For Immediate Release

Stantec completes the acquisition of green building design specialist Keen Engineering

EDMONTON AB, VANCOUVER BC (October 3, 2005) TSX: STN; NYSE SXC

Stantec significantly increased its buildings engineering and sustainable design capabilities today by completing the acquisition of Keen Engineering (Keen). Keen--with approximately 275 employees and 12 offices (10 in Canada and two offices in the United States)--is considered to be one of the leading sustainable building systems design firms in North America.

"We're very pleased to have the talented and entrepreneurial group from Keen join the Stantec family," says Tony Franceschini, Stantec President & CEO. "The combination of Keen and Stantec makes up one of North America's largest sustainable design teams with over 280 LEED(R) Accredited professionals."

Keen is a progressive consulting engineering firm specializing in sustainable mechanical, electrical, and plumbing design for buildings and facilities. The company is one of the leaders and advocates of the green building design movement throughout North America. Keen has provided professional services for over 45 years and has offices in Vancouver, Victoria, Abbotsford, Kamloops, and Kelowna, British Columbia; Calgary and Edmonton, Alberta; Toronto and Ottawa, Ontario; Montreal, Quebec; Seattle, Washington; and San Francisco, California.

"By joining Stantec, we now have one of the largest integrated buildings design teams in North America," says Kevin Hydes, Keen President & CEO, who will continue with Stantec as Vice President. "With this group of experts and more robust financial and technical resources we will be able to promote sustainable

## Edgar Filing: STANTEC INC - Form 6-K

building design to more clients across North America and make a positive impact on our environment by creating buildings that are environmentally responsible, profitable, and healthy places to live and work."

Stantec and Keen have worked together on a number of design projects including the Vancouver International Airport and the Winnipeg International Airport as well as University of Toronto's Scarborough Student Centre in Scarborough, Ontario, and the Vancouver General Hospital. Kevin Hydes is the current Chair of the US Green Building Council and founder of the Canadian Green Building Council.

### About LEED (R)

The LEED (Leadership in Energy and Environmental Design) Green Building Rating System(R) is a voluntary, consensus-based national standard for developing high-performance, sustainable buildings. The LEED(R) system was developed by the US Green Building Council (USGBC) which is a coalition of leaders from across the building industry

working to promote sustainable buildings. The Canadian Green Building Council (CaGBC) offers LEED(R) Accreditation for professionals and LEED(R) certification for buildings and facilities in Canada. LEED(R) Accredited professionals have passed a rigorous exam that tests their knowledge of green building design and sustainable building practices and are recognized by the USGBC and CaGBC.
