LEHMAN BROTHERS MARCH 31, 2007 (UNAUDITED)

NOTES TO SCHEDULE OF INVESTMENTS

(+) Investments in debt securities by Lehman Brothers First Trust Income Opportunity Fund (the "Fund") are valued using an independent pricing service approved by the Board of Trustees, which utilizes closing market prices, market quotations and transactions, quotations from dealers and various relationships among securities in determining value. Securities for which closing market prices or market quotations are not available or are not considered by Neuberger Berman Management Inc. to be reflective of a security's market value, are valued at fair value as determined in good faith by methods established by and under the supervision of the Board of Trustees. Criteria considered in making this determination may include, but are not limited to, a review of other securities by the same issuer for which market quotations are available, recent bid and ask prices for the security, the issuer's position in an economic outlook of the industry and, if necessary, a review of similar securities in similar industries. Securities with remaining maturities of 60 days or less are valued at amortized cost. This method involves valuing a portfolio security initially at its cost and thereafter assumes a constant amortization to maturity of any discount of premium.
