TEXAS CAPITAL BANCSHARES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—UNAUDITED

(1) OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization and Nature of Business

Texas Capital Bancshares, Inc. (the “Company”), a Delaware corporation, was incorporated in November 1996 and commenced banking operations in December 1998. The consolidated financial statements of the Company include the accounts of Texas Capital Bancshares, Inc. and its wholly owned subsidiary, Texas Capital Bank, National Association (the “Bank”). We serve the needs of commercial businesses and successful professionals and entrepreneurs located in Texas as well as operate several lines of business serving a regional and national clientèle of commercial borrowers. We are primarily a secured lender with a majority of our loans being made to businesses headquartered or with operations in Texas. At the same time, our national lines of business continue to provide specialized lending products to businesses throughout the United States.

Basis of Presentation

Our accounting and reporting policies conform to accounting principles generally accepted in the United States (“GAAP”) and to generally accepted practices within the banking industry. Certain prior period balances have been reclassified to conform to the current period presentation.

The consolidated interim financial statements are unaudited and certain information and footnote disclosures presented in accordance with GAAP have been condensed or omitted. In the opinion of management, the interim financial statements include all normal and recurring adjustments and the disclosures made are adequate to make the interim financial information not misleading. The consolidated financial statements have been prepared in accordance with GAAP for interim financial information and the instructions to Form 10-Q adopted by the Securities and Exchange Commission (“SEC”). Accordingly, the financial statements do not include all of the information and footnotes required by GAAP for complete financial statements and should be read in conjunction with our consolidated financial statements, and notes thereto, for the year ended December 31, 2017, included in our Annual Report on Form 10-K filed with the SEC on February 14, 2018 (the “2017 Form 10-K”). Operating results for the interim periods disclosed herein are not necessarily indicative of the results that may be expected for a full year or any future period.

Accounting Changes

ASU 2018-02 "Income Statement - Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income" ("ASU 2018-02") allows a reclassification from accumulated other comprehensive income (loss) ("AOCI") to retained earnings for the stranded tax effects caused by the revaluation of deferred taxes resulting from the newly enacted corporate tax rate in the Tax Cuts and Jobs Act. The ASU is effective in years beginning after December 15, 2018, but permits early adoption in a period for which financial statements have not yet been issued. We have elected to early adopt the ASU as of January 1, 2018. The adoption of the guidance resulted in an insignificant cumulative-effect adjustment that decreased retained earnings and increased AOCI in the first quarter of 2018.

ASU 2016-15 "Statement of Cash Flows (Topic 230)" ("ASU 2016-15") is intended to reduce the diversity in practice around how certain transactions are classified within the statement of cash flows. ASU 2016-15 became effective for us on January 1, 2018 and did not have a significant impact on our financial statements.

ASU 2016-01 "Financial Instruments - Overall (Subtopic 825-10): Recognition of Financial Assets and Financial Liabilities, ("ASU 2016-01") makes targeted amendments to the guidance for recognition, measurement, presentation and disclosure of financial instruments. ASU 2016-01 requires equity investments, other than equity method investments, to be measured at fair value with changes in fair value recognized in net income. The ASU requires a cumulative-effect adjustment to retained earnings as of the beginning of the reporting period of adoption to reclassify the cumulative change in fair value of equity securities previously recognized in AOCI. ASU 2016-01 became effective for us on January 1, 2018. The adoption of the guidance resulted in an insignificant cumulative-effect adjustment that increased retained earnings, with offsetting related adjustments to deferred taxes and AOCI. ASU 2016-01 also emphasizes the existing requirement to use exit prices to measure fair value for disclosure purposes and clarifies that entities should not make use of a practicability exception in determining the fair value of loans.

Accordingly, we refined the calculation used to determine the disclosed fair value of our loans held for investment portfolio as part of adopting this standard. The refined calculation did not have a significant impact on our fair value disclosures. See Note 11 - Fair Value Disclosures.

7

Table of Contents

ASU 2014-09 "Revenue from Contracts with Customers (Topic 606)" ("ASU 2014-09") implements a common revenue standard that clarifies the principles for recognizing revenue. The core principle of ASU 2014-09 is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2014-09 establishes a five-step model which entities must follow to recognize revenue and removes inconsistencies and weaknesses in existing guidance. The guidance does not apply to revenue associated with financial instruments, including loans and investment securities that are accounted for under other GAAP, which comprises a significant portion of our revenue stream. ASU 2014-09 became effective for us on January 1, 2018 and had no material effect on how we recognize revenue or to our consolidated financial statements and disclosures. See below for additional information related to revenue generated from contracts with customers.

Revenue Recognition

Accounting Standards Codification ("ASC") 606, Revenue from Contracts with Customers ("ASC 606"), establishes principles for reporting information about the nature, amount, timing and uncertainty of revenue and cash flows arising from the entity's contracts to provide goods or services to customers. The core principle requires an entity to recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration that it expects to be entitled to receive in exchange for those goods or services recognized as performance obligations are satisfied.

The majority of our revenue-generating transactions are not subject to ASC 606, including revenue generated from financial instruments, such as our loans, letters of credit, derivatives and investment securities, as well as revenue related to our mortgage servicing activities, as these activities are subject to other GAAP discussed elsewhere within our disclosures. Descriptions of our revenue-generating activities that are within the scope of ASC 606, which are presented in our income statements as components of non-interest income are as follows:

Service charges on deposit accounts - these represent general service fees for monthly account maintenance and activity- or transaction-based fees and consist of transaction-based revenue, time-based revenue (service period), item-based revenue or some other individual attribute-based revenue. Revenue is recognized when our performance obligation is completed which is generally monthly for account maintenance services or when a transaction has been completed (such as a wire transfer). Payment for such performance obligations are generally received at the time the performance obligations are satisfied.

Wealth management and trust fee income - this represents monthly fees due from wealth management customers as consideration for managing the customers' assets. Wealth management and trust services include custody of assets, investment management, escrow services, fees for trust services and similar fiduciary activities. Revenue is recognized when our performance obligation is completed each month, which is generally the time that payment is received. Also included are fees received from a third party broker-dealer as part of a revenue-sharing agreement for fees earned from customers that we refer to the third party. These fees are paid to us by the third party on a quarterly basis and recognized ratably throughout the quarter as our performance obligation is satisfied.

Brokered loan fees - these represent fees for the administration and funding of purchased mortgage loan interests as well as facility renewal and application fees received from mortgage originator customers in our warehouse lending business. Also included are fees received from independent correspondent mortgage lenders as consideration for our purchase of individual residential mortgage loans through our Mortgage Correspondent Aggregation ("MCA") business. Revenue related to the warehouse lending business is recognized when the related loan interest is disposed (i.e., through sale or payoff) or upon receipt of the facility renewal or application. Revenue related to our MCA business is recognized at the time a loan is purchased.

Other non-interest income primarily includes items such as letter of credit fees, gains on sale of loans held for sale and servicing fees related to the MCA program, none of which are subject to the requirements of ASC 606.

Investment Securities

Investment securities includes available-for-sale debt securities and equity securities at fair value.

Debt Securities

Debt securities are classified as trading, available-for-sale or held-to-maturity. Management classifies debt securities at the time of purchase and re-assesses such designation at each balance sheet date; however, transfers between

categories from this re-assessment are rare.

8

Table of Contents

Trading Account

Debt securities acquired for resale in anticipation of short-term market movements are classified as trading, with realized and unrealized gains and losses recognized in income. To date, we have not had any activity in our trading account.

Held-to-Maturity

Debt securities are classified as held to maturity when we have the positive intent and ability to hold the securities to maturity. Held-to-maturity securities are stated at amortized cost. Debt securities not classified as held-to-maturity or trading are classified as available-for-sale.

Available-for-Sale

Available-for-sale debt securities are stated at fair value, with the unrealized gains and losses reported as a separate component of AOCI, net of tax. The amortized cost of debt securities is adjusted for amortization of premiums and accretion of discounts to maturity, or in the case of mortgage-backed securities, over the estimated life of the security. Such amortization and accretion is included in interest income from securities. Realized gains and losses and declines in value judged to be other-than-temporary are included in gain (loss) on sale of securities. The cost of securities sold is based on the specific identification method.

All debt securities are available-for-sale as of March 31, 2018 and December 31, 2017.

Equity Securities

Beginning January 1, 2018, upon adoption of ASU 2016-01, equity securities with readily determinable fair values are stated at fair value with realized and unrealized gains and losses reported in income. For periods prior to January 1, 2018, equity securities were classified as available-for-sale and stated at fair value with unrealized gains and losses reported as a separate component of AOCI, net of tax. Equity securities without readily determinable fair values are recorded at cost less any impairment, if any.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates. The allowance for loan losses, the fair value of stock-based compensation awards, the fair value of mortgage servicing rights ("MSRs") and the status of contingencies are particularly susceptible to significant change.

Table of Contents

(2) EARNINGS PER COMMON SHARE

The following table presents the computation of basic and diluted earnings per share (in thousands except per share data):

	Three months ended March 31,	
	2018	2017
Numerator:

Effect of employee stock-based awards(1)	255,794	260,947
Effect of warrants to purchase common stock	446,819	437,324
Denominator for dilutive earnings per share—adjusted weighted average shares and assumed conversions	50,353,497	50,234,230
Basic earnings per common share	\$1.40	\$ 0.81
Diluted earnings per common share	\$1.38	\$ 0.80

(1) SARs and RSUs outstanding of 5,139 at March 31, 2018 and 3,000 at March 31, 2017 have not been included in diluted earnings per share because to do so would have been anti-dilutive for the periods presented.

(3) INVESTMENT SECURITIES

Available-for-Sale Debt Securities

The following is a summary of available-for-sale debt securities (in thousands):

	March 31, 2018			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Residential mortgage-backed securities	\$9,534	\$ 585	\$	—\$ 10,119

	December 31, 2017			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Residential mortgage-backed securities	\$10,297	\$ 648	\$	—\$ 10,945

The amortized cost and estimated fair value of available-for-sale debt securities are presented below by contractual maturity (in thousands, except percentage data):

	March 31, 2018				
	Less Than One Year	After One Through Five Years	After Five Through Ten Years	After Ten Years	Total
Residential mortgage-backed securities:(1)					
Amortized cost	169	1,651	456	7,258	9,534
Estimated fair value	173	1,804	495	7,647	10,119
Weighted average yield(2)	4.67%	5.58%	5.48%	3.48%	3.96%

Table of Contents

	December 31, 2017				
	Less Than One Year	After One Through Five Years	After Five Through Ten Years	After Ten Years	Total
Residential mortgage-backed securities:(1)					
Amortized cost	\$409	\$ 819	\$ 1,502	\$ 7,567	\$ 10,297
Estimated fair value	418	916	1,636	7,975	10,945
Weighted average yield(2)	4.59 %	6.02 %	5.32 %	3.45 %	3.97 %

(1) Actual maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without prepayment penalties.

(2) Yields are calculated based on amortized cost.

As of March 31, 2018 and December 31, 2017, we did not have any available-for-sale debt securities in an unrealized loss position.

At March 31, 2018, available-for-sale debt securities with carrying values of \$1.5 million and \$6.8 million were pledged to secure certain deposits and repurchase agreements, respectively.

Equity Securities

Equity securities consist of Community Reinvestment Act funds and investments related to our non-qualified deferred compensation plan. At March 31, 2018 and December 31, 2017, we had \$14.8 million and \$12.6 million, respectively, in equity securities recorded at fair value. Prior to January 1, 2018, equity securities were stated at fair value with unrealized gains and losses reported as a separate component of AOCI, net of tax. At December 31, 2017, net unrealized gains of \$10,000 had been recognized in AOCI. On January 1, 2018, these unrealized gains and losses were reclassified out of AOCI and into retained earnings with subsequent changes in fair value being recognized in net income. The following is a summary of unrealized and realized gains and losses recognized in net income on equity securities during the three months ended March 31, 2018 (in thousands):

	Three months ended March 31, 2018
Net gains and (losses) recognized during the period on equity securities	\$(212)
Less: Net gains and (losses) recognized during the period on equity securities sold during the period	—
Unrealized gains and (losses) recognized during the reporting period on equity securities still held at the reporting date	\$(212)

Table of Contents

(4) LOANS HELD FOR INVESTMENT AND ALLOWANCE FOR LOAN LOSSES

At March 31, 2018 and December 31, 2017, loans held for investment were as follows (in thousands):

	March 31, 2018	December 31, 2017
Commercial	\$9,461,024	\$9,189,811
Mortgage finance	4,689,938	5,308,160
Construction	2,224,403	2,166,208
Real estate	3,834,758	3,794,577
Consumer	47,311	48,684
Leases	276,303	264,903
Gross loans held for investment	20,533,737	20,772,343
Deferred income (net of direct origination costs)	(102,027)	(97,931)
Allowance for loan losses	(190,898)	(184,655)
Total loans held for investment	\$20,240,812	\$20,489,757

Commercial Loans and Leases. Our commercial loan portfolio is comprised of lines of credit for working capital and term loans and leases to finance equipment and other business assets. Our energy production loans are generally collateralized with proven reserves based on appropriate valuation standards and take into account the risk of oil and gas price volatility. Our commercial loans and leases are underwritten after carefully evaluating and understanding the borrower's ability to operate profitably. Our underwriting standards are designed to promote relationship banking rather than to make loans on a transaction basis. Our lines of credit typically are limited to a percentage of the value of the assets securing the line. Lines of credit and term loans typically are reviewed annually, or more frequently, as needed, and are supported by accounts receivable, inventory, equipment and other assets of our clients' businesses.

Mortgage Finance Loans. Our mortgage finance loans consist of ownership interests purchased in single-family residential mortgages funded through our mortgage finance group. We have agreements with mortgage lenders and purchase interests in individual loans they originate. The ownership interests collateralizing our mortgage finance loans are typically held on our balance sheet for 10 to 20 days, and substantially all loans are conforming loans. Substantially all mortgage loans are underwritten consistently with established programs for permanent financing with financially sound investors. Balances as of March 31, 2018 and December 31, 2017 are stated net of \$246.5 million and \$171.2 million of participations sold, respectively.

Construction Loans. Our construction loan portfolio consists primarily of single- and multi-family residential properties and commercial projects used in manufacturing, warehousing, service or retail businesses. Our construction loans generally have terms of one to three years. We typically make construction loans to developers, builders and contractors that have an established record of successful project completion and loan repayment and have a substantial equity investment in the borrowers. Loan amounts are derived primarily from the Bank's evaluation of expected cash flows available to service debt from stabilized projects under hypothetically stressed conditions. Construction loans are also based in part upon estimates of costs and value associated with the completed project. Sources of repayment for these types of loans may be permanent loans from other lenders, sales of developed property, or an interim loan commitment from us until permanent financing is obtained. The nature of these loans makes ultimate repayment sensitive to overall economic conditions. Borrowers may not be able to correct conditions of loan defaults, increasing risk of exposure to classification, non-performing status, reserve allocation and actual credit loss and foreclosure. These loans typically have floating rates and require commitment fees.

Real Estate Loans. A portion of our real estate loan portfolio is comprised of loans secured by properties other than market risk or investment-type real estate. Market risk loans are real estate loans where the primary source of repayment is expected to come from the sale, permanent financing or lease of the real property collateral. We generally provide temporary financing for commercial and residential property. These loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Our real estate loans generally have maximum terms of five to seven years, and we provide loans with both floating and fixed rates. Real estate loans may be more adversely affected by conditions in the real estate markets or in the general economy. Appraised values may be highly

variable due to market conditions and the impact of the inability of potential purchasers and lessees to obtain financing and a lack of transactions at comparable values.

Table of Contents

At March 31, 2018 and December 31, 2017, we had a blanket floating lien on certain real estate-secured loans, mortgage finance loans and certain investment securities used as collateral for Federal Home Loan Bank (“FHLB”) borrowings.

Summary of Loan Loss Experience

The allowance for loan losses is comprised of general reserves, specific reserves for impaired loans and an additional qualitative reserve based on our estimate of losses inherent in the portfolio at the balance sheet date, but not yet identified with specified loans. We consider the allowance at March 31, 2018 to be appropriate, given management's assessment of losses inherent in the portfolio as of the evaluation date, the significant growth in the loan and lease portfolio, current economic conditions in our market areas and other factors.

The following tables summarize the credit risk profile of our loan portfolio by internally assigned grades and non-accrual status as of March 31, 2018 and December 31, 2017 (in thousands):

March 31, 2018

	Commercial	Mortgage Finance	Construction	Real Estate	Consumer	Leases	Total

The table below presents the activity in the allowance for off-balance sheet credit losses related to unfunded commitments for the three months ended March 31, 2018 and 2017 (in thousands). This allowance is recorded in other liabilities in the consolidated balance sheet.

	Three months ended March 31,	
	2018	2017
Beginning balance	\$9,071	\$11,422
Provision for off-balance sheet credit losses	552	(575)
Ending balance	\$9,623	\$10,847

Table of Contents

We have traditionally maintained an additional qualitative reserve component to compensate for the uncertainty and complexity in estimating loan and lease losses including factors and conditions that may not be fully reflected in the determination and application of the allowance allocation percentages. The decrease in the additional qualitative reserve at March 31, 2018 was primarily related to an identified loss on a commercial loan and resolution of remaining uncertainty regarding the impact to our loan portfolio from Hurricanes Harvey and Irma. We believe the level of additional qualitative reserves at March 31, 2018 is warranted due to economic uncertainties and unpredictable factors that have produced losses, including those resulting from borrowers' misstatement of financial information or inaccurate certification of collateral values. Such losses are not necessarily correlated with historical loss trends or general economic conditions. Our methodology used to calculate the allowance considers historical losses; however, the historical loss rates for specific product types or credit risk grades may not fully incorporate the effects of uncertainty regarding the economy or unpredictable events.

Our recorded investment in loans as of March 31, 2018, December 31, 2017 and March 31, 2017 related to each balance in the allowance for loan losses by portfolio segment and disaggregated on the basis of our impairment methodology was as follows (in thousands):

March 31, 2018

	Commercial	Mortgage Finance	Construction	Real Estate	Consumer	Leases	Total

We place loans on non-accrual when there is a clear indication that the borrower's cash flow may not be sufficient to meet payments as they become due, generally when a loan is 90 days past due. When a loan is placed on non-accrual status, all previously accrued and unpaid interest is reversed. Interest income is subsequently recognized on a cash basis as long as the remaining unpaid principal amount of the loan is deemed to be fully collectible. If collectability is questionable, then cash payments are applied to principal. As of March 31, 2018, \$21.8 million of our non-accrual loans were earning on a cash basis compared to none at December 31, 2017. A loan is placed back on accrual status when both principal and interest are current and it is probable that we will be able to collect all amounts due (both principal and interest) according to the terms of the loan agreement.

Table of Contents

A loan held for investment is considered impaired when, based on current information and events, it is probable that we will be unable to collect all amounts due (both principal and interest) according to the terms of the original loan agreement. In accordance with ASC 310, Receivables, we have also included all restructured and formerly restructured loans in our impaired loan totals. The following tables detail our impaired loans, by portfolio class, as of March 31, 2018 and December 31, 2017 (in thousands):

Total loans held for investment	\$ 63,142	\$ 8,954	\$ 13,563	\$ 85,659	\$ 123,542	\$ 20,324,536	\$ 20,533,737

Loans past due 90 days and still accruing includes premium finance loans of \$4.1 million. These loans are (1) generally secured by obligations of insurance carriers to refund premiums on canceled insurance policies. The refund of premiums from the insurance carriers can take 180 days or longer from the cancellation date. Restructured loans are loans on which, due to the borrower's financial difficulties, we have granted a concession that we would not otherwise consider for borrowers of similar credit quality. This may include a transfer of real estate or other assets from the borrower, a modification of loan terms, or a combination of the two. Modifications of terms that could potentially qualify as a restructuring include reduction of the contractual interest rate, extension of the maturity date at a contractual interest rate lower than the current rate for new debt with similar risk, a reduction of the face amount of debt or forgiveness of either principal or accrued interest. At March 31, 2018 and December 31, 2017, we did not have any loans considered restructured that were not on non-accrual. Of the non-accrual loans at March 31, 2018 and December 31, 2017, \$7.6 million and \$18.8 million, respectively, met the criteria for restructured. These loans had no unfunded commitments at their respective balance sheet dates. A loan continues to qualify as restructured until a consistent payment history or change in borrower's financial condition has been evidenced, generally over no less than twelve months. Assuming that the restructuring agreement specifies an interest rate at the time of the restructuring that is greater than or equal to the rate that we are willing to accept for a new extension of credit with comparable risk, then the loan no longer has to be considered a restructuring if it is in compliance with the modified terms in calendar years after the year of the restructure.

Table of Contents

We did not have any loans that were restructured during the three months ended March 31, 2018. The following table summarizes the loans that were restructured during the three months ended March 31, 2017 (in thousands):

As of and for the three months ended March 31, 2017

	Number of Restructured Loans	Balance at Restructure	Balance at Period-End
Energy loans	1	\$ 1,070	\$ 1,070
Commercial business loans	1	599	599
Total new restructured loans	2	\$ 1,669	\$ 1,669

The restructured loans generally include terms to temporarily place loans on interest only, extend the payment terms or reduce the interest rate. We did not forgive any principal on the above loans. The restructuring of the loans did not have a significant impact on our allowance for loan losses at March 31, 2017.

The following table provides information on how loans were modified as restructured during the three months ended March 31, 2018 and 2017 (in thousands):

Three
months
ended
March
31,
2018

Extended maturity \$—\$1,669

As of March 31, 2018 and 2017, we did not have any loans that were restructured within the last 12 months that subsequently defaulted.

(5) OREO AND VALUATION ALLOWANCE FOR LOSSES ON OREO

The table below presents a summary of the activity related to OREO (in thousands):

	Three months ended March 31,	
	2018	2017
Beginning balance	\$11,742	\$18,961
Additions	—	—
Sales	(184)	(128)
Valuation allowance for OREO (2,000)	—	—
Ending balance	\$9,558	\$18,833

When foreclosure occurs, the acquired asset is recorded at fair value less selling costs, generally based on appraised value, which may result in partial charge-off of the loan. Subsequent write-downs required for declines in value are recorded through a valuation allowance or taken directly against the asset and charged to other non-interest expense.

(6) CERTAIN TRANSFERS OF FINANCIAL ASSETS

Through our MCA business, we commit to purchase residential mortgage loans from independent correspondent lenders and deliver those loans into the secondary market via whole loan sales to independent third parties or in securitization transactions to Ginnie Mae and government sponsored entities ("GSEs") such as Fannie Mae and Freddie Mac. We have elected to carry these loans at fair value based on sales commitments, market quotes or pricing models. Gains and losses on the sale of mortgage loans held for sale and changes in the fair value of the loans held for sale are included in other non-interest income on the consolidated income statement.

Residential mortgage loans held for sale are subject to both credit and interest rate risk. Credit risk is managed through underwriting policies and procedures, including collateral requirements, which are generally accepted by the secondary loan markets. Exposure to interest rate fluctuations is partially mitigated through forward sales contracts, which set the price for loans that will be delivered in the next 60 to 90 days.

The table below presents the unpaid principal balance of loans held for sale and related fair values at March 31, 2018 and December 31, 2017 (in thousands):

	March 31, 2018	December 31, 2017
Outstanding balance(1)	\$1,091,903	\$1,009,271
Fair value(1)	1,088,565	1,007,695
Fair value over/(under) outstanding balance	\$(3,338)	\$(1,576)

Does not include \$3.3 million of Small Business Administration ("SBA") loans held for sale carried at lower of (1) cost or market as of December 31, 2017 that were subsequently sold during the three months ended March 31, 2018.

No loans held for sale were on non-accrual as of March 31, 2018 or December 31, 2017. At March 31, 2018 and December 31, 2017, we had \$35.2 million and \$19.7 million, respectively, in outstanding balances of loans held for sale that were 90 days or more past due. The \$35.2 million loans held for sale that were 90 days or more past due at March 31, 2018 included \$31.1 million in loans guaranteed by U.S. government agencies that were repurchased out of Ginnie Mae securities and recorded as loans held for sale, at fair value, on the balance sheet. Interest on these past due loans accrues at the debenture rate guaranteed by the U.S. government. Also included in the \$35.2 million were \$3.1 million in loans that, pursuant to Ginnie Mae servicing guidelines, we have the unilateral right, but not the obligation, to repurchase if defined delinquent loan criteria are met, and therefore must record as loans held for sale on our balance sheet regardless of whether the repurchase option has been exercised. The comparable balances at December 31, 2017 were no loans repurchased and \$19.0 million in loans for which we have the unilateral right but not the obligation to repurchase.

The table below presents a reconciliation of the changes in loans held for sale for the three months ended March 31, 2018 and 2017 (in thousands):

	Three months ended March 31,	
	2018	2017
Beginning balance(1)	\$1,011,004	\$968,929
Loans purchased	1,479,006	1,299,542
Payments and loans sold(1)	(1,399,683)	(1,399,800)
Change in fair value	(1,762)	15,976
Ending balance	\$1,088,565	\$884,647

(1) Includes \$3.3 million of SBA loans held for sale carried at lower of cost or market at December 31, 2017 that were subsequently sold during the three months ended March 31, 2018.

We generally retain the right to service the loans sold, creating MSR which are recorded as assets on our balance sheet. A summary of MSR activity for the three months ended March 31, 2018 and 2017 is as follows (in thousands):

	Three months ended March 31,	
	2018	2017
MSRs:		
Balance, beginning of year	\$88,150	\$28,536
Capitalized servicing rights	16,750	18,094
Amortization	(2,741)	(1,104)
Sales	(25,598)	—
Balance, end of period	\$76,561	\$45,526
Valuation allowance:		
Balance, beginning of year	\$2,823	\$—
Increase (decrease) in valuation allowance	(2,823)	—
Balance, end of period	\$—	\$—
MSRs, net(1)	\$76,561	\$45,526
MSRs, fair value	\$82,274	\$48,013

(1) MSR are reported on the consolidated balance sheets at amortized cost, less a valuation allowance if the fair value of identified strata within the MSR portfolio are determined to have a fair value that is less than amortized cost.

We completed a sale of Ginnie Mae MSRs in the first quarter of 2018. In anticipation of this sale, the fair value of the MSRs at December 31, 2017 was adjusted, resulting in a \$2.8 million impairment charge taken in the fourth quarter of 2017.

At March 31, 2018 and December 31, 2017, our servicing portfolio of residential mortgage loans had an outstanding principal balance of \$6.6 billion and \$7.0 billion, respectively. In connection with the servicing of these loans, we hold deposits in the names of the investors who own the loans representing escrow funds for taxes and insurance, as well as collections in transit to the investors. These escrow funds are segregated and held in separate non-interest-bearing accounts at the Bank. These deposits, included in total non-interest-bearing deposits on the consolidated balance sheets, were \$82.7 million at March 31, 2018 and \$73.4 million at December 31, 2017.

The estimated fair value of the MSR assets is obtained from an independent third party and reviewed by management on a quarterly basis. MSRs typically do not trade in an active, open market with readily observable prices; as such, the fair value of MSRs is determined using a discounted cash flow model to calculate the present value of the estimated future net servicing income. The assumptions utilized in the discounted cash flow model are based on market data for comparable assets, where available. Each quarter, management and the independent third party discuss the key assumptions used in the discounted cash flow model and make adjustments as necessary to estimate the fair value of the MSRs. As of March 31, 2018 and December 31, 2017, management used the following assumptions to determine the fair value of MSRs:

	March 31, 2018	December 31, 2017
Average discount rates	9.61 %	9.90 %
Expected prepayment speeds	8.63 %	9.99 %
Weighted average life, in years	7.6	7.0

A sensitivity analysis of changes in the fair value of our MSR portfolio resulting from certain key assumptions is presented in the following table (in thousands):

	March 31, 2018	December 31, 2017
50 bp adverse change in prepayment speed	\$(8,142)	\$(11,896)
100 bp adverse change in prepayment speed	(20,353)	(28,226)

These sensitivities are hypothetical and actual results may differ materially due to a number of factors. The effect on fair value of a 10% variation in assumptions generally cannot be determined with confidence because the relationship of the change in assumptions to the fair value may not be linear. Additionally, the impact of a variation in a particular assumption on the fair

value is calculated while holding other assumptions constant. In reality, changes in one factor may be correlated with changes in other factors, which could impact the sensitivity analysis as presented.

In conjunction with the sale and securitization of loans held for sale, we may be exposed to liability resulting from recourse agreements and repurchase agreements. If it is determined subsequent to our sale of a loan that the loan sold is in breach of the representations or warranties made in the applicable sale agreement, we may have an obligation to either (a) repurchase the loan for the unpaid principal balance, accrued interest and related advances, (b) indemnify the purchaser against any loss it suffers or (c) make the purchaser whole for the economic benefits of the loan.

Our repurchase, indemnification and make whole obligations vary based upon the terms of the applicable agreements, the nature of the asserted breach and the status of the mortgage loan at the time a claim is made. We establish reserves for estimated losses of this nature inherent in the origination of mortgage loans by estimating the losses inherent in the population of all loans sold based on trends in claims and actual loss severities experienced. The reserve includes accruals for probable contingent losses in addition to those identified in the pipeline of claims received. The estimation process is designed to include amounts based on any actual losses experienced from actual repurchase activity.

Our estimated exposure related to loans previously sold and currently held for sale was \$1.4 million at March 31, 2018 and \$1.3 million at December 31, 2017 and is recorded in other liabilities in the consolidated balance sheets. We had \$56,000 in losses due to repurchase, indemnification and make-whole obligations during the three months ended March 31, 2018 and no losses during the three months ended March 31, 2017.

(7) FINANCIAL INSTRUMENTS WITH OFF-BALANCE SHEET RISK

The Bank is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit that involve varying degrees of credit risk in excess of the amount recognized in the consolidated balance sheets. The Bank's exposure to credit loss in the event of non-performance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amount of these instruments. The Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments. The amount of collateral obtained, if deemed necessary, is based on management's credit evaluation of the borrower.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Bank evaluates each customer's credit-worthiness on a case-by-case basis.

Standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

The table below summarizes our off-balance sheet financial instruments whose contract amounts represented credit risk (in thousands):

	March 31, 2018	December 31, 2017
Commitments to extend credit	\$7,108,257	\$6,957,847
Standby letters of credit	241,335	230,958

At March 31, 2018 and December 31, 2017, we had \$9.6 million and \$9.1 million, respectively, in allowance for off-balance sheet credit losses related to these off-balance sheet commitments recorded in other liabilities in the consolidated balance sheets.

(8) REGULATORY MATTERS

The Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory (and possibly additional discretionary) actions by regulators that, if undertaken, could have a direct material adverse effect on the Company's

and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of the Company's and the Bank's assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Company's and the Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Table of Contents

The Basel III regulatory capital framework (the "Basel III Capital Rules") adopted by U.S. federal regulatory authorities, among other things, (i) establishes the capital measure called "Common Equity Tier 1" ("CET1"), (ii) specifies that Tier 1 capital consist of CET1 and "Additional Tier 1 Capital" instruments meeting stated requirements, (iii) requires that most deductions/adjustments to regulatory capital measures be made to CET1 and not to other components of capital and (iv) defines the scope of the deductions/adjustments to the capital measures. The Basel III Capital Rules became effective for us on January 1, 2015 with certain transition provisions fully phasing in over a period ending on January 1, 2019.

Additionally, the Basel III Capital Rules require that we maintain a capital conservation buffer with respect to each of CET1, Tier 1 and total capital to risk-weighted assets, which provides for capital levels that exceed the minimum risk-based capital adequacy requirements. The capital conservation buffer is subject to a three year phase-in period that began on January 1, 2016 and will be fully phased in on January 1, 2019 at 2.5%. The required phase-in capital conservation buffer during 2018 is 1.875% and was 1.25% during 2017. A financial institution with a conservation buffer of less than the required amount is subject to limitations on capital distributions, including dividend payments and stock repurchases, and certain discretionary bonus payments to executive officers.

Quantitative measures established by these regulations to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios of CET1, Tier 1 and total capital to risk-weighted assets, and of Tier 1 capital to average assets, each as defined in the regulations. Management believes, as of March 31, 2018, that the Company and the Bank met all capital adequacy requirements to which they are subject.

Financial institutions are categorized as well capitalized or adequately capitalized, based on minimum total risk-based, Tier 1 risk-based, CET1 and Tier 1 leverage ratios. As shown in the table below, the Company's capital ratios exceeded the regulatory definition of adequately capitalized as of March 31, 2018 and December 31, 2017. Based upon the information in its most recently filed call report, the Bank met the capital ratios necessary to be well capitalized. The regulatory authorities can apply changes in classification of assets and such changes may retroactively subject the Company to changes in capital ratios. Any such changes could result in reducing one or more capital ratios below well-capitalized status. In addition, a change may result in imposition of additional assessments by the FDIC or could result in regulatory actions that could have a material adverse effect on our financial condition and results of operations.

Because our Bank had less than \$15.0 billion in total consolidated assets as of December 31, 2009, we are allowed to continue to classify our trust preferred securities, all of which were issued prior to May 19, 2010, as Tier 1 capital.

Table of Contents

The table below summarizes our actual and required capital ratios under the Basel III Capital Rules:

	Actual		Minimum Capital Required - Basel III Phase-In Schedule		Minimum capital Required - Basel III Fully Phased-In		Required to be Considered Well Capitalized	
	Capital Amount	Ratio	Capital Amount	Ratio	Capital Amount	Ratio	Capital Amount	Ratio
As of March 31, 2018:								
CET1								
Company	\$2,103,637	8.80 %	\$1,523,915	6.375 %	\$1,673,318	7.00 %	N/A	N/A
Bank	2,064,966	8.64 %	1,523,161	6.375 %	1,672,490	7.00 %	1,553,027	6.50 %
Total capital (to risk-weighted assets)								
Company	2,843,072	11.89 %	2,360,574	9.875 %	2,509,978	10.50 %	N/A	N/A
Bank	2,645,863	11.07 %	2,359,406	9.875 %	2,508,735	10.50 %	2,389,272	10.00 %
Tier 1 capital (to risk-weighted assets)								
Company	2,361,055	9.88 %	1,882,483	7.875 %	2,031,887	8.50 %	N/A	N/A
Bank	2,222,384	9.30 %	1,881,552	7.875 %	2,030,881	8.50 %	1,911,417	8.00 %
Tier 1 capital (to average assets)(1)								
Company	2,361,055	9.88 %	955,731	4.00 %	955,731	4.00 %	N/A	N/A
Bank	2,222,384	9.31 %	955,236	4.00 %	955,236	4.00 %	1,194,044	5.00 %
As of December 31, 2017:								
CET1								
Company	\$2,033,830	8.45 %	\$1,384,448	5.75 %	\$1,685,464	7.00 %	N/A	N/A
Bank	1,992,152	8.28 %	1,383,475	5.75 %	1,684,231	7.00 %	1,563,929	6.50 %
Total capital (to risk-weighted assets)								
Company	2,768,153	11.50 %	2,227,221	9.25 %	2,528,196	10.50 %	N/A	N/A
Bank	2,567,961	10.67 %	2,225,591	9.25 %	2,526,347	10.50 %	2,406,044	10.00 %
Tier 1 capital (to risk-weighted assets)								
Company	2,293,016	9.52 %	1,745,659	7.25 %	2,046,635	8.50 %	N/A	N/A
Bank	2,151,338	8.94 %	1,744,382	7.25 %	2,045,138	8.50 %	1,924,835	8.00 %
Tier 1 capital (to average assets)(1)								
Company	2,293,016	9.15 %	1,002,494	4.00 %	1,002,494	4.00 %	N/A	N/A
Bank	2,151,338	8.59 %	1,002,144	4.00 %	1,002,144	4.00 %	1,252,680	5.00 %

(1) The Tier 1 capital ratio (to average assets) is not impacted by the Basel III Capital Rules; however, it should be noted that the Federal Reserve Board and the FDIC may require the Company and the Bank, respectively, to maintain a Tier 1 capital ratio (to average assets) above the required minimum.

Our mortgage finance loan volumes can increase significantly at month end, causing a meaningful difference between ending balance and average balance for any period. At March 31, 2018, our total mortgage finance loans were \$4.7 billion compared to the average for the three months ended March 31, 2018 of \$4.1 billion. As CET1, Tier 1 and total capital ratios are calculated using quarter-end risk-weighted assets and our mortgage finance loans are 100% risk-weighted (excluding MCA mortgage loans held for sale, which receive lower risk weights), the quarter-end fluctuation in these balances can significantly impact our reported ratios. Due to the actual risk profile and liquidity of this asset class, we manage capital allocated to mortgage finance loans based on changing trends in average balances and do not believe that the quarter-end balance is representative of risk characteristics that would justify higher allocations. However, we continue to monitor our capital allocation to confirm that all capital levels remain above

well-capitalized levels.

Dividends that may be paid by subsidiary banks are routinely restricted by various regulatory authorities. The amount that can be paid in any calendar year without prior approval of the Bank's regulatory agencies cannot exceed the lesser of the net profits (as defined) for that year plus the net profits for the preceding two calendar years, or retained earnings. The Basel III Capital

24

Table of Contents

Rules further limit the amount of dividends that may be paid by our Bank. No dividends were declared or paid on our common stock during the three months ended March 31, 2018 or 2017.

(9) STOCK-BASED COMPENSATION

We have long-term incentive plans under which stock-based compensation awards are granted to employees and directors by the board of directors, or its designated committee. Grants are subject to vesting requirements and may include, among other things, nonqualified stock options, stock appreciation rights ("SARs"), restricted stock units ("RSUs"), restricted stock and performance units, or any combination thereof. There are 2,550,000 total shares authorized for grant under the plans.

The table below summarizes our stock-based compensation expense for the three months ended March 31, 2018 and March 31, 2017 (in thousands):

	Three months ended March 31,	
	2018	2017
Stock-settled awards:		
SARs	\$50	\$72
RSUs	1,896	1,593
Restricted stock	11	4
Cash-settled performance units	4,014	2,890
Total	\$5,971	\$4,559

(in thousands)	March 31, 2018
Unrecognized compensation expense related to unvested stock-settled awards	\$ 17,313
Weighted average period over which expense is expected to be recognized, in years	3.0

(10) INCOME TAXES

The Tax Cut and Jobs Act (the "Tax Act") enacted in December 2017 reduced the federal corporate income tax rate from 35% to 21% effective January 1, 2018. As a result of the Tax Act, we re-measured certain deferred tax assets and liabilities based on the rates at which they are expected to reverse in the future, which is generally 21%. However, we are still analyzing certain aspects of the Tax Act and refining our calculations, which could potentially affect the measurement of these balances or potentially give rise to new deferred tax amounts. The provisional amount recorded in 2017 related to the re-measurement of our deferred tax asset was \$17.6 million, and no further adjustments were made during the three months ended March 31, 2018.

The reconciliation of our effective income tax rate to the U.S. federal statutory tax rate is as follows:

	Three months ended March 31,	
	2018	2017
U.S. statutory rate	21 %	35 %
State taxes	1 %	1 %
Non-deductible expenses	1 %	— %
Non-taxable income	(1) %	(1) %
Other	(1) %	— %
Effective tax rate	21 %	35 %

(11) FAIR VALUE DISCLOSURES

We determine the fair market values of our assets and liabilities measured at fair value on a recurring and nonrecurring basis using the fair value hierarchy as prescribed in ASC 820, Fair Value Measurements and Disclosures. The standard describes three levels of inputs that may be used to measure fair value as provided below.

Table of Contents

Quoted prices in active markets for identical assets or liabilities. This category includes the assets and Level 1 liabilities related to our non-qualified deferred compensation plan where values are based on quoted market prices for identical equity securities in an active market.

Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets include agency mortgage-backed debt securities and Community Reinvestment Act funds. This category also includes loans held for sale and derivative assets and liabilities where values are obtained from independent pricing services using observable market data.

Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies or similar techniques, as well as instruments for which the determination of fair values requires significant management judgment or estimation. This category includes certain loans held for sale for which fair values are determined using third party pricing models. This category also includes impaired loans and OREO where collateral values have been based on third party appraisals; however, comparative sales data typically used in appraisals may be unavailable or more subjective in certain markets due to lack of market activity.

Assets and liabilities measured at fair value at March 31, 2018 and December 31, 2017 are as follows (in thousands):

	Fair Value Measurements Using	
	Level 1	Level 2 Level 3
March 31, 2018		
Available-for-sale debt securities:(1)		
Residential mortgage-backed securities	\$—	\$ 10,119
Equity securities(1)(2)	7,842	968
Loans held for sale (3)	—	1,054,314
Loans held for investment(4)(6)	—	34,251
OREO(5)(6)	—	28,258
Derivative assets(7)	—	9,558
Derivative liabilities(7)	—	17,320
Non-qualified deferred compensation plan liabilities (8)	8,049	16,831
December 31, 2017		
Available-for-sale debt securities:(1)		
Residential mortgage-backed securities	\$—	\$ 10,945
Equity securities(1)(2)	5,471	106
Loans held for sale(3)	—	1,007,695
Loans held for investment(4)(6)	—	21,216
OREO(5)(6)	—	11,742
Derivative assets(7)	—	16,719
Derivative liabilities(7)	—	17,377
Non-qualified deferred compensation plan liabilities (8)	5,587	—

(1) Securities are measured at fair value on a recurring basis, generally monthly.

(2) Equity securities consist of Community Reinvestment Act funds and investments related to our non-qualified deferred compensation plan.

(3)

Loans held for sale, excluding SBA loans which are carried at lower of cost or market, are measured at fair value on a recurring basis, generally monthly.

(4) Includes impaired loans that have been measured for impairment at the fair value of the loan's collateral.

(5) OREO is transferred from loans to OREO at fair value less selling costs.

Table of Contents

(6) Loans held for investment and OREO are measured on a nonrecurring basis, generally annually or more often as warranted by market and economic conditions.

(7) Derivative assets and liabilities are measured at fair value on a recurring basis, generally quarterly.

Non-qualified deferred compensation plan liabilities represent the fair value of the obligation to the employee, (8) which corresponds to the fair value of the invested assets, and are measured at fair value on a recurring basis, generally monthly.

Level 3 Valuations

Financial instruments are considered Level 3 when their values are determined using pricing models, discounted cash flow methodologies or similar techniques and at least one significant model assumption or input is unobservable. Level 3 financial instruments include those for which the determination of fair value requires significant management judgment or estimation. Currently, we measure the fair value of certain loans held for sale using third party pricing models on a recurring basis, and measure certain collateral dependent impaired loans and OREO on a nonrecurring basis as described below.

Loans held for sale

The following table presents a reconciliation for the three months ended March 31, 2018 of loans held for sale measured at fair value on a recurring basis using Level 3 inputs (in thousands):

Balance at Beginning of Period	Purchases / Additions	Sales / Reductions	Unrealized Gains (Losses) Recorded in Earnings(1)	Balance at End of Period
Loans held for sale \$	—\$ 36,092	\$	—\$ (1,841)	\$34,251

(1) Recorded in other non-interest income.

The fair value of loans held for sale using Level 3, or unobservable inputs, include loans that cannot be sold through normal sale channels and thus require significant management judgment or estimation when determining the fair value. The fair value of such loans is generally based upon quoted prices of comparable loans with a liquidity discount applied. At March 31, 2018, the fair value of these loans was calculated using a weighted-average discounted price of 94.9%.

Loans held for investment

At March 31, 2018 and December 31, 2017, certain impaired loans held for investment were reported at fair value through a specific allocation of the allowance for loan losses based upon the fair value of the underlying collateral. The \$28.3 million fair value of loans held for investment at March 31, 2018 reported above includes impaired loans held for investment with a carrying value of \$39.5 million that were reduced by specific allowance allocations totaling \$11.2 million based on collateral valuations utilizing Level 3 valuation inputs. The \$21.2 million fair value of loans held for investment at December 31, 2017 reported above includes impaired loans with a carrying value of \$32.2 million that were reduced by specific valuation allowance allocations totaling \$11.0 million based on collateral valuations utilizing Level 3 valuation inputs. Fair values were based on third party appraisals, which are Level 3 valuation inputs.

OREO

Certain foreclosed assets, upon initial recognition, are recorded at fair value less estimated selling costs. At March 31, 2018 and December 31, 2017, OREO had a carrying value of \$11.6 million and \$11.7 million, respectively, net of a \$2.0 million specific valuation allowance at March 31, 2018 and no valuation allowance at December 31, 2017. The fair value of OREO was computed based on third party appraisals, which are Level 3 valuation inputs.

Fair Value of Financial Instruments

GAAP requires disclosure of fair value information about financial instruments, whether or not recognized on the balance sheet, for which it is practical to estimate that value. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. This disclosure does not and is not intended to represent the fair value of the Company.

Table of Contents

A summary of the carrying amounts and estimated fair values of financial instruments is as follows (in thousands):

	March 31, 2018		December 31, 2017	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Financial assets:				
Level 1 inputs:				
Cash and cash equivalents	\$2,451,170	\$2,451,170	\$2,905,591	\$2,905,591
Investment securities	7,842	7,842	5,460	5,460
Level 2 inputs:				
Investment securities	17,087	17,087	18,051	18,051
Loans held for sale	1,054,314	1,054,314	1,011,004	1,011,004
Derivative assets	17,320	17,320	16,719	16,719
Level 3 inputs:				
Loans held for sale	34,251	34,251	—	—
Loans held for investment, net	20,240,812	20,234,875	20,489,757	20,480,802
Financial liabilities:				
Level 2 inputs:				
Federal funds purchased	527,800	527,800	359,338	359,338
Customer repurchase agreements	7,740	7,740	5,702	5,702
Other borrowings	2,300,000	2,300,000	2,800,000	2,800,000
Subordinated notes	281,496	284,393	281,406	285,485
Derivative liabilities	16,831	16,831	17,377	17,377
Level 3 inputs:				
Deposits	18,764,533	18,765,267	19,123,180	19,124,121
Trust preferred subordinated debentures	113,406	113,406	113,406	113,406

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments:

Investment Securities

Within the investment securities portfolio, we hold equity securities related to our non-qualified deferred compensation plan which are valued using quoted market prices for identical equity securities in an active market. These financial instruments are classified as Level 1 assets in the fair value hierarchy. The fair value of the remaining investment portfolio is based on prices obtained from independent pricing services which are based on quoted market prices for the same or similar securities, and these financial instruments are characterized as Level 2 assets in the fair value hierarchy. We have obtained documentation from our primary pricing service regarding their processes and controls applicable to pricing investment securities. In addition, on a quarterly basis we independently verify the prices that we receive from the service provider using two additional independent pricing sources. Any significant differences are investigated and resolved.

Loans Held for Sale

Fair value for loans held for sale is derived from quoted market prices for similar loans, in which case they are characterized as Level 2 assets in the fair value hierarchy, or is derived from third party pricing models, in which case they are characterized as Level 3 assets in the fair value hierarchy.

Derivatives

The estimated fair value of interest rate swaps and caps is obtained from independent pricing services based on quoted market prices for similar derivative contracts and these financial instruments are characterized as Level 2 assets and liabilities in the fair value hierarchy. On a quarterly basis, we independently verify the fair value using an additional independent pricing source. Any significant differences are investigated and resolved. Foreign currency forward contracts are valued based upon quoted market prices obtained from independent pricing services for similar derivative contracts. As such, these financial instruments are characterized as Level 2 assets and liabilities in the fair

value hierarchy. The derivative instruments related to the loans held for sale portfolio include loan purchase commitments and forward sales commitments. Loan purchase commitments are valued

Table of Contents

based upon the fair value of the underlying mortgage loans to be purchased, which is based on observable market data for similar loans. Forward sales commitments are valued based upon quoted market prices from brokers. As such, these loan purchase commitments and forward sales commitments are characterized as Level 2 assets or liabilities in the fair value hierarchy.

(12) DERIVATIVE FINANCIAL INSTRUMENTS

The fair value of derivative positions outstanding is included in accrued interest receivable and other assets and other liabilities in the accompanying consolidated balance sheets on a net basis when a right of offset exists, based on transactions with a single counterparty that are subject to a legally enforceable master netting agreement.

We enter into interest rate derivative positions that are not designated as hedging instruments. These derivative positions relate to transactions in which we enter into an interest rate swap, cap and/or floor with a customer while at the same time entering into an offsetting interest rate swap, cap and/or floor with another financial institution. In connection with each swap transaction, we agree to pay interest to the customer on a notional amount at a variable interest rate and receive interest from the customer on a similar notional amount at a fixed interest rate. At the same time, we agree to pay another financial institution the same fixed interest rate on the same notional amount and receive the same variable interest rate on the same notional amount. The transaction allows our customer to effectively convert a variable rate loan to a fixed rate. Because we act as an intermediary for our customer, changes in the fair value of the underlying derivative contracts substantially offset each other and do not have a material impact on our results of operations.

We also enter into foreign currency forward contracts that are not designated as hedging instruments. These derivative instruments relate to transactions in which we enter into a contract with a customer to buy or sell a foreign currency at a future date for a specified price while at the same time entering into an offsetting contract with a financial institution to buy or sell the same currency at the same future date for a specified price. These transactions allow our customers to manage their exposure to foreign currency exchange rate fluctuations. Because we act as an intermediary for our customer, changes in the fair value of the underlying derivative instruments substantially offset each other and do not have a material impact on our results of operations.

We also enter into loan purchase commitment contracts with mortgage originators to purchase residential mortgage loans at a future date, as well as forward sales commitment contracts to sell residential mortgage loans at a future date as part of our MCA program. The objective of these transactions is to mitigate our exposure to interest rate risk associated with the purchase of mortgage loans held for sale.

Table of Contents

The notional amounts and estimated fair values of interest rate derivative positions outstanding at March 31, 2018 and December 31, 2017 are presented in the following tables (in thousands):

	March 31, 2018			December 31, 2017		
	Estimated Fair Value			Estimated Fair Value		
	Notional Amount	Asset Derivative	Liability Derivative	Notional Amount	Asset Derivative	Liability Derivative
Non-hedging interest rate derivatives:						
Financial institution counterparties:						
Commercial loan/lease interest rate swaps	\$ 1,459,722	\$ 12,286	\$ 7,305	\$ 1,393,764	\$ 4,736	\$ 15,482
Commercial loan/lease interest rate caps	232,754	772	19	242,700	421	7
Foreign currency forward contracts	51,064	1,362	—	2,466	4	69
Customer counterparties:						
Commercial loan/lease interest rate swaps	1,459,722	7,305	12,286	1,393,764	15,482	4,736
Commercial loan/lease interest rate caps	232,754	19	772	242,700	7	421
Foreign currency forward contracts	51,064	—	1,362	2,466	69	4
Economic hedging interest rate derivatives:						
Loan purchase commitments	277,085	1,043	66	253,815	635	190
Forward sales commitments	1,251,750	781	1,269	1,086,224	—	1,103
Gross derivatives		23,568	23,079		21,354	22,012
Offsetting derivative assets/liabilities		(6,248)	(6,248)		(4,635)	(4,635)
Net derivatives included in the consolidated balance sheets		\$ 17,320	\$ 16,831		\$ 16,719	\$ 17,377

The weighted average received and paid interest rates for interest rate swaps outstanding at March 31, 2018 and December 31, 2017 were as follows:

	March 31, 2018	December 31, 2017
Weighted Average Interest Rate Received	3.65%	3.59%
Weighted Average Interest Rate Paid	4.14%	4.34%

Non-hedging interest rate swaps 3.65% 4.14% 3.59% 4.34%

The weighted average strike rate for outstanding interest rate caps was 2.46% at March 31, 2018 and 2.40% at December 31, 2017.

Our credit exposure on derivative instruments is limited to the net favorable value and interest payments by each counterparty. In some cases collateral may be required from the counterparties involved if the net value of the derivative instruments exceeds a nominal amount. Our credit exposure associated with these instruments, net of any collateral pledged, was approximately \$11.7 million at March 31, 2018 and approximately \$16.7 million at December 31, 2017. Collateral levels are monitored and adjusted on a regular basis for changes in interest rate swap and cap values, as well as for changes in the value of forward sales commitments. At March 31, 2018, we had pledged to counterparties \$5.3 million in cash collateral for these derivatives, of which \$5.0 million was included in interest-bearing deposits in other banks and \$270,000 was included in accrued interest receivable and other assets, and counterparties had pledged to us \$5.6 million in cash collateral included in interest-bearing deposit liabilities. At December 31, 2017, we had pledged to counterparties \$15.2 million in cash collateral for these derivatives, of which \$14.0 million was included in interest-bearing deposits in other banks and \$1.2 million was included in accrued interest receivable and other assets.

We also enter into credit risk participation agreements with financial institution counterparties for interest rate swaps related to loans in which we are either a participant or a lead bank. The risk participation agreements entered into by

us as a participant bank provide credit protection to the financial institution counterparty should the borrower fail to perform on its interest rate derivative contract with that financial institution. We are party to 14 risk participation agreements where we are a participant

30

Table of Contents

bank having a notional amount of \$145.9 million at March 31, 2018, compared to 15 risk participation agreements having a notional amount of \$157.1 million at December 31, 2017. The maximum estimated exposure to these agreements, assuming 100% default by all obligors, was approximately \$115,000 at March 31, 2018 and \$221,000 at December 31, 2017. The fair value of these exposures was insignificant to the consolidated financial statements at both March 31, 2018 and December 31, 2017. Risk participation agreements entered into by us as the lead bank provide credit protection to us should the borrower fail to perform on its interest rate derivative contract with us. We are party to 10 risk participation agreements where we are the lead bank having a notional amount of \$107.2 million at March 31, 2018, compared to 10 agreements having a notional amount of \$86.3 million at December 31, 2017.

(13) NEW ACCOUNTING PRONOUNCEMENTS

ASU 2018-03 "Technical Corrections and Improvements to Financial Instruments—Overall (Subtopic 825-10) " ("ASU 2018-03") clarifies certain aspects of the guidance issued in ASU 2016-01 including: the ability to irrevocably elect to change the measurement approach for equity securities measured using the practical expedient (at cost plus or minus observable transactions less impairment) to a fair value method in accordance with Topic 820, Fair Value Measurement; clarification that if an observable transaction occurs for such securities, the adjustment is as of the observable transaction date; clarification that the prospective transition approach for equity securities without a readily determinable fair value is meant only for instances in which the practical expedient is elected; and various other clarifications. The ASU is effective for us July 1, 2018 and early adoption is permitted. We do not expect this ASU to have a material impact on our consolidated financial statements.

ASU 2016-13 "Financial Instruments - Credit Losses (Topic 326)" ("ASU 2016-13") requires an entity to utilize a new impairment model known as the current expected credit loss ("CECL") model to estimate its lifetime "expected credit loss" and record an allowance that, when deducted from the amortized cost basis of the financial asset, presents the net amount expected to be collected on the financial asset. The CECL model is expected to result in more timely recognition of credit losses. ASU 2016-13 also requires new disclosures for financial assets measured at amortized cost, loans and available-for-sale debt securities. Entities will apply the standard's provisions as a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is adopted. ASU 2016-13 will be effective for us on January 1, 2020. We are evaluating the impact adoption of ASU 2016-13 will have on our consolidated financial statements and disclosures. While we are currently unable to reasonably estimate the impact of adopting ASU 2016-13, we expect that the impact of adoption could be significantly influenced by the composition, characteristics and quality of our loan portfolio as well as the prevailing economic conditions and forecasts as of the adoption date. As part of our evaluation process, we have established a steering committee and working group that includes individuals from various functional areas to assess processes, portfolio segmentation, systems requirements and needed resources to implement this new accounting standard.

ASU 2016-02 "Leases (Topic 842)" ("ASU 2016-02") requires that lessees and lessors recognize lease assets and lease liabilities on the balance sheet and disclose key information about leasing arrangements. ASU 2016-02 will be effective for us on January 1, 2019. ASU 2016-02 provides for a modified retrospective transition approach requiring lessees to recognize and measure leases on the balance sheet at the beginning of the earliest period presented with the option to elect certain practical expedients. We are currently evaluating a third party software solution to assist with the accounting under the new standard. Our operating leases relate primarily to office space and bank branches. We expect recorded assets and liabilities to increase upon adoption of the standard as it relates to operating leases in which we are the lessee.

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF
2. OPERATIONS

Forward-Looking Statements

Certain statements and financial analysis contained in this report that are not historical facts are forward-looking statements made pursuant to the safe harbor provisions of federal securities laws. Forward-looking statements may also be contained in our future filings with SEC, in press releases and in oral and written statements made by us or with our approval that are not statements of historical fact. These forward-looking statements are based on our beliefs, assumptions and expectations of our future performance taking into account all information currently available to us. Words such as "believes," "expects," "estimates," "anticipates," "plans," "goals," "objectives," "expects," "intends," "seeks," "targeted," "continue," "remain," "will," "should," "may" and other similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements.

Forward-looking statements may include, among other things, statements about the credit quality of our loan portfolio, economic conditions, including the continued impact on our customers from declines and volatility in oil and gas prices, expectations regarding rates of default or loan losses, volatility in the mortgage industry, our business strategies and our expectations about future financial performance, future growth and earnings, the appropriateness of our allowance for loan losses and provision for credit losses, the impact of increased regulatory requirements on our business, increased competition, interest rate risk, new lines of business, new product or service offerings and new technologies.

Forward-looking statements are subject to various risks and uncertainties, which change over time, are based on management's expectations and assumptions at the time the statements are made and are not guarantees of future results. Important factors that could cause actual results to differ materially from the forward-looking statements include, but are not limited to, the following:

Deterioration of the credit quality of our loan portfolio or declines in the value of collateral related to external factors such as commodity prices, real estate values or interest rates, increased default rates and loan losses or adverse changes in the industry concentrations of our loan portfolio.

• Changing economic conditions or other developments adversely affecting our commercial, entrepreneurial and professional customers.

• Changes in the value of commercial and residential real estate securing our loans or in the demand for credit to support the purchase and ownership of such assets.

• Adverse economic conditions and other factors affecting our middle market customers and their ability to continue to meet their loan obligations.

Unanticipated effects from the Tax Act may limit its benefits or adversely impact our business, which could include decreased demand for borrowing by our middle market customers or increased price competition that offsets the benefits of decreased federal income tax expense.

• The failure to correctly assess and model the assumptions supporting our allowance for loan losses, causing it to become inadequate in the event of deteriorations in loan quality and increases in charge-offs.

• Changes in the U.S. economy in general or the Texas economy specifically resulting in deterioration of credit quality, increases in non-performing assets or charge-offs or reduced demand for credit or other financial services we offer, including the effects from declines in the level of drilling and production related to the continued volatility in oil and gas prices.

• Adverse changes in economic or market conditions, in Texas, the United States or internationally, that could affect the credit quality of our loan portfolio or our operating performance.

• Unexpected market conditions or regulatory changes that could cause access to capital market transactions and other sources of funding to become more difficult to obtain on terms and conditions that are acceptable to us.

• The inadequacy of our available funds to meet our deposit, debt and other obligations as they become due, or our failure to maintain our capital ratios as a result of adverse changes in our operating performance or financial condition, or changes in applicable regulations or regulator interpretation of regulations impacting our business or the characterization or risk weight of our assets.

The failure to effectively balance our funding sources with cash demands by depositors and borrowers. The failure to manage information systems risk or to prevent cyber-attacks against us, our customers or our third party vendors, or to manage risks from disruptions or security breaches affecting us, our customers or our third party vendors.

Table of Contents

The failure to effectively manage our interest rate risk resulting from unexpectedly large or sudden changes in interest rates or rate or maturity imbalances in our assets and liabilities, and potential adverse effects to our borrowers including their inability to repay loans with increased interest rates.

Legislative and regulatory changes imposing further restrictions and costs on our business, a failure to remain well capitalized or well managed status or regulatory enforcement actions against us, and uncertainty related to future implementation and enforcement of regulatory requirements resulting from the current political environment.

The failure to successfully execute our business strategy, which may include expanding into new markets, developing and launching new lines of business or new products and services within the expected timeframes and budgets or to successfully manage the risks related to the development and implementation of these new businesses, products or services.

• The failure to attract and retain key personnel or the loss of key individuals or groups of employees.

• Increased or more effective competition from banks and other financial service providers in our markets.

• Structural changes in the markets for origination, sale and servicing of residential mortgages.

Uncertainty in the pricing of mortgage loans that we purchase, and later sell or securitize, as well as competition for the MSRMs related to these loans and related interest rate risk or price risk resulting from retaining MSRMs, and the potential effects of higher interest rates on our MCA loan volumes.

• Material failures of our accounting estimates and risk management processes based on management judgment, or the supporting analytical and forecasting models.

• Failure of our risk management strategies and procedures, including failure or circumvention of our controls.

• Credit risk resulting from our exposure to counterparties.

• An increase in the incidence or severity of fraud, illegal payments, security breaches and other illegal acts impacting our Bank and our customers.

• The failure to maintain adequate regulatory capital to support our business.

• Unavailability of funds obtained from borrowing or capital transactions or from our Bank to fund our obligations.

• Incurrence of material costs and liabilities associated with legal and regulatory proceedings and related matters with respect to the financial services industry, including those directly involving us or our Bank.

• Environmental liability associated with properties related to our lending activities.

• Severe weather, natural disasters, acts of war or terrorism and other external events.

Actual outcomes and results may differ materially from what is expressed in our forward-looking statements and from our historical financial results due to the factors discussed elsewhere in this report or disclosed in our other SEC filings. Forward-looking statements included herein speak only as of the date hereof and should not be relied upon as representing our expectations or beliefs as of any date subsequent to the date of this report. Except as required by law, we undertake no obligation to revise any forward-looking statements contained in this report, whether as a result of new information, future events or otherwise. The factors discussed herein are not intended to be a complete summary of all risks and uncertainties that may affect our businesses. For a more detailed discussion of these and other factors that may affect our business, see "Risk Factors" in the 2017 Form 10-K and other filings we have made with the SEC. Though we strive to monitor and mitigate risk, we cannot anticipate all potential economic, operational and financial developments that may adversely impact our operations and our financial results. Forward-looking statements should not be viewed as predictions and should not be the primary basis upon which investors evaluate an investment in our securities.

Overview of Our Business Operations

We commenced our banking operations in December 1998. An important aspect of our growth strategy has been our ability to service and manage effectively a large number of loans and deposit accounts in multiple markets in Texas, as well as several lines of business serving a regional or national clientele of commercial borrowers. Accordingly, we have created an operations infrastructure sufficient to support our lending and banking operations that we continue to build out as needed to serve a larger customer base and specialized industries.

Outstanding energy loans totaled \$1.4 billion, or approximately 7% of total loans, at March 31, 2018. Unfunded energy loan commitments increased by \$94.3 million to \$772.6 million (55% of outstanding energy loans) at March 31, 2018 compared to \$678.3 million at December 31, 2017. We recorded \$5.1 million in energy net

charge-offs during the three months ended March 31, 2018 compared to \$7.1 million for the same period in 2017. Energy non-accruals decreased to \$50.4 million at March 31, 2018 compared to \$65.2 million at December 31, 2017 and \$92.3 million at March 31, 2017. We continue to proactively manage our energy portfolio and overall credit quality, and we believe we are appropriately reserved against further energy-related losses.

The following discussion and analysis presents the significant factors affecting our financial condition as of March 31, 2018 and December 31, 2017 and results of operations for the three months in the periods ended March 31, 2018 and 2017. This discussion should be read in conjunction with our consolidated financial statements and notes to the financial statements appearing in Part I, Item 1 of this report.

Results of Operations

Summary of Performance

We reported net income of \$71.9 million and net income available to common stockholders of \$69.5 million, or \$1.38 per diluted common share, for the first quarter of 2018 compared to net income of \$42.5 million and net income available to common stockholders of \$40.1 million, or \$0.80 per diluted common share, for the first quarter of 2017. Return on average common equity ("ROE") was 13.39% and return on average assets ("ROA") was 1.22% for the first quarter of 2018, compared to 8.60% and 0.83%, respectively, for the first quarter of 2017. The increase in ROE and ROA for the quarter resulted primarily from an improvement in operating results for the first quarter of 2018 compared to the first quarter of 2017, as well as a decrease in income tax expense caused by a decline in income tax rates as a result of the Tax Cuts and Jobs Act which became effective on January 1, 2018.

Net income increased \$29.4 million, or 69%, for the three months ended March 31, 2018, as compared to the same period in 2017. The increase was primarily the result of a \$46.9 million increase in net interest income, \$2.8 million increase in non-interest income and a \$3.5 million decrease in income tax expense, offset by a \$3.0 million increase in the provision for credit losses and a \$20.9 million increase in non-interest expense.

Details of the changes in the various components of net income are discussed below.

Net Interest Income

Net interest income was \$210.3 million for the first quarter of 2018, compared to \$163.4 million for the first quarter of 2017. The increase was due to an increase in average earning assets of \$2.9 billion as compared to the first quarter of 2017, as well as the effect of increases in interest rates on loan yields. The increase in average earning assets included a \$123.3 million increase in average loans held for sale and a \$3.8 billion increase in average net loans held for investment, offset by an \$8.3 million decrease in average investment securities and a \$1.0 billion decrease in average liquidity assets. For the quarter ended March 31, 2018, average net loans held for investment, liquidity assets and loans held for sale represented approximately 84%, 11% and 5%, respectively, of average earning assets compared to approximately 77%, 18% and 5% for the same quarter of 2017.

Average interest-bearing liabilities for the quarter ended March 31, 2018 increased \$2.2 billion from the first quarter of 2017, which included a \$1.9 billion increase in average interest-bearing deposits and a \$388.2 million increase in other borrowings. Average demand deposits were \$8.1 billion for the quarter ended March 31, 2018, compared to \$7.5 billion for the same period of 2017. The average cost of total deposits and borrowed funds increased to 0.74% for the first quarter of 2018 compared to 0.34% for the same period of 2017. The cost of interest-bearing liabilities increased from 0.75% for the quarter ended March 31, 2017 to 1.32% for the same period of 2018.

Table of Contents

The following table (in thousands) presents changes in taxable-equivalent net interest income between the three month periods ended March 31, 2018 and 2017 and identifies the changes due to differences in the average volume of earning assets and interest-bearing liabilities and changes due to differences in the average interest rate on those assets and liabilities.

	Three months ended		
	March 31, 2018/2017		
	Net Change	Change Due To(1) Volume	Yield/Rate(2)
Interest income:			
Investment securities	\$(21)	\$(59)	\$ 38
Loans held for sale	3,000	1,103	1,897
Loans held for investment, mortgage finance loans	14,257	11,238	3,019
Loans held for investment	50,315	27,308	23,007
Federal funds sold and securities purchased under resale agreements	515	(29)	544
Interest-bearing deposits in other banks	2,187	(1,991)	4,178
Total	70,253	37,570	32,683
Interest expense:			
Transaction deposits	6,458	851	5,607
Savings deposits	11,475	1,493	9,982
Time deposits	476	114	362
Other borrowings	4,376	661	3,715
Long-term debt	197	5	192
Total	22,982	3,124	19,858
Net interest income	\$47,271	\$34,446	\$ 12,825

(1) Yield/rate and volume variances are allocated to yield/rate.

(2) Taxable equivalent rates are used where applicable and assume a 35% tax rate.

Net interest margin, which is defined as the ratio of net interest income to average earning assets, was 3.71% for the first quarter of 2018 compared to 3.29% for the first quarter of 2017. The year-over-year increase was due primarily to the increase in total loans held for investment, improved asset composition and the effect of increases in interest rates on loan yields attributable to our asset-sensitive balance sheet. The yield on total loans held for investment increased to 4.88% for the first quarter of 2018 compared to 4.38% for the first quarter of 2017 and the yield on earning assets increased to 4.48% for the first quarter of 2018 compared to 3.70% for the first quarter of 2017. Funding costs, including demand deposits and borrowed funds, increased to 0.74% for the first quarter of 2018 compared to 0.34% for the first quarter of 2017. The spread on total earning assets, net of the cost of deposits and borrowed funds, was 3.74% for the first quarter of 2018 compared to 3.36% for the first quarter of 2017. The increase resulted primarily from increases in interest rates and increases in the higher yielding loan components of earning assets. Total funding costs, including all deposits, long-term debt and stockholders' equity, increased to 0.74% for the first quarter of 2018 compared to 0.40% for the first quarter of 2017.

Table of Contents

Non-interest Income

The components of non-interest income were as follows (in thousands):

	Three months ended March 31,	
	2018	2017
Service charges on deposit accounts	\$3,137	\$3,045
Wealth management and trust fee income	1,924	1,357
Bank owned life insurance (BOLI) income	659	466
Brokered loan fees	5,168	5,678
Servicing income	5,492	2,201
Swap fees	1,562	1,803
Other	2,005	2,560
Total non-interest income	\$19,947	\$17,110

Non-interest income increased \$2.8 million during the three months ended March 31, 2018 compared to the same period of 2017. This increase was primarily due to a \$3.3 million increase in servicing income during the three months ended March 31, 2018 compared to the same period of 2017 primarily attributable to an increase in MSR's.

While management expects continued growth in certain components of non-interest income, the future rate of growth could be affected by increased competition from nationwide and regional financial institutions among other factors. In order to achieve growth in non-interest income, management from time to time evaluates new products, new lines of business and the expansion of existing lines of business. Any new product introduction or new market entry could place additional demands on capital and managerial resources.

Non-interest Expense

The components of non-interest expense were as follows (in thousands):

	Three months ended March 31,	
	2018	2017
Salaries and employee benefits	\$72,537	\$63,003
Net occupancy expense	7,234	6,111
Marketing	8,677	4,950
Legal and professional	7,530	7,453
Communications and technology	6,633	6,506
FDIC insurance assessment	6,103	5,994
Servicing related expenses	3,805	1,750
Allowance and other carrying costs for OREO	2,155	139
Other(1)	12,286	10,188
Total non-interest expense	\$126,960	\$106,094

Other expense includes such items as courier expenses, regulatory assessments other than FDIC insurance, due (1) from bank charges and other general operating expenses, none of which account for 1% or more of total interest income and non-interest income.

Non-interest expense for the first quarter of 2018 increased \$20.9 million, or 20%, to \$127.0 million from \$106.1 million in the first quarter of 2017. The increase is primarily due to increases in salaries and employee benefits, net occupancy, marketing and other non-interest expenses, all of which were due to general business growth and continued build-out. Servicing related expenses for the first quarter of 2018 increased \$2.1 million compared to the first quarter of 2017 related to an increase in MSR's, which are being amortized. Also contributing to the year-over-year increase in non-interest expense was a \$2.0 million increase in allowance and other carrying costs for OREO related to the OREO valuation allowance established during the first quarter of 2018.

Table of Contents

Analysis of Financial Condition

Loans Held for Investment

Loans were as follows as of the dates indicated (in thousands):

	March 31, 2018	December 31, 2017
Commercial	\$9,461,024	\$9,189,811
Mortgage finance	4,689,938	5,308,160
Construction	2,224,403	2,166,208
Real estate	3,834,758	3,794,577
Consumer	47,311	48,684
Leases	276,303	264,903
Gross loans held for investment	20,533,737	20,772,343
Deferred income (net of direct origination costs)	(102,027)	(97,931)
Allowance for loan losses	(190,898)	(184,655)
Total loans held for investment, net	\$20,240,812	\$20,489,757

Our business plan focuses primarily on lending to middle market businesses and successful professionals and entrepreneurs, and as such, commercial, real estate and construction loans have comprised a majority of our loan portfolio. Consumer loans generally have represented 1% or less of the portfolio. Mortgage finance loans relate to our mortgage warehouse lending operations in which we purchase mortgage loan ownership interests that are typically sold within 10 to 20 days. Volumes fluctuate based on the level of market demand for the product and the number of days between purchase and sale of the loans, as well as overall market interest rates and tend to peak at the end of each month.

We originate a substantial majority of all loans held for investment, excluding mortgage finance loans. We also participate in syndicated loan relationships, both as a participant and as an agent. As of March 31, 2018, we had \$2.6 billion in syndicated loans, \$825.5 million of which we administer as agent. All syndicated loans, whether we act as agent or participant, are underwritten to the same standards as all other loans we originate. As of March 31, 2018, \$76.2 million of our syndicated loans were on non-accrual.

Portfolio Geographic Concentration

More than 50% of our loan exposure is outside of Texas and more than 50% of our deposits are sourced outside of Texas. However, as of March 31, 2018, a majority of our loans held for investment, excluding our mortgage finance loans and other national lines of business, were to businesses with headquarters and operations in Texas. This geographic concentration subjects the loan portfolio to the general economic conditions within this area. We also make loans to these customers that are secured by assets located outside of Texas. The risks created by this concentration have been considered by management in the determination of the appropriateness of the allowance for loan losses.

Summary of Loan Loss Experience

The provision for credit losses, which includes a provision for losses on unfunded commitments, is a charge to earnings to maintain the allowance for loan losses at a level consistent with management's assessment of the collectability of the loan portfolio in light of current economic conditions and market trends. We recorded a provision for credit losses of \$12.0 million during the first quarter of 2018 compared to \$9.0 million in the first quarter of 2017 and \$2.0 million in the fourth quarter of 2017. The increase in provision recorded during the first quarter of 2018 compared to the same period in 2017 was primarily related to loan growth and an increase in non-accrual loans.

The allowance for credit losses, including the allowance for losses on unfunded commitments reported on the consolidated balance sheet in other liabilities, totaled \$200.5 million at March 31, 2018, \$193.7 million at December 31, 2017 and \$182.9 million at March 31, 2017. The combined allowance as a percentage of loans held for investment excluding mortgage finance loans increased slightly to 1.27% at March 31, 2018 from 1.26% at December 31, 2017 and decreased from 1.37% at March 31, 2017 as a result of strong loan growth.

The allowance for credit losses results from consistent application of our loan loss reserve methodology. At March 31, 2018, we believe the allowance is appropriate and has been derived from consistent application of our methodology.

Edgar Filing: TEXAS CAPITAL BANCSHARES INC/TX - Form 10-Q

Should any of the factors considered by management in evaluating the appropriateness of the allowance for loan losses change, our estimate of inherent losses in the portfolio could also change, which would affect the level of future provisions for loan losses.

Activity in the allowance for loan losses is presented in the following table (in thousands, except percentage and multiple data):

	Three months ended March 31, 2018	Year ended December 31, 2017	Three months ended March 31, 2017	
Allowance for loan losses:				
Beginning balance	\$184,655	\$168,126	\$168,126

Total real estate	1,187	1,713	4,179
Consumer	72	—	200
Leases	—	—	83
Total non-accrual loans	123,542	101,444	146,549
Repossessed assets:			
OREO(2)	9,558	11,742	18,833
Other repossessed assets	—	—	—
Total loans held for investment non-performing assets	\$ 133,100	\$ 113,186	\$ 165,382
Restructured loans - accruing	\$ —	\$ —	\$ —
Loans held for investment past due 90 days and accruing(3)	\$ 13,563	\$ 8,429	\$ 8,799
Loans held for sale past due 90 days and accruing(4)	\$ 35,226	\$ 19,737	\$ —

(1) As of March 31, 2018, December 31, 2017 and March 31, 2017, non-accrual loans included \$7.6 million, \$18.8 million and \$18.5 million, respectively, in loans that met the criteria for restructured.

(2) We recorded a \$2.0 million valuation allowance against the OREO balance at March 31, 2018, compared to none at December 31, 2017 and March 31, 2017.

(3) At March 31, 2018, December 31, 2017 and March 31, 2017, loans past due 90 days and still accruing include premium finance loans of \$4.1 million, \$5.5 million and \$5.1 million, respectively.

(4) Includes loans guaranteed by U.S. government agencies that were repurchased out of Ginnie Mae securities. Loans are recorded as loans held for sale and carried at fair value on the balance sheet. Interest on these past due loans accrues at the debenture rate guaranteed by the U.S. government. Also includes loans that, pursuant to Ginnie Mae servicing guidelines, we have the unilateral right, but not the obligation, to repurchase if defined delinquent loan criteria are met and therefore must record as loans held for sale on our balance sheet regardless of whether the repurchase option has been exercised.

Total non-performing assets at March 31, 2018 decreased \$32.3 million from March 31, 2017 and increased \$19.9 million from December 31, 2017. The year-over-year decrease in non-performing assets is primarily related to improvements in our energy portfolio. Energy non-performing assets totaled \$50.4 million at March 31, 2018 compared to \$65.2 million at December 31, 2017 and \$92.3 million at March 31, 2017. The increase in non-performing assets from December 31, 2017 relates primarily to two commercial loan relationships, which resulted in an increase in the provision for loan losses during the first quarter of 2018.

Table of Contents

Potential problem loans consist of loans that are performing in accordance with contractual terms but for which we have concerns about the borrower's ability to comply with repayment terms because of the borrower's potential financial difficulties. We monitor these loans closely and review their performance on a regular basis. At March 31, 2018, we had \$19.2 million in loans of this type, compared to \$49.1 million at December 31, 2017, which were not included in either non-accrual or 90 days past due categories.

Loans Held for Sale

Through our MCA program, we commit to purchase residential mortgage loans from independent correspondent lenders and deliver those loans into the secondary market via whole loan sales to independent third parties or in securitization transactions to Ginnie Mae and GSEs such as Fannie Mae and Freddie Mac. For additional information on our loans held for sale portfolio, see Note 6 - Certain Transfers of Financial Assets in the accompanying notes to the consolidated financial statements included elsewhere in this report.

Table of Contents

Liquidity and Capital Resources

In general terms, liquidity is a measurement of our ability to meet our cash needs. Our objective in managing our liquidity is to maintain our ability to meet loan commitments, purchase investment securities or repay deposits and other liabilities in accordance with their terms, without an adverse impact on our current or future earnings. Our liquidity strategy is guided by policies, formulated and monitored by our senior management and our Balance Sheet Management Committee ("BSMC"), which take into account the demonstrated marketability of assets, the sources and stability of our funding and the level of unfunded commitments. We regularly evaluate all of our various funding sources with an emphasis on accessibility, stability, reliability and cost effectiveness. For the year ended December 31, 2017 and for the three months ended March 31, 2018 our principal source of funding has been our customer deposits, supplemented by our short-term and long-term borrowings, primarily from Federal funds purchased and Federal Home Loan Bank ("FHLB") borrowings, which are generally used to fund mortgage finance assets.

Liquidity assets were \$2.3 billion at March 31, 2018, and continue to be significant as a result of deposit growth and increases in borrowing capacity related to our mortgage finance loans. The following table summarizes the composition of liquidity assets (in thousands):

	March 31, 2018	December 31, 2017	March 31, 2017
Federal funds sold and securities purchased under resale agreements	\$25,000	\$30,000	\$25,000
Interest-bearing deposits in other banks	2,271,673	2,697,581	2,779,921
Total liquidity assets	\$2,296,673	\$2,727,581	\$2,804,921

Total liquidity assets as a percent of:

Total loans held for investment, excluding mortgage finance loans	14.6	% 17.8	% 21.1	%
Total loans held for investment	11.2	% 13.2	% 16.8	%
Total earning assets	9.7	% 11.2	% 13.9	%
Total deposits	12.2	% 14.3	% 16.9	%

Our liquidity needs to support growth in loans held for investment have been fulfilled primarily through growth in our core customer deposits. Our goal is to obtain as much of our funding for loans held for investment and other earning assets as possible from deposits of these core customers. These deposits are generated principally through development of long-term relationships with customers, with a significant focus on treasury management products. In addition to deposits from our core customers, we also have access to deposits through brokered customer relationships. For regulatory purposes, these relationship brokered deposits are categorized as brokered deposits; however, since these deposits arise from a customer relationship, which involves extensive treasury services, we consider these deposits to be core deposits for our reporting purposes.

Table of Contents

We also have access to incremental deposits through brokered retail certificates of deposit, or CDs. These traditional brokered deposits are generally of short maturities, 30 to 90 days, and are used to fund temporary differences in the growth in loans balances, including growth in loans held for sale or other specific categories of loans as compared to customer deposits. The following table summarizes our period-end and average year-to-date core customer deposits, relationship brokered deposits and traditional brokered deposits (in millions):

	March 31, 2018	December 31, 2017	March 31, 2017		
Deposits from core customers	\$16,881.9	\$17,100.8	\$15,251.7		
Deposits from core customers as a percent of total deposits	90.0	% 89.4	% 91.8	%	
Relationship brokered deposits	\$1,882.6	\$2,022.4	\$1,353.7		
Relationship brokered deposits as a percent of total deposits	10.0	% 10.6	% 8.2	%	
Traditional brokered deposits	\$—	\$—	\$—		
Traditional brokered deposits as a percent of total deposits	—	% —	% —	%	
Average deposits from core customers(1)	\$17,530.6	\$16,806.9	\$15,613.3		
Average deposits from core customers as a percent of total quarterly average deposits(1)	90.2	% 91.1	% 92.0	%	
Average relationship brokered deposits(1)	\$1,898.7	\$1,647.0	\$1,360.0		
Average relationship brokered deposits as a percent of total quarterly average deposits(1)	9.8	% 8.9	% 8.0	%	
Average traditional brokered deposits(1)	\$—	\$—	\$—		
Average traditional brokered deposits as a percent of total quarterly average deposits(1)	—	% —	% —	%	

(1) Annual averages presented for December 31, 2017.

We have access to sources of traditional brokered deposits that we estimate to be \$3.5 billion. Based on our internal guidelines, we have chosen to limit our use of these sources to a lesser amount. Customer deposits (total deposits, including relationship brokered deposits, minus brokered CDs) at March 31, 2018 decreased by \$358.7 million from December 31, 2017 and increased \$2.2 billion from March 31, 2017.

We have short-term borrowing sources available to supplement deposits and meet our funding needs. Such borrowings are generally used to fund our mortgage finance assets, due to their liquidity, short duration and interest spreads available. These borrowing sources include Federal funds purchased from our downstream correspondent bank relationships (which consist of banks that are smaller than our bank) and from our upstream correspondent bank relationships (which consist of banks that are larger than our bank), customer repurchase agreements, and advances from the FHLB and the Federal Reserve. The following table summarizes our short-term borrowings as of March 31, 2018 (in thousands):

Federal funds purchased	\$527,800
Repurchase agreements	7,740
FHLB borrowings	2,300,000
Line of credit	—
Total short-term borrowings	\$2,835,540
Maximum short-term borrowings outstanding at any month-end during 2018	\$3,000,013

The following table summarizes our other borrowing capacities in excess of balances outstanding at March 31, 2018 (in thousands):

FHLB borrowing capacity relating to loans	\$4,018,719
FHLB borrowing capacity relating to investment securities	1,852
Total FHLB borrowing capacity	\$4,020,571
Unused Federal funds lines available from commercial banks	\$680,000

Table of Contents

The following table summarizes our long-term borrowings as of March 31, 2018 (in thousands):

Subordinated notes	\$281,496
Trust preferred subordinated debentures	113,406
Total long-term borrowings	\$394,902

Our unsecured, revolving, non-amortizing line of credit has maximum availability of \$130.0 million, matured on December 19, 2017, and was renewed on December 19, 2017 with a maturity date of December 18, 2018. The loan proceeds may be used for general corporate purposes including funding regulatory capital infusions into the Bank. The loan agreement contains customary financial covenants and restrictions. As of March 31, 2018 and December 31, 2017, there were no borrowings outstanding.

Our equity capital, including \$150 million in preferred stock, averaged \$2.3 billion for the three months ended March 31, 2018, as compared to \$2.0 billion for the same period in 2017. We have not paid any cash dividends on our common stock since we commenced operations and have no plans to do so in the foreseeable future.

As of March 31, 2018, our capital ratios were above the levels required to be well capitalized. We believe that our earnings, periodic capital raising transactions and the addition of loan and deposit relationships will allow us to continue to grow organically.

Table of Contents

Commitments and Contractual Obligations

The following table presents significant fixed and determinable contractual payment obligations to third parties by payment date. Payments for borrowings do not include interest. Payments related to leases are based on actual payments specified in the underlying contracts. As of March 31, 2018, our significant fixed and determinable contractual obligations to third parties, excluding interest, were as follows (in thousands):

	Within One Year	After One but Within Three Years	After Three but Within Five Years	After Five Years	Total
Deposits without a stated maturity	\$18,276,012	\$ —	\$ —	\$—	\$18,276,012
Time deposits	466,042	21,659	370	450	488,521
Federal funds purchased and customer repurchase agreements	535,540	—	—	—	535,540
FHLB borrowings	2,300,000	—	—	—	2,300,000
Operating lease obligations(1)	16,849	31,725	25,598	15,554	89,726
Subordinated notes	—	—	—	281,496	281,496
Trust preferred subordinated debentures	—	—	—	113,406	113,406

Critical Accounting Policies

SEC guidance requires disclosure of “critical accounting policies.” The SEC defines “critical accounting policies” as those that are most important to the presentation of a company’s financial condition and results, and require management’s most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

We follow financial accounting and reporting policies that are in accordance with accounting principles generally accepted in the United States. The more significant of these policies are summarized in Note 1 - Operations and Summary of Significant Accounting Policies in the accompanying notes to the consolidated financial statements included in the 2017 Form 10-K. Not all significant accounting policies require management to make difficult, subjective or complex judgments. However, the policy noted below could be deemed to meet the SEC’s definition of a critical accounting policy.

Allowance for Loan Losses

Management considers the policies related to the allowance for loan losses as the most critical to the financial statement presentation. The total allowance for loan losses includes activity related to allowances calculated in accordance with Accounting Standards Codification (“ASC”) 310, Receivables, and ASC 450, Contingencies. The allowance for loan losses is established through a provision for credit losses charged to current earnings. The amount maintained in the allowance reflects management’s continuing evaluation of the loan losses inherent in the loan portfolio. The allowance for loan losses is comprised of specific reserves assigned to certain classified loans and general reserves. Factors contributing to the determination of specific reserves include the creditworthiness of the borrower, and more specifically, changes in the expected future receipt of principal and interest payments and/or in the value of pledged collateral. A reserve is recorded when the carrying amount of the loan exceeds the discounted estimated cash flows using the loan’s initial effective interest rate or the fair value of the collateral for certain collateral-dependent loans. For purposes of determining the general allowance, the portfolio is segregated by product types in order to recognize differing risk profiles among categories, and then further segregated by credit grades. See “Summary of Loan Loss Experience” above and Note 4 – Loans Held for Investment and Allowance for Loan Losses in the accompanying notes to the consolidated financial statements included elsewhere in this report for further discussion of the risk factors considered by management in establishing the allowance for loan losses.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is a broad term for the risk of economic loss due to adverse changes in the fair value of a financial instrument. These changes may be the result of various factors, including interest rates, foreign exchange rates, commodity prices, or equity prices. Additionally, the financial instruments subject to market risk can be classified either as held for trading purposes or held for other than trading.

We are subject to market risk primarily through the effect of changes in interest rates on our portfolio of assets held for purposes other than trading. Additionally, we have some market risk relative to commodity prices through our energy lending activities. Petroleum and natural gas commodity prices were suppressed throughout 2015 and 2016, but stabilized amidst continuing market uncertainty during 2017 and continuing into 2018. Declines in commodity prices negatively impacted our energy clients' ability to perform on their loan obligations, and further uncertainty and volatility could have a negative impact on our customers and our loan portfolio. Management does not currently expect the current decline in commodity prices to have a material adverse effect on our financial position. Foreign exchange rates, commodity prices and/or equity prices do not pose significant market risk to us.

The responsibility for managing market risk rests with the BSMC, which operates under policy guidelines established by our board of directors. The negative acceptable variation in net interest revenue due to a 200 basis point increase or decrease in interest rates is generally limited by these guidelines to plus or minus 10-15%. These guidelines also establish maximum levels for short-term borrowings, short-term assets and public and brokered deposits. They also establish minimum levels for unpledged assets, among other things. Oversight of our compliance with these guidelines is the ongoing responsibility of the BSMC, with exceptions reported to the Risk Management Committee, and to our board of directors if deemed necessary, on a quarterly basis. Additionally, the Credit Policy Committee ("CPC") specifically manages risk relative to commodity price market risks. The CPC establishes maximum portfolio concentration levels for energy loans as well as maximum advance rates for energy collateral.

Interest Rate Risk Management

Our interest rate sensitivity is illustrated in the following table. The table reflects rate-sensitive positions as of March 31, 2018, and is not necessarily indicative of positions on other dates. The balances of interest rate sensitive assets and liabilities are presented in the periods in which they next reprice to market rates or mature and are aggregated to show the interest rate sensitivity gap. The mismatch between repricings or maturities within a time period is commonly referred to as the "gap" for that period. A positive gap (asset sensitive), where interest-rate sensitive assets exceed interest rate sensitive liabilities, generally will result in the net interest margin increasing in a rising rate environment and decreasing in a falling rate environment. A negative gap (liability sensitive) will generally have the opposite results on the net interest margin. To reflect anticipated prepayments, certain asset and liability categories are shown in the table using estimated cash flows rather than contractual cash flows. The Company employs interest rate floors in certain variable rate loans to enhance the yield on those loans at times when market interest rates are extraordinarily low. The degree of asset sensitivity, spreads on loans and net interest margin may be reduced until rates increase by an amount sufficient to eliminate the effects of floors. The adverse effect of floors as market rates increase may also be offset by the positive gap, the extent to which rates on deposits and other funding sources lag increasing market rates and changes in composition of funding.

Demand deposits					\$7,413,340
Stockholders' equity					2,273,429
Total					\$9,686,769

(1) Investment securities based on fair market value.

(2) Loans are stated at gross.

The table above sets forth the balances as of March 31, 2018 for interest-bearing assets, interest-bearing liabilities and the total of non-interest-bearing deposits and stockholders' equity. While a gap interest table is useful in analyzing interest rate sensitivity, an interest rate sensitivity simulation provides a better illustration of the sensitivity of earnings to changes in interest rates. Earnings are also affected by changing interest rates on the value of funding derived from demand deposits and stockholders' equity. We perform a sensitivity analysis to identify interest rate risk exposure on net interest income. We quantify and measure interest rate risk exposure using a model to dynamically simulate the effect of changes in net interest income relative to changes in interest rates and loan and deposit account balances over the next twelve months based on three interest rate scenarios. These are a "most likely" rate scenario and two "shock test" scenarios.

The "most likely" rate scenario is based on the consensus forecast of future interest rates published by independent sources. These forecasts incorporate future spot rates and relevant spreads of instruments that are actively traded in the open market. The Federal Reserve's Federal funds target affects short-term borrowing rates; the prime lending rate and LIBOR are the basis for most of our variable-rate loan pricing. The 10-year mortgage rate is also monitored because of its effect on prepayment speeds for mortgage-backed securities. We believe these are our primary interest rate

exposures. We are not currently using derivatives to manage our interest rate exposure.

46

Table of Contents

The two “shock test” scenarios assume a sustained parallel 100 and 200 basis point increase in interest rates. As short-term rates have remained low through 2017 and the first three months of 2018, we do not believe that analysis of an assumed decrease in interest rates would provide meaningful results. We will continue to evaluate these scenarios as interest rates change, until short-term rates rise above 3.0%, at which point we will resume evaluations of shock scenarios in which interest rates decrease.

Our interest rate risk exposure model incorporates assumptions regarding the level of interest rate or balance changes on indeterminable maturity deposits (demand deposits, interest-bearing transaction accounts and savings accounts) for a given level of market rate changes. Given the current environment of increasing short-term rates, deposit pricing can vary by product and customer. These assumptions have been developed through a combination of historical analysis and future expected pricing behavior. Changes in prepayment behavior of mortgage-backed securities, residential and commercial mortgage loans in each rate environment are captured using industry estimates of prepayment speeds for various coupon segments of the portfolio. The impact of planned growth and new business activities is factored into the simulation model. This modeling indicated interest rate sensitivity as follows (in thousands):

	Anticipated Impact Over the Next Twelve Months as Compared to Most Likely Scenario		Anticipated Impact Over the Next Twelve Months as Compared to Most Likely Scenario	
	100 bp Increase March 31, 2018	200 bp Increase	100 bp Increase March 31, 2017	200 bp Increase
Change in net interest income	\$ 111,887	\$ 224,491	\$ 110,730	\$ 224,489

The simulations used to manage market risk are based on numerous assumptions regarding the effect of changes in interest rates on the timing and extent of repricing characteristics, future cash flows and customer behavior. These assumptions are inherently uncertain and, as a result, the model cannot precisely estimate net interest income or precisely predict the impact of higher or lower interest rates on net interest income. Actual results may differ from simulated results due to timing, magnitude and frequency of interest rate changes as well as changes in market conditions and management strategies, among other factors.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the supervision and participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this report. Based upon that evaluation, we have concluded that, as of the end of such period, our disclosure controls and procedures were effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by us in the reports that we file or submit under the Exchange Act and were effective in ensuring that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to the Company's management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II—OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are subject to various claims and legal actions related to operating activities that arise in the ordinary course of business. Management does not currently expect the ultimate disposition of these matters to have a material adverse impact on our financial statements.

ITEM 1A. RISK FACTORS

There have been no material changes in the risk factors previously disclosed in the 2017 Form 10-K.

ITEM 6. EXHIBITS

(a) Exhibits

- 10.1 Texas Capital Bancshares, Inc. Amended and Restated 2015 Long-Term Incentive Plan, filed herewith.*
 - 10.2 Form of 2018 Performance Award Agreement for Executive Officers pursuant to the Texas Capital Bancshares, Inc. 2015 Long-Term Incentive Plan, filed herewith.*
 - 10.3 Form of 2018 Restricted Stock Unit Award Agreement for Non-Employee Directors pursuant to the Texas Capital Bancshares, Inc. Amended and Restated 2015 Long-Term Incentive Plan, filed herewith.*
 - 31.1 Certification of Chief Executive Officer pursuant to Rule 13a-14(a) of the Exchange Act, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002, filed herewith.
 - 31.2 Certification of Chief Financial Officer pursuant to Rule 13a-14(a) of the Exchange Act, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002, filed herewith.
 - 32.1 Certification of Chief Executive Officer pursuant to Rule 13a-14(b) of the Exchange Act and 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, furnished herewith.
 - 32.2 Certification of Chief Financial Officer pursuant to Rule 13a-14(b) of the Exchange Act and 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, furnished herewith.
- 101 The following materials from Texas Capital Bancshares, Inc.'s Quarterly Report on Form 10-Q for the quarter ended March 31, 2018, formatted in XBRL (eXtensible Business Reporting Language): (i) Consolidated Statements of Income, (ii) Consolidated Balance Sheets, (iii) Consolidated Statements of Cash Flows, and (iv) Notes to Consolidated Financial Statements

* Denotes management contract or compensatory plan.
