Notes To Condensed Financial Statements (Unaudited)

Note 1– Basis of Presentation

The accompanying unaudited condensed financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and in accordance with the rules and regulations of the U.S. Securities and Exchange Commission (“SEC”) for quarterly reports on Form 10-Q. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three-month period ended September 30, 2016, are not necessarily indicative of the results that may be expected for the year ended June 30, 2017. For further information, refer to the audited financial statements and footnotes thereto in our Annual Report on Form 10-K for the year ended June 30, 2016.

Note 2 – Going Concern Matters and Realization of Assets

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the ordinary course of business. However, the Company has sustained recurring losses from its continuing operations and as of September 30, 2016, had negative working capital of \$1,704,068 and a stockholders’ deficit of \$1,704,068. In addition, the Company is unable to meet its obligations as they become due and sustain its operations. The Company believes that its existing cash resources are not sufficient to fund its continuing operating losses, capital expenditures, lease and debt payments and working capital requirements.

The Company may not be able to raise sufficient additional debt, equity or other cash on acceptable terms, if at all. Failure to generate sufficient revenues, achieve certain other business plan objectives or raise additional funds could have a material adverse effect on the Company’s results of operations, cash flows and financial position, including its ability to continue as a going concern, and may require it to significantly reduce, reorganize, discontinue or shut down its operations.

In view of the matters described above, recoverability of a major portion of the recorded asset amounts shown in the accompanying balance sheet is dependent upon continued operations of the Company which, in turn, is dependent upon the Company’s ability to meet its financing requirements on a continuing basis, and to succeed in its future operations. The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or amounts and classification of liabilities that might be necessary should the Company be

unable to continue in its existence.

Management's plans include:

1. Seek to raise debt or equity for working capital purposes and to pay off existing debt balances. With sufficient additional cash available to the Company, it can begin to make marketing expenditures and hire people to generate more revenues, and consequently cut monthly operating losses.
2. Continue to create new business opportunities in a cannabis-related field. The Company has secured two purchase contracts to acquire greenhouses in California and to work with a licensed cannabis entity.
3. Renegotiate loan agreements with existing debt holders.

There can be no assurance that the Company will be able to achieve its business plan objectives or be able to achieve or maintain cash-flow-positive operating results. If the Company is unable to generate adequate funds from operations or raise sufficient additional funds, the Company may not be able to repay its existing debt, continue to operate its business network, respond to competitive pressures or fund its operations. As a result, the Company may be required to significantly reduce, reorganize, discontinue or shut down its operations. The financial statements do not include any adjustments that might result from this uncertainty.

Note 3 – Income (Loss) Per Common Share

Loss per common share data was computed as follows:

	Three Months Ended Sept. 30, 2016	Three Months Ended Sept. 30, 2015
Net loss attributable to shareholders	\$(196,290)	\$(2,246,933)
Weighted average common shares outstanding	1,487,324	51,208
Effect of dilutive securities	—	—
Weighted average dilutive common shares outstanding	1,487,324	51,208
Loss per common share - continuing operations	\$(0.13)	\$(43.57)
Loss per common share - discontinued operations	\$(.00)	\$(0.21)
Income (Loss) per common share – diluted	\$(0.13)	\$(43.88)

For the three-month periods ended September 30, 2016 and 2015 the Company excluded approximately 8,139,000 and 1,881,000 shares of common stock, respectively, issuable upon the exercise of outstanding convertible debt from the calculation of net loss per share because the effect would be anti-dilutive.

Note 4 – Principal Financing Arrangements

The following table summarizes components of debt as of September 30, 2016 and June 30, 2016:

	Sept. 30, 2016	June 30, 2016
Convertible debt due to various lenders	\$436,715	\$434,715
Less: discount on debt	13,802	22,472
Total debt, net of discounts	\$422,913	\$412,243

On February 6, 2014, the Company entered into a securities purchase agreement to issue an unsecured convertible promissory note with a principal amount of \$16,500. This promissory note bears interest at an annual rate of 8%, and a default rate of 18%, which was to be paid with principal in full on the maturity date of November 10, 2014. The principal amount of the note together with interest may be converted into shares of common stock, par value of \$0.0001 ("Common Stock") at the option of the lender at a conversion price equal to thirty five percent at the market price, calculated as the average of the lowest three trading prices during the 10 trading days prior to the conversion. As the note was not repaid on November 10, 2014, a penalty of \$5,473 has been added to the principal balance of the note. As of June 30, 2015, conversions totaling \$14,325 have been recorded and 4,359 shares of the Company's Common Stock have been issued as a result of the conversion. For the year ended June 30, 2016, additional conversions of \$6,790 were recorded, resulting in the issuance of 10,545 shares of Common Stock. The conversion price of the notes issued in is based on a variable that is not an input to the fair value of a “fixed-for-fixed” option as defined under FASB ASC Topic No. 815 - 40. The fair value of the notes was recognized as a derivative instrument at the issuance date and is measured at fair value at each reporting period. For convertible debentures issued in the first three months of fiscal 2017, the Company determined that the aggregate fair value of the conversion features was \$16,514 at the issuance dates. Debt discount was recorded up to the \$8,500 face amount of the note and is amortized to interest expense over the term of the note. The fair value of the conversion feature in excess of the principal amount allocated to the notes in the aggregate amount of \$8,014 was expensed immediately as additional interest expense.

For convertible debentures issued in fiscal 2016, the Company determined that the aggregate fair value of the conversion features was \$864,674 at the issuance dates. Debt discount was recorded up to the \$286,500 face amount of the note and is amortized to interest expense over the term of the note. The fair value of the conversion feature in excess of the principal amount allocated to the notes in the aggregate amount of \$578,174 was expensed immediately as additional interest expense. A total of \$8,136 of debt discount was charged to interest expense in the quarter ended September 30, 2016.

Accrued interest payable on the convertible notes amounted to \$50,705 at September 30, 2016 and \$42,589 at June 30, 2016.

Note 5 – Income Taxes

At September 30, 2016, the Company had net operating loss carryforwards for federal income tax purposes of approximately \$1,700,000 that expire in the years 2017 through 2032. The Company has provided an allowance for the full value of the related deferred tax asset since it is more likely than not that none of such benefit will be realized. Utilization of the net operating losses may be subject to annual limitations provided by Section 382 of the Internal Revenue Code and similar state provisions.

Due to the loss for the three-month periods ended September 30, 2016 and 2015, the Company has recorded no income tax expense in either of these three-month periods.

Note 6 – Related Party Transactions

The Company owes its Chief Executive Officer unpaid salary of \$155,527 and \$88,027 as of September 30 and June 30, 2016, respectively.

Note 7 – Stockholders' Deficit

At the opening of trading on September 16, 2016, we effected a reverse split of our common stock at a ratio of 1:1800. As a result of the reverse stock split, each of our 1,800 pre-split shares of common stock outstanding automatically combined into one new share of common stock without any action on the part of the respective holders, and the number of outstanding shares of our common stock was reduced from approximately 27.6 billion shares to 1,532,785 shares. The reverse stock split also applied to shares of common stock issuable upon the conversion of outstanding convertible securities.

The Company is authorized to issue 4,500,000,000 shares of its common stock, par value \$0.0001.

In the first quarter of fiscal 2017, the Company issued 72,222 shares of restricted stock to a convertible note holder to retire \$6,500 in debt.

Note 8 – Fair Value

The Fair Value Measurements Topic of the FASB Accounting Standards Codification establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to measurements involving significant unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

- Level 1: inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the company has the ability to access at the measurement date.
- Level 2: inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: inputs are unobservable inputs for the asset or liability.

Under the Fair Value Measurements Topic of the FASB Accounting Standards Codification, we base fair value on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is our policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements, in accordance with the fair value hierarchy. Fair value measurements for assets and liabilities where there exists limited or no observable market data and, therefore, are based primarily upon management's own estimates, are often calculated based on current pricing policy, the economic and competitive environment, the characteristics of the asset or liability and other such factors. Therefore, the results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability. Additionally, there may be inherent weaknesses in any calculation technique, and changes in the underlying assumptions used, including discount rates and estimates of future cash flows that could significantly affect the results of current or future value.

Following is a description of valuation methodologies used for assets and liabilities recorded at fair value and for estimating fair value where it is practicable to do so for financial instruments not recorded at fair value (disclosures required by the Fair Value Measurements Topic of the FASB Accounting Standards Codification).

Cash and cash equivalents, accounts receivable, and accounts payable

In general, carrying amounts approximate fair value because of the short maturity of these instruments.

Debt

At September 30 and June 30, 2016, debt was carried at its face value plus accrued interest due to the fact that the debt is fully callable by the lender. Based on the financial condition of the Company, it is impracticable for the Company to estimate the fair value of the short and long-term debt.

Liabilities Measured and Recognized at Fair Value on a Recurring Basis

The following table presents the amounts of liabilities measured at fair value on a recurring basis as of September 30 and June 30, 2016.

Derivative Liability

The fair value of the derivatives that are traded in less active over-the counter markets are generally measured using pricing models with market observable inputs such as interest rates and equity index levels. These measurements are classified as Level 3 within the fair value of hierarchy. The derivative liabilities are adjusted to their fair market value at the end of each quarter. The calculation of the derivative liability considers the principal amount of convertible debt and includes any potential conversion of accrued interest payable.

	Total	(Level 1)	(Level 2)	(Level 3)
<u>June 30, 2016</u>				
Derivative liability	\$ 872,465	-	-	\$ 872,465
<u>September 30, 2016</u>				
Derivative liabilities	\$ 935,249	-	-	\$ 935,249

The Company has no instruments with significant off-balance sheet risk.

Note 9 – Discontinued Operations

On October 7, 2015, title to the Company's former subsidiary's placer gold claims for property located in north central British Columbia, were transferred to a third party (the "Lender") who had loaned the subsidiary \$185,000 (the "Loan"). These claims, and all equipment, machinery, vehicles and ancillary buildings to process the claims were used as collateral for the Loan. The collateral was foreclosed on by the Lender and the assets are no longer owned by the Company. Due to the foreclosure in October 2015, and the Company's discontinuance of the mining operations, the mining business is presented as discontinued operations in the financial statements for the quarterly period ended September 30, 2015. The loss from discontinued operations in the three-month periods ended September 30, 2016 and 2015 amounted to \$0 and \$10,222, respectively.

Note 10 – Subsequent Events

On February 1, 2018, the Company issued a convertible debenture for gross proceeds of \$35,000. The debenture matures on February 1, 2019. The terms of the debenture require the Company to pay the debenture investor a principal sum of \$45,000 with 12% annual interest upon maturity. The principal amount of the debenture together with interest may be converted into shares of Common Stock equal to fifty percent of the lowest trading price during the 30 days prior to the conversion.

On February 1, 2018, the Company issued a convertible debenture in exchange for a reduction in principal payable of \$17,000 and interest payable of \$3,000 on a convertible debenture that was originally issued on November 5, 2015. The new debenture matures on February 1, 2019. The terms of the debenture require the Company to pay the debenture investor a principal sum of \$20,000 with 12% annual interest upon maturity. The principal amount of the debenture together with interest may be converted into shares of Common Stock at a conversion price equal to the

lower of \$0.0023 per share or fifty percent of the lowest trading price during the 40 days prior to the conversion.

On February 1, 2018, the Company issued a convertible debenture for gross proceeds of \$10,000. The debenture matures on August 1, 2018. The terms of the debenture require the Company to pay the debenture investor a principal sum of \$15,000 with 8% annual interest upon maturity. The principal amount of the debenture together with interest may be converted into shares of Common Stock equal to fifty percent of the lowest trading price during the 30 days prior to the conversion.

On February 22, 2018, the Company issued 415,983 shares of restricted Common Stock for a one-year investor relations contract.

On February 28, 2018, the Company entered into two asset purchase agreements with a non-affiliated individual (the "Seller"), pursuant to which it contemporaneously acquired certain assets which will allow the Company, subject to the Company applying for and being issued the required licenses, to establish a legal medicinal and recreational marijuana grow operation in California. The Company hired the Seller to be the Company's Chief Operating Officer on March 3, 2018. The assets purchased include a state-of-the-art indoor hydroponics facility, eleven greenhouses, various permits and additional fixtures, equipment and supplies. The purchase price for the assets consisted of 20,000,000 shares of our common stock issued to the Seller and a promissory note that required \$15,000,000 in cash payments in installments over a two-year period. In July 2018, the Company and the Seller amended the purchase agreements to reduce the amount of assets purchased and to reduce the promissory note component of the purchase price to \$7,000,000. The promissory note will not be issued until the cannabis licenses are acquired by the Company. The 20,000,000 shares of common stock were issued immediately.

On March 1, 2018 the Company issued 15,000,000 shares of restricted Common Stock to its Chief Executive Officer, as payment of \$501,000 in accrued compensation.

On March 1, 2018, the Company issued a convertible debenture for gross proceeds of \$4,000. The debenture matures on September 1, 2018. The terms of the debenture require the Company to pay the debenture investor a principal sum of \$7,500 with 8% annual interest upon maturity. The principal amount of the debenture together with interest may be converted into shares of Common Stock equal to fifty percent of the lowest trading price during the 30 days prior to the conversion.

On March 3, 2018, the Company hired a Chief Operating Officer for a base salary of \$42,500 and \$49,500 for the periods ending December 31, 2018 and 2019, respectively, payable in Common Stock of the Company at a conversion rate of \$0.125 per share.

On April 1, 2018, the Company issued a convertible debenture for gross proceeds of \$8,500. The debenture matures on October 1, 2018. The terms of the debenture require the Company to pay the debenture investor a principal sum of \$12,500 with 8% annual interest upon maturity. The principal amount of the debenture together with interest may be converted into shares of Common Stock equal to fifty percent of the lowest trading price during the 30 days prior to the conversion.

On April 1, 2018, the Company sold 150,000 shares of its Common Stock for \$10,500.

On June 1, 2018, the Company sold 150,000 shares of its Common Stock for \$10,500.

On July 2, 2018, the Company sold 160,000 shares of its Common Stock for \$4,000.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

This quarterly report on Form 10-Q and other reports filed by the Company from time to time with the U.S. Securities and Exchange Commission (collectively, the "Filings") contain or may contain forward-looking statements and information that are based upon beliefs of, and information currently available to, the Company's management as well as estimates and assumptions made by Company's management. Readers are cautioned not to place undue reliance on these forward-looking statements, which are only predictions and speak only as of the date hereof. When used in the

Filings, the words “anticipate,” “believe,” “estimate,” “expect,” “future,” “intend,” “plan,” or the negative of these terms and similar expressions as they relate to the Company or the Company’s management identify forward-looking statements. Such statements reflect the current view of the Company with respect to future events and are subject to risks, uncertainties, assumptions, and other factors. Should one or more of these risks or uncertainties materialize, or should the underlying assumptions prove incorrect, actual results may differ significantly from those anticipated, believed, estimated, expected, intended, or planned.

Although the Company believes that the expectations reflected in the forward-looking statements are reasonable, the Company cannot guarantee future results, levels of activity, performance, or achievements. Except as required by applicable law, including the securities laws of the United States, the Company does not intend to update any of the forward-looking statements to conform these statements to actual results.

Our financial statements are prepared in accordance with accounting principles generally accepted in the United States (“GAAP”). These accounting principles require us to make certain estimates, judgments and assumptions. We believe that the estimates, judgments and assumptions upon which we rely are reasonable based upon information available to us at the time that these estimates, judgments and assumptions are made. These estimates, judgments and assumptions can affect the reported amounts of assets and liabilities as of the date of the financial statements as well as the reported amounts of revenues and expenses during the periods presented. Our financial statements would be affected to the extent there are material differences between these estimates and actual results. In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require management’s judgment in its application. There are also areas in which management’s judgment in selecting any available alternative would not produce a materially different result. The following discussion should be read in conjunction with our financial statements and notes thereto appearing elsewhere in this report.

Overview

We began operating as a cannabis-delivery operation in California, in fiscal 2017, where we made deliveries to individuals who had a doctor's prescription for medical marijuana. We stopped our delivery operation activities in fiscal 2018, and entered into an asset purchase agreement that allows us to purchase 11 greenhouses, with equipment fixtures and supplies, and gives us the ability to assume ownership of 15 cannabis licenses in California. The licenses are for indoor cultivation, outdoor cultivation, processing, distribution and non-volatile extraction. Upon issuance of the licenses to our Company, we will issue a \$7,000,000 promissory note to the seller. We have already issued 20 million shares of common stock, valued at \$796,000 to the seller in conjunction with the purchase. We believe the value of the assets purchase in the three California locations and the 15 licenses is approximately \$11 million. We hired the seller of these properties to be our Chief Operating Officer.

In fiscal 2016 our efforts consisted of gold mining operations in Canada. However, those operations have been classified in our financial statements as discontinued operations, as we ceased operations and divested the Canadian subsidiary that was focused on mining.

Our limited operating history and the uncertain nature of our future operations and the markets we address or intend to address make prediction of our future results of operations difficult. Our operations may never generate significant revenues, and we may never achieve profitable operations.

Results of Operations

For the Three Months Ended September 30, 2016 Compared to the Three Months Ended September 30, 2015

General and administrative expenses increased by \$56,682 to \$70,707 for the three-months ended September 30, 2016 from \$14,025 reported in the three-months ended September 30, 2015. The increase is primarily attributable to an accrual for unpaid salary for our Chief Executive Officer of \$67,500 in the quarter ended September 30, 2016.

Professional fees increased by \$22,927 to \$32,545 for the three-months ended September 30, 2016 from \$9,618 reported in the three-months ended September 30, 2015. The increase is primarily attributable to legal fees related to our reverse split in September of 2016.

We incurred no consulting fees for the three-months ended September 30, 2016 as compared to \$48,733 in consulting fees in the three-months ended September 30, 2015. In fiscal 2016, prior management hired outside consultants, whereas current management did not incur this type of expense.

For the three months ended September 30, 2016 we had a loss on the change in value of derivative liabilities of \$57,918, as compared to a loss of \$2,164,425 in the three months ended September 30, 2015. In fiscal 2017, the loss was generated by an increase in the market value of the embedded derivative, as compared to the value when the debt originated. In fiscal 2016, the market value of the embedded derivative was significantly higher at September 30, 2015 than the market value when the debt originated.

Liquidity and Capital Resources

At September 30, 2016, we had cash and cash equivalents of \$0 and negative working capital of \$1,704,068 as compared to cash and cash equivalents of \$0 and negative working capital of \$1,525,926 at June 30, 2016.

Net cash used in operating activities amounted to \$6,700 and \$1,122 in the three-months ended September 30, 2016 and 2015, respectively. The principal use of cash from operating activities in the three-months ended September 30, 2016 was the net loss of \$196,290, which was offset by two non-cash items, amortization of debt discounts of \$26,984 and a change in the fair market value of derivatives of \$57,918. In addition, there was an increase in operating liabilities of approximately \$105,000. The principal use of cash from operating activities in the three-months ended September 30, 2015 was the net loss of \$2,246,933 which was offset by a non-cash item, a change in the fair market value of derivatives of \$2,164,425.

There was no investing activity in the three-months ended September 30, 2016 and 2015

Net cash provided by financing activities aggregated \$6,700 in the three-months ended September 30, 2016 were the proceeds of \$6,700 in convertible notes payable. There were no financing activities in the three-months ended September 30, 2015.

The accompanying financial statements have been prepared in conformity with generally accepted accounting principles, which contemplate continuation of our company as a going concern. However, we have sustained net losses from operations during the last several years, and we have very limited liquidity. Our operating losses have been funded through the issuance of equity securities and borrowings. Management anticipates that we will be dependent, for the near future, on our ability to obtain additional capital to fund our operating expenses and anticipated growth. The report of our independent registered public accounting firm expresses doubt about our ability to continue as a going concern. Our operating losses have been funded through the issuance of equity securities and borrowings.

Although we have improved our balance sheet with transactions to settle our debt, we continue to have liabilities in excess of our assets. We are working to settle our remaining liabilities and to raise cash to support our operating loss, and we continually consider a variety of possible sources. We are in default of most of our debt agreements. In the current economic environment, the procurement of outside funding is extremely difficult and there can be no assurance that such financing will be available, or, if available, that such financing will be at a price that will be acceptable to us. If we are unable to generate sufficient revenues or raise additional capital, our operations will terminate.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition or results of operations.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

We are a smaller reporting company as defined by Rule 12b-2 of the Securities Exchange Act of 1934, as amended, and are not required to provide information under this item.

Item 4. Controls and Procedures.

(a) Disclosure Controls and Procedures.

The Company's management, with the participation of the Company's principal executive officer ("PEO") / principal financial officer ("PFO"), evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this report. Based on this evaluation, the PEO / PFO concluded that, as of the end of such period, the Company's disclosure controls and procedures were not effective to ensure that information that is required to be disclosed by the Company in the reports it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to the Company's management, including the PEO / PFO, as appropriate, to allow timely decisions regarding required disclosure. The material weaknesses in our disclosure controls and procedures consisted of:

There is a lack of accounting personnel with the requisite knowledge of Generally Accepted Accounting Principles in the US ("GAAP") and the financial reporting requirements of the SEC;

There are insufficient written policies and procedures to insure the correct application of accounting and financial reporting with respect to the current requirements of GAAP and SEC disclosure requirements; and

There is a lack of segregation of duties, in that we only had one person performing all accounting-related duties.

(b) Changes in Internal Control Over Financial Reporting

There have not been any changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during our most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings.

We are currently not involved in any litigation that we believe could have a material adverse effect on our financial condition or results of operations. There is no action, suit, proceeding, inquiry or investigation before or by any court, public board, government agency, self-regulatory organization or body pending or, to the knowledge of the executive officers of our company or any of our subsidiaries, threatened against or affecting our company, our common stock, any of our subsidiaries or of our companies or our subsidiaries' officers or directors in their capacities as such, in which an adverse decision could have a material adverse effect.

Item 1A. Risk Factors.

We are a smaller reporting company as defined by Rule 12b-2 of the Securities Exchange Act of 1934, as amended, and are not required to provide information under this item.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

During the three-month period ended September 30, 2016, we issued 72,222 shares of common stock as a debt settlement of \$6,500.

Item 3. Defaults Upon Senior Securities.

None, except as described in Note 4 – Principal Financing Arrangements.

Item 4. Mine Safety Disclosures.

Not applicable.

Item 5. Other Information.

None.

Item 6. Exhibits.
