UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

x Quarterly Report pursuant to Section 13 or 15 (d) of the Securities Exchange

Act of 1934 for the Quarterly Period Ended June 30, 2009.

o Transition report pursuant to Section 13 or 15 (d) of the Exchange Act for the

Transition Period from _____ **to** _____ **.**

No. 0-17077

(Commission File Number)

PENNS WOODS BANCORP, INC.

(Exact name of Registrant as specified in its charter)

PENNSYLVANIA

23-2226454

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-Q

(State or other jurisdiction of
incorporation or organization)

(I.R.S. Employer
Identification No.)

300 Market Street, P.O. Box 967 Williamsport, Pennsylvania
(Address of principal executive offices)

17703-0967
(Zip Code)

(570) 322-1111

Registrant's telephone number, including area code

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definition of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Small reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). YES NO

On July 30, 2009 there were 3,832,957 shares of the Registrant's common stock outstanding.

PENNS WOODS BANCORP, INC. AND SUBSIDIARIES

NOTES TO

CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1. Basis of Presentation

The consolidated financial statements include the accounts of Penns Woods Bancorp, Inc. (the Company) and its wholly-owned subsidiaries: Woods Investment Company, Inc., Woods Real Estate Development Company, Inc., and Jersey Shore State Bank (the Bank) and its wholly-owned subsidiary, The M Group, Inc. D/B/A The Comprehensive Financial Group (The M Group). All significant inter-company balances and transactions have been eliminated in the consolidation.

The interim financial statements are unaudited but, in the opinion of management, reflect all adjustments necessary for the fair presentation of results for such periods. The results of operations for any interim period are not necessarily indicative of results for the full year. These financial statements should be read in conjunction with financial statements and notes thereto contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

The accounting policies followed in the presentation of interim financial results are the same as those followed on an annual basis. These policies are presented on pages 38 through 44 of the Annual Report on Form 10-K for the year ended December 31, 2008.

In reference to the attached financial statements, all adjustments are of a normal recurring nature pursuant to Rule 10-01(b) (8) of Regulation S-X.

Note 2. Recent Accounting Pronouncements

In April 2009, the FASB issued FASB Staff Position (FSP) No. FAS 141(R)-1, *Accounting for Assets Acquired and Liabilities Assumed in a Business Combination That Arise from Contingencies* (FAS 141(R)-1). This FSP requires companies acquiring contingent assets or assuming contingent liabilities in business combination to either (a) if the assets' or liabilities' fair value can be determined, recognize them at fair value, at the acquisition date, or (b) if the assets' or liabilities' fair value cannot be determined, but (i) it is probable that an asset existed or that a liability had been incurred at the acquisition date and (ii) the amount of the asset or liability can be reasonably estimated, recognize them at their estimated amount, at the acquisition date. If the fair value of these contingencies cannot be determined and they are not probable or cannot be reasonably estimated, then companies should not recognize these contingencies as of the acquisition date and instead should account for them in subsequent periods by following other applicable GAAP. This FSP also eliminates the FAS 141(R)-1 requirement of disclosing in the footnotes to the financial statements the range of expected outcomes for a recognized contingency. This FSP shall be effective for assets or liabilities arising from contingencies in business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The adoption of this FSP has

Table of Contents

not and is not expected to have a material effect on the Company's results of operations or financial position.

In April 2009, the FASB issued FSP No. FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* (FAS 157-4). This FSP relates to determining fair values when there is no active market or where the price inputs being used represent distressed sales. It reaffirms the need to use judgment to ascertain if a formerly active market has become inactive and in determining fair values when markets have become inactive. FAS 157-4 is effective for interim and annual periods ending after June 15, 2009, but entities may early adopt this FSP for the interim and annual periods ending after March 15, 2009. The adoption of this FSP has not and is not expected to have a material effect on the Company's results of operations or financial position.

In April 2009, the FASB issued FSP No. FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments* (FAS 107-1 and APB 28-1), which relates to fair value disclosures for any financial instruments that are not currently reflected on the balance sheet of companies at fair value. Prior to issuing this FSP, fair values for these assets and liabilities were only disclosed once a year. The FSP now requires these disclosures on a quarterly basis, providing qualitative and quantitative information about fair value estimates for all those financial instruments not measured on the balance sheet at fair value. FAS 107-1 and APB 28-1 is effective for interim and annual periods ending after June 15, 2009, but entities may early adopt this FSP for the interim and annual periods ending after March 15, 2009. The adoption of this FSP has not and is not expected to have a material effect on the Company's results of operations or financial position.

In April 2009, the FASB issued FSP No. FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments* (FAS 115-2 and FAS 124-2), which provides additional guidance designed to create greater clarity and consistency in accounting for and presenting impairment losses on securities. FAS 115-2 and FAS 124-2 are effective for interim and annual periods ending after June 15, 2009, but entities may early adopt this FSP for the interim and annual periods ending after March 15, 2009. The adoption of this FSP has not and is not expected to have a material effect on the Company's results of operations or financial position.

In May 2009, the FASB issued FAS No. 165, *Subsequent Events* (FAS 165), which requires companies to evaluate events and transactions that occur after the balance sheet date but before the date the financial statements are issued, or available to be issued in the case of non-public entities. FAS 165 requires entities to recognize in the financial statements the effect of all events or transactions that provide additional evidence of conditions that existed at the balance sheet date, including the estimates inherent in the financial preparation process. Entities shall not recognize the impact of events or transactions that provide evidence about conditions that did not exist at the balance sheet date but arose after that date. FAS 165 also requires entities to disclose the date through which subsequent events have been evaluated. FAS 165 was effective for interim and annual reporting periods ending after June 15, 2009. The Company adopted the

Table of Contents

provisions of FAS 165 for the quarter ended June 30, 2009, as required, and adoption did not have a material impact on Company's results of operations or financial position.

In June 2009, the FASB issued FAS No. 166, *Accounting for Transfers of Financial Assets* (FAS 166). FAS 166 removes the concept of a qualifying special-purpose entity (QSPE) from FAS No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities*, and removes the exception from applying FIN 46(R). This statement also clarifies the requirements for isolation and limitations on portions of financial assets that are eligible for sale accounting. This statement is effective for fiscal years beginning after November 15, 2009. As such, the Company plans to adopt FAS 166 effective January 1, 2010. The adoption of this standard is not expected to have a material effect on the Company's results of operations or financial position.

In June 2009, the FASB issued FAS No. 167, *Amendments to FASB Interpretation No. 46(R)* (FAS 167). FAS 167, which amends FASB Interpretation No. 46 (revised December 2003), *Consolidation of Variable Interest Entities*, (FIN 46(R)), prescribes a qualitative model for identifying whether a company has a controlling financial interest in a variable interest entity (VIE) and eliminates the quantitative model prescribed by FIN 46(R). The new model identifies two primary characteristics of a controlling financial interest: (1) it provides a company with the power to direct significant activities of the VIE, and (2) it obligates a company to absorb losses of and/or provides rights to receive benefits from the VIE. FAS 167 requires a company to reassess on an ongoing basis whether it holds a controlling financial interest in a VIE. A company that holds a controlling financial interest is deemed to be the primary beneficiary of the VIE and is required to consolidate the VIE. This statement is effective for fiscal years beginning after November 15, 2009. The adoption of this standard is not expected to have a material effect on the Company's results of operations or financial position.

In June 2009, the FASB issued FAS No. 168, *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles* (FAS 168). FAS No. 168 establishes the *FASB Accounting Standards Codification* (Codification), which was officially launched on July 1, 2009, and became the primary source of authoritative U.S. GAAP recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under the authority of Federal securities laws are also sources of authoritative GAAP for SEC registrants. The subsequent issuances of new standards will be in the form of Accounting Standards Updates that will be included in the Codification. FAS No. 168 is effective for financial statements issued for interim and annual periods ending after September 15, 2009. As such, the Company plans to adopt FAS No.168 in connection with its third quarter 2009 reporting. As the Codification is neither expected nor intended to change GAAP, the adoption of FAS 168 will not have a material impact on its results of operations or financial position.

Note 3. Per Share Data

There are no convertible securities which would affect the denominator in calculating basic and dilutive earnings per share; therefore, net income as presented on the consolidated statement of income will be used as the numerator. The following table sets forth the composition of the

Table of Contents

weighted average common shares (denominator) used in the basic and dilutive per share computation.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Weighted average common shares issued	4,011,548	4,008,030	4,011,163	4,007,603
Average treasury stock shares	(179,028)	(142,053)	(179,028)	(137,244)
Weighted average common shares and common stock equivalents used to calculate basic earnings per share	3,832,520	3,865,977	3,832,135	3,870,359
Additional common stock equivalents (stock options) used to calculate diluted earnings per share	76	138	38	164
Weighted average common shares and common stock equivalents used to calculate diluted earnings per share	3,832,596	3,866,115	3,832,173	3,870,523

Options to purchase 990 shares of common stock were outstanding during the three and six months ended June 30, 2009 but were not included in the computation of diluted earnings per share as they were anti-dilutive due to the strike price of \$31.82 being greater than the average market price of \$28.00 and \$26.31 for the three and six months ended June 30, 2009. Options to purchase 8,273 and 9,923 shares of common stock were outstanding during the three and six months ended June 30, 2008 but were not included in the computation of diluted earnings per share as they were anti-dilutive due to the strike price being greater than the average market price for the three and six months ended June 30, 2008.

Note 4. Net Periodic Benefit Cost-Defined Benefit Plans

For a detailed disclosure on the Company's pension and employee benefits plans, please refer to Note 11 of the Company's Consolidated Financial Statements included in the Annual Report on Form 10-K for the year ended December 31, 2008.

The following sets forth the components of the net periodic benefit cost of the domestic non-contributory defined benefit plan for the three and six months ended June 30, 2009 and 2008, respectively:

Table of Contents

(In Thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Service cost	\$ 136	\$ 136	\$ 272	\$ 273
Interest cost	170	152	340	304
Expected return on plan assets	(127)	(163)	(254)	(320)
Amortization of transition obligation			(1)	(1)
Amortization of prior service cost	7	7	13	13
Amortization of net loss	84	14	169	28
Net periodic cost	\$ 270	\$ 146	\$ 539	\$ 297

Employer Contributions

The Company previously disclosed in its consolidated financial statements, included in the Annual Report on Form 10-K for the year ended December 31, 2008, that it expected to contribute a minimum of \$325,000 to its defined benefit plan in 2009. As of June 30, 2009, there were contributions \$519,000 made to the plan. The Company expects to contribute a minimum of \$287,000 to the defined benefit plan during the remaining period of 2009.

Note 5. Off Balance Sheet Risk

The Company is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments are primarily comprised of commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit, interest rate, or liquidity risk in excess of the amount recognized in the consolidated balance sheet. The contract amounts of these instruments express the extent of involvement the Company has in particular classes of financial instruments.

The Company's exposure to credit loss from nonperformance by the other party to the financial instruments for commitments to extend credit and standby letters of credit is represented by the contractual amount of these instruments. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments. The Company may require collateral or other security to support financial instruments with off-balance sheet credit risk.

Financial instruments whose contract amounts represent credit risk are as follows at June 30, 2009 and December 31, 2008:

(In Thousands)	June 30, 2009	December 31, 2008
Commitments to extend credit	\$ 88,763	\$ 85,871
Standby letters of credit	1,532	841

Table of Contents

Commitments to extend credit are legally binding agreements to lend to customers. Commitments generally have fixed expiration dates or other termination clauses and may require payment of fees. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future liquidity requirements. The Company evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company, on an extension of credit is based on management's credit assessment of the counterparty.

Standby letters of credit represent conditional commitments issued by the Company to guarantee the performance of a customer to a third party. These instruments are issued primarily to support bid or performance related contracts. The coverage period for these instruments is typically a one year period with an annual renewal option subject to prior approval by management. Fees earned from the issuance of these letters are recognized upon expiration of the coverage period. For secured letters of credit, the collateral is typically Bank deposit instruments or customer business assets.

Note 6. Reclassification of Comparative Amounts

Certain comparative amounts for the prior period have been reclassified to conform to current period presentations. Such reclassifications had no effect on net income or shareholders' equity.

Note 7. Employee Stock Purchase Plan

The Company maintains the Penns Woods Bancorp, Inc. 2006 Employee Stock Purchase Plan (Plan). The Plan is intended to encourage employee participation in the ownership and economic progress of the Company. The Plan allows for up to 1,000,000 shares to be purchased by employees. The purchase price of the shares is 95% of market value with an employee eligible to purchase up to the lesser of 15% of base compensation or \$12,000 in market value annually. During the six months ended June 30, 2009 and 2008, there were 1,457 and 1,569 shares issued under the plan, respectively.

Note 8. Fair Value Measurements

Effective January 1, 2008, the Company adopted the provisions of FAS No. 157, *Fair Value Measurements* (FAS 157), for financial assets and financial liabilities. FAS 157 provides enhanced guidance for using fair value to measure assets and liabilities. The standard applies whenever other standards require or permit assets or liabilities to be measured at fair value. The standard does not expand the use of fair value in any new circumstances. The FASB issued Staff Position No. 157-1, *Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement under Statement 13*, which removed leasing transactions accounted for under FAS 13 and related guidance from the scope of FAS No. 157. The FASB also issued Staff Position No. 157-2, *Partial Deferral of the Effective Date of Statement 157*, which deferred the effective date of FAS 157 for all nonfinancial assets and nonfinancial liabilities to fiscal years beginning after November 15, 2008.

Table of Contents

FAS 157 establishes a hierarchal disclosure framework associated with the level of pricing observability utilized in measuring assets and liabilities at fair value. The three broad levels defined by FAS 157 hierarchy are as follows:

- Level I: Quoted prices are available in active markets for identical assets or liabilities as of the reported date.
- Level II: Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reported date. The nature of these assets and liabilities include items for which quoted prices are available but traded less frequently, and items that are fair valued using other financial instruments, the parameters of which can be directly observed.
- Level III: Assets and liabilities that have little to no pricing observability as of the reported date. These items do not have two-way markets and are measured using management's best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation.

The following table presents the assets reported on the balance sheet at their fair value on a recurring basis as of June 30, 2009 and December 31, 2008, by level within the fair value hierarchy. As required by FAS 157, financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

(In Thousands)	June 30, 2009				Total
	Level I	Level II	Level III		
Assets Measured on a Recurring Basis:					
Investment Securities, available-for-sale	\$ 11,728	\$ 196,173	\$	\$	207,901

(In Thousands)	December 31, 2008				Total
	Level I	Level II	Level III		
Assets Measured on a Recurring Basis:					
Investment Securities, available-for-sale	\$ 13,269	\$ 194,982	\$	\$	208,251

The following table presents the assets reported on the balance sheet at their fair value on a non-recurring basis as of June 30, 2009 and December 31, 2008, by level within the fair value hierarchy. As required by FAS 157, financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

(In Thousands)	June 30, 2009				Total
	Level I	Level II	Level III		
Assets Measured on a Non-recurring Basis:					
Impaired Loans	\$	\$ 6,044	\$	\$	6,044

(In Thousands)	December 31, 2008				Total
	Level I	Level II	Level III		
Assets Measured on a Non-recurring Basis:					
Impaired Loans	\$	\$ 4,876	\$	\$	4,876

Table of Contents**NOTE 9. ESTIMATED FAIR VALUE OF FINANCIAL INSTRUMENTS**

The Company is required to disclose estimated fair values for its financial instruments. Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Also, it is the Company's general practice and intention to hold most of its financial instruments to maturity and not to engage in trading or sales activities. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions can significantly affect the estimates.

Estimated fair values have been determined by the Company using historical data and an estimation methodology suitable for each category of financial instruments. The Company's fair value estimates, methods, and assumptions are set forth below for the Company's other financial instruments.

As certain assets and liabilities, such as deferred tax assets, premises and equipment, and many other operational elements of the Company, are not considered financial instruments but have value, this estimated fair value of financial instruments would not represent the full market value of the Company.

The estimated fair values of the Company's financial instruments are as follows at June 30, 2009 and December 31, 2008:

(In Thousands)	June 30, 2009		December 31, 2008	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Financial assets:				
Cash and cash equivalents	\$ 18,647	\$ 18,647	\$ 16,581	\$ 16,581
Investment securities:				
Available for sale	207,901	207,901	208,251	208,251
Held to maturity	110	111	135	136
Loans held for sale	4,595	4,595	3,622	3,622
Loans, net	387,697	394,297	377,122	380,771
Bank-owned life insurance	14,862	14,862	14,546	14,546
Accrued interest receivable	3,468	3,468	3,614	3,614
Financial liabilities:				
Interest-bearing deposits	\$ 420,492	\$ 423,268	\$ 345,333	\$ 347,657
Noninterest-bearing deposits	74,509	74,509	76,035	76,035

Long-term borrowings, FHLB	86,778	85,772	86,778	88,188
Accrued interest payable	1,220	1,220	1,317	1,317

Table of Contents

Cash and Cash Equivalents, Loans Held for Sale, Accrued Interest Receivable, Short-term Borrowings, and Accrued Interest Payable:

The fair value is equal to the carrying value.

Investment Securities:

The fair value of investment securities available for sale and held to maturity is equal to the available quoted market price. If no quoted market price is available, fair value is estimated using the quoted market price for similar securities. Regulatory stocks fair value is equal to the carrying value.

Loans:

Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as commercial, commercial real estate, residential real estate, construction real estate, and other consumer. Each loan category is further segmented into fixed and adjustable rate interest terms and by performing and nonperforming categories.

The fair value of performing loans is calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect the credit and interest rate risk inherent in the loan. The estimate of maturity is based on the Company's historical experience with repayments for each loan classification, modified, as required, by an estimate of the effect of current economic and lending conditions.

Fair value for significant nonperforming loans is based on recent external appraisals. If appraisals are not available, estimated cash flows are discounted using a rate commensurate with the risk associated with the estimated cash flows. Assumptions regarding credit risk, cash flows, and discounted rates are judgmentally determined using available market information and specific borrower information.

Bank-Owned Life Insurance:

The fair value is equal to the cash surrender value of the life insurance policies.

Deposits:

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-Q

The fair value of deposits with no stated maturity, such as noninterest-bearing demand deposits, savings, NOW, and money market accounts, is equal to the amount payable on demand as of June 30, 2009 and December 31, 2008. The fair value of certificates of deposit is based on the discounted value of contractual cash flows.

The fair value estimates above do not include the benefit that results from the low-cost funding provided by the deposit liabilities compared to the cost of borrowing funds in the market, commonly referred to as the core deposit intangible.

Long Term Borrowings:

The fair value of long term borrowings is based on the discounted value of contractual cash flows.

Table of Contents

Commitments to Extend Credit, Standby Letters of Credit, and Financial Guarantees Written:

There is no material difference between the notional amount and the estimated fair value of off-balance sheet items at June 30, 2009 and December 31, 2008. The contractual amounts of unfunded commitments and letters of credit are presented in Note 5.

Note 10. Federal Home Loan Bank Stock

The Bank is a member of the Federal Home Loan Bank of Pittsburgh (the FHLB), which is one of 12 regional Federal Home Loan Banks. Each Federal Home Loan Bank serves as a reserve or central bank for its members within its assigned region. It is funded primarily from funds deposited by member institutions and proceeds from the sale of consolidated obligations of the Federal Home Loan Bank System. It makes loans to members (i.e., advances) in accordance with policies and procedures established by the board of directors of the Federal Home Loan Bank. As a member, the Bank is required to purchase and maintain stock in the FHLB in an amount equal to the greater of 1% of its aggregate unpaid residential mortgage loans, home purchase contracts or similar obligations at the beginning of each year or 5% of its outstanding advances from the FHLB. At June 30, 2009, the Bank held \$7,271,300 in stock of the FHLB, which was in compliance with this requirement.

The Company evaluated its holding of FHLB stock for impairment and deemed the stock to not be impaired due to the expected recoverability of the par value, which equals the value reflected within the Company's financial statements. The decision was based on several items ranging from the estimated true economic losses embedded within the FHLB's mortgage portfolio to the FHLB's liquidity position and credit rating. The Company utilizes the impairment framework outlined in paragraph 8(i) of SOP 01-06 and paragraphs 12.21 - 12.25 of the AICPA Audit Guide for Depository and Lending Institutions to evaluate FHLB stock for impairment.

The following factors were evaluated to determine the ultimate recoverability of the par value of the Company's FHLB stock holding; (i) the significance of the decline in net assets of the FHLB as compared to the capital stock amount for the FHLB and the length of time this situation has persisted; (ii) commitments by the FHLB to make payments required by law or regulation and the level of such payments in relation to the operating performance of the FHLB; (iii) the impact of legislative and regulatory changes on the institutions and, accordingly, on the customer base of the FHLB; (iv) the liquidity position of the FHLB; and (v) whether a decline is temporary or whether it affects the ultimate recoverability of the FHLB stock based on (a) the materiality of the carrying amount to the member institution and (b) whether an assessment of the institution's operational needs for the foreseeable future allow management to dispose of the stock.

Based on its analysis of these factors, the Company determined that its holding of FHLB stock was not impaired on June 30, 2009.

Note 11. Investment Securities

The amortized cost and estimated fair values of investment securities at June 30, 2009 and December 31, 2008 are as follows:

Table of Contents

(In Thousands)	June 30, 2009			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value

Table of Contents

At June 30, 2009 there were a total of 47 and 223 individual securities that were in a continuous unrealized loss position for less than twelve months and greater than twelve months, respectively.

The Company reviews its position quarterly and has asserted that at June 30, 2009, the declines outlined in the above table represent temporary declines and the Company does have the intent and ability either to hold those securities to maturity or to allow a market recovery. There were 270 positions that were temporarily impaired at June 30, 2009. The Company has concluded that the unrealized losses disclosed above are not other than temporary but are the result of interest rate changes, sector credit ratings changes, or Company-specific ratings changes that are not expected to result in the non-collection of principal and interest during the period.

The amortized cost and estimated fair value of debt securities at June 30, 2009, by contractual maturity, are shown below. Expected maturities may differ from contractual maturities since borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

(In Thousands)	Available for Sale		Held to Maturity	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
Due in one year or less	\$ 25	\$ 25	\$ 25	\$ 25
Due after one year to five years	10,092	10,564	76	76
Due after five years to ten years	784	805		
Due after ten years	194,587	184,779	9	10
Total	\$ 205,488	\$ 196,173	\$ 110	\$ 111

Total gross proceeds from sales of securities available for sale were \$4,682,000 and \$40,169,000, for June 30, 2009 and December 31, 2008, respectively. The following table represents gross realized gains and losses on those transactions:

(In Thousands)	June 30, 2009	December 31, 2008
Gross realized gains:		
U.S. Government and agency securities	\$	\$ 253
State and political securities		236
Other debt securities	162	6
Equity securities	4	539
Total gross realized gains	\$ 166	\$ 1,034
Gross realized losses:		
U.S. Government and agency securities	\$	\$ 36
State and political securities		204
Other debt securities	37	510
Equity securities	4,584	2,315
Total gross realized losses	\$ 4,621	\$ 3,065

Table of Contents

Gross realized losses for the equity securities portfolio include impairment charges of \$4,584,000 and \$2,797,000 for the six months ended June 30, 2009 and year ended December 31, 2008, respectively.

Note 12. Subsequent Events

The Company assessed events occurring subsequent to June 30, 2009 through August 10, 2009 for potential recognition and disclosure in the consolidated financial statements. No events have occurred that would require adjustment to or disclosure in the consolidated financial statements which were issued on August 10, 2009.

CAUTIONARY STATEMENT FOR PURPOSES OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This Report contains certain forward-looking statements including statements concerning plans, objectives, future events or performance and assumptions and other statements which are other than statements of historical fact. The Company wishes to caution readers that the following important factors, among others, may have affected and could in the future affect the Company's actual results and could cause the Company's actual results for subsequent periods to differ materially from those expressed in any forward-looking statement made by or on behalf of the Company herein: (i) the effect of changes in laws and regulations, including federal and state banking laws and regulations, with which the Company must comply, and the associated costs of compliance with such laws and regulations either currently or in the future as applicable; (ii) the effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies as well as by the Financial Accounting Standards Board, or of changes in the Company's organization, compensation and benefit plans; (iii) the effect on the Company's competitive position within its market area of the increasing consolidation within the banking and financial services industries, including the increased competition from larger regional and out-of-state banking organizations as well as non-bank providers of various financial services; (iv) the effect of changes in interest rates; and (v) the effect of changes in the business cycle and downturns in the local, regional or national economies.

You should not put undue reliance on any forward-looking statements. These statements speak only as of the date of this Quarterly Report on Form 10-Q, even if subsequently made available by the Company on its website or otherwise. The Company undertakes no obligation to update or revise these statements to reflect events or circumstances occurring after the date of this Quarterly Report on Form 10-Q.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation

EARNINGS SUMMARY

Comparison of the Three and Six Months Ended June 30, 2009 and 2008

Summary Results

Net income for the three months ended June 30, 2009 was \$832,000 compared to \$2,057,000 for the same period of 2008 as after-tax securities losses increased \$1,210,000 (from a loss of \$166,000 to a loss of \$1,376,000). Included within the change in after-tax securities losses was an other than temporary impairment charge relating to certain equity securities held in the investment portfolio of \$2,251,000. Basic and diluted earnings per share for the three months ended June 30, 2009 were \$0.22 compared to \$0.53 for the three months ended June 30, 2008. Return on average assets and return on average equity were 0.51% and 5.45% for the three months ended June 30, 2009 compared to 1.30% and 11.73% for the corresponding period of 2008. Net income from core operations (operating earnings) remained stable at \$2,208,000 for the three months ended June 30, 2009 compared to \$2,223,000 for the same period of 2008. Operating earnings per share for the three months ended June 30, 2009 were \$0.58 basic and dilutive compared to \$0.58 basic and \$0.57 dilutive for the three months ended June 30, 2008.

The six months ended June 30, 2009 generated net income of \$1,671,000 compared to \$4,188,000 for the same period of 2008. Comparable results were impacted by an increase in after-tax securities losses of \$2,799,000 (from a loss of \$141,000 to a loss of \$2,940,000). Earnings per share, basic and diluted, for the six months ended June 30, 2009 were \$0.44 as compared to \$1.08 for the comparable period of 2008. Return on average assets and return on average equity were 0.51% and 5.54% for the six months ended June 30, 2009 compared to 1.33% and 11.87% for the corresponding period of 2008. Operating earnings increased 6.5% to \$4,611,000 for the six months ended June 30, 2009 compared to \$4,329,000 for the comparable period of 2008, resulting in basic and dilutive operating earnings per share increasing 7.1% to \$1.20 from \$1.12 for the six month periods ended June 30, 2009 and 2008, respectively.

Management uses the non-GAAP measure of net income from core operations, or operating earnings, in its analysis of the Company's performance. This measure, as used by the Company, adjusts net income by excluding significant gains or losses that are unusual in nature. Because certain of these items and their impact on the Company's performance are difficult to predict, management believes the presentation of financial measures excluding the impact of such items provides useful supplemental information in evaluating the operating results of the Company's core businesses. For purposes of this Quarterly Report on Form 10-Q, net income from core operations, or operating earnings, means net income adjusted to exclude after-tax net securities gains or losses. These disclosures should not be viewed as a substitute for net income determined in accordance with GAAP, nor are they necessarily comparable to non-GAAP performance measures that may be presented by other companies.

Table of Contents**Reconciliation of GAAP and non-GAAP Income**

(In Thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
GAAP net income	832	2,057	1,671	4,188
Securities losses, net of tax	(1,376)	(166)	(2,940)	(141)
Non-GAAP operating earnings	2,208	2,223	4,611	4,329

Interest And Dividend Income

Interest and dividend income for the three months ended June 30, 2009 increased \$77,000 to \$9,013,000 compared to \$8,936,000 for the same period of 2008. The increase in interest income was the result of an increase in loan interest of \$103,000 which offset the slight decline in investment securities income of \$26,000. The increase in loan interest is the result of growth in the average gross loan portfolio of \$26,772,000. The growth offset a decline in the average taxable equivalent yield of 26 basis points (bp) caused by the low interest rate environment that has existed over the past year. Dividend income decreased as a direct result of the current status of the economy that has caused many of the issuers of equity holdings in our portfolio to decrease or suspend their dividend. In addition, the Federal Home Loan Bank of Pittsburgh (FHLB) has suspended payment of dividends on shares of its common stock, which resulted in a decrease of approximately \$81,000 in dividend income the second quarter of 2009. On a taxable equivalent basis, total interest income increased \$143,000 as the tax-exempt loan and investment securities portfolios were able to obtain better yields than in the comparable period of 2008.

During the six months ended June 30, 2009, interest and dividend income was \$17,930,000, a decrease of \$54,000 over the same period in 2008. Interest income on the loan portfolio remained stable as the growth in the portfolio countered a 44 bp decline in average yield. The investment portfolio interest income was negatively impacted by approximately \$160,000 due to the suspension of FHLB dividends which resulted in total interest income from investment securities being flat to the comparable period of 2008. Tax-equivalent interest income increased \$69,000 due to better yields on the loan and investment tax-exempt portfolios, an overall increase in earning assets of \$17,732,000, and a shift in the earning asset portfolio towards loans from investments.

Interest and dividend income composition for the three and six months ended June 30, 2009 and 2008 was as follows:

Table of Contents

(In Thousands)	June 30, 2009		For The Three Months Ended June 30, 2008		Change

Interest Expense

Interest expense for the three months ended June 30, 2009 decreased \$572,000 to \$3,208,000 compared to \$3,780,000 for the same period of 2008. The decreased expense of \$347,000 associated with deposits is primarily the result of a reduction of 110 bp in rates paid on time deposits. Factors that led to the rate decreases include, but are not limited to, Federal Open Market Committee (FOMC) interest rate actions and campaigns conducted by the Company during the past two years to attract short-term CDs resulting in an increased repricing frequency. Short-term borrowings interest expense decreased \$179,000 as the average balance of such borrowings decreased \$23,284,000, while the rate paid declined 72 bp. Long-term borrowing interest expense decreased \$46,000 as the average balance of such borrowings increased slightly, while the average rate decreased 21 bp to 4.22%. The change in average balance and rate is reflective of various long-term borrowing maturities and acquisitions during 2008.

Interest expense for the six months ended June 30, 2009 decreased \$1,659,000 from the same period of 2008. The reasons noted for the decline in interest expense for the three month period comparison also apply to the six month period.

Interest expense composition for the three and six months ended June 30, 2009 and 2008 was as follows:

Net Interest Margin

The net interest margin (NIM) for the three months ended June 30, 2009 was 4.36% compared to 4.01% for the corresponding period of 2008. The increase in the NIM was driven by a 62 bp decline in the rate paid on interest bearing liabilities that more than compensated for a 6 bp decline in the yield on earning assets. The decrease in earning asset yield is due to the impact on the loan portfolio of the current low rate environment offset in part by an increase in yield for the investment portfolio. The increase in the investment portfolio yield was driven by a strategic initiative to increase tax equivalent net interest income by purchasing tax-exempt and taxable municipal bonds in anticipation of the decreasing rate environment that has continued to date. The decrease in the cost of interest bearing liabilities to 2.50% from 3.12% was driven by a reduction in the rate paid on time deposits of 110 bp. The reduction in the rate paid on time deposits was the result of a shortening of the time deposit portfolio that has resulted in an increasing repricing frequency during this period of decreasing rates.

The NIM for the six months ended June 30, 2009 was 4.42% compared to 3.95% for the same period of 2008. The impact of the items mentioned in the three month discussion also applies to the six month period. A 127 bp decline in the rate paid on time deposits served as the foundation for an 84 bp decline in rate paid on deposits, while the FOMC and general market actions affected the yield on earning assets and cost of borrowings.

The following is a schedule of average balances and associated yields for the three and six months ended June 30, 2009 and 2008:

Provision for Loan Losses

The provision for loan losses is based upon management's quarterly review of the loan portfolio. The purpose of the review is to assess loan quality, identify impaired loans, analyze delinquencies, ascertain loan growth, evaluate potential charge-offs and recoveries, and assess general economic conditions in the markets served. An external independent loan review is also performed annually for the Bank. Management remains committed to an aggressive program of problem loan identification and resolution.

Table of Contents

The allowance for loan losses is determined by applying loss factors to outstanding loans by type, excluding loans for which a specific allowance has been determined. Loss factors are based on management's consideration of the nature of the portfolio segments, changes in mix and volume of the loan portfolio, and historical loan loss experience. In addition, management considers industry standards and trends with respect to non-performing loans and its knowledge and experience with specific lending segments.

Although management believes it uses the best information available to make such determinations and that the allowance for loan losses is adequate at June 30, 2009, future adjustments could be necessary if circumstances or economic conditions differ substantially from the assumptions used in making the initial determinations. A downturn in the local economy, increased unemployment, and delays in receiving financial information from borrowers could result in increased levels of nonperforming assets, charge-offs, loan loss provisions, and reductions in income. Additionally, as an integral part of the examination process, bank regulatory agencies periodically review the Bank's loan loss allowance. The banking agencies could require the recognition of additions to the loan loss allowance based on their judgment of information available to them at the time of their examination.

While determining the appropriate allowance level, management has attributed the allowance for loan losses to various portfolio segments; however, the allowance is available for the entire portfolio as needed.

The allowance for loan losses increased from \$4,356,000 at December 31, 2008 to \$4,377,000 at June 30, 2009. At June 30, 2009 and December 31, 2008, the allowance for loan losses to total loans was 1.12% and 1.14%, respectively.

The provision for loan losses totaled \$186,000 and \$312,000 for the three and six months ended June 30, 2009, compared to \$60,000 and \$120,000 for the same period in 2008. The amount of the increase in the provision was the result of several factors, including but not limited to, an increase in gross loans of \$10,596,000 since December 31, 2008, a ratio of net charge offs to average loans of 0.07% for the six months ended June 30, 2009, a ratio of nonperforming loans to total loans of 0.68%, and a ratio of the allowance for loan losses to nonperforming loans of 164.12% at June 30, 2009. As noted in the following schedules, there has been an increase in nonperforming loans and net charge-offs over the past year. The following increases, coupled with the ratios noted previously, dictated an increase in the provision for loan losses: continued uncertainty surrounding the economy and internal loan review and analysis. The increase did not equate to the increase in charge-offs and nonperforming loans due to the well collateralized status of the nonperforming loans and overall loan portfolio in general, which limits the loan specific allocation of the allowance for loan losses.

Table of Contents

Following is a table showing the changes in the allowance for loan losses for the six month periods ended June 30, 2009 and 2008:

(In Thousands)	2009		2008	
Balance at beginning of period	\$	4,356	\$	4,130
Charge-offs:				
Real estate		192		9
Commercial and industrial		64		31
Installment loans to individuals		90		92
Total charge-offs		346		132
Recoveries:				
Real estate		8		11
Commercial and industrial				37
Installment loans to individuals		47		41
Total recoveries		55		89
Net charge-offs		291		43
Additions charged to operations		312		120
Balance at end of period	\$	4,377	\$	4,207
Ratio of net charge-offs during the period to average loans outstanding during the period		0.07%		0.01%

Following is a table showing the changes in total nonperforming loans as of:

(In Thousands)	Total Nonperforming Loans		
	Nonaccrual	90 Days Past Due	Total
06/30/09	\$ 2,089	\$ 578	\$ 2,667
12/31/08	1,476	259	1,735
06/30/08	605	304	909

Loans not included above which are troubled debt restructurings as defined in FAS 15, *Accounting by Debtors and Creditors for Troubled Debt Restructurings*, totaled \$31,000 and \$214,000 at December 31, 2008 and June 30, 2008; however, there were no troubled debt restructurings at June 30, 2009.

Non-interest Income

Total non-interest income for the three months ended June 30, 2009 compared to the same period in 2008 decreased \$2,013,000 to \$(392,000) due to a \$1,835,000 decrease in net securities gains and losses when comparing the three month periods ended June 30, 2009 and 2008. Excluding net securities gains and losses, non-interest income for the first quarter of 2009 would have decreased \$178,000 compared to the 2008 period. Deposit service charges were stagnant as overdraft fee income increased \$11,000 offsetting a decline in revenue due to customers migrating to no service charge checking accounts that were introduced as part of a customer acquisition and retention program. Gain on sale of loans decreased \$109,000 due primarily from a change in product mix which has resulted in a greater percentage of the fee collected being

Table of Contents

categorized as other income. This shift in product mix resulted in other income increasing 8.8% or \$48,000.

Insurance commissions for the three months ended June 30, 2009 decreased \$139,000 compared to the same period in 2008 due to a softening market and shift in product mix. Management of The M Group continues to pursue new and build upon current relationships. The sales call program continues to expand to other financial institutions, which results in additional revenue for The M Group if another sales outlet is added. However, the addition of another sales outlet for The M Group can take up to a year or more to be completed.

Total non-interest income for the six months ended June 30, 2009 compared to the same period in 2008 decreased \$4,703,000. Excluding net securities gains, non-interest income would have decreased \$461,000 compared to the 2008 period. The decrease in non-interest income for the six month period is the result of the same items noted in the three month discussion.

Non-interest income composition for the three months ended June 30, 2009 and 2008 was as follows:

(In Thousands)	June 30, 2009		For The Three Months Ended June 30, 2008		Change	
	Amount	% Total	Amount	% Total	Amount	%
Deposit service charges	\$ 541	(138.0)%	\$ 540	33.3%	\$ 1	0.2%

Non-interest Expense

Total non-interest expense increased \$374,000 for the three months ended June 30, 2009 compared to the same period of 2008. The \$126,000 increase in salaries and employee benefits was attributable to several items including standard cost of living wage adjustments for employees, increased pension expense, and other benefit costs. Pennsylvania shares tax increased \$67,000 due to the utilization of Pennsylvania Enterprise Zone tax credits from a low income housing partnership during 2008. Other expenses increased primarily due to normal

Table of Contents

anticipated inflationary adjustments to ongoing business operating costs in addition to increased FDIC insurance cost, including an industry-wide special assessment.

Total non-interest expense increased \$574,000 for the six months ended June 30, 2009 compared to the same period of 2008. The increase in non-interest expense for the six month period is the result of the same items noted in the three month discussion.

Non-interest expense composition for the three months ended June 30, 2009 and 2008 was as follows:

(In Thousands)	June 30, 2009		For The Three Months Ended June 30, 2008		Change	
	Amount	% Total	Amount	% Total	Amount	%
Salaries and employee benefits	\$ 2,595	53.1%	\$ 2,469	54.7%	\$ 126	5.1%

Provision for Income Taxes

Income taxes decreased \$639,000 and \$1,347,000 for the three and six months ended June 30, 2009 compared to the same periods of 2008. The decreases, due to net securities losses of \$2,086,000 and \$4,455,000, resulted in a tax benefit of \$490,000 and \$1,039,000 for the three and six months ended June 30, 2009. Excluding the impact of the net securities gains and losses, the effective tax rate for the three and six months ended June 30, 2009 was 9.02% and 9.36% as compared to 9.52% and 8.07% for the same period of 2008. The Company currently is in a deferred tax asset position due to the low income housing tax credits earned both currently and previously. Management has reviewed the deferred tax asset and has determined that the asset will be utilized within the appropriate carry forward period and therefore does not require a valuation allowance.

Table of Contents**ASSET/LIABILITY MANAGEMENT****Cash and Cash Equivalents**

Cash and cash equivalents increased \$2,066,000 from \$16,581,000 at December 31, 2008 to \$18,647,000 at June 30, 2009 primarily as a result of the following activities during the six months ended June 30, 2009:

Loans Held for Sale

Activity regarding loans held for sale resulted in loan originations exceeding sale proceeds, less \$221,000 in realized gains, by \$973,000 for the six months ended June 30, 2009.

Loans

Gross loans increased \$10,596,000 since December 31, 2008 due to the increase of commercial related loans, while non-commercial loans remained relatively constant.

The allocation of the loan portfolio, by category, as of June 30, 2009 and December 31, 2008 is presented below:

(In Thousands)	June 30, 2009		December 31, 2008		Change

The recorded investment in loans for which impairment has been recognized in accordance with Statement of Financial Accounting Standards No. 114, *Accounting by Creditors for Impairment of a Loan*, amounted to \$6,597,000 at June 30, 2009, compared to \$5,042,000 at December 31, 2008. The valuation allowance related to impaired loans amounted to \$553,000 at June 30, 2009 and \$166,000 at December 31, 2008. The increase in impaired loans and valuation allowance is primarily from a few commercial relationships.

A loan is considered impaired, based on current information and events, if it is probable that the Bank will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. The measurement of impaired loans is generally based on the present value of expected future cash flows discounted at the historical effective interest rate, except that all collateral-dependent loans are measured for impairment based on the fair value of the collateral.

Investments

The estimated fair value of the investment securities portfolio at June 30, 2009 has decreased \$375,000 since December 31, 2008. The change is primarily due to a reduction in agency securities caused by normal principal payments as the cash flows have not been fully reinvested

Table of Contents

back into the portfolio. The unrealized losses within the debt securities portfolio are the result of market activity, not credit issues/ratings, as approximately 90% of the debt securities portfolio is currently rated A or higher by either S&P or Moody's.

The Company considers various factors, which include examples from applicable accounting guidance, when analyzing the available for sale portfolio for possible other than temporary impairment. The Company primarily considers the following factors in its analysis: length of time and severity of the market value being less than carrying value, reduction of dividend paid (equities), continued payment of dividend/interest, credit rating, and financial condition of an issuer, intent and ability to hold until anticipated recovery (which may be maturity), and general outlook for the economy, specific industry, and entity in question.

The bond portion of the portfolio review is conducted with emphases on several factors. Continued payment of principal and interest is given primary importance with credit rating and financial condition of the issuer following as the next most important. Credit ratings were reviewed with the ratings of the bonds being satisfactory. Those that were not currently rated were discussed with a third party and/or underwent an internal financial review. The Company also monitors whether each of the investments incurred a decline in market value from carrying value of at least 20% for twelve consecutive months or a similar decline of at least 50% for three consecutive months. Each bond is reviewed to determine whether it is a general obligation bond, which is backed by the credit and taxing power of the issuing jurisdiction, or revenue bond, which is only payable from specified revenues. Based on the review undertaken by the Company and the intent and ability to hold the bonds until anticipated recovery (which may be maturity) the Company determined that the decline in value of the various bond holdings were deemed to be temporary and were the result of the general market downturns and interest rate/yield curve changes, not credit issues. Consistent with the Company's review of the portfolio as a whole, the intent and ability to hold such bonds until anticipated recovery and the fact that almost all of such bonds are general obligation bonds, the Company determined that the decline in the value of these bond holdings were deemed to be temporary.

The equity portfolio continues to feel the effects of the economic turbulence that is affecting the financial sector. This sector of the portfolio, as of June 30, 2009, held \$691,000 in unrealized losses on an amortized cost basis of \$11,994,000. The amount of the declines has caused several of our equity holdings to be deemed other than temporarily impaired resulting in a write down in value of these holdings of \$2,251,000 and \$4,584,000 for the three and six months ended June 30, 2009. Certain positions may be liquidated, in whole or part, through the balance of 2009 so that the losses can be carried back for tax purposes and offset against gains that have been recognized over the past several years.

The equity portion of the portfolio, which is invested entirely in financial institutions, is reviewed for possible other than temporary impairment in a similar manner to the bond portfolio with greater emphasis placed on the length of time the market value has been less than the carrying value and financial sector outlook. The Company also reviews dividend payment activities and, in the case of financial institutions, whether or not such issuer was participating in the TARP Capital Purchase Program. The starting point for the equity analysis is the length and severity of a market price decline. The Company monitors two primary measures: 20% decline

Table of Contents

for twelve consecutive months and 50% decline for three consecutive months in market value from carrying value.

Financing Activities**Deposits**

Total deposits increased 17.5% or \$73,633,000 from December 31, 2008 to June 30, 2009. The growth was led by a 100.1% or \$35,900,000 increase in money market deposits from December 31, 2008 to June 30, 2009. The increase in core deposits (deposits less time deposits) of 18.6% or \$41,829,000 has provided relationship driven funding for the loan portfolio, while also reducing the utilization of FHLB borrowings. The increase in deposits is the result of a deposit gathering program coupled with customers coming back to their hometown bank in the wake of the economic turbulence.

Deposit balances and their changes for the periods being discussed follow:

(In Thousands)	June 30, 2009		December 31, 2008		Change	
	Amount	% Total	Amount	% Total	Amount	%
Demand deposits	\$ 74,509	15.1%	\$ 76,035	18.0%	\$ (1,526)	(2.0)%
NOW accounts	58,020	11.7	53,821	12.8	4,199	7.8
Money market deposits	71,748	14.5	35,848	8.5	35,900	100.1
Savings deposits	61,924	12.5	58,668	13.9	3,256	5.5
Time deposits	228,800	46.2	196,996	46.8	31,804	16.1
Total deposits	\$ 495,001	100.0%	\$ 421,368	100.0%	\$ 73,633	17.5%

Deposit balances and their changes for the periods being discussed follow:

Borrowed Funds

Total borrowed funds decreased 36.7% or \$59,066,000 to \$101,658,000 at June 30, 2009 compared to \$160,724,000 at December 31, 2008. The decrease in borrowed funds is primarily the result of growth in deposits as part of the previously discussed deposit gathering campaigns that were utilized to provide loan portfolio funding and to reduce the level of total borrowings. FHLB repurchase agreements were utilized as their structure allowed for a reduction in interest expense, while providing the ability to reduce the borrowings at our discretion as deposit levels increased.

Table of Contents

(In Thousands)	June 30, 2009		December 31, 2008		Change	
	Amount	% Total	Amount	% Total	Amount	%

Capital

The adequacy of the Company's capital is reviewed on an ongoing basis with reference to the size, composition, and quality of the Company's resources and regulatory guidelines. Management seeks to maintain a level of capital sufficient to support existing assets and anticipated asset growth, maintain favorable access to capital markets, and preserve high quality credit ratings.

Bank holding companies are required to comply with the Federal Reserve Board's risk-based capital guidelines. The risk-based capital rules are designed to make regulatory capital requirements more sensitive to differences in risk profiles among banks and bank holding companies and to minimize disincentives for holding liquid assets. Specifically, each is required to maintain certain minimum dollar amounts and ratios of total risk-based, tier I risk-based, and tier I leverage capital. In addition to the capital requirements, the Federal Deposit Insurance Corporation Improvements Act (FDICIA) established five capital categories ranging from well capitalized to critically undercapitalized. To be classified as well capitalized, total risk-based, tier I risk-based, and tier I leverage capital ratios must be at least 10%, 6%, and 5%, respectively.

Table of Contents

Capital ratios as of June 30, 2009 and December 31, 2008 were as follows:

(In Thousands)	2009			2008		
	Amount	Ratio		Amount	Ratio

To Be Well Capitalized	32,912	5.0		32,216	5.0	

Liquidity; Interest Rate Sensitivity and Market Risk

The asset/liability committee addresses the liquidity needs of the Company to ensure that sufficient funds are available to meet credit demands and deposit withdrawals as well as to the placement of available funds in the investment portfolio. In assessing liquidity requirements, equal consideration is given to the current position as well as the future outlook.

The following liquidity measures are monitored for compliance and were within the limits cited at June 30, 2009:

1. Net Loans to Total Assets, 85% maximum
2. Net Loans to Total Deposits, 100% maximum
3. Cumulative 90 day Maturity GAP %, +/- 20% maximum
4. Cumulative 1 Year Maturity GAP %, +/- 25% maximum

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-Q

Fundamental objectives of the Company's asset/liability management process are to maintain adequate liquidity while minimizing interest rate risk. The maintenance of adequate liquidity provides the Company with the ability to meet its financial obligations to depositors, loan customers, and shareholders. Additionally, it provides funds for normal operating expenditures.

Table of Contents

and business opportunities as they arise. The objective of interest rate sensitivity management is to increase net interest income by managing interest sensitive assets and liabilities in such a way that they can be repriced in response to changes in market interest rates.

The Bank, like other financial institutions, must have sufficient funds available to meet its liquidity needs for deposit withdrawals, loan commitments and originations, and expenses. In order to control cash flow, the Bank estimates future cash flows from deposits, loan payments, and investment security payments. The primary sources of funds are deposits, principal and interest payments on loans and investment securities, FHLB borrowings, and brokered deposits. Management believes the Bank has adequate resources to meet its normal funding requirements.

Management monitors the Company's liquidity on both a long and short-term basis, thereby providing management necessary information to react to current balance sheet trends. Cash flow needs are assessed and sources of funds are determined. Funding strategies consider both customer needs and economical cost. Both short and long-term funding needs are addressed by maturities and sales of available for sale investment securities, loan repayments and maturities, and liquidating money market investments such as federal funds sold. The use of these resources, in conjunction with access to credit provides core funding to satisfy depositor, borrower, and creditor needs.

Management monitors and determines the desirable level of liquidity. Consideration is given to loan demand, investment opportunities, deposit pricing and growth potential, as well as the current cost of borrowing funds. The Company has a current borrowing capacity at the FHLB of \$196,482,000. In addition to this credit arrangement, the Company has additional lines of credit with correspondent banks of \$13,101,000. Management believes it has sufficient liquidity to satisfy estimated short-term and long-term funding needs. FHLB borrowings totaled \$86,778,000 as of June 30, 2009.

Interest rate sensitivity, which is closely related to liquidity management, is a function of the repricing characteristics of the Company's portfolio of assets and liabilities. Asset/liability management strives to match maturities and rates between loan and investment security assets with the deposit liabilities and borrowings that fund them. Successful asset/liability management results in a balance sheet structure which can cope effectively with market rate fluctuations. The matching process is affected by segmenting both assets and liabilities into future time periods (usually 12 months, or less) based upon when repricing can be effected. Repriceable assets are subtracted from repriceable liabilities, for a specific time period to determine the gap, or difference. Once known, the gap is managed based on predictions about future market interest rates. Intentional mismatching, or gapping, can enhance net interest income if market rates move as predicted. However, if market rates behave in a manner contrary to predictions, net interest income will suffer. Gaps, therefore, contain an element of risk and must be prudently managed. In addition to gap management, the Company has an asset/liability management policy which incorporates a market value at risk calculation which is used to determine the effects of interest rate movements on shareholders' equity and a simulation analysis to monitor the effects of interest rate changes on the Company's balance sheet.

Table of Contents

The Company currently maintains a GAP position of being liability sensitive. The Company has strategically taken this position as it has decreased the duration of the time deposit portfolio, while continuing to maintain a primarily fixed rate earning asset portfolio with a duration greater than the liabilities utilized to fund earning assets. Lengthening of the liability portfolio coupled with the addition of limited short-term assets is being undertaken. These actions are expected to reduce, but not eliminate, the liability sensitive structure of the balance sheet.

A market value at risk calculation is utilized to monitor the effects of interest rate changes on the Company's balance sheet and more specifically shareholders equity. The Company does not manage the balance sheet structure in order to maintain compliance with this calculation. The calculation serves as a guideline with greater emphases placed on interest rate sensitivity. Changes to calculation results from period to period are reviewed as changes in results could be a signal of future events. As of the most recent analysis, the results of the market value at risk calculation were outside of established guidelines due to the strategic direction being taken.

Interest Rate Sensitivity

In this analysis the Company examines the result of a 100 and 200 basis point change in market interest rates and the effect on net interest income. It is assumed that the change is instantaneous and that all rates move in a parallel manner. Assumptions are also made concerning prepayment speeds on mortgage loans and mortgage securities.

The following is a rate shock forecast for the twelve month period ended December 31, 2009 assuming a static balance sheet as of December 31, 2008.

(In Thousands)	Parallel Rate Shock in Basis Points				
	-200	-100	Static	+100	+200
Net interest income	\$ 21,415	\$ 21,606	\$ 21,407	\$ 20,954	\$ 20,497
Change from static	8	199		(453)	(910)
Percent change from static	0.04%	0.93%		-2.12%	-4.25%

The model utilized to create the report presented above makes various estimates at each level of interest rate change regarding cash flow from principal repayment on loans and mortgage-backed securities and or call activity on investment securities. Actual results could differ significantly from these estimates which would result in significant differences in the calculated projected change. In addition, the limits stated above do not necessarily represent the level of change under which management would undertake specific measures to realign its portfolio in order to reduce the projected level of change. Generally, management believes the Company is well positioned to respond expeditiously when the market interest rate outlook changes.

Inflation

The asset and liability structure of a financial institution is primarily monetary in nature. Therefore, interest rates rather than inflation have a more significant impact on the Company's

Table of Contents

performance. Interest rates are not always affected in the same direction or magnitude as prices of other goods and services, but are reflective of fiscal policy initiatives or economic factors which are not measured by a price index.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk for the Company is comprised primarily of interest rate risk exposure and liquidity risk. Interest rate risk and liquidity risk management is performed at the Bank level as well as the Company level. The Company's interest rate sensitivity is monitored by management through selected interest rate risk measures produced by an independent third party. There have been no substantial changes in the Company's gap analyses or simulation analyses compared to the information provided in the Annual Report on Form 10-K for the period ended December 31, 2008. Additional information and details are provided in the Liquidity and Interest Rate Sensitivity section of Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Generally, management believes the Company is well positioned to respond in a timely manner when the market interest rate outlook changes.

Item 4. Controls and Procedures

An analysis was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of June 30, 2009. There were no changes in the Company's internal control over financial reporting that occurred during the quarter ended June 30, 2009, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents**Part II. OTHER INFORMATION****Item 1. Legal Proceedings**

None.

Item 1A. Risk Factors

There are no material changes to the risk factors set forth in Part I, Item 1A, Risk Factors, of the Company's Annual Report on Form 10-K for the year ended December 31, 2008. Please refer to that section for disclosures regarding the risks and uncertainties related to the Company's business.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Period	Total Number of Shares (or Units) Purchased	Average Price Paid per Share (or Units) Purchased	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
Month #1 (April 1 - April 30, 2009)				
Month #2 (May 1 - May 31, 2009)				
Month #3 (June 1 - June 30, 2009)				

On April 28, 2009, the Board of Directors extended the previously approved authorization to repurchase up to 197,000 shares, or approximately 5%, of the outstanding shares of the Company for an additional year to April 30, 2010. To date, there have been 118,656 shares repurchased under this plan.
