Form 10QSB
August 14, 2007

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION**

Washington, D.C. 20549

FORM 10-QSB

(Mark One)

QUARTERLY REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended: **June 30, 2007**

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE EXCHANGE ACT

For the transition period from ____ to _____

GOLD RESOURCE CORPORATION

(Exact Name of Small Business Issuer as Specified in its Charter)

Colorado
(State or other jurisdiction
of incorporation or organization)

333-129321
(Commission
File No.)

84-1473173
I.R.S. Employer
Identification Number

222 Milwaukee Street, Suite 301, Denver, Colorado 80206

(Address of Principal Executive Offices) (Zip Code)

Registrant's telephone number including area code: **(303) 320-7708**

Former name, former address, and former fiscal year, if changed since last report

Check whether the Issuer (1) filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the last 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

State the number of shares outstanding of each of the issuer's classes of common equity, as of the latest practicable date: 28,249,552 shares of common stock outstanding as of August 8, 2007.

Transitional Small Business Disclosure Format: Yes No

GOLD RESOURCE CORPORATION AND SUBSIDIARIES
(AN EXPLORATION STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2007
(Unaudited)

1. Summary of Significant Accounting Policies

Basis of Presentation. The interim consolidated financial statements included herein have been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) as promulgated in Item 310 of Regulation S-B. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP) have been condensed or omitted pursuant to such SEC rules and regulations. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of financial position as of June 30, 2007, results of operations for the three months and six months ended June 30, 2007 and 2006, and cash flows for the six months ended June 30, 2007 and 2006, as applicable, have been made. The results for these interim periods are not necessarily indicative of the results for the entire year. The accompanying financial statements should be read in conjunction with the financial statements and the notes thereto included in the Company s Form 10-KSB for the year ended December 31, 2006.

Gold Resource Corporation (the Company) was organized under the laws of the State of Colorado on August 24, 1998. The Company has been engaged in the exploration for precious and base metals, primarily in Mexico, as an exploration stage company. The Company has not generated any revenues from operations. The consolidated financial statements included herein are expressed in United States dollars, the Company s reporting currency.

Basis of Consolidation. The consolidated financial statements include the accounts of the Company and its wholly owned Mexican corporate subsidiaries, Don David Gold S.A. de C.V. and Golden Trump S.A. de C.V. The expenditures of Don David Gold and Golden Trump are generally incurred in Mexican pesos. Significant inter-company accounts and transactions have been eliminated.

Estimates. The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Management routinely makes judgments and estimates about the effects of matters that are inherently uncertain. Estimates that are critical to the accompanying consolidated financial statements include the identification and valuation of proved and probable reserves, treatment of exploration and development costs as either an asset or an expense, valuation of deferred tax assets, and the likelihood of loss contingencies. Management bases its estimates and judgments on historical experience and on various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from these estimates. Estimates and assumptions are revised periodically and the effects of revisions are reflected in the financial statements in the period it is determined to be necessary.

Per Share Amounts. SFAS 128, Earnings Per Share, provides for the calculation of Basic and Diluted earnings per share. Basic earnings per share includes no dilution and is computed by dividing income available to common shareholders by the weighted-average number of shares outstanding during the period. Diluted earnings per share reflect the potential dilution of securities that could share in the earnings of the Company, similar to fully diluted earnings per share. Potentially dilutive securities, such as common stock options, are excluded from the calculation when their effect would be anti-dilutive. For the period ended June 30, 2007, outstanding options to purchase 2,600,000 shares of common stock would have an anti-dilutive effect and were therefore excluded from the calculation.

Foreign Operations. The Company's present exploration activities are in Mexico. As with all types of international business operations, currency fluctuations, exchange controls, restrictions on foreign investment, changes to tax regimes, political action and political instability could impair the value of the Company's investments.

Foreign Currency Translation. The local currency, the Mexican peso, is the functional currency for the Company's subsidiaries. Current assets and liabilities are translated using the exchange rate in effect at the balance sheet date. Other assets and liabilities are translated using historical rates. Revenues and expenses are translated at the average exchange rate for the period. Translation adjustments are reported as a separate component of shareholders' equity.

2. Mineral Properties

El Aguila. Effective October 14, 2002, the Company, through its subsidiary, Don David Gold S.A. de C.V., leased a prospective gold/silver property located in the State of Oaxaca, Mexico, designated the El Aguila property, from Jose Perez Reynoso, a consultant to the Company. The El Aguila property is an exploration stage property and incorporates approximately 4,685 acres. The lease agreement for El Aguila is subject to a 4% net smelter return royalty to the lessor where production is sold in the form of gold/silver dore and 5% for production sold in concentrate form. Prior to 2007, the Company made periodic payments required under the lease totaling \$260,000 and no further advance royalty payments are due.

El Rey and Solaga. We have acquired claims in another area of the *Sierra Madre del Sur* region of Mexico by filing concessions under the Mexican mining laws, referred to by us as the El Rey property. Additionally, in February 2007, we leased a 100% interest in a property known as the Solaga property. We have conducted minimal exploration on these properties to date.

The El Rey project is an exploration stage property located approximately 64.4 kilometers (40 miles) from the El Aguila property. There is no plant or equipment on the El Rey property. If exploration is successful, any mining would probably require an underground mine but any mineralized material could be processed at the El Aguila project mill if one was to be built in the future.

The Solaga property consists of a 400 hectare property, located approximately 120 kilometers (75 miles) from the El Aguila project. A dormant silver mine is located on the Solaga property which was in production as recently as the 1980's, however, the Company is unable to estimate if or when it will reopen the mine. The lease required an initial payment of \$10,000 and requires the Company to spend \$25,000 on the property during the first twelve months of the lease. The lease is subject to a 4% net smelter return royalty on any production.

Edgar Filing: GOLD RESOURCE CORP - Form 10QSB

Through June 30, 2007, the Company has spent or incurred approximately \$3,813,000 in acquisition, exploration and related costs for El Aguila, El Rey, and Solaga, of which approximately \$1,835,000 was spent in 2007.

3. Property and Equipment

At June 30, 2007, property and equipment consisted of the following:

Trucks and autos	\$	104,320
Office furniture and equipment		80,102
Exploration equipment		139,606
		<hr/>
Subtotal		324,028
less: accumulated depreciation		(44,218)
		<hr/>
Total	\$	<u>279,810</u>

4. Shareholders Equity

Effective February 21, 2005, the Company declared and effected a 100% forward stock split where one share of common stock, par value \$.001, was issued for each share outstanding as of that date. These financial statements reflect the effect of this 100% stock split.

The Company entered into an investor relations contract for domestic investors that required the issuance of 30,000 shares of restricted common stock during the first quarter of 2007 and an additional 30,000 shares issued in the second quarter. These shares were valued at fair market value of \$72,840 and \$101,670, respectively. The Company entered into an investor relations contract for international investors that required the issuance of 50,000 shares of restricted common stock during the second quarter of 2007. These shares were valued at fair market value of \$148,500.

Edgar Filing: GOLD RESOURCE CORP - Form 10QSB

Stock Options. The Company has a non-qualified stock option and stock grant plan under which stock options and stock grants may be granted to key employees, directors and others (the Plan). Options to purchase shares under the Plan must be granted at fair value as of the date of the grant. A total of 6,000,000 shares of common stock have been reserved under the Plan.

Effective January 1, 2006, the Company implemented the rules of SFAS 123(R), Accounting for Stock-Based Compensation, which requires the Company to expense as compensation the value of grants and options under the Plan as determined in accordance with the fair value based method prescribed in SFAS 123(R). The Company estimates the fair value of each stock option at the grant date by using the Black-Scholes option-pricing model.

During the six months ended June 30, 2007, no stock options were granted, exercised or terminated.

The following table summarizes information about outstanding stock options at June 30, 2007:

	Number of shares	Weighted average exercise price
Outstanding, January 1, 2007	2,600,000	\$ 0.60
Granted		\$
Exercised		\$
Outstanding, June 30, 2007	2,600,000	\$ 0.60

5. Related Party Transactions

In February 2007, the Company entered into a lease agreement for the Solaga property. Jose Perez Reynoso, a consultant and shareholder of the Company, is a part owner of the Solaga property.

Item 2. Management's Discussion and Analysis or Plan of Operation

Overview

The following discussion updates our plan of operation for the next twelve months. It also analyzes our financial condition at June 30, 2007 and compares it to our financial condition at December 31, 2006. Finally, the discussion summarizes the results of our operations for the three months and six months ended June 30, 2007 and compares those results to the corresponding periods ended June 30, 2006. This discussion and analysis should be read in conjunction with our audited financial statements for the two years ended December 31, 2006, including footnotes, and the discussion and analysis included in our Form 10-KSB for the year ended December 31, 2006.

On February 21, 2005, we effected a two-for-one split of our outstanding common stock. All of the financial information included in this discussion and in the financial statements appearing in this report has been adjusted to reflect the results of that stock split.

In August 2006, we completed our IPO, from which we received net proceeds of \$4,351,200. We used most of the proceeds from that offering for exploration purposes. In October 2006, we contracted with Servicios de Perforacion Insemin S.A. de C.V., a Mexican subsidiary of R&R Incorporated and commenced the third stage of our exploration program at the El Aguila project. Pursuant to that drilling program, we have now completed in excess of the original 10,000 meters (32,808 feet) of core drilling for which we contracted. We are testing geological targets including areas which we believe have yielded favorable results during a recent geochemical survey. This drilling program is expected to continue on a month by month basis for the foreseeable future.

On December 7, 2006, we completed a private placement of 4,322,000 shares of our common stock for \$1.20 per share, from which we received net cash proceeds of \$4,928,700 (Private Placement). We expect to use the proceeds for continued exploration activities, operating expenses and initial engineering and procurement for the El Aguila mining project.

Plan of Operation

Our plan of operation is to continue exploration of the El Aguila property and place the property into production. We also intend to undertake exploration of the El Rey property, a property that is in an earlier stage of exploration. Our ultimate objective is to become a producer of gold, silver and possibly some associated base metals. We are unable at this time to predict when, if ever, that objective will be achieved.

Exploration. Exploration carried out by us to date at the El Aguila project has included 203 drill holes totaling approximately 19,233 meters (63,469 feet). Our results so far have revealed areas with enough high-grade mineralization that we made a decision to put the El Aguila property into production and are targeting mid-2008 to begin commercial production, subject to additional funding, permits and equipment delivery schedules. We intend to continue exploration of the property while we prepare for production.

Anticipated Production. While we intend to continue exploration at the El Aguila project for the foreseeable future, we are moving forward with our plans to further develop the property for production. We anticipate raising additional capital in the near future in an effort to begin funding the production phase of our plan. Based on our current exploration results, we anticipate that we will place the property into production in mid-2008, subject to the need to obtain a sufficient amount of additional working capital and the acquisition of the required regulatory permits, although there is no assurance that we will be successful.

Edgar Filing: GOLD RESOURCE CORP - Form 10QSB

We have engaged Lyntek, Inc. of Denver, Colorado, on a month to month basis, to design and build the mill at the El Aguila Project. This design work is underway and we have already purchased some equipment such as the ball mill.

In carrying out our decision to commence mining, we will likely incur significant capital costs in constructing a mill and acquiring necessary equipment. At present, our cash position is not sufficient to completely fund these capital requirements and we anticipate obtaining such funding through additional equity financing which we anticipate undertaking sometime before the end of the year. Only after a mine and a mill are constructed and operational could we expect any revenue.

Additional Capital Investment. In addition to expenses of exploration and construction of a mill, we also anticipate making infrastructure improvements at the El Aguila project. Foremost among these expenses would be the construction of an improved road to the proposed mill site and camp improvements, which will be necessary to enter the production phase. We have obtained written approval from the local Ejido (agrarian community) for both these items. We estimate costs of approximately \$1,000,000 to complete these improvements and anticipate starting these capital improvements in the third quarter of 2007.

Corporate Overhead. Included in our plan of operation are the expenses of overseeing our business and paying other general and administrative expenses. These expenses primarily include salaries and consulting fees, rent, travel and professional fees. We currently estimate these expenses at \$90,000 per month based on existing commitments and expectations. We expect these expenses will be paid from our cash position and future equity offerings, if necessary, until such time, if ever, we are successful in placing one or more of our properties into production.

Liquidity and Capital Resources

As of June 30, 2007, we had working capital of \$4,663,920, comprised of current assets of \$4,696,543 and current liabilities of \$32,623. This represents a decrease of \$2,751,287 from the working capital balance of \$7,415,207 at fiscal year end December 31, 2006. We believe we have sufficient liquidity and capital for the balance of the current fiscal year, subject to the need for more funding to construct a mill, discussed above. During the six months ended June 30, 2007, we utilized our working capital resources to fund our exploration program and other operating expenses.

Due to our lack of proved or probable reserves at this time, all of our investment in mining properties has been expensed, and does not appear as an asset on our balance sheet. During the first six months of 2007, we spent \$1,834,970 on acquisition, exploration and evaluation expenses. This compares to \$211,088 for the comparable period in 2006. From inception to June 30, 2007, we have spent \$4,605,642 on the acquisition and exploration of our various properties, including \$3,813,000 which was spent on the El Aguila, El Rey and Solaga projects.

All of our capital resources to date have been provided exclusively through the sale of equity securities. From inception through June 30, 2007, we received \$14,413,151 in cash, services and other consideration through issuance of our common stock. Since we have not generated any cash from operations, we have relied on sale of equity to fund all of our capital needs.

Net cash used in operating activities was \$2,995,259 during the first six months of 2007, compared to \$499,720 during the first six months of 2006. As more fully explained in preceding paragraphs, we have accelerated exploration of the El Aguila property with the proceeds of our two recent financings. In addition, cash spent on general and administrative expenses increased during the first six months of 2007 compared to 2006, primarily in support of increasing exploration and investor relations activities.

Results of Operations Three Months Ended June 30, 2007 Compared to the Three Months Ended June 30, 2006

We are considered an exploration stage company for accounting purposes, since we have not received any revenues from operations. We are unable to predict with any degree of accuracy when this classification will change. Since we have not identified any proved or probable mineral reserves on our property, all of our exploration costs are currently expensed, contributing to the increased loss in 2007 compared to 2006. We expect to incur losses until such time, if ever, as we begin generating revenue from operations.

For the three months ended June 30, 2007, we recorded a net loss of \$(1,713,316), or \$ (0.06) per share, compared to a loss for the corresponding period of 2006 of \$(593,189) or \$(.03) per share. In neither period did we report any revenue except interest income.

General and administrative expense increased to \$394,703 for the three months ended June 30, 2007 compared to \$245,787 during the same period of 2006. The increase of \$148,916 primarily reflects approximately \$12,000 of salaries, \$14,000 in increased legal and accounting fees associated with our reporting obligations under the Securities Exchange Act of 1934, investor relations expenses of \$112,000, and \$9,000 related to increased travel. We recorded \$250,170 of stock compensation expense for the first three months of 2007 compared to \$241,350 during the comparable period in 2006.

Mineral property costs, including acquisition and exploration costs, increased \$1,008,267 from \$102,597 in 2006 to \$1,110,864 in 2007. The increase reflects our increasing exploration activities at our various projects located in and around El Aguila.

Interest income increased to \$53,748 in 2007 compared to \$595 in 2006, an increase of \$53,153. Proceeds from our 2006 financing activities have been deposited in short term interest bearing accounts pending their utilization in our exploration and operating activities.

Results of Operations Six Months Ended June 30, 2007 Compared to the Six Months Ended June 30, 2006

For the six months ended June 30, 2007, we recorded a net loss of \$(2,869,696), or \$(0.10) per share, compared to a loss for the corresponding period of 2006 of \$(924,168) or \$(.05) per share. In neither period did we report any revenue except interest income.

General and administrative expense increased to \$811,596 for the six months ended June 30, 2007 compared to \$464,471 during the same period of 2006. The increase of \$347,125 primarily reflects approximately \$34,000 of salaries, \$27,000 in increased legal and accounting fees associated with the registration statement we filed to register the securities sold in the December 2006 private placement, investor relations expenses of \$184,000, and \$27,000 related to increased travel.

We also incurred stock compensation expenses of \$323,010 in the first six months of 2007 compared to \$241,350 in 2006. During 2007, we issued 110,000 restricted shares of common stock as partial compensation for investor relations services. The cost of shares issued is determined using quoted market values during the period of the stock grant.

Edgar Filing: GOLD RESOURCE CORP - Form 10QSB

Mineral property costs for the six month period ended June 30, 2007, including acquisition and exploration costs, increased \$1,623,882 from \$211,088 in 2006 to \$1,834,970 in 2007. The increase reflects our increasing exploration activities at our various projects located in and around El Aguila.

Interest income increased to \$118,811 in 2007 compared to \$841 in 2006, an increase of \$117,970. Proceeds from our 2006 financing activities have been deposited in short term interest bearing accounts pending their utilization in our exploration and operating activities.

Forward-Looking Statements

This Form 10-QSB contains or incorporates by reference forward-looking statements, as that term is used in federal securities laws, about our financial condition, results of operations and business. These statements include, among others:

statements concerning the benefits that we expect will result from our business activities and results of exploration that we contemplate or have completed, such as increased revenues; and

statements of our expectations, beliefs, future plans and strategies, anticipated developments and other matters that are not historical facts.

These statements may be made expressly in this document or may be incorporated by reference to other documents that we will file with the SEC. You can find many of these statements by looking for words such as believes, expects, anticipates, estimates or similar expressions used in this report or incorporated by reference in this report.

These forward-looking statements are subject to numerous assumptions, risks and uncertainties that may cause our actual results to be materially different from any future results expressed or implied in those statements. Because the statements are subject to risks and uncertainties, actual results may differ materially from those expressed or implied. We caution you not to put undue reliance on these statements, which speak only as of the date of this report. Further, the information contained in this document or incorporated herein by reference is a statement of our present intention and is based on present facts and assumptions, and may change at any time and without notice, based on changes in such facts or assumptions.

Risk Factors Impacting Forward-Looking Statements

The important factors that could prevent us from achieving our stated goals and objectives include, but are not limited to, those set forth in our annual report on Form 10-KSB, other reports filed with the SEC and the following:

- The worldwide economic situation;
- Volatility in the price of precious metals;
- Any change in interest rates or inflation;
- The willingness and ability of third parties to honor their contractual commitments;
- Our ability to raise additional capital, as it may be affected by current conditions in the stock market and competition in the gold mining industry for risk capital;
- Our costs of production;

Edgar Filing: GOLD RESOURCE CORP - Form 10QSB

Environmental and other regulations, as the same presently exist and may hereafter be amended;
Our ability to identify, finance and integrate other acquisitions; and
Volatility of our stock price.

We undertake no responsibility or obligation to update publicly these forward-looking statements, but may do so in the future in written or oral statements. Investors should take note of any future statements made by or on our behalf.

Item 3. Controls and Procedures

(a) We maintain a system of controls and procedures designed to ensure that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported, within time periods specified in the SEC's rules and forms and to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, as amended, is accumulated and communicated to our management, including our Chief Executive Officer and Principal Financial Officer, as appropriate to allow timely decisions regarding required disclosure. As of June 30, 2007, under the supervision and with the participation of our Chief Executive Officer and Principal Financial Officer, management has evaluated the effectiveness of the design and operation of our disclosure controls and procedures. Based on that evaluation, the Chief Executive Officer and Principal Financial Officer concluded that our disclosure controls and procedures were effective.

(b) Changes in Internal Controls. There were no changes in our internal control over financial reporting during the quarter ended June 30, 2007 that materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) On May 25, 2007, we issued a total of 80,000 shares of common stock to two consultants for investor relations services rendered to our company valued at \$250,170, or \$3.13 per share. We relied on the exemption provided by section 4(2) of the Securities Act for each of these transactions.

(b) Our registration statement on Form SB-2, file number 333-129321, was declared effective by the SEC on May 15, 2006. Pursuant to this registration statement, we registered 7,000,000 shares of our common stock for sale by us and 8,910,707 shares of common stock for sale by certain selling shareholders. Pursuant to the registration statement, we sold a total of 4,600,000 shares for proceeds of \$4,351,200, net of expenses. The remainder of the shares registered for our account were deregistered and are no longer available for sale in this offering.

During the period ended June 30, 2007, we spent \$1,283,427 of the proceeds on a combination of exploration activities, general and administrative expenses, and capital expenditures.

Item 6. Exhibits.

a. Exhibits

31.1 Certification pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 for William W. Reid.

31.2 Certification pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 for Frank L. Jennings.

32 Certification pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 for William W. Reid and Frank L. Jennings.

SIGNATURES

In accordance with Section 13 or 15(d) of the Exchange Act, the Registrant caused this Report to be signed on its behalf by the undersigned, thereunto duly authorized.
