Oil find in block BC-60 in Espírito Santo

(Rio de Janeiro, May 14, 2003). PETROLEO BRASILEIRO S.A. Petrobras, (BOVESPA: PETR3 / PETR4, NYSE: PBR / PBRA, LATIBEX: XPBR / XPBRA), Brazil's largest oil and gas, petrochemicals and energy company, announces that today it concluded the drilling of the wildcat well 1-ESS-121, located in exploratory block BC-60, approximately 84 kilometers off-shore from the state of Espírito Santo. This well, situated in a water depth of 1,330 meters, struck a new accumulation of oil having drilled through several oil reservoirs totaling about 105 meters of porous thickness. Initial surveys indicate reserves of approximately 600 million barrels for the principal reservoirs.

1-ESS-121 was drilled 10 kilometers south of the Jubarte field, which was discovered and the area delimited by Petrobras at the end of 2002.

The productivity of the reservoirs is expected to be evaluated in the near future as part of the evaluation plan to be sent to the ANP (the National Petroleum Agency).

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
