driver to improving the profitability of the Company. Furthermore, we are continuing to make targeted investments in our businesses to drive growth in a challenging revenue environment.

Net income improved during the second quarter and first six months of 2014 in Consumer Banking and Private Wealth Management compared to the same periods in 2013. The increase in net income was primarily driven by continued improvement in credit quality, most notably in our home equity portfolio, which resulted in a decline in the provision for credit losses. This meaningful reduction in the provision for credit losses, combined with a modest increase in noninterest income, more than offset higher expenses to drive the 7% and 11% increase in net income during the three and six month periods of 2014, respectively, compared to 2013. Revenue momentum in this segment is improving, driven by growth in wealth management income, as our premier bankers and branch managers are partnering well with our financial advisors to better serve the savings and investment needs of our branch-based clients, which has been partially offset by declines in service charges. Card fees were also up due to increased purchase volume related to clients' increased utilization of our credit card product. Furthermore, our continued focus on our consumer lending platform drove the 18% increase in consumer loan production compared to June 30, 2013, primarily driven by growth in our credit card and LightStream consumer online businesses, and other consumer direct lending products, which more than offset reductions in home equity and student lending production. Noninterest expense increased 6% and 4% compared to the second quarter and first six months of 2013, respectively, driven primarily by our targeted investments in revenue generating positions, particularly in wealth and investment management, in addition to some smaller discrete charges incurred in the current quarter. We continue to make solid progress in this segment through increased investment in digital capabilities to meet our clients' needs, and targeted investments in client-facing teammates primarily serving affluent and high net worth clients.

Wholesale Banking continued its strong overall performance during the second quarter and first six months of 2014, driven by revenue growth and a reduction in the provision for credit losses, which led to increased net income compared to the same periods in 2013. Continued improvement in credit quality during the second quarter and first six months of 2014, particularly in our CRE portfolio, drove a 42% and 56% decrease in the provision for credit losses, respectively, compared to the same periods in 2013. Total revenue growth was 7% and 6% compared to the second quarter and first six months of 2013, respectively, due to increases in both net interest income and noninterest income. In particular, investment banking performance was particularly strong, reflective of the consistent investments we have made in this business over the past few years. The recent success can also be attributed to expanded product capabilities, as our M&A advisory and equity businesses were more accretive to our overall performance. Total noninterest expense increased 7% and 14% compared to the second quarter and first half of 2013, respectively, primarily due to the strategic decision to sell investments in legacy affordable housing assets in the first quarter of 2014, resulting in a \$36 million impairment charge, along with an increase in employee compensation driven in part by a reduction to incentive compensation accruals in the first quarter of 2013. Additionally, staff expenses increased as we continued to make investments to better meet our clients' needs and augment our capabilities. Loan and deposit growth drove the improvement in net interest income compared to the same periods in 2013, though continuing declines in loan yields partially offset this growth. Average loan growth was broad-based and grew 15% and 13% compared to the second quarter and first six months of 2013, respectively, led by further growth in commercial real estate, our commercial dealer group, our corporate banking national expansion initiatives, and asset securitization and

energy practice groups. Deposit growth was also strong, with increases across each line of business. Our loan pipelines also increased this quarter, giving us confidence in continued loan growth prospects throughout the remainder of 2014; however, competition remains high, which may lead to ongoing pricing pressure. We continue to invest in the business to broaden our client base and better serve our clients' needs and are optimistic about the growth and profitability outlook of our Wholesale business, as we better leverage the full platform of our product capabilities for our client base.

Mortgage Banking results were significantly impacted by the Form 8-K and other legacy mortgage-related items during the quarter. These items accounted for \$115 million in after-tax charges during the three and six months ended June 30, 2014, which drove the net loss of \$84 million and \$70 million, respectively. Excluding these items, the segment would have realized modest net income during the current quarter and first half of 2014. The decrease in noninterest expense and provision for credit losses, excluding the Form 8-K and other legacy mortgage-related items during the second quarter and first six months of 2014 compared

to the same periods in 2013, more than offset lower revenue and were the result of core expense reduction initiatives and continued lower credit-related costs, while the lower provision for credit losses was attributable to the ongoing improvement in credit quality of our residential mortgage portfolio. Revenue was lower compared to the second quarter and first six months of 2013, as a decline in noninterest income due to a decline in production volume and lower gain on sale margins was partially offset by higher servicing income. As expected, our refinance activity continued to decline in 2014, driving the lower production volume compared to the second quarter and first six months of 2013. With the resolution of additional legacy mortgage-related matters this quarter, we can further sharpen our focus on meeting more of our clients' needs and generating sustained profitability in the Mortgage Banking segment.

Additional information related to our segments can be found in Note 16, "Business Segment Reporting," to the Consolidated Financial Statements in this Form 10-Q, and further discussion of segment results for the second half of 2014 and 2013, can be found in the "Business Segment Results" section of this MD&A.

Basel III - CET 1 ratio ¹⁷	9.7	9.6

¹ Amortization expense related to qualified affordable housing investment costs is recognized in provision for income taxes for each of the periods presented as allowed by a recently adopted accounting standard. Prior to the first quarter of 2014, these amounts were recognized in other noninterest expense.

² We present certain income statement categories and also total revenue-FTE, net income per average common diluted share, net income, net income available to common shareholders, an efficiency ratio, a tangible efficiency ratio, and the effective tax rate, excluding Form 8-K items and other legacy mortgage-related items. We believe these measures are useful to investors because it removes the effect of material items impacting the periods' results allowing a more useful comparison to prior periods' results that did not have a similar impact and is more reflective of normalized operations as it reflects results that are primarily client relationship and client transaction driven. Removing these items also allows investors to compare our results to other companies in the industry that may not have had similar items impacting their results. Additional detail on certain of these items can be found in the Form 8-K filed with the SEC on July 3, 2014.

³ We present net interest income, net interest margin, total revenue, and total revenue excluding gain on sale of RidgeWorth on an FTE basis. Total Revenue is calculated as net interest income - FTE plus noninterest income. Net interest income - FTE adjusts for the tax-favored status of net interest income from certain loans and investments. We believe this measure to be the preferred industry measurement of net interest income and it enhances comparability of net interest income arising from taxable and tax-exempt sources.

⁴ We present total revenue - FTE excluding gain on sale of RidgeWorth and noninterest income excluding gain on sale of RidgeWorth. We believe revenue and noninterest income excluding the gain on sale of RidgeWorth is more indicative of our performance because it isolates income that is primarily client relationship and client transaction driven and is more indicative of normalized operations.

⁵ We present a tangible book value per common share that excludes the after-tax impact of purchase accounting intangible assets and also excludes preferred stock from tangible equity. We believe this measure is useful to investors because, by removing the effect of intangible assets that result from merger and acquisition activity as well as preferred stock (the level of which may vary from company to company), it allows investors to more easily compare our common stock book value to other companies in the industry.

⁶ We present ROTCE to exclude intangible assets (net of deferred taxes), except for MSRs, from average common shareholders' equity. We believe this measure is useful to investors because, by removing the effect of intangible assets, except for MSRs, (the level of which may vary from company to company), it allows investors to more easily compare our ROE to other companies in the industry who present a similar measure. We also believe that removing intangible assets (net of deferred taxes), except for MSRs, is a more relevant measure of the return on our common shareholders' equity.

⁷ Computed by dividing noninterest expense by total revenue - FTE. The FTE basis adjusts for the tax-favored status of net interest income from certain loans and investments. We believe this measure to be the preferred industry measurement of net interest income and it enhances comparability of net interest income arising from taxable and

tax-exempt sources.

⁸ We present a tangible efficiency ratio which excludes the amortization of intangible assets. We believe this measure is useful to investors because, by removing the effect of these intangible asset costs (the level of which may vary from company to company), it allows investors to more easily compare our efficiency to other companies in the industry. This measure is utilized by us to assess our efficiency and that of our lines of business.

⁹ We present a tangible equity to tangible assets ratio that excludes the after-tax impact of purchase accounting intangible assets. We believe this measure is useful to investors because, by removing the effect of intangible assets that result from merger and acquisition activity (the level of which may vary from company to company), it allows investors to more easily compare our capital adequacy to other companies in the industry. This measure is used by us to analyze capital adequacy.

¹⁰ Net of deferred taxes of \$206 million and \$174 million at June 30, 2014 and 2013, respectively.

¹¹ Net of deferred taxes of \$1 million and \$4 million at June 30, 2014 and 2013, respectively.

¹² We present a ratio of allowance to total loans, excluding government guaranteed and fair value loans, to exclude loans from the calculation that are held at fair value with no related allowance and loans guaranteed by a government agency that do not have an associated allowance recorded due to nominal risk of principal loss.

¹³ Reflects the pre-tax gain on sale of asset management subsidiary that impacts the Corporate Other segment.

¹⁴ Reflects the pre-tax impact from the settlement of the mortgage modification investigation and other legacy mortgage-related items that impact the Mortgage Banking segment.

¹⁵ Reflects the income tax impact on above items.

¹⁶ Primarily relates to the improved treatment of mortgage servicing assets essentially offset by certain disallowed DTAs.

¹⁷ The Basel III calculations of CET 1, RWA, and the CET 1 ratio are based upon our current interpretation of the final Basel III rules published by the Federal Reserve during October 2013, on a fully phased in basis.

¹⁸ The largest differences between our RWA as calculated under Basel I compared to Basel III relate to the risk-weightings for certain commercial loans, derivatives, unfunded commitments, letters of credit, securitizations, and mortgage servicing assets.

¹ Interest income includes loan fees of \$48 million and \$44 million for the three months ended June 30, 2014 and 2013, respectively.

² Interest income includes the effects of taxable-equivalent adjustments using a federal income tax rate of 35% and, where applicable, state income taxes to increase tax-exempt interest income to a taxable-equivalent basis. The net taxable-equivalent adjustment amounts included in the above table aggregated \$35 million and \$31 million for the three months ended June 30, 2014 and 2013, respectively.

³ Income on consumer and residential nonaccrual loans, if recognized, is recognized on a cash basis.

⁴ Derivative instruments that manage our interest-sensitivity position increased net interest income \$110 million and \$106 million for the three months ended June 30, 2014 and 2013, respectively.

⁵ The net interest margin is calculated by dividing annualized net interest income – FTE by average total earning assets.

¹ Interest income includes loan fees of \$93 million and \$71 million for the six months ended June 30, 2014 and 2013, respectively.

² Interest income includes the effects of taxable-equivalent adjustments using a federal income tax rate of 35% and, where applicable, state income taxes to increase tax-exempt interest income to a taxable-equivalent basis. The net taxable-equivalent adjustment amounts included in the above table aggregated \$69 million and \$61 million for the six months ended June 30, 2014 and 2013, respectively.

³ Income on consumer and residential nonaccrual loans, if recognized, is recognized on a cash basis.

⁴ Derivative instruments that manage our interest-sensitivity position increased net interest income \$220 million and \$225 million for the six months ended June 30, 2014 and 2013, respectively.

⁵ The net interest margin is calculated by dividing annualized net interest income – FTE by average total earning assets.

Net Interest Income/Margin
Second Quarter of 2014

Net interest income on an FTE basis was \$1.2 billion during the second quarter of 2014, which was consistent with the second quarter of 2013. However, net interest margin decreased 14 basis points to 3.11% during the second quarter of 2014, compared to 3.25% during the second quarter of 2013, primarily due to a 15 basis point decline in earning asset yields as the low interest rate environment continued. The decline in earning asset yields was primarily concentrated in our loan portfolio, partially offset by improved yields in the LHFS and securities AFS portfolio and a two basis point decline in rates paid on interest-bearing liabilities.

Average earning assets increased \$6.9 billion, or 4%, during the second quarter of 2014 compared to the second quarter of 2013, primarily driven by an increase of \$9.4 billion, or 8%, in average loans, partially offset by a \$1.9 billion decline in average LHFS. The increase in average loans was broad-based across most loan categories, primarily driven by targeted growth in C&I loans of \$5.7 billion, or 10%, CRE loans of \$1.8 billion, or 42%, and nonguaranteed residential mortgages of \$1.4 billion, or 6%, compared to the second quarter of 2013. Average LHFS decreased due to lower mortgage production volume as mortgage interest rates have increased over the past year. Additionally, in the second quarter of 2014, we transferred \$2.1 billion of government guaranteed residential mortgages, which yield approximately 3.25%, to LHFS, in anticipation of the sale of these loans in the third quarter on a servicing retained basis. We expect to invest the proceeds from this sale into high-quality liquid securities that yield approximately 3.20% in anticipation of forthcoming regulatory requirements regarding liquidity ratios. Average nonaccrual loans declined 35%, driven by the ongoing resolution of defaulted loans.

Yields on average earning assets declined 15 basis points to 3.45% during the second quarter of 2014, compared to 3.60% during the second quarter of 2013. The decline was driven by a decrease in the yield on our loan portfolio during the second quarter of 2014 to 3.67%, a decrease of 25 basis points compared to the second quarter of 2013. The decrease in the loan portfolio yield was broad-based, driven by the continued low interest rate environment and a shift in loan mix to C&I loans, where spread compression has occurred and competition in our markets remains high. A 12 basis point increase in the securities AFS portfolio yield partially offset the decline in loan yields, compared to the second quarter of 2013. The securities AFS yield increase was primarily driven by lower pay-downs of MBS securities during the quarter and the resulting impact on MBS amortization.

We utilize interest rate swaps to manage interest rate risk. The largest notional position of these swaps are pay variable-receive fixed interest rate swaps that convert a portion of our commercial loan portfolio from floating rates, based on LIBOR, to fixed rates. At June 30, 2014, the outstanding notional balance of active swaps that qualified as cash flow hedges on variable rate commercial loans was \$18.9 billion, compared to \$17.3 billion at December 31, 2013. In addition to the income recognized from currently outstanding swaps, we also continue to recognize interest income over the original hedge period resulting from terminated or de-designated swaps that were previously designated as cash flow hedges on variable rate commercial loans. Interest income from our commercial loan swaps increased to \$101 million during the second quarter of 2014 compared to \$100 million during the second quarter of 2013. As we manage our interest rate risk we may continue to purchase additional and/or terminate existing interest rate swaps. Active swaps began to mature during the second quarter of 2014 and remaining swaps have maturities through 2019. The average maturity of our active swap notional balances at June 30, 2014 was 1.7 years, and \$14.3 billion of our active swap notional balances will mature by December 31, 2016. As the swap balances mature, the interest income from the swap balances is expected to decline and our overall asset sensitivity position is expected to increase, which is a part of our balance sheet management strategy over the medium term. For every \$1.0 billion reduction in the average notional swap balance, our net interest income sensitivity would increase an additional 0.2% in a 100 basis points parallel rate increase. See Table 16, "Net Interest Income Asset Sensitivity," in this MD&A for additional details on our net interest income sensitivity analysis.

The commercial loan swaps have a fixed rate of interest that is received, while the rate paid is based on LIBOR. The weighted average rate on the receive-fixed rate leg of the swap portfolio is 1.74%. Estimated income of these swaps is included in the table below and is based on the assumption of unchanged LIBOR rates relative to June 30, 2014, which may be different than our assumption for future interest rates. Actual income from these swaps may vary from estimates, as the interest rate environment may change, we may purchase additional swaps, and/or we may terminate existing swaps.

Table 3

	Ending Notional Balance of Active Swaps (in billions)	Estimated Net ¹ Interest Income Related to Swaps (in millions)
Third Quarter 2014	\$18.9	\$98
Fourth Quarter 2014	15.4	84

Second Quarter 2015	9.9	36
Third Quarter 2015	9.5	34
Fourth Quarter 2015	9.5	33

¹ Includes estimated interest income related to active and terminated/de-designated swaps. See Note 12, "Derivative Financial Instruments," to the Consolidated Financial Statements in this Form 10-Q for additional swap information.

Average interest-bearing liabilities increased \$5.5 billion, or 5%, during the second quarter of 2014 compared to the same period of 2013, and average rates paid on interest-bearing liabilities were 0.48% during the second quarter of 2014, a decrease of two basis points compared to the same period of 2013. Average interest-bearing liabilities increased primarily due to a \$4.7 billion, or 6%, increase in average lower-cost deposits, and a \$2.3 billion, or 24%, increase in average long-term debt. These increases were partially offset by a decrease of \$2.1 billion, or 15%, in average time deposits. The increase in average long-term debt was primarily attributable to (i) the addition of a \$1.0 billion long-term FHLB advance during the second quarter of 2014, (ii) the April 2014 issuance under our Global Bank Note program of \$650 million of fixed rate senior notes, (iii) the first quarter of 2014 issuances under our Global Bank Note program of \$250 million of floating rate senior notes and \$600 million of fixed rate senior notes, and (iv) combined issuances of \$1.4 billion of fixed rate senior notes in June and October of 2013. See additional information regarding long-term debt in the "Borrowings" section of this MD&A. Average noninterest-bearing deposits increased \$1.3 billion, or 3%, compared to the second quarter of 2013.

The two basis point reduction in average interest-bearing liability costs during the second quarter of 2014 was primarily due to a six basis point decline in rates paid on interest bearing deposits, partially offset by a two basis point increase in rates paid on long-term debt driven by the aforementioned issuances. The decline in the average rate paid on interest-bearing deposits was a result of the improved funding mix driven by the shift from time deposits to lower-cost deposit products, as well as a reduction in rates paid on time deposits as maturing CDs renew at lower rates.

During the second quarter of 2014, the interest rate environment was characterized by a steepening in the yield curve compared to the same period in 2013, as rates at the long end of the yield curve increased. More specifically, for the three months ended June 30, 2014, benchmark rates were as follows compared to the same period in 2013: one-month LIBOR averaged 0.15%, a decrease of five basis points, three-month LIBOR averaged 0.23%, a decrease of five basis points, five-year swaps averaged 1.74%, an increase of 66 basis points, and ten-year swaps averaged 2.72%, an increase of 57 basis points. During the second quarter of 2014, the Fed funds target rate averaged 0.25% and the Prime rate averaged 3.25%, both unchanged from the second quarter of 2013.

We expect net interest margin to decline further throughout 2014, primarily due to continued compression in loan yields and lower commercial loan swap income. Additionally, we continue to expect the overall full year decline in net interest margin during 2014 compared to 2013 to be slightly less than the 16 basis point decline during the full

year of 2013 when compared to 2012. As our commercial loan swaps mature over the next several years, we become more asset sensitive, which is part of our balance sheet management strategy over the medium-term.

First Half of 2014

For the first six months of 2014, net interest income on a FTE basis was \$2.5 billion, which was consistent with the first six months of 2013. However, net interest margin decreased 14 basis points to 3.15%, compared to 3.29% during the first six months of 2013, primarily due to a 16 basis point decline in earning asset yields. The earning asset yield decline was primarily driven by lower loan yields, partially offset by improved yields in the LHFS and securities AFS portfolio, and a three basis point reduction in interest bearing liability costs driven by interest-bearing deposits.

Yields on average earning assets declined 16 basis points to 3.49% for the six months ended June 30, 2014, from 3.65% for the six months ended June 30, 2013, driven primarily by a decline in loan yields. The yield on average loans was 3.70%, a decrease of 27 basis points compared to the six months ended June 30, 2013, driven by broad-based declines across the loan portfolio, including an \$11 million decline in swap interest income. Partially offsetting the decline in loan yields was a yield increase of 76 basis points in average LHFS and 13 basis points in average securities AFS when compared to the six months ended June 30, 2013. Average rates paid on interest-bearing liabilities declined by three basis points compared to the six months ended June 30, 2013. Primarily driving this decline was a six basis point decrease in rates paid on interest-bearing deposits as a result of the improved funding mix driven by the shift from time deposits to lower-cost deposit products, as well as a reduction in rates paid on time deposits as maturing CDs renew at lower rates.

Average earning assets increased \$5.9 billion, or 4%. The increase was primarily driven by increases in average loans of \$8.5 billion, or 7%, partially offset by decreases of \$2.1 billion in average LHFS. The factors contributing to the year-over-year changes in average loans and LHFS were the same as those discussed above related to the second quarter of 2014 compared to the second quarter of 2013.

Average interest-bearing liabilities increased \$4.9 billion, or 5%, compared to the six months ended June 30, 2013. This change was primarily due to a \$2.2 billion, or 23%, increase in long-term debt, a \$1.2 billion, or 1%, increase in interest-bearing deposits, and an increase of \$1.1 billion, or 24%, in other short-term borrowings. The factors contributing to the year-over-year increase in interest-bearing deposits and average long-term debt were the same as those discussed above related to the second quarter of 2014 compared to the second quarter of 2013. Average noninterest-bearing deposits increased \$1.1 billion, or 3%, compared to the six months ended June 30, 2013. The increase in average other short-term borrowings was primarily due to FHLB advances.

Foregone Interest

Foregone interest income from NPLs reduced the net interest margin by two basis points during the second quarter of both 2014 and 2013, and by two and three basis points during the six months ended June 30, 2014 and 2013, respectively, as average nonaccrual loans decreased by \$475 million and \$521 million during the three and six months ended June 30, 2014, respectively, as compared to the same periods in 2013. See additional discussion of our expectations of future credit quality in the “Loans,” “Allowance for Credit Losses,” and “Nonperforming Assets” sections of this MD&A. Table 2 contains more detailed information concerning average balances, yields earned, and rates paid.

NONINTEREST INCOME

(Dollars in millions)	Three Months Ended June 30			Six Months Ended June 30

-----------------------------------------------------------------------------------	-------	-------	-------	---------	---------	-------

¹ "NM" - Not meaningful. Those changes over 100 percent were not considered to be meaningful.

² See Note 2, "Acquisitions/Dispositions," to the Consolidated Financial Statements in this Form 10-Q for additional information related to the sale of RidgeWorth and Table 1, "Selected Quarterly Financial Data and Reconciliation of Non-U.S. GAAP Measures," in this MD&A for a reconciliation of noninterest income, excluding the gain on sale of RidgeWorth.

Noninterest income increased \$99 million, or 12%, compared to the second quarter of 2013, and increased \$27 million, or 2%, compared to the six months ended June 30, 2013, driven primarily by the gain on sale of RidgeWorth, our asset management

subsidiary. For additional information related to the sale of RidgeWorth, see Note 2, "Acquisitions/Dispositions," to the Consolidated Financial Statements in this Form 10-Q. Excluding the impact from the sale of RidgeWorth, noninterest income decreased \$6 million, or 1%, compared to the second quarter of 2013 and decreased \$78 million or 5%, compared to the six months ended June 30, 2013. The decreases in both periods were driven by a decline in mortgage production revenue, partially offset by higher investment banking and mortgage servicing income. See Table 1, "Selected Quarterly Financial Data and Reconciliation of Non-U.S. GAAP Measures," in this MD&A for a reconciliation of noninterest income, excluding the gain on sale of RidgeWorth.

Trust and investment management income decreased \$14 million, or 11%, compared to the second quarter of 2013, and \$7 million, or 3%, compared to the six months ended June 30, 2013, driven entirely by the loss of RidgeWorth related revenue as a result of the May 30, 2014 sale. Retail investment services income increased \$7 million, or 10%, compared to the second quarter of 2013 and \$17 million, or 13%, compared to the six months ended June 30, 2013. The increase in each period is a result of our ongoing focus on meeting more clients' savings and investment needs. Investment banking income increased \$26 million, or 28%, compared to the second quarter of 2013, and \$46 million, or 29%, compared to the six months ended June 30, 2013. The increase in both periods was primarily driven by higher client activity across most origination and advisory product categories.

Trading income decreased \$2 million, or 4%, compared to the second quarter of 2013, and increased \$5 million, or 5%, compared to the six months ended June 30, 2013. The decline compared to the second quarter of 2013 was primarily driven by a \$15 million increase in mark-to-market valuation losses on the Company's fair value debt, partially offset by higher core trading income, which was impacted by the de-risking of certain trading positions in the second quarter of 2013. The increase compared to the six months ended June 30, 2013, was also largely driven by higher core trading income, partially offset by an \$8 million increase in mark-to-market valuation losses on the Company's fair value debt.

Mortgage servicing related income increased \$44 million compared to the second quarter of 2013 and increased \$60 million compared to the six months ended June 30, 2013. The increase was primarily due to a slower pace of loan prepayments resulting in lower decay of the servicing asset. At June 30, 2014, the servicing portfolio was \$134.4 billion compared to \$140.1 billion at June 30, 2013.

Mortgage production related income decreased \$81 million, or 61%, compared to the second quarter of 2013 and \$197 million, or 67%, compared to the six months ended June 30, 2013. The decreases were due to a decline in refinance production volume and lower gain on sale margins. Loan production volume decreased 55% and 60% compared to the three and six months ended June 30, 2013, respectively, and loan applications decreased 48% and 53% compared to the three and six months ended June 30, 2013, respectively. The decline in refinance activity, primarily a result of an increase in mortgage interest rates during the past year, drove the decreases in production volume and applications. The decline in mortgage revenue was partially offset by a decrease in mortgage repurchase provision of \$10 million, or 67%, compared to the second quarter of 2013, and \$19 million, or 66%, compared to the six months ended June 30, 2013. The mortgage repurchase reserve was \$77 million at June 30, 2014, a decrease of \$1 million from December 31, 2013. For additional information on the mortgage repurchase reserve, see Note 13, "Guarantees," to the Consolidated Financial Statements in this Form 10-Q.

Other noninterest income increased \$21 million, or 48%, compared to second quarter of 2013 and increased \$15 million, or 17% compared to the six months ended June 30, 2013. The increase was primarily driven by a \$19 million gain on the sale of government guaranteed mortgage loans and higher leasing-related income in the current quarter.

NONINTEREST EXPENSE

Table 5

(Dollars in millions)	Three Months Ended			Six Months Ended		
	June 30	June 30	% Change ¹	June 30	June 30	% Change ¹

Total noninterest expense, excluding Form 8-K and other legacy mortgage-related items ²	\$1,338	\$1,387	(4) %	\$2,695	\$2,740	(2) %

¹ "NM" - not meaningful. Those changes over 100 percent were not considered to be meaningful.

² See Table 1, "Selected Quarterly Financial Data and Reconciliation of Non-U.S. GAAP Measures," in this MD&A for a reconciliation of noninterest expense, excluding Form 8-K and other legacy mortgage-related items.

Noninterest expense increased \$130 million, or 9%, and \$134 million, or 5%, during the three and six months ended June 30, 2014 compared to the same periods in 2013, respectively, driven primarily by legacy mortgage-related operating losses during the second quarter of 2014. Noninterest expense during the three and six months ended June 30, 2014, excluding the impact of the Form 8-K and other legacy mortgage-related items from the second quarter of 2014 decreased \$49 million, or 4%, and \$45 million, or 2%, compared to the same periods in 2013, respectively. The decline in expenses in both periods was primarily due to lower cyclical costs and the continued focus on expense management. Additionally, during the first quarter of 2014, we adopted new accounting guidance that resulted in the amortization expense of qualified affordable housing investments being recognized in the provision for income taxes rather than previously in noninterest expense. Prior periods have been restated in accordance with GAAP. See Note 1, "Significant Accounting Policies," to the Consolidated Financial Statements in this Form 10-Q for further information related to the new guidance.

Personnel expenses increased \$26 million, or 4%, compared to the second quarter of 2013, and \$67 million, or 4%, compared to the six months ended June 30, 2013. The increase for both periods was due to higher salaries related to hiring efforts in certain revenue producing businesses and the impact of merit increases.

Outside processing and software decreased \$6 million, or 3%, compared to the second quarter of 2013, and \$14 million, or 4%, compared to the six months ended June 30, 2013. The decrease for both periods was primarily due to lower mortgage production volume driving the reduction in processing cost.

Operating losses increased \$146 million compared to the second quarter of 2013, and \$128 million compared to the six months ended June 30, 2013. The increase for both periods was primarily due to legacy mortgage-related matters that were settled during the second quarter of 2014. Specifically, we entered into a settlement agreement regarding STM's administration of HAMP. This settlement resulted in a \$204 million pre-tax charge that was partially offset by a net \$25 million accrual reduction for other legacy mortgage matters that progressed during the second quarter of 2014. Additionally, the second quarter of 2013 included mortgage-related charges of \$45 million. See additional discussion related to HAMP in Note 15, "Contingencies," to the Consolidated Financial Statements in this Form 10-Q.

Regulatory expenses decreased \$15 million, or 16%, compared to the six months ended June 30, 2013, due to declines in our FDIC insurance assessment rate, reflecting our reduced risk profile. Credit and collection services decreased \$29 million, or 56%, compared to the second quarter of 2013, and \$39 million, or 46%, compared to the six months ended June 30, 2013. The decrease for both periods was largely related to the continued improvement in credit quality. Excluding operating losses, we do not expect significant changes in cyclical costs going forward.

Other noninterest expense increased \$28 million, or 11%, compared to the six months ended June 30, 2013, due to discrete charges recognized in the current quarter and a \$36 million charge in the first quarter of 2014 related to the impairment of

certain affordable housing assets. The planned sale of these assets is unrelated to our core affordable housing and community development business.

PROVISION FOR INCOME TAXES

The provision for income taxes includes both federal and state income taxes. For the three and six months ended June 30, 2014, the provision for income taxes was \$173 million and \$298 million, resulting in effective tax rate of 30.2% and 27.0%, respectively. For the three and six months ended June 30, 2013, the provision for income taxes was \$156 million and \$317 million, resulting in an effective tax rate of 29.3% and 30.3%, respectively. The decrease in the effective tax rate for the six months ended June 30, 2014 was primarily due to a decrease in the UTBs due to the receipt of favorable guidance from the IRS in the first quarter of 2014.

Excluding the Form 8-K and other legacy mortgage-related items impacting the second quarter of 2014, the effective tax rate was 30.7% and 27.5% for the three and six months ended June 30, 2014, respectively. See Table 1, "Selected Quarterly Financial Data and Reconciliation of Non-U.S. GAAP Measures," in this MD&A for a reconciliation of the effective tax rate excluding Form 8-K and other legacy mortgage-related items.

Additionally, the provision for income taxes differs from the provision using statutory rates primarily due to favorable permanent tax items such as income from lending to tax exempt entities and federal tax credits from community reinvestment activities. See Note 10, "Income Taxes," to the Consolidated Financial Statements in this Form 10-Q for further information related to the provision for income taxes.

LOANS

Our disclosures about the credit quality of our loan portfolio and the related credit reserves (i) describe the nature of credit risk inherent in our loan portfolio, (ii) provide information on how we analyze and assess credit risk in arriving at an adequate and appropriate ALLL, and (iii) explain the changes in the ALLL and reasons for those changes.

We report our loan portfolio in three segments: commercial, residential, and consumer. Loans are assigned to these segments based upon the type of borrower, purpose, collateral, and/or our underlying credit management processes. Additionally, within each segment, we have identified loan types, which further disaggregate loans based upon common risk characteristics.

Commercial

The C&I loan type includes loans to fund business operations or activities, corporate credit cards, loans secured by owner-occupied properties, and other wholesale lending activities. CRE and commercial construction loan types are based on investor exposures where repayment is largely dependent upon the operation, refinance, or sale of the underlying real estate. Commercial and construction loans secured by owner-occupied properties are classified as C&I loans, as the primary source of loan repayment for owner-occupied properties is business income and not real estate operations.

Residential

Residential mortgages consist of loans secured by 1-4 family homes, mostly prime first-lien loans, both government-guaranteed and nonguaranteed. Residential construction loans include owner-occupied residential lot loans and construction-to-perm loans. Home equity products consist of equity lines of credit and closed-end equity loans that may be in either a first lien or junior lien position. At June 30, 2014, 39% of our home equity products were in a first lien position and 61% were in a junior lien position. For home equity products in a junior lien position, we own or service 30% of the loans that are senior to the home equity product.

Only a small percentage of home equity lines are scheduled to end their draw period and convert to an amortizing term loan during 2014, with 94% of home equity line balances scheduled to convert to amortization in 2015 or later and 64% in 2017 or later. Based on historical trends, within 12 months of the end of their draw period, approximately 74% of all accounts, and approximately 61% of accounts with a balance, are closed or refinanced into an amortizing loan or a new line of credit. We perform credit management activities on home equity accounts to limit our loss exposure. These activities may result in the suspension of available credit and curtailment of available draws of most home equity junior lien accounts when the first lien position is delinquent, including when the junior lien is still

current. We monitor the delinquency status of first mortgages serviced by other parties. Additionally, we actively monitor refreshed credit bureau scores of borrowers with junior liens, as these scores are highly sensitive to first lien mortgage delinquency. At June 30, 2014 and December 31, 2013, our home equity junior lien loss severity was approximately 84% and 87%, respectively. The average borrower FICO score related to loans in

our home equity portfolio was approximately 760 and the average outstanding loan size was approximately \$48,000 at June 30, 2014 and December 31, 2013.

Consumer

The loan types comprising our consumer loan segment include government-guaranteed student loans, other direct loans (consisting primarily of direct auto loans, loans secured by negotiable collateral, unsecured loans and private student loans), indirect loans (consisting of loans secured by automobiles, boats, or recreational vehicles), and consumer credit cards.

The composition of our loan portfolio is shown in the following table:

Loan Portfolio by Types of Loans (Dollars in millions)	June 30, 2014	December 31, 2013	Table 6 % Change ³	
Commercial loans:				
C&I	\$61,337	\$57,974	6	%

LHFS ²	\$4,046	\$1,699	NM	

¹ Includes \$292 million and \$302 million of loans carried at fair value at June 30, 2014 and December 31, 2013, respectively.

² Includes \$1.4 billion of LHFS carried at fair value at both June 30, 2014 and December 31, 2013.

³ "NM" - Not meaningful. Those changes over 100 percent were not considered to be meaningful.

We believe that our loan portfolio is well diversified by product, client, and geography. However, our loan portfolio may be exposed to certain concentrations of credit risk which exist in relation to individual borrowers or groups of borrowers, certain types of collateral, certain industries, certain loan products, or certain regions of the country. See Note 5, "Loans," to the Consolidated Financial Statements in this Form 10-Q for more information.

The following table shows the percentage breakdown of our LHFI portfolio by geographic region:

Loan Types by Geography

Loans Held for Investment

LHFI were \$129.7 billion at June 30, 2014, an increase of 1% from December 31, 2013. We continued to make progress in our loan portfolio diversification strategy, as we were successful in both growing targeted commercial and consumer balances and in reducing our exposure to certain real estate secured loans. Additionally, we have been successful in growing commercial and consumer loans through our national banking delivery channels, which provides us additional geographic loan diversity. Average loans during the first six months of 2014 totaled \$129.6 billion. See the "Net Interest Income/Margin" section of this MD&A for more information regarding average loan balances. Overall economic indicators in our markets are improving, and organic loan production in C&I and other consumer loans has been solid.

Commercial loans increased \$4.2 billion, or 7%, during the first six months of 2014. Growth was primarily driven by C&I loans, encompassing a diverse array of large corporate and middle market borrowers, as well as growth in CRE loans. C&I loans increased \$3.4 billion, or 6%, from December 31, 2013, primarily driven by broad-based growth across the portfolio. The most notable increases were in the asset securitization and energy portfolios within our Wholesale Banking segment. CRE loans increased \$624 million, or 11%, from December 31, 2013, driven by the purchase of approximately \$594 million in loans from a third-party during the first half of 2014.

Residential loans decreased \$3.3 billion, or 8%, during the first six months of 2014, primarily driven by a \$2.8 billion, or 81%, decrease in government-guaranteed residential mortgages and a \$290 million, or 2%, decrease in home equity products. The decrease in government-guaranteed loans was primarily due to the transfer of \$2.1 billion of guaranteed mortgage loans to LHFS in the current quarter in anticipation of sale on a servicing retained basis in the third quarter of 2014. We currently plan to reinvest the proceeds from this sale into high-quality liquid securities in anticipation of forthcoming LCR requirements. Also, during the second quarter of 2014 we sold \$325 million of government guaranteed residential mortgages, which resulted in a \$19 million pre-tax gain, and sold \$149 million of accruing TDRs to further enhance our asset quality position.

Consumer loans increased \$968 million, or 5%, during the first six months of 2014, primarily driven by an \$846 million, or 30%, increase in other direct loans, which was largely related to high credit quality consumer loans through our LightStream online lending business, as well as other high credit quality home improvement loans. Indirect loans increased \$229 million, or 2%, during the first six months of 2014 due to modest growth in indirect auto loan originations.

Loans Held for Sale

LHFS increased \$2.3 billion from December 31, 2013 primarily due to the aforementioned transfer of guaranteed mortgage loans from LHFI.

Asset Quality

Our asset quality continued to trend favorably during the first six months of 2014, driven by overall improvements in the economy, improved residential housing markets, resolution of existing NPAs, and lower inflows of NPLs. This was driven by positive trends in our residential portfolios due to lower delinquencies and loss severities, and higher prices upon disposition of foreclosed assets.

During the first six months of 2014, NPLs decreased \$72 million, or 7%, largely driven by residential mortgage NPLs. Since their peak in 2009, total NPLs have decreased \$4.6 billion, or 84%. At June 30, 2014, the percentage of NPLs to total loans was 0.69%, down seven basis points compared to December 31, 2013. We expect further, but moderating, declines in NPLs during the second half of 2014, led by continuing improvements in residential mortgage portfolios. For the second quarter of 2014 and 2013, net charge-offs were \$113 million and \$179 million, respectively, a decrease of \$66 million, or 37%. Net charge-offs for the first six months of 2014 and 2013 were \$223 million and \$405 million, respectively, a decrease of \$182 million, or 45%. The decline in net charge-offs was driven by both commercial and residential loan categories. During the second quarter and first six months of 2014, the annualized net charge-off ratio declined to 0.35%, the lowest level in over six years, compared to 0.59% and 0.67% during the same periods in 2013, respectively. The financial impact of the aforementioned sale of \$149 million of accruing TDRs included \$10 million in net charge-offs in the second quarter of 2014. We expect net charge-offs in the residential portfolio to move modestly lower in the near-term; however, we do not expect further declines in commercial and consumer net charge-offs, which we believe are at or below normal levels. See Note 1, "Significant Accounting Policies," to the Consolidated Financial Statements in our 2013 Annual Report on Form 10-K for additional policy information related to charge-offs.

Total early stage delinquencies decreased to 0.63% of total loans at June 30, 2014, a decline of 11 basis points compared to December 31, 2013. Early stage delinquencies, excluding government-guaranteed loans, improved to 0.29% of total loans at June 30, 2014, compared to 0.36% at December 31, 2013. At June 30, 2014, all loan classes, except residential construction, showed improvement in early stage delinquencies compared to December 31, 2013. We expect that further moderating improvement in early stage delinquencies will be driven by residential loans.

ALLOWANCE FOR CREDIT LOSSES

The allowance for credit losses consists of both the ALLL and the reserve for unfunded commitments. A rollforward of our allowance for credit losses, along with our summarized credit loss experience is shown in the table below. See Note 1, "Significant Accounting Policies," to our 2013 Annual Report on Form 10-K, and Note 6, "Allowance for Credit Losses," to the Consolidated Financial Statements in this Form 10-Q, as well as the "Allowance for Credit Losses" section within "Critical Accounting Policies" in our 2013 Annual Report on Form 10-K for further information regarding our ALLL accounting policy, determination, and allocation.

Summary of Credit Losses Experience

Table 8

(Dollars in millions)	Three Months Ended June 30			Six Months Ended June 30

Period-end loans outstanding				129,744	122,031	6
Ratios:						
ALLL to period-end loans ^{2,3}				1.55	% 1.75	% (11)%
ALLL to NPLs ⁴				225	188	20
ALLL to net charge-offs (annualized)				4.41x	2.97x	48
Net charge-offs to average loans (annualized)	0.35	% 0.59	% (41)%	0.35	% 0.67	% (48)%

¹ The unfunded commitments reserve is recorded in other liabilities in the Consolidated Balance Sheets.

² \$292 million and \$339 million of LHFI carried at fair value at June 30, 2014 and 2013, respectively, were excluded from period-end loans in the calculation.

³ Excluding government-guaranteed loans of \$6.1 billion and \$9.1 billion, respectively, from period-end loans in the calculation results in ratios of 1.62% and 1.89%, respectively.

⁴ \$7 million and \$8 million of NPLs carried at fair value at June 30, 2014 and 2013, respectively, were excluded from NPLs in the calculation.

⁵ "NM" - not meaningful. Those changes over 100 percent were not considered to be meaningful.

Provision for Credit Losses

The total provision for credit losses includes the provision for loan losses, as well as the provision for unfunded commitments. The provision for loan losses is the result of a detailed analysis performed to estimate an appropriate and adequate ALLL. During the second quarter of 2014, the provision for loan losses decreased \$76 million, or 50%, compared to the second quarter of 2013. For the first six months of 2014, the provision for loan losses decreased \$174 million, or 49%, compared to the same period in 2013. The decline in the provision for loan losses was largely attributable to improvements in credit quality

trends, particularly in our residential and CRE portfolios, and lower net charge-offs during the first half of 2014 compared to 2013, partially offset by the effects of loan growth in the commercial and consumer loan portfolios as well as a valuation adjustment in the first quarter of 2014 related to aircraft that were leased under arrangements that qualified as capital leases. Capital leases are categorized as loans on the Consolidated Balance Sheets and, accordingly, an adjustment to the ALLL was recognized. Positive loan growth may offset the benefits of future asset quality improvements and result in smaller declines or potential increases in the ALLL when compared to prior periods; however, the ultimate level of reserves will be determined based on our rigorous quarterly review processes.

ALLL and Reserve for Unfunded Commitments

Allowance for Loan Losses by Loan Segment

(Dollars in millions)	June 30, 2014	Table 9	
		December 31, 2013

Commercial loans	53	% 50	%
Residential loans	31	34	
Consumer loans	16	16	
Total	100	% 100	%

The ALLL decreased \$41 million, or 2%, during the first six months of 2014, primarily driven by the improvements in credit conditions of the residential loan portfolio, and the sale of \$149 million of accruing residential mortgage TDRs, which resulted in a \$16 million decline in the allowance. The decrease was partially offset by the effects of loan growth in the commercial loan portfolio as well as the aforementioned leased asset reserves. At June 30, 2014, the ALLL to period-end loans ratio of 1.55% decreased five basis points compared to 1.60% at December 31, 2013. When excluding government-guaranteed loans, the ALLL to period-end loans ratio decreased 10 basis points from December 31, 2013 to 1.62% at June 30, 2014. The decline was due to modest asset quality improvements in 2014 and the aforementioned sale of restructured loans. The ratio of the ALLL to total NPLs was 225% at June 30, 2014, compared to 212% at December 31, 2013. The increase in this ratio was primarily attributable to the \$72 million decrease in NPLs. The appropriate ALLL level will continue to be determined by our detailed quarterly review process, which considers multiple credit quality indicators. See "Critical Accounting Policies," in our 2013 Annual Report on Form 10-K for additional information related to ALLL. Despite the steady improvement in certain credit quality metrics, the ALLL level is also impacted by leading indicators of credit risk associated with the portfolio. Factors that management considers when estimating the ALLL include: continued economic uncertainty and the strength of the economic recovery; sustainability in the housing recovery; and the increasing availability of credit and resultant higher levels of leverage for consumers and commercial borrowers.

NONPERFORMING ASSETS

The following table presents our NPAs:

(Dollars in millions)	June 30, 2014	December 31, 2013	Table 10 % Change ³

¹ Does not include foreclosed real estate related to loans insured by the FHA or the VA. Proceeds due from the FHA and the VA are recorded as a receivable in other assets until the funds are received and the property is conveyed. The receivable amount related to proceeds due from FHA or the VA totaled \$79 million and \$88 million at June 30, 2014 and December 31, 2013, respectively.

² Nonaccruing restructured loans are included in total nonaccrual/NPLs.

³ "NM" - Not meaningful. Those changes over 100 percent were not considered to be meaningful.

NPAs decreased \$124 million, or 11%, during the first six months of 2014. The decrease was primarily attributable to a \$72 million, or 7%, decrease in NPLs, and a \$34 million, or 20% decline in OREO. All nonaccrual loan classes declined except C&I, which increased slightly compared to December 31, 2013. Improved net charge-offs, foreclosures, and loan performance contributed to the decrease in NPLs. At June 30, 2014, our ratio of NPLs to total loans was 0.69%, down from 0.76% at December 31, 2013 as a result of the decline in NPLs and the increase in total loans. We expect further, but moderating, declines in NPLs during the remainder of 2014, led by continuing improvements in residential loans.

Real estate related loans comprise a significant portion of our overall NPAs as a result of the devaluation of U.S. housing during the past economic recession. The amount of time necessary to obtain control of residential real estate collateral in certain states, primarily Florida, has remained elevated due to delays in the foreclosure process. These delays may continue to impact the resolution of real estate related loans within the NPA portfolio.

Nonaccrual loans, loans over 90 days past due and still accruing, and TDR loans, are problem loans or loans with potential weaknesses that are disclosed in the NPA table above. Loans with known potential credit problems that may not otherwise be disclosed in this table include accruing criticized commercial loans, which are disclosed along with additional credit quality information in Note 5, "Loans," to the Consolidated Financial Statements in this Form 10-Q. At June 30, 2014 and December 31, 2013, there were no known significant potential problem loans that are not otherwise disclosed.

Nonperforming Loans

Total nonperforming commercial loans were unchanged from December 31, 2013. The slight increase in C&I NPLs of \$3 million, or 2% was offset by a decrease in CRE and commercial construction loans.

Nonperforming residential loans were the largest driver of the overall decline in NPLs, decreasing \$70 million, or 10%, during the first six months of 2014. The reduction in nonguaranteed residential mortgage NPLs and residential construction NPLs accounted for \$36 million and \$15 million, respectively, of this decrease, and was primarily the result of net charge-offs and foreclosures, as well as pay-offs and improved loan performance.

Interest income on consumer and residential nonaccrual loans, if recognized, is recognized on a cash basis. Interest income on commercial nonaccrual loans is not generally recognized until after the principal has been reduced to zero. We recognized \$6 million and \$9 million of interest income related to nonaccrual loans during the second quarter of 2014 and 2013, respectively, and \$11 million and \$20 million during the first six months of 2014 and 2013, respectively. If all such loans had been accruing interest according to their original contractual terms, estimated interest income of \$12 million and \$20 million during the second quarter of 2014 and 2013, respectively, and \$25 million and \$43 million during the first six months of 2014 and 2013, respectively, would have been recognized.

Other Nonperforming Assets

OREO decreased \$34 million, or 20%, during the first six months of 2014 as a result of net decreases of \$15 million in residential homes, \$11 million in commercial properties, and \$8 million in residential construction related properties. Sales of OREO resulted in proceeds of \$122 million and \$205 million during the first six months of 2014 and 2013, respectively, contributing to net gains on sales of OREO of \$23 million and \$41 million, respectively, inclusive of valuation reserves.

We would not expect net gains from the sale of OREO experienced during 2013 to continue at the same level during the remainder of 2014. Gains and losses on the sale of OREO are recorded in other noninterest expense in the Consolidated Statements of Income. Sales of OREO and the related gains or losses are highly dependent on our disposition strategy and buyer opportunities. See Note 14, "Fair Value Election and Measurement," to the Consolidated Financial Statements in this Form 10-Q for additional information.

Geographically, most of our OREO properties are located in Florida, Georgia, and North Carolina. Residential and commercial properties comprised 75% and 16%, respectively, of OREO at June 30, 2014; the remainder is related to land and other properties. Upon foreclosure, the values of these properties were reevaluated and, if necessary, written down to their then-current estimated value less estimated costs to sell. Any further decreases in values could result in additional losses on these properties as we periodically revalue them as further discussed in Note 14, "Fair Value Election and Measurement," to the Consolidated Financial Statements in this Form 10-Q. We are actively managing and disposing of these foreclosed assets to minimize future losses.

At June 30, 2014 and December 31, 2013, total accruing loans past due ninety days or more included LHFI and LHFS and totaled \$1.0 billion and \$1.2 billion, respectively, 97% and 96% of which were government guaranteed at June 30, 2014 and December 31, 2013, respectively. Accruing LHFI past due ninety days or more decreased by \$183 million, or 15%, during the first six months of 2014, primarily driven by residential mortgages and student loans that are guaranteed by a federal agency.

Restructured Loans

To maximize the collection of loan balances, we evaluate troubled loans on a case-by-case basis to determine if a loan modification would be appropriate. We pursue loan modifications when there is a reasonable chance that an appropriate modification would allow our client to continue servicing the debt. For loans secured by residential real estate, if the client demonstrates a loss of income such that the client cannot reasonably support a modified loan, we may pursue short sales and/or deed-in-lieu arrangements. For loans secured by income producing commercial properties, we perform an in-depth and ongoing programmatic review. We review a number of factors, including cash flows, loan structures, collateral values, and guarantees to identify loans within our income producing commercial loan portfolio that are most likely to experience distress. Based on our review of these factors and our assessment of overall risk, we evaluate the benefits of proactively initiating discussions with our clients to improve a loan's risk profile. In some cases, we may renegotiate terms of their loans so that they have a higher likelihood of continuing to perform. To date, we have restructured loans in a variety of ways to help our clients service their debt and to mitigate the potential for additional losses. The primary restructuring methods being offered to our residential clients are reductions in interest rates and extensions of terms. For commercial loans, the primary restructuring method is the extension of terms.

Loans with modifications deemed to be economic concessions resulting from borrower financial difficulties are reported as TDRs. Accruing loans may retain accruing status at the time of restructure and the status is determined by, among other things, the nature of the restructure, the borrower's repayment history, and the borrower's repayment capacity. Nonaccruing loans that are modified and demonstrate a sustainable history of repayment performance, typically six months, in accordance with their modified terms are generally reclassified to accruing TDR status. Generally, once a residential loan becomes a TDR, we expect that the loan will continue to be reported as a TDR for its remaining life even after returning to accruing status unless the modified rates and terms at the time of modification were available in the market at the time of the modification. We note that some restructurings may not ultimately result in the complete collection of principal and interest (as modified by the terms of the restructuring), culminating in default, which could result in additional incremental losses. These potential incremental losses have been factored into our overall ALLL estimate through the use of loss forecasting methodologies. The level of re-defaults will likely be affected by future economic conditions. At June 30, 2014 and December 31, 2013, specific reserves included in the ALLL for residential TDRs were \$349 million and \$345 million, respectively. See Note 5, "Loans," to the Consolidated Financial Statements in this Form 10-Q for more information.

STM cooperated with the United States Attorney's Office for the Western District of Virginia and the Office of the Special Inspector General for the Troubled Asset Relief Program (collectively, the "Western District") in their investigation of STM's administration of HAMP. On July 3, 2014, the parties reached an agreement to settle the claims at issue in the investigation. STM's commitment under the agreement includes an expected \$179 million in consumer remediation (up to a maximum of \$274 million), \$20 million to fund housing counseling for homeowners, \$10 million paid toward restitution to Fannie Mae and Freddie Mac, and a cash payment of \$16 million to the U.S. Treasury. The financial statements at June 30, 2014 included a \$204 million pre-tax charge related to the estimated cost of the anticipated requirements of fulfilling these commitments.

Separately, we have committed to provide \$500 million in consumer relief pursuant to the National Mortgage Servicing Settlement agreement with certain parties. An expansion in the number and type of restructuring methods for consumer clients, including principal forgiveness, is being implemented as a result of these consumer relief commitments. Additionally, certain modification methods under consideration could be deemed to be economic concessions and result in additional modified loans being reported as TDRs. Our financial statements at June 30, 2014 reflect our estimated cost of the anticipated requirements of fulfilling our commitments. We do not expect the consumer relief efforts or implementation of certain servicing standards associated with the settlements to have a material impact on our future financial results. However, we face the risk of being unable to meet certain consumer relief commitments, resulting in increased costs to resolve this matter.

See additional discussion related to HAMP and the Mortgage Servicing Settlement in Note 15, "Contingencies," to the Consolidated Financial Statements in this Form 10-Q.

The following tables display our residential real estate TDR portfolio by modification type and payment status. Guaranteed loans that have been repurchased from Ginnie Mae under an early buyout clause and subsequently modified have been excluded from the table. Such loans totaled approximately \$54 million at June 30, 2014 and December 31, 2013.

Selected Residential TDR Data

Table 11

(Dollars in millions)	June 30, 2014			Nonaccruing TDRs		
	Accruing TDRs			Current	Delinquent ¹	Total

Rate reduction and term extension	1,439	135	1,574	27	127	154
Other ²	180	13	193	16	54	70
Total	\$2,328	\$242	\$2,570	\$71	\$237	\$308

¹ TDRs considered delinquent for purposes of this table were those at least thirty days past due.

² Primarily consists of extensions and deficiency notes.

At June 30, 2014, our total TDR portfolio was \$3.0 billion and was composed of \$2.7 billion, or 91%, of residential loans (predominantly first and second lien residential mortgages and home equity lines of credit), \$138 million, or 5%, of commercial loans (predominantly income-producing properties), and \$121 million, or 4%, of consumer loans. Total TDRs decreased \$158 million from December 31, 2013, primarily driven by the sale of \$149 million of residential mortgage TDRs in the second quarter of 2014. Accruing TDRs decreased \$132 million, or 5%, and nonaccruing TDRs decreased \$26 million, or 7%.

Generally, interest income on restructured loans that have met sustained performance criteria and have been returned to accruing status is recognized according to the terms of the restructuring. Such recognized interest income was \$31 million and \$30 million during the second quarter of 2014 and 2013, respectively, and \$63 million and \$56 million for the first six months of 2014 and 2013, respectively. If all such loans had been accruing interest according to their original contractual terms, estimated interest income of \$39 million and \$40 million during the second quarter of 2014 and 2013, respectively, and \$81 million and \$76 million for the first six months of 2014 and 2013, respectively, would have been recognized.

SELECTED FINANCIAL INSTRUMENTS CARRIED AT FAIR VALUE

The following is a discussion of the more significant financial assets and financial liabilities that are currently carried at fair value on the Consolidated Balance Sheets at June 30, 2014 and December 31, 2013. For a complete discussion of our financial instruments carried at fair value and the methodologies used to estimate the fair values of our financial instruments, see Note 14, "Fair Value Election and Measurement," to the Consolidated Financial Statements in this Form 10-Q.

Trading Assets and Liabilities and Derivatives

² Includes loans related to TRS.

Trading Assets and Liabilities and Derivatives

Trading assets and derivatives increased \$101 million, or 2%, compared to December 31, 2013, as a result of normal changes in the trading portfolio product mix, primarily due to increases in corporate and other debt securities, agency MBS, and CP. The increase was partially offset by decreases primarily related to trading loans and CDO/CLO securities due to the sale of investments during 2014. Trading liabilities and derivatives increased \$9 million, or 1%, compared to December 31, 2013 as increases in corporate and other debt securities and U.S. Treasury securities were partially offset by a decrease in net derivatives as a result of normal business activity. See Note 12, "Derivative Financial Instruments," to the Consolidated Financial Statements in this Form 10-Q for additional information on derivatives.

Securities Available for Sale

Table 13

(Dollars in millions)	June 30, 2014			Fair Value

¹ At December 31, 2013, other equity securities included the following: \$336 million in FHLB of Atlanta stock, \$402 million in Federal Reserve Bank stock, \$103 million in mutual fund investments, and \$1 million of other.

Securities Available for Sale

The securities AFS portfolio is managed as part of our overall liquidity management and ALM process to optimize income and portfolio value over an entire interest rate cycle while mitigating the associated risks. Changes in the size and composition of the portfolio during the first six months of 2014 reflect our efforts to maintain a high quality liquid portfolio while managing our interest rate risk profile. The amortized cost of the portfolio increased \$1.0 billion during the first six months of 2014, primarily due to increased holdings of agency MBS and U.S. Treasury securities. Additionally, our holdings of ABS and private MBS declined due to maturities and payouts. The fair value of the portfolio increased \$1.5 billion due to portfolio growth and a \$449 million increase in market value due to a decline in market interest rates.

During the six months ended June 30, 2014, we recorded \$2 million in net realized losses related to the sale of securities AFS, compared to net realized gains of \$2 million during the six months ended June 30, 2013, including \$1 million in OTTI recognized in earnings for both periods. For additional information on composition and valuation assumptions related to securities AFS, see Note 4, "Securities Available for Sale," and the "Trading Assets and Derivatives and Securities Available for Sale" section of Note 14, "Fair Value Election and Measurement," to the Consolidated Financial Statements in this Form 10-Q.

For the second quarter of 2014, the average yield, on a FTE basis, for the securities AFS portfolio was 2.61%, compared to 2.49% for the second quarter of 2013. For the six months ended June 30, 2014, the average yield on a FTE basis for the securities AFS portfolio was 2.66%, compared with 2.53% for the six months ended June 30, 2013.

The reduction of MBS premium amortization associated with lower cash flow due to higher mortgage interest rates drove the increase in yield on securities AFS.

Our total investment securities portfolio had an effective duration of 4.1 years at June 30, 2014 compared to 4.7 years at December 31, 2013. The decrease in the effective duration is the result of faster prepayment assumptions associated with

107

lower mortgage rates compared to year-end. Effective duration is a measure of price sensitivity of a bond portfolio to an immediate change in market interest rates, taking into consideration embedded options. An effective duration of 4.1 years suggests an expected price change of 4.1% for a one percent instantaneous change in market interest rates. The credit quality and liquidity profile of the securities portfolio remained strong at June 30, 2014, and consequently, we have the flexibility to respond to changes in the economic environment and take actions as opportunities arise to manage our interest rate risk profile and balance liquidity against investment returns. Over the longer term, the size and composition of the investment portfolio will reflect balance sheet trends, our overall liquidity, and interest rate risk management objectives. Accordingly, the size and composition of the investment portfolio could change meaningfully over time. Additionally, we transferred \$2.1 billion of government guaranteed residential mortgages, which yield approximately 3.25%, to LHFS in the second quarter, in anticipation of sale on a servicing retained basis in the third quarter of 2014. We currently plan on reinvesting the proceeds of this anticipated third quarter sale into high-quality liquid securities that yield approximately 3.20%, and are expected to qualify as high-quality liquid assets under the forthcoming LCR requirements.

Federal Home Loan Bank and Federal Reserve Bank Stock

We hold capital stock in the FHLB of Atlanta and in the Federal Reserve Bank. In order to be an FHLB member, we are required to purchase capital stock in the FHLB. In exchange, members take advantage of competitively priced advances as a wholesale funding source and access grants and low-cost loans for affordable housing and community-development projects, amongst other benefits. At June 30, 2014, we held a total of \$376 million of capital stock in the FHLB, an increase of \$40 million compared to December 31, 2013. During the three and six months ended June 30, 2014, we recognized dividends related to FHLB capital stock of \$3 million and \$6 million, respectively, compared to \$1 million and \$3 million during the three and six months ended June 30, 2013, respectively. In order to become a member of the Federal Reserve System, regulations require that we hold a certain amount of capital stock as either a percentage of the Bank's capital or as a percentage of total deposit liabilities. At June 30, 2014, we held \$402 million of Federal Reserve Bank stock, unchanged from December 31, 2013. During the three and six months ended June 30, 2014 and 2013, we recognized dividends related to Federal Reserve Bank stock of \$6 million and \$12 million, respectively.

BORROWINGS

Short-Term Borrowings

	June 30, 2014		Three Months Ended June 30, 2014			Six Months Ended June 30, 2014			Table 14

-----------------------------	-------	------	-------	------	-------	-------	------	-------

¹ Funds purchased and securities sold under agreements to repurchase mature overnight or at a fixed maturity generally not exceeding three months. Rates on overnight funds reflect current market rates. Rates on fixed maturity borrowings are set at the time of the borrowings.

Short-Term Borrowings

Our total period-end short-term borrowings increased \$1.0 billion, or 12%, from June 30, 2013, due to a \$633 million increase in funds purchased and a \$323 million increase in securities sold under agreements to repurchase.

During the three months ended June 30, 2014, our total daily average short-term borrowings increased \$811 million, or 10%, compared to the three months ended June 30, 2013. The increase was primarily driven by increases in daily average balances

for other short-term borrowings of \$374 million and securities sold under agreements to repurchase of \$269 million due to ordinary balance sheet management practices. The increase in daily average balances of other short-term borrowings was largely due to a \$265 million increase in daily average balances for FHLB advances. During the six months ended June 30, 2014, our total daily average short-term borrowings increased \$1.7 billion, or 24%, compared to the six months ended June 30, 2013. The increase was predominantly driven by the same factors as discussed above for the second quarter.

Our daily average balances for all short-term borrowings during the three and six months ended June 30, 2014 were lower than our period-end balances due to fluctuations resulting from normal balance sheet management practices. For the three and six months ended June 30, 2014, our maximum monthly outstanding balances for other short-term borrowings was higher than our period-end balance as a result of increased short term FHLB borrowing during the second quarter of 2014. For the six months ended June 30, 2014, our maximum monthly outstanding balance for funds purchased was higher than our period-end balance as a result of increased activity in funds purchased during the second quarter of 2014.

Long-Term Debt

During the six months ended June 30, 2014, our long-term debt increased \$2.5 billion, or 23%. The increase was due to the addition of a \$1.0 billion long-term FHLB advance during the second quarter of 2014 and our senior note issuances totaling \$1.5 billion during the first half of 2014. Specifically, during the first quarter we issued \$250 million of 3-year floating rate senior notes and \$600 million of 3-year fixed rate senior notes under our Global Bank Note program. Additionally, during the second quarter of 2014, we issued \$650 million of 5-year fixed rate senior notes that pay a fixed annual coupon rate of 2.50%. We may call these notes beginning on April 1, 2019, and they will mature on May 1, 2019. These issuances allowed us to add to our funding sources at relatively low long-term borrowing rates.

Average long-term debt for the six months ended June 30, 2014 increased \$2.2 billion, or 23%, compared to the average for the six months ended June 30, 2013. The increase was predominantly driven by the same factors as discussed above related to senior note issuances and FHLB advance addition. There have been no other material changes in our long-term debt, as described in our 2013 Annual Report on Form 10-K, since December 31, 2013.

CAPITAL RESOURCES

Our primary federal regulator, the Federal Reserve, measures capital adequacy within a framework that makes capital requirements relative to the risk profiles of individual banking companies. The guidelines risk weight assets and off-balance sheet risk exposures according to predefined classifications, creating a base from which to compare capital levels. Tier 1 capital primarily includes realized equity and qualified preferred instruments, less purchase accounting intangibles such as goodwill and core deposit intangibles, and certain other regulatory deductions. Total capital consists of Tier 1 capital and Tier 2 capital, which includes qualifying portions of subordinated debt, ALLL up to a maximum of 1.25% of RWA, and 45% of the unrealized gain on equity securities. Additionally, mark-to-market adjustments related to our estimated credit spreads for debt and index linked CDs accounted for at fair value are excluded from regulatory capital.

Both the Company and the Bank are subject to minimum Tier 1 capital and Total capital ratios of 4% and 8%, respectively. To be considered “well-capitalized,” ratios of 6% and 10%, respectively, are required. Additionally, the Company and the Bank are subject to requirements for the Tier 1 leverage ratio, which measures Tier 1 capital against average total assets less certain deductions, as calculated in accordance with regulatory guidelines. The minimum and well-capitalized leverage ratios are 3% and 5%, respectively.

The concept of Tier 1 common equity, the portion of Tier 1 capital that is considered common equity, was first introduced in the 2009 SCAP, and represents the portion of Tier 1 capital that is attributable to common shareholders. Our primary regulator, rather than U.S. GAAP, defines Tier 1 common equity and the Tier 1 common equity ratio. As a result, our calculation of these measures may differ from those of other financial services companies that calculate them. However, Tier 1 common equity and the Tier 1 common equity ratio continue to be important factors which

regulators examine in evaluating financial institutions; therefore, we present these measures to allow for evaluations of our capital. Further, on October 11, 2013, the Federal Reserve published final rules in the Federal Register related to required minimum capital ratios that become effective for us on January 1, 2015. See further discussion below under "Basel III."

Regulatory Capital Ratios (Dollars in millions)	June 30, 2014	December 31, 2013
Tier 1 capital	\$16,614	\$16,073
Total capital	19,537	19,052
RWA	155,875	148,746
Average total assets for leverage ratio	173,815	167,848
Tier 1 common equity:		
Tier 1 capital	\$16,614	\$16,073
Less:		
Qualifying trust preferred securities	627	627
Preferred stock	725	725
Allowable minority interest	107	119
Tier 1 common equity	\$15,155	\$14,602
Risk-based ratios:		
Tier 1 common equity ¹	9.72	% 9.82
Tier 1 capital	10.66	10.81
Total capital	12.53	12.81
Tier 1 leverage ratio	9.56	9.58
Total shareholders' equity to assets	12.12	12.22

¹ At June 30, 2014 our Basel III CET 1 ratio as calculated under the final Basel III capital rules was estimated to be 9.7%. See the "Selected Quarterly Financial Data and Reconciliation of Non-U.S. GAAP Measures" section in this MD&A for a reconciliation of the current Basel I ratio to the estimated Basel III ratio.

At June 30, 2014, our capital ratios were well above current regulatory requirements. Tier 1 capital ratios decreased slightly during 2014 driven by an increase in our RWA from December 31, 2013, primarily the result of loan growth and an increase in off-balance sheet unused lending commitments, partially offset by an increase in retained earnings. During the six months ended June 30, 2014, we declared and paid common dividends totaling \$160 million, or \$0.30 per common share, compared with \$81 million, or \$0.15 per common share during the six months ended June 30, 2013. Additionally, we declared and paid \$19 million and \$18 million of preferred dividends during the six months ended June 30, 2014 and 2013, respectively.

Substantially all of our retained earnings are undistributed earnings of the Bank, which are restricted by various regulations administered by federal and state bank regulatory authorities. At June 30, 2014 and December 31, 2013, retained earnings of the Bank available for payment of cash dividends to the Parent Company under these regulations totaled approximately \$2.3 billion and \$2.6 billion, respectively.

During the first quarter of 2014, we announced capital plans upon completion of the Federal Reserve's review of and non-objection to our capital plan in conjunction with the 2014 CCAR. Our capital plans include repurchase of common stock, an increase in the common stock dividend, and maintaining the current level of preferred stock dividends. Specifically, the Board has approved the repurchase of up to \$450 million of our outstanding common stock between the second quarter of 2014 and the first quarter of 2015, as well as an increase of the quarterly common stock dividend to \$0.20 per common share, which reflects an increase from \$0.10 per common share. During the second quarter, we declared and paid a \$0.20 common stock dividend and began repurchasing common shares outstanding under the 2014 capital plan. During the first quarter of 2014, we repurchased \$50 million of our outstanding common stock, which completed our authorized share repurchases in conjunction with the 2013 capital plan. During the second quarter we repurchased \$83 million of our outstanding common stock in conjunction with the 2014 capital plan.

During the second quarter, the Federal Reserve issued new industry guidance that limits a bank holding company's ability to make capital distributions to the extent that its actual capital issuances, including employee share-based compensation, are less than the amount indicated in its submitted capital plan. Given this new guidance and our

forecast for employee-related share-based compensation, our planned share repurchases through the first quarter of 2015 will be approximately \$50 million lower than the \$450 million maximum in our 2014 capital plan. The drivers of the lower than planned capital issuance include a valuation adjustment to our noncontrolling interest in RidgeWorth and changes in employee option exercises relative to forecast. The net share dilution impact from this change is immaterial.

Basel III

The Dodd-Frank Act will impact the composition of our capital elements in at least two ways over the next several years. First, the Dodd-Frank Act authorizes the Federal Reserve to enact “prudential” capital requirements which require greater capital levels than presently required and which vary among financial institutions based on size, risk, complexity, and other factors. As expected, the Federal Reserve used this authority by publishing final rules on October 11, 2013. The rules require banking organizations such as us to meet revised minimum regulatory capital ratios beginning on January 1, 2015, and begin the transition period for the revised definitions of regulatory capital and the revised regulatory capital adjustments and deductions, as well as comply with the standardized approach for determining RWAs. Second, a portion of the Dodd-Frank Act, sometimes referred to as the Collins Amendment, directs the Federal Reserve to adopt new capital requirements for certain bank holding companies, including us, which are at least as stringent as those applicable to insured depository institutions. Furthermore, beginning January 1, 2016, these rules introduce a capital conservation buffer, which places restrictions on the amount of retained earnings that may be used for distributions or discretionary bonus payments as risk-based capital ratios approach their respective “adequately capitalized” minimums.

Under the final rules, the minimum capital requirements will be a CET 1 ratio of 4.5%; Tier 1 Capital ratio of 6%; Total Capital ratio of 8%; and U.S. Leverage ratio of 4%. The rules include a capital conservation buffer of 2.5% of RWA that is effectively layered on top of the minimum capital risk-based ratios. At June 30, 2014, we believe each of our regulatory capital ratios exceeds their respective minimum capital ratio requirements under the final rules, as well as the 2.5% capital conservation buffer, when measured on a fully-phased-in basis.

Furthermore, the final Basel III capital rules require the phase out of non-qualifying Tier 1 Capital instruments such as trust preferred securities. As such, over a two year period beginning on January 1, 2015, approximately \$627 million in principal amount of Parent Company trust preferred and other hybrid capital securities currently outstanding will no longer qualify for Tier 1 capital treatment, but instead will only qualify for Tier 2 capital treatment. Accordingly, we anticipate that, by January 1, 2016, all \$627 million of our outstanding trust preferred securities will lose Tier 1 capital treatment, and will be reclassified as Tier 2 capital. We do not expect any impact to our total capital ratio as a result of this reclassification.

CRITICAL ACCOUNTING POLICIES

There have been no significant changes to our Critical Accounting Policies as described in our 2013 Annual Report on Form 10-K.

ENTERPRISE RISK MANAGEMENT

There have been no significant changes in our Enterprise Risk Management practices as described in our 2013 Annual Report on Form 10-K.

Credit Risk Management

There have been no significant changes in our Credit Risk Management practices as described in our 2013 Annual Report on Form 10-K.

Operational Risk Management

There have been no significant changes in our Operational Risk Management practices as described in our 2013 Annual Report on Form 10-K.

Market Risk Management

Market risk refers to potential losses arising from changes in interest rates, foreign exchange rates, equity prices, commodity prices, and other relevant market rates or prices. Interest rate risk, defined as the exposure of net interest income and MVE to adverse movements in interest rates, is our primary market risk and mainly arises from the structure of our balance sheet, which includes all loans. Variable rate loans, prior to any hedging related actions, are

approximately 58% of total loans and after giving consideration to hedging related actions, are approximately 44% of total loans. We are also exposed to market risk in our trading instruments carried at fair value. ALCO meets regularly and is responsible for reviewing our open positions and establishing policies to monitor and limit exposure to market risk.

111

Market Risk from Non-Trading Activities

The primary goal of interest rate risk management is to control exposure to interest rate risk, within policy limits approved by the Board. These limits and guidelines reflect our tolerance for interest rate risk over both short-term and long-term horizons. No limit breaches occurred during the first six months of 2014.

The major sources of our non-trading interest rate risk are timing differences in the maturity and repricing characteristics of assets and liabilities, changes in the shape of the yield curve, and the potential exercise of explicit or embedded options. We measure these risks and their impact by identifying and quantifying exposures through the use of sophisticated simulation and valuation models, which, as described in additional detail below, are employed by management to understand net interest income at risk and MVE at risk. These measures show that our interest rate risk profile is modestly asset sensitive at June 30, 2014.

MVE and net interest income sensitivity are complementary interest rate risk metrics and should be viewed together. Net interest income sensitivity captures asset and liability repricing mismatches for the first year inclusive of forecast balance sheet changes and is considered a shorter term measure, while MVE sensitivity captures mismatches within the period end balance sheets through the financial instruments' respective maturities and is considered a longer term measure.

A positive net interest income sensitivity in a rising rate environment indicates that over the forecast horizon of one year, asset based income will increase more quickly than liability based expense due to balance sheet composition. A negative MVE sensitivity in a rising rate environment indicates that the value of financial assets will decrease more than the value of financial liabilities.

One of the primary methods that we use to quantify and manage interest rate risk is simulation analysis, which we use to model net interest income from assets, liabilities, and derivative positions under various interest rate scenarios and balance sheet structures. This analysis measures the sensitivity of net interest income over a two year time horizon, which differs from the interest rate sensitivities in Table 16, which are prescribed to be over a one year time horizon. Key assumptions in the simulation analysis (and in the valuation analysis discussed below) relate to the behavior of interest rates and spreads, the changes in product balances, and the behavior of loan and deposit clients in different rate environments. This analysis incorporates several assumptions, the most material of which relate to the repricing characteristics and balance fluctuations of deposits with indeterminate or non-contractual maturities.

As the future path of interest rates cannot be known, we use simulation analysis to project net interest income under various scenarios including implied forward and deliberately extreme and perhaps unlikely scenarios. The analyses may include rapid and gradual ramping of interest rates, rate shocks, basis risk analysis, and yield curve twists.

Specific strategies are also analyzed to determine their impact on net interest income levels and sensitivities.

The sensitivity analysis included below is measured as a percentage change in net interest income due to instantaneous moves in benchmark interest rates. Estimated changes set forth below are dependent upon material assumptions such as those previously discussed.

Net Interest Income Asset Sensitivity

Table 16

(Basis points) Rate Change	Estimated % Change in Net Interest Income Over 12 Months ¹	
	June 30, 2014	December 31, 2013
+200	6.2%	1.8%
+100	3.2%	1.0%
-25	(0.6)%	(0.8)%

¹ Estimated % change of net interest income is reflected on a non-FTE basis.

The increase in net interest income asset sensitivity compared to December 31, 2013 is due to changes in balance sheet composition, particularly swap maturities and increased client deposits, which are expected to be accretive to net interest income in a rising rate environment. See additional discussion related to net interest income in the "Net Interest Income/Margin" section of this MD&A.

We also perform valuation analysis, which we use for discerning levels of risk present in the balance sheet and derivative positions that might not be taken into account in the net interest income simulation horizon. Whereas net interest income simulation highlights exposures over a relatively short time horizon, valuation analysis incorporates all cash flows over the estimated remaining life of all balance sheet and derivative positions. The valuation of the balance sheet, at a point in time, is defined as the discounted present value of asset cash flows and derivative cash flows minus the discounted present value

of liability cash flows, the net of which is referred to as MVE. The sensitivity of MVE to changes in the level of interest rates is a measure of the longer-term repricing risk and options risk embedded in the balance sheet. Similar to the net interest income simulation, MVE uses instantaneous changes in rates. However, MVE values only the current balance sheet and does not incorporate the growth assumptions that are used in the net interest income simulation model. As with the net interest income simulation model, assumptions about the timing and variability of balance sheet cash flows are critical in the MVE analysis. Particularly important are the assumptions driving prepayments and the expected changes in balances and pricing of the indeterminate deposit portfolios. At June 30, 2014, the MVE profile indicates a decline in net balance sheet value due to instantaneous upward changes in rates. MVE sensitivity is reported in both upward and downward rate shocks.

Market Value of Equity Sensitivity

Table 17

(Basis points) Rate Change	Estimated % Change in MVE	
	June 30, 2014	December 31, 2013
+200	(5.1)%	(8.0)%
+100	(2.1)%	(3.8)%
-25	0.2%	0.8%

The decrease in MVE sensitivity from December 31, 2013 is primarily due to an aging of interest rate swaps, fixed rate debt issuances, faster mortgage prepayments, and the annual assumption review of indeterminate maturity deposits. While an instantaneous and severe shift in interest rates was used in this analysis to provide an estimate of exposure under an extremely adverse scenario, we believe that a gradual shift in interest rates would have a much more modest impact. Since MVE measures the discounted present value of cash flows over the estimated lives of instruments, the change in MVE does not directly correlate to the degree that earnings would be impacted over a shorter time horizon (i.e., the current year). Further, MVE does not take into account factors such as future balance sheet growth, changes in product mix, changes in yield curve relationships, and changing product spreads that could mitigate the adverse impact of changes in interest rates. The net interest income simulation and valuation analyses do not include actions that management may undertake to manage this risk in response to anticipated changes in interest rates.

Market Risk from Trading Activities

Under established policies and procedures, we manage market risk associated with trading activities using a VAR approach that takes into account exposures resulting from interest rate risk, equity risk, foreign exchange risk, credit spread risk, and commodity risk. For trading portfolios, VAR measures the estimated maximum loss from a trading position, given a specified confidence level and time horizon. VAR results are monitored daily for each trading portfolio against established limits. For risk management purposes, our VAR calculation is based on a historical simulation and measures the potential trading losses using a one-day holding period at a one-tail, 99% confidence level. This means that, on average, trading losses are expected to exceed VAR one out of 100 trading days or two to three times per year. While VAR can be a useful risk management tool, it does have inherent limitations including the assumption that past market behavior is indicative of future market performance. As such, VAR is only one of several tools used to manage trading risk. Other tools used to actively manage trading risk include scenario analysis, stress testing, profit and loss attribution, and stop loss limits.

In addition to VAR, in accordance with the 2013 Market Risk Rule, we also calculate Stressed VAR, which is used as a component of the total market risk-based capital charge. We calculate the Stressed VAR risk measure using a ten-day holding period at a one-tail, 99% confidence level and employ a historical simulation approach based on a continuous twelve-month historical window that reflects a period of significant financial stress to our portfolio. As such, our Stressed VAR calculation uses the same methodology and models as regular VAR, which is a requirement under the Market Risk Rule.

The following table presents VAR and Stressed VAR for the three and six months ended June 30, as well as VAR by Risk Factor at June 30, 2014 and December 31, 2013:

Value at Risk Profile

Table 18

(Dollars in millions)	Three Months Ended June 30		Six Months Ended June 30	
	2014	2013	2014	2013
VAR (1-day holding period)				
Ending	\$2	\$5	\$2	\$5
High	3	8	3	8
Low	2	3	2	3
Average	2	4	2	5
Stressed VAR (10-day holding period)				
Ending	\$37	\$31	\$37	\$31
High	75	92	75	92
Low	22	25	18	12
Average	36	35	29	29
(Dollars in millions)			June 30, 2014	December 31, 2013
VAR by Risk Factor (1-day holding period)				
Commodity price risk			\$—	\$—
Equity price risk			1	2
Foreign exchange risk			—	—
Interest rate risk			1	2
Credit spread risk			2	2
VAR (1-day diversified) total			2	3

The trading portfolio, measured in terms of VAR, is predominantly comprised of four material sub-portfolios of covered positions: Credit Trading, Fixed Income Securities, Interest Rate Derivatives, and Equity Derivatives. While there were no material changes in composition of the trading portfolio during the first six months of 2014, risk reducing activities, primarily in our equity derivatives and fixed income business during the latter half of 2013 continued into the first quarter of 2014 and resulted in lower VAR at June 30, 2014 compared to June 30, 2013. The trading portfolio of covered positions did not contain any correlation trading positions or on- or off-balance sheet securitization positions during the first six months of 2014.

In accordance with the Market Risk Rule, we evaluate the accuracy of our VAR model through daily backtesting by comparing daily trading gains and losses (excluding fees, commissions, reserves, net interest income, and intraday trading) with the corresponding daily VAR-based measures. As illustrated below for the twelve months ended June 30, 2014, there were no instances where trading losses exceeded firmwide VAR.

We have valuation policies, procedures, and methodologies for all covered positions. Additionally, reporting of trading positions is in accordance with U.S. GAAP and is subject to independent price verification. See Note 12, "Derivative Financial Instruments" and Note 14, "Fair Value Election and Measurement" to the Consolidated Financial Statements in this Form 10-Q, as well as the "Critical Accounting Policies" section in our 2013 Annual Report on Form 10-K for discussion of valuation policies, procedures, and methodologies.

Model risk management: Our model risk management approach for validating and evaluating the accuracy of internal and vended models and associated processes includes developmental and implementation testing and on-going monitoring and maintenance performed by the various model owners. Our MRMG regularly performs independent model validations for the VAR and stressed VAR models. The validations include evaluation of all model-owner authored documentation and model-owner developed monitoring and maintenance plans and reports. In addition, the MRMG performs its own testing. Due to ongoing developments in financial markets, evolution in modeling approaches, and for purposes of model enhancement, we assess all VAR models regularly through the monitoring and maintenance process.

Stress testing: We use a comprehensive range of stress testing techniques to help monitor risks across trading desks and to augment standard daily VAR reporting. The stress testing framework is designed to quantify the impact of rare and extreme historical but plausible stress scenarios that could lead to large unexpected losses. In addition to performing firmwide stress testing of our aggregate trading portfolio, additional types of secondary stress tests including historical repeats and simulations using hypothetical risk factor shocks are also performed. Across our comprehensive stress testing framework, all trading positions across each applicable market risk category (interest rate risk, equity risk, foreign exchange risk, spread risk, and commodity risk) are included. We review stress testing scenarios on an ongoing basis and make updates as necessary to ensure that both current and potential emerging risks are appropriately captured.

Trading portfolio capital adequacy: We assess capital adequacy on a regular basis, based on estimates of our risk profile and capital positions under baseline and stressed scenarios. Scenarios consider material risks, including credit risk, market risk, and operational risk. Our assessment of capital adequacy arising from market risk also includes a review of risk arising from material portfolios of covered positions. See "Capital Resources" in this MD&A for additional discussion of capital adequacy.

Liquidity Risk Management

Liquidity risk is the risk of being unable, at a reasonable cost, to meet financial obligations as they come due. We manage liquidity risk utilizing three lines of defense as described below. These lines of defense are designed to mitigate our three primary liquidity risks: structural (“mismatch”) liquidity risk, market liquidity risk, and contingent liquidity risk. Structural liquidity risk arises from our maturity transformation activities and balance sheet structure, which may create mismatches in the timing of cash inflows and outflows. Market liquidity risk, which we also describe as refinancing or refunding risk, constitutes the risk that we could lose access to the financial markets or the cost of such access may rise to undesirable levels. Contingent liquidity risk arises from rare and severely adverse liquidity events; these events may be idiosyncratic or systemic.

We mitigate these risks utilizing a variety of tested liquidity management techniques in keeping with regulatory guidance and industry best practices. For example, we mitigate structural liquidity risk by structuring our balance sheet prudently so that we fund less liquid assets, such as loans, with stable funding sources, such as retail and wholesale deposits, long-term debt, and capital. We mitigate market liquidity risk by maintaining diverse borrowing resources to fund projected cash needs and structuring our liabilities to avoid maturity concentrations. We model contingent liquidity risk from a range of potential adverse circumstances in our contingency funding scenarios. These scenarios inform the amount of contingency liquidity sources we maintain as a buffer to ensure we can meet our obligations in a timely manner under adverse events.

Governance. We maintain a comprehensive liquidity risk governance structure in keeping with regulatory guidance and industry best practices. Our Board, through the BRC, oversees liquidity risk management and establishes our liquidity risk appetite via a set of cascading risk limits. The BRC reviews and approves risk policies to establish these limits and regularly reviews reports prepared by senior management to monitor compliance with these policies. The Board charges the CEO with determining corporate strategies in accordance with its risk appetite and the CEO is a member of our ALCO, which is the executive level committee with oversight of liquidity risk management. The ALCO regularly monitors our liquidity and compliance with liquidity risk limits, and also reviews and approves liquidity management strategies and tactics.

Management and Reporting Framework. We found our governance structure on and mitigate liquidity risk using three lines of defense. Corporate Treasury constitutes the first line of defense, managing consolidated liquidity risks we incur in the course of our business. Under the oversight of the ALCO, Corporate Treasury thereby assumes responsibility for identifying, measuring, monitoring, reporting, and managing our liquidity risks. In so doing, Corporate Treasury develops and implements short- and long-term liquidity management strategies, funding plans and liquidity stress tests. Corporate Treasury primarily monitors and manages liquidity risk at the Parent Company and Bank levels as the non-bank subsidiaries are relatively small and these subsidiaries ultimately rely upon the Parent Company as a source of liquidity in adverse environments. However, Corporate Treasury also monitors liquidity developments in and maintains a regular dialogue with other legal entities within SunTrust.

Our MRM group constitutes our second line of defense in liquidity risk management. MRM conducts independent oversight and governance of liquidity risk management activities. For example, MRM works with Corporate Treasury to ensure our liquidity risk management practices conform to applicable laws and regulations and evaluates key assumptions incorporated in our contingency funding scenarios.

Our internal audit function provides a third line of defense in liquidity risk management. The role of internal audit is to provide assurance through an independent assessment of the adequacy of internal controls in the first two lines of defense. These controls consist of procedural documentation, approval processes, reconciliations, and other mechanisms employed by the first two lines of defense in ensuring that liquidity risk is consistent with applicable policies, procedures, laws and regulations.

Uses of Funds. Our primary uses of funds include the extension of loans and credit, the purchase of investment securities, working capital, and debt and capital service. The Bank and the Parent Company borrow in the money markets using instruments such as Fed funds, Eurodollars, and CP. At June 30, 2014, the Parent Company had no CP outstanding and the Bank retained a material cash position in its Federal Reserve account. The Parent Company also retains a material cash position, in accordance with our policies and risk limits, discussed in greater detail below.

We assess liquidity needs that may occur in both the normal course of business and times of unusual adverse events, considering both on and off-balance sheet arrangements and commitments that may impact liquidity in certain business environments. We have contingency funding scenarios and plans that assess liquidity needs that may arise from certain stress events such as severe economic recessions, financial market disruptions, and credit rating downgrades. Factors that affect our credit ratings include, but are not limited to, the credit risk profile of our assets, the adequacy of our ALLL, the level and stability of our earnings, the liquidity profile of both the Bank and the Parent Company, the economic environment, and the adequacy of our capital base. At June 30, 2014, both S&P and Fitch maintained a "Positive" outlook on our credit ratings based on our improving overall risk profile and asset quality, solid liquidity profile, and sound capital position. Moody's maintained a "Stable" outlook

on our credit ratings at June 30, 2014. Future credit rating downgrades are possible, although not currently anticipated given the "Positive" and "Stable" credit rating outlooks.

Debt Credit Ratings and Outlook	June 30, 2014			Table 19
	Moody's	S&P	Fitch	
SunTrust Banks, Inc.				
Short-term	P-2	A-2	F2	
Senior long-term	Baa1	BBB	BBB+	
SunTrust Bank				
Short-term	P-2	A-2	F2	
Senior long-term	A3	BBB+	BBB+	
Outlook	Stable	Positive	Positive	

Although the Bank's investment portfolio is a use of funds, we manage that investment portfolio primarily as a store of liquidity, maintaining the super-majority (approximately 93%) of its securities in liquid and high-grade asset classes such as agency MBS, agency debt, and U.S. Treasury securities; nearly all of those liquid, high-grade securities qualify as Level 1 or Level 2 high-quality liquid assets under the proposed rule to implement the LCR for U.S. banks. At June 30, 2014, the Bank's AFS investment portfolio contained \$11.7 billion of unencumbered securities at book value.

Sources of Funds. Our primary source of funds is a large, stable retail deposit base. Core deposits, predominantly made up of consumer and commercial deposits originated primarily from our retail branch network, are our largest and most cost-effective source of funding. Core deposits increased to \$131.8 billion at June 30, 2014, from \$127.7 billion at December 31, 2013.

We also maintain access to diversified resources for both secured and unsecured wholesale funding. These uncommitted sources include Fed funds purchased from other banks, securities sold under agreements to repurchase, negotiable CDs, offshore deposits, FHLB advances, Global Bank Notes, and CP. Aggregate wholesale funding increased to \$19.8 billion at June 30, 2014 from \$17.3 billion at December 31, 2013. Net short-term unsecured borrowings, which includes wholesale domestic and foreign deposits as well as Fed funds purchased, decreased to \$4.3 billion at June 30, 2014 from \$4.9 billion at December 31, 2013.

As mentioned above, the Bank and Parent Company maintain programs to access the debt capital markets. The Parent Company maintains an SEC shelf registration from which it may issue senior or subordinated notes and various capital securities such as common or preferred stock. Our Board has authorized the issuance of up to \$5.0 billion of such securities, of which approximately \$2.9 billion of issuance capacity remained available at June 30, 2014.

The Bank maintains a Global Bank Note program under which it may issue senior or subordinated debt with various terms. During the second quarter of 2014, the Parent Company issued \$650 million of 5-year senior notes. The notes pay a fixed annual coupon rate of 2.50% and will mature on May 1, 2019. We may call the notes beginning on April 1, 2019. At June 30, 2014, the Bank retained \$35.4 billion of remaining capacity to issue notes under the Global Bank Note program.

Our issuance capacity under these Bank and Parent Company programs refers to authorization granted by our Board, which is formal program capacity and not a commitment to purchase by any investor. Debt and equity securities issued under these programs are designed to appeal primarily to domestic and international institutional investors. Institutional investor demand for these securities depends upon numerous factors, including but not limited to our credit ratings and investor perception of financial market conditions and the health of the banking sector. Therefore, our ability to access these markets in the future could be impaired for either systemic or idiosyncratic reasons.

As mentioned above, we maintain contingency funding scenarios to anticipate and manage the likely impact of impaired capital markets access and other adverse liquidity circumstances. Our contingency plans also provide for continuous monitoring of net borrowed funds dependence and available sources of contingency liquidity. These sources of contingency liquidity include available cash reserves; the ability to sell, pledge, or borrow against unencumbered securities in the Bank's investment portfolio; the capacity to borrow from the FHLB system; and the capacity to borrow at the Federal Reserve Discount Window.

The following table presents period end and average balances from these four sources for the first six months of 2014 and 2013. We believe these contingency liquidity sources exceed any contingent liquidity needs measured in our contingency funding scenarios.

Contingency Liquidity Sources (Dollars in billions)	June 30, 2014		Table 20 June 30, 2013	
	As of	Average for the Six Months Ended ¹	As of	Average for the Six Months Ended ¹
Excess reserves	\$2.8	\$3.4	\$—	\$1.6
Free and liquid investment portfolio securities ²	11.7	11.6	12.5	12.1
FHLB borrowing capacity	14.5	14.2	12.8	13.6
Discount Window borrowing capacity	20.1	20.2	19.4	18.9
Total	\$49.1	\$49.4	\$44.7	\$46.2

¹ Average based upon month-end data, except excess reserves, which is based upon a daily average.

² Includes \$376 million and \$334 million of FHLB of Atlanta stock, respectively, and \$402 million of Federal Reserve Bank stock at June 30, 2014 and 2013.

Parent Company Liquidity. Our primary measure of Parent Company liquidity is the length of time the Parent Company can meet its existing and certain forecasted obligations using its cash resources. We measure and manage this metric, "Months to Required Funding," using forecasts of both normal and adverse conditions. Under adverse conditions, we measure how long the Parent Company can meet its capital and debt service obligations after experiencing material attrition of short-term, unsecured funding and without the support of dividends from the Bank or access to the capital markets. At June 30, 2014, the Parent's Months to Required Funding remained well in excess of current ALCO and Board limits. The BRC regularly reviews this and other liquidity risk metrics. In accordance with these risk limits established by ALCO and the Board, we manage the Parent Company's liquidity by structuring its net maturity schedule to minimize the amount of debt maturing within a short period of time. No Parent Company debt matured during 2013 and no material Parent Company debt is scheduled to mature in 2014 or 2015. A majority of the Parent Company's liabilities are long-term in nature, coming from the proceeds of issuances of our capital securities and long-term senior and subordinated notes.

We manage the Parent Company to maintain most of its liquid assets in cash and securities that it could quickly convert to cash. Unlike the Bank, it is not typical for the Parent Company to maintain a material investment portfolio of publicly traded securities. We manage the Parent Company cash balance to provide sufficient liquidity to fund all forecasted obligations (primarily debt and capital service) for an extended period of months in accordance with our risk limits.

The primary uses of Parent Company liquidity include debt service, dividends on capital instruments, the periodic purchase of investment securities, loans to our subsidiaries, and common share repurchases. See further details of the authorized common share repurchases in the "Capital Resources" section of this MD&A and in Part II, "Item 2. Unregistered Sales of Equity Securities and Use of Proceeds" in this Form 10-Q. We fund corporate dividends with Parent Company cash, the primary sources of which are dividends from our banking subsidiary and proceeds from the issuance of debt and capital securities. We are subject to both state and federal banking regulations that limit our ability to pay common stock dividends in certain circumstances.

Other Liquidity Considerations. Numerous legislative and regulatory proposals currently outstanding may have an effect on our liquidity if they become effective. For example, on October 24, 2013, the Federal Reserve published proposed rules to implement the LCR for U.S. banks. The LCR would require banks to hold unencumbered, high-quality, liquid assets sufficient to withstand projected cash outflows under a prescribed liquidity stress scenario. The LCR is proposed to be phased-in as a regulatory requirement beginning January 1, 2015. While the potential impact of this and other regulatory proposals cannot be fully quantified at present, we believe that our strong core

banking franchise and prudent liquidity management practices will position us well to comply with the new standards as they become effective.

In 2011, the Federal Reserve published proposed measures to strengthen regulation and supervision of large bank holding companies and systemically important nonbank financial firms, pursuant to Sections 165 and 166 of the Dodd-Frank Act. In February 2014, the Federal Reserve approved final rules to implement these “enhanced prudential standards” under Regulation YY. These regulations include largely qualitative liquidity risk management practices, including internal liquidity stress testing. We believe that our liquidity risk management and stress testing practices will meet or exceed these new standards prior to the effective date of January 1, 2015.

As presented below, we had an aggregate potential obligation of \$69.8 billion to our clients in unused lines of credit at June 30, 2014. Commitments to extend credit are arrangements to lend to clients who have complied with predetermined contractual obligations. We also had \$3.3 billion in letters of credit at June 30, 2014, most of which are standby letters of credit, which require that we provide funding if certain future events occur. Approximately \$1.3 billion of these letters supported variable rate demand obligations at June 30, 2014. Unused commercial lines of credit have increased since December 31, 2013, as we continued to provide credit availability to our clients.

Unfunded Lending Commitments (Dollars in millions)	June 30, 2014	Table 21 December 31, 2013
Unused lines of credit:		
Commercial	\$47,001	\$43,444
Mortgage commitments ¹	3,401	2,722
Home equity lines	10,926	11,157
CRE	2,713	2,078
Credit card	5,718	4,708
Total unused lines of credit	\$69,759	\$64,109
Letters of credit:		
Financial standby	\$3,179	\$3,256
Performance standby	61	57
Commercial	26	28
Total letters of credit	\$3,266	\$3,341

¹ Includes IRLC contracts with notional balances of \$2.5 billion and \$1.8 billion at June 30, 2014 and December 31, 2013, respectively.

Other Market Risk

Except as discussed below, there have been no other significant changes to other market risk as described in our 2013 Annual Report on Form 10-K.

MSRs, which are carried at fair value, totaled \$1.3 billion at June 30, 2014 and December 31, 2013, are managed within established risk limits, and are monitored as part of various governance processes. We originated MSRs with fair values at the time of origination of \$36 million and \$68 million for the three and six months ended June 30, 2014, respectively, and \$93 million and \$203 million for the three and six months ended June 30, 2013, respectively. Additionally, we purchased servicing rights valued at approximately \$76 million during the second quarter of 2014. We recognized mark-to-market decreases of \$104 million and \$185 million in the fair value of our MSRs for the three and six months ended June 30, 2014, respectively, and increases of \$82 million and \$98 million in the fair value of our MSRs for the three and six months ended June 30, 2013, respectively. Increases or decreases in fair value include the decay resulting from the realization of expected monthly net servicing cash flows. We recorded \$36 million and \$63 million of net losses during the three and six months ended June 30, 2014, respectively, and \$76 million and \$115 million of net losses during the three and six months ended June 30, 2013, respectively, inclusive of decay and related hedges. The decrease in net losses related to MSRs during the first six months of 2014 compared to 2013 was the result of lower decay, partially offset by a decline in hedge performance. Lower decay was driven by a decline in refinance activity due to higher mortgage interest rates while the decline in hedge performance was attributable to lower carry income.

OFF-BALANCE SHEET ARRANGEMENTS

See discussion of off-balance sheet arrangements in Note 8, "Certain Transfers of Financial Assets and Variable Interest Entities," and Note 13, "Guarantees," to the Consolidated Financial Statements in this Form 10-Q.

CONTRACTUAL COMMITMENTS

In the normal course of business, we enter into certain contractual obligations, including obligations to make future payments on debt and lease arrangements, contractual commitments for capital expenditures, and service contracts. At June 30, 2014, purchase obligations were \$494 million, an increase of 27% from December 31, 2013, due to an increase in commitments to two existing suppliers, as well a new agreement that took effect during the second quarter of 2014. Additionally, at June 30, 2014, brokered time deposits were \$1.5 billion, a decrease of \$540 million, or 27%, from December 31, 2013. The decrease was due to the maturity of index-linked CDs during the second quarter. Except for the changes noted within the "Borrowings" section of this MD&A, there have been no other material changes in our Contractual Commitments as described in our 2013 Annual Report on Form 10-K.

BUSINESS SEGMENTS

The following table presents net income/(loss) for our reportable business segments:

Net Income/(Loss) by Segment	Three Months Ended June 30		Six Months Ended June 30	
	2014	2013	2014	2013
(Dollars in millions)				
Consumer Banking and Private Wealth Management	\$162	\$152	\$315	\$285
Wholesale Banking	245	228	423	409
Mortgage Banking	(84) (69) (70) (73
Corporate Other	119	96	201	164
Reconciling Items ¹	(43) (30) (65) (56
Total Corporate Other	76	66	136	108
Consolidated net income	\$399	\$377	\$804	\$729

¹ Includes differences between net income/(loss) reported for each business segment using management accounting practices and U.S. GAAP. Prior period information has been restated to reflect changes in internal reporting methodology and inter-segment transfers. See additional information in Note 16, "Business Segment Reporting," to the Consolidated Financial Statements in this Form 10-Q.

The following table presents average loans and average deposits for our reportable business segments:

Average Loans and Deposits by Segment	Three Months Ended June 30		Six Months Ended June 30	
	Average Loans		Average Consumer and Commercial Deposits	
(Dollars in millions)	2014	2013	2014	2013
Consumer Banking and Private Wealth Management	\$41,524	\$40,238	\$85,459	\$84,228
Wholesale Banking	61,359	53,522	42,865	38,654
Mortgage Banking	27,803	27,574	2,220	3,742
Corporate Other	48	38	(72) (45
	Six Months Ended June 30			
	Average Loans		Average Consumer and Commercial Deposits	
(Dollars in millions)	2014	2013	2014	2013
Consumer Banking and Private Wealth Management	\$41,395	\$40,286	\$84,990	\$84,625
Wholesale Banking	60,152	53,010	42,498	38,876
Mortgage Banking	28,043	27,784	2,054	3,630
Corporate Other	45	48	(102) (17

See Note 16, "Business Segment Reporting," to the Consolidated Financial Statements in this Form 10-Q for discussion of our segment structure, basis of presentation, and internal management reporting methodologies, including the reclassification of RidgeWorth results from the Wholesale Banking segment to Corporate Other.

BUSINESS SEGMENT RESULTS

Six Months Ended June 30, 2014 vs. 2013

Consumer Banking and Private Wealth Management

Consumer Banking and Private Wealth Management reported net income of \$315 million for the six months ended June 30, 2014, an increase of \$30 million, or 11%, compared to the same period in 2013. The increase in net income was primarily driven by continued improvement in credit quality resulting in a lower provision for credit losses and a modest increase in noninterest income, which in aggregate more than offset a 4% increase in expenses.

Net interest income was \$1.3 billion, a decrease of \$1 million compared to the same period in 2013. Increased average loan and deposit balances largely offset lower rates. The \$1.1 billion, or 3%, increase in average loans was driven by growth in consumer loans, which more than offset home equity line paydowns, decreased CRE loans, as well as lower nonaccrual loans driven by a continued improving credit environment. The \$365 million increase in average deposits was driven by increases across all account categories except time deposits, which decreased \$1.8 billion driven by maturing higher rate CDs.

Provision for credit losses was \$95 million, a decrease of \$82 million, or 46%, compared to the same period in 2013. The decrease was driven by declines in net charge-offs of \$46 million in home equity lines, \$20 million in commercial loans, \$9 million in consumer direct installment loans, and \$8 million in consumer mortgage loans.

Total noninterest income was \$743 million, an increase of \$16 million, or 2%, compared to the same period in 2013, driven by an increase in wealth management related revenue, partially offset by a decrease in service charges on deposits.

Total noninterest expense was \$1.4 billion, an increase of \$49 million, or 4%, compared to the same period in 2013. This increase was driven by staff expenses related to investment in revenue generating positions, primarily in wealth management related businesses to help fulfill more of our clients' wealth and investment management needs.

Wholesale Banking

Wholesale Banking reported net income of \$423 million for the six months ended June 30, 2014, an increase of \$14 million, or 3%, compared to the same period in 2013. The increase in net income was attributable to an increase in net interest income and noninterest income, and a decrease in provision for credit losses, partially offset by an increase in noninterest expense.

Net interest income was \$878 million, a \$43 million, or 5%, increase compared to the same period in 2013, driven by increases in average loan and deposit balances. Net interest income related to loans increased, as average loan balances grew \$7.1 billion, or 13%, led by tax-exempt, C&I, and CRE loans. Net interest income related to client deposits increased as average deposit balances grew \$3.6 billion, or 9%, compared to the same period in 2013. Lower cost demand deposits increased \$1.7 billion, or 9%, and average combined interest-bearing transaction accounts and money market accounts increased \$2.0 billion, or 11%, while average CD balances declined approximately \$100 million.

Provision for credit losses was \$30 million, a decrease of \$38 million, or 56%, from the same period in 2013. The decline reflects the continued improvement in overall Wholesale Banking credit quality.

Total noninterest income was \$586 million, an increase of \$39 million, or 7%, from the same period in 2013, as higher investment banking revenue and trading income more than offset a decline in affordable housing partnership revenue associated with the sale of certain affordable housing properties.

Total noninterest expense was \$802 million, an increase of \$99 million, or 14% compared to the same period in 2013. The increase was primarily due to the strategic decision to sell investments in Affordable Housing partnerships in the first quarter of 2014 resulting in a \$36 million impairment charge along with an increase in employee compensation driven in part by a reduction to incentive compensation accruals in the first quarter of 2013. Additionally, staff expenses increased as we continued to make investments to better meet the array of our clients' needs and augment our capabilities.

Mortgage Banking

Mortgage Banking reported a net loss of \$70 million for the six months ended June 30, 2014, compared to a net loss of \$73 million for the same period in 2013. Excluding the second quarter Form 8-K and other legacy mortgage-related items of \$179 million (pre-tax), net income would have been \$45 million for the six months ended June 30, 2014. See Table 1, "Selected Quarterly Financial Data and Reconciliation of Non-U.S. GAAP Measures," and the "Executive Overview" in this MD&A where Form 8-K and other legacy mortgage-related items are described.

Net interest income was \$274 million, an increase of \$6 million, or 2%, predominantly due to higher net interest income on loans, partially offset by lower net interest income on LHFS and deposits. Net interest income on loans increased \$35 million mainly due to increased loan spreads. Net interest income on LHFS decreased \$18 million compared to the same period in 2013, due to a \$1.8 billion, or 60%, decrease in average balances driven by lower production, which was partially offset by higher spreads. Net interest income on average deposits declined \$10 million as higher spreads were offset by a \$1.6 billion, or 43%, decline in average total deposit balances.

Provision for credit losses was \$50 million, a decrease of \$63 million, or 56%, compared to the same period in 2013. The improvement was largely attributable to improved credit quality.

Total noninterest income was \$219 million, a decrease of \$110 million, or 33%, compared to the same period in 2013. The decrease was predominantly driven by lower mortgage production income, partially offset by higher mortgage servicing income. Mortgage loan production income decreased \$197 million due to a decline in gain on sale margin and lower production-related fee income, partially offset by a \$19 million decline in the mortgage repurchase provision. Loan originations were \$7.2 billion for the six months ended June 30, 2014, compared to \$17.9 billion for the prior year, a decrease of \$10.7 billion, or 60%. Mortgage servicing income of \$99 million, increased \$60 million, driven by lower decay and higher servicing fees, offset by less favorable net hedge performance. Total loans serviced were \$134.4 billion at June 30, 2014 compared with \$140.1 billion at June 30, 2013, down 4%.

Total noninterest expense was \$556 million, a decline of \$53 million, or 9%, compared to the same period in 2013. Total staff expense declined \$79 million driven by lower staffing levels reflecting the decline in closed loan volumes and on-going efforts to right-size the mortgage business. In addition, lower mortgage production volumes resulted in declines in outside processing cost of \$20 million and credit services of \$16 million, while improved asset quality drove a decline in collection services of \$20 million. Total allocated costs decreased \$27 million. Operating losses increased \$116 million driven by higher expenses for mortgage-related legal matters, namely the previously discussed HAMP-related charge.

Corporate Other

Corporate Other net income for the six months ended June 30, 2014 was \$201 million, an increase of \$37 million, or 23%, compared to the same period in 2013. The increase was primarily due to the gain on sale of RidgeWorth and tax benefits resulting from the recognition of discrete items in the current year. These increases to net income were partially offset by higher noninterest expense and lower net interest income.

Net interest income was \$149 million, a decrease of \$14 million, or 9%, compared to the same period in 2013. The decrease was primarily due to lower commercial loan related swap income. Additionally, average long-term debt increased by \$2.1 billion, or 24%, and average short-term borrowing increased \$1.8 billion, or 52%, compared to the same period of 2013 due to balance sheet management activities.

Total noninterest income was \$209 million, an increase of \$87 million, or 71% compared to the same period in 2013. The increase was primarily due to a \$105 million gain on sale of RidgeWorth. The gain was partially offset by foregone trust and investment management income resulting from the sale of RidgeWorth, an increase in mark-to-market valuation losses on our public debt and index-linked CDs carried at fair value, and \$4 million increase in securities losses in 2014 compared to the same period in 2013.

Total noninterest expenses increased \$42 million compared to the same period in 2013. The increase was mainly due to higher severance cost and incentive compensation related to business performance, higher debt issuance costs and the lower recovery of allocated internal costs. Additionally, operating losses increased driven by an accrual reversal in the prior year. These increases were partially offset by a reduction in expenses due to sale of RidgeWorth.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

See the “Enterprise Risk Management” section of the MD&A in this Form 10-Q, which is incorporated herein by reference.

122

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Company conducted an evaluation, under the supervision and with the participation of its CEO and CFO, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) of the Exchange Act) at June 30, 2014. The Company's disclosure controls and procedures are designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the rules and forms of the SEC, and that such information is accumulated and communicated to the Company's management, including its CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure. Based upon the evaluation, the CEO and CFO concluded that the Company's disclosure controls and procedures were effective at June 30, 2014.

Changes in Internal Control over Financial Reporting

There have been no changes to the Company's internal control over financial reporting that occurred during the six months ended June 30, 2014, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. The Company has begun implementation of the new Internal Control - Integrated Framework, issued in May 2013 by the Committee of Sponsoring Organizations of the Treadway Commission. The Company will complete this implementation prior to the compliance deadline of December 2014.

PART II - OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

As previously disclosed on June 17, 2014, STM and the U.S. DOJ, the HUD, certain other federal agencies, and the Attorneys General for forty-nine states and the District of Columbia (collectively, the "Government"), reached a definitive agreement to settle (i) certain civil and administrative claims arising from FHA-insured mortgage loans originated by STM from January 1, 2006 through March 31, 2012, and (ii) certain alleged civil claims regarding SunTrust's mortgage servicing and origination practices as part of its portion of the National Mortgage Servicing Settlement. Pursuant to the settlement agreement, and as previously disclosed on October 10, 2013, SunTrust will provide \$500 million of consumer relief, make a \$468 million cash payment, and implement certain mortgage servicing standards. In return, the Government released STM and SunTrust from most claims. A copy of the settlement agreement is filed as Exhibit 10.3 to this report and is incorporated herein by reference. The foregoing summary of the settlement is qualified in its entirety by reference to the full text of the agreement. The Company previously recorded the estimated cost of this settlement, including providing the contemplated consumer relief, in the third of quarter of 2013, at the time it announced the agreements in principle. The Company does not expect the consumer relief efforts or the implementation of servicing standards required by the settlement agreement to have a material impact on its future financial results.

On July 3, 2014, STM and the United States of America, represented by the United States Attorney for the Western District of Virginia reached an agreement to settle certain claims that arose from STM's administration of the federal HAMP primarily from March 2009 and through December 2010. Specifically, SunTrust's commitment under the agreement includes an estimated \$179 million in consumer remediation (up to a maximum of \$274 million), \$20 million to fund housing counseling for homeowners, \$10 million paid toward restitution to Fannie Mae and Freddie Mac, and a cash payment of \$16 million to the U.S. Treasury. The Company incurred a \$204 million pre-tax charge in the second quarter of 2014 in connection with this matter, which reflects STM's commitment under the agreement, including its estimate of the consumer remediation obligation. A copy of the Restitution and Remediation Agreement is filed as Exhibit 10.4 to this report and is incorporated herein by reference. The foregoing summary of the

Restitution and Remediation Agreement is qualified in its entirety by reference to the full text of the agreement.

In addition, the Company and its subsidiaries are parties to numerous claims and lawsuits arising in the normal course of its business activities, some of which involve claims for substantial amounts. Although the ultimate outcome of these suits cannot be ascertained at this time, it is the opinion of management that none of these matters, when resolved, will have a material effect on the Company's consolidated results of operations, cash flows, or financial condition. For additional information, see Note 15, "Contingencies," to the Consolidated Financial Statements in this Form 10-Q, which is incorporated into this Item 1 by reference.

Item 1A. RISK FACTORS

The risks described in the Company's 2013 Annual Report on Form 10-K are not the only risks facing the Company. Additional risks and uncertainties not currently known or that the Company currently deems to be immaterial also may adversely affect the Company's business, financial condition, or future results. In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A., "Risk Factors" in the Company's 2013 Annual Report on Form 10-K, which could materially affect the Company's business, financial condition, or future results.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) None.

(b) None.

(c) Issuer Purchases of Equity Securities:

	Common Stock ¹		Number of shares purchased as part of publicly announced plans or programs	Table 24
	Total number of shares purchased ²	Average price paid per share		Approximate dollar value of shares that may yet be purchased under the plans or programs (\$ in millions)
January 1 - 31	1,354,345	\$36.92	1,354,345	\$—
February 1 - 28	—	—	—	—
March 1 - 31	17,940	37.36	—	—
Total during first quarter of 2014	1,372,285	\$36.92	1,354,345	\$—
April 1 - 30	2,009,900	\$39.76	2,009,900	\$370
May 1 - 31	79,000	37.96	79,000	367
June 1 - 30	—	—	—	367
Total during second quarter of 2014	2,088,900	\$39.69	2,088,900	\$367
Total year-to-date 2014	3,461,185	\$38.60	3,443,245	\$367

¹ On March 14, 2013, the Company announced that its Board had authorized the repurchase of up to \$200 million in shares of the Company's common stock. This authorization expires December 31, 2016. However, any share repurchase is subject to the approval of the Company's primary banking regulator as part of the annual capital planning and stress testing process and therefore, this authority effectively expired on March 31, 2014. During the first quarter of 2014, the Company completed the repurchase of authorized shares as approved by the Board and the Federal Reserve in conjunction with the 2013 capital plan.

On March 26, 2014, the Company announced that the Federal Reserve had no objections to the repurchase of up to \$450 million of the Company's outstanding common stock to be completed between April 1, 2014 and March 31, 2015, as part of the Company's capital plan submitted in connection with the 2014 CCAR. The repurchases are limited to the extent that the Company's issuances of capital stock, including employee share-based compensation, are less than the amount indicated in the 2014 CCAR capital plan. During the second quarter of 2014, the Company repurchased approximately \$83 million of its common stock at market value as part of this publicly announced plan. The Company expects to repurchase an additional \$300 million to \$350 million of outstanding common stock through the end of the first quarter of 2015.

² Includes shares repurchased pursuant to SunTrust's employee stock option plans, pursuant to which participants may pay the exercise price upon exercise of SunTrust stock options by surrendering shares of SunTrust common stock which the participant already owns. SunTrust considers shares so surrendered by participants in SunTrust's employee

stock option plans to be repurchased pursuant to the authority and terms of the applicable stock option plan rather than pursuant to publicly announced share repurchase programs. During the second quarter of 2014, no shares of SunTrust common stock were surrendered by participants in SunTrust's employee stock option plans.

At June 30, 2014, the Company had authority from its Board to repurchase all of the 13.9 million outstanding stock purchase warrants. However, any such repurchase would be subject to the prior approval of the Federal Reserve. SunTrust did not repurchase any shares of its Series A Preferred Stock Depositary Shares, Series B Preferred Stock, Series E Preferred Stock Depositary Shares, or warrants to purchase common stock during the first six months of 2014, and there was no unused Board authority to repurchase any shares of Series A Preferred Stock Depositary Shares, Series B Preferred Stock, or the Series E Preferred Stock Depositary Shares.

Item 3. DEFAULTS UPON SENIOR SECURITIES

None.

Item 4. MINE SAFETY DISCLOSURES

Not applicable.

Item 5. OTHER INFORMATION

None.

Item 6. EXHIBITS
