**PACWEST BANCORP AND SUBSIDIARIES**

**Notes to Condensed Consolidated Financial Statements**

**(Unaudited)**

**NOTE 1 BASIS OF PRESENTATION**

PacWest Bancorp is a bank holding company registered under the Bank Holding Company Act of 1956, as amended. Our principal business is to serve as a holding company for our banking subsidiary, Pacific Western Bank, which we refer to as Pacific Western or the Bank. When we say "we", "our" or the "Company", we mean the Company on a consolidated basis with the Bank. When we refer to "PacWest" or to the holding company, we are referring to the parent company on a stand-alone basis.

Pacific Western is a full-service commercial bank offering a broad range of banking products and services including: accepting time, money market, and demand deposits; originating loans, including commercial, real estate construction, SBA-guaranteed and consumer loans; and providing other business-oriented products. Although our operations are primarily located in Southern California, we expanded our presence in California's Central Coast with the FDIC-assisted acquisition of Los Padres Bank on August 20, 2010. The Bank focuses on conducting business with small to medium-sized businesses in our marketplace and the owners and employees of those businesses. The majority of our loans are secured by the real estate collateral of such businesses. We also operate three banking offices in the San Francisco Bay area and one office in Arizona, all of which were acquired through FDIC-assisted acquisitions. Our asset-based lending function operates in Arizona, California, Texas, and the Pacific Northwest.

We generate our revenue primarily from interest received on loans and, to a lesser extent, from interest received on investment securities, and fees received in connection with deposit services, extending credit and other services offered, including foreign exchange services. Our major operating expenses are the interest paid by the Bank on deposits and borrowings, compensation and general operating expenses. The Bank relies on a foundation of locally generated deposits. The Bank has a relatively low cost of funds due to a high percentage of noninterest-bearing and low cost deposits.

We have completed 22 acquisitions since May 2000.

***Basis of Presentation***

The accounting and reporting policies of the Company are in accordance with U.S. generally accepted accounting principles, which we may refer to as GAAP. All significant intercompany balances and transactions have been eliminated.

Our financial statements reflect all adjustments that are, in the opinion of management, necessary to present a fair statement of the results for the interim periods presented. Certain information and note disclosures normally included in consolidated financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission. The interim operating results are not necessarily indicative of operating results for the full year.

***Use of Estimates***

Management of the Company has made a number of estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting period to prepare these consolidated financial statements in conformity with GAAP. Actual results could differ from those estimates. Material estimates subject to change in the near term include,

Table of Contents

**PACWEST BANCORP AND SUBSIDIARIES**

**Notes to Condensed Consolidated Financial Statements (Continued)**

**(Unaudited)**

**NOTE 1 BASIS OF PRESENTATION (Continued)**

among other items, the allowances for credit losses, the carrying value of other real estate owned, the carrying value of intangible assets, the carrying value of the FDIC loss sharing asset and the realization of deferred tax assets.

In August 2010, Pacific Western acquired assets and assumed liabilities of the former Los Padres Bank ("Los Padres") in an FDIC-assisted transaction, which we refer to as the Los Padres acquisition. The acquired assets and assumed liabilities were measured at their estimated fair values. Management made significant estimates and exercised significant judgment in estimating fair values and accounting for the acquired assets and assumed liabilities in the Los Padres acquisition.

***Reclassifications***

Certain prior period amounts have been reclassified to conform to the current period's presentation format. During the current quarter, we reclassified recoveries on covered loans such that recoveries now reduce the credit loss provision for covered loans rather than increase FDIC loss sharing income. Such reclassifications had no effect on reported net earnings or losses.

**NOTE 2 GOODWILL AND OTHER INTANGIBLE ASSETS**

Goodwill arises from business combinations and represents the excess of the purchase price over the fair value of the net assets and other identifiable intangible assets acquired. Goodwill and other intangible assets deemed to have indefinite lives generated from purchase business combinations are not subject to amortization and are instead tested for impairment no less than annually. Impairment is determined in accordance with ASC 350, "*Intangibles Goodwill and Other*" and is based on the reporting unit. Impairment exists when the carrying value of goodwill exceeds its implied fair value. An impairment loss would be recognized in an amount equal to that excess and would be included in noninterest expense in the consolidated statement of earnings (loss). Our annual impairment test of goodwill resulted in no impact on our results of operations and financial condition.

Goodwill in the amount of \$46.8 million was recorded in the Los Padres acquisition. During the second quarter of 2011, we reduced goodwill by \$7.6 million as the matter with the FDIC regarding the settlement accounting for a wholly-owned subsidiary in the Los Padres acquisition was resolved. A receivable for such amount was included in the FDIC loss sharing asset at June 30, 2011 and is expected to be received during the third quarter.

Our intangible assets with definite lives are core deposit intangibles, or CDI, and customer relationship intangibles, or CRI. These intangible assets are amortized over their useful lives to their estimated residual values and reviewed for impairment at least quarterly. The amortization expense represents the estimated decline in the value of the underlying deposits or loan customers acquired.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)****(Unaudited)****NOTE 2 GOODWILL AND OTHER INTANGIBLE ASSETS (Continued)**

The following table presents the changes in CDI and CRI and the related accumulated amortization for the periods indicated:

	Three Months Ended			Six Months Ended	
	June 30, 2011	March 31, 2011	June 30, 2010	June 30, 2011	June 30, 2010
	(In thousands)				
<b>Gross amount of CDI and CRI:</b>					
Balance, beginning of period	\$ 76,319	\$ 76,319	\$ 75,911	\$ 76,319	\$ 75,911
Fully amortized portion	(2,690)			(2,690)	
Balance, end of period	73,629	76,319	75,911	73,629	75,911
<b>Accumulated amortization:</b>					
Balance, beginning of period	(52,783)	(50,476)	(45,039)	(50,476)	(42,615)
Amortization	(2,308)	(2,307)	(2,424)	(4,615)	(4,848)
Fully amortized portion	2,690			2,690	
Balance, end of period	(52,401)	(52,783)	(47,463)	(52,401)	(47,463)
Net CDI and CRI, end of period	\$ 21,228	\$ 23,536	\$ 28,448	\$ 21,228	\$ 28,448

The aggregate amortization expense related to the intangible assets is expected to be \$8.4 million for 2011. The estimated aggregate amortization expense related to these intangible assets for each of the subsequent four years is \$6.1 million for 2012, \$4.5 million for 2013, \$2.9 million for 2014, and \$2.7 million for 2015.

**NOTE 3 INVESTMENT SECURITIES***Securities Available-for-Sale*

The amortized cost, gross unrealized gains and losses and estimated fair values of securities available-for-sale are presented in the tables below as of the dates indicated. The private label collateralized mortgage obligations were acquired in the FDIC-assisted acquisition of Affinity Bank ("Affinity") in August 2009 and are covered by a FDIC loss sharing agreement. Other securities include

Mortgage-backed securities have contractual terms to maturity and require periodic payments to reduce principal. In addition, expected maturities may differ from contractual maturities because obligors and/or issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

Due after five years through ten years	41,904	43,579
Due after ten years	983,826	999,789
<b>Total securities available-for-sale</b>	<b>\$ 1,039,995</b>	<b>\$ 1,057,992</b>

At June 30, 2011, the estimated fair value of debt securities and residential mortgage-backed debt securities issued by the Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac") was approximately \$900.6 million. We do not own any equity securities issued by Fannie Mae or Freddie Mac.

As of June 30, 2011, securities available-for-sale with an estimated fair value of \$91.9 million were pledged as collateral for borrowings, public deposits and other purposes as required by various statutes and agreements.

The following tables present the estimated fair values and the gross unrealized losses on securities by length of time the securities have been in an unrealized loss position as of the dates indicated:

We reviewed the securities that were in a continuous loss position less than 12 months and longer than 12 months at June 30, 2011, and concluded that their losses were a result of the level of market interest rates relative to the types of securities and not a result of the underlying issuers' abilities to repay. Accordingly, we determined that the securities were temporarily impaired. Additionally, we have no plans to sell these securities and believe that it is more likely than not we would not be required to sell these securities before recovery of their amortized cost. Therefore, we did not recognize the temporary impairment in the consolidated statements of earnings (loss).

***FHLB Stock***

At June 30, 2011, the Company had a \$50.6 million investment in Federal Home Loan Bank of San Francisco (FHLB) stock carried at cost. In January 2009, the FHLB announced that it suspended excess FHLB stock redemptions and dividend payments. Since this announcement, the FHLB has declared and paid cash dividends in 2010 and 2011, though at rates less than that paid in the past, and repurchased certain amounts of our excess stock. We evaluated the carrying value of our FHLB stock investment at June 30, 2011 and determined that it was not impaired. Our evaluation considered the long-term nature of the investment, the current financial and liquidity position of the FHLB, the actions being taken by the FHLB to address its regulatory situation, and our intent and ability to hold this investment for a period of time sufficient to recover our recorded investment.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)****(Unaudited)****NOTE 4 LOANS***Non-Covered Loans*

When we refer to non-covered loans we are referring to loans not covered by our FDIC loss sharing agreements.

The following table presents the credit risk rating categories for non-covered loans by portfolio segment and class as of the dates indicated. Nonclassified loans are those with a credit risk rating of either pass or special mention, while classified loans are those with a credit risk rating of either substandard or doubtful.

Our federal and state banking regulators, as an integral part of their examination process, periodically review the Company's loan risk rating classifications. Our regulators may require the Company to recognize rating downgrades based on their judgments related to information available to them at the time of their examinations. Risk rating downgrades generally result in higher provisions for credit losses.

At June 30, 2011 and December 31, 2010, the Company had no non-covered loans that were greater than 90 days past due and still accruing interest. It is the Company's policy to discontinue accruing interest when principal or interest payments are past due 90 days or when, in the opinion of management, there is a reasonable doubt as to collectibility of a loan in the normal course of business. At June 30, 2011, nonaccrual loans totaled \$65.3 million. Nonaccrual loans include \$14.2 million of loans 30 to 89 days past due and \$38.9 million of current loans which have been placed on nonaccrual status based on management's judgment regarding the collectibility of such loans.

Total	\$ 65,300	\$ 82,487	\$ 147,787	\$ 94,183
			\$ 89,272	\$ 183,455

The decrease in the real estate construction impaired loan segment is due to the foreclosure on undeveloped land located in Ventura County which secured two non-covered loans with an aggregate balance of \$23.0 million. The decrease in the commercial impaired loan segment is due to two loans that have performed in accordance with their restructured terms for at least 12 months and have been removed from this category.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)****(Unaudited)****NOTE 4 LOANS (Continued)*****Covered Loans***

We refer to the loans acquired in the Los Padres and Affinity acquisitions subject to loss sharing agreements with the FDIC as "covered loans" as we will be reimbursed for a substantial portion of any future losses on them under the terms of the agreements.

The following table reflects the carrying values of covered loans as of the dates indicated:

Loan Category	June 30, 2011	December 31, 2010
(In thousands)		
Multi-family	\$ 286,615	\$ 321,650
Commercial real estate	407,257	444,244
Single family	139,238	157,424

Commercial and industrial	24,135	34,828
Home equity lines of credit	6,235	5,916
Consumer	864	1,378
Total gross covered loans	931,687	1,052,741
Less: discount	(92,847)	(110,901)
Covered loans, net of discount	838,840	941,840
Less: allowance for loan losses	(32,888)	(33,264)
Covered loans, net	\$ 805,952	\$ 908,576

The following table summarizes the changes in the carrying amount of covered acquired impaired loans and accretable yield on those loans for the period indicated:

	Covered Acquired Impaired Loans	
	Carrying Amount	Accretable Yield
(In thousands)		
Balance, January 1, 2011	\$ 879,486	\$ (290,665)
Accretion	36,898	36,898
Payments received	(130,536)	
Increase in expected cash flows		(10,472)
Provision for credit losses	(8,800)	
Balance, June 30, 2011	\$ 777,048	\$ (264,239)

The table above excludes the covered loans from the Los Padres acquisition which are accounted for as non-impaired loans and totaled \$28.9 million and \$29.1 million at June 30, 2011 and December 31, 2010, respectively.

The following table presents the credit risk rating categories for covered loans by portfolio segment as of the dates indicated. Nonclassified loans are those with a credit risk rating of either pass or special

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)****(Unaudited)****NOTE 4 LOANS (Continued)**

mention, while classified loans are those with a credit risk rating of either substandard or doubtful. It should be noted, however, that these loans are covered by loss sharing agreements with the FDIC.

	June 30, 2011			December 31, 2010		
	Nonclassified	Classified	Total	Nonclassified	Classified	Total

Total covered loans	\$ 582,854	\$ 223,098	\$ 805,952	\$ 659,559	\$ 249,017	\$ 908,576

Our federal and state banking regulators, as an integral part of their examination process, periodically review the Company's loan risk rating classifications. Our regulators may require the Company to recognize rating downgrades based on their judgments related to information available to them at the time of their examinations.

**NOTE 6 FDIC LOSS SHARING ASSET**

The FDIC loss sharing asset was initially recorded at fair value, which represented the present value of the estimated cash payments from the FDIC for future losses on covered assets. The ultimate collectibility of this asset is dependent upon the performance of the underlying covered assets, the passage of time and claims paid by the FDIC. The following table presents the changes in the FDIC loss sharing asset for the period indicated:

	<b>FDIC Loss Sharing Asset (In thousands)</b>
Balance, January 1, 2011	\$ 116,352
FDIC share of additional losses, net of recoveries	6,906
Cash received from FDIC	(20,946)
Net accretion	594
FDIC goodwill settlement receivable	7,610
Balance, June 30, 2011	\$ 110,516

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)****(Unaudited)****NOTE 7 BORROWINGS, SUBORDINATED DEBENTURES AND BROKERED DEPOSITS*****Borrowings***

The following table summarizes our outstanding FHLB advances by their contractual maturity dates as of the date indicated:

Contractual Maturity Date	June 30, 2011		Next Date Callable by FHLB <sup>(1)</sup>
	Amount (In thousands)	Interest Rate	
December 11, 2017	\$ 200,000	3.16%	September 11, 2011
January 11, 2018	25,000	2.61%	October 11, 2011
<b>Total FHLB advances</b>	<b>\$ 225,000</b>	<b>3.10%</b>	

(1) Callable quarterly.

The FHLB advances outstanding at June 30, 2011 are each callable term advances. The maturities shown are the contractual maturities for the advances. The advances have each passed their initial call dates and are currently callable on a quarterly basis by the FHLB. While the FHLB may call the advances to be repaid for any reason, they are likely to be called if market interest rates, for borrowings of similar remaining term, are higher than the advances' stated rates on the call dates. We may repay the advances at any time with a prepayment penalty. Our aggregate remaining borrowing capacity under the FHLB secured lines of credit was \$1.1 billion at June 30, 2011. As of June 30, 2011, approximately \$2.8 billion of real estate and commercial loans and securities with a carrying value of \$44.9 million were pledged to secure our FHLB advances. Additionally, the Bank had secured borrowing capacity from the Federal Reserve discount window of \$390.5 million at June 30, 2011. As of June 30, 2011, \$474.8 million of real estate construction and commercial loans not pledged to the FHLB were pledged to secure the Federal Reserve borrowing capacity. The Bank also maintains unsecured lines of credit of \$92.0 million with correspondent banks for the purchase of overnight funds; these lines are subject to availability of funds.

***Subordinated Debentures***

The Company had an aggregate amount of \$129.4 million in subordinated debentures outstanding at June 30, 2011. These subordinated debentures were issued in seven separate series. Each issuance had a maturity of thirty years from its date of issue. The subordinated debentures were issued to trusts established by us or entities we have acquired, which in turn issued trust preferred securities, which totaled \$123.0 million at June 30, 2011. These trust preferred securities are considered Tier 1 capital for regulatory purposes.

With the exception of Trust I and Trust CI, the subordinated debentures are callable at par, only by the issuer, five years from the date of issuance, subject to certain exceptions. We were permitted to call the debentures in the first five years if the prepayment election related to one of the following three events: (i) a change in the tax treatment of the debentures stemming from a change in the IRS laws; (ii) a change in the regulatory treatment of the underlying trust preferred securities as Tier 1 capital; and (iii) a requirement to register the underlying trust as a registered investment company. However, redemption in the first five years was subject to a prepayment penalty. Trust I and Trust CI

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)****(Unaudited)****NOTE 7 BORROWINGS, SUBORDINATED DEBENTURES AND BROKERED DEPOSITS (Continued)**

may not be called for 10 years from the date of issuance unless one of the three events described above has occurred and then a prepayment penalty applies. In addition, there is a prepayment penalty if either of these debentures is called 10 to 20 years from the date of their issuance and they may be called at par after 20 years.

The proceeds of the subordinated debentures we originated were used primarily to fund several of our acquisitions and to augment regulatory capital. Interest payments made by the Company on subordinated debentures are considered dividend payments by the Federal Reserve Bank, or FRB. As such, notification to the FRB is required prior to our intent to pay such interest during any period in which our cumulative net earnings for previous four quarters are not sufficient to fund the interest payments due for those periods and the current period. Should the FRB object to payment of interest on the subordinated debentures, we would not be able to make the payments until approval is received.

The following table summarizes the terms of each issuance of the subordinated debentures outstanding as of June 30, 2011:

Series	Date Issued	March 31, 2011 Amount (In thousands)	Maturity Date	Earliest Call Date by Company Without Penalty	Fixed or Variable Rate	Rate Index	Current Rate <sup>(2)</sup>	Next Reset Date
Trust CI	3/23/00	\$ 10,310	3/8/30	3/8/20	Fixed	N/A	11.00%	N/A

Gross subordinated debentures		126,808						
Unamortized premium <sup>(3)</sup>		2,615						
Net subordinated debentures		\$ 129,423						

(1) These debentures may be called without prepayment penalty.

Edgar Filing: PACWEST BANCORP - Form 10-Q

(2) As of July 28, 2011.

(3) This amount represents the fair value adjustment on the subordinated debentures issued to the trusts of acquired companies.

As previously mentioned, the subordinated debentures were issued to trusts established by us, or entities we acquired, which in turn issued \$123.0 million of trust preferred securities. The Company includes in Tier 1 capital an amount of trust preferred securities equal to no more than 25% of the sum of all core capital elements, which is generally defined as shareholders' equity less goodwill, net of

Table of Contents

**PACWEST BANCORP AND SUBSIDIARIES**

**Notes to Condensed Consolidated Financial Statements (Continued)**

**NOTE 7 BORROWINGS, SUBORDINATED DEBENTURES AND BROKERED DEPOSITS (Continued)**

any related deferred income tax liability. At June 30, 2011, the amount of trust preferred securities included in Tier I capital was \$123.0 million.

***Brokered Deposits***

Brokered deposits totaled \$43.3 million at June 30, 2011 and are included in the interest-bearing deposits balance on the accompanying condensed consolidated balance sheets. Such amount represented customer deposits that were subsequently participated with other FDIC-insured financial institutions through the CDARS program as a means to provide FDIC deposit insurance coverage for the full amount of our customers' deposits.

**NOTE 8 COMMITMENTS AND CONTINGENCES**

***Lending Commitments***

The Bank is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the consolidated balance sheets. The contract or notional amounts of those instruments reflect the extent of involvement the Company has in particular classes of financial instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Commitments to extend credit totaled \$645.5 million and \$723.1 million at June 30, 2011 and December 31, 2010, respectively.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support private borrowing arrangements. Most guarantees expire within one year from the date of issuance. The Company generally requires collateral or other security to support financial instruments with credit risk. Standby letters of credit totaled \$31.6 million and \$23.7 million at June 30, 2011 and December 31, 2010, respectively.

The Company has investments in low income housing project partnerships, which provide the Company income tax credits, and in a few small business investment companies. As of June 30, 2011, the Company had commitments to contribute capital to these entities totaling \$7.4 million.

**NOTE 8 COMMITMENTS AND CONTINGENCES (Continued)**

*Legal Matters*

In the ordinary course of our business, we are party to various legal actions, which we believe are incidental to the operation of our business. The outcome of such legal actions and the timing of ultimate resolution are inherently difficult to predict. Because of these factors, the Company cannot provide a meaningful estimate of the range of reasonably possible outcomes of claims in the aggregate or by individual claim. In the opinion of management, based upon information currently available to us, any resulting liability is not likely to have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

**NOTE 9 FAIR VALUE MEASUREMENTS**

ASC 820, *Fair Value Measurements and Disclosures*, defines fair value, establishes a framework for measuring fair value including a three-level valuation hierarchy, and expands disclosures about fair value measurements. Fair value is defined as the exchange price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date reflecting assumptions that a market participant would use when pricing an asset or liability. The hierarchy uses three levels of inputs to measure the fair value of assets and liabilities as follows:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2: Observable inputs other than Level 1, including quoted prices for similar assets and liabilities in active markets, quoted prices in less active markets, or other observable inputs that can be corroborated by observable market data, either directly or indirectly, for substantially the full term of the financial instrument. This category generally includes U.S. government and agency securities.

Level 3: Inputs to a valuation methodology that are unobservable, supported by little or no market activity, and significant to the fair value measurement. These valuation methodologies generally include pricing models, discounted cash flow models, or a determination of fair value that requires significant management judgment or estimation. This category also includes observable inputs from a pricing service not corroborated by observable market data, such as pricing covered private label CMOs.

We use fair value to measure certain assets on a recurring basis, primarily securities available-for-sale; we have no liabilities being measured at fair value. For assets measured at the lower of cost or fair value, the fair value measurement criteria may or may not be met during a reporting period and such measurements are therefore considered "nonrecurring" for purposes of disclosing our fair value measurements. Fair value is used on a nonrecurring basis to adjust carrying values for impaired loans and other real estate owned and also to record impairment on certain assets, such as goodwill, core deposit intangibles and other long-lived assets.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)****(Unaudited)****NOTE 9 FAIR VALUE MEASUREMENTS (Continued)**

The following tables present information on the assets measured and recorded at fair value on a recurring and nonrecurring basis as of the date indicated:

	Fair Value Measurement as of June 30, 2011			
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	(In thousands)			
<b>Measured on a Recurring Basis:</b>				
Securities available-for-sale:				
Municipal securities	\$ 24,059	\$	\$ 24,059	\$
Government and government-sponsored entity residential mortgage-backed securities	982,137		982,137	
Covered private label CMOs	49,501			49,501
Other securities	2,295		2,295	
	\$ 1,057,992	\$	\$ 1,008,491	\$ 49,501
<b>Measured on a Nonrecurring Basis:</b>				
Non-covered impaired loans	\$ 82,143	\$	\$ 13,491	\$ 68,652
Non-covered other real estate owned	32,425		965	31,460
Covered other real estate owned	5,689		1,964	3,725
SBA loan servicing asset	1,327			1,327
	\$ 121,584	\$	\$ 16,420	\$ 105,164

There were no significant transfers of assets between Level 1 and Level 2 of the fair value hierarchy during the three months ended June 30, 2011.

The following table presents gains and (losses) on assets measured on a nonrecurring basis for the periods indicated:

	Three Months Ended June 30, 2011	Six Months Ended June 30, 2011
	(In thousands)	
Non-covered impaired loans	\$ (6,593)	\$ (14,206)
Non-covered other real estate owned	(1,898)	(2,273)
Covered other real estate owned	(569)	(983)
SBA loan servicing asset		(70)
Total gain (loss) on assets measured on a nonrecurring basis	\$ (9,060)	\$ (17,532)

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)****(Unaudited)****NOTE 9 FAIR VALUE MEASUREMENTS (Continued)**

The following table summarizes activity for assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the period indicated:

	<b>Covered Private Label CMOs (Level 3)</b>
	<b>(In thousands)</b>
Beginning as of January 1, 2011	\$ 50,437
Total realized in earnings	1,144
Total unrealized in comprehensive income	1,570
Net settlements	(3,650)
Balance as of June 30, 2011	\$ 49,501

ASC Topic 825, *Financial Instruments*, requires disclosure of the estimated fair value of certain financial instruments and the methods and significant assumptions used to estimate such fair values. Additionally, certain financial instruments and all nonfinancial instruments are excluded from the applicable disclosure requirements. The following table is a summary of the carrying values and estimated fair values of certain financial instruments as of the dates indicated:

	<b>June 30, 2011</b>		<b>December 31, 2010</b>	
	<b>Carrying or Contract Amount</b>	<b>Estimated Fair Value</b>	<b>Carrying or Contract Amount</b>	<b>Estimated Fair Value</b>
	<b>(In thousands)</b>			
<b>Financial Assets:</b>				
Cash and due from banks	\$ 91,405	\$ 91,405	\$ 82,170	\$ 82,170
Interest-earning deposits in financial institutions	59,100	59,100	26,382	26,382
Securities available-for-sale	1,057,992	1,057,992	874,016	874,016
Investment in FHLB stock	50,591	50,591	55,040	55,040
Loans, net	3,622,661	3,611,589	3,970,978	3,960,244
<b>Financial Liabilities:</b>				
Deposits	4,486,495	4,499,393	4,649,698	4,664,575
Borrowings	225,000	245,128	225,000	243,273
Subordinated debentures	129,423	135,117	129,572	135,876

The following is a description of the valuation methodologies used to measure our assets recorded at fair value (under ASC Topic 820) and for estimating fair value for financial instruments not recorded at fair value (under ASC Topic 825).

**Cash and due from banks.** The carrying amount is assumed to be the fair value because of the liquidity of these instruments.

**Interest-earning deposits in financial institutions.** The carrying amount is assumed to be the fair value given the short-term nature of these deposits.

Table of Contents

**PACWEST BANCORP AND SUBSIDIARIES**

**Notes to Condensed Consolidated Financial Statements (Continued)**

**(Unaudited)**

**NOTE 9 FAIR VALUE MEASUREMENTS (Continued)**

**Securities available-for-sale.** Securities available-for-sale are measured and carried at fair value on a recurring basis. Unrealized gains and losses on available-for-sale securities are reported as a component of accumulated other comprehensive income on the condensed consolidated balance sheets. See Note 3 for further information on unrealized gains and losses on securities available-for-sale.

In determining the fair value of the securities categorized as Level 2, we obtain a report from a nationally recognized broker-dealer detailing the fair value of each investment security we hold as of each reporting date. The broker-dealer uses observable market information to value our fixed income securities, with the primary source being a nationally recognized pricing service. The fair value of the municipal securities is based on a proprietary model maintained by the broker-dealer. We review the market prices provided by the broker-dealer for our securities for reasonableness based on our understanding of the marketplace and we consider any credit issues related to the bonds. As we have not made any adjustments to the market quotes provided to us and they are based on observable market data, they have been categorized as Level 2 within the fair value hierarchy.

Our covered private label collateralized mortgage obligation securities, which we refer to as private label CMOs, are categorized as Level 3 due in part to the inactive market for such securities. There is a wide range of prices quoted for private label CMOs among independent third party pricing services and this range reflects the significant judgment being exercised over the assumptions and variables that determine the pricing of such securities. We consider this subjectivity to be a significant unobservable input and have concluded the private label CMOs should be categorized as a Level 3 measured asset. While the private label CMOs may be based on significant unobservable inputs, our fair value was based on prices provided to us by a nationally recognized pricing service which we also use to determine the fair value of the majority of our securities portfolio. We determined the reasonableness of the fair values by reviewing assumptions at the individual security level about prepayment, default expectations, estimated severity loss factors, projected cash flows and estimated collateral performance, all of which are not directly observable in the market.

**FHLB stock.** The fair value of FHLB stock is based on our recorded investment. In January 2009, the FHLB announced that it had suspended excess FHLB stock redemptions and dividend payments. Since this announcement, the FHLB has declared and paid cash dividends in 2010 and 2011, though at rates less than that paid in the past, and repurchased certain amounts of our excess stock. As a result of these actions, we evaluated the carrying value of our FHLB stock investment. Based on the FHLB's most recent publicly available financial results, its capital position and its bond ratings, we concluded such investment was not impaired at either June 30, 2011 or December 31, 2010.

**Non-covered loans.** As non-covered loans are not measured at fair value, the following discussion relates to estimating the fair value disclosures under ASC Topic 825. Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type and further segmented into fixed and adjustable rate interest terms and by credit risk categories. The fair value estimates do not take into consideration the value of the loan portfolio in the event the loans are sold outside the parameters of normal operating activities. The fair value of performing fixed rate loans is estimated by discounting scheduled cash flows through the estimated maturity using estimated market prepayment speeds and estimated market discount rates that reflect the credit and interest rate risk inherent in the loans. The estimated market discount rates used for performing fixed rate loans are the

**PACWEST BANCORP AND SUBSIDIARIES**

**Notes to Condensed Consolidated Financial Statements (Continued)**

**(Unaudited)**

**NOTE 9 FAIR VALUE MEASUREMENTS (Continued)**

Company's current offering rates for comparable instruments with similar terms. The fair value of performing adjustable rate loans is estimated by discounting scheduled cash flows through the next repricing date. As these loans reprice frequently at market rates and the credit risk is not considered to be greater than normal, the market value is typically close to the carrying amount of these loans.

**Non-covered impaired loans.** Nonaccrual loans and performing restructured loans are considered impaired for reporting purposes and are measured and recorded at fair value on a non-recurring basis. Non-covered nonaccrual loans with an unpaid principal balance over \$250,000 and all performing restructured loans are reviewed individually for the amount of impairment, if any. Non-covered nonaccrual loans with an unpaid principal balance of \$250,000 or less are evaluated for impairment collectively. To the extent a loan is collateral dependent, we measure such impaired loan based on the estimated fair value of the underlying collateral. The fair value of each loan's collateral is generally based on estimated market prices from an independently prepared appraisal, which is then adjusted for the cost related to liquidating such collateral; such valuation inputs result in a nonrecurring fair value measurement that is categorized as a Level 2 measurement. When adjustments are made to an appraised value to reflect various factors such as the age of the appraisal or known changes in the market or the collateral, such valuation inputs are considered unobservable and the fair value measurement is categorized as a Level 3 measurement. The impaired loans categorized as Level 3 also include unsecured loans and other secured loans whose fair values are based significantly on unobservable inputs such as the strength of a guarantor, including an SBA government guarantee, cash flows discounted at the effective loan rate, and management's judgment. The non-covered impaired loan balances shown above represent those nonaccrual and restructured loans for which impairment was recognized during the three and six months ended June 30, 2011. The amounts shown as losses represent, for the loan balances shown, the impairment recognized during the three and six months ended June 30, 2011. We recorded \$2.1 million and \$5.4 million in losses on impaired loans for the three and six months ended June 30, 2011, respectively, for loans with a fair value of zero as of June 30, 2011. Of the \$65.3 million of nonaccrual loans at June 30, 2011, \$19.8 million were written down to their fair values through charge-offs during the quarter.

**Other real estate owned.** The fair value of foreclosed real estate, both non-covered and covered, is generally based on estimated market prices from independently prepared current appraisals or negotiated sales prices with potential buyers, less estimated costs to sell; such valuation inputs result in a fair value measurement that is categorized as a Level 2 measurement on a nonrecurring basis. As a matter of policy, appraisals are required annually and may be updated more frequently as circumstances require in the opinion of management. With the deterioration of real estate values during this economic downturn, appraisals have been obtained more regularly and as a result our Level 2 measurement is based on appraisals that are generally less than nine months old. When a current appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value as a result of known changes in the market or the collateral and there is no observable market price, such valuation inputs result in a fair value measurement that is categorized as a Level 3 measurement. To the extent a negotiated sales price or reduced listing price represents a significant discount to an observable market price, such valuation input would result in a fair value measurement that is also considered a Level 3 measurement. The OREO losses shown above

Table of Contents

**PACWEST BANCORP AND SUBSIDIARIES**

**Notes to Condensed Consolidated Financial Statements (Continued)**

**(Unaudited)**

**NOTE 9 FAIR VALUE MEASUREMENTS (Continued)**

are write-downs based on either a recent appraisal obtained after foreclosure or an accepted purchase offer by an independent third party received after foreclosure.

**SBA servicing asset.** In accordance with ASC Topic 860, *Accounting for Servicing of Financial Assets*, the SBA servicing asset, included in other assets in the condensed consolidated balance sheets, is carried at its implied fair value. The fair value of the servicing asset is estimated by discounting future cash flows using market-based discount rates and prepayment speeds. The discount rate is based on the current US Treasury yield curve, as published by the Department of the Treasury, plus a spread for the marketplace risk associated with these assets. We utilize estimated prepayment vectors using SBA prepayment information provided by Bloomberg for pools of similar assets to determine the timing of the cash flows. These nonrecurring valuation inputs are considered to be Level 3 inputs.

**Deposits.** Deposits are carried at historical cost. The fair value of deposits with no stated maturity, such as noninterest bearing demand deposits, savings and checking accounts, is equal to the amount payable on demand as of the balance sheet date. The fair value of time deposits is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities. No value has been separately assigned to the Company's long-term relationships with its deposit customers, such as a core deposit intangible.

**Borrowings.** Borrowings are carried at amortized cost. The fair value of fixed rate borrowings is calculated by discounting scheduled cash flows through the estimated maturity dates or call dates, if applicable, using estimated market discount rates that reflect current rates offered for borrowings with similar remaining maturities and characteristics.

**Subordinated debentures.** Subordinated debentures are carried at amortized cost. The fair value of the subordinated debentures is based on the discounted value of contractual cash flows for fixed rate securities. The discount rate is estimated using the rates currently offered for similar securities of similar maturity. The fair value of subordinated debentures with variable rates is deemed to be the carrying value.

**Commitments to extend credit and standby letters of credit.** The majority of our commitments to extend credit carry current market interest rates if converted to loans. Because these commitments are generally unassignable by either the borrower or us, they only have value to the borrower and us. The estimated fair value approximates the recorded deferred fee amounts and is not disclosed as it is not material.

**Limitations**

Fair value estimates are made at a specific point in time and are based on relevant market information and information about the financial instrument. These estimates do not reflect income taxes or any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a portion of the Company's financial instruments, fair value estimates are based on what management believes to be conservative judgments regarding expected future cash flows, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimated fair values are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot

Table of Contents

## PACWEST BANCORP AND SUBSIDIARIES

## Notes to Condensed Consolidated Financial Statements (Continued)

(Unaudited)

**NOTE 9 FAIR VALUE MEASUREMENTS (Continued)**

be determined with precision. Changes in assumptions could significantly affect the estimates. Since the fair values have been estimated as of June 30, 2011, the amounts that will actually be realized or paid at settlement or maturity of the instruments could be significantly different.

**NOTE 10 NET EARNINGS (LOSS) PER SHARE**

The following is a summary of the calculation of basic and diluted net earnings (loss) per share for the periods indicated:

	Three Months Ended			Six Months Ended	
	June 30, 2011	March 31, 2011	June 30, 2010	June 30, 2011	2010
(In thousands, except per share data)					
<b>Basic Earnings (Loss) Per Share:</b>					
Net earnings (loss)	\$ 12,841	\$ 10,676	\$ 2,705	\$ 23,517	\$ (57,828)
Less: earnings allocated to unvested restricted stock <sup>(1)</sup>	(600)	(386)	(99)	(976)	(17)
Net earnings (loss) allocated to common shares	\$ 12,241	\$ 10,290	\$ 2,606	\$ 22,541	\$ (57,845)
Weighted-average basic shares and unvested restricted stock outstanding	37,239.8	36,801.7	36,732.9	37,021.9	36,173.4
Less: weighted-average unvested restricted stock outstanding	(1,768.2)	(1,347.6)	(1,420.6)	(1,559.0)	(1,333.6)
Weighted-average basic shares outstanding	35,471.6	35,454.1	35,312.3	35,462.9	34,839.8
Basic earnings (loss) per share	\$ 0.35	\$ 0.29	\$ 0.07	\$ 0.64	\$ (1.66)
<b>Diluted Earnings (Loss) Per Share:</b>					
Net earnings (loss) allocated to common shares	\$ 12,241	\$ 10,290	\$ 2,606	\$ 22,541	\$ (57,845)
Weighted-average basic shares outstanding	35,471.6	35,454.1	35,312.3	35,462.9	34,839.8
Add: warrants outstanding			86.8		
Weighted-average diluted shares outstanding	35,471.6	35,454.1	35,399.1	35,462.9	34,839.8
Diluted earnings (loss) per share	\$ 0.35	\$ 0.29	\$ 0.07	\$ 0.64	\$ (1.66)

(1) Represents cash dividends paid to holders of unvested restricted stock, net of estimated forfeitures, plus undistributed earnings amounts available to holders of unvested restricted stock, if any.

Table of Contents**PACWEST BANCORP AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Continued)****(Unaudited)****NOTE 11 STOCK COMPENSATION PLANS*****Restricted Stock***

At June 30, 2011, there were outstanding 920,664 shares of unvested time-based restricted common stock and 850,000 shares of unvested performance-based restricted common stock. The awarded shares of time-based restricted common stock vest over a service period of three to five years from date of the grant. The awarded shares of performance-based restricted common stock vest in full on the date the Compensation, Nominating and Governance, or CNG, Committee of the Board of Directors, as Administrator of the Company's 2003 Stock Incentive Plan, or the 2003 Plan, determines that the Company achieved certain financial goals established by the CNG Committee as set forth in the grant documents. Both time-based and performance-based restricted common stock vest immediately upon a change in control of the Company as defined in the 2003 Plan and upon death of the employee.

In March 2011, the CNG awarded 350,000 shares of performance-based restricted common stock, which will expire on March 31, 2016 if the net earnings performance target established for such awards is not met. Such restricted stock will vest upon a change in control, however, as defined in the 2003 Plan. We have determined that it is not probable at the present time that the net earnings performance target will be achieved. Accordingly, no expense is being recognized for these shares.

Compensation expense related to time-based restricted stock awards is based on the fair value of the underlying stock on the award date and is recognized over the vesting period using the straight-line method. Restricted stock amortization totaled \$2.1 million, \$2.0 million, and \$2.2 million for the three months ended June 30, 2011, March 31, 2011, and June 30, 2010, respectively, and \$4.1 million and \$4.4 million for the six months ended June 30, 2011 and 2010, respectively. Such amounts are included in compensation expense on the accompanying condensed consolidated statements of earnings (loss).

Currently no compensation expense is being recognized for any performance-based restricted stock awards as management has concluded that it is improbable that the respective financial targets for any outstanding performance-based restricted stock awards will be met. If and when the attainment of such financial targets is deemed probable in future periods, a catch-up adjustment will be recorded and amortization of such performance-based restricted stock will begin again. The total amount of unrecognized compensation expense related to all performance-based restricted stock for which amortization was suspended or has not commenced totaled \$33.8 million at June 30, 2011 as presented in the following table.

	Number of Shares Outstanding	June 30, 2011 Unrecognized Compensation Expense (in thousands)	Expiration Year of Award
Performance-based restricted stock awarded in:			
2006	275,000	\$ 14,924	2013
2007	205,000	11,259	2017
2008	20,000	453	2013
2011	350,000	7,161	2016
Outstanding performance-based restricted stock awards	850,000	\$ 33,797	

Table of Contents

**PACWEST BANCORP AND SUBSIDIARIES**

**Notes to Condensed Consolidated Financial Statements (Continued)**

**(Unaudited)**

**NOTE 11 STOCK COMPENSATION PLANS (Continued)**

The Company's 2003 Plan permits stock based compensation awards to officers, directors, key employees and consultants. The 2003 Plan authorizes grants of stock-based compensation instruments to purchase or issue up to 5,000,000 shares of authorized but unissued Company common stock, subject to adjustments provided by the 2003 Plan. In May 2011, the Board of Directors approved the equity award of 13,740 common shares to non-employee directors of the Company. Such shares were granted outright and vested immediately with a charge to other noninterest expense of \$300,000 at that time. As of June 30, 2011, there were 582,791 shares available for grant under the 2003 Plan.

**NOTE 12 RECENT ACCOUNTING PRONOUNCEMENTS**

In January 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2011-01, "*Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings in Update No. 2010-20.*" ASU 2011-01 temporarily deferred the effective date for disclosures related to troubled debt restructurings in paragraphs 310-10-50-31 through 50-34 of ASU 2010-20, "*Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses,*" to be concurrent with the effective date of proposed guidance to be issued at a later date in identifying a troubled debt restructuring. This guidance was issued by the FASB in April 2011 as ASU 2011-02, "*A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring.*" ASU 2011-02 clarifies the guidance in determining whether a creditor has granted a concession and whether a debtor is experiencing financial difficulties for purposes of determining whether a debt restructuring constitutes a troubled debt restructuring. ASU 2011-02 is effective for the first interim or annual period beginning on or after June 15, 2011 and should be applied retrospectively to the beginning of the annual period of adoption. The troubled debt restructuring disclosure information required by paragraphs 310-10-50-33 through 50-34 of ASU 2010-20 is effective for the interim and annual period beginning on or after June 15, 2011. We have not as yet determined what effect, if any, adoption of this standard will have on our financial statements and related disclosures.

In May 2011, the FASB issued ASU 2011-04, "*Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs.*" ASU 2011-04 was issued concurrently with IFRS 13, "*Fair Value Measurements,*" to provide largely identical guidance about fair value measurement and disclosure requirements. This Update does not extend the use of fair value but, rather, provides guidance about how fair value should be applied where it already is required or permitted under U.S. GAAP or International Financial Reporting Standards (IFRSs). For U.S. GAAP, most of the changes are clarifications of existing guidance or wording changes to align with IFRS 13. ASU 2011-04 is effective prospectively for interim and annual periods beginning after December 15, 2011. Early adoption is not permitted. In the period of adoption, a reporting entity will be required to disclose a change, if any, in valuation technique and related inputs that result from applying this Update and to quantify the total effect, if practicable. We have not as yet determined what effect, if any, adoption of this Update will have on our financial statements and related disclosures.

In June 2011, the FASB issued ASU 2011-05, "*Comprehensive Income (Topic 220): Presentation of Comprehensive Income.*" Under ASU 2011-05, an entity will have the option to present the components of net income and comprehensive income in either one or two consecutive financial statements. This standard eliminates the option in U.S. GAAP to present other comprehensive income in the statement

Table of Contents

**PACWEST BANCORP AND SUBSIDIARIES**

**Notes to Condensed Consolidated Financial Statements (Continued)**

**(Unaudited)**

**NOTE 12 RECENT ACCOUNTING PRONOUNCEMENTS (Continued)**

of changes in equity. ASU 2011-05 should be applied retrospectively and is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. Early adoption is permitted. Adoption of this standard will not have a material effect on our financial statements.

**NOTE 13 SUBSEQUENT EVENTS**

We have evaluated events that have occurred subsequent to June 30, 2011 and have concluded there are no subsequent events that would require recognition or disclosure in the accompanying condensed consolidated financial statements.

Table of Contents

**ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

**Forward-Looking Information**

This Quarterly Report on Form 10-Q contains certain forward-looking information about the Company and its subsidiaries, which statements are intended to be covered by the safe harbor for "forward-looking statements" provided by the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact are forward-looking statements. Such statements involve inherent risks and uncertainties, many of which are difficult to predict and are generally beyond the control of the Company. We caution readers that a number of important factors could cause actual results to differ materially from those expressed in, implied or projected by, such forward-looking statements. Risks and uncertainties include, but are not limited to:

lower than expected revenues;

credit quality deterioration or pronounced and sustained reduction in real estate market values could cause an increase in the allowance for credit losses and a reduction in earnings;

increased competitive pressure among depository institutions;

the Company's ability to complete future acquisitions and to successfully integrate such acquired entities or achieve expected benefits, synergies and/or operating efficiencies within expected time-frames or at all;

the possibility that personnel changes will not proceed as planned;

the cost of additional capital is more than expected;

a change in the interest rate environment reduces interest margins;

asset/liability repricing risks and liquidity risks;

pending legal matters may take longer or cost more to resolve or may be resolved adversely to the Company;

general economic conditions, either nationally or in the market areas in which the Company does or anticipates doing business, are less favorable than expected;

environmental conditions, including natural disasters, may disrupt our business, impede our operations, negatively impact the values of collateral securing the Company's loans or impair the ability of our borrowers to support their debt obligations;

the economic and regulatory effects of the continuing war on terrorism and other events of war, including the conflicts in Iraq, Afghanistan, and neighboring countries;

legislative or regulatory requirements or changes adversely affecting the Company's business;

## Edgar Filing: PACWEST BANCORP - Form 10-Q

changes in the securities markets; and

regulatory approvals for any capital activities cannot be obtained on the terms expected or on the anticipated schedule.

Long-term credit ratings on the United States government and federal agencies have been lowered to AA+ from AAA; the short-term rating of A-1+ was unchanged. These credit rating downgrades could disrupt the financial and liquidity markets, causing deposit volatility, reduced liquidity sources and declines in the fair values of debt securities issued by the United States government, federal agencies, government-sponsored entities and state and local governments. This downgrade is currently not expected to have a negative impact on a bank's regulatory capital calculations as shortly after the downgrade announcement, the FDIC, jointly with other banking regulators, issued a press release stating that risk weights for and treatment of United States Treasury securities and other securities

## Edgar Filing: PACWEST BANCORP - Form 10-Q

### Table of Contents

issued or guaranteed by the United States government, government agencies, and government-sponsored entities will not change. At June 30, 2011, the investments we own that may be impacted by this downgrade total approximately \$1.0 billion and include debt securities issued by the United States government, federal agencies, government-sponsored entities and state and local governments. See Note 3, *Investment Securities*, in the Notes to Condensed Consolidated Financial Statements (Unaudited) contained in "Item 1. Condensed Consolidated Financial Statements (Unaudited)," for information on our investments in debt securities.

If any of these risks or uncertainties materializes, or if any of the assumptions underlying such forward-looking statements proves to be incorrect, our results could differ materially from those expressed in, implied or projected by, such forward-looking statements. The Company assumes no obligation to update such forward-looking statements.

### **Overview**

We are a bank holding company registered under the Bank Holding Company Act of 1956, as amended. Our principal business is to serve as the holding company for our subsidiary bank, Pacific Western Bank, which we refer to as Pacific Western or the Bank.

Pacific Western is a full-service commercial bank offering a broad range of banking products and services including: accepting time, money market, and demand deposits; originating loans, including commercial, real estate construction, SBA-guaranteed and consumer loans; and providing other business-oriented products. Although our operations are primarily located in Southern California, we expanded our presence in California's Central Coast with the FDIC-assisted acquisition of Los Padres Bank on August 20, 2010. The Bank focuses on conducting business with small to medium-sized businesses in our marketplace and the owners and employees of those businesses. The majority of our loans are secured by the real estate collateral of such businesses. We acquired through FDIC-assisted acquisitions three banking offices in the San Francisco Bay area and one office in Arizona. Our asset-based lending function operates in Arizona, California, Texas, and the Pacific Northwest.

Pacific Western competes actively for deposits, and emphasizes solicitation of noninterest-bearing deposits. In managing the top line of our business, we focus on quality loan growth and loan yield, deposit cost, and net interest margin, as net interest income, on a year-to-date basis, accounts for 85.9% of our net revenues (net interest income plus noninterest income).

During the six months ended June 30, 2011, our assets declined \$134.3 million, or 2.4%, to \$5.4 billion. This was due primarily to a decrease in our total loans of \$348.3 million on a net basis, including a \$102.6 million reduction in our non-covered loans. The loan portfolio continues to decline generally due to repayments, resolution activities, and tepid loan growth. The decline in total loans was offset partially by an increase in investment securities available-for-sale of \$184.0 million due to purchases of \$262.2 million of primarily government-sponsored entity pass-through securities, offset partially by principal reductions.

During the six months ended June 30, 2011, our total deposits declined \$163.2 million, or 3.5%, to \$4.5 billion. Time deposits decreased \$163.9 million to \$1.1 billion. Core deposits, which include noninterest-bearing demand, interest checking, money market, and savings accounts, grew \$657,000 as noninterest-bearing demand accounts increased \$133.8 million and money market deposits decreased \$131.8 million. At June 30, 2011, core deposits totaled \$3.4 billion, or 76% of total deposits at that date, including \$1.6 billion of noninterest-bearing demand accounts, or 36% of total deposits.

Table of Contents

**Key Performance Indicators**

Among other factors, our operating results depend generally on the following key performance indicators:

***The Level of Our Net Interest Income***

Net interest income is the excess of interest earned on our interest-earning assets over the interest paid on our interest-bearing liabilities. Net interest margin is net interest income expressed as a percentage of average interest-earning assets. A sustained low interest rate environment combined with low loan growth and high levels of marketplace liquidity may lower both our net interest income and net interest margin going forward.

Our primary interest-earning assets are loans and investments. Our primary interest-bearing liabilities are deposits. We attribute our high net interest margin to our high level of noninterest-bearing deposits and low cost of deposits. While our deposit balances will fluctuate depending on deposit holders' perceptions of alternative yields available in the market, we attempt to minimize these variances by attracting a high percentage of noninterest-bearing deposits, which have no expectation of yield. At June 30, 2011, approximately 36% of our total deposits were noninterest-bearing.

***Loan Growth***

We generally seek new lending opportunities in the \$500,000 to \$10 million range, try to limit loan maturities for commercial loans to one year, for construction loans up to 18 months, and for commercial real estate loans up to ten years, and to price lending products so as to preserve our interest spread and net interest margin. We sometimes encounter strong competition in pursuing lending opportunities such that potential borrowers obtain loans elsewhere at lower rates than those we offer. We have continued to reduce our exposure to residential construction and foreign loans, including limiting the amount of new loans in these categories. Our ability to make new loans is dependent on economic factors in our market area, borrower qualifications, competition, and liquidity, among other items. Loan growth remains tepid, as new loan volume is not replacing maturities. We attribute this to the state of the economy in Southern California, the reluctance of businesses to make investments and grow, the scarcity of quality credits, and the competition for loans from both other community banks and the large banks. While we are able to retain maturing lending relationships having growth opportunities, we are doing so selectively based on pricing considerations, as we prefer profitability and margin retention over short term growth.

***The Magnitude of Credit Losses***

We stress credit quality in originating and monitoring the loans we make and measure our success by the levels of our nonperforming assets, net charge-offs and allowance for credit losses. We maintain an allowance for credit losses on non-covered loans which is the sum of our allowance for loan losses and our reserve for unfunded loan commitments. Provisions for credit losses are charged to operations as and when needed for both on and off balance sheet credit exposure. Loans which are deemed uncollectible are charged off and deducted from the allowance for loan losses. Recoveries on loans previously charged off are added to the allowance for loan losses. The provision for credit losses on the non-covered loan portfolio was based on our allowance methodology and reflected net charge-offs, the levels and trends of nonaccrual and classified loans, and the migration of loans into various risk classifications. A provision for credit losses on the covered loan portfolio may be recorded to reflect decreases in expected cash flows on covered loans compared to those previously estimated.

We regularly review our loans to determine whether there has been any deterioration in credit quality stemming from economic conditions or other factors which may affect collectibility of our loans. Changes in economic conditions, such as inflation, unemployment, increases in the general level of

Table of Contents

interest rates, declines in real estate values and negative conditions in borrowers' businesses could negatively impact our customers and cause us to adversely classify loans and increase portfolio loss factors. An increase in classified loans generally results in increased provisions for credit losses. Any deterioration in the real estate market may lead to increased provisions for credit losses because of our concentration in real estate loans.

***The Level of Our Noninterest Expense***

Our noninterest expense includes fixed and controllable overhead, the major components of which are compensation, occupancy, data processing, other professional service fees, and OREO expense. We measure success in controlling such costs through monitoring of the efficiency ratio. We calculate the efficiency ratio by dividing noninterest expense by net revenues (the sum of net interest income plus noninterest income). Accordingly, a lower percentage reflects lower operating expenses relative to net revenue.

The consolidated operating efficiency ratios have been as follows:

<b>Three Months Ended:</b>	<b>Efficiency Ratio</b>
June 30, 2011	58.2%
March 31, 2011	58.7%
December 31, 2010	70.4%
September 30, 2010	61.5%
June 30, 2010	62.3%

The efficiency ratio declined in the second quarter of 2011 compared to the first quarter of 2011 and the second quarter of 2010 due mostly to higher net revenues which exceeded the growth in noninterest expense. The growth in net revenues for the linked quarters was attributable mainly to higher FDIC loss sharing income stemming from higher credit-related net costs on covered loans and OREO, and higher net interest income from higher accelerated accretion of purchase discounts on covered loan payoffs. The growth in noninterest expense for the linked quarters was due principally to increases in non-covered and covered OREO expenses related mostly to higher write-downs and lower gains on sales. The growth in net revenues for the current quarter compared to the second quarter of 2010 was due mainly to higher net interest income. Net interest income increased due to higher average earning assets resulting from the August 2010 Los Padres acquisition and a higher loan yield resulting from higher accelerated accretion of purchase discounts on covered loan payoffs. The growth in noninterest expense for the second quarter of 2011 compared to the same 2010 quarter is due to the additional overhead from the acquired Los Padres operations and higher OREO costs.

The fourth quarter of 2010 efficiency ratio is higher than the other periods presented due to the combination of lower FDIC loss sharing income and higher noninterest expenses. Fourth quarter expenses included higher discretionary bonus accruals and the recognition of a penalty for the early repayment of \$50 million in FHLB advances; there is no similar repayment penalty in any of the other periods presented.

**Critical Accounting Policies**

The Company's accounting policies are fundamental to understanding management's discussion and analysis of results of operations and financial condition. The Company has identified several policies as being critical because they require management to make particularly difficult, subjective and/or complex judgments about matters that are inherently uncertain and because of the likelihood that materially different amounts would be reported under different conditions or using different assumptions. These policies relate to the allowances for credit losses and the carrying values of

Table of Contents

intangible assets and deferred income tax assets. For further information, refer to our Annual Report on Form 10-K for the year ended December 31, 2010.

**Results of Operations***Non-GAAP Measurements*

Certain discussion in this Form 10-Q contains non-GAAP financial disclosures for tangible common equity and pre-credit, pre-tax earnings. The Company uses certain non-GAAP financial measures to provide meaningful supplemental information regarding the Company's operational performance and to enhance investors' overall understanding of such financial performance. Given the use of tangible common equity amounts and ratios is prevalent among banking regulators, investors and analysts, we disclose our tangible common equity ratios in addition to equity-to-assets ratios. Also, as analysts and investors view pre-credit, pre-tax earnings as an indicator of the Company's ability to absorb credit losses, we disclose this amount in addition to net earnings. The methodology of determining tangible common equity and pre-credit, pre-tax earnings may differ among companies.

These non-GAAP financial measures are presented for supplemental informational purposes only for understanding the Company's operating results and should not be considered a substitute for financial information presented in accordance with United States generally accepted accounting principles (GAAP). The following table presents performance amounts and ratios in accordance with GAAP and a reconciliation of the non-GAAP financial measurements to the GAAP financial measurements.

Efficiency ratio	58.2%	58.7%	62.3%	58.5%	63.3%

*Second Quarter of 2011 Compared to First Quarter of 2011*

Net earnings for the second quarter of 2011 were \$12.8 million, or \$0.35 per diluted share, compared to net earnings of \$10.7 million, or \$0.29 per diluted share, for the first quarter of 2011. The \$2.2 million increase in net earnings for the linked quarters was due mostly to higher net interest income and FDIC loss sharing income, offset partially by a higher provision for credit losses and higher OREO costs.

*Second Quarter of 2011 Compared to Second Quarter of 2010*

Net earnings for the second quarter of 2011 were \$12.8 million, or \$0.35 per diluted share, compared to net earnings of \$2.7 million, or \$0.07 per diluted share, for the second quarter of 2010. The \$10.1 million increase in net earnings was due mostly to a lower provision for credit losses and higher net interest income, offset partially by higher noninterest expense. The increase in noninterest expense reflects in part the additional operating costs arising from the August 2010 Los Padres acquisition and the nine branches that acquisition added to our network.

Table of Contents

*Six Months of 2011 Compared to Six Months of 2010*

Net earnings of \$23.5 million, or \$0.64 per diluted share, for the six months ended June 30, 2011 compared to a net loss of \$57.8 million, or \$1.66 per diluted share, for the six months ended June 30, 2010. The increase in net earnings for the current year-to-date period is attributed principally to a lower provision for credit losses. The provision for the prior year period included \$71.4 million related to the sale of \$323.6 million of non-covered classified loans in the first quarter of 2010; there was no similar sale of classified loans in the current year.

***Net Interest Income***

Net interest income, which is our principal source of revenue, represents the difference between interest earned on assets and interest paid on liabilities. Net interest margin is net interest income expressed as a percentage of average interest-earning assets. Net interest income is affected by changes in both interest rates and the volume of average interest-earning assets and interest-bearing liabilities.

Net interest margin as adjusted	5.17%	5.12%	4.74%	5.14%	4.84%

### *Second Quarter of 2011 Compared to First Quarter of 2011*

Net interest income was \$68.7 million for the second quarter of 2011 compared to \$65.7 million for the first quarter of 2011. The \$3.0 million increase is due mostly to growth of \$2.5 million in interest income, which is attributed mainly to higher accelerated accretion of purchase discounts on covered loan payoffs and purchases of investment securities. Contributing to the increase in net interest income was a reduction in interest expense of \$412,000 due principally to lower rates on money market accounts and a decline in time deposit balances.

Our net interest margin for the second quarter of 2011 was 5.57%, an increase of 23 basis points from the 5.34% posted for the first quarter of 2011. The yield on average loans was 7.18% for the second quarter of 2011 compared to 6.78% for the prior quarter. The loan yield, earning asset yield and net interest margin are all affected by loans being placed on or removed from nonaccrual status and the accelerated accretion of purchase discounts on covered loan disposals; the net interest margin for the second and first quarters of 2011 was positively impacted by 40 and 22 basis points, respectively, from the combination of these items. The cost of interest-bearing deposits and all-in deposit cost declined four and three basis points to 0.75% and 0.49%, respectively, due mostly to lower rates on money market accounts and lower average balances of time deposits.

### *Second Quarter of 2011 Compared to Second Quarter of 2010*

Net interest income grew \$11.0 million during the second quarter of 2011 compared to the same quarter of 2010. The increase was due to higher interest income of \$8.9 million and lower interest expense of \$2.1 million. The growth in interest income was attributable to a higher yield on average loans and a higher average balance of investment securities. Interest expense declined primarily due to a lower rate on average deposits and a reduction in average borrowings.

The net interest margin grew 72 basis points to 5.57% for the second quarter of 2011 compared to 4.85% for the same period last year. The increase in the net interest margin was due mostly to a higher yield on average loans and lower interest expense as described above. The yield on average loans grew 62 basis points to 7.18% for the second quarter of 2011 from 6.56% from the second quarter of 2010, due in part to higher accelerated accretion of purchase discounts on covered loan disposals. The cost of interest-bearing deposits and all-in deposit cost decreased 24 and 17 basis points to 0.75% and 0.49%, respectively. Average noninterest-bearing demand deposits increased \$205.1 million to \$1.6 billion in the current quarter compared to the same period last year, and represented 35% of total average deposits for the second quarter of 2011 compared to 33% for the second quarter of 2010.

Table of Contents*Six Months of 2011 Compared to Six Months of 2010*

Net interest income grew \$18.8 million to \$134.4 million for the six months ended June 30, 2011 compared to the same period of 2010. This change was due to a \$14.6 million increase in interest income and \$4.2 million decrease in interest expense. Loan interest income grew \$9.1 million, or 7.2%, due mostly to higher accelerated accretion of purchase discounts related to covered loan payoffs. Interest income on investment securities increased \$5.8 million, or 53.4%, due to purchases. Interest expense declined mainly due to lower rates on deposits and lower average borrowing balances. Deposit interest expense declined \$2.4 million, or 17.1%, due mostly to lower rates paid. Interest expense on borrowings declined \$1.4 million as we repaid \$260 million of FHLB advances in the first half of 2010 and another \$50 million in December 2010.

The net interest margin for the first six months of 2011 was 5.45% compared to 4.87% for the first six months of 2010. The increase is due mostly to lower funding costs and a higher yield on loans offset partially by an increase in the average balance of lower yielding investment securities.

***Provision for Credit Losses***

The following table sets forth the details of the provision for credit losses and allowance for credit losses data for the periods indicated:

	Three Months Ended			Six Months Ended	
	June 30, 2011	March 31, 2011	June 30, 2010	June 30, 2011	June 30, 2010
(Dollars in thousands)					
<b>Provision For Credit Losses:</b>					
Addition to allowance for loan losses	\$ 5,050	\$ 7,800	\$ 14,345	\$ 12,850	\$ 127,217
Addition (reduction) to reserve for unfunded loan commitments	450		(245)	450	(590)
Total provision for non-covered loans	5,500	7,800	14,100	13,300	126,627
Provision for covered loans	5,890	2,910	7,825	8,800	28,100
Total provision for credit losses	\$ 11,390	\$ 10,710	\$ 21,925	\$ 22,100	\$ 154,727
<b>Allowance for Credit Losses Data:</b>					
Net charge-offs on non-covered loans	\$ 7,187	\$ 7,889	\$ 12,045	\$ 15,076	\$ 157,471
Charge-offs on classified loans sold					123,705
Annualized net charge-off ratios:					
Net charge-offs to non-covered average loans	0.97%	1.03%	1.50%	1.00%	9.43%
Net charge-offs, excluding charge-offs on loans sold, to non-covered average loans	0.97%	1.03%	1.50%	1.00%	2.02%
At Period End:					
Allowance for loan losses	\$ 96,427	\$ 98,564	\$ 88,463		
Allowance for credit losses	\$ 102,552	\$ 104,239	\$ 93,434		
Allowance for credit losses to non-covered loans, net of unearned income	3.52%	3.41%	2.93%		
Allowance for credit losses to non-covered nonaccrual loans	157.0%	135.6%	86.3%		

Provisions for credit losses are charged to earnings as and when needed for both on and off balance sheet credit exposures. We have a provision for credit losses on our non-covered loans and a provision for credit losses on our covered loans. The provision for credit losses on our non-covered loans is based on our allowance methodology and is an expense that, in our judgment, is required to maintain the adequacy of the allowance for loan losses and the reserve for unfunded loan

Table of Contents

commitments. Our allowance methodology reflects net charge-offs and the levels and trends of nonaccrual and classified loans and the migration of loans into various risk classifications. The provision for credit losses on our covered loans reflects decreases in expected cash flows on covered loans compared to those previously estimated.

We made provisions for credit losses related to both non-covered and covered loans of \$11.4 million during the second quarter of 2011 compared to \$10.7 million for the first quarter of 2011 and \$21.9 million for the second quarter of 2010. The provision related to non-covered loans totaled \$5.5 million for the second quarter of 2011; this compares to \$7.8 million for the first quarter of 2011, and \$14.1 million for the second quarter of 2010. Net non-covered loan charge-offs were \$7.2 million for the second quarter of 2011; this compares to \$7.9 million for the first quarter of 2011 and \$12.0 million for the second quarter of 2010. The level of credit loss provision and net charge-offs declined for the current period compared to prior periods.

The allowance for credit losses on non-covered loans was \$102.3 million as of June 30, 2011 and represented 3.52% of the non-covered loan balances at that date. This compares to an allowance for credit losses on non-covered loans of \$104.2 million, or 3.41% of non-covered loans, as of March 31, 2011 and an allowance for credit losses on non-covered loans of \$93.4 million, or 2.93% of non-covered loans, as of June 30, 2010. The economic downturn has negatively impacted our borrowers and the collateral values underlying our loans. A protracted economic down cycle will increase the stress on our loan portfolio and we may experience increased levels of charge-offs and provisions and may maintain a higher level of allowance for credit losses.

During the second quarter of 2011, we recorded a \$5.9 million provision for credit losses on the covered loan portfolio based on current quarter analysis of acquired loans, which indicated a decrease in expected cash flows from previous estimates. Under the terms of our loss sharing agreements with the FDIC, the FDIC will absorb 80% of the losses on the covered loans. As a result, the effect on net earnings was 20% of the provision for covered loans as we recorded 80% of this provision as an offset in FDIC loss sharing income. The provisions for credit losses on covered loans for the first quarter of 2011 and second quarter of 2010 were \$2.9 million and \$7.8 million, respectively.

We made provisions for credit losses totaling \$22.1 million during the first six months of 2011 compared to \$154.7 million for the same period last year. The provision related to non-covered loans totaled \$13.3 million for the six months ended June 30, 2011 compared to \$126.6 million for the six months ended June 30, 2010. The prior year provision included \$71.4 million related to the Company's sale of \$323.6 million of non-covered classified loans in the first quarter of 2010; there was no similar sale of classified loans in 2011. Net non-covered charge-offs were \$15.1 million during the first six months of 2011 compared to \$157.5 million for the same period last year, but the latter amount included \$123.7 million in charge-offs related to the classified loan sale in the first quarter of 2010. The provision for covered loans was \$8.8 million for the six months ended June 30, 2011 compared to \$28.1 million for the six months ended June 30, 2010.

Increased provisions for credit losses may be required in the future based on loan and unfunded commitment growth, the effect changes in economic conditions, such as inflation, unemployment, market interest rate levels, and real estate values, may have on the ability of our borrowers to repay their loans, and other negative conditions specific to our borrowers' businesses. See further discussion in "Balance Sheet Analysis *Allowance for Credit Losses on Non-Covered Loans*" and "Balance Sheet Analysis *Allowance for Credit Losses on Covered Loans*" contained herein.

Table of Contents**Noninterest Income**

The following table summarizes noninterest income by category for the periods indicated:

	Three Months Ended			Six Months Ended	
	June 30, 2011	March 31, 2011	June 30, 2010	June 30, 2011	June 30, 2010
(In thousands)

Other commissions and fees	1,980	1,720	1,845	3,700	3,635
Increase in cash surrender value of life insurance	368	379	369	747	767
FDIC loss sharing income (expense), net	5,316	(1,170)	6,004	4,146	21,751
Other income	176	302	173	478	353
<b>Total noninterest income</b>	<b>\$ 11,240</b>	<b>\$ 4,789</b>	<b>\$ 11,057</b>	<b>\$ 16,029</b>	<b>\$ 31,901</b>

*Second Quarter of 2011 Compared to First Quarter of 2011 and Second Quarter of 2010*

Noninterest income for the second quarter of 2011 totaled \$11.2 million compared to \$4.8 million for the first quarter of 2011 and \$11.1 million for the second quarter of 2010. The \$6.4 million increase in noninterest income for the second quarter of 2011 compared to the prior quarter was due mostly to higher FDIC loss sharing income stemming from higher credit-related net costs on covered loans and OREO. Service charges on deposits decreased \$158,000 for the linked 2011 quarters due to a decline in business account fee income and lower NSF handling fees from fewer checks being drawn against accounts with insufficient funds.

The \$183,000 growth in noninterest income for the second quarter of 2011 compared to the same period last year was due primarily to the \$734,000 increase in service charges on deposit accounts, while FDIC loss sharing income, net, declined \$688,000 due to a decrease in credit-related net costs on covered loans and OREO. Service charges on deposit accounts increased due to increases in service charge rates, a higher number of acquisition-related accounts, and organic growth.

*Six Months of 2011 Compared to Six Months of 2010*

Noninterest income declined \$15.9 million, to \$16.0 million, for the six months ended June 30, 2011 compared to the same period in 2010. The decline was due mainly to lower FDIC loss sharing income of \$17.6 million attributable to lower credit-related net costs on covered loans and OREO. However, service charges on deposit accounts increased \$1.6 million due to increases in service charge rates, a higher number of acquisition-related accounts, and organic growth.

Table of Contents*Noninterest Expense*

The following table summarizes noninterest expense by category for the periods indicated:

	Three Months Ended			Six Months Ended	
	June 30, 2011	March 31, 2011	June 30, 2010	June 30, 2011	June 30, 2010

Efficiency ratio	58.2%	58.7%	62.3%	58.5%	63.3%

*Second Quarter of 2011 Compared to First Quarter of 2011*

Noninterest expense grew \$5.1 million to \$46.5 million during the second quarter of 2011 compared to \$41.4 million for the first quarter of 2011. This change was due mostly to increases in covered and non-covered OREO costs. Covered OREO costs increased due principally to lower gains on sales and higher write-downs. Non-covered OREO costs increased by \$1.6 million due almost entirely to higher write-downs recognized in the second quarter. Other expense increases included higher occupancy costs due to lease renewal commissions, higher other professional services expense due to legal costs associated with our credit work-out efforts, and higher other expenses related to other loan management costs and recent stock awards for directors. Insurance and assessment costs are lower due to a decline in FDIC deposit insurance costs attributable to a revised FDIC assessment methodology effective April 1, 2011.

Noninterest expense includes non-cash expenses of time-based restricted stock amortization, which is included in compensation, and intangible asset amortization. Amortization of restricted stock totaled \$2.1 million and \$2.0 million for the second and first quarters of 2011, respectively, \$2.2 million for the second quarter of 2010, and \$4.1 million and \$4.4 million for the six months ended June 30, 2011 and 2010, respectively. Intangible asset amortization totaled \$2.3 million for each of the second and first quarters of 2011.

*Second Quarter of 2011 Compared to Second Quarter of 2010*

Noninterest expense grew \$3.8 million for the second quarter of 2011 compared to the same period of 2010 due mostly to higher OREO costs of \$3.0 million. Non-covered OREO costs grew \$1.7 million due primarily to higher write-downs and lower gains on sales. Covered OREO costs grew \$1.3 million due mostly to higher write-downs. Generally, all of the other expense categories increased due to the additional overhead associated with operating the nine branches gained in the Los Padres acquisition in August 2010.

Table of Contents

*Six Months of 2011 Compared to Six Months of 2010*

Noninterest expense declined by \$5.4 million to \$87.9 million during the six months ended June 30, 2011 compared to the same period last year. This reduction was attributable primarily to decreases in non-covered and covered OREO costs and lower insurance and assessments expense. Non-covered OREO costs declined \$6.1 million due mainly to lower write-downs of \$7.0 million and lower OREO expense of \$509,000, offset partially by lower gains on sales of OREO of \$1.5 million. Covered OREO costs declined by \$3.5 million due mostly to higher gains on sales of OREO. The declines were offset by increases in almost all other expense categories for the additional operating costs arising from the August 2010 Los Padres acquisition and the nine branches added to our network through that acquisition.

**Income Taxes**

The effective tax rate for the second quarter of 2011 was 41.6% compared to 42.0% for the first quarter of 2011 and 32.0% in the second quarter of 2010. The lower rate in the second quarter of 2010 resulted mostly from the resolution of a tax contingency which reduced income tax expense by \$400,000. The effective tax rates for the six months ended June 30, 2011 and 2010 were 41.8% and 42.5%, respectively. The Company's blended Federal and California statutory tax rate is 42.0%.

**Balance Sheet Analysis**

**Non-Covered Loans**

The following table presents the balance of each major category of non-covered loans at the dates indicated:

Loan Category	June 30, 2011		March 31, 2011		December 31, 2010	
	Amount	% of Total	Amount	% of Total	Amount	% of Total
(Dollars in thousands)						
<b>Domestic:</b>						
Real estate mortgage	\$ 2,073,868	71%	\$ 2,172,923	71%	\$ 2,274,733	72%
Commercial	640,805	22	667,401	22	663,557	21
Real estate construction	160,254	5	176,758	5	179,479	5
Consumer	22,248	1	21,815	1	25,058	1
<b>Foreign:</b>						
Commercial	18,633	1	21,808	1	21,057	1
Other, including real estate	1,442		1,488		1,551	
<b>Total gross non-covered loans</b>	<b>2,917,250</b>	<b>100%</b>	<b>3,062,193</b>	<b>100%</b>	<b>3,165,435</b>	<b>100%</b>
Less: unearned income	(4,114)		(4,539)		(4,380)	
Less: allowance for loan losses	(96,427)		(98,564)		(98,653)	
<b>Total net non-covered loans</b>	<b>\$ 2,816,709</b>		<b>\$ 2,959,090</b>		<b>\$ 3,062,402</b>	

Gross non-covered loans declined \$144.9 million during the second quarter of 2011. Real estate mortgage loans, commercial loans, and real estate construction loans decreased \$99.1 million, \$26.6 million, and \$16.5 million, respectively. The non-covered loan portfolio continues to decline. We attribute this to the state of the economy in Southern California, the reluctance of businesses to make investments and grow, the scarcity of quality credits, and the competition for loans from both other community banks and the large banks. While we are able to retain maturing lending relationships having growth opportunities, we are doing so selectively based on pricing considerations, as we prefer profitability and margin retention over short term growth.

Edgar Filing: PACWEST BANCORP - Form 10-Q

Table of Contents

## Edgar Filing: PACWEST BANCORP - Form 10-Q

The above loans are subject to a loss sharing agreements with the FDIC under which we will be reimbursed for a substantial portion of any future losses on them. Under the terms of the Los Padres loss sharing agreement, the FDIC will absorb 80% of losses and receive 80% of loss recoveries on

Table of Contents

covered assets. The loss sharing arrangement for single family and commercial (non-single family) covered assets is in effect for 10 years and 5 years, respectively, from the August 20, 2010 acquisition date and the loss recovery provisions are in effect for 10 years and 8 years, respectively, from the acquisition date. Under the terms of the Affinity loss sharing agreement, the FDIC will absorb 80% of losses and receive 80% of loss recoveries on the first \$234 million of losses on covered assets and absorb 95% of losses and receive 95% of loss recoveries on covered assets exceeding \$234 million. The loss sharing agreement is in effect for 5 years for commercial assets (non-residential loans, OREO, and certain securities) and 10 years for residential loans from the August 28, 2009 acquisition date. The loss recovery provisions are in effect for 8 years for commercial assets and 10 years for residential loans from the acquisition date.

*Allowance for Credit Losses on Non-Covered Loans*

The allowance for credit losses on non-covered loans is the combination of the allowance for loan losses and the reserve for unfunded loan commitments. The allowance for credit losses on non-covered loans relates only to loans which are not subject to the loss sharing agreement with the FDIC. The allowance for loan losses is reported as a reduction of outstanding loan balances and the reserve for unfunded loan commitments is included within other liabilities on the condensed consolidated balance sheets. Generally, as loans are funded, the amount of the commitment reserve applicable to such funded loans is transferred from the reserve for unfunded loan commitments to the allowance for loan losses based on our allowance methodology. The following discussion is for non-covered loans and the allowance for credit losses thereon. Refer to "Balance Sheet Analysis *Allowance for Credit Losses on Covered Loans*" for the policy on covered loans.

At June 30, 2011, the allowance for credit losses on non-covered loans totaled \$102.6 million, a \$1.6 million decrease from the allowance at March 31, 2011, and was comprised of the allowance for loan losses of \$96.5 million and the reserve for unfunded loan commitments of \$6.1 million. During the three months ended June 30, 2011, the Company recorded \$7.2 million in net charge-offs and a provision for credit losses of \$5.5 million.

An allowance for loan losses is maintained at a level deemed appropriate by management to adequately provide for known and inherent risks in the loan portfolio and other extensions of credit at the balance sheet date. The allowance is based upon a continuing review of the portfolio, past loan loss experience, current economic conditions which may affect the borrowers' ability to pay, and the underlying collateral value of the loans. Loans which are deemed to be uncollectible are charged off and deducted from the allowance. The provision for loan losses and recoveries on loans previously charged off are added to the allowance.

The methodology we use to estimate the amount of our allowance for credit losses is based on both objective and subjective criteria. While some criteria are formula driven, other criteria are subjective inputs included to capture environmental and general economic risk elements which may trigger losses in the loan portfolio, and to account for the varying levels of credit quality in the loan portfolios of the entities we have acquired that have not yet been captured in our objective loss factors.

Specifically, our allowance methodology contains three key elements: (i) amounts based on specific evaluations of impaired loans; (ii) amounts of estimated losses on several pools of loans categorized by risk rating and loan type; and (iii) amounts for environmental and general economic factors that indicate probable losses were incurred but were not captured through the other elements of our allowance process.

Table of Contents

Impaired loans are identified at each reporting date based on certain criteria and the majority of which are individually reviewed for impairment. A loan is considered impaired when it is probable that a creditor will be unable to collect all amounts due according to the original contractual terms of the loan agreement. We measure impairment of a loan based upon the fair value of the loan's collateral if the loan is collateral dependent or the present value of cash flows, discounted at the loan's effective interest rate, if the loan is not collateral-dependent. The impairment amount on a collateral-dependent loan is charged-off to the allowance and the impairment amount on a loan that is not collateral-dependent is set up as a specific reserve. Increased charge-offs or additions to specific reserves generally result in increased provisions for credit losses.

Our loan portfolio, excluding impaired loans which are evaluated individually, is categorized into several pools for purposes of determining allowance amounts by loan pool. The loan pools we currently evaluate are: commercial real estate construction, residential real estate construction, SBA real estate, hospitality real estate, real estate other, commercial collateralized, commercial unsecured, SBA commercial, consumer, foreign, and asset-based. Within these loan pools, we then evaluate loans not adversely classified, which we refer to as "pass" credits, separately from adversely classified loans. The adversely classified loans are further grouped into three credit risk rating categories: "special mention," "substandard" and "doubtful," which we define as follows:

Special Mention: Loans classified as special mention have a potential weakness that requires management's attention. If not addressed, these potential weaknesses may result in further deterioration in the borrower's ability to repay the loan.

Substandard: Loans classified as substandard have a well-defined weakness or weaknesses that jeopardize the collection of the debt. They are characterized by the possibility that we will sustain some loss if the weaknesses are not corrected.

Doubtful: Loans classified as doubtful have all the weaknesses as those classified as Substandard, with the additional trait that the weaknesses make collection or repayment in full highly questionable and improbable.

In addition, we may refer to the loans classified as "substandard" and "doubtful" together as "criticized loans." For additional information on classified loans, see Note 4, *Loans*, in the Notes to Consolidated Financial Statements (Unaudited) contained in "Item 1. Condensed Consolidated Financial Statements (Unaudited)."

The allowance amounts for "pass" rated loans and those loans adversely classified, which are not reviewed individually, are determined using historical loss rates developed through migration analysis. The migration analysis is updated quarterly based on historic losses and movement of loans between ratings. As a result of this migration analysis and its quarterly updating, the increases we experienced in both charge-offs and adverse classifications resulted in increased loss factors

Finally, in order to ensure our allowance methodology is incorporating recent trends and economic conditions, we apply environmental and general economic factors to our allowance methodology including: credit concentrations; delinquency trends; economic and business conditions; the quality of lending management and staff; lending policies and procedures; loss and recovery trends; nature and volume of the portfolio; nonaccrual and problem loan trends; usage trends of unfunded commitments; and other adjustments for items not covered by other factors.

We recognize the determination of the allowance for loan losses is sensitive to the assigned credit risk ratings and inherent loss rates at any given point in time. Therefore, we perform sensitivity analyses to provide insight regarding the impact adverse changes in credit risk ratings may have on our allowance for loan losses. The sensitivity analyses have inherent limitations and are based on various assumptions as of a point in time and, accordingly, it is not necessarily representative of the impact loan risk rating changes may have on the allowance for loan losses. At June 30, 2011, in the event that

Table of Contents

1% of our non-covered loans were downgraded one credit risk rating category for each category (e.g., 1% of the "pass" category moved to the "special mention" category, 1% of the "special mention" category moved to "substandard" category, and 1% of the "substandard" category moved to the "doubtful" category within our current allowance methodology), the allowance for credit losses would have increased by approximately \$1.8 million. In the event that 5% of our non-covered loans were downgraded one credit risk category, the allowance for credit losses would increase by approximately \$9.2 million. Given current processes employed by the Company, management believes the credit risk ratings and inherent loss rates currently assigned are appropriate. It is possible that others, given the same information, may at any point in time reach different conclusions that could be significant to the Company's financial statements. In addition, current credit risk ratings are subject to change as we continue to review loans within our portfolio and as our borrowers are impacted by economic trends within their market areas.

Management believes that the allowance for loan losses is adequate and appropriate for the known and inherent risks in our non-covered loan portfolio. In making its evaluation, management considers certain quantitative and qualitative factors including the Company's historical loss experience, the volume and type of lending conducted by the Company, the results of our credit review process, the levels of classified, criticized and nonperforming assets, regulatory policies, general economic conditions, underlying collateral values, and other factors regarding collectibility and impairment. To the extent we experience, for example, increased levels of documentation deficiencies, adverse changes in collateral values, or negative changes in economic and business conditions which adversely affect our borrowers, our classified loans may increase. Higher levels of adversely classified loans generally result in higher allowances for loan losses.

Although we have established an allowance for loan losses that we consider adequate, there can be no assurance that the established allowance for loan losses will be sufficient to offset losses on loans in the future. Management also believes that the reserve for unfunded loan commitments is adequate. In making this determination, we use the same methodology for the reserve for unfunded loan commitments as we do for the allowance for loan losses and consider the same quantitative and qualitative factors, as well as an estimate of the probability of advances of the commitments correlated to their credit risk rating.

The following table presents information regarding the allowance for credit losses on non-covered loans as of the dates indicated:

	June 30, 2011	March 31, 2011	December 31, 2010	June 30, 2010
	(Dollars in thousands)

***Allowance for Credit Losses on Covered Loans***

The loans acquired in the Los Padres and Affinity acquisitions are covered by loss sharing agreements with the FDIC and we will be reimbursed for a substantial portion of any future losses. Under the terms of the Los Padres loss sharing agreement, the FDIC will absorb 80% of losses and receive 80% of loss recoveries on the covered assets. The loss sharing agreement is in effect for 10 years for single family covered assets and 5 years for commercial (non-single family) covered assets from the August 20, 2010 acquisition date. The loss recovery provisions are in effect for 10 years for single family assets and 8 years for commercial (non-single family) assets from the acquisition date. Under the terms of the Affinity loss sharing agreement, the FDIC will absorb 80% of losses and receive 80% of loss recoveries on the first \$234 million of losses on covered assets and absorb 95% of losses and receive 95% of loss recoveries on covered assets exceeding \$234 million. The loss sharing agreement is in effect for 5 years for commercial assets (non-residential loans, OREO and certain securities) and 10 years for residential loans from the August 28, 2009 acquisition date. The loss recovery provisions are in effect for 8 years for commercial assets and 10 years for residential loans from the acquisition date.

We evaluated the acquired covered loans and elected to account for them under ASC 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality* ("ASC 310-30"), which we refer to as acquired impaired loan accounting.

The covered loans are subject to our internal and external credit review. If deterioration in the expected cash flows results in a reserve requirement, a provision for credit losses is charged to earnings without regard to the FDIC loss sharing agreement. The portion of the estimated loss reimbursable from the FDIC will be recorded in FDIC loss sharing income and will increase the FDIC loss sharing asset. For acquired impaired loans, the allowance for loan losses is measured at the end of each financial reporting period based on expected cash flows. Decreases in the amount and changes in the timing of expected cash flows on the acquired impaired loans as of the financial reporting date compared to those previously estimated are usually recognized by recording a provision for credit losses on such covered loans. Acquired covered loans not accounted for as impaired loans totaled \$28.9 million at June 30, 2011 and are subject to our allowance for credit loss methodology. Although we estimate the required allowance for credit losses similarly to the methodology used for originated loans, we record a provision for such loan losses only when the reserve requirement exceeds any remaining credit discount on these covered loans.

***Non-Covered Nonperforming Assets and Performing Restructured Loans***

The following table presents non-covered nonperforming assets and performing restructured loans information as of the dates indicated:

	June 30, 2011	March 31, 2011	December 31, 2010	June 30, 2010
(Dollars in thousands)				
Nonaccrual loans <sup>(1)</sup>	\$ 65,300	\$ 76,849	\$ 94,183	\$ 108,283
Other real estate owned <sup>(1)</sup>	52,194	48,367	25,598	24,523
<b>Total nonperforming assets</b>	<b>\$ 117,494</b>	<b>\$ 125,216</b>	<b>\$ 119,781</b>	<b>\$ 132,806</b>
Performing restructured loans <sup>(1)</sup>	\$ 82,487	\$ 71,669	\$ 89,272	\$ 76,367
Nonperforming assets ratio <sup>(1)(2)</sup>	3.96%	4.03%	3.76%	4.14%
Nonaccrual loans to loans, net of unearned income <sup>(1)</sup>	2.24%	2.51%	2.98%	3.40%

(1) Excludes covered loans and covered OREO from the Los Padres and Affinity acquisitions.

(2) Nonperforming assets ratio is calculated as nonaccrual loans and OREO divided by total loans and OREO.

Non-covered nonperforming assets include non-covered nonaccrual loans and non-covered OREO and totaled \$117.5 million at June 30, 2011 compared to \$125.2 million at March 31, 2011. The \$7.7 million decline in non-covered nonperforming assets is due primarily to an \$11.5 million reduction in nonaccrual loans, offset partially by a \$3.8 million increase in OREO. The non-covered nonperforming assets ratio decreased to 3.96% at June 30, 2011 from 4.03% at March 31, 2011.

***Nonaccrual Loans***

The \$11.5 million decline in non-covered nonaccrual loans during the second quarter was attributable to (a) foreclosures of \$6.1 million, (b) other reductions, payoffs and returns to accrual status of \$15.8 million, (c) charge-offs of \$5.8 million, and (d) additions of \$16.2 million.

Edgar Filing: PACWEST BANCORP - Form 10-Q

## Edgar Filing: PACWEST BANCORP - Form 10-Q

### Table of Contents

The following lending relationships, excluding SBA-related loans, were on nonaccrual status at June 30, 2011:

Nonaccrual Amount (In thousands)	Description
\$11,300	This loan is secured by three airplane hangar structures and two office buildings in Los Angeles County, California. The loan has been written down to its underlying collateral value based on the most recent appraisal.
\$7,451	This loan is secured by two hotels in San Diego County, California. The borrower's interest payments are current.
\$5,654	Four loans secured by industrial warehouse buildings in Riverside County, California. The borrower is paying as agreed.
\$3,474	An unsecured loan that has a specific reserve for the entire balance.
\$2,586	This loan is secured by a medical-related office building in Los Angeles County, California and has been written down to its underlying collateral value based on the most recent appraisal.
\$2,370	This loan is unsecured and has a specific reserve for 50% of the balance. The borrower is current on interest payments.
\$2,200	Two loans that are secured by a retail shopping center in San Diego County, California.
\$1,701	Two unsecured loans that have a specific reserve for the entire balance.
\$1,553	A loan secured by unimproved land in Imperial County, California.
\$1,287	Three loans secured by industrial buildings in Imperial County, California. The borrower is paying as agreed.

### *OREO*

Non-covered OREO grew \$3.8 million during the second quarter of 2011 due mainly to foreclosures of \$6.1 million, offset partially by write-downs of \$1.9 million. The write-downs were based on new appraisals or negotiated sales prices with buyers.

The following table presents the components of non-covered OREO by property type as of the dates indicated:

Property Type	June 30, 2011	March 31, 2011	December 31, 2010	June 30, 2010
(Dollars in thousands)				
Commercial real estate	\$ 23,408	\$ 18,674	\$ 18,205	\$ 17,285
Construction and land development	26,446	27,191	4,650	3,181
Single family residence	2,340	2,502	2,743	4,057
 Total non-covered OREO	 \$ 52,194	 \$ 48,367	 \$ 25,598	 \$ 24,523

### *Performing Restructured Loans*

Non-covered performing restructured loans grew by \$10.8 million during the second quarter of 2011 to \$82.5 million at June 30, 2011. The change was attributable primarily to additions of \$17.7 million, offset partially by \$3.9 million in transfers to nonaccrual status and \$2.9 million in loan payoffs. At June 30, 2011, we had \$59.4 million in real estate mortgage loans, \$19.0 million in real

## Edgar Filing: PACWEST BANCORP - Form 10-Q

### Table of Contents

estate construction loans, and \$4.1 million in commercial loans that were accruing interest under the terms of troubled debt restructurings.

The majority of the performing restructured loans was on accrual status prior to the loan modifications and has remained on accrual status after the loan modifications due to the borrowers making payments before and after the restructurings. In these circumstances, generally, a borrower may have had a fixed rate loan that they continued to repay, but may be having cash flow difficulties. In an effort to work with certain borrowers, we have agreed to interest rate reductions to reflect the lower market interest rate environment and/or interest-only payments for a period of time. In these cases, we do not forgive principal or extend the maturity date as part of the loan modification. As a result of the current economic environment in our market areas, we anticipate loan restructurings to continue during 2011.

### *Covered Nonperforming Assets*

Loans accounted for under ASC 310-30, which we refer to as "acquired impaired loan accounting," are generally considered accruing and performing loans as the loans accrete interest income over the estimated life of the loan when expected cash flows are reasonably estimable. Accordingly, acquired impaired loans that are contractually past due are still considered to be accruing and performing loans. If the timing and amount of future cash flows is not reasonably estimable, the loans may be classified as nonaccrual loans and interest income is not recognized until the timing and amount of future cash flows can be reasonably estimated.

The following table presents a summary of covered loans that would be considered nonaccrual except for the accounting requirements regarding acquired impaired loans and other real estate owned covered by the loss sharing agreement ("covered nonaccrual loans" and "covered OREO"; collectively, "covered nonperforming assets") as of the dates indicated:

	June 30, 2011	March 31, 2011	December 31, 2010	June 30, 2010
(In thousands)				
Covered nonaccrual loans	\$ 146,359	\$ 153,085	\$ 142,964	\$ 129,188
Covered OREO	40,949	42,117	55,816	27,787
<b>Total covered nonperforming assets</b>	<b>\$ 187,308</b>	<b>\$ 195,202</b>	<b>\$ 198,780</b>	<b>\$ 156,975</b>
Covered performing restructured loans	\$ 12,404	\$ 12,492	\$ 14,255	\$ 28,249

### *Loan Portfolio Risk Elements*

The negative trends throughout the Southern California economy have affected certain industries and collateral types more than others. Our real estate loan portfolio is predominantly commercial and as such does not expose us to higher risks generally associated with residential mortgage loans such as option ARM, interest-only or subprime mortgage loans. Our portfolio does include mortgage loans on commercial property. Commercial mortgage loan repayments typically do not rely on the sale of the underlying collateral and instead rely on the income producing potential of the collateral as the source of repayment. Ultimately, though, due to the loan amortization period being greater than the contractual loan term, the borrower may be required to refinance the loan, either with us or another lender, or sell the underlying collateral in order to pay off the loan.

At June 30, 2011, we had \$183.9 million of commercial real estate mortgage loans maturing over the next 12 months. In the event we refinance any of these loans because the borrowers are unable to obtain financing elsewhere due to the inability of banks in our market area to make loans, such loans may be considered troubled debt restructurings even though they were performing throughout their terms. Higher levels of troubled debt restructurings may lead to increased classified assets and credit loss provisions.

## Edgar Filing: PACWEST BANCORP - Form 10-Q

### Table of Contents

Our loan portfolio, including both non-covered and covered loans, continues to experience pressure from economic trends in Southern California. We expect that such pressures will continue for the remainder of 2011.

### *Deposits*

The following table presents the balance of each major category of deposits at the dates indicated:

Deposit Category	June 30, 2011		March 31, 2011		December 31, 2010	
	Amount	% of Total	Amount	% of Total	Amount	% of Total
(Dollars in thousands)						
Noninterest-bearing deposits	\$ 1,599,410	36%	\$ 1,606,182	35%	\$ 1,465,562	32%
Interest checking deposits	477,126	11	486,761	11	494,617	11
Money market deposits	1,189,999	26	1,232,766	27	1,321,780	28
Savings deposits	151,957	3	145,217	3	135,876	3
<b>Total core deposits</b>	<b>3,418,492</b>	<b>76</b>	<b>3,470,926</b>	<b>76</b>	<b>3,417,835</b>	<b>74</b>
Time deposits under \$100,000	359,890	8	372,650	8	436,838	9
Time deposits \$100,000 and over	708,113	16	741,163	16	795,025	17
<b>Total time deposits</b>	<b>1,068,003</b>	<b>24</b>	<b>1,113,813</b>	<b>24</b>	<b>1,231,863</b>	<b>26</b>
<b>Total deposits</b>	<b>\$ 4,486,495</b>	<b>100%</b>	<b>\$ 4,584,739</b>	<b>100%</b>	<b>\$ 4,649,698</b>	<b>100%</b>

Total deposits declined \$98.2 million during the second quarter to \$4.5 billion at June 30, 2011. Time deposits decreased \$45.8 million during the second quarter to \$1.1 billion at June 30, 2011. Core deposits, which include noninterest-bearing demand, interest checking, money market and savings accounts, declined \$52.4 million during the second quarter due mostly to a \$42.8 million decrease in money market accounts. At June 30, 2011, core deposits totaled \$3.4 billion, or 76% of total deposits at that date. Noninterest-bearing demand deposits decreased \$6.8 million during the second quarter to \$1.6 billion and represented 36% of total deposits at June 30, 2011.

### **Regulatory Matters**

#### *Capital*

Actual capital amounts and ratios for the Company and the Bank as of June 30, 2011 are presented in the following table. Regulatory capital requirements limit the amount of deferred tax assets that may be included when determining the amount of regulatory capital. Deferred tax asset amounts in excess of the calculated limit are deducted from regulatory capital. At June 30, 2011, such amount was \$48.2 million for the Company and \$27.2 million for the Bank. No assurance can be given that the regulatory capital deferred tax asset limitation will not increase in the future.

	June 30, 2011		
	Well Capitalized Requirement	Pacific Western Bank	PacWest Bancorp Consolidated
Tier 1 leverage capital ratio	5.00%	9.60%	9.75%
Tier 1 risk-based capital ratio	6.00%	14.29%	14.44%
Total risk-based capital ratio	10.00%	15.57%	15.72%
Tangible common equity ratio	N/A	10.26%	8.47%

Table of Contents

***Subordinated Debentures***

The Company issued subordinated debentures to trusts that were established by us or entities we have acquired, which, in turn, issued trust preferred securities, which totaled \$123.0 million at June 30, 2011. The Company includes in Tier 1 capital an amount of trust preferred securities equal to no more than 25% of the sum of all core capital elements, which is generally defined as shareholders' equity less goodwill, net of any related deferred income tax liability. At June 30, 2011, the amount of trust preferred securities included in Tier I capital was \$123.0 million. While our existing trust preferred securities are grandfathered under the Dodd-Frank Wall Street Reform and Consumer Protection Act that was enacted in July 2010, new issuances will not qualify as Tier 1 capital.

***Dividends on Common Stock and Interest on Subordinated Debentures***

Notification to the FRB is required prior to our declaring and paying a cash dividend to our stockholders during any period in which our quarterly and/or cumulative twelve-month net earnings are insufficient to fund the dividend amount. Interest payments made by the Company on subordinated debentures are considered dividend payments under FRB regulations. As such, notification to the FRB is required prior to our paying such interest during any period in which our quarterly net earnings are insufficient to fund the interest due. Should the FRB object to payment of interest on the subordinated debentures we would not be able to make the payments until approval is received.

**Liquidity Management**

***Liquidity***

The goals of our liquidity management are to ensure the ability of the Company to meet its financial commitments when contractually due and to respond to other demands for funds such as the ability to meet the cash flow requirements of customers who may be either depositors wanting to withdraw funds or borrowers who may need assurance that sufficient funds will be available to meet their credit needs. We have an Executive Asset/Liability Management Committee, or Executive ALM Committee, which is comprised of members of senior management and is responsible for managing balance sheet and off-balance sheet commitments to meet the needs of customers while achieving our financial objectives. Our Executive ALM Committee meets regularly to review funding capacities, current and forecasted loan demand, and investment opportunities.

Historically, the Bank's primary liquidity source has been its core deposit base. In addition, the Bank relies on collateralized FHLB advances as one of its sources of affordable and immediately available liquidity. The level of such wholesale funding is monitored based on the Bank's liquidity requirements, and we maintain what we believe to be an acceptable level of this collateralized borrowing capacity. The Bank's secured borrowing capacity with the FHLB was \$1.3 billion, of which \$1.1 billion was available as of June 30, 2011. The Bank also maintains a security repurchase line with the FHLB to provide an additional \$32.9 million in secured borrowing capacity, against which there were no borrowings as of June 30, 2011. In addition to the secured borrowing relationship with the FHLB, and to meet short term liquidity needs, the Bank maintains adequate balances in liquid assets, which include cash and due from banks, Federal Funds sold, interest-earning deposits in other financial institutions, and unpledged investment securities available-for-sale. The Bank also maintains a secured line of credit with the FRB which had a borrowing capacity of \$390.5 million and no amount outstanding at June 30, 2011. In addition to its secured lines of credit, the Bank also maintains unsecured lines of credit, subject to availability, of \$92.0 million with correspondent banks for purchase of overnight funds.

We may use large denomination brokered time deposits, the availability of which is uncertain and subject to competitive market forces, for liquidity management purposes. At June 30, 2011, the Bank had none of these brokered deposits. In addition, we have \$43.3 million of customer deposits that were

Table of Contents

subsequently participated with other FDIC insured financial institutions through the CDARS program as a means to provide FDIC deposit insurance coverage for the full amount of our participating customers' deposits.

To meet short-term liquidity needs, the Bank maintains what we believe are adequate balances in cash, interest-earning deposits in other financial institutions and investment securities with a maturity or duration of five years or less. Our on-balance sheet liquidity ratio, calculated as liquid assets (cash, interest-earning deposits in financial institutions and unpledged investment securities available-for-sale) as a percent of total deposits, was 24.9% as of June 30, 2011 and 18.1% at December 31, 2010. We increased the Bank's on-balance sheet liquidity in order to have more flexibility during this current economic cycle.

***Holding Company Liquidity***

The primary sources of liquidity for the Company, on a stand-alone basis, include dividends from the Bank and our ability to raise capital, issue subordinated debt and secure outside borrowings. The ability of the Company to obtain funds for the payment of dividends to our stockholders and for other cash requirements is largely dependent upon the Bank's earnings. Pacific Western is subject to restrictions under certain federal and state laws and regulations which limit its ability to transfer funds to the Company through intercompany loans, advances or cash dividends.

Dividends paid by state banks, such as Pacific Western, are regulated by the California Department of Financial Institutions ("DFI") under its general supervisory authority as it relates to a bank's capital requirements. A state bank may declare a dividend without the approval of the DFI as long as the total dividends declared in a calendar year do not exceed either the retained earnings or the total of net profits for three previous fiscal years less any dividends paid during such period. During 2011, PacWest received no dividends from the Bank. For the foreseeable future, any dividends from the Bank to the Company require DFI approval.

At June 30, 2011, the Company had, on a stand-alone basis, approximately \$20.2 million in cash on deposit at the Bank. Management believes this amount of cash is sufficient to fund the Company's 2011 cash flow needs.

***Contractual Obligations***

The following table presents the known contractual obligations of the Company as of the date indicated:

	June 30, 2011				
	Due Within One Year	Due in One to Three Years	Due in Three to Five Years	Due After Five Years	Total
	(Dollars in thousands)				
Time deposits	\$ 545,975	\$ 519,490	\$ 2,538	\$	\$ 1,068,003
Long-term debt obligations				354,423	354,423
Operating lease obligations	16,019	25,750	16,937	14,548	73,254
Other contractual obligations	7,905	10,985	4,059		22,949
<b>Total</b>	<b>\$ 569,899</b>	<b>\$ 556,225</b>	<b>\$ 23,534</b>	<b>\$ 368,971</b>	<b>\$ 1,518,629</b>

Time deposits include brokered deposits of \$43.3 million of customer deposits that were subsequently participated with other FDIC insured financial institutions through the CDARS program as a means to provide FDIC deposit insurance coverage for the full amount of our customers' deposits.

Table of Contents

Long term debt obligations include \$129.4 million of subordinated debentures and \$225.0 million of callable term FHLB advances. While the FHLB may call the advances to be repaid for any reason, they are likely to be called if market interest rates are higher than the advances' stated rates on the call dates. If the advances are called by the FHLB, there is no prepayment penalty. Should our FHLB advances be called, we would evaluate the funding opportunities available at that time, including new secured FHLB borrowings at the prevailing market rates. As borrowing rates are currently lower than our contract rates, we do not expect our secured FHLB borrowings to be called. Debt obligations are also discussed in Note 7, *Borrowings, Subordinated Debentures and Brokered Deposits*, in the Notes to Condensed Consolidated Financial Statements (Unaudited) contained in "Item 1. Condensed Consolidated Financial Statements (Unaudited)." Operating lease obligations are discussed in the Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 31, 2010. The other contractual obligations relate to the minimum liability associated with our data and item processing contract with a third-party provider and commitments to contribute capital to investments in low income housing project partnerships.

We believe that we will be able to meet our contractual obligations as they come due through the maintenance of adequate cash levels. We expect to maintain adequate cash levels through profitability, loan and securities repayment and maturity activity, and continued deposit gathering activities. We believe we have in place sufficient borrowing mechanisms for short-term liquidity needs.

**Off-Balance Sheet Arrangements**

Our obligations also include off-balance sheet arrangements consisting of loan-related commitments, of which only a portion are expected to be funded. At June 30, 2011, our loan-related commitments, including standby letters of credit, totaled \$677.1 million. The commitments which result in a funded loan increase our profitability through net interest income. We manage our overall liquidity taking into consideration funded and unfunded commitments as a percentage of our liquidity sources. Our liquidity sources have been and are expected to be sufficient to meet the cash requirements of our lending activities.

**Asset/Liability Management and Interest Rate Sensitivity**

***Interest Rate Risk***

Our market risk arises primarily from credit risk and interest rate risk inherent in our lending and financing activities. To manage our credit risk, we rely on adherence to our underwriting standards and loan policies, internal loan monitoring and periodic credit review as well as our allowance for credit losses methodology, all of which are administered by the Bank's credit administration department and overseen by the Company's Credit Risk Committee. To manage our exposure to changes in interest rates, we perform asset and liability management activities which are governed by guidelines pre-established by our Executive ALM Committee, and approved by our Asset/Liability Management Committee of the Board of Directors, which we refer to as our Board ALCO. Our Executive ALM Committee monitors our compliance with our asset/liability policies. These policies focus on providing sufficient levels of net interest income while considering capital constraints and acceptable levels of interest rate exposure and liquidity.

Market risk sensitive instruments are generally defined as derivatives and other financial instruments, which include investment securities, loans, deposits, and borrowings. At June 30, 2011, we had not used any derivatives to alter our interest rate risk profile or for any other reason. However, both the repricing characteristics of our fixed rate loans and floating rate loans, the significant percentage of noninterest-bearing deposits compared to interest-earning assets, and the callable features in certain borrowings, may influence our interest rate risk profile. Our financial instruments

Table of Contents

include loans receivable, Federal funds sold, interest-bearing deposits in financial institutions, Federal Home Loan Bank stock, investment securities, deposits, borrowings and subordinated debentures.

We measure our interest rate risk position on at least a quarterly basis using three methods: (i) net interest income simulation analysis; (ii) market value of equity modeling; and (iii) traditional gap analysis. The results of these analyses are reviewed by the Executive ALM Committee and the Board ALCO quarterly. If hypothetical changes to interest rates cause changes to our simulated net present value of equity and/or net interest income outside our pre-established limits, we may adjust our asset and liability mix in an effort to bring our interest rate risk exposure within our established limits.

We evaluated the results of our net interest income simulation and market value of equity models prepared as of June 30, 2011, the results of which are presented below. Our net interest income simulation indicates that our balance sheet is liability sensitive as rising interest rates would result in a decline in our net interest margin. This profile is primarily a result of (a) the increased origination of fixed rate loans and variable rate loans with initial fixed rate terms over the last several years and (b) declining floating rate construction loans. Our market value of equity model indicates an asset sensitive profile suggesting a sudden sustained increase in rates would result in an increase in our estimated market value of equity. This profile is a result of the assumed floors in the Company's offering rates, which are not expected to increase to the extent of the movement of market interest rates, and the significant value placed on the Company's noninterest-bearing deposits for purposes of this analysis. The divergent profile between the net interest income simulation and market value of equity model is a result of the Company's significant level of noninterest-bearing deposits. Static balances of noninterest-bearing deposits do not impact the net interest income simulation, while at the same time the value of these deposits increases substantially in the market value of equity model when market rates are assumed to rise. In general, we view the net interest income model results as more relevant to the Company's current operating profile and manage our balance sheet based on this information.

***Net Interest Income Simulation***

We used a simulation model to measure the estimated changes in net interest income that would result over the next 12 months from immediate and sustained changes in interest rates as of June 30, 2011. This model is an interest rate risk management tool and the results are not necessarily an indication of our future net interest income. This model has inherent limitations and these results are based on a given set of rate changes and assumptions at one point in time. We have assumed no growth in either our interest-sensitive assets or liabilities over the next 12 months; therefore, the results reflect an interest rate shock to a static balance sheet.

This analysis calculates the difference between net interest income forecasted using both increasing and declining interest rate scenarios and net interest income forecasted using a base market interest rate derived from the U.S. Treasury yield curve at June 30, 2011. In order to arrive at the base case, we extend our balance sheet at June 30, 2011 one year and reprice any assets and liabilities that would contractually reprice or mature during that period using the products' pricing as of June 30, 2011. Based on such repricings, we calculate an estimated net interest income and net interest margin.

The repricing relationship for each of our assets and liabilities includes many assumptions. For example, many of our assets are floating rate loans, which are assumed to reprice to the same extent as the change in market rates according to their contracted index except for floating rate loans tied to our base lending rate which are assumed to reprice upward only after the first 75 basis point increase in market rates. This assumption is due to the fact that we reduced our base lending rate 100 basis points when the Federal Reserve lowered the Federal Funds benchmark rate by 175 basis points in the fourth quarter of 2008. Some loans and investment vehicles include the opportunity of prepayment (imbedded options) and the simulation model uses a prepayment model to estimate these prepayments and

Table of Contents

reinvest these proceeds at current simulated yields. Our deposit products reprice at our discretion and are assumed to reprice more slowly in a rising or declining interest rate environment and usually reprice at a rate less than the change in market rates. Also, a callable option feature on certain borrowings will reprice differently in a rising interest rate environment than in a declining interest rate environment. The effects of certain balance sheet attributes, such as fixed rate loans, floating rate loans that have reached their floors, and the volume of noninterest-bearing deposits as a percentage of earning assets, impact our assumptions and consequently the results of our interest rate risk management model. Changes that could vary significantly from our assumptions include loan and deposit growth or contraction, changes in the mix of our earning assets or funding sources, and future asset/liability management decisions, all of which may have significant effects on our net interest income.

The simulation analysis does not account for all factors that impact this analysis, including changes by management to mitigate the impact of interest rate changes or the impact a change in interest rates may have on our credit risk profile, loan prepayment estimates and spread relationships which can change regularly. In addition, the simulation analysis does not make any assumptions regarding loan fee income, which is a component of our net interest income and tends to increase our net interest margin. Management reviews the model assumptions for reasonableness on a quarterly basis.

The following table presents as of June 30, 2011, forecasted net interest income and net interest margin for the next 12 months using a base market interest rate and the estimated change to the base scenario given immediate and sustained upward and downward movements in interest rates of 100, 200 and 300 basis points.

Interest rate scenario	Estimated Net Interest Income	Percentage Change From Base	Estimated Net Interest Margin	Estimated Net Interest Margin Change From Base
(Dollars in thousands)				
Up 300 basis points	\$ 240,192	(5.3)%	4.86%	(0.27)%
Up 200 basis points	\$ 240,905	(5.0)%	4.88%	(0.25)%
Up 100 basis points	\$ 243,892	(3.8)%	4.94%	(0.19)%
BASE CASE	\$ 253,608		5.13%	
Down 100 basis points	\$ 246,231	(2.9)%	4.99%	(0.14)%
Down 200 basis points	\$ 244,295	(3.7)%	4.95%	(0.18)%
Down 300 basis points	\$ 239,747	(5.5)%	4.86%	(0.27)%

The net interest income simulation model prepared as of June 30, 2011 suggests our balance sheet is liability sensitive. Liability sensitivity indicates that in a rising interest rate environment, our net interest margin would decrease. Due to the historically low market interest rates as of June 30, 2011 the "down" scenarios are not considered meaningful and are excluded from the following discussion. The liability sensitive profile is due mostly to the mix of fixed rate loans to total loans in the loan portfolio relative to our amount of interest-bearing deposits that would reprice as interest rates change. Although \$1.9 billion of the \$3.7 billion of total loans in the portfolio have variable interest rate terms, only \$573 million of those variable rate loans will reprice within 12 months. The remaining variable rate loans will behave as if they have fixed rates in the short run because of the effect of interest rate floors and hybrid ARM loan pricing structures of mini-perm commercial real estate loans, which generally contain initial fixed rate terms ranging from three to five years before becoming variable rate.

In comparing the June 30, 2011 simulation results to March 31, 2011, our profile has remained relatively unchanged while our overall estimated net interest income has decreased for all scenarios. The decline in the simulated net interest income is a result of lower earning assets due to the net decline in the loan portfolio.

Table of Contents***Market Value of Equity***

We measure the impact of market interest rate changes on the net present value of estimated cash flows from our assets, liabilities and off-balance sheet items, defined as the market value of equity, using a simulation model. This simulation model assesses the changes in the market value of our interest sensitive financial instruments that would occur in response to an instantaneous and sustained increase or decrease in market interest rates of 100, 200 and 300 basis points. This analysis assigns significant value to our noninterest-bearing deposit balances. The projections are by their nature forward looking and therefore inherently uncertain, and include various assumptions regarding cash flows and interest rates. This model is an interest rate risk management tool and the results are not necessarily an indication of our actual future results. Actual results may vary significantly from the results suggested by the market value of equity table. Loan prepayments and deposit attrition, changes in the mix of our earning assets or funding sources, and future asset/liability management decisions, among others, may vary significantly from our assumptions. The base case is determined by applying various current market discount rates to the estimated cash flows from the different types of assets, liabilities and off-balance sheet items existing at June 30, 2011.

The following table shows the projected change in the market value of equity for the set of rate shocks presented as of June 30, 2011:

Interest rate scenario	Estimated Market Value	Dollar Change From Base	Percentage Change From Base	Percentage of Total Assets	Ratio of Estimated Market Value to Book Value
(Dollars in thousands)					
Up 300 basis points	\$ 653,337	\$ 3,706	0.6%	12.1%	127.6%
Up 200 basis points	\$ 691,270	\$ 41,639	6.4%	12.8%	135.0%
Up 100 basis points	\$ 674,484	\$ 24,853	3.8%	12.5%	131.7%
BASE CASE	\$ 649,631			12.0%	126.9%
Down 100 basis points	\$ 580,637	\$ (68,994)	(10.6)%	10.8%	113.4%
Down 200 basis points	\$ 530,546	\$ (119,085)	(18.3)%	9.8%	103.6%
Down 300 basis points	\$ 499,159	\$ (150,472)	(23.2)%	9.3%	97.5%

The results of our market value of equity model indicate an asset sensitive interest rate risk profile at June 30, 2011 demonstrated by the increase in the market value of equity in the "up" interest rate scenarios compared to the "base case". Given the historically low market interest rates as of June 30, 2011, the "down" scenarios at June 30, 2011 are not considered meaningful and are excluded from the following discussion.

Our asset sensitive position as of June 30, 2011 is due primarily to the significant value placed on our noninterest-bearing deposits and the assumed floors in the discount rates used to value a portion of the loan portfolio. The discount rate used to value our loan portfolio is derived from the expected offering rate for each loan type with a similar term and credit risk profile. In a rising rate environment, management does not expect to increase our offering rates on certain loan products to the same extent as market rates until the fully indexed offering rate exceeds the current pricing floor, and in turn, our loans are not projected to lose significant value in the "up" 100 basis point and "up" 200 basis point scenarios. Conversely, the discount rates for our liabilities are expected to immediately change when market rates change. Therefore, our liabilities are expected to increase in value as rates rise thereby increasing the estimated market value of equity in the rising rate scenario.

In comparing the June 30, 2011 simulation results to March 31, 2011, our base case estimated market value of equity has decreased while our overall profile is consistent with the prior quarter. The decrease in base case estimated market value of equity is the result of a decrease in the discount rates used to value deposit accounts, partially offset by the \$12.8 million of earnings retained during the quarter and the \$5.8 million increase in accumulated other comprehensive income during the quarter.

Edgar Filing: PACWEST BANCORP - Form 10-Q

Table of Contents

*Gap Analysis*

As part of the interest rate management process, we use a gap analysis. A gap analysis provides information about the volume and repricing characteristics and relationship between the amounts of interest-sensitive assets and interest-bearing liabilities at a particular point in time. An effective interest rate strategy attempts to match the volume of interest sensitive assets and interest-bearing liabilities repricing over different time intervals.

The following table illustrates the volume and repricing characteristics of our balance sheet at June 30, 2011 over the indicated time intervals:

June 30, 2011	Amounts Maturing or Repricing In				Non Interest Rate Sensitive	Total
	3 Months Or Less	Over 3 Months to 12 Months	Over 1 Year to 5 Years	Over 5 Years		
(Dollars in thousands)						
<b>ASSETS</b>						
Cash and deposits in financial institutions	\$ 58,985	\$ 58	\$ 57	\$	\$ 91,405	\$ 150,505

Cumulative gap	\$ (768,222)	\$ (643,034)	\$ (164,804)	\$ 1,680,766		
Cumulative interest-earning assets to cumulative interest-bearing liabilities	64.2%	74.0%	94.5%	151.9%		
Cumulative gap as a percent of:						
Total assets	(14.2)%	(11.9)%	(3.1)%	31.2%		

Edgar Filing: PACWEST BANCORP - Form 10-Q

Interest-earning assets	(15.8)%	(13.2)%	(3.4)%	34.6%
-------------------------	---------	---------	--------	-------

All amounts are reported at their contractual maturity or repricing periods, except for \$50.6 million in FHLB stock which is shown as a longer-term repricing investment because of the FHLB's suspended/reduced stock redemptions and dividend payments. This analysis makes certain assumptions as to interest rate sensitivity of savings and NOW accounts which have no stated maturity and have had very little rate fluctuation in the past three years. Money market accounts are repriced at management's discretion and generally are more rate sensitive.

Table of Contents

The preceding table indicates that we had a negative one year cumulative gap of \$643.0 million at June 30, 2011, a decrease of \$61.7 million from the \$704.7 million negative gap position at March 31, 2011. The change in the negative gap is attributable mostly to a reduction in one-year liabilities of \$69.3 million, reflecting a \$45.7 million decrease in interest-bearing checking, money market and savings and a \$23.6 million drop in one-year time deposits. Partially offsetting this was a decline in one-year assets of \$7.6 million, which was due mostly to a \$45.8 million decrease in one-year deposits in financial institutions, offset partially by a \$40.3 million increase in one-year loans. This gap position suggests that we are liability sensitive and if rates were to increase, our net interest margin would most likely decrease. Conversely, if rates were to decrease, our net interest margin would most likely increase. The ratio of interest-earning assets to interest-bearing liabilities maturing or repricing within one year at June 30, 2011, is 74.0%. This one year gap position indicates that interest expense is likely to be affected to a greater extent than interest income for any changes in interest rates within one year from June 30, 2011.

Borrowings includes two long term advances totaling \$225.0 million with maturity dates of 2017 and 2018, which contain quarterly call options and are currently callable by the FHLB. While the FHLB may call the advances to be repaid for any reason, they are likely to be called if market interest rates, for borrowings of similar remaining term, are higher than the advances' stated rates on the call dates. If the advances are called by the FHLB, there is no prepayment penalty. Should our FHLB advances be called, we would evaluate the funding opportunities available at that time, including new secured borrowings from the FHLB at the then market rates. As borrowing rates are currently lower than our contract rates, we do not expect our secured FHLB borrowings to be called. We may repay the advances with a prepayment penalty at any time.

The gap table has inherent limitations and actual results may vary significantly from the results suggested by the gap table. The gap table is unable to incorporate certain balance sheet characteristics or factors. The gap table assumes a static balance sheet, and accordingly, looks at the repricing of existing assets and liabilities without consideration of new loans and deposits that reflect a more current interest rate environment. Unlike the net interest income simulation, however, the interest rate risk profile of certain deposit products and floating rate loans that have reached their floors cannot be captured effectively in a gap table. Although the table shows the amount of certain assets and liabilities scheduled to reprice in a given time frame, it does not reflect when or to what extent such repricings may actually occur. For example, interest-bearing demand, money market and savings deposits are shown to reprice in the first three months, but we may choose to reprice these deposits more slowly and incorporate only a portion of the movement in market rates based on market conditions at that time. Alternatively, a loan which has reached its floor may not reprice even though market interest rates change causing such loan to act like a fixed rate loan regardless of its scheduled repricing date. The gap table as presented cannot factor in the flexibility we believe we have in repricing either deposits or the floors on our loans.

Table of Contents

We believe the estimated effect of a change in interest rates is better reflected in our net interest income and market value of equity simulations which incorporate many of the factors mentioned.

**ITEM 3. Quantitative and Qualitative Disclosure about Market Risk**

Please see the section above titled "Asset/Liability Management and Interest Rate Sensitivity" in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" which provides an update to our quantitative and qualitative disclosure about market risk. This analysis should be read in conjunction with text under the caption "Quantitative and Qualitative Disclosure About Market Risk" in our Annual Report on Form 10-K for the year ended December 31, 2010, which text is incorporated herein by reference. Our analysis of market risk and market-sensitive financial information contains forward-looking statements and is subject to the disclosure at the beginning of Item 2 regarding such forward-looking information.

**ITEM 4. Controls and Procedures**

As of the end of the period covered by this report, an evaluation was carried out by the Company's management, with the participation of the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, these disclosure controls and procedures were effective.

There have been no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

**PART II OTHER INFORMATION**

**ITEM 1. Legal Proceedings**

In the ordinary course of our business, we are party to various legal actions, which we believe are incidental to the operation of our business. The outcome of such legal actions and the timing of ultimate resolution are inherently difficult to predict. Because of these factors, the Company cannot provide a meaningful estimate of the range of reasonably possible outcomes of claims in the aggregate or by individual claim. In the opinion of management, based upon information currently available to us, any resulting liability is not likely to have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

**ITEM 1A. Risk Factors**

There have been no material changes with respect to the risk factors described in Item 1A. to Part I of our Annual Report on Form 10-K for the fiscal year ended December 31, 2010, which Item 1A. is incorporated herein by reference.

Table of Contents**ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds****(c) Issuer Repurchases of Common Stock**

The following table presents stock purchases made during the second quarter of 2011:

<b>Purchase Dates:</b>	<b>Total Shares Purchased<sup>(a)</sup></b>	<b>Average Price Per Share</b>
April 1 - April 30, 2011		\$
May 1 - May 31, 2011	1,776	21.36
June 1 - June 30, 2011	856	19.47
<b>Total</b>	<b>2,632</b>	<b>\$ 20.75</b>

(a) Shares repurchased in satisfaction of financial obligations incurred through the vesting of the Company's restricted stock.

**ITEM 6. Exhibits**

<b>Exhibit Number</b>	<b>Description</b>
3.1	Certificate of Incorporation, as amended, of PacWest Bancorp, a Delaware corporation (Exhibit 3.1 to Form 8-K filed on May 14, 2008 and incorporated herein by this reference).
3.2	Certificate of Amendment, dated May 14, 2010, to Certificate of Incorporation of PacWest Bancorp (Exhibit 3.1 to Form 8-K filed on May 14, 2010 and incorporated herein by this reference).
3.3	Bylaws of PacWest Bancorp, a Delaware corporation, dated April 22, 2008 (Exhibit 3.2 to Form 8-K filed on May 14, 2008 and incorporated herein by this reference).
31.1	Rule 13a-14(a)/15d-14(a) Certification of Chief Executive Officer.
31.2	Rule 13a-14(a)/15d-14(a) Certification of Chief Financial Officer.
32.1	Section 1350 Certification of Chief Executive Officer.
32.2	Section 1350 Certification of Chief Financial Officer.
