PART I FINANCIAL INFORMATION

We continue to operate under the conservatorship that commenced on September 6, 2008, under the direction of FHFA as our Conservator. The Conservator succeeded to all rights, titles, powers and privileges of Freddie Mac, and of any shareholder, officer or director thereof, with respect to the company and its assets. The Conservator has delegated certain authority to our Board of Directors to oversee, and management to conduct, day-to-day operations. The directors serve on behalf of, and exercise authority as directed by, the Conservator. See BUSINESS Conservatorship and Related Matters in our Annual Report on Form 10-K for the year ended December 31, 2010, or 2010 Annual Report, for information on the terms of the conservatorship, the powers of the Conservator, and related matters, including the terms of our Purchase Agreement with Treasury.

This Quarterly Report on Form 10-Q includes forward-looking statements that are based on current expectations and are subject to significant risks and uncertainties. These forward-looking statements are made as of the date of this Form 10-Q and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date of this Form 10-Q. Actual results might differ significantly from those described in or implied by such statements due to various factors and uncertainties, including those described in: (a) MD&A FORWARD-LOOKING STATEMENTS, and RISK FACTORS in this Form 10-Q and in the comparably captioned sections of our 2010 Annual Report and our Quarterly Report on Form 10-Q for the first quarter of 2011; and (b) the BUSINESS section of our 2010 Annual Report.

Throughout this Form 10-Q, we use certain acronyms and terms which are defined in the Glossary.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read this MD&A in conjunction with our consolidated financial statements and related notes for the three and six months ended June 30, 2011 included in FINANCIAL STATEMENTS, and our 2010 Annual Report.

EXECUTIVE SUMMARY

Overview

Freddie Mac is a GSE chartered by Congress in 1970 with a public mission to provide liquidity, stability, and affordability to the U.S. housing market. We have maintained a consistent market presence since our inception, providing mortgage liquidity in a wide range of economic environments. During the worst housing and financial crisis since the Great Depression, we are working to support the recovery of the housing market and the nation's economy by providing essential liquidity to the mortgage market and helping to stem the rate of foreclosures. We believe our actions are helping communities across the country by providing America's families with access to mortgage funding at low rates while helping distressed borrowers keep their homes and avoid foreclosure.

Summary of Financial Results

Our financial performance in the second quarter of 2011 was impacted by the ongoing weakness in the economy, including the mortgage market. Our total comprehensive income (loss) was \$(1.1) billion and \$(430) million for the second quarters of 2011 and 2010, respectively, consisting of: (a) \$(2.1) billion and \$(4.7) billion of net income (loss), respectively; and (b) \$1.0 billion and \$4.3 billion of total other comprehensive income, respectively.

Our total equity (deficit) was \$(1.5) billion at June 30, 2011, resulting from several contributing factors including our dividend payment of \$1.6 billion on our senior preferred stock on June 30, 2011 and our total comprehensive income (loss) of \$(1.1) billion for the second quarter of 2011. To address our deficit in net worth, FHFA, as Conservator, will submit a draw request on our behalf to Treasury under the Purchase Agreement for \$1.5 billion. Following receipt of the draw, the aggregate liquidation preference on the senior preferred stock owned by Treasury will increase to \$66.2 billion.

Our Primary Business Objectives

Under conservatorship, we are focused on: (a) meeting the needs of the U.S. residential mortgage market by making home ownership and rental housing more affordable by providing liquidity to mortgage originators and, indirectly, to mortgage borrowers; (b) working to reduce the number of foreclosures and helping to keep families in their homes, including through our role in the MHA Program initiatives, including HAMP and HARP, and through our non-HAMP workout initiatives; (c) minimizing our credit losses; (d) maintaining the credit quality of the loans we purchase and guarantee; and (e) strengthening our infrastructure and improving overall efficiency. Our business objectives reflect, in part, direction we have received from the Conservator. We also have a variety of different, and potentially competing,

Table of Contents

objectives based on our charter, public statements from Treasury and FHFA officials, and other guidance and directives from our Conservator. For more information, see *BUSINESS Conservatorship and Related Matters Impact of Conservatorship and Related Actions on Our Business* in our 2010 Annual Report.

Providing Mortgage Liquidity and Conforming Loan Availability

We provide liquidity and support to the U.S. mortgage market in a number of important ways:

Our support enables borrowers to have access to a variety of conforming mortgage products, including the prepayable 30-year fixed-rate mortgage which historically has represented the foundation of the mortgage market.

Our support provides lenders with a constant source of liquidity. We estimate that we, Fannie Mae, and Ginnie Mae collectively guaranteed more than 90% of the single-family conforming mortgages originated during the second quarter of 2011.

Our consistent market presence provides assurance to our customers that there will be a buyer for their conforming loans that meet our credit standards. We believe this provides our customers with confidence to continue lending in difficult environments.

We are an important counter-cyclical influence as we stay in the market even when other sources of capital have pulled out, as evidenced by the events of the last three years.

During the three and six months ended June 30, 2011, we guaranteed \$62.2 billion and \$157.9 billion in UPB of single-family conforming mortgage loans, respectively, representing more than 275,000 and 709,000 borrowers, respectively, who purchased homes or refinanced their mortgages.

Borrowers typically pay a lower interest rate on loans acquired or guaranteed by Freddie Mac, Fannie Mae, or Ginnie Mae. Mortgage originators are generally able to offer homebuyers and homeowners lower mortgage rates on conforming loan products, including ours, in part because of the value investors place on GSE-guaranteed mortgage-related securities. Prior to 2007, mortgage markets were less volatile, home values were stable or rising, and there were many sources of mortgage funds. We estimate that prior to 2007 the average effective interest rates on conforming single-family mortgage loans were about 30 basis points lower than on non-conforming loans. Since 2007, we estimate that interest rates on conforming loans, excluding conforming jumbo loans, have been lower than those on non-conforming loans by as much as 184 basis points. In June 2011, we estimate that borrowers were paying an average of 48 basis points less on these conforming loans than on non-conforming loans. These estimates are based on data provided by HSH Associates, a third-party provider of mortgage market data.

Reducing Foreclosures and Keeping Families in Homes

We are focused on reducing the number of foreclosures and helping to keep families in their homes. In addition to our participation in HAMP, we introduced several new initiatives during the last few years to help eligible borrowers keep their homes or avoid foreclosure, including our relief refinance mortgage initiative, which is our implementation of HARP. In the first half of 2011, we helped more than 116,000 borrowers either stay in their homes or sell their properties and avoid foreclosure through HAMP and our various other workout initiatives. Table 1 presents our recent single-family loan workout activities.

Table 1 Total Single-Family Loan Workout Volumes⁽⁴⁾

	For the Three Months Ended				
	06/30/2011	03/31/2011	12/31/2010	09/30/2010	06/30/2010
	(number of loans)				
Loan modifications	31,049	35,158	37,203	39,284	49,562
Repayment plans	7,981	9,099	7,964	7,030	7,455
Forbearance agreements ⁽²⁾	3,709	7,678	5,945	6,976	12,815
Short sales and deed-in-lieu transactions	11,038	10,706	12,097	10,472	9,542
Total single-family loan workouts	53,777	62,641	63,209	63,762	79,374

- (1) Based on actions completed with borrowers for loans within our single-family credit guarantee portfolio. Excludes those modification, repayment, and forbearance activities for which the borrower has started the required process, but the actions have not been made permanent, or effective, such as loans in the trial period under HAMP. Also excludes certain loan workouts where our single-family seller/servicers have executed agreements in the current or prior periods, but these have not been incorporated into certain of our operational systems, due to delays in processing. These categories are not mutually exclusive and a loan in one category may also be included within another category in the same period.
- (2) Excludes loans with long-term forbearance under a completed loan modification. Many borrowers complete a short-term forbearance agreement before another loan workout is pursued or completed. We only report forbearance activity for a single loan once during each quarterly period; however, a single loan may be included under separate forbearance agreements in separate periods.

Table of Contents

We continue to execute a high volume of loan workouts. Highlights of these efforts include the following:

We completed 53,777 single-family loan workouts during the second quarter of 2011, including 31,049 loan modifications and 11,038 short sales and deed-in-lieu transactions.

Based on information provided by the MHA Program administrator, our servicers had completed 134,282 loan modifications under HAMP from the introduction of the initiative in 2009 through June 30, 2011 and, as of June 30, 2011, 16,106 loans were in HAMP trial periods (this figure only includes borrowers who made at least their first payment under the trial period).

We continue to directly assist troubled borrowers through outreach and other efforts. In addition, on April 28, 2011, FHFA announced a new set of aligned standards for servicing by Freddie Mac and Fannie Mae. This servicing alignment initiative will result in consistent processes for both HAMP and non-HAMP workout solutions, and will be implemented over the course of 2011 and into 2012. As part of this initiative, we will implement a new non-HAMP loan modification process that, similar to the HAMP process, will require borrowers to complete a three month trial period. We believe that the servicing alignment initiative, which will establish a uniform framework and requirements for servicing non-performing loans owned or guaranteed by us and Fannie Mae, will ultimately change the way servicers communicate and work with troubled borrowers, bring greater consistency and accountability to the servicing industry, and help more distressed homeowners avoid foreclosure. For information on changes to mortgage servicing and foreclosure practices that could adversely affect our business, see **LEGISLATIVE AND REGULATORY MATTERS** Developments Concerning Single-Family Servicing Practices.

For more information about HAMP, other loan workout programs, our relief refinance mortgage initiative, and other initiatives to help eligible borrowers keep their homes or avoid foreclosure, see **RISK MANAGEMENT** Credit Risk *Mortgage Credit Risk* *Single-Family Mortgage Credit Risk* *MHA Program* and *Single-Family Loan Workouts*.

Minimizing Credit Losses

We establish guidelines for our servicers to follow and provide them default management tools to use, in part, in determining which type of loan workout would be expected to provide the best opportunity for minimizing our credit losses. We require our single-family seller/servicers to first evaluate problem loans for a repayment or forbearance plan before considering modification. If a borrower is not eligible for a modification, our seller/servicers pursue other workout options before considering foreclosure.

To help minimize the credit losses related to our guarantee activities, we are focused on:

pursuing a variety of loan workouts, including foreclosure alternatives, in an effort to reduce the severity of losses we experience over time;

managing foreclosure timelines to the extent possible, given the increasingly lengthy foreclosure process in many states;

managing our inventory of foreclosed properties to reduce costs and maximize proceeds; and

pursuing contractual remedies against originators, lenders, servicers, and insurers, as appropriate.

We have contractual arrangements with our seller/servicers under which they agree to provide us with mortgage loans that have been originated under specified underwriting standards. If we subsequently discover that contractual

standards were not followed, we can exercise certain contractual remedies to mitigate our credit losses. These contractual remedies include requiring the seller/servicer to repurchase the loan at its current UPB or make us whole for any credit losses realized with respect to the loan. As of June 30, 2011, the UPB of loans subject to repurchase requests issued to our single-family seller/servicers was approximately \$3.1 billion, and approximately 43% of these requests were outstanding for more than four months since issuance of our initial repurchase request. The amount we expect to collect on the outstanding requests is significantly less than the UPB amount primarily because many of these requests will likely be satisfied by reimbursement of our realized losses by seller/servicers, or may be rescinded in the course of the contractual appeals process. We continue to review loans and pursue our rights to issue repurchase requests to our counterparties, as appropriate. See RISK MANAGEMENT Credit Risk *Institutional Credit Risk Mortgage Seller/Servicers* for further information on our agreements with our seller/servicers.

Our credit loss exposure is also partially mitigated by mortgage insurance, which is a form of credit enhancement. Primary mortgage insurance is required to be purchased, at the borrower's expense, for certain mortgages with higher LTV ratios. We received payments under primary and other mortgage insurance of \$0.7 billion and \$1.3 billion in the three and six months ended June 30, 2011, respectively, which helped to mitigate our credit losses. We believe that in addition to Triad Guaranty Insurance Corp., or Triad (as discussed below), certain of our other mortgage insurance counterparties

Table of Contents

may lack sufficient ability to fully meet all of their expected lifetime claims paying obligations to us over the long term as such claims emerge. However, we evaluate the near term recovery from insurance policies for mortgage loans that we hold on our consolidated balance sheet as well as loans underlying our non-consolidated Freddie Mac mortgage-related securities and covered by other guarantee commitments as part of the estimate of our loan loss reserves. Based upon currently available information, we believe that all of our mortgage insurance counterparties, except for Triad, have the capacity to pay all claims as they become due in the normal course for the near term.

Maintaining the Credit Quality of New Loan Purchases and Guarantees

We continue to focus on maintaining credit policies, including our underwriting guidelines, that allow us to purchase and guarantee loans made to qualified borrowers that we believe will provide management and guarantee fee income, over the long-term, that exceeds our expected credit-related and administrative expenses on such loans.

As of June 30, 2011 and December 31, 2010, approximately 46% and 39%, respectively, of our single-family credit guarantee portfolio consisted of mortgage loans originated after 2008. Loans in our single-family credit guarantee portfolio originated after 2008 have experienced lower serious delinquency trends in the early years of their terms than loans originated in 2005 through 2008.

The credit quality of the single-family loans we acquired in the first half of 2011 (excluding relief refinance mortgages, which represented approximately 28% of our single family purchase volume during the first half of 2011) is significantly better than that of loans we acquired from 2005 through 2008, as measured by original LTV ratios, FICO scores, and the proportion of loans underwritten with fully documented income. The improvement in credit quality of loans we have purchased since 2008 is primarily the result of the combination of: (a) changes in our credit policies, including changes in our underwriting guidelines; (b) fewer purchases of loans with higher risk characteristics; and (c) changes in mortgage insurers and lenders underwriting practices.

Approximately 93% of our single-family purchase volume in the first half of 2011 consisted of fixed-rate amortizing mortgages. Approximately 70% and 79% of our single-family purchase volume in the three and six months ended June 30, 2011, respectively, was refinance mortgages, including approximately 26% and 28%, respectively, that were relief refinance mortgages, based on UPB. Relief refinance mortgages with LTV ratios above 80% may not perform as well as other refinance mortgages over time due, in part, to the continued high LTV ratios of these loans. Approximately 14% of our single-family purchase volume in the first half of 2011 was relief refinance mortgages with LTV ratios above 80%. Relief refinance mortgages comprised approximately 10% and 7% of the UPB in our total single-family credit guarantee portfolio at June 30, 2011 and December 31, 2010, respectively.

Table 2 presents the composition, loan characteristics, and serious delinquency rates of loans in our single-family credit guarantee portfolio, by year of origination at June 30, 2011.
