Gildan Activewear Announces Higher Than Expected First Quarter Sales and Earnings

Unit Sales up 21.9% Against Background of Strong Industry Demand

Montreal, Tuesday, February 3, 2004 — Gildan Activewear Inc. (NYSE: GIL; TSX: GIL.A) today announced its results for its first fiscal quarter ended January 4, 2004, and also commented on the factors impacting its outlook for the balance of the year. With effect from the beginning of the 2004 fiscal year, the Company has adopted the U.S. dollar as its functional and financial reporting currency, and accordingly the first quarter financial statements are presented in U.S. dollars.

First quarter sales and earnings

The Company reported net earnings of U.S. \$2.9 million, or U.S. \$0.10 per diluted share, down respectively 21.6% and 23.1% compared with U.S. \$3.7 million or U.S. \$0.13 per diluted share in the first quarter of fiscal 2003. Consensus analyst expectations for the quarter were in the range of U.S. \$0.08-\$0.09 per diluted share. The Company's results for the quarter reflect increases in cost of sales and depreciation expense as a result of the upward revaluation of opening inventories and fixed assets required in order to give effect to the change to U.S. functional currency. Net earnings for the first quarter of fiscal 2004 were U.S. \$5.5 million or U.S. \$0.18 per diluted share before reflecting the accounting treatment of these adjustments resulting from the change to U.S. functional currency, up respectively 48.6% and 38.5% from the first quarter of last year.

Compared to last year, the higher first quarter results reflected further manufacturing efficiencies and increased unit sales, including the timing impact of distributors building inventory in anticipation of a January price increase, as well as more favourable product-mix. These factors were partially offset by lower selling prices, combined with higher cotton costs, increased selling, general and administration expenses and higher depreciation as a result of the Company's recent major capital investment projects.

Sales in the quarter were U.S. \$78.0 million, up 20.0% from U.S. \$65.0 million in the first quarter of fiscal 2003. The higher sales were due to a 21.9% increase in unit shipments and a higher valued product-mix, partially offset by lower selling prices. The higher unit sales reflected 12.3% growth in overall industry shipments of T-shirts in the U.S. wholesale distributor market, the impact of increased shipments into the channel in anticipation of the price increase, and continuing market share penetration in sport shirts and fleece achieved by Gildan compared with the first quarter of last year.

Gildan maintained its market leadership position in the overall T-shirt category, with a share of 30.5% in the first quarter of fiscal 2004, compared with 31.4% in the corresponding quarter of last year. During the first quarter, the Company focused on higher-valued product-lines within the T-shirt category, and decided not to fully participate in highly discounted white T-shirt promotions.

Although overall industry shipments in the sport shirt segment through the U.S. distributor channel declined by 7.6%, Gildan continued to achieve significant penetration in this segment where its unit shipments grew by 27.5% compared with the first quarter of last year and its market share increased to 20.4%, versus 14.7% a year ago. Gildan's share in the fleece category also increased in the first quarter to 13.9%, compared with 10.3% a year ago, as the Company expanded its offering of fleece products. Industry demand in this segment increased by 1.9% versus the first quarter of last year.

All U.S. market and market share data is based on the S.T.A.R.S. Report produced by ACNielsen Market Decisions.

Gross margins were 27.1% in the first quarter, compared with 29.4% in the first quarter of fiscal 2003. Before the impact of the adjustments resulting from the change to U.S. functional currency, gross margins in the first quarter of fiscal 2004 were 29.8%. Gross margins were positively impacted by the Company's recent capital investments, in particular the significantly higher proportion of overall production from the new low-cost integrated textile manufacturing facility at Rio Nance, Honduras. The resulting reductions in manufacturing costs, together with the impact of more favourable product-mix, were offset by lower selling prices, as well as higher cotton costs and the impact of the stronger Canadian dollar.

Earnings Outlook

The Company is continuing to project a diluted EPS range of U.S. \$2.25 - \$2.30 for fiscal 2004, up 25.7% - 28.5% from fiscal 2003, before taking account of the estimated U.S. \$0.16 per diluted share impact as a result of revaluing opening inventories and fixed assets. After reflecting the adjustments resulting from the transition to U.S. functional currency, the Company's EPS forecast for fiscal 2004 is U.S. \$2.10 - \$2.15, up 17.3% - 20.1% from fiscal 2003.

These full year projections assume a 15% increase in unit sales volumes combined with a slight increase in selling prices in fiscal 2004 over fiscal 2003, to reflect partial pass-through of significantly higher cotton costs. Although there is currently some promotional activity in February following the implementation of the January 2004 selling price increase, the Company expects that upward pressure on selling prices will continue as manufacturers consume inventories which include higher-cost cotton.

Cash Flow

In the first quarter, the Company used \$35.8 million of cash, defined as cash flows from operating activities less cash used in investing activities, due to a U.S. \$35.7 million use of cash for the planned seasonal build-up of inventories. The Company used U.S. \$16.1 million in the quarter for capital expenditures, primarily to implement its continuing offshore capacity expansion plans and its investment in a 50%/50% joint venture to acquire a yarn spinning facility. The Company ended the quarter with surplus cash reserves of U.S. \$37.5 million.

The Company expects to invest approximately U.S. \$60 million in capital expenditures for the full fiscal year, and to generate approximately U.S. \$5 - \$10 million of free cash flow, defined as cash flow from operating activities less cash flow from investing activities. The Company intends to use U.S. \$17.5 million of its surplus cash to meet the first scheduled installment of its U.S. senior note repayment on June 10, 2004. As of January 31, 2004, there were 23,453,443 Class A subordinate shares and 6,094,000 Class B multiple voting shares issued and outstanding along with 811,985 options outstanding.

Profile

Gildan Activewear is a public, vertically-integrated manufacturer and marketer of premium quality branded basic activewear for sale principally in the wholesale imprinted activewear segment of the Canadian, U.S., European and other international markets. The company manufactures and sells premium quality 100% cotton and 50% cotton/50% polyester T-shirts, placket collar sport shirts and sweatshirts in a variety of weights, sizes, colours and styles. The company sells its products as blanks, which are ultimately decorated with designs and logos for sale to consumers. Gildan employs more than 9,000 full-time employees.

For complete notes to the interim consolidated financial statements please refer to filings with the various securities regulatory authorities.

1)

Change in Functional Currency:

As a result of a significant portion of its revenues, expenses, assets and liabilities being denominated in U.S. dollars and the increasing international expansion of its sales and manufacturing operations, the Company adopted the U.S dollar as its functional and reporting currency effective October 6, 2003, the beginning of its 2004 fiscal year. All opening assets and liabilities were translated into U.S. dollars using the exchange rate in effect on October 6, 2003. For comparative purposes, historical financial statements and notes thereto up to and including October 5, 2003 have been restated into U.S dollars in accordance with generally accepted accounting principles. The change in the functional currency resulted in a positive currency translation adjustment of \$26.2 million as at October 5, 2003, which is reflected as a separate component of shareholders' equity.

2) Investment in Joint Venture:

During the first quarter of fiscal 2004, the Company invested in a 50%/50% owned joint venture with Frontier Spinning Mills, Inc. The new joint venture company acquired the equipment and real estate of an existing yarn-spinning facility in Cedartown, Georgia. The total cost of the acquisition, including Frontier's 50% share in the investment, amounted to \$12.5 million. The joint venture is accounted for using the proportionate consolidated method whereby the Company's proportionate share of revenues, expenses, assets and liabilities is included in these financial statements.
