## GLAMIS GOLD, LTD.

### Second Quarter 2002 Report

For the three months ended June 30, 2002

#### Message to Shareholders

Glamis enjoyed another strong quarter both in terms of earnings and production. However, the major highlight clearly was the completion of the merger between our company and Francisco Gold Corp. We believe that this merger, which received overwhelming approval by Francisco shareholders, will provide substantial benefits to our shareholders. For Glamis, the two key components of the transaction are the El Sauzal gold development project in Chihuahua State, Mexico and the Marlin advanced gold/silver exploration property in Guatemala. The El Sauzal deposit contains proven and probable oxide reserves of 2.0 million ounces of gold and the Marlin property represents enormous potential, including the known resource of 1.4 million gold equivalent ounces. We believe both projects offer considerable potential value to Glamis and its shareholders and each is expected to contribute substantially to our growth strategy.

Our operating mines continue to perform well. Gold production of 63,929 ounces for the quarter was almost 25 percent higher than in the second quarter of 2001. Of equal importance, total cash costs declined by nearly six percent to \$161 per ounce. We are particularly pleased with the performance of our San Martin mine in Honduras where productivity continues to improve and ore grades over the past two years have exceeded projections by approximately nine percent. Our Marigold Mine in Nevada is also performing well. We are currently shifting much of the emphasis at Marigold to the Millennium expansion project where we are phasing in larger, more efficient mining equipment to complete the pre-stripping program and substantially increase production over the next three years. Once mining operations are completed at Rand mine at year-end, we also plan to move the large mining fleet to Marigold mine. It is a tribute to our employees that Glamis continues to operate efficiently, profitably and safely at each of its mine sites.

Glamis is foremost a growth company that has consistently demonstrated its capacity to successfully bring development projects into production on time and within budget. Presently, we have two major development projects underway, the Millennium expansion in Nevada and the El Sauzal property in Mexico. At the Millennium expansion project, in-fill and condemnation drilling is underway in addition to pre-stripping and permitting. Once completed, Glamis' share of production from the Marigold/Millennium joint venture is projected to increase from an estimated 55,000 ounces of gold in 2002 to approximately 120,000 ounces of gold annually. We would also like to acquire the other one-third of the mine from our partner, Barrick Gold Corp., and are pursuing discussions in that regard. At the El Sauzal property in Chihuahua State, Mexico, the company is currently concentrating its efforts on site-plan optimization, process simplification and completion of the permitting process. Initial production is scheduled for the first quarter of 2005 at an annual production rate of 170,000 ounces of gold per year and a projected total cash cost of \$114 per ounce.

Exploration is also a key component of our growth strategy. At present, our programs are focused mainly on areas around existing operations and our promising Marlin and Cerro Blanco gold properties in Guatemala. Results from the initial phase of drilling at Cerro Blanco are currently being analyzed and a comprehensive \$3.0 million program at Marlin started in mid-June. We are doing some in-fill drilling at Marlin but the program is mainly designed to expand the previously calculated 1.4 million-ounce resource.

The company remains unhedged and debt-free, and our existing operations are strong cash flow generators. As of June 30, 2002 cash and cash equivalents amounted to \$45 million and working capital stood at \$57 million. Glamis' excellent financial position continues to provide us with a substantial competitive advantage in achieving our longer-term strategic goal of producing 500,000 ounces of gold annually at a total cash cost of less than \$150 per ounce.

Sincerely,

C. Kevin McArthur, President & CEO

new deposits, the Company's hedging practices, permitting time lines, and the timing and possible outcome of pending litigation involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others, the actual results of current exploration activities, actual results of current reclamation activities, conclusions of economic evaluations, changes in project parameters as plans continue to be refined, future prices of gold, as well as those factors discussed in the section entitled "Other Considerations" in the Company's Annual Information Form. Although the Company has attempted to identify important factors that could cause actual results to differ materially, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.

## Glamis Gold Ltd.

**Notes to Unaudited Interim Consolidated Financial Statements**  
**(tables expressed in thousands of United States dollars)**  
**Six months ended June 30, 2002**

**1. General**

In the opinion of management, the accompanying unaudited consolidated balance sheet and unaudited consolidated statements of earnings, deficit and cash flows contain all adjustments, consisting only of normal recurring accruals, necessary to present fairly, in all material respects, the financial position of Glamis Gold Ltd. (the Company) as of June 30, 2002 and the results of its operations and its cash flows for the three month and the six month periods ended June 30, 2002 and 2001.

These unaudited interim consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements and related footnotes included in the Company's annual report to shareholders for the year ended December 31, 2001. Certain of the comparative figures have been reclassified to conform to the current period's presentation.

The financial statements are prepared using the same accounting policies and methods of application as those disclosed in note 2 to the Company's consolidated financial statements for the year ended December 31, 2001, except as disclosed in note 3(b). These statements have been prepared in accordance with accounting principles generally accepted in Canada which conform, in all material respects, to accounting principles generally accepted in the United States. All amounts are stated in U.S. dollars unless otherwise specified.

**2. Inventories**

	June 30, 2002	December 31, 2001
Finished goods	\$ 1,677	\$ 1,626
Work-in-progress	10,541	9,193
Supplies and spare parts	2,538	1,906
	<b>\$ 14,756</b>	<b>\$ 12,725</b>

**3. Share Capital**

(a) Issued and fully paid

	Six months ended		June 30, 2001	
	June 30, 2002		June 30, 2001	
	# of Shares	Amount	# of Shares	Amount
Balance at beginning of period	83,283,462	\$ 194,793	70,097,382	\$ 159,045
Issued during the period:				
For cash consideration under the terms of Directors and Employees stock option plan (including former employees and directors of Rayrock Resources Inc.)	1,359,145	4,128	1,177,980	1,670
For cash consideration on exercise of share purchase warrants issued in conjunction with the acquisition of Cambior de Mexico	120,000	240

## Edgar Filing: GLAMIS GOLD LTD - Form 6-K

### (b) Stock-Based Compensation

Effective January 1, 2002, the Company adopted the CICA's new handbook section 3870, Stock-Based Compensation and Other Stock-Based Payments. Under the new standard, stock based payments to non-employees, and employee awards that are direct awards of stock, call for settlement in cash or other assets, or are stock appreciation rights that call for settlement by the issuance of equity instruments, granted on or after January 1, 2002, are accounted for using the fair value based method. No compensation cost is recorded for all other stock-based employee compensation awards. Consideration paid by employees on the exercise of stock options is recorded as share capital and contributed surplus. The Company discloses the pro forma effect of accounting for these awards under the fair value based method. The adoption of this new standard has resulted in no changes to amounts previously reported.

The Company uses the intrinsic value method of accounting for share options granted to directors, officers and employees. If the fair value method had been used to determine compensation cost for share options granted to directors, officers and employees, the Company's net earnings and earnings per share would have been as follows:

	As reported	Fair value of options granted	Pro forma
<u>Three months ended June 30, 2002</u>			
Net earnings	\$ 3,430	\$ 189	\$ 3,241
Basic earnings per common share	0.04		0.04
Diluted earnings per common share	0.04		0.04
<u>Six months ended June 30, 2002</u>			
Net earnings	\$ 6,596	\$ 819	\$ 5,777
Basic earnings per common share	0.08		0.07
Diluted earnings per common share	0.08		0.07

The fair value of share options was estimated using the Black-Scholes option pricing model with the following assumptions:

	Three months ended <u>June 30, 2002</u>	Six months ended <u>June 30, 2002</u>
Risk-free interest rate	3.75%	4.3%
Annual dividends		
Expected stock price volatility	50%	50%
Expected life	2.5 years	2.5 years

**5. Acquisition of Francisco Gold Corp.**

On March 6, 2002, the Company and Francisco Gold Corp. ( Francisco ) a Canadian public company, announced a transaction whereby the Company would acquire all of the issued and outstanding shares of Francisco pursuant to a plan of arrangement. Francisco's principal assets are the El Sauzal gold project in Chihuahua, Mexico and the Marlin gold project in Guatemala. The transaction was approved by Francisco shareholders on June 12, 2002 and closed effective July 16, 2002.

Under the plan of arrangement, each issued Francisco share was exchanged for 1.55 common shares of the Company and one share in Chesapeake Gold Corp. ( Chesapeake ), a new exploration company formed by Francisco. In addition, Francisco transferred to Chesapeake cash of Cdn.\$1.50 per share for each issued share of Francisco (Cdn. \$25.0 million), certain early stage Nicaraguan exploration assets and a two percent net smelter return royalty on Francisco's Guatemalan projects outside the Marlin project area. The Company retains a right to acquire a 5% stake in Chesapeake through a three year share purchase warrant.

The Company issued 25.8 million common shares under the terms of the plan of arrangement such that at closing of the transaction, the Company had 110.6 million common shares outstanding. The Company will account for this acquisition using the purchase method. The pro forma balance sheet of the Company as of June 30, 2002, giving effect to the acquisition as if it had completed on June 30, 2002, is shown as follows:

Glamis Gold Ltd.

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The Company reported earnings for the three months ended June 30, 2002 of \$3.4 million (\$0.04 per share) compared to earnings of \$1.0 million (\$0.01 per share) in the same period of 2001. Earnings for the first six months of 2002 were \$6.6 million (\$0.08 per share) compared to earnings of \$1.4 million (\$0.02 per share) in the first six months of 2001. The improvement comes primarily from a 22% increase in gold ounces sold as well as a 15% increase in the realized price of gold.

The Company continued its solid performance during the second quarter of 2002 as total cash costs of production declined to \$161 per ounce of gold compared to \$171 per ounce in the same period of 2001. The Company's total cash cost of production for the first six months of 2002 declined to \$156 per ounce compared to \$173 per ounce for the six months ended June 30, 2001. The Company produced 24% more ounces of gold in the second quarter of 2002, than in 2001 and 25% more ounces of gold in the six months ended June 30, 2002, compared to the six months ended June 30, 2001. Both the Rand Mine and the San Martin Mine posted healthy increases in production and lower total costs in the second quarter of 2002 compared to the second quarter of 2001.

The Company's improved earnings were also positively impacted by gold prices that averaged \$312 during the three months ended June 30, 2002, and \$304 for the six months ended June 30, 2002 compared to \$268 and \$266 respectively during the same periods in 2001. Revenue per ounce of gold increased to \$313 during the three months ended June 30, 2002 and \$304 for the six months ended June 30, 2002 from \$273 and \$268 respectively during the same periods of 2001.

Depreciation and depletion expense was higher both for the comparative quarters and year-to-date. This was not only a result of increased production, but included the effect of the large capital expenditures related to the Millennium expansion at the Marigold Mine on the depreciation and depletion cost per ounce. Exploration expense was lower for the quarter and year-to-date due primarily to timing of the drill programs. The Millennium in-fill drilling to date in 2002 has been capitalized, and the non-capitalized exploration planned to be done at Marigold and the newly-acquired Francisco properties is scheduled for the third and fourth quarters. General and administrative expense remained comparable to the first quarter with small increases in the second quarter of 2002 coming from realignments to staffing in anticipation of the Francisco acquisition. Interest and other income was substantially lower in the second quarter of 2002 than in 2001. In the three months ended June 30, 2002, the Company had a loss on the sale of assets of \$0.3 million and interest income of \$0.2 million. In the same period in 2001, the Company realized income of \$0.6 million from interest and other income related to several amended tax returns dating from 1992-1995. For the six-month period, interest and other income declined to \$0.3 million in 2002 compared to \$0.9 million in 2001, for the reasons stated above.

### Liquidity and Capital Resources

The Company had working capital of \$57.0 million at June 30, 2002, a slight increase over the \$55.4 million at December 31, 2001. Long term liabilities were \$20.2 million at June 30, 2002, the same as at March 31, 2002 and up slightly from the \$19.8 million at December 31, 2001. This amount consists of reserves for future reclamation costs of \$9.8 million (\$10.4 million at December 31, 2001) and future income taxes of \$10.4 million (\$9.4 million at December 31, 2001). The overall reduction in the reclamation liability reflects the work done at the Dee, Daisy and Picacho Mines. The future income tax increase is primarily due to the book earnings generated at the San Martin Mine. The Company continues to have no long-term debt.

The Company invests cash balances in short-term investments that are subject to interest rate fluctuations. Because these investments are in highly liquid, short-term instruments, any impact of an interest rate change would not be material.

Capital expenditures totaled \$9.3 million for the second quarter of 2002, and \$17.4 million year-to-date. This compares to \$5.3 million in the second quarter of 2001, and \$10.8 million for the six months ending June 30, 2001. Significant capital investments this quarter included \$7.4 million in expenditures at the Marigold Mine: \$5.7 million for a new shovel and a drill, and \$1.7 million in mine development costs. The San Martin Mine expended \$1.3 million (primarily on leach pad expansion) in the quarter and \$2.8 million

year-to-date. All capital expenditures to date in 2002 have been financed from the Company's working capital.

The Company had cash flow from operations before working capital adjustments and reclamation expenditures of \$8.9 million during the second quarter of 2002, comparing favorably with the \$3.4 million generated in the second quarter of 2001. The Company's mining operations provided \$10.1 million in cash during the second quarter of 2002 compared to \$5.3 million during the second quarter of 2001. Significantly increased production from both the San Martin Mine and the Rand Mine increased the positive increase in cash by \$2.2 million for the quarter, while improved gold prices were responsible for \$2.6 million of the increase. The cash flow from operations before working capital adjustments and reclamation expenditures was \$16.6 million for the six months ended June 30, 2002 as compared to \$7.3 million for the same period in 2001. Of the \$9.3 million increase, \$4.6 million was due to a stronger gold price and \$3.7 million to production improvements. The Company also realized \$1.4 million from the exercise of stock options and share purchase warrants during the second quarter of 2002 (\$0.9 million in 2001), primarily from former officers and employees of Rayrock Resources Inc. (acquired by the Company in March 1999). A total of \$4.4 million was received on exercise of these options and warrants year-to-date (\$1.7 million year-to-date in 2001).

For a discussion of the Francisco Gold acquisition, see note 5 to the interim consolidated financial statements.

## **OPERATIONS REVIEW**

### **Rand Mine, California**

The Rand Mine produced 19,189 ounces of gold during the second quarter 2002 bringing total production to 37,939 ounces for the six-month period ending June 30, 2002. This compares to 13,579 ounces produced for the quarter and 27,480 ounces year to date for the comparable periods in 2001. Total cash costs of production have improved slightly on both a quarterly (from \$233 per ounce of gold to \$228 per ounce) and year-to-date (from \$231 per ounce to \$230 per ounce) comparative basis. Management continues to expect the mine produce in excess of 70,000 ounces of gold this year.

### **San Martin Mine, Honduras**

During the second quarter of 2002, the San Martin Mine produced 33,772 ounces of gold, bringing the total production for the year to date to 65,133 ounces of gold. During 2001, 19,911 ounces of gold were produced in the second quarter and 42,302 ounces of gold for the six months ending June 30, 2001. Total cash costs of production for the second quarter of 2002 were \$112 per ounce of gold (\$150 during the second quarter of 2001). The 2002 year-to-date average is \$100 per ounce, comparing favorably with the six-month average cash costs of \$135 per ounce recorded in 2001. The mine continues to be on plan and is expected to produce approximately 125,000 ounces of gold in 2002.

### **Marigold Mine, Nevada**

The 66.7%-owned Marigold Mine produced 10,968 ounces of gold for the Company's account during the second quarter of 2002 (17,879 ounces of gold during the second quarter of 2001) at total cash costs of \$197 per ounce of gold (compared to \$146 per ounce in the same period during 2001). The mine is on plan for production for the Company's account of 55,000 ounces of gold during 2002, as the Millennium expansion, which is expected to increase production to an average of approximately 120,000 ounces of gold per year, is proceeding as planned.

## **PROJECTS**

### **Cerro San Pedro Project, San Luis Potosi, Mexico**

Work continued on the Cerro San Pedro Project during the quarter. Fencing around old mine workings in the area was completed and access has been closed. Discussions with the government regarding archaeological and historical issues are proceeding.

**Imperial Project, California**

In connection with the recommenced permitting process for the Imperial Project, the BLM undertook a validity examination of the unpatented mining claims comprising the project. The examination was completed by a mineral examiner employed by the BLM. His work has been submitted to the BLM Certification Panel for review and claim validity determination. The Company currently expects the BLM to release a decision on the validity examination by the end of the third quarter 2002.

**EXPLORATION**

The Company incurred \$0.3 million in exploration expenses during the second quarter of 2002 (\$0.6 million for the six months ended June 30, 2002). Drilling continued in the North and West Palo Alto zones on the San Martin property. Drilling is budgeted to continue for the balance of the year.

In Guatemala, drilling at Cerro Blanco started up during the second quarter. A 5,000 meter reverse circulation and core drill program is planned. Results are expected late in the third quarter of 2002.

**RECLAMATION ACTIVITIES**

**Dee Mine, Nevada**

During the second quarter of 2002, Dee Mine personnel continued to concentrate on dismantling and removing drain lines and other equipment. Placement of a cap on the central area of tailings facility #1 continued, and a drainage channel at tailings facility #2 was completed. Major earthwork is expected to be completed in 2003.

**Daisy Mine, Nevada**

The Mother Lode shop building was dismantled and removed during the second quarter and crews began cleaning scale sludge from the pregnant pond during the last week of June. Site closure and reclamation work at the Daisy Mine is expected to be complete by the end of 2002.

**Picacho Mine, California**

All reclamation and closure activities were completed during the first quarter of 2002. The lease was terminated and the property was returned to the owner on March 28, 2002.

**HEDGING**

As at June 30, 2002, the Company had no ounces hedged, and currently has no plans to engage in hedging activities. The Company is subject to changes in metals prices that can directly impact its profitability and cash flows. Because the markets in which the Company sells its products set prices outside of the Company's control, in appropriate circumstances, it is possible to reduce the impact of negative price movements through hedging transactions. These hedging transactions utilize so-called derivatives, the value of which is derived from movements in the prices or rates associated with the underlying product. The Company's hedging policies give management discretion to protect future cash flows by the use of forward contracts, spot deferred contracts, and options, in any combination.

**CERTIFICATIONS PURSUANT TO  
18 U.S.C. SECTION 1350  
AS ADOPTED PURSUANT TO  
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the quarterly report of Glamis Gold Ltd. ( Glamis ), a Canadian company and foreign private issuer under the multi-jurisdictional disclosure system, on Form 6-K for the period ended June 30, 2002, as furnished to the Securities and Exchange Commission on the date hereof (the Report ), I, C. Kevin McArthur, Chief Executive Officer of Glamis, do hereby certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Dated: August 21, 2002
