Management Comments

“The fourth quarter and 2010 as a whole were excellent by any metric”, commented Gabi Seligsohn, President and CEO of Nova. “For the second consecutive year, we continued to outperform the industry by solid execution of our strategic plans. We implemented adjustments to our business model in integrated metrology; we continued our penetration of the stand alone metrology market and doubled our customer base; we improved the performance of our services business and, finally, we identified attractive new areas for growth in new process technologies”.

“In order to maintain our current strong margins on significantly higher revenues over the long term, we continued to step up our research and development expenses and capital expenditures during the fourth quarter, and this investment will continue during 2011. Through our strategic investments, we believe we will succeed in expanding our share of currently served market segments by introducing next generation solutions and adding applications at existing customer sites. In addition, we expect to expand our total addressable market to close to \$1 billion over the next few years, by introducing solutions for new process technologies that our customers are currently developing. These steps are the cornerstones of our strategy that will enable us to continue to outperform the overall market over the long term.”
