COGNIZANT TECHNOLOGY SOLUTIONS CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1 — Interim Condensed Consolidated Financial Statements

The terms “Cognizant,” “we,” “our,” “us” and “the Company” refer to Cognizant Technology Solutions Corporation unless the context indicates otherwise. We have prepared the accompanying unaudited condensed consolidated financial statements included herein in accordance with generally accepted accounting principles in the United States of America, or U.S. GAAP, and Article 10 of Regulation S-X under the Securities Exchange Act of 1934, as amended. The accompanying unaudited condensed consolidated financial statements should be read in conjunction with our audited consolidated financial statements (and notes thereto) included in our Annual Report on Form 10-K for the year ended December 31, 2014. In our opinion, all adjustments considered necessary for a fair presentation of the accompanying unaudited condensed consolidated financial statements have been included, and all adjustments are of a normal and recurring nature. Operating results for the interim periods are not necessarily indicative of results that may be expected to occur for the entire year.

During the three months ended March 31, 2015, we repurchased 400,000 shares of our Class A common stock for \$25.0 million, inclusive of fees and expenses, under our existing stock repurchase program approved by our Board of Directors. As of March 31, 2015, the remaining available balance under the Board authorization was \$788.9 million. Additional stock repurchases were made in connection with our stock-based compensation plans, whereby company shares were tendered by employees for payment of applicable statutory tax withholdings. During the three months ended March 31, 2015, such repurchases totaled 217,014 shares at an aggregate cost of \$13.4 million.

New Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board, or FASB, issued a standard on revenue from contracts with customers. The new standard sets forth a single comprehensive model for recognizing and reporting revenue. The standard also requires additional financial statement disclosures that will enable users to understand the nature, amount, timing and uncertainty of revenue and cash flows relating to customer contracts. The new standard will be effective for periods beginning on or after January 1, 2017. Early adoption is not permitted. The standard allows for two methods of adoption: the full retrospective adoption, which requires the standard to be applied to each prior period presented, or the modified retrospective adoption, which requires the cumulative effect of adoption to be recognized as an adjustment to opening retained earnings in the period of adoption. We are currently evaluating the effect the new standard will have on our consolidated financial statements and related disclosures.

In April 2015, the FASB issued a standard related to the presentation of debt issuance costs. The standard requires debt issuance costs related to a recognized debt liability to be presented in the balance sheet as a direct deduction from the carrying value of that debt liability. The recognition and measurement guidance for debt issuance costs are not affected by this standard. The amendment is effective on a retrospective basis for fiscal years, and interim periods within those years, beginning on or after January 1, 2016. The adoption of this standard will affect financial statement presentation only and is expected to have no effect on our financial condition or results of operations.

In April 2015, the FASB issued a standard providing guidance to customers in evaluating whether a cloud computing arrangement includes a software license. If a cloud computing arrangement includes a software license, the standard requires the customer to account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer is required to account for the arrangement as a service contract. The amendments are effective for fiscal years, and interim periods within those years, beginning on or after January 1, 2016. The Company is currently in the process of evaluating the impact of adoption of the standard on our consolidated financial statements.

Table of Contents

Note 2 — Short-term Investments

Our short-term investments were as follows:

	March 31, 2015	December 31, 2014
	(in millions)	
Available-for-sale investment securities:		
U.S. Treasury and agency debt securities	\$545.6	\$544.7
Corporate and other debt securities	371.2	358.6
Certificates of deposit and commercial paper	263.6	4.6
Asset-backed securities	220.1	220.1
Municipal debt securities	108.8	112.8
Mutual funds	22.4	21.9
Total available-for-sale investment securities	1,531.7	1,262.7
Time deposits	546.7	501.9
Total short-term investments	\$2,078.4	\$1,764.6

Our available-for-sale investment securities consist of U.S. dollar denominated investments primarily in U.S. Treasury notes, U.S. government agency debt securities, municipal debt securities, non-U.S. government debt securities, U.S. and international corporate bonds, certificates of deposit, commercial paper, debt securities issued by supranational institutions, mutual funds invested in fixed income securities, and asset-backed securities, including Government National Mortgage Association (GNMA) mortgage backed securities and securities backed by auto loans, credit card receivables, and other receivables. Our investment guidelines are to purchase securities which are investment grade at the time of acquisition. We monitor the credit ratings of the securities in our portfolio on an ongoing basis.

Available-for-Sale Investment Securities

The amortized cost, gross unrealized gains and losses and fair value of available-for-sale investment securities at March 31, 2015 were as follows:

	Amortized Cost (in millions)	Unrealized Gains	Unrealized Losses	Fair Value
U.S. Treasury and agency debt securities	\$543.9	\$1.7	\$—	\$545.6
Corporate and other debt securities	370.1	1.2	(0.1)	371.2
Certificates of deposit and commercial paper	263.4	0.2	—	263.6
Asset-backed securities	219.9	0.3	(0.1)	220.1
Municipal debt securities	108.6	0.3	(0.1)	108.8
Mutual funds	24.3	0.2	(2.1)	22.4
Total available-for-sale investment securities	\$1,530.2	\$3.9	\$(2.4)	\$1,531.7

The amortized cost, gross unrealized gains and losses and fair value of available-for-sale investment securities at December 31, 2014 were as follows:

	Amortized Cost (in millions)	Unrealized Gains	Unrealized Losses	Fair Value
U.S. Treasury and agency debt securities	\$544.7	\$0.4	\$(0.4)	\$544.7
Corporate and other debt securities	359.0	0.3	(0.7)	358.6
Certificates of deposit and commercial paper	4.6	—	—	4.6
Asset-backed securities	220.4	0.1	(0.4)	220.1
Municipal debt securities	112.5	0.4	(0.1)	112.8
Mutual funds	23.9	0.3	(2.3)	21.9
Total available-for-sale investment securities	\$1,265.1	\$1.5	\$(3.9)	\$1,262.7

Table of Contents

The fair value and related unrealized losses of available-for-sale investment securities in a continuous unrealized loss position for less than 12 months and for 12 months or longer were as follows as of March 31, 2015:

	Less than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	(in millions)					
U.S. Treasury and agency debt securities	\$47.1	\$—	\$—	\$—	\$47.1	\$—
Corporate and other debt securities	45.7	(0.1)	—	—	45.7	(0.1)
Asset-backed securities	77.1	(0.1)	3.5	—	80.6	(0.1)
Municipal debt securities	34.5	(0.1)	—	—	34.5	(0.1)
Mutual funds	—	—	21.2	(2.1)	21.2	(2.1)
Total	\$204.4	\$(0.3)	\$24.7	\$(2.1)	\$229.1	\$(2.4)

The fair value and related unrealized losses of available-for-sale investment securities in a continuous unrealized loss position for less than 12 months and for 12 months or longer were as follows as of December 31, 2014:

	Less than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	(in millions)					
U.S. Treasury and agency debt securities	\$256.9	\$(0.4)	\$—	\$—	\$256.9	\$(0.4)
Corporate and other debt securities	229.7	(0.7)	—	—	229.7	(0.7)
Certificates of deposit and commercial paper	3.7	—	—	—	3.7	—
Asset-backed securities	151.9	(0.3)	2.8	(0.1)	154.7	(0.4)
Municipal debt securities	28.0	(0.1)	—	—	28.0	(0.1)
Mutual funds	—	—	20.7	(2.3)	20.7	(2.3)
Total	\$670.2	\$(1.5)	\$23.5	\$(2.4)	\$693.7	\$(3.9)

The unrealized losses for the above securities as of March 31, 2015 and December 31, 2014 are primarily attributable to changes in interest rates. As of March 31, 2015, we do not consider any of the investments to be other-than-temporarily impaired. The gross unrealized gains and losses in the above tables were recorded, net of tax, in accumulated other comprehensive income (loss).

The contractual maturities of our fixed income available-for-sale investment securities as of March 31, 2015 are set forth in the following table:

	Amortized Cost	Fair Value
	(in millions)	
Due within one year	\$316.2	\$316.4
Due after one year up to two years	479.5	480.7
Due after two years up to three years	473.7	475.4
Due after three years up to four years	16.6	16.7
Asset-backed securities	219.9	220.1
Fixed income available-for-sale investment securities	\$1,505.9	\$1,509.3

Asset-backed securities were excluded from the maturity categories because the actual maturities may differ from the contractual maturities since the underlying receivables may be prepaid without penalties. Further, actual maturities of debt securities may differ from those presented above since certain obligations provide the issuer the right to call or prepay the obligation prior to scheduled maturity without penalty.

Table of Contents

Proceeds from sales of available-for-sale investment securities and the gross gains and losses that have been included in earnings as a result of those sales were as follows:

	Three Months Ended	
	March 31,	
	2015	2014
	(in millions)	
Proceeds from sales of available-for-sale investment securities	\$181.8	\$179.0
Gross gains	\$0.4	\$0.4
Gross losses	(0.1) —
Net realized gains on sales of available-for-sale investment securities	\$0.3	\$0.4

Note 3 — Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities were as follows:

	March 31, 2015	December 31,
	2014	
	(in millions)	
Compensation and benefits	\$623.5	\$906.8
Income taxes	30.1	23.8
Professional fees	91.6	82.7
Travel and entertainment	33.6	35.0
Customer volume incentives	197.5	192.1
Derivative financial instruments	65.8	97.3
Other	179.7	184.6
Total accrued expenses and other current liabilities	\$1,221.8	\$1,522.3

Note 4 — Debt

On November 20, 2014, we entered into a credit agreement with a commercial bank syndicate providing for a \$1,000.0 million unsecured term loan and a \$750.0 million unsecured revolving credit facility. The term loan was used to pay a portion of the cash consideration in connection with the 2014 acquisition of TZ US Parent, Inc., or TriZetto. The revolving credit facility is available for general corporate purposes. The term loan and the revolving credit facility both mature on November 20, 2019. As of March 31, 2015 and December 31, 2014, we had notes outstanding under the revolving credit facility of \$100.0 million and \$650.0 million, respectively. We are required under the credit agreement to make scheduled quarterly principal payments on the term loan.

Short-term Debt

The following summarizes our short-term debt balances as of:

	March 31, 2015	December 31, 2014
	(in millions)	
Notes outstanding under revolving credit facility	\$100.0	\$650.0
Term loan - current maturities	50.0	50.0
Total short-term debt	\$150.0	\$700.0

Table of Contents

Long-term Debt

The following summarizes our long-term debt balances as of:

	March 31, 2015 (in millions)		December 31, 2014	
Term loan, due 2019	\$975.0		\$987.5	
Less: current maturities	(50.0)	(50.0)
Long-term debt, net of current maturities	\$925.0		\$937.5	

Note 5 — Income Taxes

Our Indian subsidiaries, collectively referred to as Cognizant India, are primarily export-oriented and are eligible for certain income tax holiday benefits granted by the government of India for export activities conducted within Special Economic Zones, or SEZs, for periods of up to 15 years. Our Indian profits ineligible for SEZ benefits are subject to corporate income tax at the rate of 33.99%. In addition, all Indian profits, including those generated within SEZs, are subject to the Minimum Alternative Tax, or MAT, at the current rate of approximately 21.0%, including surcharges. Any MAT paid is creditable against future Indian corporate income tax, subject to limitations.

Our effective income tax rates were as follows:

	Three Months Ended			
	March 31,			
	2015	%	2014	%
Effective income tax rate	25.0	%	26.3	%

For the 2015 and 2014 periods, the principal difference between our effective income tax rates and the U.S. federal statutory rate is the effect of the Indian tax holiday and earnings taxed in countries that have lower rates than the United States. In 2015, our effective income tax rate decreased primarily due to discrete tax benefits recorded in 2015.

Note 6 — Fair Value Measurements

We measure our cash equivalents, investments and foreign exchange forward contracts at fair value. The authoritative guidance defines fair value as the exit price, or the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The authoritative guidance also establishes a fair value hierarchy that is intended to increase consistency and comparability in fair value measurements and related disclosures. The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable. Observable inputs reflect assumptions market participants would use in pricing an asset or liability based on market data obtained from independent sources while unobservable inputs reflect a reporting entity's pricing based upon their own market assumptions.

The fair value hierarchy consists of the following three levels:

Level 1 – Inputs are quoted prices in active markets for identical assets or liabilities.

Level 2 – Inputs are quoted prices for similar assets or liabilities in an active market, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable and market-corroborated inputs which are derived principally from or corroborated by observable market data.

Level 3 – Inputs are derived from valuation techniques in which one or more significant inputs or value drivers are unobservable.

Table of Contents

The following table summarizes our financial assets and (liabilities) measured at fair value on a recurring basis as of March 31, 2015:

	Level 1 (in millions)	Level 2	Level 3	Total

Total	\$528.3	\$1,657.0	\$—	\$2,185.3

Table of Contents

The following table summarizes our financial assets and (liabilities) measured at fair value on a recurring basis as of December 31, 2014:

	Level 1 (in millions)	Level 2	Level 3	Total
Cash equivalents:				
Money market funds	\$176.5	\$—	\$—	\$176.5
Commercial paper	—	7.4	—	7.4
Total cash equivalents	176.5	7.4	—	183.9
Short-term investments:				
Time deposits	—	501.9	—	501.9
Available-for-sale investment securities:				
U.S. Treasury and agency debt securities	426.8	117.9	—	544.7
Corporate and other debt securities	—	358.6	—	358.6
Certificates of deposit and commercial paper	—	4.6	—	4.6
Asset-backed securities	—	220.1	—	220.1
Municipal debt securities	—	112.8	—	112.8
Mutual funds	—	21.9	—	21.9
Total available-for-sale investment securities	426.8	835.9	—	1,262.7
Total short-term investments	426.8	1,337.8	—	1,764.6
Derivative financial instruments - foreign exchange forward contracts:				
Other current assets	—	2.7	—	2.7
Accrued expenses and other current liabilities	—	(97.3)	—	(97.3)
Other noncurrent assets	—	3.9	—	3.9
Other noncurrent liabilities	—	(10.0)	—	(10.0)
Total	\$603.3	\$1,244.5	\$—	\$1,847.8

We measure the fair value of money market funds and U.S. Treasury securities based on quoted prices in active markets for identical assets and therefore classify these assets as Level 1. The fair value of commercial paper, certificates of deposit, U.S. government agency securities, municipal debt securities, U.S. and international corporate bonds and foreign government debt securities is measured based on relevant trade data, dealer quotes, or model driven valuations using significant inputs derived from or corroborated by observable market data, such as yield curves and credit spreads. We measure the fair value of our asset-backed securities using model driven valuations based on significant inputs derived from or corroborated by observable market data such as dealer quotes, available trade information, spread data, current market assumptions on prepayment speeds and defaults and historical data on deal collateral performance. The value of the mutual funds invested in fixed income securities is based on the net asset value, or NAV, of the fund, with appropriate consideration of the liquidity and any restrictions on disposition of our investment in the fund. The carrying value of the time deposits approximated fair value as of March 31, 2015 and December 31, 2014.

We estimate the fair value of each foreign exchange forward contract by using a present value of expected cash flows model. This model calculates the difference between the current market forward price and the contracted forward price for each foreign exchange contract and applies the difference in the rates to each outstanding contract. The market forward rates include a discount and credit risk factor. The amounts are aggregated by type of contract and maturity.

During the three months ended March 31, 2015 and the year ended December 31, 2014, there were no transfers among Level 1, Level 2, or Level 3 financial assets and liabilities.

Table of Contents

Note 7 — Derivative Financial Instruments

In the normal course of business, we use foreign exchange forward contracts to manage foreign currency exchange rate risk. The estimated fair value of the foreign exchange forward contracts considers the following items: discount rate, timing and amount of cash flow and counterparty credit risk. Derivatives may give rise to credit risks from the possible non-performance by counterparties. Credit risk is generally limited to the fair value of those contracts that are favorable to us. We have limited our credit risk by entering into derivative transactions only with highly-rated global financial institutions, limiting the amount of credit exposure with any one financial institution and conducting ongoing evaluation of the creditworthiness of the financial institutions with which we do business. In addition, all the assets and liabilities related to our foreign exchange forward contracts set forth in the below table are subject to International Swaps and Derivatives Association, or ISDA, master netting arrangements or other similar agreements with each individual counterparty. These master netting arrangements generally provide for net settlement of all outstanding contracts with the counterparty in the case of an event of default or a termination event. We have presented all the assets and liabilities related to our foreign exchange forward contracts on a gross basis, with no offsets, in our accompanying unaudited condensed consolidated statements of financial position. There is no financial collateral (including cash collateral) posted or received by us related to our foreign exchange forward contracts.

The following table provides information on the location and fair values of derivative financial instruments included in our unaudited condensed consolidated statement of financial position as of:

Designation of Derivatives	Location on Statement of Financial Position	March 31, 2015		December 31, 2014	
		Assets	Liabilities	Assets	Liabilities
		(in millions)

Cash Flow Hedges

We have entered into a series of foreign exchange forward contracts that are designated as cash flow hedges of Indian rupee denominated payments in India. These contracts are intended to partially offset the impact of movement of exchange rates on future operating costs and are scheduled to mature each month during 2015, 2016, 2017, and 2018. Under these contracts, we purchase Indian rupees and sell U.S. dollars. The changes in fair value of these contracts are initially reported in the caption "Accumulated other comprehensive income (loss)" in our consolidated statements of financial position and are subsequently reclassified to earnings in the same period the hedge contract matures. As of March 31, 2015, we estimate that \$40.7 million, net of tax, of the net losses related to derivatives designated as cash flow hedges recorded in accumulated other comprehensive income (loss) is expected to be reclassified into earnings within the next 12 months.

The notional value of our outstanding contracts by year of maturity and the net unrealized (loss) included in accumulated other comprehensive income (loss) for such contracts were as follows as of:

	March 31, 2015	December 31, 2014
	(in millions)	
2015	\$990.0	\$1,320.0
2016	1,020.0	720.0
2017	750.0	420.0
2018	150.0	—
Total notional value of contracts outstanding	\$2,910.0	\$2,460.0
Net unrealized (loss) included in accumulated other comprehensive income (loss), net of taxes	\$ (44.5)	\$ (86.7)

Upon settlement or maturity of the cash flow hedge contracts, we record the related gain or loss, based on our designation at the commencement of the contract, with the hedged Indian rupee denominated expense reported within cost of revenues and selling, general and administrative expenses. Hedge ineffectiveness was immaterial for all periods presented.

The following table provides information on the location and amounts of pre-tax (losses) on our cash flow hedges for the three months ended March 31:

	(Increase) Decrease in Derivative Losses Recognized in Accumulated Other Comprehensive Income (Loss) (effective portion)		Location of Net Derivative (Losses) Reclassified from Accumulated Other Comprehensive Income (Loss) (effective portion)	Net (Loss) Reclassified from Accumulated Other Comprehensive Income (Loss) into Income (effective portion)	
	2015	2014		2015	2014
	(in millions)				
Cash Flow Hedges – Designated as hedging instruments					
Foreign exchange forward contracts	\$34.7	\$86.3	Cost of revenues	\$ (11.2)	\$ (33.5)
			Selling, general and administrative expenses	(2.5)	(6.8)
			Total	\$ (13.7)	\$ (40.3)

The activity related to the change in net unrealized (losses) on our cash flow hedges included in accumulated other comprehensive income (loss) is presented in Note 9.

Table of Contents

Other Derivatives

We use foreign exchange forward contracts, which have not been designated as hedges, to hedge balance sheet exposure to certain monetary assets and liabilities denominated in currencies other than the functional currency of our foreign subsidiaries. Contracts outstanding as of March 31, 2015 are scheduled to mature in 2015. Realized gains or losses and changes in the estimated fair value of these derivative financial instruments are recorded in the caption "Foreign currency exchange gains (losses), net" in our consolidated statements of operations.

Additional information related to our outstanding contracts is as follows:

	March 31, 2015		December 31, 2014	
	Notional	Market Value	Notional	Market Value
	(in millions)			
Contracts to purchase U.S. dollars and sell:				
Indian rupees	\$160.0	\$(3.3)	\$160.0	\$1.8
Euros	14.3	(0.1)	24.4	0.2
British pounds	—	—	17.9	—
Australian dollars	9.7	\$0.1	9.6	(0.1)
Canadian dollars	4.3	—	3.7	—
Total	\$188.3	\$(3.3)	\$215.6	\$1.9

The following table provides information on the location and amounts of realized and unrealized pre-tax gains and losses on our other derivative financial instruments for the three months ended March 31, 2015 and 2014:

	Location of Net (Losses) on Derivative Instruments	Amount of Net (Losses) on Derivative Instruments	
		2015	2014
		(in millions)	
Other Derivatives – Not designated as hedging instruments	Foreign currency exchange gains (losses), net		
Foreign exchange forward contracts		\$(1.8)	\$(8.4)

The related cash flow impacts of all of our derivative activities are reflected as cash flows from operating activities.

Note 8 — Commitments and Contingencies

We are involved in various claims and legal actions arising in the ordinary course of business. We accrue a liability when a loss is considered probable and the amount can be reasonably estimated. In the opinion of management, the outcome of any existing claims and legal or regulatory proceedings, if decided adversely, is not expected to have a material adverse effect on our business, financial condition, results of operations and cash flows. Additionally, many of our engagements involve projects that are critical to the operations of our customers' business and provide benefits that are difficult to quantify. Any failure in a customer's systems or our failure to meet our contractual obligations to our clients, including any breach involving a customer's confidential information or sensitive data, or our obligations under applicable laws or regulations could result in a claim for substantial damages against us, regardless of our responsibility for such failure. Although we attempt to contractually limit our liability for damages arising from negligent acts, errors, mistakes, or omissions in rendering our services, there can be no assurance that the limitations of liability set forth in our contracts will be enforceable in all instances or will otherwise protect us from liability for damages. Although we have general liability insurance coverage, including coverage for errors or omissions, there can be no assurance that such coverage will cover all types of claims, continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. The successful assertion of one or more large claims against us that exceed or are not covered by our insurance coverage or changes in our insurance policies, including premium increases or the imposition of large deductible or co-insurance requirements, could have a material adverse effect on our business, results of operations, financial condition and cash flows.

In the normal course of business and in conjunction with certain client engagements, we have entered into contractual arrangements through which we may be obligated to indemnify clients or other parties with whom we conduct business with respect to certain matters. These arrangements can include provisions whereby we agree to hold the indemnified party and certain of their affiliated entities harmless with respect to third-party claims related to such matters as our breach of certain

Table of Contents

representations or covenants, or out of our intellectual property infringement, our gross negligence or willful misconduct or certain other claims made against certain parties. Payments by us under any of these arrangements are generally conditioned on the client making a claim and providing us with full control over the defense and settlement of such claim. It is not possible to determine the maximum potential amount under these indemnification agreements due to the unique facts and circumstances involved in each particular agreement. Historically, we have not made payments under these indemnification agreements and therefore they have not had any impact on our operating results, financial position, or cash flows. However, if events arise requiring us to make payment for indemnification claims under our indemnification obligations in contracts we have entered, such payments could have material impact on our business, results of operations, financial condition and cash flows.

Note 9 — Accumulated Other Comprehensive Income (Loss)

Changes in accumulated other comprehensive income (loss) by component were as follows for the three months ended March 31, 2015:

	Before Tax Amount (in millions)	Tax Effect	Net of Tax Amount
Foreign currency translation adjustments:			
Beginning balance	\$(34.8)	\$—	\$(34.8)
Change in foreign currency translation adjustments	(40.8)	—	(40.8)

Ending balance	\$(202.5)	\$35.2	\$(167.3)

Note 10 — Segment Information

Our reportable segments are:

• Financial Services, which includes customers providing banking/transaction processing, capital markets and insurance services;

• Healthcare, which includes healthcare providers and payers as well as life sciences customers, including pharmaceutical, biotech and medical device companies;

• Manufacturing/Retail/Logistics, which includes consumer goods, manufacturers, retailers, travel and other hospitality customers, as well as customers providing logistics services; and

Other, which is an aggregation of industry segments each of which, individually, represents less than 10% of consolidated revenues and segment operating profit. The Other reportable segment includes our information, media and entertainment services, communications and high technology operating segments. Our sales managers, account executives, account managers and project teams are aligned in accordance with the specific industries they serve. Our chief operating decision maker evaluates the company's performance and allocates resources based on segment revenues and operating profit. Segment operating profit is defined as income from operations before unallocated costs. Generally, operating expenses for each operating segment have similar characteristics and are subject to the same factors, pressures and challenges. However, the economic environment and its effects on industries served by our operating segments may affect revenue and operating expenses to differing degrees. Expenses included in segment operating profit consist principally of direct selling and delivery costs as well as a per seat charge for use of the

development and delivery centers. Certain selling, general and administrative expenses, excess or shortfall of incentive compensation for delivery personnel as compared to target, stock-based compensation expense, a portion of depreciation and amortization and the impact of the

Table of Contents

settlements of our cash flow hedges are not allocated to individual segments in internal management reports used by the chief operating decision maker. Accordingly, such expenses are excluded from segment operating profit and are separately disclosed as “unallocated” and adjusted only against our total income from operations. Additionally, management has determined that it is not practical to allocate identifiable assets by segment, since such assets are used interchangeably among the segments.

Revenues from external customers and segment operating profit, before unallocated expenses, for the Financial Services, Healthcare, Manufacturing/Retail/Logistics, and Other reportable segments were as follows:

	Three Months Ended	
	March 31,	
	2015	2014
	(in millions)	
Revenues:		
Financial Services	\$1,161.1	\$1,023.7
Healthcare	879.1	615.9
Manufacturing/Retail/Logistics	548.9	511.9
Other	322.3	270.8
Total revenue	\$2,911.4	\$2,422.3
	Segment Operating	
Profit:		
Financial Services	\$347.4	\$347.9
Healthcare	245.1	214.3
Manufacturing/Retail/Logistics	181.3	181.7
Other	92.0	89.6
Total segment operating profit	865.8	833.5
Less: unallocated costs	365.5	373.5
Income from operations	\$500.3	\$460.0

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Executive Summary

We are a leading provider of information technology (IT), consulting and business process services, dedicated to helping the world’s leading companies build stronger businesses. Our clients engage us to help them operate more efficiently, provide solutions to critical business and technology problems, and help them drive technology-based innovation and growth. Our core competencies include: business, process, operations and IT consulting, application development and systems integration, enterprise information management, application testing, application maintenance, infrastructure services, and business process services. We tailor our services to specific industries and utilize an integrated global delivery model. This seamless global sourcing model combines industry-specific expertise, client service teams based on-site at the client locations and delivery teams located at dedicated near-shore and offshore global delivery centers.

For the three months ended March 31, 2015, our revenue increased to \$2,911.4 million compared to \$2,422.3 million for the three months ended March 31, 2014. During the three months ended March 31, 2015, net income increased to \$382.9 million or \$0.62 per diluted share compared to net income of \$348.9 million or \$0.57 per diluted share during the three months ended March 31, 2014. On a non-GAAP basis during the three months ended March 31, 2015, our diluted earnings per share increased to \$0.71¹ compared to \$0.62¹ for the three months ended March 31, 2014.

The key drivers of our revenue growth during the three months ended March 31, 2015 were as follows:

- Our November 2014 acquisition of TZ US Parent, Inc., or TriZetto, which contributed revenue of approximately \$169.0 million and was the primary driver of the 42.7% revenue growth in our Healthcare business segment;
- Solid performance across all of our business segments with revenue growth of 13.4% for Financial Services, 42.7% for Healthcare (inclusive of TriZetto revenue), 7.2% for Manufacturing/Retail/Logistics, and 19.0% for Other;
- Sustained strength in the North American market where revenues grew 24.8%, inclusive of TriZetto revenue, as compared to the quarter ended March 31, 2014;

Continued penetration of the European and Rest of World (primarily the Asia Pacific) markets. Revenue from our customers outside the United States was negatively affected by the recent strength of the U.S. dollar against the British pound, the Euro and other currencies. In Europe, we experienced revenue growth of 1.2%, including a 10.7% negative currency impact, as compared to the quarter ended March 31, 2014. Revenue from our Rest of World customers increased 23.7%, including a 5.8% negative currency impact, as compared to the quarter ended March 31, 2014;

• Increased customer spending on discretionary projects;

Expansion of our service offerings, including consulting, infrastructure services, and business process services, which enabled us to cross-sell new services to our customers and meet the rapidly growing demand for complex large-scale outsourcing solutions;

• Increased penetration at existing customers, including strategic clients; and

• Continued expansion of the market for global delivery of IT and business process services.

We saw a continued demand from our customers for a broad range of services, including IT strategy and business consulting, application development and systems integration, enterprise information management, application testing, application maintenance, infrastructure services, and business process services. In addition, we are seeing an increased customer interest in our digital solutions, including social, mobile, analytics and cloud-based services and increased demand for mobility data and security services. We are also seeing an increase in demand for larger, more complex projects that are transformational for our customers. Such contracts may have longer sales cycles and ramp-up periods and could lead to greater variability in our period to period operating results. We increased the number of strategic clients by 7 during the quarter, bringing the total number of our strategic clients to 278. We define a strategic client as one offering the potential to generate at least \$5 million to \$50 million or more in annual revenues at maturity.

Non-GAAP diluted earnings per share is not a measurement of financial performance prepared in accordance with GAAP. See “Non-GAAP Financial Measures” for more information and a reconciliation to the most directly comparable GAAP financial measure.

Table of Contents

Our operating margin decreased to approximately 17.2% for the quarter ended March 31, 2015 compared to 19.0% for the quarter ended March 31, 2014. The decrease in our operating margin was due to increases in compensation and benefit costs (net of the impact of lower incentive-based compensation expense) as headcount growth outpaced revenue growth, higher subcontractor expense, investments to grow our business and increases in depreciation and amortization due to recent acquisitions, partially offset by lower realized losses on our cash flow hedges in 2015 as compared to the 2014 period.

Our non-GAAP operating margin for the quarter ended March 31, 2015 was approximately 19.8%² compared to 20.8%² for the quarter ended March 31, 2014. The decrease in our non-GAAP operating margin was due to increases in compensation and benefit costs (net of the impact of lower incentive-based compensation expense) as headcount growth outpaced revenue growth, higher subcontractor expense and investments to grow our business, partially offset by lower realized losses on our cash flow hedges in 2015 as compared to the 2014 period. Historically, we have invested our profits above the 19% to 20% non-GAAP operating margin level back into our business, which we believe is a significant contributing factor to our strong revenue growth. This investment is primarily focused in the areas of hiring client partners and relationship personnel with specific industry experience or domain expertise, training our technical staff in a broader range of service offerings, strengthening our business analytics and digital technology capabilities, strengthening and expanding our portfolio of services, continuing to expand our geographic presence for both sales and delivery as well as recognizing and rewarding exceptional performance by our employees. In addition, this investment includes maintaining a level of resources, trained in a broad range of service offerings, to be well positioned to respond to our customer requests to take on additional projects. We expect to continue to invest amounts in excess of our targeted operating margin levels back into the business.

We finished the first quarter of 2015 with approximately 217,700 employees, which is an increase of approximately 39,100 as compared to March 31, 2014. The increase in the number of our service delivery staff and the related infrastructure costs to meet the demand for our services are the primary drivers of the increase in our operating expenses in 2015. Annualized turnover, including both voluntary and involuntary, was approximately 14.0% for the three months ended March 31, 2015. The majority of our turnover occurs in India. As a result, annualized attrition rates on-site at clients are below our global attrition rate. In addition, attrition is weighted towards the more junior members of our staff. We have experienced increases in compensation and benefit costs, including incentive-based compensation costs, in India which may continue in the future; however, historically, this has not had a material impact on our results of operations as we have been able to absorb such cost increases through price increases or cost management strategies such as managing discretionary costs, the mix of our professional staff as well as utilization levels, and achieving other operating efficiencies.

At March 31, 2015, we had cash, cash equivalents and short-term investments of \$3,349.8 million, working capital of \$4,522.4 million and debt outstanding of approximately \$1,075.0 million. We believe our cash from operations and capital resources on hand provide sufficient liquidity to continue to make investments to expand and grow our business, and meet our debt repayment obligations.

During the remainder of 2015, barring any unforeseen events, we expect the following factors to affect our business and our operating results:

- Continued focus by customers on directing IT spending towards cost containment projects, such as application maintenance, infrastructure services and business process services;

- Demand from our customers to help them achieve their dual mandate of simultaneously achieving cost savings while investing in innovation;

- Secular changes driven by evolving technologies and regulatory changes;

- Volatility in foreign currency rates;

- Continued uncertainty in the world economy; and

- Addition of the TriZetto business.

Non-GAAP operating margin is not a measurement of financial performance prepared in accordance with GAAP.
2See “Non-GAAP Financial Measures” for more information and a reconciliation to the most directly comparable GAAP financial measure.

20

Table of Contents

In response to this environment, we plan to continue to:

- Invest in our talent base and new service offerings, including digital technologies;
- Partner with our existing customers to garner an increased portion of our customers' overall IT spend by providing innovative solutions;
- Focus on growing our business in Europe, the Middle East, the Asia Pacific and Latin America regions, where we believe there are opportunities to gain market share;
- Increase our strategic customer base across all of our business segments;
- Opportunistically look for acquisitions that may improve our overall service delivery capabilities, expand our geographic presence and/or enable us to enter new areas of technology;
- Focus on operating discipline in order to appropriately manage our cost structure;
- Locate most of our new development center facilities in tax incentivized areas; and
- Leverage assets and capabilities obtained from the 2014 TriZetto acquisition to aggressively pursue new opportunities in the marketplace.

Business Segments

Our four reportable business segments are:

- Financial Services, which includes customers providing banking/transaction processing, capital markets and insurance services;
- Healthcare, which includes healthcare providers and payers as well as life sciences customers, including pharmaceutical, biotech and medical device companies;
- Manufacturing/Retail/Logistics, which includes consumer goods manufacturers, retailers, travel and other hospitality customers, as well as customers providing logistics services; and
- Other, which is an aggregation of industry operating segments each of which, individually, represents less than 10.0% of consolidated revenues and segment operating profit. The Other reportable segment includes our information, media and entertainment services, communications, and high technology operating segments.

Our chief operating decision maker evaluates Cognizant's performance and allocates resources based on segment revenues and operating profit. Segment operating profit is defined as income from operations before unallocated costs. Generally, operating expenses for each operating segment have similar characteristics and are subject to the same factors, pressures and challenges. However, the economic environment and its effects on industries served by our operating segments may affect revenue and operating expenses to differing degrees. Expenses included in segment operating profit consist principally of direct selling and delivery costs as well as a per seat charge for use of the development and delivery centers. Certain selling, general and administrative expenses, excess or shortfall of incentive compensation for delivery personnel as compared to target, stock-based compensation expense, a portion of depreciation and amortization and a portion of the impact of the settlements of our cash flow hedges are not allocated to individual segments in internal management reports used by the chief operating decision maker. Accordingly, such expenses are excluded from segment operating profit.

We provide a significant volume of services to many customers in each of our business segments. Therefore, a loss of a significant customer or a few significant customers in a particular segment could materially reduce revenues for that segment. However, no individual customer accounted for sales in excess of 10% of our consolidated revenues for the periods ended March 31, 2015 and 2014. In addition, the services we provide to our larger customers are often critical to the operations of such customers and we believe that a termination of our services would require an extended transition period with gradually declining revenues.

Results of Operations

Three Months Ended March 31, 2015 Compared to Three Months Ended March 31, 2014

The following table sets forth, for the periods indicated, certain financial data for the three months ended March 31:

	2015	% of Revenues	2014	% of Revenues	Increase (Decrease) \$	%
	(Dollars in millions)					
Revenues	\$2,911.4	100.0	\$2,422.3	100.0	\$489.1	20.2
Cost of revenues ⁽¹⁾	1,727.2	59.3	1,432.4	59.1	294.8	20.6
Selling, general and administrative expenses ⁽¹⁾	610.8	21.0	485.4	20.0	125.4	25.8
Depreciation and amortization expense	73.1	2.5	44.5	1.8	28.6	64.3
Income from operations	500.3	17.2	460.0	19.0	40.3	8.8
Other income (expense), net	10.3		13.2		(2.9)	(22.0)
Income before provision for income taxes	510.6	17.5	473.2	19.5	37.4	7.9
Provision for income taxes	127.7		124.3		3.4	2.7
Net income	\$382.9	13.2	\$348.9	14.4	\$34.0	9.7
Diluted earnings per share	\$0.62		\$0.57		\$0.05	
Other Financial Information ⁽²⁾						
Non-GAAP income from operations and non-GAAP operating margin	\$576.8	19.8	\$503.8	20.8	\$73.0	14.5
Non-GAAP diluted earnings per share	\$0.71		\$0.62		\$0.09	

(1) Exclusive of depreciation and amortization expense.

Non-GAAP income from operations, non-GAAP operating margin and non-GAAP diluted earnings per share are (2) not measurements of financial performance prepared in accordance with GAAP. See "Non-GAAP Financial

Measures" for more information and a reconciliation to the most directly comparable GAAP financial measure. Revenue - Overall. Revenue increased 20.2%, or \$489.1 million, to \$2,911.4 million during the three months ended March 31, 2015 from \$2,422.3 million during the three months ended March 31, 2014. Revenue growth during the first quarter of 2015 included approximately \$169.0 million from TriZetto, which we acquired in the fourth quarter of 2014, representing 34.6% of the period over period revenue growth. Revenues from new customers, including new TriZetto customers, contributed \$178.6 million, representing 36.5% of the period over period revenue growth. The increases in revenue from new and existing customers were primarily attributed to greater acceptance of our global delivery model among an increasing number of industries, continued interest in using our global delivery model as a means to reduce overall IT and operations costs, increased customer spending on discretionary projects, and continued penetration in all our geographic markets. The recent strength of the U.S. dollar negatively impacted our revenue by \$61.9 million in the first quarter 2015 as compared to the first quarter of 2014.

Our consulting and technology services revenues for the three months ended March 31, 2015 increased by approximately 32.0% compared to the three months ended March 31, 2014 and represented approximately 56.3% of total revenues for the three months ended March 31, 2015. Our outsourcing services revenue for the three months ended March 31, 2015 increased by approximately 7.8% and constituted approximately 43.7% of total revenues for the three months ended March 31, 2015.

Revenues from our top five customers as a percentage of total revenues were 11.2% and 13.1% for the quarters ended March 31, 2015 and 2014, respectively. Revenues from our top ten customers as a percentage of total revenues were 19.0% and 22.4% for the quarters ended March 31, 2015 and 2014, respectively. As we continue to add new customers and increase our penetration at existing customers, we expect the percentage of revenues from our top five and top ten customers to decline over time.

Table of Contents

Revenue - Reportable Segments. Revenues by reportable business segment were as follows for the three months ended March 31:

	2015	2014	Increase	
			\$	%
	(Dollars in millions)			
Financial Services	\$1,161.1	\$1,023.7	\$137.4	13.4
Healthcare	879.1	615.9	263.2	42.7
Manufacturing/Retail/Logistics	548.9	511.9	37.0	7.2
Other	322.3	270.8	51.5	19.0
Total revenue	\$2,911.4	\$2,422.3	\$489.1	20.2

Revenue from our Financial Services segment grew 13.4% or \$137.4 million for the three months ended March 31, 2015, as compared to the three months ended March 31, 2014. Our banking and insurance customers contributed approximately \$68.8 million and \$68.6 million, respectively, to the period over period revenue increase. In this segment, revenue from customers added since March 31, 2014 was approximately \$27.5 million and represented 20.0% of the period over period revenue increase in this segment. Key areas of focus for our Financial Services customers included cost optimization, regulatory and compliance driven initiatives, cyber security, risk management, and the adoption and integration of digital technologies to align with shifts in consumer preferences.

Revenue from our Healthcare segment grew 42.7% or \$263.2 million for the three months ended March 31, 2015, as compared to the three months ended March 31, 2014. Our healthcare customers contributed \$223.8 million to the period over period revenue growth, including approximately \$169.0 million of revenue from our fourth quarter 2014 acquisition of TriZetto. Revenue from our life sciences customers increased by \$39.4 million. Revenue from customers added since March 31, 2014, including new TriZetto customers, was approximately \$125.2 million and represented 47.6% of the period over period revenue increase in this segment. We have seen an improvement in demand among our healthcare payer customers, partially driven by cost optimization initiatives. Longer term, we believe that the healthcare industry continues to present a growth opportunity due to factors which are transforming the industry, including the changing regulatory environment, increasing focus on medical costs, and the consumerization of healthcare.

Revenue from our Manufacturing/Retail/Logistics segment grew 7.2% or \$37.0 million for the three months ended March 31, 2015, as compared to the three months ended March 31, 2014. Our retail and hospitality customers and manufacturing and logistics customers contributed approximately \$19.6 million and \$17.4 million, respectively, to the period over period revenue increase. Revenue from customers added since March 31, 2014 was approximately \$17.1 million and represented approximately 46.3% of the period over period revenue increase in this segment. Demand within this segment continues to be driven by multichannel commerce implementation and integration efforts, analytics, supply chain consulting and implementation initiatives, and increased adoption of digital technologies to align with shifts in consumer preferences. Discretionary spending by our retail customers has been and may continue to be affected by recent weakness in the retail sector.

Revenue from our Other segment grew 19.0% or \$51.5 million for the three months ended March 31, 2015, as compared to the three months ended March 31, 2014. In the first quarter of 2015, growth within Other was due to an increase in discretionary spending and was strong among our information, media and entertainment customers, where revenue increased by approximately \$26.8 million, and our telecommunication customers, where revenue increased by approximately \$17.5 million. Revenue from customers added since March 31, 2014 was approximately \$8.8 million and represented 17.0% of the period over period revenue increase in this segment.

Table of Contents

Revenue - Geographic Markets. Revenues by geographic market were as follows for the three months ended March 31:

	2015	2014	Increase (Decrease)	
			\$	%
	(Dollars in millions)			
North America	\$2,292.0	\$1,836.2	\$455.8	24.8
United Kingdom	285.1	277.5	7.6	2.7
Rest of Europe	190.8	192.6	(1.8)	(0.9)
Europe - Total	475.9	470.1	5.8	1.2
Rest of World	143.5	116.0	27.5	23.7
Total Revenue	\$2,911.4	\$2,422.3	\$489.1	20.2

North America continues to be our largest market, representing approximately 78.7% of total revenue for the first quarter of 2015, and accounting for \$455.8 million of the \$489.1 million total revenue increase from the first quarter of 2014. Revenue growth among our North America customers includes approximately \$169.0 million from our fourth quarter 2014 acquisition of TriZetto.

The revenue growth in Europe and Rest of World markets was driven by the increasing acceptance of our global delivery model, partially offset by the recent strength of the U.S. dollar against the British pound, the Euro and other currencies. For the remainder of 2015, we expect that the strength of the U.S. dollar may continue to negatively impact our revenue from countries outside the United States. In 2015, revenue from our customers in Europe grew 1.2%, including a 10.7% negative currency impact, compared to the same period in 2014. The revenue growth from our Rest of World customers in 2015 was primarily driven by the India, Japan, Australia, Hong Kong, and Singapore markets and includes a negative currency impact of 5.8%. We believe that Europe, the Middle East, the Asia Pacific and Latin America regions will continue to be areas of significant investment for us as we see these regions as long-term growth opportunities.

Cost of Revenues (Exclusive of Depreciation and Amortization Expense). Our cost of revenues consists primarily of salaries, incentive-based compensation, stock-based compensation expense, payroll taxes, employee benefits, immigration and project-related travel for technical personnel, subcontracting and sales commissions related to revenues. Our cost of revenues increased by 20.6% or \$294.8 million during the first quarter of 2015 as compared to the first quarter of 2014. The increase was due primarily to an increase in compensation and benefits costs (net of the impact of lower incentive-based compensation expense) and subcontractor expense, partially offset by lower realized losses on our cash flow hedges in 2015 compared to the 2014 period. For the three months ended March 31, 2015, compensation and benefit costs increased by approximately \$195.6 million, primarily as a result of the increase in the number of our service delivery personnel, including new TriZetto employees, partially offset by lower incentive based compensation costs in 2015 as compared to 2014.

Selling, General and Administrative Expenses. Selling, general and administrative expenses consist primarily of salaries, incentive-based compensation, stock-based compensation expense, payroll taxes, employee benefits, immigration, travel, marketing, communications, management, finance, administrative and occupancy costs. Selling, general and administrative expenses, including depreciation and amortization, increased by 29.1%, or \$154.0 million during the first quarter of 2015 as compared to the first quarter of 2014. Selling, general and administrative expenses, including depreciation and amortization, increased as a percentage of revenue to 23.5% in the first quarter of 2015 as compared to 21.9% in the first quarter of 2014. The increase as a percentage of revenue was due primarily to increases in compensation and benefit costs (net of the impact of lower incentive-based compensation expense), increases in depreciation and amortization due to recent acquisitions, and investments to grow our business, partially offset by lower realized losses on our cash flow hedges in 2015 compared to the 2014 period.

Income from Operations and Operating Margin - Overall. Income from operations increased 8.8% or approximately \$40.3 million in the first quarter of 2015 as compared to the first quarter of 2014. Our operating margin decreased to 17.2% during the first quarter of 2015 from 19.0% in the first quarter of 2014, due to increases in compensation and benefit costs (net of the impact of lower incentive-based compensation expense) as headcount growth outpaced

revenue growth, higher subcontractor expense, investments to grow our business and increases in depreciation and amortization due to recent acquisitions, partially offset by lower realized losses on our cash flow hedges in 2015 compared to the 2014 period. Excluding the impact of applicable designated cash flow hedges, the depreciation of the Indian rupee against the U.S. dollar positively impacted our operating margin by approximately 14 basis points or 0.14 percentage points in the three months ended March 31, 2015. Each additional 1.0% change in the exchange rate between the Indian rupee and the U.S. dollar will have the effect of moving our operating margin by approximately 19 basis points or 0.19 percentage points.

Table of Contents

We entered into foreign exchange forward contracts to hedge certain Indian rupee denominated payments in India. These hedges are intended to mitigate the volatility of the changes in the exchange rate between the U.S. dollar and the Indian rupee. During the three months ended March 31, 2015 and 2014, the settlement of certain cash flow hedges negatively impacted our operating margin by approximately 47 basis points or 0.47 percentage points and 167 basis points or 1.67 percentage points, respectively.

For the three months ended March 31, 2015 and 2014, our non-GAAP operating margins were 19.8%³, and 20.8%³, respectively. As set forth in the “Non-GAAP Financial Measures” section below, our non-GAAP operating margin excludes stock based compensation expense and acquisition-related charges.

Segment Operating Profit. Segment operating profits were as follows for the three months ended March 31:

	2015	2014	Increase (Decrease)	
			\$	%
	(Dollars in millions)			
Financial Services	\$347.4	\$347.9	\$(0.5)	(0.1)
Healthcare	245.1	214.3	30.8	14.4
Manufacturing/Retail/Logistics	181.3	181.7	(0.4)	(0.2)
Other	92.0	89.6	2.4	2.7
Total segment operating profit	865.8	833.5	32.3	3.9
Less: unallocated costs	365.5	373.5	(8.0)	(2.1)
Income from operations	\$500.3	\$460.0	\$40.3	8.8

Our segment profit across all segments decreased as a percentage of revenues due to headcount growth outpacing revenue growth and continued investments to grow our business. The decrease in unallocated costs is attributable to lower incentive-based compensation accrual rates in 2015 compared to the 2014 period, partially offset by investments to grow our business.

Other Income (Expense), Net. Total other income (expense), net consists primarily of foreign currency exchange gains and (losses), interest income and interest expense. The following table sets forth total other income (expense), net for the three months ended March 31:

	2015	2014	Increase/ Decrease
	(in millions)		
Foreign currency exchange (losses) gains	\$(0.4)	\$7.1	\$(7.5)
(Losses) on foreign exchange forward contracts not designated as hedging instruments	(1.8)	(8.3)	6.5
Net foreign currency exchange (losses)	(2.2)	(1.2)	(1.0)
Interest income	18.0	13.5	4.5
Interest expense	(5.0)	—	(5.0)
Other, net	(0.5)	0.9	(1.4)
Total other income, net	\$10.3	\$13.2	\$(2.9)

The foreign currency exchange losses of approximately \$0.4 million were primarily attributed to the remeasurement of the Indian rupee denominated net monetary assets on the books of our Indian subsidiaries to the U.S. dollar functional currency as well as the remeasurement of other net monetary assets denominated in currencies other than the functional currency of the subsidiary. The \$1.8 million of losses on our foreign exchange forward contracts not designated as hedging instruments relate to the realized and unrealized gains and losses on foreign exchange forward contracts entered into primarily to offset foreign currency exposure to the Indian rupee and other non-U.S. dollar denominated net monetary assets. As of March 31, 2015, the notional value of our undesignated hedges was \$188.3 million. The increase in interest income of \$4.5 million was primarily attributable to an increase in average balances of time deposits in India in the first quarter of 2015. The 2015 interest expense is primarily attributable to the interest on debt originated in the fourth quarter of 2014.

Non-GAAP operating margin is not a measurement of financial performance prepared in accordance with GAAP.
3 See “Non-GAAP Financial Measures” for more information and a reconciliation to the most directly comparable GAAP financial measure.

Table of Contents

Provision for Income Taxes. The provision for income taxes increased to approximately \$127.7 million during the three months ended March 31, 2015 from approximately \$124.3 million during the three months ended March 31, 2014. The effective income tax rate decreased to 25.0% for the three months ended March 31, 2015 from 26.3% for the three months ended March 31, 2014. The decrease in our effective income tax rate was primarily attributed to discrete tax benefits recorded in 2015.

Net Income. Net income increased to approximately \$382.9 million for the three months ended March 31, 2015 from approximately \$348.9 million for the three months ended March 31, 2014, representing 13.2% and 14.4% of revenues, respectively. The decrease in net income as a percentage of revenues is primarily attributed to the decrease in operating margin, partially offset by a lower effective income tax rate.

Non-GAAP Financial Measures

Portions of our disclosure, including the following table, include non-GAAP income from operations, non-GAAP operating margin, and non-GAAP diluted earnings per share. These non-GAAP financial measures are not based on any comprehensive set of accounting rules or principles and should not be considered a substitute for, or superior to, financial measures calculated in accordance with GAAP, and may be different from non-GAAP measures used by other companies. In addition, these non-GAAP measures should be read in conjunction with our financial statements prepared in accordance with GAAP. The reconciliations of Cognizant's non-GAAP financial measures to the corresponding GAAP measures should be carefully evaluated.

Our non-GAAP income from operations and non-GAAP operating margin exclude stock-based compensation expense and acquisition-related charges. Our definition of non-GAAP diluted earnings per share excludes net non-operating foreign currency exchange gains or losses, in addition to excluding stock-based compensation expense and acquisition-related charges.

We seek to manage the company to a targeted non-GAAP operating margin of 19% to 20% of revenues. We believe providing investors with an operating view consistent with how we manage the company provides enhanced transparency into the operating results of the company. For our internal management reporting and budgeting purposes, we use non-GAAP financial information that does not include stock-based compensation expense, acquisition-related charges and net non-operating foreign currency exchange gains or losses for financial and operational decision making, to evaluate period to period comparisons and for making comparisons of our operating results to those of our competitors. Therefore, it is our belief that the use of non-GAAP financial measures excluding these costs provides a meaningful measure for investors to evaluate our financial performance. Accordingly, we believe that the presentation of non-GAAP income from operations, non-GAAP operating margin and non-GAAP diluted earnings per share, when read in conjunction with our reported GAAP results, can provide useful supplemental information to our management and investors regarding financial and business trends relating to our financial condition and results of operations.

A limitation of using non-GAAP financial measures versus financial measures calculated in accordance with GAAP is that non-GAAP measures do not reflect all of the amounts associated with our operating results as determined in accordance with GAAP and exclude costs that are recurring, namely stock-based compensation expense, certain acquisition-related charges, and net non-operating foreign currency exchange gains or losses. In addition, other companies may calculate non-GAAP financial measures differently than us, thereby limiting the usefulness of these non-GAAP financial measures as a comparative tool. We compensate for these limitations by providing specific information regarding the GAAP amounts excluded from non-GAAP income from operations, non-GAAP operating margin and non-GAAP diluted earnings per share to allow investors to evaluate such non-GAAP financial measures.

Table of Contents

The following table presents a reconciliation of each non-GAAP financial measure to the most comparable GAAP measure for the three months ended March 31:

	2015	% of Revenues	2014	% of Revenues
	(Dollars in millions, except per share amounts)			
GAAP income from operations and operating margin	\$500.3	17.2	\$460.0	19.0
Add: Stock-based compensation expense	45.8	1.6	35.8	1.5
Add: Acquisition-related charges ⁽¹⁾	30.7	1.1	8.0	0.3
Non-GAAP income from operations and non-GAAP operating margin	\$576.8	19.8	\$503.8	20.8
GAAP diluted earnings per share	\$0.62		\$0.57	
Effect of above operating adjustments, net of tax	0.09		0.05	
Effect on non-operating foreign currency exchange gains and losses, net of tax ⁽²⁾	—		—	
Non-GAAP diluted earnings per share	\$0.71		\$0.62	

(1) Acquisition-related charges include, when applicable, amortization of purchased intangible assets included in the depreciation and amortization expense line on our condensed consolidated statements of operations, external deal costs, acquisition-related retention bonuses, integration costs, changes in the fair value of contingent consideration liabilities, charges for impairment of acquired intangible assets and other acquisition-related costs.

(2) Non-operating foreign currency exchange gains and losses are inclusive of gains and losses on related foreign exchange forward contracts not designated as hedging instruments for accounting purposes. Per share amounts for the periods presented round to zero.

Liquidity and Capital Resources

Our cash generated from operations has historically been our primary source of liquidity to fund operations and investments to grow our business. In addition, as of March 31, 2015, we had cash, cash equivalents and short-term investments of \$3,349.8 million and additional available capacity under our revolving credit facility of \$650.0 million. We have used and plan to continue to use a combination of our cash flow from operations, cash on hand and capacity available under our revolving credit facility for expansion of existing operations, including our offshore development and delivery centers, continued development of new service lines, acquisitions of related businesses, formation of joint ventures, stock repurchases and general corporate purposes, including funding working capital requirements. The following table provides a summary of the major cash flows and liquidity trends for the three months ended March 31:

	2015	2014	Increase / Decrease
	(in millions)		
Net cash from operating activities	\$189.3	\$157.3	\$32.0
Net cash (used in) investing activities	(364.0)	(433.7)	69.7
Net cash (used in) financing activities	(557.3)	(6.5)	(550.8)

Operating activities. The increase in cash generated from operating activities was primarily attributable to the increase in our net income during the 2015 period as compared to the 2014 period. Trade accounts receivable increased to approximately \$2,059.9 million at March 31, 2015 from approximately \$1,968.7 million at December 31, 2014. Unbilled accounts receivable increased to approximately \$388.2 million at March 31, 2015 from approximately \$324.6 million at December 31, 2014. The increase in trade accounts receivable and unbilled receivables as of March 31, 2015 as compared to December 31, 2014 was primarily due to increased revenues and a higher number of days sales outstanding. We monitor turnover, aging and the collection of accounts receivable through the use of management reports that are prepared on a customer basis and evaluated by our finance staff.

In the fourth quarter of 2014, we modified our days sales outstanding calculation to net the uncollected portion of deferred revenue from our total accounts receivable balance. Our reported days sales outstanding have historically included trade accounts receivable, net of allowance for doubtful accounts, and unbilled accounts receivable. Our new methodology reduces these balances by the uncollected portion of deferred revenue for the purpose of calculating our days sales outstanding.

27

Table of Contents

Under this modified method, our days sales outstanding as of March 31, 2015 was approximately 73 days as compared to 70 days as of December 31, 2014 and 70 days as of March 31, 2014. Under our historical method, our days sales outstanding as of March 31, 2015 was approximately 76 days as compared to 77 days as of December 31, 2014 and 73 days as of March 31, 2014.

Investing activities. The decrease in net cash used in investing activities is primarily related to lower net investment purchases of available-for-sale securities in the 2015 period.

Financing activities. The increase in cash used in financing activities in the 2015 period is primarily attributable to repayments of notes under our revolving credit facility in the first quarter of 2015.

On November 20, 2014, we entered into a credit agreement with a commercial bank syndicate providing for a \$1,000.0 million unsecured term loan and a \$750.0 million revolving credit facility. The term loan was used to pay a portion of the cash consideration in connection with our acquisition of TriZetto. The revolving credit facility is available for general corporate purposes. The term loan and the revolving credit facility both mature on November 20, 2019. As of March 31, 2015, we have \$975.0 million and \$100.0 million outstanding under the term loan and the revolving credit facility, respectively. During the first quarter of 2015, we repaid \$550.0 million of the \$650.0 million outstanding under the revolving credit facility at December 31, 2014.

The credit agreement contains certain negative covenants, including limitations on liens, mergers, consolidations and acquisitions, subsidiary indebtedness and affiliate transactions, as well as certain affirmative covenants. In addition, the credit agreement requires us to maintain a debt to total stockholders' equity ratio not in excess of 0.40:1.00. As of March 31, 2015, we are in compliance with our debt covenants and have provided a quarterly certification to our lenders to that effect. We believe that we currently meet all conditions set forth in the credit agreement to borrow thereunder, and we are not aware of any conditions that would prevent us from borrowing part or all of the remaining available capacity under the revolving credit facility as of March 31, 2015 and through the date of this filing.

We intend to continue to use a portion of our available capital resources for stock repurchases during 2015. The number of shares ultimately repurchased under our open-market share purchase program may vary depending on numerous factors, including, without limitation, our stock price and other market conditions, our ongoing capital allocation planning, the levels of cash and debt balances, other demands for cash, such as acquisition activity, general economic and/or business conditions, and board and management discretion. Additionally, as these factors may change over the course of the year, the amount of stock repurchase activity during any particular period cannot be predicted and may fluctuate from time to time. Stock repurchases may be made from time to time through open-market purchases and through the use of Rule 10b5-1 plans and/or by other means. The stock repurchase program may be accelerated, suspended, delayed or discontinued at any time, without notice.

We believe our U.S. cash flows continue to be sufficient to fund our current domestic operations and obligations, including debt service. The amount of funds held in U.S. tax jurisdictions can fluctuate due to the timing of receipts and payments in the ordinary course of business, including debt repayments, and due to other reasons, such as acquisition-related activities. The Company's U.S. operations historically have generated and are expected to continue to generate substantial cash flows. In circumstances where the Company has additional cash requirements in the United States, we have several additional liquidity options available to meet those requirements. These options may include borrowing additional funds, including borrowings under our committed revolving credit facility, temporarily utilizing inter-company loans with certain foreign subsidiaries on a limited basis, and, while we currently do not have plans to do so, repatriating certain of our foreign earnings. We also believe we have access to the credit and equity markets and could borrow additional funds under acceptable terms and conditions or raise additional capital through an equity transaction.

Many of our operations are conducted outside the United States and significant portions of our cash, cash equivalents and short-term investments are held internationally. As of March 31, 2015, \$2,986.7 million of our cash, cash equivalents and short-term investments was held outside the United States. As part of our ongoing liquidity assessments, we regularly monitor the mix of domestic and international cash flows and cash balances. We utilize certain strategies in an effort to ensure that our worldwide cash is available in the locations in which it is needed. Most of the amounts held outside of the United States could be repatriated to the United States but, under current law,

would be subject to income taxes in the United States, less applicable foreign tax credits. Other than amounts for which we have already accrued U.S. taxes, we intend to indefinitely reinvest these funds outside the United States and our current plans do not demonstrate a need to repatriate these amounts to fund our liquidity needs in the United States. If such earnings are repatriated in the future, or are no longer deemed to be indefinitely reinvested, we will accrue the applicable amount of taxes associated with such earnings at that time. Due to the various methods by which such earnings could be repatriated in the future, it is not currently practicable to determine the amount of applicable taxes that would result from such repatriation.

Table of Contents

We expect our operating cash flow, cash and investment balances, and available capacity under our revolving credit facility to be sufficient to meet our operating requirements for the next twelve months. Our ability to expand and grow our business in accordance with current plans, to make acquisitions and form joint ventures and to meet our long-term capital requirements beyond a twelve month period will depend on many factors, including the rate, if any, at which our cash flow increases, our ability and willingness to accomplish acquisitions and joint ventures with capital stock, our continued intent not to repatriate foreign earnings, and the availability of public and private debt and equity financing. We cannot be certain that additional financing, if required, will be available on terms and conditions acceptable to us, if at all.

Commitments and Contingencies

We are involved in various claims and legal actions arising in the ordinary course of business. We accrue a liability when a loss is considered probable and the amount can be reasonably estimated. In the opinion of management, the outcome of any existing claims and legal or regulatory proceedings, if decided adversely, is not expected to have a material adverse effect on our business, financial condition, results of operations and cash flows. Additionally, many of our engagements involve projects that are critical to the operations of our customers' business and provide benefits that are difficult to quantify. Any failure in a customer's systems or our failure to meet our contractual obligations to our clients, including any breach involving a customer's confidential information or sensitive data, or our obligations under applicable laws or regulations could result in a claim for substantial damages against us, regardless of our responsibility for such failure. Although we attempt to contractually limit our liability for damages arising from negligent acts, errors, mistakes, or omissions in rendering our services, there can be no assurance that the limitations of liability set forth in our contracts will be enforceable in all instances or will otherwise protect us from liability for damages. Although we have general liability insurance coverage, including coverage for errors or omissions, there can be no assurance that such coverage will cover all types of claims, continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. The successful assertion of one or more large claims against us that exceed or are not covered by our insurance coverage or changes in our insurance policies, including premium increases or the imposition of large deductible or co-insurance requirements, could have a material adverse effect on our business, results of operations, financial condition and cash flows.

Foreign Currency Risk

Overall, we believe that we have limited revenue risk resulting from movement in foreign currency exchange rates as approximately 78.7% of our revenues for the three months ended March 31, 2015 were generated from customers located in North America. Revenue from our customers in the United Kingdom, Europe and Rest of World represented 9.8%, 6.6% and 4.9%, respectively, of our 2015 revenues. Accordingly, our operating results outside the United States may be affected by fluctuations in the exchange rate of the British pound, Euro, and other currencies to the U.S. dollar.

A portion of our costs in India, representing approximately 22.8% of our global operating costs for the three months ended March 31, 2015, are denominated in the Indian rupee and are subject to foreign exchange rate fluctuations. These foreign currency exchange rate fluctuations have an impact on our results of operations. In addition, a portion of our balance sheet is exposed to foreign currency exchange rate fluctuations, which may result in non-operating foreign currency exchange gains or losses upon remeasurement. For the three months ended March 31, 2015, we reported foreign currency exchange losses, exclusive of hedging gains or losses, of approximately \$0.4 million, which were primarily attributed to the remeasurement of the Indian rupee denominated net monetary assets on the books of our Indian subsidiaries to the U.S. dollar functional currency as well as the remeasurement of other net monetary assets denominated in currencies other than the functional currency of the subsidiary. On an ongoing basis, we manage a portion of this risk by limiting our net monetary asset exposure to certain currencies, primarily the Indian rupee, in our foreign subsidiaries.

Table of Contents

We entered into a series of foreign exchange forward contracts that are designated as cash flow hedges of certain Indian rupee denominated payments in India. Our Indian subsidiaries, collectively referred to as Cognizant India, converts U.S. dollar receipts from intercompany billings to Indian rupees to fund local expenses. These hedges to buy Indian rupees and sell U.S. dollars are intended to partially offset the impact of movement of exchange rates on future operating costs. For the three months ended March 31, 2015, we reported losses of \$13.7 million on contracts that settled during this period. As of March 31, 2015, we have outstanding contracts with a notional value of \$2,910.0 million and weighted average forward rate of 66.7 rupees to the U.S. dollar. These contracts are scheduled to mature as follows:

	Notional Value (in millions)	Weighted Average Contract Rate (Indian rupee to U.S. dollar)
2015	\$990.0	61.2
2016	1,020.0	68.0
2017	750.0	71.1
2018	150.0	72.4
Total	\$2,910.0	66.7

Our foreign subsidiaries are exposed to foreign exchange rate risk for transactions denominated in currencies other than the functional currency of the respective subsidiary. We also use foreign exchange forward contracts to hedge balance sheet exposure to certain monetary assets and liabilities denominated in currencies other than the functional currency of the subsidiary. These contracts are not designated as hedges and are intended to offset the foreign currency exchange gains or losses upon remeasurement of these net monetary assets. We entered into a series of foreign exchange forward contracts scheduled to mature in 2015 which are used to hedge our foreign currency denominated net monetary assets. At March 31, 2015, the notional value of the outstanding contracts was \$188.3 million and the related fair value was a liability of \$3.3 million. During the three months ended March 31, 2015, inclusive of approximately \$1.8 million of losses on these undesignated balance sheet hedges, we reported net foreign currency exchange losses of approximately \$2.2 million.

Off-Balance Sheet Arrangements

Other than our foreign exchange forward contracts, there were no off-balance sheet transactions, arrangements or other relationships with unconsolidated entities or other persons in the 2015 and 2014 periods that have, or are reasonably likely to have, a current or future effect on the company's financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Critical Accounting Estimates

Management's discussion and analysis of our financial condition and results of operations is based on our unaudited condensed consolidated financial statements that have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and assumptions that affect the amounts reported for assets and liabilities, including the recoverability of tangible and intangible assets, disclosure of contingent assets and liabilities as of the date of the financial statements, and the reported amounts of revenues and expenses during the reported period. On an on-going basis, we evaluate our estimates. The most significant estimates relate to the recognition of revenue and profits based on the percentage of completion method of accounting for certain fixed-bid contracts, the allowance for doubtful accounts, income taxes, valuation of goodwill and other long-lived assets, valuation of investments and derivative financial instruments, assumptions used in valuing stock-based compensation arrangements, contingencies and litigation. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. The actual amounts may differ from the estimates used in the preparation of the accompanying condensed consolidated financial statements. For a discussion of our critical accounting estimates, see "Item 7. Management's Discussion and Analysis of Financial

Condition and Results of Operations” in our 2014 Annual Report on Form 10-K. Our significant accounting policies are described in Note 1 to the audited consolidated financial statements included in our 2014 Annual Report on Form 10-K. There have been no material changes to the aforementioned critical accounting estimates and policies during the quarter.

Recent Accounting Pronouncements

See Note 1 to our unaudited condensed consolidated financial statements for additional information.

Table of Contents

Effects of Inflation

Our most significant costs are the salaries and related benefits for our programming staff and other professionals. In certain regions, competition for professionals with advanced technical skills necessary to perform our services has caused wages to increase at a rate greater than the general rate of inflation. As with other service providers in our industry, we must adequately anticipate wage increases, particularly on our fixed-price contracts. Historically, we have experienced increases in compensation and benefit costs, including incentive-based compensation, in India; however, this has not had a material impact on our results of operations as we have been able to absorb such cost increases through price increases or cost management strategies such as managing discretionary costs, mix of professional staff and utilization levels and achieving other operating efficiencies. There can be no assurance that we will be able to offset such cost increases in the future.

Forward Looking Statements

The statements contained in this Quarterly Report on Form 10-Q that are not historical facts are forward-looking statements (within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended) that involve risks and uncertainties. Such forward-looking statements may be identified by, among other things, the use of forward-looking terminology such as “believes,” “expects,” “may,” “could,” “would,” “plan,” “intend,” “estimate,” “predict,” “continue,” “should” or “anticipates” or the negative thereof or other variations thereon or comparable terminology, or by discussions of strategy that involve risks and uncertainties. From time to time, we or our representatives have made or may make forward-looking statements, orally or in writing.

Such forward-looking statements may be included in various filings made by us with the Securities and Exchange Commission, or press releases or oral statements made by or with the approval of one of our authorized executive officers. These forward-looking statements, such as statements regarding anticipated future revenues or operating margins, anticipated growth opportunities, earnings, capital expenditures, liquidity, plans, objectives and other statements regarding matters that are not historical facts, are based on our current expectations, estimates and projections, management’s beliefs and certain assumptions made by management, many of which, by their nature, are inherently uncertain and beyond our control. Our actual results, performance or achievements could differ materially from the results expressed in, or implied by, these forward-looking statements. There are a number of important factors that could cause our results to differ materially from those indicated by such forward-looking statements, including, but not limited to:

- competition from other service providers;
- the risk that our operating margin may decline and we may not be able to sustain our current level of profitability;
- the risk of liability or damage to our reputation resulting from security breaches;
- any possible failure to comply with or adapt to changes in healthcare-related data protection and privacy laws;
- the loss of customers, especially as a few customers account for a large portion of our revenues;
- the risk that we may not be able to keep pace with the rapidly evolving technological environment;
- the rate of growth in the use of technology in business and the type and level of technology spending by our clients;
- mispricing of our services, especially as an increasing percentage of our revenues are derived from fixed-price contracts;
- the risk that we might not be able to maintain effective internal controls, including as we acquire and integrate other companies;
- our inability to successfully acquire or integrate target companies;
- system failure or disruptions in our communications or information technology;
- the risk that we may lose key executives and not be able to enforce non-competition agreements with them;
- competition for hiring highly-skilled technical personnel;
- possible failure to provide end-to-end business solutions and deliver complex and large projects for our clients;
- the risk of reputational harm to us;
- our revenues being highly dependent on clients concentrated in certain industries, including financial services and healthcare, and located primarily in the United States and Europe;
- risks relating to our global operations, including our operations in India;

- the effects of fluctuations in the Indian rupee and other currency exchange rates;
- the effect of our use of derivative instruments;
- the risk of war, terrorist activities, pandemics and natural disasters;

the possibility that we may be required, as a result of our indebtedness, or otherwise choose to repatriate foreign earnings or that our foreign earnings or profits may become subject to U.S. taxes;

the possibility that we may lose certain tax benefits provided to companies in our industry by the Indian government;

the risk that we may not be able to enforce or protect our intellectual property rights, or that we may infringe upon the intellectual property rights of others;

changes in domestic and international regulations and legislation relating to immigration and anti-outsourcing;

increased regulation of the financial services and healthcare industries, as well as other industries in which our clients operate; and

the factors set forth in Part I, in the section entitled “Item 1A. Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2014.

You are advised to consult any further disclosures we make on related subjects in the reports we file with the Securities and Exchange Commission, including this report in the section titled “Part I, Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations” and “Part I, Item 1. Business” in our Annual Report on Form 10-K for the year ended December 31, 2014. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable securities laws.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

We are exposed to foreign currency exchange rate risk in the ordinary course of doing business as we transact or hold a portion of our funds in foreign currencies, particularly the Indian rupee. Accordingly, we periodically evaluate the need for hedging strategies, including the use of derivative financial instruments, to mitigate the effect of foreign currency exchange rate fluctuations and expect to continue to use such instruments in the future to reduce foreign currency exposure to appreciation or depreciation in the value of certain foreign currencies. All hedging transactions are authorized and executed pursuant to regularly reviewed policies and procedures.

We have entered into a series of foreign exchange forward contracts that are designated as cash flow hedges of certain Indian rupee denominated payments in India. Cognizant India converts U.S. dollar receipts from intercompany billings to Indian rupees to fund local expenses. These U.S. dollar / Indian rupee hedges are intended to partially offset the impact of movement of exchange rates on future operating costs. As of March 31, 2015, the notional value and weighted average contract rates of these contracts were as follows:

	Notional Value (in millions)	Weighted Average Contract Rate (Indian rupee to U.S. dollar)
2015	\$990.0	61.2
2016	1,020.0	68.0
2017	750.0	71.1
2018	\$150.0	72.4
Total	\$2,910.0	66.7

As of March 31, 2015, the net unrealized loss on our outstanding foreign exchange forward contracts was \$54.2 million. Based upon a sensitivity analysis of our foreign exchange forward contracts at March 31, 2015, which estimates the fair value of the contracts based upon market exchange rate fluctuations, a 10.0% change in the foreign currency exchange rate against the U.S. dollar with all other variables held constant would have resulted in a change in the fair value of approximately \$265.4 million.

Our foreign subsidiaries are exposed to foreign currency exchange rate risk for transactions denominated in currencies other than the functional currency of the respective subsidiary. We also use foreign exchange forward contracts to hedge balance sheet exposure to certain monetary assets and liabilities denominated in currencies other than the functional currency of the subsidiary. These contracts are not designated as hedges and are intended to offset the foreign currency exchange gains or losses upon remeasurement of these net monetary assets. We entered into a series of foreign exchange forward contracts scheduled to mature in 2015 which are used to hedge our foreign currency denominated net monetary assets. At March 31, 2015, the notional value of the outstanding contracts was \$188.3

million and the related fair value was a liability of \$3.3 million. Based upon a sensitivity analysis of our foreign exchange forward contracts at March 31, 2015, which estimates the fair value of the contracts based upon market exchange rate fluctuations, a 10.0% change in the foreign currency exchange rate against the U.S. dollar with all other variables held constant would have resulted in a change in the fair value of approximately \$19.1 million.

Table of Contents

In the fourth quarter of 2014, we entered into the credit agreement providing for a \$1,000.0 million unsecured term loan and a \$750.0 million unsecured revolving credit facility. The term loan and the revolving credit facility both mature on November 20, 2019. As of March 31, 2015, we have \$975.0 million and \$100.0 million outstanding under the term loan and the revolving credit facility, respectively. The credit agreement requires interest to be paid at either the base rate or the Eurocurrency rate, plus a margin. The margin over the base rate is 0.00%, and the margin over the Eurocurrency rate ranges from 0.75% to 1.125%, depending on our debt ratings (or, if we have not received debt ratings, from 0.875% to 1.00%, depending on our debt to total stockholders' equity ratio). Thus, our debt exposes us to market risk from changes in interest rates. We performed a sensitivity analysis to determine the effect of interest rate fluctuations on our interest expense. A 10% change in interest rates, with all other variables held constant, would have resulted in a 1.5% change to our reported interest expense.

In addition, our cash, cash equivalents and short-term investments are subject to market risk from changes in interest rates. As of March 31, 2015, a 10% change in interest rates, with all other variables held constant, would result in a change in the fair market value of our available-for-sale investment securities of approximately \$1.6 million.

Information provided by the sensitivity analysis does not necessarily represent the actual changes that would occur under normal market conditions.

We typically invest in highly-rated securities and our policy generally limits the amount of credit exposure to any one issuer. Our investment policy requires investments to be investment grade with the objective of minimizing the potential risk of principal loss. We may sell our investments prior to their stated maturities for strategic purposes, in anticipation of credit deterioration, or for duration management. As of March 31, 2015, our short-term investments totaled \$2,078.4 million. Our investment portfolio is primarily comprised of time deposits, mutual funds invested in fixed income securities and U.S. dollar denominated corporate bonds, municipal bonds, certificates of deposit, commercial paper, debt issuances by the U.S. government, U.S. government agencies, foreign governments and supranational entities and asset-backed securities. The asset-backed securities include Government National Mortgage Association (GNMA) mortgage backed securities and securities backed by auto loans, credit card receivables, and other receivables.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Our management, under the supervision and with the participation of our chief executive officer and our chief financial officer, evaluated the design and operating effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, or the Exchange Act) as of March 31, 2015. Based on this evaluation, our chief executive officer and our chief financial officer concluded that, as of March 31, 2015, our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in our reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to our chief executive officer and our chief financial officer as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

No changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended March 31, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1A. Risk Factors

There have been no material changes in our risk factors from those disclosed in Part I, Item 1A, Risk Factors, in our Annual Report on Form 10-K for the fiscal year ended December 31, 2014 filed with the Securities and Exchange Commission on February 27, 2015.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

Our existing stock repurchase program, as amended and approved by our Board of Directors, allows for the repurchase of \$2.0 billion of our outstanding shares of Class A common stock, excluding fees and expenses, through December 31, 2015. Under the stock repurchase program, the company is authorized to repurchase its Class A common stock through open market purchases, including under a trading plan adopted pursuant to Rule 10b5-1 of the Securities Exchange Act of 1934, or in private transactions, in accordance with applicable federal securities laws. The timing of repurchases and the exact number of shares to be purchased are determined by the company's management, in its discretion, or pursuant to a Rule 10b5-1 trading plan, and will depend upon market conditions and other factors. During the three months ended March 31, 2015, we repurchased \$25.0 million of our Class A common stock under our stock repurchase program. These stock repurchases were funded from working capital. As of March 31, 2015, the remaining available balance under the Board authorization was \$788.9 million.

Month	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased under the Plans or Programs (in millions)
January 1, 2015 - January 31, 2015	—	\$—	—	\$813.9
February 1, 2015 - February 28, 2015	300,000	62.50	300,000	795.2
March 1, 2015 - March 31, 2015	100,000	62.10	100,000	788.9
Total	400,000	\$62.40	400,000	

In addition, during the three months ended March 31, 2015, we purchased additional shares in connection with our stock-based compensation plans, whereby shares of our common stock were tendered by employees for payment of applicable statutory tax withholdings. For the three months ended March 31, 2015, we purchased 217,014 shares at an aggregate cost of \$13.4 million in connection with employee tax withholding obligations.
