Re: Unaudited Second Quarter 2007 Financial Statements

Summary

Attached are CBOE's unaudited financial statements as of June 30, 2007. During the second quarter of 2007 CBOE recorded a pre-tax profit of \$32.2 million on average volume of 3,499,000 options contracts per day. During the same quarter last year CBOE recorded a pre-tax profit of \$23.7 million on average volume of 2,918,000 options contracts per day. Year-to-date, CBOE is reporting a pre-tax profit of \$62.5 million on average volume of 3,435,000 options contracts per day. During the same period last year CBOE reported a pre-tax profit of \$32.0 million on average volume of 2,705,000 options contracts per day.

Revenue

Gross revenue totaled \$84.6 million for the second quarter of 2007 compared to \$70.5 million for the same period in 2006. The \$14.1 million increase (20% over 2006) resulted from higher trading volumes that increased transaction fees by \$11.3 million. All other revenue categories increased by \$2.8 million during the second quarter of 2007 compared to the same quarter last year.

Year-to-date, gross revenue totaled \$162.5 million compared to \$129.7 million for the same period in 2006. The \$32.8 million increase (25% over 2006) reflects the higher trading volume in 2007 compared to 2006.

Expenses

Expenses totaled \$52.4 million for the second quarter of 2007 compared to \$46.8 million for the same period in 2006. Employee costs increased by \$3.1 million as a result of severance costs (\$1.6 million increase) and accrued expense for year-end staff bonuses (\$1.3 million increase). Severance expenses increased for the quarter ended June 30, 2007 as CBOE enacted a restructuring in May 2007 that resulted in the elimination of approximately 25 positions, while no

such action occurred in the same period in 2006. The increase in the bonus provision is driven by increased profitability. Depreciation and amortization decreased by \$0.7 million in the second quarter 2007 due to capital expenditures in 2004 and 2005 being slightly lower than historical averages. Outside services increased by \$1.5 million mostly because of increased legal costs. Travel and promotional expenses increased by \$0.8 million and is attributable to our corporate branding program. Royalty fees increased by \$1.4 million because of high volume in licensed products. Other expense declined \$0.6 million mainly due to a reduction in trade engine related systems errors.

On a year-to-date basis, total expense is \$100.0 million for the six months ended June 30, 2007 compared to \$97.6 million for the same period in 2006. Decreases in employee costs (\$1.4 million) and depreciation and amortization (\$1.4 million) are offset by increases in outside services (\$1.5 million, mostly for legal costs); royalty fees (\$1.7 million, because of increased volume); and travel and promotional expenses (\$1.3 million for the corporate branding initiative).

Consolidated Balance Sheets

Working capital (current assets minus current liabilities) increased by \$13.6 million to \$122.9 million during the second quarter while cash and investments increased by \$3.0 million to \$131.5 million at June 30, 2007. These increases are attributable to revenue exceeding cash expenses less capital expenditures resulting from high trading volume during the quarter. CBOE also spent \$11.7 million for capital expenditures mostly for systems hardware and capitalized software during the three months ended June 30, 2007.
