(1) The Re-opening Spread is a comparable and shows the basis point difference between the yield on the Notes and the yield on the specified Government of Canada (GoC) benchmark bond(s) of similar maturity. Comparables means information that compares an issuer to other issuers. The Re-opening Spread is the customary method for benchmarking yields on Canadian investment grade debt instruments issued in Canada. Information about the GoC benchmark bond(s) of similar maturity (including the yield) was obtained from public sources and has not been verified by the Company or any of the Agents. Numerous factors affect the value of an investment in the Notes other than the Re-opening Spread. If the information concerning the GoC benchmark bond(s) (including the yield) used in calculating the Re-opening Spread contains a misrepresentation, investors do not have a remedy under securities legislation in any province of Canada. Investors are cautioned to not put undue reliance on the Re-opening Spread in making an investment decision.
