May 02, 2006

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 6-K

REPORT OF FOREIGN ISSUER PURSUANT TO RULE 13A-16 OR 15D-16 OF THE SECURITIES EXCHANGE ACT OF 1934

For the Month of April 2006

Australia and New Zealand Banking Group Limited

ACN 005 357 522

(Translation of registrant's name into English)

Level 6, 100 Queen Street Melbourne Victoria 3000 Australia

(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F ☒

Form 40-F ☐

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g32 (b) under the Securities Exchange Act of 1934.

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Yes ☐

No ☒

If Yes is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b):

This Form 6-K may contain certain forward-looking statements, including statements regarding (i) economic and financial forecasts, (ii) anticipated implementation of certain control systems and programs, (iii) the expected outcomes of legal proceedings and (iv) strategic priorities. Such forward- looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors, many of which are beyond our control and which may cause actual results to differ materially from those expressed in the forward-looking statement contained in these forward- looking statements. For example, these forward-looking statements may be affected by movements in exchange rates and interest rates, general economic conditions, our ability to acquire or develop necessary technology, our ability to attract and retain qualified personnel, government regulation, the competitive environment and political and regulatory policies. There can be no assurance that actual outcomes will not differ materially from the forwardlooking statements contained in the Form 6-K.

Signatures

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Australia and New Zealand
Banking Group Limited

2006 Interim Results

Australia and New Zealand Banking Group Limited

27 April 2006

Peter Marriott

Chief Financial Officer

www.anz.com

[LOGO]

Welcome to IFRS!

1 October 2004

IFRS applies, except AASB 139/132/4. AASB 139 the most significant of new standards for a bank

1 October 2005

AASB 139, 132 & 4 come into play

	Mar 2005	Sep 2005	Mar 2006
Statutory IFRS Accounts 2005 not restated for AASB 139, 132, and 4	2005 [GRAPHIC]	2005 [GRAPHIC]	2006 [GRAPHIC]
Fully Comparable IFRS Accounts We have applied all standards to 2005 to generate meaningful cash earnings comparatives	2005 [GRAPHIC]	2005 [GRAPHIC]	2006 [GRAPHIC]

Lack of comparability HOH a real issue eg:

Change in margin	3 bp (statutory)	7 bp (fully comparable)
Other income growth	-14% (statutory)	2% (fully comparable)

[LOGO]

Very strong headline growth; 10.4% underlying growth

[CHART]

8

Good underlying business momentum

Strong income growth, continued investment
(Cash Earnings)

[CHART]

HOH Growth	4.2%	2.3%	2.1%	(31.1)%	12.4%	9.3%
Profit before Provisions			4.9%			

Solid volume growth offset by margin pressure, particularly in Corporate and Esanda

[CHART]

@Continuing Businesses

#NII includes tax equivalent gross-up

^excludes non core items & shareholder functions

+growth in net loans & advances, including acceptances, fx adjusted

Competitive impacts on overall margin moderating slightly*

Lower competitive intensity in NZ,
partly offset by increase in Australia

Includes 1.5bp impact from higher trading securities etc, which
drove higher non-interest income

[CHART]

Competition reflected mainly
in product migration
(competition impact on Group Margin
2H05 – 1H06)

[CHART]

Offset by 2bp benefit from basis risk

Total Mortgages margin has increased by 1bp

* Competition impact in 2H05 was 5.4bp including impacts of product migration

Non Interest Income highly seasonal, but good momentum

Item	pcp growth	hoh growth
Fee Income	8%	flat
FX Earnings	3%	2%
Profit on Trading Secs.	large	56%
Other	16%	7%
Total	11%	2%

Non Interest Income is subject to seasonality, largely on fee line

(other income growth hoh*)

[CHART]

**Operating segments core OOI growth, 1H06 & 2H05 AIFRS, 1H05 & 2H04 AGAAP*

Client flows driving increased Markets income, assisted by favourable conditions

Total Markets Revenue (\$m)

Looking at Trading Income in isolation is misleading, given interplay with NII and FX revenue

[CHART]

ANZ VaR remains significantly below peers
(Ave period VaR 99% confidence level)

[CHART]

^NAB & WBC ave. for Sep-05 half, CBA ave. for Dec-05 half

Re-opening the Jaws increasing the gap between revenue and cost growth

Revenue/Cost Jaws reopening

Revenue Growth v Cost Growth (hoh)*

1.1% -2.2% -1.3% +0.1% +2.2%

[CHART]

Cost to Income reduced^ Impacted by IFRS restatements

[CHART]

Continuing to invest in frontline capabilities

(1H06 FTE growth)

Integration savings key driver. 64 frontline FTE added in the half

[CHART]

*2H05 & 1H06 AIFRS, remainder AGAAP, Core revenue and expense growth, adjusted for NBNZ normalisation

^Adjusted for AIFRS 2005 adjustments and non core items

Portfolio credit quality remains strong

**Increase in Non Accrual loans
driven by two accounts**

[CHART]

**Delinquencies remain low
(60+ day delinquencies)**

[CHART]

**Individual Provisions
maintained at low levels
(Ind. Provisions / Net Lending Assets*)**

[CHART]

**annualised*

Collective Provision driven by a reduction in risk offset by lending growth

Collective Provision Charge (\$m)

[CHART]

Key Drivers	1H05	2H05	1H06
Portfolio growth & risk changes	8%+ portfolio growth and flat risk mix in continuing business	10%+ portfolio growth and flat risk mix in continuing business, except for Cards	11%+ portfolio growth and flat risk mix in continuing business, except for Cards & Esanda
Scenario impact	Introduction of Oil Provision due to increased volatility in oil price. Rundown of offshore risk provision	Increased Oil Provision due to spike in oil price. Rundown of offshore risk provision	Oil Provision reduction in line with modelled emergence pattern
Other	Reduction in risk as legacy assets, including offshore energy exposures matured or sold	Continuing risk reduction as legacy assets matured or sold	Final run-off of risk associated with legacy assets

+annualised

Capital management and other financial considerations

Capital Management

Capital management initiatives will generally be considered when ACE capital is above the target range

In the short-term, ACE capital generation needs to cover:

Balance Sheet impact of market share gains driving above peer RWA growth

Asian acquisitions

Deductions - eg capitalised software

Lower DRP flow back than peers

APRA's revised hybrid rules expected to allow access to cost effective non-innovative hybrid capital

Revenue Hedging

Current revenue hedging policy is to remain unhedged unless the currency is perceived to be significantly overvalued

Future foreign exchange hedging may be designated as a mixture of revenue (short term P&L) and capital hedges (Equity)

Group outlook

Item	Outlook	Drivers
Revenue	Slightly above mid point of 7% - 9% medium term target range	Continued strong volume growth in both Aust & NZ, driving interest and fee income Margin compression forecast to be slighter greater than long term trend
Expenses	Low end of 5%-7% 2006 guidance	Ongoing investment particularly in Personal and increased people costs in Inst/Corp Partly offset by continued efficiency gains across the Group
Provisions	Difficult to be prescriptive - no immediate concerns	Uncertain - dependant on actual losses, asset growth and change in risk profile, but more likely to increase
Taxation	Higher tax rate than FY05	Increased tax rate due to continued run-off of structured transactions. Likely to be higher in 2 nd half

Cash EPS (cents per share)	175.2								171.8

(1) This excludes the effect of applying bid or offer prices rather than mid prices and changes in the market value of counterparty risk included in the measurement of the fair value of derivatives

Major divisions driving improved revenue growth

Divisional Revenue[^] Growth Matrix

[CHART]

2005 growth represents AGAAP Mar 05 v Mar 04, 2006 growth represents AIFRS Mar 06 v Mar 05

Good momentum in major divisions

Personal driven by strong FUM growth and stable margins

Good growth in Markets, Trade, C&SF driving **Institutional**

Solid volume growth & more favourable margin environment benefiting **New Zealand**

Good performance from Pacific and growth in Asian Cards earnings driving **Asia Pacific**

Solid volume growth offset by increased margin contraction impacting **Corporate**

Esanda impacted by reduced margins, continued restructuring of UDC and impact of oil price on residual values

[^]*Continuing business, excludes significant items*

**New Zealand Businesses in NZ\$, normalised for NBNZ*

Australian Geographic margin down 2bps

Competition key driver of margin decline

Includes benefit of TTS provision release, FX revenue hedge and reduced broker impact

[CHART]

Competition impacts across the portfolio

(competition impact on Aust margin hoh)

Impact	1H06 (bps)	2H05 (bps)
Mortgages	(0.9)	(1.3)
Inst. & Corp	(1.1)	(1.3)
Esanda	(0.6)	(0.5)
Card Product Mix	(0.7)	(0.3)
Deposit Product Mix	(0.3)	(0.4)
Other	(0.5)	(0.2)
Total	(4.1)	(4.0)

Reduced competition offset by increased funding impact in NZ Geographic margin

Shift in funding mix offset by capital investment earnings

Transfer of capital from UK to NZ

[CHART]

Fixed rate mortgage competition abated in 1H06

(competition impact on NZ margin hoh)

Impact	1H06 (bps)	2H05 (bps)
Mortgage Product Mix	(1.9)	(3.3)
Fixed Rate Competition	(0.1)	(2.5)
Inst. & Corp	(0.2)	(1.2)
UDC	(1.1)	(0.4)
Deposit Product Mix	(3.1)	(2.5)
Other (incl. Liab s)	1.3	(0.4)
Total	(5.1)	(10.3)

ACE capital position relatively stable over the half

ACE Capital conservatively managed during 1H06 awaiting final APRA rules

[CHART]

ANZ continues to generate sufficient organic capital to fund business growth and capital initiatives

Commitment for Tianjin partnership included in 1H06 ACE calculation

APRA recently announced deferral of net AIFRS deductions (deferred pensions liabilities, capitalised software, derivative hedge accounting) to Jan 2008 coinciding with expected BASEL II implementation

#Includes non-core earnings of 4bps

NZ revenue hedges partially unwound as NZ\$ weakens

A\$/NZ\$ weakened to long term average rate

[CHART]

NZ\$ Revenue Hedging

	Mar-06	Sep-05
Notional Principal (NZ\$b pre-tax)	2.91	4.35
Deferred Market Value (A\$m post-tax)	143#	29
Expected 2H06 Benefit	26	
Post 2006	117	
Ave. exchange rate of open position (spot)	~ 1.095	~ 1.088

Current revenue hedging policy is to remain unhedged unless the currency is perceived to be significantly overvalued.

Post Sept 06, AIFRS requires revenue hedges to be MTM through P&L. ANZ will continue with its current hedging policy, however future hedging may be designated as a mixture of revenue (short term P&L) and capital hedges (Equity).

At Sept 06, realised & unrealised profits taken to retained earnings

During the half, NZ\$0.7b of hedges matured against 1H06 earnings (cost \$2m), and additional NZ\$0.7b of hedges unwound as NZ\$ weakened approaching longer term average (benefit locked in \$26m).

95% of 2H06 NZ earnings hedged at ~1.106.

#based on closing rate of 1.17

\$350m on market share buyback completed in March 06

Summary

Total shares repurchased	15.7m
% of shares on issue	0.9%
Capital consumption	A\$350m

ILLUSTRATIVE

Revenue Growth

[CHART]

PBP Growth

[CHART]

Each 10% change in provisioning charge yoy equals 1.3% change in growth rate

Assumes slightly higher tax rate in second half.

Credit Quality

31

Net Individual Provision charge down 8.5%

Credit quality in New Zealand and Offshore continues to improve, with lower Net Individual Provisions.

Net Individual Provisions are up in Australia, due to the downgrade and provisioning of two Institutional accounts.

Net Individual Provisions by Geography

[CHART]

Net Individual Provisions By Size 1H06

[CHART]

Group risk grade profile largely unchanged

Group Outstandings

[CHART]

*Excludes Kingfisher securitisation amount of \$1.5bn

Institutional risk grade profile continues to improve

Institutional Outstandings

[CHART]

34

Credit quality robust in Mortgages Australia

Dynamic LVR profile reflects strong migration into lower LVR buckets compared to time of origination

Strong LVR profile

[CHART]

Owner Occupied dominates the portfolio, while the uptake of Equity products has stabilised

Broker and Network 60+ day arrears are marginally higher at Mar-06 than at Sep-05 due to seasonality, but in line with Mar-05

Network vs Brokers 60+ day Delinquencies

[CHART]

Portfolio by product Mortgages Australia (incl Origin)

[CHART]

Credit Cards: Risk Mix shift towards Proprietary Cards

The Consumer Cards portfolio has traditionally been weighted towards Loyalty however this balance is progressively changing due to strong Proprietary growth through competitive products and focused marketing campaigns, including the very successful Zero % balance transfer

Consumer Cards Outstandings (A\$b)

[CHART]

Proprietary products are higher risk than Loyalty products and while their arrears rate is higher, there is no deteriorating trend present in either product

**Credit Cards Australia 60+Days
arrears impacted by seasonality**

[CHART]

**Personal Loans Australia arrears
improving following seasonal up-tick**

[CHART]

NZ consumer credit quality putting it in perspective

<p>NZ Home Loan arrears in line with same period last year</p> <p>[CHART]</p> <p>Income growth likely to absorb higher repayment costs from refinancing at higher interest rates, even for those coming off best in market offers</p> <p>[CHART]</p>	<p>NZ Credit Card arrears well down on same period last year</p> <p>[CHART]</p> <p>Estimated Effective Rate on fixed borrowings across all tenors</p> <p>[CHART]</p>

Interim Corporate Responsibility Report released today

Strong progress on our Corporate Responsibility agenda

Putting our customers first

ANZ has the most satisfied retail customers of the four major banks and St George according to Roy Morgan research. Customer satisfaction continues to improve - from 76.6% in September 2005 to 78.2% in February 2006.

We have been managing and measuring our performance on each of the promises in our Customer Charter for five years now. The Charter was updated in November 2005 to include new responsible lending commitments and, since then, we have met or exceeded all but one of the revised performance indicators. Our monthly tracking reported three customer complaints about privacy, which have since been investigated and addressed.

We have opened 11 new branches and installed 160 new ATMs across Australia in the past six months. Our new branches are located in Thirroul and Scone, NSW; Clarkson, Livingston, Melville and Falcon Dawesville, WA; Diamond Creek and Wyndham Village, Victoria; Chancellor Park and Miami in Qld and Gungahlin, ACT.

Leading and inspiring our people

Employee engagement remains steady at 60%. Our engagement score remains the highest of all major corporations in Australia and ahead of the banking and financial services sector benchmark. Within these results, engagement in our Personal Division increased from 64 to 66%.

Our Breakout program has been in place for six years now as part of our long-term commitment to creating a values-driven culture. This year, a major focus for the program is involving our people who serve our customers. Almost 3,000 employees from our Personal Division have completed the Breakout to the Frontline program since its commencement, including 2,025 participants in the past six months. A further 150 additional workshops are scheduled throughout the remainder of the year

We achieved our goal to have 20% female representation in executive positions and completed our first organisation-wide Diversity survey.

Our Lost Time Injury Frequency Rate (LTIFR) has declined from 4.2 in October 2005 to 4 and employee turnover remains steady at 11.6%.

Earning community trust

We are expanding our Saver Plus financial literacy and matched savings program to include 18 sites nationally and 6,000 families over the next three years. The program will be implemented in partnership with The Smith Family, Brotherhood of St Laurence, Benevolent Society and Berry Street Victoria and six sites in Victoria, which will be delivered in partnership with the State Government.

More than 4,150 people have participated in our MoneyMinded financial education program through group workshops and one-to-one meetings with financial counsellors and community educators across Australia. We have also launched MoneyMinded on-line, a non-branded, interactive financial education website for our employees, customers and the community.

The MoneyBusiness financial literacy and inclusion program with Indigenous communities is in progress in six remote sites in the Northern Territory and Western Australia. This pilot program is being conducted in partnership with FaCSIA and community organisations such as Mission Australia (Katherine), Galiwinku Community Incorporated (Galiwinku), Geraldton Resource Centre (Geraldton), Kununurra Waringarri Aboriginal Corp (Kununnurra) and Centacare (Tennant Creek). Eighteen local staff have been appointed from within Indigenous communities to manage the program.

Integrating environmental and social considerations into our business practices

We have developed and implemented our Environmental Management System, which will be independently verified by September 2006. A range of initiatives has commenced to assist in reducing our overall footprint including specific work at key commercial sites and branches to improve energy and operational efficiencies.

Our Sustainable Procurement Policy, Sustainable Clauses and the Sustainability Self-Assessment Tool have been integrated into the templates for all new tenders and new and existing contracts with key strategic suppliers.

Following the pilot phase of ANZ's environmental and social issues screening process, full implementation has been agreed and initiated across our Institutional & Corporate lending activities. At 31 March 2006, 25% of Institutional divisions new transactions and annual reviews have been screened, along with a complete assessment of both Institutional and Corporate's lending portfolios.

ANZ interim profit \$1,811 million

All figures compared to March 2005 half year unless otherwise indicated

Profit after tax

Statutory profit \$1,811 million	up 16 %
Cash* profit \$1,731 million	up 10 %
Cash* profit before provisions	up 10 %

Earnings per share

EPS 98.4 cents	up 18 %
Cash* EPS 94.0 cents	up 10 %

Dividend

Interim dividend 56 cents	up 10 %
----------------------------------	----------------

Ratios

Return on equity 20.9% (18.3%)

Adjusted common equity ratio stable at 5.0%

Business comment

Strong performance in Personal Banking, record lead in customer satisfaction

Good momentum in New Zealand and Institutional

Continued frontline investment with 1,231 additional FTE

Provision for credit impairment at cyclical low

Growth and Transformation program on track

Revenue* growth 8% (target range 7% - 9%)

Cost-Income* ratio 45.8% (1.0% improvement)

* Adjusted for AIFRS 2005 adjustments and non-core items (including significant items, ANZ National Bank incremental integration costs and AIFRS mark to market of certain hedge gains/losses)

Australia and New Zealand Banking Group Limited (ANZ) today announced a record profit after tax of \$1,811 million for the half-year ended 31 March 2006, up 16%. The headline result included a number of one-off gains including the National Housing Bank (NHB) insurance settlement and, adjusting for these, cash* earnings per share were up 10%.

The Interim Dividend was increased by 10% to 56 cents.

ANZ Chief Executive Officer Mr John McFarlane said: This is a good result based on a strong underlying business performance.

Revenue growth at 8% is the highest it has been in recent years and solidly within our target range of 7-9%. The cost to income ratio is down 1%, with expenses contained within our target range. Credit quality remains at its best level in more than a decade and at a cyclical low. While we remain vigilant to potential risks, we are yet to see any material credit issues emerging.

In recent years we set out to make ANZ a very different bank. Against the trend we invested to create a real difference that others would find hard to replicate.

We began a journey to create a distinctive culture and we have achieved high levels of staff engagement. We added around 4,000 people to serve our customers while others were cutting staff. We opened and refurbished, and restaffed our branches while others were closing. We invested in Asia at a time the market considered it unfashionable.

This has been the right agenda but it has been tougher than we anticipated. Only now is the difference starting to be tangible, and beginning to change the face of banking in Australia and New Zealand.

This result is good progress but still leaves a great deal to be done. We need to work hard in the years ahead to build the momentum in our Personal, Institutional and New Zealand divisions, to improve our cost-income ratio and advance our strategic agenda. Continuing to make ANZ a very different bank remains the core of our agenda, Mr McFarlane said.

Divisional Performance

Personal continues to deliver very strong growth, with earnings up 16%. We continued our investment in future growth with the addition of 545 staff, 22 new branches, and 362 ATMs since the March 2005 half. All individual personal businesses recorded double-digit earnings growth, with Mortgages up 21% and Investment & Insurance Products up 18%. Personal also saw continued improvements in staff engagement and in customer satisfaction, where we now have a distinct lead over our peers.

Institutional grew 8% over the same period last year, adjusting for discontinued businesses exited to reduce risk. Institutional has invested in its businesses throughout the year, through the retention and recruitment of high quality staff, and has restructured its business model to recognise the changing requirements of our customer base. This has helped secure very high revenue growth of 12%. The performances of Trade and Transaction Services, Markets, Corporate and Structured Finance, and New Zealand were particularly strong.

* Adjusted for AIFRS 2005 adjustments and non-core items (including significant items, ANZ National Bank incremental integration costs and AIFRS mark to market of certain hedge gains/losses)

New Zealand Businesses (which excludes Institutional) were up 14% on the same period last year in NZ dollar terms. On a full geographic basis New Zealand was up 16%. This was assisted by lower credit provision charges and, adjusting for this, profit before provisions was up 3% and up 5% on the previous half. The business is showing promising momentum, with robust credit growth and improved credit quality. Interest margin decline moderated and we are starting to see cost synergies flow from integration.

Corporate was up 16%, with improved credit quality offsetting the impact of increased competitive intensity. Lending and deposit growth were both up 11%. Expenses grew 8% from a 5% growth in staff numbers and the impact of annual salary increases, as we continued to invest in expanding our customer proposition. We expect expense growth to moderate in the second half, and income growth to improve as we generate returns from our earlier investment.

Asia Pacific was up 18%. Very strong growth in the Pacific and the network business in Asia were partly offset by lower equity accounted earnings in Panin Bank. Costs associated with developing our partnership business contributed to overall costs increasing 23%. Our Asian cards business had a 47% growth in earnings over the previous half. We advanced our strategic agenda in Asia, with the planned acquisition of a 19.9% stake in Tianjin City Commercial Bank. Discussions on other expansion options continued.

Esanda is receiving increased management attention and was the only division to have a disappointing half. Earnings were down 20% on the same period last year due to lower margins, the impact of higher petrol prices, higher credit losses from declining security values, and mark-to-market write-downs of residual asset values. UDC continues to be weak, although new management is focused on turning this around. Performance in the second half is expected to improve.

Looking forward

Commenting on the outlook for ANZ, Mr McFarlane said: With a strong first half behind us and good momentum going into the second half, we are increasingly confident about the year as a whole. 2006 is expected to be a good year for ANZ.

We are now seeing returns from the investment we made in recent years and this is likely to result in revenue growth above the mid-point of our medium term 7-9% target range in 2006. Expense growth is under control and likely to be towards the bottom end of our 5-7% target range for the year. While the credit environment remains benign, we envisage a modest increase in credit costs in the second half from a very low base.

Over the past nine years, shareholders have seen good financial returns, and we are continuing to invest to underpin our future. Our agenda is to make ANZ a very different bank. This is now showing through in our relationships with our customers, our people, the community and our shareholders, Mr McFarlane said.

Total non-core items	80	(9)	2	large	large
Cash profit	1,731	1,583	1,568	9%	10%

(1) ANZ has reduced the September 2005 profit after tax by \$46 million (Mar 2005: \$15 million increase) to bring the result for that period to an AIFRS basis that is fully comparable with March 2006 figures (refer pages 13 to 15), allowing readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability

(2) In the March 2006 half ANZ has classified the \$113 million (\$79 million after tax) settlement of the National Housing Bank (NHB) insurance matter and the \$14 million after tax settlement of warranty claims on Lloyds TSB plc (tax on warranty settlement: \$nil) as significant items. In the September 2005 half ANZ classified \$14 million after tax profit on the sale of NBNZ life and funds management businesses as a significant item (tax on gain on sale of NBNZ life and funds management businesses: \$nil). ANZ excludes significant items to eliminate the distorting effect of one-off transactions on the results of its core business (refer page 13)

(3) In the March 2006 half ANZ has classified \$13 million after tax profit (Sep 2005: \$12 million; Mar 2005 \$19 million) on derivatives entered into to manage interest rate and foreign exchange risk on funding instruments, not designated as accounting hedges, ineffective portions of cash flow hedges, profit or loss on disposal of investment securities, and fair value movement in bonds and notes designated at fair value as a non-core item. ANZ excludes volatility associated with fair value movements on these transactions to provide a better indication of the core business performance (tax on hedge gains/losses \$5 million (Sep 2005: \$5 million; Mar 2005: \$8 million))

(4) In the March 2006 half ANZ has incurred \$26 million after tax ANZ National Bank incremental integration costs (Sep 2005 half: \$35 million; Mar 2005 half: \$17 million). Tax on ANZ National Bank incremental integration costs is \$13 million (Sep 2005: \$18 million; Mar 2005: \$8 million). ANZ National Bank incremental integration costs are excluded to better reflect the core cost base and assist analysis of the cost base following completion of the integration (refer page 13)

Analysis of Cash(1) profit by key line item:

Cash(1) (basic adjusted for non-core items)	94.0	86.1	85.7	9%	10%

(1) ANZ has reduced the September 2005 profit after tax by \$46 million (Mar 2005: \$15 million increase) to bring the result for that period to an AIFRS basis that is fully comparable with March 2006 figures (refer pages 13 to 15), allowing readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability

In the March 2006 half ANZ has classified the \$113 million (\$79 million after tax) settlement of the NHB insurance matter and the \$14 million after tax settlement of warranty claims on Lloyds TSB plc (tax on warranty settlement: \$nil) as significant items. In the September 2005 half ANZ classified \$14 million after tax profit on the sale of NBNZ life and funds management businesses as a significant item (tax on gain on sale of NBNZ life and funds management businesses: \$nil). ANZ excludes significant items to eliminate the distorting effect of one-off transactions on the results of its core business (refer page 13)

In the March 2006 half ANZ has classified \$13 million after tax profit (Sep 2005: \$12 million; Mar 2005 \$19 million) on derivatives entered into to manage interest rate and foreign exchange risk on funding instruments, not designated as accounting hedges, ineffective portions of cash flow hedges, profit or loss on disposal of investment securities, and fair value movement in bonds and notes designated at fair value as a non-core item. ANZ excludes volatility associated with fair value movements on these transactions to provide a better indication of the core business performance (tax on hedge gains/losses \$5 million (Sep 2005: \$5 million; Mar 2005: \$8 million))

In the March 2006 half ANZ has incurred \$26 million after tax ANZ National Bank incremental integration costs (Sep 2005 half: \$35 million; Mar 2005 half: \$17 million). Tax on ANZ National Bank incremental integration costs is \$13 million (Sep 2005: \$18 million; Mar 2005: \$8 million). ANZ National Bank incremental integration costs are excluded to better reflect the core cost base and assist analysis of the cost base following completion of the integration (refer page 13)

CHIEF FINANCIAL OFFICER'S REVIEW**March 2006 half year compared to September 2005 half year**

ANZ recorded a profit after tax of \$1,811 million for the half year ended 31 March 2006, an increase of 12% over the September 2005 half year. After adjusting for AIFRS 2005 adjustments(1) and non-core items(1) referred to on pages 13 to 15, cash(1) profit increased 9% to \$1,731 million. Earnings per share increased 14.0% to 98.4 cents over the September 2005 half. After adjusting AIFRS 2005 adjustments and non-core items(1) Cash EPS increased 9.2% to 94.0 cents.

Profit growth

Cash profit increased 9% to \$1,731 million. Core(1) revenue increased 4% with volume growth partly offset by reduced margins (-7 basis points). Operating expense growth was contained to 2%.

Cash profit in Australia increased 6% over the September 2005 half year with strong growth in Personal (12%) and Corporate (9%). Profit in Esanda reduced 9%.

Cash profit in New Zealand increased 31% (32% in NZD terms) with higher lending volumes, a strong performance in the Markets business in Institutional, lower provisions in Corporate Banking and increased earnings on additional equity capital. These increases were partly offset by reduced earnings in UDC and lower earnings in non-continuing businesses from certain structured finance transactions which have been exited. Profit in Asia Pacific increased 7%, driven by volume growth in Fiji, PNG and the Indonesian cards business being partly offset by lower earnings from PT Panin Bank.

Profit in the UK and US decreased driven by reduced profit in non-continuing businesses with the sale of the London headquartered project finance business in 2005 and repatriation of capital.

(1) ANZ has reduced the September 2005 profit after tax by \$46 million (Mar 2005: \$15 million increase) to bring the result for that period to an AIFRS basis that is fully comparable with March 2006 figures (refer page 13), allowing readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability

In the March 2006 half ANZ has classified the \$113 million (\$79 million after tax) settlement of the NHB insurance matter and the \$14 million after tax settlement of warranty claims on Lloyds TSB plc (tax on warranty settlement: \$nil) as significant items. In the September 2005 half ANZ classified \$14 million after tax profit on the sale of NBNZ life and funds management businesses as a significant item (tax on gain on sale of NBNZ life and funds management businesses: \$nil). ANZ excludes significant items to eliminate the distorting effect of one-off transactions on the results of its core business (refer page 13)

In the March 2006 half ANZ has classified \$13 million after tax profit (Sep 2005: \$12 million; Mar 2005 \$19 million) on economic hedges as a non-core item. ANZ excludes volatility associated with fair value movements on these transactions to provide a better indication of the core business performance (tax on hedge gains/losses \$5 million (Sep 2005: \$5 million; Mar 2005: \$8 million))

In the March 2006 half ANZ has incurred \$26 million after tax ANZ National Bank incremental integration costs (Sep 2005 half: \$35 million; Mar 2005 half: \$17 million). Tax on ANZ National Bank incremental integration costs is \$13 million (Sep 2005: \$18 million; Mar 2005: \$8 million). ANZ National Bank incremental integration costs are excluded to better reflect the core cost base and assist analysis of the cost base following completion of the integration (refer page 13)

Profit drivers

Profit after tax increased 12% over the September 2005 half year. Cash(1) profit increased 9% over the September 2005 half. For a discussion of the impact of non-core items and AIFRS 2005 adjustments refer pages 13 to 15.

Significant influences on profit are shown below. Explanations are on cash profit adjusted for AIFRS 2005 adjustments and non-core items:

Net interest 14% - *Adjusted for AIFRS 2005 adjustments and non-core items(1) 4%:*

Net interest income was driven by growth of 6% in interest earning assets, particularly in Institutional (13%), Personal (6%) largely in Mortgages, New Zealand businesses (5%) and Asia Pacific (29%), and deposit growth in Personal (4%), Corporate (5%) and Asia Pacific (9%). Volume growth was partly offset by a 7 basis point decline in margin.

Other income 14% - *Adjusted for AIFRS 2005 adjustments and non-core items(1) 2%:*

Other income growth was driven by volume-related growth in fees and higher profit on trading securities with a strong March half result in New Zealand. These increases were partly offset by reduced foreign exchange income, lower equity accounted income in PT Panin and reduced income in Esanda largely from a reduction in residual values of leased vehicles. Other income is seasonally weaker in the September half.

Operating expenses 4% - *Adjusted for AIFRS 2005 adjustments and non-core items(1) 2%:*

Operating expenses increased slightly reflecting a 2% increase in average staff numbers, largely in Personal and Institutional, offset by reduced costs in the Group Centre.

Provision for credit impairment 24% - *Adjusted for AIFRS 2005 adjustments and non-core items(1) 31%:*

The reduction in Provision for credit impairment reflected the Group's strengthening risk profile. Individual provisions reduced \$18 million with a lower number of large single name losses and low levels of default in New Zealand. This was partly offset by the September 2005 half including several large write-backs and recoveries. Collective provisions reduced \$83 million, with a lower provision for oil price shock risk.

Income tax 18% - *Adjusted for AIFRS 2005 adjustments and non-core items(1)* 13%:

The increase in tax expense is driven by growth in profit before tax and a 0.6% increase in the effective tax rate following the run-off of certain structured financing transactions and higher earnings in higher tax rate jurisdictions.

Exchange rates 1%

The depreciation of the AUD has resulted in a \$5 million increase in the contribution from earnings denominated in foreign currencies, principally New Zealand (net of profit on contracts put in place to hedge USD and NZD revenues). Whilst the average NZD exchange rate moved by only 1%, the closing rate had depreciated by 6% with a corresponding impact on the balance sheet.

(1) *Refer footnote 1 on page 11*

March 2006 half year compared to March 2005 half year

The Group recorded a profit after tax of \$1,811 million for the half year ended 31 March 2006, an increase of 16% over the March 2005 half. Cash profit increased 10% over the March 2005 half.

Basic earnings per share increased 18% (15.2 cents) to 98.4 cents. Cash earnings per share (refer page 22) increased 10% (8.3 cents) to 94.0 cents.

Revenue increased 8%. After adjusting for AIFRS 2005 adjustments and non-core items, net interest increased 7% with a 14% increase in average interest earning asset volumes partly offset by a 17 basis point reduction in margin. Other operating income increased 11% with a strong performance in Institutional. Operating costs increased 6% driven by investment in staff principally in 2005.

After adjusting for AIFRS 2005 adjustments and non-core items, cash profit in Australia increased 9%, driven by 16% growth in Personal and 16% growth in Corporate. Cash profit in New Zealand increased 16% in NZD terms including 8% as a result of a lower credit impairment charge. Profit increased by 14% in New Zealand Businesses, 8% in Institutional and higher earnings on capital offset reduced profit in UDC and non-continuing businesses. Cash profit in the Asia Pacific geographies increased 26% with volume related growth and lower credit impairment provisioning. Other geographies reduced 10% reflecting the sale of the London headquartered project finance business in 2005.

Non-core items

ANZ has adjusted the income statement for non-core items, as outlined below, to assist readers in understanding the core business performance by removing the volatility in reported results created by one-off significant items, ANZ National Bank incremental integration costs which will not be incurred going forward, the timing differences in the recognition of fair value gains in profit on hedging contracts and the move to the Australian equivalents of International Financial Reporting Standards (AIFRS) which has resulted in different recognition criteria in the March 2006 half than used in the 2005 financial year.

Non-core items in the profit and loss

NBNZ incremental integration costs after tax	(26)	(35)	(17)	-26%	53%
Non-core items	80	(9)	2	large	large

Significant items

Significant items in the profit and loss are those items that management believe do not form part of the core business by virtue of their magnitude and infrequent nature and, as such, should be removed from profit when analysing the core business performance. The following are considered significant items:

Settlement of the NHB insurance claim (March 2006 half year)

During the March 2006 half ANZ settled its \$130 million claim with a number of reinsurers over the 1992 and 2002 National Housing Bank (NHB) matter. ANZ has reported the \$113 million (\$79 million after tax) cost recovery as a significant item in 2006. \$1 million was received in 2005 and not treated as significant as it was immaterial.

Settlement of ANZ National Bank warranty claims (March 2006 half year)

As part of the purchase of the National Bank of New Zealand on 1 December 2003, Lloyds TSB provided ANZ with certain warranties. A claim was made under these warranties in relation to the accounting treatment in the Completion Accounts of the provision for retirement gratuities. As a result of the mediation of this claim, ANZ National Bank received in the March 2006 half \$14 million pre-tax revenue (\$14 million after tax) on final settlement of the claim.

Sale of NBNZ Life and Funds Management (September 2005 half year)

On 30 September 2005 ANZ National Bank sold NBNZ Life and Funds Management businesses into a joint venture with ING. Profit after tax on sale of \$14 million was recognised.

ANZ National Bank incremental integration costs

Expenditure on the integration of ANZ National Bank includes both the reallocation of existing resources to integration and incremental integration costs. Incremental costs are those costs that will not recur once integration is complete and thus do not form part of the core ongoing cost base. During the March 2006 half year \$26 million after tax (Sep 2005 half: \$35 million; Mar 2005: \$17 million) or \$39 million before tax (Sep 2005 half: \$53 million; Mar 2005 half: \$25 million) of incremental integration costs were incurred. This program is now complete.

Fair Value hedging gains

As at 1 October 2005, the Group has designated certain fair value hedges and financial liabilities as fair value through profit and loss. Any hedge ineffectiveness will result in volatility through the Income Statement. ANZ has separately reported the impact of volatility due to hedge ineffectiveness as a non-core item as the profit reported on hedge transactions will reverse over time and as such is not part of the core operating performance. During the March 2006 half year \$13 million (Sep 2005: \$12 million; Mar 2005: \$19 million) after tax or \$18 million (Sep 2005: \$17 million; Mar 2005: \$27 million) before tax profit has been reported as a non-core item.

AIFRS 2005 adjustments

The Group implemented accounting policies in accordance with AIFRS on 1 October 2004, except for those relating to financial instruments and insurance contracts, which were implemented on 1 October 2005. The 2005 comparatives for these standards have not been restated in the statutory accounts. To assist readers understand the core business performance on a comparable basis, ANZ has adjusted the 2005 figures to be comparable with the March 2006 half year result within the Chief Financial Officer's and Business Performance Reviews. The major adjustments are to the provision for credit impairment and recognition of fees as effective yield adjustments to net interest. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability and as there is no impact on cash. Ineffectiveness on these hedges was trivial on the March 2006 half year.

Summary of major AIFRS impacts

The following table reconciles fully comparable AIFRS values with equivalents calculated under previous AGAAP.

	Half year Mar 06 \$M	Half year Sep 05 \$M	Half year Mar 05 \$M	Movt Mar 06 v. Sep 05 %	Movt Mar 06 v. Mar 05 %

Net interest margin (adjusted for AIFRS 2005 adjustments(1))	2.29	2.36	2.46	-3%	-7%

(1) Refer footnote 1 on page 11

(2) AIFRS 2005 adjustments include the reclassification of customers liability for acceptance from non-interest earning to interest earning (Sep 2005: \$13.3 billion; Mar 2005: \$13.1 billion) to be consistent with the classification of commercial bill fees as interest. Average balance sheets adjusted for AIFRS 2005 adjustments are included as Supplementary Information on pages 118 to 121

March 2006 half year compared to September 2005 half year

Net interest income at \$3,368 million was 14% (\$415 million) higher than the September 2005 half. After adjusting for non-core items and AIFRS 2005 adjustments, core net interest was 4% (\$137 million) higher than the September 2005 half.

Volume

Average interest earning assets increased 13%. After adjusting for AIFRS 2005 adjustments, interest earning assets increased 7%:

Average net advances grew by \$12.6 billion (5%). Growth in net advances in Australia was attributable to Personal Banking Australia (\$5.8 billion or 6% with \$4.7 billion in Mortgages or 5%) and Corporate Australia (\$1.4

billion or 6%). New Zealand's average net advances increased by \$3.1 billion (5%) with exchange rate impacts (-\$0.3 billion). Average net advances grew by \$0.6 billion (7%) in Overseas Markets.

Other interest earning assets increased \$7.6 billion (23%), driven by higher levels of liquid assets, trading securities, available-for-sale assets and interbank lending.

Average deposits and other borrowings grew \$11.0 billion (6%) with growth in Treasury (\$2.3 billion or 13%) to fund asset growth, Personal Banking Australia (\$2.2 billion or 5%) and Corporate Australia (\$1.3 billion or 7%). Average deposits and other borrowings increased in New Zealand (\$0.8 billion or 1%) with exchange rate impacts (\$0.3 billion). Average deposits and other borrowings grew (\$4.5 billion or 23%) in Overseas Markets, with exchange rate impacts \$0.4 billion.

Margin

Net interest average margin increased by 3 basis points, however, core net interest margin adjusted for AIFRS 2005 adjustments reduced 7 basis points from the September 2005 half year:

AIFRS 2005 adjustments (+10 basis points)

Changes predominantly reflect the inclusion of certain fees as net interest income, partially offset by interest expense on Hybrid securities, reported as debt instruments under AIFRS and inclusion of acceptances in average interest earning assets.

Funding mix (-4 basis points)

Changes in the funding mix reduced the net interest margin due to substitution of wholesale funding for customer deposits (2 basis points) and a decrease in net non-interest bearing items (2 basis points).

Asset mix (-2 basis point)

Movements in the composition of assets in the portfolio negatively impacted the net interest margin by 2 basis points, reflecting an increase in the proportion of lower yielding non-lending liquid assets in Group Treasury and Institutional.

Competition (-4 basis points)

Competitive pressures were most marked in Australian Mortgages (1 basis point), Corporate Australia and Institutional (1 basis point), plus migration of customers to lower yielding credit cards and New Zealand fixed rate mortgages (1 basis point) and high yielding deposits (1 basis point).

Wholesale rates (+2 basis points)

Wholesale rate movements benefited margins from lower basis risk in variable rate mortgages and credit cards plus increased earnings on the investment of capital and rate insensitive deposits (2 basis points), with minimal changes in Treasury mismatch earnings.

Other items (+1 basis point) include:

a reduction in retail broker payments and higher earnings from foreign exchange revenue hedging (+1 basis point)

release of a provision relating to prior year income in Institutional (+2 basis points)

reduced effective yield fee income decreased margins (-1 basis point)

other impacts including decreases from change in interest not recognised on impaired loans, discontinued businesses and cash flow impacts on derivatives (-1 basis point)

March 2006 half year compared to March 2005 half year

Net interest increased \$503 million (18%) over the March 2005 half, or \$228 million (7%) after adjusting for AIFRS 2005 adjustments.

Volume

Average interest earning assets increased 20%. After adjusting for AIFRS 2005 adjustments, interest earning assets increased 14%:

Average net advances grew by \$25.3 billion (11%). Growth in net advances in Australia was attributable to Personal Banking Australia (\$12.0 billion or 12% with Mortgages contributing \$9.8 billion or 12%), Institutional (\$3.3 billion or 11%) and Corporate Australia (\$2.2 billion or 10%). New Zealand's average net advances increased by \$6.6 billion (11%) with exchange rate impacts (-\$0.5 billion). Average net advances increased by \$0.1 billion (1%) in Overseas Markets.

Other interest earning assets increased \$11.6 billion (40%), driven by higher levels of liquid assets, trading securities, available-for-sale assets and interbank lending.

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Average deposits and other borrowings increased \$17.3 billion (10%) from growth in Personal Banking Australia (\$3.5 billion or 9%), Institutional (\$1.9 billion or 10%) and Corporate Australia (\$1.9 billion or 11%). Average deposits and other borrowings increased in New Zealand (\$1.3 billion or 3%) with exchange rate impacts (-\$0.4 billion). Average deposits and other borrowings grew (\$5.3 billion or 28%) in Overseas Markets with exchange rate impacts \$0.3 billion.

Margin

Net interest average margin reduced by 7 basis points whilst core net interest margin adjusted for AIFRS 2005 adjustments reduced 17 basis points from the March 2005 half:

AIFRS 2005 adjustments (+10 basis points)

Changes predominantly reflect the inclusion of certain fees as net interest income, partially offset by interest expense on Hybrid securities, reported as debt instruments under AIFRS and inclusion of acceptances in average interest earning assets.

Funding mix (-7 basis points)

Higher proportions of more expensive wholesale and customer liabilities (-4 basis points) within the portfolio and falling levels of net non-interest bearing interest items (-3 basis points).

Asset mix (-4 basis points)

Lower proportions of higher yielding assets in Asset Finance and Corporate and Structured Financing reduced margin by 2 basis points and an increase in the proportion of lower yielding non-lending liquid assets in Group Treasury and Institutional (2 basis points)

Competition (-10 basis points)

Competitive pressures reduced margins, with this impact arising mainly in Mortgages (Australian mortgages 2 basis points, New Zealand mortgages 1 basis points) and Institutional lending with slight margin reductions in Corporate Banking, Business Banking and Rural portfolios. In addition customer migration to lower yielding credit cards and New Zealand fixed rate mortgages reduced the net interest margin (-2 basis points), together with migration into high yielding customer deposits (-2 basis points).

Wholesale rates (+3 basis points)

Increased income on the investment of capital and rate insensitive deposits (+2 basis points) and less basis risk in variable rate mortgages and credit cards (+1 basis point).

Other items (+1 basis point) include:

Funding costs associated with unrealised trading gains increased as a result of movements in the AUD. This decrease in interest income is reflected in the net interest margin, however it is directly offset by an equivalent increase in trading income (-3 basis points)

Release of revenue relating to prior year income in Institutional (+2 basis points)

Benefit from mix impacts on discontinued businesses (+2 basis points)

Other Operating Income

	Half year Mar 06 \$M	Half year Sep 05 \$M	Half year Mar 05 \$M	Movt Mar 06 v. Sep 05 %	Movt Mar 06 v. Mar 05 %

(1) Refer footnote 1 on page 11

March 2006 half year compared to September 2005 half year

Other operating income decreased \$266 million (14%). After adjusting for AIFRS 2005 adjustments and non-core items, core other operating income increased \$34 million (2%) (refer pages 13 to 15 for details). The following explanations are based on core other operating income:

Fee income increased \$2 million.

Lending fee income increased \$7 million (3%):

Personal Banking Australia increased \$5 million (7%) with a seasonal increase and higher volumes in Banking Products (\$3 million or 8%) with a higher number of transaction accounts and Mortgages increasing \$2 million (12%) driven by lending growth.

New Zealand increased \$5 million (15%).

Institutional decreased \$4 million (6%) with a \$7 million reduction in Corporate and Structured Financing due to large deals in the Structured Debt portfolio closing in the second half of 2005 offset by a \$4 million increase in Trade and Transaction Services as a result of an improved performance in Trade Finance.

Non-lending fee income decreased \$5 million (1%):

Institutional decreased \$18 million with Corporate and Structured Financing decreasing \$16 million related to a reduction in advisory and syndication fees and coming off a particularly strong September 2005 half.

Personal Banking Australia increased \$12 million (4%) with a \$7 million (12%) increase in Investment Insurance Products primarily due to increased volume in commissions from INGA as a result of strong market conditions and funds under management growth, and Banking Products increasing \$2 million (4%) related to the continuing strong growth in the transaction banking account base.

Foreign exchange earnings decreased \$6 million (3%) entirely in Institutional where lower foreign exchange swap and spot earnings were offset by increased profit on trading instruments (\$24 million, see below). In New Zealand, there was an increase of \$28 million in foreign exchange earnings driven by greater currency volatility in the first half of 2006.

Profit on trading instruments increased \$51 million with Institutional increasing \$35 million driven by strong growth in New Zealand associated with increased activity and positioning to take advantage of interest rate and currency volatility as well as the profit offsetting the foreign exchange loss referred to above. In addition the six months to September 2005 included the \$16 million cost from the hedge of capital investment earnings in INGA which ceased in October 2005.

Other operating income decreased \$13 million (7%):

Esanda and UDC decreased \$17 million due to a \$6 million impact from the fall in second-hand car prices and the inclusion of a \$7 million gain in the September 2005 half year resulting from the alignment of revenue recognition on leases in the New Zealand Fleet business with Group accounting policies.

Group Centre decreased \$14 million mainly due to the timing of recognition of gains in ANZ's share of INGA capital investment earnings with the move to available-for-sale classification (high level of realisation of gains in the September 2005 half).

Non-continuing businesses increased \$18 million as a result of a \$12 million gain from settlement of the sale warranties relating to the sale of the London headquartered project finance business and a \$4 million gain on sale of power assets.

Movements in average exchange rates over the September 2005 half year were immaterial.

March 2006 half year compared to March 2005 half year

Other operating income decreased \$122 million (7%). Core other operating income increased \$156 million (11%) after excluding AIFRS 2005 adjustments and non-core items (refer pages 13 to 15 for details). The following explanations exclude AIFRS 2005 adjustments and non-core items:

Fee income increased \$76 million (8%).

Lending fee income increased \$18 million (9%). Institutional increased \$16 million of which \$9 million in Corporate and Structured Financing was largely in project financing fees and \$6 million was driven by Trade and Transaction Services reflecting an improvement in performance in Trade Finance.

Non-lending fee income increased \$58 million (8%):

Personal Banking Australia increased \$41 million (13%), of which \$17 million in Consumer Finance was driven by volume growth and cross sell initiatives. Investment & Insurance Products increased \$12 million due to an increase in income generated by financial planners. Banking Products increased \$7 million driven by increased account and transaction numbers.

New Zealand increased \$8 million (4%) driven by card fees and interchange fees from credit card purchases.

Asia Pacific increased \$5 million (21%) primarily due to increased card fees in Indonesia.

Corporate Australia increased \$5 million (13%), which included an increase in advisory fees and ANZ Online fee income.

Foreign exchange earnings increased \$6 million (3%). Trade and Transaction Services increased as a result of continued growth particularly from international payments revenue. There was also growth in Markets in New Zealand driven by positioning for currency volatility in the first half of 2006 and a \$10 million increase in the Pacific mainly due to growth in PNG assisted by major mining deals. This was offset by a reduction in Australia where reduced foreign exchange earnings on swap and spot positions were offset in profit on trading instruments.

Profit on trading instruments increased \$105 million:

Markets grew by \$89 million due primarily to strong growth in New Zealand (\$22 million) associated with increased activity and positioning to take advantage of interest rate and currency volatility and a \$28 million increase due to revenue growth underpinned by increased frontline staff and initiatives following the restructure in the first half of 2005. Increased profit on swap and spot foreign exchange contracts (\$24 million) offset the foreign exchange reduction referred to above. Total income in Markets increased \$58 million.

Group Centre also increased with the March 2005 half including a \$16 million cost as a result of the hedge of capital investment earnings in INGA. Hedging of capital investment earnings ceased in October 2005.

Other operating income decreased \$31 million (16%):

Group Centre decreased \$18 million due mainly to lower share of INGA capital investment earnings following the capital repatriation in 2005 and the timing of profit recognition on the available-for-sale accounting basis.

Esanda and UDC decreased \$13 million due largely to the impact of a fall in second-hand car prices.

Institutional reduced \$10 million with the March 2005 half including a \$10 million gain on sale of Sydney Futures Exchange shares.

Asia Pacific decreased \$7 million due to reduced equity accounted earnings from PT Panin Bank as the first half of 2006 has seen increased pressure on margins from interest rates, increased costs relating to the branch expansion project and reduced bond income.

Non-continuing Businesses increased \$11 million due to the gain from the settlement of warranties relating to the sale of the London headquartered project finance business as well as the gain on sale of power assets. This was offset by the \$4 million profit on sale of the London based headquartered project finance business in the first half of 2005.

Personal Banking Australia increased \$6 million with Mortgages increasing \$4 million as a result of increased insurance premiums driven by higher sales of LMI loans.

Movements in average exchange rates over the March 2005 half year were immaterial

Expenses

	Half year Mar 06 \$M	Half year Sep 05 \$M	Half year Mar 05 \$M	Movt Mar 06 v. Sep 05 %	Movt Mar 06 v. Mar 05 %
Operating expenses					
Personnel expenses	1,341	1,286	1,207	4%	11%
Premises expenses	205	197	193	4%	6%
Computer expenses	258	281	260	-8%	-1%
Other expenses	433	427	440	1%	-2%
Restructuring costs	22	22	27	0%	-19%
Core operating expenses	2,259	2,213	2,127	2%	6%
NBNZ incremental integration costs(1)	39	53	25	-26%	56%
Significant items - settlement of NHB insurance claim	(113)			n/a	n/a
Total operating expenses	2,185	2,266	2,152	-4%	2%
Total employees	31,063	30,976	29,832	0%	4%

(1) These costs are personnel costs of \$22 million (Sep 2005 half: \$23 million; Mar 2005 half: \$13 million), computer costs of \$6 million (Sep 2005 half: \$15 million; Mar 2005 half: \$2 million), and other costs of \$11 million (Sep 2005 half: \$15 million; Mar 2005 half: \$10 million).

March 2006 half year compared to September 2005 half year

Operating expenses decreased \$81 million (4%) over the September 2005 half year due largely to the \$113 million pre-tax settlement of the NHB insurance claim. After adjusting for non-core items, core operating expenses increased \$46 million (2%) (refer page 13 for details of non-core items). The following explanations exclude non-core items:

Personnel expenses increased \$55 million (4%) as a result of annual salary increases and growth in staff numbers; especially in the September 2005 half.

Premises costs increased \$8 million (4%) driven largely by rental expense reflecting additional space requirements.

Computer costs decreased \$23 million (8%). The reduction was mainly in Operations, Technology and Shared Services due to an \$11 million reduction in computer contractors resulting from the completion of business systems integration in New Zealand, a \$7 million reduction in depreciation principally as a result of asset write-downs in the second half of 2005 and assets fully depreciating. Lower software licence costs also contributed to the reduction (\$3 million).

Other expenses increased \$6 million with non-lending losses increasing \$14 million in Institutional and New Zealand (the latter including a NZD10 million Commerce Commission settlement impact and NZD5 million cost of operating relocated domestic systems as part of integration) offset by a \$6 million reduction in indirect taxes in Esanda.

Movements in average exchange rates over the September 2005 half year were immaterial.

March 2006 half year compared to March 2005 half year

Operating expenses increased \$33 million (2%) or \$132 million (6%) adjusting for non-core items including the \$113 million pre-tax settlement of the NHB insurance claim and ANZ National Bank incremental integration costs (refer page 13 for details). The following explanations exclude non-core items:

Personnel costs were up \$134 million (11%) due to annual salary increases and a 4% increase in staff numbers mainly in the following business units:

Personal Banking Australia increased 6%. Retail Banking increased 5% due to frontline increases primarily as a result of new branch staffing and network initiatives. Consumer Finance increased by 5% following the introduction of the 24 hour call centre in April 2005, increased sales staffing and the introduction of the white-labelling capability.

Institutional increased 8% mainly due to a 15% increase in Trade and Transaction Services reflecting business expansion particularly in the Trade Finance and Custodian Services businesses.

Asia Pacific increased 10% related mainly to the formation of the ANZ Royal Bank joint venture in Cambodia and the broader partnership agenda as well as business growth and the launch of initiatives in the Pacific mainly in Amerika Samoa, Solomon Islands and PNG.

Premises costs increased \$12 million (6%) with a \$7 million increase in rental expense reflecting additional space requirements and a \$4 million rise in the cost of security services.

Computer costs decreased \$2 million (1%). A \$4 million decrease due to timing of software purchases was offset by a \$5 million increase in computer repairs.

Other expenses were \$7 million (2%) lower. This was due to a reduced charge for non-lending losses (\$4 million) as the first half of 2005 included a \$15 million charge for cheque conversion losses. This was offset by a NZD10 million increase in New Zealand in the first half of 2006 as a result of the Commerce Commission settlement. In addition, there was a \$4 million reduction in professional fees due to a decrease in AIFRS and Sarbanes Oxley project costs and a \$6 million decline in indirect taxes in Esanda. These were offset by increased travel costs of \$11 million.

Movements in exchange rates reduced cost growth by \$5 million.

Income Tax Expense

	Half year Mar 06 \$M	Half year Sep 05 \$M	Half year Mar 05 \$M	Movt Mar 06 v. Sep 05 %	Movt Mar 06 v. Mar 05 %

Effective tax rate	29.1%	28.0%	27.5%		
Income tax expense on cash profit(1)	716	636	611	13%	17%
Effective tax rate (cash profit(1))	29.2%	28.6%	28.0%		

(1) Refer footnote 1 on page 11

March 2006 half year compared to September 2005 half year

The Group's income tax expense increased by \$112 million to \$742 million resulting in an effective tax rate of 29.1%, an increase of 1.1% from the September 2005 half year. The March 2006 half year included the settlement of an ANZ National Bank warranty claim, which was non-taxable, and the September 2005 half year included the non-taxability of profit on sale of NBNZ Life and Funds Management businesses.

Adjusted for AIFRS 2005 adjustment and non-core items, income tax expense increased by \$80 million resulting in an effective tax rate of 29.2% an increase of 0.6% from the September 2005 half year. This increase reflects the run-off of certain New Zealand and Australian structured financing transactions and proportionately higher earnings in higher tax rate jurisdictions, predominately New Zealand.

March 2006 half year compared to March 2005 half year

The Group's effective tax rate for the March 2006 half year increased 1.6% from the March 2005 half year.

Adjusted for AIFRS 2005 adjustment and non-core items, the effective tax rate increased 1.2% from the March 2005 half year. This increase reflects the run-off of certain New Zealand and Australia structured financing transactions, lower equity accounted earnings from INGA and PT Panin Bank and proportionately higher earnings in higher tax rate jurisdictions, predominantly New Zealand. The March 2005 half year included the non-taxable profit on sale of Sydney Futures Exchange shares.

(1) Refer Note 6 for full calculation

(2) Refer page 11

(3) The EPS calculation excludes the Euro preference shares

Earnings per share increased 14.0% (12.1 cents) to 98.4 cents on the September 2005 half. Cash EPS for the Group increased 9.2% or 7.9 cents on the September 2005 half. The main drivers of the increase in cash EPS on the September 2005 half are:

Growth in continuing business profit before provisions contributed 5.4%

Reduction in the continuing businesses provision charge contributed 6.5%

Partly offset by headwinds, including non-continuing businesses (2.5%) and the dilution by the issuance of shares (-0.2%)

Earnings per share increased 18.3% (15.2 cents) on the March 2005 half. Cash EPS for the Group increased 9.7% or 8.3 cents on the March 2005 half. The main drivers of the increase in cash EPS on the March 2005 half are:

Growth in continuing business profit before provisions contributed 10.3%

Reduction in the continuing businesses provision charge contributed 2.3%

Partly offset by headwinds, including non-continuing businesses (2.6%) and the dilution by the issuance of shares (0.3%)

Dividends

	Half year Mar 06	Half year Sep 05	Half year Mar 05	Movt Mar 06 v. Sep 05 %	Movt Mar 06 v. Mar 05 %

(1) Refer footnote 1 on page 11

The Directors propose that an interim dividend of 56 cents be paid on each ordinary share, up 5 cents (9.8%) on the 2005 interim dividend broadly in line with the growth in Cash EPS (adjusted for non-core items and AIFRS 2005 adjustments). The proposed interim dividend will be fully franked.

The Group has a dividend reinvestment plan and a bonus option plan. Participation in these plans is limited to 50,000 shares in each plan. Election notices for these plans must be received by 5.00 pm (AEST) on the record date, namely, 19 May 2006. It is proposed that the interim dividend will be payable on 3 July 2006. Dividends payable to shareholders with a registered address in Great Britain (including the Channel Islands and the Isle of Man) and New Zealand will be converted to their local currency at ANZ's daily forward exchange rate at the close of business on the record date for value on the payment date.

The Group expects current timing differences will generate future franking credits and therefore the Group expects it will be able to maintain full franking for the foreseeable future.

EVA Reconciliation

One measure of shareholder value is EVATM (Economic Value Added) growth relative to prior periods. EVATM for the half year ended 31 March 2006 at \$1,013 million was up \$22 million on the half year ended 30 September 2005, and up \$93 million on the March 2005 half.

	Half year Mar 06 \$M	Half year Sep 05 \$M	Half year Mar 05 \$M	Movt Mar 06 v. Sep 05 %	Movt Mar 06 v. Mar 05 %

EVATM	1,013	991	920	2%	10%

(1) Refer footnote 1 on page 11

EVATM is a measure of risk adjusted accounting profit used for evaluating business unit performance and is a key factor in determining the variable component of remuneration packages. It is based on operating profit after tax, adjusted for non-core items, credit costs, the cost of capital, and imputation credits (measured at 70% of Australian tax). Of these, the major component is the cost of capital, which is calculated on the risk adjusted or economic capital at a rate of 11%. At the Group level, total capital is used so the cost of capital reflects the full resources provided by shareholders. The credit cost adjustment replaces the credit provision charge with economic loss provision after tax at the rate applicable in the relevant geography.

At ANZ, economic capital is equity allocated according to a business unit's inherent risk profile. It is allocated for several risk categories including: credit risk, operating risk, interest rate risk, basis risk, mismatch risk, investment risk, trading risk deferred acquisition costs risk and other risk. The methodology used to allocate capital to business units for risk is designed to help drive appropriate risk management and business strategies.

Credit Risk**Individual provision charge**

The individual provision charge was \$188 million, down \$18 million over the September 2005 half. This reduction results from lower single name provisions, especially in New Zealand as well as Esanda and UDC, partially offset by two larger single name provisions in Institutional. This was a strong result given the September 2005 half benefited from large write-backs in non-continuing businesses, due to sales and realisations of non-performing Power assets.

	Half year Mar 06 \$M	Half year Sep 05 \$M	Half year Mar 05 \$M	Movt Mar 06 v. Sep 05 %	Movt Mar 06 v. Mar 05 %

AIFRS 2005 adjustments(1)	N/A			n/a	n/a
Individual/specific provision charge	188	206	151	-9%	25%

Collective (general) provision charge

Collective (general) provision charges were \$36 million, down \$54 million over the September 2005 half or \$83 million on a comparable basis after AIFRS 2005 adjustments. The reduction over the half was largely driven by improved risk profiles in Institutional, Corporate and New Zealand, a benign credit environment, as well as a partial unwind across all business units of non-customer specific provisions held for oil price risk. Partially offsetting this was some increase for growth and the strategic risk mix change in Personal Banking Australia towards lower rate cards and declining secondhand car prices in Esanda. The increase in the September 2005 half was driven by growth and a \$68 million top up for non-customer specific oil price risk, partially offset by a modest improvement in the Group's overall profile.

(1) Refer footnote 1 on page 11

Collective (general) provision balance

The collective provision balance at 31 March 2006 was \$1,903 million (0.83% of risk weighted assets), a decrease of \$264 million from the general provision balance of \$2,167 million (0.99% of risk weighted assets) at 30 September 2005. This represents a surplus of \$237 million over the APRA minimum guideline. The reduction in balance results from the first time adoption of AIFRS on 1 October 2005.

Economic loss provisions (ELP)

With effect from 1 October 2005 the Group has adopted an incurred loss approach to credit loss provisioning as required by AASB 139:

Financial Instruments: Recognition and Measurement . Prior to that date the Group had adopted an economic loss provisioning (ELP) methodology that recognised an expense for credit losses based on the expected long term loss ratio for each part of the loan portfolio.

Management believe that disclosure of ELP data will assist readers in determining the longer term expected loss rates on the lending portfolio as ELP removes the volatility in reported earnings created by the use of an incurred loss methodology. ANZ will continue to use the ELP methodology internally for economic value added (EVA) reporting and as another factor when determining the dividend payout ratio.

The Group economic loss provision charge (ELP) was \$334 million, an increase of \$38 million (13%) over the half year to September 2005. This increase was driven by growth and the strategically planned risk mix shift in Consumer Finance and slightly higher expected losses in Esanda due to a decrease in the realisable value of motor vehicles in default.

	% of Group Net Advances	Half year Mar 06	Half year Sep 05	Half year Mar 05

(1) *ELP rate = Annualised economic loss provisioning divided by average net lending assets*

Gross impaired loans

Gross impaired loans increased to \$726 million, up \$84 million from \$642 million as at 30 September 2005. This increase was largely driven by two new accounts in Institutional and a small increase in Mortgages. Offsetting this were strong realisations and a falling exchange rate in New Zealand, plus strong realisations in non-continuing businesses.

The default rate (new impaired loans/average gross lending assets) has increased 1 basis point since September 2005 half. This increase was also largely the result of higher new impaired loans in Institutional, offset by lower new impaired loans in New Zealand.

The table below shows all outstanding revenue hedges, interest income earned and fair value of these hedges.

Revenue related cash flow hedges

31 March 2006

30 September 2005(2)

	Notional Principal Amount \$M	Amount taken to Income \$M	Unrealised Gains / (Losses) \$M	Notional Principal Amount \$M	Amount taken to Income \$M	Unrealised Gains / (Losses) \$M
USD Revenue Hedges					8	
NZD Revenue Hedges(1)	3,776	(3)	204	3,957	(16)	41
Total	3,776	(3)	204	3,957	(8)	41

(1) Notional principal amount for March 2006 is \$3,131 million purchased and \$645 million sold contracts from partial close out of hedge. The net open position is \$2,486 million. Revenue hedges are treated as cash flow hedges

(2) Numbers are based on half year period

The Group uses a variety of derivative instruments to hedge against the adverse impact on future offshore revenue streams from exchange rate movements. As at 31 March 2006 ANZ had net \$2.5 billion (Sep 2005: \$4.0 billion; Mar 2005: \$3.9 billion) hedge contracts in place.

Movements in average exchange rates resulted in an increase of \$5 million in the Group's profit after tax (net of profit and loss on revenue hedges). Earnings from revenue hedges increased by \$5 million (before tax) from the September half. Hedge revenue is booked in the Group Centre as interest income.

Balance Sheet

Total assets increased by \$21.3 billion (7%) since 30 September 2005 to \$319.4 billion. Exchange rate movements accounted for a net reduction of \$3.6 billion consisting of a reduction of \$4.7 billion in New Zealand partly offset by a \$1.2 billion increase in Overseas Markets. Excluding the impact of exchange rate movements, total assets increased \$17.3 billion (9%) in Australia, \$8.3 billion (11%) in New Zealand, \$1.2 billion (12%) in Asia Pacific and \$0.2 billion (2%) in other geographies.

The explanations in the table below describe movements in the major asset classes.

Liquid assets 20% (*Excl Exchange Rates* 19%)

Liquid assets increased by \$2.3 billion to \$13.9 billion at 31 March 2006.

Australia increased \$1.1 billion mainly in Group Treasury. New Zealand increased \$0.7 billion, despite the weakening NZD, with increased liquidity held by Treasury. Overseas Markets increased \$0.5 billion due to a weakening AUD (+\$0.3 billion) and increased liquid assets in China and the Treasury operations in New York.

Due from other financial institutions 31% (*Excl Exchange Rates* 31%)

Due from other financial institutions increased by \$2.0 billion to \$8.3 billion at 31 March 2006 due largely to increase in volume of interbank lending, bank overdrafts, securities borrowing volumes in Institutional Australia and interbank lending in the Treasury operations in Singapore, New Zealand and the United States.

Derivatives 101% (*Excl Exchange Rates* 104%)

Derivative assets increased \$3.8 billion to \$7.5 billion at 31 March 2006 driven principally by increased volatility in exchange rates, notably the significant depreciation in the AUD and NZD during March 2006 and increased trading activity. Derivative liabilities increased 45%, also driven by exchange rates.

Trading securities 39% (*Excl Exchange Rates* 40%)

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Trading securities volumes increased \$2.4 billion to \$8.7 billion at 31 March 2006 due largely to more active trading in Institutional in Australia (\$1.8 billion) and New Zealand (\$0.5 billion).

Available-for-sale assets 32% (*Excl Exchange Rates* 31%, *excl Exchange Rates and AIFRS 2005 Adjustment* 18%)

Available-for-sale assets include assets previously classified as investment securities and loans and advances and other assets that are available-for-sale. These assets are measured at fair value. Available-for-sale asset volumes increased \$3.2 billion to \$13.3 billion at 31 March 2006 due to the reclassification of \$1.1 billion assets from net loans and advances and other assets on 1 October 2005 on adoption of AIFRS and an increase in available-for-sale loans in Institutional Australia. Increased liquidity holdings in overseas markets have offset reduced levels of available-for-sale securities in New Zealand where a greater proportion of the liquidity portfolio were reported as trading securities.

Net loans and advances 4% (*Excl Exchange Rates* 5%)

Net loans and advances increased \$9.1 billion since September 2005 to \$241.5 billion. Excluding the impact of exchange rate movements (-\$3.2 billion) and the impact of adopting AIFRS (-\$1.3 billion resulting from changes in credit provisioning and the reclassification to available-for-sale), the increase was \$13.6 billion (6%).

Growth in Australia was 5% (\$8.6 billion). After adjusting 2005 to a fully comparable AIFRS basis growth was \$9.5 billion (6%) largely the result of increases in the following businesses:

Personal Banking Australia (6% or \$6.5 billion), predominantly in Mortgages (\$5.4 billion) as a result of growth in housing loans. Consumer Finance increased \$0.6 billion, reflecting the success of the low rate MasterCard product, and Regional Commercial and Agribusiness Products grew \$0.3 billion.

Institutional Australia (6% or \$1.5 billion) largely in Corporate and Structured Financing (\$0.9 billion) due to increased project finance and structured debt activity. Debt Products Group increased \$0.3 billion driven by increased demand for funding of mergers and acquisition activity, and volumes in Trade and Transaction Services increased \$0.2 billion as a result of growth in overdrafts.

Corporate Australia (5% or \$1.1 billion) largely in Business Banking (\$0.6 billion) driven by continued investment in frontline staff and process simplification, the industry specialisation approach to customers and a competitive customer service proposition, and Corporate banking (\$0.5 billion).

Esanda (3% or \$0.4 billion) with solid new business writings partly offset by the natural run-off of assets.

New Zealand reduced by \$0.2 billion; however, after excluding the impact of exchange rates and impact of adopting AIFRS, growth was \$3.7 billion, or 6%, with increases in National Bank Retail (\$1.1 billion), ANZ Retail (\$1.0 billion), Rural Banking (\$0.6 billion), Institutional (\$0.2

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

billion) and Corporate Banking (\$0.9 billion) partly offset by a \$0.3 billion reduction in non-continuing businesses. Overseas Markets grew by \$0.6 billion (7%). After excluding the impact of exchange rate movements and the impact of adopting AIFRS on 1 October 2005 growth was \$0.4 billion (5%) in Asia Pacific (\$0.2 billion) and the north west Institutional operations (\$0.2 billion).

Customer's liability for acceptance 2% (Excl Exchange Rates 2%)

Customer's liability for acceptance increased by \$0.2 billion to \$13.7 billion at 31 March 2006 with growth in Institutional Australia (\$0.1 billion) and Asia (\$0.1 billion).

All other assets 12% (Excl Exchange Rates 10%)

Other assets reduced \$1.7 billion due mainly to lower trade dated asset volumes in Institutional.

Total liabilities increased by \$22.0 billion (8%) from 30 September 2005. Exchange rate movements accounted for a net reduction of \$2.6 billion consisting of a \$4.1 billion reduction in New Zealand offset by a \$1.5 billion reduction in Overseas Markets.

The explanations in the table below describe movements in the major liability classes.

Due to other financial institutions 11% (*Excl Exchange Rates* 10%)

Due to other financial institutions increased \$1.3 billion to \$13.3 billion at 31 March 2006.

Volumes in Australia increased \$1.9 billion principally in the Markets business in Institutional with increased interbank repo activity. Excluding exchange rate movements New Zealand reduced \$0.6 billion largely in Structured Finance.

Deposits and other borrowings 3% (*Excl Exchange Rates* 5%)

Deposits and other borrowings increased \$6.5 billion to \$196.9 billion at 31 March 2006. Exchange rate movements reduced deposits and other borrowings by \$2.1 billion with a \$3.3 billion reduction in New Zealand partly offset by a \$1.2 billion reduction in Overseas Markets. Excluding exchange rate movements:

Australia increased \$2.7 billion (2%) largely as a result of increases in the following businesses:

Treasury funding reduced \$1.9 billion with a reduced requirement for short-term domestic funding with increased term debt issuance and higher offshore commercial paper funding.

Personal Banking Australia increased \$2.6 billion mainly due to growth in high yielding term deposit and cash management account products.

Institutional increased \$0.5 billion with increased funding in Markets, Corporate and Structured Financing and Debt Product group, partly offset by a slight reduction in corporate deposits in Trade and Transaction Services.

Corporate Australia increased \$0.9 billion, with strong growth across all segments.

Esanda increased \$0.6 billion to fund asset growth.

New Zealand increased \$1.5 billion (3%), largely in Institutional (\$2.7 billion), National Bank retail (\$0.6 billion) ANZ Retail (\$0.4 billion) and Corporate Banking (\$0.6 billion) partly offset in Treasury (-\$2.8 billion) with increased term funding allowing a reduction in shorter term commercial paper and certificate of deposit funding.

Overseas Markets increased by \$4.9 billion largely due to increased commercial paper issuance by ANZ Delaware (\$3.4 billion) and the requirement to fund balance sheet growth.

Payables and other liabilities 27% (*Excl Exchange Rates* 30%)

Payables and other liabilities increased \$2.1 billion (27%) to \$9.7 billion at 31 March 2006 with an increase in securities lending volumes in Institutional.

Derivatives 45% (*Excl Exchange Rates* 49%)

Derivative liabilities increased \$1.9 billion to \$6.1 billion at 31 March 2006. The increase is driven by increased volatility in exchange rates, principally the significant movement in the NZD during March and increased trading activities. The movement is consistent with the movement in Derivative assets

Bonds and Notes 20% (*Excl Exchange Rates* 14%)

Bonds and notes increased \$7.9 billion to \$46.9 billion at 31 March 2006. Excluding exchange rate movements, bonds and notes increased by \$5.5 billion in response to increased term funding requirements.

Loan Capital 22% (*Excl Exchange Rates* 18%)

Loan capital increased \$2.0 billion to \$11.1 billion at 31 March 2006 in response to term funding requirements and the reclassification of ANZ StEPS from equity to debt on adoption of AIFRS on 1 October 2005.

Capital Management

	As at Mar 06	As at Sep 05	As at Mar 05
Tier 1	6.8%	6.9%	7.0%
Tier 2	4.0%	3.9%	3.6%
Deductions	(0.4)%	(0.3)%	(0.3)%
Total	10.4%	10.5%	10.3%
ACE	5.0%	5.1%	5.1%
RWA \$m	230,653	219,573	209,524

ACE Ratio

The ACE ratio at 5.0% remains at the upper end of the Group's targeted capital range. During the period, ACE ratio declined 9 basis points principally due to:

net profit excluding preference share dividends of \$1.8 billion (+82 basis points);

ordinary share dividend commitments of \$1.0 billion (-47 basis points);

buy-back of ordinary equity of \$146 million (-7 basis points) being offset by share issues of \$179 million (+8 basis points) through the Bonus Option Plan, Dividend Reinvestment Plan, option conversions and issues to staff;

increase in risk weighted assets, excluding the impact of exchange rate movements (-30 basis points);

increase in investment/profit retention in funds management businesses and associates (-12 basis points); and

exchange rate movements and opening AIFRS adjustments had an immaterial impact.

Hybrid Capital and Tier 1 Capital

The Group raises hybrid capital to supplement the Group's ACE capital to further strengthen the Group's capital base and ensure compliance with APRA's prudential capital requirements, principally its Tier 1 capital requirements.

At 31 March 2006 the Group had three Hybrid Capital instruments on issue:

Hybrid Capital details

	ANZ StEPS	US Stapled Trust Security	Euro Hybrid
Amount (in issue currency)	\$1,000 million	USD1,100 million	500 million
Accounting classification	Debt	Debt	Equity
Regulatory (APRA) classification	Tier 1	Tier 1	Tier 1
March 2006 balance	\$1,000 million	\$1,536 million	\$871 million
Interest rate	BBSW +1.00%	Tranche 1 Coupon: 4.48% Tranche 2 Coupon: 5.36%	Euribor +0.66%

On adoption of AIFRS on 1 October 2005 the ANZ StEPS issue was reclassified from equity to debt, however, it continues to be classified as Tier 1 capital for regulatory purposes.

Buy-Back of Ordinary Equity

The Group commenced an on-market buy-back of \$350 million of ordinary equity on 10 January 2005. The buy-back was completed 14 March 2006 with the Group repurchasing 15.7 million shares at an average cost of \$22.26 per share. Shares repurchased for the current half-year was 6.1 million shares at an average cost of \$24.02 per share, totalling \$146 million.

Prudential Issues - APRA's proposals on AIFRS changes and Tier 1 hybrid capital

APRA has recently released several announcements concerning the development of the prudential capital standards that will be adopted on 1 July 2006 post the adoption of AIFRS. The final format and content of these standards are still subject to on-going discussions between APRA and the financial industry.

AIFRS and capital deductions

In November 2005, APRA issued draft prudential standards and guidance notes outlining the proposed prudential capital treatment of various adjustments arising from the adoption of AIFRS. This statement was supplemented in March 2006 with the issue of a statement dealing with Capitalised Software Costs. Based upon these statements and discussions to date with APRA, the issues that most affect ANZ are:

APRA introduced transition rules requiring ADIs to report their prudential capital ratios up until 1 July 2006 based upon AGAAP existing at 30 September 2005, unless otherwise agreed with APRA. ANZ has agreed alternative arrangements with APRA and is reporting capital ratios based upon its financial statements subject to reversing the impact of recognising deferred pension liabilities, deferred fee revenue and cash flow hedge accounting of derivatives. At 1 October 2005 the impact on ACE capital of the various AIFRS adjustments, net of the transitional rules, was a reduction of \$48 million.

Effective 1 July 2006:

The transitional rules agreed with APRA will cease and a deduction for the pension liability (\$91 million as at 31 March 2006) will be required to be taken; and

Capitalised Software Costs are classified as an intangible asset under AIFRS and APRA has indicated that they be taken as a Tier 1 deduction. At 31 March 2006 ANZ had \$384 million of capitalised software costs (before tax).

APRA introduced further transitional rules in their April 2006 statement on Tier 1 Capital and Securitisation, where ADIs will calculate the impact of AIFRS on their capital base at 1 July 2006, and this amount, the IFRS transitional adjustment, will be added back to an ADIs capital base between 1 July 2006 and 1 January 2008. The IFRS transitional adjustment will effectively defer any adverse impact from adopting AIFRS accounting until introduction of BASEL II. ANZ is in discussion with APRA on this issue; based upon the items outlined above, ANZ would anticipate an add back to capital of approximately \$500 million as an IFRS transitional adjustment.

Tier 1 Capital and Securitisation

In April 2006, APRA issued draft prudential standards and guidance notes outlining what instruments and items will qualify for Tier 1 and Tier 2 capital, including sub-categories therein for hybrid Tier 1, Lower and Upper Tier 2. Material changes from the existing prudential standards are:

Introduction of a sub-category of Tier 1 capital being Fundamental Tier 1 which includes most components of shareholders equity, excluding hybrid Tier 1 instruments. This sub-category must be at least 75% of net Tier 1, which

effectively reduces the level of hybrid Tier 1 capital (Residual Tier 1) to 25% of net Tier 1 - previously it was 25% of Tier 1 before deductions.

Splitting hybrid Tier 1 into two sub-categories, Innovative and Non-Innovative Tier 1, with limits of 15% and 10% of net Tier 1 respectively. Transition rules will be available to ADI s up until January 2010 if the ADI is above these limits when first measured on 1 January 2008 based upon hybrid Tier 1 instruments on issue at 31 August 2005 (subject to certain conditions being met).

The Non-Innovative category is a new classification covering instruments that have the characteristics of non-cumulative, irredeemable preference shares without innovative capital features .

ANZ believes that its existing hybrid Tier 1 instruments will be classified as Innovative and as such ANZ expects that it will be applying for the transitional relief contemplated in the draft standard.

ANZ National Bank - Integration

The integration program that began in 2004 has been completed during the half. The key achievements in this half have been:

Transfer from Australia to New Zealand of the location and operation of ANZ Retail and related systems and functions to complete compliance with Reserve Bank of New Zealand (RBNZ) Conditions of Registration 13(i)

Completion of the successful migration to ANZ Group systems in Institutional, and Corporate Banking

Transition of all New Zealand processes and systems to Business-As-Usual management.

The integration objectives have been successfully achieved:

Business integration is complete. This has delivered integration of organisational and management structures, processes, systems, and premises for Institutional, Corporate Banking, Rural Banking, Retail Banking support functions, head office and central support functions which has facilitated:

establishing a common platform for future growth initiatives and further transformation of support services

growing our Institutional businesses under the ANZ brand

maintaining separately branded Retail and Corporate Banking businesses

strengthening our Rural banking business primarily under National Bank brand

merging and rationalising head office and support functions

aligning, to the extent possible, ANZ National and ANZ technology systems and functions.

Compliance with RBNZ Conditions of Registration 13(i) relating to location and operation of domestic systems in New Zealand. This delivered the transfer of ANZ Retail, HR/Payroll, and General Ledger systems to New Zealand, the augmentation of New Zealand-based IT support staff, and establishment of certain new New Zealand-based business functions

Customer satisfaction and retention targets have been achieved - revenue attrition relating to integration activities has continued to track favourably against estimates

Staff engagement has been achieved, and a single enterprise agreement has been established

Realisation of integration synergies has tracked in line with expectations.

Integration has successfully delivered a major program for ANZ National Bank:

30 workstreams comprising approximately 150 individual projects have progressed successfully in line with plans

Around 1300 system changes have been successfully implemented

At its peak over 600 staff were contributing to the program

126 property relocations were implemented

Project execution has been completed substantially by the ambitious target of December 2005, with the final major deliverables completed in February 2006.

The RBNZ finalised its Outsourcing Policy in January 2006. The Policy addresses the location and management of so called core functions requiring ANZ National Bank to maintain continuity of core functions - settlement, clearance, payment and risk position management - particularly in a stress or failure situation. Discussions continue with the RBNZ on outlining ANZ National Bank's approach to compliance with the Policy.

As the full impact of RBNZ requirements under the Conditions of Registration were clarified, the total cost of integration increased. The total cost of integration has been NZD239 million, in line with the estimate of NZD240 million advised in October 2005 and a modest increase on the original estimate of NZD220 million. Of this amount, approximately 5% has been met by a restructuring charge included in the calculation of goodwill; a further 10% relates to expenditure on equipment that has been capitalised and 22% relates to the cost of existing resources. Integration costs of NZD9 million were incurred in 2004, with the majority of integration costs of NZD139 million incurred in 2005. Expenditure of NZD51 million was incurred in this first half of 2006. These costs related primarily to systems and technology integration and non-branch expenses, with NZD46 million incurred in meeting RBNZ requirements, NZD19 million expenditure on integrating essential technology infrastructure and NZD174 million expenditure on the core business program of integration.

Revenue attrition relating to integration activities has continued to track favourably against expectations, with little attrition evident, and has stabilised at NZD34 million per annum. The cost synergies and revenue benefits, net of NZD12 million cost increase impact of RBNZ requirements, have increased to an estimated NZD120 million in 2007 (cost synergies NZD70 million and revenue synergies NZD50 million, with additional cost synergies identified).

ING Australia performance

The results in the table below show the performance of INGA on a fully comparable AIFRS basis, other than the half year to March 2005 which adopts AIFRS from 1 January 2005 (i.e. commencement of INGA's financial year). In addition, the results have been restated to exclude net profits from the New Zealand business that INGA sold in September 2005; these are included in New Zealand Businesses.

-
- (1) *Experience gains or losses arise where actual outcomes differ from valuation methods and assumptions*
- (2) *Remediation expenses represent costs incurred in rectifying historical unit pricing errors and fully compensating customers*
- (3) *Transitional tax relief for life insurance companies discontinued with effect from 1 July 2005*
- (4) *On 30 September 2005 ING Australia sold its New Zealand based businesses to a joint venture between ING Group and ANZ National Bank (further details are contained on page 13). As a result, prior period profits relating to the sold operations (Sep 2005: \$4 million; Mar 2005: \$4 million) are now reflected in the ING NZ joint venture*
- (5) *ANZ adopts the equity method of accounting for its 49% interest in INGA. The carrying value of the investment in INGA has been tested for impairment by comparing the carrying value with the recoverable amount of INGA. The Group engaged Ernst & Young ABC Limited (EY ABC) to provide an independent valuation of INGA for 31 March 2006 assessment purposes (the recoverable amount). The independent economic valuation was based on a discounted cash flow approach, with allowance for the cost of capital. Based on the results of this valuation, no change is required to the carrying value of the investment in INGA*
- (6) *Value of new business represents the present value of future profits arising from the new business written over the periods less the present value of the cost of capital applying to that new business. Consistent value factors are applied across all reporting periods*
- (7) *Cost to Income ratio is management expenses (excluding Remediation Expenses) / Total Income*
- (8) *Other Flows includes investment income net of taxes, fees and charges*

March 2006 half year compared to September 2005 half year

Highlights of the March 2006 half year included the launch of INGA's new retail risk product, OneCare and a marked improvement in net inflows of retail and mezzanine funds management products, up 92%. The increase was driven by strong inflows into INGA's flagship platform product, OneAnswer, and lower outflows across INGA's wealth management products. INGA also acquired majority ownership of Oasis Asset Management, a rapidly growing provider of badged platform products to non-aligned advisers.

Considerable progress was made in remediation of products and systems. This work is now separated from INGA's core business and is scheduled for completion by 31 December 2006.

INGA has maintained its market share rankings over the period. In Funds Management the improvement in net flows over the year has lifted INGA's ranking to 6th position as reported by Plan For Life. INGA maintained its 3rd place ranking in the employer super mastertrust segment as measured by DEXX&R. INGA's rankings in the life risk market for both new business (3rd) and Inforce premiums (4th) as measured by Plan for Life remained unchanged.

A core component of INGA's strategy is to grow the number of aligned advisers. Following the acquisition of the Synergy dealer group in December 2005 the total number of INGA aligned advisers grew to 1,093. According to the latest Money Management Survey, INGA would rank 4th in terms of number of advisers, up from 7th position in the previous half.

Profit after tax decreased by 20% on the September 2005 half year. Operating profit after tax was 7% higher, but more than offset by lower capital investment earnings. Significant factors affecting the result were:

Funds management income increased by 9% based on higher average funds under management underpinned by strong investment markets, and improved net flows in both personal investments and employer super businesses. The increased fee revenue driven by these factors was partly offset by reduced margins arising from higher commission payments.

Risk income increased by 11%. Operating margins relating to INGA's life risk business increased by 6% following better client retention and improved claims experience.

Funds management expenses increased by 9% due to higher spend on customer service. Life risk expenses increased due to costs incurred in developing the new OneCare product and other non-recurring items. Remediation expenses are at similar levels to the September 2005 half and should be completed by the end of the calendar year.

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Tax on operating profit decreased 44% due to favourable prior period tax adjustments in the current half, partially offset by the loss of transitional tax relief for life companies from 1 July 2005.

Capital investment earnings after tax declined 56% from the strong September 2005 half due to lower average capital employed in the business together with lower average yields. In 2005, ANZ partially hedged against volatility in this income stream and, as a result, gains in capital investment earnings were partially offset by hedge losses. ANZ ceased hedging capital investment earnings from 1 October 2005.

March 2006 half year compared to March 2005 half year

Profit after tax decreased by 25% compared to the same period last year. Operating profit after tax was 5% higher, but more than offset by lower capital investment earnings. Significant factors impacting the result were:

Funds management income increased by 18% based on higher average funds under management underpinned by strong investment markets, and improved net flows.

Risk income increased by 11% due to ongoing favourable claims experience in the March 2006 half, supported by continued strong sales of life insurance products through the ANZ network and direct marketing initiatives.

Expenses increased due to higher spend on customer service in funds management together with additional costs associated with the new OneCare product and other non-recurring items in the life risk business. Remediation expenses increased by 60% as activity increased.

Tax on operating profit increased by 20% due to the loss of transitional tax relief for life companies from 1 July 2005, and was partially offset by lower favourable prior period tax adjustments booked in the current half.

ING New Zealand joint venture

In September 2005 ANZ National Bank Limited entered into a joint venture with ING Insurance International Limited (INGII). The joint venture, ING (NZ) Holdings Ltd (INGNZ), is 49% owned by ANZ National Bank Limited and 51% owned by INGII.

The Group adopts the equity method of accounting for its 49% interest in INGNZ. As at 31 March 2006, the equity accounted value was NZD156 million (Sep 2005: NZD145 million). The change since September 2005 reflects the equity accounted profit for the half year.

The carrying value is subject to a recoverable amount test to ensure that this does not exceed its recoverable amount at the reporting date. The Group obtained an independent valuation at 31 March 2006 to ensure the carrying value did not exceed the recoverable amount. The valuation supported the carrying value and accordingly no write-down was made.

In the March 2006 half INGNZ contributed NZD12 million in equity accounted earnings. This was a NZD3.1 million reduction on the September 2005 half in which a total of NZD15.2 million (Mar 2005: NZD14.1 million) was reported between INGA (Sep 2005: NZD4 million; Mar 2005: NZD 4 million) and the New Zealand Businesses (Sep 2005: NZD11 million; Mar 2005: NZD10 million), prior to the establishment of the joint venture.

Deferred acquisition costs and deferred income

The Group recognises assets that represent deferred acquisition costs relating to the acquisition of interest earning assets, and liabilities that represent deferred income relating to income received in advance of services performed. Deferred acquisition costs - at 31 March 2006 the Group's assets included \$549 million (Sep 2005: \$524 million; Mar 2005: \$492 million) in relation to costs incurred in acquiring interest earning assets. During the half year, amortisation of \$138 million (Sep 2005 half: \$135 million; Mar 2005 half: \$123 million) was recognised as an adjustment to the yield earned on interest earning assets.

Deferred income - at 31 March 2006, the Group's liabilities included \$426 million (Sep 2005: \$92 million; Mar 2005: \$130 million) in relation to income received in advance. At March 2006, this includes \$5 million (Sep 2005: \$3 million; Mar 2005 \$4 million) deferred service type fees. These fees are deferred and will be amortised over the period of service under the AIFRS standard AASB 118: Revenue .

At March 2006, fee income of \$364 million that is integral to the yield of an originated financial instrument, net of any direct incremental costs, has been capitalised. This income is deferred and recognised against net loans and advances over the expected life of the financial instrument under the AIFRS standard AASB 139: Financial Instruments: Recognition and Measurement .

The balances of deferred acquisition costs and deferred income at period end were:

	Deferred Acquisition Costs(1)		Deferred Income		
	Mar 06	Sep 05	Mar 05	Mar 06	Sep 05
	\$M	\$M	\$M	\$M	\$M
Personal Banking Australia	155	153	151	90	32

Institutional	1		2	(2)
Other(2)	3	11	3	3
Total	138	168	135	167

(1) Costs capitalised during the half exclude brokerage trailer commissions paid, relating to the acquisition of mortgage assets

(2) Includes Group Centre, Corporate Australia, INGA and Asia Pacific

Software capitalisation

At March 2006, the Group's intangibles included \$384 million (Sep 2005: \$381 million; Mar 2005: \$401 million) in relation to costs incurred in acquiring and developing software. During the March 2006 half year, amortisation expense of \$56 million (Sep 2005 half: \$64 million; Mar 2005 half: \$57 million) was recognised.

	Half year Mar 06 \$M	Half year Sep 05 \$M	Half year Mar 05 \$M	Movt Mar 06 v. Sep 05 %	Movt Mar 06 v. Mar 05 %

(1) ANZ has reduced the September 2005 profit after tax by \$46 million (Mar 2005: \$15 million increase) to bring the result for that period to an AIFRS basis that is fully comparable with March 2006 figures (refer pages 13 to 15), allowing readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on

the basis of impracticability. In the March 2006 half ANZ has classified the \$113 million (\$79 million after tax) settlement of the NHB insurance matter and the \$14 million after tax settlement of warranty claims on Lloyds TSB plc (tax on warranty settlement: \$nil) as significant items. In the September 2005 half ANZ classified \$14 million after tax profit on the sale of NBNZ life and funds management businesses as a significant item (tax on gain on sale of NBNZ life and funds management businesses: \$nil). ANZ excludes significant items to eliminate the distorting effect of one-off transactions on the results of its core business (refer page 13). In the March 2006 half ANZ has classified \$13 million after tax profit (Sep 2005: \$12 million; Mar 2005 \$19 million) on derivatives entered into to manage interest rate and foreign exchange risk on funding instruments, not designated as accounting hedges, ineffective portions of cash flow hedges, profit or loss on disposal of investment securities, and fair value movement in bonds and notes designated at fair value as a non-core item. ANZ excludes volatility associated with fair value movements on these transactions to provide a better indication of the core business performance (tax on hedge gains/losses \$5 million (Sep 2005: \$5 million; Mar 2005: \$8 million)). In the March 2006 half ANZ has incurred \$26 million after tax ANZ National Bank incremental integration costs (Sep 2005 half: \$35 million; Mar 2005 half: \$17 million). Tax on ANZ National Bank incremental integration costs is \$13 million (Sep 2005: \$18 million; Mar 2005: \$8 million). ANZ National Bank incremental integration costs are excluded to better reflect the core cost base and assist analysis of the cost base following completion of the integration (refer page 13)

(2) ANZ has removed the impact of exchange rate movements to provide readers with a better indication of the business unit performance in local currency terms. Retranslation is net of revenue hedge earnings

The Group from time to time modifies the organisation of its businesses to enhance the focus on delivery of specialised products or services to customers. Prior period numbers are adjusted for such organisational changes to allow comparability. The significant changes since 30 September 2005 have been:

Non-Continuing Business - The Non-Continuing Business comprising the London headquartered project finance and certain structured finance transactions that ANZ has exited as part of its de-risking strategy has been removed from Institutional and reported as a separate business unit.

Personal Banking - Within Personal banking Wealth Management has been renamed Investment Insurance Products.

There were also a number of minor restatements as a result of customer segmentation, changes to internal transfer pricing methodologies and the realignment of support functions.

ANZ has netted inter-business unit expenses and inter-business unit income and reported as an expense for business unit profitability purposes.

Personal Banking Australia

Brian Hartzler

March 2006 half year compared to September 2005 half year

Profit after tax increased 12%, underpinned by strong loan and deposit growth (balances increased 6% in both categories) while maintaining a disciplined approach to pricing. Overall returns on risk adjusted assets increased, with margin growth in higher risk products offsetting the expected rise in bad debt costs.

Balance sheet growth drove the double digit earnings growth in Mortgages and Consumer Finance, while Rural Commercial and Agribusiness benefited from an improved credit environment. Banking Products continued to grow the deposit book above system levels. Investment & Insurance Products experienced strong growth from financial planner sales and other direct investment businesses and benefited from a 7% increase in INGA income.

Significant aspects to the result were:

Overall net interest income increased 5%. Mortgages and Rural Commercial and Agribusiness Products net interest income grew 6% in line with balance sheet growth as margins were held. Consumer Finance net interest income increased 6% with strong balance sheet growth of 10% partly offset by margin decline driven by strong growth in the lower rate MasterCard product. Banking Products net interest income increased by 3% with good deposit growth of 6% being partly offset by ongoing migration into lower margin products within the portfolio.

Other operating income increased 5%. Mortgages grew other income 28%, while Consumer Finance was relatively flat. Banking Products grew other income by 5% from higher numbers of transaction accounts. Financial planning income was up 11% from higher sales volumes. The contribution from the INGA increased following strong funds management and life risk performances. The underlying momentum in this business remains sound as market conditions are favourable and the life business continues to experience low levels of claims.

Operating costs increased 2% as the footprint expanded with 11 new branches and 134 more ATMs. This contributed to a 5% increase in premises costs and a 5% increase in personnel costs, with the latter also affected by annual salary rises. Computer costs fell as the previous half included charges for branch software now amortised fully.

Credit costs reduced 12% overall as there was a \$16 million beneficial adjustment in collective provisions due to a revision to oil price risk. Despite strong balance sheet growth individual provisions were flat reflecting seasonally

lower March half year charges.

March 2006 half year compared to March 2005 half year

Profit after tax increased 16% with double digit profit growth recorded by all Personal businesses driven by a strong income performance.

Operating income increased 11% driven by strong volume growth across all businesses partly offset by margin contraction as higher growth was experienced in lower margin business. Double digit income growth was achieved by Mortgages (14%), Consumer Finance (13%) and Investment & Insurance Products. Sound revenue growth was achieved in Banking Products revenues (8%) and Rural Commercial and Agribusiness (7%). All businesses benefited from the investment in staff through the continued expansion of the footprint.

Operating expenses increased 7%, resulting from higher numbers of front line staff to service increased business volumes and ongoing investment in the branch network.

Credit impairment rose largely due to increases in overall lending volumes and the planned higher relative growth of Consumer Finance businesses, partly offset by a lower level of collective provisioning due to a revision to oil price risk.

(1) *Other includes Executive, Infrastructure and Client Relationship Group costs, not all of which are allocated to the Institutional businesses*

Institutional

Steve Targett

March 2006 half year compared to September 2005 half year

Profit after tax increased by \$25 million (5%), as growth momentum established in the last half continued to strengthen. Strategic initiatives, aimed at tightening client focus and increasing solution driven sales, began to deliver improved results across the Institutional businesses this half.

Non-lending revenue increased reflecting the success of continuing efforts to move the mix of business from the debt product with disciplined use of capital and strong risk management. The Client Relationship Group actively leads the delivery of our client solutions.

Profit from Markets increased by 13% driven by a strong performance in New Zealand where currency and interest rate moves created favourable trading conditions, compared to the less volatile environment and softer corporate demand in the Australian market. Trade and Transaction Services increased 11% with high growth in the International Payments and Clearing Services business, strong offshore Trade Finance growth and the release of revenue that related to prior years. Corporate and Structured Financing profit increased 20% with a lower credit impairment charge resulting from the write-back of individual provisions during the half. Asset growth in the Debt Products Group was offset by competitive pressures and tighter credit spreads resulting in reduced margins and a 7% decrease in earnings. Credit quality remains sound.

Significant factors affecting the result were:

Net interest income grew by \$59 million (12%). Trade and Transaction Services increased \$29 million including increased deposit volumes and the release of revenue that related to prior years, partly offset by reduced lending volumes in International Trade Finance. Markets increased \$11 million, Debt Products Group increased by \$7 million, with lending growth of 2% offset by tighter spreads and competition causing margin erosion and Corporate and Structured Financing increased \$12 million.

Overall loan volumes increased 7%, while deposit volumes increased 12%. Net interest margin decreased by 4 basis points.

Other operating income increased \$13 million (2%). Markets increased \$27 million (9%) on the back of a strong New Zealand result and Trade and Transaction Services increased \$5 million. Corporate and Structured Financing other operating income reduced \$13 million (14%), with strong contributions from structured finance and private equity offset by reduced advisory fees following the particularly strong September 2005 half. Other operating

income reduced by \$5 million in Debt Products Group, driven by competitive pricing pressure.

Operating expenses have increased by 7%, reflecting the investment being made in new growth initiatives and higher non-lending losses. Salary expenses increased 4%, and staff numbers increased by 1%. Institutional is building its staff capabilities to facilitate greater penetration of new business opportunities.

Provision for credit impairment increased by \$3 million. The individual provision charge was \$27 million higher, with two large new provisions in the half in Australia and New Zealand offset by recoveries. The collective provision charge reduced by \$24 million with a reduction in the provision held for oil price risk, the impact of the increase in individual provisions resulting from the down-grade of two large exposures to non-accrual and a stable risk profile on our lending assets. Net impaired loans have increased by \$126 million due largely to two corporate accounts in Australia and New Zealand.

March 2006 half year compared to March 2005 half year

Profit after tax increased by \$36 million (8%).

Operating income increased by 12%. Revenue in Trade and Transaction Services increased \$54 million on the back of stronger trade flows through Asia and the UK, increased International Payments foreign exchange revenue and the prior year income booked in the March 2006 half. Markets revenue increased \$58 million with stronger client and trading activities in Australia, New Zealand, the Pacific and Asia. Debt Products Group increased 1% with higher revenue and lending volume growth offset by margin contraction.

Operating expenses increased 12%. Staff costs were higher, due to investment in people, new capabilities and systems.

Provision for credit impairment increased \$12 million. Individual provisions increased reflecting the down-grade of two large accounts during the current half. Collective provision reduced reflecting the factors mentioned above.

(1) For a reconciliation of the New Zealand Businesses results to the New Zealand Geographic results refer page 55

New Zealand businesses

Graham Hodges

March 2006 half year compared to September 2005 half year

Profit after tax for the New Zealand Businesses increased NZD78 million (27%) over the September 2005 half, assisted by a NZD63 million after tax reduction in the Provision for credit impairment. Profit before provisions increased 5%.

ANZ Retail, National Bank Retail and Corporate Banking posted strong profit growth with increases of 7%, 17% and 147% respectively. Solid asset growth in these businesses was partly offset by lower net interest margins due to price competition, increased wholesale funding, and continued unfavourable product mix with switching from variable rate to fixed rate mortgages. Profit before provisions grew by 5% in National Bank Retail and 4% in Corporate Banking. Profit before provisions in ANZ Retail and Rural Banking was flat, reflecting the competitor-driven net interest margin reduction and a seasonally stronger second half in Rural Banking. The results of the Retail Banks also include the liability for costs and compensation to customers relating to a Commerce Commission action on disclosure of optional issuer fees (NZD10 million) and the cost of the operation of domestic systems relocated to New Zealand under the integration program (NZD5 million).

Key influences on the result include the following:

Net interest income increased 4% (NZD31 million). Lending volumes increased 7% in NZD terms with growth in National Bank Retail (5%), ANZ Retail (8%), Corporate Banking (11%) and Rural (6%). NZD deposit volumes increased 5% in customer businesses with solid deposit growth in Corporate Banking (14%) and ANZ Retail (4%), where the On-line Call product was particularly successful. Deposits and other borrowings in Treasury reduced with other sources of wholesale funding increased to fund asset growth across the New Zealand businesses.

Net interest margins have reduced 7 basis points impacted by competition and customer migration from variable rate to fixed rate mortgages, increased requirement for wholesale funding, changes in deposit mix with growth in lower margin call (including ANZ On-line Call) and term deposit products. Lending margins in Rural decreased slightly reflecting competition. These factors were partially offset by slightly stronger deposit margins.

Other operating income reduced marginally. Other income in National Bank Retail increased 12% relating to transactional and credit card accounts. Other income in Corporate Banking reduced, mainly in fees, with these being lumpy and seasonal in nature. Fees in Rural Banking were flat as were fees in ANZ Retail. Treasury other income reduced \$2 million but was offset by an increase in net interest income.

Operating expenses increased 1%. Salary increases, a small increase in numbers of front-line staff, and the

cost of the Commerce Commission settlement (NZD10 million) were largely offset by a 6% reduction in the number of support staff and control of discretionary spend.

Provision for credit impairment reduced by NZD94 million. The collective provision reduced by NZD31 million, with increased lending volumes being offset by a lower provision for oil price risk, and an improved credit risk profile (an increased proportion of low risk residential and rural lending). The individual provision charge reduced by NZD63 million largely as a result of provisioning for two isolated corporate accounts and exposures to the apple and pear export industry in the preceding September half. Net impaired loans reduced NZD36 million as a result of the generally benign credit conditions.

March 2006 half year compared to March 2005 half year

Profit after tax increased 14%, with growth in National Bank Retail (16%), Rural Banking (5%), and Corporate Banking (49%). Profit in ANZ Retail was flat. Profit before provisions grew by 3% overall with growth in National Bank Retail (6%), Corporate Banking (8%) and Rural Banking (5%), partly offset by a reduction in ANZ Retail (-5%)

Net interest income increased 5%. Lending volumes increased 14% in NZD terms, with growth in all businesses, whilst deposits grew 8% in National Bank Retail and ANZ Retail. Interest margin has declined by 26 basis points reflecting the impact of competition, in particular the mortgage price war in the March 2005 half, product switching from variable rate to fixed rate mortgages, and a change in funding mix to higher rate deposit and wholesale products.

Other operating income increased 6%. Other income in National Bank Retail increased 20%, relating to transactional and credit card accounts. Other income in Corporate Banking reduced, mainly in fees, with these being lumpy in nature. Fees in Rural Banking and ANZ Retail also reduced slightly.

Operating expenses increased 7% with salary increases and a small increase in staff numbers reflecting an increased investment in frontline staff, and the NZD10 million cost associated with the Commerce Commission settlement and NZD5 million domestic system costs as discussed above.

Provision for credit impairment reduced NZD53 million. The individual provision charge reduced as a result of the provisioning for a number of isolated corporate accounts in the March 2005 half, and recoveries of previously provisioned corporate accounts in the current half. The collective provision charge reduced as a result of a lower provision for oil price risk, and an improved credit risk profile with lending growth mainly in low risk residential mortgages.

Corporate Australia

Mark Paton

March 2006 half year compared to September 2005 half year

Profit after tax increased by 9%, driven by strong balance sheet growth and continued improvement in the credit quality of the lending portfolio, partially offset by the impact of competitive pressures on margins and fees. The business franchise remains strong with leading levels of customer satisfaction and low propensity to switch, as well as very high levels of employee engagement. The business model has been further enhanced by the ongoing expansion of the Wall Street to Main Street (WSTMS) proposition for the Corporate market, the newly created Small Business segment and our industry specialisation models. ANZ received the CFO Magazine Business Bank of the Year award for 2005.

Significant influences on the result were:

Net interest income increased 3% driven by growth in both average lending (6%) and average deposits (7%). The solid growth in average lending (Corporate Banking 7%, Business Banking 6% and Small Business Banking 16%) and average deposit volumes (Corporate Banking 7%, Business Banking 7% and Small Business Banking 10%) was the result of a continued focus on new customer acquisition as well as growth from existing customers. Key factors in achieving growth were ANZ's leading customer service proposition, continued investment in people and process simplification, as well as the industry and local market specialisation approach to customers.

The net interest margin declined by 6 basis points, largely driven by ongoing competitive pressures in the lending book, as well as some moderate compression of margins on the deposit portfolio.

Other external operating income increased 4%, largely from continued growth in the WSTMS proposition, including private equity exit profits, with marginal growth in other fees. The WSTMS proposition continues to grow our portfolio and future earnings potential, with 13 deals closing this half, bringing the total Corporate Private Equity portfolio value to over \$200 million.

Operating expenses increased 8% including:

the impact of an expense refund relating to prior periods in the September 2005 half year;

continued investment in front line staff (particularly in Small Business) and the WSTMS proposition and the creation of new Corporate Banking regions; and

higher branch costs as a result of our increased branch footprint.

After adjusting for these factors Operating expenses, including the impact of annual salary rises and on-going commitment to the Graduate program, were well managed at 2%.

The benefits of our on-going productivity agenda are reflected in the increase in revenue per average FTE. Productivity gains in back and middle office operations and shared service areas have been used to partially fund the on-going investment program. The cost to income ratio remains low at 40% in line with last half, allowing for the impact of the expense refund in September 2005.

Credit quality remains sound and the overall quality of our credit portfolio has improved over the period. This reflects the strong focus on risk management and compliance in both the Business Banking and Corporate Banking segments and the impact of the continued de-risking of our portfolio, as well as the strength of the economy and business confidence. Provision for credit impairment decreased by 52% and impaired loans as a percentage of net loans and advances decreased to 0.12% over the period.

March 2006 half year compared to March 2005 half year

Profit after tax increased 16%, with solid growth in all businesses. Net interest income increased 7% due to growth of 10% in average lending and 11% growth in average deposit volumes. Net interest margins declined 9 basis points due principally to competitive pressures. Other external operating income increased by 9% due to an increase in advisory and ANZ Online fee income. Operating costs increased by 8% mainly due to continued investment in frontline staff and salary increases. Provision for credit impairment decreased by 51% and net impaired loans as a percentage of net advances reduced by 52% reflecting the improvement in the quality of the credit portfolio.

Esanda and UDC

David Hisco

A leading provider of vehicle and equipment finance, rental services and fixed and at call investments. Operates in Australia as Esanda and Esanda FleetPartners and in New Zealand as UDC and Esanda FleetPartners

March 2006 half year compared to September 2005 half year

Profit after tax decreased by 4%. Profit growth in Australia of 9% was offset by a 31% profit reduction in New Zealand which was impacted by structural changes made last year and competitive pressure. Overall the Australian business continues to provide opportunities for future profit growth. A number of actions are underway in the New Zealand businesses to return to profitable growth.

Significant influences on the result were:

Net interest income declined 2%, with a 3% increase in lending volumes in Australia from solid new business writings offset by an 11% reduction in volumes in New Zealand. A 14 basis point decline in margins resulted from the run-off of higher yielding loans during the half which were replaced by lower margin new business. Pricing initiatives have been put in place to stabilise margins and grow revenue, the impact of which will flow through in the March 2007 half.

Other operating income decreased 40%, due to a \$6 million impact from a fall in second-hand car prices as well as the inclusion of a \$7 million gain in the September 2005 half year resulting from the alignment of revenue recognition on leases in the New Zealand Fleet business with Group accounting policies.

Operating expenses increased by 2% due to annual salary increases. These increases were partly offset by a \$6 million reduction in indirect taxes.

Provision for credit impairment decreased by 27% despite a 1% increase in lending volumes. Individual provision charge was lower compared to the 2005 half, largely associated with improvement in the commercial loan portfolio and the exited aircraft lease business (\$9 million) in 2005.

March 2006 half year compared to March 2005 half year

Profit after tax decreased by 20%. Net interest income was flat with a 5% increase in lending volumes offset by a 17 basis point margin reduction. Other operating income decreased 32% due to a \$10 million impact from the fall in second-hand car prices. Operating expenses were flat with an increase in personnel costs due to annual salary increases offset by a \$6 million reduction in indirect taxes. Provision for credit impairment increased 17% and individual provision charge increased \$11 million with an individual loss of \$5 million in the March 2006 half.

Asia Pacific

Bob Edgar

Provision of retail and corporate banking services in the Pacific Region and Asia, including ANZ's share of PT Panin Bank in Indonesia; this business excludes Institutional businesses, which are a matrix responsibility and included in Institutional business unit results. March 2006 half year compared to September 2005 half year

Profit after tax increased by 5%. Excluding the impact of exchange rate movements profit increased 1%. A strong result in the Pacific (up 23%) was partly offset by lower equity accounted earnings for PT Panin Bank.

Excluding exchange rate movements the main drivers of the results were:

Net interest income increased 7% driven by a 12% growth in lending volumes. Growth in lending was particularly strong in Fiji, Samoa and PNG.

Other external operating income reduced 4%. Fee growth of 7% largely in the Cards business in Indonesia was offset by lower equity accounting earnings for PT Panin Bank (\$4 million) and a reduction in foreign exchange income (\$2 million) from the particularly strong September 2005 half.

Operating expenses increased 9% as a result of costs associated with building partner relationships in China and Vietnam, the first full half of operating costs in Cambodia, and additional customer facing staff in the Pacific.

Provision for credit impairment reduced by \$4 million. The individual provision charge reduced largely as a result of the write-back of provisioning in Fiji.

Income tax expense was flat.

March 2006 half year compared to March 2005 half year

Profit after tax increased 18%. Net interest increased 20% driven by 28% growth in lending volumes and a 14% growth in deposit volumes. Other operating income increased slightly with strong card and other fee growth and increased foreign exchange revenue being partly offset by reduced equity accounted income from PT Panin. Operating expenses increased 23% largely as a result of advancing the partnership business agenda in Asia and additional customer facing staff in the Pacific. The impact of exchange rate movements was less than 3%.

Non-continuing businesses

Steve Targett

Comprises the London headquartered project finance business, the run-off of New Zealand conduit transactions and certain structured finance transactions that ANZ has exited as part of its de-risking strategy

Total employees		5	9	-100%	-100%

March 2006 half year compared to September 2005 half year

Profit after tax reduced by \$33 million (52%). Significant factors affecting the result were:

Net interest income reduced by \$25 million reflecting a 48% (\$0.8 billion) reduction in lending volumes from the September 2005 half.

Other operating income of \$18 million largely represents a \$12 million release of provisions created on the sale of the London headquartered project finance business following the expiry of certain warranties provided to Standard Chartered Bank and a \$4 million gain on sale of power assets.

Operating expenses reduced by \$7 million, with the remaining expenses being legal and restructuring costs associated with the legacy balances in the London headquartered project finance business.

Provision for credit impairment credit decreased by \$45 million. The individual provision credit in the September 2005 half reflected the net recovery of \$30 million on legacy project finance assets. The remainder of the credit impairment credit, \$23 million credit in the collective provisions resulted from the significant reduction in risk as the legacy assets matured or were sold.

March 2006 half year compared to March 2005 half year

Profit after tax reduced by \$33 million (52%). Operating income reduced by \$4 million, with reduced net interest income resulting from a \$2.3 billion reduction in lending volumes partly offset by an \$11 million increase in other operating income. The \$18 million other operating income in the current half was largely from the release of provisions created on the sale of the London headquartered project finance business, whilst the March 2005 half included \$4 million profit on the sale of those businesses.

Operating expenses reduced by \$15 million with the London headquartered project finance business being sold part way through the March 2005 half. Provision for credit impairment reduced by \$36 million. The March 2005 half included a net recovery of \$11 million in individual provisions and a \$33 million credit in the collective provision charge resulting from the significant reduction in risk as legacy assets matured or were sold through that half.

March 2006 half year compared to September 2005 half year

The result for the Group Centre was \$27 million profit compared with \$16 million in the September 2005 half. Significant influences on the result were:

Movements in the average NZD exchange rate resulted in a \$9 million after tax increase in income on contracts put in place to hedge NZD denominated earnings. These gains were partly offset in New Zealand Businesses, and the New Zealand component of the Institutional and Esanda (UDC) businesses. The gains on the NZD contracts were partly offset by the maturity of contracts put in place to hedge USD revenues, which resulted in a decline of \$6 million after tax.

Other operating income decreased \$4 million with lower capital investment earnings (net of hedge costs) from INGA. Capital investment hedges were terminated in October 2005.

Operating expenses reduced \$22 million with lower non-incremental New Zealand businesses System Integration costs and other project costs.

Income tax expense increase reflects a tax benefit booked in the prior half in respect of issue costs for the 2 for 11 rights issue, and lower INGA non-taxable Capital investment earnings.

March 2006 half year compared to March 2005 half year

The half year profit of \$27 million was \$22 million higher than the March 2005 half. Revenue increased \$12 million with higher net interest offset by lower capital investment earnings (net of hedge earnings) in INGA following the payment of dividends. External operating expenses reduced 3% with the inclusion of provisioning for cheque conversion fraud in the March 2005 half.

	1,731	1,583	1,568	9%	10%

(1) ANZ has reduced the September 2005 profit after tax by \$46 million (Mar 2005: \$15 million increase) to bring the result for that period to an AIFRS basis that is fully comparable with March 2006 figures (refer pages 13 to 15), allowing readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability

In the March 2006 half ANZ has classified the \$113 million (\$79 million after tax) settlement of the NHB insurance matter and the \$14 million after tax settlement of warranty claims on Lloyds TSB plc (tax on warranty settlement: \$nil) as significant items. In the September 2005 half ANZ classified \$14 million after tax profit on the sale of NBNZ life and funds management businesses as a significant item (tax on gain on sale of NBNZ life and funds management businesses: \$nil). ANZ excludes significant items to eliminate the distorting effect of one-off transactions on the results of its core business (refer page 13)

In the March 2006 half ANZ has classified \$13 million after tax profit (Sep 2005: \$12 million; Mar 2005 \$19 million) on derivatives entered into to manage interest rate and foreign exchange risk on funding instruments, not designated as accounting hedges, ineffective portions of cash flow hedges, profit or loss on disposal of investment securities, and fair value movement in bonds and notes designated at fair value as a non-core item. ANZ excludes volatility associated with fair value movements on these transactions to provide a better indication of the core business performance (tax on hedge gains/losses \$5 million (Sep 2005: \$5 million; Mar 2005: \$8 million))

In the March 2006 half ANZ has incurred \$26 million after tax ANZ National Bank incremental integration costs (Sep 2005 half: \$35 million; Mar 2005 half: \$17 million). Tax on ANZ National Bank incremental integration costs is \$13 million (Sep 2005: \$18 million; Mar 2005: \$8 million). ANZ National Bank incremental integration costs are excluded to better reflect the core cost base and assist analysis of the cost base following completion of the integration (refer page 13)

(1) ANZ has reduced the September 2005 profit after tax by \$65 million (Mar 2005: \$29 million decrease) to bring the result for that period to an AIFRS basis that is fully comparable with March 2006 figures (refer pages 13 to 15) allowing readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability

In the March 2006 half ANZ has classified the \$113 million (\$79 million after tax) settlement of the NHB insurance matter as a significant item. ANZ excludes significant items to eliminate the distorting effect of one-off transactions on the results of its core business (refer page 13)

In the March 2006 half ANZ has classified \$9 million after tax profit (Sep 2005: \$12 million; Mar 2005 \$19 million) on derivatives entered into to manage interest rate and foreign exchange risk on funding instruments, not designated as accounting hedges, ineffective portions of cash flow hedges, profit or loss on disposal of investment securities, and fair value movement in bonds and notes designated at fair value as a non-core item. ANZ excludes volatility associated with fair value movements on these transactions to provide a better indication of the core business performance (tax on hedge gains/losses \$3 million (Sep 2005: \$5 million; Mar 2005: \$8 million))

March 2006 half year compared to September 2005 half year

Profit after tax increased by 8%. Cash profit increased 7% (refer pages 13 to 15 for an explanation of non-core items and AIFRS adjustments). Significant influences on cash profit were:

Net interest income increased by 6%. Average net advances increased 5%, driven by growth in Personal Banking Australia 6%, Corporate Australia 7% and Institutional 4%. Average deposit and other borrowing volumes increased 5%, driven by Personal Banking Australia 5%, Corporate Australia 7%, Group Treasury 13% and Esanda 7%. Net interest margin decreased 3 basis points with a change in the asset mix, increased volumes of wholesale funding and competitive pressures in the lending books of Mortgages, Institutional and Corporate Banking. Institutional Australia's margin increased as Trade and Transactional Services included the release of revenue that related to prior years and Market's net interest income increased \$22 million due to a reduction in funding costs associated with unrealised trading gains resulted in a higher proportion of revenue being booked as interest. Personal Banking Australia net interest margin was unchanged.

Fee income decreased by \$1 million. Personal Banking Australia increased 4% underpinned by growth in Mortgages, Banking Products, from higher numbers of transaction accounts, and financial planning fees were up from higher sales volumes. Institutional Australia decreased \$17 million mainly due to reduced advisory fees in Corporate and Structured Financing following the particularly strong September 2005 half.

Other operating income decreased \$23 million. Markets decreased \$22 million, offset by higher net interest income. Excluding this impact, other operating income decreased 2% due to a \$6 million impact from a fall in the value in second-hand car prices in Esanda and \$3 million lower contribution from INGA, net of capital hedges.

Operating expenses increased by 2% reflecting an increased investment in frontline staff and the footprint expansion, with 11 new branches and 134 more ATMs, annual salary increases, and higher non-lending losses in Institutional partly offset by lower computer expenses in Operations, Technology and Shared Services and Personal Banking Australia and a \$6 million reduction in indirect taxes in Esanda.

Provision for credit impairment decreased by 15% (\$39 million) driven by reduced provisions held for non-customer specific oil price risk. The impact of volume growth was partly offset by improved credit quality in most portfolios. The individual provision charge increased \$18 million with an increase in Institutional, due to two large new provisions, partly offset by a lower charge in Esanda largely associated with improvement in the commercial loan portfolio and the exited aircraft lease business in 2005.

March 2006 half year compared to March 2005 half year

Profit after tax increased 15%. After adjusting for the impact of non-core items and AIFRS 2005 Adjustments (refer pages 13 to 15), cash profit increased 9%; net interest income increased 10% as average net advances increased 12% and average deposits and other borrowings increased 10% partly offset by an 11 basis point margin contraction. Fee income increased 11% with growth in Personal Banking Australia (13%), Institutional (14%) and Corporate (10%). Operating expenses increased 5% reflecting the 5% increase in staff numbers and the ongoing investment in the branch network. Provision for credit impairment increased 12% as the individual provision charge increased \$68 million, due largely to recoveries in the March 2005 half, two large new provisions in Institutional and the planned risk mix shift in Personal Banking. Collective provision reduced largely as a result of the reduced provisions held for non-customer specific oil price risk.

(1) ANZ has reduced the September 2005 profit after tax by NZD11 million (Mar 2005: NZD25 million increase) to bring the result for that period to an AIFRS basis that is fully comparable with March 2006 figures (refer pages 13 to 15) allowing readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

In the March 2006 half ANZ has classified the \$14 million after tax settlement of warranty claims on Lloyds TSB plc (tax on warranty settlement: \$nil) as a significant item. In the September 2005 half ANZ classified \$14 million after tax profit on the sale of NBNZ life and funds management businesses as a significant item (tax on gain on sale of NBNZ life and funds management businesses: \$nil). ANZ excludes significant items to eliminate the distorting effect of one-off transactions on the results of its core business (refer page 13)

In the March 2006 half ANZ has incurred \$26 million after tax ANZ National Bank incremental integration costs (Sep 2005 half: \$35 million; Mar 2005 half: \$17 million). ANZ National Bank incremental integration costs are excluded to better reflect the core cost base following completion of the integration (refer page 13)

(1) Refer footnote 1 on page 51

March 2006 half year compared to September 2005 half year

Profit after tax increased by 25% in NZD terms. After adjusting for the impact of non-core items and AIFRS 2005 adjustments (refer pages 13 to 15), profit after tax increased 32% (NZD114 million) impacted by a NZD92 million (NZD62 million after tax) reduction in the Provision for credit impairment charge. Profit before provisions increased 14% after adjusting for the impact of AIFRS 2005 adjustments and non-core items.

Key influences on cash profit include:

Net interest income increased NZD50 million including an additional NZD39 million resulting from the replacement of intercompany debt with preference share capital as a result of amendments to thin capitalisation rules.

Lending volumes increased 6% in NZD terms with growth in New Zealand Businesses (7%) and Institutional (9%) offsetting reductions in UDC (-5%) and non-continuing business (-64%). Customer deposit volumes increased 5% in New Zealand businesses in NZD terms. Net interest margins declined 4 basis points despite a 9 basis point (approximately \$40 million) benefit from the additional capital. After adjusting for this, the 13 basis point reduction was as a result of the migration of customers from variable to fixed rate loans, higher funding costs from growth in wholesale debt and lower margin deposits, and margin reductions in Rural and UDC.

Fee income was flat with a 3% increase in New Zealand Businesses, offset by lower fees in Institutional with reduced activity in structured leasing, and in non-continuing businesses.

Other operating income was NZD39 million higher, largely due to the strong result in the markets business in Institutional. This was partly offset by a NZD10 million reduction in UDC, reflecting a one-off benefit (NZD7 million) in the September half's result from an accounting policy change.

Operating expenses were flat. The cost of the settlement with the Commerce Commission action over disclosure of optional issuer fees (NZD10 million), salary increases and a small increase in numbers of front-line staff were offset by a 6% reduction in the number of support staff and tight control over discretionary spend.

Provision for credit impairment reduced by NZD92 million. The collective provision reduced NZD31 million, with increased lending volumes being offset by a lower provision for oil price risk, and an improved credit risk profile (an increased proportion of low risk residential and rural lending). The individual provision charge reduced by NZD61 million largely as a result of provisioning for two isolated corporate accounts and exposures to the apple and pear export industry in the September half. Net impaired loans reduced NZD4 million as a result of the generally benign credit conditions.

March 2006 half year compared to March 2005 half year

Profit after tax increased by 20% in NZD terms. After adjusting for the impact of AIFRS 2005 adjustments and non-core items (refer pages 13 to 15), cash profit increased 16% (NZD65 million) impacted by a NZD24 million after tax reduction in the Provision for credit impairment charge. Profit before provisions increased 12% after adjusting for the impact of non-core items. The following explanations exclude the impact of non-core items

Net interest income increased 7% including 3% as a result of the replacement of intercompany debt with capital as discussed above. Lending volumes increased 13% in NZD terms. Net interest margins have reduced 18 basis points, reflecting the impact of competition, in particular the mortgage price war in the March 2005 half, product switching from variable rate to fixed rate loans, and a change in funding mix to more expensive deposit and wholesale products.

Other operating income increased 68% largely due to the strong result in the markets business in Institutional.

Operating expenses increased 9% with salary increases, an increase in front line staff, and the cost of the Commerce Commission settlement (NZD10 million), partly offset by reduced support staff.

Provision for credit impairment reduced NZD36 million. The individual provision charge reduced as a result of provisioning for a number of isolated corporate accounts in the March 2005 half, and recoveries of previously

provisioned corporate accounts received in the current half. The collective provision charge reduced as a result of a lower provision for oil price risk and an improved credit risk profile, with lending growth mainly in lower risk residential mortgages.

(1) ANZ has reduced the September 2005 profit after tax by \$2 million (Mar 2005: \$3 million) to bring the result for that period to an AIFRS basis that is fully comparable with March 2006 figures (refer pages 13 to 15) allowing readers to see the impact on 2005 results for accounting standards that have only been applied from 1 October 2005. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability

March 2006 half year compared to September 2005 half year

Profit after tax increased 9%. After adjusting for AIFRS 2005 adjustments (refer pages 13 to 15) profit after tax increased by 7%. The depreciation of the AUD increased profit growth by 2% (\$2 million).

After adjusting for non-core items and exchange rate movements:

Net interest increased 13% driven by improved Treasury performance in Singapore and growth in lending and deposit volumes. Growth in lending was particularly strong in Fiji, Samoa and PNG with significant deposit growth achieved in Asia Markets.

Fee income increased 3% due to higher Cards volumes in Indonesia.

Other external operating income reduced 3% largely as a result of reduced equity accounted earnings in PT Panin Bank (\$4 million). Foreign exchange revenue was flat with the strong September 2005 half.

Operating expenses increased 8% as a result of costs associated with building partner relationships in China and Vietnam, the first full half of operating costs in Cambodia and new product specialists in Asia and additional customer facing staff in the Pacific.

Provision for credit impairment reduced by \$5 million. The individual provision charge reduced largely as a result of the write-back of provisioning on accounts in Fiji and Singapore.

Income tax expense increase reflects increased profit.

March 2006 half year compared to March 2005 half year

Profit after tax increased 31%. After adjusting for the impact of non-core items: profit increased 26%; operating income increased 23% with strong lending and deposit volume growth, higher Treasury earnings in Singapore, improved foreign exchange earnings and increased fee income. These were offset by lower equity accounted earnings from PT Panin Bank; operating expenses increased by 20% as investments were made to progress partnerships in Cambodia, China and Vietnam, together with the addition of specialist product skills in Asia and additional customer facing staff in the Pacific. The impact of exchange rate movements increased profits by 2%.

(1) ANZ has reduced the September 2005 profit after tax by \$35 million (Mar 2005: \$19 million decrease) to bring the result for that period to an AIFRS basis that is fully comparable with March 2006 figures (refer pages 13 to 15) allowing readers to see the impact on 2005 results for accounting standards that have only been applied from 1 October 2005. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability

In the March 2006 half ANZ has classified \$4 million after tax profit (Sep 2005: \$nil; Mar 2005 \$nil) on derivatives entered into to manage interest rate and foreign exchange risk on funding instruments, not designated as accounting hedges, ineffective portions of cash flow hedges, profit or loss on disposal of investment securities, and fair value movement in bonds and notes designated at fair value as a non-core item. ANZ excludes volatility associated with fair value movements on these transactions to provide a better indication of the core business performance (tax on Fair value hedge gains/losses \$2 million (Sep 2005: \$nil; Mar 2005: \$nil))

March 2006 half year compared to September 2005 half year

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

Profit after tax increased 12%. Cash profit reduced 28%. The impact of exchange rates was immaterial. Significant influences on the core result were:

Net interest income decreased 40% mainly due to reduced earnings on capital following a change in the New Zealand funding structure resulting in repayment of intragroup debt and a reduction in the non-continuing business.

Fee income increased 5%. Increases in lending fees in Corporate and Structured Financing and Trade and Transaction Services were offset by a reduction of \$5 million in other fees.

Other operating income increased \$26 million due largely to the profit on the sale of a power asset in the US and the settlement of warranties on the sale of the London headquartered project and structured finance business.

Operating expenses decreased 2%. The rise in staff numbers is attributable to increases in technology staff in India, however these costs were charged to other businesses.

The credit in Provision for credit impairment is due to the reduction in assets following the sale of the project and structured finance business and debt recoveries. The credit in the individual provisions charge reduced as a result of lower recoveries in the March 2006 half year. Net impaired loans reduced due to the realisation of a power exposure in the US.

March 2006 half year compared to March 2005 half year

Profit after tax increased 14%. Cash profit decreased 14%. Core operating income decreased by 15% due largely to reduced earnings on capital, and lower asset volumes following the sale of the project and structured finance business offset by profit on the sale of a power asset in the US and the settlement of sale warranties. Operating expenses decreased 13% due to a reduction in personnel costs following the sale of the project and structured finance business. The credit to individual provisions is due to the recovery of bad debts previously provided for. Net impaired loans have reduced due to the sale of a power asset in the US.

(1) *An explanation of the differences between accounting under current AGAAP (AIFRS) as opposed to previous AGAAP is set out on pages 13 to 15*

(2) *ANZ has reduced the September 2005 profit after tax by \$46 million (Mar 2005: \$15 million increase) to bring the result for that period to an AIFRS basis that is fully comparable with March 2006 figures (refer page 6), allowing readers to see the impact on 2005 results of accounting standards that have only been applied from 1 October 2005. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability. In the March 2006 half ANZ has classified the \$113 million (\$79 million after tax) settlement of the NHB insurance matter and the \$14 million after tax settlement of warranty claims on Lloyds TSB plc (tax on warranty settlement: \$nil) as significant items. In the September 2005 half ANZ classified \$14 million after tax profit on the sale of NBNZ life and funds management businesses as a significant item (tax on gain on sale of NBNZ life and funds management businesses: \$nil). ANZ excludes significant items to eliminate the distorting effect of one-off transactions on the results of its core business (refer page 13). In the March 2006 half ANZ has classified \$13 million after tax profit (Sep 2005: \$12 million; Mar 2005 \$19 million) on derivatives entered into to manage interest rate and foreign exchange risk on funding instruments, not designated as accounting hedges, ineffective portions of cash flow hedges, profit or loss on disposal of investment securities, and fair value movement in bonds and notes designated at fair value as a non-core item. ANZ excludes volatility associated with fair value movements on these transactions to provide a better indication of the core business performance (tax on hedge gains/losses \$5 million (Sep 2005: \$4 million; Mar 2005: \$8 million)). In the March 2006 half ANZ has incurred \$26 million after tax ANZ National Bank incremental integration costs (Sep 2005 half: \$35 million; Mar 2005 half: \$17 million). Tax on ANZ National Bank incremental integration costs is \$13 million (Sep 2005: \$18 million; Mar 2005: \$8 million). ANZ National Bank incremental integration costs are excluded to better reflect the core cost base and assist analysis of the cost base following completion of the integration (refer page 13)*

(3) *Average ordinary shareholders' equity excludes minority interest*

(4) *Operating expenses excludes goodwill amortisation of \$nil (Sep 2005: \$nil; Mar 2005: \$nil; Sep 2004: \$83 million; Mar 2004: \$63 million; Sep 2003: \$9 million; Mar 2003: \$9 million; Sep 2002: \$10 million). Under AIFRS goodwill is not amortised and therefore was not recognised from the March 2005 period onwards*

(5) *September 2003 and prior periods adjusted for the bonus element of the rights issue*

(6) *Excludes employees whose only ANZ shares are held in trust under ANZ employee share schemes*

DIRECTORS REPORT

The directors present their report on the consolidated financial report for the half year ended 31 March 2006.

Directors

The names of the directors of the Company who held office during and since the end of the half year are:

Mr CB Goode, AC - Chairman	Director since 24 July 1991, Chairman since 24 August 1995
Mr J McFarlane - Chief Executive Officer	CEO and director since 1 October 1997
Dr GJ Clark	Director since 1 February 2004
Dr RS Deane	Director since 28 September 1994
Mr JK Ellis	Director since 1 October 1995
Mr DM Gonski, AO	Director since 7 February 2002
Ms MA Jackson, AC	Director since 22 March 1994
Mr DE Meiklejohn	Director since 1 October 2004
Mr JP Morschel	Director since 1 October 2004

Result

The consolidated profit attributable to shareholders of the Company was \$1,811 million. Further details are contained in the Chief Financial Officer's Review and Business Performance Review on pages 11 to 49 and in the financial report.

Review of operations

A review of the operations of the consolidated entity during the half year and the results of those operations are contained in the Chief Financial Officer's Review and Business Performance Review on pages 11 to 49.

Lead auditor's independence statement

The lead auditor's independence statement given pursuant to ASIC Class Order 05/910 is set out on page 117 and forms part of the Directors Report for the half year ended 31 March 2006.

Rounding of amounts

The Company is a company of the kind referred to in the Australian Securities and Investments Commission class order 98/100 dated 10 July 1998 pursuant to section 341(1) of the Corporations Act 2001 (as amended). Consequently, amounts in this report and the accompanying financial report have been rounded to the nearest million dollars except where otherwise indicated.

Signed in accordance with a resolution of the directors.

NOTES TO FINANCIAL STATEMENTS

1. Significant Accounting policies

(i) Basis of preparation

These consolidated financial statements comprise a general purpose financial report and:

should be read in conjunction with the ANZ Financial Report and the ANZ Concise Annual Report for the year ended 30 September 2005 and any public announcements made by the Parent entity and its controlled entities (the Group) for the half year ended 31 March 2006 in accordance with the continuous disclosure obligations under the Corporations Act 2001 (as amended) and the ASX Listing Rules

are presented in Australian dollars in accordance with class order 98/100 dated 10 July 1998 (millions, except where stated otherwise)

comply with the accounts provisions of the Banking Act 1959, applicable Australian Accounting Standards, the Corporations Act 2001 (as amended), the Corporations Regulations 2001 and other authoritative pronouncements of the Australian Accounting Standards Board (AASB)

are condensed financial statements as defined in AASB 134: Interim Financial Reporting . Compliance with AASB 134 ensures compliance with International Financial Reporting Standard IAS 34: Interim Financial Reporting . This report does not include all notes of the type normally included in the annual financial report

have been prepared in accordance with the historical cost convention except that the following assets and liabilities are stated at their fair value: derivative financial instruments including the fair value of any applicable underlying exposure, assets treated as available-for-sale, financial instruments held for trading, term funding instruments including specific bonds and notes, and defined benefit plans assets and liabilities.

The preparation of the financial report requires the use of management judgement, estimates and assumptions that affect reported amounts and the application of policies. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable. Actual results may differ from these estimates. Such estimates may require review in future periods.

International Financial Reporting Standards (IFRS) form the basis of Australian Accounting Standards issued by the AASB, being Australian equivalents to IFRS (AIFRS). The Group revised its accounting policies on 1 October 2005 to enable the preparation of financial statements that comply with AIFRS. This is the Group's first financial report prepared in accordance with AIFRS and AASB 1: First-time Adoption of Australian Equivalents to International Financial Reporting Standards has been applied. An explanation of how the transition from superseded policies to AIFRS has impacted the Group's reported financial position, financial performance and cash flow, is set out in Note 24.

The accounting policies have been consistently applied by all consolidated entities and to all periods presented in the consolidated financial report and the opening AIFRS balance sheet as at 1 October 2004, except for those policies relating to Standards for which comparatives are not restated, as permitted under the first time adoption transitional provisions. The Standards are AASB 132: Financial Instruments: Presentation and Disclosure, AASB 139: Financial Instruments: Recognition and Measurement, and AASB 4: Insurance Contracts.

The Group's key accounting policies that have been amended by the adoption of AIFRS follow.

(ii) Consolidation

The financial statements consolidate the financial statements of Australia and New Zealand Banking Group Limited (the Company) and all its subsidiaries where it is determined that there is a capacity to control. Control means the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

On adoption of AIFRS certain special purpose entities in which the Group holds less than a majority of voting rights, were deemed to be controlled entities where:

in substance, the majority of the risks and rewards from their activities accrue to the Group; or

in substance, the Group controls their decision making powers so as to obtain the majority of the risks and rewards from their activities.

(iii) Interest income and interest expense

Interest income and interest expense are recognised in the income statement as they accrue using the effective interest method.

Fee income and directly related transaction costs relating to loan origination, financing or restructurings are now deferred and amortised to interest income over the expected life of the loan using the effective interest method.

Loan commitment fees, together with related direct costs, are deferred and recognised as an adjustment to the interest yield on the loan once drawn or immediately to the income statement for expired commitments.

Fees and commissions payable to brokers in respect of originating lending business, where these are incremental costs directly related to the issue of a financial instrument, are included in interest income as part of the effective interest rate.

(iv) Fee and commission income

Unless included in the effective interest calculation (refer 1(iii)), fees and commissions are brought to account on an accrual basis.

Fees and commissions that relate to the execution of a significant act (for example, advisory services, placement fees and underwriting fees) are recognised when the significant act has been completed.

Fees charged for providing ongoing services that represent the recoupment of the costs of providing service (for example, maintaining and administering existing facilities) are recognised as income over the period the service is provided.

(v) Offsetting of income and expenses

Income and expenses are not offset unless required or permitted by an accounting standard. At the Group level, this generally arises in the following circumstances:

where transaction costs, which are an integral part of the effective interest rate of a financial instrument measured at amortised cost, are offset against the interest income generated by the financial instrument

where gains and losses relating to fair value hedges are assessed as being effective

where gains and losses from a group of similar transactions are reported on a net basis, such as foreign exchange gains and losses, or

where amounts are collected on behalf of third parties, where the Group is acting as an agent.

(vi) Cash receipts on impaired loans

Cash receipts on impaired loans are applied as a reduction to principal.

(vii) Derivative financial instruments

Derivative financial instruments are contracts whose value is derived from one or more underlying financial instruments or indices.

Derivative financial instruments including swaps, forward rate agreements, futures, options and combinations of these instruments are entered into by the Group for trading purposes, including customer-related reasons, or for hedging purposes where the derivative instruments are used to hedge the Group's exposures to interest rate risk, currency risk, price risk, credit risk and other exposures relating to non-trading positions.

Derivative financial instruments are recognised initially at fair value with gains or losses from subsequent remeasurement at fair value being recognised in the income statement. Where the derivative is designated and effective as a hedging instrument, the timing of the recognition of any resultant gain or loss in the income statement is dependent on the hedging designation. These hedging designations and associated accounting treatments are as follows:

Fair value hedge

Where the Group hedges the fair value of a recognised asset or liability or firm commitment, changes in the fair value of derivatives designated as a fair value hedge are recognised in the income statement. Changes in the fair value of the hedged item attributable to the hedged risk are reflected as adjustments to the carrying value of the hedged items, which are also recognised in the income statement.

Hedge accounting is discontinued when the hedge instrument expires or is sold, terminated, exercised or no longer qualifies for hedge accounting. The resulting adjustment to the carrying amount of the hedged item arising from the hedged risk is amortised to the income statement over the period to maturity.

If the hedged item is sold or repaid, the unamortised fair value adjustment is recognised immediately in the income statement.

Cash flow hedge

The Group designates derivatives as cash flow hedges where the instrument hedges the variability in cash flows of a recognised asset or liability, a foreign exchange component of a firm commitment or a highly probable forecast transaction. The effective portion of changes in the fair value of derivatives qualifying and designated as cash flow hedges is deferred to the cash flow hedging reserve which forms part of shareholders equity. Any ineffective portion is recognised immediately in the income statement. Amounts deferred in equity are recognised in the income statement in the period during which the hedged forecast transactions take place.

When the hedge expires, is sold, terminated, exercised, or no longer qualifies for hedge accounting, the cumulative amount deferred in equity remains in the cash flow hedging reserve, and is subsequently transferred to the income statement when the hedged item is recognised in the income statement.

When a forecast transaction is no longer expected to occur, the amount deferred in equity is recognised immediately in the income statement.

Net investment hedge

Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges. The gain or loss from remeasuring the fair value of the hedging instrument relating to the effective portion of the hedge is deferred in equity and the ineffective portion is recognised immediately in the income statement. Amounts deferred in the foreign currency translation reserve are recognised in the income statement when the foreign operation is disposed of.

All gains and losses from changes in the fair value of derivatives, that are not designated in a hedging relationship but are entered into to manage the interest rate and foreign exchange risk of funding instruments, are recognised in the income statement. The component of the fair value change in the derivative and which relates to current period realised and unrealised interest, is included in net interest income. The remainder of the fair value movement is included in other income.

Embedded derivatives - Derivatives embedded in financial instruments or other host contracts are treated as separate derivatives when their economic characteristics and risks are not closely related to those of the host contracts, and the host contracts are not measured at fair value. The embedded derivative is reported at fair value with changes in fair value immediately recognised in the income statement.

(viii) **Trading Securities and other financial assets at fair value through profit or loss**

Trading securities and other financial instruments acquired principally for the purpose of selling in the short-term or which are part of a portfolio which is managed for short-term gains are recognised in the balance sheet at their fair value. Additionally, this valuation basis is used as an alternative to hedge accounting for certain financial instruments. It is not used for illiquid instruments or those for which the demonstrated variability in the range of fair value estimates is other than low.

Changes in the fair value (gains or losses) of financial instruments are recognised in the income statement in the period in which they occur.

(ix) **Available-for-sale assets**

Available-for-sale assets comprise non-derivative financial assets which the Group designates as available-for-sale but which are not deemed to be held principally for trading purposes, and include equity investments, certain loans and advances and fixed term securities. They are initially recorded at fair value plus transaction costs. Subsequent gains or losses arising from changes in fair value are included as a separate component of equity, the available-for-sale revaluation reserve. When an available-for-sale asset is sold, the cumulative gain or loss relating to the asset is transferred from equity to the income statement.

Where there is objective evidence of impairment to an available-for-sale asset, the cumulative loss related to that asset is removed from equity and recognised in the income statement. If, in a subsequent period, the amount of an impairment loss relating to an available-for-sale debt instrument decreases and the decrease can be linked objectively to an event occurring after the impairment event, the loss is reversed through the income statement.

Premiums and discounts are included within the calculation of the fair value of the security. Interest and dividend income is accrued.

Financial assets previously disclosed as investment securities are now predominantly treated as available-for-sale securities.

(x) Impairment of loans and advances

Loans and advances are regularly reviewed for impairment loss.

Credit impairment provisions are raised for exposures that are known to be impaired. Loans are impaired and impairment losses incurred if there is objective evidence of impairment as a result of one or more loss events that occurred after the initial recognition of the loan and that loss event or events has had a reliably estimable impact on the estimated future cash flows of the individual loan or the collective portfolio of loans.

Impairment is assessed firstly for assets that are individually significant (or on a portfolio basis for small value loans), and then on a collective basis for those exposures not individually known to be impaired.

For those exposures that are assessed collectively, these are placed in pools of similar assets with similar risk characteristics. The required provision is estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the collective pool. The historical loss experience is adjusted based on current observable data.

The estimated impairment loss is measured as the difference between the asset's carrying amount and the estimated future cash flows discounted to their present value. As this discount unwinds during the period between recognition of impairment and recovery of the written down amount, it is recognised in net interest income. The process of estimating the amount and timing of cash flows involves considerable management judgement. These judgements are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

The provision for impairment loss (individual and collective), referred to as 'Provision for credit impairment', is deducted from loans and advances in the balance sheet and the movement in the provision for the reporting period is reflected in the income statement. When a loan is uncollectible, it is written-off against the related provision for loan impairment. Subsequent recoveries of amounts previously written off are taken to the income statement.

Where impairment losses recognised in previous periods are subsequently decreased or no longer exist, such impairments are reversed in the income statement.

(xi) Goodwill and other intangible assets

Goodwill

Goodwill, representing the excess of the purchase consideration over the fair value of the identifiable net assets of a controlled entity at the date of gaining control, is recognised as an asset and not amortised, but tested for impairment annually and when the goodwill is impaired the difference is charged to the income statement. Any impairment of goodwill cannot be subsequently reversed.

Other intangible assets

Other intangible assets comprise costs incurred in acquiring and building software and computer systems ('software').

Software is amortised using the straight-line method over its expected useful life to the Group. The period of amortisation is between 3 and 5 years except for branch front-end applications where 7 years is used.

At each reporting date, software assets are reviewed for impairment. If any such indication exists, the recoverable amount of the assets are estimated and compared against the existing carrying value. Where the existing carrying value exceeds the recoverable amount, the difference is charged to the income statement.

Costs incurred in planning or evaluating software proposals, or in maintaining systems after implementation, are not capitalised.

(xii) Premises and equipment impairment assessment

At each reporting date, the carrying amounts of premises and equipment are reviewed for impairment. If any such indication exists, the recoverable amount of the assets are estimated and compared against the existing carrying value. Where the existing carrying value exceeds the recoverable amount, the difference is charged to the income statement. If it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash generating unit to which the asset belongs.

A previously recognised impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount.

(xiii) Employee benefits

The directors have elected under s334(5) of the Corporations Act 2001 to early adopt the December 2004 revision of Australian Accounting Standard AASB 119: Employee Benefits .

Defined benefit superannuation schemes

The Group operates a number of defined benefit schemes. The liability and expense related to providing benefits to employees under each defined benefit scheme are calculated by independent actuaries. Initially, a defined benefit liability is recognised to the extent that the present value of the defined benefit obligation of each scheme, calculated using the Projected Unit Credit Method, is greater than the fair value of each scheme's assets. Where this calculation results in a benefit to the Group, a defined benefit asset is recognised. In each subsequent reporting period, ongoing movements in the defined benefit liability or asset carrying value are treated as follows:

net movement relating to the current period's service cost, interest cost, expected return on scheme assets, past service costs and other costs (such as the effects of any curtailments and settlements), is recognised as an employee expense in the income statement

movements relating to actuarial gains and losses are recognised directly in retained earnings

contributions incurred are recognised directly against the net defined benefit position.

Share-based compensation

The Group has various equity settled share-based compensation plans. These are described in Note 49 of the 2005 annual financial report and largely comprise the Employee Share Acquisition Plan and the ANZ Share Option Plan.

ANZ ordinary shares

The fair value of ANZ ordinary shares granted under the Employee Share Acquisition Plan is measured at grant date, using the one-day volume weighted average market price of ANZ shares. The fair value is expensed immediately when shares vest immediately or on a straight-line basis where shares vest over the relevant vesting period. This is recognised as an employee compensation expense with a corresponding increase in equity.

Share options

The fair value of share options is measured at grant date, using an option pricing model. The fair value is expensed on a straight-line basis over the relevant vesting period. This is recognised as an employee compensation expense with a corresponding increase in the share options reserve. The option pricing model takes into account the exercise price of the option, the risk free interest rate, the expected volatility of ANZ ordinary share price and other factors. Market vesting conditions are taken into account in estimating the fair value.

Performance rights

From October 2005, ANZ has granted performance Rights to certain employees. A Performance Right is a right to acquire a share at nil cost to the employee, subject to satisfactorily meeting time and performance hurdles. Upon exercise, each Performance Right entitles the holder to one ordinary share in ANZ. The fair value of Performance Rights is determined at grant date using an option pricing model, taking into account market conditions. The fair value is expensed over the relevant vesting period. This is recognised as an employee expense with a corresponding increase in equity.

Other adjustments

The amount of expense recognised during the vesting period is adjusted for the number of shares, options or performance rights expected to vest. Non-market vesting conditions (eg service conditions) are taken into account, so that ultimately the expense recognised in the income statement reflects the number of shares or share options that actually vest.

(xiv) **Offsetting of assets and liabilities**

Assets and liabilities are offset and the net amount reported in the balance sheet only where:

there is a current enforceable legal right to offset the asset and liability, and

there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

(xv) Income tax

Income tax expense

Income tax on earnings for the period comprises current and deferred tax and is based on the applicable tax law in each jurisdiction. It is recognised in the income statement as tax expense, except when it relates to items credited directly to equity, in which case it is recorded in equity, or where it arises from the initial accounting for a business combination, in which case it is included in the determination of goodwill.

Current tax

Current tax is the expected tax payable on taxable income for the period, based on tax rates (and tax laws) which are enacted or substantively enacted by the reporting date, including any adjustment for tax payable in previous periods. Current tax for current and prior periods is recognised as a liability (or asset) to the extent that it is unpaid (or refundable).

Deferred tax

Deferred tax is accounted for using the comprehensive tax balance sheet liability method. It is generated by temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes, and the amounts used for taxation purposes.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period(s) when the asset and liability giving rise to them are realised or settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the reporting date. The measurement reflects the tax consequences that would follow from the manner in which the Group, at the reporting date, recovers or settles the carrying amount of its assets and liabilities.

Deferred tax liabilities are recognised for all taxable temporary differences, other than those in relation to taxable temporary differences arising from goodwill. Deferred tax liabilities are recognised for taxable temporary differences arising on investments in controlled entities, branches, associates and joint ventures, except where the Group is able to control the reversal of the temporary differences and it is probable that temporary differences will not reverse in the foreseeable future. Deferred tax assets associated with these interests are recognised only to the extent that it is probable that the temporary difference will reverse in the foreseeable future and there will be sufficient taxable profits against which to utilise the benefits of the temporary difference.

Deferred tax assets, including those related to the tax effects of income tax losses and credits available to be carried forward, are recognised only to the extent that it is probable that future taxable profits will be available against which the deductible temporary differences or unused tax losses and credits can be utilised.

Offsetting

Current and deferred tax assets and liabilities are offset only to the extent that they relate to income taxes imposed by the same taxation authority and there is a legal right and intention to settle on a net basis and it is allowed under the tax law of the relevant jurisdiction.

(xvi) **Change in accounting policy**

In the current reporting period the Group has adopted AASB 132: Financial Instruments: Presentation and Disclosure, AASB 139: Financial Instruments: Recognition and Measurement and AASB 4: Insurance Contracts. This change in accounting policy has been adopted in accordance with the transitional rules contained in AASB 1, which does not require the restatement of comparative information for financial instruments within the scope of AASB 132, AASB 139 and AASB 4. The impact of this change in accounting policy in the current reporting period is detailed in Note 24.

Net profit excluding preference share dividends (\$M)	1,799	1,574	1,517	14%	19%
Interest on US Trust securities(1)(\$M)	29	25	23	16%	26%
Interest on ANZ StEPS(2)(\$M)	33	34	32	-3%	3%
Net profit attributable to shareholders of the Company excluding interest on US Trust securities and ANZ StEPS(\$M)	1,861	1,633	1,572	14%	18%
Adjusted weighted average number of shares on issue (M)	1,828.4	1,824.7	1,822.7	0%	0%
Weighted average number of convertible options (M)	11.9	9.3	7.7	28%	55%
Weighted average number of convertible US Trust securities at current market price(1) (M)	58.0	60.1	69.1	-3%	-16%
Weighted average number of convertible ANZ StEPS securities(2) (M)	38.7	42.7	49.7	-9%	-22%
Adjusted weighted average number of shares - diluted (M)	1,937.0	1,936.8	1,949.2	0%	-1%
Diluted earnings per share (cents)	96.1	84.3	80.6	14%	19%

(1) The US Stapled Trust securities issued on 27 November 2003 mandatorily convert to ordinary shares in 2053 unless redeemed or bought back prior to that date. The US Stapled Trust Security issue can be de-stapled and the investor left with coupon paying preference shares at ANZ's discretion at any time, or at the investor's discretion under certain circumstances. AASB 133 requires that potential ordinary shares for which conversion to ordinary share capital is mandatory must be included in the calculation of diluted EPS. The inclusion of this issue in EPS increased the diluted number of shares by 58.0 million

(2) ANZ StEPS (issued on 23 September 2003) converts to either \$100 for each ANZ StEPS share or a number of ordinary shares calculated at the market price of ANZ ordinary shares less 2.5%. ANZ StEPS has been included for the first time in dilutive EPS in 2005 due to the adoption of AIFRS. The inclusion of this issue in EPS increased the dilutive number of shares by 38.7 million

7. Derivative financial instruments

Derivatives

Derivative instruments are contracts whose value is derived from one or more underlying financial instruments or indices. They include swaps, forward rate contracts, futures, options and combinations of these instruments. The use of derivatives and their sale to customers as risk management products is an integral part of the Group's trading activities. Derivatives are also used to manage the Group's own exposure to fluctuations in exchange and interest rates as part of its asset and liability management activities. Derivatives are subject to the same types of credit and market risk as other financial instruments, and the Group manages these risks in a consistent manner.

The following table provides an overview of the Group's exchange rate, interest rate, commodity and credit derivatives. It includes all contracts, both trading and hedging.

Notional principal amount is the face value of the contract and represents the volume of outstanding transactions. Credit equivalent amount is calculated in accordance with the APRA capital adequacy guidelines and combines the aggregate value of all contracts in a positive market position plus an allowance for the potential increase in value over the remaining term of the transaction. Fair value is the net position of contracts with positive market values and negative market values.

	Notional Principal amount \$M	Credit equivalent amount \$M	As at 31 March 2006				Total fair value of derivatives	
			Trading(6)		Fair Value Hedging			
			Assets \$M	Liabilities \$M	Assets \$M	Liabilities \$M	Assets \$M	Liabilities \$M
Foreign exchange and commodities contracts								
Spot and forward contracts	239,291	5,406	3,405	(2,743)	216	(10)	3,621	(2,753)
Swap agreements(4)	100,384	5,938	2,375	(156)	177	(270)	2,552	(426)
Futures contracts(1)	466	n/a	18	(28)			18	(28)
Options purchased	11,635	373	229				229	
Options sold(2)	15,671	n/a		(198)				(198)
Other contracts	7,723	1,283	926	(823)			926	(823)
Collateral(5)			(1,942)	543			(1,942)	543
	375,170	13,000	5,011	(3,405)	393	(280)	5,404	(3,685)
Interest rate contracts								
Forward rate agreements	71,743	8	3	(4)			3	(4)
Swap agreements(4)	481,229	4,394	1,601	(1,687)	105	(433)	1,706	(2,120)
Futures contracts(1)	78,404	n/a	168	(165)	2		170	(165)
Options purchased	21,021	106	78				78	
Options sold(2)	44,136	n/a		(33)				(33)
	696,533	4,508	1,850	(1,889)	107	(433)	1,957	(2,322)

Credit Contracts

Credit default swaps(3)	19,873	2,845	121	(124)	3	(3)	124	(127)
Total	1,091,576	20,353	6,982	(5,418)	503	(716)	7,485	(6,134)

-
- (1) *Credit equivalent amounts have not been included as there is minimal credit risk associated with exchange traded futures where the clearing house is the counterparty*
- (2) *Options sold have no credit exposures as they represent obligations rather than assets*
- (3) *Credit default swaps include structured transactions that expose the Group to the performance of certain assets. The total investment of the Group in these transactions is USD 250 million (Sep 2005:USD 500 million)*
- (4) *The fair value of swap agreements includes internal allocations between Trading and Hedging*
- (5) *Collateral relates predominantly to Foreign Exchange contracts*
- (6) *Includes derivatives entered into to manage interest rate and foreign exchange risk on funding instruments, not designated as accounting hedges*

The following table excludes the impact of AASB 132 and AASB 139. As such the data in the table is not on a comparable basis to 31 March 2006 data. This data has been adjusted to reflect the impact of derivatives in securitisation vehicles that were consolidated from 1 October 2004 on adoption of AIFRS.

	As at 30 September 2005			
	Notional Principal amount \$M	Credit equivalent amount \$M	Fair value Assets \$M	Liabilities \$M

Net interest and other income not recognised					
Australia	4	7	9	-43%	-56%
New Zealand	6	2	2	large	large
Overseas markets	4	1	5	large	-20%
Total net interest and other income not recognised	14	10	16	40%	-13%

(1) Under AIFRS, from 1 October 2005 the impairment loss on an impaired loan is calculated as the difference between the asset's carrying amount and the estimated future cash flows discounted to their present value. As this discount unwinds during the period it is recognised as interest. The comparatives do not reflect this change and represent interest and other income received (refer Note 1 (vi))

In the event of customer default, any loan security is held as mortgagee in possession and therefore the Group does not hold any other real estate owned assets.

Cumulative (gain) loss transferred to the income statement on impairment of financial assets				n/a	n/a
Total available-for-sale revaluation reserve	8			n/a	n/a

(1) Includes a \$20 million increase in the opening asset revaluation reserve balance relating to reclassification of legacy balances. The asset revaluation reserve has been transferred to retained earnings on adoption of AIFRS, refer Note 24 (vi)

- (2) *Includes a \$19 million increase in the opening foreign currency translation reserve balance relating to reclassification of legacy balances. The foreign currency translation reserve has been transferred to retained earnings on adoption of AIFRS, refer Note 24 (v)*
- (3) *The share option reserve arises on the grant of share options to selected employees under the ANZ share option plan. Amounts are transferred out of the reserve and into share capital when the options are exercised. Further information about share based payments to employees is disclosed in Note 24 (iii) to the financial statements*
- (4) *The available-for-sale revaluation reserve arises on the revaluation of available-for-sale financial assets. Where a revalued financial asset is sold, that portion of the reserve which relates to that financial asset, is realised and recognised in the profit or loss (refer Note 1 (ix)). Where a revalued financial asset is impaired, that portion of the reserve which relates to that financial asset is recognised in the profit or loss (refer Note 1 (ix))*
- (5) *ANZ has taken the election, pursuant to accounting standard AASB 1 (36A), to not comply with accounting standards AASB 132 and AASB 139 in the comparative information in its first AIFRS financial report. Therefore the 2005 year is nil for this line item*

Total shareholders equity	18,796	19,538	18,927	-4%	-1%

(6) The hedging reserve represents hedging gains and losses recognised on the effective portion of cash flow hedges. The cumulative deferred gain or loss on the hedge is recognised in the profit or loss when the hedged transaction impacts profit or loss, consistent with the applicable accounting policy as detailed in Note 1 (vii)

(7) Comprises

- Remeasurement of the carrying value of the Group's investment in INGA as at 1 October 2005
- Adjustment in respect of hedging derivative financial instruments as at 1 October 2005
- Recognition of the fair value of derivatives relating to securitisation and structured finance transactions as at 1 October 2005
- Deferral of previously recognised fees now treated as an adjustment to yield on 1 October 2005
- Recalculation of the loan impairment provision on 1 October 2005 resulting from the change to use of the incurred loss approach from the Economic Loss Provisioning approach

(8) *ANZ has taken the option available under AASB 119 to recognise actuarial gains/losses on defined benefit superannuation plans directly in retained profits (refer Note 1 (xiii) and Note 24 (ii))*

(3) Excludes off balance sheet exposures in subsidiaries consolidated on adoption of AIFRS from 1 October 2004 as required by Australian Prudential Regulation Authority

15. Average balance sheet and related interest - statutory basis

Averages used in the following tables are predominantly daily averages. Interest income figures are presented on a tax equivalent basis. Impaired loans are included under the interest earning asset category, loans, advances and bills discounted. Intragroup interest earning assets and interest bearing liabilities are treated as external assets and liabilities for the geographic segments.

Proforma average balance sheets adjusted to bring prior period data onto a fully comparable basis are included as supplementary information on pages 118 to 121. These are not subject to review by Auditors.

18. Contingent liabilities and contingent assets

Contingent liabilities

General

There are outstanding court proceedings, claims and possible claims against the Group, the aggregate amount of which cannot readily be quantified. Appropriate legal advice has been obtained and, in the light of such advice, provisions as deemed necessary have been made. In some instances we have not disclosed the estimated financial impact as this may prejudice the interests of the Group.

Sale of Grindlays businesses

On 31 July 2000, ANZ completed the sale to Standard Chartered Bank (SCB) of ANZ Grindlays Bank Limited and the private banking business of ANZ in the United Kingdom and Jersey, together with ANZ Grindlays (Jersey) Holdings Limited and its subsidiaries, for USD1.3 billion in cash. ANZ provided warranties and certain indemnities relating to those businesses and, where it is anticipated that payments would be likely under the warranties or indemnities, made provisions to cover the anticipated liability. The issues below have not impacted our reported results. All settlements and costs have been covered within the provisions established at the time. ANZ may be held liable in relation to the following:

FERA

In 1991 certain amounts were transferred from non-convertible Indian Rupee accounts maintained with Grindlays in India. These transactions may not have complied with the provisions of the Foreign Exchange Regulation Act, 1973. Grindlays, on its own initiative, brought these transactions to the attention of the Reserve Bank of India. The Indian authorities have served notices on Grindlays and certain of its officers in India that could lead to possible penalties. Criminal prosecutions have also been foreshadowed and, in the case of two former officers and the bank, commenced. Grindlays is contesting the validity of these prosecutions.

Differential Cheques

In June 2003, Grindlays was successful in its appeal against orders to repay, with interest, two payments it received from a stockbroker in 1991 in connection with securities transactions. These orders had directed repayment of Indian Rupees 24 million (plus interest accruing at 24% since 1991). Since the appeal decision was handed down, no further action has been taken against Grindlays in relation to notices in respect of a further eleven payments received by it in 1991 in similar circumstances totalling Indian Rupees 225 million.

In addition, ANZ provided an indemnity relating to tax liabilities of Grindlays (and its subsidiaries) and the Jersey Sub-Group to the extent to which such liabilities were not provided for in the Grindlays accounts as at 31 July 2000. Claims have been made under this indemnity with no material impact on the Group expected.

Contingent tax liability

The Group in Australia was during 2005 subjected to client risk reviews by the Australian Taxation Office (ATO) across a broad spectrum of matters, as part of normal ATO procedures. The reviews mainly covered years up to 2003. Matters listed by the ATO for further investigation remain outstanding.

The ATO is also reviewing the taxation treatment of certain other transactions undertaken by the Group in the course of normal business activities.

In addition, at the Company's request the ATO is reviewing the taxation treatment of the sale of Grindlays in 2000. It is also reviewing the transfer of the life and funds management businesses into the joint venture with ING in 2002.

The Group in New Zealand is being audited by the Inland Revenue Department (IRD) as part of normal revenue authority procedures, with a particular focus on certain kinds of structured finance transactions. The IRD has issued Notices of Proposed Adjustment (the "Notices") in respect of some of those structured finance transactions. The Notices are not tax assessments and do not establish a tax liability, but are the first step in a formal disputes process. In addition, some tax assessments have been received. Should the same position be adopted by the IRD on the remaining transactions of that kind as reflected in the Notices and tax assessments received, the maximum potential tax liability would be approximately NZD451 million (including interest tax effected) for the period to 31 March 2006. Of that maximum potential liability, approximately NZD129 million is subject to tax indemnities provided by Lloyds TSB Bank PLC under the agreement by which ANZ acquired the National Bank of New Zealand and which relate to transactions undertaken by the National Bank of New Zealand before December 2003.

General or issue-specific audits and other investigations are being undertaken by revenue authorities in the United States, the United Kingdom and in other jurisdictions as part of normal revenue authority activity in those countries.

The Company has assessed these and other taxation claims arising in Australia, New Zealand and elsewhere, including seeking independent advice where appropriate, and believes that it holds appropriate provisions.

Interbank Deposit Agreement

ANZ has entered into an Interbank Deposit Agreement with the major banks in the payments system. This agreement is a payment system support facility certified by the Australian Prudential Regulation Authority, where the terms are such that if any bank is experiencing liquidity problems, the other participants are required to deposit equal amounts of up to \$2 billion for a period of 30 days. At the end of 30 days the deposit holder has the option to repay the deposit in cash or by way of assignment of mortgages to the value of the deposit.

Clearing and Settlement Obligations

In accordance with the clearing and settlement arrangements set out:

in the Australian Payments Clearing Association Limited (APCA) Regulations for the Australian Paper Clearing System, the Bulk Electronic Clearing System, the Consumer Electronic Clearing System and the High Value Clearing System (HVCS), the Company has a commitment to rules which could result in a bilateral exposure and loss in the event of a failure to settle by a member institution; and

in the Austraclear System Regulations and the CLS Bank International Rules, the Company has a commitment to participate in loss-sharing arrangements in the event of a failure to settle by a member institution.

For both the APCA HVCS and Austraclear, the obligation arises only in limited circumstances.

Contingent asset matters

National Housing Bank

In 1992, Grindlays received a claim aggregating to approximately Indian Rupees 5.06 billion from the National Housing Bank (NHB) in India. The claim arose out of cheques drawn by NHB in favour of Grindlays, the proceeds of which were credited to the account of a Grindlays customer.

Grindlays won an arbitration award in March 1997, under which NHB paid Grindlays an award of Indian Rupees 9.12 billion. NHB subsequently won an appeal to the Special Court of Mumbai, after which Grindlays filed an appeal with the Supreme Court of India. Grindlays paid the disputed money including interest into court. Ultimately, the parties settled the matter and agreed to share the moneys paid into court which by then totalled Indian Rupees 16.45 billion (AUD 661 million at 19 January 2002 exchange rates), with Grindlays receiving Indian Rupees 6.20 billion (AUD 248 million at 19 January 2002 exchange rates) of the disputed monies. ANZ in turn received a payment of USD124 million (USD equivalent of the Indian Rupees received by Grindlays) from Standard Chartered Bank under the terms of an indemnity given in connection with the sale of Grindlays to Standard Chartered Bank.

ANZ Claims

ANZ has pursued two separate actions arising from the above.

A \$130 million plus interest claim against its insurers. \$130 million being the balance of the limit of indemnity under ANZ's insurance arrangements for the 1991-92 policy year.

ANZ has settled the claim for \$114.3 million which has been recognised in these accounts, less an amount of \$0.9 million which was recognised in the accounts at 30 September 2005.

ANZ is entitled to share with NHB in the proceeds of any recovery from the estate of the customer whose account was credited with the cheques drawn by NHB. However, the Indian Taxation Department is claiming a statutory priority to all of the funds available for distribution to creditors of that customer. Proceedings are currently onfoot in the Special Court, Mumbai to determine these issues.

20. Changes in composition of the Group

Newly controlled entities

The following securitisation special purpose entities were consolidated as part of the Group from 1 October 2004 because of the application of new AASB UIG Interpretation 112: Consolidation - Special Purpose Entities . The entities were not included in the previous year's financial statements because AASB UIG 112 became operative on 1 October 2005.

Arc Funding Pty Ltd

Aurora Securitisation

Echo Funding Pty Ltd

Eos Trust

Kingfisher Trust No. 1

Kingfisher Trust No 2

Kingfisher Trust 2001-1G

Kingfisher Trust 2004-1G

Kingfisher Securitisation Pty Ltd

Omeros Trust

Omeros II Trust

Orion Funding Pty Ltd

Solera Trust

Stellar Funding Pty Ltd

Coral Finance Ltd

The impact of the consolidation of these entities is explained in Note 24.

Disposal of controlled entities

There were no material controlled entities disposed of during the half year to 31 March 2006. On 30 September 2005, the controlled entities NBNZ Life Insurance Limited and NBNZ Investment Services Limited were sold. The profit before tax on disposal was \$14 million (\$14 million after tax). The after tax contribution prior to disposal was \$9 million in the September 2005 half (Mar 2005 half: \$9 million).

United States dollar	0.7162	0.7623	0.7719	0.7418	0.7643	0.7671

23. Significant events since balance date

There have been no significant events from 31 March 2006 to the date of this report.

24. Impact of adopting Australian Equivalents to International Financial Reporting Standards (AIFRS)

The Group implemented accounting policies in accordance with Australian Equivalents to International Financial Reporting Standards (AIFRS) on 1 October 2004, except for those relating to financial instruments and insurance contracts, which were implemented on 1 October 2005.

The transition was accounted for in accordance with Accounting Standard AASB 1: First time adoption of Australian equivalents to International Financial Reporting Standards .

The impacts set out below are separated between those applicable from 1 October 2004 (and impacting the comparative periods) and those applicable from 1 October 2005. All amounts are stated on a before tax basis, unless otherwise noted. The reconciliation tables set out in pages 106 to 115 reconcile previous AGAAP to AIFRS and cross reference to the notes below.

AIFRS adjustments with effect from 1 October 2004

(i) Goodwill

Initial reduction in retained earnings. Potential volatility in future earnings.

The adoption of AIFRS reduced the carrying amount of goodwill on transition by \$5 million at 1 October 2004 (refer Table 1) and \$15 million at 1 October 2005 (refer Table 6) related to the acquisition of assets and liabilities that did not meet the AIFRS definition of a business combination. The Group elected not to restate the classification and accounting treatment of past business combinations that occurred prior to 1 October 2004.

Under AIFRS, the past practice of systematically amortising goodwill over the expected period of benefit ceased and was replaced by impairment testing annually or more frequently if events or circumstances indicate that goodwill might be impaired.

This change in accounting policy resulted in:

a decrease in the amortisation expense of \$224 million for the year to 30 September 2005 (31 March 2005: \$110 million), including notional INGA and associates goodwill of \$45 million (31 March 2005: \$23 million) (refer Tables 2 and 3); and

a corresponding increase in the carrying value of goodwill, associates and joint venture entities (refer Tables 4 and 5).

(ii) Defined benefit superannuation schemes

Initial reduction in retained earnings. Actuarial movements recognised in retained earnings.

On adoption of AASB 119: Employee Benefits, surpluses (assets) and/or deficits (liabilities) that arise within defined benefit superannuation schemes are recognised on the Balance Sheet.

Under previous AGAAP, the Group accounted for the defined benefit superannuation schemes on a cash basis and did not recognise an asset or liability for the net position of the defined benefit superannuation schemes. The Group elected to apply the option available under AASB 119 to recognise actuarial gains and losses in the Balance Sheet (i.e. the direct to retained earnings approach). The non-cash expense reflecting the notional cost of the benefits accruing to members of the defined benefit schemes in respect of service provided over the reporting period is charged to the Income Statement. All transitional adjustments were, and ongoing movements reported for each scheme are, actuarially determined in accordance with AASB 119. Contributions to the schemes are made in accordance with the governing rules of the relevant schemes and there is no present liability to fund any deficits.

At 1 October 2004, the Group recognised a liability position of \$200 million, an asset of \$2 million, and a deferred tax asset of \$57 million, resulting in a \$141 million decrease in retained earnings (refer Table 1).

For the AIFRS comparative year ended 30 September 2005, the Group recognised a decrease in the liability of \$34 million (31 March 2005: \$10 million) and an increase in the asset of \$6 million (31 March 2005: \$2 million) largely representing an actuarial gain and a deferred tax adjustment of \$16 million (31 March 2005: \$4 million). The actuarial gain of \$25 million after tax (31 March 2005: \$7 million after tax) was adjusted against retained earnings (refer Tables 4 and 5).

(iii) Share based payments

Initial reduction in shareholders' equity. Higher ongoing expenses.

Under previous AGAAP, the Group recognised an expense equal to the full fair value of all deferred shares issued as part of the short term and long term incentive arrangements. The deferred shares vest over one to three years and may be forfeited under certain conditions. The Group did not recognise an expense for options issued to staff or for shares issued under the \$1,000 employee share plan. On adoption of AASB 2:

Share-based Payment, the Group recognised an expense for all share based remuneration, including deferred shares and options, and recognises this expense over the relevant vesting period.

The Group elected to retrospectively apply AASB 2 to share based payments granted prior to 7 November 2002.

On 1 October 2004, this change in accounting policy resulted in:

the establishment of a share options reserve of \$44 million to reflect the fair value of options granted to employees;

a reduction in paid up capital of \$64 million representing the fair value of unvested shares;

recognition of a deferred tax liability of \$24 million; an

a net decrease to retained earnings of \$4 million after tax

(refer Table 1).

For the AIFRS comparative year ended 30 September 2005, the impact of the change was:

an increase in the share options reserve of \$23 million (31 March 2005: \$12 million);

an increase in paid up capital of \$41 million (31 March 2005: \$16 million);

an accrual for \$1,000 shares of \$16 million (31 March 2005: \$11 million);

a reduction in deferred tax of \$17 million (31 March 2005: \$7 million); and

a decrease in profit after tax of \$63 million (31 March 2005: \$32 million)

(refer Tables 4 and 5).

(iv) Securitisation

Additional assets/liabilities recognised. Immaterial impact on net profit.

AIFRS has introduced new requirements for the recognition of financial assets, including those transferred to a special purpose entity for securitisation. The accounting treatment of existing securitisations has been reassessed. Consequently, some vehicles, which were previously not consolidated, are being consolidated by the Group. This resulted in an increase in assets and liabilities recorded within the Balance Sheet of \$5 billion as at 1 October 2004 for the Group (refer Table 1). For the comparative AIFRS year ended 30 September 2005, the Group recognised a decrease of \$388 million in both assets and liabilities (31 March 2005: \$268 million in assets and \$269 million in liabilities), reflecting the net impact of repayment and securitisation of new assets during the year (refer Tables 4 and 5).

The impact on the Income Statement is that income and expenses increased to recognise the income and expense items recorded within these vehicles, with the overall impact on net profit being immaterial.

(v) Foreign currency translation reserve

Initial increase in retained earnings, no change to shareholders' equity.

The Group has elected to apply the option under AASB 121: 'The Effects of Changes in Foreign Exchange Rates', to reset amounts recorded within the foreign currency translation reserve to zero. On 1 October 2004, adopting this election resulted in an increase in retained earnings of \$218 million (refer Table 1).

(vi) Asset revaluation reserve - balance relating to land and buildings

Initial increase in retained earnings, no change to shareholders' equity.

The Group has elected to apply the option under AASB 1: 'First time Adoption of Australian Equivalents to International Financial Reporting Standards', to recognise the value of Land and Buildings at deemed cost. As a result, the Group's asset revaluation reserve of \$31 million relating to Land and Buildings was reset to zero as at 1 October 2004 and adjusted against retained earnings (refer Table 1).

(vii) Taxation

Change in methodology. Immaterial impacts.

Under AASB 112: 'Income Taxes', a balance sheet method of tax effect accounting has been adopted, replacing the 'Income Statement' approach previously used by the Group.

Income tax expense comprises current and deferred taxes, with income tax expense recognised in the Income Statement, or recognised in equity to the extent that it relates to items recognised directly in equity. Deferred tax is calculated using the balance sheet method by determining temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the tax base of those assets and liabilities as used for taxation purposes.

At 1 October 2004, a reduction to deferred tax liabilities of \$18 million was recognised with a corresponding increase of \$16 million after tax to retained earnings and an increase to Share Capital of \$2 million representing share issue costs previously offset against Share Capital (refer Table 1).

(viii) Software reclassification

Reclassification only.

On transition to AIFRS, capitalised software assets were reclassified from Premises and Equipment to a separately identifiable intangible asset. This resulted in a reclassification of \$435 million as at 1 October 2004 (refer Table 1). The amount reclassified decreased by \$29 million and \$48 million as at 31 March 2005 and 30 September 2005 respectively (refer Tables 4 and 5).

(ix) Derivatives reclassification

Reclassification only.

At 1 October 2004, there was a reclassification of \$4.5 billion from Other Assets and \$5.7 billion from Payables and Other Liabilities, to the new AIFRS Balance Sheet line items of Derivative Financial Assets and Derivative Financial Liabilities respectively (refer Table 1).

The amount reclassified from Other Assets decreased by \$706 million at 30 September 2005 (31 March 2005: \$434 million), and the amount reclassified from Other Liabilities decreased by \$1.43 billion at 30 September 2005 (31 March 2005: \$669 million) (refer Tables 4 and 5).

(x) Other

The comparative AIFRS year ended 30 September 2005 and half year ended 31 March 2005 income statements contains minor leasing and tax remeasurement adjustments together with the impact of securitisation and defined benefit plan adjustments (refer Tables 2 and 3).

The balance sheets, as reflected in Tables 1, 4 and 5 also contain other minor remeasurements.

AIFRS adjustments with effect from 1 October 2005

(a) Credit loss provisioning

Initial increase in retained earnings. Volatility in future earnings.

AASB 139: Financial Instruments: Recognition and Measurement adopts an incurred loss approach for credit loss provisioning and provides guidance on the measurement of incurred losses. Provisions are raised for losses that have already been incurred for exposures that are known to be impaired. The estimated losses on these impaired exposures are then discounted to their present value using the original effective interest rate. As this discount unwinds during the period between recognition of impairment and recovery of the written down amount, it is recognised in the Income Statement as interest income.

The General Provision in the Balance Sheet was replaced on adoption of AIFRS by a Collective Provision.

Exposures not individually known to be impaired are placed into pools of similar assets with similar risk characteristics to be collectively assessed for losses that have been incurred, but not identified yet. The required provision is estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the collective pool. The historical loss experience is adjusted based on current observable data.

The Collective Provision under AIFRS shares the same underlying measurement objectives as the previous AGAAP General Provision. However, as a result of the application of a new estimation methodology, certain judgemental risk measures have changed.

The Group believes that the resulting Collective Provision, while lower than the previous General Provision, comfortably falls within the probable range of losses that have been incurred but not identified in our portfolio.

On adoption of AIFRS, the previous Economic Loss Provisioning (ELP) charge to profit was replaced by a charge for individual provisions on impaired exposures together with a charge for movements in the Collective Provision.

As a result of these changes:

at 1 October 2005, there was an increase of \$1 million to retained earnings relating to individual provisions on impaired exposures as a result of the net impact of including expected interest cash flows in the calculation of the individual provision and discounting estimated future cash flows;

at 1 October 2005, the Collective Provision was \$288 million less than the AGAAP General Provision. After tax, this resulted in an increase to retained earnings of \$207 million and a decrease in the foreign currency translation reserve of \$23 million at 1 October 2005;

individual provisions and movements in the Collective Provision are charged direct to the Income Statement, driving increased earnings volatility; and

movements in the Collective Provision are driven by changes in portfolio size, portfolio mix, credit risk and economic cycles.

(b) Fee revenue - financial service fees recognised as an adjustment to yield

Initial reduction in retained earnings.

Under AASB 139: Financial Instruments: Recognition and Measurement, fee income (such as loan approval fees) integral to the yield of an originated financial instrument (such as loans and advances measured at amortised cost), net of any direct incremental costs, are capitalised and deferred over the expected life of the financial instrument.

On 1 October 2005, certain fees that have previously been recognised in the Income Statement, were deferred and recognised against net loans and advances in the Balance Sheet with a corresponding reduction to retained earnings of \$276 million after tax. The annual impact on net profit from this change is not material. However, there was an increase in interest income (offset by a reduction in fee income) and a reclassification to interest earning assets of customers liabilities for acceptances of \$13.4 billion.

(c) Derivative financial instruments, including hedging

Initial reduction in retained earnings. Volatility in future earnings. New assets and liabilities recognised.

At 1 October 2005, recognition of the fair value of derivatives relating to securitisation vehicles and structured finance transactions reduced retained earnings by \$78 million. The Group continues to evaluate hedging relationships and effectiveness for certain structured finance transactions, which introduces volatility within the Income Statement.

AIFRS permits hedge accounting (if certain criteria are met) for fair value hedges, cash flow hedges and hedges of investments in foreign operations. Fair value and cash flow hedge accounting can only be considered where prospective and retrospective effectiveness tests are met and the hedge relationship has been adequately documented. Ineffectiveness precludes the use of hedge accounting.

At 1 October 2005, the Group designated certain fair value and cash flow hedges and financial liabilities as fair value through other income in the profit and loss, resulting in an increase in net assets of \$86 million represented by a decrease in retained earnings of \$75 million, and an increase in reserves of \$161 million.

(d) Financial instruments classification and measurement

Certain assets reclassified and measured at fair value. Initial decrease in retained earnings.

Under AIFRS, certain financial assets of the Group previously carried at amortised cost were either:

reclassified as available-for-sale assets, resulting in measurement at fair value with movements being taken to an available-for-sale equity reserve (1 October 2005: \$17 million); or

reclassified as financial assets held at fair value through the profit and loss, with movements in fair value through other income in the profit and loss resulting in a decrease in retained earnings (1 October 2005: \$3 million).

All derivative financial instruments, including those used as hedging instruments, are measured at fair value and recognised in the Balance Sheet. This requires an adjustment to reflect the market value of counterparty risk in the fair value of derivatives, which resulted in a decrease in retained earnings of \$29 million at 1 October 2005. (Under AGAAP, counterparty risk was notionally allowed for as part of the General Provision.)

Financial instruments are measured under AIFRS at bid or offer prices rather than the previous AGAAP use of mid prices. On 1 October 2005, this change in measurement resulted in a decrease to retained earnings of \$5 million.

(e) Classification of hybrid financial instruments

Reclassification of ANZ StEPS from equity to debt.

Under AASB 132: Financial Instruments: Presentation, ANZ StEPS, a hybrid Tier 1 instrument treated as equity under previous AGAAP, was reclassified as debt. Prepaid issue costs, offset against the preference share capital balance under previous AGAAP, were capitalised and amortised to interest over a 5 year period from the date of issue.

At 1 October 2005, loan Capital increased to \$1 billion representing the transfer of \$987 million from Preference Share Capital to Loan Capital, capitalised prepaid issue costs of \$11 million, deferred tax liability of \$4 million and a decrease in retained earnings after tax of \$6 million representing amortisation of prepaid issue costs. Ongoing distributions to the holders of ANZ StEPS will be treated as an interest expense in the Income Statement rather than as dividends under previous AGAAP.

(f) Accounting for INGA

Initial reduction in retained earnings and increase in notional goodwill.

Under AASB 131: Interests in Joint Ventures , and in line with previous AGAAP, the Group is required to equity account for its interest in INGA. The adoption of AIFRS by INGA resulted in the following significant measurement and recognition differences to previous AGAAP:

reclassification and measurement of shareholder investments as available-for-sale assets. This change in measurement results in a reduction in investment return volatility experienced by INGA, as only realised gains and losses are reported in its net profit;

increased policy liabilities resulting from a change in the discount rates applied in the actuarial calculation of policy liabilities and the separate presentation and change in basis of deferred acquisition costs (largely commissions) previously included within net policy liabilities (total impact is a decrease to retained earnings of \$107 million);

initial entry fee income previously taken upfront is deferred and amortised to income over time (total impact is a decrease to retained earnings of \$23 million); and

other sundry items (total impact is a decrease to retained earnings of \$16 million)

Under AIFRS, the excess of the market value over net assets (EMVONA) for INGA's life insurance controlled entities is no longer recognised. Accordingly, an adjustment for this amount has been made to notional goodwill of \$72 million.

The Group's 49% share of INGA's net AIFRS adjustment is a decrease of \$146 million to retained earnings and an increase of \$8 million to the available-for-sale reserve, resulting in a reduction in the carrying value of the Group's interest in INGA of \$138 million as at 1 October 2005.

Explanation of material AIFRS adjustments to the AGAAP cash flow statement for 31 March 2005 and 30 September 2005

Various assets and liabilities (principally loans and advances and deposits and other borrowings) which were classified as investing or financing cash flows, are now reclassified as operating cash flows under AIFRS. The Group's net cash position has not changed. There are no other material differences between the cash flow statement presented under AIFRS and that presented under previous AGAAP.

DIRECTORS' DECLARATION

The directors of Australia and New Zealand Banking Group Limited declare that:

1. in the directors' opinion the financial statements and notes of the consolidated entity set out on pages 61 to 115 are in accordance with the Corporations Act 2001 (as amended), including:

(a) that they comply with Australian Accounting Standard AASB 134: Interim Financial Reporting, and the Corporations Regulations 2001, and

(b) that they give a true and fair view of the financial position of the consolidated entity as at 31 March 2006 and of its performance for the half year ended on that date; and

2. in the directors' opinion at the date of this declaration there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

Signed in accordance with a resolution of the directors.

/s/ Charles Goode
Charles Goode
Chairman

AUDITORS' REVIEW REPORT AND INDEPENDENCE STATEMENT

Independent review report to the members of Australia and New Zealand Banking Group Limited

Scope

We have reviewed the financial report of Australia and New Zealand Banking Group Limited (the Company) for the half year ended 31 March 2006, consisting of the consolidated condensed interim statements of income, balance sheet, recognised income and expense, cash flows, accompanying notes 1 to 24 and the Directors' Declaration set out on pages 64 to 116. The financial report includes the consolidated condensed financial statements of the consolidated entity comprising the Company and the entities it controlled at the end of the half year or from time to time during the half year. The Company's directors are responsible for the financial report including the relevant reconciling information regarding adjustments required under the Australian Accounting Standard AASB 1: First-time Adoption of Australian equivalents to International Financial Reporting Standards.

We have performed an independent review of the financial report in order to state whether, on the basis of the procedures described, anything has come to our attention that would indicate that the financial report is not presented fairly in accordance with Australian Accounting Standard AASB 134: Interim Financial Reporting and other mandatory financial reporting requirements in Australia and statutory requirements, so as to present a view which is consistent with our understanding of the consolidated entity's financial position, and performance as represented by the results of its operations and its cash flows and in order for the Company to lodge the financial report with the Australian Securities and Investments Commission.

Our review has been conducted in accordance with Australian Auditing Standards applicable to review engagements. A review is limited primarily to inquiries of Company personnel and analytical procedures applied to the financial data. These procedures do not provide all the evidence that would be required in an audit, thus the level of assurance is less than given in an audit. We have not performed an audit and, accordingly, we do not express an audit opinion.

Statement

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half year financial report of Australia and New Zealand Banking Group Limited is not in accordance with:

(a) the Corporations Act 2001, including:

(i) giving a true and fair view of the consolidated entity financial position as at 31 March 2006 and of its performance for the half year ended on that date; and

(ii) complying with Australian Accounting Standard AASB 134: Interim Financial Reporting and the Corporations Regulations 2001; and

(b) other mandatory financial reporting requirements in Australia.

27 April 2006

Lead Auditor's Independence Statement to the directors of Australia and New Zealand Banking Group Limited

I state that, to the best of my knowledge and belief in relation to the review for the half year ended 31 March 2006 there have been:

(a) no contraventions of the auditor independence requirements of the Corporations Act 2001 in relation to the review, other than contraventions (relating to minor matters rectified within 7 days and reported to the directors) covered by ASIC Class Order 05/910; and

(b) no contraventions of any applicable code of professional conduct in relation to the review.

DEFINITIONS

Adjusted common equity (ACE) is Tier 1 capital less preference shares and other Hybrid Capital at current rates and regulatory deductions from total capital.

AIFRS - Australian Equivalents of International Accounting Standards

Business Unit description:

Personal Banking Australia

Banking Products manufactures deposit, transaction account and margin lending products.

Consumer Finance provides consumer and commercial credit cards, ePayment products, personal loans, and merchant payment and ATM facilities.

Mortgages provides mortgage finance secured by residential real estate in Australia.

Rural Commercial and Agribusiness Products provides a full range of banking services to personal customers across Australia, and to small business and agricultural customers in rural Australia.

Investment & Insurance Products comprises the equity accounted earnings from INGA's core business operations (excludes investment earnings), the Financial Planning distribution business, margin lending, the trustee business and E*Trade.

Other includes the branch network, whose costs are fully recovered from product business units, Private Banking and marketing and support costs.

Institutional

Client Relationship Group manages customer relationships and develops financial services solutions and strategies for large businesses with a turnover greater than \$100 million in Australia and New Zealand and, through corporate clients where the Group has an existing customer relationship, in the United Kingdom, United States and Asia.

Corporate and Structured Financing provides complex financing and advisory services, structured financial products, leasing, private equity, project and leveraged finance and infrastructure investment to ANZ's Institutional, Corporate and Small Business customers.

Debt Product Group manages Institutional's balance sheet with particular focus on credit quality, diversification and maximising risk adjusted returns.

Markets provides origination, underwriting, structuring, risk management, advice and sale of credit and derivative products, foreign exchange and commodity trading and sales-related services globally.

Trade and Transaction Services provides cash management, trade finance, international payments, clearing and custodian services principally to institutional and corporate customers.

New Zealand Businesses

ANZ Retail operating under the ANZ brand in New Zealand provides a full range of banking service to personal and business banking customers.

Corporate Banking in New Zealand incorporates the ANZ and NBNZ brands, and provides financial solutions through a relationship management model for medium-sized businesses with a turnover up to NZD100 million.

National Bank Retail operating under the National Bank brand in New Zealand, provides a full range of banking services to personal customers from youth through to private banking, and business banking customers with turnover up to NZD5 million.

NBNZ refers to the operations of the National Bank of New Zealand Limited purchased on 1 December 2003. These operations were amalgamated with ANZ Banking Group (New Zealand) Limited on 26 June 2004 to form **ANZ National Bank Limited (ANZ NB)**. NBNZ was reported as a separate business unit until 30 September 2004.

Rural Banking in New Zealand provides a full range of banking services to rural and agribusiness customers.

Corporate Australia

Business Banking in Australia provides a full range of banking services to metropolitan-based small to medium businesses, with turnover up to \$10 million and business banking funds under management of more than \$50,000.

Corporate Banking Australia manages customer relationships and develops financial solutions for medium-sized businesses with a turnover of \$10 million to \$150 million.

Small Business Banking in Australia provides business banking services to metropolitan-based small businesses, with business banking funds under management of up to \$50,000.

Non-continuing Businesses comprises the London headquartered project finance business the run-off of New Zealand conduit transactions and certain structured finance transactions that ANZ has exited as part of its de-risking strategy.

Group Centre

treasury is the banker to all ANZ businesses charged with providing cashflow support, ensuring liquidity, managing interest rate risk and providing capital to the businesses.

Economic loss provisioning (ELP) charge is determined based on the expected average annual loss of principal over the economic cycle for the current risk profile of the lending portfolio.

Equity standardisation Economic Value Added (EVATM) principles are in use throughout the Group, whereby risk adjusted capital is allocated and charged against business units. Equity standardised profit is determined by eliminating the impact of earnings on each business unit's book capital and attributing earnings on the business unit's risk adjusted capital. This enhances comparability of business unit performance. Geographic results are not equity standardised.

Impaired assets are those whose carrying value was greater than the amount expected to be recovered over its life. More specifically, in relation to loans or other credit facilities, impairment may arise where there is reasonable doubt about the collectability of interest, fees (past and future) or principal outstanding, or where concessional terms have been provided because of the financial difficulties of the customer.

Income includes external interest income, other external operating income, and if positive and net intersegment interest income.

Individual provision charge is the amount of impairment on those loans and advances assessed for impairment on an individual basis (as opposed to on a collective basis). It takes into account expected cash flow over the lives of those loans and advances.

Liquid assets are cash and cash equivalent assets. Cash equivalent assets are highly liquid investments with short periods to maturity, are readily convertible to cash at ANZ's option and are subject to an insignificant risk of changes in value.

Net advances include gross loans and advances and acceptances less income yet to mature and provisions (for both as at and average volumes).

Net inter business unit expenses - consists of the charges made between business units for the provision of support services. Both payments and receipts by business units are shown as net inter business unit expenses.

Net interest margin is net interest income as a percentage of average interest earning assets. Non-assessable interest income is grossed up to the equivalent before tax amount for the purpose of these calculations.

Net interest spread is the average interest rate received on interest earning assets less the average interest rate paid on interest bearing liabilities. Non-assessable interest income is grossed up to the equivalent before tax amount for the

purpose of these calculations.

Net non-interest bearing items, referred to in the analysis of interest spread and net interest average margin, includes shareholders' equity, impairment of loans and advances, and deposits not bearing interest and other liabilities not bearing interest, offset by premises and equipment and other non-interest earning assets. Impaired loans are included within interest bearing loans, advances and bills discounted.

Net tangible assets equals share capital and reserves attributable to shareholders of the company less preference share capital and unamortised intangible assets (including software).

Operating expenses exclude the provision for impairment of loans and advances charge.

Operating income in business segments includes equity standardised net interest and other operating income.

Overseas Markets includes all operations outside of Australia and New Zealand. The Group's geographic segments are Australia, New Zealand and Overseas Markets.

Profit on a fully comparable AIFRS basis is management's estimate of prior year results adjusted for the impact of those AIFRS standards, principally financial instrument and insurance related, which became effective from 1 October 2005. No adjustment has been made to retrospectively designate derivatives hedging the Group's funding on the basis of impracticability.

Return on asset ratios include net intra group assets which are risk weighted at 0% for return on risk weighted assets calculations.

Significant items are items that have a material impact (typically >\$10 million) on profit after tax, or the earnings used in the earnings per share calculation. Significant items also do not arise in the normal course of business and are infrequent in nature. Divestments are typically defined as significant items.

Total advances include gross loans and advances and acceptances less income yet to mature (for both as at and average volumes). Loans and advances classified as available-for-sale are excluded from total advances.

Unproductive facilities comprise facilities (such as standby letters of credit, bill endorsements, documentary letters of credit, guarantees to third parties, undrawn facilities to which the Group is irrevocably committed and market related exposures) where the customer status is non-accrual.
