UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, DC 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the Fiscal Year Ended December 31, 2011

Commission File Number 1-5277

BEMIS COMPANY, INC.

(Exact name of Registrant as specified in its charter)

Missouri
(State or other jurisdiction of
incorporation or organization)

43-0178130
(I.R.S. Employer
Identification No.)

One Neenah Center, 4th Floor, P.O. Box 669, Neenah, Wisconsin 54957-0669

(Address of principal executive offices)

Edgar Filing: BEMIS CO INC - Form 10-K

Registrant's telephone number, including area code: **(920) 727-4100**

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Each Exchange on Which Registered
Common Stock, par value \$.10 per share	New York Stock Exchange

Securities registered pursuant to section 12(g) of the Act: **None**

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. YES NO

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. YES NO

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§232.405) is not contained herein, and will not be contained, to the best of the Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer <input checked="" type="checkbox"/>	Accelerated Filer <input type="checkbox"/>
Non-Accelerated Filer <input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller Reporting Company <input type="checkbox"/>

Edgar Filing: BEMIS CO INC - Form 10-K

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Act). YES NO

The aggregate market value of the voting and non-voting common equity held by nonaffiliates of the Registrant on June 30, 2011, based on a closing price of \$33.78 per share as reported on the New York Stock Exchange, was \$3,516,333,187.

As of February 21, 2012, the Registrant had 103,090,342 shares of Common Stock issued and outstanding.

Table of Contents

PART I ITEMS 1, 1A, 1B, 2, and 3

ITEM 1 BUSINESS

Bemis Company, Inc., a Missouri corporation (the Registrant or Company), continues a business formed in 1858. The Company was incorporated in 1885 as Bemis Bro. Bag Company with the name changed to Bemis Company, Inc. in 1965. The Company is a principal manufacturer of flexible packaging products and pressure sensitive materials, selling to customers throughout North America, Latin America, Europe, and Asia Pacific. In 2011, approximately 89 percent of the Company's sales were derived from the Flexible Packaging segment and approximately 11 percent were derived from the Pressure Sensitive Materials segment.

The majority of the Company's products are sold to customers in the food industry. Other customers include companies in the following types of businesses: chemical, agribusiness, medical, pharmaceutical, personal care, electronics, automotive, construction, graphic industries, and other consumer goods. Further information about the Company's operations in its business segments and geographic areas is available in Note 21 to the Consolidated Financial Statements included in Item 8 of this Annual Report on Form 10-K.

As of December 31, 2011, the Company had over 20,000 employees, about 13,900 of whom were classified as production employees. Many of the North American production employees are covered by collective bargaining contracts involving five different international unions, two independent unions, and 26 individual contracts with terms ranging from one to five years. During 2011, six contracts covering 1,102 employees at six different locations in the United States were successfully negotiated. Ten domestic labor agreements covering 1,150 employees are scheduled to expire in 2012. Many of the production employees and some of the salaried workforce who are located outside the United States are covered by collective bargaining contracts involving 23 different unions with terms ranging from one to two years.

Working capital fluctuates throughout the year in relation to the level of customer volume and other marketplace conditions. Inventory levels reflect a reasonable balance between raw material pricing and availability, and the Company's commitment to promptly fill customer orders. Manufacturing backlogs are not a significant factor in the industries in which the Company operates. The business of each of the segments is not seasonal to any significant extent.

The Company is the owner or licensee of a number of United States and foreign patents and patent applications that relate to certain of its products, manufacturing processes, and equipment. The Company also has a number of trademarks and trademark registrations in the United States and in foreign countries. The Company's patents, licenses, and trademarks collectively provide a competitive advantage. However, the loss of any single patent or license alone would not have a material adverse effect on the Company's results as a whole or those of either of its segments.

The Company's business activities are organized around its two business segments, Flexible Packaging and Pressure Sensitive Materials. Both internal and external reporting conform to this organizational structure. A summary of the Company's business activities reported by its two business segments follows.

Flexible Packaging Segment

The flexible packaging segment manufactures a broad range of packaging for food, consumer goods, and industrial applications. Multilayer flexible polymer film structures and laminates are sold for food, medical, and personal care products as well as non-food applications utilizing vacuum or modified atmosphere packaging. Additional products include blown and cast stretch film products, carton sealing tapes and application equipment, custom thermoformed and injection molded plastic packaging, multiwall paper bags, printed paper roll stock, and bag closing materials. Markets for our products include processed and fresh meat, liquids, frozen foods, cereals, snacks, cheese, coffee, condiments, candy, pet food, bakery, seed, lawn and garden, tissue, fresh produce, personal care and hygiene, disposable diapers, printed shrink overwrap for the food and beverage industry, agribusiness, pharmaceutical, minerals, and medical device packaging.

Pressure Sensitive Materials Segment

The pressure sensitive materials segment manufactures pressure sensitive adhesive coated paper and film substrates sold into label, graphic, and technical markets. Products for label markets include narrow-web rolls of pressure sensitive paper, film, and metalized film printing stocks used in high-speed printing and die-cutting. Products for graphic markets include pressure sensitive films used for decorative signage through computer-aided plotters, digital and screen printers, and photographic overlamine and mounting materials including optically clear films with built-in UV inhibitors. Products for technical markets include micro-thin film adhesives used in delicate electronic parts assembly and pressure sensitive applications utilizing foam and tape based stocks to perform fastening and mounting functions.

Marketing, Distribution, and Competition

While the Company's sales are made through a variety of distribution methods, more than 90 percent of each segment's sales are made by the Company's direct sales force. Sales offices and plants are located throughout North America, Latin America, Europe, and Asia Pacific to provide prompt and economical service to more than 30,000 customers. The Company's technically trained sales force is supported by product development engineers, design technicians, and a customer service organization.

No single customer accounts for ten percent or more of the Company's total sales. Nevertheless, business arrangements with large customers require a large portion of the manufacturing capacity at a few individual manufacturing sites. Any change in the business arrangement would typically occur over a period of time, which would allow for an orderly transition for both the Company's manufacturing site and the customer.

The major markets in which the Company sells its products are highly competitive. Areas of competition include service, innovation, quality, and price. This competition is significant as to both the size and the number of competing firms. Major competitors

Table of Contents

in the Flexible Packaging segment include Amcor Limited, Berry Plastics Corporation, Bryce Corporation, Exopack Company, Hood Packaging Corporation, Printpack, Inc., Sealed Air Corporation, Sonoco Products Company, Wihuri OY, and Wintpak Ltd. In the Pressure Sensitive Materials segment major competitors include 3M, Acucote, Inc., Avery Dennison Corporation, FLEXcon Corporation, Green Bay Packaging Inc., Ricoh Company, Ltd., Ritrama Inc., Spinnaker Industries, Inc., Technicote Inc., UPM-Kymmene Corporation, and Wausau Coated Products Inc.

The Company considers itself to be a significant factor in the market niches it serves; however, due to the diversity of the Flexible Packaging and Pressure Sensitive Materials segments, the Company's precise competitive position in these markets is not reasonably determinable. Advertising is limited primarily to business and trade publications emphasizing the Company's product features and related technical capabilities.

Raw Materials

Polymer resins and films, paper, inks, adhesives, aluminum, and chemicals constitute the basic major raw materials. These are purchased from a variety of global industry sources and the Company is not dependent on any one supplier for its raw materials. While temporary industry-wide shortages of raw materials may occur, the Company expects to continue to successfully manage raw material supplies without significant supply interruptions. Currently, raw materials are readily available.

Research and Development Expense

Research and development expenditures were as follows:

(in thousands)	2011	2010	2009
Flexible Packaging	\$ 33,886	\$ 28,271	\$ 17,301
Pressure Sensitive Materials	4,865	6,067	7,041
Total	\$ 38,751	\$ 34,338	\$ 24,342

Environmental Control

Compliance with federal, state, and local laws, rules, and regulations which have been enacted or adopted regulating discharges of materials into the environment or otherwise relating to the protection of the environment, is not expected to have a material effect on the capital expenditures, earnings, or competitive position of the Company and its subsidiaries.

Available Information

The Company is a large accelerated filer (as defined in Exchange Act Rule 12b-2) and is also an electronic filer. Electronically filed reports (Forms 4, 8-K, 10-K, 10-Q, S-3, S-8, etc.) can be accessed at the Securities and Exchange Commission (SEC) website (<http://www.sec.gov>) or by visiting the SEC's Public Reference Room located at 100 F St., N.E., Washington, DC 20549 (call 1-202-551-8090 or 1-800-732-0330 for hours of operation). Electronically filed and furnished reports can also be accessed through the Company's own website (<http://www.bemis.com>), under Investor Relations/SEC Filings or by writing for free information, including SEC filings, to Investor Relations, Bemis Company, Inc., One Neenah Center, 4th Floor, P.O. Box 669, Neenah, Wisconsin 54957-0669, or calling (920) 727-4100. In addition, the Company's Board Committee charters, Principles of Corporate Governance, and the Company's Code of Conduct can be electronically accessed at the Company's website under Company Overview or, free of charge, by writing directly to the Company, Attention: Corporate Secretary. The Company

Edgar Filing: BEMIS CO INC - Form 10-K

intends to post any amendment to, or waiver from, a provision of the Code of Conduct that applies to our principal executive officer, principal financial officer, principal accounting officer, controller and other persons performing similar functions on the Investor Relations section of its website (www.bemis.com) promptly following the date of such amendment or waiver.

Table of Contents

Explanation of Terms Describing the Company's Products

Barrier laminate A multilayer plastic film made by laminating two or more films together with the use of adhesive or a molten plastic to achieve a barrier for the planned package contents.

Barrier products Products that provide protection and extend the shelf life of the contents of the package. These products provide this protection by combining different types of plastics and additives into a multilayered plastic package. These products protect the contents from such things as oxygen, moisture, light, odor, or other environmental factors.

Blown film A plastic film that is extruded through an annular die in the form of a tube and then expanded by an internal column of air in the manufacturing process.

Bundling films A film manufactured by a modified blown film process that is used for wrapping and holding multipacks of products such as canned goods and bottles of liquids, replacing corrugate and fiberboard.

Cast film A plastic film that is extruded through a straight slot die as a flat sheet during its manufacturing process.

Coextruded film A blown or cast film extruded with multiple layers extruded simultaneously.

Controlled atmosphere packaging A package which limits the flow of elements, such as oxygen, carbon dioxide or moisture, into or out of the package.

Crystallized Polyester (PET) CPET. The process of using a combination of formulated resin blends and thermoforming conditions to increase the crystallinity of PET trays, which increases the heat distortion temperature of the trays to 450 degrees Fahrenheit. This allows foods packaged in these trays to go directly from freezer to oven for heating of the food.

EZ Open Packaging Any one of a series of technologies employed to allow the consumer easy access to a packaged product. Peelable closures, laser or other physical scoring/abrasion of a packaging film may be used. EZ Open can be combined with reclose features such as plastic zippers or the inclusion of pressure sensitive materials into the packaging film.

Flexible polymer film A non-rigid plastic film. Generally the shape of the package changes as the product contained in it is removed.

Flexographic printing The most common flexible packaging printing process in North America using a raised rubber or alternative material image mounted on a printing cylinder.

Graphic products Pressure sensitive materials used for decorative signage, promotional items and displays, and advertisements.

In-line overlamination The ability to add a protective coating to a printed material during the printing process.

IWS Individually Wrapped Slices. A term used to describe individually wrapped slices of process cheese foods.

IWS Inner Wrap The plastic film used to wrap each slice of process cheese. Typically, these films are cast coextrusions of polypropylene resins.

Label products Pressure sensitive materials made up and sold in roll form.

Labelstock Pressure sensitive material designed for the label markets.

Laminate/Barrier laminate A multilayer plastic film made by laminating two or more films together with the use of adhesive or a molten plastic to achieve the distribution and use requirements for the planned package contents. Alternately, a barrier layer can also be included as one of the

Edgar Filing: BEMIS CO INC - Form 10-K

films or in the laminating medium to protect the packaged products from such things as moisture, oxygen or other environmental factors.

Liner or Inner Liner Films A multilayer coextruded film that is used as the inner liner for bag-in-box packaging applications for products such as cereal or crackers. The films typically are comprised of high density polyethylenes and may contain barrier resins such as EVOH or nylon.

Modified atmosphere packaging A package in which the normal atmospheric composition of air inside the package has been modified by replacing it with a gas such as nitrogen.

Monolayer film A single layer extruded plastic film.

Multiwall paper bag A package made from two or more layers, at least one of which is paper, which have not been laminated.

Pouches and bags An option that delivers a semi-finished package, instead of rollstock, to a customer for filling product and sealing/closing the package for distribution.

Pressure sensitive material A material coated with adhesive such that upon contact with another material it will stick.

Prime label A pressure sensitive label used as the primary decorative label or secondary label, typically on a consumer product.

Retort A food processing technique in which the food product is placed in a package and then thermally treated (in the range of 250 degrees Fahrenheit) to extend the food product's shelf life under room temperature storage conditions. High oxygen and moisture barrier flexible or rigid packaging materials can be used for the primary package.

Rigid Packaging A form of packaging in which the shape of the package is retained as its contents are removed in use. Bottles, trays and clamshell packaging are examples.

Rollstock The principal form in which flexible packaging material is delivered to a customer. Finished film wound on a core is converted in a process at the end user's plant that forms, fills, and seals the package of product for delivery to customers.

Rotogravure printing A high quality, long run printing process utilizing a metal engraved cylinder.

Sheet products Pressure sensitive materials cut into sheets and sold in sheet form.

Shrink film/ Barrier shrink film A packaging film consisting of polyethylene and/or polypropylene resins extruded via a tubular process. The film is cooled and then reheated and stretched at a temperature near its melting point. The film can be irradiated with an electron beam in a second process to cross link the molecules for added heat resistance and strength. The film is made to shrink around a product to be packaged by an application of a thermal treatment. Alternately, a layer of an oxygen barrier material can be included to manufacture a barrier shrink film product.

Stretch film A plastic film with a significant ability to stretch which is used to wrap pallets of goods in the shipping process.

Technical products Technically engineered pressure sensitive materials used primarily for fastening and mounting functions, for example in cell phones, appliances, and electronic devices.

Thermoformed plastic packaging A package formed by applying heat to a film to shape it into a tray or cavity and then sealing a flat film on top of the package after it has been filled.

UV inhibitors Chemical agents included in a film to protect products against ultraviolet rays.

Variable information label A pressure sensitive label that is typically printed with a bar code or other type of variable information.

Table of Contents

ITEM 1A RISK FACTORS

The following factors, as well as factors described elsewhere in this Form 10-K, or in other filings by the Company with the Securities and Exchange Commission, could adversely affect the Company's consolidated financial position, results of operations or cash flows. Other factors not presently known to us or that we presently believe are not material could also affect our business operations and financial results.

Raw materials. Raw material cost increases or shortages could adversely affect our results of operations.

As a manufacturer, our sales and profitability are dependent on the availability and cost of raw materials, which are subject to price fluctuations. Inflationary and other increases in the costs of raw materials have occurred in the past and are expected to recur, and our performance depends in part on our ability to reflect changes in costs in selling prices for our products. In the past, we have been generally successful in managing increased raw material costs and increasing selling prices when necessary. Past performance may or may not be replicable in the future. Natural disasters such as hurricanes, in addition to terrorist activity and government regulation of environmental emissions, may negatively impact the production or delivery capacity of our raw material suppliers in the chemical and paper industries. This could result in increased raw material costs or supply shortages, which may have a negative impact on our profitability if we are unable to pass along the increased costs in our selling prices or, in the case of a shortage, secure raw materials from alternative sources.

Acquisitions. We may not be able to successfully integrate businesses that we acquire.

We have made numerous acquisitions in the past and are actively seeking new acquisitions that we believe will provide meaningful opportunities to grow our business and improve profitability. Acquired businesses may not achieve the levels of revenue, profit, productivity, or otherwise perform as we expect. Acquisitions involve special risks, including, without limitation, the potential assumption of unanticipated liabilities and contingencies as well as difficulties in integrating acquired businesses. While we believe that our acquisitions will improve our competitiveness and profitability, we can give no assurance that acquisitions will be successful or accretive to earnings.

Goodwill and other intangible assets. A significant write down of goodwill and/or other intangible assets would have a material adverse effect on our reported results of operations and net worth.

We review our goodwill balance for impairment at least once a year using the business valuation methods allowed in accordance with current accounting standards. These methods include the use of a weighted-average cost of capital to calculate the present value of the expected future cash flows of our reporting units. Future changes in the cost of capital, expected cash flows, or other factors may cause our goodwill and/or other intangible assets to be impaired, resulting in a non-cash charge against results of operations to write down these assets for the amount of the impairment. In addition, if we make changes in our business strategy or if external conditions adversely affect our business operations, we may be required to record an impairment charge for goodwill or intangibles, which would lead to decreased assets and reduced net operating performance. If a significant write down is required, the charge would have a material adverse effect on our reported results of operations and net worth. We have identified the valuation of intangibles as a critical accounting estimate. See Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Estimates and Judgments Intangible assets and goodwill included in Item 7 of this Annual Report on Form 10-K.

Patents and proprietary technology. Our success is dependent on our ability to develop and successfully introduce new products and to acquire and retain intellectual property rights.

Our ability to develop and successfully market new products and to develop, acquire, and retain necessary intellectual property rights is essential to our continued success, but cannot reasonably be assured.

Facility consolidation activities **Our facility consolidation activities and cost saving initiatives may not achieve the results we anticipate.**

We have undertaken and will continue to undertake facility consolidation activities and cost reduction initiatives to optimize our asset base, improve operating efficiencies and generate cost savings. We cannot be certain that we will be able to complete these initiatives as planned or that the estimated operating efficiencies or cost savings from such activities will be fully realized or maintained over time. In addition, we may not be successful in migrating production from one facility to another.

Funded status of pension plans **Recognition of pension liabilities may cause a significant reduction in stockholders' equity.**

Current accounting standards issued by the Financial Accounting Standards Board (FASB) require balance sheet recognition of the funded status of our defined benefit pension and postretirement benefit plans. If the fair value of our pension plans' assets at a future reporting date decreases or if the discount rate used to calculate the projected benefit obligation (PBO) as of that date decreases, we will be required to record the incremental change in the excess of PBO over the fair value of the assets as a reduction of stockholders' equity. The resulting non-cash after-tax charge would not reduce reported earnings as this amount would represent future expense. Rather, it would be recorded directly as a decrease in the Accumulated Other Comprehensive Income component of stockholders' equity. While we cannot estimate the future funded status of our pension liability with any certainty at this time, we believe that if the market value of assets or the discount rate used to calculate our pension liability materially decreases, the adjustment could significantly reduce our stockholders' equity. A significant reduction in stockholders' equity may impact our compliance with debt covenants or could cause a downgrade in our credit ratings that could also adversely impact our future cost and speed of borrowing and have an adverse affect on our financial condition, results of operations and liquidity. We have identified pension assumptions as critical accounting estimates. See Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Estimates and Judgments Pension costs and Pension assumptions sensitivity analysis included in Item 7 of this Annual Report on Form 10-K.

Multiemployer Pension Plans

We participate in three multiemployer pension plans administered by labor unions representing some of our employees. We make periodic contributions to these plans to allow them to meet their pension benefit obligations to their participants. Our required contributions to these funds are increasing because of a shrinking contribution base as a result of the insolvency or withdrawal of other

Table of Contents

companies that currently contribute to these funds, inability or failure of withdrawing companies to pay their withdrawal liability, lower than expected returns on pension fund assets or other funding deficiencies. In the event that we withdraw from participation in one of these plans, then applicable law could require us to make an additional lump-sum contribution to the plan, and we would have to reflect that as an expense in our consolidated statement of operations and as a liability on our consolidated balance sheet. Our withdrawal liability for any multiemployer plan would depend on the extent of the plan's funding of vested benefits. In the ordinary course of our renegotiation of collective bargaining agreements with labor unions that maintain these plans, we may decide to discontinue participation in a plan, and in that event, we could face a withdrawal liability. All multiemployer plans in which we participate are reported to have significant underfunded liabilities. Such underfunding could increase the size of our potential withdrawal liability.

Information technology. A failure in our information technology infrastructure or applications could negatively affect our business.

We depend on information technology to record and process customer's orders, manufacture and ship products in a timely manner, and maintain the financial accuracy of our business records. We are in the process of implementing a global Enterprise Resource Planning (ERP) system that will redesign and deploy new processes and a common information system across our plants over a period of several years. There can be no certainty that this system will deliver the expected benefits. The failure to achieve our goals may impact our ability to (1) process transactions accurately and efficiently and (2) remain in step with the changing needs of the trade, which could result in the loss of customers. In addition, the failure to either deliver the application on time, or anticipate the necessary readiness and training needs, could lead to business disruption and loss of customers and revenue. Finally, failure or abandonment of the ERP system could result in a write-off of part or all of the costs that have been capitalized on the project.

Our information systems could also be penetrated by outside parties intent on extracting information, corrupting information, or disrupting business processes. Such unauthorized access could disrupt our business and could result in the loss of assets, which could result in the loss of customer confidence and business, and cause us to incur time and expense in remediation efforts.

Credit rating. A downgrade in our credit rating could increase our borrowing costs and negatively affect our financial condition and results of operations.

In addition to using cash provided by operations, we regularly issue commercial paper to meet our short-term liquidity needs. Our credit ratings are important to our ability to issue commercial paper at favorable rates of interest. A downgrade in our credit rating could increase the cost of borrowing by increasing the spread over prevailing market rates that we pay for our commercial paper or the fees associated with our bank credit facility. If for any reason the commercial paper market was not available, we would borrow on our existing credit agreements. If these were no longer available to us, we would be required to seek alternative sources of financing. We would expect to meet our financial liquidity needs by accessing the bank market, which would further increase our borrowing costs.

Interest rates. An increase in interest rates could reduce our reported results of operations.

At December 31, 2011, our variable rate borrowings approximated \$455.0 million (which includes \$400 million fixed rate notes that have been effectively converted to variable rate debt through the use of a fixed to variable rate interest rate swap). Fluctuations in interest rates can increase borrowing costs and have an adverse impact on results of operations. Accordingly, increases in short-term interest rates will directly impact the amount of interest we pay. For each one percent increase in variable interest rates, our annual interest expense would increase by \$4.6 million on the \$455.0 million of variable rate debt outstanding as of December 31, 2011.

Domestic and international economic conditions.

Disruption in the domestic and international equity and financial markets may impact local economies in which we conduct business. We are not able to predict the future impact of other market disruptions on our liquidity and consolidated statements of financial position, results of operations, and cash flows.

Foreign operations. Conditions in foreign countries and changes in foreign currency exchange rates may significantly reduce our reported results of operations.

We have operations in the United States, Canada, Mexico, South America, Europe, and Asia Pacific. In 2011, approximately 33 percent of our sales were generated by entities operating outside of the United States. Fluctuations in currencies can cause transaction and translation losses. In addition, our revenues and net income may be adversely affected by economic conditions, political situations, and changing laws and regulations in foreign countries, as to which we have no control.

Numerous other factors over which we may have limited or no control may affect our performance and profitability.

Other factors that may influence our earnings, financial position, and liquidity include: legal and administrative cases and proceedings (whether civil, such as environmental or product related, or criminal), settlements, judgments, and investigations; developments or assertions by or against us relating to intellectual property rights and intellectual property licenses; adoption of new, or changes in, accounting policies or practices and the application of such policies and practices; changes in business mix; customer and supplier business reorganizations or combinations; increase in cost of debt; ability to retain adequate levels of insurance coverage at acceptable rates; fluctuations in pension and employee benefit costs; loss of significant contract(s); risks and uncertainties relating to investment in development activities and new facilities; timely development and successful market acceptance of new products; pricing of competitive products; disruptions in transportation networks; increased participation in potentially less stable emerging markets; reliability of utility services; impact of computer viruses; general or specific economic conditions and the ability and willingness of purchasers to substitute other products for the products that we manufacture; financial condition and inventory strategies of customers and suppliers; credit risks; changes in customer order patterns; employee work stoppages at plants; increased competition; changes in government regulations and the impact of changes in the world political environment, including the ability to estimate the impact of foreign currency exchange rates on financial results; the impact of epidemiological events on the economy and on our customers and suppliers; and acts of war, terrorism, weather, and other natural disasters.

ITEM 2 PROPERTIES

Properties utilized by the Company at December 31, 2011, were as follows:

Flexible Packaging Segment

This segment has 73 manufacturing plants located in 18 states, the Commonwealth of Puerto Rico, and eleven non-US countries, of which 64 are owned directly by the Company or its subsidiaries and nine are leased from outside parties. Initial building lease terms generally provide for minimum terms of five to 21 years and have one or more renewal options. The initial term of building leases in effect at December 31, 2011, expire between 2012 and 2026.

Pressure Sensitive Materials Segment

This segment has seven manufacturing plants located in three states and two non-US countries, all of which are owned directly by the Company or its subsidiaries.

Corporate and General

The Company considers its plants and other physical properties to be suitable, adequate, and of sufficient productive capacity to meet the requirements of its business. The manufacturing plants operate at varying levels of utilization depending on the type of operation and market conditions. The executive offices of the Company, which are leased, are located in Neenah, Wisconsin.

ITEM 3 LEGAL PROCEEDINGS

The Company is involved in a number of lawsuits incidental to its business, including environmental related litigation and routine litigation arising in the ordinary course of business. Although it is difficult to predict the ultimate outcome of these cases, management believes, except as discussed below, that any ultimate liability would not have a material adverse effect on the Company's consolidated financial condition or results of operations.

Environmental Matters

Edgar Filing: BEMIS CO INC - Form 10-K

The Company is a potentially responsible party (PRP) pursuant to the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (commonly known as Superfund) and similar state laws in proceedings associated with seventeen sites around the United States. These proceedings were instituted by the United States Environmental Protection Agency and certain state environmental agencies at various times beginning in 1983. Superfund and similar state laws create liability for investigation and remediation in response to releases of hazardous substances in the environment. Under these statutes, joint and several liability may be imposed on waste generators, site owners and operators, and others regardless of fault. Although these regulations could require the Company to remove or mitigate the effects on the environment at various sites, perform remediation work at such sites, or pay damages for loss of use and non-use values, we expect the Company's liability in these proceedings to be limited to monetary damages. The Company expects its future liability relative to these sites to be insignificant, individually and in the aggregate. The Company has reserved an amount that it believes to be adequate to cover its exposure.

São Paulo Tax Dispute

Dixie Toga Ltda. (formerly Dixie Toga, S.A.), acquired by the Company on January 5, 2005, is involved in a tax dispute with the City of São Paulo, Brazil. The City imposes a tax on the rendering of printing services. The City has assessed this city services tax on the production and sale of printed labels and packaging products. Dixie Toga, along with a number of other packaging companies, disagree and contend that the city services tax is not applicable to its products and that the products are subject only to the state value added tax (VAT). Under Brazilian law, state VAT and city services tax are mutually exclusive and the same transaction can be subject to only one of those taxes. Based on a ruling from the State of São Paulo, advice from legal counsel, and long standing business practice, Dixie Toga appealed the city services tax and instead continued to collect and pay only the state VAT.

The City of São Paulo disagreed and assessed Dixie Toga the city services tax for the years 1991-1995. The assessments for those years are estimated to be approximately \$58.5 million at the date the Company acquired Dixie Toga, translated to U.S. dollars at the December 31, 2011 exchange rate. Dixie Toga challenged the assessments and ultimately litigated the issue in two annulment actions filed on November 24, 1998 and August 16, 1999 in the Lower Tax Court in the city of São Paulo. A decision by the Lower Tax Court in the city of São Paulo in 2002 cancelled all of the assessments for the years 1991-1995. The City of São Paulo, the State of São Paulo, and Dixie Toga had each appealed parts of the lower court decision. On February 8, 2010, the São Paulo Court of Justice issued a Decision in favor of Dixie Toga. This Decision has been appealed by the City of São Paulo. In the event of a successful appeal by the City and an adverse resolution, the estimated amount for these years could be substantially increased for additional interest, monetary adjustments and costs from the date of acquisition.

The City has also asserted the applicability of the city services tax for the subsequent years 1996-2001 and has issued assessments for those years for Dixie Toga and for Itap Bemis Ltda., a Dixie Toga subsidiary. The assessments for those years were upheld at the administrative level and are being challenged by the companies. The assessments at the date of acquisition for these years for tax and penalties (exclusive of interest and monetary adjustments) are estimated to be approximately \$8.8 million for Itap Bemis and \$28.4 million for Dixie Toga, translated to U.S. dollars at the December 31, 2011 exchange rate. In the event of an adverse resolution, the estimated amounts for these years could be increased by \$47.9 million for Itap Bemis and \$142.2 million for Dixie Toga for interest, monetary adjustments and costs.

Table of Contents

The 1996-2001 assessments for Dixie Toga are currently being challenged in the courts. In pursuing its challenge through the courts, taxpayers are generally required, in accordance with court procedures, to pledge assets as security for its lawsuits. Under certain circumstances, taxpayers may avoid the requirement to pledge assets. Dixie Toga has secured a court injunction that avoids the current requirement to pledge assets as security for its lawsuit related to the 1996-2001 assessments.

The City has also asserted the applicability of the city services tax for the subsequent years 2004-2009. The assessments issued by the City for these years have been received and are being challenged by the Company at the administrative level. The assessments for tax, penalties, and interest are estimated to be approximately \$41.7 million, translated to U.S. dollars at the December 31, 2011 exchange rate.

The Company strongly disagrees with the City's position and intends to vigorously challenge any assessments by the City of São Paulo. The Company is unable at this time to predict the ultimate outcome of the controversy and as such has not recorded any liability related to this matter. An adverse resolution could be material to the consolidated results of operations and/or cash flows of the period in which the matter is resolved.

Brazil Investigation

On September 18, 2007, the Secretariat of Economic Law (SDE), a governmental agency in Brazil, initiated an investigation into possible anti-competitive practices in the Brazilian flexible packaging industry against a number of Brazilian companies including a Dixie Toga subsidiary. The investigation relates to periods prior to the Company's acquisition of control of Dixie Toga and its subsidiaries. Given the preliminary nature of the proceedings, the Company is unable at the present time to predict the outcome of this matter.

ITEM 4 MINE SAFETY DISCLOSURES

Not applicable.

PART II ITEMS 5, 6, 7, 7A, 8, 9, 9A, and 9B

ITEM 5 MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

The Company's common stock is traded on the New York Stock Exchange under the symbol BMS. On December 31, 2011, there were 3,618 registered holders of record of our common stock. The Company did not repurchase any of its equity securities in the fourth quarter of the fiscal year ended December 31, 2011. As of December 31, 2011, under authority granted by the Board of Directors, the Company had authorization to repurchase an additional 4,543,800 shares of its common stock.

Overview

Bemis Company, Inc. is a leading global manufacturer of flexible packaging and pressure sensitive materials supplying a variety of markets. Generally about 65 percent of our total company net sales are to customers in the food industry. Sales of our flexible packaging products are widely diversified among food categories and can be found in nearly every aisle of the grocery store. Our emphasis on supplying packaging to the food industry has historically provided a more stable market environment for our flexible packaging business segment, which accounts for about 90 percent of our net sales. Our remaining net sales is from the pressure sensitive materials business segment which, while diversified in end use products, is less focused on food industry applications and more exposed to economically sensitive end markets.

Market Conditions

The markets into which our products are sold are highly competitive. Our leading flexible packaging market positions in North and South America reflect our focus on expanding our offering of value-added, proprietary products. We also manufacture products for which our technical know-how and economies of scale offer us a competitive advantage.

The primary raw materials for our business segments are polymer resins, films, paper, ink, adhesives, aluminum, and chemicals. During the first five months of 2011, the cost of our commodity and specialty resin raw materials increased substantially. Furthermore, the time lag between raw material cost increases and the subsequent adjustment of our selling prices in accordance with formulas included in our customer pricing agreements has had a negative effect on operating profit during 2011 compared to 2010. Weak global economic conditions, sustained high unemployment levels, and higher retail food prices in grocery stores has also led to reduced consumer demand for certain packaged food products during 2011. Lower unit sales volumes during the second half of 2011 reflect the lower unit sales volumes experienced by many of our customers.

Facility Consolidation

During the fourth quarter of 2011, Bemis initiated a facility consolidation program to improve efficiencies and reduce fixed costs. As a part of this program, both administrative and production workforce levels were reduced during the fourth quarter. Bemis has also announced the planned closure of five facilities, two of which were completed by early January 2012. Most of the production from these five facilities will be transferred to other Bemis facilities.

Charges associated with the facility consolidation-related activities totaled \$38.4 million in the fourth quarter of 2011, including \$26.3 million of employee-related costs and \$12.1 million of fixed asset accelerated depreciation and writedowns. Management expects to recognize additional pre-tax charges related to these efforts of approximately \$45 million over the next 15 months, primarily associated with accelerated depreciation, equipment relocation, and lease termination expenses. Cash payments in 2012 are expected to be approximately \$35 million.

Acquisitions

Shield Pack

On December 1, 2011, we acquired the common stock of Shield Pack, LLC of West Monroe, Louisiana for a cash purchase price of approximately \$44.5 million, subject to customary post-closing adjustments. Shield Pack is a manufacturer of high barrier liners for bulk container packaging.

Table of Contents**Mayor Packaging**

On August 1, 2011, we acquired Mayor Packaging, a Hong Kong-based manufacturer of consumer and specialty flexible packaging including a manufacturing facility in Dongguan, China. The cash purchase price of approximately \$96.7 million was financed with commercial paper.

Noncontrolling Interest of Dixie Toga Ltda. (formerly Dixie Toga, S.A.)

During the third quarter of 2011, we completed the purchase of the remaining shares owned by the noncontrolling interest of our Brazilian subsidiary, Dixie Toga Ltda., for approximately \$90 million.

Alcan Packaging Food Americas

On March 1, 2010, we acquired the Food Americas operations of Alcan Packaging (Alcan Packaging Food Americas), a business unit of Rio Tinto plc. Under the terms of the \$1.2 billion transaction, we acquired 23 Food Americas flexible packaging facilities in the United States, Canada, Mexico, Brazil, Argentina, and New Zealand, which recorded 2009 net sales of \$1.4 billion. These facilities are included in our flexible packaging business segment and produce flexible packaging principally for the food and beverage industries and augment our product offerings and technological capabilities. The majority of the financing for this transaction was completed during the third quarter of 2009 through the issuance of \$800.0 million of public notes and 8.2 million common shares issued in a secondary public stock offering. The remaining cash purchase price was financed in the commercial paper market at the time of closing.

Sale of Discontinued Operations

Under the terms of an order signed by the U.S. District Court for the District of Columbia on February 25, 2010, a portion of the Alcan Packaging Food Americas business acquired on March 1, 2010 was to be divested; accordingly, we had classified the related operating results as discontinued operations. On July 13, 2010, we sold these discontinued operations to Exopack Holding Corp., an affiliate of private investment firm Sun Capital Partners, Inc. The transaction was completed for a cash purchase price, net of selling costs, of \$75.2 million. The divested business recorded 2009 net sales of approximately \$156 million and included two facilities which manufacture flexible packaging for retail natural cheese and shrink bags for fresh red meat.

Results of Operations**Consolidated Overview**

(in millions, except per share amounts)	2011		2010		2009	
Net sales	\$	5,322.7	\$	4,835.0	\$	3,514.6
Net income attributable to Bemis Company, Inc.		184.1		205.1		147.2
Diluted earnings per share		1.73		1.85		1.38

2011 versus 2010

Net sales for the year ended December 31, 2011 increased by 10.1 percent. We estimate that acquisitions increased net sales by approximately 4.8 percent during the year. Currency translation increased net sales by 1.7 percent. The remaining organic sales growth primarily reflects

higher selling prices which were partially offset by lower unit sales volume. Higher selling prices during 2011 reflect higher raw material costs.

Diluted earnings per share for 2011 of \$1.73 included charges of \$0.24 for facility consolidation and other costs and \$0.05 related to our Mayor Packaging acquisition, partially offset by a \$0.03 gain associated with a non U.S. pension plan curtailment. This compared to diluted earnings per share for 2010 of \$1.85, which included a \$0.23 charge related to our Alcan Packaging Food Americas acquisition and a \$0.06 charge related to the pre-closing impact of the July 2009 financing of the Alcan Packaging Food Americas acquisition. Diluted earnings per share from discontinued operations were \$0.02 in 2010. Operating results for the year ended December 31, 2011 were negatively impacted by higher raw material costs and lower unit sales volumes during the year.

2010 versus 2009

Net sales for the year ended December 31, 2010 increased by 37.6 percent. Acquisitions increased net sales by approximately 31 percent during the year. The effect of currency translations accounted for a 1.8 percent increase in net sales. Net of these impacts, the increase in net sales primarily reflects higher prices and improved unit sales volume from both existing and acquired operations. Selling prices were increased during 2010 in response to higher raw material costs.

Diluted earnings per share for 2010 of \$1.85 included a \$0.09 charge for transaction related legal, accounting and other professional fees, a \$0.09 charge associated with Alcan Packaging Food Americas purchase accounting adjustments for inventory and order backlog, as well as a \$0.05 charge for acquisition related integration costs including severance costs for workforce reductions and equipment relocation costs. In addition, the pre-closing impact of the July 2009 financing of the Alcan Packaging Food Americas acquisition reduced 2010 diluted earnings by \$0.06 per share. Diluted earnings per share from discontinued operations were \$0.02 in 2010. For the year ended December 31, 2009, diluted earnings per share of \$1.38 included a \$0.50 per share charge representing the impact of Alcan Packaging Food Americas acquisition related professional fees, acquisition financing, an administrative sales tax assessment, and severance charges, partially offset by a \$0.02 per share gain on the sale of an asset. Operating results for the year ended December 31, 2010 improved compared with the year ended December 31, 2009 due to increased unit sales volume, currency translation benefits, and the accretive effect of the Alcan Packaging Food Americas acquisition.

Flexible Packaging Business Segment

Our flexible packaging business segment provides packaging to a variety of end markets, including applications for meat and cheese, confectionery and snack foods, frozen foods, lawn and garden products, health and hygiene products, beverages, healthcare products, bakery goods, and dry foods.

Edgar Filing: BEMIS CO INC - Form 10-K

Table of Contents

(dollars in millions)	2011		2010		2009	
Net sales	\$	4,747.9	\$	4,272.4	\$	2,983.4
Operating profit (See Note 21 to the Consolidated Financial Statements)		427.6		468.5		379.2
Operating profit as a percentage of net sales		9.0%		11.0%		12.7%

2011 versus 2010

For the total year 2011, flexible packaging net sales increased 11.1 percent compared to 2010. Acquisitions increased net sales by approximately 5.4 percent, and currency effects accounted for a sales increase of 1.6 percent. The remaining increase in net sales was driven by higher selling prices partially offset by the impact of lower unit sales volumes of packaging for applications such as bakery, confectionery, pet food, and health and hygiene products.

Operating profit for the total year 2011 was \$427.6 million, or 9.0 percent of net sales, compared to \$468.5 million, or 11.0 percent of net sales, in 2010. The net effect of currency translation increased operating profit in 2011 by \$5.0 million. The lower percentage of operating profit to net sales in 2011 reflects the impact of higher raw material costs during the first six months of 2011 and lower unit sales volumes during the second half of the year. In addition, operating profit for 2011 included \$34.9 million of facility consolidation and other charges and \$4.5 million of Mayor Packaging acquisition-related charges, which was partially offset by a \$2.7 million gain associated with a non U.S. pension plan curtailment. Total year 2010 operating profit included \$20.1 million of Alcan Packaging Food Americas acquisition related charges.

2010 versus 2009

Net sales in our flexible packaging business segment increased 43.2 percent in 2010. Acquisitions increased net sales by approximately 36 percent, and currency effects accounted for a sales increase of 2.4 percent. The remaining increase in net sales was driven by higher sales across many market categories.

Operating profit increased to \$468.5 million, or 11.0 percent of net sales, in 2010, compared to \$379.2 million, or 12.7 percent of net sales in 2009. The net effect of currency translation increased operating profit in 2010 by \$6.5 million compared to 2009. The decrease in operating profit as a percentage of net sales in 2010 reflects the combined impact of generally lower operating margins from the acquired business and the short-term negative impact of higher raw material costs in advance of selling price adjustments. In addition, operating profit includes \$20.1 million of acquisition related charges. Operating margins in 2009 benefited from decreasing raw material costs during the first half of that year.

Pressure Sensitive Materials Business Segment

The pressure sensitive materials business segment offers adhesive products to three markets: prime and variable information labels, which include roll label stock used in a wide variety of label markets; graphic design, used to create signage and decorations; and technical components, which represent pressure sensitive components for industries such as the medical, automotive, construction and electronics industries. Paper and adhesive are the primary raw materials used in our pressure sensitive materials business segment.

(dollars in millions)	2011		2010		2009	
Net sales	\$	574.8	\$	562.6	\$	531.2
Operating profit (See Note 21 to the Consolidated Financial Statements)		33.4		33.0		13.6
Operating profit as a percentage of net sales		5.8%		5.9%		2.6%

2011 versus 2010

For the total year 2011, net sales of pressure sensitive materials were \$574.8 million, a 2.2 percent increase from net sales in 2010. Currency effects increased net sales by 2.4 percent. Net sales reflected lower unit sales volumes offset by higher selling prices.

Operating profit was \$33.4 million or 5.8 percent of net sales in 2011, compared to \$33.0 million or 5.9 percent of net sales in 2010. The net effect of currency translation increased operating profit in 2011 by \$1.1 million. Lower unit sales volumes reflecting current weak economic conditions were offset by higher selling prices across all product categories. Total year 2011 operating profit included a \$2.7 million charge related to facility consolidation and other costs.

2010 versus 2009

For the total year 2010, net sales of pressure sensitive materials were \$562.6 million, a 5.9 percent increase from net sales in 2009. Currency effects accounted for a net sales decline of 1.6 percent. The resulting 7.5 percent increase in net sales reflects the increase in unit sales volumes in 2010 compared to 2009 when economic conditions negatively impacted demand for our pressure sensitive materials products.

The net effect of currency translation decreased operating profit by \$0.7 million in 2010. Higher operating profit in 2010 reflects the positive impact of substantially improved unit sales volumes combined with disciplined cost management.

Consolidated Gross Profit

(dollars in millions)	2011	2010	2009
Gross profit	\$ 910.2	\$ 893.2	\$ 700.2
Gross profit as a percentage of net sales	17.0%	18.5%	19.9%

Gross profit in 2011 reflects the negative impact of increasing resin prices during the first half of the year coupled with lower sales volume during the second half of 2011. Gross profit in 2010 reflects the negative impact of \$15.4 million of expenses associated with the purchase accounting impact of the fair value write-up of inventory and a charge for the fair value of the customer order backlog,

Table of Contents

both related to the Alcan Packaging Food Americas acquisition. The decrease in gross profit as a percentage of net sales in 2010 is primarily attributable to generally lower operating margins in the newly acquired Alcan Packaging Food Americas business combined with increasing raw material costs.

Consolidated Selling, General and Administrative Expenses

(dollars in millions)	2011		2010		2009	
Selling, general and administrative expenses (SG&A)	\$	483.4	\$	459.1	\$	370.9
SG&A as a percentage of net sales		9.1%		9.5%		10.5%

Selling, general, and administrative expenses increased in both 2011 and 2010 primarily reflecting the increased costs associated with the August 1, 2011 purchase of Mayor Packaging, and the March 1, 2010 purchase of Alcan Packaging Food Americas. Selling, general, and administrative expenses in 2010 included \$4.5 million of expenses primarily related to severance and equipment relocation costs associated with our Alcan Packaging Food Americas acquisition.

Research and Development (R&D)

(dollars in millions)	2011		2010		2009	
Research and development (R&D)	\$	38.7	\$	34.3	\$	24.3
R&D as a percentage of net sales		0.7%		0.7%		0.7%

Our efforts to introduce new products continue at a steady pace and are an integral part of our daily plant operations. Our research and development engineers work directly on commercial production equipment, bringing new products to market without the use of pilot equipment. We believe this approach significantly improves the efficiency, effectiveness, and relevance of our research and development activities and results in earlier commercialization of new products. Expenditures that are not distinctly identifiable as research and development costs are included in costs of products sold.

Other Operating (Income) Expense, Net

(dollars in millions)	2011	2010	2009
Other operating (income) expense, net	(17.7)	(1.0)	24.7

For the year 2011, other operating income and expense included \$20.0 million of fiscal incentive income compared to \$15.9 million in 2010 and \$16.6 million in 2009. These fiscal incentives are associated with net sales in South America and are included in flexible packaging segment operating profit. Other operating income and expense for the year 2011 also included \$3.1 million of acquisition related expense, compared to \$15.6 million of such charges in 2010. During 2009, in addition to the fiscal incentive income, other operating income and expense included \$44.8 million of acquisition related expenses.

Interest Expense

(dollars in millions)	2011	2010	2009
Interest expense	76.8	73.5	42.1
Effective interest rate	5.4%	5.8%	4.3%

Interest expense increased in 2011 compared to 2010 as a result of the October 2011 issuance of \$400 million long-term notes. These funds were raised in anticipation of the repayment of our \$300 million notes which will mature on April 1, 2012. Interest expense increased in 2010 compared to 2009 due to the July 2009 issuance of \$800 million of long-term notes as financing for the Alcan Packaging Food Americas acquisition.

Other Non-operating (Income) Expense, Net

(dollars in millions)	2011	2010	2009
Other non-operating (income) expense, net	(1.6)		(2.1)

During 2011, net other non-operating (income) expense included interest income and a gain on sales of excess land, partially offset by a foreign exchange loss of \$1.8 million. During 2010, net other non-operating income included interest income offset by foreign exchange losses.

Income Taxes

(dollars in millions)	2011	2010	2009
Income taxes	104.9	117.6	87.8
Effective tax rate	35.9%	35.9%	36.5%

The difference between our overall tax rate of 35.9 percent in 2011 and 2010, and 36.5 percent in 2009 and the U.S. statutory rate of 35 percent in each of the three years presented principally relates to state and local income taxes net of federal income tax benefits and the differences between tax rates in the various foreign jurisdictions in which we operate.

Net Income Attributable to Noncontrolling Interests

Noncontrolling interests primarily represent the outstanding preferred shares of Dixie Toga Ltda., our Brazilian flexible packaging subsidiary. During the third quarter of 2011, we completed the purchase of the outstanding shares owned by the noncontrolling interest of Dixie Toga for approximately \$90 million.

Table of Contents

Liquidity and Capital Resources

Debt to Total Capitalization

Net debt to total capitalization (which includes total debt net of cash balances divided by total debt net of cash balances plus equity) was 48.0 percent at December 31, 2011, compared to 38.9 percent at December 31, 2010. Total debt increased from \$1,286.5 million as of December 31, 2010 to \$1,569.9 million as of December 31, 2011, principally due to acquisition financing. In addition, equity balances decreased in 2011 reflecting changes in exchange rates used to translate foreign currency financial statements to the U.S. dollar.

Credit Rating

Our capital structure and financial practices have earned us investment grade credit ratings from two nationally recognized credit rating agencies. These credit ratings are important to our ability to issue commercial paper at favorable rates of interest.

Cash Flow

Net cash provided by operations totaled \$420.8 million for the year ended December 31, 2011, compared to \$368.0 million in 2010 and \$475.8 million in 2009. Increases in working capital had a negative impact on cash provided by operations during the years presented. Increasing raw material costs negatively impacted working capital levels during 2011 and 2010. Net cash provided by operations was reduced by voluntary pension contributions to our U.S. pension plans of \$15.0 million, \$15.0 million, and \$30.0 million during 2011, 2010, and 2009, respectively. Contributions to our defined benefit pension plans are expected to be approximately \$65 million in 2012.

Net cash used in investing activities totaled \$284.1 million for the year ended December 31, 2011, including the acquisition of both Shield Pack and Mayor Packaging. This compares to cash used in investing activities in 2010 totaling \$1.2 billion, reflecting the acquisition of Alcan Packaging Food Americas. During 2009, we invested \$30.3 million net cash in the acquisition of the South American rigid packaging operations of Huhtamaki Oyi.

Net cash used in financing activities for the year ended December 31, 2011 included common stock dividend payments of \$101.8 million, the purchase of 5 million shares of our common stock for \$161.1 million, and the purchase of the remaining shares of our Brazilian subsidiary, Dixie Toga, Ltda. owned by the noncontrolling interest for \$89.7 million. This compares to cash used for financing activities during the year ended December 31, 2010 that included common stock dividends of \$101.9 million, the purchase of 1.5 million shares of our common stock for \$45.8 million, and the purchase of subsidiary shares from noncontrolling interests of \$15.9 million. Net cash provided by financing activities in 2009 reflected the issuance of \$800 million of public notes and 8.2 million of common shares issued in a secondary public stock offering. The proceeds of these financing activities were used to fund the 2010 purchase of the Alcan Packaging Food Americas acquisition.

Available Financing

In addition to using cash provided by operations, we issue commercial paper to meet our short-term liquidity needs. At year-end, our commercial paper debt outstanding was \$46.5 million. Based on our current credit rating, we enjoy ready access to the commercial paper markets.

Under the terms of our revolving credit agreement, we have the capacity to borrow up to \$800 million. This facility is principally used as back-up for our commercial paper program. Our revolving credit facility is supported by a group of major U.S. and international banks. Covenants imposed by the revolving credit facility include limits on the sale of businesses, minimum net worth calculations, and a maximum ratio of debt to total capitalization. The revolving credit agreement includes a \$100 million multicurrency limit to support the financing needs of our international subsidiaries. At December 31, 2011, there was no outstanding balance on the revolving credit facility. If this revolving credit facility was no longer available to us and we were not able to issue commercial paper, we would expect to meet our financial liquidity needs by accessing the bank market, which would increase our borrowing costs. Borrowings under the credit agreement are subject to a variable interest rate.

Public notes totaling \$300 million are scheduled to mature in April 2012 and industrial revenue bonds totaling \$8 million are scheduled to mature in November 2012. These bonds have been classified as long term debt on the December 31, 2011 balance sheet in accordance with our ability and intent to refinance them with commercial paper.

Liquidity Outlook

On July 21, 2011, we amended our revolving credit facility to increase the total amount available from \$625 million to \$800 million and to extend the term from April 29, 2013 to July 21, 2016. As of December 31, 2011, \$54.5 million of outstanding debt was supported by this credit facility, leaving \$745.5 million of available credit. As of December 31, 2011 cash and cash equivalents outside of the United States was \$36.9 million.

Management expects cash flow from operations and available liquidity described above to be sufficient to support operations going forward. There can be no assurance, however, that the cost or availability of future borrowings will not be impacted by future capital market disruptions. In addition, increases in raw material costs would increase our short term liquidity needs.

Capital Expenditures

Capital expenditures were \$135.2 million during 2011, compared to \$113.2 million in 2010, and \$89.2 million in 2009. Over the next several years, we expect average annual capital expenditures to be less than total annual depreciation and amortization expenses. We expect to fund 2012 capital expenditures with cash provided by operating activities.

Table of Contents**Dividends**

We increased our quarterly cash dividend by 4.3 percent during the first quarter of 2011 to \$0.24 per share from \$0.23 per share. This follows increases of 2.2 percent in 2010 and 2.3 percent in 2009. In February 2012, the Board of Directors approved the 29th consecutive annual increase in the quarterly cash dividend on common stock to \$0.25 per share, a 4.2 percent increase.

Share Repurchases

During 2011, we purchased 5.0 million shares of our common stock in the open market, compared to 1.5 million shares in 2010. No shares were repurchased during 2009. As of December 31, 2011, we were authorized to purchase an additional 4.5 million shares of our common stock for the treasury.

Contractual Obligations

The following table provides a summary of contractual obligations including our debt payment obligations, operating lease obligations, and certain other purchase obligations as of December 31, 2011. Obligations under capital leases are insignificant.

(in millions)	Contractual Payments Due by Period				
	Total	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years
Long-term debt obligations (1)	\$ 1,568.2	\$ 321.4	\$ 447.0	\$	\$ 799.8
Interest expense (2)	441.0	73.2	125.9	90.0	151.9
Operating leases (3)	71.5	11.5	16.2	10.4	33.4
Purchase obligations (4)	248.6	237.2	2.2	0.3	8.9
Postretirement obligations (5)	73.4	30.5	13.0	11.5	18.4
Severance (6)	15.8	15.8			
Total	\$ 2,418.5	\$ 689.6	\$ 604.3	\$ 112.2	\$ 1,012.4

(1) These amounts are included in our Consolidated Balance Sheet. A portion of this debt is commercial paper backed by a bank credit facility that expires on July 21, 2016. Certain amounts have been reflected as being due in less than one year even though they have been classified as long term in our Consolidated Balance Sheet. These items include \$300 million notes, \$8 million IRB, and commercial paper and have been included in Long Term Debt in our Consolidated Balance Sheet in accordance with our ability and intent to refinance these items on a long-term basis. See Note 14 to the Consolidated Financial Statements for additional information about our long term debt.

(2) A portion of the interest expense disclosed is subject to variable interest rates. The amounts disclosed above assume that future variable interest rates are equal to rates at December 31, 2011.

(3) We enter into operating leases in the normal course of business. Substantially all lease agreements have fixed payment terms based on the passage of time. Some lease agreements provide us with the options to renew the lease. Our future operating lease obligations would change if we exercised these renewal options and if we entered into additional operating lease agreements.

(4) Purchase obligations represent contracts or commitments for the purchase of raw materials, utilities, capital equipment and various other goods and services.

(5) Postretirement obligations represent contracts or commitments for postretirement healthcare benefits and benefit payments for the unfunded Bemis Supplemental Retirement Plan. See Note 11 to the Consolidated Financial Statements for additional information about our postretirement benefit obligations.

(6) Severance costs relate to our facility consolidation program, which is further described in Note 2 and Note 4 to the Consolidated Financial Statements.

Pursuant to current authoritative accounting guidance, we have accrued income tax liabilities associated with uncertain tax positions. These liabilities have been excluded from the table above due to the high degree of uncertainty as to amounts and timing regarding future payments. See Note 16 of the Consolidated Financial Statements for additional information.

Market Risks and Foreign Currency Exposures

We enter into contractual arrangements (derivatives) in the ordinary course of business to manage foreign currency exposure and interest rate risks. We do not enter into derivative transactions for speculative trading purposes. Our use of derivative instruments is subject to internal policies that provide guidelines for control, counterparty risk, and ongoing reporting. These derivative instruments are designed to reduce the income statement volatility associated with movement in foreign exchange rates and to achieve greater exposure to variable interest rates.

A portion of the interest expense on our outstanding debt is subject to short-term interest rates. As such, increases in short-term interest rates will directly impact the amount of interest we pay. For each one percent increase in variable interest rates, the annual interest expense on \$455.0 million of variable rate debt outstanding (which includes \$400 million fixed rate notes that have been effectively converted to variable rate debt through the use of a fixed to variable rate interest rate swap) would increase by \$4.6 million.

Our international operations enter into forward foreign currency exchange contracts to manage foreign currency exchange rate exposures associated with certain foreign currency denominated receivables and payables. At December 31, 2011 and 2010, we had outstanding forward exchange contracts with notional amounts aggregating \$9.8 million and \$12.0 million, respectively. Forward exchange contracts generally have maturities of less than six months. Counterparties to the forward exchange contracts are major financial institutions. Credit loss from counterparty nonperformance is not anticipated. We have not designated these derivative

Table of Contents

instruments as hedging instruments. The net settlement amount (fair value) related to the active forward foreign currency exchange contracts is recorded on the balance sheet within current liabilities and as an element of other operating (income) expense, net, which offsets the related transactions gains and losses on the related foreign denominated asset or liability. Amounts recognized in income related to forward exchange contracts were \$0.5 million income and \$1.3 million income in the years ended December 31, 2011 and 2010, respectively.

Our business in Brazil held U.S. dollar denominated debt which created exposure to changes in currency rates when compared to its functional currency of the Brazilian real. In order to hedge this exposure, we entered into currency swap contracts with maturities that matched the underlying debt, effectively converting a portion of the U.S. denominated debt to the local currency. We had not designated these derivative instruments as hedging instruments. There were no outstanding currency swap contracts as of December 31, 2011. At December 31, 2010, the Company had outstanding currency swap contracts with notional amounts aggregating \$86.4 million. The net settlement amount (fair value) related to swap contracts was recorded on the balance sheet as either a current or long-term asset or liability and as an expense element of other non-operating (income) expense, net, which offset the related transaction gains or losses. Amounts recognized in income related to these currency swaps were \$6.6 million expense and \$12.0 million expense in the years ended December 31, 2011 and 2010, respectively.

The Company enters into interest-rate swap contracts to economically convert a portion of the Company's fixed-rate debt to variable rate debt. During the fourth quarter of 2011, the Company entered into four interest rate swap agreements with a total notional amount of \$400 million. These contracts were designated as hedges of the Company's \$400 million 4.50 percent fixed-rate debt due in 2021. The variable rate for each of the interest rate swaps is based on the six-month London Interbank Offered Rate (LIBOR), set in arrears, plus a fixed spread. The variable rates are reset semi-annually at each net settlement date. The net settlement benefit to the Company, which is recorded as a reduction in interest expense, was \$1.6 million in 2011. At December 31, 2011, the fair value of these interest rate swaps was \$3.3 million, in the Company's favor, using discounted cash flow or other appropriate methodologies, and is included in deferred charges and other assets with a corresponding increase in long-term debt.

The operating results of our international operations are recorded in local currency and translated into U.S. dollars for consolidation purposes. The impact of foreign currency translation on net sales was an increase of \$80.3 million and \$62.1 million in 2011 and 2010, respectively. Operating profit increased by approximately \$6.1 million and \$5.8 million in 2011 and 2010, respectively, as a result of foreign currency translation.

Shareholders' equity includes adjustments to other comprehensive income for changes in currency translation for consolidated balance sheet accounts. The impact of currency translation during 2011 was a decrease in shareholders' equity totaling \$112.9 million.

Critical Accounting Estimates and Judgments

Our discussion and analysis of our financial condition and results of operations is based on our consolidated financial statements, which have been prepared in accordance with GAAP. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of expenses during the reporting period. On an ongoing basis, management evaluates its estimates and judgments, including those related to retirement benefits, intangible assets, goodwill, and expected future performance of operations. Our estimates and judgments are based on historical experience and on various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following are critical accounting estimates used in the preparation of our consolidated financial statements.

- The calculation of annual pension costs and related assets and liabilities; and
- The valuation and useful lives of intangible assets and goodwill.

Pension costs

Amounts related to our defined benefit pension plans that are recognized in our financial statements are determined on an actuarial basis. The accounting for our pension plans requires us to recognize the overfunded or underfunded status of the pension plans on our balance sheet. A substantial portion of our pension amounts relate to our defined benefit plans in the United States. Net periodic pension cost recorded in 2011 was \$28.6 million, compared to pension cost of \$26.5 million in 2010 and \$18.8 million in 2009.

One element used in determining annual pension income and expense in accordance with accounting rules is the expected return on plan assets. For the year 2011, we maintained a target allocation to equity investments of 70 percent of total assets and an expected long-term rate of return on total U.S. pension plan assets of 8.25 percent.

To develop the expected long-term rate of return on assets assumption, we considered compound historical returns and future expectations based on our target asset allocation. For the historical long-term investment periods of 10, 15, 20 and 25 years ending December 31, 2011, our U.S. pension plan assets earned annualized rates of return of 3.7 percent, 6.4 percent, 7.4 percent, and 8.2 percent, respectively. Using our U.S. target asset allocation of plan assets of 70 percent equity securities and 30 percent fixed income securities, our outside actuaries have used their independent economic model to calculate a range of expected long-term rates of return and, based on their results, we have determined our U.S. asset return assumptions to be reasonable.

This assumed long-term rate of return on assets is applied to a calculated value of plan assets, which recognizes changes in the fair value of plan assets in a systematic manner over approximately three years. This process calculates the expected return on plan assets that is included in pension income or expense. The difference between this expected return and the actual return on plan assets is generally deferred and recognized over subsequent periods. The net deferral of asset gains and losses affects the calculated value of pension plan assets and, ultimately, future pension income and expense.

Table of Contents

At the end of each year, we determine the discount rate to be used to calculate the present value of pension plan liabilities. This discount rate is an estimate of the current interest rate at which the pension liabilities could be effectively settled at the end of the year. In estimating this rate, we look to changes in rates of return on high quality, fixed income investments that receive one of the two highest ratings given by a recognized ratings agency. At December 31, 2011, for our U.S. defined benefit pension plans we determined this rate to be 4.25 percent, a decrease of one percent from the 5.25 percent rate used at December 31, 2010.

For our non-U.S. pension plans, we follow similar methodologies in determining the appropriate expected rates of return on assets and discount rates to be used in our actuarial calculations in each individual country.

U.S. Pension assumptions sensitivity analysis

Based on our current discount rate assumption of 4.25 percent and our expected rate of return on pension plan assets of 8.00 percent, we expect pension expense before the effect of income taxes for 2012 to be in a range of \$45 million to \$50 million. The following charts depict the sensitivity of estimated 2012 pension expense to incremental changes in the discount rate and the expected long-term rate of return on assets.

(dollars in millions)	Total increase (decrease) to pension expense from current assumptions
<u>Discount rate</u>	
3.25 percent	\$ 8.2
3.50 percent	6.0
3.75 percent	3.9
4.00 percent	1.9
4.25 percent Current Assumption	0.0
4.50 percent	(1.9)
4.75 percent	(3.7)
5.00 percent	(5.4)
5.25 percent	(7.0)
<u>Rate of Return on Plan Assets</u>	
7.00 percent	4.9
7.25 percent	3.6
7.50 percent	2.4
7.75 percent	1.2
8.00 percent Current Assumption	0.0
8.25 percent	(1.2)
8.50 percent	(2.4)
8.75 percent	(3.6)
9.00 percent	(4.9)

The amount by which the fair value of plan assets differs from the projected benefit obligation of a pension plan must be recorded on the Consolidated Balance Sheet as an asset, in the case of an overfunded plan, or as a liability, in the case of an underfunded plan. The gains or losses and prior service costs or credits that arise but are not recognized as components of pension cost are recorded as a component of other comprehensive income. The following chart depicts the sensitivity of the total pension adjustment to other comprehensive income to changes in

the assumed discount rate.

(dollars in millions)	Total increase (decrease) in Accumulated Other Comprehensive Income, net of taxes, from current assumptions	
Discount rate		
3.25 percent	\$	(101.9)
3.50 percent		(74.3)
3.75 percent		(48.3)
4.00 percent		(23.5)
4.25 percent	Current Assumption	0.0
4.50 percent		22.4
4.75 percent		43.7
5.00 percent		63.9
5.25 percent		83.2

Intangible assets and goodwill

The purchase price of each new acquisition is allocated to tangible assets, identifiable intangible assets, liabilities assumed, and goodwill. Determining the portion of the purchase price allocated to identifiable intangible assets and goodwill requires us to make significant estimates. The amount of the purchase price allocated to intangible assets is generally determined by estimating the future cash flows of each asset and discounting the net cash flows back to their present values. The discount rate used is determined at the time of the acquisition in accordance with accepted valuation methods.

Goodwill represents the excess of the aggregate purchase price over the fair value of net assets acquired, including intangible assets. We review our goodwill for impairment annually and assess whether significant events or changes in the business circumstances indicate that the carrying value of the goodwill may not be recoverable. The test for impairment requires us to make estimates about fair value, most of which are based on projected future cash flows. Our estimates associated with the goodwill impairment tests are considered critical due to the amount of goodwill recorded on our consolidated balance sheet and the judgment required in determining fair value amounts, including projected future cash flows. Goodwill was \$1.0 billion as of December 31, 2011.

Intangible assets consist primarily of purchased technology, customer relationships, patents, trademarks, and tradenames and are amortized using the straight-line method over their estimated useful lives, which range from one to 30 years, when purchased. We review these intangible assets for impairment as changes in circumstances or the occurrence of events suggest that the remaining value is not recoverable. The test for impairment requires us to make estimates about fair value, most of which are based on projected future cash flows. These estimates and projections require judgments as to future events, condition, and amounts of future cash flows.

Table of Contents

New Accounting Pronouncements

There has been no new accounting guidance issued or effective during 2011 that is expected to have a material impact on our consolidated financial position, results of operations, or cash flows.

Forward-looking Statements

This Annual Report contains certain estimates, predictions, and other forward-looking statements (as defined in the Private Securities Litigation Reform Act of 1995, and within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended). Forward-looking statements are generally identified with the words believe, expect, anticipate, intend, estimate, target, may, will, plan, project, should, continue, or the negative thereof or other similar expressions, or discussion of future aspirations, which are predictions of or indicate future events and trends and which do not relate to historical matters. Such statements are based on information available to management as of the time of such statements and relate to, among other things, expectations of the business environment in which we operate, projections of future performance (financial and otherwise), including those of acquired companies, perceived opportunities in the market and statements regarding our mission and vision. Forward-looking statements involve known and unknown risks, uncertainties and other factors, which may cause actual results, performance or achievements to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements. We undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events, or otherwise.

Factors that could cause actual results to differ from those expected include, but are not limited to, general economic conditions caused by inflation, interest rates, consumer confidence, rates of unemployment and foreign currency exchange rates; investment performance of assets in our pension plans; competitive conditions within our markets, including the acceptance of our new and existing products; customer contract bidding activity; threats or challenges to our patented or proprietary technologies; raw material costs, availability, and terms, particularly for polymer resins and adhesives; price changes for raw materials and our ability to pass these price changes on to our customers or otherwise manage commodity price fluctuation risks; unexpected energy surcharges; broad changes in customer order patterns; our ability to achieve expected cost savings associated with facility consolidation initiatives; the presence of adequate cash available for investment in our business in order to maintain desired debt levels; a failure in our information technology infrastructure or applications; changes in governmental regulation, especially in the areas of environmental, health and safety matters, fiscal incentives, and foreign investment; unexpected outcomes in our current and future administrative and litigation proceedings; unexpected outcomes in our current and future tax proceedings; changes in domestic and international tax laws; costs associated with the pursuit of business combinations; unexpected costs associated with the integration of acquired businesses; unexpected costs related to plant closings; changes in our labor relations; and the impact of changes in the world political environment including threatened or actual armed conflict. These and other risks, uncertainties, and assumptions identified from time to time in our filings with the Securities and Exchange Commission, including without limitation, those described under Item 1A Risk Factors of this Annual Report on Form 10-K and our quarterly reports on Form 10-Q, could cause actual future results to differ materially from those projected in the forward-looking statements. In addition, actual future results could differ materially from those projected in the forward-looking statement as a result of changes in the assumptions used in making such forward-looking statement.

ITEM 7A QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information required by this Item 7A is included in Note 8 to the Consolidated Financial Statements included in Item 8 of this Annual Report on Form 10-K, and under the caption Market Risks and Foreign Currency Exposures which is part of Management's Discussion and Analysis included in Item 7 of this Annual Report on Form 10-K. Based on a sensitivity analysis (assuming a 10 percent adverse change in market rates) of our foreign exchange, currency swaps, and interest rate derivatives and other financial instruments, changes in exchange rates or interest rates would not materially affect our consolidated financial position and liquidity. The effect on our consolidated results of operations would be substantially offset by the impact of the hedged items.

Table of Contents

ITEM 8 FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Management's Responsibility Statement

The management of Bemis Company, Inc. is responsible for the integrity, objectivity, and accuracy of the financial statements of the Company. The financial statements are prepared by the Company in accordance with accounting principles generally accepted in the United States of America, and using management's best estimates and judgments, where appropriate. The financial information presented throughout this Annual Report on Form 10-K is consistent with that in the financial statements.

The management of Bemis Company, Inc. is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Under the direction, supervision, and participation of the Chief Executive Officer and the Chief Financial Officer, the Company's management conducted an evaluation of the effectiveness of internal control over financial reporting based on the framework in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO-Framework). Based on the results of this evaluation management has concluded that internal control over financial reporting was effective as of December 31, 2011. Item 9A of this Annual Report on Form 10-K contains management's favorable assessment of internal controls over financial reporting based on their review and evaluation utilizing the COSO-Framework criteria.

The Audit Committee of the Board of Directors, which is composed solely of outside directors, meets quarterly with management, the Internal Audit Director, the Director of Global Financial Compliance, and independent accountants to review the work of each and to satisfy itself that the respective parties are properly discharging their responsibilities. PricewaterhouseCoopers LLP, the Director of Global Financial Compliance, and the Internal Audit Director have had and continue to have unrestricted access to the Audit Committee, without the presence of Company management.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Bemis Company, Inc.:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of income, of shareholders' equity and of cash flow present fairly, in all material respects, the financial position of Bemis Company, Inc. and its subsidiaries at December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2011 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A in this Annual Report. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 BUSINESS DESCRIPTION

Bemis Company, Inc., a Missouri corporation, was founded in 1858 and incorporated in 1885 as Bemis Bro. Bag Company. In 1965 the name was changed to Bemis Company, Inc. (the Company). Based in Neenah, Wisconsin, the Company employs approximately 20,200 individuals and has 80 manufacturing facilities. The Company manufactures and sells flexible packaging products and pressure sensitive materials throughout North America, Latin America, Europe, and Asia Pacific.

The Company's business activities are organized around its two business segments, Flexible Packaging, which accounted for approximately 89 percent of 2011 net sales, and Pressure Sensitive Materials, which accounted for the remaining net sales. The Company's flexible packaging business has a strong technical base in polymer chemistry, film extrusion, coating, laminating, printing, and converting. The Company's pressure sensitive materials business specializes in adhesive technologies. The primary markets for the Company's products are in the food industry, which accounted for approximately 66 percent of net sales. The Company's flexible packaging products are widely diversified among food categories and can be found in nearly every aisle of the grocery store. Other markets include chemical, agribusiness, medical, pharmaceutical, personal care products, electronics, automotive, construction, graphic industries, and other consumer goods. All markets are considered to be highly competitive as to price, innovation, quality, and service.

Note 2 SIGNIFICANT ACCOUNTING POLICIES

Principles of consolidation: The consolidated financial statements include the accounts of the Company and its majority owned subsidiaries. All intercompany transactions and accounts have been eliminated. The classification of \$15.9 million purchase of subsidiary shares from noncontrolling interests in the first quarter of 2010 was corrected from cash used in investing activities to cash used in financing activities for the year ended December 31, 2010. This correction in classification did not have a material impact on previously issued statements of cash flows. In addition, certain prior year amounts have been reclassified to conform to current year presentation. Joint ventures which are not majority controlled are accounted for by the equity method of accounting with earnings of \$2.5 million, \$2.1 million, and \$2.2 million in 2011, 2010, and 2009 respectively, included in other operating (income) expense, net, on the accompanying consolidated statement of income. Investments in joint ventures are included in deferred charges and other assets on the accompanying consolidated balance sheet.

Noncontrolling interests: During the third quarter of 2011, the Company completed the purchase of the remaining shares owned by the noncontrolling interest of the Company's Brazilian subsidiary, Dixie Toga, Ltda. (formerly Dixie Toga, S.A.), for approximately \$90 million.

Estimates and assumptions required: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Translation of foreign currencies: The Company considers the local currency to be the functional currency for substantially all foreign subsidiaries. Assets and liabilities are translated at the exchange rate as of the balance sheet date. All revenue and expense accounts are translated at average exchange rates in effect during the year. Translation gains or losses are recorded in the foreign currency translation component in accumulated other comprehensive income (loss) in shareholders' equity. Foreign currency transaction gains (losses) of \$(1.9

Edgar Filing: BEMIS CO INC - Form 10-K

million, \$(0.9) million, and \$1.4 million in 2011, 2010, and 2009 respectively, are included as a component of other operating (income) expense, net. Additionally in 2011 and 2010, foreign currency transaction losses of \$1.8 million and \$2.6 million, respectively, are included as a component of other non-operating (income) expense, net.

Revenue recognition: Sales and related costs of sales are recognized when persuasive evidence of an arrangement exists, title and risk of ownership have been transferred to the customer, the sales price is fixed or determinable, and collectability is reasonably assured. These conditions are typically fulfilled upon shipment of products. All costs associated with revenue, including customer volume discounts, are recognized at the time of sale. Customer volume discounts are accrued in accordance with current authoritative accounting guidance and recorded as a reduction to sales. Shipping and handling costs are classified as a component of costs of sales while amounts billed to customers for shipping and handling are classified as a component of sales. The Company accrues for estimated warranty costs when specific issues are identified and the amounts are determinable.

Environmental cost: The Company is involved in a number of environmental related disputes and claims. The Company accrues environmental costs when it is probable that these costs will be incurred and can be reasonably estimated. The Company's reserve for environmental liabilities at December 31, 2011 and 2010 was \$7.5 million. The Company made no adjustments to the reserve accounts and costs which were directly expensed for environmental remediation matters resulted in charges to the income statements for each of the years 2011, 2010, and 2009. There were no third party reimbursements for any of the years presented.

Research and development: Research and development expenditures are expensed as incurred.

Facility Consolidation and Other Costs: Facility consolidation and other costs are recognized when the liability is incurred. The Company calculates severance obligations based on its standard customary practices. Accordingly, the Company records provisions for severance when probable and estimable and the Company has committed to the facility consolidation plan. In the absence of a standard customary practice or established local practice for locations outside the U.S., liabilities for severance are recognized when incurred. If fixed assets are to be disposed of as a result of the Company's facility consolidation efforts, the assets are written off when the Company commits to dispose of them and they are no longer in use. Depreciation is accelerated on fixed assets for the period of time the asset continues to be used until the asset ceases to be used. Other facility consolidation costs, including costs to relocate equipment, are generally recorded as the service is provided.

Table of Contents

Estimates of facility consolidation and other program costs and related cash charges are based on the Company's best estimates at December 31, 2011. Although the Company does not anticipate significant changes, the actual costs may differ from estimates due to subsequent events. As such, additional costs and further fixed asset write-downs may be required in future periods.

Cash and cash equivalents: The Company considers all highly liquid temporary investments with a maturity of three months or less when purchased to be cash equivalents. Cash equivalents include certificates of deposit that can be readily liquidated without penalty at the Company's option. Cash equivalents are carried at cost which approximates fair market value.

Accounts receivable: Trade accounts receivable are stated at the amount the Company expects to collect, which is net of an allowance for sales returns and the estimated losses resulting from the inability of its customers to make required payments. The following factors are considered when determining the collectability of specific customer accounts: customer creditworthiness, past transaction history with the customer, and changes in customer payment terms or practices. In addition, overall historical collection experience, current economic industry trends, and a review of the current status of trade accounts receivable are considered when determining the required allowance for doubtful accounts. Based on management's assessment, the Company provides for estimated uncollectible amounts through a charge to earnings and a credit to valuation allowance. Balances that remain outstanding after the Company has used reasonable collection efforts are written off through a charge to the valuation allowance and a credit to accounts receivable. Accounts receivable are presented net of an allowance for doubtful accounts of \$30.5 million and \$27.5 million at December 31, 2011 and 2010, respectively.

Inventory valuation: Inventories are valued at the lower of cost, as determined by the first-in, first-out (FIFO) method, or market. Inventory values using the FIFO method of accounting approximate replacement cost. Inventories are summarized at December 31, as follows:

(in thousands)	2011	2010
Raw materials and supplies	\$ 225,263	\$ 242,847
Work in process and finished goods	420,795	431,016
Total inventories	\$ 646,058	\$ 673,863

Property and equipment: Property and equipment are stated at cost. Maintenance and repairs that do not improve efficiency or extend economic life are expensed as incurred. Plant and equipment are depreciated for financial reporting purposes principally using the straight-line method over the estimated useful lives of assets as follows: land improvements, 15-30 years; buildings, 15-45 years; leasehold and building improvements, the lesser of the lease term or 8-20 years; and machinery and equipment, 3-16 years. For tax purposes, the Company generally uses accelerated methods of depreciation. The tax effect of the difference between book and tax depreciation has been provided as deferred income taxes. Depreciation expense was \$203.1 million, \$191.6 million, and \$150.8 million, for 2011, 2010, and 2009 respectively. On sale or retirement, the asset cost and related accumulated depreciation are removed from the accounts and any related gain or loss is reflected in income. Interest costs which are capitalized during the construction of major capital projects totaled \$0.1 million in 2011, \$0.0 million in 2010, and \$1.1 million in 2009.

The Company reviews its long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. If impairment indicators are present and the estimated future undiscounted cash flows are less than the carrying value of the assets, the carrying values are reduced to the estimated fair value.

Edgar Filing: BEMIS CO INC - Form 10-K

The Company capitalizes direct costs (internal and external) of materials and services used in the development and purchase of internal-use software. Amounts capitalized are amortized on a straight-line basis over a period of three to twelve years and are reported as a component of machinery and equipment within property and equipment.

The Company is in the process of developing and implementing a new Enterprise Resource Planning (ERP) system. Certain costs incurred during the application development stage have been capitalized in accordance with authoritative accounting guidance related to accounting for costs of computer software developed or obtained for internal use. These costs are amortized over the system's estimated useful life as the ERP system is placed in service. Capitalized costs for this new ERP system were \$87 million and \$85 million as of December 31, 2011 and 2010, respectively.

Goodwill: Goodwill represents the excess of cost over the fair value of net assets acquired in business combinations. Goodwill and indefinite-lived intangible assets are not amortized, but are reviewed at least annually for impairment and whenever there is an impairment indicator, using a fair-value based approach. The Company conducts its annual impairment evaluation in the fourth quarter of each year. No impairment was indicated for the years ended December 31, 2011, 2010, or 2009. The recoverability of goodwill is measured using a two step process. Step one of the test compared the fair value of each reporting unit to its book value. Step two, which compares the book value of the goodwill to its implied fair value, was not necessary since there were no indicators of potential impairment from step one.

Intangible assets: Contractual or separable intangible assets that have finite useful lives are amortized against income using the straight-line method over their estimated useful lives, with original periods ranging from one to 30 years. The straight-line method of amortization reflects an appropriate allocation of the costs of the intangible assets to earnings in proportion to the amount of economic benefits obtained by the Company in each reporting period. The Company tests finite-lived intangible assets for impairment whenever there is an impairment indicator. Intangible assets are tested for impairment by comparing anticipated undiscounted future cash flows from operations to net book value.

Financial instruments: The Company recognizes all derivative instruments on the balance sheet at fair value. Derivatives not designated as hedging instruments are adjusted to fair value through income. Depending on the nature of derivatives designated as hedging instruments, changes in the fair value are either offset against the change in fair value of the hedged assets, liabilities, or firm commitments through earnings or recognized in shareholders' equity through other comprehensive income until the hedged item is recognized. Gains or losses, if any, related to the ineffective portion of any hedge are recognized through earnings in the current period.

Table of Contents

Note 8 contains expanded details relating to specific derivative instruments included on the Company's balance sheet, such as forward foreign currency exchange contracts, currency swap contracts, and interest rate swap arrangements.

Other liabilities and deferred credits: Other liabilities and deferred credits balances include non-current pension and other postretirement liability amounts of \$243.4 million and \$157.8 million at December 31, 2011 and 2010, respectively.

Treasury stock: Treasury stock purchases are stated at cost and presented as a separate reduction of shareholders' equity. During 2011, the Company purchased 5.0 million shares of common stock in the open market for \$161.1 million. During 2010, the Company purchased 1.5 million shares of common stock in the open market for \$45.8 million. At December 31, 2011, 4.5 million common shares can be repurchased, at management's discretion, under authority granted by the Company's Board of Directors in 2011.

Note 3 NEW ACCOUNTING GUIDANCE

Balance Sheet Disclosure – Offsetting Assets and Liabilities

In December 2011, the Financial Accounting Standards Board (FASB) issued new guidance that requires an entity to disclose both gross and net information about instruments and transactions eligible for offset in the statement of financial position as well as instruments and transactions executed under a master netting or similar arrangement. The new guidance was issued to enable users of financial statements to understand the effects or potential effects of those arrangements on its financial position. The new guidance is required to be applied retrospectively and is effective for fiscal years, and interim periods within those years, beginning on or after January 1, 2013. The adoption of the new guidance will not have an impact on the Company's consolidated financial position, results of operations, or cash flows.

Goodwill Impairment Testing

In September 2011, the FASB issued new guidance intended to simplify goodwill impairment testing. The new guidance allows an entity to perform a qualitative assessment on goodwill impairment to determine whether a quantitative assessment is necessary. This guidance is effective for the Company's interim and annual periods beginning January 1, 2012. The adoption of this guidance will not have an impact on its consolidated financial position, results of operations, or cash flows.

Multiemployer Pension Plans

In September 2011, the FASB issued guidance requiring companies to provide additional disclosures related to multiemployer pension plans. The disclosures are required to be made on an annual basis for all individually material plans. Retrospective application of the disclosures is required. This guidance is effective for fiscal years ending after December 15, 2011. The adoption of the new guidance in the fourth quarter of 2011 did not have an impact on the Company's consolidated financial position, results of operations, or cash flows.

Comprehensive Income

In June 2011, the FASB issued new guidance on the presentation of comprehensive income. Specifically, the new guidance allows an entity to present components of net income and other comprehensive income in one continuous statement, referred to as the statement of comprehensive

income, or in two separate, but consecutive statements. The new guidance eliminates the current option to report other comprehensive income and its components in the statement of changes in equity. While the new guidance changes the presentation of comprehensive income, there are no changes to the components that are recognized in net income or other comprehensive income under current accounting guidance. In December 2011, the FASB indefinitely deferred the guidance related to the presentation of reclassification adjustments. This new guidance is effective for fiscal years and interim periods beginning after December 15, 2011. The adoption of the new guidance in the first quarter of 2012 will not have an impact on the Company's consolidated financial position, results of operations, or cash flows.

Fair Value Measurements

In May 2011, the FASB issued new guidance to achieve common fair value measurement and disclosure requirements between U.S. Generally Accepted Accounting Principles (GAAP) and International Financial Reporting Standards. This new guidance amends current fair value measurement and disclosure guidance to include increased transparency around valuation inputs and investment categorization and is effective for fiscal years and interim periods beginning after December 15, 2011. The adoption of the new guidance in the first quarter of 2012 will not have an impact on the Company's consolidated financial position, results of operations, or cash flows.

Note 4 FACILITY CONSOLIDATION AND OTHER COSTS

During the fourth quarter of 2011, the Company initiated a facility consolidation program to improve efficiencies and reduce fixed costs. As a part of this program, both administrative and production workforce levels were reduced during the fourth quarter. The Company has also announced the planned closure of five facilities, two of which were completed by early January 2012. Most of the production from these five facilities will be transferred to other facilities. The total estimated program costs of \$83.4 million, the majority of which relate to our Flexible Packaging segment, include \$28.5 million employee costs, \$30.8 million fixed asset accelerated depreciation and writedowns, and \$24.1 million other facility consolidation costs.

Charges associated with the facility consolidation and other costs totaled \$38.4 million or \$0.24 per share in the fourth quarter of 2011, including \$26.3 million of employee-related costs including severance, pension and other termination benefits, \$11.8 million of fixed assets accelerated depreciation and writedowns, and \$0.3 million of other exit costs. Included in the 2011 employee-related costs is a partial withdrawal liability provision which represents management's best estimate for the cost to exit a multiemployer pension plan related to a facility which is scheduled to cease operations in 2012. Management expects to recognize additional pre-tax charges related to these efforts of approximately \$45 million over the next 15 months, primarily associated with accelerated depreciation, equipment relocation, and lease termination expenses. Cash payments in 2012 are expected to be approximately \$35 million. The costs related to facility consolidation activities have been recorded on the consolidated statement of income as facility consolidation and other costs.

Table of Contents

An analysis of the 2011 facility consolidation and other costs activity follows:

(in thousands)	Employee Costs	Fixed Asset Related	Other Costs	Total Facility Consolidation and Other Costs
2011 Activity				
Total net expense accrued				
Flexible Packaging	\$ 23,115	\$ 11,575	\$ 242	\$ 34,932
Pressure Sensitive	2,744			2,744
Corporate	445	234		679
Charges to accrual account				
Flexible Packaging	(3,389)	(11,575)	(15)	(14,979)
Pressure Sensitive	(199)			(199)
Corporate	327	(234)		93
Reserve balance at December 31, 2011	\$ 23,043	\$	\$ 227	\$ 23,270

Note 5 ACQUISITIONS*Shield Pack*

On December 1, 2011, the Company acquired the common stock of Shield Pack, LLC, a Louisiana manufacturer of high barrier liners for bulk container packaging. The acquisition supports new market applications for bulk liquids and other products requiring barrier packaging. The preliminary purchase price of approximately \$44.5 million was paid in cash and is subject to customary post-closing adjustments. The preliminary purchase price allocation resulted in goodwill of approximately \$24.4 million. The preliminary fair value of assets and liabilities acquired was \$56.1 million and \$11.6 million, respectively.

Mayor Packaging

On August 1, 2011, the Company acquired Mayor Packaging, a privately-owned manufacturer of consumer and specialty flexible packaging including a manufacturing facility in Dongguan, China. The acquisition supports the Company's strategy to enhance its presence in the Asia-Pacific region. The purchase price of approximately \$96.7 million was financed with commercial paper and is subject to customary post-closing adjustments. Under the terms of the agreement, the Company may be required to make additional payments to the sellers of up to \$13 million over three years if certain conditions are met. These payments are recorded as compensation expense within selling, general and administrative expenses in the period accrued based on the likelihood of achieving these milestones. The preliminary allocation of the purchase price resulted in approximately \$42.6 million of goodwill. The preliminary fair value of assets and liabilities acquired was \$116.8 million and \$20.1 million, respectively.

Alcan Packaging Food Americas

On March 1, 2010, the Company completed its acquisition of the Food Americas operations of Alcan Packaging, a business unit of Rio Tinto plc. Under the terms of the \$1.2 billion transaction, the Company acquired 23 Food Americas flexible packaging facilities in the U.S., Canada, Mexico, Brazil, Argentina, and New Zealand, with 2009 net sales of \$1.4 billion. These facilities produce flexible packaging principally for the food and beverage industries and augment the Company's product offerings and technological capabilities.

Edgar Filing: BEMIS CO INC - Form 10-K

In compliance with regulatory requirements for approval of the transaction in the United States, the Company was obligated to divest a portion of the acquired business, which included two facilities. This portion of the business was related primarily to sales of flexible packaging for retail natural cheese products and shrink bag packaging for fresh meat products. The sale of this portion of the business was completed on July 13, 2010 as discussed in Note 6 Discontinued Operations. The 2009 annual net sales associated with the sold business were approximately \$156 million. Operating results associated with this sold business have been classified on the consolidated statement of income as income (loss) from discontinued operations, net of tax.

The total purchase price for the acquisition was as follows:

(in thousands)

Cash consideration	\$	1,210,491
Assumption of liabilities of seller		7,092
	\$	1,217,583

Certain customary working capital adjustments were made to the purchase price in the first quarter of 2011. The majority of the financing for this transaction was completed during the third quarter of 2009 through the issuance of \$800.0 million of public notes and 8.2 million common shares issued in a secondary public stock offering. The remaining cash purchase price was financed in the commercial paper market in advance of closing. The Company incurred \$59.4 million in acquisition-related fees which were recorded in other operating expense in the consolidated statement of income, of which \$15.6 million were incurred in the year ended December 31, 2010 and \$43.8 million were incurred in the year ended December 31, 2009.

The allocation of the purchase price to the assets acquired and liabilities assumed is based on the estimated fair values at the date of acquisition. The allocation resulted in goodwill of approximately \$353.3 million, which is attributed to business synergies and intangible assets that do not meet the criteria for separate recognition. The Company expects that approximately \$308.5 million of this goodwill will be deductible for tax purposes. Other long-term assets include an adjustment of approximately \$17.9 million to record

Table of Contents

assets related to the indemnity provisions of the sale and purchase agreement, and are primarily related to tax matters. The following table summarizes the estimated fair values of the assets acquired and the liabilities assumed at the acquisition date:

(in thousands)	March 1, 2010
Cash and cash equivalents	\$ 22,090
Accounts receivable, net	145,874
Inventories	179,536
Prepaid expenses and other current assets	8,291
Working capital of discontinued operations	8,452
Property and equipment	458,846
Goodwill	353,296
Other intangible assets	130,300
Long-term assets of discontinued operations	63,985
Other long-term assets	19,693
Accounts payable	(125,678)
Accrued salaries and wages	(12,088)
Accrued income and other taxes	139
Deferred income taxes	(2,921)
Long-term liabilities	(32,232)
	\$ 1,217,583

The determination of fair value for acquired intangible assets was primarily based on the discounted expected cash flows. The determination of useful life was based on historical acquisition experience, economic factors, and future cash flows of the assets acquired. The amortization expense related to these intangible assets was \$7.0 million and \$9.1 million for the twelve months ended December 31, 2011 and December 31, 2010, respectively, using straight-line amortization. The fair values and useful lives that have been assigned to the acquired identifiable intangible assets follow:

(in thousands)	Useful Life	Fair Value
Customer relationships	20 years	\$ 87,300
Technology	15 years	39,700
Order backlog	One month	3,300
Total		\$ 130,300

The results of the acquired operations have been included in the consolidated financial statements since the date of acquisition. In accordance with current accounting guidance, income from discontinued operations does not include depreciation or amortization expense.

The following pro forma financial information for the year ended December 31, 2010 reflects the results of operations as if the acquisition of the Food Americas operations of Alcan Packaging had been completed on January 1, 2010. No pro forma results are presented for the year ended December 31, 2011, as the results of the acquired company are included in the actual results. Pro forma adjustments have been made for the elimination of sales of discontinued operations and changes in depreciation and amortization expenses related to the valuation of the acquired fixed and intangible assets and assumed liabilities at fair value, the addition of incremental interest costs related to debt used to finance the acquisition, and the tax benefits related to the increased costs.

Edgar Filing: BEMIS CO INC - Form 10-K

(in thousands)	2010	
Net sales		
Pro forma	\$	5,030,956
As reported		4,835,042
Net income attributable to Bemis Company, Inc.		
Pro forma	\$	211,947
As reported		205,111
Diluted earnings per share		
Pro forma	\$	1.91
As reported		1.85

The pro forma financial information is presented for informational purposes only. It is not necessarily indicative of what the Company's results of operations actually would have been had the Company completed the acquisition as of the beginning of 2010, nor does it purport to project the future operating results of the Company. It also does not reflect any cost savings, operating synergies or revenue enhancements that may be achieved nor the costs necessary to achieve those cost savings, operating synergies, revenue enhancements, or integration efforts.

Acquisition of South American Rigid Packaging Operations of Huhtamaki Oyj

On June 3, 2009, the Company announced that it acquired the South American rigid packaging operations of Huhtamaki Oyj, a global manufacturer of consumer and specialty packaging. This rigid packaging business, which includes three facilities in Brazil and one facility in Argentina, recorded annual net sales of approximately \$86.0 million in 2008, primarily to dairy and food service markets. The purchase price of \$43.0 million was paid with a combination of \$32.3 million cash on hand, \$1.9 million of debt assumed, and an \$8.8

Table of Contents

million note payable to the seller. The note payable to seller matured on May 31, 2010 and has been paid. The fair values of assets and liabilities acquired were \$51.7 million and \$10.9 million, respectively.

Note 6 DISCONTINUED OPERATIONS

As discussed in Note 5 - Acquisitions, the Company was obligated to divest a portion of the acquired Alcan Packaging Food Americas business in the United States in order to comply with regulatory requirements for approval of the transaction. This portion of the business included two facilities and was primarily related to the production and sales of flexible packaging for retail natural cheese products and shrink bag packaging for fresh meat products. The sale of this portion of the business was completed on July 13, 2010 for net cash proceeds of approximately \$75.2 million. Prior to the sale, the assets and liabilities for these operations were segregated as assets and liabilities of discontinued operations on the Company's consolidated balance sheet. The pre-sale goodwill and intangible assets values were adjusted to reflect the Company's updated estimate of fair value of the assets of the discontinued operations less estimated selling costs as of March 1, 2010. This resulted in no gain or loss on the sale of discontinued operations.

From the March 1, 2010, date of the Food Americas acquisition, through the July 13, 2010 sale date, the operating results associated with this portion of the acquired business were classified as discontinued operations. In accordance with current accounting guidance, income from discontinued operations does not include depreciation or amortization expense. The operating results of the discontinued operations from the March 1, 2010 acquisition date through July 13, 2010 included in the consolidated financial statements for the year ended December 31, 2010 follow:

(in thousands)	2010	
Net sales	\$	54,950
Income (loss) before income taxes	\$	2,782
Provision for income taxes		(1,000)
Income (loss) from discontinued operations, net of tax	\$	1,782

Note 7 FINANCIAL ASSETS AND FINANCIAL LIABILITIES MEASURED AT FAIR VALUE

The fair values of the Company's financial assets and financial liabilities listed below reflect the amounts that would be received to sell the assets or paid to transfer the liabilities in an orderly transaction between market participants at the measurement date (exit price).

The Company's non-derivative financial instruments included cash and cash equivalents, accounts receivable, accounts payable, short-term borrowings, and long-term debt. At December 31, 2011 and 2010, the carrying value of these financial instruments, excluding long-term debt, approximates fair value because of the short-term maturities of these instruments.

Fair value disclosures are classified based on the fair value hierarchy. Level 1 fair value measurements represent exchange-traded securities which are valued at quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access as of the reporting date. Level 2 fair value measurements are determined using input prices that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data. Level 3 fair value measurements are determined using unobservable inputs, such as internally developed pricing models for the asset or liability due to little or no market activity for the asset or liability.

Edgar Filing: BEMIS CO INC - Form 10-K

The fair value measurements of the Company's long-term debt, including current maturities, primarily represent exchange-traded securities which are valued at quoted prices (unadjusted) in active markets for identical assets that the Company has the ability to access as of the reporting date. The carrying values and estimated fair values of long-term debt, including current maturities, at December 31, 2011 and 2010 follow:

(in thousands)	December 31, 2011		December 31, 2010	
	Carrying Value	Fair Value (Level 2)	Carrying Value	Fair Value (Level 2)
Total long-term debt	\$ 1,567,532	\$ 1,702,373	\$ 1,285,674	\$ 1,388,019

The fair values for derivatives are based on inputs other than quoted prices that are observable for the asset or liability. These inputs include foreign currency exchange rates and interest rates. The financial assets and financial liabilities are primarily valued using standard calculations / models that use as their basis readily observable market parameters. Industry standard data providers are the primary source for forward and spot rate information for both interest rates and currency rates, with resulting valuations periodically validated through third-party or counterparty quotes.

(in thousands)	Fair Value As of December 31, 2011 (Level 2)	Fair Value As of December 31, 2010 (Level 2)
	Currency swaps net asset (liability) position	\$
Forward exchange contracts net asset (liability) position	(3)	13
Interest rate swaps net asset (liability) position	3,268	

Table of Contents

Note 8 DERIVATIVE INSTRUMENTS

The Company enters into derivative transactions to manage exposures arising in the normal course of business. The Company does not enter into derivative transactions for speculative or trading purposes. The Company recognizes all derivative instruments on the balance sheet at fair value. Derivatives not designated as hedging instruments are adjusted to fair value through income. Depending on the nature of derivatives designated as hedging instruments, changes in the fair value are either offset against the change in fair value of the hedged assets, liabilities, or firm commitments through earnings or recognized in shareholders' equity through other comprehensive income until the hedged item is recognized. Gains or losses, if any, related to the ineffective portion of any hedge are recognized through earnings in the current period.

The Company enters into forward exchange contracts to manage foreign currency exchange rate exposures associated with certain foreign currency denominated receivables and payables. Forward exchange contracts generally have maturities of less than six months and relate primarily to major Western European currencies for the Company's European operations, the U.S. dollar for the Company's Brazilian operations, and the U.S. and Australian dollars for the Company's New Zealand operations. The Company has not designated these derivative instruments as hedging instruments. At December 31, 2011, and December 31, 2010, the Company had outstanding forward exchange contracts with notional amounts aggregating \$9.8 million and \$12.0 million, respectively. The net settlement amount (fair value) related to active forward exchange contracts is recorded on the balance sheet as either a current or long-term asset or liability and as an element of other operating (income) expense, net, which offsets the related transaction gains or losses.

The Company entered into currency swap contracts to manage changes in the fair value of U.S. dollar denominated debt held in Brazil. The contracts effectively converted a portion of that debt to the functional currency of its Brazilian operation. These currency swap contracts generally had maturities that matched the maturities of the underlying debt. The Company had not designated these derivative instruments as hedging instruments. There were no outstanding currency swap contracts as of December 31, 2011. At December 31, 2010, the Company had outstanding currency swap contracts with notional amounts aggregating \$86.4 million. The fair value related to swap contracts was recorded on the balance sheet as either a current or long-term asset or liability and as an element of other non-operating (income) expense, net, which offset the related transaction gains or losses.

The Company enters into interest-rate swap contracts to economically convert a portion of the Company's fixed-rate debt to variable rate debt. During the fourth quarter of 2011, the Company entered into four interest rate swap agreements with a total notional amount of \$400 million. These contracts were designated as hedges of the Company's \$400 million 4.50 percent fixed-rate debt due in 2021. The variable rate for each of the interest rate swaps is based on the six-month London Interbank Offered Rate (LIBOR), set in arrears, plus a fixed spread. The variable rates are reset semi-annually at each net settlement date. The net settlement benefit to the Company, which is recorded as a reduction in interest expense, was \$1.6 million in 2011. At December 31, 2011, the fair value of these interest rate swaps was \$3.3 million, in the Company's favor, using discounted cash flow or other appropriate methodologies, and is included in deferred charges and other assets with a corresponding increase in long-term debt.

The Company is exposed to credit loss in the event of non-performance by counterparties in forward exchange contracts, currency swaps, and interest-rate swap contracts. Collateral is generally not required of the counterparties or of the Company. In the event a counterparty fails to meet the contractual terms of a currency swap or forward exchange contract, the Company's risk is limited to the fair value of the instrument. The Company actively monitors its exposure to credit risk through the use of credit approvals and credit limits, and by selecting major international banks and financial institutions as counterparties. The Company has not had any historical instances of non-performance by any counterparties, nor does it anticipate any future instances of non-performance.

The fair values, balance sheet presentation, and the hedge designation status of derivative instruments at December 31, 2011 and December 31, 2010 are presented in the table below:

Edgar Filing: BEMIS CO INC - Form 10-K

(in thousands)	Balance Sheet Location	Fair Value As of December 31, 2011	Fair Value As of December 31, 2010
Asset Derivatives			
Forward exchange contracts not designated as hedge	Accounts receivable	\$ 57	\$ 90
Interest rate swaps designated as hedge	Deferred charges and other investments	3,268	
Total asset derivatives		\$ 3,325	\$ 90
Liability Derivatives			
Currency swaps not designated as hedge	Accounts payable	\$	\$ 1,368
Forward exchange contracts not designated as hedge	Accounts payable	60	77
Total liability derivatives		\$ 60	\$ 1,445

The income statement impact of derivatives not designated as hedging instruments for the years ended December 31, 2011 and 2010 are presented in the table below:

(in thousands)	Location of Gain (Loss) Recognized in Income on Derivatives	Amount of Gain (Loss) Recognized in Income on Derivatives	
		2011	2010
Forward exchange contracts	Other operating (income) expense, net	\$ 451	\$ 1,288
Currency swap contracts	Other non-operating (income) expense, net	(1,802)	(5,918)
Total		\$ (1,351)	\$ (4,630)

Table of Contents**Note 9 GOODWILL AND OTHER INTANGIBLE ASSETS**

Changes in the carrying amount of goodwill attributable to each reportable business segment follow:

(in thousands)	Flexible Packaging Segment	Pressure Sensitive Materials Segment	Total
Reported balance at December 31, 2009	\$ 594,298	\$ 52,554	\$ 646,852
Acquisition Adjustments	354,154		354,154
Currency translation	12,587	104	12,691
Reported balance at December 31, 2010	961,039	52,658	1,013,697
Acquisition Adjustments	66,161		66,161
Currency translation	(31,162)	(227)	(31,389)
Reported balance at December 31, 2011	\$ 996,038	\$ 52,431	\$ 1,048,469

The components of amortized intangible assets follow:

(in thousands) Intangible Assets	December 31, 2011		December 31, 2010	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Contract based	\$ 20,793	\$ (13,571)	\$ 15,447	\$ (12,468)
Technology based	91,269	(35,287)	92,149	(29,629)
Marketing related	26,304	(13,868)	26,833	(13,253)
Customer based	200,989	(54,154)	168,115	(47,078)
Reported balance	\$ 339,355	\$ (116,880)	\$ 302,544	\$ (102,428)

Amortization expense for intangible assets during 2011, 2010, and 2009 was \$18.1 million, \$18.9 million, and \$9.3 million respectively. Estimated annual amortization expense is \$18.4 million for 2012, \$17.8 million for 2013, and \$16.6 million for each of the years 2014 through 2016.

The Company completed its annual impairment tests in the fourth quarter of 2011 with no indications of impairment of goodwill found. The Company does not have any accumulated impairment losses.

Note 10 PENSION PLANS

Total multiemployer plan, defined contribution, and defined benefit pension expense in 2011, 2010, and 2009 was \$41.9 million, \$44.8 million, and \$29.1 million, respectively. The Company sponsors 401(k) savings plans (a defined contribution plan) for substantially all U.S. employees. The Company contributes \$0.50 for every pre-tax \$1.00 an employee contributes on the first two percent of eligible compensation plus \$0.25 for every pre-tax \$1.00 an employee contributes on the next six percent of eligible compensation for the plans that include a company match. Company contributions are invested in Company stock and are fully vested after three years of service. Total Company contributions for 2011, 2010, and 2009 were \$8.8 million, \$8.2 million, and \$6.6 million, respectively.

Edgar Filing: BEMIS CO INC - Form 10-K

Effective January 1, 2006, the Company's U.S. defined benefit pension plans were amended for approximately two-thirds of the participant population. For those employees impacted, future pension benefits were replaced with the Bemis Investment Profit Sharing Plan (BIPSP), a defined contribution plan which is subject to achievement of certain financial performance goals of the Company. Total contribution expense for BIPSP and other defined contribution plans (including a multiemployer defined contribution plan) was \$11.8 million in 2011, \$17.0 million in 2010, and \$9.5 million in 2009. Defined benefit multiemployer plans cover employees at four different manufacturing locations and provide for contributions to union administered defined benefit pension plans. Amounts charged to pension cost and contributed to the multiemployer plans in 2011, 2010, and 2009 totaled \$1.5 million, \$1.3 million, and \$0.8 million, respectively.

The Company's defined benefit pension plans continue to cover a substantial number of U.S. employees, and the non-U.S. defined benefit plans cover select employees at various international locations. The benefits under the plans are based on years of service and salary levels. Certain plans covering hourly employees provide benefits of stated amounts for each year of service. In addition, the Company also sponsors an unfunded supplemental retirement plan to provide senior management with benefits in excess of limits under the federal tax law and increased benefits to reflect a service adjustment factor.

Net periodic pension cost for defined benefit plans included the following components for the years ended December 31, 2011, 2010, and 2009:

(in thousands)	2011	2010	2009
Service cost - benefits earned during the year	\$ 13,460	\$ 12,876	\$ 12,584
Interest cost on projected benefit obligation	35,267	34,484	33,776
Expected return on plan assets	(40,332)	(39,863)	(40,780)
Settlement gain	(3,283)	(6)	(5)
Curtailement gain	(2,200)

Table of Contents

The accumulated benefit obligation for all defined benefit pension plans was \$741.5 million and \$630.8 million at December 31, 2011, and 2010, respectively.

Presented below are the projected benefit obligation, accumulated benefit obligation, and fair value of plan assets for pension plans with projected benefit obligations in excess of plan assets and pension plans with accumulated benefit obligations in excess of plan assets as of December 31, 2011 and 2010.

(in thousands)	Projected Benefit Obligation Exceeds the Fair Value of Plan's Assets				Accumulated Benefit Obligation Exceeds the Fair Value of Plan's Assets			
	U.S. Plans		Non-U.S. Plans		U.S. Plans		Non-U.S. Plans	
	2011	2010	2011	2010	2011	2010	2011	2010
Projected benefit obligation	\$ 728,557	\$ 612,346	\$ 76,163	\$ 67,064	\$ 728,557	\$ 612,346	\$ 34,777	\$ 36,704
Accumulated benefit obligation	681,561	572,965	59,973	55,279	681,561	572,965	25,328	26,681
Fair value of plan assets	481,398	476,899	58,628	49,632	481,398	476,899	21,177	19,884

The Company's general funding policy is to make contributions as required by applicable regulations and when beneficial to the Company for tax purposes. The employer contributions for the years ended December 31, 2011 and 2010, were \$19.7 million and \$19.2 million, respectively. Total expected cash contributions for 2012 are \$65.2 million which are expected to satisfy plan and regulatory funding requirements.

For each of the years ended December 31, 2011 and 2010, the U.S. pension plans represented approximately 89 percent of the Company's total plan assets and approximately 90 percent of the Company's total projected benefit obligation. Considering the significance of the U.S. pension plans in comparison with the Company's total pension plans, the critical pension assumptions related to the U.S. pension plans and the non-U.S. pension plans are separately presented and discussed below.

The Company's actuarial valuation date is December 31. The weighted-average discount rates and rates of increase in future compensation levels used in determining the actuarial present value of the projected benefit obligation for the years ended December 31 are as follows:

	U.S. Pension Plans		Non-U.S. Pension Plans	
	2011	2010	2011	2010
Weighted-average discount rate	4.25%	5.25%	4.68%	5.13%
Rate of increase in future compensation levels	4.25%	4.25%	3.73%	3.73%

The weighted-average discount rates, expected returns on plan assets, and rates of increase in future compensation levels used to determine the net benefit cost for the years ended December 31 are as follows:

	U.S. Pension Plans			Non-U.S. Pension Plans		
	2011	2010	2009	2011	2010	2009
Weighted-average discount rate	5.25%	5.75%	6.00%	5.28%	5.42%	5.82%
Expected return on plan assets	8.25%	8.25%	8.25%	6.34%	6.25%	6.16%
	4.25%	4.25%	4.25%	3.93%	3.90%	3.90%

Rate of increase in future compensation levels

The Pension Investment Committee appointed by the Company's Board of Directors is responsible for overseeing the investments of the pension plans. The overall investment strategy is to achieve a long-term rate of return that maintains an adequate funded ratio and minimizes the need for future contributions through diversification of asset types, investment strategies, and investment managers. A target asset allocation policy is used to balance investments in equity securities with investments in fixed income securities. The majority of pension plan assets relate to U.S. plans and employ a target asset allocation of 70 percent equity securities and 30 percent fixed income securities. Equity securities primarily include investments in diversified portfolios of domestic large cap and small cap companies. Fixed income securities include diversified investments across a broad spectrum of primarily investment-grade debt securities.

Edgar Filing: BEMIS CO INC - Form 10-K

Table of Contents

The pension plan assets measured at fair value at December 31, 2011 and December 31, 2010 follow:

(in thousands)	2011 U.S. Pension Plans			2011 Non-U.S. Pension Plans		
	Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

Balance at December 31, 2010	\$ 327,217	\$ 153,604	\$ 1,635	\$ 29,748	\$ 4,278	\$ 18,234

(a) This category includes mutual funds that are actively traded on public exchanges. The funds are invested in equity and debt securities that are actively traded on public exchanges.

(b) Common trust funds consist of shares in commingled funds that are not publicly traded. The funds are invested in equity and debt securities that are actively traded on public exchanges.

Edgar Filing: BEMIS CO INC - Form 10-K

(c) The general insurance account is primarily comprised of insurance contracts that guarantee a minimum return.

* The table presenting the fair value of plan assets as of December 31, 2010, does not include a liability related to the U.S. pension plans participation in a securities lending program. The securities lending program authorized the pension plan trustee to lend securities, which are assets of the pension plans, to approved borrowers. The trustee requires that borrowers, pursuant to a securities lending agreement, deliver collateral to secure each loan. Cash collateral received was invested in collateral funds comprised primarily of high quality, short-term investments. As of December 31, 2010, the value of the loans outstanding exceeded the value of the invested collateral by \$5.6 million. At December 31, 2011, the Company was no longer participating in the securities lending program.

The reconciliation of the beginning and ending balances of the fair value measurements using significant unobservable inputs (Level 3) for the years ended December 31, 2011 and 2010 follows:

(in thousands)	U.S. Govt. Debt Securities	Corporate Debt Securities	General Insurance Account
Fair value of plan assets at December 31, 2009	\$ 7,981	\$ 2,767	\$ 19,728

Foreign currency exchange rate changes			(682)
Fair value of plan assets at December 31, 2011	\$	\$ 2,653	\$ 19,055

* Transfers into and out of Level 3 are due to availability of observable market data for the same or similar securities.

Table of Contents

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid:

(in thousands)	U.S. Pension Plans		Non-U.S. Pension Plans	
2012	\$	57,841	\$	1,910
2013		31,660		4,062
2014		40,198		4,151
2015		36,928		3,526
2016		39,191		8,198
Years 2017-2021		204,720		17,063

As of January 1, 2012, the expected long-term annual rate of return on plan assets was assumed to be 8.00 percent, which is a reduction of 0.25 percent from the Company's January 1, 2011 assumption. To develop the expected long-term rate of return on assets assumption, the Company considered historical returns and future expectations. Using historical long-term investment periods of 10, 15, 20, and 25 years ended December 31, 2011, the Company's pension plan assets have earned annualized rates of return of 3.7 percent, 6.4 percent, 7.4 percent, and 8.2 percent, respectively. Using the Company's 2012 target asset allocation for plan assets of 60 percent equity securities and 40 percent fixed income securities, the Company's outside actuaries have used their independent economic model to calculate a range of expected long-term rates of return and, based on their results, the Company has determined these assumptions to be reasonable.

At the end of each year, the Company determines the discount rate to be used to calculate the present value of its U.S. pension plan liabilities. This discount rate is an estimate of the current interest rate at which pension liabilities could be effectively settled at the end of the year. In estimating this rate, the Company looks to rates of return on high quality, fixed income investments that receive one of the two highest ratings given by a recognized ratings agency. For the years ended December 31, 2011 and 2010, the Company determined this rate to be 4.25 percent and 5.25 percent, respectively. For non-U.S. pension plans, similar methodologies are followed in determining the appropriate expected rates of return on assets and discount rates to be used in the actuarial calculations in each individual country.

Note 11 POSTRETIREMENT BENEFITS OTHER THAN PENSIONS

The Company sponsors several defined postretirement benefit plans that cover a majority of salaried and a portion of nonunion hourly employees. These plans provide health care benefits and, in some instances, provide life insurance benefits. Postretirement health care plans are contributory, with retiree contributions adjusted annually. Life insurance plans are noncontributory.

Net periodic postretirement benefit costs included the following components for the years ended December 31, 2011, 2010, and 2009:

(in thousands)	2011		2010		2009	
Service cost - benefits earned during the year	\$	327	\$	305	\$	224
Interest cost on accumulated postretirement benefit obligation		440		446		610
Amortization of prior service (credit)		(642)		(750)		(454)
Recognized actuarial net (gain)		(436)		(464)		(524)
Net periodic postretirement benefit (income)	\$	(311)	\$	(463)	\$	(144)

Edgar Filing: BEMIS CO INC - Form 10-K

Changes in benefit obligation and plan assets, and a reconciliation of the funded status at December 31, 2011 and 2010, are as follows:

(in thousands)	2011		2010	
Change in Benefit Obligation				
Benefit obligation at the beginning of the year	\$	7,807	\$	9,987

Table of Contents

(in thousands)	2011	2010
Amount recognized in consolidated balance sheet consists of:		
Accrued benefit liability, current	\$ (707)	\$ (677)
Accrued benefit liability, non-current	(8,710)	(7,130)
Deferred tax liability	(3,080)	(4,311)
Accumulated other comprehensive income	(5,202)	(7,153)
Net amount recognized in consolidated balance sheet	\$ (17,699)	\$ (19,271)

Accumulated other comprehensive income related to other postretirement benefit plans is as follows:

(in thousands)	2011	2010
Unrecognized net actuarial losses (gains)	\$ (4,589)	\$ (6,183)
Unrecognized net prior service costs (benefits)	(3,693)	(5,281)
Tax expense (benefit)	3,080	4,311
Accumulated other comprehensive loss (income), end of year	\$ (5,202)	\$ (7,153)

Estimated amounts in accumulated other comprehensive income expected to be reclassified to net period cost during 2012 are as follows:

(in thousands)	
Net actuarial (gains) losses	\$ (304)
Net prior service costs (benefits)	(643)
Total	\$ (947)

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid:

(in thousands)	Benefit Payments
2012	\$ 706
2013	676
2014	702
2015	724
2016	736
Years 2017-2021	4,012

The employer contributions for the years ended December 31, 2011 and 2010, were \$1.2 million and \$1.1 million, respectively. The expected contribution for 2012 is \$0.7 million which is expected to satisfy plan funding requirements.

The health care cost trend rate assumption affects the amounts reported. For measurement purposes, the assumed annual rate of increase in the per capita cost of covered health care benefits was 8.0 percent for 2011 and was 8.5 percent for 2010; each year's estimated rate was assumed to decrease gradually to 5.0 percent and remain at that level thereafter. The annual incremental decrease was assumed to be one-half percent for both 2011 and 2010. A one-percentage point change in assumed health care trends would have the following effects:

Edgar Filing: BEMIS CO INC - Form 10-K

(in thousands)	One Percentage Point Increase		One Percentage Point Decrease	
Effect on total of service and interest cost components for 2011	\$	4	\$	(3)
Effect on postretirement benefit obligation at December 31, 2011		65		(60)

The Company's actuarial valuation date is December 31. The weighted-average discount rates used to determine the actuarial present value of the net postretirement projected benefit obligation for the years ended December 31, 2011 and 2010 were 4.25 percent and 5.25 percent, respectively. The weighted-average discount rates used to determine the net postretirement benefit cost was 5.25 percent, 5.75 percent, and 6.00 percent for the years ended December 31, 2011, 2010, and 2009, respectively.

Note 12 MULTIEMPLOYER DEFINED BENEFIT PENSION PLANS

The Company contributes to three multiemployer defined benefit pensions plans under the terms contained in four collective bargaining agreements. The risks of participating in these multiemployer plans are different from single-employer plans in the following aspects:

- a. Assets contributed to the multiemployer plan by one employer may be used to provide benefits to employees of other participating employers.
- b. If a participating employer stops contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers.
- c. If the Company chooses to stop participating in a multiemployer plan, the Company may be required to pay that plan an amount based on the underfunded status of the plan, referred to as a withdrawal liability.

Table of Contents

The Company recorded charges related to the partial withdrawal from the GCIU Employer Retirement Fund as part of its facility consolidation activities. The expense recorded represents the Company's best estimate of the expected partial withdrawal liability. There were no similar charges recorded for the years ended December 31, 2010 and 2009. While it is not possible to quantify the potential impact of future actions, further reductions in participation or withdrawal from these multiemployer pension plans could have a material impact on the Company's consolidated annual results of operations, financial position, or cash flows.

The Company's participation in these plans for the annual period ended December 31, 2011, 2010, and 2009 is outlined in the table below.

Multiemployer Pension Fund	EIN/Pension Plan Number	Pension Protection Act Zone Status		FIP/RP Status Implemented	Company Contributions (in thousands)			Surcharge Imposed	Expiration Date of Bargaining Agreement
		2011	2010		2011	2010	2009		
Central States Southeast and Southwest Areas Pension Fund	36-6044243/001	Red	Red	Yes	\$ 859	\$ 782	\$ 711	No	5/15/12
Warehouse Employees Local 169 & Employers Joint Pension Fund	23-6230368/001	Red	Red	Yes	76	66	62	Yes	5/31/12
GCIU Employer Retirement Fund	91-6024903/001	Red	Red	Yes	519	478	N/A	Yes	07/31/12-04/30/13(a)
					\$ 1,454	\$ 1,326	\$ 773		

(a) The Company is party to two significant collective-bargaining agreements that require contributions to GCIU - Employer Retirement Fund. The agreement for the Company's Newark, CA facility expires on July 31, 2012 and the agreement for the Company's Minneapolis, MN facility expires on April 30, 2013.

The EIN Number column provides the Employer Identification Number (EIN). Unless otherwise noted, the most recent Pension Protection Act (PPA) zone status available in 2011 and 2010 is for the plan's year-end at December 31, 2010 and December 31, 2009, respectively. The zone status is based on information that the Company received from the plan and is certified by the plan's actuary. Among other factors, plans in the red zone are generally less than 65 percent funded, plans in the yellow zone are less than 80 percent funded, and plans in the green zone are at least 80 percent funded. The FIP/RP Status Implemented column indicates plans for which a Financial Improvement Plan (FIP) or a Rehabilitation Plan (RP) has been implemented.

Note 13 STOCK INCENTIVE PLANS

The Company's 2007 (adopted in 2006) Stock Incentive Plan provides for the issuance of up to 6,000,000 shares of common stock to certain employees. The plan expires 10 years after its inception, at which point no further stock options or performance units (commonly referred to as stock awards) may be granted. As of December 31, 2011, 2010, and 2009, respectively, 4,378,338, 4,541,522, and 5,674,004 shares were

Edgar Filing: BEMIS CO INC - Form 10-K

available for future grants under these plans. Shares forfeited by an employee become available for future grants.

Stock Options

Stock options have not been granted since 2003 and all stock options outstanding at December 31, 2011 are fully vested. Stock options were granted at prices equal to fair market value on the date of the grant and are exercisable, upon vesting, over varying periods up to ten years from the date of grant. Stock options for directors vested immediately, while options for Company employees generally vested over three years (one-third per year). Details of the exercisable stock options are presented in the table below:

(dollars in thousands, except per share amounts)	Aggregate Intrinsic Value	Number of Options	Per Share Option Price Range	Weighted-Average Exercise Price Per Share
Exercisable at December 31, 2008	\$ 5,467	1,389,338	\$15.86 - \$26.95	\$ 19.75
Exercised in 2009	\$ 4,906	(563,156)	\$15.86 - \$17.44	\$ 17.40
Exercisable at December 31, 2009	\$ 6,860	826,182	\$16.78 - \$26.95	\$ 21.35
Exercised in 2010	\$ 5,988	(575,236)	\$16.78 - \$24.82	\$ 19.87
Exercisable at December 31, 2010	\$ 1,991	250,946	\$22.04 - \$26.95	\$ 24.72
Exercised in 2011	\$ 1,389	(173,506)	\$22.04 - \$25.22	\$ 24.65
Exercisable at December 31, 2011	\$ 402	77,440	\$24.82 - \$26.95	\$ 24.88

The weighted-average remaining contractual life of the outstanding and exercisable options at December 31, 2011 was 1.0 years.

Table of Contents*Stock Awards*

Distribution of stock awards is made in the form of shares of the Company's common stock on a one for one basis. Distribution of the shares will normally be made not less than three years, nor more than six years, from the date of the stock award grant. Stock awards for directors vest immediately. All other stock awards granted under the plans are subject to restrictions as to continuous employment, except in the case of death, permanent disability, or retirement. Approximately 38 percent of the stock awards granted in 2011 and 18 percent of stock awards granted in 2010 are also subject to the degree to which specified total shareholder return conditions are satisfied. In addition, cash payments are made during the vesting period on the outstanding stock awards granted prior to January 1, 2010, equal to the dividend on the Company's common stock. Cash payments equal to dividends on awards made on or after January 1, 2010, will be distributed at the same time as the shares of common stock to which they relate. The cost of the award is based on the fair market value of the stock on the date of grant and is charged to income over the requisite service period. Total compensation expense related to stock incentive plans was \$16.3 million in 2011, \$18.4 million in 2010, and \$19.0 million in 2009.

As of December 31, 2011, the unrecorded compensation cost for stock awards was \$33.6 million and will be recognized over the remaining vesting period for each grant which ranges between 2012 and 2015. The remaining weighted-average life of all stock awards outstanding as of December 31, 2011 was 2.1 years. These awards are considered equity-based awards and are therefore classified as a component of additional paid-in capital.

The following table summarizes stock awards unit activity for the three years ended December 31, 2011:

	2011	2010	2009
Outstanding units granted at the beginning of the year	3,158,335	3,303,137	3,342,414
Units Granted	357,791	1,344,084	285,470
Units Paid (in shares)	(406,711)	(1,277,284)	(280,858)
Units Canceled	(218,117)	(211,602)	(43,889)
Outstanding units granted at the end of the year	2,891,298	3,158,335	3,303,137
Aggregate intrinsic value at year end of outstanding awards, in thousands	\$ 86,970	\$ 103,053	\$ 97,938

Note 14 LONG-TERM DEBT

Debt consisted of the following at December 31,

(dollars in thousands)	2011	2010
Commercial paper payable through 2012 at a weighted-average interest rate of 0.4%	\$ 46,500	\$ 158,750
Notes payable in 2012 at an interest rate of 4.875%	300,000	300,000
Industrial revenue bond payable in 2012 at an interest rate of 1.6%	8,000	8,000
Notes payable in 2014, at an interest rate of 5.65% less unamortized discount of \$349 and \$484, respectively	399,651	399,516
	399,062	398,939

Edgar Filing: BEMIS CO INC - Form 10-K

Notes payable in 2019, at an interest rate of 6.8% less unamortized discount of \$938 and \$1,061, respectively		
Notes payable in 2021, at an interest rate of 4.5% includes \$3,268 fair value of interest rate swap, less unamortized discount of \$2,534	400,734	
Debt of subsidiary companies payable through 2013 at interest rates of 7.3% to 20.6%	13,585	20,469
Obligations under capital leases	629	792
Total debt	1,568,161	1,286,466
Less current portion	13,411	2,941
Total long-term debt	\$ 1,554,750	\$ 1,283,525

The commercial paper, \$300 million notes, and Industrial Revenue Bond, all due in 2012, have been classified as long-term debt, to the extent of available long-term backup credit agreements, in accordance with the Company's intent and ability to refinance such obligations on a long-term basis. The weighted-average interest rate of commercial paper outstanding at December 31, 2011, was 0.4 percent. The maximum outstanding during 2011 was \$574.5 million, and the average outstanding during 2011 was \$289.8 million. The weighted-average interest rate during 2011 was 0.4 percent.

As of December 31, 2011, the Company had available from its banks an \$800 million revolving credit facility. This credit facility is used principally as back-up for the Company's commercial paper program and expires on July 21, 2016. The revolving credit facility is supported by a group of major U.S. and international banks. Covenants imposed by the revolving credit facility include limits on the sale of businesses, minimum net worth calculations, and a maximum ratio of debt to total capitalization. The revolving credit agreement includes a combined \$100 million multicurrency limit to support the financing needs of the Company's international subsidiaries.

Table of Contents

On July 27, 2009, the Company issued \$400 million of notes due in 2014 with a fixed interest rate of 5.7 percent and \$400 million of notes due in 2019 with a fixed interest rate of 6.8 percent. The proceeds of these notes were used as partial funding of the acquisition of the Alcan Packaging Food Americas business.

On October 4, 2011, the Company issued \$400 million of notes due in 2021 with a fixed interest rate of 4.5 percent. The Company used the net proceeds of the notes to repay outstanding commercial paper and for general corporate purposes. The Company intends to fund the repayment of its \$300 million aggregate principal amount of 4.875 percent notes due April 1, 2012 with the proceeds from additional commercial paper issuances. Concurrent with the issuance, the Company entered into four interest rate swap agreements with a total notional amount of \$400 million. These contracts were designated as hedges of the Company's \$400 million 4.5 percent fixed-rate debt due in 2021. The variable rate for each of the interest rate swaps is based on the six-month London Interbank Offered Rate (LIBOR), set in arrears, plus a fixed spread. The variable rates are reset semi-annually at each net settlement date. The net settlement benefit to the Company, which is recorded as a reduction in interest expense, was \$1.6 million in 2011. At December 31, 2011, the fair value of these interest rate swaps was \$3.3 million, in the Company's favor, using discounted cash flow or other appropriate methodologies, and is included in deferred charges and other assets with a corresponding increase in long-term debt.

The industrial revenue bond has a variable interest rate which is determined weekly by a Remarketing Agent based on similar debt then available. The interest rate at December 31, 2011, was 1.6 percent and the weighted-average interest rate during 2011 was 1.7 percent.

Long-term debt maturing in years 2012 through 2016 is \$321.4 million, \$47.1 million, \$399.8 million, \$0 million, and \$0 million, respectively. Certain of these amounts have been classified as long term liabilities in accordance with the Company's ability and intent to refinance such obligations on a long term basis. The Company is in compliance with all debt covenants.

Note 15 LEASES

The Company has leases for manufacturing plants, land, warehouses, machinery and equipment, and administrative offices that expire at various times over the next 90 years. Under most leasing arrangements, the Company pays the property taxes, insurance, maintenance, and other expenses related to the leased property. Total rental expense under operating leases was approximately \$17.8 million in 2011, \$13.9 million in 2010, and \$10.6 million in 2009.

Minimum future obligations on leases in effect at December 31, 2011, were:

(in thousands)	Operating Leases
2012	\$ 11,495
2013	9,137
2014	7,094
2015	5,745
2016	4,642
Thereafter	33,379

Total minimum obligations	\$	71,492
---------------------------	----	--------

Note 16 INCOME TAXES

(in thousands)	2011		2010		2009	
U.S. income before income taxes	\$	188,641	\$	221,576	\$	148,447
Non-U.S. income before income taxes		103,582		105,708		91,863
Income before income taxes	\$	292,223	\$	327,284	\$	240,310
Income tax expense consists of the following components:						
Current tax expense:						
U.S. federal	\$	49,310	\$	70,894	\$	51,921
Foreign		31,225		28,689		26,019
State and local		859		9,925		4,904
Total current tax expense		81,394		109,508		82,844
Deferred tax expense:						
U.S. federal		13,267		2,017		(22)
Foreign		5,126		5,734		4,232
State and local		5,113		341		746

Total income tax expense	\$	104,900	\$	117,600	\$	87,800

Edgar Filing: BEMIS CO INC - Form 10-K

Table of Contents

The tax effects of temporary differences that give rise to the deferred tax assets and deferred tax liabilities are presented below.

(in thousands)	2011	2010
Deferred Tax Assets:		
Accounts receivable, principally due to allowances for returns and doubtful accounts	\$ 9,511	\$ 7,458
Inventories, principally due to additional costs inventoried for tax purposes	25,890	17,949
Employee compensation and benefits accrued for financial reporting purposes	141,228	99,487
Foreign net operating losses	22,524	18,910
Foreign tax credits	9,001	6,650
Other	4,583	3,706
Total deferred tax assets	212,737	154,160
Less valuation allowance	(31,590)	(29,682)
Total deferred tax assets, after valuation allowance	\$ 181,147	\$ 124,478

(in thousands)	2011	2010
Deferred Tax Liabilities:		
Plant and equipment, principally due to differences in depreciation, capitalized interest, and capitalized overhead	\$ 149,002	\$ 137,560
Goodwill and intangible assets, principally due to differences in amortization	129,205	86,313
Other	3,546	60
Total deferred tax liabilities	281,753	223,933
Deferred tax liabilities, net	\$ 100,606	\$ 99,455

The net deferred tax liabilities are reflected in the balance sheet as follows:

(in thousands)	2011	2010
Deferred tax assets (included in prepaid expense and other current assets)	\$ 74,979	\$ 58,834
Deferred tax liabilities	175,585	158,289
Net deferred tax liabilities	\$ 100,606	\$ 99,455

The Company's effective tax rate differs from the federal statutory rate due to the following items:

(dollars in thousands)	2011		2010		2009	
	Amount	% of Income Before Tax	Amount	% of Income Before Tax	Amount	% of Income Before Tax
Computed expected tax expense on income before taxes at federal statutory rate	\$ 102,278	35.0%	\$ 114,549	35.0%	\$ 84,109	35.0%
Increase (decrease) in taxes resulting from:						
State and local income taxes net of federal	3,881	1.3	6,673	2.0	3,672	1.5

Edgar Filing: BEMIS CO INC - Form 10-K

income tax benefit						
Foreign tax rate differential	(626)	(0.2)	(3,383)	(1.0)	(2,181)	(0.9)
Manufacturing tax benefits	(4,200)	(1.4)	(5,775)	(1.8)	(3,710)	(1.5)
Other	3,567	1.2	5,536	1.7	5,910	2.4
Actual income tax expense	\$ 104,900	35.9%	\$ 117,600	35.9%	\$ 87,800	36.5%

As of December 31, 2011, the Company had foreign net operating loss carryovers of approximately \$69.6 million that are available to offset future taxable income. Approximately \$21.1 million of the carryover expires over the period 2014-2023. The balance has no expiration. In addition, the Company had \$9.0 million of foreign tax credit carryover that is available to offset future tax. This carryover expires in the year 2018.

Current authoritative guidance issued by the FASB requires that a valuation allowance be established when it is more likely than not that all or a portion of deferred tax assets will not be realized. The Company has, and continues to generate, both net operating losses and deferred tax assets in certain jurisdictions for which a valuation allowance is required. The Company's management determined that a valuation allowance of \$31.6 million and \$29.7 million against deferred tax assets primarily associated with the foreign net operating loss carryover and the foreign tax credit carryover was necessary at December 31, 2011 and 2010, respectively.

Table of Contents

Provision has not been made for U.S. or additional foreign taxes on \$305.4 million of undistributed earnings of foreign subsidiaries because those earnings are considered to be indefinitely reinvested in the operations of those subsidiaries. It is not practical to estimate the amount of tax that might be payable on the eventual remittance of such earnings.

The Company had total unrecognized tax benefits of \$25.6 million and \$24.0 million for the years ended December 31, 2011 and 2010 respectively. The approximate amount of unrecognized tax benefits that would impact the effective income tax rate if recognized in any future periods was \$18.5 million and \$16.8 million for the years ended December 31, 2011 and 2010, respectively.

A reconciliation of the beginning and ending amount of unrecognized tax benefits, in millions, is as follows:

	2011		2010	
Balance at beginning of year	\$	24.0	\$	11.6
Additions based on tax positions related to the current year		2.0		1.3
Additions for tax positions of prior years		5.9		13.0
Reductions for tax positions of prior years		(1.2)		(0.7)
Reductions due to a lapse of the statute of limitations		(1.2)		(0.8)
Settlements		(3.9)		(0.4)
Balance at end of year	\$	25.6	\$	24.0

The Company recognizes interest and penalties related to unrecognized tax benefits as components of income tax expense. The Company had approximately \$6.9 million and \$7.8 million accrued for interest and penalties, net of tax benefits, at December 31, 2011 and 2010, respectively.

As a result of the 2010 acquisition of the Food Americas operations of Alcan Packaging, the Company recorded \$7.7 million of unrecognized tax benefits and \$6.7 million of interest and penalties as of December 31, 2010 related to pre-acquisition tax positions of prior years. A corresponding asset related to the indemnity provisions was also recorded for these amounts.

During the next 12 months it is reasonably possible that a reduction of gross unrecognized tax benefits will occur in an amount of up to \$6.0 million as a result of the resolution of positions taken on previously filed returns.

The Company and its subsidiaries are subject to U.S. federal and state income tax as well as income tax in multiple international jurisdictions. The Company's U.S. federal income tax returns prior to 2010 have been audited and settled. With few exceptions, the Company is no longer subject to examinations by tax authorities for years prior to 2006 in the significant jurisdictions in which it operates.

Note 17 ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The components of total other comprehensive income (loss) are as follows:

Edgar Filing: BEMIS CO INC - Form 10-K

(in thousands)	2011	2010
Comprehensive income (loss) attributable to Bemis Company, Inc.	\$ (9,444)	\$ 223,771
Comprehensive income (loss) attributable to Noncontrolling interests	5,283	7,730
Total comprehensive income (loss)	\$ (4,161)	\$ 231,501

The components of accumulated other comprehensive income (loss) are as follows as of December 31:

(in thousands)	2011	2010	2009
Foreign currency translation	\$ 128,813	\$ 243,344	\$ 220,297
Pension and other postretirement liability adjustment, net of deferred tax effect of \$130,058, \$92,154 and \$90,009	(219,689)	(152,885)	(149,025)
Unrecognized gain on derivative, net of deferred tax effect of \$85, \$421 and \$758	132	658	1,185
Accumulated other comprehensive income (loss)	\$ (90,744)	\$ 91,117	\$ 72,457

Note 18 NONCONTROLLING INTERESTS

During the third quarter of 2011, the Company completed the purchase of the shares owned by the noncontrolling interest of its Brazilian subsidiary, Dixie Toga, Ltda. (formerly Dixie Toga, S.A.), for approximately \$90 million. The remaining outstanding equity in American Plast S.A. was acquired by the Company during the first quarter of 2011 and the first quarter of 2010 for approximately \$14 million. The Company acquired the remaining outstanding equity in Insit Embalagens Ltda. in the first quarter of 2010 for approximately \$2 million. In accordance with current accounting guidance, the differences between the total consideration amounts paid and the noncontrolling interest adjustments were recorded as adjustments to capital in excess of par value. The following table summarizes the effects of changes in the Company's ownership interest in its subsidiaries on the Company's equity:

Table of Contents

(in thousands)	2011	2010
Net income attributable to Bemis Company, Inc.	\$ 184,081	\$ 205,111
Transfers to noncontrolling interests:		
Decrease in Bemis Company, Inc.'s capital in excess of par value due to purchase of Dixie Toga S.A. preferred shares	(48,115)	
Decrease in Bemis Company, Inc.'s capital in excess of par value due to purchase of American Plast S.A. common shares	(170)	(6,016)
Decrease in Bemis Company, Inc.'s capital in excess of par value due to purchase of Insit Embalagens Ltda. common shares		(1,991)
Net transfers to noncontrolling interests	(48,285)	(8,007)
Change from net income attributable to Bemis Company, Inc. and transfers to noncontrolling interests	\$ 135,796	\$ 197,104

Note 19 EARNINGS PER SHARE COMPUTATIONS

In accordance with current accounting guidance, unvested share-based payment awards that contain nonforfeitable rights to receive dividends or dividend equivalents (whether paid or unpaid) are participating securities, and thus, should be included in the two-class method of computing earnings per share. Participating securities under this statement include a portion of the Company's unvested employee stock awards, which receive nonforfeitable cash payments equal to the dividend on the Company's common stock. The calculation of earnings per share for common stock shown below excludes the income attributable to the participating securities from the numerator and excludes the dilutive impact of those awards from the denominator.

(in thousands, except per share amounts)	2011	2010	2009
Numerator			
Net income attributable to Bemis Company, Inc.	\$ 184,081	\$ 205,111	\$ 147,221
Income allocated to participating securities	(2,689)	(3,691)	(4,583)
Net income available to common shareholders (1)	\$ 181,392	\$ 201,420	\$ 142,638
Denominator			
Weighted-average common shares outstanding - basic	104,629	108,662	103,447
Dilutive shares	443	88	154
Weighted-average common and common equivalent shares outstanding - diluted	105,072	108,750	103,601
Per common share income			
Basic	\$ 1.73	\$ 1.85	\$ 1.38
Diluted	\$ 1.73	\$ 1.85	\$ 1.38

(1) Basic weighted-average common shares outstanding	104,629	108,662	103,447
Basic weighted-average common shares outstanding and participating securities	106,180	110,653	106,771
Percentage allocated to common shareholders	98.5%	98.2%	96.9%

Certain stock options and stock awards outstanding were not included in the computation of diluted earnings per share above because they would not have had a dilutive effect. The excluded stock options and stock awards represented an aggregate of 1,244,773 shares at December 31, 2010. There were no such options or shares outstanding at December 31, 2011 or 2009.

Note 20 COMMITMENTS AND CONTINGENCIES

Edgar Filing: BEMIS CO INC - Form 10-K

The Company is involved in a number of lawsuits incidental to its business, including environmental related litigation and routine litigation arising in the ordinary course of business. Although it is difficult to predict the ultimate outcome of these cases, management believes, except as discussed below, that any ultimate liability would not have a material adverse effect on the Company's consolidated financial condition or results of operations.

Environmental Matters

The Company is a potentially responsible party (PRP) pursuant to the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (commonly known as Superfund) and similar state laws in proceedings associated with seventeen sites around the United States. These proceedings were instituted by the United States Environmental Protection Agency and certain state environmental agencies at various times beginning in 1983. Superfund and similar state laws create liability for investigation and remediation in response to releases of hazardous substances in the environment. Under these statutes, joint and several liability may be imposed on waste generators, site owners and operators, and others regardless of fault. Although these regulations could require the Company to remove or mitigate the effects on the environment at various sites, perform remediation work at such sites, or pay damages for loss of use and non-use values, the Company expects its liability in these proceedings to be limited to monetary damages. The Company expects its future liability relative to these sites to be insignificant, individually and in the aggregate. The Company has reserved an amount that it believes to be adequate to cover its exposure.

São Paulo Tax Dispute

Dixie Toga Ltda., acquired by the Company on January 5, 2005, is involved in a tax dispute with the City of São Paulo, Brazil. The City imposes a tax on the rendering of printing services. The City has assessed this city services tax on the production and sale of

Table of Contents

printed labels and packaging products. Dixie Toga, along with a number of other packaging companies, disagree and contend that the city services tax is not applicable to its products and that the products are subject only to the state value added tax (VAT). Under Brazilian law, state VAT and city services tax are mutually exclusive and the same transaction can be subject to only one of those taxes. Based on a ruling from the State of São Paulo, advice from legal counsel, and long standing business practice, Dixie Toga appealed the city services tax and instead continued to collect and pay only the state VAT.

The City of São Paulo disagreed and assessed Dixie Toga the city services tax for the years 1991-1995. The assessments for those years are estimated to be approximately \$58.5 million at the date the Company acquired Dixie Toga, translated to U.S. dollars at the December 31, 2011 exchange rate. Dixie Toga challenged the assessments and ultimately litigated the issue in two annulment actions filed on November 24, 1998 and August 16, 1999 in the Lower Tax Court in the city of São Paulo. A decision by the Lower Tax Court in the city of São Paulo in 2002 cancelled all of the assessments for the years 1991-1995. The City of São Paulo, the State of São Paulo, and Dixie Toga had each appealed parts of the lower court decision. On February 8, 2010, the São Paulo Court of Justice issued a Decision in favor of Dixie Toga. This Decision has been appealed by the City of São Paulo. In the event of a successful appeal by the City and an adverse resolution, the estimated amount for these years could be substantially increased for additional interest, monetary adjustments and costs from the date of acquisition.

The City has also asserted the applicability of the city services tax for the subsequent years 1996-2001 and has issued assessments for those years for Dixie Toga and for Itap Bemis Ltda., a Dixie Toga subsidiary. The assessments for those years were upheld at the administrative level and are being challenged by the companies. The assessments at the date of acquisition for these years for tax and penalties (exclusive of interest and monetary adjustments) are estimated to be approximately \$8.8 million for Itap Bemis and \$28.4 million for Dixie Toga, translated to U.S. dollars at the December 31, 2011 exchange rate. In the event of an adverse resolution, the estimated amounts for these years could be increased by \$47.9 million for Itap Bemis and \$142.2 million for Dixie Toga for interest, monetary adjustments and costs.

The 1996-2001 assessments for Dixie Toga are currently being challenged in the courts. In pursuing its challenge through the courts, taxpayers are generally required, in accordance with court procedures, to pledge assets as security for its lawsuits. Under certain circumstances, taxpayers may avoid the requirement to pledge assets. Dixie Toga has secured a court injunction that avoids the current requirement to pledge assets as security for its lawsuit related to the 1996-2001 assessments.

The City has also asserted the applicability of the city services tax for the subsequent years 2004-2009. The assessments issued by the City for these years have been received and are being challenged by the Company at the administrative level. The assessments for tax, penalties, and interest are estimated to be approximately \$41.7 million, translated to U.S. dollars at the December 31, 2011 exchange rate.

The Company strongly disagrees with the City's position and intends to vigorously challenge any assessments by the City of São Paulo. The Company is unable at this time to predict the ultimate outcome of the controversy and as such has not recorded any liability related to this matter. An adverse resolution could be material to the consolidated results of operations and/or cash flows of the period in which the matter is resolved.

Brazil Investigation

On September 18, 2007, the Secretariat of Economic Law (SDE), a governmental agency in Brazil, initiated an investigation into possible anti-competitive practices in the Brazilian flexible packaging industry against a number of Brazilian companies including a Dixie Toga subsidiary. The investigation relates to periods prior to the Company's acquisition of control of Dixie Toga and its subsidiaries. Given the preliminary nature of the proceedings, the Company is unable at the present time to predict the outcome of this matter.

Multiemployer Defined Benefit Pension Plans

The Company contributes to three multiemployer defined benefit pension plans based on obligations arising under collective bargaining agreements covering union-represented employees. The Company does not directly manage these multiemployer pension plans, which are generally managed by boards of trustees, half of whom are appointed by the unions and the other half by employers contributing to the plans. Based on the information provided by the plan administrators, the Company is aware that these plans are underfunded. In addition, pension-related legislation requires underfunded pension plans to improve their funding ratios within prescribed intervals based on the level of their underfunding. As a result, the Company expects its contributions to these plans to increase in the future.

Under current law regarding multiemployer defined benefit plans, a plan's termination, the Company's voluntary withdrawal, or the mass withdrawal of all contributing employers from any underfunded multiemployer pension plan would require the Company to make payments to the plan for the Company's proportionate share of the multiemployer pension plan's unfunded vested liabilities. Based on the information available from plan administrators, the Company estimates its share of withdrawal liability on its multiemployer pension plans to be approximately \$34.0 million based on a voluntary withdrawal. This estimate excludes amounts for which the company has recorded withdrawal liabilities as part of its facility consolidation and other costs program. The majority of the plans in which the company participates have a calendar year-end valuation date. As such, the majority of the estimated withdrawal liability results from plans for which the valuation date was December 31, 2010. Due to lack of current information, the Company believes that its current share of the withdrawal liability could materially differ from this estimate. In addition, if a multiemployer defined benefit pension plan fails to satisfy certain minimum funding requirements, the IRS may impose a nondeductible excise tax of 5 percent on the amount of the accumulated funding deficiency for those employers contributing to the fund.

The Company recorded charges related to the partial withdrawal from the GCIU Employee Retirement Fund as part of the Company's 2011 facility consolidation program. The expense recorded represents the Company's best estimate of the expected settlement of these partial withdrawal liabilities. While it is not possible to quantify the potential impact of future actions, further reductions in

Table of Contents

participation or withdrawal from these multiemployer pension plans could have a material impact on the Company's consolidated annual results of operations, financial position, or cash flows.

Note 21 SEGMENTS OF BUSINESS

The Company's business activities are organized around and aggregated into its two principal business segments, Flexible Packaging and Pressure Sensitive Materials, based on their similar economic characteristics, products, production process, types of customers, and distribution methods. Both internal and external reporting conform to this organizational structure, with no significant differences in accounting policies applied. Minor intersegment sales are generally priced to reflect nominal markups. The Company evaluates the performance of its segments and allocates resources to them based primarily on operating profit, which is defined as profit before general corporate expense, interest expense, other non-operating (income) expense, income taxes, and noncontrolling interests. While there are similarities in selected technology and manufacturing processes utilized between the Company's business segments, notable differences exist in products, application and distribution of products, and customer base.

Products produced within the Flexible Packaging business segment service packaging applications for markets such as food, medical devices, personal care, agribusiness, chemicals, pet food, and consumer products. Products produced within the Pressure Sensitive Materials business segment include film, paper, and metalized plastic film printing stocks used for primary package labeling, promotional decoration, bar code inventory control labels, and laser printing for administrative office and promotional applications. This segment also includes micro-thin film adhesives used in delicate electronic parts assembly and graphic films for decorative signage.

A summary of the Company's business activities reported by its two business segments follows:

BUSINESS SEGMENTS (in millions)	2011		2010		2009	
Net Sales to Unaffiliated Customers:						
Flexible Packaging	\$	4,750.6	\$	4,273.7	\$	2,986.2

ITEM 9 CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A CONTROLS AND PROCEDURES

(a) Management's Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

The Company's management, under the direction, supervision, and involvement of the Chief Executive Officer and the Chief Financial Officer, has carried out an evaluation, as of the end of the period covered by this report, of the effectiveness of the design and operation of the disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) of the Company. Based on this evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that disclosure controls and procedures in place at the Company are effective to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified by the Securities and Exchange Commission's rules and forms and is accumulated and communicated to our management, including the Chief Executive Officer and the Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) Management's Report on Internal Control Over Financial Reporting

The management of Bemis Company, Inc. is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Under the direction, supervision, and participation of the Chief Executive Officer and the Chief Financial Officer, the Company's management conducted an evaluation of the effectiveness of internal control over financial reporting based on the framework in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO-Framework). Based on the results of this evaluation, management has concluded that internal control over financial reporting was effective as of December 31, 2011.

The effectiveness of our internal control over financial reporting as of December 31, 2011, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report, which appears on page 21 of this Form 10-K.

(c) Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting during the most recent fiscal quarter that have materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B OTHER INFORMATION

None.

Pursuant to the rules and regulations of the Securities and Exchange Commission (SEC), we have filed certain agreements as exhibits to this Annual Report on Form 10-K. These agreements may contain representations and warranties by the parties thereto. These representations and warranties have been made solely for the benefit of the other party or parties to such agreements and (i) may have been qualified by disclosures made to such other party or parties, (ii) were made only as of the date of such agreements or such other date(s) as may be specified in such agreements and are subject to more recent developments, which may not be fully reflected in our public disclosure, (iii) may reflect the allocation of risk among the parties to such agreements and (iv) may apply materiality standards different from what may be viewed as material to investors. Accordingly, these representations and warranties may not describe our actual state of affairs at the date hereof and should not be relied upon.

Exhibit	Description	Form of Filing

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON FINANCIAL STATEMENT SCHEDULE

To the Board of Directors and Shareholders of Bemis Company, Inc.:

Our audits of the consolidated financial statements and of the effectiveness of internal control over financial reporting referred to in our report dated February 29, 2012 appearing in Item 8 of this Form 10-K also included an audit of the financial statement schedule listed in Item 15(a)(2) of this Form 10-K. In our opinion, this financial statement schedule presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements.
