## BANKUNITED, INC. AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

June 30, 2011

## Note 1 Basis of Presentation

BankUnited, Inc. ( BKU ) is the holding company for BankUnited (BankUnited or the Bank ), a federally chartered, federally insured savings association headquartered in Miami Lakes, Florida. On May 21, 2009, BankUnited was granted a savings association charter and the newly formed bank acquired substantially all of the assets and assumed all of the non-brokered deposits and substantially all of the other liabilities of BankUnited, FSB from the Federal Deposit Insurance Corporation ( FDIC ) in a transaction referred to as the Acquisition . In connection with the Acquisition, the Bank entered into loss sharing agreements with the FDIC ( Loss Sharing Agreements ) that cover single family residential mortgage loans, commercial real estate, commercial and industrial and consumer loans, certain investment securities and other real estate owned ( OREO ), collectively referred to as the covered assets . Pursuant to the terms of the Loss Sharing Agreements, the covered assets are subject to a stated loss threshold whereby the FDIC will reimburse the Bank for $80 \%$ of losses of up to $\$ 4.0$ billion, and $95 \%$ of losses in excess of this amount, beginning with the first dollar of loss incurred.

BankUnited, Inc. s wholly owned subsidiaries include BankUnited and BankUnited Investment Services, Inc. (collectively the Company ). BankUnited provides a full range of banking and related services to individual and corporate customers through 81 branch offices located in 13 Florida counties.

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities and Exchange Commission (the SEC ). Accordingly, they do not include all of the information and footnotes required for a fair presentation of financial position, results of operations and cash flows in conformity with U.S. generally accepted accounting principles ( GAAP ) and should be read in conjunction with the Company s consolidated financial statements and the notes thereto appearing in the Company s Annual Report on Form 10-K for the year ended December 31, 2010 filed with the SEC. In the opinion of management, all adjustments, consisting of normal recurring adjustments, considered necessary for a fair presentation have been included. Operating results for the six months ended June 30, 2011 are not necessarily indicative of the results that may be expected in future periods.

In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses and disclosures of contingent assets and liabilities. Management has made significant estimates in certain areas, such as the allowance for loan losses, the amount and timing of expected cash flows from covered assets and the FDIC indemnification asset, the valuation of OREO, the valuation of deferred tax assets, the evaluation of investment securities for other than-temporary impairment and the fair values of financial instruments. Actual results could differ from these estimates.

Certain amounts for the prior period have been reclassified to conform to the current period presentation.

## Note 2 Recent Accounting Pronouncements

In April 2011, the Financial Accounting Standards Board ( FASB ) issued Accounting Standards Update 2011-02, A Creditor s Determination of Whether a Restructuring is a Troubled Debt Restructuring. This update clarifies existing guidance on a creditor s evaluation of whether a restructuring constitutes a troubled debt restructuring, including clarification of a creditor s evaluation of whether it has granted a concession and of whether a debtor is experiencing financial difficulties. The Company is required to adopt this update for the quarter ending September 30, 2011, retrospectively to the beginning of the annual period of adoption, or January 1, 2011. Management does not anticipate that adoption will have a material impact on the Company s consolidated financial position, results of operations or cash flows.

In April 2011, the FASB issued Accounting Standards Update 2011-03, Reconsideration of Effective Control for Repurchase Agreements. This update removes from the assessment of effective control: (1) the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee, and (2) the collateral maintenance implementation

Edgar Filing: BankUnited, Inc. - Form 10-Q

Table of Contents

## BANKUNITED, INC. AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

June 30, 2011
guidance related to that criterion. The update is required to be adopted prospectively by the Company for the quarter ending March 31, 2012. Management does not anticipate that adoption will have a material impact on the Company s consolidated financial position, results of operations or cash flows.

In May 2011, the FASB issued Accounting Standards Update 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs. The amendments in this Update result in common fair value measurement and disclosure requirements in U.S. GAAP and International Financial Reporting Standards ( IFRS ). The amendments change the wording used to describe many of the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements. Some of the amendments clarify the FASB s intent about the application of fair value measurement requirements and others change principles or requirements for measuring fair value or disclosing information about fair value measurements. The Company is required to adopt this update prospectively for the quarter ending March 31, 2012. This update will result in expanded disclosures in the Company s financial statements; however, management does not anticipate that adoption will have a material impact on the Company s consolidated financial position, results of operations or cash flows.

In June 2011, the FASB issued Accounting Standards Update 2011-05, Presentation of Comprehensive Income. This update provides entities with an option of presenting the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. This update eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders equity. The Company is required to adopt this update retrospectively for the quarter ending March 31, 2012. Adoption of this update will affect the manner of presentation of the components of comprehensive income in the Company s financial statements, but will not have an impact on the Company s consolidated financial position, results of operations or cash flows.

## Note 3 Acquisition Activity

On June 2, 2011, BKU entered into a Merger Agreement with Herald National Bank ( Herald ), a national banking association based in the New York metropolitan area ( Merger Agreement ). The Merger Agreement provides that, upon the terms and subject to the conditions set forth therein, a to-be-formed direct, wholly-owned national bank subsidiary of BKU will merge with and into Herald, with Herald continuing as the surviving entity and a wholly-owned subsidiary of BKU. Upon completion of the merger, holders of Herald common and preferred stock will receive cash or shares of BKU common stock having a value equal to $\$ 1.35$ plus the value of 0.099 shares of BKU common stock as of the effective time of the Merger. The Merger Agreement provides that the surviving bank will be merged with and into BankUnited, with BankUnited surviving, in August 2012. Completion of the Merger is subject to various customary conditions, including, among others, (a) ratification and confirmation of the Merger Agreement by Herald shareholders, (b) effectiveness of the registration statement for the BKU common stock to be issued in the Merger and approval of the listing on the New York Stock Exchange of the BKU common stock to be issued in the Merger, (c) the absence of any law or order prohibiting the closing of the Merger and (d) receipt of required regulatory approvals.

During the quarter ended June 30, 2010, the Company exchanged certain non-covered trust preferred securities for preferred stock of the same issuer to achieve higher returns and more favorable tax treatment. Based on the market value of the trust preferred securities at the time of the exchange, the Company recognized a gross realized loss of $\$ 2.8$ million.

The carrying value of securities pledged as collateral for Federal Home Loan Bank ( FHLB ) advances, public deposits, interest rate swaps, securities sold under agreements to repurchase and to secure borrowing capacity at the Federal Reserve Bank, totaled $\$ 869.8$ million and $\$ 496.5$ million at June 30, 2011 and December 31, 2010, respectively.

The following table presents the aggregate fair value and the aggregate amount by which amortized cost exceeds fair value for investment securities that are in unrealized loss positions at June 30, 2011 and December 31, 2010, aggregated by investment category and length of time that individual securities had been in a continuous unrealized loss position. At December 31, 2010, all of the securities in unrealized loss positions had been in continuous unrealized loss positions for less than twelve months (in thousands):

The Company monitors its investment securities available for sale for other than temporary impairment, or OTTI, on an individual security basis considering numerous factors including the Company s intent to sell securities in an unrealized loss position; the likelihood that the Company will be required to sell these securities before an anticipated recovery in value; the duration and severity of impairment; the earnings performance, credit rating, asset quality, and business prospects of the issuer; changes in the rating of the security; adverse changes in the regulatory, economic or technological environment; adverse changes in general market conditions in the geographic area or industry in which

## Edgar Filing: BankUnited, Inc. - Form 10-Q

the issuer operates; and factors that raise concerns about the issuer $s$ ability to continue as a going concern such as negative cash flows from operations, working capital deficiencies or non-compliance with statutory capital requirements or debt covenants. The relative significance of each of these factors varies depending on the circumstances related to each security.

None of the securities in unrealized loss positions at June 30, 2011 and December 31, 2010 were determined to be other-than-temporarily impaired. The Company does not intend to sell securities that are in unrealized loss positions and it is not more likely than not that the Company will be required to sell these securities before recovery of the amortized cost basis, which may be maturity. At June 30, 2011, forty-seven securities were in unrealized loss positions. The amount of impairment related to twelve of these securities was considered

## BANKUNITED, INC. AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

June 30, 2011
insignificant, totaling approximately $\$ 24,000$ and no further analysis with respect to these securities was considered necessary. The basis for concluding that impairment of the remaining securities is not other-than-temporary is further described below:
U.S. Government agency and sponsored enterprise mortgage backed securities and Small Business Administration securities:

At June 30, 2011, six U.S. Government agency and sponsored enterprise mortgage backed securities and five U.S. Small Business Administration securities were in unrealized loss positions. All of these securities had been in unrealized loss positions for less than twelve months. The amount of impairment of each of the individual securities is less than $1 \%$ of amortized cost. The timely payment of principal and interest on these securities is explicitly or implicitly guaranteed by the U.S. Government. Given the limited severity and duration of impairment and the expectation of timely payment of principal and interest, the impairments are considered to be temporary.

Private label mortgage backed securities and CMO s and Re-Remics:

At June 30, 2011, nine private label mortgage-backed securities and Resecuritized real estate mortgage investment conduits ( Re-Remics ) were in unrealized loss positions. These securities were assessed for OTTI using third-party developed credit and prepayment behavioral models and CUSIP level constant default rates, voluntary prepayment rates and loss severity and delinquency assumptions. The results of this evaluation were not indicative of credit losses related to any of these securities as of June 30, 2011. Two of these securities have been in unrealized loss positions for thirteen months; the amount of impairment of each of these securities is less than $2 \%$ of amortized cost. The remaining securities have been in unrealized loss positions for less than twelve months; the amount of impairment of each of these securities is less than $5 \%$ of amortized cost. Given the limited severity and duration of impairment and the expectation of timely recovery of outstanding principal, the impairments are considered to be temporary.

Private label commercial mortgage backed securities

At June 30, 2011, one private label commercial mortgage backed security was in an unrealized loss position. This security had been in an unrealized loss position for one month and the amount of impairment was less than $1 \%$ of amortized cost. The security was further assessed for OTTI using a discounted cash flow model. The results of this analysis were not indicative of expected credit losses. Given the limited severity and duration of impairment and the expectation of timely repayment of outstanding principal and interest, the impairment is considered to be temporary.

Non-mortgage asset backed securities:

At June 30, 2011, six non-mortgage asset backed securities were in unrealized loss positions. These securities had been in continuous unrealized loss positions for less than twelve months at June 30, 2011 and the amount of impairment was $3 \%$ or less of amortized cost basis for each of the securities. These securities were assessed for OTTI using a third-party developed credit and prepayment behavioral model and CUSIP level constant default rates, voluntary prepayment rates and loss severity and delinquency assumptions. The results of this evaluation were not indicative of credit losses related to these securities as of June 30, 2011. Given the limited severity and duration of impairment and the expectation of timely recovery of outstanding principal, the impairments are considered to be temporary.

Mutual funds and preferred stock:

At June 30, 2011, eight mutual fund and preferred stock investments were in unrealized loss positions, including two positions in mutual funds and six positions in financial institution preferred stocks. Impairment of the mutual fund positions has been driven primarily by increases in intermediate term interest rates. These investments have been in continuous unrealized loss positions for less than twelve months at June 30, 2011 and the severity of impairment is $4 \%$ or less of cost basis. The severity of impairment of both of these positions declined during the

# Edgar Filing: BankUnited, Inc. - Form 10-Q 

Table of Contents

## BANKUNITED, INC. AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

June 30, 2011
three months ended June 30, 2011. The majority of the underlying holdings of the mutual funds are either explicitly or implicitly guaranteed by the U.S. Government.

The financial institution preferred stocks have been in continuous unrealized loss positions for less than three months and the severity of impairment of individual securities is less than $3 \%$ of amortized cost basis. All of the preferred stock holdings are investment grade; the issuing institutions are well capitalized and reporting positive earnings. Given the limited duration and severity of impairment, management $s$ evaluation of the financial condition of the preferred stock issuers, the rating of these investments and the nature of the assets underlying the mutual fund investments, these impairments are considered to be temporary.

## Note 5 Loans and Allowance for Loan Losses

A significant portion of the Company s loan portfolio consists of loans acquired in the Acquisition. These loans are covered under BankUnited s Loss Sharing Agreements (the covered loans ). Non-covered loans are those originated or purchased since the Acquisition. Covered loans are further segregated between those acquired with evidence of deterioration in credit quality since origination (Acquired Credit Impaired or ACI loans) and those acquired without evidence of deterioration in credit quality since origination ( non-ACI loans).

At June 30, 2011 and December 31, 2010, loans consisted of the following (dollars in thousands):

|  | June 30, 2011 |  |  |  |  |  |  |  |  |

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

June 30, 2011

At June 30, 2011 and December 31, 2010, the unpaid principal balance ( UPB ) of ACI loans was $\$ 6.3$ billion and $\$ 7.2$ billion, respectively.

During the six months ended June 30, 2011 and 2010, the Company purchased one-to-four single family residential loans with UPB totaling $\$ 157.6$ million and $\$ 23.7$ million, respectively.

At June 30, 2011, the Company had pledged real estate loans with UPB of approximately $\$ 4.9$ billion and carrying amounts of approximately $\$ 2.3$ billion as security for Federal Home Loan Bank advances.

The following tables present information about the ending balance of the allowance for loan losses and related loans as of June 30, 2011 and summarize the activity in the allowance for loan losses for the three and six months ended June 30, 2011 (in thousands):

Increases (decreases) in the FDIC indemnification asset of \$(5.8) million and $\$ 0.8$ million were reflected in non-interest income for the three and six months ended June 30, 2011, and $\$ 12.4$ million and $\$ 19.0$ million for the three and six months ended June 30, 2010, respectively, related to the provision for loan losses on covered loans, including both ACI and non-ACI loans.

## Non-ACI and non-covered loans:

The tables below present information about non-ACI and non-covered impaired loans as of June 30, 2011 and December 31, 2010. Commercial and commercial real estate relationships on non-accrual status or with internal risk ratings of substandard or doubtful and with committed balances greater than or equal to $\$ 500,000$ are individually evaluated for impairment and if determined to be impaired are reflected as impaired loans in the tables below. Also included in total impaired loans are loans that have been placed on non-accrual status, generally because they are 90 days or more delinquent, and loans that are 90 days or more delinquent and still accruing, for which impairment is measured collectively. These include 1-4 single family residential, home equity, smaller balance commercial and commercial real estate, and consumer loans (in thousands):

Management considers delinquency status to be the most meaningful indicator of the credit quality of one-to-four single family residential, home equity and consumer loans. Delinquency statistics are updated at least monthly. Internal risk ratings are considered the most meaningful indicator of credit quality for commercial and commercial real estate loans. Internal risk ratings are a key factor in identifying loans that are individually evaluated for impairment and impact management s estimates of loss factors used in determining the amount of the allowance for loan losses. Internal risk ratings are updated on a continuous basis. Relationships with balances in excess of $\$ 250$ thousand are re-evaluated at least annually and more frequently if circumstances indicate that a change in risk rating may be warranted. Loans exhibiting potential credit weaknesses that deserve management s close attention and that if left uncorrected may result in deterioration of the repayment capacity of the borrower are categorized as special mention. Loans with well defined credit weaknesses including payment defaults, declining collateral values, frequent overdrafts, operating losses, increasing balance sheet leverage, inadequate cash flow, project cost overruns, unreasonable construction delays, past due real estate taxes or exhausted interest reserves are assigned an internal risk rating of substandard. A loan with a weakness so severe that collection in full is highly questionable or improbable will be assigned an internal risk rating of doubtful.

The following table presents an aging of past due loans in the non-ACI and non-covered portfolios as of June 30, 2011 and December 31, 2010 (in thousands):

|  | June 30, 2011 |  |  |  |  |  |  |  | December 31, 2010 |  |  |  |  |  |  |

June 30, 2011

## ACI Loans:

The accretable yield on ACI loans represents the amount by which undiscounted expected future cash flows exceeds carrying value. Changes in the accretable yield on ACI loans for the six months ended June 30, 2011 and the year ended December 31, 2010 were as follows (in thousands):

| Balance, December 31, 2009 | 1,734,233 |  |
| :--- | :---: | ---: |
| Reclassifications from non-accretable difference | 487,718 |  |
| Accretion |  | $(387,977)$ |
| Balance, December 31, 2010 | $1,833,974$ |  |
| Reclassifications from non-accretable difference | 64,058 |  |
| Accretion |  | $(209,981)$ |
| Balance, June 30, 2011 | $\$$ | $1,688,051$ |

ACI loans or loan pools are considered to be impaired when there has been further deterioration in the cash flows expected at acquisition plus any additional cash flows expected to be collected arising from changes in estimates after acquisition, other than due to decreases in interest rate indices and changes in prepayment assumptions. Discount continues to be accreted on ACI loans or pools as long as there are expected future cash flows in excess of the current carrying amount; therefore, these loans are not classified as non-accrual even though they may be contractually delinquent. ACI 1-4 single family residential and home equity loans accounted for in pools are evaluated for impairment on a pool basis and the amount of any impairment is measured based on the expected aggregate cash flows of the pools. ACI commercial and commercial real estate loans are evaluated individually for impairment.

The tables below set forth at June 30, 2011 and December 31, 2010, the carrying amount of ACI loans or pools for which the Company has determined it is probable that it will be unable to collect all the cash flows expected at acquisition plus additional cash flows expected to be collected arising from changes in estimates after acquisition, if any, as well as ACI loans not accounted for in pools that have been modified in a troubled debt restructuring, and the related allowance amounts (in thousands):

## Note 6 FDIC Indemnification Asset

The FDIC indemnification asset represents the present value of estimated future payments to be received from the FDIC under the terms of BankUnited s loss sharing agreements with the FDIC.

When the Company recognizes gains or losses related to covered assets in its consolidated financial statements, changes in the estimated amount recoverable from the FDIC under the loss sharing agreements with respect to those gains or losses are also reflected in the consolidated financial statements. Covered loans may be resolved through repayment, short sale of the underlying collateral, foreclosure or, for the non-residential portfolio, charge-off, or by sale of the loans. For loans resolved through repayment, short sale or foreclosure, the difference between consideration received in satisfaction of the loans and the carrying value of the loans is recognized in the statement of operations line item Income (loss) from resolution of covered assets, net. Losses from the resolution or permanent modification of covered loans increase the amount recoverable from the FDIC under the loss sharing agreements. Gains from the resolution of covered loans reduce the amount recoverable from the FDIC under the loss sharing agreements. Similarly, differences in proceeds received on disposition of OREO and the carrying amount of the OREO result in gains or losses and reduce or increase the amount recoverable from the FDIC under the loss sharing agreements. Increases in valuation allowances related to covered assets also increase the amount estimated to be recoverable from the FDIC. These additions to or reductions in amounts recoverable from the FDIC related to the resolution of covered assets are recorded in the income statement line item Net gain (loss) on indemnification asset and reflected as corresponding increases or decreases in the FDIC indemnification asset.

The following table summarizes the components of the gains and losses associated with covered assets, plus the provision for loan losses on non-covered loans, along with the related additions to or reductions in the amounts recoverable from the FDIC under the loss sharing agreements, as reflected in the consolidated statements of operations for the three and six months ended June 30, 2011 and 2010 (in thousands):

|  | Transaction Income (Loss) |  | Months Ended June Net Gain (Loss) on Indemnification Asset |  | Net Impact on Pretax Earnings |  | Transaction Income (Loss) |  | Months Ended June Net Gain (Loss) on Indemnification Asset |  | Net Impact on Pretax Earnings |  |

Changes in the FDIC indemnification asset for the six months ended June 30, 2011 and the year ended December 31, 2010 were as follows (in thousands):
$\left.\begin{array}{l|c|c} & & \begin{array}{c}\text { Sear Ended } \\ \text { December 31, }\end{array} \\ \text { 2010 Months Ended }\end{array}\right]$

Under the terms of the loss sharing agreements, the Company is also entitled to reimbursement from the FDIC for certain expenses related to covered assets upon final resolution of those assets. For the six months ended June 30, 2011 and 2010, non-interest expense includes approximately $\$ 17.5$ million and $\$ 28.3$ million, respectively, of disbursements subject to reimbursement at the $80 \%$ level under the loss sharing agreements. For the six months ended June 30, 2011 and 2010, claims of $\$ 18.7$ million and $\$ 14.3$ million, respectively, were submitted to the FDIC for reimbursement. As of June 30, 2011, $\$ 22.6$ million of disbursements remain to be submitted for reimbursement from the FDIC in future periods as the related covered assets are resolved.

## Note 7 Income Taxes

## Edgar Filing: BankUnited, Inc. - Form 10-Q

The Company s effective income tax rate for the six months ended June 30, 2011 differs from the statutory federal income tax rate primarily due to the impact of $\$ 110.4$ million in compensation expense related to Profits Interest Units as further described in Note 10. This expense is not deductible for income tax purposes. Additionally, during the six months ended June 30, 2011, the Company recorded a provision related to uncertain state income tax positions of approximately $\$ 7.6$ million, including estimated interest and penalties. For the three months ended June 30, 2011 and the three and six months ended June 30, 2010, the Company s effective income tax rate differs from the statutory federal income tax rate primarily due to state income taxes and compensation expense related to equity-based compensation.

## Note 8 Derivatives and Hedging Activities

The Company uses interest rate swaps to manage interest rate risk related to FHLB advances and certificates of deposit with maturities of one year, which expose the Company to variability in cash flows due to changes in interest rates. The Company enters into LIBOR-based interest rate swaps that are designated as cash flow hedges with the objective of limiting the variability of interest payment cash flows resulting from changes in the benchmark interest rate LIBOR. The effective portion of changes in the fair value of interest rate swaps designated

# Edgar Filing: BankUnited, Inc. - Form 10-Q

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

June 30, 2011
as cash flow hedging instruments is reported in accumulated other comprehensive income ( AOCI ) and subsequently reclassified into interest expense in the same period in which the related interest on the floating-rate debt obligations affects earnings. The Company may be exposed to credit risk in the event of nonperformance by the counterparties to its interest rate swap agreements. The Company manages this risk by entering into interest rate swaps only with primary dealers, the use of ISDA master agreements, credit approvals, counterparty limits and monitoring procedures and does not currently anticipate any losses from failure of counterparties to honor their obligations.

The Company also enters into interest rate swaps with certain of its borrowers to enable those borrowers to manage their exposure to interest rate fluctuations. To mitigate interest rate risk associated with these derivative contracts, the Company enters into offsetting derivative contract positions with financial institution counterparties. The Company manages credit risk, or the risk of default by its borrowers, though its normal loan underwriting and credit monitoring policies and procedures. These interest rate swap contracts are not designated as hedging instruments; therefore, changes in the fair value of these derivatives are recognized immediately in earnings.

The following tables set forth certain information concerning the Company s interest rate contract derivative financial instruments and related hedged items at June 30, 2011 and December 31, 2010 (dollars in thousands):

|  | Hedged Item | Pay Rate | Receive Rate | June 30 <br> Remaining <br> Life in <br> Years | Notional Amount |  | Balance Sheet Location | Fair value |  |  |  |

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

June 30, 2011

The following table provides information about gains and losses recognized, included in interest expense in the accompanying consolidated statements of operations, related to interest rate contract derivative instruments designated as cash flow hedges for the three and six months ended June 30, 2011 and 2010 (in thousands):

|  | Three Months Ended June 30, 20112010 |  |  |  | $\begin{array}{cr}\text { Six Months Ended June 30, } \\ 2011 & 2010\end{array}$ |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Amount of gain (loss) in AOCI, net of tax (effective portion) | \$ | $(26,692)$ | \$ | $(26,419)$ \$ | $(26,692)$ | \$ | $(26,419)$ |
| Amount of gain (loss) reclassified from AOCI into income (effective portion) | \$ | $(4,767)$ | \$ | $(3,390)$ \$ | $(9,469)$ | \$ | $(4,433)$ |
| Amount of gain (loss) recognized in income (ineffective portion) | \$ |  | \$ | \$ | 427 | \$ | (279) |

Following is a summary of the changes in the component of accumulated other comprehensive income related to these derivatives (in thousands):

|  | Six Months Ended June 30, |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 2011 |  | 2010 |  |
| Balance, beginning of period | \$ | $(23,931)$ | \$ | $(1,292)$ |
| Unrealized (gain) loss on cash flow hedges |  | $(4,496)$ |  | $(40,909)$ |
| Tax effect |  | 1,735 |  | 15,782 |
| Net of tax |  | $(2,761)$ |  | $(25,127)$ |
| Balance, end of period | \$ | $(26,692)$ | \$ | $(26,419)$ |

During the six months ended June 30, 2011 and 2010, no derivative positions designated as cash flow hedges were discontinued, and none of the gains and losses reported in AOCI were reclassified into earnings as a result of the discontinuance of cash flow hedges or because of the early extinguishment of debt.

Table of Contents

## BANKUNITED, INC. AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

June 30, 2011

The Company enters into commitments to fund residential mortgage loans with the intention that these loans will subsequently be sold into the secondary market. A mortgage loan commitment binds the Company to lend funds to a potential borrower at a specified interest rate within a specified period of time, generally 30 to 90 days. These commitments are considered derivative instruments. The notional amount of outstanding mortgage loan commitment derivatives was $\$ 5.8$ million and $\$ 6.4$ million at June 30, 2011 and December 31, 2010, respectively. Outstanding derivative loan commitments expose the Company to the risk that the price of the loans arising from exercise of the commitments might decline from inception of the commitment to funding of the loan. To protect against the price risk inherent in derivative loan commitments, the Company utilizes best efforts forward loan sale commitments. Under a best efforts contract, the Company commits to deliver an individual mortgage loan to an investor if the loan to the underlying borrower closes. Generally, the price the investor will pay the Company for a loan is specified prior to the loan being funded. These commitments are considered derivative instruments once the underlying loans are funded. All of the Company s loans held for sale at June 30, 2011 and December 31, 2010 were subject to forward sale commitments. The notional amount of forward loan sale commitment derivatives was $\$ 1.2$ million and $\$ 2.7$ million at June 30, 2011 and December 31, 2010, respectively. The fair value of derivative loan commitments and forward sale commitments was insignificant at June 30, 2011 and December 31, 2010.

## Note 9 Stockholders Equity

On February 2, 2011, the Company closed an initial public offering ( IPO ) of 33,350,000 shares of common stock at $\$ 27.00$ per share. In the offering, the Company sold $4,000,000$ shares and selling stockholders sold $29,350,000$ shares. Proceeds received by the Company on the sale of the $4,000,000$ shares amounted to $\$ 102.6$ million, net of underwriting discounts. The Company incurred direct costs of the stock issuance of $\$ 4.0$ million, which were charged to paid-in capital. Prior to the IPO, BankUnited, Inc. was a wholly owned subsidiary of BU Financial Holdings LLC ( BUFH ), a Delaware limited liability company. Immediately prior to the completion of the offering, a reorganization was effected in accordance with BUFH s LLC agreement, pursuant to which all equity interests in the Company were distributed to the members of BUFH and BUFH was liquidated.

Effective January 10, 2011, the Board of Directors authorized a 10-for-1 split of the Company s outstanding common shares. Stockholders equity has been retroactively adjusted to give effect to this stock split for all periods presented by reclassifying from paid-in capital to common stock the par value of the additional shares issued. All share and per share data have been retroactively restated for all periods presented to reflect this stock split.

## Note 10 Equity Based Compensation

## Profits Interest Units of BUFH

## Edgar Filing: BankUnited, Inc. - Form 10-Q

Prior to the consummation of the IPO, BUFH had a class of authorized membership interests identified as Profits Interest Units ( PIUs ). PIUs were awarded to management members of the Company who owned common units of BUFH and entitled the holders to share in distributions from BUFH after investors in BUFH received certain returns on their investment. The PIUs were divided equally into time-based and IRR-based PIUs. Time-based PIUs generally vested in equal annual installments over a period of three years from the grant date. Based on their settlement provisions, the PIUs were classified as liabilities. Compensation expense related to the time-based PIUs was measured based on their estimated fair values and recognized in earnings over the vesting period. The related liability was reflected in the consolidated balance sheet of the Company as a liability to BUFH.

In accordance with a resolution approved by the BUFH Board of Directors, immediately prior to consummation of the IPO of the Company s common stock, the IRR-based PIUs became fully vested. In conjunction with the IPO, the time-based and IRR-based PIUs outstanding were exchanged for $1,931,745$ unvested shares and $3,863,491$ unvested shares of the Company s common stock, $3,023,314$ vested stock options and $1,511,656$ unvested stock options. The vested and unvested shares and vested stock options participate in dividends declared on the Company s common stock on a one-for-one basis. The unvested stock options issued in exchange for PIUs participate on a one-for-one basis in dividends declared on common stock until they vest. In conjunction with the IPO, the Company recorded approximately $\$ 110.4$ million in compensation expense related to the exchange and the vesting of the IRR-based PIUs. This expense, which is not deductible for tax purposes, resulted in an

## BANKUNITED, INC. AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

June 30, 2011
offsetting increase in paid-in capital. Compensation expense of $\$ 7.0$ million and $\$ 10.6$ million was recognized for the three and six months ended June 30, 2010, respectively, related to time-based PIUs.

## Equity Based Compensation

On March 11, 2011 the Board of Directors granted 265,840 shares of unvested stock under the BankUnited 2010 Omnibus Equity Incentive Plan (the 2010 Plan ). The shares granted were valued at $\$ 28.05$ per share, representing the closing price of the Company s common stock on the date of grant, for a total of $\$ 7.5$ million. On May 18, 2011, the Board of Directors granted an additional 17,250 shares of unvested stock under the 2010 Plan. These shares were valued at $\$ 27.00$ per share, representing the closing price of the Company s common stock on the date of grant, for a total of $\$ 465.8$ thousand. The shares vest in equal annual installments over a period of three years. Unvested shares participate in dividends declared on the Company s common stock on a one-for-one basis.

In addition to compensation expense recorded in conjunction with the IPO and PIUs discussed above, the Company recorded a total of \$9.4 million and $\$ 15.8$ million of stock based compensation expense during the three and six months ended June 30,2011 and $\$ 317.9$ thousand and $\$ 532.9$ thousand during the three and six months ended June 30, 2010, respectively.

## Note 11 Fair Value Measurements

Assets and liabilities measured at fair value on a recurring basis

Following is a description of the methodologies used to estimate the fair values of assets and liabilities measured at fair value on a recurring basis, and the level within the fair value hierarchy in which those measurements are typically classified.

Investment securities available for sale Fair value measurements are based on quoted prices in active markets when available; these measurements are classified within Level 1 of the fair value hierarchy. These securities typically include U.S. treasury securities, preferred stock of U.S. government agencies and certain mutual funds. If quoted market prices in active markets are not available, fair values are estimated using quoted prices of securities with similar characteristics, quoted prices of identical securities in inactive markets, discounted cash flow techniques, or matrix pricing models. Investment securities available for sale that are generally classified within Level 2 of the fair value hierarchy include U.S. government agency mortgage-backed securities, preferred stock of issuers other than U.S. government agencies, certain nonmortgage asset backed securities, state and municipal obligations and U.S. Small Business Administration securities. Observable inputs that

## Edgar Filing: BankUnited, Inc. - Form 10-Q

may impact the valuation of these securities include benchmark yield curves, reported trades, dealer quotes, issuer spreads, current rating, constant default rates and constant prepayment rates. Investment securities available for sale generally classified within Level 3 of the fair value hierarchy include private label mortgage backed securities, Re-Remics, certain nonmortgage asset backed securities and other debt securities. The Company typically values these securities using internally developed or third party proprietary pricing models, primarily discounted cash flow valuation techniques, which incorporate both observable and unobservable inputs. Unobservable inputs that may impact the valuation of these securities include risk adjusted discount rates, projected prepayment rates, projected default rates and projected loss severity.

Derivative financial instruments Interest rate swaps are predominantly traded in over-the-counter markets and, as such, values are determined using widely accepted discounted cash flow modeling techniques. These discounted cash flow models use projections of future cash payments and receipts that are discounted at mid-market rates. Observable inputs that may impact the valuation of these instruments include LIBOR swap rates, LIBOR forward yield curves and counterparty credit risk spreads. These fair value measurements are generally classified within level 2 in the fair value hierarchy. Loan commitment derivatives are priced based on a bid pricing convention adjusted based on the Company s historical fallout rates. Fallout rates are a significant unobservable input; therefore, these fair value measurements are classified within level 3 of the fair value hierarchy. The value of these derivatives is generally not significant.

## BANKUNITED, INC. AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

June 30, 2011

Profits interest units The fair value of profits interest units outstanding prior to the IPO was historically estimated using the Black-Scholes option pricing model. Since the Company s common stock historically was not traded on an exchange, significant inputs to the model including estimated volatility, equity value per share, estimated dividend yield and expected life were unobservable; therefore this fair value measurement was classified within level 3 of the fair value hierarchy. None of these instruments remain outstanding at June 30, 2011.

FDIC warrant The fair value of the FDIC warrant was historically estimated using binomial and Monte Carlo simulation models that incorporated significant unobservable inputs as to equity value per share, estimated volatility, expected life, and dividend yield. This fair value estimate was classified within level 3 of the fair value hierarchy. The warrant was redeemed in February, 2011.

The following table presents assets and liabilities measured at fair value on a recurring basis as of June 30, 2011 and December 31, 2010 (in thousands):

|  | June 30, 2011 |  |  |  |  |  |  |  |

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

June 30, 2011

Changes in the fair value of the FDIC warrant and derivative liabilities are included in the statement of operations line item Other non-interest expense . Changes in the fair value of the liability for PIUs are included in the consolidated statement of operations line item Employee compensation and benefits .

Assets and liabilities measured at fair value on a non-recurring basis

Following is a description of the methodologies used to estimate the fair values of assets and liabilities measured at fair value on a non-recurring basis, and the level within the fair value hierarchy in which those measurements are typically classified.

Collateral dependent impaired loans and OREO The carrying amount of real estate collateral dependent impaired loans is based on the fair value of the underlying real estate less estimated costs to sell. The carrying value of OREO is initially measured based on the fair value of the real estate acquired in foreclosure and subsequently adjusted to the lower of cost or estimated fair value, less estimated cost to sell. Fair values are typically based on real estate appraisals which utilize market and income approaches to valuation incorporating both observable and unobservable inputs. When current appraisals are not available, the Company may use brokers price opinions, home price indices, or other available information about changes in real estate market conditions to adjust the latest appraised value available. These adjustments to appraised values may be subjective and involve significant management judgment. Fair value measurements related to collateral dependent impaired loans and OREO are classified within level 3 of the fair value hierarchy.

The following table presents assets for which nonrecurring changes in fair value have been recorded for the six months ended June 30, 2011 and 2010 (in thousands):

The Company did not have any impaired loans whose carrying amounts were measured based on the fair value of underlying collateral at June 30, 2011 or 2010.

The following table presents the carrying value and fair value of financial instruments as of June 30, 2011 and December 31, 2010 (in thousands):

| Derivative liabilities |  | 49,523 |  | 49,523 |  | 42,707 |  | 42,707 |

The following methods and assumptions were used to estimate the fair value of each class of financial instruments, other than those described above:

The carrying amounts of certain financial instruments approximate fair value due to their short-term nature and generally negligible credit risk. These financial instruments include cash and cash equivalents, income tax receivable, accrued interest receivable, securities sold under agreements to repurchase, accrued interest payable, income taxes payable and advance payments by borrowers for taxes and insurance.

Federal Home Loan Bank stock:

There is no market for this stock, which can be liquidated only by redemption by the FHLB. The stock is carried at par, which has historically represented the redemption price and is therefore considered to approximate fair value. FHLB stock is evaluated quarterly for potential impairment.

## Loans held for sale:

The fair value of loans held for sale is based on pricing available in the secondary market.

## Covered loans:

Fair values are estimated based on a discounted cash flow analysis. Estimates of future cash flows incorporate various factors that may include the type of loan and related collateral, collateral values, estimated default probability and loss severity given default, internal risk rating, whether the interest rate is fixed or variable, term of loan, whether or not the loan is amortizing and loan specific net realizable value analyses for certain commercial and commercial real estate loans. The fair values of loans accounted for in pools are estimated on a pool basis. Other loans may be grouped based on risk characteristics and fair value estimated in the aggregate when applying discounted cash flow valuation techniques.
Discount rates are based on current market rates for new originations of comparable loans adjusted for liquidity and credit risk premiums that the Company believes would be required by market participants.

# Edgar Filing: BankUnited, Inc. - Form 10-Q 

## Table of Contents

BANKUNITED, INC. AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

June 30, 2011

## Non-covered loans:

Fair values are estimated using a discounted cash flow analysis with a discount rate based on interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. The allowance for loan losses is considered a reasonable estimate of the required adjustment to fair value to reflect the impact of credit risk. This estimate may not represent an exit value as defined in ASC 820.

FDIC indemnification asset:

The fair value of the FDIC indemnification asset has been estimated using a discounted cash flow technique incorporating assumptions about the timing and amount of future projected cash payments from the FDIC related to the resolution of covered assets. The factors that impact estimates of future cash flows are similar to those impacting estimated cash flows from covered loans described above. The discount rate is determined by adjusting the risk free rate to incorporate credit risk, uncertainty in the estimate of the timing and amount of future cash flows and illiquidity.

## Deposits:

The fair value of demand deposits, savings accounts and money market deposits is the amount payable on demand at the reporting date. The fair value of time deposits is estimated using a discounted cash flow analysis based on rates currently offered for deposits of similar remaining maturities.

FHLB advances:

Fair value is estimated by discounting contractual future cash flows using the current rate at which borrowings with similar terms and remaining maturities could be obtained by the Company.

Note 12 Commitments and Contingencies

## Edgar Filing: BankUnited, Inc. - Form 10-Q

The Company issues off-balance sheet financial instruments to meet the financing needs of its customers. These financial instruments include commitments to fund loans, unfunded commitments under existing lines of credit, and commercial and standby letters of credit. These commitments expose the Company to varying degrees of credit and market risk which are essentially the same as those involved in extending loans to customers, and are subject to the same credit policies used in underwriting loans. Collateral may be obtained based on the Company s credit evaluation of the counterparty. The Company s maximum exposure to credit loss is represented by the contractual amount of these commitments. Amounts funded under non-cancelable commitments in effect at the date of the Acquisition are covered under the loss sharing agreements if certain conditions are met.

## Commitments to fund loans:

These are agreements to lend funds to customers as long as there is no violation of any condition established in the contract. Commitments to fund loans generally have fixed expiration dates or other termination clauses and may require payment of a fee. Many of these commitments are expected to expire without being funded and, therefore, the total commitment amounts do not necessarily represent future liquidity requirements.

Unfunded commitments under lines of credit:

Unfunded commitments under lines of credit include consumer, commercial and commercial real estate lines of credit to existing customers. Many of these commitments have fixed expiration dates or other termination clauses and may require payment of a fee. Some of these commitments may mature without being fully funded.

## BANKUNITED, INC. AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

June 30, 2011

## Commercial and standby letters of credit:

Letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. These letters of credit are primarily issued to support trade transactions or guarantee arrangements. Fees collected on standby letters of credit represent the fair value of those commitments and are deferred and amortized over their term, which is typically one year or less. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

Total lending related commitments outstanding at June 30, 2011 were as follows (in thousands):

|  |  | Covered |  | Non-Covered |  | Total |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |
| Commitments to fund loans | $\$$ |  | $\$$ | 163,499 | $\$$ | 163,499 |
| Unfunded commitments under existing lines of credit |  | 156,844 |  | 309,476 | 466,320 |  |
| Commercial and standby letters of credit | $\$$ | 156,844 | $\$$ | 40,063 |  | 10,063 |
| Total |  |  | 483,038 | $\$$ | 639,882 |  |

## Legal Proceedings

The Company is involved as plaintiff or defendant in various legal actions arising in the normal course of business. While the ultimate outcome of any such proceedings cannot be predicted with certainty, it is the opinion of management, based upon advice of legal counsel, that no proceedings exist, either individually or in the aggregate, which, if resolved adversely to the Company, would have a material effect on the Company s consolidated financial position, results of operations or cash flows.

## Note 13 Earnings per Share

Basic earnings per common share is calculated by dividing income available to common stockholders by the weighted average number of common shares outstanding for the period, reduced by average unvested stock awards. Unvested stock awards and stock option awards with nonforfeitable rights to dividends or dividend equivalents, whether paid or unpaid, are considered participating securities and are included in the computation of basic earnings per share using the two class method. Diluted earnings per common share is computed by dividing net income by the weighted average number of common shares outstanding for the period, increased for the dilutive effect of unexercised stock options and unvested share awards using the treasury stock method.

The computation of basic and diluted earnings per common share is presented below (in thousands except per share amounts):

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis is intended to focus on significant changes in the financial condition and results of operations of the Company during the three and six month periods ended June 30, 2011 and should be read in conjunction with the consolidated financial statements and notes thereto included in this Quarterly Report on Form 10-Q and the Company s 2010 Annual Report on Form 10-K.

## Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that reflect the Company s current views with respect to, among other things, future events and financial performance. Words such as anticipates, expects, intends, plans, believes, seeks, estimates, and similar expressions identify forward-looking statements. These forward-looking statements are based on the historical performance of the Company and its subsidiaries or on the Company s current plans, estimates and expectations. The inclusion of this forward-looking information should not be regarded as a representation by the Company that the future plans, estimates or expectations so contemplated will be achieved. Such forward-looking statements are subject to various risks and uncertainties and assumptions relating to the Company s operations, financial results, financial condition, business prospects, growth strategy and liquidity. If one or more of these or other risks or uncertainties materialize, or if the Company s underlying assumptions prove to be incorrect, the Company s actual results may vary materially from those indicated in these statements. A number of important factors could cause actual results to differ materially from those indicated by the forward-looking statements. Factors that may cause actual results to differ materially from these forward-looking statements include but are not limited to, the risk factors described in Part I, Item 1A of the Company s 2010 Annual Report on Form 10-K. The Company does not undertake any obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise.

## Overview

The Company is a savings and loan holding company with two wholly-owned subsidiaries: BankUnited, which is one of the largest independent depository institutions headquartered in Florida by assets, and BankUnited Investment Services, a Florida insurance agency. As of the close of business on May 21, 2009, BankUnited entered into a Purchase and Assumption Agreement, including Loss Sharing Agreements, with the FDIC to acquire substantially all of the assets and assume all of the non-brokered deposits and substantially all of the other liabilities of BankUnited, FSB from the FDIC, a transaction referred to as the Acquisition . Neither the Company nor the Bank had any substantive operations prior to the Acquisition.

In June, 2011, the Company filed an application, which is currently under review, with the Office of the Comptroller of the Currency (the OCC ) to change BankUnited s charter to that of a national bank. On August 12, 2011, the Company also filed an application with the Federal Reserve Board and the OCC to change its charter to that of a bank holding company and acquire control of Herald.

Through BankUnited s network of 81 branches in 13 Florida counties, we provide a full range of commercial and consumer banking services to growing companies and their executives, commercial and middle-market businesses and consumers in Florida s coastal regions. Through BankUnited Investment Services, we offer wealth management and financial planning services to our customers.

## Performance Highlights for the Quarter

- Net income for the quarter ended June 30 , 2011 was $\$ 44.0$ million or $\$ 0.44$ per common share as compared to $\$ 51.2$ million or $\$ 0.55$ per common share for the quarter ended June 30, 2010.
- For the quarter ended June 30, 2011, net interest income increased by $\$ 21.1$ million to $\$ 117.3$ million from $\$ 96.2$ million for quarter ended June 30, 2010. The net interest margin increased to $5.99 \%$ from $4.93 \%$. The primary drivers of the increase in net interest income were an increase in interest income on loans of $\$ 14.7$ million and a decrease in interest expense on deposits of $\$ 9.6$ million. The yield on

## Edgar Filing: BankUnited, Inc. - Form 10-Q

Table of Contents
loans increased to $13.15 \%$ for the quarter ended June 30, 2011 from $10.15 \%$ for the quarter ended June 30, 2010 primarily due to an increase in expected cash flows from the Company s acquired credit impaired loan portfolio. The average rate paid on interest-bearing deposits declined to $1.24 \%$ for the quarter ended June 30, 2011 from $1.60 \%$ for the quarter ended June 30, 2010 as a result of the continued run-off of higher cost time deposits, a shift in deposit mix toward lower cost core deposit products and declines in market interest rates.

- Total loans increased by $\$ 70.7$ million during the quarter ended June 30, 2011. Total loans originated since the Acquisition, or non-covered loans, grew by $\$ 303.5$ million during the quarter ended June 30, 2011 while covered loans declined by $\$ 232.8$ million due to continued resolutions. The growth in non-covered loans for the quarter was led by an increase in commercial and commercial real estate loans and leases of $\$ 178.9$ million and growth of $\$ 124.3$ million in the one-to-four single family residential portfolio.
- Asset quality remained strong, with a ratio of non-performing assets to total assets of $1.62 \%$, a ratio of non-performing loans to total loans of $0.89 \%$ and an annualized net charge-off ratio (net charge-offs to average loans) of $0.55 \%$.
- Core deposits, which we define as demand, savings, and money market deposits, increased by $\$ 145.6$ million to $\$ 4.4$ billion for the quarter ended June 30, 2011 and by $\$ 379.0$ million for the six months ended June 30, 2011.
- BankUnited s capital ratios continue to exceed the requirements to be considered well capitalized under applicable regulatory guidelines, with a Tier 1 leverage ratio of $10.79 \%$ a Tier 1 risk-based capital ratio of $40.62 \%$ and a Total risk-based capital ratio of $41.50 \%$ at June 30, 2011.
- On June 2, 2011, we entered into a Merger Agreement with Herald, a national banking association based in the New York metropolitan area. Herald had total assets of $\$ 486.6$ million at June 30, 2011. In exchange for their ownership interests in Herald, Herald shareholders will receive a combination of cash and the Company s common stock equal in value to $\$ 1.35$ plus the value of 0.0990 shares of our common stock as of the effective time of the merger. The Merger Agreement provides that a to-be-formed direct, wholly-owned national bank subsidiary of BankUnited, Inc. will merge with and into Herald, with Herald continuing as the surviving entity and a wholly-owned subsidiary of BankUnited, Inc. The surviving bank will be merged with and into BankUnited, with BankUnited surviving, in August 2012.

## Results of Operations

The Company reported a net income of $\$ 44.0$ million or $\$ 0.44$ per share for the three months ended June 30,2011 as compared to $\$ 51.2$ million or $\$ 0.55$ per share for quarter ended June 30, 2010. For the six months ended June 30, 2011, the Company reported a net loss of $\$(23.7)$ million or $\$(0.25)$ per share as compared to net income of $\$ 111.9$ million or $\$ 1.20$ per share for the six months ended June 30, 2010.

## Net Interest Income

Net interest income is the difference between interest earned on interest earning assets and interest incurred on interest bearing liabilities and is the primary driver of core earnings. Net interest income is impacted by the relative mix of interest earning assets and interest bearing liabilities, the ratio of interest earning assets to total assets and of interest bearing liabilities to total funding sources, movements in market interest rates, levels of non-performing assets and pricing pressure from competitors.

The mix of interest earning assets is influenced by loan demand and by management s continual assessment of the rate of return and relative risk associated with various classes of earning assets. The mix of interest bearing liabilities is influenced by management sassessment of the need for lower cost funding sources weighed against

## Edgar Filing: BankUnited, Inc. - Form 10-Q

Table of Contents
relationships with customers and growth requirements and is impacted by competition for deposits in the Bank s market and the availability and pricing of other sources of funds.

Net interest income is also impacted by accretion of fair value adjustments recorded in conjunction with the Acquisition and the accounting for ACI loans. Fair value adjustments of interest earning assets and interest bearing liabilities recorded at Acquisition are accreted to interest income or expense over the lives of the related assets or liabilities. Generally, accretion of fair value adjustments increases interest income and decreases interest expense, and thus has a positive impact on our net interest income, net interest margin and interest rate spread. Due to the revaluation of covered assets in conjunction with the Acquisition and the resultant accretion, generally covered assets have higher yields than do assets purchased or originated since the Acquisition. Net interest income will be impacted in future periods as covered assets are repaid or mature and these assets comprise a lower percentage of total interest earning assets.

At Acquisition, ACI loans were recorded at fair value, measured based on the present value of expected cash flows. The excess of expected cash flows over carrying value, known as accretable yield, is being recognized as interest income over the lives of the underlying loans. Accretion related to ACI loans has a positive impact on our net interest income, net interest margin and interest rate spread.

Interest expense incurred on our interest bearing liabilities is impacted by the accretion of fair value adjustments on our time deposits and our advances from the FHLB recorded in connection with the Acquisition. The impact on interest expense decreased for the three and six month periods ended June 30, 2011, as compared to the comparable periods in 2010, and is expected to continue to decrease as these liabilities mature or are repaid. Accretion of fair value adjustments on time deposits totaled $\$ 2.2$ million and $\$ 4.7$ million, respectively, for the three months and six months ended June 30, 2011 as compared to $\$ 5.1$ million $\$ 14.7$ million, respectively, for the three months and six months ended June 30 , 2010.

The following tables present, for the periods indicated, information about (i) average balances, the total dollar amount of interest income from earning assets and the resultant average yields; (ii) average balances, the total dollar amount of interest expense on interest bearing liabilities and the resultant average rates; (iii) net interest income; (iv) the interest rate spread; and (v) the net interest margin. Nonaccrual and restructured loans are included in the average balances presented in this table; however, interest income foregone on nonaccrual loans is not included. Yields have been calculated on a pre-tax basis (dollars in thousands):

(1) Annualized

Three months ended June 30, 2011 compared to three months ended June 30, 2010

Net interest income was $\$ 117.3$ million for the three months ended June 30, 2011 compared to $\$ 96.2$ million for the three months ended June 30 , 2010, an increase of $\$ 21.1$ million. The increase in net interest income was comprised of an increase in interest income of $\$ 12.4$ million and a decrease in interest expense of $\$ 8.7$ million.

## Edgar Filing: BankUnited, Inc. - Form 10-Q

The increase in interest income was driven primarily by a $\$ 14.7$ million increase interest income from loans, partially offset by a decline of $\$ 2.5$ million decrease in interest income from investment securities. Increased interest income from loans is reflective of an increase in the average yield to $13.15 \%$ for the three months ended June 30, 2011 from $10.15 \%$ for the comparable period in 2010. This increase was partially offset by a decline in average loans outstanding resulting from pay-downs and resolutions of covered loans. The increased yield reflects an increased yield on covered loans partially offset by the origination and purchase of new loans at lower prevailing market rates of interest. The average yield on loans originated and purchased since the Acquisition was $5.21 \%$ for the three months ended June 30, 2011 as compared to $5.45 \%$ for the comparable period in 2010. The yield on covered loans increased to $14.95 \%$ for the three months ended June 30, 2011 from $10.40 \%$ for the same period in 2010 as a result of increases in projected cash flows from the covered ACI Loans. For the three months ended June 30, 2011, interest income from investment securities decreased due to a decline in the average yield to $3.30 \%$ from

## Edgar Filing: BankUnited, Inc. - Form 10-Q

Table of Contents
$4.18 \%$, partially offset by an increase in average volume. The decrease in average yield resulted primarily from new purchases reflecting lower general market rates of interest.

The primary component of the decrease in interest expense for the three months ended June 30,2011 as compared to the three months ended June 30, 2010 was a $\$ 9.6$ million decline in interest expense on deposits. The decrease reflects both a decline in the average balance of deposits and a decline in the average rate paid, partially offset by a decrease in accretion of Acquisition related fair value adjustments. The decline in volume is due to the continued run-off of time deposits assumed in the Acquisition, partially offset by growth in core deposits, including demand, savings and money market deposit accounts. The decrease in the average rate paid is a result of this shift in deposit mix to lower cost products coupled with declining market rates of interest. Accretion of fair value adjustments reduced interest expense by $\$ 2.2$ million for the three months ended June 30, 2011 as compared to $\$ 5.1$ million during the same period in 2010.

Net interest margin for the three months ended June 30, 2011 was $5.99 \%$ as compared to $4.93 \%$ for the three months ended June 30, 2010, an increase of 106 basis points. The average yield on interest earning assets increased by 60 basis points while the average rate paid on interest bearing liabilities decreased by 18 basis points for an improvement in the interest rate spread of 78 basis points. The improvement in both net interest margin and interest rate spread resulted primarily from the increased average yield on covered loans and the decrease in the average rate paid on deposits as discussed above.

Six months ended June 30, 2011 compared to six months ended June 30, 2010

Net interest income was $\$ 229.6$ million and $\$ 188.7$ million for the six months ended June 30, 2011 and June 30, 2010, respectively, an increase of $\$ 40.9$ million. The increase in net interest income for the six months ended June 30, 2011 as compared to the six months ended June 30, 2010 was comprised of an increase in interest income of $\$ 26.7$ million, primarily attributable to an increase in interest income on loans of $\$ 25.2$ million, and a decrease in interest expense of $\$ 14.2$ million, resulting primarily from a decrease in interest expense on deposits of $\$ 17.6$ million partially offset by an increase in interest expense on FHLB advances of $\$ 3.4$ million.

The increase in interest income on loans for the six months ended June 30, 2011 as compared to the six months ended June 30, 2010 was reflective of an increase in the average yield to $12.62 \%$ from $9.77 \%$, partially offset by a decrease in the average volume of loans outstanding. The average yield on loans originated and purchased since the Acquisition was $5.32 \%$ for the six months ended June 30, 2011as compared to $5.49 \%$ for the comparable period in 2010. The yield on covered loans increased to $14.05 \%$ for the six months ended June 30,2011 as compared to $9.98 \%$ for the same period in 2010.

The decline in interest expense on deposits resulted from declines in both the average volume of deposits outstanding and in the average rate paid on interest bearing deposit accounts. Accretion of fair value adjustments reduced interest expense by $\$ 4.7$ million for the six months ended June 30, 2011 as compared to $\$ 14.7$ million during the same period in 2010. Interest expense on FHLB advances and other borrowings increased by $\$ 3.4$ million for the six months ended June 30, 2011 as compared to the six months ended June 30,2010 primarily as a result of lower accretion of fair value adjustments. The decline in accretion is due to the maturity and repayment of a portion of the specific advances that were outstanding at the Acquisition date.

## Edgar Filing: BankUnited, Inc. - Form 10-Q

Net interest margin for the six months ended June 30, 2011 was $5.87 \%$ as compared to $4.90 \%$ for the six months ended June 30, 2010, for an increase of 97 basis points. The average yield on interest earning assets increased by 57 basis points for the six months ended June 30, 2011 as compared to the same period in 2010, while the average rate paid on interest bearing liabilities decreased by 15 basis points for the six months ended June 30, 2011, for an improvement in the interest rate spread of 72 basis points. The improvement in both net interest margin and interest rate spread resulted primarily from the increased average yield on covered loans and the decrease in the average rate paid on deposits as discussed above. The factors impacting trends in net interest income for the six months ended June 30, 2011 were consistent with those impacting net interest income for the three months then ended, discussed above.

## Table of Contents

## Provision for Loan Losses

The provision for loan losses is the amount of expense that, based on our judgment, is required to maintain the allowance for loan losses at an adequate level to absorb probable losses inherent in the loan portfolio at the balance sheet date and that, in management s judgment, is appropriate under U.S. generally accepted accounting principles. Our determination of the amount of the allowance and corresponding provision for loan losses considers ongoing evaluations of the various segments of the Company s loan portfolio and of individually significant credits, levels of non-performing loans and charge-offs, statistical trends and economic and other relevant factors. The determination of the amount of the allowance is complex and involves a high degree of judgment and subjectivity.

The risk of loss associated with covered loans differs significantly from the risk of loss associated with non-covered loans. The Loss Sharing Agreements significantly limit the Company s exposure to credit losses on covered loans. Recognition of future losses on covered loans is also mitigated by the fair market value of loans established in the application of acquisition accounting.

Covered Loans are further broken out into two broad categories: (i) ACI loans, or those acquired with evidence of deterioration in credit quality since origination and (ii) loans that did not exhibit evidence of deterioration in credit quality at acquisition, or non-ACI loans. A provision for loan losses related to ACI loans is recorded only when estimates of future cash flows related to these loans are revised downward, indicating further deterioration in credit quality. A provision for loan losses for non-ACI loans may be recorded if factors considered relevant by management indicate that the credit quality of the non-ACI loans has deteriorated.

Since the recording of a provision for loan losses on covered loans represents an increase in the amount of reimbursement we ultimately expect to receive from the FDIC under the Loss Sharing Agreements, we also record an increase in the FDIC indemnification asset for the present value of the projected increase in reimbursement, with a corresponding increase in non-interest income, recorded in the statement of operations line item Net gain (loss) on indemnification asset. Therefore, the impact on our results of operations of any provision for loan losses on Covered Loans is significantly mitigated by an increase in non-interest income.

For the three months ended June 30, 2011 and 2010, we recorded a (recovery of) provision for loan losses on covered loans of $\$(6.4)$ million and $\$ 16.7$ million, respectively. The recovery of provision for the three months ended June 30, 2011 primarily resulted from improved performance of a pool of ACI home equity loans. An allowance for loan losses in the amount of $\$ 18.5$ million related to this pool was established during the year ended December 31, 2010. A reversal of that allowance in the amount of $\$(7.8)$ million was recorded during the prior quarter ended March 31, 2011 and an additional \$(7.0) million was reversed during the three months ended June 30, 2011. For the six months ended June 30, 2011 and 2010, we recorded provisions for loan losses on covered loans of $\$ 3.6$ million and $\$ 24.4$ million, respectively. The impact on earnings from the provisions for losses on covered loans was partially mitigated by recording increases (decreases) in non-interest income of $\$(5.8)$ million and $\$ 12.4$ million during the three months ended June 30 , 2011 and 2010, respectively, and $\$ 0.8$ million and $\$ 19.0$ million for the six months ended June 30, 2011 and 2010, respectively.

For the three months ended June 30, 2011 and 2010, we recorded provisions for loan losses of $\$ 3.6$ million and $\$ 1.2$ million, respectively, for loans we originated or purchased subsequent to the Acquisition. For the six months ended June 30, 2011 and 2010, we recorded provisions for loan losses of $\$ 5.0$ million and $\$ 1.7$ million, respectively, relating to these loans. These loans are not protected by the Loss Sharing Agreements and as such, these provisions are not offset by an increase in non-interest income.

## Non-Interest Income

The Company reported non-interest income of $\$ 52.9$ million and $\$ 83.7$ million for the three months ended June 30, 2011 and June 30, 2010, respectively. Non-interest income was $\$ 117.1$ million for the six months ended June 30,2011 as compared to $\$ 166.2$ million for the six months ended June 30, 2010. The following table presents a comparison of the categories of non-interest income for the three and six month periods ended June 30, 2011 and 2010 (in thousands):

## Table of Contents

|  | Three Months Ended June 30, 20112010 |  |  |  | Six Months Ended June 30, 2011 2010 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Accretion of discount on FDIC indemnification asset | \$ | 14,873 | \$ | 36,776 | \$ | 34,443 | \$ | 91,160 |
| Income from resolution of covered assets, net |  | 3,076 |  | 58,593 |  | 2,366 |  | 94,990 |
| Net gain (loss) on indemnification asset |  | 11,312 |  | $(26,950)$ |  | 37,634 |  | $(49,985)$ |
| FDIC reimbursement of costs of resolution of covered assets |  | 8,241 |  | 7,880 |  | 18,741 |  | 14,315 |
| Non-interest income from covered assets |  | 37,502 |  | 76,299 |  | 93,184 |  | 150,480 |
| Service charges on deposits and other fee income |  | 1,993 |  | 2,060 |  | 4,145 |  | 4,171 |
| Service charges on loans |  | 655 |  | 529 |  | 1,187 |  | 1,049 |
| Gain (loss) on sale or exchange of investment securities available for sale |  | 100 |  | $(2,836)$ |  | 103 |  | $(2,810)$ |
| Mortgage insurance income |  | 6,784 |  | 2,255 |  | 8,085 |  | 5,057 |
| Other non-interest income |  | 5,824 |  | 5,442 |  | 10,416 |  | 8,258 |
| Total non-interest income | \$ | 52,858 | \$ | 83,749 | \$ | 117,120 | \$ | 166,205 |

For the three and six month periods ended June 30, 2011 and 2010, the majority of our non-interest income resulted from accretion of discount on the FDIC indemnification asset, the resolution of assets covered by our Loss Sharing Agreements with the FDIC and reimbursement by the FDIC of costs of resolution of covered assets.

The FDIC indemnification asset represents the present value of estimated future cash payments from the FDIC for probable losses on covered assets, up to 90 days of past due interest, excluding interest related to loans on nonaccrual at Acquisition, and reimbursement of certain expenses. Accretion is a result of discounting and may also increase or decrease from period to period due to changes in expected cash flows from covered loans. If projected cash flows from the ACI loans increase, the yield on the loans will increase and the discount rate of accretion on the FDIC indemnification asset will decrease as less cash is expected to be recovered from the FDIC.

Accretion of discount on the FDIC indemnification asset totaled $\$ 14.9$ million and $\$ 36.8$ million for the three months ended June 30, 2011 and 2010 , respectively and $\$ 34.4$ million and $\$ 91.2$ million for the six months ended June 30, 2011 and 2010, respectively. The decrease in accretion in 2011 as compared to 2010 was related to the decrease in the average balance of the indemnification asset as well as a decrease in the average discount rate during the period to $2.89 \%$ from $6.08 \%$. The decline in the average discount rate corresponds to the increased yield on covered loans.

A rollforward of the FDIC indemnification asset for the six months ended June 30, 2011 and the year ended December 31, 2010 follows (in thousands):

|  | $\begin{aligned} & \text { Six Months } \\ & \text { Ended June 30, } \\ & 2011 \end{aligned}$ |  | Year Ended December 31, 2010 |  |
| :---: | :---: | :---: | :---: | :---: |
| Balance, beginning of period | \$ | 2,667,401 | \$ | 3,279,165 |
| Accretion |  | 34,443 |  | 134,703 |
| Reduction for claims filed |  | $(486,558)$ |  | $(764,203)$ |
| Net gain (loss) on indemnification asset |  | 37,634 |  | 17,736 |
| Balance, end of period | \$ | 2,252,920 | \$ | 2,667,401 |

Accretion of discount on the FDIC indemnification asset results in an increase to the balance of the FDIC indemnification asset with a corresponding increase in non-interest income. We project the amount of accretion will continue to decline in future periods, because our projected cash flows from ACI loans have been increasing, and as a result we expect to collect less cash flow from the indemnification asset.

# Edgar Filing: BankUnited, Inc. - Form 10-Q 

Table of Contents

The balance of the FDIC indemnification asset is reduced as claims for reimbursement are filed with the FDIC. The balance of the FDIC indemnification asset is also reduced or increased as a result of decreases or increases in estimated cash flows to be received from the FDIC related to the ultimate resolution of covered assets. We record an offsetting entry in the statement of operations line item Net gain (loss) on indemnification asset. This line item also includes a significantly mitigating impact related to loan loss provisions on covered loans, provisions for impairment of OREO and gains or losses on the sale of covered loans and OREO.

Covered loans may be resolved through repayment, foreclosure, short sale of the underlying collateral, sale of the loans or, for the non-residential portfolio, charge-offs. The difference between consideration received in resolution of covered loans and the amount of projected losses from resolution of those loans as well as losses from permanent modifications of ACI loans accounted for in pools, is recorded in the statement of operations line item Income (loss) from resolution of covered assets, net. The amount of income recorded in any period will be impacted by the number and unpaid principal balance ( UPB ) of ACI loans resolved and our ability to accurately project cash flows from ACI loans in future periods. As expected, the impact of this line item on the results of operations decreased for the three and six months ended June 30, 2011 as compared to the three and six months ended June 30, 2010, as we have gained additional history in terms of the performance of the loans we acquired, which we have reflected in the update of our projected cash flows from ACI loans.

Losses from the resolution or permanent modification of covered loans increase the amount recoverable from the FDIC under the Loss Sharing Agreements. Gains from the resolution of covered loans reduce the amount recoverable from the FDIC under the Loss Sharing Agreements. These additions to or reductions in amounts recoverable from the FDIC related to the resolution of covered loans are recorded in non-interest income in the line item Net gain (loss) on indemnification asset and reflected as corresponding increases or decreases in the FDIC indemnification asset.

Increases or decreases in impairment related to covered loans are recorded in earnings through the provision for losses on covered loans. Under the terms of the Loss Sharing Agreements, the Company is entitled to recover from the FDIC a portion of losses on these loans; therefore, the discounted amount of changes in expected cash flows from the FDIC related to these losses is recorded in non-interest income in the line item Net gain (loss) on indemnification asset and reflected as a corresponding increase or decrease in the FDIC indemnification asset.

The Company records impairment charges related to declines in the estimated net realizable value of OREO properties subject to the Loss Sharing Agreements and recognizes additional gains or losses upon the eventual sale of such OREO properties. The estimated increase or reduction in amounts recoverable from the FDIC with respect to these gains and losses is reflected as an increase or decrease in the FDIC indemnification asset and in non-interest income in the line item Net gain (loss) on indemnification asset.

When the Company recognizes gains or losses related to covered assets in its consolidated financial statements, changes in the estimated amount recoverable from the FDIC under the Loss Sharing Agreements with respect to those gains or losses are also reflected in the consolidated financial statements as discussed above. Net gain (loss) on indemnification asset of $\$ 11.3$ million and $\$(27.0)$ million was recorded for the three months ended June 30, 2011 and 2010, respectively. For the six months ended June 30, 2011 and 2010, net gain (loss) on indemnification asset amounted to $\$ 37.6$ million and $\$(50.0)$ million, respectively. The net impact on earnings before taxes of transactions related to covered assets, plus the provision for loan losses on non-covered loans, was $\$(3.2)$ million and $\$ 10.4$ million, respectively, for the three months ended June 30 , 2011 and 2010 and $\$(10.8)$ million and $\$ 16.2$ million, respectively, for the six months ended June 30,2011 as detailed in the tables below (in thousands):

| Income from resolution of covered assets, net | \$ | 3,076 | \$ | 58,593 | \$ | 2,366 | \$ | 94,990 |

We incurred net losses from foreclosures and short sales for the quarter and six months ended June 30, 2011 as compared to net gains for the quarter and six months ended June 30, 2010 due to continuing home price deterioration in our primary market areas.

Certain OREO related expenses, including attorney s fees, foreclosure costs, property preservation costs, maintenance and repair costs, advances for taxes and insurance, appraisal costs and inspection costs are also reimbursed under the terms of the Loss Sharing Agreements with the FDIC. Such expenses are recorded in non-interest expense when incurred, and the reimbursement is recorded as FDIC reimbursement of costs of
resolution of covered assets in non-interest income when submitted to the FDIC, generally upon ultimate resolution of the underlying covered asset. This may result in the expense and the related income from reimbursements being recorded in different periods. For the three months ended June 30, 2011 and 2010, non-interest expense includes

Edgar Filing: BankUnited, Inc. - Form 10-Q

Table of Contents
approximately $\$ 8.6$ million and $\$ 13.0$ million, respectively, of disbursements subject to reimbursement under the loss sharing agreements. For the six months ended June 30, 2011 and 2010, non-interest expense includes approximately $\$ 17.5$ million and $\$ 28.3$ million, respectively, of such disbursements. During the six months ended June 30, 2011 and 2010, claims of $\$ 18.7$ million and $\$ 14.3$ million, respectively, were submitted to the FDIC for reimbursement. As of June 30, 2011, $\$ 22.6$ million of disbursements remain to be submitted for reimbursement from the FDIC in future periods.

## Non-Interest Expense

The Company reported non-interest expense of $\$ 95.9$ million for the three months ended June 30, 2011 as compared to $\$ 74.4$ million for the three months ended June 30, 2010. Non-interest expense was $\$ 300.2$ million and $\$ 140.1$ million for the six months ended June 30, 2011 and 2010, respectively. The following table presents the components of non-interest expense for the three and six months ended June 30, 2011 and 2010 (in thousands):

|  | Three Months Ended June 30, 2011 |  |  |  | Six Months Ended June 30, 2011 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Employee compensation and benefits | \$ | 41,364 | \$ | 34,081 | \$ | 190,670 | \$ | 63,504 |
| Occupancy and equipment |  | 8,791 |  | 7,418 |  | 16,396 |  | 13,642 |
| Impairment of other real estate owned |  | 8,187 |  | 5,063 |  | 17,786 |  | 5,901 |
| Foreclosure expense |  | 6,057 |  | 7,932 |  | 10,527 |  | 19,375 |
| (Gain) loss on sale of OREO |  | 12,264 |  | $(1,693)$ |  | 24,474 |  | $(3,167)$ |
| OREO related expense |  | 2,589 |  | 5,086 |  | 6,932 |  | 8,886 |
| Change in value of FDIC warrant |  |  |  | 2,353 |  |  |  | 3,205 |
| Deposit insurance expense |  | 2,329 |  | 3,706 |  | 6,518 |  | 6,951 |
| Professional fees |  | 3,507 |  | 2,469 |  | 6,736 |  | 4,662 |
| Telecommunications and data processing |  | 3,418 |  | 2,746 |  | 6,866 |  | 5,736 |
| Other non-interest expense |  | 7,383 |  | 5,272 |  | 13,323 |  | 11,440 |
| Total non-interest expense | \$ | 95,889 | \$ | 74,433 | \$ | 300,228 | \$ | 140,135 |

As is typical for financial institutions, employee compensation and benefits represents the single largest component of recurring non-interest expense. The increase in employee compensation and benefits expense for the three months ended June 30, 2011 as compared to the three months ended June 30, 2010 of $\$ 7.3$ million reflects an increase in equity based compensation expense of $\$ 2.1$ million and as well as increased costs of enhancing our work force to enable our growth strategy.

Employee compensation and benefits for the six months ended June 30, 2011 as compared to the six months ended June 30, 2010 was impacted by a one-time equity based compensation charge of $\$ 110.4$ million recorded in conjunction with the consummation of the IPO of our common stock in February, 2011. Prior to consummation of the IPO, our employee compensation and benefits expense included expense related to Profits Interest Units ( PIUs ) issued to certain members of executive management. The PIUs were divided into two equal types of profits interests. Half of the PIUs, referred to as time-based PIUs, vested with the passage of time following the grant date. The remaining half of the PIUs, referred to as IRR-based PIUs, vested immediately prior to the consummation of the IPO. Immediately prior to the consummation of the IPO, the time-based and IRR-based PIUs were exchanged for a combination of vested and unvested shares of the Company s common stock and vested and unvested stock options. Share based compensation expense of $\$ 110.4$ million related to these instruments was recorded in conjunction with the IPO. This charge to compensation expense was offset by a credit to paid-in capital and therefore did not impact the Company s capital position. In addition to this one-time charge, employee compensation and benefits expense for the six months ended June 30 , 2011 included equity based compensation expense of $\$ 15.8$ million related to stock options and stock awards granted to employees in 2010 and 2011 and the instruments received in exchange for PIUs. Employee compensation and benefits expense for the six months ended June 30, 2010 included $\$ 11.2$ million in equity based compensation, primarily related to the PIUs.

Impairment of OREO increased by $\$ 3.1$ million for the three months ended June 30, 2011 to $\$ 8.2$ million from $\$ 5.1$ million for the three months ended June 30, 2010 while (gain) loss on sale of OREO increased by $\$ 14.0$ million to $\$ 12.3$ million for the three months ended June 30, 2011 from $\$(1.7)$ million for the three months ended

# Edgar Filing: BankUnited, Inc. - Form 10-Q 

Table of Contents

June 30, 2010. These increases are primarily attributable to continuing deterioration in home prices coupled with the high volume of foreclosure and OREO sale activity.

OREO and foreclosure expense remain at high levels due to the continuing high volume of foreclosure activity, however, in the aggregate, these expenses declined by $\$ 4.4$ million for the three months ended June 30, 2011 as compared to the three months ended June 30, 2010 and by $\$ 10.8$ million for the six months ended June 30, 2011 as compared to the six months ended June 30, 2010. These decreases reflect a decline in the number of units in the foreclosure pipeline. At June 30, 2011, approximately 3,600 units were in the foreclosure process, down from approximately 6,100 units at June 30, 2010.

At June 30, 2011, all OREO properties were covered by the Loss Sharing Agreements with the FDIC. OREO losses and OREO and foreclosure expenses are therefore substantially offset by non-interest income related to indemnification by the FDIC as discussed above.

The change in value of the FDIC warrant for the three and six month periods ended June 30, 2010 resulted from the change in fair value of a liability classified warrant issued to the FDIC in conjunction with the Acquisition. The warrant was redeemed for cash in February of 2011.

## Income Taxes

The provision for income taxes was $\$ 33.2$ million for three months ended June 30, 2011 and $\$ 36.4$ million for the three months ended June 30, 2010. The Company s effective tax rate was $43 \%$ and $42 \%$ for the three months ended June 30, 2011 and 2010, respectively. The effective tax rate differed from the statutory federal income tax rate of $35 \%$ primarily due to state income taxes and certain non-deductible equity based compensation expense.

For the six months ended June 30, 2011 and 2010, the provision for income taxes was $\$ 61.6$ million and $\$ 76.8$ million, respectively. The Company s effective tax rate was $162 \%$ and $41 \%$ for the six months ended June 30, 2011 and 2010, respectively. For the six months ended June 30, 2011, the Company s effective tax rate differed from the statutory federal tax rate primarily due to the $\$ 110.4$ million charge to compensation expense recorded in conjunction with the IPO. This expense is not deductible for income tax purposes. Additionally, a provision of approximately $\$ 7.6$ million, including penalties and interest, was recorded for uncertain state income tax positions during the six months ended June 30, 2011. For the six months ended June 30, 2010, the effective tax rate differed from the statutory federal tax rate primarily due to state income taxes and non-deductible equity based compensation.

At June 30, 2011 and December 31, 2010, the Company had net deferred tax liabilities of $\$ 44.2$ million and $\$ 4.6$ million, respectively.

## Financial Condition

## Edgar Filing: BankUnited, Inc. - Form 10-Q

Loans, OREO and certain investment securities, including certain private-label mortgage-backed and non-investment grade securities acquired in the Acquisition are covered by the Loss Sharing Agreements with the FDIC. The Loss Sharing Agreements afford the Company significant protection against future credit losses related to these assets. Under the Loss Sharing Agreements, the FDIC will cover $80 \%$ of losses and certain expenses related to the covered assets up to the $\$ 4.0$ billion stated threshold and $95 \%$ of losses and certain expenses that exceed the $\$ 4.0$ billion stated threshold. At June 30, 2011, \$2.9 billion or $77 \%$ of loans, net of discounts and deferred origination fees and costs, were covered loans and $\$ 255.7$ million or $7 \%$ of investment securities available for sale were covered securities. All of the Company s OREO at June 30, 2011 was covered by the Loss Sharing Agreements.

Loans net of discounts and deferred origination fees and costs decreased to $\$ 3.8$ billion at June 30, 2011 from $\$ 3.9$ billion at December 31, 2010, primarily due to the continued resolution of ACI loans. Loans acquired in the Acquisition, or covered loans, declined by $\$ 472.4$ million from December 31, 2010 to June 30, 2011 while loans originated since the Acquisition, or non-covered loans, increased by $\$ 356.5$ million. Loan demand in our primary market areas remains depressed, limiting the volume of new originations, although loan growth accelerated during

Table of Contents
the three months ended June 30, 2011. Total loans originated since the Acquisition, before deducting deferred origination fees and costs, grew by $\$ 303.5$ million during the three months ended June 30, 2011. Loan growth for the six months ended June 30, 2011 was led by an increase of $\$ 208.6$ million in commercial and commercial real estate loans and leases. Growth in the one-to-four family single family residential portfolio for the six months ended June 30, 2011 was led by $\$ 157.6$ million in purchases of residential mortgages.

The portfolio of available for sale securities has grown to $\$ 3.8$ billion at June 30, 2011 from $\$ 2.9$ billion at December 31, 2010. Growth of the investment portfolio continues to be driven by the deployment of cash generated from loan resolution activity during a period of diminished loan demand.

Average interest earning assets increased $\$ 143.5$ million to $\$ 7.8$ billion for the six months ended June 30, 2011 from $\$ 7.7$ billion for the six months ended June 30, 2010. This increase was driven primarily by an increase in the average balance of investment securities, partially offset by a decline in the average balance of loans resulting from ACI loan resolutions. Average non-interest earning assets declined by $\$ 588.2$ million, largely due to the decrease in the FDIC indemnification asset.

Average interest bearing liabilities decreased by $\$ 881.4$ million to $\$ 8.6$ billion for the six months ended June 30,2011 from $\$ 9.5$ billion for six months ended June 30, 2010, reflecting a decrease in average interest-bearing deposits. The reduction in outstanding interest-bearing deposits resulted from the continued run-off of time deposits assumed in the Acquisition. Average non-interest bearing liabilities increased by $\$ 159.2$ million, primarily as a result of an increase in non-interest bearing demand deposits. Average equity increased by $\$ 242.7$ million, primarily as a result of the IPO.

## Investment Securities Available for Sale

Our investment strategy continues to focus on providing liquidity necessary for day-to-day operations, adding a suitable balance of high credit quality, diversifying assets to the consolidated balance sheet, managing interest rate risk, and generating acceptable returns given our established risk parameters. We have sought to maintain liquidity and manage interest rate risk by investing a significant portion of the portfolio in high quality liquid securities consisting primarily of U.S. Government agency floating rate residential mortgage-backed securities. We have also invested in highly rated structured products including private label residential and commercial mortgage-backed securities, Re-securitized Real Estate Mortgage Investment Conduits, or Re-Remics , bank preferred stocks and asset-backed securities collateralized primarily by auto loans, credit card receivables, student loans and floor plan loans that, while somewhat less liquid, provide us with higher yields. A relatively short effective portfolio duration helps mitigate interest rate risk arising from the currently low level of market interest rates.

The following tables show, as of June 30, 2011 and December 31, 2010, the amortized cost and fair value of investment securities available for sale and the breakdown of covered and non-covered Securities (in thousands):

Edgar Filing: BankUnited, Inc. - Form 10-Q

At June 30, 2011 the weighted average life of the mortgage-backed securities portfolio was 1.3 years and the effective duration of the portfolio was 4.1 years.

We evaluate the credit quality of individual securities in the portfolio quarterly to determine whether any of the investments in unrealized loss positions are other-than-temporarily impaired. This evaluation considers the duration and severity of impairment; collateral values and levels of subordination or over-collateralization; collateral performance; the credit rating, earnings performance and business prospects of the issuer and other relevant factors. We may consider factors that raise significant concerns about an issuer s ability to continue as a going concern such as negative cash flows from operations, working capital deficiencies, or non-compliance with statutory capital requirements or debt covenants. We may also consider adverse changes in the regulatory or economic environment as well as significant adverse changes in general market conditions of the geographic area or the industry in which individual issuers operate. We consider both our intent to sell investment securities and whether it is more likely than not that we will be required to sell the securities prior to recovery of amortized cost basis, which might be until

## Edgar Filing: BankUnited, Inc. - Form 10-Q

maturity for debt securities or for a reasonable forecasted period of recovery for equity securities.

The carrying value of investment securities in an unrealized loss position totaled $\$ 568.8$ million with unrealized losses of $\$ 3.5$ million at June 30, 2011. At December 31, 2010, the carrying value of investment securities in an unrealized loss position totaled $\$ 717.6$ million with unrealized losses of $\$ 7.8$ million. At June 30, 2011, securities with a carrying value of $\$ 43.0$ million and unrealized losses of $\$ 0.4$ million had been in unrealized loss positions for 12 months or longer. No securities had been in unrealized loss positions for 12 months or more at December 31, 2010.

No securities have been determined to be other-than-temporarily impaired as of June 30, 2011. Approximately $89.2 \%$ of the securities purchased since the Acquisition are agency-backed or currently rated AAA. The timely repayment of principal and interest on the U.S. Government agency and sponsored enterprise mortgage-backed securities and U.S. Small Business Administration securities is either explicitly or implicitly guaranteed by the full faith and credit of the U.S. Government. We used third party developed credit and prepayment behavioral models incorporating CUSIP level constant default rates, voluntary prepayment rates and loss severity and delinquency assumptions to perform projected cash flow analyses of the private label mortgage-backed securities and Re-Remics and non-mortgage asset backed securities. Based on the results of this analysis, no credit losses were projected. We do not intend to sell securities in an unrealized loss position and it is not more likely than not that we will be required to sell them before recovery of their amortized cost basis.

## Table of Contents

As a member institution of the Federal Home Loan Bank of Atlanta, BankUnited is required to own capital stock in the FHLB. No market exists for this stock, and the Bank s investment can be liquidated only through repurchase by the FHLB; such repurchases have historically been at par. We monitor our investment in FHLB stock for impairment through review of recent financial results, dividend payment history and information from credit agencies. As of June 30, 2011, we had not identified any indicators of impairment of FHLB stock.

## Loans

The loan portfolio comprises the Company s primary interest-earning asset. At June 30, 2011 and December 31, 2010, respectively, 76.6\% and $86.3 \%$ of total loans, net of discounts and deferred origination fees and costs, were covered loans. The following table shows the composition of the Company s loan portfolio and the breakdown of the portfolio between covered ACI loans, covered non-ACI loans and non-covered loans at June 30, 2011 and December 31, 2010 (dollars in thousands):

## Residential Mortgages

## Edgar Filing: BankUnited, Inc. - Form 10-Q

Loans secured by residential real estate have consistently represented the majority of the total loan portfolio. One-to-four single family residential mortgages totaled $\$ 2.5$ billion, or $63.4 \%$, of the portfolio and $\$ 2.7$ billion, or $67.5 \%$, of the portfolio at June 30,2011 and December 31, 2010, respectively. The decline in this portfolio segment is primarily a result of the resolution of covered loans, including transfers to OREO. Home equity loans and lines of credit totaled $7.3 \%$ and $7.7 \%$ of the loan portfolio at June 30, 2011 and December 31, 2010, respectively. Substantially all of the home equity loans and lines of credit are covered loans.

The non-covered residential loan portfolio includes loans originated and purchased since the Acquisition. We currently originate residential mortgage loans with terms ranging from 10 to 40 years, with either fixed or adjustable interest rates, primarily to customers in the state of Florida. Newly originated residential mortgage loans are primarily closed-end first lien loans for the purchase or re-finance of owner occupied property. We also purchase loans to supplement our mortgage origination platform and to geographically diversify our loan portfolio given the current credit environment of the non-agency mortgage market in Florida. At June 30, 2011, \$40.0 million, or

Table of Contents
$15.1 \%$, of our non-covered one-to-four single family residential loans were originated loans and $\$ 224.4$ million, or $84.9 \%$, of our non-covered residential loans were purchased loans.

We do not originate option ARM, no-doc or reduced-doc mortgages and do not utilize wholesale mortgage origination channels although the covered loan portfolio contains loans with these characteristics. All of these loans are covered loans; therefore, the Company s exposure to future losses on these mortgage loans is mitigated by the Loss Sharing Agreements.

## Commercial and commercial real estate loans and leases

The commercial and commercial real estate portfolio segments collectively comprise $70.2 \%$ of loans originated or purchased since the Acquisition as of June 30, 2011.

Commercial real estate loans include term loans secured by income producing properties including rental apartments, industrial properties, retail shopping centers, office buildings and hotels as well as real estate secured lines of credit, and acquisition, development and construction loans. Commercial real estate loans typically have shorter repayment periods and reprice more frequently than 1-4 single family residential loans. The Company s underwriting standards generally provide for loan terms of five years, with amortization schedules of no more than twenty-five years. Loan to value, or LTV, ratios are typically limited to no more than $80 \%$. In addition, the Company usually obtains personal guarantees of the principals as additional security for most commercial real estate loans.

Commercial loans are typically made to growing companies and middle market businesses and include equipment loans, working capital lines of credit, asset- backed loans, acquisition finance credit facilities, lease financing and Small Business Administration product offerings. These loans may be structured as term loans, typically with maturities of five years or less, or revolving lines of credit which typically mature annually.

## Asset Quality

In discussing asset quality, a distinction must be made between covered loans and loans originated or purchased by us since the Acquisition, or non-covered loans. Non-covered loans were underwritten under significantly different and generally more conservative standards than the covered loans. In particular, credit approval policies have been strengthened, wholesale mortgage origination channels have been eliminated, no-doc and option adjustable rate mortgage, or option ARM, loan products have been eliminated, and real estate appraisal policies have been improved. Although the risk profile of covered loans is higher than that of the non-covered loans, our exposure to loss related to the covered loans is significantly mitigated by the Loss Sharing Agreements and by the fair value basis recorded in these loans resulting from the application of acquisition accounting.

We have established a credit risk management framework and put in place an experienced team to lead the workout and recovery process for the commercial and commercial real estate portfolios. We have also implemented a dedicated internal loan review function that reports directly to our Audit Committee. We have an experienced resolution team in place for covered residential mortgage loans, and have implemented outsourcing arrangements with industry leading firms in certain areas such as OREO resolution.

Loan performance is monitored by our credit, workout and recovery and loan review departments. Commercial and commercial real estate loans are regularly reviewed by our internal loan review department. The Company utilizes an asset risk classification system as part of its efforts to monitor and improve commercial asset quality. Loans exhibiting potential credit weaknesses that deserve management sclose attention and that if left uncorrected may result in deterioration of the repayment capacity of the borrower are categorized as special mention. Borrowers with credit weaknesses that may jeopardize collectability will likely demonstrate one or more of the following: payment defaults, frequent overdrafts, operating losses, increasing balance sheet leverage, inadequate cash flow, project cost over-runs, unreasonable construction delays, exhausted interest reserves, past due real estate taxes or declining collateral values. Generally, a loan with one or more of these identified weaknesses will be classified substandard. Loans that have credit weaknesses that render collection or liquidation in full highly questionable or improbable based on current circumstances are classified doubtful.

# Edgar Filing: BankUnited, Inc. - Form 10-Q 

## Table of Contents

## Non-Covered Loans

Overall asset quality of the non-covered loan portfolio at June 30, 2011 is considered by management to be strong.

#### Abstract

A key credit quality indicator for commercial real estate and commercial loans is internal risk rating. At June 30, 2011, 2.9\% of non-covered commercial and commercial real estate loans were rated special mention or adversely classified. Forty-eight non-covered commercial and commercial real estate loans and leases aggregating $\$ 5.9$ million were rated special mention and thirty-one non-covered commercial and commercial real estate loans and leases aggregating $\$ 12.7$ million were classified substandard. At December 31, 2010, twenty non-covered commercial and commercial real estate loans aggregating $\$ 9.0$ million were rated special mention and twelve non-covered commercial and commercial real estate loans aggregating $\$ 5.9$ million were classified substandard.

Loan performance, or delinquency status, is considered the most significant credit quality indicator for the residential, home equity and consumer portfolios. At June 30, 2011, non-covered residential loans delinquent by less than 90 days totaled $\$ 2.2$ million or $0.8 \%$ of the non-covered residential portfolio. There were no non-covered residential loans delinquent 90 days or more and no delinquencies in the non-covered home equity portfolio at June 30, 2011. There were no delinquencies in the non-covered residential mortgage or home equity loan portfolios at December 31, 2010. Delinquent consumer loans in the non-covered portfolio were insignificant at June 30, 2011 and December 31, 2010.

The majority of our non-covered residential mortgage portfolio consists of purchased loans. The credit parameters for purchasing loans are similar to the underwriting guidelines in place for our mortgage origination platform. In general, we purchase performing jumbo mortgage pools which have average FICO scores above 700, primarily are owner-occupied and full documentation and have a current LTV less than $80 \%$. At June 30, 2011, the purchased loan portfolio had the following characteristics: $59.3 \%$ were fixed rate loans, $87.4 \%$ were full documentation and had an average FICO score of 763 and average LTV of $68.2 \%$. The majority of this portfolio was owner-occupied, with $94.1 \%$ primary residence and $5.9 \%$ second homes. In terms of vintage, $4.6 \%$ of the portfolio was originated pre 2007, $2.0 \%$ in 2007, $11.5 \%$ in $2008,6.2 \%$ in $2009,15.0 \%$ in 2010 and $60.7 \%$ in 2011.

Similarly, the originated loan portfolio had the following characteristics at June 30, 2011: 75.1\% were fixed rate loans, $99.4 \%$ were full documentation and had an average FICO score of 771 and average LTV of $62.1 \%$. The majority of this portfolio was owner-occupied, with $92.6 \%$ primary residence and $7.4 \%$ second home. In terms of vintage, $12.7 \%$ of the portfolio was originated in 2009 and $56.8 \%$ in 2010 and $30.5 \%$ in 2011.

## Covered Loans

Covered loans consist of both ACI loans and non-ACI loans. At June 30, 2011, ACI loans totaled $\$ 2.6$ billion and non-ACI loans, net of unearned discounts and deferred fees and costs, totaled $\$ 365.8$ million. Covered 1-4 single family residential loans were placed into homogenous pools at Acquisition and the ongoing credit quality and performance of these loans is monitored on a pool basis. At Acquisition, the fair value of the pools was measured based on the expected cash flows to be derived from each pool. Initial cash flow expectations incorporated significant assumptions regarding prepayment rates, frequency of default and loss severity. For ACI pools, the difference between total contractual payments due and the cash flows expected to be received at Acquisition was recognized as non-accretable difference. The excess of expected
cash flows over the recorded fair value of each ACI pool at Acquisition, known as the accretable yield, is being recognized as interest income over the life of each pool. We monitor the pools quarterly to determine whether any material changes have occurred in expected cash flows that would be indicative of impairment or necessitate reclassification between non-accretable difference and accretable yield. Generally, improvements in expected cash flows less than $1 \%$ of the expected cash flows from a pool are not recorded. This threshold may be revised as we gain greater experience. Generally, commercial and commercial real estate loans are monitored individually due to their size and other unique characteristics.

Residential mortgage loans, including home equity loans, comprised $87.8 \%$ of the UPB of the acquired loan portfolio at the Acquisition date. We performed a detailed analysis of the portfolio to determine the key loan characteristics influencing performance. Key characteristics influencing the performance of the residential mortgage portfolio, including home equity loans, were determined to be delinquency status; product type, in particular,

Edgar Filing: BankUnited, Inc. - Form 10-Q

Table of Contents
amortizing as opposed to option ARM products; current indexed LTV ratio; and original FICO score. The ACI loans in the residential mortgage portfolio were grouped into ten homogenous static pools based on these characteristics, and the non-ACI residential loans were grouped into two homogenous static pools.
$1-4$ single family residential non-ACI loans had an aggregate UPB of $\$ 212.8$ million as of May 21, 2009. As of June 30, 2011, $36.1 \%$ of the UPB had been repaid, demonstrating the intent and ability of borrowers in this group to satisfy their mortgage obligations. At June 30, 2011, $\$ 9.5$ million or $8.8 \%$ of the $1-4$ single family residential non-ACI portfolio was delinquent by 60 days or more. At June 30, 2011, $\$ 500.4$ million or $24.4 \%$ of ACI $1-4$ single family residential loans were contractually delinquent by 60 days or more. However, future losses to the Company related to the covered loans are significantly mitigated by the Loss Sharing Agreements with the FDIC.

Covered home equity loans and lines of credit had a carrying amount of $\$ 277.5$ million at June 30, 2011, including ACI loans of $\$ 86.9$ million and non-ACI loans of $\$ 190.6$ million. At June $30,2011, \$ 10.5$ million or $5.5 \%$ of non-ACI and $\$ 16.5$ million or $19.0 \%$ of ACI home equity loans and lines of credit were 60 days or more contractually delinquent. Losses related to these loans are significantly mitigated by the Loss Sharing Agreements.

Ongoing asset quality of significant commercial and commercial real estate loans is monitored on an individual basis through the Company s regular credit review and risk rating process. At June 30, 2011, non-ACI commercial and commercial real estate loans had a carrying value of $\$ 66.2$ million, of which $\$ 3.9$ million were rated special mention, $\$ 7.4$ million were rated substandard and one relationship with a carrying value of $\$ 9.3$ million was rated doubtful. At December 31, 2010, loans with a carrying value totaling $\$ 12.7$ million were rated special mention and loans with a carrying value totaling $\$ 8.7$ million were rated substandard. At June 30, 2011, ACI commercial and commercial real estate loans had a carrying value of $\$ 417.2$ million of which $\$ 50.5$ million were rated special mention, $\$ 174.6$ million were rated substandard and $\$ 0.5$ million were rated doubtful. The Company s exposure to future losses related to these loans is mitigated by the Loss Sharing Agreements.

## Impaired Loans and Non-Performing Assets

As of June 30, 2011, substantially all of our non-performing assets are covered assets.

Non-performing assets consist of (i) non-accrual loans, (ii) accruing loans that are more than 90 days contractually past due, excluding ACI loans, (iii) loans that are the subject of a troubled debt restructuring, excluding ACI loans accounted for in pools and (iv) OREO. Impaired loans also include ACI loans or pools for which expected cash flows have been revised downward since Acquisition. Because of discount accretion, these loans have not been classified as nonaccrual loans and we do not consider them to be non-performing assets.

The following table summarizes the Company s impaired loans and other non-performing assets at June 30, 2011 and December 31, 2010 (in thousands):

Edgar Filing: BankUnited, Inc. - Form 10-Q

|  |  |  |  |  |
| Non-performing loans to total loans(1) |  | 0.89\% |  | 0.66\% |
| Non-performing assets to total assets |  | 1.62\% |  | 2.14\% |
| Allowance for loan losses to total loans(1) |  | 1.48\% |  | 1.48\% |
| Allowance for loan losses to non-performing loans |  | 167.35\% |  | 226.35\% |
| Net charge-offs to average loans |  | 0.55\% |  | 0.37\% |

Total loans for purposes of calculating these ratios is net of unearned discounts and deferred fees and costs.

Contractually delinquent ACI loans are not reflected as nonaccrual loans because discount continues to be accreted. Discount accretion continues to be recorded as there continues to be an expectation of future cash flows in excess of carrying amount from these loans. The carrying value of ACI loans contractually delinquent by more than 90 days or in foreclosure but still accruing was $\$ 541.7$ million and $\$ 717.7$ million at June 30, 2011 and December 31, 2010, respectively. The decrease in the carrying value of these loans is attributable to loan resolutions, including foreclosures, as well as improvements in our roll rates.

At June 30, 2011 and December 31, 2010, $89.4 \%$ and $87.6 \%$ of non-performing loans were covered loans, respectively. All of our OREO properties were covered under the Loss Sharing Agreements at June 30, 2011 and December 31, 2010. The increase in non-performing loans at June 30, 2011 as compared to December 31, 2010 is attributable primarily to one non-ACI relationship.

As of June 30, 2011 and December 31, 2010, there were five and three commercial ACI relationships with aggregate carrying amounts of $\$ 4.1$ million and $\$ 2.4$ million, respectively that were the subject of troubled debt restructurings. These loans are included in impaired ACI loans on accrual status in the table above. Under generally accepted accounting principles, modified ACI loans accounted for in pools are not considered troubled debt restructurings and are not separated from their respective pools when modified. There were no non-ACI loans or non-Covered Loans that were the subject of troubled debt restructurings at June 30, 2011 or December 31, 2010.

Except for ACI loans, loans are placed on nonaccrual status when (i) management has determined that full payment of all contractual principal and interest is in doubt, or (ii) the loan is past due 90 days or more as to principal and/or interest, unless the loan is well-secured and in the process of collection. Residential and consumer

Edgar Filing: BankUnited, Inc. - Form 10-Q

Table of Contents
loans not accounted for in pools are returned to accrual status as of the date the loan is no longer delinquent in excess of 90 days and ultimate collectability is assured. Commercial real estate and commercial loans are returned to accruing status only after all past due principal and interest have been collected. Except for ACI loans accounted for in pools, loans that are the subject of troubled debt restructurings are placed on nonaccrual status at the time of the modification unless the borrower has no history of missed payments for six months prior to the restructuring. If borrowers perform pursuant to the modified loan terms for at least six months and the remaining loan balances are considered collectable, the loans are returned to accrual status.

Commercial and commercial real estate loans are charged off when, in management s judgment, the carrying amount of the loan is not collectible. Residential real estate loans and secured consumer loans are typically charged off when they become 120 to 180 days past due, depending on the collateral type. Secured loans may be written down to the fair value of the collateral less estimated disposition costs. Unsecured consumer loans are generally charged off when they become 90 days past due. Home equity loans and lines of credit are fully reserved for when they become 120 days past due, and generally fully charged off at or before reaching 270 days delinquency.

## Loss Mitigation Strategies

Although our exposure to loss on covered assets is mitigated by the Loss Sharing Agreements, we have implemented strategies designed to minimize losses on these assets. We have increased the quality and experience level of our workout and recovery and mortgage servicing departments. We evaluate each ACI loan to determine the most effective loss mitigation strategy, which may be modification, short sale, or foreclosure. We offer loan modifications under the U.S. Treasury Department s Home Affordable Modification Program ( HAMP ) for eligible borrowers in the residential ACI portfolio. HAMP is a uniform loan modification process that provides eligible borrowers with sustainable monthly mortgage payments equal to a target $31 \%$ of their gross monthly income. As of June 30, 2011, 8,754 borrowers had been counseled regarding their participation in HAMP; 6,165 of those borrowers were initially determined to be potentially eligible for loan modifications under the program. As of June 30, 2011, 1,570 borrowers who did not elect to participate in the program had been sent termination letters and 1,282 borrowers had been denied due to ineligibility. At June 30, 2011, there were 2,629 permanent loan modifications and 152 active trial modifications.

## Other Real Estate Owned

All of the OREO properties owned by the Company are covered assets. The following table presents the changes in OREO for the quarters and six months ended June 30, 2011 and 2010 (dollars in thousands):

|  | Three Months Ended June 30,2011 |  |  |  | Six Months Ended June 30, 2011 2010 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Balance, beginning of period | \$ | 182,482 | \$ | 149,788 | \$ | 206,680 | \$ | 120,110 |
| Transfers from loan portfolio |  | 93,862 |  | 96,894 |  | 205,544 |  | 164,463 |
| (Decrease) increase from resolution of covered loans |  | $(11,025)$ |  | 3,393 |  | $(17,617)$ |  | 9,270 |
| Sales |  | $(115,409)$ |  | $(81,790)$ |  | $(235,098)$ |  | $(124,720)$ |
| Impairment |  | $(8,187)$ |  | $(5,063)$ |  | $(17,786)$ |  | $(5,901)$ |
| Balance, end of period | \$ | 141,723 | \$ | 163,222 | \$ | 141,723 | \$ | 163,222 |

## Analysis of the Allowance for Loan Losses

The allowance for loan losses relates to (i) loans originated or purchased since the Acquisition, (ii) estimated additional losses arising on non-ACI loans subsequent to the Acquisition, and (iii) additional impairment recognized as a result of decreases in expected cash flows on ACI loans due to further credit deterioration. The impact of any additional provision for losses on covered loans is significantly mitigated by an increase in the FDIC indemnification asset.

# Edgar Filing: BankUnited, Inc. - Form 10-Q 

Table of Contents

## Non-Covered and non-ACI Loans

Based on an analysis of historical performance of the non-ACI residential mortgage and home equity portfolio, OREO and short sale losses and recent trending data, we have concluded that changes in LTV ratios and FICO scores are the leading indicators of performance for this portfolio. The non-ACI residential mortgage portfolio has therefore been divided into homogenous groups based on LTV and FICO score for purposes of calculating the allowance for loan losses. Calculated frequency of roll to loss and severity percentages are applied to the dollar value of loans in each group to calculate an overall loss allowance. FICO scores are refreshed quarterly and LTV ratios are updated using the Case-Shiller quarterly MSA Home Price Index to adjust the original appraised value of the underlying collateral. Frequency is calculated for each pool using a four month roll to loss percentage, based on the assumption that if an event has occurred with a borrower that will ultimately result in a loss, this will manifest itself as a loan in default and in process of foreclosure within four months. Loss severity given default is estimated based on internal data about OREO sales and short sales from the portfolio.

Due to the lack of similarity between the risk characteristics of non-covered loans and covered loans in the residential and home equity loan portfolios, management does not believe it is appropriate to use the historical performance of the covered residential mortgage portfolio as a basis for calculating the allowance for loan losses applicable to non-covered loans. The portfolio of loans originated and purchased since the Acquisition is not seasoned and has not yet developed an observable loss trend. Therefore, the allowance for loan losses for non-covered residential loans is based primarily on management s assessment of the risk of default and on the OTS Thrift Industry Charge-Off Rates by Asset Type, annualized Net Charge-Off Rates Twelve Quarter Average for the southeast region (the OTS Charge-Off Rates ). We believe use of the twelve quarter average to be appropriate for this portfolio since it takes into account periods of both economic growth and serious economic contraction.

The allowance for non-covered and non-ACI commercial loans is based primarily on the Bank s internal credit risk rating system, the OTS Charge-Off Rates, and management $s$ assessment of portfolio risk characteristics. The allowance is comprised of specific reserves for significant and classified loans that are individually evaluated and determined to be impaired as well as general reserves for individually evaluated loans determined not to be impaired and smaller balance and non-classified loans. For all commercial and commercial real estate exposures on non-accrual status or graded substandard or doubtful with committed credit facilities greater than or equal to $\$ 500,000$, a quarterly net realizable value analysis is prepared by the credit, workout and recovery and loan review departments. This analysis forms the basis for specific reserves. Since the originated portfolio is not yet seasoned enough to exhibit a loss trend and the non-ACI portfolio has limited delinquency statistics, we currently use the OTS Charge-Off Rates and management s assessment of risk characteristics by portfolio segment in determining the appropriate general reserve percentages. We believe that loans rated special mention or substandard that are not determined to be individually impaired exhibit characteristics indicative of a heightened level of credit risk. Management may therefore augment general reserve percentages for loans in these categories.

Since the non-covered portfolio is not yet seasoned enough to exhibit a loss trend, the allowance for non-covered consumer loans is based primarily on the OTS Charge-Off Rates and management s assessment of portfolio risk characteristics.

In addition to the quantitative calculations described above, a dollar value adjustment is made to the allowance for relevant qualitative factors when there is a material observable trend in those factors not already taken into account in the quantitative calculations. Qualitative factors that may result in an adjustment to the allowance include: levels of and trends in delinquencies and impaired loans; levels of and trends in recoveries of prior charge-offs; trends in volume, type and terms of loans; effects of changes in lending policies and procedures; experience, ability and depth of lending management, loan review and workout and recovery staff; credit concentrations; national, regional and local economic trends; housing and banking industry conditions and trends; emerging trends for particular loan types; and strategic initiatives of the Company that may impact loan performance.

For non-ACI loans, the allowance is initially calculated based on unpaid principal balance, or UPB. The total of UPB, less the calculated allowance, is then compared to the carrying amount of the loans. If the calculated balance net of the allowance is less than the carrying amount, an additional allowance is established. Any such increase in the allowance for non-ACI loans will result in a corresponding increase in the FDIC indemnification asset. For the three months and six months ended June 30, 2011, we recorded provisions for non-ACI loans of

Table of Contents
$\$ 0.1$ million and $\$ 6.3$ million, respectively, and for the three months and six months ended June 30, 2010, we recorded provisions for non-ACI loans of $\$ 8.7$ million and $\$ 11.7$ million, respectively. The majority of the provision for non-ACI loans recorded during the six months ended June 30, 2011 related to one credit relationship.

## ACI Loans

For ACI loans, a valuation allowance is established when periodic evaluations of expected cash flows reflect a decrease from the level of cash flows that were estimated to be collected at Acquisition plus any additional expected cash flows arising from revisions in those estimates. We perform a quarterly analysis of expected cash flows for ACI loans.

The analysis of expected cash flows for residential ACI pools incorporates updated pool level expected prepayment rates, default rates, and delinquency levels, and loan level loss severity given default assumptions. Prepayment, delinquency and default curves used for this purpose are derived from roll rates generated from the historical performance of the ACI residential loan portfolio observed over the immediately preceding four quarters. Given the static nature of the pools and unique characteristics of the loans, we believe that regularly updated historical information from the Company s own portfolio is the best available indicator of future performance. Estimates of default probability and severity of loss given default also incorporate updated LTV ratios. Historic and projected values for the Case-Shiller Home Price Index for the relevant MSA are utilized at the individual loan level to project current and future property values. Costs and fees represent an additional component of loss on default, and are projected using the Making Home Affordable cost factors provided by the Federal government.

The primary assumptions underlying estimates of expected cash flows for commercial and other loans are default probability and severity of loss given default. Updated assumptions for large balance and delinquent loans in the commercial and commercial real estate ACI portfolios are based on net realizable value analyses prepared at the individual loan level by the Company s workout and recovery department. Updated assumptions for smaller balance commercial loans are based on a combination of the Company s own historical delinquency data and industry level delinquency data. Delinquency data is used as a proxy for defaults as the Company s experience has been that few of these loans return to performing status after being delinquent greater than 60 days. An additional multiplier is also applied in developing assumptions for loans rated special mention, substandard, or doubtful based on the Company s historical loss experience with classified loans.

We recorded recoveries of the provision for loan losses related to ACI loans of $\$(6.6)$ million and $\$(2.7)$ million for the three months and six months ended June 30,2011 and $\$ 8.0$ million and $\$ 12.7$ million for the three months and six months ended June 30, 2010, respectively.

The following table provides an analysis of the allowance for loan losses, provision for loan losses and net charge-offs for period from December 31, 2010 through June 30, 2011 (in thousands):

## Table of Contents

The following table shows the distribution of the allowance for loan losses, broken out between covered and non-covered loans, as of June 30 , 2011 and December 31, 2010 (dollars in thousands):

(1)

Represents percentage of loans receivable in each category to total loans receivable.

The most significant components of the change in the allowance for loan losses at June 30, 2011 as compared to December 31, 2010, include:

- A recovery of the provision for losses related to ACI home equity lines of credit of $\$ 14.8$ million resulting from an improvement in the performance of and expected cash flows from this portfolio;
- A $\$ 12.4$ million provision related to non-residential real estate ACI loans, also resulting from the re-evaluation of expected cash flows from the covered ACI loans;
- A $\$ 5.2$ million increase in specific reserves related to one commercial relationship in the covered non-ACI portfolio;
- A provision of $\$ 5.0$ million for non-covered loans, the majority of which related to the non-covered commercial portfolio and corresponded to growth in this portfolio segment.

## Funding Sources

Deposits are our primary funding source, supplemented by FHLB advances. We continue to work towards optimizing our deposit mix and lowering our cost of deposits by reducing rate sensitive time deposits. At June 30, 2011 approximately $36.1 \%$ of total deposits were concentrated in time deposits, with consumer core deposits accounting for $46.6 \%$ of total deposits and commercial core deposits accounting for $17.3 \%$ of total deposits. At December 31, 2010, time deposits accounted for $44.5 \%$ of total deposits while consumer core deposits represented $43.0 \%$ of the total and commercial core deposits represented $12.5 \%$ of total deposits. We anticipate that commercial core deposits will drive core deposit growth and comprise an increasing percentage of our deposit base in the future.

The Bank s liquidity needs are primarily met by its cash position, growth in core deposits, cash flow from its amortizing investment and loan portfolios, and reimbursements under the Loss Sharing Agreements. If necessary, the Bank currently has the ability to raise additional liquidity through collateralized borrowings, FHLB advances or the sale of available for sale investment securities. We regularly monitor several measures of liquidity, including liquid assets, defined as cash and cash equivalents, and pledgeable securities, to total assets.

## Deposits

The following table presents information about our deposits for the three months and six months ended June 30, 2011 and 2010 (dollars in thousands):

| Total | $\$$ | $1,016,850$ |

## Borrowed Funds

The following table sets forth information regarding our short-term borrowings, consisting of securities sold under agreements to repurchase, as of and for the quarters and six months ended June 30, 2011 and 2010 (dollars in thousands):

|  | Three Months Ended June 30,2011 |  |  |  | Six Months Ended June 30, 20112010 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Maximum outstanding at any month-end | \$ | 2,165 | \$ | 17,459 | \$ | 2,165 | \$ | 17,459 |
| Balance outstanding at end of period |  | 2,165 |  | 1,606 |  | 2,165 |  | 1,606 |
| Average outstanding during the period |  | 3,785 |  | 9,955 |  | 2,045 |  | 12,512 |
| Average interest rate during the period |  | 0.42\% |  | 0.40\% |  | 0.49\% |  | 0.77\% |
| Average interest rate at end of period |  | 0.50\% |  | 0.04\% |  | 0.50\% |  | 0.04\% |

The Company also utilizes FHLB advances to finance its operations. The contractual balance of FHLB advances outstanding at June 30, 2011 totaled $\$ 2.2$ billion, with $\$ 1.1$ billion, $\$ 565.0$ million, $\$ 505.0$ million and $\$ 0.4$ million maturing in 2012, 2013, 2014 and 2015, respectively.

## Liquidity and Capital Resources

Stockholders equity has been impacted primarily by proceeds from the IPO, the retention of earnings, the payment of dividends and to a lesser extent, changes in the unrealized gains, net of taxes, on investment securities available for sale, changes in unrealized losses, net of taxes, on
cash flow hedges. Stockholders equity increased $\$ 223.2$ million, or $17.8 \%$, to $\$ 1.5$ billion at June 30,2011 from $\$ 1.3$ billion at December 31, 2010, due primarily to proceeds from the IPO, the retention of earnings exclusive of $\$ 116.8$ million in stock based compensation that resulted in a credit to paid-in capital and therefore did not negatively impact the Company s capital position, and the reclassification of $\$ 45.0$ million in equity based instruments previously classified as liabilities, offset by $\$ 28.4$ million in dividends.

Edgar Filing: BankUnited, Inc. - Form 10-Q

Table of Contents

The OTS and FDIC have adopted regulations setting forth a five-tier system for measuring the capital adequacy of the financial institutions they supervise. At June 30, 2011 and December 31, 2010, BankUnited had capital levels that exceeded the well-capitalized guidelines. In addition, a condition of approval of BankUnited s application for Federal Deposit Insurance requires BankUnited to maintain a tier 1 leverage ratio at no less than eight percent throughout the first three years of operation. To date, BankUnited has exceeded that requirement. The Bank s capital ratios as of June 30, 2011 are presented in the table below (dollars in thousands):

|  | Actual |  |  | June 30, 2011 Required to be Considered Well Capitalized |  |  | Required to be Considered Adequately Capitalized |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Ratio |  | Amount | Ratio |  | ount | Ratio |  | ount |
| Tier 1 leverage ratio | 10.79\% | \$ | 1,138,778 | 8.00\% | \$ | 844,521 | 8.00\% | \$ | 844,521 |
| Tier 1 risk-based capital ratio | 40.62\% | \$ | 1,138,778 | 6.00\% | \$ | 168,222 | 4.00\% | \$ | 112,148 |
| Total risk based capital ratio | 41.50\% | \$ | 1,163,523 | 10.00\% | \$ | 280,370 | 8.00\% | \$ | 224,296 |

The Company s tangible common equity to tangible assets ratio was $13.06 \%$ at June 30, 2011 and $10.97 \%$ at December 31, 2010 (see the section entitled Non-GAAP Financial Measure below).

Liquidity involves the Company s ability to raise funds to support asset growth or reduce assets to meet deposit withdrawals and other borrowing needs, to maintain reserve requirements and to otherwise operate the Company on an ongoing basis. The Company s liquidity needs are primarily met by growth in core deposits, its cash position and cash flow from its amortizing investment and loan portfolios and reimbursements under the Loss Sharing Agreements. If necessary, the Bank has the ability to raise liquidity through collateralized borrowings, FHLB advances, or the sale of available for sale securities. The Company s ALCO policy has established several measures of liquidity, including liquid assets (defined as cash and cash equivalents, and pledgeable securities) to total assets. The Company s liquidity is considered acceptable if liquid assets divided by total assets exceeds $2.5 \%$. At June 30, 2011, the Company s liquid assets divided by total assets was $12.91 \%$.

As a holding company, BankUnited, Inc. is a corporation separate and apart from our subsidiary BankUnited, and therefore, provides for its own liquidity. BankUnited, Inc. s main sources of funding include management fees and dividends paid by its subsidiaries, and access to capital markets. There are regulatory limitations that affect the ability of BankUnited to pay dividends to BankUnited, Inc. Management believes that such limitations will not impact our ability to meet our on-going short-term cash obligations.

We expect that our cash and liquidity requirements will continue to be generated by operations, including reimbursements under the Loss Sharing Agreements, and we intend to satisfy our capital requirements over the next 12 months through these sources of liquidity.

## Interest Rate Sensitivity

The principal component of the Company $s$ risk of loss arising from adverse changes in the fair value of financial instruments, or market risk, is interest rate risk, including the risk that assets and liabilities with similar repricing characteristics may not reprice at the same time or to the same degree. The primary objective of the Company $s$ asset/liability management activities is to maximize net interest income, while maintaining acceptable levels of interest rate risk. The Company s Asset/Liability Committee (ALCO) is responsible for establishing policies to limit
exposure to interest rate risk, and to ensure procedures are established to monitor compliance with these policies. The guidelines established by ALCO are reviewed and approved by the Company s Board of Directors.

Management believes that the simulation of net interest income in different interest rate environments provides the most meaningful measure of the Company s interest rate risk. Income simulation analysis is designed to capture not only the potential of all assets and liabilities to mature or reprice, but also the probability that they will

## Edgar Filing: BankUnited, Inc. - Form 10-Q

Table of Contents
do so. Income simulation also attends to the relative interest rate sensitivities of these items, and projects their behavior over an extended period of time. Finally, income simulation permits management to assess the probable effects on the balance sheet not only of changes in interest rates, but also of proposed strategies for responding to them.

The Company s income simulation model analyzes interest rate sensitivity by projecting net interest income over the next twenty four months in a most likely rate scenario based on forward interest rate curves versus net interest income in alternative rate scenarios. Management continually reviews and refines its interest rate risk management process in response to the changing economic climate. Currently, the Company s model projects a plus 100 , plus 200 , and plus 300 basis point change (with rates increasing 25 basis points per month until the applicable limit is reached) as well as a modified flat scenario incorporating a flattened yield curve. We did not simulate a decrease in interest rates at June 30, 2011 due to the extremely low rate environment.

The Company s ALCO policy has established that interest income sensitivity will be considered acceptable if net interest income in the plus 200 basis point scenario is within $10 \%$ of forecasted net interest income in the most likely rate scenario over the next twelve months and within $12 \%$ in the second year. At June 30, 2011, the impact on projected net interest income in a plus 200 basis point scenario is $2.41 \%$ in the first twelve months and $9.46 \%$ in the second year.

These forecasts are within an acceptable level of interest rate risk per the policies established by ALCO. In the event the model indicates an unacceptable level of risk, the Company could undertake a number of actions that would reduce this risk, including the sale of a portion of its available for sale investment portfolio or the use of risk management strategies such as interest rate swaps and caps.

Many assumptions were used by the Company to calculate the impact of changes in interest rates, including the change in rates. Actual results may not be similar to the Company s projections due to several factors including the timing and frequency of rate changes, market conditions and the shape of the yield curve. Actual results may also differ due to the Company sactions, if any, in response to the changing rates.

## Off-Balance Sheet Arrangements

## Commitments

We routinely enter into commitments to extend credit to our customers, including commitments to fund loans or lines of credit and commercial and standby letters of credit. The credit risk associated with these commitments is essentially the same as that involved in extending loans to customers and they are subject to our normal credit policies and approval processes. While these commitments represent contractual cash requirements, a significant portion of commitments to extend credit may expire without being drawn upon. The following table details our outstanding commitments to extend credit as of June 30, 2011 (in thousands):

|  |  | Commitments Not Covered |  | Total |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Commitments to fund loans | \$ | \$ | 163,499 | \$ | 163,499 |

| Unfunded commitments under lines of credit | 156,844 |  | 309,476 | 466,320 |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |
| Commercial and standby letters of credit |  |  | 10,063 | 10,063 |  |  |
| Total | $\$$ | 156,844 | $\$$ | 483,038 | $\$$ | 639,882 |

## Derivative Financial Instruments

Interest rate swaps are one of the tools we use to manage interest rate risk. These derivative instruments are used to mitigate exposure to changes in interest rates on FHLB advances and time deposits. These interest rate swaps are designated as cash flow hedging instruments. The fair value of these instruments is included in other liabilities in our consolidated balance sheets and changes in fair value are reported in accumulated other comprehensive income. At June 30, 2011, outstanding interest rate swaps designated as cash flow hedges had an

Table of Contents
aggregate notional amount of $\$ 630.0$ million. The aggregate fair value of interest rate swaps designated as cash flow hedges included in other liabilities at June 30, 2011 was $\$ 49.2$ million.

## Critical Accounting Policies and Estimates

The Company has made no significant changes in its critical accounting policies and significant estimates from those disclosed in its 2010 Annual Report on Form 10-K.

## Non-GAAP Financial Measure

Tangible common equity to tangible assets is a non-GAAP financial measure. For purposes of computing tangible common equity to tangible assets, tangible common equity is calculated as common stockholder s equity less goodwill and other intangible assets, net, and tangible assets is calculated as total assets less goodwill and other intangible assets, net. Tangible common equity to tangible assets should not be viewed as a substitute for total stockholders equity to total assets. The most directly comparable GAAP financial measure is total stockholders equity to total assets. See the reconciliation below (in thousands):

|  | $\begin{gathered} \text { June 30, } \\ 2011 \end{gathered}$ |  | $\begin{gathered} \text { December 31, } \\ 2010 \end{gathered}$ |  |
| :---: | :---: | :---: | :---: | :---: |
| Total stockholders equity | \$ | 1,476,673 | \$ | 1,253,508 |
| Less: goodwill and other intangible assets, net |  | 68,835 |  | 69,011 |
| Tangible common stockholders equity | \$ | 1,407,838 | \$ | 1,184,497 |
| Total assets | \$ | 10,846,659 | \$ | 10,869,560 |
| Less: goodwill and other intangible assets, net |  | 68,835 |  | 69,011 |
| Tangible Assets | \$ | 10,777,824 | \$ | 10,800,549 |
| Equity to assets |  | 13.61\% |  | 11.53\% |
| Tangible common equity to tangible assets |  | 13.06\% |  | 10.97\% |

Management of the Company believes this non-GAAP financial measure provides an additional meaningful method of evaluating certain aspects of the Company s capital strength from period to period on a basis that may not be otherwise apparent under GAAP. Management also believes that this non-GAAP financial measure, which complements the capital ratios defined by regulators, is useful to investors who are interested in the Company s equity to assets ratio exclusive of the effect of changes in intangible assets on equity and total assets.

## Item 3. Quantitative and Qualitative Disclosures About Market Risk

See the section entitled Interest Rate Sensitivity included in Item 2 Management s Discussion and Analysis of Financial Condition and Results of Operations .

## Item 4. Controls and Procedures

An evaluation of the effectiveness of the Company s disclosure controls and procedures as of June 30, 2011 was carried out under the supervision, and with the participation of, the Chief Executive Officer ( CEO ) and Chief Financial Officer ( CFO ). Based on that evaluation, the CEO and CFO have concluded that the Company s disclosure controls and procedures are effective in alerting them in a timely manner to material information required to be disclosed by the Company in reports that it files or submits under the Securities Exchange Act of 1934 (the Exchange Act ).

Disclosure controls and procedures are designed to ensure that information required to be disclosed in reports filed by the Company under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC s rules and forms. Disclosure controls are also designed with the objective of ensuring that such information is accumulated and communicated to the Company s management, including the CEO and the CFO, as appropriate, to allow timely decisions regarding required disclosures. Disclosure controls include review of internal controls that are designed to provide reasonable assurance that transactions are properly authorized, assets are safeguarded against unauthorized or improper use and transactions are properly recorded and reported. There was no significant change in the Company s internal controls over financial reporting during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the internal control over financial reporting.

Any control system, no matter how well conceived and operated, can provide only reasonable assurance that its objectives are achieved. The design of a control system inherently has limitations, including the controls cost relative to their benefits. Additionally, controls can be circumvented. No cost-effective control system can provide absolute assurance that all control issues and instances of fraud, if any, will be detected.

## PART II. OTHER INFORMATION

## Item 1. Legal Proceedings

From time to time we are a party to various litigation matters incidental to the conduct of our business. We are not presently party to any legal proceedings the resolution of which we believe would have a material adverse effect on our business, operating results, financial condition or cash flow.

## Item 1A. Risk Factors

There have been no material changes in the risk factors disclosed by the Company in its 2010 Annual Report on Form 10-K filed with the Securities and Exchange Commission on March 31, 2011.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Not applicable

Item 3. Defaults Upon Senior Securities
