**Item 9. Regulation FD Disclosure**

The following information is furnished pursuant to Item 9, "Regulation FD Disclosure" and Item 12, "Disclosure of Results of Operation and Financial Condition". The information furnished in this Form 8-K and the Exhibit attached hereto shall not be treated as filed for purposes of the Securities Exchange Act of 1934, nor shall it be deemed incorporated by reference in any filing under the Securities Act of 1933, except as shall be expressly set forth by specific reference in such filing.

On October 30, 2003, Mettler-Toledo International Inc. ("Mettler-Toledo") issued a press release (the "Release") setting forth its financial results for the nine and three months ended September 30, 2003. A copy of the Release is furnished hereto as Exhibit 99.1 to this report.

Mettler-Toledo evaluated its operating performance for the nine and three months ended September 30, 2003 based on several factors, including (i) net earnings before restructuring charges, (ii) Adjusted Operating Income (both before and including restructuring charges), (iii) EBITDA and (iv) Free Cash Flow.

Net earnings before restructuring charges for the nine months ended September 30, 2003 represents Mettler-Toledo's net earnings before the impact of a restructuring charge, recorded in the three months ended March 31, 2003, related to the final union settlement on a manufacturing facility closure in France. Net earnings before restructuring charges and one-time tax gain in the nine month period ended September 30, 2002 represents Mettler-Toledo's net earnings before the impact of a restructuring charge, recorded in the three months ended June 30, 2002, related to headcount reductions and manufacturing transfers, and a one-time tax gain in respect of a tax restructuring program and related tax audits. Mettler-Toledo provides information on net earnings before restructuring charges and non-recurring items because it believes the information provides important financial information in measuring and comparing its operating performance on an ongoing basis. Mettler-Toledo wanted investors to be aware of the effects of restructuring charges and one-time tax gain on its operating results for the nine month periods ended September 30, 2003 and 2002. Net earnings before restructuring charges and one-time tax gain is not intended to represent net earnings under U.S. GAAP and should not be considered as an alternative to net earnings as an indicator of Mettler-Toledo's performance.

## Edgar Filing: METTLER TOLEDO INTERNATIONAL INC/ - Form 8-K

Mettler-Toledo defines Adjusted Operating Income as operating income (gross profit less research and development, selling, general and administrative expenses and restructuring charges) before amortization, interest expense and non-recurring costs. Mettler-Toledo believes it is important to present Adjusted Operating Income both before and including restructuring charges so that investors are aware of the effects of restructuring charges on its operating results for the nine month periods ended September 30, 2003 and 2002. As discussed in Mettler-Toledo's Annual Report on Form 10-K for the year ended December 31, 2002, Mettler-Toledo provides information on Adjusted Operating Income because Mettler-Toledo believes that Adjusted Operating Income provides important financial information in measuring and comparing its operating performance on an ongoing basis, and as such is used as an important performance measurement by management. In Mettler-Toledo's Annual Report on Form 10-K, it measured the operating performance of its segments using Adjusted Operating Income. Adjusted Operating Income is not intended to represent operating income under U.S. GAAP and should not be considered as an alternative to earnings before taxes as an indicator of Mettler-Toledo's performance.

Mettler-Toledo defines EBITDA as Adjusted Operating Income plus depreciation. Mettler-Toledo considers EBITDA an important indicator of the operational strength and performance of its businesses, including the ability to provide cash flows to service debt and fund capital expenditures. EBITDA is also used by Mettler-Toledo's financing sources as an important measure of its ability to service its debt and is used by its senior lenders in determining financial covenant compliance. EBITDA is not intended to represent operating income, earnings before taxes or other measures of financial performance under U.S. GAAP and should not be considered as an alternative to operating income or earnings before taxes as an indicator of Mettler-Toledo's performance.

Mettler-Toledo defines Free Cash Flow as net cash provided by operating activities less capital expenditures before restructuring and acquisition payments. Mettler-Toledo considers Free Cash Flow an important indicator of the operational strength and performance of its businesses. Free Cash Flow is not intended to represent the various cash flow measures recorded under U.S. GAAP (e.g. net cash provided by operating activities) and should not be considered as an alternative to such measures as an indicator of Mettler-Toledo's performance.

Mettler-Toledo believes each of these financial measures provides useful additional information to supplement the information provided under U.S. GAAP. Mettler-Toledo warns investors not to place undue reliance on any of these financial measures, and they should not be considered as a replacement of earnings before taxes, net earnings or net cash provided by operating activities determined under U.S. GAAP as a measure of its operating performance.

The Release provides a reconciliation of all of the above financial measures to the most comparable financial measures recorded under U.S. GAAP.

## Edgar Filing: METTLER TOLEDO INTERNATIONAL INC/ - Form 8-K

### METTLER-TOLEDO INTERNATIONAL INC. REPORTS THIRD QUARTER 2003 RESULTS

- - Increases EPS 4% - -  
- - Generates Strong Cash Flow - -

GREIFENSEE, Switzerland and COLUMBUS, Ohio, USA - October 30, 2003 - Mettler-Toledo International Inc. (NYSE: MTD) today announced net earnings of \$24.2 million, or \$0.53 per share on a diluted basis, for the quarter ended September 30, 2003. This represents a 4% increase over net earnings per share of \$0.51 for the third quarter of 2002.

For the nine-month periods ending September 30, net earnings per share were \$1.47 in 2003 and \$1.46 in 2002. These amounts exclude restructuring charges in both periods and a one-time tax gain in 2002. On a reported basis, net earnings per share were \$1.38 in 2003, versus \$1.52 in 2002.

Sales for the quarter were \$320.8 million, compared with \$307.0 million in 2002. This represents a 5% benefit from currency and flat local currency sales. Adjusted operating income amounted to \$39.8 million, compared with \$40.2 million in the prior year.

For the nine months ended September 30, 2003, the Company reported sales of \$934.0 million, compared with \$876.4 million for 2002. This represents a 7% increase in reported sales, consisting of an 8% benefit from currency and a 1% decline in local currency sales. Adjusted operating income in 2003 amounted to \$113.3 million, compared with \$113.8 million in the same period of 2002. Adjusted operating income after restructuring charges was \$107.8 million in 2003 and \$85.1 million in 2002.

Robert F. Spoerry, Chairman, President and Chief Executive Officer, stated, "We achieved our financial targets for the quarter even as we continue to operate in a challenging global economy. Although sales were flat in local currency, gross margins continued to increase over the prior year, thanks to cost-savings initiatives such as manufacturing consolidation. As expected, adjusted operating income in the quarter was constant with the prior year. Cash flow generation was very strong at \$36.7 million, which represents a 21% increase over the prior year amount. In the coming weeks, we plan to refinance our existing bank debt, which is due in May 2004, with a new bank facility that provides greater financial flexibility than our existing one. Given the attractiveness of longer-term interest rates, we are exploring options to raise debt in the capital markets in conjunction with this refinancing."

Spoerry concluded, "Our strategic initiatives remain firmly on track. Due to an accelerated R&D investment over the last few years, our product pipeline is at a record level. We began the rollout of our new laboratory products with a new generation of analytical balances. These instruments provide value to customers through enhanced throughput and better ergonomics. Other core growth initiatives, such as expanding our services offering and broadening our product portfolio in Asia, are also yielding benefits. We remain diligent in our cost-reduction initiatives and, in the fourth quarter, we will complete our transfer of production from South Carolina to China."

For the nine months ended September 30, 2003, the Company reported local currency sales declines of 4% in the Americas and 2% in Europe and sales growth of 14% in Asia and the Rest of World.

The Company has reconciled its diluted earnings per share before restructuring charges to its diluted earnings per share to be reported in the Company's Form 10-Q for the quarter and nine months ended September 30, 2003 on the comparative financial information schedules attached to this press release. Additional operational data has also been reconciled to the most comparable U.S. GAAP measure in the attached schedules.

The Company will host a conference call to discuss its third quarter results today (Thursday, October 30) at 5:00 p.m. Eastern Time. To hear a live webcast or replay of the call, visit the investor relations page on the Company's website at [www.mt.com](http://www.mt.com).

METTLER TOLEDO is a leading global manufacturer of precision instruments. The Company is the world's largest manufacturer and marketer of weighing instruments for use in laboratory, industrial and food retailing applications. The Company also holds top-three market positions in several related analytical instruments and is a leading provider of automated chemistry systems used in drug and chemical compound discovery and development. In addition, the Company is the world's largest manufacturer and marketer of metal detection systems used in production and packaging. Additional information about METTLER TOLEDO can be found on the World Wide Web at "[www.mt.com](http://www.mt.com)."

Statements in this discussion which are not historical facts may be considered "forward-looking statements" that involve risks and uncertainties. For a discussion of these risks and uncertainties, which could cause actual events or results to differ from those contained in the forward-looking statements, see Exhibit 99.1 to the Company's Annual Report on Form 10-K for the most recently ended fiscal year.
